

FORECASTS—North and east winds. Fine Wednesday—Easterly winds cooler unsettled and showery.

THE EVENING JOURNAL

ESTABLISHED 1859

ST. CATHARINES, ONTARIO TUESDAY, JUNE 10, 1919

PRICE—TWO CENTS.

TWO HUNDRED DELEGATES WILL VISIT THIS CITY

Expected That Technical Section of Pulp and Paper Manufacturers Will Motor Down From Thorold.

MAYOR PROPOSES RECEPTION.

Although it was not known until today for certain that the two hundred delegates comprising part of the technical association of the Pulp and Paper industries of the United States...

Up to the present time the arrangements have been entirely in the hands of the Thorold Board of Trade which is planning quite an extensive reception.

It is planned to meet the delegation at the New York Central station Niagara Falls, N.Y., with sufficient motors to accommodate the crowd...

The strawberry season will be at its height between the 20th and 25th of June. Camps have been opened at Vineland, Grimsey and at Burlington where they desire to place 90 girls...

A big shortage of help is also reported in the factory department. Out of 166 orders filed by employers...

WELLAND, June 10.—Working on a concrete standard along high tension wires, Joseph Connolly, of this city...

DETROIT, June 10.—Thousands of workers walked to their places of employment yesterday, but tens of thousands rode in automobiles, trucks and trailers.

DETROIT GOING TO FIGHT. Detroit, June 10.—Thousands of workers walked to their places of employment yesterday...

HUGE CROWDS GO TO SEE THE CIRCUS. The Sparks Brothers circus which was held on Monday afternoon and evening was well attended.

GIVES UP HOUSING PLAN. Ingersoll Abandons Scheme Owing to the General Unrest.

INGERSOLL, June 10.—Because of the general unrest the Ingersoll Housing Commission has abandoned the project to build 50 houses...

NO EXCITEMENT OVER CHANCE FOR CHEAP FISH

Promised Eagerness of People to Save Money by Buying Government Goods did not Materialize.

SKEPTICAL OVER QUALITY

Although there was a strong demand made at the first of this year principally from the Trades and Labor Council that Ontario Government fish should be placed on sale in this city...

Members of Olympic Planning for big Outing in Near Future. A special meeting of Olympic Sanatorium O. O. H. and P. was held last night when a general discussion took place regarding the holding of the first annual picnic.

Change the Date. It was also thought wise to change the date of the local picnic owing to the fact that the Oddfellows from Welland and Port Colborne are picnicking at Crystal Beach on Dominion Day.

URGENT REJECTION OF THE GERMAN COUNTER PLANS. PARIS, June 10.—The Peace conference commissions on colonies, prisoners of war, responsibilities and the labor, military and naval clauses of the treaty in their reports to the Council of Four.

THE WEATHER. The barometer is quite high over the eastern half of the continent from the great lakes and Mississippi to the Atlantic white to the westward it is low.

THE WEATHER. The barometer is quite high over the eastern half of the continent from the great lakes and Mississippi to the Atlantic white to the westward it is low.

BOMB FOUND. PHILADELPHIA, June 10.—Police are today investigating the finding of another supposed bomb in the north eastern section of Philadelphia yesterday.

NO BRIGHT ON THE ONTARIO BERRIES. Strawberry growers in Ontario are more fortunate than the growers in the adjoining Province of Quebec.

EDITOR OF "RED FLAG" SHOT BY GOVERNMENT AT BERLIN. BERLIN, June 10.—Herr Levine, editor of the Red Flag of Munich, and one of the leaders in the Communist uprising in Bavaria...

PARIS, June 10.—Gaston Quien, a Socialist, who is believed to have entered German service as a spy and to have played a prominent part in the betrayal of Nuree Cavell, will be tried next month.

GERMAN SUB SOON TO PASS UP CANAL ON WAY TO CHICAGO

A former German submarine manned by a crew from the U. S. Navy and in charge of Lieut. Lockwood U.S.N. is expected to arrive in Toronto about 4 o'clock this afternoon from Rochester. It will be escorted by a U. S. tug.

OTTAWA, June 10.—The amendment to the budget moved by A. R. Master yesterday afternoon reads as follows: That all the words after the word "list" be left out and the following inserted instead thereof.

That to relieve the present situation, the tariff should be so framed as to free the food of the people and the machinery used in the development of the natural resources of Canada...

That to take off or substantially reduce, as specifically as may be expedient and just to all interested, the duties upon all other necessities of life.

Also the reciprocal offer of trade with the United States should be accepted, and a general downward revision of the tariff undertaken forthwith in conformity with the principles herein enunciated.

SAYS MAXIMUM RENT LAW HAS FAILED TO END PROFITEERING. Thomas Adams, Canadian Housing Expert, Claims Building is Only Solution.

NEW YORK, June 10.—Establishment of minimum rents by law will not aid in preventing profiteering among landlords, according to Thomas Adams, housing expert of the Canadian government...

NEW YORK, June 10.—A report that investigators in Bessemer, Pa., had learned from a woman informed details of the bomb plot which started the nation with a series of explosions early last week was laid today before William J. Flynn, government agent in charge of the anarchist hunt.

It was learned that Flynn was considering the report. It was not known what action, if any, he would take to confirm the story.

The report was that detectives in Bessemer learned the bombs were made there, of iron piping and dynamite, stolen from plants nearby, and that a gang of L.W.W. met there on May 27 and departed with the bombs in suitcases.

MEXICAN GOVERNMENT WITHDRAWS DELEGATES. MEXICO CITY, June 10.—The Mexican government has ordered the withdrawal of the Mexican delegates from the Pan-American commercial congress as a protest against the speed recently made before the American congress by Speaker Gilllett of the house of representatives.

FUNERAL OF ADA GROCE. The funeral of the late Ada Groce took place on Saturday from her late home, 29 Simcoe St., at 1:30 p.m. The burial was at Victoria Lawn Cemetery where Rev. H. L. Roberts of Lundy's Lane Methodist church officiated.

ARRIVE BACK HOME. Several more St. Catharines men arrived in the city yesterday afternoon and were given a hearty welcome at the Station.

It's reported that the peace treaty is undergoing repairs. Particular attention should be given to its bulk or it may spring another leak.

BRIDGEBURGER FINED. BRIDGEBURG, June 10.—It cost R. W. Blyley of Buffalo, a summer resorter living on the Canadian shore \$150 in the Police Court here on a charge of attempting to bring a stolen automobile into Canada via the Fort Erie ferry from Buffalo...

BRIDGEBURGER FINED. BRIDGEBURG, June 10.—It cost R. W. Blyley of Buffalo, a summer resorter living on the Canadian shore \$150 in the Police Court here on a charge of attempting to bring a stolen automobile into Canada via the Fort Erie ferry from Buffalo...

BRIDGEBURGER FINED. BRIDGEBURG, June 10.—It cost R. W. Blyley of Buffalo, a summer resorter living on the Canadian shore \$150 in the Police Court here on a charge of attempting to bring a stolen automobile into Canada via the Fort Erie ferry from Buffalo...

AMENDMENTS TO BUDGET PLACED BEFORE HOUSE

Criticism of the Opposition and Counter Proposals are Tabled by Mr. A. R. McMaster.

OTTAWA, June 10.—The amendment to the budget moved by A. R. Master yesterday afternoon reads as follows: That all the words after the word "list" be left out and the following inserted instead thereof.

That to relieve the present situation, the tariff should be so framed as to free the food of the people and the machinery used in the development of the natural resources of Canada...

That to take off or substantially reduce, as specifically as may be expedient and just to all interested, the duties upon all other necessities of life.

Also the reciprocal offer of trade with the United States should be accepted, and a general downward revision of the tariff undertaken forthwith in conformity with the principles herein enunciated.

GOING TO PICK THE COLORS OUT OF THE FOOLISH RAINBOW

CLEARING HOUSE EDICT HURTS CAN. ADA CREDIT

TORONTO, June 10th.—A prominent business house in Toronto has received the following advice from the manager of its Chicago branch:

Chicago Clearing House has just made a ruling that on account of the strike situation in Canada it will not accept Canadian cheques except for collection. My object in writing you is to ask if you will, in sending in your commission cheques, send a New York or Chicago draft. Otherwise I shall not get credit in my bank for at least ten days after your cheque is deposited.

BODY FOUND IN CANAL. THREE LIMBS MISSING. WELLAND, June 10.—The lifeless body of an unknown man was found floating on the surface of the canal about a mile below the canal bridge at Welland.

The discovery was made that both legs had been cut off, also one arm. Close investigation disclosed what apparently is a gunshot wound through the left breast. The body appeared to have been in the water for some time. It is generally thought that the arms and legs being missing is due to their coming in contact with the propeller of a boat or boats. Foul play is suspected in the gun wound. Dr. Colbeck was called, but an inquest was found unnecessary.

SEVERAL GENERALS ARE KNIGHTED BY KING. LONDON, June 10.—The following Generals have been knighted: Knight Commander of the Bath, Major-General Loomis.

Knight Commanders of St. Michael and St. George—Major Generals Morrison and Burgess. At the investiture at Buckingham Palace Saturday the following honours were awarded: Distinguished Service Order—Major Norman MacAulay, Artillery; Henry Willis O'Connor, Infantry; Military Cross and Bar—Major J. Hamilton, Infantry; Red Cross, Sister Lila Carr Hanrahan.

ARSON TRIAL IS OPENED. President of New York Creamery Charged With Instigation. AUBURN, June 10.—Jacob Smith of New York, president of the Smith Bros. creamery at Cato, which was burned down a few months ago, was placed on trial here yesterday on a charge of arson. Smith is charged with being the man higher up who instigated several former convicts to burn the place.

The case attracted unusual notice owing to the fact that the alleged arson grew out of the milk war in New York and was revealed by Assistant Dooling of New York. The entire day was taken up in selecting a jury.

BRIDGEBURGER FINED. BRIDGEBURG, June 10.—It cost R. W. Blyley of Buffalo, a summer resorter living on the Canadian shore \$150 in the Police Court here on a charge of attempting to bring a stolen automobile into Canada via the Fort Erie ferry from Buffalo...

High Potentate and Village Jester Will Join the Caravan on its way to Niagara Falls To-morrow Where Numerous Spectacular Events Have Been Staged for the Honor and Glory of Good Fellowship.

BY GIVEN THIRTY-THIRD READING.

If the clock on the County Buildings fails to make its hands go round tomorrow and the curfew doesn't toll at 9 p.m. there will be good reason. The whole government of the corporation of the city of St. Catharines from the high potentate down to the town jester will be away on a holiday picking rainbows from the spray.

The necessary bylaws and resolutions have been duly passed authorizing the citizens to abstain from pouring money into the city treasurer for one day. The Count has given legal opinion that anyone who doesn't pay his taxes on Wednesday will not have to pay less on Thursday. With this advice of Mr. Cummings, City Clerk Fay has attached the civic seal to the opinion and Assistant Clerk McBride will duly file it away in the safe under serial number 6,754,394B, which means that it will not permit of any appeal except at heavy cost.

When requested by any analytical aldermanic mind of the future it will be gravely produced and read from the throne to prove that Alderman Smith's trip to New York has nothing on this voyage to the Falls. All of which means that the City Fathers, City Mothers, City administrators and City Mothers have all gone to the banks of the blue Niagara to study the problem as to why water never will run uphill.

Authoritative Advice.

According to the latest advice from Doc Bonham's museum of the twentieth century germs, Wednesday June 11th, 1919, is to be put under a physical test of two hundred pounds to the square inch from 1 a.m. to 10 p.m. and then it will be picked away among the memories of his modern laboratory. Anyone breaking the seal will be brought before the Board of Health and the Medical Officer, Dr. Currey, will administer an effective anesthetic.

It is also announced that Alderman Hill went over the steel arch bridge on Sunday last to ascertain if the United States authorities would exact any customs duty on baseballs that Ald. Westwood knocked over the river during the championship game. This member for St. Andrews has found up a powerful lot of players who intend to challenge Ty Cobb or even Brantford before the week is over. Ald. Dakers is no sacre saint but Westy will be see muscle strong but Ald. Smith declares "there's nuthin to it". The President of the United States himself would come to see the sport if he didn't have a golf match on in Washington, D. C.

Out With a Wager.

Ald. Nash says he is going to make a careful survey of Victoria Park but he will wager a pony horse that he has nothing on St. Kitts rose garden. In fact if a little more money had been put in the estimates there might be blue, brown and gray roses blooming now. To which Ald. Riffer replies that he will bet Ald. Nash any day that a Reo six can beat his Ford by half an hour easily in twice around St. Patrick's Ward. Ald. Eagle as Minister of Finance is ready to hold the money for he knows something, too, about motoring, especially between Lewiston and the Falls.

A Real Humdinger.

A more important feature of the holiday, however, will be the spectacle of seeing Ald. McDowell smoke four cigars in thirty minutes while Ald. Stose reads a treatise on the need of conservation. This is looked forward to as one of the real treats of the day for the Mayor has promised to suspend all rules and to throw Bourinot and his wisdom into the whirlpool, to feed the ignorant fishes.

One of the happy events of the day will be the sight of a hand stunk of Treasurer Watt who will give an exhibition of how to toss figures into the air and have them land on the ground as gold dollars. Mr. J. Williams is going to collect the crowd around by explaining to the people that if they could only think so there is no more glorious way in the world of parting with money than by leaving it on deposit with the tax collector. He in turn will be supported by Assessor Young who can raise four million pounds with one arm and think

(Continued on page 6)

tain," at right Chief

only eight soldiers were lost by action. The "Empress of" now in Liverpool, will take to Australia and then return regular route across the Pacific to recover to port in the east "Empress of Asia" will go back over through the Panama with Canadian troops enlisted in Columbia.

Edward Philip, O.B.E., Chief of the "Empress of Britain" for Chief Engineer of the Pacific Ocean Services, Ltd., on the Empress throughout and has never missed a trip, personally decorated by King for his services and is an of the Order of the British Empire. LABOR SHOULD REPUDIATE BOLSHEVISTS

Moderate minded, well balanced labor leaders can, surely, have little criticism to offer of the action taken a few days ago by Parliament in passing legislation to arrest, imprison and deport Bolshevists and other agitators of a dangerous type.

The demands of organized labor are sometimes far removed from what employers conceive to be just and fair, but taken as a body of men all over the country, the intelligent labor men are as good and as law-abiding citizens as their neighbors.

It is, of course, a result of general circumstances that in an almost world wide movement of improved social conditions thousands of cool-headed, head-working and lawful men are caught in a maelstrom and carried along by the momentum of the vast organized body to which they belong, but we have enough conscience in humankind to believe that wrong usually falls and right mostly triumphs.

Further more, any group of employees who sign an agreement, or have some one sign it on their behalf, should respect the seriousness of their obligation. They should honor and observe the terms as they expect employers to keep them.

PEACE TERMS

German psychology has long been a byword for absurdity and perversity but they are of stunning severity. Nor can the fact that the Germans have for several months had abundant notice of what was awaiting them be regarded as sufficient reason for expecting them to view the fate that impends with serenity or resignation.

The men who can distinguish between the good and the bad in publicity (another name for advertising) and who has an attraction that will deliver the goods, yes, deliver even more than the circular, billboard and reader digests forth, and who has the courage to "hold on," is coming out upon one of the many highways that lead to success.

To watch the steady and fruitful results of well placed and well handled advertising is a fascinating game.

ARRIVED!!! NEW STOCK OF Bathing Caps Just Received All colors. All styles. Also Water Wings ABBS-McNAMARA Quality Druggists

ceived to be the spirit of the President's utterances in general. Right or wrong, it would surely be a harsh judge who would censure them for indulging in this expectation.

SOCIAL UNREST

A high British authority recently expressed his deliberate conviction that of the social unrest now prevalent throughout the world, eighty per cent must be ascribed to the fall in the purchasing power of money.

When the money unit falls in value—and the fall which we have been experiencing in the last few years is beyond all precedent—the adjustment which in the course of time restores normal relations is nowhere so slow as in a large section of what may be called the middle classes. In the case of the wage-earner there is a painful interval, but on the whole the time of his suffering from the dislocation of prices is not apt to be very long.

VALUE OF EFFECTIVE ADVERTISING TO CONCERT MANAGERS

Probably one of the greatest, if not the greatest things in modern business is advertising. Probably no other thing is so little understood or so often abused and misunderstood by managers of musical attractions, local and otherwise.

Among the managers of the great artists, artists with real, not alleged, box office drawing power, the value of advertising and its use is well understood. They believe in big advertising, in advertising on a large scale, and in keeping everlastingly at it.

Correct handling of types and type faces, the use of white space, or color, or design and proportion, of photographs and cuts are details of the business that count for more than most people realize.

Illustration of a man and a woman. Text: THERE WAS A YOUNG MAN NAMED HAROLD WHO TREATED HIS GIRL TO MUCH TARTARUM SHE SAID "MY DEAR, PLEASE BUY ME "THRIFT STAMPS" INSTEAD THEY'LL BE HANDY FOR MY MARRIAGE."

MOST EVERYONE USES THEM FOR THE STOMACH

They Act Quickly, and Make You Feel Lively as a Kid

A crowning curative triumph in medicine is now given to the world, and all who have been sufferers from stomach ailments, indigestion and headache can be cured by a purely vegetable remedy.

Calomel, salts and such like are no longer necessary. They are harsh and disagreeable. Science has devised something far superior, and you can go today with 25c to any druggist and buy a box of Dr. Hamilton's Pills which are considered the very quickest and safest cure for the stomach, bowels, liver and kidneys.

Half sick men and women, who scarcely know what ails them, will be given a new lease of life, with Dr. Hamilton's Pills. Depressed spirits disappear, headaches are forgotten, appetite increases, blood is purified and enriched, pains at the base of the spine are cured, the nerves are toned up, ambition to work is increased, and day by day the old-time health and vigor return.

WHAT EXCHANGES SAY JUST THE DIFFERENCE.

(Financial Post) In considering the relations of capital and labor, it may be worth noting that the great majority of capitalists have at some time been workers, but that few workers have ever been capitalists.

AN EDITOR'S CYNICISM (Toronto Star)

A correspondent of one of the papers pays a tribute to the high value of the dandelion as a salad. Another member of the great connoisseur class has a recollection of paying thirty-five cents at a hotel for a small plate of dandelion leaves described as a salad.

AN INADEQUATE PROBE. From the Montreal Herald.

An analysis of the special committee of the House of Commons proposed by Sir Thomas White to investigate high prices and undue profits discloses some very curious facts. With possibly two exceptions every member of it represents a rural constituency.

BOLSHEVIST SITUATION

WINNIPEG, June 10.—Harold Riley, Pres. of the Returned Soldier's Loyalist Association, announced that literature endorsing Russia, Bolsheviki principles and approving a Soviet Government plan for Winnipeg has been obtained by members of the association.

OVERHEAD EXPENSE

(From the Victoria Colonist) The British Government will spend \$32,500,000 on aerial service this year, which, in our humble opinion, is making the money fly.

REPAIRS TO ROADS SHOULD BE MADE WHEN NEEDED, AND NOT ONCE A YEAR AFTER CROPS ARE LAID BY.

Alexander McLeod and Richard Wilkie have both accepted positions on the local police force.

WINTER HOME FLOWERS

Brightening the Windows When Bloom is Most Welcome.

Financing and Grading Grain—How a Good Fanning Mill Properly Operated Will Greatly Increase the Yield of Field Crops—Every Farmer Should Have One. (Contributed by Ontario Department of Agriculture, Toronto.)

To insure a supply of flowers during early winter for the window it is necessary to have suitable plants started early in the fall. Among the best kinds for early winter flowering are a few of what are known by florists as Dutch bulbs.

White Roman Hyacinths are very satisfactory for early flowering. The colored Roman Hyacinths are not so good, and do not flower as early as the White Romans. The loose growing, richly perfumed flowers of the White Romans are very pretty and acceptable.

Chinese Sacred Lilies. Bulbs of these can be started in deep saucers or soup plates in October for early flowering. Set the bulbs firmly in the saucer and then fill the hole in the bottom of the flower pot.

Clearing and Grading Grain. These two farm operations may be accomplished at the same time and by the same means. The fanning mill is the most successful medium in obtaining this result and too much importance cannot be placed on the use of the machine.

IS IT A CONTRACT? Whether Doctor is Bound by Accepting Call is Before Courts.

TORONTO, June 10.—When a doctor receives and accepts a call in that a binding contract? This was an interesting point raised in the Appeal Court, Osgoode Hall, yesterday, when Dr. E. E. Macdonald, his solicitor, Gidson Grant, appeared from the judgment of Mr. Judge Denton and jury in the County Court, when \$500 damages was awarded to Charlotte Smith as a result of alleged non-attendance during her illness.

NATION-WIDE STRIKE Plans Made for Great Move of Telegraphers

CHICAGO, June 10.—After a conference with other union officials yesterday, S. J. Konekamp, international President of the Commercial Telegraphers, stated that final steps have been taken for the nation-wide strike of 70,000 telegraphers and telephone operators next Wednesday.

CITY OF ST. CATHARINES Taxes Year 1919

## GOOD PROGRESS MADE ON NEW PLANT

Good progress is being made on the construction of the new plant of the Imperial Oil Company at the corner of Carleton and Rodman streets which is being erected at a cost of about \$50,000. When finished the company will bring its products down by barge from Sarnia and will unload through 8 inch pipes that will lead from the canal to the big tanks at the plant.

## STAINLESS STEEL

It was an accident which led to the invention of stainless steel. A certain Sheffield expert was experimenting to find a means of preventing erosion or wearing away in gun tubes. After some experiments he noticed that certain pieces of steel had not suffered from corrosive influences under conditions which would have rusted ordinary steel. He followed up this clue, and stainless steel was thus evolved. This new metal, with a bright surface is able to resist the corroding effect of air, water, acids without staining. It was immediately commended by the Government for use in aeroplane construction and for purposes where strength and durability combined with rust-resisting qualities were invaluable. -Fit Bits.

## Handling Wool Co-operatively

(1) Grading Wool in Alberta.  
(2) Sheep on an Irrigated Farm in Alberta.

EIGHT years ago, after thoroughly investigating the sheep industry in Canada, the sheep commissioners regretfully stated: "From shearing to marketing no country in the world handles its wool in a worse manner than Canada. As far as the wool of mutton breeds and cross breeds go, we do not know of any country where it is handled in such an unsatisfactory way and delivered in such bad condition."

Having reached this conclusion, the commission intimated that the way was open to find a remedy had been found. This consisted of the organization of wool growers' associations throughout Canada, the direction of their efforts in producing good wool, and in classifying it. During 1914, the first year of the work, 205,123 pounds were graded for societies organized in Quebec, Ontario, Manitoba and Alberta. The following year, through 19 organizations distributed over Canada, 420,000 pounds were classified and offered for co-operative sale. The season of 1916 saw 1,712,500 pounds, while in 1917 this was increased to 2,097,909 pounds.

It was early in 1917, because of peculiar war conditions, that Martin Barrill, then Minister of Agriculture, recognizing the importance of co-operativizing the sale of wool, and the advantages that must accrue from having one centre of operation, sanctioned the rental of suitable premises in Toronto, for the storage of the wool of the various associations where clips would be graded by the wool experts of the live stock branch, and shipped out when purchased. This led to the further step of 1918 in the organization of the Co-operative Wool Growers' Limited as the central agency for the disposal of wool shipped in and collected from all parts of Canada.

Whereas, when the central warehouse was first established, it was estimated that as much as 200,000 pounds of wool might be received during 1919, no less than 500,000 pounds of wool had been sold up to the end of August, 1918, due to the associations in the various provinces pulling together. After that amount had been sold a considerable quantity of wool remained in storage, but it was anticipated that all would be disposed of at favorable prices, which was later proved true.

Thus co-operation in a few years actual service proved the revolutionizing factor in the wool industry in Canada. Breeder and farmers were quick to learn the oft-repeated lesson to get the best prices the best wool is produced. Formerly the wool was sold in bulk for what it would bring. To-day, under the team-work plan, the wool is sorted and inspected, grade values becoming apparent, and sheepowners are becoming more and more to recognize the importance of care in selection, industry in keeping, and the exercise of intelligence in shearing, packing and shipping.

In Manitoba, this year has been a decided increase in the number of sheepowners who make their wool through the co-operative system. In 1918, 88,000 pounds were received; whereas, in 1919, 170,000 pounds, and in 1918, 362,000 pounds were received. In 1917 there were 465 sheepowners who participated in the wool, while in 1918 this number increased to 917. The grading system has had a marked effect on the quality of the wool, and graders as well as graders uphold the belief that the education work in this connection is doing an incalculable amount of good and increasing the revenue derived by the sheepowner from the sale of his wool. In former years, when wool was sold at a flat rate, the importance of keeping the wool in a clean condition and avoiding tyeing with binder twine, as well as mixing greasy backs and tan with the white and tags, locks and pieces,

Year	No. clips	Pounds	Average price per lb.
1914	179	89,404	17 1/2
1915	318	159,228	25 1/2
1916	437	179,890	22 1/2
1917	623	233,445	25 1/2
1918	916	393,968	27 1/2

It will be noted that the 1918 business was 50 per cent over the 1917 wool shipments. The Southern Saskatchewan Wool Growers' Association handled eight and one-half sections, besides the amount mentioned, the province being too large for one organization to handle at present. In Alberta, likewise too large a territory for one agency to handle, there are three organizations mentioned in the 1918 report, each revealing a large expansion in territory and volume of business. These associations are the Provincial Sheep Breeders' Association, the Alberta Live Stock Association, and the Pincher Creek Wool Growers' Association. These three agencies did by far the greatest business of any provincial system in Canada in 1918, when they collected, graded and shipped 1,250,000 pounds of wool of various grades. -Fit Bits.

You Can Cook Better With Low Pressure Gas

North and east winds, fine Wednesday—Easterly winds, cooler, unsettled

Better results can be obtained with a pressure of one ounce than with a pressure of four ounces, if your cooking vessel is properly placed over the burner.

Yet many people cook with the gas on at full pressure, which means that twice as much gas is used to get poorer results.

Remember this when you are cooking and do not waste gas.

ALTHOUGH NATURAL GAS IS CHEAP, DO NOT WASTE IT, THE SUPPLY IS NOT EVERLASTING.

THE UNITED GAS COMPANIES, Limited.

You Have No Right To Suffer

Suffering is unnecessary and with CHIROPRACTIC at hand, ready and willing to help you, you are acting very foolishly if you do not consult your Chiropractor at once. Upon the condition of your spine depends the state of your health and your suffering is without doubt due to a subluxated vertebra which is pressing upon the nerves causing the stop of mental impulse from the brain to the various organs.

Consultation and Spinal Analysis Free.

The tax rate at Tillsonburg has been struck at 32 mills a reduction of 1 1/2 mills. Labor is scarce and outside labor will have to be brought in to finish road work. The house problem is also to the front, new buildings being either rented or sold before the foundation is completed.

An essay competition was conducted by the Stratford Chamber of Commerce recently on the "Necessity of Cleanliness." There were two divisions one for the Collegiate and Normal Schools, and one for the public school. There were fifty students competing in the higher schools and eighteen from the Public School.

Mr. E. J. S. Brown, assistant inspector of taxation for this district, for the Dominion finance department, is leaving at the end of this week for a visit to the Old Country.

Mayor Booker of Hamilton received much criticism for declaring yesterday a half holiday in honor of the home coming of the gallant 54th Battalion. The city offices all closed at noon but many of the stores remained open.

Brig.-Gen. H. C. Bickford, head of the Canadian Expeditionary Force in Siberia, who returned to Hamilton on Saturday, declared that if any Bolsheviks are arrested in Canada, Siberia is the best place to send them as there, are a lot of their fellows over there. While the Siberian contingent had very little actual fighting, their splendid discipline won for them an enviable record and maintained the glorious record set up by their kinsmen in France and Belgium reports the General.

A gang of laborers started again this forenoon on the James St. improvement work for the N. S. & T. Ry. so that the strike of yesterday was short lived.

PERSONAL

Word has been received that Dr. Sutherland who has been overseas for three years has sailed for home and will be in the city early next week.

June Weddings

MISSEN-MILLER NUPTIALS

A very pretty but quiet June wedding took place on Monday afternoon at 3 o'clock at the home of the brides parents, Mr. and Mrs. Hugh Miller, Pelham Road, when their eldest daughter, Helen Harrison, was united in the holy bonds of matrimony to Mr. Edward Lionel Missen, youngest son of William Missen, of Fonthill. Rev. Mr. Radcliffe, officiating. The bride wore a very pretty wedding dress of ivory georgette crepe and duchess silk, picture hat to match and carried a shower bouquet of bridal roses. She was attended by her sister Miss May Miller, who wore a pretty dress of blue silk and carried a shower bouquet of carnations. Mr. Thomas Weatherhead very ably assisted the groom.

The service which was witnessed by only the immediate relatives of the bride and groom took place under an arch of Union Jacks and marguerites after which a buffet lunch was served.

The groom's gift to the bride was a solid leather suitcase with ivory fittings, to the maid a silver purse, the best man receiving a diamond and pearl tie pin. The brides present to the groom was a silver headed walking stick suitably engraved. The young couple left for Bala Lake, Muskoka, where they will spend a ten days honeymoon.

C. M. A. MEETING

Forty-Eighth Annual Convention Opening in Montreal

TORONTO, June 10.—Manufacturers from various parts of Canada arrived here yesterday to attend the forty-eighth annual meeting of the Canadian Manufacturers' association, which commences to-day. The convention this year is especially important in view of the industrial conditions now confronting industry and a special appeal has been made to the 8,500 members of the association throughout the Dominion to take part in the discussions at the various sessions.

At the annual dinner on Thursday evening addresses will be delivered by Lloyd Harris, chairman of the Canadian mission in London; Geo. B. Nicholson, M.P., chairman of the cost of living committee of the government; M. A. Brown, mayor of Medicine Hat; T. P. Howard, Montreal, incoming president, and W. C. Good, of the united farmers of Ontario.

At the business sessions to-day the chief items on the agenda are the president's annual review and reports by the general manager, treasurer, executive committee and insurance committee.

BUGLARS DON'T DREAM

People who dream may rest assured that they are not possessed of a criminal mind. The criminal does not dream. He is essentially a man of action whose mind never wanders from purposes to morals, and consequently his sleep is undisturbed by any nightmare or hallucination. Suspicion is the fact proved by a group of investigators. Their records show that of one hundred and twenty-five proven criminals under observation not one was disturbed in any way in his slumbers. These observations taken while the criminals were lying in their cells, the time when ghosts of the past should visit them, it is all.

The discovery that they do nothing of the kind is the more startling because it has always been a popular belief that wrongdoers are haunted at night by their crimes. But apparently the novelists who led us to this supposition are at fault. The truth would seem that the average criminal enjoys a slumber as sweet and dreamless as that of any innocent child.—Tit Bits.

Brilliant support and good pitching by Jones in crises enable Toronto to take the first game of the series at Binghamton yesterday by 3 to 2.

11,000 ARE LOCKED OUT

ANSONIA, CT., June 10.—Just as a conference had ended between a committee of employees and officials of the American Brass company today closed its plant here, throwing about 4,000 temporarily out of employment. The Ansonia Manufacturing company followed suit, affecting about 7,000 more.

It was stated at the office of the American Brass company that nineteen workers presented demands at 8.45 and requested an answer by 10 o'clock. The committee presented six-teen points in their demands, the most important being an increase of 25 cents an hour and double time for all over eight hours.

Those who know Chopin's music realize the difference in expression of his national dances. The Polonaises, Mazurkas and Nocturnes differ so much from one another, yet they all express one distinct national feeling. Chopin poured forth his melody spontaneously.

# Farms Wanted for Soldier Settlers

Powers are proposed to be granted at the approaching session of Parliament to The Soldier Settlement Board of Canada to purchase lands to be resold to qualified returned soldiers settling on land. In the case of undeveloped lands the Board will be granted powers of forced purchase at prices judicially determined.

To enable soldiers to locate in any district in Ontario that they wish, the Advisory Board for the Province of Ontario desire to have filed with them a full description and lowest cash prices on a small number of select farms in each district of the Province, available for purchase.

The public are hereby informed that this land is for returned soldiers, and no tenders to sell are requested except for land of good quality and location, and reasonable value, making possible the success of the soldier as a farmer. The purchase price in all cases will be fixed by the Board after the land has been inspected and valued.

The information received will be treated as confidential. No commission will be charged or paid. No offer to sell will be binding on the person offering unless a sale is effected, and no obligation will be on the Board to accept any offer.

If application from a returned soldier be received for a farm listed with the Board, a valuation for such farm may be at once made by the Board and, if approved, negotiations may be entered into for the purchase and sale thereof. An approved list is desired for each district of Ontario.

## BARBERRY CAUSES RUST

Provincial Campaign Advocated to Destroy This Shrub.  
Currant and Gooseberry Worms Causes Great Losses—How to Identify It—Simple Measures of Control—Spraying With Arsenate of Lead Solution Most Effective.

(Contributed by Ontario Department of Agriculture, Toronto.)  
**T**HE Barberry should not be tolerated by the farmers of Ontario. It is a thief in their midst, which every year takes money from their pockets, by increasing the amount of rust upon their grain, and thus reducing their crops.

The Barberry increases the amount and severity of rust. It is not necessary to go into the complicated life-history of the fungus which causes stem rust of grain. Scientists have known for many years that one phase of its life-cycle is passed on the Barberry, and all who have made a study of the matter agree that the amount and severity of stem rust is very much increased by the presence of the Barberry in the neighborhood of grain fields. While scientists do not expect to see rust entirely disappear if the Barberry is destroyed, the general consensus of opinion is that if it were completely exterminated the chances of severe epidemics of stem rust occurring would be greatly reduced.

In Ontario legislation has been passed regarding the destruction of this shrub. Let all concerned realize that the Barberry does increase the amount and severity of stem rust, and a sentiment will be created for the enforcement of the present act. This act should be enforced. The Barberry in Ontario should be destroyed. There is strong evidence to show that Barberry bushes are centres of infection which in wet seasons may give rise to severe epidemics of rust.

The Common Barberry and its purple-leaved variety harbor grain rust. The average man does not know this shrub when he sees it. It is a spiny shrub from six to nine feet high, with yellow wood, arching branches and gray twigs. The leaves are bright green, smooth, somewhat oval, from one to three inches long, the margins with bristly teeth. The flowers are small, yellow and borne in long, drooping clusters. The berries are oblong, red and sweet.

The Japanese Barberry Harmless. If Barberries are required for ornamental shrubs, the low growing, small-leaved Japanese Barberry (Berberis thunbergii, D.C.) may be planted, as this species does not harbor the rust.—Prof. J. E. Howitt, O. A. College, Guelph.

**Currant and Gooseberry Worm.**  
The most common insect enemy of currants and gooseberries is the Currant and Gooseberry Worm. The larva is a greenish caterpillar, about three-quarters of an inch long when full grown, with a black head and numerous black spots over the body. The larvae attack the foliage of gooseberries and of red and white currants but seldom injure that of black currants. At first they work chiefly in the centre part of the bush, stripping the leaves nearly all off there, and doing much damage before they are observed. Later they may devour the foliage in any place. It is common to see nearly all the leaves eaten of numerous bushes.

The life history of the insect is as follows:—The adults are known as Sawflies—are small four-winged flies, about a quarter of an inch in length. The female has the abdomen yellowish and the rest of the body blackish in color. The eggs are for the most part blackish or black. The flies appear in spring very soon after the leaves have expanded, and lay their eggs on the underside of the leaves in chains along the main veins. The young larvae on hatching feed upon the foliage and become full grown in two or three weeks. Then they drop to the ground and form little cases in which they pupate. A new brood of flies emerge, lay their eggs and from these there comes a second brood of larvae, which may be seen on the plants at the time when the currants are ripe. When these larvae are full grown they enter the soil, form little cases or cocoons, and remain there till the next year, when they pupate and emerge as adults.

**Method of Control.**—These are easy insects to kill. All currant bushes and gooseberries should be sprayed with from two to three pounds arsenate of lead, paste or half that amount of the powder form in forty gallons of water as soon as the leaves have become well expanded. Particular care should be taken to spray thoroughly the inner parts of the bush. This will kill all the first brood. If a second brood appears hellebore should be used instead of arsenate of lead, in the proportion of one ounce to one gallon of water. Arsenate of lead would be dangerous on the ripe fruit. The insect occurs everywhere in the province, and everyone should prevent his plants being weakened and seriously injured by it, especially as it is so easy to control.

Note.—Hellebore loses its insecticidal properties unless kept in airtight packages.—Prof. L. Caspar, O. A. College, Guelph.

One drugist doesn't make a summer, but his soda fountain enables him to turn out a good many swallows.

## CO-OPERATIVE EXPERIMENTS

How to Obtain the Most Practical Kind of Information.  
Kindness and Cleanliness Two Chief Points to Observe in Caring for Dairy Stock—Cow and Young Calf Should Be Separated in Not Over Three Days.

(Contributed by Ontario Department of Agriculture, Toronto.)  
**C**O-OPERATIVE experiments have been conducted in agriculture throughout Ontario annually since 1886. Previous to the war the number of farmers conducting these experiments reached over 5,000, and in 1918 (the last year of the war) the number was slightly over 3,500. Some of the various varieties of crops now grown in general cultivation throughout Ontario were introduced through the medium of the co-operative work, such as, for instance, as the O.A.C. No. 21 barley, Marquis spring wheat, O.A.C. No. 72 oats, O.A.C. No. 3 oats, Dawson's Golden Chaff winter wheat, O.A.C. No. 81 spring rye, Canadian Beauty pease, O.A.C. No. 51 Soy beans, Rye buckwheat, Golden Bantam sweet corn, Early Amber sugar cane, Dwarf Essex rape, Irish Cobbler potatoes, Yellow Leviathan mangels, Grimm and Ontario Variegated alfalfa, etc.

The co-operative experiments enable practical farmers to obtain information regarding varieties of field crops, mixtures of grain for grain and for fodder production, ways in increasing soil fertility, etc., for their own particular farms which they can possibly get in any other way. They furnish hundreds and even thousands of object lessons annually, which form centres of interesting study along the lines of progressive agriculture. They enable farmers to get a supply of pure seed of the leading varieties of field crops which rapidly increase in quantity and which furnish seed for sowing and planting in large areas and for selling at good prices. The whole work leads to a substantial increase in farm profits and to a steady advance in agricultural education throughout Ontario.

The plan of the co-operative work is to give to the farmer a circular form and has already been sent to all the successful co-operative experimenters of the past few years. Other interested farmers could secure a copy of the circular by applying to the Department of Field Husbandry, Agricultural College, Guelph, Ontario.—Dr. C. A. Zavitt, Ontario Agricultural College, Guelph.

**Care of Cow and Young Calf.**  
Kindness and cleanliness are the two chief points to observe in caring for dairy stock.

About a week before the young calf is expected, the cow should be placed in a clean, well-bedded, comfortable box-stall. The practice of compelling cows to give birth to their calves, tied in the row, is cruelty for the cows, dangerous for the calf, and bad for the whole herd. Privacy and quietness should be the rule at this time.

The cow should be allowed to lick the calf dry, and should be kept tied until the afterbirth is removed. The two chief points to observe in caring for the calf are:—

1. The calf should be kept in a clean, well-bedded, comfortable box-stall. The practice of compelling cows to give birth to their calves, tied in the row, is cruelty for the cows, dangerous for the calf, and bad for the whole herd. Privacy and quietness should be the rule at this time.

2. The calf should be kept in a clean, well-bedded, comfortable box-stall. The practice of compelling cows to give birth to their calves, tied in the row, is cruelty for the cows, dangerous for the calf, and bad for the whole herd. Privacy and quietness should be the rule at this time.

3. The calf should be kept in a clean, well-bedded, comfortable box-stall. The practice of compelling cows to give birth to their calves, tied in the row, is cruelty for the cows, dangerous for the calf, and bad for the whole herd. Privacy and quietness should be the rule at this time.

4. The calf should be kept in a clean, well-bedded, comfortable box-stall. The practice of compelling cows to give birth to their calves, tied in the row, is cruelty for the cows, dangerous for the calf, and bad for the whole herd. Privacy and quietness should be the rule at this time.

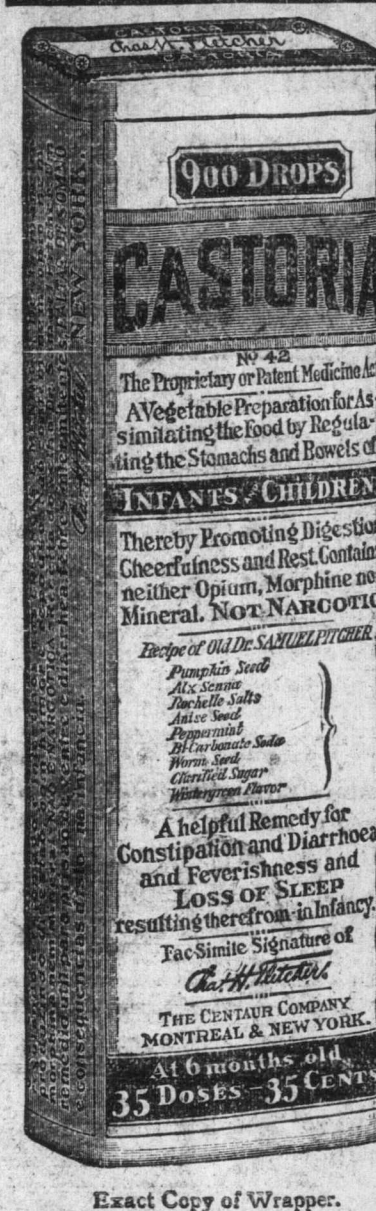

## NEW HIGH RECORDS BY MERCHANTS BANK

Annual Report Shows Splendid Gains in all Departments  
Business men throughout the country need not fear the outcome of the adjustment from war to peace if the statement of the Merchants Bank made public at the Annual Meeting by any criterion. The period covers the year ended April 30, 1919, so includes six months of war and six months of peace. The showing made, is most satisfactory as every department of the bank's activities registers gains. In such matters as net profits, dividends deposits, both interest bearing and non interest bearing, quickly available assets, current loans and total assets very satisfactory increases have been made. Net profits stand at \$1,383,000 as compared with \$1,236,000 for the previous year. The dividend was increased during the year from 10 to 11 per cent., note circulation gained \$1,000,000 and is now \$13,316,000 interest bearing, deposits stand at nearly \$2,000,000 as compared with less than \$76,000,000 last year, non bearing interest, deposits are now \$43,500,000 as compared with \$34,500,000, quickly available assets stand at \$32,700,000 or \$5,000,000 over the figures for the previous year, current loan amount to \$26,900,000 as compared with \$76,600,000 in 1918 while total assets are \$168,725,000 a gain of nearly \$26,000,000 during the year.

At the annual meeting Sir H. Montagu Allan reviewed the year's business and referred to the death of Andrew A. Allan, a director of the bank. Mr. D. C. Casarow, the General Manager, commented in a general way on the results achieved and drew a very gratifying picture of the country's position and prospects. It was pointed out that since the war ended many new branches and sub branches had been opened which not only have absorbed the Bank's officers returning from the front, but have provided additional banking facilities for the public. It was also shown that the Bank's clientele invested \$45,000,000 in Victory Loans of which only \$4,000,000 were conversions. Altogether the showing is one that reflects the highest credit on the management.

Provision was made at the meeting for increasing the Bank's Capital from \$10,000,000 to \$15,000,000. This being as explained by the President, merely in preparation for possible future requirements there being no intention to issue further new stock in the near future.

## Highway of the Great Divide

In Canada, opening up an Alpine region of entrancing beauty. It will be possible to motor from Calgary to Windermere between sunrise and sunset, through a hundred miles of the most glorious scenery in North America. A good automobile road runs south to Port Steeles and Cranbrook, and from Cranbrook there are excellent roads to Spokane, or eastwards through the Crow's Nest Pass, and back to Calgary. The Good Roads Association of Alberta is enthusiastic over the prospect as this will mean the advent of many tourists from all over America. The new road will also be of great benefit to the Upper Columbia Valley which has many attractions for tourists on account of the fertility of the soil and suitability for mixed farming. This valley is served by the Kootenay Central Railway, a recently constructed branch of the Canadian Pacific.

Between Banff, the popular summer resort in the Canadian Pacific Rockies and Lake Windermere, the head waters of the great Columbia River, lies an Alpine ridge of spectacular beauty, forming part of the Great Divide. This ridge is penetrated by two comparatively easy passes, the Simpson, and the Vermilion which lead into the Valley of the Kootenay River, a region abounding in game on account of its being well south of the main line of the Canadian Pacific Railway. Between the Kootenay River and the Columbia River is a small range of mountains through which the Sinclair Pass and Canyon provide an easy road. Which the first surveys were made for an automobile road between Banff and Windermere it was planned to use the Simpson Pass, named after Sir George Simpson, Governor of the Hudson's Bay Company, who made this crossing in 1841. But the route over the Vermilion was found to be easier and at the same time more beautiful, and construction of the Highway of the Great Divide was commenced from opposite Castle Mountain in this direction. At the same time used in this method, more through the Sinclair Canyon was also commenced and at the time of the outbreak of war a gap of only thirty miles separated the two roads. War put an end to construction, and a great washout destroyed several miles of the western end, so that the project seemed to have been abandoned. Now, however, the Dominion Government has made an arrangement with the British Columbia Government by which the route of the road comes under the jurisdiction of the Dominion. Park, and a substantial appropriation has been allotted to finish the work. In this way there is every prospect of the early completion of what will be the most wonderful automobile road

(1) Sinclair Pass, Highway of the Great Divide. (2) Sinclair Canyon, Highway of the Great Divide.

MAJOR LEAGUE FEATURES

Sunday's hero: George Sisler. The St. Louis star scored the first pair of runs after doubling, and drove in the second and winning one off Walter Johnson.

Guy Morton's single settled the Athletics in the ninth, 1 to 0.

Rain stopped the Reds after they had plastered the Dodgers with four runs, leaving a four to one defeat for the Brooklyn upstarts.

The mighty Alexander apparently is growing more so. He won from the Braves with nine runs to help him.

Frank Baker's home run was his first of the year in New York, contributing to the Yankees' 4 to 0 victory over the White Sox. Bob Shawkey allowed one hit.

Red Amft pitched his first full game of the year and turned back the Phillies 6 to 3.

Eighty are scarce for the feature race at the revival of the Canadian Henley this year because certain Canadian clubs have not yet recovered their pre-war popularity, so the C.A.A.O. has enlisted the services of Joe Wright to secure American entries.

AN IDEAL SUMMER OUTING

Algonquin Park, two hundred miles north of Toronto and one hundred miles west of Ottawa, is known to thousands who have enjoyed the attractions that are offered in this wonderful Government Reserve. At an altitude of two thousand feet above sea level the air is pure and bracing. Speckled trout, salmon trout and black bass abound in the lakes and streams of this park. The Grand Trunk operate hotels and log cabin camps in the park. The Highland Inn on Cache Lake, Algonquin Park Station, with accommodation for 150 people, opens for the reception of guests this year on June 14th, and Nominigan Camp, on Smoke Lake, with accommodation for 75 people, opens on June 28th.

Indications are that there will be a large influx of summer visitors to this park this year, and patrons are advised to communicate early and reserve their accommodation for their summer outing. Handsome illustrated descriptive literature sent free on application to Grand Trunk Agent or C. E. Horning, D.P.A., Toronto, Ont.

The Martin 10-mile road race usually run January 1, at St. Catharines, one of the liveliest sporting events in Ontario, will be revived possibly in October after a five years let up, owing to the war. Jim Corkery, Jack Adams, Tom Coley, Percy Sellen, Jack Tait, Tom Longboat, and boys of that calibre used to gallop for the Martin medals and merchandise.

AN OLD RESIDENT HAS PASSED AWAY

Mr. Robert Wright, an old and highly respected resident of this city passed away last night at the family residence, 112 Church Street, at the advanced age of 72 years. He was a devoted member of St. Paul Street Methodist Church, where he attended for many years. Besides his sorrowing widow he is survived by five daughters, Mrs. George Bowman, Retta, Minnie, Irene, Katie and Lillian, all of this city, and three sons, J. Harold, of Regina, Sask.; N. Hanlan, of Brandon, Man., and Edgar at home.

THE TIMAGAMI FOREST RESERVE

Every angler who knows the real thrill of landing a "big fellow" desires to enjoy the sport that the wonderful Timagami region of Ontario affords. Sportmen who have fished all the important waters of the continent declare that the fishing in Timagami cannot be excelled. Lake Timagami with its sixteen hundred islands and three thousand miles of shore line is the home of the black bass, the brook trout and other game fish, while the innumerable smaller lakes are also well stocked. There are no hardships to be encountered in reaching Timagami. A few minutes after leaving the Grand Trunk through train from Toronto the sportsman finds himself in the bottom of the forest, and in a labyrinth of islands, inlets and channels inviting him to go north, south, east and west. There are good outfitting facilities, and also some boarding establishments, but this great region is still absolutely unspoiled. For full particulars and information regarding this territory apply to Grand Trunk Agent or C. E. Horning D.P.A., Toronto, Ont.

MORE TROOPS COMING

Toronto Men From Siberia on the Mont Eagle. OTTAWA, June 10.—The Mont Eagle, which will reach Vancouver on or about the 20th, has on board 705 members of the Canadian Siberian Expeditionary Force, of which 49 are classed as patients and 45 Imperials bound for England. There are 159 for Toronto.

The Militia Department has been advised that the Limer Royal George, with 1,446 Canadian soldiers on board, will reach Halifax on or about June 15th. She carries the 14th Field Ambulance and Mechanical Transport troops, comprising 654 officers and men for Toronto, and the narrative section for Ottawa.

ON CROSS BENCHES

DISPOSITION OF BOYS

The three lads who were before the Magistrate on Monday morning on a charge of breaking into Mr. Plehn's house near Vineland Station, when the occupants were away from home, also into the vacant house owned by Mrs. Brennan in the same vicinity, came up before the County Judge on Monday afternoon. One of the lads was discharged but the other two were remanded until June 18th.

GOING TO PICK THE COLORS OUT THE FOOLISH RAINBOW

(continued from Page 1) nothing of it and who says that every body who eats two pieces of pie at the picnic will be assessed accordingly. The Mayor is expected to go along to keep the atmosphere perfectly clear so that nobody will get out of order.

Specification—Too

The City Engineer has prepared a splendid blue print for the occasion showing lateralals and elevations of all hats of aldermen who meet lady voters during the day. Cost Clerk Smith has figured out the estimate of any contract that is undertaken to satisfy a disgruntled ratepayer and says it will exceed the price of any two Borsilinos that can be put up.

Auditor Shaw says he has checked the account but he can find no vouchers and therefore his firm will have to bring in a special report on January 1st 1920.

The building inspector would give evidence to support these gentlemen, but he thinks of going West to measure the dimensions of appetites.

Altogether you see there is going to be something doing tomorrow but Albert Durham tells us, just before going to press, that there is one law he won't burn and that is that all lights are to be out at 11 at night.

Even Father's cigar won't exercise any mystic influence over him then, then.

Moved that we adjourn. Mr. Mayor carried—To that brother in law of Jack's.

ELECTION MAY BE FORCED BY GRAIN GROWERS

Extreme Free Traders Opposing Government—Ministers May go in Reorganization.

OTTAWA, June 10.—While there is no reason to believe that the Government is considering an election it may be driven to it by the situation which has arisen at Ottawa. If the Western grain growers who think that free trade is the only question in the world, persist in opposing the Government, they may force an appeal to the people. There are some members anyway who have an idea that an election might tend to settle the present unrest. On the other hand the feeling in many quarters is strong that in the present industrial chaos and disturbance an election would be disastrous.

There is little talk of Cabinet reorganization and it is unlikely it will take place until after the session is over. The suggestion has again been revived that Sir Arthur Currie be taken into the Cabinet. If the Minister of Agriculture is selected from the House the choice lies between Donald Sutherland, North Oxford, R. C. Henders, MacDonald, and Dr. Talmie, Victoria. It seems to be taken for granted that three Conservative Unionists will retire in Cabinet shuffle, Sir George Foster, Hon. C. J. Doherty and Hon. Martin Burrell.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for repairs to breakwaters at Port Colborne, Ont." will be received at this office until 12 o'clock noon, Friday, June 20, 1919, for the construction of repairs at two points on the eastern and two on the western breakwaters at Port Colborne, Welland County, Ont.

Plans and forms of contract can be seen and specification and forms of tender obtained at this Department, at the offices of the District Engineers, Equity Building, Toronto, Ont.; Shaughnessy Building, Montreal, Que.; and at the Post Office, Port Colborne, Ont.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained herein. Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to 10 per cent of the amount of the tender. War Loan Bonds of the Dominion will also be accepted as security, or War Bonds and cheques if required to make up an odd amount.

Note—Blue prints can be obtained at this Department by depositing an accepted bank cheque for the sum of \$20, payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order, R. C. DESROCHERS, Secretary, Department of Public Works, Ottawa, May 27, 1919.

## Lemons Whiten and Beautify the Skin!

### Make Cheap Lotion

The juice of two fresh lemons strain-  
ed into a bottle containing three  
ounces of orchard whips makes a  
whole quart pint of the most re-  
markable lemon skin beautifier at  
about the cost one must pay for a  
small jar of the ordinary cold creams.  
Care should be taken to strain the  
lemon juice through a fine cloth so  
no lemon pulp gets in, then this lo-  
tion will keep fresh for months. Every  
woman knows that lemon juice is used  
to bleach and remove such blemishes  
as freckles, sallowness and tan, and  
is the ideal skin softener, smoothen-  
er and beautifier.  
Just try it. Make up a quart pint  
of this sweetly fragrant lemon lotion  
and massage it daily into the face,  
neck, arms and hands. It should nat-  
urally help to whiten, soften, freshen  
and bring out the hidden roses and  
beauty of any skin. It is wonderful  
for rough, red hands.  
Your druggist will sell three ounces  
of orchard whips at little cost, and  
any grocer will supply the lemons.

## INTERMEDIATE SALARIES AND THE INCOME TAX

Below are taxes as announced in the  
White Budget:  
1 Unmarried persons and widows  
or widowers without dependent chil-  
dren:

Salary	Present	New
\$1,100	12	12
1,200	14	14
1,300	16	16
1,400	18	18
1,500	20	20
1,600	22	22
1,700	24	24
1,800	26	26
1,900	28	28
2,000	30	30
2,500	36	36
3,000	42	42

Salary	Present	New
\$2,100	44	44
2,200	46	46
2,300	48	48
2,400	50	50
2,500	52	52
2,600	54	54
2,800	58	58
3,000	62	62

Note: For unmarried persons, the  
rate between \$1,000 and \$1,500 is re-  
duced from two to four per cent. Above  
that, in intermediate salaries, it re-  
mains at 4 per cent, as before. For  
married persons the rate between \$2-  
000 and \$3,000 is raised from 2 to 4  
per cent; above that, up to \$5,000, it  
remains at 4 per cent, as before.

A man with an income of \$3,000 has  
to pay as large an increase, \$20, as  
one with an income of \$4,000 or \$5,000.

**KINDNESS OVERDONE**  
(From The Forecast)  
Some of these guys have got a funny  
way of doing their bit," wailed one of  
the boys at the San Pedro submarine  
base the other day.  
"Here I blowed home for a vacation  
and finds this guy parading around  
with my girl.  
"I nails him and wants to know what  
the big idea is.  
"Tain't nothin' wrong," he comes  
back. I just take her down to the news-  
paper once every day to see if you're  
got killed or not."

**THE DOMINION**  
The Adriatic and the Lapland ar-  
rived at Halifax with Canadian troops  
Stratford-Collegiate Institute Board  
has granted the teachers a 10 per  
cent increase.  
The Tunisian, bringing troops to  
Quebec and Montreal was delayed by  
fogs in the Gulf.  
Three steamers grounded in Lak-  
Superior owing to fog, the Wilkinson,  
Hamenic and Trevor Dawson.  
Joseph Connolly of Welland, fore-  
man in-charge of the Welland Electric  
Company, was electrocuted at work.  
A gas well in Dover field, No. 13  
is turning out a better producer than  
was expected, yielding 7,500 feet in  
24 hours.

## HIGHEST EGG RETURNS

Secure These by Hatching Your  
Chicks Early.

Not Every Farmer should Plant an  
Apple Orchard—Only Those Who  
Understand the Business and  
Wish to Speculate—The Small  
Orchard is Usually Not Profitable.

(Contributed by Ontario Department of  
Agriculture, Toronto.)  
THE early hatched pullets are  
usually the best winter lay-  
ers. Pullets hatched during  
the first three weeks of  
April not only lay from two to three  
dozen more eggs during the year but  
lay many more eggs during the winter.  
The average pullet begins lay-  
ing at an age of six and one-half to  
seven months; the later hatched ones  
are slower to mature than those  
hatched early. To be sure your  
chickens will be hatched early an in-  
cubator is almost a necessity. The  
later the hens begin to lay, generally  
the later they become broody.

An incubator is a machine and re-  
sponds to treatment the same as any  
other machine. It is not difficult to  
handle but it can not supply its own  
oil for heat or keep itself clean, nor  
yet can it supply the little chicks in-  
side the eggs with good pure air un-  
less the room in which the incubator  
is placed has good air.  
The room in which the machine is  
run should be clean and well ven-  
tilated. If you can sleep in the room  
comfortably it is good enough. Es-  
pecially is this the best place be-  
cause the temperature is more even  
and the machine is therefore easier  
to regulate as to heat. The incubator  
should be clean; especially is this  
true of the interior of the machine.  
It is advisable to brush out the ma-  
chine as clean as you can, then wash  
it out with water and soap and last-  
ly disinfect it. Perhaps one of the  
best materials to use is the com-  
mon larry compounds that are used  
about the stables. Just spray or wash  
the machine thoroughly after each  
hatch. It does not take much time  
and saves a lot of trouble with the  
chicks. With some types of machines  
having cloth tops in the hatching  
chamber it is wise to remove the old  
cloth each season and replace it with  
a new piece.

Be sure and test the thermometer.  
Take it into a drug store and the  
druggist will test it for you along-  
side one you know is accurate. Many  
hatches are lost through bad ther-  
mometers.  
Get only clean eggs and of good  
size or set the kind of eggs you want  
the pullets to lay. Be sure your hands  
are clean when you turn the eggs.  
Oily or dirty hands lower the hatch.  
Do not keep your hands in the same  
room as the incubator.  
When chicks hatch do not feed  
them before they are at least forty-  
eight hours old. Should they pant  
inside the machine, use a fan to cool  
them. Give them plenty of air—  
Prof. W. R. Graham, O. A. College,  
Guelph.

**Who Should Plant an Apple Orchard.**  
The apple growing industry of the  
future in Ontario will be developed  
by men who like the work, and who  
have the perseverance and intelli-  
gence to meet the problems encoun-  
tered. The necessary practice and  
experience can be acquired as one  
goes along, and the difficulties of man-  
aging the business can be overcome  
by starting in a small way, or by  
putting one's time on other crops  
while the orchard is growing. The  
men who should not undertake apple  
growing are those who do not like  
the work, and those who from lack  
of experience and knowledge expect  
to find in it phenomenal profits. The  
apple industry offers perhaps as good  
opportunities for profit as are to be  
found in any other line of agricul-  
ture or horticulture, but is at the  
same time no more profitable, on an  
average, than any other well-manag-  
ed business; neither should encour-  
agement be offered to land specula-  
tors, many of whom in the past put  
out misleading information as to op-  
tuna to be made. The success of the  
industry will depend on, 1st, the  
man; 2nd, his local and farm con-  
dition. A man who understands  
orchard work and has a liking for it  
can make a success of apple orchard-  
ing as a side-line in general farming,  
in stock farming, or in dairying, al-  
though it may be pointed out that  
many dairy farmers find it does not  
pay to neglect their herds in order  
to care for an orchard. Orchards be-  
low five acres in size are likely to  
receive very little attention on most  
farms, and farmers who wish to de-  
velop apple orchards as a profitable  
side-line should plant not less than  
ten acres if possible. Orchards rang-  
ing in size from ten to twenty-five  
acres can be conducted as profitable  
side-lines on many farms.  
The commercial apple growing in-  
dustry is developing along two lines.  
There are now to be found quite a  
number of orchards ranging in size  
from forty acres up to one hundred  
and twenty-five, or larger. These con-  
stitute highly specialized businesses  
and are sound economic propositions  
provided one is situated as to  
labor. The extra labor required at  
planting time. The chief difficulty  
with an orchard of this class is that  
a great deal of help is required at  
other periods of the year, while at  
other periods there is little or no  
work to be done. The problem, there-  
fore, becomes one of adjusting apple  
orcharding to other lines of produc-  
tion, so as to equalize the distribu-  
tion of labor throughout the year. It  
would appear that an excellent sys-  
tem of diversification could be worked  
out by using strawberries, rasp-  
berries, currants and gooseberries  
along with apples or other tree fruits,  
excepting cherries. Cherries can be  
planted in the spring with the small  
fruits, but can be handled along  
with apples unless strawberries and  
raspberries are preferred. Prof.  
W. W. Crow, O. A. College, Guelph.

The Olympic, with 5,440 troops, is  
expected on the 11th; the Royal Geor-  
gia with 1,440 on the 16th at Halifax,  
and the Month, with 705 Canadian  
soldiers, on the 20th, at Vancouver.

## The cleanliness of the sealed package appeals to the daintiness of a woman.

She knows that it protects the  
contents from dust, dirt, odors  
and moisture.

She will be doubly pleased with  
our new waxed board package—  
which we have adopted after sev-  
eral years of testing—because it  
is stronger, more secure and more  
completely air-tight; altogether the  
best container for tea that has  
yet been devised.

Ask your grocer for Red Rose Tea  
in the sealed carton.

## RIDGEWAY

Mr. and Mrs. E. S. Huffman of Buf-  
falo visited Mr. and Mrs. Wm. Clark  
the past week.  
Mrs. Beatha Martin and daughter  
Lillian were guests of Mrs. John Mil-  
ler last week.

Miss Mary Thompson and Miss C.  
Thompson returned to Waterdown on  
Thursday.  
Mr. and Mrs. R. M. Wiley of Buf-  
falo have returned to their summer  
home at Thunder Bay.

Miss Jennie Gram of Buffalo has  
returned to the Terrace Inn on the  
lake shore for the summer.

Mr. and Mrs. Clarence Burd have  
returned from their wedding trip.

P. Grey Price of Toronto has been  
visiting at the home of Mrs. Bertha  
Thomas.

Mr. and Mrs. James Barst and  
family, Frank Claus and Arthur  
Claus of Buffalo, spent Decoration  
Day with Mr. and Mrs. Daniel Claus,  
Guelph.

# Glen Ridge

## The Ideal Residence Area of St. Catharines

Glen Ridge is by far the most desirable residential sub-  
section in St. Catharines now on the market, and  
possesses the following enormous advantages:

1. It is close to the heart of the city, all lots being within one  
mile radius of the Post Office and City Buildings.
2. There are building restrictions ensuring the erection of only  
the most desirable dwellings.
3. Beautiful surroundings and park areas.
4. Prices moderate and reasonable terms.

We expect a big movement in this property in the  
next two months. So act quickly and own a home in  
the most beautiful sub-division in the Niagara Peninsula.

## USE A HYDRAULIC RAM

Now Recognized As the Cheapest Power for Pumping.

When and How It is Used—Complete Information Given—Tuberculosis Cows a Menace to Health—How Tubercular Test is Made—Why It Pays Farmer to Test Cattle and to Discard Renctors.

(Contributed by Ontario Department of Agriculture, Toronto.)

WHEN conditions are suitable for an hydraulic ram it is without question the cheapest and most satisfactory method of pumping water. It has one drawback—it wastes far more water than it pumps to the buildings, and hence can only be installed where the supply is from five to twenty times as great as required at the buildings. The efficiency of the ram is from 68 to 80 per cent, i.e., it uses 68 to 80 per cent of the energy of the falling water. Suppose the spring supplies 10 gallons per minute and the fall from the spring to the ram is five feet. Multiply these together and then take 65 per cent of the product, and we have the energy available for driving water to the buildings.

Energy in this case 65-100 x 10 = 650 foot-gallons—32.5 foot-gallons. Now divide this by the height of the buildings above the ram and we have the number of gallons the ram will deliver per minute at the buildings. If, for example, the height is 32.5 feet then

Number of gallons per minute—32.5 divided by 32.5—1 gallon, which is 1-10 of the water supplied by the supposed spring.

Number of gallons per day—60 x 24 = 1,440 gallons (about 23 barrels). Consequently with five feet of head and 32.5 feet of lift the ram will deliver at the buildings 1-10 of the water in the spring. The quantity that will be delivered with other heads, lifts and spring-flows may be calculated in a similar way.

Generally speaking it is found that for each 10 feet of lift there should be one foot of head, but there is a limit—it is seldom advisable to install a ram where the head is less than two feet, although they have been known to work with as little as 18 inches. The length of drive pipe should not be less than three-quarters of the vertical lift to the buildings, or less than five feet from the spring to the ram. It may, however, be longer, but seldom exceeds 50 feet, and 75 feet might be taken as an extreme length for a run of ram suitable for farm conditions. If too long a drive pipe is used, the extra friction it prevents the water from striking as heavily or as frequently as with a drive pipe just the right length.

The cost of installing a ram is not great. For the smallest size of ram it will run in the neighborhood of \$25 to \$35 and about \$15 extra for each hundred feet between the spring and the ram. Thus if they were 100 feet apart the total cost would be from \$40 to \$45. For 200 feet they run from \$55 to \$65, and other distances in proportion. The largest size of standard ram can be installed at about \$100 if the ram is 100 feet apart, and \$125 if 200 feet apart.—R. R. Graham, B.S.A., O. A. College, Guelph.

**Tuberculosis in Cattle.** One reason why farmers should have their cattle tested for tuberculosis is the financial loss which they suffer by having tubercular animals in their herds. As the disease is a great stayer in development and does not induce sudden death, like anthrax, black leg or hog cholera, the farmer does not realize the loss that he endures by having tubercular animals in his herd until one or more animals develop the disease in an advanced degree and die or are slaughtered, when they are at once seen to be infected with the disease. Such animals will have had the disease a long time without it being suspected and will have been giving off in their milk, saliva and droppings large numbers of tubercular bacilli. In this way the bacilli are spread around, the food, water and atmosphere in the stable get contaminated with them and other animals come in contact with the disease from these contaminated materials.

The tuberculin test will indicate whether or not an animal is tubercular long before any clinical symptoms are visible, thus enabling one to deal with such an animal before it becomes a dangerous spreader of the disease.

When an animal is shown to be tubercular it should not be allowed to mix with the rest of the herd. When cattle are purchased to add to the herd it should be only when subject to the tuberculin test, as cattle may have every visible indication of good health and yet be tubercular, the disease not yet having developed to an advanced degree.

It is therefore strongly recommended that farmers

1st. Have their herds tested for tuberculosis with the tuberculin test.

2nd. That they slaughter the calves that have the disease in an advanced degree.

3rd. That they separate the cattle that react to the test from those which do not react.

4th. That they remove the calves from tubercular mothers as soon as dropped, and feed them on milk from healthy cows or on their mother's milk after it has been properly pasteurized, i.e., after it has been heated to 145 deg. F. for half an hour.

5th. That they apply the tuberculin test to every new purchase of cattle that are to be placed in the clean herd.

6th. That the herd be tested with tuberculin annually.

Observing Tuberculosis For the Test. The manufacture and supply of tuberculin is kept under the Dominion Government control. It is required that a veterinarian be employed by the farmer to make the test.—Prof. Dan. H. Jones, Ontario Agricultural College, Guelph.

Before the largest crowd of the season Hamilton shut Brantford out by 8 to 0 in a Michigan-Ontario League game at Hamilton yesterday.

## 70,000 TELEGRAPHERS STRIKE ON WEDNESDAY

CHICAGO, June 10.—After a conference with other union officials today S. J. Koenekamp, International President of the Commercial Telegraphers' Union of America stated that final steps have been taken for the nation wide strike of 70,000 telegraph and telephone operators next Wednesday.

"Telegrams from all sections of the country show the determination of the workers to win their fight," he said.

## ADVERTISE IN THE JOURNAL

DR. ARTHUR B. COBB  
Dentistry

Of all tests of real merit the test of time is the greatest.

Anything that lacks merit can not survive the test of passing years.

Our Dental Offices have stood the test of time. We have been established in Buffalo for more than twenty years, and with each passing year our business has expanded and our fame for skilled Dentistry has spread.

Patients of twenty years ago are still our patients, and they have remained loyal to us only because we have served them faithfully.

If your teeth require Dental attention and you recognize the great importance of having a skilled Dentist to treat them, it is to this Office that you may safely turn, well knowing that you will receive the best of care promptly and at the lowest cost.

Offices 308-378 Main Street, Corner of Eagle  
Open until 8; No Sunday work.  
Phone: Seneca 405.

## Rates for Telephone Service

THE new rates for Long Distance Service, effective May 25th and based upon air-line mileage, correct inequalities in the old schedule and embody both increased and decreased charges.

Following is a comparison of old and new rates for a 3-minute talk to points most frequently called by local subscribers:

	OLD RATE	NEW RATE
St. Catharines to Hamilton	\$.30	\$.30
Toronto	.40	.30
Brantford	.40	.40
London	.60	.70
Guelph	.40	.45
St. Thomas	.60	.70

The hours during which reduced Long Distance rates (night rates) are in effect are now

From 8.30 p.m. to 11.30 p.m., 60 per cent of day rate  
From 11.30 p.m. to 6 a.m., 40 per cent of day rate

Night rates are based on Standard Time

## LOCAL SERVICE

Rates for local service to present subscribers will be increased ten per cent, effective from July 1st next.

Applicants for service will be charged at the increased rates, from May 25th.

Every Bell Telephone is a Long Distance Station

The Bell Telephone Co. of Canada

## CULTIVATE THOROUGHNESS

Most piano and violin pupils have been so thoroughly barbed with continual threats of what will happen if they are not careful of details that many of them form the habit of stopping at every little blunder.

The old experienced teachers usually insist upon working up small bits, apart from the playing of the piece as a whole. When you have made up your mind to play a piece, look upon it as though you were starting out to ride rough shod over all little blunders. Any one who has ever ridden upon a bicycle knows that if one stopped every time there was a slight wavering from the line of gravity, the bicycle would be lost at once. One could never learn to ride. The best way for the student who is studying without a teacher is to play through the piece at a sensible pace and while doing it so note carefully in the mind where the tendency to fall is. Then go back to that place and by means of repeated trials get the weak passage so that you can play it confidently. Then try the piece through again and put a mental chalk mark against another weak passage. Proceed in this way until you have mastered the work.

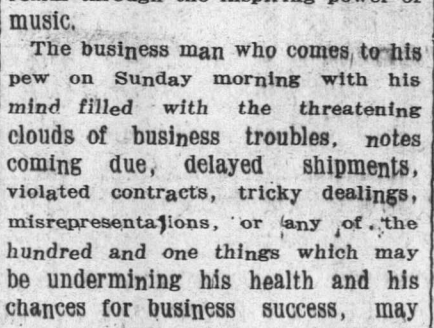

## THE GOOD ORGANIST AND THE BUSINESS MAN

A good organist is first of all a priest of his art. He ministers to humanity in a way which often times surpasses that of the person in the pulpit. It is his mission to lift the mind of his hearers to a different realm through the inspiring power of music.

The business man who comes to his pew on Sunday morning with his mind filled with the threatening clouds of business troubles, notes coming due, delayed shipments, violated contracts, tricky dealings, misrepresentations, or any of the hundred and one things which may be undermining his health and his chances for business success, may hear just a few chords at the beginning of a prelude that will transport him to another world. Beautiful melodies, rich harmonies coax the tired brain to rest, just as the pillows of pine needles in the forest bid the mountaineer lay down and refresh his worn out body. Unless the organist is really a priest of his art and renders a real service to his congregation how can he expect the tired business men to realize what an indispensable blessing music is to them.

A fly is not very tall, yet it stands over six feet without shoes or stockings on.

## MEETING IN CITY PARK FOR THE

Large Gathering Listened to Address by Prof. Speakers.

Quite a large gathering was present in Montebello night and listened with interest and close attention to the address delivered by Mayor of Brantford and Mr. Allan M.P.P. of Hamilton. Mr. presided and introduced the who had previously appeared an audience in Merriton, home will speak in Port tonight.

Mayor McBride is a man of commanding platform appearance and moderate in tone and conveys the impression who believes in the work getting the best wages and conditions they can but he is these things being secured constitutional lines. He stressed profiteers and said that of the country and its control the hands of a small group of rest payments. He called the blunderbuss and said working man of this country entitled to a larger share in the they helped to produce and going to get it.

Mr. Stathome wandered able in his address and drew finger to cold hard facts of ing as well as he can when he reviewed the hard time Zealand had one known as the late premier Dess S. Ward, out of the ranks of crs had risen and saved. They were honest, courageous who appealed to the sense of ing classes. What had be New Zealand could be de ada which was now burden heavy debt and interest.

Mr. Stathome discussed cost of living and the fo the "big fellows" that w in the profits. The work produced the wealth of and were entitled to have voice in the government of They should give Gr politicians both a wide b a man who was friendly to ed to the Legislative halls. Both speakers were list close attention.
