No graft! No deals! "The Thistle, Shamrock, Rose entwined, The Maple Leaf forever."

RIGHT VS. EXPEDIENCY

The citizen to whose views regarding politics, as expressed in the Sun, the Times took exception yesterday, has another interview with the Sun in which he defends his attitude and says: "I pointed to how Nova Scotia, Quebec and the West were making rapid progress because of the assistance they were receiving from the government, and the moral was that the more solidly a province supported a government the more assistance that province could count upon from the government. It is all very well to talk about sentiment and political principles, but the science of politics is a very practical one, and the province that is divided against itself because of political rancor will not get as much assistance from any government as where the representation is solidly supporting the government and consequently the province will not make the same progress as it otherwise might."

ANOTHER STRAW

The Liberal government in England received another rude shock yesterday when its candidate in Wolverhampton won by only eight votes, compared with a Liberal majority of 2,805 two years ago. The battle was fought chiefly on the tariff reform issue, and the result indicates that the Chamberlain policy is steadily gaining ground. The by-elections generally have shown a strong and widespread reaction against the government, and the confidence of the Unionist party that it will be able in the general elections to defeat the government is strengthened by every such result as that in Wolverhampton. Premier Asquith is an able man, and will perhaps make a stronger defence than Sir Henry Campbell-Bannerman could have done had he lived; but when the tide of public sentiment begins to tend strongly against a government, as now seems the case in the United Kingdom, he must be an exceptionally resourceful and astute statesman who can turn the tide or make it serve his purpose. In the old country as in Canada the wave of conservatism is once more rising toward the flood. The period of Liberalism both there and here has proved disappointing in many respects, even to Liberals, who see in broken pledges and abandoned policies ground for serious complaint, if not severe censure, as well as the explanation of the waning popularity of the Liberal cause.

ABOUT DREDGING

There should not be much difficulty in arranging to have further necessary dredging done in the harbor of St. John. Dredging here is like that done in the St. Lawrence—it is in the interests of the trade of the whole country. It is worth while in this connection for St. John people to note what is being done in the St. Lawrence. We quote from Saturday's Montreal Star: "Work in the ship channel will soon be well under way for the season. There are now two dredges at work at Pointe aux Trembles en bas. On Tuesday three will set out to work at Pointe Citrouille and Batiscan. At the moment the water is too high at Cap a la Roche to permit work there. The channel now has a depth of ten feet above low water level, and with more than forty feet of water in the channel it would be possible to send anything afloat to this port. Next week the two dredges to be used below Quebec will be sent out. They will be placed at Beaujeu Bank and St. Thomas shoal. Next week the Lady Grey will leave Quebec for the purpose of "sweeping" the channel below that port. This is arduous and tedious work and will occupy the entire season."

THE NEW TOWNS

The Toronto News has this to say of Lloydminster, which is named after the Rev. G. E. Lloyd (now Archbishop Lloyd), formerly of Rosheasy, N.B., who brought the first settlers for the new town by way of this port a few years ago: "Five years ago there was no Lloydminster. Now it has a population of twelve hundred. It has substantial frame and brick houses and places of business. It must have taken a good many nails and hinges and pots of paint and cartloads of furniture and stoves and woodware and stationery to build and furnish Lloydminster, not to speak of the implements, the tools, and the dry goods and the groceries required by the townspeople and the settlers on the adjoining farms. These things do not grow in the fertile soil of the west. They are produced in the factories of the East, and as Lloydminster is only one or two or three hundred towns that have sprung up in the last five years, the west must have contributed something to the prosperity of the East."

Hon. Mr. Maxwell stated in the house yesterday that on the hustings Hon. Mr. McKeown had declared that the government had set aside \$15,000 of the increased federal subsidy as part of a fund to wipe out the provincial debt. Mr. McKeown denied yesterday that he had made this statement. Mr. Wilson joined Mr. Maxwell in the assertion that Mr. McKeown did make it. The Telegraph this morning quotes from the press report of Mr. McKeown's hustings speech, which agrees with the assertion of Mr. Maxwell and Mr. Wilson. Thus Mr. McKeown finds himself flatly contradicted by two members and by the press report of his remarks. It is not a very desirable position in which he has placed himself.

The Sun should not worry too much about the attitude of Hon. Robert Maxwell regarding temperance legislation. Mr. Maxwell has not abandoned his faith in prohibition as the ultimate solution of the problem. He would not doubt welcome the advocacy of the Sun in bringing public opinion to the point where it would insist upon such a measure. The Sun has said that in all matters relating to the laws of the country the people cannot evade responsibility. The press aids very materially in the formation of public opinion. The Sun's opportunity is here and now.

The "booster" committee of the board of trade has had phenomenal success. It is expected that at least sixty new members will be added on Friday. This will be good for the funds of the board but very much better for the interests of the city, assuming that these new members really desire to make the board a center of mutual effort for the benefit of St. John. The board has a fine opportunity to join hands with the newly installed city council to make 1908 a banner year in civic progress.

The federal government in the Manitoba election bill proposes to take charge of the voters' lists. By a careful manipulation of the lists something might be done to benefit the party in the federal elections. And yet, as Mr. Borden pointed out yesterday, Sir Wilfrid Laurier once declared "that he was quite disposed to accept the franchise prepared by the legislature, whether Liberal or Conservative." The lists prepared by the authority of the Manitoba legislature are now to be rejected by Sir Wilfrid.

If a Scott Act inspector is essential to the enforcement of the law in Fredericton, the friends of law and order should force the hand of the city council. If the police cannot do the work thoroughly other means should be found, or the recent expression of feeling at the polls was a waste of energy. And now it is Mr. Tweeddale who has the provincial government on the run. In view of the fact that he has started them along the highway which the late government left in a shocking state it is doubtful if they can make good time, even with Mr. Tweeddale at their heels.

BIG MONEY IN SHEEP
Australian Sheep Rancher Tells of His Country's Industry.

(TORONTO NEWS).
A typical Australian sheep rancher, Mr. Charles Deaver, Toowoomba, Queensland, arrived at the Palmer House this morning on route for a holiday in old England. Mr. Deaver does not pretend to ranch on a large scale. He has "only 25,000 sheep," and his farm includes just 30,000 acres. It is situated 60 miles from Brisbane. There is big money in sheep-raising, he says. One hundred per cent profit in one season is not uncommon. The cost of the way and he tells of one firm who on an investment of \$45,000 had a profit of \$45,000 in one year. It is a country where they do everything in the line of ranching on a big scale. One big cattle rancher a year or two ago had no less than 25,000 calves. Queensland has still 1,600,000 acres of good grazing land not yet taken up, and the future of the industry now seems assured. He says that he has secured 250,000 feet in any part of the country by boring although they have to go down 200 feet in some places. Within the last three years 250 artesian wells and 300 sub-artesian wells have been sunk, and this will largely prevent the danger from drought which has been the great enemy of that country. The great difficulty in times of drought, Mr. Deaver explained, is the lack of water for the animals to drink. There is nearly always enough grass to support the animals, but it is impossible to take the animals to water without water. He says the country is the next place.

MAINE WOMAN FACES A CHARGE OF ARSON

Bangor, Me., May 5.—Mrs. Ella Nason, of Glenburn, who was arrested two weeks ago charged with attempted incendium in the firing of the barn on the Charles Toole estate at Punah Lake a year ago, was again arrested today, charged with arson in the burning of the building on April 21 last. At the time of her first arrest, Mrs. Nason was held in \$1,000 bail for the grand jury and gave bail today for \$25,000. It is thought that she is mentally unbalanced, and she will be examined as to her sanity. An interesting feature of the case as heard in the municipal court today was the reading of a letter written by Mrs. Nason to the town authorities of Glenburn, purporting to be the confession of a tramp named "Jason Slattery." The letter states that the tramp fired the Toole barn on April 21 last, and asked that Mrs. Nason be freed of the charge. Charles F. Nason, Sweet, clerk of the supreme court, testified as a handwriting expert that in his opinion the alleged confession was written by Mrs. Nason herself. The Toole barn and contents were valued at \$41,000.

PRETTY GIRL GIVES THE UNKISSED A NEAR-KISS

Muskegon, Mich., May 4.—Claidstone Dowie has been kissed, like a thunderbolt out of the blue, if he happened today in public, with out warning, with a gay crowd of men and the record of a lifetime of osculatory abstinence was broken in a moment. It happened in a justice court here, where a young Dowie made his debut as a witness for the prosecution in a case where he was sued for \$80 which he claimed to be due her for domestic services in the home of a Muskegon resident. She was young and also she had the full gift of beauty. Whether it was the sight of beauty in distress, the marriage of the bride who had been kissed by a young man, or the fact that she returned a verdict in her favor, the pretty defendant turned to her young lawyer with a beaming smile. "You a dear, you dear man," she cried. "I've a notion to kiss you when it happens. She smooched around his neck, kissed his lips and cheeks, she kissed him at the same time and the flying oarman struck him down on the floor. The court room rang with the cheers of the populace. Pale, eye, even paler than the little Dowie gathered his law books together and as one in a daze, he staggered from the court room.

WINNIPEG PROSPEROUS

Winnipeg, May 5.—May Day brought no trouble in Winnipeg, for while only a few of the building trades have signed up for the season there is an understanding between the contractors and the unions. There is a tendency to lower wages in one or two of the trades, notably the plasterers, who were paid 55 cents per hour last year. Sheet metal workers, bricklayers, masons and painters have the working agreements. The schedule of the carpenters is likely to stand. With the plumb line there is open shop, as there has been ever since the strike last year. A busy building season is assured, and with the greatly reduced cost of lumber and materials generally a prosperous year for all the unions and builders seems assured.

THE RAILWAY OUTLOOK.
New York—Some prominent railroad officials say that although the outlook for the railroads has been improved considerably by the recent successful offering of new securities they regard present prices for the stocks in which there has been the greatest activity for some weeks as too high. Other observers who are disposed to be optimistic say that railroad officials are untidy pessimists. Some conservative bankers however agree with the pessimistic railroad men. The shrewdest speculative observers, however, think that U. P. and S. P. and several other favorite issues will continue active and will advance until after the U. P. financing shall have been accomplished.

OFF HIS MIND
"Do you know that I'm feeling a heap easier in my mind than I was a week ago?" said the Long Island farmer. "Got the mortgage on your farm paid off?" was asked in reply. "Noah, Haven't got any mortgage to pay off. I was in town last week with some stuff and heard two men talking about the Panama Canal. I read something about it, but wasn't posted, and when they said that it was cost \$300,000,000 my hair stood up." "Yes, that's the estimated cost," replied the grocer. "I went home and told the old woman and my son Sam. I said to them, says I, 'Git ready for the porchouse! Git ready for starvation! Git ready for paupers' graves. That Panama Canal is to cost \$300,000,000, and it will take the last pig's tail on our farm to pay for our share of it!' " "And their hair stood up?" queried the grocer. "The old woman fainted dead away, but Sam he took it as cool as I. He hunted around for a piece of chalk and then went out to dig on the barn door. After an hour he came in with a grin on his face and said: " 'Dad, I've got it down plumb firm, and there's no occasion to be skeered. Our share of the \$300,000,000 is only 'leven cents.' " "You can't beat Sam on figures. He'd gone over it a dozen times, and it was all 'leven cents. I gave one yell for joy, and then I write a letter to the President, enclosing our share and rode three miles to mail it, and the blained thing was off my mind forever. Yes, sir, I'm feelin' fine as silk and not a care on my mind, and afore I go home I'm goin' to look around a bit and buy Sam the best dollar jackknife in this hick town."

COFFEE CROP WILL BE LIGHT.
(Toronto News).
Mr. Achilles Dault, Santos, Brazil, a clerk by marriage of General Campos Salles, ex-President of Brazil, is at the Rosin House today. He comes from South Brazil, where coffee is the chief product, corresponding to the wheat crop of Canada. A year ago the yield of coffee was unusually heavy, the total value being about \$17,000,000. This year the prospect is for a rather light crop. Mr. Dault states that there is a steady stream of immigrants flowing into Brazil from Italy, Spain, and Northern Africa; the number of them coming to work on the coffee plantations. Every mail steamer arriving now is crowded with immigrants and the total number annually is between 200,000 and 300,000, or about the same as Canada.

TEAMSTERS AND STREET CARS MUST RESPECT THE STEEL

Several weeks ago the Times stated that Superintendent Winchester was on the lookout for teamsters who persisted in standing their horses or carts directly across the sidewalk, thus obstructing the passage and compelling pedestrians to go out into the middle of the road. Despite previous warning teamsters continue to offend.

There have also been complaints about the street cars on the Paradise Row line, which, as a rule, are not allowed to cross near Haystack corner.

The agitation for some such place has been going on for years, and now the dream is about to become a reality.
