Huge Crowds Keenly Interested in All Exhibits-Bursting of Water Main Causes Some Inconvenience — Special Speakers At Directors' Luncheon Today.

With nearly as many people on the grounds at noon today as yesterday at noon, indications were that today's attendance would be at the lowest possible estimate considerably upwares of 20,000 people. With many observers of yesterday's crowds convinced that there were really 60,000 or more who paid admissions at the gates, another big day seems assured, although it is scarcely probable that the attendance figures will equal those of Wednesday. Today's fair visitors appeared to be largely second day visitors, and there were smaller crowds on the Midway, but quite as large throngs in the various department buildings as there were at the same time yesterday.

The McAdoo award in 1919, by which a general increase was given to railwaymen, did not remedy the evil. So an agitation was started some months ago by the Canadian Brotherhood of Railway Employees, along with two ofter organizations, to secure greater increases for the senior clerks. Their purpose was accomplished last July, when a new scale was granted by a board of conciliation. By this award the senior clerks received considerable increases while smaller ones were while smaller ones were increases while smaller ones were increases while smaller ones were smaller to the solution of the specific to the solution of the specific to the solution of the speci

granted to the juniors.

Because the results of their efforts was threatened to be wiped out by the recent American Railway Labor Board award, which was put into effect on the G. T. R., much dissatisfaction was expressed by the officials of the unions. While the increase of 13 cents an hour was being granted to all clerks the award was to be based on the scale prevailing in February, 1919, therefore, all clerks who received increases last July received the 13 cents, less the amounts received at that time. This again raised the junior clerks to almost as high a level as the senior clerks.

Other horses that were in the accident were High Note, Lady Clay, Johnnie Canuck and Nilboy, received a bad bruise on the hip and several scratches about the face, but was able to proceed with the race. When Mr. Hodgins left his farm, which is just a few miles out of Lucan, he had no intention of driving a horse. He is well known throughout all Western Ontario and in many parts of the United States, where he has driven horses for the past fifteen years. Mr. Hodgins, after making a successful tour of many tracks in the United States last summer, sold his horse, and since then he has not been doing much driving. He was considered by all race horse men as a good driver and careful, when horses were bunched up.

# DER POWERS WOULD DEVELOP TO CITY TRADE BETWEEN

Many Important Changes Dr. Charles Gray Here in In-Made by Recent Legislation of Drury Govt.

Several important changes in municipal legislation made by the Drury Government at the last session of the Legislature, are only now becoming known in city hall circles here as the vast amount of other outstanding measures at that time obscured them. These changes will become effective here with the election of next year's council. The board of police commissioners will be required to submit its sioners will be required to submit its estimates for approval of the council where formerly they had a free hand. The counch will have authority to erect war memorials, and to pay for them with debentures without obtaining the consent of the electors, and may also grant aid to patriotic organizations.

Dr. Charles D. Gray, president of the American-Canadian Deep Waterways Association, was in London today to discuss the deep waterways project with prominent men representing a number of the London business organizations. He also took up the matter of developing trade between this city and Fort Erie, Pa., which is his home.

With this object in view, he and members of the chamber of commerce visited Port Stanley in the morning and inspected the harbor facilities there. Dr. Gray was impressed with the agricultural development of the surrounding district, and was confident that a large trade in the products could be developed between Port Stanley and Fort Erie by means of fast boats,

may also grant aid to patriotic organizations.

May Grant Aid.

Power is also given to municipalities to join the Deep Waterways Association, and to grant aid to the organization. Bylaws may be passed prohibiting traffic in more than one direction on certain streets, and safety zones may be established on streets where street cars are operated. Increased fees for weighing market produce are also permitted. License of second-hand dealers may be restricted to one or more classes of goods instead of being of a general nature.

One of the most important changes deals with the qualifications of candidates for municipal offices. It is now required that such a candidate shall be a householder residing in the municipality, or rated on the last revised assessment roll for land held in his be entered on the voters' list and residing in or within two miles of the municipality, and that he is entered on the voters' list as a voter at municipal elections, and is a British subject, twenty-one years of age, and not otherwise disqualified.

He did not view the outlook for the coming winter in an optimistic ma "Canada and the United States "Canada and the United States will freeze this winter because of the coal miners and the coal speculators." he asserted. "That will do more to further deep waterways than anything that could happen. Fulfillment of the scheme will mean the release of 700,000,000 tons of coal and its by-products which are now used by the railroads. It will also take away the job of the professional radical agitator who is opposing the plan for that reason. The majority of labor is in favor of it, but we have not sought the support of Gompers or other labor leaders, because it is not needed."

This point is distinctly brought out in the McLaughlin exhibit. The new Mc-Laughlin Master Six models show many refinements for the comfort and pleas-ure of the motorists that are lacking in the Buick car as built in the United States.

Among these appointments are the handsome new top of black top material; natural wood bows with nickel-plated slat irons; plate glass in rear of top as well as in side curtains; walnut instruwell as in side curtains; walnut instru-ment board, recessed, with locked com-partment for small parcels; tonneau light; deep, rich upholstering with special roll to serve as an arm rest, and many other features shows the thought and study that McLaughlin engineers have put through to build a car worthy of the slogan, "Canada's Standard Car."

UNIVERSITY OPENING NEAR. 1 The hour is now near at hand when the

youth or maiden who has passed the matricula tion test, and desires the higher education to which that admits, will approach the magic gates of Alma Mater. Many young people in this part of Ontario are planning to begin a four-year course in Arts at Western University. Others are perhaps hesitating still about the course and about the university.

Already there has been a considerable en rollment of freshmen at Western, 24 in Arts, 31 in Medicine, a large number for so early in September. The capacity of the old Arts buildings will be somewhat taxed to accommodate the crowd this year. However, several extensions of space have been lately managed. In particular, the library has been removed to a neighboring building, leaving space for more class-rooms in the old place. Some class-rooms have been fitted up also in the library building

It is becoming pretty widely known that Western University laboratories and libraries are now very much up to date. With the Barnett library, the generous provision for students in the London Public Library and the recent accessions of absolutely new books in great numbers to the university main libraries of arts, medicine and public health, Western students have the largest and most modern facilities in the way of books and periodicals. The department of education has been quick to approve the recent expansion of equipment and of the facilty. Honor graduates of Western are fully be! recognized for specialist work, as teachers in the high schools of the province. Citizens of London, even if not enrolled as students, should make themselves more acquainted with the university laboratories and with its extensive files of learned periodicals along all sorts of lines, economics, sociology, language and literature, the sciences, philosophy, history, etc.

There should be an especially bumper enrollment for the coming year of London people of both sexes. The city council has dealt with the university in most liberal fashion, voting the unprecedented sum of \$55,000 for the university's budget this year, besides the \$100.000 contributed to the new medical buildings. London parents will doubtless consider that in sending their sons and daughters to the home uniwell as consulting the children's best interests. THE SHADOW OVER ENGLAND.

The failure of negotiations between the British Government and the coal miners to head off a strike of miners brings the United Kingdom very close to a grave industrial and social struggle. The miners have balloted by a large majority to tie up the coal pits, and as the transport workers and railway men have voted to support the miners, there is little chance of escaping a bitter contest. The only way a clash can be avoided is for one side to give in, and there is not the slightest indication at the present moment that either Government or men are prepared to even make concessions, much less to surrender. On top of this, too, the great Trades Congress sitting at Portsmouth, has come out with the declaration that the miners' de-

THE GENERAL BENEFIT OF THRIFT.

There is no truer thrift than that evidenced by life insurance. Today life insurance is very popular. It taxes the capacity of some of the largest companies to carry the insurance offered. Professor Cole of Harvard writes as follows of insurance premiums as capital:

"If your money has gone into life insurance, a large part of it (all that has not yet been needed for the payment of death claims, policy-holders and the necessary expenses), has gone into a reserve fund, which is growing ready for the various payments to policy-holders. That fund has been invested by insurance companies as an important part of the capital of railroads, public service plants, government enterprises like the building of roads, public buildings, farm loans, dwelling house loans and so forth. The people who borrow the money pay interest to the insur-ance companies, and this interest makes the reserve larger. So the insurance premiums that you have to pay are very much smalle than would be necessary if your money were not earning interest. A part of the capital of railroads, manufacturing establishments and municipalities that are making it possible for us to have as many comforts and conveniences as we now get, is your capital, and you as being paid for the use of it, because with the aid of labor it produces more wealth. a large part of the railroads, the telephones the telegraphs and the other public enterprises that add to the comforts and interests of life, are actually owned by you and others who have furnished insurance money."

It might be set forth as a tenable thesis that no great orator has ever lacked some appreciation of nature. The greatest effect which the younger Pitt ever made in the Commons was he brought the rays of the rising sun into the peroration of a great speech. [Brockville Recorder.] Canada's gold situation has caused anxiety in ome quarters for the past year, and much has been said and written of it, but usually the conclusion reached is that, while it is not satisfactory, most of the countries of the world are in a worse position. The Teller, published by the Sterling Bank of Can ada, says that in December, 1913, the gold held by the government and the banks of Canada amounted to about \$142,000,000. At the end of 1919 it had increased by \$50,000,000. With a population of less than 10,000,000, or about one-half of one per cent of the population of the world, Canada holds approxi-

One of the finest apiaries in Western Ontario is that of Samuel Moore near Bayfield. Here the yearly output of honey is reckoned by the ton and the working bees by the million. According to Mr. Moore, beekeeping is a most profitable as well as intensely interesting business. THE CIRCUS DOG. Part III. Monty Meets Mr. Billy Goat.

Our friend the clown had no trouble in getting Monty away with him. They traveled by train to another circus, where the clown, whose name was Mr. Bangs, was going to work. With careful care Monty soon became well again and thanks to Mr. Bangs, his broken bones mended up without making the little dog a cripple.

soft step sounded right inside, and a strange scent came to Monty. He peeped out and discovered a funny-looking whiskered object just in the act of grabbing up a linen collar. At first Monty thought it was a little old man, but when he recognized Mr. Billie Goat, the circus goat that had arrived just a few days before, he jumped forward. What a run the thief gave him, but the little dog was out of the tent and after him as soon as he was sure who it was. They ran out into a field, and here Mr. Goat came to an abrupt stop. The first thing Monty If now you find the sleeve pattern too long for your arm, do not just turn it up at the bottom. but take two folds across the pattern, one between the top and the elbow, and the other between the elbow and the wrist. These folds must be exactly the same depth, because the elbow is the most important part of the fitted sleeves, and if any alteration is made, the relation of the elbow to each part must be equally altered. One tuck below and one tuck the same size above, will keep the proportion right. The elbow of the pattern must fit exactly over the elbow of the pattern must fit exactly over the elbow of the arm. If the too of the sleeve is too high for your shoulder, do not cut the curved top lower, but place a tuck across the narrew part of the top of the sleeve, and one inch to the back; the change in the form of the sleeve will be at once apparent.

If instead of being too long, you find that the pattern is too short for you, cut across about half-way above the elbow the colors are accounted as the pattern is too short for you, cut across about half-way above the elbow the colors across a pattern to both to both to both to back; the change in the form of the across about half-way above the elbow the colors are discovered that somehow all the little dog a cripple.

freshly-extracted honey complete the picture. The basswood honey mostly got from basswood and thistle flowers, is the whitest and clearest honey, and therefore commands the biggest market. Clover honey, gathered when the clover and milkweed are in bloom, is perhaps the general favorite, and has the most delightful flavor. The poorer grade of honey comes later, and is known as buckwheat, although the bees get a large number of their sweet loads from the goldenrod at this time.

A bee hunt is one of the most fascinating of sports, thinks Mr. Moore, who began his interest in bees while a boy, hunting them in the woods. ### TY SHOULD HAVE BEEN WITH FAMILY YESTERDAY, BUT-

During twelve years of baseball Ty Cobb has refused to play exhibition games with minor league clubs. To the members of the team who know Cobb intimately, it is not put down to inflation of the head, but to an established rule of the gragtest player of all rule of the greatest player of all time, even when he had not been granted that title by the experts of the game.

A lot of the fans will wonder why Cobb should have broken his rule this time, but a member of the Tiger team let out the secret the Figer team let out the secret last night at a little dinner given Cobb by Mac Fergusson at the London Club after the game.
Cobb, it appears, had been looking for this day off for some time. His family of three had all been elected for a trip to the surgeons for a general attack on adenoids and tonsils. President Maines, so this player said, went into the dressing-rooms after the game with the New York Yanks on Tuesday, and spent an hour with Cobb. The most the perspiring M-O prexy could say he knew was that Cobb would let him brow that night at 9 o'clock.

brow that night at 9 o'clock.
Cobb had been persuaded to let
the boy put his traveling kit with
the rest of the players.
Nine o'clock—No Cobb. Ten o'clock-Still no Detroit's as still.

Eleven o'clock—Quieter, but still no Cobb.

Mr. Maines was taking a train for London at 11:15, and was just leaving the hotel when Cobb arsized and said he would come.

And he did.

Incidentally Tyrus, in a soft Southern drawl, just before he departed, intimated that the London eague team he had seen in a long

rived and said he would come.

# Picked Doubles Tourney On Saturday To End Thistles Play

Trundlers With Lots of Amusement.

As a climax to the carnival week of bowling which has afforded so much amusement to both players and spec-tators, the Thistle Club will hold a picked doubles tournament next Saturday, September 18, as announced a week ago. Four 15-end games will be played, starting at 2 p.m. Supper will be served on the grounds. This will be the closing event for the season on the Thistie greens, and every bowler out of the city as well, as local will be

### Brantford Junior O. B. A. Nine Idle As Result of T.A.B.A. Stand

BRANTFORD Sept. 15.-The industrial boys' club officials are somewhat aggravated over the junior baseball situation as it stands today. Brantford. with Kitchener and Hamilton, whose teams they met in the semi-finals, had to have its league series over by August 16 to enable the semi-finals to be played. This was an O. B. A. ruling, presumably applicable to all leagues ing, presumably applicable to all leagues operating under the O. B. A. A. The Toronto Amateur B. A., however, defied this ruling, and were not to have their winners decided until Saturday last, when the final game of their league was scheduled, this also being the deciding game. It rained on Saturday, however, and the game had to be postponed. The refusal of the Toronto team to play Wednesday further postpones the final game, and the postpones the final game, and the Brantford team has not had a game in over two weeks, which the officials claim is unfair.

Hughie Jennings, freckled as ever, and with a few croaking "We-ahs" still in his aged frame, Ty Cobb and the rest of the clipped-clawed Jungle pack along. spent the afternoon yesterday in the "sticks" over at the west-end ball yard in company with the local doughty Tribesmen, winners of the Mint League championship. In the ninth the minor champs went at it in the spirit that the worst that could be done for one day had been done to them. Joe Briger took a fatherly look at Ehmke and picked on an ordinary double and. Cobb-like, outthought Veach and stretched it into three bags. Crichlow lifted a high fly to right and Joe started for home. The throw was a bit wide and a bound, so Joe slid under the bound, while Ainsmith took the bound and made a dive for the spot Joe ought to have been but wasn't. Pittenger doubled to right, but Dowling hit right at Young, who doubled up on Pitt, who thoughtlessly left second.

Committee Approved.

In presenting the resolution and announcing the committee's recommendation that it be concurred in. Chairman Aitcheson said that the committee had been impelled to its action by the fact that at Hamilton last year many unions in that city and in adjacent places had rushed in their full quota as delegates for the day the elections were held, although they had not been in attendance for the other business of the session, and delegates from the Hamilton locals denied that this had influenced their action.

Two amendments looking to an increase of the representation beyond that allowed in the resolution were under consideration when the adjournment was taken.

Several items in the report of the Secretary of the West was read from Joseph Sexton, secretary of the Nova Scotia Council, stating that owing to the lack of co-operation of labor in Nova Scotia no report had been agreed upon. The text of the telegram was as follows:

"Regret that it was impossible to send report of Nova Scotia Federation in time for publication prior to convention. Can only say that due to apathy on the part of members and disinterestedness of officials and lack of support of labor unions in the province the federation lacked the support necessary for success. However, efforts are being made toward reorganization of federation so that it may fulfult the duties and benefits possible."

The delayed printed copies of the Toronto Trades and Labor Council resolutions were distributed.

should not be concurred in.

Peter Leckie of Ottawa objected to
the deletion of the resolution.

Delegate Burton of Hamilton entered
a vigorous protest, against making the
suggested change in the constitution,
and hinted at an ulterior motive on
the part of those proposing it, as it
was known that the present incumbent of the office, P. M. Draper, could
not undertake to devote his entire time
to the work. He had no objections
to making the change provided the
work was not already being well done
or if such action would result in increased efficiency, but intimated that
he knew of no complaints against the
present holder of the office on this
score.

Delegate Bowen of Ottawa objected
to the recommendation of the committee, but made it plain that there was
no intention to reflect on Mr. Draper,
and expressed the hope that Mr.
Draper would see his way clear to devote his whole time to the work of
the congress.

Cannot Serve Two Masters.

Delegate Pihe, Victoria, B.C., opposed the recommendation of the committee, stating that it was the feeling in the West that no man could serve two masters, and they opposed the office being held by a man who was an employee of the Government.

Delegate John Kennedy of Toronto alleged ulterior motives on the part of those who desired the change made in the constitution, and strenuously

that Government employees could not be loyal union men.

Thin Edge of Red Wedge.

Delegate Henry Barrett of London declared the resolution was nothing more or less than the thin edge of the One Big Union wedge.

Delegate J. W. Wilkinson favored the deletion of the resolution. Delegate George Burnette, Montreal, supported the committee and took exception to the statement of Mr. Pihe that a public servant could not loyally serve labor as well.

A resolution from the Victoria District Trades Council recommending that any person holding a salaried appointment in the gift of the crown should not be eligible for any position to the congress met a similar fate.

mended be not concurred in, and which Henry Barrett of London characterized as the "thin edge of the One Big Union," was deleted from the report on the motion of Mr. Barrett.

Peter Leckie, speaking in support of the resolution, declared they had a strike in Ottawa without permission and whether Local 200 got permission or not, they would strike while the iron was hot. Living costs had gone up 110 per cent and wages had not. If everybody was like him they would keep on striking until wages did.

At the conclusion of Mr. Leckie's remarks, Mr. MacBride, M. P. P., mayor of Brantford, took the floor to remark: "Now that we have heard from the delegate an expression of his great intellect and balance I would move that the motion be put."

The motion was not put, however, until Delegate Ernest Robinson of Winnipeg and Delegate Roper of Edmonton had explained that it was the toleration of such expression of opinion as that advanced by Mr. Leckie that had eventually led to the secession movement in the West and disrupted the ranks of labor.

Opening the debate at the morning's session on the clause of political action.

Delegate Morgan of Toronto declared

Use Coccoanut Oil

For Washing Hair

If you want to keep your hair in good condition, be careful what you wash it with.

Don't use prepared shampoos or anything else, that contains too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just plain mulsified cocoanut oil (which is pure and entirely greaseless), is much better than anything else you can use for shampooing, as this can't possibly injure the hair.

Simply moisten your hair with water and rubit in. One or two teaspoonfuls will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily, and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get mulsified cocoanut oil at most any drug store. It is ve

that if the congress went into politics it would be a house divided against itself. He thought that there was room enough for both the Independent Labor party and the Trades and Labor Congress of Canada.

The report of the committee was concurred in. A clause in the report of the executive council regarding destructive propaganda, in which reference was made to the activities of the One Big Union, was expected to raise a storm in some quarters, but carried without a single protestation.

"Passing the Buck."

Clauses in the report referring to contributions to campaign funds to support political parties, naturalization of alien immigrants, and action of the Federal Government in referring the eighthour and 44-hour week to the provincial governments were next presented by Delegate W. J. Wilkinson of Vancouver, in which the opinion was expressed that the Government had engaged in the popular pastime of "passing the buck."

Arrests Follow Investigation Into Attempt To Lynch McNeal.

All But One Native-Born English-Speaking Residents of Town.

ST. CATHARINES, Sept. 15.—Thirteen persons were arrested today in connection with the riot at Thorold in August, when an attempt was made to lynch David McNeal just after he had been committed for trial on a charge of having murdered Margaret Boucock, the four-year-old child whose body was found in an unfrequented spot some distance from the town of Thorold several weeks after she had been missing from her home.

During the riot an attempt to destroy the town hall by fire was deliberately made by a crowd of men with a view to compelling the authorities to give McNeal up to speedy and illegal execution, and the hall was considerably damaged. McNeal appealed to the mob, declared that he was innocent of the murder and so worked on their feelings that they desisted from their mad course and left his unharmed.

HE nation-wide friendship for the Gray-Dort cannot be based on price alone, for there are cars selling at lower prices.

Evidently motor car buyers have determined for themselves that the value and thrift of the Gray-Dort are very unusual.

In less than five years the Gray-Dort has outstripped, in demand and production, a dozen cars which have been on the Canadian market longer. It is now one of the four largest-selling cars in Canada.

### Gray=Dort Popular In Rural Districts

"The reason the Gray-Dort has taken such a strong hold of the rural districts is because the farmer is, as a rule, a shrewd, careful buyer, who knows what he wants," says William Gray, vice-president of Gray-Dort Motors, Limited.

"He is in the market for a good ma-chine, both for practical service and for his family's pleasure, and he knows how

"Since his car is largely a utility vehicle, he places more weight on factors which have a direct bearing on the business value of the car. This is where certain characteristics of the Gray-Dort take on added importance.

"The farmer cannot wait upon roads and weather. He demands a car which, like the Gray-Dort, has proven its ability to negotiate satisfactorily unfavorable road conditions in every kind of weather and temperature.

"In accomplishing this, the light weight of the Gray-Dort is a decided advantage. It is well known that in soft earth, mud and sand, and even snow, the light car has a marked advantage over its heavier brother. The Gray-Dort can pull out of places where a heavy car with abundant power will simply spin its wheels.

"And with regard to power, it is absolutely essential that the farmer have a car with ample power in proportion to the weight to be moved. Here again the wonderful ability and exceptional power of the Gray-Dortengine makes it specially suitable for this class of work.

"Finally, the farmer demands economy of operation and freedom from repairs. He judges the value of his car more from the maintenance cost than the first price. And, judged from this standpoint, the Gray-Dort has always proved heaping value—due to its remarkably low upkeep cost."

It is natural that the argument about selling in foreign markets and buying in protected markets should be most strongly urged in Western Canada, where grain is grown for export. But the conditions of agriculture are changing very rapidly in Western Canada. Not so many years ago wheat was the principal source of farm revenue in Ontario. What is the case now? Figures for the year 1917 show that wheat constituted 5 per cent of the total value of the farm produce of Ontario.

Roughly speaking, a new country starts growing wheat and gradually develops into mixed farming, and the progress of the Prairie Provinces away from the wheat growing stage to the mixed farming stage has already reached extensive proportions.

The increase in farm live stock be tween 1911 and 1916 in the Prairie Provinces is set forth in Table 18. page 195 of the Canada Year Book.

### Said To Be Selling Milk At Less Than Cost.

New York, Sept. 16.-The Dairymen's League announced last night that its lirectors and county president, at meetings in Utica, adopted unusual means to meet the serious situation which has arisen as a result of the depression of the milk market and the strong probability that dairymen may have difficulty in marketing their product after October 1. After long discussion the league officials voted to recommend to the 85,000 members that the proceeds

from every member's milk be pooled.

The league considers this the most important action ever undertaken by its officials. If the recommendation is carried out it will mean that there will be no more milk wars, the consumers will be supplied with a regular uninterrupted flow of milk, and the farmers will be sure of a market. The pooling plan provides for the payment by the buyer of milk direct to the Dairymen's Co-operative Association, the proceeds to be pooled and every dairyman to receive his equal share.

At the Utica meetings the league also voted to sell milk for October for not less than \$3.85 a hundred pounds, with the usual freight and butter-fat differentials. This is something like 21 cents a hundred pounds under the cost of production, as figured by Dr. G. F. Warren of the New York State College of Agriculture.

The farmers are faced with a serious from every member's milk be pooled.

Agriculture.

The farmers are faced with a serious situation after October 1, which may force many of them to disperse their dairy heris. The New York Milk Dealers' conference has served notice on the league that after the present contracts expire on September 30, the manufacturing dealers will not be in the market to buy any more milk until such time as market conditions for manufactured milk products improve. The reason given by the dealers is that there is little or no market for manufactured dairy products, especially for condensed milk, evaporated milk and milk powder.

In many markets dealers report there

many markets dealers report there is little buying of dairy products, and that everyone seems to be waiting for lower prices.

### Fined \$12,000 For Profiteering

Clothier Pleads Guilty to the Charges Laid by Special Investigators.

Buffalo, Sept. 16.-After entering a plea of guilty on ten counts to profiteering in men's clothing, the Sultzbach Clothing Company, sperating the store known as "Georges," in Ellicott Square, was fined \$12,000 in federal court by Judge John R. Hazel. The indictment, on more than sixty counts, was found against the company, following a campaign by a special flying squadron of investigators sent here by the department of justice.

George F. Sultzbach of New York, president of the company, was in court and entered the plea. In an interview

and entered the plea. In an interview he said:

"If we keep on as we have been the lawyers will have the store and everything else."

In pronouncing judgment, Judge Hazel said he felt justified in bestowing a wholesome punishment, saying he felt that the firm "had been greedly and avariciously taking excess charges from the public."

The plea of guilty was entered for ten counts. In presenting the case, Mr. Sherman said he was willing to dismiss the other counts on that plea, as he considered these ten the strongest the

The maximum penalty provided for by law is a fine of \$5,000 on each count, making a possible fine in this case of \$50,000.

### RECORD TOBACCO CROP, SAY REVENUE OFFICERS

Expect to Issue 4,500 Licenses Before Crop Is Harvested.

Windsor, Sept. 16 .- That the tobacco crop of Essex and Kent counties this year will create a record, was declared tonight by officials of the Government inland revenue department, Walkerville, which has jurisdiction over the two

This estimate is borne out by the number of licenses issued to growers this year, the aggregate already reaching over 3 500. while total for all last year was but 3,657. It is expected 4,500 licenses will be issued before the crop

While the quantity of the weed will assume larger proportions in the two counties this year, it will not approach the same standard of quality, however, as that of last year, owing to unfavorable weather conditions of too much rain, with a lack of warm and continued high temperatures.

### A FAMILY FAILING.

A FAMILY FAILING.

OWEN SOUND, Sept. 15.—This afternoon at Hepworth Mrs. William Currie was fined \$500 on a charge of selling whiskey. Last week her, husband, a farmer of Amabel Township, was fined \$1,000 in the Owen Sound police court. Some time ago a brother, Joseph Currie, was fined for a breach of the O. T. A. in Wiarton. In the evidence to prove Mrs. Currie's share in the family failing, two young men testified they bought bottles of home brew from her at \$4 a bottle. The fine was promptly paid, as was her husband's last week.

LIGHTNING CAUSES HEAVY LOSS. Owen Sound, Sept. 16.—Two large barns, each 40 by 70 feet, containing seventy-five loads of hay and 45 loads of grain, owned by Benjamin Elder of Elsinore, were completely destroyed in a fire started by a lightning bolt during a heavy electrical storm last night. The stock was all taken out safely. The loss is practically covered by insurance.

RESIGNS CUSTOMS OFFICER'S JOB. Windsor, Sept. 16.—Robert H. Harrison, first president of the Border Great War Veterans' Association, vice-president of the Provincial G. W. V. A., and one of the original founders of that organization of returned men in Canada, today turned in his resignation as a special customs officer in charge of inspection of trains entering Canada from the United States, at this point on the border. He will leave at the end of the month, to engage in the wholesale heavy hardware business in Toronto.

Newton Harvey, professor of physiology, Princeton University, "a most extraordinary kind of lamp which is able to make its oil from the products of its own combustion." Speaking before the American Philosophical Society, he described the chemistry of the production of light by the firefly. Without going into technical details, it may be said that this light is due to the burning or oxidation of a substance called luciferin in the presence of an enzyme or catalyst called luciferase. As in other methods of burning, oxygen is necessary; unlike other methods, water is essential, and no carbon dioxide or heat is produced. When the luciferin is oxidized, producing light, it turns to oxyluciferin and water. ### IMPERSONATED POLICE AND SECURED WHISKEY

His Alleged Accomplices. BRANTFORD, Sept. 15. - County Constable Fred Kerr arrested George Him, an Indian, today on a charge of impersonating a police officer and stealing liquor to the value of \$875

Him, it is alleged, with two others called at the Vanduzen place Sunday night and stated that they represented the license department, and asked to make an inspection of the liquor said to be on the premises. The trio then seized the whiskey, loaded it up and got off. In the police court this morning, to permit the police to arrest the other two men implicated, an adjournment of a week was made. The liquor has not been recovered.

## **Are Your Funds Waiting Investment?**

Close to \$1,000,000,000 is now being distributed from coast to coast in connection with our crops. This will shortly result in a freer circulation of funds throughout Canada's industrial, mercantile and financial world.

Our foreign trade is running 25% over the previous year. Our domestic trade, as shown by bank clearings, is over 28% above the previous year, and bank deposits are over \$150,000,000 than the record year ending June, 1919.

At this time, during the past few years, Canadians have had an opportunity, through great public loans, of purchasing Victory Bonds, and over one million Canadians evidenced their approval of Canada's Premier Security by purchasing in the aggregate over \$2,000,000,000 worth.

Beyond doubt Canadians are financially able to make further substantial investment records. We cannot conceive of any better form of investment for the large funds now accumulated than Victory Bonds, which undoubtedly will be bought up freely.

NOW IS NO TIME FOR IDLE FUNDS

The new prices for Victory Bonds make them the greatest investment bargain in Canada. There will be no public loan this year. The present supply is not large. Do not let your funds lie idle and "rust." If you have funds available we cannot too strongly recommend that you purchase Victory Bonds to the limit.

Your orders will receive our best attention.

Engineers' Convention Urged **British Unions To Irish** Action.

PITTSBURG, Pa., Sept. 15.—A big British flag draped on the wall above the platform in the hotel where were assembled the delegates to the con-vention of the International Union of Steam and Operating Engineers here today caused the suspension of business until it was replaced by the United States colors until it was replaced by the United States colors.
Several delegates protested against the presence of the flag, because no United States flag of equal size was in sight, and when the flag was not immediately taken down they marched from the room and remained away until the hotel management had obtained a new United States flag and draped it above the platform.

new United States flag and draped it above the platform.

No objection was taken by the delegates to the British flag, which was moved to a less conspicuous part of the room. The convention passed a resolution urging the British trades unions to demand the withdrawal of British troops from Ireland, indorsing Irish "freedom," and urging the release of Lord Mayor MacSwiney from Brixton Prison.

Kerr Frascr, pastor of Knox Presbyterian Church, Mr. McCulloch in a brief address, in which he reviewed the family history, presented the home to the hospital trust.

Lieutenant-Governor Clarke, an old friend of the McCulloch family, paid a splendid tribute to the late Hugh McCulloch, a pioneer of industry in Ontario, and the service he rendered to the country of his adoption, and congratulated the donors of the memorial which they chose to honor their father, thus setting an example to others, which if followed would be for the public welfare. His honor then declared the nurses' home open.

Mayor A. W. Mercer briefly expressed the appreciation of the citizens at the generosity of the donors. The party then proceeded to inspect the building.

To give citizens the opportunity of inspecting it, the home will be open to the public Thursday afternoon, after which time it will be occupied by the nursing staff of the hospital.

PRICE AT WOODSTOCK WOODSTOCK, Sept. 15 .- Commenc-WOODSTOCK, Sept. 15.—Commencing tomorrow morning the price of milk will go up 1 cent, and will be 13 cents a quart. The Woodstock Dairy Company made this announcement today. Cream will sell at 20 cents a half pint, whipping cream at 25 cents a half pint, and buttermilk at 6 cents. The cost of bottles is given as the principal reason for the advance in the price of the milk. As the stockholders in this company are milk producers in this company are milk producers themselves, it does not appear that the winter price of milk has anything to do with the advance in the prices to the consumers.

CANNIBAL CAPERS, OR A NEW 'he solut . of the high cost of dying solved at last. Let the cannibal savages of the New Guinea Islands boil you alive in oil and preserve your skull as a monument to what a good meal you provided. Of course, you wouldn't like

to be the party of the first part at one of these horrible feasts, but how would you like to be a spectator to would you like to be a spectator to this and all sorts of other hairraising, thrilling adventures on the wickedest, blackest spot on earth.

"Shipwrecked Among the Cannibals," that unexpected and unusual film, which is drawing everyone in London and all the visitors to the Western Fair to see it at the Majestic this week, reads like a tale from one of Stevenson's stories of the South Seas. You are carried far away into the wilds of the South Sea Islands, and with these two daring cameramen live for fourteen months ing cameramen live for fourteen months among those savage people, who are nothing more or less than untamed tigers. You'll remember this picture long after you have seen it, and never cease to marvel at the daring of those men, who had the courage to face death a thousand and one times in search of pictures to complete this splendid record of adventures, life and splendid record of adventures, life and customs of the one people in the world who might be called the missing links. Special school children's matinee daily, and the boards of education of Toronto and Ontario have urged that every man, woman and child should feel it their duty to see this, a picure which we most likely will never see the like again, and certainly have never seen anything to equal it be-

STRONGER AND STRONGER GROWS
THE ENTHUSIASM FOR ALLEN'S
SPLENDID FILM ATTRACTION. As the crowds increase stronger and stronger becomes the enthusiasm for the exceptional photoplay attraction, which the Allen is showing this week. Seldom do we see such beauty, both in settings and costumes and feminine Seldom do we see such beauty, both in settings and costumes and feminine grace as is in "On With the Dance," in which that dazzling jewel of the Zeigfeld Follies, Mae Murray, shines supreme for her artistry and wonderful charm of face and form. It is the marvellous beauty of the production as a whole, the exceptional strength and interest of the story, which holds you so enthralled from beginning to end. The great scenes of New, York's Gay White Way, the thrilling, tense moments of the crowded cabaret Montmarte, and the gorgeous peacock room in which the masked dancer defles convention and curiosity every evening at eleven. These are a few of the big moments of the production, but throughout it is one of unswerving merit, making you forget for an hour or so your own every-day life, and taking you to enjoy the pleasures of the sensation-seeking, dance-mad throngs, which make the cabarets and roof gardens of New York famous. You miss an epic in photoplay production if you fall to see "On With the Dance," while it is showing at London's most popular theatre this week.

Then there is that special Sunshine comedy "Jazz Bandits," with the-always interesting Allen News, and special music by the celebrated Allen concert orchestra, and that \$25,000 organ, of which you hear so many talking. Continuous performance daily, with a special children's matinee at

secretary, Rev. Clarence Foreman, of London, and treasurer, Rev. L. Diehl of Port Burwell.

It was resolved by the alumni to celebrate in a fitting manner the diamond jubilee of Huron College, and to pay off the indebtedness by raising funds through private subscriptions. Another resolution was passed to the effect that a memorial be erected in Huron College to the graduates who were killed overseas and also to those who served in the world war.

AT LOEW'S.

AT LOEW'S.

William Farnum, great actor that he is, and a man whose friends demand much of his time, never forgets that the body must be exercised as well as the brain. And the exercise in which he most delights is farming. Even while he was making scenes for the stupendous William Fox special production "If I Were King," from the famous book and play by Justin Huntly McCarthy—in which he is to open at Loew's Theatre today—he found both mental and physical enjoyment digging in his garden at Sag Harbor, Long Island.

In this big garden, early in the morning or during the late evening, he often got behind the plow, preparing the ground for his potato patch, which he knew would help him give the High Cost of Living a solar plexus blow next winter. He worked until he was dripping with perspiration. A cool bath followed; and if it were morning, he felt he could work through the day in comfort. So keen is Mr. Farnum about his farm that it is said to be one of the finest and one of the most productive of its kind on all Long Island. In "If I Were King," Mr. Farnum plays the part of that delightfully romantic character, Francois Villon.

A rattlingly funny comic, Loew's Screen Pictorial, and a new bill of Loew's Supreme Vaudeville completes the program for the last three days.

2. Miss L. B. Gregory, Ilderton. Members of the Central Veterans' Council are intent on having a juvenile court established in London. Their latest move has been to approach the mayor and the provincial authorities AT WESTERN FAIR to ask them to lend aid in securing what the veterans claim is a necessity

The Western Ontario Regiment Pipe Band made its frst public appearance when it appeared in front of the grand stand at the Western Fair on Wednesday night. Eighteen members turned out for parade. It is expected that 25 bandsmen will be available today. According to the men, the great reception they got from the thousands who packed the stands was a pleasing one. here.

The council wanted to have one day of the Fair set aside as Veterans' Day, believing that it would result in many out-of-town returned men making the trip to the exhibition. However, they claim nothing has been done so far towards making their wish a reality, the Fair board having filed their recommendation.

the city police force has handed in his resignation.

After having given five years of service he has decided to go into the truck business. P. C. McCaughey was well liked by his fellow-officers, and was a hard worker at all times.

To his credit he has the arrest of three auto thieves during his comparatively short stay on the force. His work at the time when rum running from Montreal to Windsor was common was exceptional. In the report of almost every big raid his name was to be found. One night, in company with another policeman, he was successful in apprehending men with an auto line apprehending men with an autofulled with bottles of liquor, which they were taking to Windsor.

General regret at his leaving was expressed by those employed at the Carling policeman," one of the older members remarked.
