**Technical and Bibliographic Notes/Notes techniques et bibliographiques**

The institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

- Coloured covers/  
Couvercle de couleur
- Covers damaged/  
Couvercle endommagée
- Covers restored and/or laminated/  
Couvercle restaurée et/ou pelliculée
- Cover title missing/  
Le titre de couverture manque
- Coloured maps/  
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/  
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/  
Planches et/ou illustrations en couleur
- Bound with other material/  
Relié avec d'autres documents
- Tight binding may cause shadows or distortion  
along interior margin/  
La reliure serrée peut causer de l'ombre ou de la  
distortion le long de la marge intérieure
- Blank leaves added during restoration may  
appear within the text. Whenever possible, these  
have been omitted from filming/  
Il se peut que certaines pages blanches ajoutées  
lors d'une restauration apparaissent dans le texte,  
mais, lorsque cela était possible, ces pages n'ont  
pas été filmées.
- Additional comments:/  
Commentaires supplémentaires:

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages/  
Pages de couleur
- Pages damaged/  
Pages endommagées
- Pages restored and/or laminated/  
Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed/  
Pages décolorées, tachetées ou piquées
- Pages detached/  
Pages détachées
- Showthrough/  
Transparence
- Quality of print varies/  
Qualité inégale de l'impression
- Includes supplementary material/  
Comprend du matériel supplémentaire
- Only edition available/  
Seule édition disponible
- Pages wholly or partially obscured by errata  
slips, tissues, etc., have been refilmed to  
ensure the best possible image/  
Les pages totalement ou partiellement  
obscures par un feuillett d'errata, une pelure,  
etc., ont été filmées à nouveau de façon à  
obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/  
Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanks  
to the generosity of:

Seminary of Quebec  
Library

The images appearing here are the best quality  
possible considering the condition and legibility  
of the original copy and in keeping with the  
filming contract specifications.

Original copies in printed paper covers are filmed  
beginning with the front cover and ending on  
the last page with a printed or illustrated impres-  
sion, or the back cover when appropriate. All  
other original copies are filmed beginning on the  
first page with a printed or illustrated impres-  
sion, and ending on the last page with a printed  
or illustrated impression.

The last recorded frame on each microfiche  
shall contain the symbol → (meaning "CON-  
TINUED"), or the symbol ▽ (meaning "END"),  
whichever applies.

Maps, plates, charts, etc., may be filmed at  
different reduction ratios. Those too large to be  
entirely included in one exposure are filmed  
beginning in the upper left hand corner, left to  
right and top to bottom, as many frames as  
required. The following diagrams illustrate the  
method:

L'exemplaire filmé fut reproduit grâce à la  
générosité de:

Séminaire de Québec  
Bibliothèque

Les images suivantes ont été reproduites avec le  
plus grand soin, compte tenu de la condition et  
de la netteté de l'exemplaire filmé, et en  
conformité avec les conditions du contrat de  
filmage.

Les exemplaires originaux dont la couverture en  
papier est imprimée sont filmés en commençant  
par le premier plat et en terminant soit par la  
dernière page qui comporte une empreinte  
d'impression ou d'illustration, soit par le second  
plat, selon le cas. Tous les autres exemplaires  
originaux sont filmés en commençant par la  
première page qui comporte une empreinte  
d'impression ou d'illustration et en terminant par  
la dernière page qui comporte une telle  
empreinte.

Un des symboles suivants apparaîtra sur la  
dernière image de chaque microfiche, selon le  
cas: le symbole → signifie "A SUIVRE", le  
symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être  
filmés à des taux de réduction différents.  
Lorsque le document est trop grand pour être  
reproduit en un seul cliché, il est filmé à partir  
de l'angle supérieur gauche, de gauche à droite,  
et de haut en bas, en prenant le nombre  
d'images nécessaire. Les diagrammes suivants  
illustrent la méthode.

### I. MONOGYNIA.

423. BEJARIA. *Cal. 7-fidus. Pet. 7. Stam. 14. Caps. 7-locularis, polysperma.*
424. TILIA. *Cal. 5-partitus, deciduus. Pet. 5. Stigma sub-5-lobum. Caps. immatura 5-locularis, 5-valvis, 5-sperma: matura submonosperma, basi dehiscens.*
425. HELIANTHEMUM. *Cal. laciinis 5. saepius inaequalibus: 2. extimus minoribus. Pet. 5. Caps. 1-locularis, 3-valvis; valvis medio septiferis.*
426. HUDSONIA. *Cal. 3-partitus, tubulosus. Pet. 5. Stam. 10—15. Caps. 1-locularis, 3-valvis, 3-sperma.*
427. TALINUM. *Cal. 5-phillus. Pet. 5. Caps. 1-locularis, 3-valvis, polysperma.*
428. PORTULACCA. *Cal. 2-fidus. Pet. 5. Caps. 1-locularis, circumscissa.*
429. CHELIDONIUM. *Cal. 2-phillus, deciduus. Pet. 4. Caps. 1-locularis, linearis. Sem. plurima, cristata.*
430. GLAUCIUM. *Cal. 2-phillus, deciduus. Pet. 4. Siliqua 2-locularis, linearis. Sem. plurima, punctata.*
431. PAPAVER. *Cal. 2-phillus, deciduus. Pet. 4. Caps. 1-locularis, sub stigmate persistente poris dehiscens.*
432. SANGUINARIA. *Cal. 2-phillus. Pet. 8. Caps. ovata, 1-locularis.*
433. ARGEMONE. *Cal. 3-phillus, deciduus. Pet. 6. Caps. semivalvis.*
434. PODOPHYLLUM. *Cal. 3-phillus. Pet. 9. Bacca 1-locularis, coronata stigmate.*
435. ACTAEA. *Cal. 4-phillus, deciduus. Pet. 4. Bacca 1-locularis. Sem. semiorbiculata.*
436. SARRACENIA. *Cal. duplex, 3-phillus et 5-phillus. Pet. 5. Caps. 5-locularis. Stylus stigmate clypeatus.*

437. LEWISIA. *Cal.* 7—9-phillus, scariosus. *Pet.* 14—  
18. *Stylus* 3-fidus. *Caps.* 3-locularis, polysperma.  
*Semina* nitida.
438. NYMPHÆA. *Cal.* 4—5-phillus. *Pet.* plurima, ger-  
mini sub staminibus inserta. *Stigma* radiatum, ses-  
sile, medio nectariferum. *Bacca* multilocularis, po-  
lysperma.
439. NUPHAR. *Cal.* 5—6-phillus. *Pet.* plurima, recep-  
taculo cum staminibus inserta, dorso nectarifera.  
*Stigma* radiato-sulcatum, sessile. *Bacca* multilocu-  
laris, polysperma.
440. CERATOPHYLLUM. *Cal.* multipartitus : femineus  
6-phillus, imbricatus. *Cor.* O. *Anth.* tricuspidatæ.  
*Nuz* 1-spermia. *Monoicum.*

## II. DI-PENTAGYNIA.

441. CALLIGONUM. *Cal.* 5-partitus. *Cor.* O. *Styli* 4.  
*Nuz* 1-locularis, 4-alata. *Dioicum.*
442. DATISCA. *Cal.* 5-phillus : femineus 2-dentatus.  
*Cor.* O. *Anth.* sessiles, oblongæ, 15. *Styli* 3. *Caps.*  
3-angularis, 3-cornis, 1-locularis. *Dioica.*
443. MENISPERMUM. *Cal.* O. *Pet.* 4. exteriora ; 8.  
interiora. *Stam.* 6. 8. 12. 16. *Pist.* 2—3. *Bacca*  
1—2, monospermæ. *Dioicum.*
444. DELPHINIUM. *Cal.* O. *Pet.* 5. *Nectar.* 2-fidum,  
postice cornutum. *Caps.* 1—3. seu 5.
445. ACONITUM. *Cal.* O. *Pet.* 5. supremo fornicato.  
*Nectar.* 2. pedunculata, recurva. *Caps.* 3. seu 5.
446. AQUILEGIA. *Cal.* O. *Pet.* 5. *Nectar.* corniculata,  
inter petala. *Caps.* 5. distinctæ.
447. CIMICIFUGA. *Cal.* 4—5-phillus. *Pet.* 4—8. car-  
tilaginea. *Caps.* 1—5. seu plures, oblongæ, sutura  
laterali dehiscentes, polyspermæ.
448. ASCYRUM. *Cal.* 4-phillus : 2. interioribus majori-  
bus. *Pet.* 4. *Filam.* in 4. phalanges digesta. *Caps.*  
oblonga, 1-locularis, 2-valvis, calyx inclusa.
449. HYPERICUM. *Cal.* 5-partitus, lacinias subæquali-  
bus. *Pet.* 5. *Filam.* vix basi connata. *Caps.* sub-  
rotunda : loculis numero stylorum : 1—2—3—5.
450. ELODEA. *Cal.* 5-partitus, æqualis. *Pet.* 5. ungu-  
bus nectariferis. *Filam.* 10—15. in 3. phalanges  
connata. *Glandulæ* inter phalanges. *Styli* 3. di-  
vergentes. *Caps.* 3-locularis.

## III. POLYGYNIA.

\* Flores vagi.

451. ILLICIUM. *Cal.* 6-phyllo. *Pet.* 27. *Caps.* plures, in orbem digestæ, 2-valves, 1-spermæ.
452. MAGNOLIA. *Cal.* 3-phyllo. *Pet.* 6—9. *Caps.* 2-valves, 1-spermæ, in strobilum imbricatae. *Sem.* pendula.
453. LIRIODENDRON. *Cal.* 3-phyllo. *Pet.* 6. *Samaræ* imbricatae in strobilum. *Caps.* 1—2-spermæ, non dehiscentes.
454. PORCELSIA. *Cal.* 3-phyllo. *Pet.* 6. interiora majora. *Stigmata* sessilia, obtusa. *Baccæ* plures aut abortione subsolitariae, ovoideo-subreniformes, polyspermæ. *Sem.* sutura interna adnexa, arillata.
455. ATRAGENE. *Cal.* 0. *Cor.* 4—6-petala. *Nectaria* 4, spatulata, petalis alternantia. *Filam.* exteriora dilatata subantherifera. *Sem.* aristata, aristis pilosis.
456. CLEMATIS. *Cal.* 0. *Pet.* 4—6. *Sem.* caudata, cauda plurimosa.
457. ANEMONE. *Cal.* 0. *Pet.* 6—9. *Sem.* ecaudata.
458. THALICTRUM. *Cal.* 0. *Pet.* 4—5. *Stam.* longissima. *Sem.* ecaudata, striata, teretia.
459. HYDRASTIS. *Cal.* 0. *Pet.* 3. *Bacca* composita, acinis monospermis.
460. BRASENIA. *Cal.* 0. *Pet.* 6. persistenta: 3. interiora longiora. *Caps.* 6—10. oblongæ, dispersæ.
461. CALTHA. *Cal.* 0. *Pet.* 5. decidua. *Caps.* plurimæ, polyspermæ.
462. COPTIS. *Cal.* 0. *Pet.* 5—6. caduca. *Nectar.* 5—6. cucullata. *Caps.* 5—8. stipitatæ,stellatæ, rostratæ, polyspermæ.
463. TROLLIUS. *Cal.* 0. *Pet.* 5—8. decidua. *Nectar.* 5—8. linearia. *Caps.* plurimæ, sessiles, polyspermæ.
464. HEPATICA. *Cal.* 3-phyllo. *Pet.* 6—9. *Sem.* nuda.
465. RANUNCULUS. *Cal.* 5-phyllo. *Pet.* 5. intra unguis poro mellifero. *Sem.* nuda.
466. SAGITTARIA. *Cal.* 3-phyllo. *Pet.* 3. *Caps.* aggregatae, 1-spermæ. *Polygama.*
467. CYAMUS. *Cal.* 4—5-phyllo. *Pet.* plurima. *Fructus* turbinatus, in disco truncato foveis plurimis excavatus 1-spermis. *Nuces* ovatae, stylo persistente coronatae.

\*\* *Flores spathacei. Spadix simplex.*

468. POTHOS. *Spatha cucullata. Spadix floribus tectus.*

## I. MONOGYNIA.

423. BEJARIA. *Gen. pl. 811. Vent. hort. cels p. 51.*

*racemosa.*

1. *B. foliis ovato-lanceolatis glabris, floribus racemoso-paniculatis terminalibus.* — *Vent. l. c.*  
*Befaria paniculata. Mich. fl. amer. 1. p. 280.*  
*Icon. Mich. l. c. t. 26. Vent. l. c. t. 51.*
2. *B. foliis utrinque acutis, caule hispido.*
3. *B. foliis obovatis obtusiusculis, caule glabro.*  
 In sandy woods, on the banks of swamps and ponds ;  
 Georgia and Florida : particularly plentiful on the  
 Island of St. Mary's.  $\frac{1}{2}$ . June. v. v. A beautiful  
 shrub, from three to four feet high ; flowers white,  
 tinged with red, of an agreeable scent.

424. TILIA. *Gen. pl. 894.*

*glabra.*

1. *T. foliis suborbiculato-cordatis abrupte acuminatis argute serratis subcoriaceis glabris, petalis apice truncatis crenatis, stylo petalii subæquali, nuce ovata subcostata.* —  
*Vent. in mem. de l'instit. sc. phys. 4. p. 9. t. 2.*
- T. americana. Willd. sp. pl. 2. p. 1162.*
- T. caroliniana. Wangh. amer. 56.*
- T. canadensis. Mich. fl. amer. 1. p. 306.*
- Icon. Vent. l. c. t. 2. Mich. arb. t. ....*
- In the woods of Canada and the northern United States,  
 and on the mountains, as far south as Carolina.  $\frac{1}{2}$ .  
 May, June. v. v. This tree is known by the name  
 of Lime- or Line-tree; Basswood; Spoonwood; and is  
 both useful and ornamental.

2. *T. foliis cordatis sensim acuminatis rarer dentatis membranaceis glabris, paniculis laxifloris, petalis emarginatis, stylo petalis longiore, nuce globosa.*—*Mich. fl. amer. 1. p. 306.*  
*Icon. Mich. arb. t. . . .*  
 Near the sea-coast: Maryland to Georgia.  $\frac{1}{2}$ . May, June. *v. v. s. fl.* A very distinct species, though generally confounded with the foregoing one.
3. *T. foliis basi truncatis obliquis acuminatis denticulato-serratis subtus pubescentibus, paniculis confertifloris, petalis emarginatis, stylo petalis subaequali, nuce globosa laevi.*—*Vent. in mem. de l'instit. sc. phys. 4. p. 10. t. 3.* *Willd. sp. pl. 2. p. 1162.*  
*T. caroliniana. Mill. dict. no. 4.*  
*T. americana. Walt. fl. car. 153. Wangh. amer. 55.*
- $\beta$ . *T. foliis laxe serratis tenuissimis subpapyraceis. Vent. leptophylla.*  
*l. c. p. 11.*  
 In close copses and on the banks of rivers: Virginia to Georgia.  $\frac{1}{2}$ . May—July. *v. v.* The variety  $\beta$ . can scarcely be considered a distinct species, unless the flowers and fruit should prove it so, both of which I have not seen.
4. *T. foliis ovatis basi oblique aut aequaliter truncatis cor-datisque argute serratis subtus niveo-tomentosis, nuce globosa subcostata.* *Vent. l. c. p. 16. t. 5.*  
 On the banks of the Ohio and Mississippi.  $\frac{1}{2}$ . June. *v. s.* A very handsome and desirable ornamental tree.

425. HELIANTHEMUM. *Juss. gen. pl. 326.**Cisti spec. Gen. pl. 913.*

1. *H. exstipulatum, erectum; foliis alternis erectis linearilanceolatis planis subtus tomentosis, racemis terminilibus paucifloris, calycis laciniis lato-ovatis acuminatis, capsulis calyce brevioribus.*—*Willd. sp. pl. 2. p. 1199.*  
*sub Cisto.*  
 In dry fields and pine woods: Canada to Carolina.  $\frac{1}{2}$ . June. *v. v.* Flowers, as in all the following species, yellow.
2. *H. exstipulatum, erectum, pulverulento-tomentosum; ramuliflorum.*  
*foliis alternis oblongis acutis margine revolutis subtus tomentosis, racemis brevissimis, summitate subtrifloris, calycis laciniis orbiculatis pulverulentis, capsulis globosis longitudine calycis.*—*Mich. fl. amer. 1. p. 307.*

*Menandra raniis alternis. Clayt. fl. virg. 20.*

In sandy fields: New Jersey to Carolina. ♀. July.  
v. v. Flowers small.

- corymbosum.* 3. *H. exstipulatum, erectum, ramosum, minutum pubescens; foliis alternis lanceolatis subtus cano-tomentosis, corynibus fastigiatis confertissim multifloris, calycis lacinias ovatis acutis, capsulis calyce vix longioribus.*—*Mich. fl. amer. 1. p. 307.*

In dry barren sand-fields, particularly along the sea-coast: New Jersey to Georgia. ♀. June—Aug.  
v. v. Flowers very small, sometimes without petals;  
from which circumstance this and the foregoing species have been mistaken for *Lechea major*.

- rosmarinifolium.* 4. *H. exstipulatum, stricte-erectum, simplex, canescens; foliis linearibus margine revolutis subtus cano-tomentosis, racemulis axillaribus interrupte confertifloris, calycis lacinias ovatis acutis, petalis calyce triplo longioribus.*

In pine-barrens: Georgia. *Enslen.* ♀. July. v. s.  
*in Herb. Enslen.* Flowers bright yellow.

- carolinianum.* 5. *H. exstipulatum, hirsutum, erectum; foliis alternis oblongo-ovalibus subdenticulatis, imis obovalibus utrinque hirsutis, pedunculis terminalibus paucis calycibusque villosissimis, calycis lacinias oblongis acutis petalis brevioribus.*—*Mich. fl. amer. 1. p. 307.*

*Cistus carolinianus. Walt. fl. car. 152.*

Icon. *Vent. cels 74.*

In pine-barrens of Carolina and Georgia. ♀. June—  
Aug. v. v. Flowers and leaves larger than in any other species.

#### 426. HUDSONIA. *Gen. pl. 822. Willd. hort. berol. 15.*

*ericoides.*

1. *Hudsonia. Willd. sp. pl. 2. p. 858.*

Icon. *Willd. hort. berol. 15. Berg. act. holm. 1778. t. 2.*  
In pine-barrens of New Jersey and Virginia. ♂. May,  
June. v. v. Flowers yellow. This delicate little shrub, not above six inches high, covers large tracts of sandy pine-woods in a similar manner as common heath.

427. TALINUM. *Juss. gen. pl. 346.*

1. *T. foliis cylindricis carnosis, corymbis terminalibus pedunculatis.* — *teretifolium.*  
On sunny rocks: Delaware and Virginia. 4. July.  
*v. v.* Flowers purple.

428. PORTULACCA. *Gen. pl. 824.*

1. *P. foliis cuneiformibus, floribus sessilibus.* — *Willd. sp. oleracea.*  
*pl. 2. p. 859.*  
Icon. *Schkuhr handb. 130.*  
*Purslane* is a common weed in gardens.

429. CHELIDONIUM. *Gen. pl. 880.*

1. *C. foliis alternis pinnatis lobatis, umbellis axillaribus pedunculatis.* — *Willd. sp. pl. 2. p. 1141.*  
Icon. *Fl. dan. 542. Engl. bot. 1581.*  
Near old buildings and among rocks: New England and Pennsylvania; probably introduced. 4. May, June. *v. v.* The yellow fluid which it affords by breaking the stems, is considered an infallible remedy in curing warts and corns.
2. *C. caulis in summitate geminatim diphylloides, foliis sessilibus lobato-pinnatifidis, pedunculo solitario unifloro, capsula oblongo-ovata.* — *Mich. fl. amer. 1. p. 309.*  
In shady woods, near rivulets: Kentucky and Tennessee. *Michaux.* 4. May. *v. s.* Resembles *Sanguinaria* very much, and seems to be the connecting link to both genera.

430. GLAUCIUM. *Juss. gen. pl. 261.*

1. *G. caule glabro, foliis caulinis amplexicaulibus repandis, pedunculis unifloris, siliqua tuberculato-scabriuscula.* — *Smith. fl. brit. 2. p. 563.*  
*Chelidonium Glaucium.* — *Willd. sp. pl. 2. p. 1142.*  
Icon. *Fl. dan. 585. Engl. bot. 8.*  
On the sea-coast of Virginia and Carolina. 6. June, July. *v. v.* Flowers large, yellow.

431. PAPAVER. *Gen. pl. 681.*

1. *P. capsulis hispidis, scapo unifloro nudo hispido, foliis subpinnatis, foliolis lanceolatis; inferioribus subincisis.* — *Willd. sp. pl. 2. p. 1145.*

Icon. *Fl. dan.* 41. *Dill. elth. t.* 224. *f.* 291.

In Labrador. *Colmaster.* ♂. *v. s. in Herb. Dickson.*  
Flowers yellow.

\* 432. SANGUINARIA. *Gen. pl.* 878.

*canadensis.*

1. *S. folio subreniformi sinuato-lobato, scapo unifloro.*—  
*Willd. sp. pl.* 2. *p.* 1140.

Icon. *Bot. mag.* 162. *Dill. elth. t.* 252.

*stenopetala.*

- β. *S. petalis linearibus.*  
In dry woods, generally in fertile soil : Canada to Florida. ♀. March, April. *v. v.* Flowers white ; the number of petals is variable ; and with little care and attention a fine double variety might be produced. It is known by the name of *Blood-wort*.

433. ARGEMONE. *Gen. pl.* 882.

*mexicana.*

1. *A. capsulis 5-valvibus, foliis pinnatifidis incisis spinosis, floribus axillaribus.*—*Willd. sp. pl.* 2. *p.* 1148.

Icon. *Bot. mag.* 243.

On banks of rivers : Carolina to Florida. ♂. July, Aug.  
*v. v.* Flowers yellow, large. In Georgia is a variety with white flowers, which has a beautiful appearance.

434. PODOPHYLLUM. *Gen. pl.* 879.

*peltatum.*

1. *P. caule unifolio unifloro, folio peltato palmato : lobis cuneatis incisis.*—*Willd. sp. pl.* 2. *p.* 1141.

Icon. *Trew ehret. t.* 29. *Catesb. car.* 1. *t.* 24.

In shady woods, in large patches, generally on moist ground : New England to Carolina. ♀. March, April. *v. v.* Flower white ; the fruit is the size of a common plum, green, eatable, and known by the name of *May-apple* : the root is sometimes used as Ipecacuanha.

435. ACTÆA. *Gen. pl.* 877.

2. f. 7.

**B. A. baccis rubris.**

In shady rocky woods, in rich vegetable mould : Canada to Virginia; principally on the mountains. ♀. April, May. v. v. Flowers white; berries white or red; known by the name of *Red and White Cohosh*, and considered by the natives as a valuable medicine. *A. spicata* differs not only in its foliage, but the petals are the length of the stamens.

**436. SARRACENIA. Gen. pl. 885.**

1. *S. foliis brevibus, tubo ventricoso-gibbo, fauce coarc-tato, ala ventrali arcuatim elatiore, appendice erecta subreniformi-cordata mutica sessili.* *Mich. fl. amer.* 1. p. 310. *Willd. sp. pl.* 2. p. 1150.  
*Icon. Bot. mag.* 849. *Mill. ic.* 241. *Catesb. car.* 2. t. 70. *Pluk. amalh. t.* 376. f 6.  
In cedar swamps and sphagnum marshes : Canada to Carolina. ♀. June, July. v. v. Flowers purple, large. This singular and handsome plant is, with all the following, a very desirable object in the collection of the admirers of nature; they bear cultivation, in pots filled half way with sphagnum, extremely well.
2. *S. foliis elongatis, tubo superne dorso maculato, in ap-pedicem fornicatum incurvatam brevem desinente, ala ventrali linear-lanceolata.* *Mich. fl. amer.* 1. p. 310.  
*S. minor.* *Walt. fl. car.* 153.  
*S. adunc.* *Smith-exot. bot.* 1. t. 53.  
In open swamps, on sandy soil : North Carolina to Florida. ♀. June, July. v. v. Flowers yellow. The transparent spots on the back of the leaf distinguish this species very easily from the following, with which it has often been confounded.
3. *S. foliis strictis longissime infundibuliformibus, fauce patula, ala ventrali subnulla, appendice erecta basi coarctata ima parte lateribus retroflexis, mucrone subulato.* *Mich. fl. amer.* 1. p. 310. *Willd. sp. pl.* 2. p. 1150.  
*Icon. Bot. mag.* 780. *Bot. rep.* 381. *Catesb. car.* 2. t. 69. *Pluk. amalh. t.* 376. f. 5.  
In open swamps : Virginia to Florida. ♀. June, July. v. v. Flowers yellow. This is the tallest growing sort; the leaves are often two feet long.

*psittacina.*

4. *S. foliis brevibus superne coloratis venoso-reticulatis, ala ventrali sub un subcuneatim latescente, tubo sensim in appendice recurvata rotundatim fornicatam mucronatam desinente.* Mich. fl. amer. 1. p. 311.

*S. rubra.* Wali. fl. car. 152.

Icon. Pluk. amalh. t. 152. f. 3?

In swamps of Georgia and Florida. ♀. June, July.  
v. v. Flowers on very long peduncles, purple; leaves small, very handsomely marked with purple veins.

437. LEWISIA. *Pursh in linn. trans. v. 11.**rediviva.*1. *Lewisia. l. c.*

On the banks of Clark's river. ♀. July. v. s. in *Herb. Lewis.* Petals white; calyx elegantly red-veined, of a consistency like paper.

*Radix fusiformis, ramosa, sanguinea. Folia radicalia linearia, subcarnosa, obtusiuscula. Scapus uniflorus? an biflorus. Pedicellus basi geniculatus. Calyx coloratus, scariosus, 7—9-phyllus, patens: foliolis ovatis, acutis, concavis, nervoso-venosis, interioribus angustioribus. Petala 14—18. alba, lanceolata, patentia, calyce vix duplo longiora. Filamenta 14—18. receptaculo petalis opposite inserta, filiformia, calyce breviora. Antheræ oblongæ, erectæ. Germen superum, ovatum, glabrum. Stylus filiformis, staminibus paulo longior, superne trifidus. Stigmata 3. bifida. Capsula oblonga, 3-locularis: loculis bispermis. Semina lenticularia, nitida, nigra.*

This elegant plant would be a very desirable addition to the ornamental perennials, since, if once introduced, it would be easily kept and propagated, as the following circumstance will clearly prove. The specimen with roots taken out of the Herbarium of M. Lewis, Esq. was planted by Mr. M'Mahon of Philadelphia, and vegetated for more than one year: but some accident happening to it, I had not the pleasure of seeing it in flower.

438. NYMPHÆA. *Gen. pl. 886.**odorata.**Castalia. Salisb. in annals of bot. 2. p. 71.*

*demersum.*

1. C. foliis verticillatis octonis dichotomo-bigeminis dorso dentatis spinulosis, floribus axillaribus solitariis sessilibus, fructibus 3-spinosis.—*Willd. sp. pl.* 4. p. 405.

Icon. *Engl. bot.* 947.

In ditches and stagnant waters, floating: New York to Virginia. ♀. July, Aug. v. v. Flowers exceeding small.

## II. DI-PENTAGYNIA.

441. CALLIGONUM. *Gen. pl.* 834.

*canescens.*

1. C. dioicum, pulverulento-tomentosum; foliis lanceolatis, floribus axillaribus glomeratis in apice ramulorum subspicatis, fructibus alatis, alis veniosis cristato-dentatis.

In the plains of the Missouri, near the Big-bend. ♀. July, Aug. v. s. in *Herb. Lewis.* Flowers exceeding small. Goats delight to feed upon this shrub.

442. DATISCA. *Gen. pl.* 1543.

*hirta.*

1. D. caule hirsuto, foliis pinnatis, foliolis basi confluentibus.—*Willd. sp. pl.* 4. p. 823.

In Pennsylvania. *Kalm.* ♀. +. Flowers yellow, small, in terminal panicles. I never had an opportunity of seeing this plant myself.

443. MENISPERMUM. *Gen. pl.* 1544.

*canadense.*

1. M. foliis peltatis cordatis subrotundo-angulatis, racemis compositis.—*Willd. sp. pl.* 4. p. 824.

- β. *M. foliis lobatis.*  
*M. virginicum. Willd. sp. pl. 4. p. 824. excl. syn. Dill. elth.*  
 On the banks of rivers and sides of fertile hills, climbing among other shrubs.  $\text{h}.$  July. *v. v.* Flowers greenish yellow; berries black, resembling grapes. *M. foliis hederaceo, Dill. elth. t. 178. f. 219.* belongs to *M. carolinianum* or *Wendlandia*.
2. *M. foliis cordatis palmato-lobatis longissime pedicellatis, racemis simplicibus, floribus hexapetalis dodecandris.*  
 In Kentucky and Tennessee.  $\text{U.}$  June, July. *v. v. s. fl.; v. s. in Herb. Lyon.* Berries large, black, one-seeded. Stem climbing to the height of twenty feet; leaves large.

444. DELPHINIUM. *Gen. pl. 924.*

1. *D. pumilum; caule simplici, foliis palmato-multifidis, laciiniis sublanceolatis obtusiusculis, fasciculo paucifloro, cornu recto corolla breviore, capsulis 3, compressis arcuatis subreflexo-patulis.—Mich. fl. amer. 1. p. 314.*  
 On the side of shady and fertile hills, on the banks of rivers: Virginia to Carolina; particularly plentiful about Harper's Ferry on the Potowmac, Virginia.  $\text{U.}$  April, May. *v. v.* Not above eight inches high; flowers beautiful blue.
2. *D. caule stricto simplici, foliis linearis-multipartitis, spica floribus breviter pedicellatis, cornu sursum arcuato, petalis villosissimis, capsulis ternis. Mich. fl. amer. 1. p. 314.*  
*D. carolinianum. Walt. fl. car. 155.*  
 On the borders of woods, in sandy soil: Carolina and Georgia. On the banks of the Missouri and Mississippi.  $\text{U.}$  May, June. *v. s.* Flowers beautiful sky-blue, large. W. Bartram mentions this very handsome species in his Travels.
3. *D. caule glabro subramoso, foliis tripartito-palmatis, laciiniis lanceolatis subtrifidis, spicis strictis, cornu recto longitudine corollæ, capsulis ternis.—Willd. sp. pl. 2. p. 1230.*  
*D. tridactylum. Mich. fl. amer. 1. p. 314.*  
*D. urceolatum. Jacq. collect. 1. p. 153.*  
*Icon. Mill. ic. t. 250. f. 2. Jacq. ic. rar. 1. t. 101.*

In rocky shady places, in the moutains of Virginia and Carolina.  $\frac{4}{4}$ . July. v. v. From two to four feet high.

*Consolida.*

4. D. pubescens; caule erecto ramoso, foliis linear-multipartitis, cornu adscendente corollam subaequante, nec-tario monophyllo, capsula solitaria.—*Willd. sp. pl. 2. p. 1226.*

Icon. *Fl. dan.* 683.

In fields and woods: Pensylvania and Virginia.  $\odot$ . June, July. v. v. Common *Lark-spur*, probably introduced with the seeds of grain from Europe.

445. ACONITUM. *Gen. pl. 928.*

*uncinatum.*

1. A. floribus subpentagynis, foliis 3—5-lobis inciso-dentatis, corollarum galea longius extensa.—*Willd. sp. pl. 2. p. 1238.*

In swamps and on the side of rivulets, on the high mountains of Virginia and Carolina.  $\frac{4}{4}$ . June, July. v. v. Flowers large, of a fine blue and singular structure. On the foot of the Peaks of Otter and about the Sweet-springs another species occurs, with smaller flowers, and a climbing stem which sometimes attains the height of nine feet; but unfortunately I have no materials at present to give a correct description thereof.

446. AQUILEGIA. *Gen. pl. 934.*

*canadensis.*

1. A. cornibus rectis, staminibus exsertis.—*Willd. sp. pl. 2. p. 1247.*

Icon. *Bot. mag.* 246. *Rob. ic.* 296.

In the crevices of rocks: Canada to Carolina.  $\frac{4}{4}$ . April, May. v. v. Flowers scarlet, mixed with yellow.

447. CIMICIFUGA. *Gen. pl. 993.*

*Serpentaria.*

1. C. foliis decompositis, foliolis ovato-oblongis incisis dentatis: dentibus mucronatis divaricatis, racemis virginatim paniculatis elongatis, floribus submonogynis, capsulis ovatis.

*Actaea racemosa.* *Willd. sp. pl. 2. p. 1139.*

*Actaea monogyna.* *Walt. fl. car.* 151.

## POLYANDRIA DI-PENTAGYNIA. Ascyrum.

gis basi biglandulosis, floribus terminalibus solitariis breviter pedicellatis 3-gynis.—Willd. sp. pl. 3. p. 1473.

A. stans. Mich. fl. amer. 2. p. 77.

In low overflowed op'n places, generally in sandy soil : New Jersey to Carolina.  $\frac{1}{2}$ . July, Aug. v. v. Flowers larger than the former species : it is from one to two feet high.

*amplexicaule.* 4. A. erectum ; caule superne dichotome-paniculato, ramis ancipitibus, foliis ovato-oblongis amplexicaulibus, foliolis calycinis exterioribus cordatis, floribus 3-4-gynis.—Mich. fl. amer. 2. p. 77.

A. stans. Willd. sp. pl. 3. p. 1475.

Hypericum tetrapetalum. Lam. encycl. 4. p. 153.

In low grounds and woods : Virginia to Florida.  $\frac{1}{2}$ . July, Aug. v. v. The flowers and leaves larger than any other sort.

## 449. HYPERICUM. Gen. pl. 1224.

## \* Pentagyna.

*Kalmianum.* 1. H. fruticosum, ramosissimum ; ramulis 4-gonis, foliis linear-lanceolatis, corymbis terminalibus 3—7-floris, laciniis calycis lanceolatis obtusiusculis, capsulis longitudine calycis.—Willd. sp. pl. 3. p. 1438.

H. Bartramianum. Mill. dict. n. 10.

In Pennsylvania and Virginia.  $\frac{1}{2}$ : June, July. v. s. in Heil. Lambert. v. v. in Hortis. From three to five feet high : the flowers of the whole genus are yellow.

*pyramidal-tum.* 2. H. herbaceum, erectum ; caule subtetragono ramoso, foliis sessilibus oblongis acutis glabris, floribus terminalibus, stylis staminibus brevioribus, calycinis foliolis ovatis acutis.—Willd. sp. pl. 3. p. 1444.

H. amplexicaule. Lam. encycl. 4. p. 147.

Icon. Vent. malm. 118.

In Canada ?  $\frac{1}{2}$ . July, Aug. v. v. in Hortis. Flowers the size of *H. Ascyrum*.

*ascyroides.* 3. H. herbaceum, glabrum ; caule simplici 4-gono, foliis sessilibus oblongis acutis glabris, floribus terminalibus, stylis longitudine staminum, calycinis foliolis ovato-lanceolatis.—Willd. sp. pl. 3. p. 1443.

H. macrocarpum. Mich. fl. amer. 2. p. 82.

In Canada and the western parts of New York and Pennsylvania.  $\frac{1}{2}$ . July, Aug. v. v. Flowers the largest of all the species here enumerated.

## \*\* Trigynæ. Fruticosæ.

4. *H. ramis* *ancipitibus*, *foliis ovali-oblongis obtusis mucronatis* *basi angustatis*, *floribus terminalibus subsolitariis*, *calycinis foliolis oblongis acutis staminibus petalis* *æquantibus*, *stylis coadunatis longitudine staminum*.  
*Mich. fl. amer. 2. p. 81.*

*H. elatum. Ait. kew. 3. p. 104?*

In shady rocky places in Kentucky and Tennessee.  $\text{h.}$  July, Aug. *v. v.* Resembles *H. Ascyrum* very much; the leaves of the calyx are broad, and sometimes longer than the petals.

5. *H. ramis* *ancipitibus*, *foliis ellipticis margine crispato-revolutis supra opacis subtus glaucis*, *floribus terminalibus subsolitariis sessilibus*, *calycinis foliolis ovatis acuminitatis*, *petalis deflexis staminibus longioribus*, *stylis coadunatis longitudine staminum*.

In South Carolina and Georgia. *Lyon.*  $\text{h.}$  July, Aug. *v. v.* This elegant species grows to the height of about two feet or more. Every branchlet has from one to three large flowers, of a bright golden yellow; the petals turn downwards, and leave the large crown of stamens in an upright situation, which, with the beautiful red ovate germen in the centre, gives the flower a particularly pleasing appearance.

6. *H. ramis* *ancipitibus*, *foliis lanceolato-linearibus obtusiusculis*, *corymbis axillaribus et terminalibus paucifloris*, *floribus primordialibus sessilibus staminibus stylisque longitudine petalorum*, *calycinis foliolis lanceolatis*.—*Willd. sp. pl. 3. p. 1453.*

*H. Kalmianum. Du Roi harbk. 1. p. 310.*

In Virginia. *Gronov.*  $\text{h.}$  June—Aug. *v. v. in Hortis.* The most common and most hardy species in the gardens. I rather suspect its native country to be Canada, as most of the shrubby kinds coming from the southern parts are extremely tender.

7. *H. ramis* *alato-4-gonis*, *foliis oblongo-lanceolatis obtusiusculis sessilibus*, *panicula pedunculata dichotoma nudiuscula*, *floribus solitariis subsessilibus*, *calycinis lacinias lanceolatis petalis duplo brevioribus*, *stylis coadunatis staminibus longioribus*.—*Mich. fl. amer. 2. p. 78.*

*H. levigatum. Ait. kew. 3. p. 106?**H. ligustrinum. Herb. Banks. MSS.*

In Carolina. *Michaux.*  $\text{h}.$  July, Aug. *v. v.* Flowers small. Willdenow in the Species Plantarum considers this to be an herbaceous plant, whereas it certainly is a shrub.

*glaucum.*

8. *H. ramis teretibus, foliis oblongis cordatis amplexicaulis obtusiusculis lœvigatis glaucis coriaceis, panicula divaricato-dichotoma foliosa, calycinis foliolis ovatis acutis petalis longioribus, staminibus petalis subaequantibus, stylis coadunatis.* — *Mich. Fl. amer. 2. p. 78.*

*H. myrtifolium.* *Lam. encycl. 4. p. 180.*

In Florida. *Michaux.*  $\text{h}.$  July, Aug. *v. v.* Flowers large.

*densiflorum.*

9. *H. ramosissimum; ramulis subteretibus, foliis linearilanceolatis obtusiusculis basi attenuatis, paniculis terminalibus composite-dichotomis subfoliosis densifloris, floribus solitariis pedicellatis, calycinis laciinis brevisimis ovatis deciduis, staminibus stylisque coadunatis petalis brevioribus.*

*H. rosmarinifolium.* *Lam. encycl. 4. p. 159?*

On the dry ridges and savannahs of the Virginia mountains.  $\text{h}.$  June, July. *v. v.* About two feet high; flowers middle-sized, in very abundant and close panicles.

*galloides.*

10. *H. ramulis tetragonis, foliis linearibus sessilibus margine revolutis, axillis fasciculato-foliolosis, paniculis terminalibus divaricato-dichotomis, petalis staminibus æquivalentibus calyci linearie vix longioribus, stylis coadunatis subexertis.* — *Lam. encycl. 4. p. 161.*

In sandy moist places, near rivulets: New Jersey to Carolina.  $\text{h}.$  July—Sept. *v. v.* About two feet high; flowers the size of No. 9.

- aspalathoides. 11. *H. ramis subteretibus dichotomis, foliis fasciculatis linearibus acutis striatis, floribus solitariis axillaribus subsessilibus, staminibus petalis brevioribus, stylis coadunatis.* — *Willd. sp. pl. 3. p. 1451.*

*H. fasciculatum.* *Lam. encycl. 4. p. 160.*

In Carolina. *Fraser.*  $\text{h. +.}$  Flowers of middle size.

- fasciculatum. 12. *H. ramulis teretibus, foliis quasi verticillatim-fasciculatis linearilanceolatis acutis basi attenuatis petiolatis margine revolutis, pedunculis in apice ramorum axillaribus trifloris, flore medio sessili, calycibus foliiformibus, stylis coadunatis.* — *Willd. sp. pl. 3. p. 1452. excl. syn. Michaux.*

*H. axillare*. *Lam. encycl. 4. p. 161.*

*H. Coris*. *Walt. fl. car. 190.*

In pine woods of Georgia and Florida.  $\frac{1}{2}$ . July. v. v.

Flowers the size of *H. perforatum*.

13. *H. ramulis angulosis*, foliis confertis quasi verticillatim fasciculatis filiformi-linearibus convexis obtusis sessilibus, pedunculis in apice ramulorum axillaribus 1—3-floris, calycibus foliiformibus, stylis coadunatis. *tenuifolium*.

*H. fasciculatum*. *Mich. fl. amer. 1. p. 80.*

In Georgia. *Enslen. v. s. in Herb. Enslen.* Resembles the foregoing species in many respects.

### POLYANDRIA POLYGYNIA. Thalictrum.

389

On the banks of ditches and rivulets: Pennsylvania and Virginia. ♀. June—Aug. v. v. A tall species; flowers white.

5. caule foliis duplo altiore, foliis compositis, foliolis *purpurascens*. subrotundis 3-fidis incisis, paniculis nudiusculis, flo-  
ribus cernuis, staminibus coloratis.—Willd. sp. pl. 2.  
p. 1299.

On dry sunny hills: Pennsylvania and Virginia. ♀.  
May, June. v. v. A small plant; stem and filaments purple.

6. T. foliis simplicibus 5-lobis serratis, floribus corymbosis.  
—Willd. enum. 585.

In Carolina, Willdenow. ♀. +. Flowers resembling those of *T. speciosum*.

### 459. HYDRASTIS. Gen. pl. 958.

*canadensis*.

1. H. caule superne opposite diphylo, foliis petiolatis basi  
emarginatis palmatis serratis incisis, pedunculo termi-  
nali solitario unifloro.—Willd. sp. pl. 2. p. 1340.

Icon. Mill. ic. t. 285.

In shady woods, on fertile soil and among rocks: Canada to Carolina, principally in the Allegany mountains.  
♀. April, May. v. v. Flowers pale rose-coloured;  
berry red. The roots are yellow, and afford a fine dye.

### 460. BRASENIA. Gen. pl. 938.

Hydropeltis. Mich. fl. amer. 1. p. 323.

*peltata*.

1. B. foliis centro peltatis ovalibus integerrimis, pedunculis  
solitariis unifloris.

Hydropeltis purpurea. Mich. fl. amer. 1. p. 324, t. 29.  
Icon. Bot. mag. 1147. Pluk. atm. t. 349, f. 3.

In lakes and slow-flowing waters: New Jersey to Ca-  
rolina. ♀. June—Aug. v. v. Floating on the wa-  
ter; the whole plant has a purple colour; the flowers  
dark purple, the size of *Caltha*; the petioles and under  
surface of the leaves are covered with a transparent  
gelatinous substance.

### 461. CALTHA. Gen. pl. 957.

*ficarioides*.

1. C. caule erecto unifloro unifolio, foliis radicalibus cor-  
dato-ovatis obtusissimis paucidentatis multinervibus,  
petalis ellipticis.

## POLYANDRIA POLYGYNIA. Caltha.

*Ranunculus Ficaria*. *Walt. fl. car.* 159.

In shady cedar-swamps of New Jersey and Carolina.

♀. June, July. v. v. Flowers deep yellow, the size of *Ranunculus Ficaria*.

*integerrima*. 2. C. caule erecto corymboso, foliis integerrimis sinu clauso orbiculato-cordatis, floralibus sessilibus reniformibus basi obsolete crenatis, petalis obovalibus.

In wet meadows and small rivulets: New England to Virginia. ♀. May—July. v. v. Flowers yellow, smaller than the following species.

*palustris*. 3. C. caule erecto corymboso, foliis cordato-reniformibus: lobis patulis, circumcirca acute-crenatis, floralibus sub-sessilibus, petalis ovatis.—*Willd. sp. pl.* 2. p. 1338.

*Icon. Fl. dan.* 668. *Engl. bot.* 506.

In low boggy meadows: Canada to Pennsylvania. ♀. April—June. v. v. Flowers golden yellow, large.

*flabellifolia*. 4. C. caule procumbente, foliis dilatato-reniformibus: lobis patentissimis, circumcirca argute acuteque dentatis, pedunculis axillaribus solitariis unifloris, petalis obovatis, capsulis rostro adunco.

In a large sand-spring on Pokono-mountain, Pennsylvania. ♀. July, Aug. v. v. Flowers yellow, the size of *Ranunculus arvensis*. This plant has some affinity with *C. natans* *Willd. sp. pl.* 2. p. 1339. of which I have seen perfect specimens in the Herbarium of A. B. Lambert, Esq., collected by Pallas in the most eastern parts of Siberia, under the name of *C. pusilla*, which I distinguish by the following diagnosis: *Caltha natans*, caule procumbente natante, foliis cordato-reniformibus: lobis subapproximatis, postice obsolete crenatis, antice dentatis, petalis ovalibus, capsulis rostro recto. The flowers of that species are white, with a tinge of red, of the same size as the present species.

462. COPTIS. *Salisb. in linn. trans.* 8. p. 305.

*trifolia*. 1. C. foliis ternatis, foliolis rotundato-obovalibus acuminate-crenatis, scapo unifloro.—*Salisb. l. c.*

*Helleborus trifolius*. *Willd. sp. pl.* 2. p. 1338.

*Icon. Fl. dan.* 566.

In cedar-swamps and mountain bogs: Canada to Virginia. ♀. May—July. v. v. A delicate small plant; flowers white.

*Caltha palustris*.

In woods, on the side of fertile and rocky hills : Canada  
to Carolina. *4. March—May. v. v.* Flowers blue or  
purple ; generally smaller than in the European plant.

465. RANUNCULUS. *Gen. pl. 953.*

\* *Foliis simplicibus, integris.*

1. *R. glaber, caule declinato, foliis angusto-lanceolatis acuminatis integerrimis denticulatisque, inferioribus petiolatis, pedunculis terminalibus axillaribus unifloris, calycibus subreflexis.—Willd. sp. pl. 2. p. 1307.*

*Flammula.*

*Icon. Fl. dan. 575. Engl. bot. 397.*

In inundated places and small rivulets : Pennsylvania and  
Virginia. *4. July—Sept. v. v.* Flowers deep yellow,  
small.

2. *R. adpresso-pilosus; foliis lanceolatis subdenticulatis acuminatis subsessilibus, caule erecto multifloro.—Willd. sp. pl. 2. p. 1308.*

*Lingua.*

*Icon. Engl. bot. 100. Fl. dan. 755.*

On the banks of rivers, among *scirpus* and other river  
plants : Pennsylvania and Virginia. *4. July, Aug.*

- v. v.* Resembles the preceding one, but is upright, the flowers larger and in greater abundance.
- pusillus.* 3. *R. glaber*; foliis petiolatis, inferioribus ovatis dentatis, superioribus linear-lanceolatis apice dentatis, supremis linearibus bracteiformibus, pedunculis alternis solitariis unifloris.  
*R. flammula.* *Walt. fl. car.* 159. *Mich. fl. amer.* 1. p. 321.  
*v. s.* in *Herb. Enslen.* A small species, with exceeding small flowers, petals pale yellow.
- filiformis.* 4. *R. glaber*, *pusillus*; caulis filiformibus repens geniculatis, geniculis unifloris, foliis linear-subulatis obtusis.—*Mich. fl. amer.* 1. p. 320.  
In inundated places, on the river St. Laurence, Hudson's Bay, and Labrador. *v. s.* in *Herb. Banks.* Resembles *R. reptans* very much.
- Cymbalaria.* 5. *R. glaber*, *minimus*, *filiformis*, *repens*, ad genicula radicans; foliis cordato-reniformibus oblique 5-dentatis, pedunculis radicalibus solitariis plerumque bifloris, petalis linearibus, fructibus oblongis.  
In saline marshes near the salt-works of Onondago, New York. *v. v.* Flowers the size of the foregoing one, pale yellow, sometimes white. This little plant has some resemblance to *R. salsuginosus* of Pallas, whose specimens I had an opportunity of seeing in the collection of A. B. Lambert, Esq. and which may be distinguished by the following diagnosis: *R. glaber*, *filiformis*, *repens*, ad genicula radicans; foliis ovatis rarer cordatis apice 3-dentatis, pedunculis radicalibus solitariis plerumque unifloris, petalis obovatis, fructibus subglobosis. The flowers are more than ten times larger than in *R. Cymbalaria*.
- \*\* *Foliis dissectis et divisis.*
- abortivus.* 6. *R. glaber*; caulis striatis inferne nudis, foliis radicalibus cordato-reniformibus obtuse-crenatis, caulinis petiolatis ternatis angulatis, superioribus sessilibus, ramulis subtrifloris.—*Willd. sp. pl.* 2. p. 1314.  
In wet places on the side of ponds and ditches: New York to Carolina. *v. v.* Flowers small, yellow.
- nitidus.* 7. *R. glaberrimus*; caulis fistulosus, foliis radicalibus rotundato-subreniformibus obtuse-crenatis, caulinis ses-

- silicibus digitatis, foliolis incisis, lacinia obtusis, seminibus subglobosis glaberrimis.—Walt. Fl. car. 159. Lam. encycl. 6. p. 126.
- In inundated grounds: New York to Carolina. ♀. July, Aug. v. v. Flowers small; petals white. This and the foregoing one are nearly related to each other, and probably only varieties of the same species, though distinguished by Walter and Lamarck.
8. R. glaber; foliis inferioribus palmatis, superioribus sessilibus digitatis, fructibus oblongis.—Willd. sp. pl. 2. p. 1315.  
Icon. Fl. dan. 571. Engl. bot. 681.
- In ponds and ditches: Canada to Virginia. ♀. June—Aug. v. v. Flowers yellow, small.
9. R. pubescens; foliis radicalibus reniformibus tripartitis inciso-crenatis, caulinis sessilibus digitatis linearibus, caule multifloro, calyce colorato patente.—Willd. sp. pl. 2. p. 1314.  
Icon. Fl. dan. 665. Engl. bot. 624.
- In old meadows and woods: Pennsylvania. ♀. May, June. v. v. Flowers yellow, middle-sized.
10. R. pusillus, glaber; foliis radicalibus subcordato-reniformibus inciso-dentatis, caulinis sessilibus digitatis, lacinia linearibus integerrinis, caule paucifloro, petalis oblongis calyce subæquantibus.
- In Labrador. Colmaster. ♀. May, June. u. s. in Herb. Dickson. Flowers small, yellow; it approaches very near to *R. nivalis*.
11. R. pilosus, erectus, ramosus; foliis ternatis trifidis incisis subtus pilosis, pedunculis teretibus, calycibus reflexis, petalis calyce subæquantibus.—Willd. sp. pl. 2. p. 1323.  
R. canadensis. Jacq. ic. rar. 1. t. 105.
- In low meadows: Canada to Pennsylvania; rare. ♀. July, Aug. v. v. Flowers the size of *R. acris*.
12. R. hirsutissimus; foliis compositis: ternatis trifidis incisis dentatisque, caule erecto multifloro, pedunculis sulcatis, calycibus retroflexis, radice bulbosa.—Willd. sp. pl. 2. p. 1324.  
Icon. Fl. dan. 551. Engl. bot. 515.
- In meadows and grass plots, common. ♀. May—Aug. v. v.
13. R. hirsutus; foliis ternatis inciso-lobatis, caule erecto

In ponds: Carolina. 4. July. Aug. v. s. in Herb. Lyon.
8. *S. foliis angusto-lanceolatis inferne carinatis rigidis nitrinque acutissimis, scapo ramoso, floribus monoicis.*  
In still and deep waters of Oswego river near the great falls, New York. 4. July, Aug. v. v. This species grows in a depth of more than seven feet water; the petioles are strong and stiff; the flowers very numerous.
9. *S. foliis linear-lanceolatis acutis inferne angustatis, scapo simplici multifloro, floribus dioicis, bracteis calycibus que rotundatis obtusis.*  
In small ponds: New Jersey. 4. July, Aug. v. v. Leaves about six inches long and half an inch wide; flowers from twelve to eighteen in a scape.
10. *S. foliis linearibus longissimis 3 nervibus, scapo simplici paucifloro, floribus monoicis, bracteis oblongis obtusis.*  
*S. graminea: foliis lanceolato-linearibus, capitulis pistillorum pusillis. Mich. fl. amer. 2 p. 190?*  
In Carolina, Lyon, Canada. Michaux. 4. July, Aug. v. s. in Herb. Lyon.
11. *S. foliis subulatis basi vaginantibus dorso convexis, scapo simplici paucifloro, floribus monoicis, bracteis dilatatis acuminatis.*  
In small rivulets and ditches, near Philadelphia. 4. July, Aug. v. v. A small species; leaves sometimes with a dilated point, representing a leaf.
12. *S. foliis natantibus elliptico-lanceolatis obliquis 3-nervibus basi attenuatis, influlis subcordatis, scapo simplici paucifloro, pedunculus inferiorius elongatus.—Mich. fl. amer. 2 p. 190.*  
In rivulets of Lower Carolina. 4. July, Aug. v. s. in Herb. Lyon. Flowers small; leaves about an inch and a half long.

467. CYAMUS. *Salisb. in annals of bot. 2. p. 75.**Nelumbium. Willd. sp. pl. 2. p. ....**Navicornus.*

1. C. foliis peltatis orbiculatis integerrimis, corolla polypetala, antheris superne linearibus.—*Salisb. l. c.*

*Nelumbium luteum. Willd. sp. pl. 2. p. 1259.**Nymphaea Nelumbo β. Sp. pl. 730.**Icon. Bartr. ic. ined. in mus. Banks.*

In ponds and lakes of Carolina and Virginia; also near Philadelphia, in ditches and ponds of Brobston's meadows. ♀. July. v. v. Flowers large, yellow, resembling a double tulip. The seeds are very agreeable to eat, and eagerly sought for by children and Indians. By the latter it is supposed they were introduced to those ponds near Philadelphia, as there is no other instance known to have been found so far north. Walter mentions his *Nelumbo* to have white flowers; this variety I have never seen.'

*pentapetalus.*

2. C. foliis peltatis orbiculatis integerrimis, calyce pentaphyllo, corolla pentapetalata.

*Nelumbium pentapetalum. Willd. sp. pl. 2. p. 1259.**Nymphaea pentapetala. Walt. fl. car. 155.*

In North and South Carolina. ♀. July. v. s. Flowers large, white. A specimen seen in the collection of a gentleman in Carolina ascertains the existence of this formerly doubtful plant; but unfortunately I took no notes at that time, being in expectation of seeing the living plant.

*reniformis.*

3. C. foliis reniformibus, corolla polypetala.

*Nelumbium reniforme. Willd. sp. pl. 2. p. 1260.**Nymphaea reniformis. Walt. fl. car. 155.*

In Carolina. *Walter.* ♀. +. This is a doubtful species, and probably a plant belonging to a different genus.

468. POTHOS. *Gen. pl. 210.**fœtida.*

1. P. acaulis; foliis ovatis cordatis, spadice subgloboso.—*Mich. fl. amer. 2. p. 186.*

*Dracontium fœtidum. Willd. sp. pl. 2. p. 288.**Icon. Bot. mag. 836. Catesb. car. 2. t. 71.*

In low grounds, on the side of shady rivulets and springs: Canada to Virginia. ♀. Feb.—April. v. v. Leaves large; flowers several, almost sessile on the ground,

of a singular shape, spotted yellow and brown; the whole plant very foetid, from which it has the name of *Skunk-weed* or *Skunk-cabbage*. It has four distinct, truncated, fleshy petals, and four stamens to each germ.

469. CALLA. *Gen. pl. 1388.*

1. *C. foliis subrotundo-cordatis acutis, spatha ovata cuspidata.* — *Willd. sp. pl. 2. p. 290.*

*Icon. Fl. dan. 422.*

In sphagnum swamps, on the mountains and near rivulets: Canada to Pennsylvania.  $\frac{1}{2}$ . July, Aug. v. v. Flowers white.

470. ARUM. *Gen. pl. 1387.*

1. *A. acaule; foliis hastato-cordatis acutis, lobis obtusis, spatha elongata incurva, spadice superne longius masculiflora.* — *Willd. sp. pl. 4. p. 484.*

*Calla virginica. Mich. fl. amer. 2. p. 187.*

In overflowed places on the banks of rivers, among *Scirpi* and *Junci*.  $\frac{1}{2}$ . June, July. v. v. Spatha long, involute, green.

2. *A. acaule; foliis subhastato-sagittatis, lobis oblongis, sagittifolium.* *spatha cucullata superne ovali, spadice longo a medio ad apicem masculiflora.*

*Calla sagittifolia. Mich. fl. amer. 2. p. 187.*

*Caladium sagittifolium. Willd. sp. pl. 4. p. 489?*

On the banks of rivers and old swamps: Pennsylvania to Carolina.  $\frac{1}{2}$ . July, Aug. v. v.

3. *A. acaule; foliis ternatis, foliolis ovatis acuminatis, spadice cylindrico spatha sessili ovata acuminata horizontaliter patenti altiore.* — *Willd. sp. pl. 4. p. 481.*

*Icon. Pluk. alm. t. 148. f. 6. bona.*

In swamps of Virginia and Maryland.  $\frac{1}{2}$ . May, June. v. v. Spatha dark brown, of a disagreeable smell.

4. *A. subcaulescens; foliis ternatis, foliolis ovatis acuminatis, spadice clavato spatha ovata acuminata plana pendulata dimidio breviore, floribus monoicis.* — *Willd. sp. pl. 4. p. 480.*

- a. A. spatha virescente.* *Icon. Pluk. alnath. t. 376. f. 3.*

### I. GYMNOSPERMIA.

\* *Calyces subquinquefidii.*

471. AJUGA. *Cor.* labium superius minimum bidentatum.  
*Stamina* labio superiore longiora.
472. TEUCRIUM. *Cor.* labium superius nullum, sed fis-  
sura ejus loco in qua *Stamina* jacent.
473. MENTHA. *Cor.* subæqualis, 4-fida: lacinia latiore  
emarginata. *Stam.* erecta, distantia.
474. ISANTHUS. *Cal.* campanulatus. *Cor.* 5-partita :  
tubo recto, angusto : lacinii ovatis æqualibus. *Stam.*  
subæqualia. *Stigm.* linearia, recurva.
475. CUNILA. *Cal.* cylindricus, 5-dentatus, fauce villo-  
sus. *Cor.* ringens : labio superiore erecto, plano,  
emarginato. *Stam.* 2. sterilia.
476. HYSSOPUS. *Cor.* labium inferius tripartitum, laci-  
nula intermedia crenata. *Stam.* recta, distantia.
477. NEPETA. *Cal.* aridns, striatus. *Cor.* tubo longius-  
culo : labio inferioris lacinula intermedia crenata ;  
faux margine reflexo. *Stam.* approximata.
478. LAMIUM. *Cor.* labium superius integrum, fornica-  
tum : labium inferius bilobum : faux utrinque mar-  
gine dentata.
479. GALEOPSIS. *Cor.* labium superius subcrenatum,  
fornicatum : labium inferius supra 2-dentatum.
480. STACHYS. *Cor.* labium superius fornicatum : la-  
bium inferius lateralibus reflexum : lacinia interme-  
dia majore emarginata. *Stam.* deflorata versus la-  
tera reflexa.
481. LEONURUS. *Cal.* 5-gonus, 5-dentatus. *Cor.* la-  
bium superius villosum, planum, integrum : inferius  
tripartitum, lacinia media indivisa.
482. GLECHOMA. *Cal.* 5-fidus. *Antherarum* singulum  
par in formam crucis connivens.

483. MARRUBIUM. *Cal.* hypocrateriformis, rigidus, 10-striatus. *Cor.* labium superius bifidum, lineare, rectum.

484. HYPTIS. *Cal.* 5-dentatus, crescens. *Cor.* ringens: labium superius bifidum, inferius tripartitum, lacinia media sacculiformi. *Stam.* tubi ventri inserta, declinata.

485. PYCNANTHEMUM. *Involucrum* multibracteatum, capitulis subjectum. *Cal.* tubulatus, striatus. *Cor.* labium superius subintegrum, inferius trifidum. *Stam.* subæqualia.

\*\* *Calyces bilabiati.*

486. CLINOPODIUM. *Involucrum* multisetum, verticillo subjectum. *Cor.* labium superius planum, obcordatum, rectum.

487. ORIGANUM. *Strobilus* tetragonot, spicatus, calyces colligens. *Cor.* labium superius erectum, planum: inferius tripartitum: laciñis æqualibus.

488. DRACOCEPHALUM. *Cor.* faux inflata, labium superius concavum.

489. PRUNELLA. *Cor.* labium superius dilatatum. *Filam.* bifurca: altero apice antherifera. *Stigm.* bifidum.

490. SCUTELLARIA. *Cal.* ore integro, post florescentiam, clauso, operculato. *Cor.* tubus elongatus.

491. THYMUS. *Cal.* campanulatus, faux villis clausa. *Cor.* labium superius planum, emarginatum.

492. CALAMINTHA. *Cal.* defloratus villis clausus. *Cor.* fauce inflata, labio superiore emarginato, inferiore tripartito: laciñia intermedia integra, subemarginata aut crenulata.

493. HEDEOMA. *Cal.* basi gibbus. *Cor.* ringens. *Stam.* 2. sterilia.

494. TRICHOSTEMA. *Cor.* labium superius falcatum. *Stam.* longissima.

## II. ANGIOSPERMIA.

\* *Calyces quinquefidi.*

495. LINNÆA. *Cal.* superus, duplex: fructus 2-phyllo; floris 5-partitus. *Cor.* campanulata. *Bacca* sicca, 3-locularis.

496. PHRYMA. *Cal.* cylindricus, supra longior, trifidus, infra bidentatus. *Cor.* labium superius emarginatum, inferius majus. *Sem.* unicum.

487. ORIGANUM. *Gen. pl. 981.*

1. *O. spicis subrotundis paniculatis conglomeratis, bracteis calyce longioribus ovatis.* *Willd. sp. pl. 3. p. 135.*  
*Icon. Fl. dan. 638.*  
 In dry stony fields and woods: Pennsylvania to Virginia.  
 2. July, Aug. *v. v.* Flowers pale red.

488. DRACOCEPHALUM. *Gen. pl. 984.*

1. *D. spicis brevibus tetragonis, bracteis ovatis acutis, calycis dentibus inæqualibus, foliis arcte sessilibus ovali-oblongis superne denticulatis.* *Vent. hort. cel. t. 44.*  
*cum icon.*  
*Prasium incarnatum.* *Walt. fl. car. 165.*  
 In Lower Carolina. 2. Aug. Sept. *v. v.* Flowers blueish-red, with white stripes, very ornamental.
2. *D. spicis elongatis confertifloris, bracteis subulatis, calycis dentibus brevibus subæqualibus, foliis linearilanceolatis serratis.* *Willd. sp. pl. 3. p. 149.*  
*Icon. Bot. mag. 467. Rob. ic. 207.*  
 In mountain meadows: Virginia and Carolina. 2. July—Sept. *v. v.* Flowers reddish-purple. There is a taller variety with dark purple flowers.
3. *D. spicis elongatis remotifloris, bracteis subulatis, calycis dentibus subæqualibus, foliis obovato-lanceolatis superne denticulatis.* *Willd. sp. pl. 3. p. 150.*  
*Prasium purpureum.* *Walt. fl. car. 166.*  
*Icon. Bot. mag. 214.*  
 In the mountains of Virginia and Carolina. 2. July—Sept. *v. v.* Resembles the former very much; it is always smaller in size, and weakly in stem.

489. TRUNELLA. *Gen. pl. 990.*

1. *P. foliis petiolatis oblongo-ovatis basi dentatis, calycis labiis inæqualibus, superiore truncato aristato, caule adscendente.* *Willd. sp. pl. 3. p. 176.*  
*Icon. Fl. dan. 910. Engl. bot. 961.*  
 In fields and meadows: New England to Carolina. 2. July, Aug. *v. v.* Flowers violet purple.
2. *P. foliis petiolatis ovato-lanceolatis basi dentatis, calycis pensylvanice. labiis æqualibus, superiore truncato triaristato, caule adscendente.* *Willd. hort. berol. p. 9. t. 9.*

## DIDYNAMIA GYMNOSPERMIA. Prunella.

*P. laciniata. Walt. fl. car. 163.*

*P. sylvestris autumnalis, &c. Gron. fl. virg. 91.*

In woods and meadows: Pennsylvania to Carolina. ♂.

July, Aug. v. v. Resembles the foregoing species; the spikes are longer, and the flowers pale blue.

## 490. SCUTELLARIA. Gen. pl. 989.

*lateriflora.*

1. *S. ramosissima*, glabriuscula; foliis longissime petiolatis ovatis dentatis, caulinis subcordatis, racemis lateralibus foliosis.—*Willd. sp. pl. 3. p. 172.*

On the side of ditches and ponds: Canada to Carolina. ♀. July—Sept. v. v. Flowers blue, small.

*nervosa.*

2. *S. simpliciuscula*, glabra; foliis sessilibus ovatis dentatis nervosis, racemo terminali laxo folioso.

On the banks of rivulets: Virginia. ♀. July, Aug. v. v. Flowers, as the most of this genus, blue, larger than the foregoing species.

*galericulata.*

3. *S. simpliciuscula*, glabra; foliis subsessilibus ovato-lanceolatis basi subcordatis crenatis, floribus axillaribus solitariis.—*Willd. sp. pl. 3. p. 173.*

Icon. *Fl. dan. 637. Engl. bot. 523.*  
In Canada and in the salt-marshes of Onondago, New York. ♀. July, Aug. v. v. Flowers large, pale blue.

*angustifolia.*

4. *S. simplex*, tenuissime pubescens; foliis linearibus, floribus axillaribus oppositis, genitalibus subexertis.

On the river Kooskoosky. *M. Lewis.* ♀. June. v. s. in *Herb. Lewis.*

*parvula.*

5. *S. simplex*, pusilla, dense pubescens; foliis sessilibus ovatis integerrimis, omnibus conformibus, floribus axillaribus solitariis.—*Mich. fl. amer. 2. p. 11.*

In Canada and the Illinois country. *Michaux.* On banks of rivers in Virginia. *Ph.* ♂. June, July. v. v. Not above two inches high; flowers small, pale blue.

*caroliniana.*

6. *S. ramosa*, glaberrima; foliis petiolatis linear-lanceolatis acutis integerrimis, racemis laxis foliosis, calycibus obtusis.—*Lam. encycl. 7. p. 706.*

Icon. *Lam. illustr. t. 515. f. 3.*

In Carolina. *Fraser.* ♀. +.

*integrifolia.*

7. *S. simpliciuscula*, dense pubescens; foliis subsessilibus oblong-linearibus obtusis integerrimis basi attenuatis, racemis laxiusculis foliosis.—*Willd. sp. pl. 3. p. 173.*

Icon. *Pluk. alm.* 441. f. 6.

8. *S. foliis omnibus linearibus*.—*Willd. sp. pl. 3. p. 174.* *hyssopifolia.*

On dry hills, in rich soil : New York to Carolina.  $\frac{1}{2}$ .

July—Sept. v. v. Flowers large, handsome blue. This species is very variable, in size and figure of leaves, simple and branched stems, &c.

8. *S. ramosa*, elata, pubescens ; foliis ovatis acuminatis serratis breviter petiolatis, racemis terminalibus laxiusculis plerumque paniculatis, bracteis lanceolatis brevibus.—*Bot. rep. 494.*

*serrata.*

*S. integrifolia. Auctorum.*

In fields and meadows : Virginia and Carolina.  $\frac{1}{2}$ . July—Sept. v. v. The tallest species ; flowers large and handsome.

9. *S. simpliciuscula*, pubescens ; foliis remotis rhomboideo-ovatis obtusis rotundato-crenatis basi attenuatis, petiolis brevibus, racemis terminalibus laxis plerumque ramosis, bracteis lanceolatis integris.—*Mich. fl. amer. 2. p. 11.*

*pilosa.*

*S. ovalifolia. Pers. syn. 2. p. 136?*

*S. caroliniana. Walt. fl. car. 163.*

Icon. *Pluk. alm. t. 313. f. 4.*

In shady woods : Virginia and Carolina.  $\frac{1}{2}$ . July, Aug. v. v. Resembles the foregoing one ; it is a smaller plant, with only a few leaves.

#### 491. THYMUS. *Gen. pl. 982.*

1. *T. floribus capitatis, caulibus repentibus, foliis planis obtusis basi ciliatis.* *Willd. sp. pl. 3. p. 138.*

*Serpullum.*

Icon. *Engl. bot. 1514.* *Schkuhr handb. 144.*

Common Thyme occurs frequently in an apparently wild state, particularly on the commons near Philadelphia.  $\frac{1}{2}$ .  $\frac{1}{2}$ . July, Aug. v. v. Flowers purple.

#### 492. CALAMINTHA. *Tourn. inst. 193.*

1. *C. pubescens, ramosissima ; foliis ovatis obtusis subseratis, verticillis pedunculatis dichotomio-corymbosis folio longioribus, villis calycinis prominentibus.*

*Nepeta.*

*Melissa Nepeta. Willd. sp. pl. 3. p. 147.*

*Thymus Nepeta. Smith fl. brit. 2. p. 642.*

Icon. *Engl. bot. 1414.* *Curt. lond. 6. t. 40.*

## DIDYNAMEA GYMNOSPERMIA. Calamintha.

In lime-stone soil, on dry barren hills: Virginia. 2. June, July. Flowers white, tinged with red.

- grandiflora.* 2. *C. erecto-cespitoso*; foliis rhomboideo-ovalibus superne obsolete dentatis glabriusculis, verticillis subpedunculatis subdecemfloris folio brevioribus, villis calycinis inclusis.

*Thymus grandiflorus.* *Bot. mag.* 997.

*Thymus carolinianus.* *Mich. fl. amer.* 2. p. 9.

*Thymbra caroliniana.* *Walt. fl. car.* 162.

On the banks of the river Savannah, in Georgia and Carolina. 2. ½. July, Aug. v. v. Flowers large, pale purple.

493. HEDEOMA. *Pers. syn.* 2. p. 131.

*glabra.*

1. *H. erecta, glabra*; foliis inferioribus oblongis, superioribus lanceolatis remote serratis, pedunculis terminalibus ternis.—*Pers. syn.* 2. p. 131.

*Cunila glabella.* *Mich. fl. amer.* 1. p. 13.

On rocks on the river Tennessee, near Nashville, ¼. +.

*pulegioides.*

2. *H. pubescens*; foliis oblongis serratis, pedunculis axillaribus verticillatis, calycis labio inferiore biseto, setis ciliatis.—*Pers. syn.* 2. p. 131.

*Cunila pulegioides.* *Willd. sp. pl.* 1. p. 122.

In fields and on dry hills: Canada to Carolina. ①. June, July. v. v. A small plant; flowers small, pale blue.

*hispida.*

3. *H. ramosa, undique hispido-pilosa*; foliis linearibus nervosis margine revoluto integerrimis, verticillis subquadrifloris, calycibus hispidissimis lacinii subulatis.

On the banks of the Missouri. ①. June, July. v. s. Not above two inches high; flowers very small.

494. TRICHOSTEMA. *Gen. pl.* 988.

1. *Z. foliis ovato-cuneiformibus superne serratis, spicis capitato-conicis solitariis elongato-pedunculatis, caule herbaceo repente.*—*Lam. illustr. 1. p. 59.*  
*Verbena nodiflora. Willd. sp. pl. 1. p. 117.*  
*Lippia nodiflora. Mich. fl. amer. 2. p. 15.*  
*Blaria nodiflora. Gært. de fruct. et sem. 1. p. 266. t. 56.*  
Icon. *Lam. illustr. 1. t. 17. f. 3. Rob. ic. 30.*  
On the coast of Virginia and Carolina, and on the banks of the Ohio. ♀. July, Aug. v. v. Flowers white, small.
2. *Z. foliis lineari-lanceolatis argute serratis, spicis capitato-* *nodiflora.* *lanceolata.*

## DIDYNAMIA ANGIOSPERMIA. Zapania.

*conicis solitariis elongato-pedunculatis, caule herbaceo repente.* — *Pers. syn. 2. p. 140.*

*Lippia lanceolata. Mich. fl. amer. 2. p. 15.*

In Carolina and Georgia, on the banks of rivers. ♀. July, Aug. v. v. Flowers white.

## 499. CAPRARIA. Gen. pl. 1030.

*multifida.*

1. *C. erecta, viscido-pubescent; foliis superioribus terno-verticillatis multifidis, pedicellis solitariis.* — *Mich. fl. amer. 2. p. 22. t. 36.*

On the banks of rivers, in the western parts of the settlements, particularly on the Missouri and Mississippi. ♂. July, Aug. v. s. Flowers small, greenish-white.

## 500. HERPESTIS. Gært. carp. 3. p. 187. t. 214.

Monnieria. *Mich. fl. amer. 2. p. 22.*

*rotundifolia.*

1. *H. minutum pubescens; foliis subovali-orbiculatis multinervibus, pedunculis passim oppositis folia subæquantibus.*

*Monnieria rotundifolia. Mich. fl. amer. 2. p. 22.*

On overflowed banks of rivers, in the Illinois and other western parts. ♀. July, Aug. v. s. Flowers pale blue, small.

*amplexicaulis.*

2. *H. caulinibus lanatis, foliis breviter cordato-ovalibus amplexicaulinibus integris obtusis, pedunculis folio breviribibus.*

*Monnieria amplexicaulis. Mich. fl. amer. 2. p. 22.*

In ponds and ditches: Carolina and Georgia. ♀. June — Aug. v. v. Flowers blue, larger than the other species.

*cuneifolia.*

3. *H. glaberrima; foliis cuneato-obovalibus superne obsolete subcrenatis, pedunculis folia subæquantibus.*

*Monnieria cuneifolia. Mich. fl. amer. 2. p. 22.*

On the overflowed banks of rivers, near the sea-shore: Pennsylvania to Carolina. ♀. Aug. v. v. Leaves thick; flowers very small, pale blue.

*micrantha.*

4. *H. glabra, succulenta; foliis arcte sessilibus ovalibus obtusis integerrimiis striato-nervosis, pedunculis folio breviribibus, calyce 5-phyllo, stylo bifido.*

*Gratiola repens. Willd. sp. pl. 1. p. 103?*

*Icon. Swartz. ic. t. 33.*

On the banks of rivers, to the edge of low water mark : Pennsylvania to Virginia. ♂. July, Aug. v. v. Flowers very small, white. It approaches near to *Lindernia*.

501. LINDERNIA. *Gen. pl. 1031.*

1. *L. glaberrima*; foliis oblongo-ovatis obsolete dentatis sessilibus, pedunculis axillaribus unifloris, corollis calyce duplo longioribus, capsulis calyce brevioribus.—  
*Willd. sp. pl. 3. p. 325?*

*pyxidaria.*

*Gratiola inaequalis. Walt. fl. car. 61.*

*Gratiola emarginata. Mich. fl. amer. 1. p. 6.*

*Gratiola floribunda pedunculatis, foliis ovatis crenatis. Gron. fl. virg. 3.*

major.

2. *L. foliis repando-dentatis, pedunculis brevibus.*  
On the banks of ponds and rivers, in gravelly soil: New York to Virginia. ♂. July, Aug. v. v. Flowers blue. The European plant, figured by Schkuhr and Krockier, seems to be a very different species from the present one, as the corolla is shorter than the calyx.

502. SCROPHULARIA. *Gen. pl. 1014.*

1. *S. foliis cordatis serratis acutis basi rotundatis, petiolis inferne ciliatis, paniculae fasciculis laxae paucifloris.*—  
*Willd. sp. pl. 3. p. 269.*  
*S. nodosa* β. *americana. Mich. fl. amer. 2. p. 21.*  
In low grounds: Pennsylvania to Carolina. ♀. June—Aug. v. v. Flowers greenish-brown. The plant often more than four feet high.
2. *S. foliis lanceolatis inaequaliter serratis acuminatis basi acutis, petiolis nudis, paniculae fasciculis corymbosis.*  
In wet meadows and woods: Pennsylvania. ♀. Aug. Sept. v. v. Flowers greenish-yellow.

*lanceolata.*503. BIGNONIA. *Gen. pl. 1018.*

1. *B. foliis conjugatis cirrhosis, inferioribus ternatis, foliolis ovato-cordatis acuminatis, racemis axillaribus, caule muricato.*—  
*Willd. sp. pl. 3. p. 296.*  
Icon. *Plum. ic. t. 58.*  
In shady woods: Carolina to Florida. ♀. June, July. v. v. Flowers yellowish-scarlet.
2. *B. foliis conjugatis cirrhosis, foliolis oblongis basi subcordatis, imis simplicibus.*—  
*Willd. sp. pl. 3. p. 297.*

*crucigera.**capreolata.*

In sandy fields near Savannah, Georgia.  $\frac{1}{2}$ . July. *v. s.* in *Herb. Enslen.*
- ciliosa.* 4. *R. erecta, ramosa ; foliis subsessilibus ovato-oblongis margine nervis venisque pilis albis longe ciliatis, brac-*

- teis lanceolatis brevibus, calycis lacinia subulatis tubo  
corollæ quadruplo brevioribus.  
Near Savannah, Georgia.  $\frac{1}{2}$ . July. v. s. in Herb.  
Enslen.
5. R. glabriuscula, diffusa, radicans; foliis in petiolum longi-  
giuscule angustatis ovalibus obtusis, floribus subsessi-  
libus, capsulis linearibus. Mich. fl. amer. 2. p. 23.  
In Georgia and Florida. Michaux. +.

*humistrata.*

## 505. BUCHNERA. Gen. pl. 1035.

1. B. caule simplici, foliis lanceolatis subdentatis asperis  
trinervibus, spicis remotifloris.—Willd. sp. pl. 3.  
p. 334.  
On dry sandy hills: Pennsylvania to Carolina; rare.  $\frac{1}{2}$ .  
July. v. v. Flowers deep blue.

*americana.*

## 506. ANTIRRHINUM. Gen. pl. 1007.

1. A. procumbens, pilosum; foliis alternis hastatis integer-  
rimis, pedunculis solitariis longissimis.—Willd. sp.  
pl. 3. p. 234.  
Icon. Fl. dan. 426. Engl. bot. 692.  
In sandy fields: Pennsylvania to Virginia.  $\odot$ . July,  
Aug. v. v. Flowers yellow mixed with purple.
2. A. erectum, glabrum; foliis sparsis lanceolato-linearibus  
confertis, spicis terminalibus densifloris, calyci-  
bus glabris calcare brevioribus.—Willd. sp. pl. 3.  
p. 253.  
Icon. Fl. dan. 982. Engl. bot. 658.  
In fields and dry hills, near houses; frequent.  $\frac{1}{2}$ . June  
—Aug. v. v. Flowers large, yellow. This fine-  
looking plant is one of the worst and most trouble-  
some weeds in several parts of Pennsylvania and Virginia.
3. A. assurgens, glabrum, simplicissimum; foliis sparsis  
erectis angusto-linearibus obtusis remotis, floribus ra-  
cemosis, stolonibus procumbentibus.—Willd. sp. pl. 3.  
p. 255.  
Icon. Vent. hort. cels 49.  
In low grounds: Canada to Carolina.  $\odot$ . June—Aug.  
v. v. Flowers small, purple.
4. A. pusillum, simplex, glabrum; foliis oppositis linearibus  
acutis, floribus axilaribus brevi-pedunculatis, calyci-  
bus campanplatis.

*Elatine.**Linaria.**canadense.**tenellum.*

On the banks of the Missouri. *M. Lewis.* ○. July.  
*v. v.*; *v. s. in Herb. Lewis.* Flowers bright blue,  
 large in proportion to the size of the plant.

*Crontium.*

5. *A. erectum*, ramosum, pubescens; foliis alternis lanceolatis, floribus subspicatis, calycibus digitatis corolla longioribus, corollis ecaudatis.—*Willd. sp. pl. 3.* p. 258.

Icon. *Curt. fl. lond. 4. t. 45.* *Riv. t. 82.*  
 In fields: Virginia; rare. ○. July, Aug. *v. v.* Flowers pale purple.

507. GERARDIA. *Gen. pl. 1004.*

\* *Flores purpurei.*

*purpurea.*

1. *G. caule opposite ramosissimo, foliis linearibus, floribus axillaribus oppositis subsessilibus.*—*Willd. sp. pl. 3.* p. 221.

pedunculis axillaribus folio longioribus, calycibus 5-partitis.

In Georgia. *Bartram.* v. s. in *Herb. Banks.*

6. *G. ramosissima*; foliis lanceolatis serratis basi attenuatis subpetiolatis, racemis terminalibus, floribus oppositis bracteatis.

In great abundance in the pine-forests of the Rocky-mountain. *M. Lewis.* h. June. v. s. in *Herb. Lewis.*

*Frutex elegans* 3-4-pedalis ramosissimus. *Rami* teretes, dense foliosi, tenuissime pubescentes. *Folia* semuncialia, opposita, lanceolata, acuta, interdum obtusa cum mucrone, superne acute serrata, inferne quasi in petiolum attenuata, integerrima, utrinque glabra. *Racemi* terminales, simplices, erecti, bracteati. *Flores* oppositi, pedicellati, magnitudine et colore *Digitalis purpurei*. *Bractae* opposita, sessiles, oblongæ, acutæ, integerrimæ, pedicellis vix breviores. *Calyx* profunde 5-partitus, basi unibracteolatus: lacinis lanceolatis, acutis. *Bracteola* lineares, calyce breviores. *Corolla*: *Tubus* calyce quadruplo longior, superne ventricosus. *Limbus* patens, subæqualis, 5-fidus: *Lacinia* rotundatis. *Filamenta* tubo duplo breviora, imo corollæ inserta. *Antheræ* oblongæ, hirsutissimæ. *Stylus* longitudine tubi. *Capsula*.....

\*\* *Flores flavi.*

7. *G. pubescens*; caulinis subsimplicibus, foliis subsessilibus lanceolatis integerrimis vel dentatis, inferioribus subpinnatifido-incisis, floribus axillaribus oppositis subsessilibus.—*Willd. sp. pl. 3. p. 223.*

Icon. *Pluk. mant. t. 389. f. 3.*

In dry shady and rocky woods: New England to Florida. 4. July—Sept. v. v. Flowers large, and, as all the following, yellow. It is seldom more than two feet high.

8. *G. glabra*; caule paniculato, foliis petiolatis pinnatifidis: lacinis lanceolatis acutis integris vel postice incisodentatis, summis lanceolatis integris, floribus axillaribus oppositis pedicellatis.

*Rhamnthus virginicus. Willd. sp. pl. 3. p. 191.*

Icon. *Pluk. alm. t. 389. f. 1.*

On the banks of rivers, in rich shady places: Pennsylvania to Carolina. 4. July, Aug. v. v. From three to five feet high. This fine species has been generally

*fruticosa.*

*flava.*

*quercifolia.*

confounded with the foregoing one, but differs widely from it. The stem is smooth, purple, with a blue dew over it, and very much branched. The flowers are nearly the size, shape, and colour of the preceding species. The original specimen of Gronovius of *Rhinanthus virginicus*, in the Banksian Museum, is evidently our present plant.

- Pedicularia.* 9. *G. pubescens*, brachiatim-paniculata; foliis oblongis duplicito-inciso-serratis pinnatifidisque, floribus axillaribus oppositis pedicellatis, calycis lacinias foliaceis inciso-dentatis.—*Willd. sp. pl. 3. p. 223.*

Icon. *Lam. illustr. t. 529. f. 2.*

In dry shady woods: New York to Carolina. ♂. June — Aug. v. v. A very handsome species, of which there are several very striking varieties.

- cassiodes.* 10. *G. virgatim-paniculata*; foliis setaceo-pinnatifidis: laci-niis linearibus.

*G. Afzelia. Mich. fl. amer. 2. p. 20.*

*Afzelia cassiodes. Gmel. syst. nat. 927.*

*Anonymos cassiodes. Walt. fl. var. 171.*

In dry sandy woods of Carolina and Georgia. ♂. July, Aug. v. s. Flowers small, yellow.

### 508. PEDICULARIS. Gen. pl. 1003.

- euphrasioides.* 1. *P. caule ramoso pubescente*, foliis pinnatifidis dentatis, calycibus tubulosis bipartitis truncatis, corollæ galea bidentata. *Willd. sp. pl. 3. p. 204.*

Icon. *Houttuyn. linn. syst. 8. t. 57.*

In Labrador. *Colmaster.* ♀. v. s. in *Herb. Dickson.* Flowers yellow; from six to eight inches high.

- pallidu.* 2. *P. caule ramoso elato glabro*, foliis suboppositis lanceolatis crenatis dentatis, spica aphylla glabra, corollæ galea obtusa, calyx bifido rotundato.—*Herb. Banks.*

*P. virginica. Lam. encycl. 5. p. 126.*

In swamps, on lime-stone soil: Virginia. *Lamarch.* In a swamp near King's-bridge, New York. *Ph. 4.* July, Aug. v. v.; v. s. in *Herb. Banks.* Flowers yellow; grows upwards of three feet high. I considered this species to be the *Rhinanthus virginicus*, which Linnaeus had adopted from Gronovius's Flora Virginica; but on examining the Gronovian Herbarium in the Banksian Museum, I found his *Rhinanthus* to be the *Gerardia quercifolia*.

- lanceolata.* 3. *P. caule simplici*, foliis lanceolatis inciso-dentatis, spica

- aphylla, calycibus glabris, capsulis brevibus. *Mich.*  
*fl. amer. 2. p. 18.*
- In the Illinois country. *Michaux.* ♀.
4. *P. caule simplici, foliis lanceolatis pinnatifidis dentatis,*  
spica foliosa alterniflora hirsuta, capsulis in mucro-  
nem gladiatum exertum protractis.—*Mich. fl. amer. 3.*  
*p. 18.*
- In rich soil, in grassy moist places: Pennsylvania to Vir-  
ginia. ♀. May, June. v. v. Flowers yellow, tinged  
with purple; sometimes a foot high.
5. *P. caule simplici, foliis pinnatifidis inciso-dentatis, ca-*  
pitulo basi folioso hirsuto, corollis galea setaceo-biden-

## DIDYNAMIA ANGIOSPERMIA. Mimulus.

427

pedunculis axillaribus corymatis elongatis, calyce inaequali, dentibus acutis scutulis.—Willd. sp. pl. 3. p. 361.  
Icon. Feuill. peruv. 2. t. 34.

On the banks of Clark's river. *M. Lewis.* On the north-west coast. *Pallas.* ♀. July, Aug. v. s. in *Herb. Lewis.* nec non *Lambert.* Flowers golden-yellow. It has lately been introduced into the gardens, and will be a fine addition to our hardy perennial plants.

4. *M. erectus*, pusillus, pubescens; foliis sessilibus oblongo-lanceolatis acutis nervosis mucronato-denticulatis, floribus paucis terminalibus longissime pedunculatis, dentibus calycis acuminatis.

On the head springs of the Missouri, at the foot of Portage hill. *M. Lewis.* ♀. Aug. v. s. in *Herb. Lewis.* Not above eight inches high; flowers two or three, larger than any other known species, of a beautiful pale purple.

## 510. CHELONE. Gen. pl. 1003.

1. *C. foliis oppositis lanceolato-oblongis acuminatis serratis, spicis terminalibus densifloris.*—Willd. sp. pl. 3. p. 223.

*glabra.*

- α. *C. foliis subsessilibus, floribus albis.*

*alba.*

- β. *C. foliis brevi-petiolatis, floribus purpureis.*

*purpurea.*

*C. obliqua.* Willd. sp. pl. 3. p. 225.

*C. purpurea.* Mill. div. n. 2.

Icon. Schkuhr handb. 172. Mill. ic. 93. Pluk. mant. t. 348. f. 3.

On the banks of rivers, ponds, and swamps: New England to Carolina. β In rivulets on the high mountains of Virginia and Carolina. ♀. July, Aug. v. v. Flowers large, in close spikes, in var. α. white; purple in var. β. I have not been able to find sufficient distinctions between *C. glabra* and *C. obliqua*, so as to consider them distinct species.

## 511. PENTSTEMON. Gen. pl. 1758.

1. *P. caule glabro, foliis laevigatis ovato-oblongis basi amplexicaulibus tenuissime denticulatis, inferioribus integerrimis, floribus paniculatis, filamento sterili superne barbato.*—Willd. sp. pl. 3. p. 228.

*laevigata.*

*Chelone Penstemon.* J. F. Miller. ic. 4.

Icon. Lam. illustr. 528. Arduin. spec. t. 5. Moris. hist. 2. s. 5. t. 8. f. 6.

## DIDYNAMIA ANGIOSPERMIA. Pentstemon.

In stony low grounds: Pennsylvania to Carolina.  $\mathcal{U}$ . July—Sept. *v. v.* From one to two feet high; flowers pale purple.

*pubescens.* 2. P. caule pubescente, foliis serrulatis lanceolato-oblongis sessilibus, floribus paniculatis, filamento sterili ab apice infra medietatem barbato.—*Willd. sp. pl. 3. p. 227.*

*latifolia.* Chelone Pentstemon. *Mant. 415.*

*latifolia.*  $\alpha$ . P. foliis lavigatis serratis latioribus.

Icon. *Moris. hist. 3. s. 11. t. 21. f. 2.*

*angustifolia.*  $\beta$ . P. foliis pubescentibus obscure denticulatis angustis.

P. hirsuta. *Willd. sp. pl. 3. p. 227.*

Chelone hirsuta. *Mill. dict. n. 3.*

Icon. *Moris. hist. 3. s. 11. t. 21. f. 3.*

On the side of hills and in dry meadows: New York to Virginia.  $\mathcal{U}$ . July—Sept. *v. v.* About a foot high; flowers pale purple, longer than the foregoing species.

*frutescens.* 3. P. caule fruticoso, ramis angulatis superne pubescentibus, foliis lanceolatis obsolete denticulatis sessilibus glabriusculis, racemis terminalibus subcorymbosis, filamento sterili longitudinaliter barbato.—*Lambert in linn. trans. 10. p. 259.*

Icon. *Linn. trans. 10. t. 6.*

On the north-west coast. M. Lewis. Unalashka. *Pallas.*  $\mathfrak{h}$ . *v. s. in Herb. Lambert. nec non Lewis.* A small shrub, about a foot or more high; flowers purple.

512. MARTYNIA. *Gen. pl. 1010.*

*Proboscidea.* 1. M. caule ramoso, foliis alternis cordatis integerrimis villosis.—*Willd. sp. pl. 3. p. 264.*

M. alternifolia. *Lam. encycl. 2. p. 112.*

M. annua. *Sp. pl. 802.*

Icon. *Bot. mag. 1056. Mill. ic. 286.*

On the banks of the Mississippi.  $\Theta$ . July. *v. v.* Flowers large, white, speckled with purple and yellow. The singular shape of its fruit, connected with the beauty of its flowers, makes this annual a desirable plant in all collections.

513. SCHWALBEA. *Gen. pl. 1001.*

*americana.* 1. S. simplex, pubescens; foliis lanceolatis, racemo terminali, floribus alternis.—*Willd. sp. pl. 3. p. 201.*

Icon. *Lam. illustr. 520. Pluk. munt. t. 348. f. 2.*

In pine-barrens: New Jersey to Carolina.  $\mathcal{U}$ .  $\mathfrak{d}$ . June, July. *v. v.* Flowers yellowish-brown.

514. RHINANTHUS. *Gen. pl. 997.*

1. *R. corollarum* labio superiore emarginato bidentato, lacinia media labii inferioris brevissima. *Willd. sp. pl. 3. p. 188.*  
*Crista galli.*  
 Icon. *Schkuhr handb. 169. Fl. dan. 981. Engl. bot. 657.*  
 In fields and meadows: Lower Canada. ♂. June, July.  
*v. v.* Flowers yellow. *R. virginicus.* Vid. *Gerardia* & *Pedicularis pallida.*

515. BARTSIA. *Gen. pl. 996.*

1. *B. foliis alternis linearibus indivisis, superioribus lanceolatis, floralibus subovalibus summitate subdentatis, omnibus 3-nervibus, dentibus calycis acutis.* — *Willd. sp. pl. 3. p. 186. Mich. fl. amer. 2. p. 17.*  
*pallidæ.*  
 Icon. *Gmel. fl. sib. 3. t. 42.*  
 In Canada and Labrador. On the White-hills of New Hampshire. *Prof. Peck. ♀. July. v. s. in Herb. Lambert.* Flowers pale yellow; the floral leaves purple.
2. *B. foliis alternis prælongo-linearibus, floralibus ovatis longissime acuminatis 3-nervibus, omnibus indivisis, floribus bracteis brevioribus, dentibus calycis acutis.*  
*On the north-west coast: Unalashka. ♀. v. s. in Herb. Lambert.*  
*acuminata.*
3. *B. hirsutissima; foliis alternis linearibus inciso-pinnatifidis: lacinia filiformibus, bracteis membranaceis oblongis obtusis basi utrinque hastato-unidentatis floribus longioribus, calycibus brevibus pilosis, dentibus subulatis.*  
*On the banks of Clark's river. M. Lewis. ♀. July. v. s. in Herb. Lewis.* About a foot high; flowers deep yellow; floral leaves tinged with purple.  
*tenuifolia.*
4. *B. foliis alternis linearibus inciso-pinnatifidis, lacinia linearibus, bracteis dilatatis plerumque trifidis floribus longioribus, dentibus calycis rotundato-obtusis.* — *Willd. sp. pl. 3. p. 185.*  
 Icon. *Pluk. alm. t. 102. f. 5. Moris. hist. 3. s. 11. t. 13. f. 28.*  
*coccinea.*
- α. B. bracteis coccineis.*  
*β. B. bracteis intescentibus. Rarior.*  
 In wet meadows: Canada to Florida. ♂. ♀. June, July. *v. v.* Flowers yellow, involved in scarlet floral leaves, which give this plant a very elegant appearance.  
*coccinea.*  
*pallens.*

*alpina.*

5. B. foliis oppositis ovatis subcordatis obtuse-serratis rugosus, antheris hirsutis.—*Willd. sp. pl. 3. p. 187.*  
 Icon. *Fl. dan. 43. Engl. bot. 361. Schkuhr handb. 169.*  
 In Labrador. *Colmaster. ♀. July. v. s. in Herb. Dickson.* Not above six inches high; floral leaves similar to the stem leaves, purple; flowers long, of a fine deep purple.

*Gymnandra.*

6. B. foliis suboppositis ovatis crenatis, binis radicalibus petiolatis, spica oblonga, verticillis bracteatis coarctatis.—*Willd. sp. pl. 3. p. 186.*

*Gymnandra borealis. Pall. itin. 3. t. A. f. 1.**Lagotis glauca. Gært. act. petrop. 14. t. 18.*

On the mouth of the river Columbia. *M. Lewis.* In Unalashka. *Herb. Pallas. ♀. v. s. in Herb. Lewis. nec non Lambert.* About a span high; flowers pale blue. This singular plant grows on the most unfertile rocks, exposed to the most rigorous cold winds, in places where vegetation seems entirely to cease.

516. EUPHRASIA. *Gen. pl. 998.**officinalis.*

1. E. foliis ovatis obtuse-dentatis, laciniis labii corollæ inferioris emarginatis. *Willd. sp. pl. 3. p. 193.*  
 Icon. *Fl. den. 1037. Engl. bot. 1416. Sabb. hort. 3. t. 9.*  
 In Canada. *Michaux. ♂. July—Sept. v. s.* Flowers white, with purple veins.

*latifolia.*

2. E. foliis ovatis dentato-palmatis, floribus spicatis, corollis tubulosis, laciniis labii inferioris obtusis. *Willd. sp. pl. 3. p. 192.*  
 Icon. *Sabb. hort. 3. t. 7. Moris. hist. 3. s. 11. t. 24. f. 8.*  
 In Labrador. *Colmaster. ♂. July. v. s. in Herb. Dickson.* Flowers smaller, pale purple.

517. MELAMPYRUM. *Gen. pl. 999.**lineare.*

1. M. gracile; foliis inferioribus linearibus integris, floralibus lanceolatis postice dentatis, floribus axillaribus distinctis.—*Lam. encycl. 4. p. 23.*  
*M. americanum. Mich. fl. amer. 2. p. 16.*  
 In shady woods, particularly on the mountains: Canada to Carolina. ♂. July, Aug. v. v. Flowers yellow.

- 5

A. foliis ovatis denticulatis glabris. *Gronov. virg. 99.*  
On the borders of rivulets and springs. ♀. March—May. v. v. This is one of the early spring flowers; the taste resembling spring cresses. It would be desirable to have it introduced into the gardens for that purpose, as it will grow in any soil.

## TETRADYNAME SILIQUOSA.

## 531. TURRITIS. Gen. pl. 1095.

*laevigata.*

1. *T. foliis glabris, radicalibus obovatis serratis, caulinis lanceolato-linearibus integerrimis amplexicaulibus.* Willd. sp. pl. 3. p. 543.

On rocks : Pennsylvania to Virginia ; rare. ♂. May, June. v. v. Very smooth and glaucous, about a foot high.

*ovata.*

2. *T. pubescens ; foliis radicalibus petiolatis ovatis dentatis obtusis, caulinis amplexicaulibus oblongis serratis acutis.*

On rocks : Pennsylvania to Virginia. June. Resembles *T. hirsuta*.

*Napus.*

1. *B. radice caulescente fusiformi, foliis laevibus, superioribus cordato-lanceolatis amplexicaulibus, inferioribus lyratis dentatis.* Willd. sp. pl. 3. p. 547.

Icon. Engl. bot. 2146.

*Rape* frequently is found wild, but is of European origin. ♂. May, June. v. v.

*Rapa.*

2. *B. radice caulescente orbiculari depressa carnosa, foliis radicalibus lyratis scabris, caulinis integerrimis laevibus.* Willd. sp. pl. 3. p. 548.

Icon. Engl. bot. 2176.

*Turnips* are likewise apparently indigenous.

## 532. BRASSICA. Gen. pl. 10.

*lacinia.*

1. *D. foliis ternis ternatis, foliolis tripartitis linearis-oblongis incisis dentatis, radicis tuberibus moniliformibus.* — Willd. sp. pl. 3. p. 479.

*D. concatenata.* Mich. fl. amer. 2. p. 30.

In shady mountainous situations : New England to Carolina. ♀. May, June. v. v. Flowers large, pale purple.

*diphylla.*

2. *D. caulibus approximate diphylloides, foliolis ternis ovato-oblongis inaequaliter inciso-dentatis, radice dentata.* — Mich. fl. amer. 2. p. 30.

Icon. Bot. mag. 1465.

## II. DECANDRIA.

### 546. GERANIUM. Gen. pl. 1118.

*maculatum.*

1. *G. erectum, retrorsum pubescens; caule dichotomo, foliis oppositis 3—5-partitis incisis, summis sessilibus, pedunculis elongatis bifloris, petalis obovatis.*—*Willd. sp. pl. 3. p. 705.*

*Icon. Cavan. diss. 4. t. 86. f. 2. Dill. elth. t. 132. f. 159.*

In shady woods and meadows: Canada to Carolina. ♀. May—July. v. v. Flowers purple, large. This

1. H. foliis  
candri  
Willd  
Icon. B  
car. 1

species is known in some parts of the mountains by the name of *Alum-root*, on account of the astringent taste of its roots, which are very successfully employed in curing the flux among children, which is a disease very prevalent in those countries.

2. *G. diffusum, pubescens; foliis oppositis 5-lobis, lobis carolinianum. trifido-incisis, pedunculis bifloris subfasciculatis, petalis emarginatis longitudine calycis aristati, arillus villosus.*—*Willd. sp. pl. 3. p. 711.*

*G. lauuginosum. Jacq. hort. schœnb. 2. t. 140.*  
*Icon. Cavan. diss. 4. t. 84. f. 1. ♂ t. 124. f. 2. Dill. elth. t. 135. f. 162.*

In fields: Virginia to Georgia. ♂. June, July. v. v.  
Flowers small, white, with red veins.

3. *G. diffusum, pubescens; foliis oppositis 5-partitis, lobis 3-fidis incisis linearibus, pedunculis bifloris elongatis, petalis emarginatis longitudine calycis aristati, arillus pilosis, pilis glandulosis.*—*Willd. sp. pl. 3. p. 712.*

*Icon. Cavan. diss. 4. t. 78. f. 2.*  
In fields: New York. ♂. June, July. v. v. Flowers rose-coloured, larger than the foregoing one.

4. *G. diffusum, hirsutum; foliis oppositis ternatis quinatisque trifido-pinnatifidis, pedunculis bifloris, petalis integris calyce aristato duplo longioribus, arillus reticulatis.*—*Willd. sp. pl. 3. p. 714.*

*Icon. Fl. dan. 694. Cavan. diss. 4. t. 86. f. 1.*  
In shady moist places, on rocks: New York to Virginia; rare. ♂. June—Aug. v. v. Flowers pale red. It is singular, that the American plant has not that heavy scent the European is so well known by, though its other characters agree exactly.

*dissectum.*

### III. POLYANDRIA.

#### 547. HALESIA. Gen. pl. 814.

1. *H. foliis ovatis acuminatis argute serratis, floribus dodecandris, fructu subæqualiter rhomboideo-tetraptero.*—*Willd. sp. pl. 2. p. 849.*

*tetraptera.*

*Icon. Bot. mag. 910. Cavan. diss. 6. t. 186. Catesb. car. 1. t. 64.*

- diptera.* In shady woods, on the banks of rivers: Carolina.  $\frac{h}{2}$ . April, May. v. v. A handsome small tree; flowers white, resembling those of Snow-drops, from which it has been called *Snow-drop Tree* or *Silver-bell Tree*.
2. *H. foliis oblongo-ovatis obtuse-acuminatis membranaceis, floribus octandris, fructu subelliptico, aliis alternis majoribus*.—*Willd. sp. pl. 2. p. 849.*  
Icon. *Cavan. diss. 6. t. 187.*  
In shady forests of Georgia.  $\frac{h}{2}$ . April, May. v. v. s. *f.*; v. s. in *Herb. Lyon.* Flowers larger than the preceding species.
- parviflora.* 3. *H. fructu inaequaliter subtetraptero clavato floribusque parvulis*.—*Mich. fl. amer. 2. p. 40.*  
In Florida near Matanza. *Michaux.*  $\frac{h}{2}$ . +.
- grandifolium.* 548. STYRAX. *Gen. pl. 753.*
1. *S. foliis lato-ovobatis acuminatis subtus tormentosis, ramulis multifloris elongatis, pedunculis inferioribus axillaribus solitariis unifloris*.—*Willd. sp. pl. 2. p. 622.*  
*S. officinale. Walt. fl. car. 140.*  
*S. grandiflorum. Mich. fl. amer. 2. p. 41.*  
In woods, on the banks of rivers: Virginia to Georgia.  $\frac{h}{2}$ . June—Aug. v. v. A fine ornamental shrub, as the two following likewise are; flowers white.
- pulverulentum.* 2. *S. foliis subsessilibus ovalibus s. obovatis obtusis subtus pulverulento-tomentosis, floribus axillaribus et subterminalibus brevissime pedicellatis*.—*Mich. fl. amer. 2. p. 41.*  
*S. laevigatum. Bot. mag. 921.*  
In woods of Virginia and Carolina.  $\frac{h}{2}$ . June—Aug. v. v. Resembles the foregoing one. The figure referred to represents the present species, *S. laevigatum* or the following species has to my knowledge not yet been introduced into Europe.
- glabrum.* 3. *S. foliis ovali-lanceolatis utrinque acutis glabris, pedunculis axillaribus unifloris solitariis binis*.—*Cavan. diss. 6. t. 188. f. 1.*  
*S. laevigatum. Willd. sp. pl. 2. p. 624.*  
*S. americanum. Lam. encycl. 1. p. 82.*  
*S. laeve. Walt. fl. car. 140.*  
In the swamps of Virginia and Carolina.  $\frac{h}{2}$ . July, Aug. v. v. Not above three or four feet high; the number of stamens is from six to ten.

- A. *nana*. *Fraser. catal.* 1813.  
On the banks of the Missouri.  $\frac{1}{2}$ . July, Aug. v. s. *in Herb. Lewis*. From one to two feet high; flowers purple and fragrant. A very elegant little shrub.
3. A. *humilis*, *frutescens*; foliis brevissime petiolatis sine mucrone utrinque obtusis glabriusculis, spicis paniculatis elongatis pubescentibus, calycibus subsessilibus, dentibus omnibus acuminatis.—*Willd. sp. pl.* 3. p. 970.
- A. *herbacea*. *Walt. fl. car.* 179.
- A. *pumila*. *Mich. fl. amer.* 2. p. 64.  
In sandy dry fields: Carolina and Georgia.  $\frac{1}{2}$ . June, July. v. v. From two to three feet high; flowers a fine blue, smaller than No. 1.
4. A. *undique cano-tomentosa*, *humilis*; foliolis approximatis subsessilibus ovato-ellipticis acutis mucronatis, spicis paniculatis cano-tomentosis, calycibus sessilibus, dentibus omnibus acuminatis.
- On the banks of the Missouri and Mississippi.  $\frac{1}{2}$ . July, Aug. v. v. Resembles the foregoing one very much; flowers of a more beautiful blue.

*pubescens.**canescens.*562. ERYTHRINA. *Gen. pl.* 1163.

1. E. *pumila*; foliis ternatis rhomboidibus glabris, spicis longissimis, caule herbaceo inermi.—*Willd. sp. pl.* 3. p. 912.  
*Icon. Bot. mag.* 877. *Trew. chret. t.* 58. *Catesb. car.* 49. *Dill. elth. t.* 90. *f.* 106.  
In sandy woods and fields: Carolina and Florida.  $\frac{1}{2}$ . June, July. v. v. A beautiful perennial; flowers scarlet.

*herbacea.*563. LUPINUS. *Gen. pl.* 1176.

1. L. *perennis*, *repens*; caule foliisque glabriusculis, foliis digitatis: foliolis (8-9) lanceolatis obtusiusculis, calycibus alternis inappendiculatis: labio superiore emarginato; inferiore integro.—*Willd. sp. pl.* 3. p. 1022.  
*Icon. Bot. mag.* 202. *Mill. dict. t.* 170. *f.* 1.  
On dry hills, in gravelly soil: Canada to Florida.  $\frac{1}{2}$ . May—July. v. v. Flowers blue, purple, and sometimes white.
2. L. *perennis*; caule foliisque hirsutis, foliis digitatis: *nootkatensis*. foliolis (7-8) lanceolatis obtusis, calycibus verticillatis

*perennis.*

## DIADELPHIA DECANDRIA. Lupinus.

inappendiculatis : labio superiore emarginato, inferiore integro.—*Donn. catal. hort. cantab.*

*Icon. Bot. mag. 1311.*

On the north-west coast, *Menzies.* ♀. June, July. *v. s. in Herb. Lambert.* This stately perennial approaches near to the foregoing one in its general character, but the flowers are larger and beautifully variegated. In the Herbarium of A. B. Lambert, Esq. is a specimen from Professor Rudolph, of St. Petersburg, collected in Unalashka, under the name of *L. regius*, decidedly the same with the present species, the name of which sufficiently shows the grandeur of this plant in its native state.

*sericeus.*

3. *L. perennis*; caule foliisque sericeo-tomentosis, foliis digitatis : foliolis (7-8) lanceolatis acutis utrinque sericeis, calycibus subverticillatis inappendiculatis : labio superiore inciso ; inferiore integro.

On the banks of the Kooskoosky. *M. Lewis.* ♀. July. *v. s. in Herb. Lewis.* Flowers pale purple, or rose-coloured.

*argenteus.*

4. *L. perennis*; foliis digitatis : foliolis (5-7) lineari-lanceolatis acutis supra glabris subtus argenteo-sericeis, calycibus alternis inappendiculatis : labio superiore obtuso ; inferiore integro.

On the banks of the Kooskoosky. *M. Lewis.* ♀. June, July. *v. s. in Herb. Lambert.* Flowers small, cream-coloured.

*pusillus.*

5. *L. biennis*, *pusillus*, undique pilis longis albidis hirsutissimus ; foliis digitatis : foliolis (7) lineari-ellipticis supra glabris, calycibus alternis inappendiculatis : labio superiore bipartito ; inferiore integro, leguminibus sub-dispermis.

On the banks of the Missouri. ♂. June. *v. s. in Herb. Lewis.* Flowers small, a fine blue mixed with some red.

*vilosus.*

6. *L. perennis*, *vilosissimus* ; foliis simplicibus oblongis, spicis elongatis, calycibus alternis inappendiculatis : labio superiore bifido ; inferiore integro elongato.—*Mich. fl. amer. 2. p. 56.*

*L. pilosus.* *Walt. fl. car. 180.*

In dry sandy fields : Carolina and Florida. ♀. June-Aug. *v. v.* A beautiful perennial, but very shy of cultivation ; flowers very variable in colour : white, rose red, and purple.

In pine-barrens: Carolina to Florida.  $\frac{1}{4}$ . June—Aug.  
*v. s. in Herb. Leconte.* Flowers blue.
3. P. pubescens, ramosissima; foliis ternatis: foliolis ellipticis utrinque rugoso-punctatis, pedunculis axillariis folio longioribus sub-3-floris.  
On the banks of the Missouri. *M. Lewis.*  $\frac{1}{4}$ . Sept.  
*v. s. in Herb. Lewis.* Flowers very small, pale blue.
4. P. pubescens; foliis ternatis: foliolis elongato-lanceolatis, petiolo crassis, spicis axillaribus folio vix longioribus densifloris, floribus pedicellatis, bracteis pedicello vix longioribus, dentibus calycis coloratis.  
On the banks of the Missouri.  $\frac{1}{4}$ . July, Aug. *v. s.*  
Flowers bright blue, small.
5. P. undique argenteo-tomentosa; foliis ternatis: foliolis lanceolato-oblongis, spicis terminalibus interruptis, bracteis ovatis acuminatis, floribus suboppositis sessilibus.  
On the banks of the Missouri.  $\frac{1}{4}$ . *v. s.* Flowers purple: the silvery tomentum gives this plant a particularly handsome appearance.
6. P. undique villosa; foliis digitato-quinatis: foliolis lanceolatis inaequalibus planis integerrimis, spicis axillaribus densifloris, lacinia calycis lanceolatis corolla paulo brevioribus, leguminibus ensiformi-rostratis, radice fusiformi.  
On the banks of the Missouri. *M. Lewis.*  $\frac{1}{4}$ . June, July. *v. s. in Herb. Lewis.* Flowers pale blue.  
Tota planta pilis longis albidis tecta. *Radix fusiformis, crassa, exsiccatione farinosa. Caulis erectus, subramosus, teres, sulcatus, pedalis et ultra. Folia alterna,*

*canescens.**melilotoides.**tenuiflora.**lanceolata.**argophylla.**esculenta.*

petiolata, digitato-quinata. *Foliola* subpetiolata, lanceolata, utrinque acuta, integerrima, plana, supra glabra, punctis vix conspicuis confertissime adpersa, subitus pilosa, uncialia. *Petioli* communes teretes, folio longiores. *Stipulae* persistentes, ad basin petiolorum oppositae, oblongo-lanceolatae, acutae. *Spicæ* axillares, pedunculatae, densifloræ, bracteatae, foliis longiores. *Bractæ* lato-ovatae, acuminatae, calyce breviores. *Flores* sessiles, cærulei, magnitudine et figura *Vicia sativa*. *Calyx* hirsutissimus, 5-fidus s. profunde 5-dentatus: dentibus linear-lanceolatis: 2. lateralibus subfalcatis: inferius latior. *Corolla*: *Verillum* obovatum, interne utrinque glandula instructum, calyce paulo longiore. *Aë* semi-ovatae, vexillo breviores. *Carina* oblonga. *Legumen* calyce tectum, monospermum, hirsutum, rostro ensiforme, glabro, calyce longiore instructum. *Semen* reniforme, nigrum.

It approaches very near to *P. pentaphylla* Willd. sp. pl. 3. p. 1352. which is fully described and figured by B. Jussieu in *Act. par.* 1744. p. 381. t. 17. But not only the botanical difference, but the medical use made of the Mexican plant, proves their distinctness. The present plant produces the famous *Bread-root* of the American Western Indians, on which they partly subsist in winter. They collect them in large quantities, and if for present use, they roast them in the ashes, when they give a food similar to yams: if intended for winter use, they are carefully dried, and preserved in a dry place in their huts. When wanted for use, they are mashed between two stones, mixed with some water, and baked in cakes over the coals. It is a wholesome and nourishing food, and, according to Mr. Lewis's observation, agreeable to most constitutions; which, he observed, was not the case with the rest of the roots collected by those Indians for food. This root has been frequently found by travellers in the canoes of the Indians, but the plant which produces it has not been known until lately.

*Lupinellus.*

7. *P. foliis quino-digitatis: foliolis angustissime linearibus, spica pauciflora, leguminibus ovoideis, uncinat-mucronatis, nervoso-rugosis.* — *Mich. fl. amer.* 2. p. 58.

In barren fields of Carolina.  $\frac{1}{4}$ . v. s. in *Herb. Lyon.* Flowers very small. The leaves of the whole genus are covered with resinous dots.

590. TEPHROSIA. *Pers. syn. 2. p. 329.*

1. *T. erecta*, candicanti-villosa ; foliolis (17—21) ovali-oblongis acuminatis, racemo terminali brevi subsessili, leguminibus retrofalcatis villosis, calycibus lanatis.—  
*Pers. syn. 2. p. 329.*

*Galega virginiana. Pluk. alm. t. 23.f. 2.*

In sandy and dry woods : Canada to Florida. 24. June, July. v. v. About a foot high ; flowers very handsome, rose-coloured and yellowish white.

2. *T. prostrata*, pubescens ; foliis pinnatis quinis subsessiliibus : foliolis cuneato-ovatius obtusissimis supra glabris, subtus sericeis, pedunculis oppositifoliis elongatis sub-3-floris, leguminibus rectiunculis.

*Galega villosa. Mich. fl. amer. 2. p. 67?*

In Georgia. *Enslen.* 24. July, Aug. v. s. in *Herb. Enslen.* Flowers purple. The singular circumstance of the nearly sessile leaves, gives it the appearance of a trifoliate plant, the lower pair representing stipulæ. Though Michaux's description answers very well in any other respect, I was led to doubt by his not mentioning the number of leaves, which is one of the most striking characters.

3. *T. gracilis*, humifusa, pubescens ; foliolis (13—15) oblongo-ellipticis truncato-obtusis mucronatis, pedunculis oppositifoliis elongatis 3—5-floris, leguminibus oblongis falcatis hispidis.

*Galega hispida. Mich. fl. amer. 2. p. 68.*

*Galega spicata. Walt. fl. car. 188.*

In pine-woods and on slate-hills : Virginia to Georgia. 24. July—Sept. v. v. Flowers pale red.

*virginiana.*

*hispida.*

*sericeus.*

591. LOTUS. *Gen. pl. 1212.*

1. *L. foliis ternatis subsessilibus oblongis acutis sericeo-vilosis*, pedunculis axillaribus unifloris folio longioribus, flore unibracteato, calycinis lacinias linearibus, legume glabro longissimo.

On the banks of the Missouri. ♂. v. s. Flowers yellow.

592. MEDICAGO. *Gen. pl. 1214.**lupulina.*

1. *M. spicis ovalibus, leguminibus reniformibus monospermis stipulis integerimis, foliolis obovatis, caulinibus procumbentibus.*—*Willd. sp. pl. 3. p. 1406.*

Icon. *Schkuhr handb. t. 212.*

In gravelly soil, on road sides: Canada to Carolina. O. June—Sept. *v. v.* Flowers small, yellow.

*intertexta.*

2. *M. pedunculis subbifloris, leguminibus cochleatis ovalibus, aculeis pubescentibus setaceis distichis adpresso, stipulis ciliato-dentatis, foliolis obovatis dentatis.*—*Willd. sp. pl. 3. p. 1411.*

*M. polymorpha intertexta. Sp. pl. 1098.*

Icon. *Schkuhr handb. 212. b.*

In sandy fields: Carolina. July, Aug. *v. v.* Flowers yellow.

*Note.*—In addition to the observations under *Psoralea esculenta*, p. 475. it may be interesting to state, that A. B. Lambert, Esq. raised in the summer of 1812 a number of plants, the seeds of which were taken out of a specimen collected in the year 1805 by M. Lewis, Esq. Also, that this highly interesting plant is now growing at Messrs. Frasers, Sloane Square.

Common in fields and grass plots; probably introduced.

♀. April—July. v. v. Flowers yellow; it is gene-  
rally known by the name of *Dandelion*. There is  
another species, found in shady wet woods, which I  
consider indigenous, but I have no materials in hand  
to give its description.

597. CHONDRILLA. *Gen. pl.* 1235.

1. C. glaberrimum, multicaule; foliis linear-lanceolatis in-  
tegerrimis, pedunculis 2-3. longissimis subaphyllis uni-  
floris.

In Lower Virginia. ♂. Aug. Sept. v. v. Flowers  
bright yellow; pappus turns a pale red; the peduncles  
are from six to ten inches long, with a few linear, small  
leaves.

*lævigata.*

598. PRENANTHES. *Gen. pl.* 1236.*junccea.*

1. P. caule virgatim-ramosissimo sulcato glabro, foliis caulinis reniatis subulatis brevissimis, ramulis unifloris, calycibus 5-fidis 5-floris: foliolis margine membranaceis.

On the banks of the Missouri.  $\frac{1}{4}$ . v. s. Flowers purple; it has a striking resemblance to *Chondrilla junccea*; but the leaves are shorter, and the pappus entirely sessile; the radical leaves I have not seen.

*altissima.*

2. P. caule ramoso, foliis trilobis petiolatis angulatis denticulatis margine scabris, racemis axillaribus, floribus nutantibus, calycibus sub-5-floris.—*Willd. sp. pl.* 3. p. 1537.

Icon. *Pluk. alm.* t. 317. f. 2.

In shady woods: Canada to Virginia.  $\frac{1}{4}$ . July—Sept. v. v. Flowers yellow. Generally a very tall robust plant.

*cordata.*

3. P. caule superne paniculato, foliis petiolatis cordatis dentatis ciliatis, floralibus sessilibus oblongis integerrimis, panicula laxa racemiflora, floribus nutantibus, calycibus 6-fidis 6-floris.—*Willd. hort. berol.* 25.

In shady woods, about rocks; New York to Virginia.  $\frac{1}{4}$ . Aug.—Oct. v. v. Flowers pale yellow. It is an intermediate species between the preceding and *P. alba*.

*virgata.*

4. P. glabra; caule simplicissimo, foliis omnibus lyrato-sinuatis, racemulis subsecundis, floribus pendulis, calycibus glabris 8-fidis 10-floris.—*Mich. fl. amer.* 2. p. 83.

*P. autumnalis.* *Walt. fl. car.* 193.

In sandy fields, near ditches: New Jersey to Carolina.  $\frac{1}{4}$ . Aug. Sept. v. v. From three to six feet; flowers pale purple. This plant has a very fine effect in large plantations. Michaux quotes Gronovius; but his *P. autumnalis* belongs to *P. rubicunda*.

*simplex.*

5. P. caule simplicissimo, foliis superioribus linear-lanceolatis integerrimis, radicalibus lanceolatis sinuatis, ramo terminali simplicissimo, floribus nutantibus, calycibus sub-8-floris.

*P. virgata.* *Willd. sp. pl.* 3. p. 1533.

In Carolina. *Enslen.*  $\frac{1}{4}$ . July, Aug. v. s. in *Herb. Enslen.* About two feet high; flowers purple.

eighteen inches high.

9. *P. foliis dentatis asperis, radicalibus palmato-sinuatis, caulinis longe petiolatis sinuato-pinnatifidis subtrilobis: lacinia intermedia 3-partita, summis lanceolatis, racemis terminalibus subpaniculatis brevibus nutantibus, calycibus 8-fidis 12-floris.*

On the mountains of Virginia and Carolina. 4. Aug.—  
Oct. v. v. About two feet high; flowers pale  
purple. This plant is known by the inhabitants under  
the name of *Lion's-foot*, and is in high esteem as a  
specific in curing the bite of the rattlesnake. During  
my travels through the mountains of Virginia, I had  
an opportunity of being a witness of the efficacy of  
this remedy. A man living in Cove-mountains, near  
the Sweet-springs, was bit in the foot by a Moccasin  
snake, a species considered the most dangerous. An  
inflammation and swelling of his whole leg took place  
immediately; but by taking the milky juice of this plant  
boiled in milk, inwardly, and applying to the wound the  
steeped leaves, which were very frequently changed,  
he was cured in a few days. As this plant deserves

*crepulina.*

*alba.*

*rubicunda.*

*Serpentaria.*

the attention of the physician, I have given a figure of it, it being frequently confounded with another species of this genus, which probably may not have quite so strong an effect, as the inhabitants are very careful to have the true *Lion's-foot*, in case of accidents happening, and usually call the other species of *Prenanthes* *False Lion's-foot*. Gronovius, in his Flora, pag. 113, mentions Dr. Witt's *Snake-root* under *P. autumnalis* or Willdenow's *rubicunda*, as a remedy for the bite of the rattlesnake; which shows that he had information of the use made of this plant, though he did not know the genuine species. In the Banksian Herbarium is a specimen of *P. rubicunda*, with the following note in the hand-writing of Clayton: "This is the rattlesnake-root that Dr. Witt supposes to be the best cure for the bite of the snake, a very odd plant, hardly two leaves alike upon a plant, as to shape or the indentings of the leaves."

*racemosa.*

10. *P. caule simplici, foliis omnibus indivisis lævibus, radicibus ovali-lanceolatis, caulinis semiamplexicaulibus, racemo oblongo hirsutissimo, fasciculis cernuis, calycibus 8-9-partitis 9-12-floris.* *Mich. fl. amer.* 2. p. 84.

On road sides, in shady woods: Virginia and Carolina.  
 ♂. July—Sept. v. v. Flowers very small, blue.  
 This plant has been used for curing the bite of the  
 rattlesnake, in the same manner as *Prenanthes Ser-*  
*pentaria*, and is known by the name of *Gall of the*  
*Earth*.

- acuminatus.* 7. S. pedunculis subsquamosis, floribus paniculatis, foliis  
 radicalibus subruncinatis, caulinis ovatis acuminatis  
 petiolatis medio denticulatis.—*Willd. sp. pl. 3.*  
*p. 1521.*

*Lactuca villosa. Jacq. hort. schœnb. 3. t. 367?*  
 In low shady places: Pennsylvania to Virginia. ♂. Aug.  
 Sept. v. v. Flowers small, blue.

- pallidus.* 8. S. racemo composito terminali, foliis lanceolato-ensi-  
 formibus amplexicaulibus dentatis. *Willd. sp. pl. 3.*  
*p. 1521.*

*Lactuca canadensis. Sp. pl. 1119.*  
*Icon. Rob. ic. 148 & 151.*

On road sides and in woods: Canada to New England.  
 ♀. July—Sept. v. v. Flowers small, yellow.

- pulchellus.* 9. S. pedunculis squamosis, floribus corymboso-racemosis,  
 foliis caulinis cordato-amplexicaulibus ovato-oblongis  
 acutis integerrimis glabris.  
 On the banks of the Missouri. ♀. Sept. v. s. Flowers  
 large, beautiful blue.

#### 601. HIERACIUM. *Gen. pl. 1238.*

*pusillum.*

1. H. pusillum, villosissimum; caule simplici erecto uni-  
 floro remote subbisfoliato, foliis lanceolatis attenuatis  
 acutis integerrimis, caulinis linearibus, calyce villosi-  
 simo.—*Willd. sp. pl. 3. 1561.*

In Labrador. *Colmaster.* ♀. July. v. s. in *Herb.*  
*Dickson.* A very small plant; flowers, as in all the  
 following species, yellow, the size of a common daisy.  
 It strongly resembles *H. alpinum*, and is probably only  
 a diminutive variety thereof.

2. H. scapo nudo corymboso-paniculato glabro, pedicellis  
 filiformibus, foliis obovato-lanceolatis supra rarer pi-  
 losis, subtus nudis margine ciliatis glanduloso-denticu-  
 latis, venis coloratis, calycibus glabris.—*Willd. sp.*  
*pl. 3. p. 1570.*

In shady fertile woods: Canada to Carolina. ♀. June  
 —Aug. v. v. Flowers middle size, of a beautiful

About two feet high ; stem solid, smooth, purple ; peduncles tomentose ; flowers small, but very closely collected in a corymbose panicle, of a beautiful pale purple inclining to flesh colour.

17. *E. foliis petiolatis ternis quaternis ovatis utrinque attenuatis serratis scabriusculis.* *Willd. sp. pl. 3. p. 1756.*

In swamps and on the banks of rivers : New York to Virginia. ♀. Aug.—Oct. v. v. A tall plant without branches.

18. *E. glabellum* ; *foliis quaternis ovali-lanceolatis utrinque acuminatis subfalcatis rariter serratis, squarnis calycinis extimis brevibus ovalibus.* *Mich. fl. amer. 2. p. 99.*

On the banks of the Ohio and Scioto rivers. *Michaux.*  
♀. +. A tall plant, resembling *E. album*.

\*\* *Calyculus plus quam 5-floris.*

19. *E. foliis petiolatis quaternis quinisve ovato-lanceolatis serratis rugoso-venosis scabriusculis, caule fistuloso.* *Willd. sp. pl. 3. p. 1759.*

Icon. *Rob. ic. 217. Corn. canad. t. 72. Moris. hist. 3. s. 7. t. 13. f. 4. Dod. mem. t. 217.*

In swamps, wet woods, and on the banks of rivulets : Canada to Virginia. ♀. Aug.—Oct. v. v. Very tall ; flowers purple.

20. *E. foliis petiolatis quaternis quinisve ovato-lanceolatis inaequaliter serratis subtus pubescentibus, caule solido sulcato.* *Willd. sp. pl. 3. p. 1760.*

Icon. *Herm. parad. t. 158. Moris. hist. 3. s. 7. t. 18. f. 3.*

In swamps and near ponds and rivulets : Canada to Carolina. ♀. Aug.—Oct. v. v. Stem marked with purple lines, not so tall as the preceding species ; flowers purple.

21. *E. foliis petiolatis quaternis quinisve ovatis acuminatis serratis utrinque scabris, caule solo tereti.* *Willd. enum. 853.*

*E. maculatum. Hortul.*

In the Blue-mountains : New Jersey and Pennsylvania.  
♀. Aug.—Oct. v. v. Not so tall as the preceding ; flowers purple, very ornamental.

22. *E. foliis petiolatis ternis quaternis ovato-lanceolatis, verticillatum.*  
*basi cuneatis inaequaliter serratis glabriusculis, caule solo lœvi.* *Willd. sp. pl. 3. p. 1760.*

On the banks of rivers and in swamps; frequent: New York to Carolina. *v. v.* From four to six feet high; flowers purple. It differs from No. 18 in its stem, broader and smoother leaves, and white calyces; from No. 19 in its stem and smooth leaves.

- perfoliatum.* 23. *E. foliis connato-perfoliatis oblongis sursum angustatis serratis rugosis subtus tomentosis, caule villoso.* — *Willd. sp. pl. 3. p. 1761.*

*E. connatum. Mich. fl. amer. 2. p. 99.*  
*Icon. Pluk. alm. t. 87. f. 6.*

In low meadows and about springs: Canada to Florida. *v. v.* Aug.—Oct. From two to three feet high; flowers white. The whole plant is exceedingly bitter, and has been used for ages past by the natives and inhabitants in intermitting fevers. It is generally known by the name of *Thorough-wort* or *Bone-set*. I have stated a case of its efficacy in those diseases in a letter to William Royston, Esq who inserted it in the Medical and Physical Journal. In which I stated the benefits derived from this plant, by myself and others during my stay in the neighbourhood of lake Ontario, when both the influenza and lake fever (similar to the yellow fever) were raging among the inhabitants. It is generally used as a decoction, or, which I consider the more effectual way, as an infusion in gin or rum.

- cœlestinum.* 24. *E. foliis petiolatis cordato-ovatis obtusiusculis triplineribus obtuse serratis, floribus corymboosis.* *Willd. sp. pl. 3. p. 1764.*

*Icon. Dill. elth. t. 114. f. 159.*

In mountain-woods of Virginia to Carolina. *v. v.* Flowers large, beautiful blue.

On road sides and in newly cleared grounds: Canada to  
Carolina. O. July, Aug. v. v. From two to five  
feet high. This is one of the plants which spring up  
in the most remote western countries, when the land  
is cleared of timber, particularly when the brush-  
wood is burnt on the ground; from which circumstance  
it is generally known by the name of *Fire-weed*. I  
have frequently found it covering a square piece of  
cleared land, when there was not a single plant to be  
found in any other place for a considerable distance  
round it.

10. *S. caule erecto hirto, foliis lanceolatis scaberrimis rugosis inferioribus adpresso-serratis, racemis paniculatis secundis patentissimis.* *Willd. sp. pl. 3. p. 2058. Mill. dict.*  
*S. altissima* *s.* *Ait. kew. 3. p. 213.*  
*Icon. Dill. edit. t. 308. f. 396.*  
 In dry barren soil: Canada to Virginia.  $\frac{v}{u}$ . Aug.—Oct. v. v.; v. s. in *Herb. Banks. et Lambert.*
11. *S. caule erecto villosa, foliis lanceolatis molliusculis serratis enervibus, racemis paniculatis secundis.* *Herb. Banks. ms.*  
*S. altissima* *g.* *Ait. kew. 3. p. 213.*  
*S. pilosa. Mill. dict.*  
 In fields and woods; frequent.  $\frac{v}{u}$ . Aug.—Oct. v. v.; v. s. in *Herb. Banks. et Lambert.* From eighteen inches to three feet high.
12. *S. caule erecto hirto sulcato, foliis oblongis utrinque attenuatis acuminatis, supra glabris, subtus rugosis scabris, medio adpresso-serratis, racemis secundis.* —*Willd. sp. pl. 3. p. 2059.*  
 In old fields and about fences: Pennsylvania to Virginia.  $\frac{v}{u}$ . Aug.—Oct. v. v.; v. s. in *Herb. Lambert.*
13. *S. caule erecto tereti hirto, foliis oblongis acutis subamplexicauli-sessilibus glabris margine scabris rarer obsolete dentatis, panicula nuda secunda pyramidata, ramis reflexis, pedunculis glabris.*  
 In pine-barrens of Georgia. *Enslen.*  $\frac{v}{u}$ . Aug. Sept. v. s. in *Herb. Enslen.* About two feet high; the leaves decrease toward the beginning of the panicle, which consists of lively yellow and very small flowers.
14. *S. caule erecto tomentoso, foliis caulinis lanceolatis hispidis integerrimis, radicalibus subcuneiformibus serratis, racemis paniculatis secundis.* *Willd. sp. pl. 3. p. 2059.*  
 In sandy and barren fields; common: Canada to Carolina.  $\frac{v}{u}$ . Aug.—Oct. v. v.; v. s. in *Herb. Banks.* The whole plant has a gray aspect, and is about a foot, or sometimes two, high.
15. *S. caule erecto glabro, foliis ellipticis serratis glabris, radicalibus oblongo-spathulatis, racemis paniculatis secundis patentibus, pedunculis pubescentibus.* *Willd. sp. pl. 3. p. 2059.*  
 In shady woods, in fertile soil: New York to Virginia.  $\frac{v}{u}$ . Sept. Oct. v. v. Two feet high.

*rugosa.**villosa.**scabra.**pyramidata.**nemoralis.**patula.*

- ulmifolia.* 16. S. caule erecto glabro striato, foliis ellipticis profunde serratis acuminatis, subtus villosis, radicalibus obovatis, racemis paniculatis secundis, pedunculis villosis, ligulis abbreviatis.—*Willd. sp. pl. 3. p. 2060.*  
In swamps and shady woods: New York to Virginia.  
4. Aug.—Oct. v. v.
- arguta.* 17. S. caule erecto glabro, foliis glabris argute inaequaliter serratis, caulinis ellipticis, radicalibus ovato-oblongis, racemis paniculatis secundis, ligulis elongatis. *Willd. sp. pl. 3. p. 2060.*  
In woods and meadows: Canada to Virginia. 4. Sept.—Nov. v. v.; v. s. in *Herb. Banks.*
- juncea.* 18. S. caule erecto glabro, foliis lanceolatis glabris margine scabris, inferioribus serratis, racemis paniculatis secundis. *Willd. sp. pl. 3. p. 2060.*  
In sandy fields and woods: New Jersey to Carolina.  
4. Aug.—Oct. v. v.; v. s. in *Herb. Banks.*
- elliptica.* 19. S. caule erecto glabro, foliis ellipticis levibus serratis, racemis paniculatis secundis, ligulis mediocribus. *Willd. sp. pl. 3. p. 2060.*  
S. latissimifolia. *Mill. dict.*  
In shady woods, among rocks: New York to Virginia.  
4. Aug.—Oct. v. v.; v. s. in *Herb. Banks.*
- asperata.* 20. S. caule paniculato-corymboso, racemis suberectis, floribus adscendentibus, foliis lanceolatis serratis scabris. *Herb. Banks. mss.*  
In Canada. 4. v. s. in *Herb. Banks.*
- recurvata.* 21. S. caule erecto pubescente, foliis lanceolatis serratis margine scabris, racemis elongatis secundis recurvatis paniculatis. *Willd. enum. 889.*  
In shady woods: Pennsylvania and Virginia. 4. Sept.—Nov. v. v.
- sempervirens.* 22. S. caule erecto glabro, foliis linear-lanceolatis subcarnosis levibus integerrimis margine scabris, racemis paniculatis secundis, pedunculis pilosis. *Willd. sp. pl. 3. p. 2060.*  
Icon. *Pluk. alm. t. 235. f. 5.* *Moris. hist. 3. s. 7. t. 23. f. 15.*  
In swamps and on the banks of rivers: Canada to Pennsylvania. 4. Sept.—Nov. v. v.; v. s. in *Herb. Banks. et Lambert.*
- virgata.* 23. S. caule glabro simplicissimo, foliis subcuneato-lanceolatis obtusis integerrimis glaberrimis appressis, supe-

rioribus sensim minoribus, ramis paniculae elongatis apice racemifloris, pedunculis glabris secundis.—*Mich. fl. amer. 2. p. 117.*

In shady wet woods of Lower Carolina and Georgia.  
*U. Aug.—Oct. v. v.* About two foot high; extremely smooth and slender.

24. *S. caule erecto pubescente, foliis linear-lanceolatis integrerrimis glabris margine scabris, racemis paniculatis secundis.* *Willd. sp. pl. 3. p. 2061.*

*Icon. Pluk. alm. 116. f. 6.*

In dry sunny situations, on fertile woodlands: Canada to Carolina; principally throughout the Allegany mountains. *U. Aug. Oct.—v. v.; v. s. in Herb. Banks.* This is most generally and principally known among the inhabitants by the name of *Golden-rod*, and used as a wholesome tea. The flowers, gathered when fully expanded, and carefully dried, give a most agreeable substitute for tea, which for some time has been an article of exportation to China, where it fetches a high price.

25. *S. caule erecto tereti aspero, foliis arcte sessilibus reflexis linear-lanceolatis mucronatis subitus subcarinatis margine asperis, panicula racemis recurvatis.* —*Mich. fl. amer. 2. p. 117.*

In open swamps of Virginia and Carolina. *U. Aug. Sept. v. v.*

\*\*\* *Racemis erectis.*

26. *S. glabra, suffruticosa; foliis lanceolatis obtusis enervibus, pauciflosculo-panicula composita multiflora, fasciculis erectis, calycibibus angusto-oblongis 5-floris, radio unico.* —*Mich. fl. amer. 2. p. 116.*

In the sand-barrens of Virginia and Carolina. *U. Aug.—Oct. v. v.*

27. *S. caule foliisque ellipticis pilosis, inferioribus serratis, ramis foliolosis, racemis erectis, foliolis calycinis obtusis.* *Willd. sp. pl. 3. p. 2061.*

*Icon. Pluk. alm. t. 114. f. 3.*  
 In woods and on dry hills: Canada to Carolina. *U. Aug.—Oct. v. v.; v. s. in Herb. Banks.* It is easily distinguished from the rest, by the short and close racemes and white rays.

28. *S. caule erecto villoso, foliis ellipticis scabriusculis petiolatis, racemis erectis, ligulis elongatis.* *Willd. sp. pl. 3. p. 2062.*

*odora.*

*retrorsa.*

*bicolor.*

*petiolaris.*

In dry sandy soil : New Jersey to Carolina. 2. Sept.—Nov. v. v.; v. s. in *Herb. Banks.*

*stricta.*

29. S. caule erecto glabro, foliis caulinis lanceolatis integerimis glabris margine scabris, radicalibus serratis, racemis paniculatis erectis, pedunculis glabris. *Willd. sp. pl. 3. p. 2062.*

In sandy woods : New Jersey to Carolina. 2. Aug.—Nov. v. v.; v. s. in *Herb. Banks. et Lambert.* About two feet high, very smooth.

*lanceolata.*

30. S. caule hirto angulato ramosissimo, foliis lanceolato-linearibus integerrimis erectiusculis 3—5-nervibus scabriusculis : nervis subtus pilosis, axillis nudis, corymbis terminalibus fastigiatis, ramulis capitatis, ligulis altitudine disci.—*Willd. sp. pl. 3. p. 2062.*

*Chrysocoma graminifolia. Sp. pl. 1178.*

In fields and meadows, on the side of woods and rivers: Canada to Pennsylvania. 2. Sept.—Nov. v. v.; v. s. in *Herb. Banks. et Lambert.* From four to five feet high ; flowers small.

*tenuisolia.*

31. S. caule seabro angulato corymboso-ramoso, foliis angustissime-linearibus patulis obsolete 3-nervibus scabris, axillis foliosis, corymbis terminalibus fastigiatis, ramulis capitatis, ligulis disco vix altioribus.

*S. lanceolata* β. minor. *Mich. fl. amer. 2. p. 116.*

In pine-barrens : New Jersey to Carolina. 2. Sept. Oct. v. v. Not above a foot high ; leaves very small and narrow.

*Sarothræ.*

32. S. caule angulato scabro inferne nudo, superne corymboso, ramis summitate paucifloris, foliis linearibus stricte-appressis obsolete 3-nervibus utrinque scabris, axillis nudis, ligulis disco duplo longioribus.

On the plains of the Missouri. *M. Lewis.* 2. Sept. v. s. in *Herb. Lewis.* About a span high ; resembling *Hypericum Sarothra* in general habit very much. This and the two preceding have a great affinity to one another ; but I consider them good and permanent species, as there are no intermediate varieties, which might lead to the suspicion that all belong to one genuine species.

*cæsia.*

33. S. caule lœvi erecto, foliis lanceolatis glabris, racemis erectis, ligulis mediocribus. *Willd. sp. pl. 3. p. 2062.*

Icon. *Dill. elth. t. 307. f. 395.*

- A. squarrosus. *Herb. Banks. mss.*
- In dry, sandy and gravelly fields, and among rocks : Pennsylvania to Carolina. 4. Aug.—Nov. v. v.; v. s. in *Herb. Banks.* Resembles the preceding, but is more branching and of lower growth; the stems are rough, and generally of a purple colour; leaves more crowded, smaller, and more reflex; flowers of the same colour, but smaller, and not raised on almost naked peduncles.
7. A. foliis angusto-linearibus enervibus impunctatis glabris *graminifolius.* erectis, ramulis terminalibus nudiusculis 1-floris, calycibus laxis discum subæquantibus.—*Herb. Banks. mss.*
- At Hudson's Bay. 4. Aug. Sept. v. s. in *Herb. Banks.* Flowers pale-purple; not above six inches high.
8. A. foliis linearibus enervibus punctatis scabris reflexo-patentibus, ramis corymboso-fastigiatis foliosis, calycibus imbricatis brevibus, radiis disco subæqualibus.—*Willd. sp. pl. 3. p. 2024.*
- In dry shady woods and exsiccated swamps : Pennsylvania to Virginia. 4. Sept.—Nov. v. v. About eighteen inches or two feet high; flowers the size of a large daisy; rays white or faintly purple.
9. A. foliis lineari-lanceolatis albo-villosis, caule ramoso villosi, ramis recurvato-patulis, ramulis subsecundis unifloris, calycibus oblongis laxis imbricatis, squamis lanceolatis mucronatis.—*Willd. sp. pl. 3. p. 2025.*
- A. villosus. *Mich. fl. amer. 2. p. 113.*
- In natural meadows of the Illinois country. 4. Aug.—Oct. +.
10. A. glaberimus, parviflorus; caule paniculato, ramis multifloris, foliis lineari-subulatis, calycibus cylindraceis, ligulis radii minutis. *Mich. fl. amer. 2. p. 111.*
- In salt-marshes : Pennsylvania to Carolina. 4. Aug.—Nov. +.
11. A. foliis lineari-lanceolatis utrinque attenuatis acuminatis, caule pubescente paniculato erecto, ramis paucifloris, calycibus imbricatis, squamis linearibus acutis adpresis. *Willd. sp. pl. 3. p. 2025.*

*linifolius.**pilosus.**subulatus.**foliolosus.*

Icon. *Dill. elth. t. 35. f. 39?*

In dry barren fields and on road sides : Canada to Carolina. ♀. Aug.—Oct. v. v.; v. s. in *Herb. Lambert.* Flowers small, white; scarcely a distinct species from the following. There is no specimen of it in the Banksian Herbarium.

*tenuifolius.*

12. A. foliis linear-lanceolatis utrinque attenuatis margine hispidis, caule glabro ramoso erecto, ramulis unifloris, calycibus imbricatis, squamis oblongis acutis laxis. *Willd. sp. pl. 3. p. 2026.*

Icon. *Pluk. alm. 78. f. 5.*

On road sides and barren fields. Aug.—Nov. v. v.; v. s. in *Herb. Banks. et Lambert.* Flowers the same as the preceding, which I consider only a variety of the present species.

*dumosus.*

13. A. foliis linearibus glabris, ramulorum brevissimis, ramis paniculatis, calycibus cylindraceis arcte imbricatis. *Willd. sp. pl. 3. p. 2026.*

*violaceus.*

- α. A. radio pallide violaceo, caule pubescente. *Ait. kew. 3. p. 202.*

*albus.*

- β. A. radio albo, caule glabro. *Ait. l. c.*

Icon. *Herm. parad. 95. Pluk. alm. t. 78. f. 6.*

In dry barren fields and sand-barrens : New England to Carolina. ♀. Aug.—Nov. v. v.; v. s. in *Herb. Banks. et Lambert.* Flowers small, rays white, disk yellow.

*ericoides.*

14. A. foliis linearibus glaberrimis, ramulorum subulatis approximatis, caulinis elongatis, calycibus subsquarrosis, foliolis acutis, caule glabro. *Willd. sp. pl. 3. p. 2027.*

In barren grounds and on road sides ; common : Canada to Carolina. ♀. Aug.—Nov. v. v.; v. s. in *Herb. Banks. et Lambert.* Flowers the size and colour of the preceding.

*mulfiflorus.*

15. A. foliis linearibus glabriusculis, caule ramosissimo difuso pubescente, ramulis secundis, calycibus imbricatis, squamis oblongis squarrosis acutis. *Willd. sp. pl. 3. p. 2027.*

Icon. *Dill. elth. t. 36. f. 40.*

In dry fields, and on road sides : Canada to Carolina. ♀. Aug.—Nov. v. v.; v. s. in *Herb. Banks. et Lambert.* Probably only a variety of the preceding.

*ciliatus.*

## 637. DONIA. Ait. kew. ed. 2. t. 4. p. 82.

- I. D. herbacea; foliis oblongis amplexicaulis serratis, calycinis squamis apice filiformibus revoluto-squarrosa.

In open prairies, on the banks of the Missouri. M. Lewis. 4. Aug. Sept. v. s. in Herb. Lewis; v. v. cult. Flowers yellow, resembling those of *Inula*. The whole plant is viscous, and has a strong resiniferous or balsamic scent.

*Caulis* erectus, teres, albidus, corymboso-ramosus. *Rami* alterni, angulati, apice uni- aut triflori. *Folia* alterna, basi dilatata, amplexicaulia, oblonga, acuta aut obtusa, serrata, glabra, utrinque squamulis punctiformibus resiniferis obsita. *Flores* 1—3. in summitate ramearum, corymbosi, flavi, ante explicationem copiose resiniferi. *Calyx* hemisphaericus, arcte imbricatus: *Squamis* apice filiformibus, revolutis et quasi caput Medusae referentibus. *Flosculi* radii linearilanceolatae, acutae.  *Semina* oblongo-obovata. *Pappus*: aristis 2—4. deciduis. *Receptaculum* platuum, nudum, favulosum.

It approaches near to *Aster glutinosus* Cav. ic. 2. p. 53. t. 168. which is the *Donia glutinosa* Ait. kew. ed. 2. t. 4. p. 82. which I distinguish by the following diagnosis: *Donia glutinosa*: frutescens; foliis oblongo-obcuneatis sessilibus serratis, calycinis squamis linearibus erectis.

## 638. BCEBERA. Willd. sp. pl. 3. p. 2125.

- I. B. caule paniculato, foliis oppositis subbipinnatis glabris acutis.—Willd. sp. pl. 3. p. 2125. chrysanthemoides.

*Tagetes* papposa. Mich. fl. amer. 2. p. 132.

*Tagetes* pumila. Hort. pisani.

*Dyssodia* glandulosa. Cav. demonstr. bot. p. 202.

On the overflowed banks of the Missouri and Mississippi. ①. Aug. Sept. v. s. Flowers small, golden-yellow.

## 639. ACTINELLA. Pers. syn. 2. p. 469.

Actinea. Juss. in annal. mus. 2. p. 425.

*lanata.*

1. A. undique lanato-tomentosa; foliis linearibus superne pinnatifidis, pedunculis elongatis unifloris, radiis bidentatis, seminibus glabris 5-gonis.

On the high lands of the Kooskoosky. M. Lewis. 4.  
June, July. v. s. in Herb. Lewis. Flowers orange-yellow. It resembles in habit Jussieu's *Actinea*, in *Annal. du mus. 2. t. 61. f. 2.*

*Planta* omnibus partibus tomento albo lanato tecta. *Caulis* ramosus, teres. *Rami* alterni, superne subdivisi. *Ramuli* uniflori. *Folia* caulinis alterna, linearia, superne dilatato-pinnatifida, dentata; ramea linearis, integra. *Pedunculi* terminatis, elongatis, superne incrassati. *Flores* aurantiaci, magnitudine *Tagetidis erectae*. *Calyx* oblongus, simplex, polyphyllus: foliola 12—14. linearis-lanceolata, acuta. *Corollulae* radii 12—14. oblongae, bidentatae, nervosae: disci tubulosae, concolores. *Pappus*: paleis 4—6. scariosis, albidis, acutis, interdum laceris. *Semina* prismatico-oblonga, 5-gona.

## SYNGENESIA SUPERFLUA. Bupthalmum.

On the sea-coast: Virginia to Florida.  $\frac{1}{2}$ . Aug. Sept. v. v. A shrub about five feet high.

*angustifoli-*  
*um.*

2. B. foliis alternis linearibus superne latioribus integerrimis glabris, calycinis foliolis acute-lanceolatis.—*Herb. Banks. mss.*

In Georgia and Florida. *Bartram.*  $\frac{1}{2}$ . v. s. in *Herb. Banks.*

*sagittatum.*

3. B. tomentosum; foliis radicalibus longissime petiolatis oblongis sagittatis integerrimis subtriangularibus, caulinis oblongis in petiolum attenuatis, caule subtrifloro, calycinis foliolis exterioribus disco longioribus.

On dry barren hills, in the Rocky-mountains. *M. Lewis.*  $\frac{1}{2}$ . June, July. v. s. in *Herb. Lewis.* Flowers large, yellow. The natives eat the young stems as they spring up, raw.

650. AMELLUS. *Gen. pl. 1315.*

*villosus.*

1. A. villosissimus; foliis sessilibus oblongis acuminatis integrerrimis, floribus axillaribus brevi-petiolaratis, radice integris, paleis setaceis.

On the Missouri.  $\frac{1}{2}$ . v. s. Rays yellow.

*spinulosus.*

2. A. canescens; foliis bipinnatifidis inciso-dentatis, lacinia linearibus rigido-mucronatis, floribus lateralibus et terminalibus congestis, radice bidentata, paleis setaceis. In open prairies on the Missouri. *M. Lewis.*  $\frac{1}{2}$ . Aug. Sept. v. s. in *Herb. Lewis.* Rays yellow.

*Tota planta rigida, scabra, cano-viridescens. Caulis ramosissimus. Rami angulosi. Ramuli laterales breves, uniflori. Folia alterna, bipinnatifida, rigida, lacinia linearibus, spinula terminata, inferioribus inciso-dentata. Flores laterales solitarii et terminales congesti, subcorymbosi, lutei. Calyx imbricatus: squamis exterioribus brevioribus, acutis, hirsutis; interioribus linearibus, scariosis. Corollulae radii linear-lanceolatae, bidentatae. Receptaculum: Paleis brevibus, subulatis, bidentatae.* Both species are an intermediate link between *Aster* and *Inula*. They approach the nearest to *Amellus*; but the receptacle is not, properly speaking, paleaceous, but only setaceous.

651. VERBESINA. *Gen. pl. 1317.*

*virginica.*

1. V. caule angusto alato, foliis alternis lato-lanceolatis sub-serratis, corymbo composito, calycibus oblongis pubescentibus.—*Willd. sp. pl. 3. p. 2222.*

C. Calceolus  $\gamma$ . Sp. pl. 1346.

Icon. Bot. mag. 216. Pluk. mant. t. 418. f. 3. Moris.  
hist. 3. s. 12. t. 11. f. 17.

In low meadows and bogs, particularly in the mountainous tracts : Canada to Carolina.  $\gamma$ . May, June. v. v. From eighteen inches to three feet high. The plant in its foliage resembles *Helleborus viridis*; the flowers are generally by two, sometimes three, very large, the lower lip white with red veins, and crimson spots inside.

5. C. caule folioso, lobo styli orbiculato obtusiusculo, petalis 5. duobus inferioribus linear-lanceolatis deflexis, lateralibus linearibus horizontalibns, supremo ovato-oblongo acuto, labello longitudine petalarum antice obverse-conico saccato.—Ait. kew. ed. 2. tom. 5. p. 222

In shady sphagnum woods, about Montreal, Canada. M'Kenzie.  $\gamma$ . May. v. v. Flower small, petals greenish-brown; lower lip white, with crimson veins; of a very singular structure, resembling at a front view a sheep's head, the two lateral petals forming the horns. The stem is pubescent, not a span high; leaves smooth, in general alternately by four. It distinguishes itself very strongly from all the rest by having five petals, and by the singular structure of its lower lip.

6. C. scapo aphylo unifloro, foliis radicalibus geminis oblongis obtusis, lobo styli subrotundo-rhombeo acuminate deflexo, labello petalis lanceolatis longiore antice fissio. Willd. sp. pl. 4. p. 144.

C. acaule. Ait. kew. 3. p. 161.

Icon. Bot. mag. 192. Salisb. in linn. trans. 1. t. 3. f. 4. Catesb. car. app. t. 3. Pluk. mant. t. 418. f. 1.

In shady rocky situations and on dry mountain bogs: Canada to Carolina.  $\gamma$ . May, June. v. v. Not much above a span high; flower purple, large. I have observed a white variety on the Broad-mountains, Pennsylvania. The whole of this genus is known among the inhabitants by the name of *Mocassim Flower*, or sometimes *Ladies Slippers*.

## II. AMENTACEÆ.

\* *Flores dioici.*

691. SALIX. *Amenta* cylindracea, imbricata: squamis 1-floris. *Cal.* 0. *Masc.* *Glandula* baseos nectarifera. *Stam.* 1-6, interdum monadelpha. *Fem.* *Styl.* bifidus. *Caps.* 1-locularis, 2-valvis, polysperma. *Sem.* papposa.
692. POPULUS. *Amenta* cylindracea, laxe imbricata: squamis margine laceris, 1-floris. *Cal.* urceolatus, integer. *Masc.* *Stam.* 8, exerta. *Fem.* *Stigma* 4-fidum. *Caps.* 2-locularis, 2-valvis, polysperma. *Sem.* papposa.
693. MYRICA. *Amenta* ovata, imbricata: squamis lunatis, trifloris. *Cal.* 0. *Masc.* *Squama* 4-andra, radius 6-andra. *Fem.* *Styli* 2. *Drupa* 1-sperma.

\*\* *Flores monoici.*

694. BETULA. *Amenta* imbricata: squamis peltatis, 3-floris, 3-fidis. *Masc.* *Cal.* 4-partitus. *Stam.* 10-12. *Fem.* *Squama* 2-flora. *Cal.* 0. *Stigm.* 2. *Sem.* 1, utrinque membrana alatum.
695. ALNUS. *Amentum* receptaculis cuneiformibus truncatis 3-floris compositum. *Masc.* *Cal.* 4-partitus. *Stam.* 4. *Fem.* *squama* biflora. *Cal.* 0. *Stigm.* 2. *Sem.* 1, compressum, ovatum, apterum.
696. CARPINUS. *Amenta* laxe imbricata: squamis 1-floris. *Cal.* 0. *Masc.* *Squama* ovata, ciliata. *Stam.* 6-10. *Antheræ* apice villosæ. *Fem.* *Squama* lanceolata, ciliata, biflora. *Germen* apice denticulatum. *Stigm.* 2. *Nux* ovata, sulcata.

697. OSTRYA. *Amenta imbricata. Masc. Cal. squama. Fil. ramosa. Fem. Amentum nudum. Caps. inflatae, imbricatae, basi monospermæ.*
698. FAGUS. *Masc. Amentum subrotundum. Cal. 5-fidus, campanulatus. Stam. 8—12. Fem. Cal. 4-dentatus, setosus. Germ. 2. Nuces 2. calyx echinato, coriaceo, 4-fido inclusæ.*
699. CASTANEA. *Masc. Amentum nudum, lineare. Cal. sub-6-phyllo. Stam. 5—20. Fem. Cal. 5-6-phyllo, muricatus. Germ. 3. Stigm. penicilliforme. Nuces 3. calyx echinato inclusæ.*
700. QUERCUS. *Masc. Amentum nudum, lineare. Cal. sub-5-fidus. Stam. 4—10. Fem. Cal. plerumque 6-dentatus, scaber. Styli 2—5. Nux coriacea, calyx persistente basi cincta.*
701. CORYLUS. *Masc. Amentum imbricatum : squamis 3-fidis unifloris. Cal. 0. Stam. 8. Fem. Cal. bipartitus, lacerus. Styli 2. Nux ovata, calyx persistente cincta.*
702. LIQUIDAMBAR. *Masc. Amentum conicum, involucro 4-phyllo cinctum. Filam. numerosa. Fem. Amentum globosum, involucro 4-phyllo cinctum. Cal. urceolatus, biflorus. Styli 2. Caps. 2. basi cinctæ, 2-valves, polyspermæ.*
703. COMPTONIA. *Masc. Amentum cylindricum, lax imbricatum ; squamis 1-floris. Cal. 2-phyllo. Filam. 3. bifurcata. Fem. Amentum ovatum. Cal. 6-phyllo. Styli 2. Nux ovata, 1-locularis.*
704. PLATANUS. *Amentum globosum. Masc. Cor. vix manifesta. Antheræ filamentum circumnatae. Fem. Cor. polypetala. Styli stigmate recurvo. Sem. sub-rotunda, stylo mucronata, basi papposa.*
705. JUGLANS. *Masc. Amentum imbricatum. Cal. 6-partitus. Filam. 4—18. Fem. Cal. 4-fidus, superus. Cor. 4-partita. Styli 2. Drupa coriacea, nuce sulcata.*
706. MORUS. *Amentum subglobosum. Masc. Cal. 4-partitus. Filam. 4. Fem. Cal. 4-phyllo. Styli 2. Cal. baccatus. Sem. 1.*

## I. SEGREGATÆ.

## 681. VALLISNERIA. Gen. pl. 1491.

- americana.* 1. V. foliis linearibus, pedunculis masculis feminineisque rectis. *Willd. sp. pl. 4. p. 651. Mich. fl. amer. 2. p. 220.*

At the bottom of muddy and slow-flowing rivers: Mississippi and St. John's, Florida. *Michaux.* In Ossego river, New York: Delaware, Pennsylvania, and James's and Greenbrier rivers, Virginia. *Ph. U. S. Aug. - Oct. v. v.* This most interesting and singular plant I observed in the Delaware, near Philadelphia, in 1800; which discovery I communicated, accompanied with a drawing and description, to Dr. B. S. Barton, of Philadelphia. The economy of its fecundation is highly interesting to the young student of the sexual system. *Michaux* and *Willdenow* consider it as specifically distinct from *V. spiralis*; but I have always considered it only a local variety, as the peduncles of the female flowers are in deep water really spiral.

682. NAJAS. *Willd. act. acad. berol. 1798, p. 85.*

- canadensis.* 1. N. pusilla, filiformis, laevis; foliis angustissime linearibus. *Mich. fl. amer. 2. p. 220.*

In lakes: Canada, on Lake St. John's. *Michaux.* +.

## 683. DIOTIS. Gen. pl. 1423.

- lanata.* 1. D. omnibus partibus cano-tomentosa; caule flexuoso, glomerulis spicarum confertissimis

On the banks of the Missouri, in open prairies. *M. Lewis.* b. Aug. Sept. v. s. in *Herb. Lewis.* Resembles *Diotis eratoides*, but is distinct at first sight by its long woolly tomentum.

## 684. RICINUS. Gen. pl. 1464.

- communis.* 1. R. foliis peltatis palmatis, lobis lanceolatis serratis, caule herbaceo pruinoso, stigmatibus tribus apice bifidis, capsulis echinatis. *Willd. sp. pl. 4. p. 564.*

Icon. *Blackw. t. 148.*

In cultivated grounds, frequent in old plantations in Virginia and Carolina. ♂. Aug. Sept. v. v. Introduced by the Negroes. Known by the name of *Castor-oil Bean*.

## 685. JATROPHA. Gen. pl. 1463.

1. J. herbacea, stimulis patulis horridissima; foliis subpalmato-lobatis, lobis obtusiusculis subsinuato-incisis, cymulis brevi-pedunculatis. *Mich. fl. amer. 2. p. 216.*  
J. urens. *Walt. fl. car. 239.*  
Icon. *Pluk. alm. t. 220. f. 3.* *Mareg. brass. 79. f. 2.*  
In fields and plantations: Virginia to Florida. ♀. July, Aug. v. v. Flowers white; roots tuberous and eatable, the same as *J. Manihot*, which is so generally cultivated in the West Indies under the name of *Cassada*. The present plant is a very injurious weed in some parts of Carolina, as it ruins the Negroes' feet when they tread upon it; from which it is known by the name of *Tread-sofly*.

*stimulosa.*

## 686. CROTON. Gen. pl. 1462.

1. C. foliis ellipticis integerrimis obtusiusculis incanis subtus tomentosis petiolatis, spicis terminalibus paucifloris. *Willd. sp. pl. 4. p. 532.* *Walt. fl. car. 239.*  
C. disjunctiflorum. *Mich. fl. amer. 2. p. 214.*  
C. spicis dichotomis, flore semineo unico pedicellato. monanthogynum. *Mich. fl. amer. 2. p. 215.*  
On the sea-coast of Carolina; β. in Tennessee, near Nashville. ♀. June, July. v. s. The flowers of this genus are small and inconspicuous. The branches sometimes live over winter, but it cannot be considered a real shrub. Most of the species here mentioned are covered with stellated hairs.
2. C. suffruticosum,stellato-tomentosum; foliis oblongis integerrinis subtus tomentosis petiolatis, pedunculis terminalibus subbifloris.—*Willd. sp. pl. 4. p. 535.*  
C. punctatum. *Jacq. ic. rar. 3. t. 621.*  
In sterile woods of Georgia and Florida. ♀. July, Aug. v. s.
3. C. hispidissimum; foliis oblongis serratis subtus hirtis glandulosum. basi subintegerrimis biglandulosis, caule trichotomo, spicis alaris, capsulis glomeratim sessilibus.—*Willd. sp. pl. 4. p. 540.*  
C. scordioides. *Lam. encycl. 2. p. 214.*

Icon. *Jacq. ic. rar. 1. t. 194.*

On the sea-coast of Carolina and Florida. ⊖ July,  
Aug. v. v.

*capitatum.*

4. C. tomentoso-lanatum; foliis oblongo-ovalibus obtusis  
basi rotundatis integris, utrinque tomentosis, floribus  
femineis ad basin spicillæ marium capitatum congestis.  
—*Mich. fl. amer. 2. p. 214.*

In the Illinois country. *Michaux.* ⊖ +. Resem-  
bles *C. argenteum.*

#### 687. ACALYPHA. *Gen. pl. 1461.*

*virginica.*

1. A. floribus femineis ad basin spicæ masculæ, involucris  
ovatis acuminatis dentatis, foliis breviter petiolatis ob-  
longo-lanceolatis remote obtuse-serratis.—*Willd. sp.*  
*pl. 4. p. 521.*

Icon. *Pluk. phyt. t. 99. f. 4.*

In fields, cultivated grounds, and on road sides: Canada  
to Virginia. ⊖ June—Aug. v. v.

*caroliniana.*

2. A. floribus femineis ad basin spicæ masculæ, involucris  
cordatis dentatis, foliis longe petiolatis subrhomboidali-  
ovatis serratis basi integerrimis.—*Willd. sp. pl. 4.*  
*p. 521.* *Walt. fl. car. 238.*

In cultivated grounds: Virginia to Florida. ⊖ July,  
Aug. v. v.

#### 688. TRAGIA. *Gen. pl. 1410.*

*mrens.*

1. T. erecta; foliis lanceolatis sessilibus obtusis apice sub-  
dentatis, cauleque ramoso pubescentibus. *Willd. sp.*  
*pl. 4. p. 325.*

α. T. foliis oblongo-ovalibus nonnullis subcuneatis. *Mich.*  
*fl. amer. 2. p. 175.*

Icon. *Pluk. atm. t. 107. f. 5.*

β. T. foliis lanceolatis subdentatis integrisque. *Mich. l. c.*  
T. innocua. *Walt. fl. car. 229.*

γ. T. foliis linearibus fere omnibus integris. *Mich. l. c.*  
In waste places, on road sides and cultivated grounds:  
Virginia to Carolina. ⊖ June—Aug. v. v.

*urticifolia.*

2. T. erecta, caule hirsutissimo, foliis cordatis ovatis ser-  
ratis.—*Willd. sp. pl. 4. p. 321.*

T. mercurialis. *Walt. fl. car. 229.*

- In cultivated grounds: Virginia, near Staunton. ♀.  
July, Aug. v. v. Resembles *E. spathulata*.
13. E. caulibus gracile-debilis, simpliciter 3-fidis, foliis *mercurialina*, oppositis ternisve sessilibus ovalibus integris, pedunculis terminalibus solitariis unifloris.—*Mich. fl. amer.* 2. p. 212.
- In shady rocky situations: Pennsylvania and Kentucky.  
♀. July, Aug. v. v. Resembles in aspect *Mercurialis annua*.
14. E. umbella 3-fida: bis dichotoma, involucro foliiforme, involucellis oblongis cordatis margine membranaceis coloratis, foliis lanceolato-oblongis subcordato-amplexicaulinibus acutis glaucescentibus glabris, appendicibus calycinis petaloideis subtrotundis, capsulis pilosis.
- On the Yellow-stone river. *M. Lewis*. ♂. July. v. s. in *Herb. Lewis*. A very handsome species; the white margin of the involucre and white petal-like appendices have a fine contrast with the elegant soft green leaves.
15. E. umbella 4-fida: dichotoma, foliis oppositis lanceolatis integerrimis. *Willd. sp. pl.* 2. p. 906.  
Icon. *Blackw. t.* 123.  
Not native, but frequently found near gardens and in cultivated ground. ♂. July, Aug. v. v. It is generally known in America by the name of *Mole-plant*, it being supposed that no moles disturb the ground where this plant grows.
16. E. umbella 5-fida: 3-fida: dichotoma; involucellis foliisque oblongis obtusis, appendicibus calycinis petaloideis obovatis.—*Willd. sp. pl.* 2. p. 916.  
Icon. *Pluk. mant. t.* 446. f. 3.  
In dry fields: Canada to Carolina. ♀. July, Aug. v. v.  
It is very variable in its foliage: sometimes the leaves are quite linear.
17. E. umbella 5-fida: trifida: bifida, involueris ovatis, petalis integris, foliis lanceolatis subpilosis apice serrulatis. *Willd. sp. pl.* 2. p. 917.  
Icon. *Gmel. sib.* 2. t. 93.  
In shady wet woods, in the mountains of Maryland and Virginia. ♀. June, July. v. v. From two to four feet high.

*marginata*.*Lathyris*.*corollata*.*pilosa*.

690. STILLINGIA. *Gen. pl. 1470.**sylvatica.*

1. S. herbacea ; foliis sessilibus oblongis obtusis basi attenuatis serrulatis, flosculis masculis squamam floralem vix superantibus.—*Willd. sp. pl. 4. p. 588.*

In pine-barrens : Virginia to Florida. ♀. May, June. v. v. Flowers yellow, in a spike, resembling a catkin.

*ligustrina.*

2. S. fruticosa ; foliis petiolatis ovali-lanceolatis utrinque attenuatis integerrimis, flosculis masculis brevissime pedicellatis.—*Willd. sp. pl. 4. p. 588.*

In shady woods : Carolina and Georgia. ♂. June, July. v. v.

*sebifera.*

3. S. arborea ; foliis petiolatis rhomboides acuminatis integerimis, infra basin glandula petiolari, floribus masculis pedicellatis.—*Willd. sp. pl. 4. p. 588.*

*Croton sebiferum. Sp. pl. 1425.*

Icon. *Pet. gaz. t. 54. f. 3. Pluk. amalh. t. 390. f. 2.*  
On the sea-coast of South Carolina ; originally a native of China. ♂. July, Aug. v. v. Known by the name of *Tallow Tree.*

## II. AMENACEÆ.

691. SALIX. *Gen. pl. 1493.*

\* *Foliis integerrimis aut obsolete serratis ; vernatio revoluta.*

*viminalis.*

1. S. foliis lanceolato-linearibus longissimis acuminatis integrerrimis subundulatis subtus sericeo-argenteis, versus marginem sparse-glandulosis, stipulis exiguis, amentis praecocibus, squamis subrotundis pilosissimis, germinibus sessilibus ovatis, stylo filiformi, stigmatibus acutis indivisis.—*Willd. sp. pl. 4. p. 706.*

Icon. *Hoffm. salic. 1. t. 2. f. 1 & 2. t. 5. f. 2. t. 21. f. e. f. g.*

On the banks of rivers and about plantations ; introduced from Europe. ♂. April, May. v. v. Filaments yellow, anthers orange.

*candida.*

2. S. foliis linear-lanceolatis longissimis apice obsolete denticulatis supra pubescentibus subrufis niveo-tomentosis margine revolutis, stipulis lanceolatis petiolatum subz-

ginally a native  
Known by the

In dry shady woods : New York to Pennsylvania. h. April, May. v. v. The native place of this willow is not mentioned by Willdenow ; but a plant in the collection of G. Anderson, Esq. which was found among a promiscuous collection of willows made by me on the Catskill mountains, New York, decides the question. To this gentleman's acute observations I am indebted for the present division of *Salices "vernatio revoluta,"* as likewise for the greater part of the present arrangement of American willows.

3. foliis lanceolatis acutiusculis subintegerrimis pubescenti-canis, subtus rugoso-venosis, margine revolutis, stipulis deciduis lanceolatis, amentis præcocibus diandris, squamis oblongis margine villosis, germinibus ova-to-lanceolatis sericeo-villosis longe pedicellatis, stylo brevi, stigmatibus bifidis.—*Willd. sp. pl. 4. p. 692.*
- S. tristis. *Muhl. in annals of bot. 2. p. 68. t. 5. f. 9.*
- S. alpina. *Walt. fl. car. 243.*
- S. flava. *Schæpf. mat. med. amer.*

In shady dry woods : New York to Virginia. h. April, v. v. From three to five feet high ; branches greenish-yellow, with black dots ; the anthers are purple, changing to yellow when burst ; scales white with a red tip, which gives the catkins a very pleasing appearance. In this and the following species I have not been able to ascertain whether the vernatio is revolute ; but their natural affinity to the preceding ones strongly indicates that they are so.

4. foliis linear-lanceolatis utrinque acutis integerrimis margine revolutis supra glabriusculis subtus rugoso-venosis tomentosis, stipulis nullis, amentis præcocibus oblongis.—*Willd. sp. pl. 4. p. 693.*

In dry sandy woods : New Jersey to Carolina. h. March, April. v. v.; v. s. in *Herb. Banks.* Approaches near to the preceding.

5. foliis obovato-lanceolatis acutis integerrimis margine glandulosis glabris subtus glaucis, junioribus sericeis, stipulis nullis, amentis præcocibus recurvatis, squamis apice nigris, pilis longitudine germinis, germinibus ovatis brevi-pedicellatis sericeis, stylo brevissimo, stigmatibus bifidis.

*Muhlenber-*

pedicellatis glabris,

n Hort. Anderson.

For this beautiful little species I am indebted to G. Anderson, Esq.; it has all the appearance of *Arbutus Uva ursi* in habit, as well as in the form of its leaves.

10. S. depressa; foliis ovalibus subacutis basi cordatis inte-  
gerrimis reticulato-venosis supra glabris, subtus pal-  
lidis nervo margineque pilosis, stipulis semicordatis.

In Labrador. ♂. v. v. s. fl. in Hort. Anderson. In ge-  
neral habit it resembles *S. myrsinoides*.

11. S. diffusa; foliis obovatis obtusis integerrimis supra gla-  
bris, subtus sericeo-villosis, stipulis nullis, amentis  
subcoætaneis sessilibus oblongis 2-andris, squamis obo-  
vatis apice nigris pilosis.

In Labrador. ♂. Colmaster. North-west coast. Nelson.  
♂. May. v. s. in Herb. Dickson. et Banks. This  
species is allied to *S. Arenaria* Linn. and is more in-  
clined to be upright than the preceding.

12. S. erectinscula, divaricata; ramulis lœvigatis, foliis ob-  
longo-lanceolatis utrinque acutis medio serrulatis gla-  
berrimis patentibus planis discoloribus, stipulis nullis.  
In Labrador. ♂. v. v. s. fl. in Hort. Anderson. This sin-  
gular species distinguishes itself at first sight by its  
remarkable plain and patent leaves; it is inclined to  
rise from the ground on a single low stem, and ap-  
proaches to the following division.

#### †† *Caulis erecto.*

13. S. ramulis lœvigatis, foliis obovato-lanceolatis acutis inte-  
gerrimis utrinque glabris concoloribus, stipulis nullis,  
amentis coætaneis pedunculatis glaberrimis, squamis  
oblongis pedicello duplo brevioribus vix pilosis, ger-  
minibus ovato-oblongis longissime pedicellatis glabris,  
stigmatibus sessilibus bifidis.

*S. pensylvanica* Hortul.

On the Catskill mountains, New York. ♂. April. v. v.  
This elegant and singular species flowered in the gar-  
den of G. Anderson, Esq., from a plant brought by  
me from America. He has one through another chan-  
nel, which appears to be the male to this species.

14. S. foliis suboppositis obovato-lanceolatis acutis glabris *Lambertiana*.  
apice subserratis discoloribus, stipulis nullis, amentis  
precocibus, squamis orbiculatis nigris, filamento  
unico, anthera geminata, germinibus sessilibus ova-  
to-ellipticis sericeis, stylo brevissimo, stigmatibus ova-  
tis emarginatis.—Willd. sp. pl. 4. p. 673.

*cordifolia*.

*obovata*.

*planifolia*.

*pedicellaris*.

Icon. Engl. bot. 1359.

On the banks of rivers and in willow grounds; introduced from Europe.  $\frac{1}{2}$ . March, April. v. v. It is cultivated on account of its exceeding tough branches for the use of making baskets.

- rosmarinifolia*. 15. S. foliis strictis linear-lanceolatis utrinque acutis integrim marginे subglandulosis supra deciduo-pubescentibus, subtus sericeis, stipulis exiguis lanceolatis erectis, amentis præcocibus ovatis recurvatis, squamis oblongis obtusis ciliatis, germinibus pedicellatis lanceolatis villosis, stigmatibus subsessilibus bifidis.—Willd. sp. pl. 4. p. 679.

Icon. Engl. bot. 1365.

In wet meadows and mountain swamps: Pennsylvania to Carolina.  $\frac{1}{2}$ . March, April. v. v. Not above three feet high. This species, though mentioned as a British plant in the Flora Britannica, is decidedly of American origin; as both sexes have been introduced from that country by G. Anderson, Esq. It has a great resemblance in general character to *S. recurvata*, but the *vernatio equitans* removes them far from one another.

- fuscata*. 16. S. foliis obovato-lanceolatis acutis glabris subserratis subtus glaucis, junioribus pubescentibus, stipulis exiguis, amentis præcocibus nutantibus, squamis obtusis intus vix pilosis, germinibus brevi-pedicellatis ovatis sericeis, stigmatibus sessilibus bilobis.

In low overflowed grounds, on the banks of rivers: New York to Pennsylvania.  $\frac{1}{2}$ . March, April. v. v. Branches of the preceding year covered with a dark brown or black tomentum.

\*\*\* *Foliis remote obtuseque serratis.*

- conifera*. 17. S. foliis oblongo-lanceolatis remote serratis acutis supra glabris subtus planis tomentosis, annectinis glabris, stipulis lunatis subdentatis, amentis præcocibus diandris, squamis lanceolatis obtusis villosis, germinibus pedicellatis lanceolatis sericeis, stylo bifido, stigmatibus bilobis.—Willd. sp. pl. 4. p. 705.

*S. longirostris*. Mich. Jl. amer. 2. p. 226.

Icon. Wangh. amer. t. 31. f. 72.

In shady woods on gravelly dry soil: New York to Carolina.  $\frac{1}{2}$ . April. v. v. The cone-like excrescence at the end of the branches, occasioned by an insect, is not unfrequently found on other species belonging

x.  
to the present division, but particularly on *S. pri-*  
*noides.*

culatis tomentosis diandris, squamis planis retusis, filamentis basi barbatis squama duplo longioribus.—Willd. sp. pl. 4. p. 670.

Icon. Muhl. in annals of lot. 2. t. 5. f. 6.

On the banks of the Susquehannah. Muhlenberg. h.  
July. +. Not above two feet high; branches brown;  
branchlets white.

\*\*\*\* Foliiis dense acuteque serratis.

† *Triandrae*. (Filamentis 3—6.)

*talyonica*. 23. S. ramis pendulis, foliis lanceolatis acuminatis serratis glabris discoloribus, stipulis exiguis subrotundis, amentis coetaneis, germinibus sessilibus ovatis glabris.—Willd. sp. pl. 4. p. 671.

On road sides and about plantations; introduced from Europe. h. May. v. v. The Weeping Willow is now almost naturalized, being every where planted for ornament.

*Houstoniana*. 24. S. foliis linear-lanceolatis acutis tenuissime serratis utrinque glabris nitidis concoloribus, stipulis nullis, amentis coetaneis cylindricis villosis, squamis ovatis acutis, filamentis 3—5. usque ad medium barbatis.

S. tristis. Hortul.

In Virginia and Carolina. h. v. v. s. fl.; v. s. c. fl. in Herb. Banks. specimen Houstonianum. This species, so frequently found in the gardens under the name of *S. tristis*, is very far from being in any way related to it. The specimen in the Banksian Herbarium was collected by Houston, and, as it is said, in Vera Cruz. But I am confident it is a more northern plant, as I frequently have seen it in Virginia. The branches are extremely brittle at their base.

*falcata*. 25. S. foliis longissimis linear-lanceolatis superne sensim attenuatis subfalcatis basi acutis approximato-serratis utrinque glabris, junioribus sericeis, stipulis lunatis dentatis deflexis.

On the banks of rivers: Pennsylvania to Virginia. h. v. v. s. fl. A very smooth species; branches very slender and brown.

*nigra*. 26. S. foliis lanuginosis utrinque acutis serrulatis concoloribus glabris petiolis et nervo medio supra tomentosis, stipulis exiguis dentatis, amentis coetaneis erectis cylindricis villosis, squamis oblongis villosissimis, filamentis 3—6. basi barbatis, germinibus pedicellatis ovatis gla-

## 693. MYRICA. Gen. pl. 1510.

*Gale.*

1. M. foliis cuneato-lanceolatis apice serratis obtusis, amentis masculis imbricatis, squamis acuminatis ciliatis, fructibus squamoso-capitatis.—*Willd. sp. pl. 4. p. 745.*

Icon. *Fl. dan. 327.*

In boggy grounds in Canada, and about lakes on high mountains; plentifully on the Broad mountains, Pennsylvania.  $\frac{1}{2}$ . May. v. v. A low shrub, like all the following, of an agreeable sweet scent.

*cerifera.*

2. M. foliis cuneato-lanceolatis apice rariter serratis acutis, amentis masculis laxis, squamis acutis, fructibus globosis minoribus.—*Willd. sp. pl. 4. p. 745.*

Icon. *Catesb. car. 1. t. 69. Plak. alm. t. 48. f. 9.**pumila.*

3. M. foliis lineari-lanceolatis. *Mich. fl. amer. 2. p. 228.*  
In shady dry woods: Virginia to Carolina.  $\beta$ . In Carolina and Florida.  $\frac{1}{2}$ . May, June. v. v. A shrub sometimes more than twelve feet high. The berries of this and the following species produce a white vegetable wax, which the inhabitants manufacture into candles equal to those made of bees-wax.

*carolinensis.*

3. M. foliis cuneato-oblongis grosse dentatis, amentis masculis laxis, squamis acutis, baccis globosis majoribus.—*Willd. sp. pl. 4. p. 746.*

M. cerifera  $\beta$ . *Mich. fl. amer. 2. p. 223.*Icon. *Catesb. car. 1. p. 13.*

In wet places about rivers and swamps: New England to Florida.  $\frac{1}{2}$ . May. v. v. Not above three or four feet high.

*pensylvanica.*

4. M. foliis oblongis utrinque acutiusculis integerrimis aut apice rariter subserratis margine revolutis, amentis masculis laxis, squamis acutis, baccis globosis majusculis.—*Lam. encycl. 2. p. 592.*

Icon. *Duham. arb. ed. nov. 2. t. 55.*

In shady rocky situations: New Jersey and Pennsylvania.  $\frac{1}{2}$ . May. v. v. Not above three feet high. It generally is confounded with the preceding, but is a very distinct species.

## 694. BETULA. Gen. pl. 1419.

Icon. *Abbot. insect. 2. p. 151. t. 75. Pluk. alm. t. 156.  
f. 1.*

In shady woods: New England to Carolina.  $\frac{1}{2}$ . May.

*v. v.* A small tree, of exceeding hard and heavy wood, from which it is generally known under the name of *Iron-wood*; in some parts they call it *Lever-wood*. I observed a variety in Pennsylvania, of which the younger branches were covered with glandulous hairs. It is rather singular to observe that the plate in *Mich. arb. s. t. 7.* intended for the present plant, represents *Ostrya vulgaris* with hanging cones, which is never the case in the American species.

698. FAGUS. *Gen. pl. 1448.**sylvatica.*

1. *F. foliis ovatis acuminatis leviter dentatis margine ciliatis basi acutis, nucibus ovato-triquetris obtusis cum mucrone.* — *Willd. sp. pl. 4. p. 459. Mich. arb. 2. p. 170.*

Icon. *Mich. l. c. t. 8.*

In extensive forests: New Hampshire to Georgia.  $\frac{1}{2}$ . May. *v. v.* This species of beech forms those extensive and beautiful woods generally known by the name of *Beech-woods*, and always gives the indication of a fertile soil. It is distinguished by the name of *White Beech* from the following.

*ferruginea.*

2. *F. foliis ovato-oblongis acuminatis subtus pubescentibus grosse dentatis basi obtusis subcordato-inaequalibus, nucibus acute ovato-triquetris acutissimis.* — *Willd. sp. pl. 4. p. 460.*

Icon. *Mich. arb. 2. p. 174. t. 9. Abbot. insect. 2. t. 75.*

In rich level lands, at the foot of mountains: Canada to New England.  $\frac{1}{2}$ . May, June. *v. v.* It is distinguished by the inhabitants by the name of *Red Beech*, the wood being of a darker colour than the preceding. Both species are highly useful timber trees.

699. CASTANEA. *Tournef. inst. t. 352.**vesca : americana.*

1. *C. foliis lanceolatis acuminatis mucronato-serratis utrinque glabris.* — *Willd. sp. pl. 4. p. 460.*

*Liquidambar asplenifolium. Sp. pl. 1418.*  
 Icon. *Pluk. alm. t. 100. f. 6.*  
 In sandy, stony, or silty woods: New England to Virginia.  $\frac{1}{2}$ . March, April. v. v. The *Sweet-fern Bush* rises to about three or four feet high; the whole of the plant when rubbed has a strong resinous scent.

704. PLATANUS. *Gen. pl. 1451.*

1. *P. foliis quinquangularibus obsolete lobatis dentatis, ramulis albentibus.—Willd. sp. pl. 4. p. 474.*  
 Icon. *Catesb. car. 1. t. 56. Duham. orb. t. 35. Mich. arb. 3. t. 3.*  
 On the banks of rivers: Canada to Florida, and in Louisiana.  $\frac{1}{2}$ . May. v. v. This tree is known by the name of *Button-wood*, *Water Beech*, *Sycamore* and *Plane Tree*; in Canada *Cotton Tree*. It is perhaps the largest tree in North America: on the fertile banks of the Ohio and the Mississippi there are trees measuring from ten to sixteen feet in diameter.

## 705. JUGLANS. Gen. pl. 1446.

- \* *Amentis masculis simplicibus, polyandris*: Walnuts.
- nigra.* 1. *J. foliolis numerosis ovato-lanceolatis serratis subcordatis superne angustatis, subtus petiolisque subpubescentibus, fructibus globosis scabro punctatis, nuce corrugata.* — *Willd. sp. pl. 4. p. 456.*  
*Icon. Mich. arb. 1. p. 157. t. 1. Jacq. ic. rar. 1. t. 191.*  
*Wangh. amer. t. 8. f. 20. Catesb. car. 1. t. 67.*  
 In fertile woods: New England to Florida.  $\textcircled{h}$ . April, May. v. v. The Black Walnut is, like all the following, a tree of large size, and its nuts are eaten by men and several species of animals. The wood is put to various mechanical and economical uses; for which information I refer to the different authors on forest trees, but particularly to the works of the younger Michaux.
- cineræa.* 2. *J. foliolis numerosis lanceolatis serratis basi rotundatis subtus pubescenti-mollibus, petiolis villosis, fructibus oblongo-ovatis apice mammosis viscidis longe penduculatis, nuce oblonga acuminata insigniter insculpto-scabrosa.* — *Willd. sp. pl. 4. p. 456.*  
*J. cathartica. Mich. arb. 1. p. 165.*  
*J. oblonga. Mill. dict. n. 3. Retz. obs. 1. p. 10.*  
*Icon. Mich. arb. 1. t. 2. Jacq. ic. rar. 1. t. 192. Wangh. amer. t. 9. f. 21.*  
 Near the sea-coast: Canada to Virginia, and on the Allegany mountains.  $\textcircled{h}$ . April, May. v. v. It is known under the name of Butter Nut, Oil Nut, and White Walnut. The younger Michaux has altered the adopted name, and substituted one indicating the medicinal use made of it, which certainly would be a very good name if the old one had not been so long established.
- \*\* *Amentis masculis compositis, tetrandris*. Hickory.
- olivæformis.* 3. *J. foliolis numerosis (13—15) lanceolatis subfalcatis serratis, impari petiolato, fructibus oblongis tetragonis, nuce olivæformi laevi.* — *Willd. sp. pl. 4. p. 457.*  
*J. angustifolia. Ait. kew. 3. p. 361.*  
*J. Pecan. Muhl. in nov. act. soc. nat. scrut. verol. 3. p. 392.*  
*Icon. Mich. arb. 1. t. 3.*  
 On the banks of the Ohio, Mississippi, and other rivers.

in Upper Louisiana.  $\frac{1}{2}$ . April, May. v. v. It is generally known under the name of *Pecan* or *Illinois Nut*; the fruit is small, with a very thin shell, and a delicious kernel.

4. *J. foliolis subnovenis obovato-lanceolatis acuminatis serratis subtus pubescentibus, impari subsessili basi attenuato, fructibus subrotundis 4-carinatis, nuce subglobosa leviter compressa lœvi longe mucronata.* —Willd. sp. pl. 4. p. 457.

*J. mucronata.* Mich. fl. amer. 2. p. 192.

*J. laciniosa,* Mich. arb. 1. p. 199.

Icon. Mich. arb. 1. t. 8.

In fertile valleys of the Allegany mountains.  $\frac{1}{2}$ . April, May. v. v.. It is called *Thick Shell-bark Hickory*, *Springfield* or *Glocester Nut*. The nuts are large and fine tasting; the bark is torn lengthways in long loose fragments, as in the following species.

5. *J. foliolis subseptenatis longe petiolatis oblongo-lanceolatis acuminatis argute serratis, subtus villosis, impari sessili, amentis filiformibus glabris, fructibus depresso-globosis, nuce compressa obliqua.* —Mich. fl. amer. 2. p. 193. Sp. pl. 1415.

*J. compressa.* Willd. sp. pl. 4. p. 458. Muhl. in nov. act. soc. nat. scrut. berol. 3. p. 390.

*J. squamosa.* Mich. arb. 1. p. 190.

Icon. Mich. arb. 1. t. 7. Pluk. alm. t. 309. f. 2. Gært. carp. 2. t. 89. sub *J. compressa*. Catesb. car. 1. t. 38.

In shady fertile forests: New England to Carolina, and throughout the Allegany mountains.  $\frac{1}{2}$ . April, May. v. v. This useful tree is known by the name of *Shell-bark Hickory*, *Shag-bark* and *Scaly-bark Hickory*, on account of its bark, which is torn in loose fragments like the preceding: its nuts are white, with a thin shell and very sweet and large kernel.

6. *J. foliolis subnovenis oblongo-lanceolatis acuminatis leviter serratis subtus pubescentibus scabris, impari subpetiolato, amentis filiformibus longissimis tomentosis, fructibus subglobosis lœvibus, pericarpio crassissimo, nuce subsexangulata putamine crassa durissima.* —Mich. fl. amer. 2. p. 192.

*J. alba.* Willd. sp. pl. 4. p. 457.

Icon. Mich. arb. 1. p. 186. t. 6.

In fertile forests: New England to Virginia, and on the Allegany mountains.  $\frac{1}{2}$ . April, May. v. v. This

*sulcata.*

*alba.*

*tomentosa.*

is known under the name of *Mocker Nut*, *White-heart Hickory* or *Common Hickory*. The wood is excellent for mechanical purposes, and particularly esteemed as fire-wood; but the nuts are very hard, with but little kernel in them.

*amara.*

7. *J. foliolis subnovenis ovato-oblongis acuminatis argute serratis utrinque glabris, impari breviter petiolato, fructibus subglobosis, superne suturis prominulis, nuce lævi subglobosa mucronata, putamine fragili.* —*Mich. arb.* 1. p. 177.

In dry fertile woods: New England to Maryland, and on the mountains. ♀. May. v. v. This is known by the name of *Bitter Nut*, *White* or *Swamp Hickory*. The nuts are small, the kernel bitter.

*porcina.*

8. *J. foliolis subseptenis lanceolatis acuminatis serratis utrinque glabris, impari subsessili, fructibus pyriformibus vel globosis, nuce lævi durissima.* —*Mich. arb.* 1. p. 206.

In dry barren soil: New Jersey to Carolina.  $\frac{1}{2}$ . May.

v. v. The *Jersey Pine, Pitch or Scrub Pine*, is of middle size, straggling growth, and full of resin. Its branches are tougher than any other pine I know, and might be used for several useful purposes if its wood was not so apt to an early decay. A. B. Lambert, Esq. in his magnificent Monograph on this interesting and useful genus, made similar observations, which the younger Michaux in his *Arbres forestiers*, p. 60, has taken up as a point of criticism. On this subject Mr. Lambert favoured me with his observations respecting this and some other remarks made by Mr. Michaux, which I think proper here to insert; it is in the following words: "The criticisms made by Mr. Michaux on my 'Description of the genus Pinus' are so inaccurate, that I did not think them worth my notice before, nor should I now, were it not to prevent Mr. Pursh from being misled by them, though I believe he is already well aware of their fallacy; I shall therefore beg of him to insert a few observations on the different subjects to which they respectively belong, if they meet with his approbation and con-

*inops.*

DICLINIA CONIFERÆ. *Pinus.**resinosa.*

currence. Whether Mr. Michaux has been successful in changing the specific names of the pines, I shall leave to future botanists to decide: but I must correct him in respect to the *specific name* he has added to my own, which certainly does not belong to it." The observation which Mr. Lambert makes in this place is, " Michaux's observations relative to the branches of *P. inops* being not fit for hoops appear to be mere matter of opinion, as well as mine, without experience."

9. *P. foliis elongatis geminatis, vaginis elongatis, strobilis ovato-conicis basi rotundatis subsolitariis folio dimidio brevioribus, squamis medio dilatatis inermibus.*—*Lambert. monogr. p. 20. t. 14.*

In Canada and the western parts of New York.  $\text{h. v. v.}$  This tree, called by Aiton *Pitch Pine*, is generally known in its native country by the name of *Norway Pine*; sometimes, particularly among the Canadian French, *Red Pine*. It grows in close forests, is very tall, and its bark is remarkably smooth and red; the timber is very heavy, for which reason it is rejected for masts, though its size and shape are apparently very recommendable for that purpose. Mr. Lambert in his note, quoted above, observes, " In confirmation of what I have said relative to the timber of *P. resinosa*, Mr. Michaux mentions the exportation of it being much diminished, as it has been found to contain too much sap; but he still thinks, from some planks he has seen, it is without foundation."

*Banksiana.*

10. *P. foliis brevibus geminatis rigidis divaricatis obliquis, strobilis recurvis tortis, squamis inermibus.*—*Lambert. monogr. p. 7. t. 3.*

mountains, Carolina.  $\frac{1}{2}$ . *v. s.* in *Herb. Lambert.* The cones are large and armed with strong spines. The cone figured *t. 16. f. c.* in *Lambert. monogr.* is genuine, but the branch belongs to a separate species.

15. *P. foliis elongatis ternis, vaginis elongatis, strobilis oblongo-conicis deflexis folio brevioribus, spinis indexis.*  
—*Lambert. monogr. p. 23. t. 16. 17.*

Icon. *Lambert. l. c.* *Mich. arb. 1. p. 97. t. 9.*

In barren and sandy situations: Virginia to Florida.  $\frac{1}{2}$ . April, May. *v. v.* The *Loblolly* or *Old-field Pine* is found in large tracts in the southern states: all the woods seem to be seeded with it; for when any piece of cleared land is neglected for any space of time it will be covered with those pines. It is difficult and in some cases almost impracticable to recover those lands run over with young pines, as the ground appears to have lost all fertile properties for any other vegetable than those trees. The account Mr. Michaux gives of this tree is very correct and instructive; as also is the plate of Mr. Lambert; but unfortunately the latter, considering *P. tæda Wangh. amer. 41.* a genuine synonym, although it evidently belongs to *P. rigida* or *serotina*, has inadvertently been led into some errors in his description.

*palustris.*

In low cedar swamps; Canada to New Jersey. h. April, May. v. v. The *Black Larch* *Tamara* *k.*, or *Hack-matack* of the Americans, is a beautiful tree, resembling the European Larch in appearance, as well as in the excellent qualities of its wood and bark.

19. *P. foliis fasciculatis deciduis, strobilis subrotundis acuminatis, squamis reflexis, bracteolis ellipticis obtuse acuminatis.* *Lambert. monogr.* p. 56. t. 37.

*P. pendula.* *Willd. arb.* 215.

*P. laricina.* *Du Roi harbk.* 2. p. 83.

*Larix americana.* *Mich. fl. amer.* 2. p. 203.

Icon. *Lambert.* l. c. *Mich. arb.* 3. t. 4. *Wangh. amer.*  
t. 16. f. 37.

About Hudson's Bay and on high mountains of New York and Pennsylvania. h. May. v. v. The *Red Larch* resembles the preceding, and both have been considered as one species by Michaux; but they are specifically and constantly different; I never saw them both growing in the same place, or even near one another. Mr. Lambert likewise observes that they have always kept distinct, when raised from seed.

708. CUPRESSUS. Gen. pl. 1458.

1. *C. foliis distichis planis deciduis, floribus masculis aphylo-paniculatis, strobilis subglobosis.* — *Willd. sp. pl.* 4. p. 512.

### I. GONOPTERIDES.

713. **EQUISETUM.** *Recept.* peltata, pentagona, spicata.  
*Indusium corniculatum.* *Stam.* 4. *Styl.* O. *Sem.* 1.

### II. STACHYOPTERIDES.

714. **LYCOPODIUM.** *Capsulae* reniformes, 1-loculares, 2-valves, polyspermae. *Sem.* minutissima, pulv-  
riformia.  
715. **BERNHARDIA.** *Capsulae* 3-coccæ, 3-loculares :  
loculis superne dehiscentibus, semibivalvibus.  
716. **OPHIOGLOSSUM.** *Capsulae* nudæ, uniloculares,  
in spicam articulatam disticham connatæ, 2-valves,  
transverse dehiscentes.  
717. **BOTRYCHIUM.** *Capsulae* subglobosæ, rachi adu-  
natæ in racemum compositum dispositæ, 1-loculares :  
valvulis binis postice co[n]nexis transverse dehis-  
tibus.

### III. SCHISMATOPTERIDES.

718. **HYDROGLOSSUM.** *Spicæ* unilaterales. *Capsulae*  
biseriales, latere interiore a basi ad verticem dehis-  
centes. *Indusium* squamiforme quamlibet capsulam  
obtegens.  
719. **SCHIZÆA.** *Spicæ* unilaterales, flabellatæ, aggre-  
gatæ. *Capsulae* vertice radiatim striatæ, subturbinatæ,  
poro oblongo latere hiantes. *Indusium* continuum  
e margine inflexo spicæ formatum.  
720. **OSMUNDA.** *Capsulae* subglobosæ, pedicellatæ,  
striatæ, semibivalves, paniculatae. *Indusium* nullum.

## IV. FILICES.

721. ACROSTICHUM. *Capsulæ* sparsæ, discum totum inferiorem frondis vel ejus partem occupantes. *Indusium* nullum.
722. POLYPODIUM. *Sori* subrotundi, sparsi. *Indusia* nulla.
723. WOODSIA. *Sori* subrotundi, sparsi. *Indusium* ciliiforme, apertum, margine crinitum, includens *Capsulas* pedicellatas.
724. ASPIDIUM. *Sori* subrotundi, sparsi. *Indusium* umbilicatum vel uno latere dehiscens.
725. ONOCLEA. *Capsulæ* partem frondis inferiorem dense tegentes. *Indusia* squamiformia, in formam baccæ connata non dehiscentia.
726. STRUTHIOPTERIS. *Capsulæ* partem frondis inferiorem dense tegentes. *Indusia* squamiformia, marginalia, interius dehiscentia.
727. ASPLENIUM. *Sori* lineares, transversales, sparsi. *Indusia* e venis lateralibus orta, costam versus dehiscens.
728. SCOLOPENDRIUM. *Sori* lineares, transversales, sparsi. *Indusium* duplex, ad utrumque latus sori situm.
729. PTERIS. *Sori* continuí, lineares, marginales. *Indusium* e margine frondis, inflexum, interius dehiscens.
730. VITTARIA. *Sori* lineares, longitudinales, continuí vel in margine vel in disco frondis. *Indusium* duplex, ad utrumque latus *sori*.
731. BLECHNUM. *Sori* lineares, longitudinales, continuí, ad utrumque latus costæ frondis. *Indusium* superficiarium, interius dehiscens.
732. WOODWARDIA. *Sori* oblongi, distincti, recti, ad utrumque latus costæ frondis. *Indusia* superficiaria, fornicata, interius dehiscientia.
733. ADIANTUM. *Sori* oblongi vel subrotundi, *Indusii* membranaceis, e margine ortis, interius dehiscientibus inserti.
734. CHEILANTHES. *Sori* punctiformes, discreti, marginales, tecti *Indusio* squamiformi marginali interius dehiscente.
735. DICKSONIA. *Sori* punctiformes, marginales, subrotundi, distincti. *Indusium* duplex, alternum superficiarium, exterius dehiscens, alterum marginale interius dehiscens.

t. 1. f. 2.

In low copses, climbing among small shrubs. ♀. July.  
 v. v. This is the most beautiful and singular of all  
 the North American ferns, and is a highly ornamental  
 plant when cultivated in pots.

### 719. SCHIZÆA. *Smith act. taur.* 5. p. 419.

1. S. fronde simplicissima linear-compressa, spicis conglobatis inflexis secundis. *pusilla.*

In barren sandy but moist grounds : New Jersey, Burlington county, near a place called Quaker Bridge. ♀. Aug. Sept. v. v. This singular little fern is very scarce, and so small that it generally escapes the notice of the botanist, unless accident points it out.

### 720. OSMUNDA. *Gen. pl.* 1622.

1. O. frondibus sterilibus pinnatis, pinnis pinnatifidis, lacinia ovato-oblongis obtusis integerrimis, stipite lanato, fructificantibus bipinnatis lanugibiosis.—*Willd. sp. pl.* 5. p. 98.

Icon. *Schkuhr filic.* t. 146. *Moris. hist.* 3. s. 14. t. 4. f. 3.

In low open woods and exsiccated swamps : New England to Florida. ♀. June—Aug. v. v. This is a fern of the size and habit of *Polyodium Filix mas*; the fertile stems are covered with a cinnamon-coloured down.

2. O. frondibus pinnatis ferrugineo-tomentosis, pinnis pinnatifidis apice coarctato-fructificantibus.—*Willd. sp. pl.* 5. p. 96.

In Virginia. *Clayton.* ♀. April. +. This is probably only a variety of the preceding. I have no specimen in my herbarium; but recollect very well that the fructiferous stems of that species very frequently grow out into leaves, which may have given rise to the formation of the present species.

3. O. frondibus pinnatis glabris, pinnis oppositis pinnatifidis, lacinia oblongis acutiusculis integerrimis, pinnis aliquot intermediae fructificantibus.—*Willd. sp. pl.* 5. p. 96.

*Claytoniana.*

## SUPPLEMENTUM.

---

*Lycopus exaltatus*.—L. foliis basi pinnatifido-serratis, laciniis integerrimis subserratisque, calycibus spinescentibus.—  
*Willd. sp. pl. 1. p. 121.*

page 16.

Icon. *Fl. grec. t. 12.*

In low shady woods: Virginia to Carolina; rare. ♀. July, Aug. v. v.; v. s. in *Herb. Sherard.* From three to six feet high. This species I omitted for want of a specimen in my Herbarium, though I found it myself in Virginia; but seeing a specimen of Catesby's in the Sherardian Herbarium, I was convinced of its being a real American species.

p. 17.

*Monarda rugosa*.—M. glabriuscula; capitulis mediocribus subsimplicibus, bracteis exterioribus ovatis undulatis pilosis, calycibus corollisque glabris, lac'nia media labii inferioris bidentata, foliis ovatis subcordatis acutis rugosis, nervis subtus petiolisque pilosiss, caule acutangulo glabriuscule.—*Willd. sp. pl. 1. p. 125.*

In Canada and on the mountains of Virginia. ♀. July—Sept. v. v. in *Hort. Lambert.* About four feet high; flowers small, white.

p. 28.

*Valeriana dioica*.—V. glabra; foliis radicalibus subspathulato-ovatis integris longissime petiolatis, caulinis paucis pinnatifidis, laciniis lanceolatis integerrimis subdentatisque obtusiusculis.—*Willd. sp. pl. 1. p. 176.*

Icon. *Fl. dan. 687.*

In swamps at Hudson's Bay. *Tilden.* ♀. June. v. s. in *Herb. Sherard.* About a span high; flowers flesh-coloured.

*Fedia chenopodifolia*.—F. dichotoma; foliis ovatis acutis inferne dentatis, cymis nudis divaricato-dichotomis, filamentis longis.

- Valeriana virginiana*, pedis anserinæ folio. *Pet. H. S. in Herb. Sherard.*  
In Virginia. ♂. *v. s. in Herb. Sherard.* About a span high; flowers the size of *V. officinalis*.
- Aristida pallens*.—A. culmo erecto simplici, foliis filiformibus, radicalibus culmo brevioribus, panicula pauciflora, pedicellis alternis brevibus bifloris, aristis elongatis.—*Cav. ic. 5. t. 468. f. 2.*  
In Upper Louisiana. *Bradbury.* ♀. *v. s. in Herb. Bradbury.* About a foot high; the awns more than three inches high.
- Stipa membranacea*.—S. foliis convoluto-filiformibus glabris, panicula laxa, pedicellis flexuosis, calycibus membranaceis 3-nervibus longe acuminatis, corollis calyce brevioribus sericeo-villosis, villis corollam superantibus, arista nuda recta calyce paulo longiore.  
On the banks of the Missouri. *Bradbury.* *v. s. in Herb. Bradbury.* About eighteen inches high; flowers oval, covered with long silky hair.
- Bromus altissimus*.—B. panicula nutante, spiculis oblongis sub-6-floris, flosculis pubescentibus, valvula exteriore 3-nervata breviter aristata, foliis vaginisque glabris, culmo glabro altissimo.  
On the banks of the Missonri. ♀. July, Aug. *v. v. in Hort. Lambert.* From five to eight feet high.
- Cynosurus secundus*.—C. glaber; foliis linearibus, spica elongata unilateralis, spiculis solitariis, defloratis reflexis, calycibus linear-lanceolatis acutissimis.  
In Upper Louisiana. *Bradbury.* *v. s. in Herb. Bradbury.* Resembles *C. retroflexus* very much.
- Allionia liliaris*.—A. caule erecto tereti, foliis linearibus subcarnosis, floribus racemosis, pedicellis aggregatis, staminibus longissime exertis.  
*Calymenia angustifolia*. *Fraser Catal. 1813.*  
In Upper Louisiana. *Bradbury.* *v. s. in Herb. Bradbury.*
- Allionia hirsuta*.—A. caule erecto angulato, foliis lanceolatis nervosis utrinque hirsutis, calycibus hirsutissimis sub-3-floris.  
In Upper Louisiana. *Bradbury.* *v. s. in Herb. Bradbury.*

*Plantago elongata*.—*P.* foliis linearibus integerrimis glabris,  
scapo spicis elongatis subimbricatis foliis longioribus,  
bracteis ovatis acutis margine membranaceis.

p. 99.

In Upper Louisiana. *Bradbury*. v. s. in *Herb. Bradbury*. Resembles *P. pauciflora*.

p. 131.

*Pulmonaria lanceolata*.—*P.* glabra, erecta ; foliis radicali-  
bus longissime pedicellatis lanceolatis, caulinis lineari-  
oblongis, floribus subpaniculatis, calycibus abbreviatis.

In Upper Louisiana. *Bradbury*. *U.* v. s. in *Herb. Bradbury*. Flowers small, resembling those of *P. paniculata*.

*Pulmonaria sibirica*.—*P.* calycibus abbreviatis, foliis radica-  
lis cordatis. *Willd. sp. pl. 1. p. 770.*

*Anchusa. Gmel. sib. 4. p. 75. no. 15. t. 39.*

In Canada. *Masson*. *U.* July. v. s. in *Herb. Lambert*.  
Flowers purple, in terminal corymbs ; it resembles *P. virginica* very much.

p. 133.

*Cynoglossum glomeratum*.—*C.* hispidum ; foliis spatulatis  
obtusis, floribus glomeratis.

*C. glomeratum. Fraser. catal. 1813.*

In Upper Louisiana. *Bradbury*. *U.* v. s. in *Herb. Bradbury*.

p. 135.

*Lysimachia lanceolata*.—*L.* glaberrima ; foliis quaternis sub-  
petiolatis lanceolatis promissa acuminatis, pedunculis  
quaternis multifloris, floribus summis racemosis, corol-  
lae laciniis ovatis acutis, caule erecto simplici.

*L. caroliniana quadrifolia*, foliis acutis. *Herb. Sherard*.

In Carolina *Catesby*. *U.* v. s. in *Herb. Sherard*.

Flowers the size of *L. vulgaris*.

*Calystegia Catesbeiana*.—*C.* volubilis, tomentosa ; foliis ob-  
longis sagittatis acuminatis, pedunculis unifloris folio  
brevioribus, bracteis ovalibus obtusis calyce longio-  
ribus.

p. 143.

In Carolina. *Catesby*. v. s. in *Herb. Sherard*. Flowers  
large, purple.

*Calystegia paradoxa*.—*C.* humifusa, tomentosa ; foliis ob-  
longis cordato-sagittatis acutis, pedunculis unifloris  
elongatis folio longioribus, bracteis a flore remotis line-  
aribus, calycibus nudis glabris acuminatis.

*Convolvulus virginianus*, laeviter hirsutis et oblongis foliis,  
flore maximo albicante. *Pluk. mant. 54. secundum*  
*Herb. Sherard*.

- In Virginia or Carolina. *v. s. in Herb. Sherard.* Flowers large, white.
- p. 143.* *Convolvulus Sherardi.*—*C. humifusus, pubescens; foliis ellipticis utrinque retusis mucronatis, floribus solitariis subsessilibus.*  
*C. forte monococco* Banist. *similis, sed vasculis sessilibus.*  
*Herb. Sherard.*  
 In Carolina. *Catesby.* *○. v. s. in Herb. Sherard.* Resembles *C. trichosanthes* very much; I have only seen a specimen with fruit.
- p. 147.* *Cantua parviflora.*—*C. pubescens, diffusa; foliis pinnatifidis, laciniis linearibus elongatis, pedunculis solitariis unifloris terminalibus et oppositifoliis, corollis calyce vix longioribus.*  
*Ipomopsis inconspicua.* *Smith exot bot. 1. t. 14.*  
 In North America. *Hoy.* *○. June. v. v. in Hortis.* Flowers small, pale blue. I insert this plant on the authority of Exotic Botany; but at the same time I doubt very much of its being a native of North America, and more strongly suspect it to come from Mexico.
- p. 148.* *Phlox acuminata.*—*P. erecta, pubescens; caule angulato, foliis ovato-lanceolatis acuminatis inferne angustatis subpetiolatis subtus pubescentibus, floralibus subcordatis, corymbis paniculatis, corollæ laciniis rotundatis, tubo pubescente, calycibus aristatis.*  
*Phlox decussata.* *Lyon catal. 1812.*  
 On the mountains of Georgia and South Carolina. *Lyon.* *♀. Aug. Sept. v. v. in Hort. Lambert.* From four to five feet high; flowers very handsomely variegated, with dark and light shades of purple.
- p. 149.* *Phlox nitida.*—*P. erecta, glaberrima; caule tereti maculato lœvigate, foliis ovato-oblongis subcarnosis supra nitidis atrovirentibus, subtus pallidis, corymbis fastigiatis, ramis inferioribus elongatis nudiusculis, corollæ laciniis lato-ovovatis subretusis, dentibus calycinis lanceolatis mucronatis.*  
*P. suffruticosa.* *Hortul.*  
 In South Carolina. *Fraser.* *♀. Aug.—Oct. v. v. in Hortis.* Near two feet high; flowers of a brilliant purple, which is deeper than in any other species. This species approaches near to *P. Carolina*; but besides its other characters it distinguishes itself very easily by flowering later and longer than that species.

p. 156.

*Solanum heterandrum*.—S. annum; caule foliisque aculeatis, foliis ovatis pinnatifidis utrinque hirsutis, lacinia obtusiusculis, antheris declinatis distantibus, ima corniformi productiore, bacca calyce echinato inclusa.

Icon. Tab. 7.

The present description has been taken from a living plant raised by A. B. Lambert, Esq. from seeds received of Mr. Nuttall. The native specimen the former description was made from was very imperfect.

p. 157.

*Physalis somnifera*.—P. perennis, tomentosa; foliis ovatis integerrimis, floribus confertis brevissime pedicellatis, corollis campanulatis. *Willd. sp. pl. 1. p. 1019.*

Icon. *Cav. ic. 2. t. 103.*

In South Carolina. *Catesby.* 4. July. v. s. in *Herb. Sherard.* Flowers small, brownish-yellow.

p. 159.

*Campanula nitida*.—C. glaberrima; foliis radicalibus spatulato-oblongis coriaceis cartilagineo-crenatis, caulinis lanceolato-oblongis subintegerrimis, floribus racemosis, corollis campanulato-rotatis. *Willd. sp. pl. 1. p. 899.*

*C. americana minor*, flore cœruleo patulo. *Rob. ic.*

In North America. 4. July. v. s. in *Herb. Lambert.* nec non *Sherard.* About a span high; flowers middle size, fine blue. What part of America it is from is not known, but I suppose it to be Hudson's Bay. Misled by Michaux, this plant had been inserted as a synonym to *C. acuminata*, with which it has not the least connection.

p. 163.

*Ribes laxiflorum*.—R. inerme; foliis cordatis 5-lobis incisodentatis glabris, petiolis gracilibus, racemis laxis erectis longitudine foliorum, bracteis subulatis, pedicellis elongatis, calycibus campanulato-tubulatis, baccis globosis hispidis.

On the north-west coast. *Menzies.* ½. v. s. in *Herb. Banks.* The flowers appear to be yellow, about the size of *R. floridum*.

p. 165.

*Ribes speciosum*.—R. sub gemmis 3-plicato-aculeatum; foliis cuneato-subrotundis inciso-crenatis glabris nervosis subtus pallidioribus, petiolis brevibus, pedunculis sub-3-floris foliis longioribus, pedicellis germinibusque glanduloso-pilosus, calycibus tubulatis pedicellis longioribus, staminibus longissime exertis.

On the north-west coast. *Menzies.* ½. v. s. in *Herb. Banks.* The younger branches are hispid; the flowers

large, purple. The leaves are small, and have some resemblance to those of *Thalictrum*.

p. 165.

*Ribes Menziesii* — R. sub gemmis 3-plicato-aculeatum; ramis hispidissimis, foliis basi truncatis sub-5-lobis inciso-dentatis, lobis lateralibus brevioribus, subtus tomentosis, pedunculis subbifloris foliis subaequantibus, calycibus tubulosis: limbo patente, staminibus longitudine calycis, stylo exerto, baccis globosis aculeatis.

On the north-west coast, near Fort Trinidad. *Menzies*.  
*H. v. s. in Herb. Banks.* The flowers of the size and colour of *R. sanguineum*.

p. 173.

*Viola asarifolia*.—V. acaulis, pubescens; foliis dilatato-retiniformibus acutis circumcirca crenato-dentatis basi flabellatim in petiolum attenuatis, pedunculis foliis multo brevioribus.

*Viola caroliniana maxima*, foliis cucumerinis, floribus ad radicem pediculis brevibus natis. *Herb. Sherard*, In low rich woods: Virginia to Carolina. *Catesby*. *U.* May. *v. s. in Herb. Sherard.* I have seen this species several times in Virginia, but generally without flowers; which has been the reason that no specimen was in my collection.

p. 190.

*Hydrocotyle ambigua*.—H. folio radicali composito, caule subaphyllo 2-3-umbellifero, umbellulis sub-3-floris, petalis lanceolatis.

In Upper Louisiana. *Bradbury*. *v. s. in Herb. Bradbury*. A very small plant; flowers in proportion large, white, with purple anthers; resembling *H. composita*.

p. 192.

*Selinum acaule*.—S. glabrum, acaule; foliis bipinnatis, foliis linearibus superioribus confluentibus, scapis radicalibus foliis brevioribus, umbellulis radii masculi.

In Upper Louisiana. *Bradbury*. *U. v. s. in Herb. Bradbury*. Not above two or three inches high; the seeds resembling those of *Pastinaca sativa*.

p. 197.

*Seseli divaricatum*.—S. caule ramosissimo divaricato, foliis bipinnatifidis, lacinias lanceolatis incisis, involucris nullis, involucellis linearibus.

In Upper Louisiana. *Bradbury*. *v. s. in Herb. Bradbury*. Resembles *S. tortuosum* very much.

p. 223.

*Allium cernuum*.—A. scapo nudo tetragono umbellifero, foliis linearibus planiusculis, umbella cernua, staminibus simplicibus, germine sex-dentato. *Roth in Annals of bot. 2. p. 27.*

*Icon. Cat. bot. fasc. 2. t. 2. Bot. mag. 1324.*  
On the mountains of Virginia and Carolina.  $\mathcal{U}$ . July,  
Aug. v. v. Flowers large, rose-coloured, sweet-scented; the leaves have scarcely any scent.

*Smilacina stellata*,  $\beta$ . uniflora.—S. foliis subfalcato-lanceolatis glabriusculis, caule unifloro.

p. 233.

*Polygonatum monanthemum*, flore parvo erecto. *Sherard. Herb.*

In Hudson's Bay. *Tilden. U. v. s. in Herb. Sherard.*  
As I have seen but one individual specimen, I consider it only as a variety, though it is probable it may be a distinct species.

*Helonias graminea*.—H. scapo folioso paniculato, racemis divaricatis, bracteolis ovatis pedicellis longioribus, petalis oblongis acuminatis, staminibus corolla triplo brevioribus, foliis linearibus canaliculatis subtus glaucis.—*Bot. mag. 1599.*

p. 243.

On the mountains of Georgia. *Lyon. U. Aug. v. s. in Herb Lyon.* This species has a strong affinity with *Nolina Georgiana*.

p. 248.

*Rumex venosus*.—R. valvulis maximis integerrimis reticulato-venosis, foliis lanceolatis integerrimis parallelo-venosis.

In Upper Louisiana. *Bradbury. U. v. s. in Herb. Bradbury.* The seeds resemble those of *R. vesicarius*.

p. 249.

*Smilax circidifolia*.—S. aculeata; foliis inermibus orbiculato-cordatis acuminatis 5-nervibus utrinque glabris reticulato-venosis breviter petiolatis.

*S. floridana*; viticulis spinosis judaicæ arboris folio maximum cordato. *Pluk. amalth. 194.*

In South Carolina. *Catesby. h. v. s. s. fl. in Herb. Sherard.* Though the description was taken from a specimen without flowers, I am convinced of its being a distinct species from any one described.

p. 260.

*Gaura coccinea*.—G. sericeo-pubescent; foliis linear-lanceolatis subdenticulatis, spica conferta, petalis longitudo calycis, stigmate subintegro.

*G. coccinea*. *Fraser. catal. 1813.*

In Upper Louisiana. *Bradbury. v. s. in Herb. Bradbury.* About a span high; flowers smaller than *G. biennis*, scarlet. In the Catalogue quoted this plant is marked as a perennial, but by the appearance of the specimen I should take it to be only annual.

*Oenothera albicaulis*.—O. tenuissime pubescens; caule nervisque foliorum albidis, foliis pinnatifidis, laciinis divaricatis.

p. 262.

*ricatis, floribus subspicatis, germinibus sessilibus cylindraceis, staminibus corolla brevioribus, petalis obcordatis.*

*O. albicaulis. Fraser. catal. 1813.*

In Upper Louisiana. *Bradbury.* ♂. *v. s. in Herb. Bradbury.* Not above four inches high; flowers large, white. This species is intermediate between *O. tetrapetala* and *O. sinuata*.

*Oenothera Fraseri.*—*O. glabriuscula;* caule inferne simplici, superne ramiolo, foliis ovatis petiolatis glandulosodenticulatis, racemis foliosis, capsulis pedicellatis obovatis 4-gonis.

In South Carolina. *Fraser.* ♀. June, July. *v. v. in Hortis.* This species approaches so near to *O. fruticosa* that it is difficult to define the distinction, though their other habits are so very different. The present species flowers a short time, the stems decay, and form immediately a tuft of large radical leaves. *O. fruticosa* flowers till late in autumn, and never shows its radical leaves in that manner. The differentia specifica of *O. fruticosa* will be *O. fruticosa*, tenui pubescens; caule a basi ramosa, divaricata, foliis sessilibus lanceolatis subdentatis acutis, capsulis pedicellatis oblongo-clavatis angulatis.

*Oenothera macrocarpa.*—*O. glabriuscula;* caule ramoso, foliis lanceolatis, petiolatis, distanter glandulosodenticulatis margine nervisque sericeo-albidis, petalis cum acumine obcordatis, capsulis ellipticis 4-alatis brevisimae pedicellatis.

*O. missouriensis. Bot. mag. 1592.*

On the banks of the Mississippi, near St. Louis. ♂. July—Oct. *v. v. in Hort. Lambert.* This species exceeds in size and beauty of its flowers any other one known; they are of a bright yellow, very large, and open about five o'clock in the evening. The calyx is covered with a very fine and white silky down, and is spotted with purple. The figure in the Botanical Magazine is apparently taken from a very weak and starved plant: the flowers of those in possession of A. B. Lambert, Esq., were nearly six inches in diameter, and the tube nearly seven inches long. There is an inequality on the edges of the petals, but by no means can it be called serrulate, which term has been introduced in the differentia specifica, and strongly but erroneously expressed in the figure. The specific name given there is inapplicable, as it never was found any where else,

but near St. Louis, where Mr. Nuttall gathered the ripe fruits of it, specimens of which I have seen.

*Oenothera cæspitosa* — O. acaulis ; foliis lanceolatis inciso-dentatis, capsulis oblongis sessilibus, calycis tubo longissimo, petalis bilobis distantibus. *Sims in Bot. mag.* 1593.

*O. scapigera*. *Fl. amer. sept.* 1. p. 263.

On the banks of the Missouri. *Lewis*. 4. June, July. v. v. in *Hort. Fraser*; v. s. specimen *imperfectum in Herb. Lewis*. This singular species resembles *O. acaule* of Cavaillès. The flowers open in the evening, are white, changing to red, and of an agreeable scent. The erroneous description given in the place above quoted was owing to a very imperfect specimen in the Lewisian collection.

*Eriogonum pauciflorum*.—E. caule simplici basi folioso, umbellis paucifloris, floribus subsessilibus, foliis linearilanceolatis utrinque cano-tomentosis.

In Upper Louisiana. *Bradbury*. 4. v. s. in *Herb. Bradbury*. This is the smallest species, generally from two to three inches high; the flowers appear to be white.

*Cactus viviparus*.—C. subrotundus multiplex, tuberculis cylindraceis barbatis supra sulca exaratis proliferis.

*C. viviparus*. *Fraser. catal.* 1813.

In Upper Louisiana. b. v. v. s. fl. in *Hort. Lambert*. Resembles *C. mammillaris*; the flowers are large and red; the fruit the size of a grape, green and eatable. In the same collection are also the two other species mentioned in Fraser's Catalogue; but only seeing the plants without flowers, I could not define their characters.

*Crataegus turbinata*.—C. inermis, glabra; foliis cuneato-obovatis incisis serratis, corymbis paucifloris, pedicellis brevibus, fructibus turbinatis.

In Carolina and Virginia. b. June. v. v.; v. s. in *Herb. Sherard*. This species approaches near to *C. spathulata*, but its fruit distinguishes it from all the rest of the American species.

*Rosa lutescens*.—R. germinibus globosis pedunculisque glabris, ramulis hispido-spinoisis, foliolis (7) glabris ova-liibus acuminato-serratis, petiolis inermibus, floribus so-

p. 336.

p. 345.

- litariis, laciniis calycis lanceolatis cuspidatis, petalis ovalibus obtusissimis.  
In Carolina. ♀. May, June. v. v. in Hort. Lee. Flowers white, with a faint tint of yellow.
- p. 352. *Geum triflorum*.—G. pilosum; caule simplici subtrifloro, foliis radicalibus interrupte pinnatis, foliolis cuneatis inciso-dentatis, petalis oblongis longitudine calycis, aristis longissimis villosis.  
In Upper Louisiana. Bradbury. ♀. v. s. in Herb. Bradbury. The aristas of the seeds are resembling those of *Clematis*.
- p. 356. *Potentilla arguta*.—P. erecta, simplex, pubescens; foliis pin-natis, foliolis ovatis argute dentatis, exterioribus majoribus, stipulis rhomboideis incisis, floribus terminalibus conferto-corymbosis.  
In Upper Louisiana. Bradbury. ♀. v. s. in Herb. Bradbury. Flowers yellow; leaves large.
- p. 384. *Clematis Catesbyana*.—C. scandens, pubescens; foliis bi-ternatis, foliolis subcordatis trilobis, paniculis divaricato-dichotomis, petalis staminibus longioribus, floribus subdioicis.  
In South Carolina. Catesby. ♀. v. s. in Herb. Sherard. Resembles *C. virginica*. The filaments of the female flowers are membranaceous, linear, and without anthers.
- p. 385. *Clematis ovala*.—C. erecta, simplex; foliis ovatis sensim acutis brevi-petiolatis glabris utriusque reticulato-venosis, inferioribus subcordatis pedunculo terminali solitario unifloro, aristis plumosis longissimis.  
In South Carolina. Catesby. ♀. v. s. in Herb. Sherard. Resembles *C. integrifolia*. In the Sherardian Herbarium the figure of *Pluk. mant. t. 379. f 4.* is quoted; but I consider that figure to be an imperfect specimen of a *Clematis* with compound leaves.
- p. 395. *Ranunculus multifidus*.—R. foliis tripartito-multifidis: laciniis incisis approximatis, caule natante, foliolis calycis subtrotundis petalis paulo brevioribus.  
In Upper Louisiana. Bradbury. ♀. v. s. in Herb. Bradbury. Flowers yellow; resembles *R. fluviatilis*.
- p. 424. SEYMERIA. *Cal.* campanulatus, 5-partitus: laciniis linearibus, aequalibus. *Cor.* campanulata. *Tubus* calyce

vix longior. *Limbus* 5-fidus: laciinis subæqualibus, oblongis, patentibus. *Filamenta* 4. brevia, fauce inserata. *Antheræ* erectæ, oblongæ, nude, longitudine corollæ. *Stylus* declinatus, longitudine staminorum. *Stigma* simplex. *Caps.* subrotunda, 2-locularis, 2-valvis, apice dehiscens.

*Seymeria tenuifolia*.—*S. glabriuscula*, *virgatim paniculata*; foliis setaceo-pinnatifidis, laciinis divisis.

*Gerardia Cassioides*. Vol. 2. p. 424.

In dry sandy woods of Carolina and Georgia. ♂. July, Aug. v. s. in *Herb. Sherard.* Flowers small, dark yellow.

*Seymeria pectinata*.—*S. viscido-pubescent*, brachiatum ramosissima; foliis pectinato-pinnatifidis, laciinis indivisis linearibus acutis.

In South Carolina. *Catesly*. ♂ July. v. s. in *Herb. Sherard.* Flowers the size and colour of the preceding. While writing the genus *Gerardia*, I strongly suspected *G. cassioides* to be a distinct genus, which already had been considered so by Walter and Gmelin. Having no materials then at hand, I followed the authority of Michaux. But finding in the Sherardian Herbarium not only that species, but also a new one described here, I was convinced of its generic distinction, the character of which is well expressed in *Walt. fl. car.* 171. I have named this genus in memory of the late Henry Seymer, Esq. of Hanford, Dorsetshire, a gentleman much celebrated for his extensive collections in natural history, and for whom Dr. Solander had so great a regard as to dedicate the plant which afterwards was called *Solandra grandiflora* to his memory, as I have seen it named *Seymera* in the Herbarium of A. B. Lambert, Esq., in Dr. Solander's own handwriting.

*Chelone Lyoni*—*C. glabra*, ramosa; foliis petiolatis cordato-ovatis serratis, spicis terminalibus densitioris.

In Upper Carolina and Georgia. *Lyon*. ♀. July—Sept. v. s. in *Herb. Lambert*. This is a very fine and large species; flowers purple.

*Pentstemon eriantherus*.—*P. caule pumilo pubescente*, foliis oblongis acutis obsolete denticulatis subhirsutis, floribus racemosis, pedicellis plerumque solitariis, filamento sterili exerto apice revoluto longitudinaliter barbato, calycis foliolis linearibus hirsutissimis.

p. 427.

p. 428.

*P. cianthera*. *Fraser. catal.* 1813.

In Upper Louisiana. *Bradbury*.  $\mathcal{U}$ . *v. s. in Herb.*

*Bradbury*. Not above a span high ; flowers large in proportion, of a deep purple ; the hairs of the infertile anthera are long and golden yellow. It approaches near to *P. frutescens*.

*Pentstemon angustifolia*.—*P. caule* vix pubescente, foliis glabris longe linearibus integerrimis, floribus racemoso-paniculatis, filamento sterili relquis breviore superne sub-hirsuto, calycis foliolis lanceolatis glabris.

*P. angustifolium*. *Fraser. catal.* 1813.

In Upper Louisiana. *Bradbury*.  $\mathcal{U}$ . *v. s. in Herb.*

*Bradbury*. Flowers resembling those of *P. pubescens*.

*Pentstemon glabra*.—*P. caule* foliisque glabris, foliis sub-amplexicaulibus ovato-oblongis integerrimis, floribus racemoso-paniculatis, filamento sterili nudo clavato apice retuso, calycis foliolis subrotundis acuminatis, lacinias corollæ subaequalibus rotundatis, antheris hirsutis.

In Upper Louisiana. *Bradbury*.  $\mathcal{U}$ . *v. s. in Herb.*

*Bradbury*. A fine and large species ; flowers dark purple.

*Pentstemon Bradburii*.—*P. glaberrima* ; foliis subamplexicaulibus ovato-oblongis integerrimis, superioribus subrotundis, floribus verticillatis, filamento sterili apice brevi barbato, calycis foliolis oblongis acutis.

*P. grandiflorum*. *Fraser. catal.* 1813.

This is the finest and largest of all the species ; the flowers very large, and variable in their colour.

p. 431.

*Castilleja sessiliflora*.—*C. foliis apice palmato-incisis, floribus sessilibus.*

In Upper Louisiana. *Bradbury*.  $\mathcal{U}$ . *v. s. in Herb.*

*Bradbury*.

*Caulis ramosus*, teres, dense pubescens. *Folia alterna*, sessilia, utrinque pubescentia, apice in lacinias 3—5. *divisa* : lacinias linearibus, elongatis, acutis. *Flores* in apice ramorum axillares, solitarii, sessiles, coccinei ?

*Calyx* tubulosus, basi ventricosus, 4-fidus ? *Corolla* ringens. *Labium* superius acutum ? *infras* trifidum : lacinias linearibus, acutis, labio superiore vix brevibus. *Stamina* fauci corollæ inserta, uniformia, longitudine labii superioris, glabra. *Antheræ* lineares. *Stigma* exertum.

This highly interesting plant has some distant affinity with *C. fissifolia*. Smith ic. ined. t. 40.

*Cleome pinnata*.—*C. subpubescens*, hexandra; foliis pinnatis, foliolis lanceolatis inferne attenuatis rarer dentatis, superioribus confluentibus, floribus racemosis, pedicellis aggregatis,

In Upper Louisiana. Bradbury. v. s. in Herb. Bradbury. About two feet high; flowers of a bright yellow; the pods are on very long pedicels.

*Polygala corymbosa*.—*P. caule* inferne simplicissimo, summitate ramosa corymbose multifloro, foliis linearibus.— Mich. fl. amer. 2. p. 54.

*P. c. mosae*. Walt. fl. car. 179. In swamps: Carolina to Florida. 24. July, Aug. v. s. Flowers yellow, when dried green.

*Vicia stipulacea*.—*V. racemis* subquadrisfloris folio longioribus, stipulis foliiformibus basi semisagittatis integris, foliolis 8—10. linear-lanceolatis utrinque acutis nervosis glabris.

In Upper Louisiana. Bradbury. 24. v. s. in Herb. Bradbury.

*Caulis* subtetragonus, striatus, simplex, vix pedalis. *Foliola* 8—10. opposita lineari-lanceolata acuta glabra utrinque elevato-nervosa. *Stipulae* longitudine foliorum, basi semisagittatae, auriculis acutis. *Cirrus* obsoletus, setaceus. *Pedunculi* axillares folio duplo longiores. *Racemi* plerumque 4-flori. *Flores* magni, purpurei. *Legumen* glabrum.

*Ervum multiflorum*.—*E. racemis* pedunculatis multifloris folio longioribus, legumiinibus lanceolatis glabris sub-4-spermis, stipulis ovatis acuminatis, foliolis linearibus obtusis, cirrhis nullis, caule paniculato.

Astragalus tenellus. Vol. 2. p. 473.

In Upper Louisiana. M. Lewis and Bradbury. 24. Aug. v. s. in Herb. Lewis, nec non Bradbury.

*Caulis* erectus, paniculato-ramosus, teres. *Ramuli* juniores sericei. *Foliola* plurima, alterna linearia, obtusa, glabriuscula. *Cirri* nulli. *Stipulae* ovatae longe acuminatae. *Raceni* axillares, elongati, pedunculati. *Bracteae* minutae, ovatae, acuminatae, vix longitudine pedicellarum. *Pedicelli* flore breviores. *Flores* parvi albidii, vexillo oblongo. *Calyx* sericeus, corolla triplo brevior, dentibus subulatis. *Style* filiformis, glaber,

p. 441.

p. 446.

p. 472.

*inflexus. Stigma acutum, glabrum. Legumina pendula, oblongo-lanceolata, glabra, 3-4-sperma.*

Of this plant I had an imperfect specimen in the Lewisan Herbarium, together with some pods of an *Astragalus*, which led me into the error of placing it under that genus; but having since seen fine specimens in the collection of Mr. Bradbury, I was enabled to correct this error.

*Astragalus racemosus*.—A. caulescens, erectus, subpubescens; foliolis (21) lanceolatis superne sensim minoribus, stipulis ovatis acuminatis, spicis racemosis pedunculatis folio longioribus, densifloris, bracteis linearibus pedicellis brevioribus, calycibus glabriusculis, dentibus subulatis.

In Upper Louisiana. *Bradbury. Ȑ. v. s. in Herb. Bradbury.* Flower white. Resembles *A. carolinianus*.

*Astragalus carnosus*.—A. caulescens, diffusus, albido-sericeus, foliolis (21) ellipticis supra glabris, subtus sericeis, stipulis subulatis, spicis subsessilibus, leguminibus globosis inflatis carnosis.

In Upper Louisiana. *Bradbury. v. s. in Herb. Bradbury.* The fruit resembles that of *A. psycodes*. Flowers appear to have been white. This is probably the *A. crassicarpus* *Fraser. catal. 1813.*

p. 473.

*Astragalus triphyllus*.—A. acaulis, argenteus, foliis ternatis, foliolis sessilibus lanceolatis, scapo nullo, leguminibus sessilibus oblongis.

In Upper Louisiana. *Bradbury. Ȑ. v. s. in Herb. Bradbury.* A most singular species, the leaves of a shining silver colour; the flowers were too much decayed when I examined the specimens.

*Oxytropis Lambertii*.—O. acaulis, sericeo-pilosa; foliolis (19) lanceolato-ellipticis utrinque acutis, scapis folia æquantibus, spicis capitatis, bracteis linearibus longitudinalibus calycis.

On the Missouri. *Bradbury. Ȑ. Aug. Sept. v. v. in Hort. Lambert.* Flowers a beautiful purple. It approaches near to *O. argentata* and *setosa*.

p. 474.

*Dalea aurea*.—D. sericeo-villosa; spicis oblongis terminalibus solitariis, bracteis oblongis acuminatis calycis longitudinalibus ciliatis, calycibus villosissimis, foliis sub-2-jugis oblongis obovatisque obtusis.

*D. aurea*. *Fraser. catal. 1813.*  
In Upper Louisiana. *Bradbury*. *U. v. s. in Herb.*  
*Bradbury*. Flowers bright yellow, in oblong hairy spikes.

*Psoralea laxiflora*.—*D. glabriuscula*; caule superne ramosissimo, ramis laxis elongatis, spicis paniculatis elongatis, floribus remotiusculis, bracteis subrotundis mucronatis carinatis, floribus enneandris, calycibus sericeo-villosis, foliis sub-4-jugis linearibus.

*D. enneandra*. *Fraser. catal. 1813.*  
In Upper Louisiana. *Bradbury*. *U. v. s. in Herb.*  
*Bradbury*. This is the tallest of the genus. The white flowers are in narrow spikes, and have remarkable silky calyces, which form a fine contrast with the rest of the plant, being entirely destitute of hair.

*Psoralea elliptica*.—*P. subpubescens*; foliis ternatis: foliolis ellipticis obtusis, pedunculis axillaribus folio longioribus, spicis conferto-paucifloris, dentibus calycis abbreviatis.

p. 475.

In Upper Louisiana. *Bradbury*. *U. v. s. in Herb.*  
*Bradbury*. Flowers small, white with a tinge of purple.

*Psoralea longifolia*.—*P. undique sericeo-villosa*; foliis ternatis: foliolis linearibus elongatis, spicis axillaribus penduculatis laxifloris folio brevioribus, dentibus calycis bracteisque subulatis.

In Upper Louisiana. *Bradbury*. *U. v. s. in Herb.*  
*Bradbury*. Flowers midde-sized, apparently white. The leaves have none of those glandular dots so general in this genus.

*Psoralea cuspidata*.—*P. villosa*; foliis digitato-quinatis, foliolis obovatis mucronatis integerrimis, spicis axillaribus densifloris, lacinias calycis bracteisque ovatis cuspidatis conspicue punctatis.

p. 476.

*P. macrorhiza*. *Fraser. catal. 1813.*  
In Upper Louisiana. *Bradbury*. *U. v. s. in Herb.*  
*Bradbury*. This species has some resemblance to *P. esculenta*.

*Cytisus rhomifolius*.—*C. pubescens*; racemis terminalibus erectis, leguminibus falcatis subarticulatis, foliolis oblongo-rhomboideis obtusis, stipulis rotundato-ovatis obliquis.

p. 480.

*C. rhombifolius*. *Fraser. catal. 1813.*

In Upper Louisiana. *Bradbury. v. s. in Herb. Bradbury.* The stipulae are large and foliaceous; the specimen I have seen was in fruit, and Mr. Bradbury has seen only one plant in flower.

p. 505.

*Troximum glaucum*.—*T. scapo unifloro glabriusculo, foliis linear-lanceolatis planis integerrimis utrinque glaucis, calycinis foliolis imbricatis acutis pubescentibus.*—*Vol. 2. p. 505.*

*Troximum cuspidatum*.—*T. scapo unifloro superne subtomentoso, foliis linearibus margine undato tomentosis, calycinis foliolis imbricatis cuspidatis glabris.*

In Upper Louisiana. *Bradbury. 4. v. s. in Herb. Bradbury.* Flowers large, yellow. Resembles the preceding.

p. 519.

*Hymenopappus scabiosaeus*.—*H. candicanti-lanuginosus; foliis profunde pinnatifidis, laciiniis linear-oblongis sub-dentatis, floribus simpliciter corymbosis, calyce sub-10-phyllo flosculis majore, seminibus pubescentibus.*—*Vol. 2. p. 519.*

*Hymenopappus tenuifolius*.—*H. candicanti-lanuginosus; caule corymbo-ramoso, foliis subbipinnatifidis, laciiniis anguste linearibus integris, floribus composite corymbosis, pedicellis confertis, calyce sub-6-phyllo flosculis breviore, seminibus villosissimis.*

In Upper Louisiana. *Bradbury. 3. v. s. in Herb. Bradbury.* At first sight I considered this to be the same with the preceding species; but comparing the figure and description in the *Journal d'Histoire Naturelle*, vol. 1. p. 16. t. 1. with my specimen, I found them materially distinct. The flowers are white, and not half the size of the former.

p. 521.

*Artemisia dracunculoides*.—*A. glabra; ramis nutantibus, foliis longo-linearibus subfalcatis, radicalibus trifidis, racemis foliosis, pedicellis brevibus, floribus erectis, calycibus subglobosis paucifloris, foliolis scariosis.*

*A. nutans*. *Fraser. catal. 1813.*

In Upper Louisiana. *Bradbury. 4. v. s. in Herb. Bradbury.* From three to four feet high; flowers very small.

p. 532.

*Erigeron hirsutum*.—*E. undique hirsutissimum; caule sim-*

- plici unifloro, foliis linearibus integerrimis enervibus,  
calycibus hirsutis.  
*E. uniflorum*. Willd. sp. pl. 3. p. 1960 ?  
 In Upper Louisiana. Bradbury. ♀. v. s. in Herb.  
 Bradbury. Not above five inches high; flowers large,  
ray white and long.
- Galardia acaulis*.—G. pilosa; scapo unifloro, foliis linearis-  
spathulatis, paleis pappi (5—7) ovatis brevi-aristatis. p. 573.  
 In Upper Louisiana. Bradbury. ♀. v. s. in Herb.  
 Bradbury. Not above a span high; flower small, sim-  
ply yellow.
- Iva axillaris*.—I. herbacea, subpilosa; foliis plerumque op-  
positis linearis-lanceolatis integerrimis, floribus axillari-  
bus solitariis nutantibus, calycibus simpliciusculis, fo-  
liolis ovatis. p. 580.  
 In Upper Louisiana. Bradbury. ♂. v. s. in Herb.  
 Bradbury. About a span high; flowers white.
- Ambrosia hispida*.—A. undique canescens-hispida; foliis  
bipinnatifidis, lacinias incisis, racemis terminalibus sub-  
paniculatis. p. 581.  
 In South Carolina. Catesby. ♂. v. s. in Herb. Sherard.  
 About a foot high; flowers larger than *A. trifida*.
- Orchis herbiola*.—O. cornu filiformi germine breviore, la-  
bello oblongo obtuso basi utrinque dentato; palato uni-  
dentato, bracteis flore longioribus. p. 587.  
 Habenaria herbiola. Brown in Ait. kew. ed. 2. vol. 5.  
 p. 193.  
 In North America. Fothergill. ♀. +. This species,  
unknown to me, appears to approach near to *Orchis*  
*fuscescens*.
- Aristolochia tomentosa*.—A. caule volubili frutescente, foliis  
petiolatis cordatis subtus tomentosis, pedunculis solita-  
riis ebracteatis, corollæ tubo retorto; limbo subæqua-  
liter trifido: ore hiante. Sims in bot. mag. 1369.  
 On the mountains of South Carolina. Lyon. ♂. June.  
 v. v. Resembles *A. Sipho*. Flowers yellow.
- Alnus glauca*.—A. foliis oblongis acutis duplicato-serratis  
subtus glaucis, axillis venarum nudis, stipulis lanceola-  
tis.—Mich. arb. 3. p. 322. t. 4. p. 596.  
 In New England and on the high mountains of Pensyl-  
vania. ♂. March, April. v. v. This shrub, which  
is known by the name of *Black Alder*, has a strong re-  
semblance to *A. incana*.

## VALUABLE WORKS

IN

### Natural History

PUBLISHED BY

WHITE, COCHRANE, AND Co.,

HORACE'S HEAD, FLEET STREET.

---

ORIENTAL MEMOIRS; selected and abridged from a Series of Familiar Letters written during Seventeen Years' Residence in India: including Observations on Parts of Africa and South America; and a Narrative of Occurrences in four India Voyages. By JAMES FORBES, F.R.S. &c. Elegantly printed by BENSLEY, in 4 vols. royal 4to. Price 16l. 16s. in boards. With a Portrait of the Author, and 93 Engravings from original Drawings, illustrative of the Natural History, Scenery, Antiquities, and Costume, and including Portraits of several distinguished Characters.

The Subjects of Natural History have been engraved and coloured by HOOKER in a style of great accuracy and beauty; and the Landscapes and other Subjects by C. HEATH, ANGUS, STORER, GREIG, &c.

THE NATURAL HISTORY AND ANTIQUITIES OF SELBORNE, in the County of Southampton. To which are added: The NATURALIST'S CALENDAR; OBSERVATIONS ON VARIOUS PARTS OF NATURE; and POEMS. By the late Rev. GILBERT WHITE, formerly Fellow of Oriel College, Oxford. A new Edition, elegantly printed in post 4to. by BENSLEY, with Additions, and 13 Engravings, several of which are new. Price 2l. 12s. 6d. in boards.

Fifty Copies are printed on royal quarto paper, (with the copy of a curious old Painting, beautifully coloured,) and done up in 2 vols. Price 5l. 5s. in boards. Of these very few now remain.

To those who are acquainted with this Work, any recommendation of it is superfluous: to those who are not, the testimonies borne to its merits, both as to matter and style, by some of the most eminent Writers of the present day, by Dr. WHITAKER, DR. AIKIN, MR. EDGWORTH, &c. may offer some inducement to its perusal. Without exaggeration, it may be said to stand at the head of, and to serve as a model for, all Works of a similar description.

*Valuable Works lately published by*

At the same time is published, handsomely printed in 2 vols. 8vo. with Four Engravings, price 16s. in boards, a new Edition of

THE NATURAL HISTORY OF SELBORNE: To which are added, THE NATURALIST'S CALENDAR; MISCELLANEOUS OBSERVATIONS; and POEMS.

*Extract from the Advertisement.—*“The NATURAL HISTORY OF SELBORNE has probably been supposed by many to be formed upon a more local and confined plan than it really is. In fact, the greater part of the Observations are applicable to all that portion of the island in which the Author resided, and were indeed made in various places. Almost the only matter absolutely local, is the account of the Antiquities of the Village of Selborne; and this seemed to stand so much apart, that, however well calculated to gratify the lovers of topographical studies, it was thought that its entire omission would be no loss to the Work, considered as a publication in Natural History.”—“The Editor flatters himself that, in its present form, it will prove an acceptable addition to the library of the Naturalist, and will in particular be useful in inspiring young persons, and those who pass their time in retirement, with a taste for the very pleasing branch of knowledge on which it treats.”

FAUNA ORCADENSIS; or, The Natural History of the Quadrupeds, Birds, Reptiles, and Fishes of Orkney and Shetland. By the Rev. GEORGE LOW, Minister of Birsay and Haray. From a Manuscript in the possession of WILLIAM ELFORD LEACH, M.D. F.L.S. &c. Elegantly printed in 1 vol. sm. 4to. Price 1l. 1s. in boards.

NATURAL HISTORY; General and Particular. By the COUNT DE BUFFON. Illustrated with above Six Hundred Copper-plates. The History of Man and Quadrupeds translated, with Notes and Observations, by WILLIAM SMELLIE, Member of the Antiquarian and Royal Societies of Edinburgh. A new Edition, carefully corrected, and considerably enlarged by many additional Articles, Notes, and Plates, and some Account of the Life of BUFFON, by WILLIAM WOOD, F.L.S. In 20 vols. 8vo. Price 12l. in boards.

AN ESSAY ON THE PHILOSOPHY, STUDY, AND USE OF NATURAL HISTORY. By CHARLES FOTHERGILL. Beautifully printed in foolscap 8vo. Price 8s. in boards,

LACHESIS LAPONICA: or, A TOUR IN LAPLAND. Now first published from the original Manuscript Journal of the celebrated LINNAEUS. By JAMES EDWARD SMITH, M.D. F.R.S. &c. President of the Linnean Society. Handsomely printed in 2 vols. 8vo. with above 60 Wood Cuts from the extemporaous Sketches of the illustrious Author. Price 1l. 1s. in boards.

“Although the preceding notices and extracts can convey to our readers a very inadequate idea of the quantity of minute details which has been pressed into this interesting diary, they may serve to furnish exemplifications of its nature and spirit. Whoever peruses the entire document with candour and attention, will be induced to regard it as the unaided and unpreserved production of a student of medicine, in his 25th year, labouring under the daily privation of many comforts, and braving cold, tempest, and danger, in

## WHITE, COCHRANE, and Co. Fleet Street.

the eager prosecution of natural science. In this Itinerary we perceive no traces of that vanity for which its Author was subsequently too much distinguished."—*Monthly Review*, March 1812.

"Before we close our report of this very extraordinary production, we deem it only an act of justice to the learned and laborious Editor, to mention, that he has bestowed much trouble in deciphering the original manuscript, and in procuring a faithful version of its miscellaneous contents. Even the fac-similes of the rough drawings, though executed in a very different style from the pretty plates of Mr. Ackermann's Repository, contribute, nevertheless, to the graphic and ghostly air of the whole performance."—*Edinburgh Review*, Feb. 1812.

**PETRALOGY: A TREATISE ON ROCKS.** By JOHN PINKERTON, Author of Modern Geography, &c. Handsomely printed in 2 large vols. 8vo. with 25 Vignette and other Engravings. Price 2l. 2s. in boards.

Extracts from the Introduction.—"I would propose, in the present advanced state of science, that the mineral kingdom be divided into three provinces: 1. PETRALOGY, or the knowledge of rocks, or stones which occur in large masses. 2. LITHOTOCY, the knowledge of gems and small stones. 3. METALLOGY; or the knowledge of metals. Each of these branches is even at present so important, and offers such numerous topics of disquisition and research, that in the course of no long period a Professor of each will appear in Universities; and each might occupy the sole pursuit of an Author who is zealous to make discoveries, or to compose complete and classical works."—"In the present Work it is to be hoped that the want of attention, care, or labour will not be accused. The Author has sedulously employed the intervals of ten years in this production, particularly three which he passed at Paris, where he had constant opportunities of seeing the most opulent cabinets, and of conversing with men eminent in the science; as PATRIN, GILLET-LAUMONT, DAUBUSSON, and others: not to mention interviews with HAUy and with WERNER, during his short stay in that capital.—He hopes the Work may at least aspire to the humble praise of utility, the chief aim of his labours."

**MINERALOGICAL TRAVELS THROUGH THE HEBRIDES, ORKNEY AND SHETLAND ISLANDS, AND MAINLAND OF SCOTLAND;** with Dissertations upon PEAT and KELP. By ROBERT JAMESON, Regius Professor of Natural History, Keeper of the Museum, and Lecturer on Mineralogy in the University of Edinburgh, President of the Wernerian Society, &c. &c. In 2 vols. 4to. with Maps and Plates. Price 1l. 16s. in boards.

**POMONA HEREFORDIENSIS:** being a descriptive Account of the old CIDER and PERRY FRUITS of HEREFORDSHIRE, which have always been esteemed the best of their Kind; with such new Fruits as have been found to possess superior Excellence. Accompanied by 80 highly-finished coloured Engravings, by WILLIAM HOOKER, from Drawings principally by Miss MATTHEWS. Published under the Patronage of the Agricultural Society of Herefordshire. The Descriptions by T. A. KNIGHT, Esq. In 1 vol. royal 4to. Price 4l. 10s. in boards.

**POMONA LONDINENSIS.** Containing COLOURED REPRESENTATIONS of the BEST FRUITS cultivated in the British Gardens: with Des-

*Valuable Works lately published by*

Scributions, in which the Author is assisted by the President and Members of the Horticultural Society. By WILLIAM HOOKER, F.H.S: Draughtsman and Engraver to the Society.

The FIRST and SECOND NUMBERS, handsomely printed on extra super-royal 4to. with seven Plates in each, Price 1l. 1s. per Number, are now ready for delivery.

*A few Copies are taken off on atlas 4to. and coloured in a superior manner. Price 1l. 15s.*

The probable extent of the Work will be about Eighteen Numbers. A Number will be published every Four Months.

POMONA BRITANNICA: or, A COLLECTION of the most esteemed FRUITS at present cultivated in this Country: together with the Blossoms and Leaves of such as are necessary to distinguish the various Sorts from each other. Selected from the Royal Gardens at Hampton Court, and the remainder from the most celebrated Gardens round London. Accurately drawn and coloured from Nature; with full Descriptions of their various Qualities, Seasons, &c. By GEORGE BROOK SHAW. In Atlas folio: the Letter-press printed by BENSLEY in the first style of elegance; with 90 Engravings, engraved and coloured in a novel and beautiful style. Price 45l. in boards.

*This Work was originally published in Thirty Numbers, at 1l. 10s. each. Subscribers who have not yet completest their Copies, may do it by an early application to the Publishers.*

HORTUS CANTABRIGIENSIS: or, A CATALOGUE OF PLANTS, INDIGENOUS and EXOTIC. By JAMES DONN, Curator, Fellow of the Linnaean and Horticultural Societies. The Seventh Edition, in small 8vo. Price 10s. in boards.

MAWE'S GARDENER'S CALENDAR, AND GENERAL DIRECTORY. By JOHN ABERCROMBIE. The Twentieth Edition, corrected and greatly enlarged, in 1 thick vol. 12mo. Price 7s. 6d. in boards.

AN ESSAY ON THE PROBABILITY OF SENSATION IN VEGETABLES. By J. P. TUPPER, F.L.S. Member of the Royal College of Surgeons. In 8vo. Price 6s. in boards.

FLORA GRÆCA: sive Plantarum rariorn Historia, quas in Provinciis aut Insulis Græciae legit, investigavit, et depingi curavit, JOHANNES SIBTHORP, M.D. S.S. Reg. et Linn. Lond. Socius, Bot. Professor Regius in Academia Oxoniensi. Hic illic etiam insertae sunt pauculae Species quas Vir idem clarissimus, Græciam versus navigans, in Itinere, presertim apud Italiam et Siciliam, invenerit. Characteres omniu[m] Descriptiones et Synonyma elaboravit JACOBUS EDWARDUS SMITH, M.D. &c. Societatis Linneanae Londinensis Praeses.

VOLUME the FIRST, containing Two FASCICULI; and the First FASCICULUS of the Second Volume, are now published. This Work is beautifully printed in folio, and each Fasciculus contains 50 Plates engraved and coloured in the most finished manner by SOWERBY, from drawings by FERD. BAUER. Price Twelve Guineas each.

The whole Work will extend to Ten Volumes, or Twenty Fasciculi: From the nature of the Work, and the great expenses attending it, only Fifty Copies are prepared for Sale.

WHITE, COCHRANE, and Co. Fleet Street.

FLORÆ GRÆCÆ PRODROMUS : sive Plantarum omnium Enumeratio, quas in Provinciis aut Insulis Græcia invenit JOHANNES SIBTHORP, M.D. &c. Hic illic etiam insertæ sunt pauculæ Species quas Vir idem clarissimus, Græciam versus navigans, in Itinere, præsertim apud Italiam et Siciliam, invenerit. Characteres omnium, Descriptiones et Synonyma, elaboravit JACOBUS EDWARDUS SMITH, M.D. &c. Societatis Linneanæ Londinensis Præses.

VOLUME the FIRST, containing Two Parts, and the First Part of the Second Volume, handsomely printed in royal 8vo. are published, Price 10s. 6d. each Part in boards.

The Fourth Part (which is in progress) will complete the Work.

FLORA BRITANNICA, Auctore JAC. EDV. SMITH, M.D. Societatis Linneanæ Præside, &c. &c.

Volumes the First, Second, and Third, in 8vo. Price 1l. 6s. 6d. in boards.

The Fourth and Fifth Volumes are in preparation.

AN INTRODUCTION TO PHYSIOLOGICAL AND SYSTEMATIC BOTANY. By JAMES EDWARD SMITH, M.D. F.R.S. &c. &c. President of the Linnean Society. The Third Edition, in 8vo. with Engravings. Price 14s. in boards.

A few Copies with coloured Plates. Price 1l. 8s. in boards.

The Edinburgh Reviewers, at the conclusion of their review of "Dr. Smith's Introduction to Botany," observe that "Botany is daily becoming a more fashionable female study; and this is an elementary book which may be put with confidence into the hands of women, without any risk of wounding the most delicate mind. We are happy, for the sake of those fair students, to observe, that Dr. Smith promises a translation of his Flora Britannica; for this, we doubt not, will, when accomplished by Dr. Smith himself, form the best popular Herbal ever published. In the mean time he very candidly recommends Dr. Withering's Arrangement of British Plants: to which we would take the liberty to add Mr. Galpine's Compendium of British Botany, (which is indeed nearly a translation of Dr. Smith's *Compendium Floræ Britannicae*,) as a most useful and commodious pocket companion in botanical excursions."

A SYSTEMATIC ARRANGEMENT OF BRITISH PLANTS: with an easy Introduction to the Study of Botany. Illustrated by Copper-plates. By W. WITHERING, M.D. F.R.S. &c. The Fifth Edition, corrected and considerably enlarged, by WILLIAM WITHERING, Esq. In 4 vols. 8vo. Price 2l. 8s. in boards.

A SYNOPTICAL COMPEND OF BRITISH BOTANY; (from the Class Monandria to Polygamia inclusive;) arranged after the Linnaean System; and containing the essential Characters of the Genera, the specific Characters, English Names, Places of Growth, Soil, and Situation, Colour of the Flowers, Times of Flowering, Duration, and References to Figures. By JOHN GALPINE, A.L.S. In foolscap 8vo. with a Frontispiece. Price 10s. 6d. in boards.

LETTERS ON THE ELEMENTS OF BOTANY. Addressed to a Lady, by the celebrated J. J. ROUSSEAU. Translated into English,

*Works lately published by WHITE and Co. Fleet Street.*

with Notes, and Twenty-four additional Letters fully explaining the System of Linnaeus. By THOMAS MARTYN, B.D. F.R. & L.S.S. Regius Professor of Botany in the University of Cambridge. The Seventh Edition, with Corrections and Improvements, in 8vo. Price 8s. in boards.

THIRTY-EIGHT PLATES, with Explanations, intended to illustrate Linnaeus's System of Vegetables, and particularly adapted to the LETTERS on the ELEMENTS OF BOTANY. By the SAME AUTHOR. In 8vo. Price 9s. in boards, or coloured, Price 18s. in boards.

THE LANGUAGE OF BOTANY; being A DICTIONARY of the TERMS made use of in that Science, principally by Linnaeus; with familiar Explanations, and an Attempt to establish significant English Terms. By the SAME AUTHOR. The Third Edition, corrected and enlarged, in 8vo. Price 7s. in boards.

AN INTRODUCTION TO THE SCIENCE OF BOTANY, chiefly extracted from the Writings of Linnaeus. By the late JAMES LEE, Nurseryman and Florist. To which are added several new Tables and Notes, and a Life of the Author. Fourth Edition, corrected and enlarged by JAMES LEE, Son and Successor to the Author. In 8vo. with a Portrait and Plates, Price 14s. in boards; or with the Plates coloured, 21s. in boards.

AN INTRODUCTON TO THE STUDY OF CRYPTOGAMOUS PLANTS. By KURT SPRENGEL, M.D. Professor of Botany at Halle, &c. Translated from the German. Neatly printed in 8vo. with 104to Plates, Price 9s. in boards; or with the Plates coloured, 18s. in boards.

FERDINANDI BAUER ILLUSTRATIONES FLORÆ NOVÆ HOLLANDIÆ, sive ICONES GENERUM quæ in Prodromo Flora Novæ Hollandiae et Insulae Van Diemen descriptis RÖBERTUS BROWN.

Nos. I and II. handsomely printed in folio, with Five Plates in each, price 7s. per Number.

THEOPHRASTI ERESII DE HISTORIA PLANTARUM Libri X. Græcè, cum Syllabo Generum et Specierum, Glossario et Notis. Curante J. STACKHOUSE, Arin. Soc. Linn. S.

Pars I. continens Libros V. priores. Handsomely printed in crown 8vo. with a Portrait of the Author, Price 12s. in boards.

MR. PENNANT'S BRITISH ZOOLOGY; a new Edition, in 4 vols. 8vo. with 298 Engravings, many of which are new. Price 6l. in boards: or in royal 8vo. 3l. 8s. in boards.

In this Edition the Additions by the Editor constitute an increase of nearly a third to the preceding Edition.
