ANNUAL MEETING OF THE BOARD OF TRADE.

The annual meeting for the election of office-bearers and the transaction of general business took place yesterday in the Victoria Chambers. Mr. H. S. Scott, Vice-President, occupied the Chair, and the Secretary, Mr. T. H. Grant, was also present. The following members were in attendance : Messrs. J. F. Turnbull, A. Joseph, O. Murphy, C. Poston, J. Baile, W. G. Wurtele, B. Bennett, M. Stevenson, J. Archer, R. Brodie, W. Hunt, W. Rae, R. Shaw, J. H. Clint, J. Laird, H. W. Welch, H. O'Connor, G. T. Cary, J. C. Thomson, W. Brodie, R. Hamilton, O. Leduc, J. Hossack, J. Roche, Geo. Hall, M. Connolly, P. Garneau, W. White, M. G. Mountain, J. Thomson and W. Withall.

The CHAIRMAN said that, in the absence of the President, Mr. Henry Fry, it was his duty to preside on this occasion. The annual report would go fully into the matters they had had before them during the year, and it was unnecessary for him to trouble the meeting with any remarks respecting the points, which would come up in the regular course. The Secretary would read the report.

Mr. T. H. GRANT then read the annual report as follows :—

ANNUAL REPORT.

The Council of the Quebec Board of Trade, in bringing their yearly proceedings to a close, have the pleasure of drawing the attention of the Board, to the most important subjects that have engaged their attention during their term of office.

CITY CORPORATION BILL.

In April last, shortly after the election of your Council, a deputation was named to wait upon His Worship the Mayor, and suggest several amendments and additions to the taxation scheme of the Finance Committee,

TRADE AND COMMERCE OF

with a view of securing an equitable adjustment of the taxes. The Mayor promised to give the matter his best attention, but the bill introduced into Parliament, was so much at variance with the wishes of the citizens, that your Council felt it their duty to take active measures to defeat the most objectionable clauses. Accordingly with the consent of the Board, J. W. Cook, Esq., Advocate, was despatched to Ottawa, and through his exertions, and those of Sir N. F. Belleau, the Hon. Chas. Allcyn, and Hon. I. Thibaud, the obnoxious bill was deprived of some of the worst features. The present law is still defective, and your Council hope a further effort will be made, on the assembling of the Legislature, to pass a more efficient measure for the government of the city.

CITY FIRE DEPARTMENT.

Repeated representations were made by your Council to the municipal authorities, to adopt some effective means of protecting the property of the citizens from fire, and it is satisfactory to know that the existing fire organization, which has already done good service, and the further arrangements contemplated by the Fire Committee of the Corporation, will, your Council hope, have the effect of reducing the present high rates of insurance and render property less liable to destruction. This important matter demands constant attention.

PUBLIC STREETS.

The Council called the attention of the Mayor and Corporation to the filthy condition of the principal thoroughfares in the Lower Town, and although the city was threatened with the re-appearance of Cholera, no effort was made until late in the season, to repair and clean them. It is hoped that, on the departure of the snow this spring, active measures will be taken, to put the leading streets in order, and have them properly cleaned.

QUARANTINE REGULATIONS.

The limits prescribed under the Quarantine regulations, for the bringing to of vessels with clean bills of health, having been considered too circumscribed, the Council brought the matter under the notice of the Government,—requesting them to extend their limits so as to include the ballast ground, and recommending that a medical man, to be appointed by the Government, and paid by the owners, should board all steamships with the Pilots at Father Point, and to issue certificates to enable these steamers to pass the Quarantine Station, provided there is no disease on board. These recommendations were adopted.

POST OFFICE.

Representations were made to the Government on the utter inadequacy of the Post Office accommodation in this city; and although the Post Master General promised to give the subject his careful attention, it is to be

mentioned with
done to provide
is entertained

mentioned with much regret and disappointment that nothing has been done to provide for the want. It has been publicly stated that an intention is entertained of altering the old Post Office instead of erecting a suitable building, worthy of Quebec, a course this Board would earnestly deprecate, as the existing building cannot be converted into a convenient Post Office.

INTERCOLONIAL BOARD.

A convention of delegates from all the Provinces was called to meet in Montreal in June last, to complete the organization of a Central Board for British North America. The Fenian trouble, however, necessitated a postponement, and it is not now proposed to convene another meeting until the Union of the Provinces shall have been completed.

CORPORATION OF PILOTS.

This body brought before Parliament, at its last session, an amendment to their Act of Incorporation, seeking for powers and privileges which were considered dangerous to the efficiency of the service, and the rights of masters and owners, and your Council took active measures to defeat it. Through the exertions of Hon. C. Alleyn, Geo. Irvine, Esq., M.P.P. for Megantic, and J. W. Cook, Esq., the bill was defeated, and the thanks of the Board are due to those gentlemen for their valuable aid on the occasion.

THE NEW TARIFF.

The tariff of duties and the proposition of the Finance Minister to issue Provincial Notes and withdraw the bank circulation, received the careful attention of the Council. A letter suggesting several changes was sent to the Hon. Mr. Galt, some of which were acted upon, but the Council regret to observe that the sugar duties were so changed as to throw the whole trade into the hands of the refiners to the detriment of the revenue. Under Confederation the entire tariff will require revision, when, it is hoped, a law satisfactory to all parties will receive the careful attention of Parliament.

NAVIGATION OF THE ST. LAWRENCE IN WINTER.

This question has excited a good deal of attention both in and out of Parliament, and a special Committee was named by your Council to investigate the subject. Their report has already been before the members of the Board, and copies of it were sent to the Colonial Delegates in England, the Secretary of State for the Colonies, the Board of Admiralty and the War Office. Letters have been received from those departments endorsing the views of the Council.

THE CENTRAL SYSTEM.

At the Detroit Convention the Committee on weights and measures suggested the general adoption on this Continent of the central system in the weighing of grain, flour and seeds. Since that meeting, the Albany Board of Trade have taken an active part in promoting its introduction in

the chief cities of the United States and British America. At the suggestion of your Council, the merchants and dealers of this city commenced to enforce the system on the 1st November last, and nearly all the Boards of Trade in Canada have recommended its adoption.

INVESTIGATION INTO SHIPWRECKS.

At the request of the Council, the Government instituted an enquiry into the loss of the steamer *Annette*, and the barks *Ellen* and *General Sale*. The reports of the Commissioner, J. W. Dunscomb, Esq., have been published, and the members of the Board are acquainted with the result. Mr. Dunscomb recommended that an additional light should be placed at the South Traverse, and a steam trumpet or fog whistle on Red Island reef. The Council pressed these recommendations on the attention of the Government, and they are unofficially informed that it is purposed to carry them into effect next summer. Your Council have not neglected to urge on the authorities the necessity of having a permanent Court of Enquiry, open to the public, to avoid delay and secure prompt and reliable testimony, and they recommend this matter to further consideration by their successors.

SEIZURE OF VESSELS.

The seizure and serious detention of the ship *Transit*, Capt. Moore, off the Pillars, on the 26th June last, for the sum of \$60, was made the subject of complaint to the Council, and the matter was brought under the notice of the Attorney General for Lower Canada. The subject was referred by him to Geo. O. Stuart, Esq., who recommended the repeal of the Law, as far as the jurisdiction of the Circuit Court is concerned.

FLOUR INSPECTION AND WEIGHING.

A circular from the Hon. J. Young, Flour Inspector, Montreal, has been received, stating that he proposed this spring, in order to remedy the evil of short weight, to weigh every barrel, and recommending uniformity in the manufacture of barrels, so as to equalise tares. The Board of Examiners have recommended our Flour Inspector to adopt the same course. The standard samples of flour for the present year, have been adopted by the Board, and they are now in the custody of the Secretary.

WEIGHING COALS.

The coal merchants of this city have had under consideration, the difficulties and losses arising from short deliveries, and recommended that, in future, all cargoes should be weighed. The intervention of the Board was requested, and, at the last quarterly meeting, the following resolution was adopted: "That this Board, having taken into consideration the representations made by the merchants of this city, who are buyers of coal cargoes, relative to the present system of buying by bills of lading, recommend

that, in future, divered, shall be of bills of ladi strongly of opin weight, and the the same rule in

that, in future, all coal cargoes should be weighed, and the weight so delivered, shall be the quantity on which payment shall be made, irrespective of bills of lading." In connection with this subject, your Council are strongly of opinion that coals should also be sold to the local consumer by weight, and they hope the coal dealers will see the propriety of adopting the same rule in the retail as well as the wholesale trade.

WEIGHER, MEASURER AND GAUGER.

The Board of Examiners have adopted, and the Council have approved of a code of rules, and a tariff of fees, for the guidance of the weigher, measurer and gauger, under the Provincial Act of Parliament, 28 Vic., chap 6. Mr. John Fraser, has been appointed to the office.

THE PILOT SCHOONERS.

Complaints having been made of the absence of the pilot schooners from their station at Bic this fall, of their having failed to take the pilots out of six outward bound vessels, and the serious detention of the ship *Miranda* from the same cause, the Council referred the matter to the Trinity Board, who replied that they had no jurisdiction therein, but that under the by-laws of the Corporation of Pilots, the master of a pilot schooner, not performing his duty, is liable to a fine of not less than ten, and not more than forty dollars, and that in case the Corporation of Pilots refused to prosecute under the provisions of the by-law, they can, like other corporate bodies, be subject to a mandamus. If owners or masters of vessels would see the law enforced, there might be less cause for complaint.

STEAM COMMUNICATION WITH THE GULF PORTS.

This important subject has been frequently before the Board and the public, and several ineffectual attempts have been made to establish a line of boats between Quebec and the Maritime Provinces. A Company, however, is now in course of organization—over two-thirds of the nominal capital has been subscribed and a suitable steamer has been purchased,—so that a weekly line during the ensuing summer may be regarded as a certainty. Great credit is due to those gentlemen who projected this new enterprise, and through whose energy and perseverance so much has been accomplished. It is the duty of all persons interested in the prosperity of Quebec to promote the success of the Company by every means in their power.

HARBOUR COMMISSION.

Early in the year a contract was entered into between the Commissioners and Mr. Brown, of Thorold, for dredging the Commissioners' wharves, and securing to proprietors the right of dredging round their wharves on the same terms as the Commissioners. The work was commenced and the East India wharf dredged to a depth of 25 feet, but owing to a series of

TRADE AND COMMERCE OF

accidents to the dredge, it was not completed. The Council regret to learn that Mr. Brown has notified the Commissioners that he cannot complete the contract. It is hoped, however, that the work may be continued by competent contractors.

The break-water at the mouth of the St. Charles has been completed by Messrs. S. & C. Peters, at a cost of \$200,000.

Some amelioration in the tariff for loading at the Commissioners' wharves, was granted.

The Commissioners have compromised the dispute between Mr. Reynard and the Government relative to the wharf so long held by that gentleman, and have obtained possession of the property.

V THE SHIPPING OFFICE AND THE CRIMPING SYSTEM.

His Excellency the Administrator of the Government, has submitted to your Council, a correspondence between J. W. Dunscomb, Esq., and the Imperial Government, on the subject of employing shipwrecked seamen, and the crimping system at the Port of Quebec, and has requested the remarks and suggestions of the Board thereon. A special Committee was named to consider the questions submitted, and their report recommending the following changes has been adopted by the Council, viz : The abolition of the present Shipping Office, and the appointment of three Shipping Masters, to be placed under the entire control of the Board of Trade, to be licensed by them and paid by a fee of a dollar a man, with power to the Council to appoint, suspend, or dismiss any such shipping master. The transfer of the control of the Water Police to the Collector of Customs, and the compelling of the Shipping Master to ship the men in rotation as entered on their lists in each office, which would secure the shipping of wrecked seamen, and that when there is a refusal, without reason, on the part of the Shipping Master, to engage good and useful seamen, notice should be given to the master, that the seamen in question will otherwise be sent on board, as distressed seamen, for a passage home at twenty cents a day. The Committee also report, that in proposing those changes, they had no desire to deprive the present Shipping Master of his office, and suggest, in the event of these recommendations being adopted, he be named one of the three Shipping Masters.

J STATISTICS OF THE TRADE OF THE PORT.

No reliable mode has ever been adopted of securing correct and regular returns of the Imports by Rail, Barge and river Steamer at the Port of

Quebec, (and, in some instances, merchants have refused to give a list of their receipts.) The Managing Director of the Grand Trunk Railway has kindly consented to furnish your Council with a weekly statement of their Imports, and the Collector of Customs, J. W. Dunscomb, Esq., has promised that he will detail a competent clerk to procure the receipts by both barge and steamer. Your Council has also named a Committee to perfect this important matter.

DELEGATE FROM ENGLAND.

Your Council are in possession of a letter from the Mayor and Member for Birmingham, stating that Mr. A. Field of the Chamber of Commerce of that City, had been deputed to visit the chief cities of the United States and the Provinces of Canada, and confer with the Boards of Trade, on certain proposed changes in the Maritime Law, &c., and we may therefore shortly expect the pleasure of a visit from that gentleman.

SHIP LABORERS' SOCIETY.

The illegal and unjustifiable conduct of the members of this body, in causing a strike amongst the laborers on board ship last summer, and the violence resorted to by them, to prevent non-members of the Society, from working on their own terms, had an injurious effect upon the trade of the port, and was in direct variance with the Act of Incorporation, which distinctly states that the Society was incorporated for benevolent objects. The Board learns with regret that the laborers intend, not only to adopt the same course next summer, but to insist on greater exactions. If so, measures will have to be adopted to suppress any attempt at coercion, and protect the citizens in the exercise of their rights. Merchants can have no objection to the payment of liberal wages, and the Board will do all in its power to sustain the labourers in their just demands, but to force ships to employ members of that Society *only*, to the exclusion of all those who do not belong to it, would be so gross an outrage on the liberty of the subject, and so pernicious in its tendency to all the interests concerned, that it cannot be submitted to. It is hoped, therefore, for the sake of peace and order, the ship laborers will have the good sense, not to resort in future, to any such unjustifiable proceedings.

ST. SAUVEUR FIRE.

Since the last Annual Meeting, your Council have had to deplore one of the most extensive conflagrations that have ever taken place in British America, by which the whole of St. Sauveur, and a considerable portion of St. Roch's, were reduced to ashes. Through the unbounded liberality of our fellow subjects in Great Britain and Ireland, and the generosity of our American neighbors and fellow Colonists in these Provinces, a large amount of distress, which would otherwise have prevailed, was relieved, and the warmest and most grateful thanks of the Board are due to them for their timely and generous contributions.

VACANCIES IN THE COUNCIL.

During the year, two members of the Council have resigned, James Dean and Henry Dinning, Esquires, and O. Leduc and John Laird, Esquires, have been elected in their place.

OFFICIAL ASSIGNEE.

Mr. Thos. LeBel, Official Assignee for the District of Kamouraska, has resigned and the office is still vacant.

INSPECTOR OF ASHES.

By the death of the late Mr. Charles Little, who held the office for over ten years, we have lost the services of an Inspector of Ashes, and the vacancy is not yet filled.

INSPECTOR OF LEATHER.

At the request of the Inspector, Mr. Leon Bellerive, was appointed and sworn in as Assistant Inspector of Leather for the District of Quebec.

NEW MEMBERS.

Thirty-six new members joined the Board during the year.

DEATHS.

Your Council have to record with sincere regret the death during the year of three old and esteemed members of the Board. Edward Poston, Yves Tessier, and William Price, Esquires. The latter gentleman was one of the original members of the Board.

In addition to the above mentioned subjects, a number of minor, though important questions, received the careful attention of your Council. They have been enabled, also, to procure a more suitable and convenient place for the meetings of the Board, although at a somewhat increased rent. The deliberations and operations of the Board are increasing in interest and importance yearly, and the cordial co-operation of all its members is required in the interest of the trade of the port.

HENRY W. WELCH,
Treasurer,
Quebec Board of Trade.

1st April, 1867.

Mr. M. STEVENSON moved, seconded by Mr. WESTON HUNT—That the report be received, adopted and published.

Mr. WELCH said that, before the report was adopted, he would like to, inquire what prospect was there of getting a graving-dock the very object for which the Harbor Commission was appointed some years ago. That was also, the justification for the enormous taxation laid on the shipping here. The Harbor Commission had been in existence more than seven years, and yet we saw no more of the graving-dock than when it was appointed. The building of a graving-dock at Quebec was not simply a local, but a national question. It was more important we should have such a convenience here, that Confederation had been consummated. At present the shipping was subjected to enormous taxation without receiving any direct advantages. What advantages did vessels that lay at Point Levi get, for the one-third of the taxation which the county it belonged to paid. If there was a graving-dock they would participate in the benefits derived from it; but the matter, unfortunately, seemed to have been entirely dropped.

The CHAIRMAN said he was not prepared to state anything had been done during the present year beyond what had appeared in the papers. With respect to the correspondence that took place with the Lords of the Admiralty, he regretted he was not able to give such information as to the proceedings of the Harbor Commission as the President might lay before

them if he were here, as he used to give (the Chairman) the correspondence in question.

Mr. JOSEPH—Y

Mr. SHAW—A

The CHAIRMAN—

Mr. SHAW—T

The CHAIRMAN—water, which arose interest was necessary.

Mr. SHAW—W

Mr. JOSEPH said, in his opinion, I have no knowledge of a graving-dock; but I know that the extent of the work of the Harbor Commission, it was necessary that the means should be provided for a new harbor, as it was necessary to have a graving-dock. The plans were made by the President of the Board of Admiralty; and, of course, the graving-dock till the time of the meeting was yet going on; but a graving-dock was necessary of a graving-dock.

The CHAIRMAN—The graving-dock was abandoned; but the

The motion for

On motion of Mr. R. Brodie and J. H. C. for the office-bearers

The CHAIRMAN said he received a note from Mr. Scott during next winter, consequently, his services were requested. He (the Chairman) intended to fulfil the duties of the office.

them if he were here. Mr. Joseph might know something of the matter, as he used to give an account of any progress made, in former years. He (the Chairman) thought the last step taken by the Commission was the correspondence in question.

Mr. JOSEPH—Yes.

Mr. SHAW—Are there any more break-waters to build?

The CHAIRMAN—if you desire it, there are.

Mr. SHAW—They are as desirable as ever.

The CHAIRMAN—There is a large amount of interest paid on the break-water, which arose mainly from the outlay on that work; the rest of the interest was necessitated by the absence of any revenue.

Mr. SHAW—Which will continue for many years to come.

Mr. JOSEPH said—Since ceasing to be a member of the Harbor Commission, I have no knowledge of what has been done towards the building of a dock; but I know that the break-water built is merely about one-third of the extent of the work projected at first. While I was a member of the Commission, it was decided that no more of the work should be built, and that the means that would be required to complete this break-water or new harbor, as it was called, should be expended in the making of a graving-dock. The plans were made, but not carried out, when I ceased to be President of the Board of Trade. Those plans were to be submitted to the Admiralty; and, of course, nothing could be done towards constructing a graving-dock till they were approved of. The correspondence might be yet going on; but a year ago the Commissioners were fully aware of the necessity of a graving-dock and are still.

The CHAIRMAN—The matter is much in the same state. The idea is not abandoned; but there is no immediate probability of action in the matter.

The motion for the adoption of the report was carried.

ELECTION OF OFFICE-BEARERS.

On motion of Mr. O. Murphy, seconded by Mr. P. Garneau, Messrs. R. Brodie and J. H. Clint were appointed scrutineers to examine the ballot for the office-bearers for the ensuing year, and report the result.

The CHAIRMAN said, with regard to the election of a President, he had received a note from Mr. H. Fry, stating he would be absent from Quebec during next winter, and also a portion of the approaching summer; and, consequently, his re-election would prove inconvenient. He, therefore, requested Mr. Scott to state at this meeting that he did not seek re-election. He (the Chairman) trusted the Board would not release Mr. Fry from the duties of the office. He had made an excellent President, had advanced the

interests of the Board on all occasions; and it would be better for the Board to submit to the occasional absence of Mr. Fry, than lose his services. He was sure there would be a general desire to re-elect that gentleman.

The ballot then took place with the following result:—

Mr. H. FRY, re-elected President.

Mr. H. S. SCOTT, Vice President.

Mr. T. H. GRANT, Secretary.

Mr. H. W. WELCH, Treasurer.

COUNCIL.—B. Bennett, P. Garneau, A. Joseph, J. G. Ross, J. Laird, A. Thomson, M. G. Mountain, A. Fraser, T. H. Dunn, O. Leduc.

BOARD OF ARBITRATION.—The President Vice-President and Council, were elected the Board of Arbitration.

With reference to the office of Vice-President, Mr. Scott requested the meeting, before the ballot took place, not to re-elect him, as he had served in that capacity several years, and found it inconvenient to come down to Lower Town every day to discharge the duties of the office.

The vote, however, placed him in the same position as before, whereupon he declined to serve. A second ballot was then taken, resulting in the election of Mr. Robert Hamilton. He thanked the members for the honor done him, but positively refused to serve for personal reasons which he thought important. After some delay, and fruitless efforts to induce some new man to accept the office, Mr. Scott yielded to the general request to serve as Vice-President another year, on the understanding of his being permitted to resign during the twelve months, should he feel such a step necessary.

THANKS.

Moved by Mr. WURTELE, seconded by Mr. WHITE—That the thanks of the Board are due to the old Council for their attention to the interests of the Board during their term of office.—Carried.

The following new members were elected: S. Vaughan, of DeWolf and Vaughan; J. E. Deschamps, of the Richelieu Company; Adam Watters, grocer; C. J. Hinde, merchant, Esquires.

It was moved by Mr. Grant, seconded by Mr. Connolly, and Resolved,—

That as the Confederation of the Provinces will necessitate many important changes in the commercial, fiscal and maritime laws of the country, the Council be instructed to enquire into and report to the Board at an early date what changes, if any, are necessary in the various laws and regulations connected with our navigation interests and customs and excise duties.

The meeting then adjourned, at two o'clock.

Quebec, 15th March, 1867.

C. S. PHILLIPS,
per BENJ. ROUSSEAU,
Deputy Inspector.

Report of the Inspector at Quebec, on the inspection of Leather and Raw Hides for the year 1866.

Inspected during 12 months ending 31st Dec- ember, 1866.....	29,300	Sides Sole Leather.
Measured during same period (which is sold by measurement).....	10,000	Sides Upper Leather.
Inspected from 1st January, 1866, to 6th Sep- tember, 1866	1,700	Raw Hides
From 6th September to 31st December, 1866. 43,000	do.	

The increase in the inspection of Raw Hides, since 6th September, 1866, is
due to the Law rendering the inspection compulsory, having gone into operation
on that day.

A. FORTIN,
Inspector.

REMARKS.—Out of the 29,300 Sides Sole Leather inspected, 12,000 were in-
spected at the Champlain Tanneries, and 3,000 at the Roxton Falls Tanneries.
Those 15,000 were forwarded to Montreal, to be sold there. There are only two
houses in Quebec who manufacture sole leather, Messrs. O. L. Richardson & Son
and Mr. Jos. Louis. Out of the 10,000 Sides Uppers measured, two-thirds were
shipped to Montreal, but these did not go through a full inspection, the measure-
ment only having been obtained, and not the quality of the leather, manufac-
turers objecting to further inspection, as it is not compulsory on those leathers.

The law enforcing the inspection of Raw Hides works pretty well, and gives
confidence to purchasers, and manufacturers buy with more satisfaction. It has
also had the effect of stopping the damage to hides by knife cutting.

I would also remark that the Quebec market does not supply more than one-
third to the Quebec manufacturers, the remainder being purchased in the Mon-
treal, Upper Canada and Chicago markets.

The whole respectfully submitted,
Quebec, 24th March, 1867.

A. FORTIN,
Inspector.

THE LOWER PORT TRADE.

THE LOWER PORT TRADE.
This branch of business has been of great value to Quebec, which, until within the last five years, has always enjoyed a complete monopoly both of the Import and Export Trade. The following is a Statement of the principal articles of Export for the year 1866, to the Free Port of Gaspé and the Maritime Provinces:

Total value.....			

In the list of exports from Quebec, for want of space, we have omitted a number of articles, so that they do not show the total business done. The following figures, however, represent the greater number of the exports.

To the Maritime Provinces.

\$482,632
443,250

§ 925,782

It will be observed by this statement that Gaspé, with its small population, received from Quebec within forty thousand dollars as much as all the Maritime Provinces put together, a proof of the immense extent to which the trade with these sister Colonies.

TRADE AND COMMERCE OF

COMPARATIVE STATEMENT of the number and tonnage of Sailing Vessels and Steamers, with the number of men employed, entered Inwards and Outwards for the years 1865 and 1866, shewing the countries from whence they came and for which they cleared, whether with cargo or in ballast, also distinguishing the countries to which they belonged.

REMARKS.

The season now closing has been one of great commercial depression in England, arising from the failure of banking and financial companies to an extent of almost fabulous amounts, which for months enhanced the value of money from 4½ to 10 per cent, and although the bank rate is now reduced to 4, yet the effect of the extreme stringency being of such long continuance, has been to create a paralysis in mostly all branches of trade, and we fear a long period of time will elapse ere the mercantile world assumes a healthy buoyancy.

As if these difficulties in finance were not sufficient for the present stagnation in business, we have had strikes in different branches of trade, and while we are writing, we have intelligence by Atlantic Cable of the fears entertained of a general rising in Ireland.

Notwithstanding these disturbing events in the Mother Country, the trade of Canada has in the main, been good, especially that branch which more particularly concerns those to whom these remarks are addressed.

WHITE PINE has been high all the season, especially in summer, when generally it is dull and heavy of sale, but large purchases embracing from two and a half to three million feet, were then made for the American market, at prices far beyond what would have justified shipments to the United Kingdom, and we consider it our duty to warn those going Home to contract, against relying too implicitly on the timber which is manufacturing, and which is intended for this market, finding its way to Quebec. Large sales of Sawn Lumber have been made at extreme prices for delivery in the States in 1867, and Square Timber will, we think, be bought largely for that market. Buyers from New York and Albany, will in all probability, commence in Spring instead of Summer, as their purchases this season would have been on a much larger scale had the capacity of the canals been such as would have enabled the timber to have reached the New York market before the close of the canal navigation. The Stock wintering is less than last year, by two and a half million feet but nevertheless is larger than was anticipated. The exports have fallen far short, being 15,541,320, against 19,007,880 in 1865, which must have its effect on the markets in Liverpool and the Clyde, where, up to this time, it has been selling at prices far from remunerative, although the freights have been very low all the year.

RED PINE is a great drug on both sides of the Atlantic, and we cannot too strongly recommend a total cessation in its manufacture, till there is some demand for it.

OAK has been heavy of sale all the season, occasioned by the want of enquiry on the other side of the Atlantic. The supply has been much short of last year, and the stock is 25 per cent loss.

ELM AND TAMARAC have both been difficult of sale, owing to the great stagnation in ship-building, and till this branch of our trade revives, we do not recommend their being manufactured to any extent.

ENGLISH SPECIFICATION OF DEALS are 12 and 13 feet long, one-ninth under 11 inches broad and upwards,— $\frac{1}{4}$ firsts and $\frac{1}{2}$ seconds are worth £2 to £3 more than the above quotations, and if first quality alone
from £3 to £5. Dry Flotted are worth 10s. more than our quotations.

N. B.—Parties in England will bear in mind that timber sold in the Raft subjects the purchaser to great expense in pressing, butting, and at times heavy loss for culls—if sold in shipping order, the expense of shipping only to be added.

STAVES have been high since Summer, and the stock wintering is small, and the price in London and mostly all the English markets very encouraging. We think parties in the West may calculate on prices being remunerative in 1867, as the Stocks are very bare everywhere.

DEALS have been held at extreme prices all the year, and the shipments have been on a very large scale, so large, indeed, as to tell seriously on the London market, which is the great centre of this portion of our export. Notwithstanding this, however, manufacturers are asking very high prices for next year's delivery, occasioned by the active enquiry of the Americans for all kinds of Sawn Timber, both Pine and Spruce.

FREIGHTS have ruled ruinously low all the season.

We tender our thanks to Messrs. Wood, Petry, Poitras & Co., for the use of their tabular statements.

J. BELL FORSYTH & CO.

SYTH & CO.

(ANNUAL CIRCULAR.)

QUEBEC, 30th November, 1866.

We beg to forward the Trade Returns for the year, comprising the Supply, Export, and Stock of Timber at this Port, with a statement for the past five years respectively, an average for the same period and five years preceding, together with Prices Current. The season just closed has been one of great activity for the Timber Trade, and our staple article of White Pine has maintained a higher price throughout the season than we have ever known it before. The tightness in the English money market, it was feared by some at the commencement of the year, would have had a damaging effect upon our trade; but the feeling was only temporary, and notwithstanding a great falling off in the number of vessels expected to arrive, prices have kept up without any diminution to the close of the season. During last winter our Government appointed a Commission to proceed to the West India Islands and South America, and we are not without good reason for expecting beneficial results from their visit to these countries; already the Spanish Government have, with a view of promoting trade between Canada and the Islands of Cuba and Porto Rico, appointed a regular Consul to reside at Quebec, and before long, our trade in sawn lumber must increase for the United States and other foreign countries, while the square timber trade will proportionately diminish.

WHITE PINE.—The stock on hand of this article is of square 10,875,175 against 12,426,850, and of waney 762,903 against 347,187 at the same period last year, and is superior in point of quality to what has ever wintered before, the trifling amount of small and inferior wood on hand in the spring, and what arrived this year, having been worked off by spring shipments and local consumption during the season, and is all with little exception in the hands of shippers. It is important not to lose sight of the fact that large tracts of timber limits of the highest value for lumbering purposes, have, within the past two years, passed out of the hands of those engaged in the production of square wood and waney board, into the hands of those engaged in deals and sawn lumber for the American market, and we cannot shut our eyes to the change that must before long take place in our export trade from the large and increasing demand for Deals and sawn lumber. The fears entertained by some of the effect of the abrogation of the Reciprocity Treaty by the United States Government, have been unfounded, and has proved that when an article is indispensable, the increased cost falls upon the consumer while the Trade sustains no diminution in consequence.

RED PINE.—The stock on hand of this article is 5,020,415 against 5,949,111 feet last year, two-thirds of which is inferior and small-sized wood. The market has been very dull throughout the season, and sales have been made at all times with difficulty and at a sacrifice. There is no reason to expect any change in this article until our ship-building trade improves, as Pitch Pine from the States has to a great extent displaced it in the English markets.

TAMARAC.—The stock on hand is of Square 332,139 against 376,357 feet last year, and of Flatted 291,227 against 291,359 feet at the same period. Square wood has been in fair request for good large sizes, but small has been difficult of

TRADE AND COMMERCE OF

sale. For Flatted there has been but a limited enquiry; a moderate production next season will be required for export, but it must be large to ensure a remunerating price.

HARDWOODS, OAK AND ELM.—Stocks of both are reduced, being of Oak 1.417.285 against 1.705.799 feet, and of Elm 1.232.214 against 2.232.101 last year. Oak has maintained its price throughout the season, with an improving tone to the market, while Elm has been only in moderate demand, and there seems no encouragement to manufacture.

STAVES.—Stocks on hand have been much reduced; Standard being 425 against 1092 M., and Puncheon 185 against 2251 M. last year. They have been in good demand the whole season, and Puncheon have been much sought after, prices this year will no doubt operate as a stimulus to next years production.

DEALS.—Have been in active demand for both Pine and Spruce all the year with a steadily improving tone to the market, and although preparations for another year's business are upon an extensive scale, there does not seem any danger of the supply being disproportionate to the demand.

FREIGHTS.—Have been dull and depressed the season throughout, with a downward tendency, 28/- to 28/3 for Liverpool and the Clyde were the Spring rates, falling to as low as 22/6; they afterwards rallied in October, and the closing rates may be quoted at 24/- to Liverpool, and 77/8 for Bright Pine Deals to London.

Referring you to the Prices Current and Tables annexed.

We remain, Your obedient servants,

WOOD, PETRY, POITRAS & CO.

TRADE AND COMMERCE OF

Port of Quebec.—Semi-Annual Return of Goods, entered for Consumption with the values thereof, and leaving the Countries from whence imported, during the half-year ending upon the 30th day of June, 1866.

NOTE.—Goods entered for Consumption are those that pay Duty, Ex-Ship and Ex-Warehouse. Importations from Great Britain or elsewhere, viz. the United States—are to be set down as imported from Great Britain or the Country where the Goods were purchased. All Goods purchased in the United States, though the produce of other Countries, are to be considered as imported from the United States.

TRADE AND COMMERCE OF

Port of Quebec.—Semi-Annual Return of Goods, entered for Consumption with the values thereof, and shewing the Countries from whence imported, during the half year ending upon the 31st day of December, 1866.

Note.—Goods entered for Consumption are those that pay *Duty*, *Ex-Ship* and *Ex-Warehouse*. Importations from Great Britain or elsewhere, *viz.* the United States—are to be set down as imported from Great Britain or the Country where the Goods were purchased. All Goods purchased in the United States, *though the produce of other Countries*, are to be considered as imported from the United States.
