The Century of their Manufacture to Be  
Duly Celebrated

TERRYVILLE, Conn., Nov. 5.—Preparations are being made in this vicinity to celebrate the centennial of American clock-making in 1835, and at the same time fittingly to honor the man who, in beginning the great industry, founded the village that bears his name.

Mr. Terry, as is well known, was the first man to manufacture clocks in the United States. He was born in Terryville, Conn., in 1785. He was a pioneer in the clock-making industry and his work has been a source of pride to the community.

He died in 1855 after he and his sons had established several manufacturing concerns in Terryville. He was a man of great industry and his work has been a source of pride to the community.

MR. OSER WILL BE INVITED

The Aggressive Financier Will Be Asked  
to Be a Majority Candidate

The name of Mr. E. Osier was yesterday freshly mentioned in prominent circles as a candidate for the mayoralty. A strong and long requisition will be presented to him in her glass, for which she died. Yesterday, Mayor Clarke will not run. For it is likely that Mr. Fleming would care to face the music. It would come down to a race between Mr. Osier and Mr. Clarke.

Mr. Osier is a wealthy citizen, a stockbroker, a large owner of city property, a director of the C.P.E. of the Dominion Bank and other institutions and a man with unlimited capacity for business. He is remarkably hard-headed and clear-headed and knows how to put his feet down firmly. If he consents to run it will be under strong pressure and becoming a candidate to be a public duty; it is stated that he is not of any kind. He is the kind of man, however, that he does go into the fight he will go in with vim and vigor and will be depended on to administer the trust with vigor and prudence.

POISONER IN THE TOLL

London Police Believe They Have  
Caught a Murderer

LONDON, Nov. 5.—The police are of opinion that they have at last in their custody the mysterious murderer of Ellen Doudworth who had come to be known as the Lambeth poisoner from the locality in which his operations were confined.

Some weeks ago Ellen met the poisoner in the street. He asked her to have a drink and she accompanied him to a public house. There, in the presence of a waiter, he administered to her a small quantity of a poisonous substance. A few days ago a woman named Annie Bowden was similarly accosted by William Foster, a jeweler, doing business in Clerkenwell in the north of London.

On her accompanying him to a public house Slater produced a packet containing a letter telling her that it contained poison asked her if she would have some, at the same time holding it over the glass from which she was drinking. Frightened, the woman called a policeman and Slater was arrested. A large quantity of morphia and cyanide of potassium were found. On his being arraigned several Lambeth women who had seen the man who poisoned Ellen Doudworth while in her company identified Slater as the same person. Although he bears an excellent reputation he was charged with murder and remanded without bail.
