Eggs Fifty Cents a Dozen. A gentleman who keeps a few hens for pro-fit, recently carried some fresh laid eggs to a wholesale dealer at Faneail Hall Market, Boston, and received for the same forty-three cents per dozen. The desier said to him, "next week I will pay you forty-five cents, and before Christmas fifty cents a dozen for all

mat weeks I will pay you forly-ave cents, and before Christmas fifty cents a dozen for all you will bring me like these."

What is true of Boston is in a measure true of every market for eggs. The next eight weeks will be the season of highest prices. Therefore work your hens now for all they can do. We have no doubt but that, for want of the proper ingredients in their food, more than one half of the hens in this country are now idle, when eggs will sell for fifty cents per dozen. It is pure folly to wonder, spend time and money or experiment to find out why your hens do not lay. You better by far profit by the experience of others, and make them lay during December and January. The following sworn statement shows that, the quickest and surest way to do this and increase the egg product during these months from one to six hundred per cent, is by the use of Sheridan's Powder to make hens lay, once daily in the food.

### SHYING HORSES.

We are asking for a remedy for shying. There, is no doubt that shying is often the result of imperfect vision. It will be noticed that a horse often shies when there is nothing at all to shy at, so far as the driver can see, and at other times will shy at what certainly would not attract the animai's attention if it could plainly see and discern just what it was. Perhaps there is no remedy for shying where imperfect vision is the cause.
