Debate New Down to Education Clauses and Date Fixing.

Edmonton Chosen As the Temporary Capital of Alberta-Lands and Minerals in the New Province to Re-main in the Control of the Domin-ion Authorities—Mr. Borden's Wis-

dem and Alertness.

Ottawa, June 28.—Yesterday's proceedings in the House began with great acclaim on the Government side at the introduction of Hon. Charles Ryman and George Smith of North Oxford. They were led in between the Prime Minister and the Minister of Custome. The sitting was devoted mainly to discussion of the subject of cold storage introduced by Mr. Armstrong of Lambton, and spoken to at great length by the Minister of Agriculture.

Mr. Prefontaine introduced a bill to provide for the regulation of wireless telegraphy in Canada, a reprint of the act passed in the British Farliament last year. It was read a first time.

Borden Facilitates Legislation.

R. L. Borden suggested that Mr. Logan's bill to prevent false representations to induce funging to come to Canada, and the bill of Mr. Guthrie to amend the criminal code, be put on the list of Government orders in order that they may be at least considered this session. Sir Wilfrid Laurier promised to take the suggestion into consideration.

Mr. Foster brought up the half-breed

mised to take the suggestion into consideration.

Mr. Foster brought up the half-breed scrip deal. In reply, Sir Wlifrid Laurier said the allegations of fraud upon the half-breeds were specific and an investigation had been ordered, whereas those of Chaffee were indidnite.

Will Confer With Mr. Borden.

Mr. Borden drew attention to a despatch referring to the Government's ten-year contracts with the North Atlantic Transportation Co. of Amsterdam for the bringing of immigrants to Canada at so much per head. Had the for the bringing of immigrants to Can-ada at so much per head. Had the Government been dickering to bring out a certain Russian sect known as the Molocaus? Mr. Oliver declared it was the first he had heard of the Molo-caus, and Mr. Fielding said it was his intention to confer with the leader of the Opposition as to making public the Government's contract with the Am-sterdam company.

the Opposition as to making public the Government's contract with the Amsterdam company.

Edmenton Temporary Capital.

In Committee on the autonomy bill, several of the non-contentions clauses were passed. On clause 8, fixing Edmonton as the temporary capital of Alberta, McCarthy protested and favored Caligary. He was supported by Lake of Qu'Appelle. Oliver and Scott favored Edmonton and the clause carried. On the land sause, Lake moved that the lands and minerals be entrusted to the Province, and was supported by Fowler and McCarthy, who protested that the only reason for the Government retaining control was to keep in employment the army of Dominion of ficials now in the country. The clause carried, as did also the schedule of constituencies as amended.

ACT NOW

The Council Should Immediately Pass a By-law Prohibiting Dogs From Running at Large.

"I am glad to see The Planet is conducting a campaign against dogs' running at large in the city," said a North Chatham Resident this morning. "Dogs are becoming a nuisance in Chatham, and when the City Council bring in that by-law that Ald. Bell spoke of, prohibiting the nuisance, they should make it good and strong.

"There is a lady on Joseph street who had a couple of visitors on Sunday, and all day long there were three dogs around her house, running out and barking at every person who passed along the street.

"In the evening I saw another little dog around the same place, and when a little girl came out on the street it ran up to her. The little child put out her hand to pet the animal and received a nip on her hand, which sent the little girl home crying. Fortunately, no blood was raised, but it goes to show that if there happened to be any mad dogs, in Chatham, pedestrians would not be safe from their attacks. Now is the time to act before we have a case like the one London is experiencing."

Hon. Jules Allard, Minister of Public Works of Quebec, had a leg broken near the ankle. No one else received serious injuries.

MISSIONER OF EMPIRE

Mr. Chamberlain Talks to C.M.A. Tourists in His Home City.

An Imperial Re-Union-A Self-Contained Empire Dream of "the Greatest Living Statesman"-To This End "Sentiment Must Be Organized and Consolidated - We Dare Not Face Separation," Is His Message.

Birmingham, June 28.—(C. A. P.)—The Canadian Manufacturers' Association had a great reception at Birmingham yesterday. Wherever they went crowds watched them. They were received at the Town Hall by the Mayor. Mr. W. K. George, replying to the hearty welcome, compilmented Birmingham on having produced the greatiest living statesman. Speaking on behalf of the Canadian manufacturers, he vouched that they were a unit in favor of Mr. Chamberlain's policy.

Afterwards the whole party were entertained at a luncheon by Mr. Chamberlain. Mr. Jaese Collings, who neverted a said that if Mr. Chamberlain's ideas could be carried out they would weld the Empire together.

Mr. Chamberlain was received with tremendous applause, the whole audience rising and cheering. He said he attached the greatest possible importance to the visif. It was necessary to get a perfect understanding. He commented on the great opening which Canada offered for the redundant population which the Mother Country exported. The Canadian Manufacturers' Association-should make the people of the Mother Country acquainted with Birmingham, June 28.—(C. A. P.)—

Association should make the people of the Mother Country acquainted with the conditions in Canada. Referring to the Colonial conference, he said it must meet without any restrictions whatever. Closer union with the Colonies was the greatest issue now. The question was whether we shall be able to maintain the relation. There are no Colonies now in the old sense, but sister States. The great question was to weld together diverse interests for the common good. This was the greatest question since the beginning.

Our Loyalty Not Doubted.

The Canadian Manufacturers' Association should speak on such a question. There was no reason why their mouths should be closed on a question which concerned the Empire as a whole. Were they as business men satisfied with the relations of the present time? Were they as business men satisfied of the future? In spite of contemptible criticism, he never doubted the loyalty of Canadians. Sentiment, the ties of blood, language and law were slender, but strong. Yet might not this m a great crisis prove insufficient? (Some cries of "No."). Sentiment must be organized and consolidated. They could not dare to face the possibilities of separation.

Opposed to a Tresty.

United, he man shall make us afraid. Empires are not made in a day. If they advanced one step in the direction of his policy it would be a step for the peace and prosperity of the world. Sir Wiffrid Laurier offered to make a treaty with the Mother Country, a mutual Empire was the fundamental principle of his plan. Only its friends should recognise the difficulties in the way. He could not expect Canada to make a treaty to mortgage its future. The question should be fully discussed by the whole people, and he thought the Mother Country should be treated a little better than its competitors. The question should be fully discussed by the whole people, and he thought the Mother Country should be treated a little better than its competitors. The question ghould be fully discussed by the world produce everything required in the way

AN IMPORTANT JUDGMENT.

Light Co. Must Put Wires Underground Or Be Liable for Damages.

Or Be Liable for Damages.

Montreal, June 28.—The Court of Review yesterday morning gave a very important judgment in a case against the Montreal Light, Heat & Power Co. Last year a man named Curde, operating a derirck, struck a live wire and was killed. Another ran to his rescue and was stinned, while yet a third, in trying to rescue them got a shock though their bodies and was killed. A nother ran to his rescue and was stinned, while yet a third, in trying to rescue them got a shock though their bodies and was killed. A fury gave Mrs. Crude \$8,000 damages, but as this was the first case of the kind in the Province the judge referred it to the Court of Review.

The company applied to have the judgment reversed, net only on the facts but on the extraordinary argument that their charter gave them the rights to put up their wires as they pleased, and it was for the public to avoid accidents.

The Court of Review replied to this that any powers obtained from the Government were subordinate to the civil law, that special law or no special law the company must take the best way to avoid accidents with its wires, which was to put them under ground. They therefore upheld the judgment for the full amount.

Druggist Was Fined.

Brockville, June 28.—Under the new license inspector for Brockville, more convictions have been obtained for violations of the Liquor Act than for some years previous. Two fines were paid into the Police Court yesterday. One of the delinquents was a druggist, charged with selling whiskey without a license. He paid a fine of \$50 and costs. The cases of two hotelskeepers will come up later in the week.

BASEBALL REVIVED

Dutton Downed Chatham in a Fast Game—Errors Responsible for De-feat—Fine Pitching.

A GOOD GAME.

Some of the oldest inhabitants can remember the time when Chatham had a baseball team of its very own. Yesterday a fresh start was made when a team Chatham clinelfed with the Dutton aggregation. Let it be said right here that, aithough Dutton does not occupy a very large space on the map, it will, hereafter, be noted in the future geographics of Canada as being famous for the brand of bail-players raised in that vicinity. They played fast, snappy ball unmarred by the semblance of an error. Only splend op tiching held their score down. The Chatham bunch, while not quite so fast, did splendidly. Just throw a lot of the letters of the alphabet together, and mir them up and gou have Chatmix them up and gou have Chat-mars pitcher—Bdelleterche. This young man can do stunts with a ball and to his ability is due the fact that Dutton's score was not

The final score was 6-l in favor of the visitors. They were presented with one in the second on an error. Again in the fifth Cartier muffed a pop fly and, by a passed ball advanced the runner to second, from whence a hit scored him; anothey hit and a fittle sleepy play on second scored another—3-0. Chatham had a good chance in the sixth, when Cook got one of the two hits of the day and O'Keefe bunted safely. With two out Head failed to comment and the chance went glimmering. In the seventh Cartier threw into centre field to catch a runner, stealing second and Cook's em-bon point hindered him from fielding the ball—result, score was increased to 4-0.

Chatham scored its only run in the eighth on a two base hit by Cartier and Rankin's sacrifice. In the ninth Dutton made the score 6-1 by an error, a sacrifice and two hits for two sacks. In their half Chatham could do nothing.

The spectators were greatly pleased at the showing of the team, notwithstanding its defeat, and woulf like to see more exhibitions. It is felt the revival of the sport is due in a great measure to the generous support of Peter Moduley. darger.
The final score was 6—1 in favor of

OBSTINACY DOESN'T PAY.

A long-standing complaint again British manufacturers is that they obstinately refuse to adapt their goods or their methods to the wants of their foreign oustomers. It appears that the same complaint can fairly be made against some Cana dian manufacturers. It is made by J. S. Larke, the Canadian commercial agent in Australia. In his latest report he says that Australian demand Canadian manufactured good would be much greater if Canadian manufacturers would only take the trouble to find out what suits Australian tastes, and pay heed to advice tendered then. He mentions several instances of trade being los through sheer obstinacy. One is that of a Canadian manufacturer who was assured of a good grade in boots and shoes if he made a slight alteration in shape; but he declined to make any change, and dost not only the trade, but the prospect of building up a trade.

methods of packing. The Canadian fruit trade has been hampered by olete and clumsy packing of fruit, and the same fault will work similar results in other branches of the ex-port trade. The instance cited by Mr. Larke is this: "A number of machines were or-

dered with definite instructions as to how they were to be packed. In due course an invoice was received with a covering letter stating that the instructions respecting packing were absurd, that they had made a study of it and had shipped in the they had found to be right. When the goods arrived half of them were found to be broken. Had the instructions sent been followed, the loss would have fallen upon the buyers, but under the circumstances it must fall on the shipper. It must be borne in mind that while Australians may occasionally make mistakes in their directions, they have had a much greater experience in the requirements of long ocean voyages than the majority of Canadians and their instructions are based upon this experience."

If Canadian manufacturers are to compete successfully in neutral markets with fore'gn manufacturers; they will have to imitate German and American methods. They will have to study the wants and even the prejudices and whims of foreign customers, and do all they can to meet the demand promptly and cheerfully.

INDIAN DEFICIENCY. The Presbyterian.

Apart from the Indian girls who are in domestic service, where not much initiative or independence of action is demanded, there are not ten graduates of Indian schools now making a living by trades among white people, as a result of twenty years? work by the government and all the churches. And this in spite of the fact that the Indian picks up a trade readily and does his work neatly and intelligently. Everybody knows that in such imitative branches of education as writing, drawing and modeling, the average Indian pupil is decidedly in advance of the average white pupil. The difficulty is of an entirely different character; it is moral. That fixity of purpose, that strength of will, that firmnes of moral fiber which generations of Christian civilization have developed in the Anglo-Saxon are as yet radimentary in the average Indian

atend to keep up the clip they are now setting they had best make arrangements to engage assistance for the City Clerk, while the newspapers will be called up to enlarge their reportorial staffs.

For the second consecutive night the aldermen have gone the time limit—and a fathom or two there over. Somebody suggested a third meeting for to-night, but it was finally decided that a committee gathering would fill the bill-two midnight sessions of the Council being surely sufficient even for the City Clerk Megritt bore a big

City Clerk Merritt bere a big brunt of the affain last night. At the outset he was plunged into the reading of the voluminous electric raligand by-law and when he reached the end thereof just one hour, and eight and a half minutes had elaps-ed. This was followed by other by-laws and ere the general business was taken up at all the rules had been suspended and the eleven o'clock limit passed.

All the members were present ex-cept Ald. O'Keefe.

The following by-laws were intro-duced and put through all their stages:

duced and put through all their stages:
Ald. Austin—By-law embodying agreement with the Chatham, Wallaceburg and Lake Eric Railroad.
Ald. Austin—By-law embodying agreement with the Chatham Steam Heating Company.

Ald. Marshall—By-law for the lay-

ing of en asphalt blook pavement on Wellington street east. Ald, Potter-By-law to amend the cemetery by-law. Ald. Edmondson-By-law to amend

the by-law regulating the number the by-law regulating the number of tavern licenses.

Ald. Austin asked what arrangement had been made with Mr. Macaulay in connection with the Edward street franchise. He thought some arrangement should be made before the by-law was passed.

Ald. Bell thought it wiser to pro-

eed. If Mr. Macaulay were damaged he company would be responsible

therefor.

Mayor Cowan—I take a point of order. As stockholder and solicitor of the company I do not think Ald, Bell has any right to take part in Ald. Bell said he had no desire to take part unless invited and with-

drew. Ald. Austin said Mr. Macaulay was Aid. Austin said Mr. Macaulay was willing to leave the matter to an arbitration of three citizens if he and Mr. Warburton could not agree.

This was satisfactory to the company and the matter was so settled. When the by-law granting the 40 year franchise to the Chatham Steam Heating Co. came up in committee Aid. Marshall said he had made a matche the craving agrants is more Aid. Marshall said he had made a mistake the previous evening in moving this resolution. It was a blunder, he said, and he had new tight. He was now going to oppose it. He was not in favor of the exclusive franchise.

mean the loss of a valuable and much-needed industry.

After some discussion it was finally decided on motion of the Mayor and and Aid. Austin to strike out the word "exclusive," granting the franchise for the 50 years, ten more than previously agreed upon.

In moving the by-law amending the cemetery by-law Ald. Potter pointed out that after a careful examination of the temetery accounts for some years past, it had been found that there was an average annual deficit of over \$360. It was mecessary then to avoid further definits by increasing the rates charged for lots. The increase will raise the revenue materially and enable the commiftee to proceed with many much-needed improvements.

Ald. Potter's resolution was unanimously endorsed.

In moving the by-law to increase the number of tavern licenses Aid, Edmondson said the new hotel Mrs. Mount was going to erect would cost \$8,000 and he had the assurance of Chairman Smith, of the License Board, that if the by-law passed Mrs. Mount would get her license.

Ald. Austin srid that the Commissioners were evidently not endeavorting to secure a better class of hotels and they were making no effort to secure a higher standard. He thought the Council were not school boys to be played with by the commissioners. There were now a number of hotels held in abeyance to be dealt with.

On motion of Ald. Austin the Mayor and Clerk were anthorized to sign the agreements with the Radial Road and the Steam Heating Co.

On motion of Ald. Austin the Clerk was instrusted to publish necessary notice for the Windsor & Essex Hapid Railway Co.

On motion of Ald. Marshall, the Clerk was authorized to advertice for the Windsor & Essex Hapid Railway Co.

Why furnaces crack in Summer.

In the old fashioned hotwater heaters with wide, flat surfaces, the soot finds a splendid resting place. A scraper and brush jams soot into the interstices between the water sections. There it cakes and hardens, absorbs moisture, then it expands, and you have a "Bison" hotwater heater you won't have any furnace troubles. There are no flat soot collecting surfaces in the "Bison"—no crevices where soot can lodge; there will be no cracked waterposts, no delays, no mess, no plumbers' bills.

twenty from Yokohama, in Japan, on a terrace near the temple sits the most gigantic idol in the world. It is the gigantic idol in the world. It is the brazen image of a delty and dates from the reign of the Emperor Shomu, who died A. D. 748. The dimensions of this idol are colossal. His height from the base of the lotus flower upon which he sits to the top of his head is sixty-three and a haif feet. The face is sixteen feet in length and nine and s half feet wide, the eyes are three feet nine inches from corner to corner, the cycbrows five and a half feet and the ears eight and a half feet. The chest is twenty feet in depth, and the midule finger is exactly five feet long. The fifty-six leaves of the lotus throne are such ten feet long and six feet wide.

LEARN DRESSMAKING IN TWO WEEKS

I will be at the Garner Hotel, Chatham, on Saturday, July 22nd, between 9 and 6 o'clock, to show how dressmaking can be taught, in two weeks. Why spend from six to nine months learning dressmaking in a shop, and them not know anything about cutting, when I teach you everything from measuring to finish in the making of ladies' and children's garments in two weeks. I have taught over 700 girls in this way within the past three years, and all were more than satisfied. If you are the wife or daughter of a farmer, mechanic, laborer, merchant or millionaire, you should learn Dressmaking. No accomplishment you can acquire will prove of such every-day, life-long value to you as a practical knowledge of Dressmaking. And if you have this knowledge you can, by saving dressmaker's bills, be able to dress much better, with less money, than you probably do now. I teach you how to put together, not only the lining, but all the outer goods, in coate, skirts, waists, wrappers, sleeves, in fact everything in dressmaking. And you are losing nothing by trying, for if you are not satisfied at the end of the term, then there will be no charge. School teachers, college girls and everybody who are having your holidays now, do not fail to take advantage of this splendid opportunity. You may never get another like it.

Charge for full course is \$10, when

not fail to take advantage of this splendid opportunity. You may never get another like it.

Charge for fall course is \$10, when you are through, if satisfied, including one of the most perfect fitting systems in use, which I give you free! I will also at the same time teach part of the course, consisting of shirtwansts, sleeves and skirts, and teach you how to use the system for \$6.

I will teach at Chatham from July 24th to August 5th. Hours from to 5. All wishing to learn, or full particulars, be sure to see in the upstair parlor of the Hotel Garner on Saturday, July 22nd, at

the hours named above.

An evening class will also be taught at Chatham this time. Full particulars for it can be had apon application on July 22nd.

Made by Cures Like That of Simo V. Landry-He Tells About it Him

setf.

River Bourgois, Richmond Co., U. B., June 26.—(Special).—Among the many men in this part of Canada whom Dodd's Kidney Pills have relieved of aches and pains and weakness and made strong and able to do a good day's work is Mr. Simon V. Landry. Mr. Landry has numerous friends here who can vouch for the story he tells of his cure.

"I was bothered for over a year," he says, "with lame back, weaklegs, palpitation of the heart, general weakness and shortness of breath; in fact I could not work and was a total wreck.

"I tould not get anything to help me till I tried Dodd's Kidney Pills. But they did me good and no mistake. I used three boxes and I'm back at work again."

It is the cures they make that make Dodd's Kidney Pills so popular. Their popularity has grown steadily for thirteen years. It must be well founded.

Trying to Cause Germany and France to Fight.

So Says the German Press, Which Likewise Announces That Relations Be tween Germany and Great Britain Were Never Worse Than at This Moment - Germany-to Make Many Concession to France to Aver: War.

Concession to France to Aver: War.

Berlin, June 27.—The second interview of M. Bihourd, the French Ambassador, with Chancellor Von Buelow, was devoted to a detailed discussion of the French note, but the Foreign Office abstains from giving any information regarding the results reached. It is semi-officially stated that the German answer has not yet been drawn up. The Government and press, therefore, resont the assertion in the London newspapers that the German Government refuses to take into consideration every point raised by Premier Rouvier, ment refuses to take into consideration every point raised by Premier Rouvier, and throughout the German press a growing impatience is manifested at what is regarded as a British attempt to embroil Germany and France. It is noted with satisfaction that some of the French statesmen begin to interpret Great Britain's interest in the Franco-German difficulty in the same way. The newspapers quote approvingly the words of Gen. De Gallifet, the former Nar Minister of France, that Great Britain alone wayts war between France and Germany, for it would be to her own advantage and at France's expense.

expense.

Accused of incendiarism.

Similar views are expressed in the German press, the writers arguing that Great Britain, having gotten rid of Russian for a generation through the war in the Far East, is deliberately working to fan the flames of the old hate between France and Germany, and cause another war which must weaken her only formidable rivals in Western European politics. It is noted that the relations between Germany and Great Britain have never been worse than at this moment. Hints dropped in official circles indicate that chagrin was felt at the Berlin court at the fact that King Edward sent no more important representative to the Crown Prince's wedding than the young Prince Arthur of Connaught, while it is plainly intimated that the failure of Emperor William to send any representative at all. Emperor William to send any repre-sentative at all to the wedding of Princess Margaret of Connaught was intended to give expression to his re-sentment at this slight.

French Public Tension Less.

Paris, June 27.—Although Germany's formal reply to the French note has not yet been received, there is reason to believe that the interview between Chancellor Von Buslow and M. Bihourd (the French Ambassador to Germany) resulted in quite fully foreshadowing Germany's intentions. The results of the interview are now in the possession of Premier Rouvier. Public tension is much relieved, the bourse sharing in the improvement.

St. Petersburg. Jisne 27.—The French Consul-General denies the report that the French reservists in Russia have been notified to get ready for active service.

Germany's Reply In Paris.

Germany's Reply In Paris.

Paris, June 27.—A strong impression prevails that Germany's reply to the French note regarding Morocco reached Paris late last night, and that it will be presented during an interview between Prince Radolin, the German Ambassador, and Premier Rouvier to-day. The officials neither confirmed nor denied the report that the reply had been received, maintaining the actictest reserve.

BELGIUM IS WARNED.

France Said to Fear Attack From That Direction.

London, June 27.—The Brussels correspondent of The Dally Mail says that France, fearing sudden attack through Belgium, has officially warned the Belgian Minister at Paris of the necessity of rendering effective the fortifications of Antwerp and along the River Mense.

CENSURE MOTION FAILS.

Opposition Fail in Attack on Balfour in Army Scandal.

London, June 27.—The House of Commons last night defeated the Opposition's motion of censure on the Government in connection with the army stores scandal in South Africa by a vote of 329 to 55 after a long debate.

The Government acted mainly on the defensive, disclaiming responsibility, and rather laying blame on Lieut-Gen. Sir W. Francis Butler, chairman of the war office committee, for the publication of the report on this matter issued June 14. In the course of the debate Premier Balfour, Secretary for War Hon. Arnold Forster and Indian Secretary Brodrick (former war secretary), underwent a flerce cross-examination, which they adroftly sustained.

Not much importance was attached to the debate in view of the recent appointment of a commission with liberal powers to inquire into this matter.

SIX MEN ARRESTED.

Circus Hands Terrorize Quebec Village But Yield to Seldiers.

But Yield to Soldiers.

'Quebec, June 27.—Six circus hands, belonging to Lemon Bros.' Circus, were arrested yesterday morning at Grande Mere, Que. They are accused of rape, committed on a 14-year-old girl at Roberval Saturday night, under especially brutal circumstances, the girl being kidnapped for the purpose.

When the constable on Saturday tried to arrest the men'he was resisted, but forty of fifty citizens went forward to assist the constable, when a fight started. The circus men were not only armed with revolvers, but they also had a regular arsenal of rifies stored away on their train, with which they armed themselves and fired on the peaceable citizens. Fortunately, only

they armed themselves and fired on the peaceable citizens. Fortunately, only one man was hit, the Indian, Robinson, who received a bullet in his left leg. By this time the whole population of the villiage, which numbers 5,000, became excited and rushed to their homes after their own riles and fowling pieces.

The circus then pulled out for Grande Mere. The train made its first stop at Chambord Junction in order to get a clearance order, and started for Grande Mere, where the show was billed to perform yoxerday. While standing at the Junction, one of the ruffinat took deliberate aim from a car window and shot a young girl named Tremblay, who was sitting at her doorstep with her mother.

It Is Absolutely Necessary if You Be-

What would you think of a young man, ambitious to become a lawyer, who should surround himself with a medical atmosphere and spend his time reading medical books? Do you think he would ever become a great lawyer by fellowing such a course? No, he must put himself into a law atmosphere, where he can absorb it and be steeped in it until he is attuned to the legal note. He must be grafted into the legal tree so that he can feel its sap circulating through him.

the legal tree so that he can feel its sap circulating through him.
How long would it take a young man to become successful who puts himself into an atmosphere of failure and remains in it until he is soaked to saturation with the idea? How long would it take a man who depreciates himself, talks of failure, thinks of failure, walks like a failure and dresses like a failure, who is always complaining of the insurmountable difficulties in his way, and whose every step is on the road to failure—how long would it take him to arrive at the success goal? Would any one believe in him or expect him to win?

The majority of failures began to deeriorate by deubting or depreciating themselves, or by losing confidence in their own ability. The moment you harbor doubt and begin to lose faith in yourself you capitulate to the enemy. Every time you acknowledge weak-ness, inefficiency or lack of ability you weaken your self confidence, and that is to undermine the very foundation of all collections. tion of all achievements.

So long as you carry around a fail-ure atmosphere and radiate doubt and discouragement you will be a failure. Turn about face, cut off all the currents of failure thoughts, of discourag-ed thoughts. Boldly face your goal with a stout heart and a determined endeavor and you will find that things will change for you; but you must see a new world before you can live in it. It is to what you see, to what you believe, to what you struggle inces-santly to attain that you will approxi-mate.—Orison Swett Marden in Suc-cess Magazine.

Noan was the name of a woman as well as of the patriarch.

At an inquest in England a female witness gave her Christian name as "Noah." The coroner remarked that he had never before known a woman to bear the name. Whereupon the witness, who was well posted in the origin of her singular prenomen, said:

Reference was duly made, and in the eleventh verse of the thirty-sixth chapter the coroner found mention made of "Mahlah, Tirsah and Hoglah and Micatiand Noah, the daughters of Zelophehad."

Walking and Balancing.

It is pointed out that in walking or

running the arms and legs produce a "balancing" like that of the reciprocating and revolving parts of a locomo-tive. The movements of the legs react upon the trunk and tend to rotate it in alternate directions about a vertical axis. But the swinging of the arms, each in unison with the opposite leg, produces an opposing mechanical couple, the effect of which is to rotate the trunk in the other direction, thus bal-ancing, in part at least, the rotating action of the legs.

Ruskin's Whimsicality.

A story illustrating Ruskin's whimsicality was given on the authority of a friend of the great writer. "One morning," he notes, "as we were coming out of chapel he said to us, 'I ought not to have come to chapel this morning." We asked him in some astonishment why. He said, 'I am going to write a critique on —'s picture in the academy and want to be in a perfectly diabolical temper."

"I think ladies ought never to study music as an art. At least they ought not to take up the time of teachers who are able to teach and make true artists. And I will tell you why. There is no question but there are twenty musical ladies to one musical man, and my own experience is that they learn more quickly, have more poetry and, in fact, are more diligent pupils than men. But what is the invariable result? When a young lady has become a perfect artists some handsome mustache comes along, and she chooses the handsome mustache in preference to art." mustache in preterence to art."

WANTON CRUELTY

Man on Head St. Said to be Indulg ing in an Inhuman Destruction of Robins-Should be investigated.

If current rumors are correct, and there seems to be no doubt of it, there is a case of wanton cruelty to birds going on in North Chatham, near the Wagon Works. The case is at least worthy of investigation from the Humane Officer. It is said a certain resident of Head St., who owns some cherry trees, claims to have a permit to protect his fruit from the ravages of the robins. He has therefore purchased an air rifle and amuses himself by sitting out in his back yard, picking off the robins as they appear. Every man has a right to protect his fruit, but it is claimed that the man in question does not kill the birds outright, and several of them are hopping helplessly around on the flats of the river with broken wings and broken legs. A man who has interested himself somewhat in the case is Geo. Shea, who has the contract for piling staves and headings in the flats near the above mentioned man's cherry, threes. Mr. Shea and his men have several times had narrow escapes from being hit by the bullets that miss their intended mark, and Mr. Shea also is loth to see such wanton cruelty prevail under his very eyes. It is expected that a complaint will be made to the police.

QUESSING HIS WEIGHT

Tis said that a well-known barrister, quite a celebrity in footracing circles and very popular with
all lovers of good, clean, healthy
athleticism, has generously purchased a box of cigars for a physician and business man as the reauti
of a practical joke, of which he
laughingly claims he was the goodhumored victim,

The burrister had challenged all

The young son of Hugh Montgomery, of Oungah, sustained a severe injury the other day. He was playing sround the house when he fell and it was some time afterwards that he was found by his mother. The Ittle fellow's hip was badly fractured.

Segood-naturedly did he take the scales with the result that the guitleman in question, who is a thorough sportsman, insisted on doing the generous to his friends who are now all smoking fine perfectos. He has since found out that he was the victim of a practical joke and that a friendly physician again had his foot on the scales.

So good-naturedly did he take the discovery that he forthwith duplicated his generosity and a second box of Havanas was the result.

Sandwich, June 26,—By defeating the Thistles, of Windsor, on Saturday, the local Association football team cinched the championship of the Western section of the Peninsular League, and is now entitled to play off with Darrell, Ont., winner of the Eastern series, for the Walkser Oup.—Mail and Empire.

This is a little previous in view of the fact that Chatham and Darrell are tied at present, each having wonf a game and two games being tied. LAURUSSE

That Monday's game will be a good one is becoming more apparent day by day. St. Thomas is strong and are to be accompanied by a bunch of fans. Some difficulty is being experienced in getting a referee. St. Thomas had agreed to Dr. Campbell, of Detroit. They now insist upon either Waghorne or Brown Jackson.

Canadian Supreme Court Fails Them in Appeal.

Noted Georgia Embezklers Must Be Handed Over to United States-After Three Years' Litigation, Through All Sorts of Courts, They Must Stand Trial-Details of Cause Celebre in Canadian Courts.

Celebre in Canadian Courts.

Ottawa, June 28.—The Supreme Court yesterday morning quashed the appeal of Gaynor and Greene from the court below, and by a unanimous opinion the Court holds the two Americans are subject to extradition and should be handed over to the United States sulfarities.

This is understood to finally dispose of a case, which will be historic in Canadian legal history. Gaynor and Greene had been in the employment of the Government of the United States and were charged with embessionent in connection with certain transactions in the State of Georgia. They eccaped to Canada in 1992, and an application for their axtradition was plication for their extradition was

pilostion for their extradition was made by the United State authorities to the extradition commissioner, Ulric Eartontaine:

Lafontaine:

Lafontaine issued fils warrant for arrest, and Gaynor and Greene applied to: Justice Andrews for a writ of labels's corpus. When the facts were made known to Justice Andrews he comanded them to their lawful custody in Mentreal, whence he thought they never should have been removed. Gaynor and Greene then applied to Justice Caron, who Issued a writ of habeas corpus returnable before himself and ultimately discharged the accused. An appeal was then taken by the United States Government to the judical commistee of the Privy Council, who, on February 8 last, advised His Majesty to reverse the two judgments of Justice Caron on August 13, 1902.

Proceedings before Commissioner Lafontaine were then renewed, and after evidence had been heard he ordered the extradition of the successed. An appeal was intunated for them to the Supreme

evidence had been heard he ordered the extradition of the accused. An appeal was intimated for them to the Supreme Court, but the United States Government entered a motion to quash the appeal on the ground that it was against good faith, and as it arose out of a criminal charge was incompetent. That motion has been granted, and as the judgment is understood to be final Gaynor and Greene will now be returned to Georgia for trial on the charge of embezzlement originally laid against them.

RAILWAY COMMISSION.

In Duthie ve. G. T. R. Chairman Kil-lam Doubts Commission's Ability.

in Duthie vs. G. T. R. Chisrman Killam Deublis Commission's Ability.
Ottawa June 25.—The complaint of J. H. Duthie of Toronto, on behalf of Hoffman & Co. of Detroit against the Grand Trunk Rhiway Co., on account of demurage charges, was heard by the Railway Commission yesterday morning.

"We may be able to make an order of some kind, but I doubt our ability to adjudicate in money matters," said the chairman.

Judgment on special complaint was reserved, and Duthie then made the argument that the car service, or demurage, charges collected by the Grand Trunk were unjustifiable, and in the nature of extortion. He said the Car Service Association was a combination in restraint of trade. It owed its existence to the fact that the agents of the railway companies were unable to ceilect unreasonable charges.

In reply to Mr. Duthie, M. K. Cowan, for the Grand Trunk, said that the whole matter of the car service was a subject of discussion at present between the Manufacturers' Association and the railway companies, and they keped within the month to arrive at an annocable arrangement.

WHAT HE WOULD DO.

Colonel Hayes Had an Answer Ready For General Scott.

For General Scott.

Of Colonel John O. Hayes, who
served with distinction under General
Winfield Scott in the Mexican war, an Winfield Scott in the Mexican war, an amusing story is told by T. E. Fariah in his "Gold Hunters of California." Hayes, with his command, had been out scouting. On his return he made no report to General Scott, who sent for him. General Scott was a veritable martinet in enforcing military discipline. After Hayes was seated in the commander's headquarters Scott said, "Colonel Hayes, I have received no report of your expedition against the padre." "I did not think it worth while," said Hayes. "Every officer of the army is required to make a full report of everything to his superior officer. Please make your report verbally."

Hayes began by saying that he struck lowed it for two days, and on the third day, while his command was resting at noon and taking their siests, the old padre came down on them. The "boys" gathered themselves together and whipped the Mexicans off, killing quite a number of the padre's command. His own loss was insignificant—one killed and three wounded. "Surprised you, eh?" queried Scott. "Yes; we were not expecting him." "Where were your pickets?" "Did not have any."
"What!" shouted General Scott. "A

colonel in the regular army of the United States go into camp in the heart of the enemy's country and nev-er place a picket on guard? What would you do if surprised when "Sheet the first man that waked me un!" was the cool reply.

The old man filled the vessel with fair water, and the youth tried to drink from it. He could not, though, succeed. To whatever spout he put his lips the water refused to flow from that ing, flowing from half a dozen other ones instead all over his face and neck.

"That's enough for me," he said.
"This puzzle tankard," said the antiquary, "dates back to the seventeenth century. Every tavern had one in those days. The landlord would fill it with days. The hadderd would hit it with ale or sack or beer, and if you could empty it down your throat you got your drink for nothing. Otherwise you must stand treat. It was a horseman's weapon and consisted of a broad curved dager blade fixed at right angles to a shaft, pickax fashion. The shaft incloses a dagger, unscrewing at the butt end. This concealed dagger is a very common feature of Indian arms and especially of the battle axes of Persia.

Twe of the Men Identified Who Answered Fieldhouse's Defi.

Hamilton, June 22.—Damaging evidence against the three prisoners, James Neelon, Mike Connors and Stanley Davis, was given at the Fieldhouse liquest last night. Witnesses swore that Fieldhouse went down the street in front of Neelon's home, issuing a challenge to fight. J. H. McCarthy and two other friends were with him. Three men left Neelon's house, and one of them struck both McCarthy and Fieldhouse over the head with a board. Victor Theort identified the prisoners, Neelon and Connors, as two of the men who answered Fieldhouse's challenge. P. C. Meyers said that he called at Neelon's home sometime after the row and found Neelon and Connors in an outbuilding. The hands of both men were covered with blood. No evidence was given to show how Fieldhouse got to his boarding-house, but Drs. Parry and Davis, who conducted the postmortem examination, said that it was possible that he may have walked home. The inquiry was adjourned till next Wednesday to give the police a chance to get some witnesses, who, they think, have left the city to avoid telling what they know.

LACE BARK TREES.

The Many Uses to Which Their Airlly Light Fabries Are Put. There are in all about half a dozen lace bark trees in the world, so called because the inner bark yields a natural lace in ready made sheet form which can be made up in serviceable articles of apparel. Only four of these curious

of apparel. Only four of these curious species of trees are of much practical value. Tourists who have stopped at Hawaii or Samoa may recall the lace bark clothing of the natives—clothing of a neat brown color when new, of remarkable strength and of a frag an odor, like freshly cured tobacco leaf. The native tapa cloth, as it is called, is made from the bark of the brusone, in an inference of the brusone, in the color when the bark of the brusone, in the color was a superior to the bark of the brusone, in the color was a superior to the bark of the brusone, in the color was a superior to the bark of the brusone, in the color was a superior to the bark of the brusone, in the color was a superior to the bark of the brusone, in the color was a superior was a super papirifera, but it is not usually inclined among the real lace lack trees.

In its natural state the real face bar is of a delicate cream white tint. It is probably a kind of fibrous pith. When the outer bark is removed it can tunfolded and unwound in one seamle. piece, having a surface of a like more than a square yard. Westin and sun bleaching give it a dazzlin white appearance. The fabric is airdlight. It is used in the West Indica for mantillas, cravats, collars, cuffs, win dow curtains—in a word, for every per pose that ordinary lace is used. In making up shawis, vells and the like it is customary to piece two sheets of lace bark together. Delicate and apparently weak as it is in single mest, a bit of lace bark, if rolled into a thin string, will all but resist human strength to break it.

Despite its practical use there is no essential demand for lace bark. It has been used by the natives for hundreds of years and yet is comparatively little known to this day. A few specimens of lace bark articles exist in different countries of Europe. These were made hundreds of years ago, yet, although their age is considerable, they are said to be in a good state of preservation.

A Waiter's Walk. Some interesting particulars are given as to the ground covered by a waiter in dancing attendance upon the guests in a restaurant in Christiania The waiter had provided himself with a pedometer before starting his work. According to his calculations, he took ome thirty-seven miles, between 8 a. m. and 12:30 a. m. Working (and walking) four days a week, he calcuhated that he covered more than 7,000 miles in a year, which would seem to show that Swedish waiters take their work very seriously, unless, indeed, the pedometer was "fast."—Westminster Gazette.

Oldest Dwellings In Europe. One of the very earliest human settlements in Europe is Roche Corbon, on the banks of the Loire, seven miles above Tours. Here limestone cliffs stretch for miles and are pigeonholed with caves, which are on different leve els and open on to terraces. When the rest of the country was nothing but forest land Roche Corbon was a thriving settlement inhabited by wild skin clad predecessors of the present cave dwellers. These terraces and caves were formed by the action of mighty rivers, and during the glacial period, when the climate of that portion of France was very severe, man drove out the bears and hyenas and took refuge in these natural shelters, which faced south, and so became human setments of a primitive sort. DEAFNESS CANNOT BE CURED.

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous liaing of the Eustachian Tobe. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this ness is the result, and unless the in-flammation can be taken out and this tube restored to its normal condi-tion, hearing will be destroyed for-ever; nine cases out of ten are caus-ed by Catarrh, which is nothing but an inflamed condition of the mucous

A SUCCESSFUL HORSEMAN

Never allows his forse to suffer pain. He always uses Nerviline, which is noted for curing stiffness; rheamatism, swellings and strains. Nerviline is just as good inside as outside. For cramps, colie, and internal pain it's a perfect marvel. In the good racing stables Nerviline is always used, because it makes better horses and smaller veterinary bills. Twenty-five cents buys a large bottle of Nerviline. Try it.

Just as the permanence of a beautiful painting will depend upon the purity of the colors with which it is painted, so the permanence of beauty depends on the purity of the blood. Paint, powder and cosmetics won't avail to preserve beauty. Beauty begins in the blood. Dr. Pierce's Golden Medical Discovery is a true beautifier, because it provides for nature that pure blood with which alone she can paint. The use of this medicine will cleanse the skin, heighten the complexion, brighten the eyes, and give to face and form that radiance of health which is the greatest charm of beauty. Dr. Pierce's Pieasant Pellets are very effective in miding the system of clegging residuum, which accumulates with constipated habit.

BOTH GENERALS REGRET.

Linevitch and Kuropatkin Think Their Army Now Big Enough to Defeat the Japanese

Gunshu Pass, Manchuris, June 27.—
Vague despatches reaching here
through the efficial papers edited for
the army, make the conditions under
which the proposed peace is to be
reached indifferently understood. Although Gens, Linevitch and Kuropatkin express the conviction that Russis
is drifting toward peace, no action
looking to an armistice has yet been
taken. On the contrary, the commanders appear to regret that at the time
when the army has reached its maximum strength it is likely to be deprived
of victory.

Numerous small bodies of Japanese
secuts have appeared in the regions of

of victory.

Numerous small bodies of Japanese scouts have appeared in the regions of seither Russian fiank, and it is feared they were intended to screen the turning operations of the Japanese, as before the battle of Mukden. Chinese report that fianking movements have been already begun, but the Russian staff denies this.

Traders ceming from Bedoun say that the Japanese are advancing in that direction from Simmintin.

Jap Aftempt Repulsed,
St. Petersburg, June 27.—Two telegrams were received yesterday by Emperor Nicholas from Lieut-Gen. Linevitch, dated June 24 and June 25, respectively, and referring to the movements of June 21 and June 22. On the latter date a Japanese attempt to dislodge the Russian outposts in the valley of the Kaite was repulsed while the Russians in the Pailungchen district dislodged the Japanese cutposts at Nanshancheng and advanced southward of that place. The Russions operating mear Ufangiu retired after unmasking many of the Japanese resumed the offensive near Shimiaots, continuing a frental attack and making an energette

Meet in August.

Washington, June 27.—The President has received from both the Russian and Japanese Governments the stafement that the plenipotentiaries of the two countries will meet in the United States during the first ten days of August, and he has expressed to both Governments the what that the meeting should take place, if possible, on the first of August and if not on that date, then at the ealiest date thereafter.

Outrages Not to Occur Again.

London, June 27.—Questioned in the House of Commons yesterday regarding the destruction of British vessels by Russian auxiliary crulsers, Premier Balfour said the Russian Government disapproved of the actions of their cruisers, and that orders had been transmitted, rendering quite impossible any repetition of the last, which the British Government regarded as eutrages against international law.

Ottawa, June 27.-Hen. Frank Oliv-Ottawa, June 27.—Hon. Frank Olivers as an apologist for official misdeinge is not a success. Yesterday he had a tough case to defend, but flounded into a slough of inconsistencies, lost his temper and made a mess of things generally. The case was somewhat akin to the Thessalon postoffice deal in which the postmaster escaped punishment for defalvation by throwing the blame on his daughter. Poster, who read extracts from the report of Leach, who had found that \$459.05 was missing.

R. L. Borden said that if, instead of frictitious indignation, Mr. Oliver would get down to the facts of the case, he would be doing a better service. The deciaration of Beers Struthers and others of McLeod was that they had paid \$39 each to Sub-Agent Nixon, not to his son. The defence of the Minister of the Interior was, the lamest, weakest and most unfortunate defence he had ever heard in the House of Commons.

weakest and most unfortunate defence he had ever heard in the House of Commons.

Sir Wilfrid Laurier took the ground that the defaication was a small one, that Nizon facilitated investigation of the amounts and at once made restitution, with the help of his friends. Naturally Nixon must be responsible, but it appeared the son was guilty of the shortages. Such being the facts, could Nixon, whose other duties often called him away, be held morally guilty?

Alberts Autonomy Bill.

The House last night took up the schedule of the autonomy bill defining the twenty-five constituencies of Alberta, which was adopted after the boundaries of Gleichen, Rosebud, Banff and Innisfall had been changed to preserve community of interest.

Before the clauses giving a member each to Peace River and Athabasca were passed, Mr. Borden renewed his protest against this unfair and outrageous gerrymander.

The land clause and clauses two and sixteen, relating to education, still remain to be dealt with The land clause will be dealt with at the next sitting and on Wednesday the educational clauses will be taken up, together with the amendment proposed thereto.

WHAT HE WOULD DO.

Colonel Hayes Had an Answer Ready
For General Scott.
Of Colonel John C, Hayes, who
served with distinction under General
Winfield Scott in the Mexican war, an amusing story is told by T. E. Farish in his "Gold Hunters of California." in his "Gold Hunters of California." Hayes, with his command, had been out scouting. On his return he made no report to General Scott, who sent for him, General Scott was a veritable martinet in enforcing military discipline. After Hayes was seated in the commander's headquarters Scott sa'd, "Colonel Hayes, I have received no report of your expedition against the padre." "I did not think it worth while," said Hayes. "Every officer of the army is required to make a full report of everything to his superior offiport of everything to his superior offi-cer. Please make your report verbal-

Hayes began by saying that he struck the padre's trail on a certain day, fol-lowed it for two days, and on the third day, while his command was resting at noon and taking their siesta, the old padre came down on them. The "boys" gathered themselves together and whipped the Mexicans off, killing quite a number of the padre's command. His own loss was insignificant-one killed own loss was insignificant—one killed and three wounded. "Surprised you, eh?" queried Scott. "Yes; we were not expecting him." "Where were your pickets?" "Did not have any."

"What!" shouted General Scott. "A colonel in the regular army of the United States go into camp in the heart of the enemy's country and never place a picket on guard? What would you do if surprised when asleep?" "Shoot the first man that waked me up!" was the cool reply.

THE PUZZLE TANKARD. It Was a Feature of the Seventeenth

Century Tavern.
"This is a puzzle tankard," said the antiquary. "Try it."

The tankard, of peculiar shape, with odd little spouts protruding from it in unexpected places, was made of blue glazed ware, and on it was scratched the stanza:

From Mother Earth
I claim my birth;
I'm made a joke for man.
But now I'm here,
Filled with good cheer,
Come taste me if you can.

The old man filled the vessel with fair water, and the youth tried to drink from it. He could not, though, succeed. To whatever spout he put his lips the To whatever spout he put his lips the water refused to flow from that opening, flowing from half a dozen other ones instead all over his face and neck. Twe of the Men Identified Who Answered Fieldhouse's Defi.

Hamilton, June 22.—Damaging evidence against the three prisoners, James Neelon, Mike Connors and Stanley Davis, was given at the Fieldhouse Inquest last night. Witnesses swore that Fieldhouse went down the street in front of Neelon's home, issuing a challenge to fight. J. H. McCarthy and two other friends were with him. Three men left Neelon's house, and one of them struck both McCarthy and Fieldhouse over the head with a board. Victor Theort Identified the prisoners, Neelon and Connors, as two of the men who answered Fieldhouse's challenge. P. C. Meyers said that he called at Neelon's home sometime after the row and found Neelon and Connors in an outbuilding. The hands of both men were covered with blood. No evidence was given to show how Fieldhouse got to his boarding-house, but Drs. Parry and Davis, who conducted the postmortem examination, said that it was possible that he may have walked home. The inquiry was adjourned till next Wednesday to give the police a chance to get some witnesses, who, they think, have left the city te avoid telling what they know.

LACE BARK TREES.

The Many Uses to Which Their Airlly Light Fabries Are Put. There are in all about half a dozen lace bark trees in the world, so called because the inner bark yields a natural lace in ready made sheet form which can be made up in serviceable articles of apparel. Only four of these curious or apparel. Only four of these curious species of trees are of much practical value. Tourists who have stopped at Hawaii or Samoa may recall the lace bark clothing of the natives—clothing of a neat brown color when new, of remarkable strength and of a frag an odor, like freshly curved tobacco lenf. The native tapa cloth as it is called. The native tapa cloth, as it is called, made from the bark of the brussie, is papirifera, but it is not usually include

s of a delicate cream white tint. It probably a kind of fibrous pith. When the outer bark is removed it can be unfolded and unwound in one seamles piece, having a surface of a litt more than a square yard. Washin and sun bleaching give it a dazzling white appearance. The fabric is airillight. It is used in the West Indicates mantillas, cravats, collars, cuffs, window curtains—in a word, for every popose that ordinary lace is used. In making up shawls, vells and the like It is customary to piece two sheets of lace bark together. Deficate and apparently weak as it is in single mesh a bit of lace bark, if rolled into a thin string, will all but resist human strength to break it.

Despite its practical use there is no essential demand for lace bark. It has been used by the natives for hundreds of years and yet is comparatively little known to this day. A few specimens of lace bark articles exist in different countries of Europe. These were made hundreds of years ago, yet, although their age is considerable, they are said to be in a good state of preservation.

FALCONRY.

It Was a Favorite Sport of Many English Monarchs.

Richard I. when in the Holy Land amused himself with hawking on the plain of Sharon and is said to have presented some of these birds to the sultan. King John used to send both to Ire-land and to Norway for his hawks. We are told by Froissart that when Ed ward III, invaded France he had thirty falcons and every day either hunted or went to the river for the purpose of hawking. Henry VII, imported goshawks from France, giving £4 for a single bird—a much greater sum in single bird—a much greater sum in those days than at present. Henry VIII. while hawking at Hitchin was leaping a dike when the pole broke, and the king was immersed head first into the mud and would have perished in all probability had not his falconer dragged him out.

Elizabeth and James I, were much interested in the sport. The latter sovereign indeed expended considerable sums on its maintenance. Aubrey in his "Miscellanies" says, "When I was him to the sum of the

his "Miscellanies" says, "When I was a freshman at Oxford I was wont to go to Christ church to see Charles I. at supper, where I once heard him say that as he was hawking in Scotland he rode into the quarry and there found the cover of partridges falling upon the huwk, and I remember his expression further, 'And I will swear upon the book 'tis true.' Oldest Dwellings In Europe One of the very earliest human set-tlements in Europe is Roche Corbon, on the banks of the Loire, seven miles above Tours. Here limestone cliffs stretch for miles and are pigeonholed with caves, which are on different levels and open on to terraces. When the rest of the country was nothing but forest land Roche Corbon was a thriving settlement inhabited by wild skin clad predecessors of the present cave dwellers. These terraces and caves were formed by the action of mighty rivers, and during the glacial period, when the climate of that portion of France was very severe, man drove out the bears and hyenas and took ref uge in these natural shelters, which faced south, and so became human settlements of a primitive sort. Near at hand were the rivers and great forests full of fish and game.

Nature has just one pigment on her pallette with which she produces all the marvellous tints of beauty, and that one pigment is the blood. The shell-like plack beneath the finger nails, the delicate rose of the cheek, the cherry ripeness of the lips, the irridescent brilliance of the eyes are all produced by the blood. Just as the permanence of a beautiful parating will depend upon the purity of the colors with which it is painted, so the permanence of beauty depends on the purity of the blood. Paint, powder and cosmetics won't avail to preserve beauty. Beauty begins in the blood. Dr. Pierce's Golden Medical Discovery is a true-beautifier, because it provides for nature that pure blood with which alone she can paint. The ase of this medicine will cleanse the skin, heighten the complexion, brighten the eyes, and give to face and form that radiance of health which is the greatest charm of beanty. Dr. Pierce's Pleasant Pellets are very affective in sudding the system of clegging residuum, which accumulates with constipated habit.

Gunshu Pass, Manchuria, June 27.—
Vague despatches reaching here through the efficial papers edited for the army, make the conditions under which the proposed peace is to be reached indifferently understood. Although Gens. London, June 27.—Questioned in the House of Commons pesterday regarding the destruction of British vessels by Russian auxiliary cruisers, Framer Balfour said the Russian Government disapproved of the actions of their cruisers, and that orders had been transmitted, rendering quite impossible any repetition of the last, which the British Government regarded as entrages against international law.

"ONLY A FAMILY AFFAIR."

Another Grit Rewarded With Better Paying Office After Having Seen Found Out—The House.

Ottawa, June 27.—Hon. Frank Oliver as an apologist for official misdoings is not a success. Yesterday he had a tough case to defend, but founded into a slough of inconsistencies, jost his tough case to defend but flounded into a slough of inconsistencies, lost his temper and made a mess of things generally. The case was somewhat akin to the Thessalen postoffice deal in which the postmaster escaped punishment for defalcation by throwing the blame on his daughter. Mr. Oliver's defaulting protege was one Nixon, Subland Agent at Macleod, who got banind \$506 in his accounts and then at a private investigation held by a fellow partisan, Leach of Winnipeg, put up the ples that his young son had taken the money, Nigon's suboffice was closed, but officials of the Interior Department within a few days after Leach's report reached Ottawa had him appointed to the immigration service, and two weeks afterwards raised his salary from \$25 to \$75 per month. Mr. Oliver's defence was that it was 'only a family affair,' and that as restitution had been made it was the part of private individuals, not of the Government, to invoke the criminal law. The subject was brought up by Mr. Foster, who read extracts from the report of Leach, who had found that \$49.05 was missing.

port of Leach, who had found that \$499.05 was missing.
R. L. Borden said that if, instead of frictitious indignation, Mr. Oliver would get dewn to the facts of the case, he would be doing a better service. The declaration of Beers Struthers and others of McLeod was that they had paid \$36 each to Sub-Agent Nixon, not to his son. The defence of the Minister of the Interior was, the lamest, weakest and most unfortunate defence he had ever heard in the House of Commons.

weakest and most unfortunate defence he had ever heard in the House of Commons.

Sir Wilfrid Laurier took the ground that the detaication was a small one, that Nixon facilitated investigation of the amounts and at once made restitution, with the help of his friends. Naturally Nixon must be responsible, but it appeared the son was guilty of the shortages. Such being the facts, could nixon, whose other duties often called him away, he held morally guilty?

Mr. Fitzpatrick replied: "Some of the provisions of that act have been eclared ultra vires. The Government oes not agree in that judgment, and is our intention to apply to the Privy Council for leave to appeal Privy Council for leave to appeal.

"I do not think it necessary to say what effect that judgment might have with respect to other legislation on this question. As far as the proceedings are concerned, the Dominion of Canada will be represented by Mr. Shepley of Toronto and Mr. Newcombe, Deputy Minister of Justice.

CUBAN DYARRHOEA.

U. S. soldiers who served in Cuba during the Spanish war know what this disease is, and that ordinary remedies have little more effect than so much water. Cuban diarrhoea is almost as severe and dangerous as a mild attack of cholera. There is one remedy, however, that can always be epenedd upon, as will be seden by the following certificate from Mrs. Minnie Jacobs, of Houston, Texas: "I hereby certify that Chamberlain's Colle, Cholera and Diarrhoea Remedy cured my hisband of a severe attack of Cuban diarrhoea, which he brought home from Cuba. We had several doctors, but they did him no good. One bottle of this remedy cured him, as our neighbors will testify. I thank God for so valuable a medicine." For safe by All Druggists.

Ottawa, June 27.—The members of the Ottawa Plumbers' Union went on strike yesterday to enforce a demand for 30 cents an heur, and a Saturday half holiday without pay. The maxi-mum now is 27.1-2 cents, and the em-ployers offer 28.1-2 cents and refuse the half holiday. half holiday.

THIS MEDICINE IS BREATHED THIS MEDICINE IS BREATHED.

That's why it is sure to cure Catarrh. You see it goes direct to the source of the disease,—its healing value of the disease,—its healing value of the disease of the disease

Binder Twine Comes Down.

Kingston, June 27.—Owing to a reduction in the price of hemp and a very lucrative purchase made by the Government for its binder twine factory at Kingston Penitentiary, it has been decided to cut the price of warranted pure manila binder twine by three-quarters of a cent. The new price will be 11 1-2 cents per pound.

THAT PALE, TIRED GIRL.

She is in society, in business, She is in society, in business, at home, everywhere you see her, but always worn and fatigued. She has not heard of Ferrozone or she would be perfectly well. How quickly the strengthens — what an appetite it gives—what a glow it brings to pald lid cheeks! The nutriment contained in Ferrozone puts strength into any-body. Laughing eyes, rosy lips, and bright, quick movements all tell of the vitality Ferrozone produces. Thousands of attractive, happy women use Ferrozone—why not you? Novel Written in Verse.

A London publisher received the manuscript of a novel written from beginning to end, in verse. Curious, he read it and found it not at all a bad story; so good, indeed, that he is willing to print it if the author will translate it into Enclish pross.
