THE STAR.

Intemperance.

How long, oh Holy Father, Shall this dark presence dwell In our fair land, its victims. The host of ruin swell? We weep; our tears avail not. And willing arms are weak; They stretch to rescue vainly, And vainly still they seek.

To vanquish the dread monster, O must the countless tears, The strivings, weak but earnest, Be lost and must the years Still bear to the dark future The demon's countless throng Of hapless writhing victims Before our gaze? How long?

Shall prayer be unavailing; Forever is thy ear Grown heavy, that the wailings Of grief thou dost not hear? Is thine eye dim; does anguish Attract no more thy sight: Are the abodes of misery Unseen, thine arm of might-

Has it grown weak? Oh Father, As thou art changeless, save Our country's sons: oh conquer Intemperance! the brave But wearied, strengthen; hasten In thine own time, the day When prayers shall yield to praises, And tears be wiped away.

Oh weary ones take courage, Your strivings are not vain, Nor are your prayers unheeded They shall not come again Unto you void; take courage; Deliverance will come, Through him gird on your armour. And chase the demon home.

It was a strange route she had chosen for her walk, for it led to Rose Hill Cemetery, which she entered.

It was late in the afternoon, and the cemetery was strangely quiet; and deserted.

There was no one there to watch her movements, and pry into her grief. Perhaps this was why she had chosen this hour of the day to visit it. She did not seek the graves of her parents, for she hardly glanced that way, side a grave upon whose marble slab was engraved these words:

a home of his own-just married -and just returned to his native counother.

After seven long years of exile in various parts of the world, Russel was home again-bearded, brown, and wealthy.

He was seated in one of the soft crimson-velvet easy chairs, looking dreamily out of his study window at the gathering twilight.

He was thinking of the shy, pretty girl of sixteen he had left seven years ago, with a betrothal ring upon her finger; still another vision of her, as a matured, lovely woman of twenty-three, and how she had remained true to him all these years. fore.

There was a soft, tender expression in his eyes, and a happy smile just vlsible beneath his heavy dark moustache.

He went on with his dreaming, watch, ing the young moon rise, and the stars come out one by one.

The window was open, and he could hear the sound of water splashing in the marble basin, and the few last chirips of some bird in its nest.

So busy was he with his thoughts, that he did not hear the door open, or a light tread, until something white stood by his side.

He looked up and saw Adelaide, the moon shining in upon her fair face and white muslin dress.

You look like an angel, Adie, dear, he said. Come sit on my lap, and let us talk awhile.

It must be remembered that their honeymoon was scarcely over, and that Russel had been cheated out of all those years of courting; he was terribly in love with his young wife, and acted the perfect lover.

Adelaide Wilde accepted her husband's invitation, and seating herself, began to toy with his thick chestnut hair. she lifted the ringlets from the broad white forehead that contrasted so strongly with his sun-browned cheeks.

He told her of his travels, and how he had spent the time of their dreary separation.
