The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the lest page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une teile empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, seion le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents.

Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

## INTRODUCTION.

All the leading tables have been retained in this, the third issue of the Statistical Abstract, and have been revised, in some cases enlarged, and brought down to the close of either the financial or calendar year, as the case may be, while, on some matters, information has been given up to the end of May, 1888. A number of new tables have also been added throughout the book, more particularly in the Preliminary Remarks and in Chaps. I, II, III, IV, VII and VIII.

An entirely new chapter on Mineral Statistics has been added, which will be found to contain information of much value, hitherto not available to the public.

The full text of the proposed Fishery Treaty is given in Chap. IX, but owing to the returns of the Fishery Department not naving been made up at date of going to press, the figures relating to the fisheries for 1887 are necessarily meagre and incomplete.

As it was found impossible to obtain all the Provincial Reports on Education in time for an early issue of this work, the chapter on Education has been omitted, and will be inserted again, brought down to a common date, in future issues.

Some misapprehension respecting the tariff, as published in last year's issue, having been found to exist, the appendix

to the present number contains a complete tariff, revised to the 31st May, 1888, together with a list of decisions made by the Board of Customs down to the same date.

Official publications have, in all cases, been used when available, and where information has been taken from other works, only the most trustworthy have been used, and in all cases duly acknowledged.

The greatest care has been taken to have all statements and figures absolutely correct, but as liability to error always exists, it is requested, as in former years, that if any errors are detected, they may be reported to this office.

DEPARTMENT OF AGRICULTURE, Ottawa, 23rd June, 1888.

### ADDENDA.

#### MINISTERIAL CHANGES.

Page 48. The Hon. Thomas White, Minister of the Interior and Superintendent General of Indian Affairs, died on the 21st April, 1888. The offices have not yet (28rd June, 1888) been filled.

The Hon. Sir Charles Tupper, G. C. M. G., resigned the position of Minister of Finance, and on 23rd May, 1888 was re-appointed High Commissioner for Canada in the United Kingdom.

The Hon. G. E. Foster, late Minister of Marine and Fisheries, was appointed Minister of Finance on 29th May, 1888.

Mr. Charles H. Tupper, M. P., was appointed Minister of Marine and Fisheries on 31st May, 1888.

#### LATEST APPOINTMENTS.

The Hon. A. W. McLelan, Postmaster General, to be Lieutenant Governor of Nova Scotia from 9th July, 1888.

The Hon. John Christian Schultz, to be Lieutenant Governor of Manitoba from 1st July, 1888.

Mr. Joseph Royal, M.P., to be Lieutenant Governor of the North-West Territories from 1st July, 1888.

## ERRATA.

Page 213. For Sir James Laird read Sir James Caird.

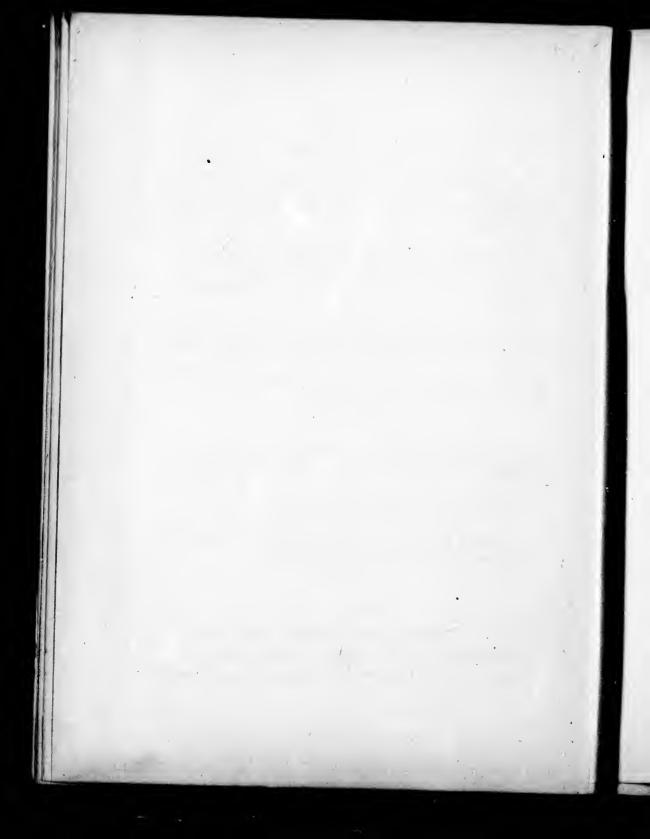

Page 260, par. 360. For "directed" read "diverted."

Page 359, par. 554. For "5611" light stations read "561."

OM

## CANADA.

# STATISTICAL ABSTRACT AND RECORD. FOR THE YEAR 1887.

· Preliminary Remarks.

- 1. The Dominion of Canada consists of the Provinces of The Dom-Ontario and Quebec (formerly Upper and Lower Canada), Canada. Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island, and the North-West Territories, which latter contain the vast territory formerly under the control of the Hudson's Bay Company. It therefore comprises the whole of the northern half of North America, with the exception of the United States Territory of Alaska on the west, and Labrador, which is under the control of the Government of Newfoundland, on the east. It is bounded on the north by the Arctic Ocean, on the west by the Territory of Alaska and the Pacific Ocean, on the south by the United States, and on the east by the Atlantic Ocean.
- 2. The origin of the word Canada is obscure, but the origin of derivation now generally accepted is that from an Indian 'Canada.' word "Kannatha," meaning a village or collection of huts, and it is supposed that Jacques Cartier hearing this word used by the Indians with reference to their settlements, mistook its meaning, and applied it to the whole country.
- 3. Canada has an area of about 3,470,257 square miles, or Area. including its water surface, 3,610,000 square miles, and is abut 3,500 miles from east to west, and 1,400 miles from north to south.

The Great Lakes.

4. Among its principal physical features are its inland lakes, which are remarkable for their size and number, and contain more than half the fresh water of the globe. The largest of these, generally known as the great lakes, separate Canada from the United States, and consist of Lakes Superior, Huron, St. Clair, Erie and Ontario, and the following table gives their length, breadth, area and height above the sea:—

Michigan	320	80	25,600	578

Lake Michigan. 5. Lake Michigan is in the United States, but is connected with Lake Huron by the Strait of Mackinaw.

The Great Lakes.

6. These lakes form a complete system of navigation from the head of Lake Superior to the Atlantic Ocean, a distance of 2,384 miles. Lake Superior is connected with Lake Huron by the Ste. Marie River and the Sault Ste. Marie Canal. Lake Huron flows into Lake St. Clair by the St. Clair River, and Lake St. Clair into Lake Erie by the Detroit River. Lake Erie flows into Lake Ontario by the Niagara River, fourteen miles from the mouth of which are the renowned Niagara Falls, 160 feet in height. The two lakes are connected for the purposes of navigation by the Welland Canal. The St. Lawrence River, flowing out of Lake Ontario into the Gulf of St. Lawrence, forms the outlet of this system.

Lakes.

7. The other principal lakes in Ontario are the Lake of

s inland ber, and se. The separate f Lakes e follownt above

Lake of

the Woods (1,500 square miles), Lakes Nepigon, Nipissing and Simcoe, and the Muskoka Lakes, Muskoka, Rosseau, Joseph and the Lake of Bays In Quebec are Lake Temiscamingue, which is on the borders of Ontario and Quebec, Lake St. John, Grand Lake and Lake Mistassini; and in the Territories and Manitoba are Lakes Great Bear (10,000 square miles), Great Slave (12,000 square miles), Athabasca (3,000 square miles), Winnipeg, 280 miles long, 57 miles broad, 650 feet above the sea and an area of 8,500 square miles; Winnipegosis, 120 miles long, 17 miles broad, 700 feet above the sea, and an area of 1,936 square miles, and Manitoba, length 120 miles, breadth 16 miles, elevation above sea 670 feet, and area 1,900 square miles.

8. The principal mountains are the Rocky Mountains in Mountains. The West, which extend from the Arctic Ocean to the United States, and contain the highest points in the Dominion, among the chief being Mount Hooker, 16,760 feet, Mount Brown, 16,000 feet, and Mount Murchison, 15,700 feet, while there are several others of nearly the same height. The Canadian Pacific Railway crosses this range through the Kicking Horse Pass at an altitude of 5,300 feet above the sea. West of the Rocky Mountains, and between them and the Pacific Ocean, are the Cascade Mountains, which follow the coast from the Fraser River to Alaska, and in some places are as high as 10,000 feet. The other ranges of any size are the Wotschish and Notre Dame Mountains in Quebec, and the North and South Mountains and the Cobequid Mountains in Nova Scotia.

9. The principal rivers are, in the Territories and Mani-Rivers, toba, the Mackenzie River, over 2,400 miles in length, the Copper Mine and Great Fish Rivers, which flow into the Arctic Ocean; the Saskatchewan, Assiniboine and Red Rivers, which flow into Lake Winnipeg, and the Churchill,

Severn and Albany Rivers, which flow into Hudson's Bay. In Ontario and Quebec the St. Lawrence, with its tributaries the Ottawa, St. Maurice, Richelieu and Saguenay. In New Brunswick the St. John, Restigouche and Miramichi Rivers; and in British Columbia, the Fraser River, which flows into the Gulf of Georgia, the Peace River which rises in that Province and flows into the Mackenzie River, and the Columbia River, over 1,200 miles in length, which flows through the United States into the Pacific Ocean.

Gulfs and

10. The coast line of Canada is very much broken and contains several large gulfs, bays and inlets, besides innumerable smaller ones. On the east the principal indents are the Gulf of St. Lawrence, the Bay of Fundy and Bay of Chaleurs; on the north, Hudson's Bay, which is really a large inland sea, being 1,000 miles long, and 600 miles wide, with an area of 350,000 square miles, Baffin's Bay, the Gulf of Boothia, and Melville and Lancaster Sounds; and on the west the Strait of Juan de Fuca, the Gulf of Georgia and Queen Charlotte Sound.

Islands.

11. The largest islands on the west are Vancouver, and Queen Charlotte Islands, the former is about 300 miles in length, has an area of about 20,000 square miles and contains Victoria, the capital of British Columbia, and on the east, Prince Edward Island, which forms the Province of that name, Cape Breton, which is part of the Province of Nova Scotia, being separated from the mainland by the Gut of Canso, and Anticosti, in the Gulf of St. Lawrence on which the Dominion Government have important signal and wrecking stations. A great network of islands the limits of which have not been well defined, extends along the entire north coast of Canada. It is known generally as the Arctic Archipelago.

Physical features. 12. The whole of the eastern part of Canada, from the

Atlantic to the north-west boundaries of Ontario was forson's Bay. merly one vast forest, and is still very extensively wooded, ributaries timber in various forms being one of the principal exports In New of the country. In the southern part of the centre of the ii Rivers; Dominion is a vast tract of prairie land, while the northern flows into portion is principally forest, and is inhabited only by a few s in that tribes of Indians, and by officers of the Hudson Bay Comand the pany in their most advanced posts. The prairie land is ich flows covered with soil of great richness, and is adapted for the raising of cereals and roots of all kinds, while for grazing oken and purposes it is unsurpassed, the climate being suitable for les innustock breeding, and the pasturage excellent, and almost dents are unlimited. West of the Rocky Mountains is another great y of Chatract of forest land, the timber on which is invaluable, while ly a large the soil is very fertile, and the country as it becomes cleared,

> 13. The timber in British Columbia attains in many cases Timber in to an enormous size, specimens of the Douglas pine being Columbia. among the largest trees in the world. The following illustrations will give some idea of their great size, square timber has been cut from the Douglas pine, measuring eight feet by one hundred and five feet in length, and from one log no less than eight pieces of timber have been cut, each piece measuring 12 inches by 12 inches and fifty feet in length. Cedar trees also have been found 24 feet in diameter and 300 feet high.

is found to possess great agricultural capabilities.

14. The climate is dry, healthy and invigorating, and Climate. owing to the great area of the country extending over 20 degrees of latitude, or from the latitude of Constantinople to the North Pole, has a wide range of temperature. The extreme dryness of the atmosphere, however, makes both cold and heat less acutely felt than the readings of the thermometer would lead people to expect. In the Maritime Provinces the climate somewhat resembles that of the British

Isles; in Ontario, Quebec and Manitoba the summers are warm and the winters cold, but the cold is pleasant and bracing, and the snow that generally covers the ground during the winter is of the greatest benefit alike to the farmer, the lumberman and the merchant. In the North-West Territories cattle graze at large all through the winter months; and on the Pacific slope west of the Rocky Mountains, the climate is milder than in any other part of the Dominion.

Climate.

15. The popular idea in other countries for a long time was, and indeed to a certain extent still is, that Canada is a country of perpetual winter, and normally covered with snow, and Canadians themselves are to a large extent to blame for the continuation of the idea, by almost invariably representing Canadian winter scenes in their pictures, by writing descriptions of winter amusements and pastimes alone, and, if desirous of sending their portraits to friends in other countries, by being always taken in winter costume, with probably a snow covered forest or frozen lake in the back ground. The facts are, that the average winter is about four and a half months, and though the spring may begin two or three weeks later than in England, the conditions for rapid growth—warm sunshine and rain—are so favorable that the crops of the two countries are about equally advanced by the middle of July, and as during the last few years the country has become better known, it is beginning to be understood that though the winters are at times severe, they are healthy and enjoyable, while the summer weather is not surpassed in the most favoured parts of Europe. That the climate is superior to that of England is admitted by all who have experienced both.

Temperature and rainfall 1884.

16. The report of the meteorological service for 1884, which for some reason was not published until late in 1887, affords

63·66 49·85 59·23 48·03 45·29 43·33 Extremes of mean temperature.

17. According to the above figures, the extremes of mean temperature in the several Provinces were as follows:—

	Max.	Min.
Outario	47.81	34.14
Quebec	41.67	27.59
Nova Scotia	44.51	39 03
New Brunswick	42.18	37.45
Manitoba	31.96	28.66
British Columbia	46.97	38.48
Prince Edward Island	39.48	37.88
The Territories	37.77	26.65

The highest mean temperature was at Windsor, Ontario, viz., 47.81, and the lowest at Fort Chipewyan, N.W.T., 26.65.

Temperature 1887. 18. The following information respecting the weather of 1887 has been taken from the *Monthly Weather Review*, a useful publication issued by the Superintendent of the Meteorological Service at Toronto. The mean temperature and total precipitation at a station in Prince Edward Island, and at the capitals of the other Provinces and of the Territories have been given, with remarks applicable to all parts of the Dominion. The first table gives the mean temperature at the places named in each month in 1887:—

#### MEAN TEMPERATURE AT THE UNDERMENTIONED PLACES IN CANADA.

Places.	Jan.	Feb.	Mar	April.	May.	June.

The average in all cases means the average obtained from thirteen years' observation, except where otherwise mentioned. The temperature in January was below the average for the month in Manitoba, Ontario, Quebec and New Brunswick; at Winnipeg it was as much as 8°.1 below. In Nova Scotia and British Columbia, the temperature was above the average. The lowest temperature was registered at Regina, viz., 52 below zero, and the highest at Halifax, 54°.9. In February the temperature was below the average at all the stations, except a few on Lakes Erie and Ontario; at Medicine Hat, N.W.T., it was 23°6 below the average of three years. The lowest temperature was again registered at Regina, viz., 48° below zero, and the highest at Victoria, 59°. In March and April the temperature was generally below the average, except in the latter month in Manitoba and the North-West. In May, June and July the temperature was very generally above the average, especially in May when it was universally so, and the exceedingly hot weather during these three months will long be remembered. In Toronto the mean temperature in May was 6° 51 higher than the average of fortyseven years, and in Montreal 60.35 higher than the average of thirty years. The highest recorded temperature in this month was 93°.3 at Windsor, Ont. The same temperature was recorded at a number of places during the following

June, while in July, the thermometer reached 97°·2 at Toronto, and 100° at several places in Ontario. This period of excessive heat was followed by unusually cool weather in August, September and October, the temperature being generally below the average, particularly in the two latter months. The temperature in November and December was, on the whole, slightly below in the former and above the average in the latter month.

Rain and snowfall 1987. 19. The next table gives the total precipitation in inches during the year at the same places:—

TOTAL PRECIPITATION IN INCHES AT THE UNDERMENTIONED PLACES IN CANADA, 1887.

gener-Quebec v. In the city of Quebec forty-eight inches fell in January, fiftynine inches in February, and thirty-seven inches in March. In May the rainfall throughout the Dominion was very light, many districts being absolutely rainless, and the crops suffered much from drouth in consequence. the rainfall was generally below the average, and in July it was almost universally so throughout the Dominion, "but," Mr. Carpmael says "the mere expression of the rainfall "being below the usual quantity, conveys but a poor idea of "the effect of the drouth, in many parts of the Dominion "crops ruined, pastures burnt up, wells running dry and the "foliage of the trees resembling October instead of mid-"summer." In August and September the rainfall was again below the average, particularly in September, and in the N. and N. E. parts of Ontario, in many places the pastures were destroyed, and the farmers forced to feed hay to their cattle. In October rain was still lacking, being the eighth month during which in some parts of the Dominion, the same conditions had prevailed. In November the fall was an average one, but was generally above the average in December, especially in British Columbia.

21. A remarkable meteor was observed in the Maritime Remarkable Provinces on 15th September, of which a number of September accounts have been furnished, the best of which is probably that of Mr. M. H. Nickerson, of Barrington, as follows: \* "As "observed in Barrington, the meteor appeared at an altitude "of say 60°, in a direction about N. by W. and at 8:34 local "time. Its course as near as could be judged was S.S.E. "Its maximum brightness was attained at the moment of its "vanishing. The point of its disappearance was about S. "25° E, and at an altitude of 20°. As the meteor was in the "form of a speroid, its greater apparent diameter was nearly "twice that of the moon, and one-third longer than the less. "Monthly Weather Review, September, p. 7.

- "The duration of its visible flight was not more than four
- "seconds. The noise in connection, which at first could not
- "be distinguished from thunder, at a distance of twelve or fifteen miles, began one minute and twenty seconds after
- "the meteor had disappeared, and lasted forty-five seconds.
- "Soon as the meteor vanished from sight, its track appeared
- "to fill with a dull reddish hue, which was slowly diffused
- "on both sides, and remained distinctly perceptible till near "midnight."

Storm Warnings. 22. The number of storm warnings issued during the year by the Meteorological Service was 1,093, of which 972, or 88.9, were verified, no warnings of this nature were issued during the months of May, June and July.

The following table shows the number of storm warnings issued and verified in each year since 1877:—

is

la

m cl

in an sh en d h b

0

YEAR.	Number Issued.	Number Verified.	Percentage Verified.	
1877	743	510	68.6	
1878	860	673	78.3	
1879	712	591	83.●	
1880	889	736	82.8	
1881	854	727	85.1	
1882	841	658	78 <b>·2</b>	
1883	1,085	858	79.1	
1884	798	663	83 2	
1885	830	741	89.3	
1886	906	799	88.2	
1887	1,093	972	88.9	

It will be seen, therefore, that out of a total of 9,611 storm warnings issued during the last 11 years, 7,928, or 82. 4 per cent have been verified.

Weather predictions. 23. The total number of weather predictions of all kinds was 7,603, of which 79. 6 per cent. were fully, and 90. 8 per cent. fully and partly verified.

24. Minerals of almost every kind are known to exist, and Minerals. their development in the future will constitute one of the chief sources of wealth for the country. Gold has been found extensively in Nova Scotia and British Columbia. In the former Province there are fifty-eight mines in working order, and in the latter there is scarcely a stream of any importance in which the "colour" of gold cannot be found, and paying mines exist in localities extending through ten degrees of latitude. The total value of gold exported from this Province, since its admission into Confederation, to 30th June, 1887, has reached the large sum of \$15,274,065. Gold has also been found in Ontario and Quebec, and it is not improbable that valuable discoveries of that metal are yet to be made in these Provinces. Iron is found in considerable quantities in all the Provinces, and the supply is practically inexhaustible; that of Nova Scotia is particularly fine, and brings in the market nearly double the price of English iron. More complete details respecting the mineral resources of Canada are given in a subsequent chapter.

25. What may be called the natural industries of the Dom- Natural industries. inion are: - In Prince Edward Island, agriculture, fishing and shipbuilding; in Nova Scotia, coal and gold mining, shipbuilding, agriculture, lumber and fishing, the fisheries of this Province being the most valuable and productive in the world; in New Brunswick, shipbuilding, lumbering, agriculture and fishing, the value of the fisheries being second only to that of Nova Scotia; in Quebec, agriculture, shipbuilding, lumbering, fishing and mining; in Ontario, agriculture, lumbering and mining; in Manitoba and the Territories, agriculture and stock-raising; coal mining is expected to become a very important industry in these regions, it being estimated that there are about 65,000 square miles of coal-bearing strata east of the Rocky Moun-

tains; and in British Columbia, mining, lumbering, fishing and agriculture.

Manufac-

26. The leading manufacturing industries, principally in turing lindustries. Ontario and Quebec, are works for making all kinds of agricultural implements in iron and wood, waggons, carriages, and railroad rolling stock (including locomotives), cotton factories, woollen factories, saw-mills, tanneries, machinery, iron and hardware works, flax works, furniture, paper, soap, woodenware, boot and shoe, cloth and linen, door, sash, stave, tobacco, meat and food preserving, and cheese factories. Sugar refining is extensively carried on in Halifax and Montreal.

Discovery of Canada

27. According to what may be rather called tradition than history, the shores of North America were visted on several occasions as early as the tenth century by parties of Norsemen, some of whom settled in what is now the State of Massachusetts, but were eventually either killed or expelled by the natives. The earliest authentic record of the landing of Europeans on these shores, is that of Sebastian Cabot who reached some part of the coast of Labrador on the 21st June. 1497, and two days afterwards discovered the Island of Newfoundland. Columbus did not reach the mainland until the following year, 1498, and Amerigo Vespucci, from whom the Continent took its name, until 1499, Cabot therefore is fairly entitled to be considered as the discoverer of what is now the Dominion of Canada. In 1517 Cabot made another voyage and succeeded in making his way into what was afterwards called Hudson's Bay, but nothing further was done towards the exploration of the mainland until the expedition of Jacques Cartier in 1534, who landed at Gaspé on the 24th July in that year, and with this date Canadian history proper may be said to begin.

28. Commencing with the first voyage of Cartier, the Principal following are some of the principal events of importance in Canadian the history of this country:—

1534. July 24. Landing of Jacques Cartier at Gaspé
The Bay of Chalcurs was so named by him on account of the great heat of
the weather.

1535. July. Second visit of Cartier.

August 10. Cartier anchored in a small bay at the mouth of the St. John
River, which, in honour of the day, he named after St. Lawrence. The
name was afterwards extended to the gulf and river.

1540. Third visit of Cartier.

1542-43. The Sieur de Roberval and his party wintered at Cape Rouge.

1598. The Marquis de la Roche landed 40 convicts on Sable Island, where they were left for five years without relief, and only twelve were found alive at the end of that time.

1603. First visit of Samuel de Champlain to Canada.

1605. Founding of Port Royal (Annapolis), Acadia (derived from an Indian word "Cadie," a place of abundance), by the Baron de Poutrincourt.

1608. Second visit of Champlain. Founding of Quebec, the first permanent settlement of Canada. The name is said to be an Indian one, "Kebec," a strait. 28 settlers wintered there, including Champlain.

1611. Establishment of a trading post at Hochelaga.

1613. St. John's, Newfoundland, founded.

1615. Champlain sailed up the Ottawa River, crossed Lake Nipissing and descended French River into Georgian Bay and Lake Huron, returning by Lake Ontario.

1320. Population of Quebec, 60 persons.

1629. July. Capture of Quebec by the English under Sir David Kirk 117 persons wintered there.

1632. Canada ceded to France by the Treaty of St. Germain-en-Laye.

1635. December 25. Death of Champlain at Quebec.

1642. May 18. Ville Marie (Montreal) founded.

1642-1667. Frequent and serious wars between the French and the Iroquois Indians.

1667. Population of New France, 3,918.

1672. Count de Frontenac appointed Governor. Population, 6,705.

1689. August. Massacre at Lachine by Indians, and capture of the Fort at Montreal, which they held till October.

1690. Capture of Port Royal by Sir Wm. Phipps, and unsuccessful attack upon Quebec.

1692. Population of New France, 12,431.

1698. Death of Frontenac. Population, 13,355.

- 1701. August 4. Ratification of a treaty of peace with the Iroquois at Montreal.
- 1713. Treaty of Utrecht by which Hudson's Bay and adjacent territory, Nova Scotia (Acadia) and Newfoundland were ceded to the English.
- 1720. Population of New France 24,434, and of St John Island (Prince Edward Island) about 100.
- 1739. Population of New France, 42,701.
- 1745. Louisbourg, Cape Breton, taken by the English.
- 1748. Restoration of Louisbourg to the French in exchange for Madras by the peace of Aix-la-Chapelle.
- 1749. The City of Halifax founded by Lord Halifax. 2,544 B itish emigrants brought out by the Hon. Edward Cornwallis, the first English Governor of Nova Scotia.
- 1752. March 23. Issue of the Halifax Gazette, the first paper published in Canada.
- 1755. Expulsion of the Acadians from Nova Scotia, about 6,000.
- 1758. July 26. Final capture of Louisbourg by the English.
- 1759. July 26. Capture of Fort Niagara by the English under General Prideaux, who was killed during the assault
  - June 25, Commencement of the siege of Quebec.
  - September 12. Battle of the Plains of Abraham, and defeat of the French by General Wolfe, who was killed on the field. Loss of the English, 700, and of the French 1,500.
    - September 13. Death of General Montcalm, commander of the French forces.
      September 18. Capitulation of Quebec to General Townshend.
- 1760. April. Unsuccessful attack on Quebec by General de Lévis.
  - September 8. Capitulation of Montreal, and completion of the conquest of Danada. Population of New France, 70,000.
- 1762. British population of Nova Scotia, 8,104.
- 1763. Fel ruary 10. Treaty of Paris signed, by which France ceded and guaranteed to His Britannic Majesty in full right "Canada with all its dependencies."
  - General Murray was the first Governor General of the Province of Quebec.
- 1764. June 21. Issue of the Quebec Gazette.\*
  - In this year Pontiac, chief of the Ottawas, organized a conspiracy for a simultaneous rising among the Indian tribes, and a general massacre of the British. The plan was successfully carried out in several places, where not a soul was left alive, but finally the Indians were forced to succumb.
- 1788. General Carleton, afterwards Lord Dorchester, appointed Governor General.
- 1770. Prince Edward Island made into a separate province, with Walter Paterson the first Gove: nor. The first meeting of the Hous, of Assembly took place in July, 1773.

<sup>\*</sup>This has generally been considered as the first paper published in Canada, but the Halifax Gazette, though lasting barely two years, has undoubtedly the claim to priority.

in Canada, pubtedly the 1774. The "Quebec Act" passed. This Act gave the French Canadians the free exercise of Roman Catholic religion, the enjoyment of their civil rights, and the protection of their own civil laws and customs. It annexed large territories to the Province of Quebec, provided for the appointment by the Crown of a Legislative Council, and for the administration of the criminal law as in use in England.

1775. Outbreak of the American Revolution, and invasion of Canada by the Americans; every place of importance rapidly fell into their hands, with the exception of Quebec, in an attack upon which Gen. Montgomery was

defeated and killed on 31st December.

1776. Reinforcements arrived from England, and the Americans were finally driven out of Canada.

1783. September 3. Signing of the Treaty of Paris, and definition of the boundary line between Canada and the United States, viz., the Great Lakes, the St. Lawrence, the 45th parallel of north latitude, the highlands dividing the waters falling into the Atlantic from those emptying themselves into the St. Lawrence and the St. Croix River.

1784. Population of Canada, 113,012. (United Empire Loyalists in Upper Canada not included).

British population of Nova Scotia, 32,000 (about 11,000 Acadians not included).

Separation from Nova Scotia, and erection into a new province of New Brunswick, population, 11,457.

About this time began the migration into Canada and Nova Scotia of the United Empire Loyalists, as they were called, that is, of those settlers in the American States who had remained faithful to the British cause. This migration lasted for several years, and though it is not possible to arrive at any exact figures, it is probable that the number altogether was not less than 40,000. The Loyalists were well treated by the British Government, and large grants of lands were made to them in various parts of the country. The banks of the St. Lawrence and shores of Lake Ontario in particular, were settled by about 10,000, on lands al'otted to them by the Government.

1785. Re-introduction of the right of habeas corpus.

1791. Division of the Province of Quebec into two Provinces, viz., Upper and Lower Canada. Each Province to have a Lieutenant Governor, and a Legislature composed of a House of Assembly and a Legislative Council. The members of the Council were to be appointed by the Lieutenant Governor for life, those of the Assembly to be elected by the people\_for four years.

Population of the two Provinces, 161,311.

1792. September 17. First meeting of the Parliament of Upper Canada at Newark (Niagara) under Lieut. Governor Simcoe. The House of Assembly consisted of sixteen members.

December 17. Opening of the Legislature of Lower Canada, at Quebec, by Gen. Clarke. The House of Assembly consisted of fifty members.

- 1793. Abolition of slavery in Upper Canada.
- 1796. The seat of Government of Upper Canada removed from Niagara to York (Toronto).
- 1798. The name of St. John's Island changed to that of Prince Edward Island, in honour of the Duke of Kent, the change to take effect in 1800. Population, 4,500.
- 1806. November. Issue of Le Canadien, the first newspaper printed entirely in French.

Population of Upper Canada, 70,718, and of Lower Canada, 250,000.

- 1812. War declared between Great Britain and the United States.
  - August 11. Surrender of Detroit by the Americans under General Hull to General Brock.
  - October 13 Battle of Queenston Heights, and defeat of the Americans.

    Death of General Brock.

10

18

18

18

18

- 1812. November Defeat of General Dearborn by Col. de Salaberry at Lacolle River.
- 1813. April 25. Capture of York by the Americans.

June 5. Battle of Stoney Creek and defeat of the Americans.

- September Battle of Moraviautown Retreat of the British, and death of the Indian chief Tecumseth.
- Battle of Chateauguay—Defeat of three thousand Americans under General Hampton, by Colonel de Salaberry and four hundred French Canadian militia.
- September 25. Battle of Chrysler's Farm—Defeat and rout of General Wilkinson and the Americans by the Canadian militia under Col. Morrison.
- 1814. Battle of Lundy's Lane, and defeat of the Americans.

  December 24 War terminated by the Treaty of Ghent.

  Population of Upper Canada, 95,000, and Lower Canada, 335.0 0.
- 1818. October 20. Convention signed at London regulating the rights of Americans in the British North American fisheries.
- 1821. Commencement of the Lachine Canal.
- 1831. Population-Upper Canada, 236,702; Lower Canada, 553,134.
- 1836. July 21. Opening of the railroad from Laprairie to St. John's—the first railroad in Canada.
- 1837-38 Outbreak of rebellion in both Provinces. It was suppressed in Upper Canada by the Militia, and in Lower Canada by British troops.
- 1840. Death of Lord Durham, to whose exertions the subsequent Union of the Provinces was mainly due.
- 1841. February 10. Union of the two Provinces under the name of the Province of Canada, and establishment of Responsible Government. The Legislature was to consist of a Legislative Council and Legislative Assembly; each Province to be represented by 62 members, 42 elected by the people, and 20 appointed by the Crown.

Population of Upper Canada, 455,688.

1842. Settlement of the boundary line bet cen Canac and the United States, by the Ashburton Treaty.

1844. Population of Lower Canada, 697,984.

1845. Large fires in the City of Quebec. 25,000 people rendered hom less.

1848. The St. Lawrence canals opened for navigation.

1849. Riots in Toronto and Montreal over the Rebellion Losses Bill, and burning of the Parliament Library at Montreal

1850. The first sod of the Northern Railway turned by Lady Elgia.

1851. Transfer of the control of the Postal system from the British to the Provincial Governments, and adoption of a uniform rate of postage, viz, three pence per ½ ounce. The use of postage stamps was also introduced.

Population of Upper Canada, 952,004; of Lower Canada, 890,261; of New Brunswick, 193,800, and of Nova Scotia, 276,854.

1852. Commencement of the Grand Trunk Railway.

1853. The number of members in the Legislative Assembly was increased from 84 to 130, being sixty-five from each Province

1854. January 27. Main line of the Great Western Railway opened for traffic.

Abolition of Seignorial Tenure in Lower Canada, and settlement of the Clergy Reserves question.

June 5. Reciprocity treaty with the United States, signed at Washington, It provided for mutual rights of fishing in certain Canadian and American waters, for the free interchange of the products of the sea, the soil, the forest and the mine; it allowed Americans the use of the St. Lawrence River and Canadian Canals on the same terms as British subjects, and gave to Canadians the right to navigate Lake Michigan. This treaty was to last ten years.

1856. The Legislative Council was made an elective chamber.

1858. Adoption of the decimal system of currency. Selection by the Queen of the city of Ottawa as the capital of the Dominion and permanent seat of Government

1860. August 25. Opening of the Victoria Bridge by the Prince of Wales. This bridge crosses the St. Lawrence at Montreal, on the line of the Grand Trunk Railway. It is the largest iron tubular bridge in the world, is sixty feet high in the centre, and nearly two miles in length.

September 1. Laying of the corner stone of the Parliament Buildings at Ottawa by the Prince of Wales. These buildings, together with the Departmental Buildings, have been erected at a total cost up to 30th.

June, 1887, of \$4,486,176.

1861. Population of Upper Canada, 1,396,091; of Lower Canada, 1,111,566; of New Brunswick, 252,947; of Nova Scotia, 330,857; of Prince Edward Island, 80,957; of Vancouver's Island, exclusive of Indian, 3,024.

1866. March 17. Termination of the Reciprocity Trenty in consequence of notice given by the United States.

June 1. Invasion of Canada by Fenians Battle of Ridgeway, and retreat of the volunteers.

June 3. Withdrawal of the Fenians into the United States.

June 8. First meeting of Parliament in the new buildings at Ottawa. At this meeting the final resolutions necessary to effect the Confederation of the Provinces were passed.

1867. February 10. The British North America Act passed by the Imperial Legislature.

July 1. Union of the Provinces of Canada, Nova Scotia and New Brunswick under the name of the Dominion of Canada. The names of Upper and Lower Canada were changed to Ontario and Quebec respectively.

Lord Monck was the first Governor General of the Dominion, and the first Parliament met on the 6th November, Sir John A. Macdonald being Premier.

1868. April 9. Hon. T. D'Arcy McGee, M.P., murdered at Ottawa. July 31. The Rupert's Land Act passed by the imperial Government providing for the acquisition by the Dominion of the North-West Territories.

1869. June 22. Bill passed providing for the Government of the North-West Territories.

1869. October 29. Hon. Wm. Macdougall, appointed Lieutenant Governor. Red River rebellion.

November 19. Deed of surrender signed, Hudson's Bay Company to Her Majesty.

1870. March 4. Thomas Scott shot at Fort Garry.

August. Arrival at Fort Garry of the expedition under Colonel (Lord) Wolseley, when the rebels were found to have dispersed.

May 25. Fenians crossed the frontier at Trout River in Quebec, but were driven back by the volunteers.

July 15. Addition of the North-West Territories to the Dominion and admission of the Province of Manitoba into the Confederation. This Province was made out of a portion of the newly acquired Territory.

1871. May 8. Signing of the Treaty of Washington.

July 20. Admission of British Columbia into the Confederation.

Population of the Dominion, 3,485,761; of Manitoba 18,995; of British Columbia, 36,224, and of Prince Edward Island, 94,021. Total 3,635,024.

1872. Abolition of dual representation.

1873. May 2. Death of Sir George E. Cartier, in London.

July 1. Admission of Prince Edward Island into the Confederation.

1876. Opening of the Intercolonial Railway from Quebec to Halifax

1877. June 20. Great fire in St. John, New Brunswick.

November 23. Award of the Halifax Fisheries Commission of the sum of \$5,500,000 to be paid by the United States to the Imperial Government.

1879. Adoption of a Protective Tariff, otherwise called the National Policy.

1880. Death of the Hon. George Brown.

October 21. Contract signed for the construction of the Canadian Pacific Railway. This contract was subsequently ratified by 44 Vic., c. 1 (1881).

1881. April 4. Population of the Dominion, 4,324,810.

May 2. First sod turned by the Canadian Pacific Railway Company.

1832. June 21. Logality of the Canada Temperance Act confirmed by the Privy Council.

August 23. The new seat of Government for the North-West Territories received the name of Regina.

1885. March 26. Outbreak of rebellion in the North-West, commencement of hostilities at Duck Lake.

April 2. Massacre at Frog Lake.

April 14. Fort Pitt abandoned.

April 24. Engagement at Fish Creek

May 17. Battle of Batoche, and defeat of the rebels.

May 26. Surrender of Poundmaker.

July 1. Termination of the fishery clauses of the Washington Treaty, by the United States.

July 2. Capture of Big Bear, and final suppression of the rebellion. Total loss of the Militia and Volunteers under fire, killed in, wounded 115.

The rebel loss could not be ascertained. Est and 140 killed.

November 7. Driving of the last spike of the Canada dailway.

11886. June 28. First through train left Montreal for Vancouver.

# CHAPTER I.

#### CONSTITUTION AND GOVERNMENT.

Constitu-

29. The Constitution of the Dominion of Canada is similar in principle to that of the United Kingdom.

Executive authority.

30. By the British North America Act, the Executive Govern ment and authority of and over Canada, as well as the command in chief of the Land and Naval Militia, and of all Naval and Military Forces of and in Canada, were declared to be vested in the Queen.

Parlia-

31. The Parliament consists of the Queen, the Senate and the House of Commons. The Queen is represented by the Governor General, who is assisted by a Privy Council, to which belong all those who are or have been advisers of the Crown, the acting portion of the Council, however, consists only of the Ministry of the day.

The Governor General. 32. The Governor General is appointed by the Queen, and holds office for five years. He takes no part in legislation, but assents in the Queen's name to all measures which have passed both the Senate and the Commons. He may, however, refuse such assent, or may reserve bills for Her Majesty's consideration. He may also disallow Acts of the Provincial Legislatures, within one year of their having been passed in the Province.

The Senate.

33. The Senate is composed of members appointed for life by the Crown under the Great Seal of Canada. A Senator is entitled to be styled Honourable. He must be a British subject, born or naturalized, have passed the age of thirty years, be a resident in the Province for which he is appointed, and hold property to the value of \$4,000 above all liabilities. His seat becomes yacant if he fails to attend two

consecutive sessions of Parliament, if he becomes bankrupt, or takes advantage of any insolvent law, or is attainted of treason or convicted of felony. The Speaker, who must be a Senator, is appointed by the Governor General, and fifteen members, including the Speaker, form a quorum. Each Senator receives \$1,000 per annum as an indemnity. The number of Senators cannot exceed 78, until the admission of Newfoundland, when it may be increased to 82. There are at present 78 members, representing the several provinces as follows: Ontario, 24; Quebec, 24; Nova Scotia, 10; New Brunswick, 10; Manitoba, 3; British Columbia, 2; Prince Edward Island, 4, and the North-West Territories 1. Bills, of all kinds, except money bills, can be originated in the Senate, A Senator cannot be elected a member of the House of Commons.

34. The members of the House of Commons must also be The House British subjects, but require no other qualification. They mons. are elected by the people for five years, unless the House is sooner dissolved, under a uniform franchise for the whole Dominion. The Speaker is elected by the members themselves, twenty of whom (including the Speaker) constitute a quorum. Members are paid at the rate of \$10 a day, if the session is less than thirty days, and \$1,000 for the session, if over thirty days. All bills for appropriating any part of the Public revenue, or for imposing any tax or impost, must originate in the House of Commons, and must first be recommended by message of the Governor General. The House shall be called together from time to time by the Governor General in the name of the Queen, under the Great Seal of Canada, but there must be a session of Parliament once at least in every year, and twelve months must not intervene between the last sitting of one session and the first sitting of the next.

35. The concurrence of the Governor General, the Senate, Concurrence

enate and ed by the ouncil, to

ed for life A Senator a British of thirty s appointve all liattend two and House of Commons, is necessary before any measure can become law. Every member of the Senate and the Coath of all-House of Commons must take the oath of allegiance before taking his seat.

Authority of Parliament. 36. The exclusive legislative authority of the Parliament of Canada extends to all matters connected with the following subjects:—

Public Debt.
Trade and Commerce.
Taxation.
Borrowing money on public credit.
Postal Service.
Census and Statistics.
Militia and Defence.
Military and Naval Service.
Civil Service.
Lighthouses, Buoys, &c.
Navigation and Shipping.
Quarantine and Marine Hospitals.
Sea Coast and Inland Fisheries.
Inter-provincial Ferries, and with
Foreign Countries.

Currency and Coinage.
Banking.
Savings Banks.
Weights and Measures.
Bills of Exchange.
Interest.
Legal Tender.
Bankruptcy.
Patents.
Copyrights.
Indians.
Naturalization.
Marriage and Diverce.
Criminal Law.
Penitentiaries.

Administration of public affairs. 37. The administration of public affairs is at present divided into the following thirteen departments, viz.:—Finance, Justice, Public Works, Railways and Canals, Militia and Defence, Customs, Agriculture, Post Office, Marine and Fisheries, Inland Revenue, Interior, Indian Affairs, and Department of Secretary of State, but provision was made during the last session of Parliament for the amalgamation of the Departments of Customs and Inland Revenue, the new Department to be known as that of Trade and Commerce, presided over by a Minister designated accordingly, while in the place of the present Ministers of Customs and Inland Revenue, two Comptrollers will be appointed whe shall vacate their offices on any change of government, but shall not necessarily have seats in the Cabinet.

The Cabi- 38. Each Department is presided over by a Minister who

ent diviinance. tia and ne and rs, and s made mation ue, the d Comdingly, ms and ed who nt. but

er who

may be a member either of the Senate or the House of Commons, and these Ministers form the Cabinet for the time being.

39. The Lieutenant Governors of the several Provinces are Provinces are challegisappointed by the Governor General. The forms of the Leg- lature islatures vary in the different Provinces. Quebec, Nova Scotia, New Brunswick and Prince Edward Island each has two Chambers (a Legislative Council and a Legislative Assembly) and a responsible Ministry; in Ontario, Manitoba and British Columbia there is only one Chamber (the Legislative Assembly) and a responsible Ministry. In Prince Edward Island the members of the Council are elected; in Quebec, Nova Scotia and New Brunswick they are appointed for life by the Lieutenant Governor. The following are the numbers of the members of the Provincial Legislatures:-

Legislatures.	Legislative Council.	Legislative Assembly.
Prince Edward Island	13	30
Nova Scotia	17	38 41
Quebrc	24	65
Ontario		90
Manitoba		35
British Columbia		25
The Territories (North-West Council)		20

- 40. The North-West Territories are presided over by a North-Lieutenant Governor and a Council partly elected by the Council. people and partly appointed by the Privy Council of the Dominion.
- 41. The Provincial Legislatures have the exclusive right Authority to legislate on such matters as: the Constitution of the clair Legislatures Province, taxation and raising money for Provincial pur-

poses, management and sale of Provincial lands, establishment and management of prisons, hospitals, asylums, municipal institutions, licenses, local works and undertakings, property and civil rights in the Province, the administration of justice, education, and generally all matters of a local or private nature in the Province.

Provincial qualiacations for voters.

42. The qualifications for voters at elections for the Provincial Assemblies are determined by the several Legislatures, and vary accordingly.

Number of members of House of Commons. 43. The original number of members of the House of Commons was 181, but in accordance with the provisions of the British North America Act described below, and in consequence of the admission of new Provinces and the Territories this number has been increased to 215, distributed as follows: Ontario, 92; Quebec, 65; Nova Scotia, 21; New Brunswick, 16; Manitoba, 5; British Columbia, 6; Prince Edward Island, 6, and the North-West Territories, 4. By section 51 of the British North America Act it was provided that the number of representatives for Quebec should always be 65, and that the other Provinces should be represented in such proportion to their population, as ascertained at each decennial census, as the number 65 would bear to the population of Quebec so ascertained.

Represen-

44. The following table gives the proportionate representation of each Province according to the Re-distribution Act of 1882:—

Ontario	One member	to 20,908	of the population.
Quebec	44	20,901	66
Nova Scotia	. "	20,979	"

epresention Act

on.

The original numbers of representatives from Manitoba, British Columbia and Prince Edward Island were specially provided for in the Acts admitting these Provinces into the Confederation. Subsequent readjustment will be in accordance with the above mentioned section of the British North America Act. According to the census of 1886 the representation in Manitoba was one member to 21,728 of the population.

45. The qualifications for voters at elections for the qualifica-Dominion Parliament are as follow: A vote is given to voters at Dominion every male subject of the full age of 21 years. being the owner, tenant or occupier of real property of the actual value in cities of \$300, in towns of \$200, or elsewhere of \$150, or of the yearly value wherever situate of not less than \$2 per month, or \$6 per quarter, or \$12 half-yearly, or \$20 per annum, or who is a resident in any electoral district with an income from earnings or investments of not less than \$300 per annum, or is the son of a farmer, or any other owner of real property which is of sufficient value to qualify both father and son, or is a fisherman and owner of real property, which with boats, nets and fishing tackle amounts to \$150 actual value. Voting is by ballot, except in the Territories.

46. Indians in Manitoba, British Columbia, the District of what In-Keewatin and the Territories are not entitled to vote. vote. Indians in other parts of Canada, possessed of land on a reserve, with improvements of not less value than \$150, and not otherwise qualified, shall be entitled to vote.

47. By special provision votes are given to persons in Voters in British Columbia and Prince Edward Island, who, not bla and coming within the Dominion franchise, were at the time of leland. the passing of the Act (20th July, 1885), entitled to vote according to the then existing Provincial laws, but only for so long as they shall be so qualified.

What persons disqualified.

48. The following persons, in addition to the Indians above mentioned, are disqualified for voting at elections for the Dominion Parliament, viz., the chief justice and judges of the Supreme Court, the chief justices and judges of the Superior Courts, and the judges of all other courts in the Dominion. Revising officers, returning officers and election clerks, and all counsel, agents, attorneys and clerks of candidates, who have been or may be paid for their services, are disqualified from voting in the district in which they have been so engaged, but not elsewhere.

Election procedure.

49. Writs for new elections are dated and made returnable as the Governor General shall determine, the date of the nomination, which shall be named in the writ, being also fixed by him. Within eight days from the receipt of the writ, the returning officer shall post up at each polling place in the district, a proclamation setting forth the dates for the days of nomination and polling, which latter in the case of general elections shall be everywhere on the same day (except as is specially provided for in British Columbia and the Territories, and in the Districts of Algoma, Chicoutimi and Saguenay and Gaspé) and of the official declaration of the return of the poll, together with a list of the several polling places, such proclamation to be posted up at least eight days before the day fixed for the nomination. The polling day is to be the seventh after the day of nomination, except as specially provided. It is proposed by a Bill now before the House to make uniform the dates for holding elections in British Columbia and the other electoral districts for which special provisions had been made in consequence of the difficulties of communication.

Franchise Act.

50. The last general election was held on the 22nd February, 1887, and the preceding one on the 20th June, 1882. In the interval, viz., on 20th July, 1885, an Electoral

ians above is for the judges of es of the rts in the d election s of canservices,

hich they

returnable te of the eing also pt of the ling place tes for the ie case of same day mbia and hicoutimi aration of le several at least The on. mination, Bill now holding districts sequence

ne 22nd h June, Electoral Franchise Act was passed providing for a uniform franchise for the whole Dominion in elections for the House of Commons, the right to vote at such elections having previously been determined by the Franchise Acts in force in the several Provinces.

51. The following table gives the number of voters regis- Partleutered, the number of votes polled, and the number of ballots general spoiled and rejected at the last two general elections. spoiled and rejected at the last two general elections.

Increase in number of voters. 54. According to a statement published by Mr. Joseph Pope, from which the figures in the foregoing table are partly taken, the natural increase in the number of electors between 1882 and 1887 may be set down approximately at 6 per cent., which would make the increase consequent on the passing of the Franchise Act of 1885, 16.40 per cent. The largest increases were naturally to be found in Manitoba and British Columbia, while the smallest was in Prince Edward Island, which was owing to the extremely liberal franchise previously in force in that Province. If the Territories are included, the inhabitants of which were enfranchised by special Act in 1886, the total increase in the number of voters since 1882 will be found to have been 190,327 or 23.68 per cent.

Summary statement. 55. The next table is a summary of the table on page 81:—

		1882.		1887.				
Provinces.	Number of Voters on Lists.	Total Votes Polled.	Spoiled and Rejected Ballots.	Number of Voters on Lists.	Total Votes Polled.	Spoiled and Re- jected Ballots

P. E. Island Canada	‡20,042 702,772	15,199	10,002	938,159	18,760 659,819	232 8,472		

<sup>\*</sup> In contested constituencies. † Partly estimated. ‡ Approximate.

Constituencies returning two mem56. The constituencies of Ottawa, Hamilton, Halifax, Picton, Victoria, B.C., Cape Breton, St. John, N.B. (City and County) and the three counties of Prince Edward Island each return two members and every elector has the privilege of two votes. In order, therefore, to avoid, as far as possible, the

counting of the same elector twice, the highest number of votes cast for a Ministerial candidate and the highest number for an Opposition candidate, in each of these places have been added together and considered as the total vote. This plan is considered a better one than that of halving the total vote as being more likely to represent the individual vote.

The total increase in the number of voters (exclusive of 2).

57. The total increase in the number of voters (exclusive of Total inthe Territories) was 180,012 and the increase in the number of votes polled was 169,601, being 94.21 per cent. of the total increase. Including the Territories, the increase was 176,821 or 92.90 per cent.

58. The following table gives the proportions of votes percentage of polled to voters on the lists, and of spoiled ballots to votes voters, do. polled at each general election:—

Provinces.	Percen of Votes p total V	olled to	Percentage of spoiled ballots to Votes polled.		
	1882.	1887.	1882.	1887.	
CutarioQuebco	69·59 66·63	69 ·51 68 · 13	1 ·25 3 · 79	0 ·96 1 · 77	
Nova Scotia New Brunswick	83 · 77 73 · 82	81 ·61 77 · 79	1.26 3.03	1 ·44 1 ·66	
Manitoba	84.55	45 .60	2.15	1.38	
British Columbia Prince Edward Island	96 54 75 83	56·78 87·41	9·60 1·73	2 ·18 1 ·23	
Canada	69 · 68	70 -27	2 .04	1.38	

It will be seen that there was an increase of nearly one per cent. in the proportion of votes polled to voters on the list, in spite of the very large falling off in the figures of British Columbia, which probably should be attributed to the season of the year, the election in 1882 having been held in June, and in 1887 in February. There was an increase

Spoiled and rejected ballots.

59. There was a decrease in the number of spoiled and rejected ballots of 1,530, and in proportion to the number of votes polled, the decrease was noticeable in every Province, particularly in Quebec, Nova Scotia and British Columbia, and for the whole Dominion it amounted to 37.20 per cent. As the increased franchise included a large number of persons who had never previously been entitled to vote, the above result may be considered as very satisfactory evidence of the progress of education in this country.

Proportions of voters to population, &c.

60. In 1882 the proportion of voters to the population of 1881 was 1 to every 5.38 persons, and at 1887 to the estimated population of 1886, the proportion was 1 to every 4.82. At the time of the census of 1831, 24 per cent. of the population were males at and over 21, and of these 77 per cent. were entitled to vote, and the proportion of members to males at and over 21 was 1 to every 4,914 and to the number entitled to vote 1 to every 3,808. In 1837 the proportion of members to the number entitled to vote was 1 to every 4,575, or, including the Territories, 1 to every 4,623.

Proportion in the United Kingdom.

61. In 1881 the proportion of members to the population of the United Kingdom was 1 to every 54,255 persons.

Proportion of members to population.

62. The proportion of members per 100,000 of the population at the census of 1881 in the following countries was:

United Kingdom		2.0
Canada		5.0
Victoria	*********	10.0
New South Wales		14.4
Queensland		25.8
South Australia		16.0
Tasmania	· · · · · · · · · · · · · · · · · · ·	27.6
New Zealand		16.5

nitoba and ario, Nova portions at

poiled and number of Province. Columbia, 0 per cent. number of o vote, the y evidence

ulation of to the estievery 4.82. the popuper cent. rs to males umber enportion of very 4,575.

opulation sons.

e populaies was:

10.0 25.8

2.0

16.0 27.6 16.5

The figures for the Australasian Colonies are taken from the Victorian Year Book, 1885-86, p. 100.

It will be seen that in proportion to population, Canada has more than twice as many members as the United Kingdom, but is considerably behind all the Australasian Colonies Queensland and Tasmania having more than five times as many.

63. The North-West Territories were not represented in Election 1882 and have not therefore been included in the compara-ritories. tive tables, but the following are particulars of the election in 1887, being the first held in those districts:—

Electoral Districts.	Number of Veins on L +	Total Votes Polled.	Percentage of Votes Polled to total Voters.
AlbertaAssinibois East	2,950	2,055	69 · 66
	3.772	2,746	72 · 80
Assiniboia West	1,885	1,149	60 ·95
	1,708	1,270	74 ·35
The Territories	10,315	7,220	70 .00

As specially provided by Statute, the voting in the Ter- open ritories is open, consequently there could be no spoiled or rejected ballots. It will be seen that the proportion of votes, polled to the total number of voters on the list was very much higher than in the neighbouring Province of Manitoba, the fact of this being the first opportunity that the inhabitants had of exercising the franchise, since representation was given them, may have acted as a special inducement to many to go to the polls.

64. The franchise in the Territories is somewhat different Franchise to the rest of the Dominion, every bonû fide male resident and "ntories. householder, of the age of 21 years, not an alien or an Indian

and who has resided within the electoral district for not less than twelve months preceding the election being entitled to vote.

Total proportion of votes to voters.

65. It is a curious fact that whether the Territories are included or excluded, the proportion of votes polled to the number of voters remains precisely the same, viz, 70:27.

Naturali-

66. Any person, an alien, who has resided for three years in this country can, after taking the oath of residence and allegiance before a judge, commissioner or magistrate, and having the same registered, obtain a certificate of naturalization, and become entitled to the privileges of a British subject. An alien woman, when married to a British subject, becomes thereby a naturalized British subject.

Governors General of Canada.

67. The following is a list of the Governors General of Canada since Confederation, with the dates of their respective appointments:—

#### GOVERNORS GENERAL OF CANADA SINCE 1867.

3 OF THE

69. It will be seen that there have been five complete Par- Duration of Parlisliaments and one Session of the sixth since Confederation. ment The first Parliament was the longest one, and the second was the shortest. The average length of each Session has been 87 days, or about 12 weeks, the longest Session was in 1885, viz., 24 weeks, 4 days, and the next longest was in 1867-68, viz., 16 weeks, 4 days. The shortest Session was in 1873, and only lasted 2 weeks and 1 day.

70. The next table gives the names of the ho 's of the Cabinet different Cabinet offices since Confederation, with the dates of their respective appointments. There have only been two changes of Gc rernment and three Ministries, and with the exception of from 7th November, 1873, to 17th October, 1878, Sir John A. Macdonald has been in power during the whole period.

71. In 1879 a Bill was passed dividing the office of the Depart-Minister of Public Works; the new Department assuming changes. exclusive control of Railways and Canals, and in the same Session the office of Receiver General was abolished.

1885

76. It will be noticed that the Emperor of Brazil has oldest and reigned longer than any other Monarch, having succeeded soverto the throne in 1831, at the age of six years. Queen Victoria eigns. comes next, succeeding in 1837, at the age of eighteen years. Owing to the death of William I, Emperor of Germany, on 9th March, 1888, a few days before completing his 91st year, William III of Holland is the oldest Sovereign. The King of Spain is still the youngest Sovereign in the world, being

not yet two years old.

# CHAPTER II.

# POPULATION AND VITAL STATISTICS.

Census 1871 and 1861.

77. The last census of the Dominion of Canada was taken on the 4th April, 1881, and the following table is a comparative statement of the population at that date, and on 2nd April, 1871, the date of the preceding census:—

POPULATION OF CANADA-1871 AND 1881.

reference to the whole of the Dominion outside of the seven Provinces.

Birthplaces and religions in the Provisional Districts, 1885.

80. The following is a summary of the religious and birthplaces of the people in the three provisional districts in 1885:—

CENSUS OF THREE DISTRICTS IN THE NORTH-WEST TERRI-TORIES—1885.

RELIGIONS AND BIRTHPLACES OF THE PEOPLE.

Religions.	Total.	Birthplaces.	Total.
Church of England Roman Catholic Pagan Presbyterian Methodist Baptist No religion Lutheran Congregational Jews Disciples Brethren Quakers Unitarian Protestants Universalist Adventist Other denominations Not given	9,976 9,301 7,893 7,712 6,910 778 641 209 145 106 57 37 36 28 22 22 20 1	The Territories Ontario England and Wales Manitoba Scotland Quebec Ireland United States Nova Scotia New Brunswick Prince Edward Island Germany Sweden, Norway & Denmark Other British Possessions Russia and Poland France Italy British Columbia At Sea Spain and Portugal Other Countries Not given	25,169 8,823 3,853 3,144 2,143 1,340 1,162 1,007 504 265 126 124 111 100 93 31 166 2

Natives of the three Districts.

81. The natives of the Territories comprised 52 per cent. of the population, but most of them were Indians, only 14 per cent. of the whites having been born in the Territories.

Enumeration of Indians, 82. It was not thought well to enumerate the Indians in the usual way, on account of the many difficulties in the way of doing so successfully, and their numbers were therefore taken from the books of the Government agents, who keep records in connection with supplies and treaty payments. No information, however, could be obtained regarding the follow white a populin the female ages of stood,

ans in in the there-, who payegarding their ages, conjugal condition, &c., and, therefore, the following table relates almost entirely to the ages of the white population. As a general rule the largest portion of a population is found to be under the age of five years, but the people. in the Territories it will be seen that this only applies to females, the largest number of males being between the ages of 20 and 30, a fact easily to be explained and understood, when the large number of young single men who have gone in to settle are taken into account.

CENSUS OF THE THREE DISTRICTS, 1885.

AGES OF THE WHITE POPULATION.

Ages.	Males.	Females.	Ages.	Males.	Females
Under 5 years	2,159 1,957	2,014 1,895 1,467	55 to 60 years 60 to 65 '' 65 to 70 ''	296 216 103	181 123

40 to 45 "	902 624 446	460 415 302	Not given Total	7,562	8,810 21,249

83. The following statements with reference to the conju- conjugal gal condition of the people, do not, of course, include condition. Indians:

HUSBANDS AND WIVES OF WHITES AND HALF-BREEDS IN THE THREE DISTRICTS, 1885.

	]	Husbands		Wives.			
DISTRICTS.	Under 21 years.	Over 21 years	Total.	Under 21 years.	Over 21 years.	Total.	
Assiniboia	28 4 9	3,486 681 1,976	3,514 685 1,985	204 59 112	3,110 608 1,622	3,314 667 1,724	
Total	41	6,143	6,184	375	5,340	5,715	

Excess of

84. Husbands exceeded wives by 469, which was a large number, considering the size of the population. Only 66 per cent. of the husbands were under 21 years, but 6:56 per cent. of the wives were under that age.

Proportions of wives to husbands.

85. The proportions of wives to husbands were as follows:-

WIVES TO EVERY 1,000 HUSBANDS IN THE THREE DISTRICTS-1885.

Assiniboia	943
Saskatehewan	973
Alberta	874
The Territories	

Wives were a decided minority in all the districts, but especially in Alberta.

Husbands and wives under and husbands under 21 was about the same in the three districts, over 21 husbands under 21 was about the highest in Saskatchewan :-

> HUSBANDS AND WIVES UNDER AND OVER 21 YEARS IN EVERY 1,000 HUSBANDS AND WIVES IN THE THREE DISTRICTS, 1885.

	Husn	ANDS.	Wives.		
Districts.	Under 21 years.	Over 21 years.	Under 21 years	Over 21 years.

of the lands o acres, s increas have be vated acre. The proportion of cultivated to occupied area was only 5.07 per cent., but it must be remembered that by far the largest portion of the occupied area is used for stock raising, the number of acres held under grazing leases in Alberta and Assiniboia alone being on the 31st December, 1887, no less than 4,466,844.

The following is a statement of the occupiers of lands occupiers and lands occupied in 1885.

## CENSUS OF THE THREE DISTRICTS - 4885.

OCCUPIERS OF LANDS AND LANDS OCCUPIED.

		Oc	CUPIERS C	m		
District.	Total occu- piers.	160 acres and under.	161 acres to 320.	321 acres and over.	Total acres occupied.	Total acres cul- tivated.

Cooperage	1	200	1	600	200	1,00
Dress-making, &c	1	600	1	200	200	60
Flour and grist mills	8	121,000	33	12,330	239,900	365,29
Furniture-making	3	11,600	9	4,500	1,800	17,00
Grain chopping mills	3	2,800	8	850	8,250	15,80
Gunsmithing	_ 1	400	1	450		1,00
Lime kilns	16	1,926	38	1,487	420	6,50
Photographic galleries.	1	600	1	750	600	3,00
Printing offices Saddle and harness ma-	5	28,500	18	10,800	1,770	21,00
king	8	7,500	15	7,920	14,980	32,80
Sash and door factories.		12,200	16	10,300	58,000	86,00
Saw mills	13	490,000	218	60,385	92,850	227,58
Tailors and clothiers	3	600		3,250	2,348	6,10
Tinsmithing	10	12,900	14	9,850	25,925	52,40

91. No comparison of value can be made in detail between comparisons with the above figures and those of 1881, but the following fig-1881. ures will show the great progress that had been made in the intervening four years:—

	1881.	1885.	Increase.
Capital invested	\$ 104,500	\$ 771,451	\$ 666,951
Hands employed	83	546	463
Yearly wages	35,425	186,917	151,492
Value of raw material	79,751	. 518,428	438,677
Value of articles produced	195,938	1,029,235	833,297

These figures may be taken as fairly representing the values they profess to, but as the enumerators have to trust almost entirely to the owner's estimates, there is naturally a tendency in some cases to over valuation.

ccupa-

1885:

portion ursuits, Northf policeAnimals and field products in the three Districts, 1885.

92. The next tables give the census returns of the number of animals in, and the quantity of butter and cheese made in the three districts in 1885, also particulars concerning the field products in the same year, and a column has been added to this, as well as to the next table, giving the corresponding figures for the whole North-West, in 1881, in order that a general idea may be obtained of the progress made during the last four years.

Other furs and pelts	389	216	314	919

93. The information in the foregoing table was obtained Furs and principally from the traders, and not as had been the custom in previous census, from the hunters themselves, for it was found that there was considerable liability to have the skins reported twice, once by the hunter, and again by the trader; it was, moreover, impossible to obtain any correct information from the Indian hunters. The figures are not supposed to be absolutely correct, and it is altogether likely that some of the animals were killed outside of the district, but they represent a very fairly correct statement of the number of skins disposed of by the traders during the census year.

94. The North-West Territories constitute not only the Fur prelargest but almost the last remaining fur preserve in the the Northworld, every variety of fur being found within their

limits, and they yield three quarters of all the furs sold in the markets of Leipsic and London, which are the great fur markets of the world. Beaver, which were formerly so abundant, have become very scarce indeed, and their fur has gone up in value more rapidly than that of any other animal, but as they are easily domesticated, and, in addition to their valuable skins, make capital food, it has been suggested that preserves should be created in suitable parts of the Territories, to be attended to by the Indians, who would thus be furnished with sources both of profit and food.

Buffalo in

95. Thirty-six buffalo were reported to have been killed during the year, but it is most probable that they were actually killed outside, though possibly by residents in, the three districts. The buffalo, which ten years ago could be counted by millions, is now practically extinct; as far as known there being none left in Canada except a herd of about 68, kept at Stony Mountain, Manitoba, which are semi-domesticated, and with which successful crosses with domestic cattle have been made. The total number left in the United States is variously estimated at from 600 to 1,000.

Cross between buffalo and domestic catile. 96. In the second report of the Committee appointed by the Senate to collect information regarding the natural food products of the North-West, it is stated in regard to the reproduction of the buffalo as a food supply, that in the changed condition of the country, the presence of those animals would probably disturb the present agricultural training of the Indians, and interfere with the farming and herding efforts of the white settlers, but attention was called to the evidence received with reference to successful crosses between a Buffalo bull and Durham cow, and a Durham bull and Buffalo cow, at Stony Mountain,

the former cross being the one preferred; "the hybrid "animal thus produced being said to be larger, hardier, "stronger, heavier and more easily wintered than the "domestic animal, with the additional advantage of "yielding a skin as heavily but more evenly furred than "the buffalo robe, and worth, it was said, as much as the "full price of a domestic animal." The Committee recommended that the Government Experimental Farms about to be established in Manitoba and the Territories should continue these experiments, and also endeavour to obtain hybrids between the moose and musk ox and domestic stock. practicability of a successful cross with the buffalo having been fairly established, it is likely that in the near future this may prove a very valuable source of food supply as well as of profit from the heavy skins. It was suggested before the Committee that a cross between a buffalo and Galloway or Polled Angus would produce fine black robes, which would be worth from \$75 to \$100 each.

97. The total quantity of fish caught in the census year, Fish in : according to the returns was 3,713 barrels, but this amount West, can only be considered as approximate, and the quantity actually taken was probably far larger. Owing to the growing scarcity of fish in consequence of the large exports to the United States, the committee above mentioned, strongly recommended the prohibition of the exports of almost all fish, and the establishment of a local hatchery for the breeding of certain varieties at some point central for distribution; the varieties recommended being the sturgeon, whitefish, gold eye, catfish, perch, eels, pike, maskinongé and carp.

98. The total number of churches in the 3 districts was 66 Churches viz., 19 Church of England, 18 Presbyterian, 15 Roman Three Districts 1885. Catholic, 11 Methodist, and other Denominations 3.

 $6\frac{1}{2}$ 

proportion therefore to the number of followers to each religion, there were 525 persons to each Church of England Church, 428 to each Presbyterian, 620 to each Roman Catholic, and 628 to each Methodist. There were also one hospital, one orphanage, two colleges, and five convents.

Census of Manitoba 1886. 99. A census of Manitoba was taken on the 31st day of July, 1886, with the following result:

# CENSUS OF MANITOBA-1886.

#### POPULATION AND OCCUPIED DWBLLINGS.

Electoral District.	1	Occupied Dwell-

Total	59,594	49.046	108,640	23,871

Increase since 1881. 100. The last census of Manitoba was taken on the 4th April, 1881, when the population was 65,954. Soon after that date, however, a large portion of the Province, known as the Manitoba Extension, was taken away and added to Ontario and the District of Keewatin, reducing the area of Manitoba from 123,200 square miles to 60,520. For the purpose of comparison, therefore, the population of the Extension should be deducted from that of the Province in 1881, which reduces the numbers to 62,260, showing that the increase in the five years, 1881-1886 was 74:49 per cent., which, while not perhaps quite as high as was expected, still shows a very remarkable rate of increase. The numerical increase was 46,380.

101. per 10 per 10 of po female count immig male i increa above ance impos off in falling becom per 1,0 and 50

the 4th on after known dded to e area of the purxtension n 1881, that the

er cent., xpected, The e.

101. The proportion of females to males was 82'80 females Proportions of per 100 males; in 1881 the proportion was 77.26 females males and females. per 100 males. In old settled countries, where the growth of population depends entirely on the natural increase, females are always found to predominate, but in newercountries, where the population is largely made up by immigration, the reverse is almost invariably the case, the male immigrants being in excess of the female ones. The increase in the proportion of females, as shown by the above figures, probably indicates, after making due allowance for the natural increase, the extent of which it is impossible to determine, that there has been a slight falling off in the excess of male immigration since 1881, which falling off may be expected to continue as the country becomes settled and developed The average ratio of sexes per 1,000 of population in old countries is about 495 males and 505 females (Statistical Abstract, 1886, p 90), in Manitoba in 1886 the ratio was 549 males and 451 females.

102. There was an increase of 11,068, or 86.44 per cent. in occupied the number of occupied dwellings, but the number of dwellings inhabitants to each dwelling was less than in 1881, being 4.55 as compared with 5.15. This is doubtless due to the number of single men who have immigrated and are for the present living alone on their homesteads.

103. There was an increase in the number of uninhabited Uninhablhouses of 1,162, being an increase of no less than 146 per ted houses cent., and as the proportion of dwellings per 100 of population increased from 2062 per cent. in 1881 to 23.77 per cent. in 1886, it is evident that there has been an unnecessary excess of building operations, the consequence, no doubt, of the unnatural inflation in 1882. There were only 41 uninhabited houses in Winnipeg in 1881, while there were 436 in 1886. The total number of families was 25,155,

being at the average rate of 4.31 persons to a family. This was a lower proportion than in 1881, when it was 4.65. In 1881 the number of persons to the square mile, when the area of the Province was 123,200 square miles, was .53; in 1886, when the area had been reduced by 62,680 square miles, the number was 1.79 per square mile.

Religions and birthplaces in Manitoba 1886.

104. The following table is a summary of the religious and birthplaces of the people in Manitoba in 1836:—

CENSUS OF MANIFOBA, 1886.

hose of or 1886,

105. The next table gives the ages of the people in 1886. Ages of the people in 1886. The proportion of children under five years has not varied in the people as much as might have been expected, being only a trifle higher—viz: 15.55 per cent. of the total population in 1886, and 14.88 per cent. in 1881, but there was a larger difference in the numbers between the ages of 20 and 30, the proportion being 20.51 per cent. as compared with 24.24 per cent. in 1881. There was an increase in the males and a decrease in the females under 20, as shown by the following figures:—

	Males.	Females.
1881	42.70 per cent.	51.50 per ceut.
1886	43:71	49.87 "

# CENSUS OF MANITOBA, 1886. AGES OF THE PROPLE.

45 to 50 '' 50 to 55 ''	2,013 1,603	1,448	Total	59,594	49,046

The population was slightly older in 1886, those under 21 forming 46:49 per cent. of the whole number, as compared with 47:38 in 1881.

106. There was an increase in the number of females Females between the ages of 15 and 45, the proportions being 4,437 females between those ages in every 10,000 females living in 1886, and 4,326 in every 10,000 in 1851.

Husbands and wives in Mani-

107. The following is a comparative statement of the number of husbands and wives in Manitoba in 1881 and 1896, distinguishing between those under and over 21 years:

HUSBANDS AND WIVES IN MANITOBA-1881 AND 586.

V	Husbands.		WIYES.			
YEAR.	Under 21 years	Over 21 years.	Total.	Under 21 years.	Over 21 years.	Total.
881 886,		10,872 17,351	10,948 17,389	686 699	9,857 16,272	10,543 16,971

Decrease

108. A very large decrease will be seen to have taken place bands and in the number of husbands and wives under 21 years, more der 21. particularly in that of husbands, and there is no immediate way of accounting for it, unless it has arisen from the fact that in 1881 an attempt was made to enumerate Indians the same as whites, and particulars of their conjugal condition were taken which could not fail to be more or less inaccurate.

Increase in number of wives.

109. It was natural to expect an increase in the proportion of wives to husbands, many husbands coming in first to find land and then sending for their families; there were 9,759 wives to every 10,000 husbands in 1886, as compared with 9,630 wives to the same number of husbands in 1881.

Husbands in every 10,000, 1881 and 1886.

110. The following figures give the numbers of husbands and wives under and over 21 years in every 10,000 of each class respectively in 1881 and 1886:

111. The single males of 20 and upwards, and the single able males females of 15 and upwards, i. e., the bachelors and spinsters females. of the population, numbered 15,174 and 11,085 respectively. Adding to these numbers the widowers and widows at all ages, viz., 979 and 1,857, it is found that the total marriageable population amounted to 16,153 males and 12,392 females, the former exceeding the latter by 3,761, the marriageable males being in the proportion of 130 to every 100 females. In 18-1 the marriageable males were in the proportion of 162 to every 100 marriageable females, showing that the excess of bachelors is being steadily reduced. It follows almost as a matter of course that the single males exceeded the single females, the excess amounting to 9,431. In every 10,000 single men there were 7,765 single women. In 1881 the similar proportion was 6,137.

112. The percentage of married to total married and Proportion of marriageable men was about the same as in 1881, while marriageable men that of women to total married and marriageable women and wowas somewhat smaller, as is shown by the following figures:-

PERCENTAGE OF MARRIED TO TOTAL MARRIED AND MARRIAGE-ABLE MEN AND WOMEN IN MANITOBA-1 81 AND 1886.

	Males.	Females.

Proportion of married ulation.

113. The following is a comparative statement of the percentage of married, widowed, unmarried and children to the total male and female population respectively in 1881 and 1836 :-

PERCENTAGE OF MARRIED, WIDOWED, UNMARRIED AND CHILDREN TO TOTAL MALE AND FEMALE POPULATION IN MANI-TOBA-1881 AND 1886.

#### MALES.

YEAR.	Married.	Widowers.	Bachelors, 20 and over.	Children under 20.
1881	29·43	1·42	26·36	42·79
1886	29·18	1·64	25·46	43·72

#### FEMALES.

YEAR.	Married.	Widows.	Spinsters, 15 and over.	Children under 15.
1881	36·67	3·20	18·87	41·26
	34·60	2·77	22·50	40·13

The changes among the males are about what might have been expected, except that there is a slight decrease in the proportion of the married, but among females it is not quite the same. The proportions of married, widows and children are smaller, and of spinsters decidedly larger.

114. It may be said to be a general rule that persons support- 114. It may be said to be a general rule that persons dependent between the ages of fifteen and sixty-five are able to contribute more or less to their own maintenance, the majority as a rule being able to support themselves altogether, while those under fifteen and over sixty-five rely generally on others for support, whence it follows that the physical effectiveness of a country may be pretty accurately gauged by the proportion of its inhabitants at the middle period of life.

115. The following table shows the proportions in Mani- Relative toba in every 10,000 persons living, and in every 10,000 strength of the population of males living at the sustaining, as compared with those at Manltoba the dependent ages, in 1881 and 1886:—

RELATIVE STRENGTH OF THE TOTAL AND OF THE MALE POPULATION OF MANITOBA-1881 AND 1886.

a fair way to attain their normal excess. The proportion of females in the rural population was almost the same as in 1881, being 79.51 per 100 males, as compared with 78.01 in the former year. The proportion of urban population to the total population of the Province has increased very largely, since 1881-viz., from 12:10 per cent. to 25:88 per cent., and is now higher than was the proportion in any other Province in 1881. (Statistical Abstract, 1885, p. 80.)

the people occupations of the people in Manitoba in 1886:—
toba 1886.

122. The number of persons engaged in agricultural pur-Agriculsuits was very large, and slightly in excess of the pro-class. portion similarly engaged in 1881, being 210 in every 1,000 persons as compared with 205 in the former year.

123. The large increase in the number of railway and Railway telegraph employés, viz., 490, is a proof of the large extension of these facilities in the Province. There was a decrease of 1,125 in the number of hunters, but it is probable that a number of Indians were returned as such in 1881.

124. The following is a list of the industrial establish- industrial establishments in Manitoba in 1886, showing the number of each ments in Manitoba kind, the amount of capital invested, number of hands em-1886. ployed and other particulars :-

sible to necesount of s, how-

126. A comparative statement of the several amounts, Industrial showing the increase in each, between 1881 and 1886, is montal 1886 given below:

compared.

INDUSTRIAL ESTABLISHMENTS IN MANITOBA-1881-1886.

	1881.	1886.	Increase.
Number of establishments	344	553	209
	\$1,383,331	\$3,474,583	\$2,091,252
Number of hands employed	1,921	2,307	386
Yearly wages paid	\$755,507	\$971,537	\$216,030
Value of raw materials	\$1,924,821	\$2,887,677	\$962,856
Value of articles produced	\$3,413,026	\$5,526,166	\$2,113,140

The amount paid in wages in 1881 was at the average rate of \$393 per annum per each hand employed, in 1886 the average had risen to \$421 per hand. Perhaps the largest and most important increase was in flour and grist mills, the increase in number being 18, in hands employed 158, in wages paid \$85,048, in capital invested \$701,364, in value of raw material \$1,027,982, and in value of articles produced \$1,538,453.

127. The next table gives the yield of field products in Field products in duots in Manitoba in 1886, according to the census returns, together Manitoba with the totals of the census of 1881, as far as available.

Cultivation of hay and wheat. 128. Cultivated was not separated from prairie hay in 1881, the total crop in that year having amounted to 185,279 tons. The amount of cultivated hay is at present very small, the prairie grass yielding more to the acre, and being amply sufficient for all services. The increase in wheat is naturally the largest, upwards of 350,000 acres having being brought under the cultivation of this grain since 1881. The yield to the acre was apparently larger in 1881, the average having been 20.1 bushels, as compared with 18.4 bushels in 1886.

Animals in Manitoba 1886. 129. The next table gives similar information respecting the number of animals and their products. The largest proportionate increase was in the number of swine, and the smal to a

184. In view of the proposed negotiations with reference Area da, to the entry of Newfoundland into the Confederation, the fund following information will be of interest:

The Island of Newfoundland, which, with Labrador, is the only part of British North America not included in the Dominion, is situated on the north-east side of the Gulf of St. Lawrence, and is 350 miles long by about 180 wide, with an estimated area of 40,000 square miles. The coast of Labrador has an area of about 120,000 square miles, but the number of inhabitants is very limited. A census of the colony was taken in 1884, when it was found to contain 197,835 persons, of whom only 4,211 were living in Labrador.

182. The sex of those living in Labrador was not given, but of the 193,124 inhabitants of Newfoundland, 99,344 were Populamales and 93,780 females, being an excess of males of 5,564; Newthe proportion of females being 94.30 per 100 males. population of St. John, the capital of the colony, was 83,145, viz., 18,508 males and 19,642 females, the numerical excess of females being 1,139, and the proportion 106 15 females per 100 males.

133. The Roman Catholic, Church of England and Weslevan are the principle religious denominations, the num- Religiona bers and proportions being as follows:-

	Number:	Proportion to Population.
Roman Catholic	75, 254	38.13
Church of England!	69,000	34.96
Wesleyan	48,767	24 • 71
Presbyterian	1,495	0 • 75
Other denominations	1,470	0.74
Not given	1,349	0.68

134. The factories, mills, &c., numbered 198 and employ- Industrial ed 2,459 hands; their total value was \$1,161,352, and the ments. value of goods produced \$1,891,167.

Farm stock. 185. The total area under cultivation was 46,996 acres, and the numbers of farm stock were as follow:—Cows, 19,088; horses, 5,586; sheep, 40,826; swine, 21,555; and goats, 7,984

m

m

ab

m

th

th eig

an

188

Fishing industry.

186. The principal industry is fishing, principally cod and seal, and 60,419 persons, being 80.61 per cent. of the population, were engaged in it, the total number of vessels and boats employed being 25,225. In the Bank fishery for cod 60 vessels, aggregating 2,507 tons and employing 1,695 persons were engaged, and in seal fishing there were 21 steam vessels of 5,877 tons and employing 4,778 men. The number of seals caught was 865,931.

Educa-

137. In 1885, there were 204 Roman Catholic schools, 174 Church of England, 107 Methodist and 7 others, making a total of 492, at which the attendance was 27,322. The Government grant amounted to \$4.17 per head of attending schoolars, and the proportion of denominational population attending school was: Church of England, 15.25 per cent.; Methodist, 13.63 per cent.; Roman Catholic, 13.01 per cent.; other denominations, 10.05 per cent.

Area of

138. The area of Canada is estimated to contain 3,610,257 square miles. It is the largest of all the British possessions, embracing very nearly one-half of the whole Empire. The continent of Australia is the next largest, having an area of 2,944,628 square miles, and the area of Tasmania and New Zealand added to this, makes the total area of the Australasian Colonies 3,075,080, or 535,227 square miles less than that of Canada. The total area of the British Empire is 7,999,618 square miles. The combined area, therefore, of Canada and the Australasian Colonies comprises very nearly seven-eighths of the whole Empire.

Area of Europe. 139. The area of the whole continent of Europe is

-Cows,

		A Company of the Comp

The area of the Province of Manitoba was erroneously stated at 123,200 square miles in the Statistical Abstract, 1886, that portion which was added to the District of

Keewatin and to Ontario not having been deducted. The areas of the Provinces of Ontario and Quebec can only be considered as approximate, the northern boundaries of both Provinces not having yet been exactly defined. It will be seen that Canada has an area of inland water surface which is alone 18,885, square miles larger than the combined area of Great Britain.

Density of popula-

143. Prince Edward Island is the smallest of all the Provinces, but is more than twice as thickly populated as any other Province, the proportion being 510 persons to the square mile. Nova Scotia comes next in density of population, with 210 persons. The following is the order in which the Provinces stand, according to density of population:

Prince Edward Island, Nova Scotia, New Brunswick, Ontario.

Quebec, Manitoka, British Columbia. Ad Ce

Book.

#### PART II. - VITAL STATISTICS.

147. Twenty-two towns made returns of mortuary statistics Collection for the year 1886, and with the exception of certain figures statistics. collected by the Provincial Government with more or less accuracy, these returns are the only means of information respecting the urban rate of mortality in Canada that are available, and they, moreover, comprise the only vital statistics of any nature collected by the Dominion Government, except such as are obtained at the taking of each census, and except those statistics of the French population of Quebec, which, with the assistance of the Government, are taken by the Roman Catholic Church. The large extent of territory, and consequently the great outlay that would be necessary have hitherto prevented the adoption by Government of any comprehensive plan for the collection of this class of statistics, but as their importance is becoming more fully recognized every day, and as the Government have in contemplation the establishment of a Statistical Bureau in connection with the new Department of Trade and Commerce, it is possible that some endeavour will be soon made to secure correct returns of births, deaths and marriages throughout the Dominion, though it will necessarily be some time before they can attain any very high degree of accuracy.

148. The following table gives the number of deaths in Deaths in twenty-two cities and towns in Canada, together with the towns in Canada, ratio per 1,000 deaths at different ages. The figures are taken from the mortuary statistics, and while fairly correct must be accepted with a certain amount of reserve.

DEATH RATE IN SOME OF THE PRINCIPAL CITIES AND TOWNS IN CANADA, 1886.

of child number deaths r per cent 1885 wl as befor from thi

debility from pr under or

death radistinct

149. The heaviest death rate in the table was that of Denth Sorel, viz., 44.88, as this is the first time this place has pared. made complete returns, it is not possible to know whether the above figures are anywhere near the normal rate or not, but it is probably they are not. The town appears to have suffered from a visitation of diphtheria and throat affections, the combined deaths from these two causes having been 92 out of a total of 303, or 30.36 per cent. St. Hvacinthe, which had the second highest rate last year, viz., 48 83, is again second in the list, with a reduced rate, but still a very high one; out of a total of 264 deaths, 106. or 40.15 per cent., occurred from atrophy and debility and teething, 82 of which were of infants under two years of age. There were also 39 deaths from small-pox, being an increase of 3 over the preceding year. The death rate in Montreal was lower than it had been since the returns were first made, but no particular value can be attached to any comparison of this description, for previous to 1886 the various populations were only estimated, and in many cases considerably under or over the mark, now, however, that the plan of taking the population, according to the municipal returns in each year, has been adopted, comparisons of the

150. The largest number of deaths was in every instance peaths of of children under 5 years of age, the proportion to the total number having been 52.43 per cent. There were 5,738 deaths returned of children under 1 year of age, being 34.54 per cent. of the total deaths, a larger proportion than in 1885 when it was 31.6 per cent. Diarrhœal affections were. as before, most fatal to these young children, 1.428 deaths from this cause being recorded, 1,332 from atrophy and debility, 702 from diseases of the respiratory organs, and 332 from premature birth, so that 66 15 per cent. of the deaths under one year resulted from the above four causes.

death rate between places and years will soon become of

distinct value.

Deaths of total number of deaths of illegitimate children returned mate chil- was 1.146, but with the exception of those from Montreal dren. Quebec and Ottawa, the figures are far too wide of the mark to be of any value. Owing to the natural desire for concealment on the part of the parents, the difficulty of obtaining accurate returns of this class of deaths is excessive. Out of the above number, no less than 1,080 or 94.24 per cent, were under one year of age. The number of cases of children still-born returned was 756. The number of deaths recorded from suicide was 31, viz., 22 males and 9 females, the number returned in 1885 from 19 cities, was 21. The above number of suicides were divided among 12 out of the 22 cities, the largest number, viz., 9, being from

152. The order of fatality was somewhat different from fatality that of 1885, as will be seen from the following arrange. 1885, 1886 ment, the most fatal disease being placed first:

1885.

Atrophy and debility. Lung diseases. Phthisis. Diarrhoeal affections Cerebro spinal affections. Diphtheria Diseases of heart and blood vessels. Throat affections.

1886.

Atrophy and debility. Diarrhoal affections. Lung diseases. Phthisis. Cercbro spinal affections. Diphtheria. Throat affections. Diseases of heart and blood vessels.

153. The total number of deaths from atrophy and de- Deaths bility was 5 less than in 1885, but it is still the largest arrophy number from any one cause. Out of 2,005 deaths from this bility. cause 1,477 were of children under 5 years of age, being 73.66 per cent. of the whole number, a proportion slightly less than that of 1885, which was 74.51 per cent. wa an increase of 546 or no less than 42.79 per cent. in the number of deaths from diarrhoal affections, of From diarrhoad this number 1,427 were of children under one year, and 318 affections. of children under 5 years, so that 95.77 of all the deaths from this cause were of children under 5 years, a proportion. higher than in the preceding year, when it was 94.20. Ottawa 24.37 per cent. of the total number of deaths from all causes, were of children under one year, from diarrheal affections.

154. There was a total increase in the number of deaths From from phthisis of 214, of which 104 were returned from the phthisis and lung 3 cities not included last year, leaving an increase of 110 deaths from this cause as compared with 1885, an increase of 7.72 per cent. Similarly there was an increase of 138 or 9.34 per cent. in deaths from lung diseases. The total deaths from all kinds of lung diseases were 3,101 (i.e. in the same 19 cities in 1885 and 1886), as compared with 2,901 in 1885,

From diphtheria.

showing that there was an increase in 1886 of 200, or 6.89 per cent. There was again a large increase of the number of deaths from diphtheria, and in spite of all the precautions taken, this disease seems to be steadily on the increase. There was an increase as compared with 1885 of 138, or 18:35 per cent. Comparing the returns from 10 cities in 1884 with returns from the same places in 1886, there was an increase of no less than 53.71 per cent. in the number of deaths from diphtheria. It is well known that this diseases is particularly fatal to children, and out of 988 deaths in 1886, 911, or 92:20 per cent. were of children under 11 years of age. In Sorel 13.20 per cent. of the whole number of deaths were from this cause. The increase in deaths from diphtheria appears to be very general in England,\* in 1885 the number was 19 per cent. above the mean for the previous 10 years, and in 1886 in Ireland†the number was 18 in excess of the average for the previous 10 years.

From cerebrospinal affections.

155. There was a decrease of 75 in the deaths from cerebrospinal affections as compared with 1835, and an increase of 87 in deaths from affections of the throat. From diphtheria and affections of the throat, deaths in Sorel formed 30.36 per cent. of the total number.

Death rate in principal cities in Canada.

156. The following table, the figures for which are taken, with the exception of the average column, from the mortuary statistics, gives the death rate per 1,000 of population in six of the principal cities in the Dominion, but, as before explained, the figures must not be taken as by any means conclusive, owing to the inaccuracy of the estimated populations, on which they are based, previous to 1886:—

• 48th Report of the Registrac General. † 23rd Report of the Registrar General (Ireland.)

Cities.	1883.	1884.	1885.	1886.	Average for four years.
Montreal	30.98	33:05	54-25	27 99	36.56
Toronto	22.40	20.30	20.01	21.50	21.21
Hamilton	20.59	19.66	19.01	20.71	19.99
Halitax	19:56	20.92	21.72	20.32	20.68
Ottawa	26.94	23.11	24.88	28.76	25.93
St John, N B	22.03	22 29	24.32	21.18	22.43

157. All deaths from typhus, enteric or typhoid and Typhus and simple continued fevers are included in one item, and it is typhota not, therefore, possible to separate exactly the deaths from the different diseases; but as cases of pure typhus are extremely rare in this country, it will not be very far wrong to consider all the deaths under the above head as deaths from typhoid fever. The absolute difference between typhus and typhoid has now been so thoroughly well established that it would be well if the two fevers were treated as two separate and distinct diseases. As long ago as 1869 they were separated in the Registrar General's returns for England and Wales, and in his presidential address to the Epidemiological Society on 9th November, 1887, Dr. Thorne said that since the differentiation of these two poisons, the deaths from tpyhus had fallen from 1.9 to 0.1, and from typhoid from 3.9 to 1.7 per 10,000 living. He further stated that it had been now conclusively established that they were two distinct diseases, due to two separate specific contagia and developing under two altogether different circumstances.

158. The long continued drought of the summer and causes of typhoid. autumn of 1887 has been held responsible for a very general outbreak of typhoid fever and diphtheria, and though the returns are not yet available, there is no doubt that in pro-81

portion to population, the deaths have been very numerous. Great as the advances are that have been made in sanitary conditions in this country of late years, it is clear that the arrangements are by no means as perfect yet as they ought to be. Bad drainage in one form or another is almost invariably the original cause of these diseases. In the address above alluded to Dr. Thorne says that typhoid is due to specific infection, always operating through the agency of tilth, and which finds its nidus in conditions brought by failure to deal properly with the solid and liquid refuse of populations. Its potency of infection is such that when present in potable water in quantities infinitesimal, and altogether beyond the reach of discovery either by chemistry or physics, it is yet able to lead to widespread disaster. Since 1869 no less than \$40,000,000 have been spent in England "on sanitary work aimed essentially at the removal of conditions favourable to this and allied diseases."

Deaths from typhoid.

159. As no returns are made, it is, of course, not possible to ascertain the number of deaths from typhoid in the Dominion, the only figures available being those in the mortuary statistics, and the following is a comparative statement of the number of deaths from typhoid fever in 19 cities in 1885 and 1886:

CITIES.	1885.	1886.	CITIES.	1885.	1886.
Montreal	· 96	92 38	Guelph Belleville	3	2
TorontoQuebec		16	Chatham	4	5

y of t by se of hen and mis-

ster. t in oval

sible the morstaten 19

1886.

245

160. According to the above figures, the deaths from peaths typhoid and simple continued fever in 19 cities with a phoid in population of 675,674 in 1886 was 0.86 per 1,000 living. Kingdom In London in 1885, with a population of 4,083,928, the deaths from typhoid were 0.15, and from simple and ill defined fever 0.02; in the same year in England and Wales from the same causes the deaths were 0.17 and 0.02 respectively per 1,000 living. In Ireland in 1886, the deaths from the same causes, with a population of 5,174.886, were 0.14 and 0.07 respectively per 1,000 living. While the death rate in London from both causes combined was 0.19 per 1,000 living, in Montreal it was 0.49 in Ottawa 0.45, and in Toronto 0.82.

161. Serious as these figures are in themselves, when cause of the returns for the current year are published they will be break or found still more alarming, and it is plainly the duty of Queenscivic and municipal authorities to take vigorous and immediate steps towards remedying this dangerous state of affairs. The colony of Queensland in 1884 suffered from a similar visitation, and the following extract from the Register General's report for that year describes so closely the condition of affairs in Canada, that it is worth quoting: "The absence of the ordinary rain, cleansing the open " water-courses and drains in our large centres of population. and also washing all impurities from the surface, rendered "the task imposed on the various Boards of Health of " cleansing our cities and towns, a very difficult one. It is "evident from the result that, unaided by nature in the "manner indicated, they have been unable to combat "successfully with the death-dealing germs engendered "during the hot and dry season in 1884. The increased " mortality from this cause, the highest ever recorded in the "colony, must be looked upon with the utmost gravity, " and those charged with the sanitary conditions of our

"townships should make strenuous efforts to fight against this fatal disease, one which in nearly all cases attacks the very flower of the population, those in the prime of life and strength. The more glaring sanitary defects may have been dealt with by them, but it is apparent that many death-dealing nuisances are still in existence to cause such a heavy loss of life from typhoid fever, as that which occurred last year."

Typhoid and diphtheria in Toronto. 162. The report of the Toronto Local Board of Health for 1887 calls special attention to the serious increase of diphtheria and typhoid fever in that city. The cases of typhoid increased from 52 in 1886 to 193 in 1887 and of diphtheria from 214 to 625. As has been pointed out, these diseases are pre-eminently filth diseases, and as such are more or less preventable if only proper precautions are taken. It is only too apparent that "many death-dealing "nuisances are still in existence," and it is doubtful if in many places even "the more glaring sanitary defects have "been dealt with."

Extract from report of Toronto Board of Health. 163. The following extract from the Toronto Report is full of truth, and should be read by every one, the conditions being possible in almost every part of the Dominion, but more particularly applicable to cities, towns and villages:

"So long as privy pits continue in the built up parts of cities, storing up filth to putrify during warm weather, and give forth noxious gases, so long as wells containing foul organic matter continue to be used, so long as cisterns with putrified rain water remain in yards, often near windows and doors, so long as the yards continue to be befouled by kitchen slops and fluid excrement from want of house drainage, so long as stables are allowed with flooring which absorbs the liquid manure, and allows it to pass into the ground, and the manure is allowed to accumulate lying upon the ground and exposed to the rain, and so long as garbage is used for filling up low ground

164. Water is always a most important factor in spreading Purificatyphoid fever, and whenever the slightest suspicion of dan-water. ger exists, it should be always boiled before using. It is also said that one-half grain of alum to each gallon of water will render it comparatively pure and free from contamination.

165. There was a slight decrease in the number of deaf and dumb in Manitoba in 1886, the proportion being one in every 1,357 persons as compared with one in every 1,346 in Manitoba and the 1881. There were 19 deaf and dumb in The Territories in Three Districts, 1885 heing one in every 2,545 of the population. There was a decided increase in the number of those of unsound mind, the proportion being one in every 1,308, in 1881 it was one in every 1,090. In The Territories the total number was 10, being one in every 4,862 persons. The decrease in the number of blind persons in Manitoba in 1886 was very marked, the number being only one in every 6,790 persons, against one in every 2,127 in 1881. In The Territories the proportion was very large indeed, being as high as one in every 819 persons, this high rate is presumably caused by the dirt and smoke among the Indians.

<sup>\*</sup>Toronto Board of Health Report, 1887 p. 17.

## CHAPTER III.

#### FINANCE.

The fiscal year.

166. The fiscal year of the old Province of Canada used to be identical with the calendar year, and terminate on the 31st December; in 1864, however, a change was made, and it was decided to commence the fiscal year on the 1st July and end it on the 30th June. At Confederation the same plan was adopted for the Dominion, and has since been maintained. As therefore, all financial and commercial returns, and as a general rule departmental reports, are made up to the 30th June in each year, the fiscal year beginning on the 1st July and ending on the 30th June, is the one spoken of and refered to throughout this work, except where specially mentioned.

Conversion of foreign currency.

167. In all cases where figures relating to foreign countries have been used, their values have been first changed into pounds sterling, and then converted into currency at the rate of \$4.86.66. For the sake of convenience, cents have been omitted from most of the tables, and only used with reference to amounts per head and similar calculations.

Consolidated Fund. 163. The receipts from the sources of the ordinary revenue of the country are paid into what is called the Consolidated Fund, and payments thereout are made to cover the ordinary expenses. These receipts and payments therefore constitute what may be called the regular income and expenditure of the country, and the figures relating thereto are among the principal indicators of its financial and commercial condition.

Sources of revenue.

169. The ordinary revenue is derived from a variety of sources, which may, however, be divided into two classes viz., "Taxation" and "Other sources." The amounts raised by taxation consist solely of Customs and Excise duties,

and the from to ordina provin expens

170. expend

171.

precediture and derived crease from e from vaccoun less that charge a large was als in the

on accorevenuand she

and those raised from other sources consist of money derived from the postal service, railways, public works &c. The ordinary expenditure provides for the charges for debt and provincial subsidies, charges on revenue, and the current expenses of the country.

170. The following figures give the ordinary revenue and Revenue and and exexpenditure for the year ended 30th June, 1887:-

Expenditure ..... 35,657,680 Revenue in excess of expenditure......

171. The revenue was \$2,577,953 in excess of that of the Increase preceding year, while there was a decrease in the expendicate. ture amounting to \$3,353,932. The increase in revenue was derived almost entirely from taxation, there being an increase in the receipts from Customs duties of \$3,005,250 and from excise duties of \$455,296, and a decrease in receipts from various sources of \$882,593. The amount paid on account of the North West Rebellion of 1885, was much less than that paid in the previous year, and was moreover charged to a different account (see par. 176) which facts to a large extent explain the reduction in expenditure. There

172. The following table gives the receipts and payments The Conon account of the Consolidated Fund, that is, the ordinary Fund, 1868-1887. revenue and expenditure of the country for the last 20 years, and shows the surplus or deficiency in each year:

was also a decrease in charges for debt and subsidies, and

in the expenses of Legislation.

1887	35,754,993	35,657,680	97,313		

Surplus and deficit of revenue.

173. In thirteen years out of the twenty that have elapsed since Confederation, there has been a surplus of revenue, and in the remaining seven an excess of expenditure. The total amount of surplus during the period has been \$30,375,-863, and of deficit \$16,044,817, being a net excess of revenue over expenditure of \$14,331,046. The revenue raised in 1887 was, with one exception, the largest ever raised (that raised in 1883 having exceeded it by \$39,656.) and was \$22,067,065 in excess of that of 1868, the first year after Confederation, being an increase of 161 per cent. After deducting the war expenditure from the expenditure of 1886, it will be seen that there was a decrease of ordinary expenditure in the year under review amounting to \$176,712, with

the ex largest \$22,17 ture he than to attend it will expend revenuture the

the exception however of 1886, the expenditure was the largest since Confederation, exceeding that of 1868 by \$22,171,588, being an increase of 164 per cent. The expenditine expenditure ture has therefore increased in a somewhat larger proportion than the revenue, but when the difficulties and expenses attending the opening up of new country are considered, it will be seen to be inevitable that at the beginning the expenditure should increase in faster proportion than the revenue, and in connection with the increase in expenditure the large extent of additional territory brought under control since Confederation must not be overlooked.

174. The following is a detailed comparative statement of Heads of the various receipts on account of the Consolidated Fund from all sources in the years 1886 and 1887, showing the increase or decrease in each item:-

HE.

HEADS

CHARG

Interest of Charges of Sinking F Premium, change Subsidies \$5,093 in 1886, and there were also increases from hydraulic rents, slides and booms, and minor public works. The revenue derived from the Post Office was materially larger, showing an increase of \$111,907 as compared with an increase of \$61,661 in 1886, while the decrease in revenue from money orders in 1886 of \$1,342 was changed to an increase of \$7,026. The decrease of \$17,797 in telegraph receipts was due to the fact of the British Columbia lines have been taken over by the Canadian Pacific Kailway Company, and these lines were the only ones belonging to the Government, the revenue from which exceeded the expenditure thereon. The decrease also in interest on investments was very large, amounting to \$1,308,191.

176. The following is a comparative statement of the Heads of principal items of ordinary expenditure in the years 1886 expenditure. and 1887. The expenditure on account of the North-West Rebellion of 1885 having been charged to Consolidated Fund or revenue account in 1886 and to capital account in 1887, it has been thought advisable for the purposes of just comparison to eliminate the payments on that account in 1886 from this table, which will explain why the total of 1886 does not agree with that given in the table in par. 172.

Note. - The items of exceptional expenditure are printed in italics.

Increase and decrease of expenditure under various heads.

177. There was a decrease of \$454,079 in the amount of interest paid on the public debt, and of \$86,631 in the charges of management, and in the total charges for debt and subsidies, a decrease of \$539,761. The amount of investments for sinking funds was less by \$13,317 than in the preceding year; this fund it will of course be remembered consists of money set aside for the redemption of the public debt, and is therefore, though entered as an expenditure, practically a reduction of liability. Although a general election was held during the year, there was a decrease in the

amount expended for legislation of \$60,476, but if the sum of \$141,000 for extra sessional indemnity which was totally exceptional expenditure, be deducted from 1886, it will be found that there was actually an increase in 1887 of \$80,524, which was in consequence of the general elections. There was but slight difference in the amounts expended for civil government, the principal changes being an increase of \$14,339 in the Post Office, a decrease of \$15,156 in the Department of the Secretary of State, and of \$5,780 in that of Finance. The total increase of expenditure on public works was \$86,764, the largest item being \$83,425 on harbours and rivers. The total decrease in other expenditure amounted to \$401,455. The expenditure under the new item of Experimental Farm amounted to \$91,544. The exceptional expenditure, viz., for the Manitoba census, and Colonial Exhibition was \$117,693.

178. With the exception of public works and minor Charges revenues, there was an increase under every head of venue. charges on revenue, the largest being for railways and the post office, as the expenses in connection with the Liquor License Act may be considered as exceptional. The cost of collection however was a trifle less in 1887, viz., 23:42 per cent. of the total revenue, as compared with 23:53 per cent. in 1886. The payment, in 1886, on account of the North-West Rebellion amounted to \$3,177,220, for those made in 1887, see par. 181.

179. There was a decrease in the amount of subsidies subsidies authorized by Parliament paid to railways of \$1,294,716; ways. the total amount paid being \$1,406,533, as follows:

Albert Southern Railway	Company	\$ 1,000

Particulars of subsidies to railways.

180. The total amount of subsidies voted by Parliament towards the construction of railways, on which payments have been made, or liabilities still exist, was, on the 81st December, 1887, \$10,395,565; of this amount the sum of \$4,082,807 had been already paid, leaving \$6,251,334 still due, \$61,924 not having been earned, owing to an over estimate of mileage. The above amount of \$10,395,565 had been voted among 89 companies, but as, on the 31st December, 1887, no contracts had been entered into by 43 companies, it is not at all probable that the full amount will ever become payable. In addition to the above money subsidies, grants of land have been made to 11 companies in Manitoba and the North-West Territories, amounting to 19,787,744 acres, of which quantity 75,690 acres have been patented. The average grant was 7,300 acres per mile, and the estimated number of miles subsidised was 2,710. A loan was also authorized to one company, in 1886, of \$15,000, of which \$13,778 has been paid, and \$1,222 is still due.

Capital account.

181. The total amount paid on capital account was \$4,439,939, being \$2,036,461 less than in 1886. The amount was made up as follows:—

\$4,439,939

182. The sum of \$655,435 was laid out in investments, investbeing a decrease of \$2,491,630 as compared with 1886. The investments were as follow:-

		Co	\$	11,437 191,000
Quebec	4.4			452,795
Three Rivers	44	***************************************		203
			9	8655.435

183. The total expenditure on capital account and sub-sidies to railways, together with the sums invested as above, on subsi-dies and amounted to \$6,501,907, being a decrease of expenditure capital under these heads, as compared with the preceding year of \$5,822,807. The subsidies to railways authorized at the last Session of Parliament amounted to \$2,187,600, as compared with \$2,073,065 voted at the previous Session, but \$470,000 of the former amount was in lieu of the same amount previously granted.

Estimated

184. The revenue for 1887 was estimated at \$35,300,000 revenue 184. The revenue for 1887 was estimated at \$35,300,000 and expenditure, which was \$454,993 less than the amount actually realized, 1887. and the expenditure, including Supplementary Estimates, was put at \$35,761,322, which was \$103,642 more than was expended.

Silver and copper imported.

185. Silver and copper to the value of \$975,000 were imported during the year, at a profit of \$82,194, which was \$12,041 more than the total expenditure of the Finance Department, including contingencies.

Heads of revenue and ex-penditure, 1867-1887.

186. The several amounts received and expended under the principal heads of ordinary revenue and expenditure in each year since Confederation, are given in the following table:-

Manitoba, not included in estimated population until 1371.

British Columbia do do 1872.

Prince Edward Island do do 1874.

The Territories do do 1831.

Increase and decrease per head.

188. The revenue was 41 cents per head more than in 1886, and with the exception of the years 1882 and 1883 was higher than in any year since Confederation, in those years however it was 21 cents and 59 cents respectively more per head than in 1887. The expenditure was 82 cents less than in the preceding year, but with the exception also of 1885 was in advance of any other year in the table.

ER

xpen-ure per Head

\$ cts.

an in 83 was e years re per s than f 1885 Revenues in Austra-lasian colonies.

190. The expenditure exceeded the revenue in 27 out of the 36 countries and colonies named in the list, and the total expenditure was \$30,346,668 in excess of revenue. In proportion to population, both the revenues and expenditures of the Australasian Colonies, are very high, the chief explanation of which is that "a considerable revenue is "derive from the usufruct of the unsold lands, which " is not enerally the case elsewhere, the revenues also are "swelled by the large sums which are received annually " from the alienation of Crown Lands, and from the working "The practice of treating " of the State railways." \* " money derived from the sale of Crown Lands as revenue " obtains in all the Australian Colonies, and the money so "raised forms one of the largest items of their annual "income." Canada will undoubtedly in a few years be deriving a large revenue from the sale of Dominion Lands, provided that the practice of treating such moneys as revenue will be in force, but all the principal railways are in the hands of private companies. Both in India and Cape Colony, the railways are principally owned by the Government, producing a corresponding difference in the amount of revenue.

Revenues and exin foreign countries.

191. The ordinary revenues and expenditures in some of penditures the principal foreign countries, as nearly as they could be ascertained, have been given in the following table:-

<sup>\*</sup>Not including the revenues and expenditures of the several States.

France has both the largest revenue and the largest expenditure of any country in the world, considerably exceeding that of the United Kingdom, in 1887 it will be seen that the two amounts were almost identical, the proportion per head of population being the same; the same remark applies to Japan. Expenditure was in excess of revenue in ten out of the eighteen countries about which particulars are given.

192. As stated above in paragraph 169, the sources from Amount derived which the ordinary revenue is derived, may be divided into from taxation and two classes, viz., 1, taxation; 2, other sources. And the other sources. following figures give the amount raised in each class in 1887:-

Revenue raised	by taxationfrom other sources	\$28,687,002 7,067,991
	Total	\$35,754,993

w South

Receipts from taxa-

193. As compared with the preceding year, there was an increase in receipts from taxation of \$8,460,546, and a decrease from other sources of \$882,593, and of the total revenue 80.23 per cent. was derived from taxation as against 76.03 per cent. in 1886. The receipts from taxation being derived solely from Customs and Excise duties, it follows, in the absence of any extreme increase in the tariff, that the more prosperous the country, and the larger its trade, the greater will be the amount derived from taxation, and as the largest part of the revenue is obtained in this manner, in the years of the largest revenues, the amount of taxation per head of population will also be found to be largest. It will be seen, however, that in 1882 when the amount derived from taxation was \$1,137,956 less than in the year under review, the amount paid per head was 34 cents more, and it will also be noticed that the proportion of revenue raised by taxation in these days of a protective tariff, is not so large as it was in the years when a revenue tariff was in force.

Amounts raised by taxation, 1867-1887. 194. The following table gives the amount raised by taxation in each year since 1st July, 1867, also the average amount of such taxation paid per head of population, and the proportion of total revenue:—

1868... 1869... 1870... 1871... 1872... 1873... 1874...

1887	28,687,002	3,460,546	1	5 88	80.23

195. The largest amount derived from taxation in any Increase one year during the period was in 1883, when the amount tion. was \$582,696 in excess of that of 1887, in which year, however, the next largest amount was raised; the smallest amount raised was in 1869, viz., \$11,112,573, or \$17,574,429 less than in 1857. Comparing the first and last years of the above period of twenty years, it will be found that while the total receipts have increased 145 per cent., the amount paid per head of population has only increased 69 per cent., while the proportion to total revenue has decreased 614 per cent.

196. Several very important changes were made in the changes tariff in 1887, more particularly in the iron duties. A slight tariff change was made in the export duties by cedar logs

venue , taxa-

Proportion de-rived from the whole amount of taxation is derived from Customs duties, the proportion in 1887 being 78 per cent., in 1886 it was 76 per cent., in 1885, 74 per cent. and in 1884, 78 per cent. This is a larger proportion than in either the United Kingdom and most of the colonies, or in many European countries and the United States.

199. The expenses of collection of Customs revenue were Collection only 3.66 per cent. of the amount realized, and with the revenue. exception of the years 1882 and 1883 was the lowest proportion in any year since Confederation. The fact, however, of those two years and the one under review being the years in which the largest amounts were realized, shows that the proportion does not always increase with the amount, and that it costs as much to collect a small Customs revenue as a large one. Considering the large area of the Dominion, and the length of its frontiers, together with the large number of ports of entry it is necessary to keep up, the cost of collection must be considered as being moderate. In the United Kingdom in 1887 it was 4.70 per cent.

200. There being no sytem of direct taxation in this Indirect country, and the use of articles on which Excise duties are taxation. collected being to a very large extent optional, it follows that the Customs duties alone form that part of the general taxation of which everyone must pay a share, and it will therefore, be satisfactory to notice from the foregoing table

that the receipts from Customs duties have increased in far larger proportion than has the proportion of population, showing that the ability to purchase has increased in much greater ratio than the burden of taxation, the increase in the receipts from Customs being 160 per cent.

since 1868, and in the amount per head only 41 per cent.

201. In the United Kingdom in 1887 the proportion per Customs head was \$2.62, in the United States in the same year it duties per head in was \$3.53, in both cases being a smaller proportion than in some fothis country, while in some of the Australian colonies it countries. was very much higher; for instance, in New South Wales it was \$10.04, in New Zealand \$10.86, and in Queensland 315.27 per head.

202. The following is a statement for the last twenty Heads of years of the amounts received from the principal heads taxation, 1867-1887. under which taxation has been levied by means of customs and excise duties. As the tariff has undergone many changes during the period, notably in 1879, no comparisons can be strictly made from year to year, and the figures must always be considered with reference to the tariff in

force at the time:-

Duty on bill stamps.

Receipts bacco and sugar duties.

203. The duties on bill stamps, &c., were all repealed in 1882, the amount received in that year up to the date of repeal having been \$82,616, and the total amount received since Confederation, \$2,686,850. The receipts from tobacco were higher than in any year since 1876, owing, however, more to increased duty than to increased consumption, and the decrease in duties on cigars was owing to a larger cousumption of domestic manufactures. The receipts from sugar duties were \$863,703 more than in 1886, and were larger than in any other year in the table. The duties on tea and coffee were taken off in 1882, causing a large reduction of revenue.

Consump-

204. The consumption of tea and sugar per inhabitant tion of tea has been generally considered one of the best standards by which to judge the condition of the people, it having been found that the consumption of these two articles indicates more clearly than almost anything else their well-being, or otherwise; and judging the condition of the inhabitants of Canada by this test, it will be found that there has been a steady and satisfactory improvement. In 1868 the consumption of sugar was 15 lbs. per head, in 1877 it was 23 lbs. per head, and in 1887 it was no less than 41 lbs., an increase of 18 lbs. per head in the last ten years, and nearly double the quantity consumed in 1877. As far as information is available it would appear that the per capita consumption of sugar in Canada is larger than that of almost any other country, with the exception of the United Kingdom and the United States, a fact that speaks well for the condition of the working classes in this coun-In the United Kingdom the amount was 66½ lbs. per head, a decrease of 4 lbs. as compared with 1885; in the United States it was about 44 lbs., not very much more than in this country. The consumption of tea has also very largely increased, in 1868 it was 2 lbs. per head, in 1877

aı

fo

co

Unite India Cape Nata Cana New Victo South Queer Weste Tasma

New 2

than but, it was 31 lbs. per head, and in 1887 about 4 lbs. per head. The consumption of tea in England in 1886 was about 43 lbs. per head. According to the Trade and Navigation Returns there was a large decrease in the consumption of tea in 1887 as compared with 1886, but this article being free of duty, it is all entered as for consumption, and no notice of its future course taken; some of it may again leave the country, and some of it may be yet in warehouse, however about 4 lbs. per head is probably now the consumption in Canada.

205. The amount of taxation in the United Kingdom, Taxation in British and in such other British possessions for which the figures Possessions. for any recent period were available, are given, as nearly as could be ascertained, in the following table:-

TAXATION IN PRINCIPAL BRITISH POSSESSIONS

		Т	AXATION.	
COUNTRY.	Year	Amount.	Per Head.	Per- centage of Total Revenue.
	•	\$	\$ cts.	
United Kingdom	1887	370,426,000	9 93	83 85
India		136,628 182	0 68	37 70
Cape of Good Hope	1881	8,175,074	7 79	56 00
Natal	1882	1,353,405	3 28	42 28
Canada	1887	28,687,002	5 88	80 23
New South Wales		12,710,930	12 68	34 39
Victoria	1887	13,607,983	13 56	43 14
South Australia	1885	3,647,308	11 65	32 45
Queensland	1887	5,872,013	17 14	42 94
Western Australia	1885	709,730	20 83	45 11
Tasmania		1,842,957	13 43	66 56
New Zealand	1886	10,956,405	18 58	61 04

A larger percentage of revenue is raised in Canada than elsewhere, with the exception of the United Kingdom, but, India excluded, the amount raised per head by taxa--

United States	18.7	336,143,175	5 59	90.5

in

Proportion of taxation to revenue in foreign countries.

207 The actual figures for 1886, not being available, most of the above figures are taken from the estimated revenue for 1887. The United States, it will be seen, expected to raise the largest proportion from taxation, over 90 per cent. being derivable from this source, Spain, the Netherlands and Portugal raising the next largest proportions. Belgium only raised half its revenue in this manner, and Russia two-thirds, all the other counties raise over 70 per cent. It will

be observed that of the countries given in the two tables, the amount raised by taxation is largest in France, the United Kingdom and the United States in the order named, and that with the exception of the Australasian Colonies, the amount per head in France is larger than in any other country named. The percentage of taxation to revenue is lowest in South Australia, New South Wales and India.

208. The gross debt of the Dominion of Canada on the Gross debt of Landa on the Gross debt of Landa on the Gross debt of Landa on the Same ada, 1887. 30th June, 1887, amounted to \$273,187,626, on the same date in 1886 it was \$273,164,341, there was therefore during the year an increase in the gross amount of liabilities of \$23,285.

209. The net public debt on the same date in 1887 was Net debt \$227,314,775, and in 1886, \$223,159,107, being an increase in the actual net liabilities of \$4,155,668.

This increase is to be accounted for as follows:—

crease of debt.

210. The preceding table gives the total liabilities and state meat of assets and the net liabilities, together with the respective assets and liabilities increase or decrease of each, for every year since Confedera-The number of years of revenue required to pay off a sum equivalent to the debt are also given.

211 With the exception of the years 1871 and 1882 there Increase has been an increase in the amount of debt in every year since Confederation, the total increase amounting to \$151,-585,270, being an average annual increase of \$7,579,263. The assets it will be seen show a decrease in 1887 of \$4,132,383.

212. In 1868 the debt was equivalent to five and one Proporhalf year's revenue, in 872 it would only have taken four revenue years' revenue, and in 1887 it would have required 6 years and 4 months of revenue to pay off the debt. seen, therefore, that the debt has increased in a somewhat greater ratio than the revenue, the proportion of increase being 200 per cent. and 161 per cent. respectively.

213. The principal objects upon which this large increase Objects of the debt. of debt has been laid out have been the following, viz., the assumption by the Dominion of the debts of the various Provinces on their entering the Confederation, the construction of the Intercolonial and Canadian Pacific Railways and of numerous public works, the enlargement and improvement of canals, and the acquisition and management of the North-West Territories.

214. The combined debt of the four Provinces which was Assumption of assumed by the Dominion at the time of Confederation was claid debta \$77,500,000. In 1869 a further allowance of \$1,186,756 was made to Nova Scotia, and since that date additional Provincial debts have been assumed or allowed by the Dominion to the extent of \$30,743,393, making a total assumption of

Provincial debts of \$109,430,148, leaving therefore the sum of \$117,883,763 as the actual net liability created by the Dominion Government since Confederation. For it must be remembered that the allowance of these debts to the Provinces was in accordance with arrangements made at that time, and that though the amount of the public debt has been thereby increased, no new liabilities have been actually created, inasmuch as these debts, if not taken over by the Dominion, would still be owing by the Provinces, and this assumption of Provincial debts has been therefore a simple transfer of liability, and the burden on the people has not been increased, but has been made actually lighter, since the Government were enabled to change the high interest-bearing bonds of the Provinces for their own bonds at a lower rate.

Particulars of Provincial debts assumed.

215. The following are particulars of the Provincial debts assumed by the Dominion at Confederation:

Canada	\$	62,500,000
Nova Sco	otia	8,000,000
New Bru	nswick	7,000,000
	***************************************	77,500,000
Debts subseque	atly assumed or allowed:	
Nova Sc	otia (1869)	1,186,756
The old 1	Province of Canada (1873)	10,506,089

Expenditure for working expenses, &c. 220. In addition to the large amount shown to have been expended upon construction, there has also been spent for working expenses, staff maintenance and repairs the sum of \$46,535,025, which amount has however been to a large extent provided for out of corresponding revenue.

Cost of the Paritament Buildings.

221. The Parliament Buildings at Ottawa, which are acknowledged to be among the finest on the Continent of America, have been erected at a total cost up to the 30th June, 1887, of \$4,270,772, and the sum of \$117,346 during 1886, and of \$98,058 during the past year having been spent on the new Departmental Building in Wellington Street, the total expenditure on construction of the Parliament and Departmental Buildings to 30th June, 1887, has been \$4,486,176.

sum o
in 188
the w

The case under which which so the sound was a second with the sound sequer has be in whi paid ar averag actuall

on asse

222. In 1868 the assets amounted to \$17,317,410, and in petalls of assets. 1887 to \$45,872,851, showing an increase of \$28,555,441. The assets only include interest-bearing investments, loans, cash and banking accounts, no account being taking of the unsold lands belonging to the Government, or of the railways, canals, public buildings and other public works, which it either owns or has assisted in construction, and which are the material results of the large expenditure of public money. The following are details of the assets on 30th June, 1887:-

Sinking Funds	\$19,054,577
Quebec Herbour Debentures	2,822,289
Graving Dock, Quebcc	744,000
Improvement of St. Lawrence	2,530,504
Montreal Harbour Bonds, &c	452,200
Northern Railway Bonds	316,333
St. John River and Railway Extension Company	
Canadian Pacific Railway Land Grant Bonds	29,000
North Shore Railway Bonds	970,000
Bank Deposits	130,000
Sundry investments	608,016
Total Interest-bearing investments	\$ 28.090,859
Province accounts	
Miscellaneous accounts	1,601,533
Banking accounts	6,002,951
Specie reserve	
Silver coinage accounts	9,153
Total Assets	\$45,872,851

223. In 1868 the interest-bearing assets amounted to the Interest sum of \$15,853,720, or over nine-tenths of the whole amount, assets. in 1887, they were \$28,090,859, or not quite two-thirds of the whole.

224. The reduction in high-interest bearing debts, and con-Rates of interest sequently the decrease in the rate of interest now payable, payable on debt has been very considerable, as shown by the following table, and assets. in which the amounts given are those of the actual interest paid and received, and of the actual net interest; and the average rate of net interest is the average rate of the interest actually paid on the gross debt, after deducting that received on assets :-

Note.

225. It will be seen that the average rate of interest actu- Reduction ally paid on the net debt has decreased from \$4.51 per cent, interest. in 1-67 to \$3.18 per cent. in 1887, being a reduction of \$1.33 per cent. The rate, it will be noticed, is 32 cents per cent. higher than in 1886, which will be easily accounted for, when the sudden fall in the rate of interest received on assets, viz., from \$459 per cent. to \$2.16 per cent. is considered. This fall is due to the repayment of the loans to the Canadian Pacific Railway and of other high interest-bearing: investments. While the rate of actual net interest paid has slightly increased, there has been a further reduction in the net rate of interest paid on the gross debt of 17 cents, caused by the redemption of some of the small loans bearing high rates of interest. The total reduction in the net rate since Confederation has been \$1.10 per cent.

226. The following table gives the proportions per head of Proporestimated population, of the gross and net debt, of the assets, debt, as-and of the interest on the same paid and received in each interest year since Confederation: -

1868         28 74         6 27         22 47         1 33         0 04         1 2           1869         32 92         10 70         22 22         1 44         0 09         1 3           1870         33 58         10 94         22 64         1 47         0 16         1 3           1871         32 82         10 74         22 08         1 47         0 16         1 3           1872         33 90         11 13         22 77         1 46         0 13         1 5           1873         35 37         8 15         27 22         1 42         0 11         1 5           1874         36 90         8 58         23 32         1 50         0 16         1 5           1875         39 02         9 17         29 85         1 70         0 22         1 4           1876         40 82         9 28         31 54         1 62         0 20         1 4           1877         43 52         10 32         33 20         1 73         0 15         1 5           1879         43 29         8 80         34 41         73         0 15         1 5           1880         46 17         10 00         36 17         1 84	YEAR ENDED 30TH JUNE,	Gross Debt per Head. Note.-Estimated population will be found on page 136.

Increase in proportion of debt and assets.

227. There was a decrease of 95 cents per head in the gross debt, and \$1.02 per head in the assets, and there was consequently a decrease of 18 cents in the gross interest paid per head, and of 27 cents per head in the amount of interest received on assets, but an increase in the net amount of interest per head of 15 cents, consequent on the reduction of assets previously mentioned. While the amount per head of the net debt was more than double what it was at Confederation, the net interest paid per head has only increased 38 per cent.

Fixed charges.

228. The fixed charges, that is, the charges for debt, sinking fund and subsidies to provinces amounted in 1868 to 58 per cent. of the revenue; in 1887 they had been reduced to 44 per cent.; in 1886 they were 49 per cent. A large item among the liabilities that does not bear interest is the amount of Dominion notes in circulation; in 1867 they amounted only to \$3,113,700; on 30th June, 1887, to \$15,059,836; and on the 31stDecember, 1887, to \$15,702,101.

Dominion notes.

The debt created solely for public improvements.

229. From the foregoing pages it will be clearly seen that, with the exception of the debts allowed to provinces, which allowances were rendered more or less necessary by the conditions of Confederation, and which debts, it must be remembered, were themselves originally incurred for the purpose of public improvements, the whole of the public debt has been created by the construction of public works of great utility and national importance; the principal portion having been spent on railways and canals, facility of transport being the essence of progress, not only in a new but in any country, and these are the reasons that place the debts of Canada and other British colonies, whose debts have been contracted for similar purposes, on so entirely a different footing to those of European countries and the United States, the debts of which have accumulated solely by aggressive and defensive wars.

230. Notwithstanding the large debts that have been in- Victorian 1888. curred by the Australasian Colonies and Canada, the credit of these countries is remarkable good, and their stocks are eagerly sought after in European markets, e. g., tenders for a Victorian Government four per cent. loan of £1,500,000, minimum price of issue £104 per cent., were opened on 10th January, 1898, and amounted to £8,466,500, at an average price of £108 18s. 10d., and that notwithstanding the fact that the public debt of Victoria was at the time \$146 per head of population, more than three times the amount of the net debt of Canada per head.

231. The following table gives particulars of the latest Ganadian Canadian and Australasian loans offered in London, and tralasian will help to show the position of the credit of Canada in London. financial circles. It must, however, be remembered that there was a period of two years between the dates of the Canadian and Australasian loans, and there is sound reason for supposing that when this country applies for another loan the price realized will be considerably higher. The figures for the Australasian colonies are taken from "Wealth and Progress of New South Wales" by Mr. T. A. Coghlan, Government Statistician, p. 411:—

233. The total public debts of Great Britain and her possessions amount to \$5,565,778,486, of which Great Britain owes 64 per cent., India 15 per cent., the Australasian Colonies 13 per cent., and Canada 4 per cent. With the exception of the Australasian Colonies, the amount per head in the United Kingdom was higher than in any of her colonies, and with the exception of New Zealand and South Australia, the multiple of revenue was also the highest. At the time of Confederation five years and 6 months of the revenue would have been required to pay off the net debt of Canada, in 1887 it would have taken 6 years and 4 months.

234. The proportions of debt to population in the Austral-Expenditure on asian Colonies and also in Cape Colony are very large, but railways while, as in Canada, the whole amounts have been incurred lia and in the construction of public works, by far the largest por- Colony. tion has been expended on railways, which in those colonies are almost altogether the property of the State, and there is consequently a very much larger revenue available for the payment of interest derived directly from the expenditure of loans, than there is in this country, where the money has been spent on works directly productive to the country, but only indirectly so to the State revenue. In proportion moreover to the wealth and general trade, more particularly of the Australasian Colonies, their populations are very scanty.

235. It is doubtful whether the calculations as to the Proportion of amount of debt per head of population really possess as colonial debts to much value as is generally ascribed to them; what may seem an enormous amount per capita for a country to carry, may be relatively a far smaller burden than a much reduced amount in another country, and, therefore, if possible, the debt of a country should be compared with its wealth and resources, which would afford a far more accurate, in fact,

the most accurate idea possible, of its actual financial position, but unfortunately the wealth of a country can only be estimated approximately, and in no two cases can such an estimate be expected to agree, the absence of certainty therefore doing away with the value of such calculations. If the value of the enormous resources of the principal colonies could be put into figures, the present debts, large as they appear to be, would seem justified by the assets set against them, and it must be remembered that the development of natural wealth in this or any other country is absolutely impossible without an expenditure, more or less large, first being made, in order to provide the means of bringing that wealth within reach of its proper markets. Mr. Mulhall calculates that the debt of the United Kingdom is 8 per cent., of the Australasian Colonies 20 per cent. and of Canada 61 per cent. of the national wealth of each country respectively. If these figures are at all correct, Canada's position is a very favorable one.

Prices of colonial securities in Lon-don.

236. That the future prospects of England's principal colonies are well thought of in the financial markets of the world, the following quotations of prices of Colonial Government securities in London in March of the present year, will testify:—

New South Wales	4	per cent.	118

an

nty ons. oloe as set elops abless ns of kets. Kingcent. each rrect,

111

amount. The debt of the German Empire is the Federal debt, alone, exclusive of the debts of the several States, which amount to \$1,813,623,148. Though the amount per head of debt is larger in France, the Netherlands and Portugal, yet the country of Peru is actually in a worse financial position than any other on the list; it would take more than 31 years of its revenue to pay off the debt, while it owes for unpaid interest the sum of \$87,054,155. Of European countries the least burdened with debt is Switzerland, as hardly 8 months of revenue would suffice to discharge its liabilities, it moreover possesses assets amounting to \$8,600,000. Persia is the only recognized country in the world which has no public debt. The debt of the United States was reduced \$74,291,065 during the fiscal year 1887, and if the cash in the Treasury on 1st July, 1887, be deducted, the amount of debt is reduced to \$1,218,338,031.

Debts of the United States.

239. In 1887 the debts of the several States forming the United States, exclusive of the public debt, and of all county, city and municipal debts, amounted to \$228,347,462, a sum larger than the whole net debt of Canada. In 1880 the combined net state, county and municipal debt of the several States and Territories amounted to \$1,056,584,146, and in addition to this, the several cities of the United States have debts amounting in the aggregate to about \$550,000,000. If the national debt is added to the above figures, a total liability is produced of \$3,307,356,094, being about \$55 per head of the present population, which amount however is, of course, not divided equally, but varies with the locality, some of the States having no debt at all. If the States debts alone are added to the national debt, the amount will be found to be about \$32 per head.

a y el

ea

all

Provin-

240. The total debt of the Province of Quebec, including temporary loans, on 30th June, 1886, was \$19,068,023, with assets amounting to \$10,220,818, leaving a net debt of \$8,847,-

205; the debt of Nova Scotia, on 1st January, 1887, was \$823,000, with assets \$399,225; the debt of New Brumswick on 31st December, 1887, was \$1,991,700, with assets \$596,449; and the debt of British Columbia on the 30th June, 1886, was \$921,546, with assets \$743,011. The total net provincial debts therefore amounted to \$10,844,766. If this amount is added to the public debt, the amount per head of the total population will be \$48.85. No figures are at present available for determining either the county or municipal debts in Canada, or the debts of its several cities.

241. Under the provisions of the Civil Service Superan- Superan- untion. nuation Act, 1883, retiring allowances are granted to such members of the Civil Service coming within the scope of the Act, who have served for not less than ten years and have attained the age of sixty years, or become in some manner incapacitated from properly performing their duties, or whose office may be abolished for the better promotion of efficiency or otherwise.

242. These allowances are calculated on the average Calculation of alyearly salary received during the then last three years, as lowances. follow: for ten years but less than eleven years service an allowance of ten-fiftieths of such average salary; for eleven years but less than twelve years service an allowance of eleven-fiftieths, and a further allowance of one-fiftieth for each additional year of service up to 35 years, when the maximum allowance of thirty-five-fiftieths may be granted but no addition is made for any service over thirty-five years.

243. These provisions practically apply to all officers, to whom clerks and employés of the Inside and Outside Civil Service, ble. including those of the Senate, House of Commons and Library of Parliament.

244. As a provision towards making good the above Assessallowances, a reduction is made of two per cent. per annum salaries.

Liabilty to serve.

245. All persons under sixty years of age, in receipt of a superannuation allowance, and not mentally or bodily disabled, are liable to fill, if required, under pain of forfeiture of such allowance, any public position in any part of Canada, for which their previous services have rendered them eligible. No such position, however, is to be lower in rank or salary than the position retired from.

Gratui-

246. Provision is also made for the granting of gratuities in cases where an allowance has not been earned by duration of service.

Amount paid in 1887.

247. The total amount paid out on account of superannuation allowances and gratuities in 1887 was \$202,285, and the following table shows the manner in which that sum was divided among the different departments and divisions:—

SUPERANNUATION ALLOWANCES AND GRATUITIES-1887.

248. Pensions, which are of a different nature to superan- Pensions. nuation allowances, are also granted in accordance with various Acts of Parliament to retired judges, and to a certain number of persons, or their widows and children, for military services. The total amount paid under this head in 1887 was \$102,109, being \$13,790 more than in the preceding year.

### CHAPTER IV.

#### TRADE AND COMMERCE.

249. The legal weights and measures of Canada are the Weights and meas-Imperial yard, Imperial pound avoirdupois, Imperial gallon ures. and the Imperial bushel.

250. By Act of 42nd Vic., cap. 16, it was provided:—That Measures in contracts for sale and delivery of any of the undermen-by weight tioned articles the bushel should be determined by weighing, unless a bushel by measure be specially agreed upon, the weight equivalent to a bushel being as follows:—

			=		
Wheat	60	lbs.	Castor beans	40	lbs.
Indian corn	56	"	Potatoes	60	"
Rye	56	44	Turnips	60	"
Peas			Carrots	60	"
Barley	48	66	Parsnips	60	"
Malt		"	Beets	60	"
Oats	34	**	Onions	60	"
Beans	60		Bituminous coal	70	
Flax seed	50	"	Clover seed	60	
Hemp	44		Timothy	48	**
Blue grass seed			Buck wheat		

And by the same Act the British hundredweight of 112 pounds, and the ton of 2,240 pounds, were abolised, and the hundredweight was declared to be 100 pounds and the ton 2,000 pounds avoirdupois, thus assimilating the weights of Canada and the United States.

Customs valuations. 251. Customs valuations upon goods imported subject to ad valorem duties are made at the fair market value thereof, when sold for home consumption in the principal markets of the country whence they were exported. The values of goods subject to export duty are to be their actual cost, or the value which they truly have at the port and time of exportation.

Classification of imports and exports.

252. The classification of goods in the tollowing table is the same as that adopted in this work for the first time last year, and has in the present issue been extended to exports, and the figures have been so arranged that the relative values of imports and exports of any article during the past two years can be seen at a glance.

The mode of classification is that in use in Victoria and other Australasian Colonies, the principle of which is that articles of a like nature shall be classed together. A copy of the tariff at present in force, certified to by the Department of Customs, will be found at the end of this book, together with an alphabetical index with reference numbers to the following table and to the tariff, so that the order in which any article is placed, and the duty (if any) payable thereon can be immediately found.

2 438,309 31,397 Imports and exports, 1886 and 1867, and inorease in value. 258. The total value of imports and exports, and amount of duty collected in 1887, as compared with 1886, was as follows:—

Imports.	Exports.	Duty Collected		
1886\$104,424,561	\$85,251,314	\$19,448,123		
1887 112,892,236	89,515,811	22, 469, 705		

There was therefore an increase in the value of imports of \$8,467,675, and in the value of exports of \$4,264,497, making an increase in the total trade of \$12,732,172, while the increase in duty collected amounted to \$8,021,582. The above satisfactory showing justifies therefore the opinion expressed last year that the indications were that the depression of trade which had been prevalent during the past 4 years was passing away.

Decrease in values and increase in quantitles. 254. The value of the total trade is still considerably below the returns for 1882 and 1883, but the decline in values in many of the principal articles of merchandise has been so marked, that there is good reason to suppose that at former prices, the trade of 1887 would not have fallen far short of the highest point yet reached. That the decline in values has exceeded the decrease in the volume of trade to a considerable extent will be apparent on examining the following comparative statement of the quantities and values of the principal articles of food exported during the years of 1882 and 1887 respectively, from which it will be seen that with scarcely an exception the percentage of inincrease or decrease in value was respectively considerably smaller or larger than the corresponding percentage in quantities.

QUANTITIES AND VALUES OF PRINCIPAL ARTICLES OF FOOD EXPORTED FROM CANADA, 1882 AND 1887, COMPARED.

255. The following tables relating to the trade of the Decline in values United Kingdom, furnish a good illu tration of the decline and introduced in values but increase in quantities of late years. They inthe United Values in the ere prepared by Mr. Giffen of the Imperial Board of Trade dom. and are taken from the Board of Trad Journal, May, 1888. The figures they contain are very sign ficant, and demonstrate in a marked manner the absolute importance of making allowance for prices when comparing statements of imports and exports. At the prices of 1873 the total imports would have been over 500 millions instead of 350 millions, and the exports 350 millions instead of 2121 millions. Thus it will be seen that "the real progress has been immense," "although, on the footing of declared values only, there" "would seem to be no progress at all."

\*Average.

258. The value of imports has been exceeded six times, Average and the value of exports five times since Confederation, and imports in six years during the same period the total trade was ports. also larger. The average value per head during the twenty years has been of imports \$25.38, of exports \$20.36, and of the total trade \$45.74, so that in 1887 imports were \$2.14,

exports \$2, and the total trade \$4.17 below the average. The amount of the total trade per head was considerably below that of several previous years, though the total aggregate trade was \$16,698,345 above the average.

259. The amount of trade done by the United States is only exceeded by three countries in the world, and is therefore many times larger than the trade of Canada, but in Canadian proportion to population, the trade of the Dominion is considerably in advance of that of the United States as is shown by the following statement:-

and American trade com-paredi

#### FOREIGN TRADE OF CANADA AND THE UNITED STATES PER CAPITA, 1887.

Country.	Imports.	Exports.	Total Trade.
,	\$ cts.	o cts.	\$ cts.
Canada	23 16 11 54	18 36 11 93	41 52 23 47
Excess per head in favour of Canada	11 62	6 43	18 05

Excess of imports.

260. During the last twenty years, the exports have only once exceeded the imports, viz., in 1880, in every other year there having been an excess of imports. The average annual excess of imports has been \$20,285,558, therefore the excess in 1887 was \$3,090,867 above the average.

261. Whether a continual excess of imports is or is not prejudicial to the interests of a country, is a complex and much debated question. The imports into the United Kingdom have for many years largely exceeded the exports, yet that country is steadily augmenting its wealth. India, on the other hand, has had a large excess of exports for several years, and yet is by no means in a prospero actio incr "loa

Articles on which export duty is collected, viz. :- Pine, oak and spruce logs and shingle and stave bolts.

<sup>\*</sup>Wealth and Progress of New South Wales, p. 412.

Duty col-

263. With one exception, viz., in 1883, the amount of duty was the largest ever collected, and was 155 per cent. larger than that collected in 1868, though the amount per head shows an increase only of 76 per cent. There was again a considerable increase in the duty collected on exports.

Comparative value of goods entered for consumption.

264. In goods entered for consumption there was an increase of \$6,036,734 over 1886, and of \$2,929,409 over 1885, which is a further confirmation of the general improvement in trade. The value per head of these imports in 1886 was \$20.77, and in 1887 \$21.67, an increase of 90 cents per head. The value of similar goods in the United States in 1887 was \$12.10 per head, being \$9.57 per head less than in Canada.

Summary of imports 1885, 1886 and 1887.

265. A comparative summary of the value of the principal articles imported in the last three years will be found in the following table, dutiable goods being distinguished from those admitted free:—

Increase in dutiable and decrease in free goods. 266. There was an increase in the value of dutiable goods imported in 1887 of \$9,942,642 as compared with 1886, and of \$5,865,292 as compared with 1885, while there was a decrease in the value of free goods of \$1,474,967 as compared with the preceding year, which was due to the reduced importations of coin and bullion, there having been a decrease under this head of \$3,078,339.

Principal increases in dutiable goods

267. Among dutiable articles the principal increases are found in imports of grain of all kinds, manufactures of copper, fancy goods, flax, hemp and jute and manufactures of the same, green and dried fruits, hats and bonnets, manufactures of iron and steel, jewellery, manufactures of paper, manufactures of silk, spirits and wines, sugars, watches and woollen manufactures, the increase under the latter head amounting to \$2,572,948. It is satisfactory to note the increases in fancy goods, hats and bonnets, jewellery, manufactures of silk, spirits and wines, watches, &c., these being articles that are more luxuries than necessaries, and their increased importation indicates a greater margin out of the savings of the people for their purchase.

Principal decreases.

268. The principal decreases among dutiable articles were in imports of books, flour and meal, manufactures of cotton (these imports have steadily decreased during the last five years), provisions, soap, tea and manufactures of wood.

Increases and decreases among free goods. 269. Among free goods the principal increases were in lumber and timber, sawn, but not otherwise manufactured, animals for improvement of stock, fur skins not dressed, raw hides (there was a decrease in imports of manufactures of leather), and steel rails; and the principal decreases were in logs and unmanufactured timber, tobacco manufactured, coffee and tea and coin and bullion.

Goods entered for consump270. The following table gives the value of goods entered for consumption (dutiable being distinguised from free)

VALUE OF GOODS ENTERED FOR CONSUMPTION BY PROVINCES, 1887.

Provinces.	Dutiable Goods.	Free Goods.	Total.	Duty Collected.
	\$	\$	\$	\$
Ontario	32,678,815	9,992,604	42,671,419	8,003,391
Quebec	31,647,834	12,117,906	43,765,740	9,770,958
Nova Scotia	4,647,604	2,206,683	6,854,287	1,757,350
New Brunswick	3,912,604	1,740,417	5,653,021	1,346,768
Manitoba	1,678,177	334,006	2,012,183	508,947
British Columbia	3,065,791	560,348	3,626,139	883,421
Prince Edward Island	424,228	179,990	604,218	153,861
The Territories	65,626	386,795	452,421	13,609

271. The dutiable goods entered for consumption were increased \$7,461,860 in excess of the preceding year, while free goods percenthighest during the last 20 years.

272. The figures in the preceding table must only be taken as indicative of the channels by which goods enter the Dominion, and not as by any means representing the individual consumption of each Province. Quebec, containing the principal ports of entry by the St. Lawrence, and Ontario the principal ports of entry for goods from the United States, it is clear that a very large portion of the duty collected is really paid by the other Provinces, and it is probable that the largest portion of the duty collected in the Province of Quebec is actually paid by the Province of Ontario. The same remarks apply more or less equally well to exports, the Province of Prince Edward Island

similarly entered were less by \$1,425,126. The percentage duty.

of duty on goods entered for consumption was 21.24, being higher than in any year since Confederation, the next highest having been in 1881 viz., 20.19. The percentage of duty on the total value of imports was 19.87, being also the

In three years, only since Confederation has the value of exports of Canadian produce in 1887 been exceeded, viz., in 1881, 1882 and 1883, and the percentage of total imports, though a trifle lower than in 1886, had only been exceeded in two years, viz., 1882 and 1886. The value per head, however, while 36 cents more than in 1886, was yet much lower than the value in many previous years.

277. The following tables give the value of the imports value and 277. The following tables give the value of the imports of imports for home consumption and of exports of home produce of and ex-ports of wheat, flour and other breadstuffs in each year since Con-bread-stuffs, 1867- federation, with the quantities of the same respectively:— ne forest

278. The very marked effect which the adoption of the Effect of the Na-National Policy, in 1879, had upon the imports of wheat rolling on and flour will be immediately apparent upon looking at the imports of the above tables. It will be seen that while the average importation of wheat in each year from 1868 to 1879 was \$5,480,735, in the period 1880 to 1886 it only averaged \$149,374 per annum, increasing the home market for wheat to the extent of \$5,331,361 annually. That amount of money was therefore expended in the country, which otherwise would have been paid away for imported wheat, and considering the universal depression of the agricultural industry, this result cannot but have been of benefit to the farming community.

279. The total wheat crop of 1886 was about 37,731,275 consumpbushels, and there were imported for home consumption in wheat per head in 1887 (reckoning five bushels of wheat to the barrel of flour) Canada. 3,213,91 bushels, making a total of 40,945,193 bushels. Of this quantity, there was exported of wheat and flour. 8,232,791 bushels, and at two bushels to the acre, 4,561,540 bushels were retained for seed, leaving 28,150,862 bushels available for consumption, being at the rate of 5.77 bushels per head of population. The consumption in the United States is said to be over six bushels per head, and estimating the consumption in the United Kingdom at 204,000,000 bushels, the amount per head in 1886 was 5.47 bushels.

280. "Such is the importance of the question of the Import. "price of wheat, that it partakes of the nature of a grave question "social problem, and it is therefore not surprising to find price of "it always before us, and always being discussed in one "form or another." So says M. François Bernard in an article on the world's wheat production\*, and as, owing to the extreme decline in value of late years, this question

\*Royal Statistical Society's Journal, December, 1887.

has assumed more than ordinary prominence, it may not be out of place to attempt some explanation of the causes that have led to the fall, and of the reasons why it is unlikely that former prices will obtain again.

Average price of wheat, London and New York, 1871-1887.

281. During the week ended 1st October, 1887, the price of wheat in London was the lowest touched for 125 years, viz., 28s. 5d. per quarter, or 86 cents per bushel. And the steady fall of late years is shown in the following table which gives the average price of wheat in London, and the average export price in New York for 15 years from 1871:—

٠	London. New York.

Reasons for the supremacy of the United States in the wheat market.

282. A series of bad harvests in Europe, commencing in 1872 and culminating in 1879, 1880 and 1881, during which years particularly the failure of the crop was for duration and extent without a parallel in the last four centuries, necessitated an unusually large demand for foreign supplies, and a coincident series of good seasons in the United States, together with the enormous area rapidly brought under cultivation for wheat (in 1870 the area of wheat was 18,992,591 acres, and in 1880, 37,986,717 acres, or almost exactly double the quantity), and the fact that there was

encing in ng which duration centuries, eign suphe United brought wheat was or almost there was practically no competition, gave that country for a number of years the control of the European markets, and the price of wheat was regulated by the American supply. Farmers, therefore, in the United States, having a ready market at a good price for all the wheat they could raise, prospered accordingly. This state of things has, he rever, during the last six years, undergone a complete change, the American supremacy in the wheat market of the world is gone and may never return.

283. This change has been brought about by two great Causes of its decline causes both being concurrent in their effect, these causes are: 1. Increase in the sources of supply. 2. Improvement in means of transport. First with reference to the increase in the sources of supply.

284. The United States still stand first in the list of Producwheat exporting countries, and in all probability must yet wheat in the United hold that position for some years. The area under wheat states. cultivation has not varied very much since 1880, remaining always about 37,000,000 acres, but the amount of production and export show greater fluctuations, as will be seen from the following figures:-

YEAR.	Area under Wheat Cultivation in United States.	Total Production.	Total Exported.

	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	

Amount' available for export in United States not likely to increase.

286. It is estimated that of the crop of 1887, the United States will have 104,000,000 bushels available for export. M. Bernard predicts that in twenty years the production will reach 550,000,000 bushels, and the annual export 137,000,000 bushels. But taking into consideration the rapidity with which the population is increasing, the small average yield, not exceeding at its best 13 bushels to the acre, the actual average for a number of years being about 12.4 bushels, and the fact that the area of land available for wheat cultivation is much nearer exhaustion than is generally supposed, while much of the land formerly raising good wheat, has been run down through reckless farming and will require many years of careful nursing to recover its fertility, the amount available for export is not likely to increase to any extent.

Export of wheat from India 1880-1887. 287. India now stands second in importance as a wheat growing country, and judged only by the rapid increase in

the quantity exported seems likely to be able soon to rival the United States, to whom she has already proved herself a formidable competitor. The following table gives the total quantities of wheat exported, and the quantities exported to the United Kingdom, from British India, in the years 1880 to 1887:—

#### EXPORTS OF WHEAT FROM INDIA - 1830-1887.

Year.	Total Exported.	Exported to United Kingdom.
1880	Bushels.  13,896,168 37,078,571 26,402,893 39,118,791 29,550,741 30,312,969 41,558,250	Bushels. 6,027,560 13,691,283 15,793,874 20,998,111 14,897,551 22,717,802 20,578,038 11,344,000

288. In 1886 the total area under wheat cultivation was Exports of Indian 20,658,163 acres in British India, and about 7,000,000 acres wheat not belonging to the Native States. The average production increase varies very much, ranging from 21 bushels to 6 bushels extent. per acre, the general average being about 13 bushels, the same as in the United States, the conditions of production, however, are very different, the price of labour in India being excessively cheap, the average wages of the agricultural labourer not being more than 6 cents per day, and the extension of the railway system and of the system of irrigation have both progressed so rapidly of late years that the question of Indian wheat taking the place of American wheat on the European markets has often been seriously discussed. But the total population of India is about 250,-000,000, and the amount used for home consumption is at

present very small in proportion to population, and it is not unlikely that increased production will bring about increased home consumption, the supply in this case creating the demand, so that the amount available for export will necessarily be curtailed, and recent investigations have thrown so much more light on the matter, that there appears now to be no probability that the predictions will ever be realized of those who have said that the time will come when not a bushel of wheat will cross the Atlantic, and the European markets will be supplied entirely from the East. The total yield in 1878 was estimated at 280 million bushels, and in 1886-7, at 238,585,947 bushels, an actual decrease of 42 million bushels, while the exports increased from 11,896,580 bushels to 41,558,250 bushels. Sir James Laird, one of the Indian Famine Commissioners, said that "there had been no ma-"terial increase either in acreage or product, but the surplus "that had been pitted and preserved for famine years had "been exported, owing to increased facilities for transportation." Supposing this to be really the case, and Sir James Laird's authority is of the very highest, it seems that if a famine should occur in India, and famines do occur in that country periodically, there will be no reserves of wheat to fall back on as in former years, and even if the home production is sufficient for the home consumption at such a time, the withdrawal of supplies from the European markets must have a disturbing effect, and a tendency to considerably increase prices. Under these circumstances it would appear as if the increase in the supply of Indian wheat had been largely overestimated, and the London Times, in a recent article on a report on the extent of wheat cultivation in India by Hon. J. R. Dodge, Statistician to the United States Department of Agriculture, in which he shows very conclusively, that the American farmer has no reason to be very seriously afraid of Indian competition, said that the report entirely demonstrated "that the popu-

289. It was at one time thought probable that Russia and Exports of Hungary would not only grow enough wheat to supply from Russia. the European markets, but also the general markets of the world, but that idea is no longer entertained. The total wheat crop in Russia in 1886 was 172,000,000 bushels, and was estimated at 216,000,000 for 1887, and the following are the latest available figures of exports since 1880:

EXPORT OF WHEAT FROM RUSSIA, 1889-1886.

YEAR.	Total Exported.	Exported to UnitedKingdom.	
1880	Bushels. 36,565,653 48,972,597 76,373,532 83,777,096 67,719,720 91,754,000	Bushels. 5,376,605 7,553,745 17,874,513 24,913,956 10,084,473 22,354,535 6,945,236	

290. In this country, also, with its large and ever in-Russian exports of creasing population, it is probable that a larger demand for wheat likely to home consumption, which is also very small at present in vary proportion to population, will accompany increased production, and that the surplus for export will not assume any very large proportions. In the report on the Foreign Commerce of the United States, Mr. Switzler says (p. 30): "Russia seems to be losing its hold as a source of wheat "supply to the British market, while British India is "making rapid strides, increasing its share of this very "important trade." The Statist, however (Supplement, 11th Feb., 1888), says: "The shipments of Russia have only

"lately become liberal, but the good yield is practically

"unquestioned, and there must still remain in that vast

"empire a large supply, which can come forward if prices in 1888 are good enough to draw it forth."

Exports of Australasian wheat.

291. The Australasian colonies have undoubtedly a very important future before them as wheat exporting countries, though owing to bad harvests the amount exported has been comparatively small, but the climate is favourable, and the area available exceedingly large. The average yield appears to be about 14 bushels per acre, varying from 7·10 bushels in South Australia to 26·21 bushels in New Zealand\*.

The export of wheat from the Australasian colonies has been as follows:—

QUANTITIES OF WHEAT EXPORTED FROM AUSTRALASIAN COLONIES, 1880-1886.

YEAR.	Total Exported.	Exported to United Kingdom.	
1880	Bushels. 13,999,415 9,729,596 8,506,904 7,481,949 19,466,921 12,593,890 2,462,763	Bushels. 7,926,569 5,541,629 4,620,237 5,345,368 9,503,596 9,854,566 1,378,905	

The crop of 1887-88 is said to be 8,000,000 bushels in advance of that of the preceding year. Victoria, South Australia and New Zealand are at present the principal wheat exporting colonies.

Production of wheat in Canada. 292. Canada has the reputation of producing, in the Province of Manitoba, the finest wheat in the world; and there Victorian Year Book 1885-86, p. 499.

Prothere is probably no other country where soil and climate combined are more favourable to the growth of this cereal. The wheat exporting Provinces of the Dominion are Ontario and Manitoba and the North-West Territories. Wheat in all the other Provinces grows well, but the quantity raised is never likely to exceed that required for home consumption. Particulars of the yield in The Territories are not available, except for the census year 1885, when 67,256 acres were sown with wheat, and yielded 1,147,124 bushels, giving an average of 17 bushels per acre. In 1887 in Ontario the total acreage was 1,382,564, and the yield 20,075,728 bushels, being an average of 14 bushels to the acre; this however was, owing to the heat and drought, much below the average of the last six years, which was for fall wheat 20.2 bushels and for spring wheat 15.5 bushels. In Manitoba in 1887 the acreage was 432,134, the yield 12,351,724 bushels, and the average 27.7 bushels. The average yield for the period 1883-1887 was 19.4 bushels. The total crop in Canada in 1887 was probably about 37,000,000 bushels.

293. The following are the export figures of wheat from Exports of Canada since 1880, flour being reduced to wheat, at five wheat, bushels to the barrel:—

QUANTITIES OF WHEAT EXPORTED FROM CANADA, 1880-1887.

Ygar.	Total Exported.	Exported to UnitedKingdom.	
	Bushels.	Bushels.	
1880	7,813,560	6,366,867	
1881	4,722,313 6,193,730	4,209,998 5,109,370	
1883	8,312,688	6,675,896	
1884	1,732,471	1,484,256	
1885	2,959,841	2,409,041	
1886	5,349,663	4,264,841	
1887	8,232,791	6,776,929	

Future probabili-ties for Canadian wheat.

294. Almost the entire quantity exported goes to the United Kingdom, which is and probably always will be the best and nearest market. The area at present under wheat cultivation is only small, not amounting to 2,000,000 acres, but the area available is enormous, and with increased population and extended transport facilities the future of Canada as a wheat exporting country is very promising. In the article already alluded to, M. Bernard appears to have entirely overlooked Canada as one of the future sources of the wheat supply, thinking, it is presumed, that the quantity available for export, would always be too small to be worth much consideration, but it is believed that it will not be many years before the export of Canadian wheat becomes a very important item in the consideration of the world's supply.

Wheat in the Argenpublic.

295. The valley of the La Plata is also undoubtedly destined at some future time to produce an enormous quantity of wheat. M. Bernard predicts that in twenty years it will hold the position with reference to wheat, now occupied by the United States.

Imports of wheat in-to United countries 1871-1886.

296. The following table, taken from the report of the Foreign Commerce of the United States, 1887, p. 33, shows from prin- the share of the principal countries in the import of wheat into the United Kingdom during the years 1871 to 1886 inclusive :-

277. Some idea can be formed from the foregoing remarks changes of the great changes that have taken place in the last few source of years in the sources of the wheat supply of the world, and of the still greater changes it is both possible and probable will take place in the course of the next twenty years. It will be seen that wheat is being raised in ever increasing quantity in countries that at one time were not only thought incapable of growing it, but were thought to be too far away from the principal countries of demand, ever to make the exportation of wheat possible at any reasonable cost; but, coming now to the second reason for the fall in price, such have been the scientific discoveries, and such the improvements in and extension of means of transport and consequent reduction in cost of freight, that the products of India and Australia and the far west of America

can be placed on the European markets at a cost enabling them successfully to compete with the productions of even the nearest sources of supply.

Extract from speech of Sir Lyon Playfair. 298. Sir Lyon Playfair, speaking at Leeds in December, 1887, said: "If our landlords and farmers want to know "the names of the three persons who have knocked out the "bottom of our old agricultural system, I can tell them. "Their names are Wheatstone, Sir Henry Bessemer, and Dr. "Joule. The first, by telegraphy, has changed the whole "system by which exchanges are made; the second, by his "improvements in steel, has altered profoundly the trans-"portation of commodities by sea and by land; and the "third, by his discoveries of the mechanical equivalent of "heat, has led to great economy of coal in compound "engines. By these changes the United States, Canada, "India and Russia have their corn crops brought to our "doors."

Decrease in freight rates.

299. Not many years ago the freight from New York to Liverpool was from 12 cents to 15 cents a bushel, while now it is from 5 cents to 7 cents, and owing to extreme competition the inland freights have undergone even greater reduction; and similar reductions have taken place all over the world. "The effect of these changes has been to destroy "local markets and to consolidate all into one market—the "world.\*" "The actual wheat market is universal, the "prices of this commodity are governed by the supply, and "the international requirements, and it is to the develop-"ment of the ways of communication that this phenomenon "is attributable.†" It would seem therefore that it is no longer possible for any one country to control the supply, and therefore the markets, as was the case formerly, but that that country which can furnish the cheapest labour,

rly, but labour, and the fastest and cheapest facilities of transport, will The price of wheat obtain the largest share of the world's purchases; and as not likely scientific discoveries are perpetually being made which tend to shorten time and space between the producer and consumer, it would seem inevitable that the price of wheat must fall in harmony. If farmers would realise that wheat will never again obtain its former prices (excepting of course any special combination of a failure of crop and a general war, or some such other untoward circumstances) and never again be the profitable crop that it was, and would turn their attention to mixed farming on scientific principles, they would probably not feel so keenly the present agricultural depression.

300. The following table gives the estimated wheat crop wheat of the world, 1887\*:—

Imports of wheat into the United Kingdom 1887.

302. The total imports of wheat into the United Kingdom in the calendar year 1887 were 149,272,776 bushels, the value of which was 1513 million dollars, and if paid for at the same rate as twenty years ago the value would have been 273 million dollars.

Imports and exports of Canada by countries 1887.

303. The next table gives the imports from and exports of Canada to the United Kingdom, other British Possessions and Foreign Countries during the year 1887, with the percentage of the total amount in each case:—

<sup>\*</sup> Supplement to the Statist, February, 1888.

the trade with the United States formed 6:30 per cent. of their total trade, and according to American official figures, 5:49 per cent. of their total imports were exports from British North America (including Newfoundland), and 4:76 per cent. of their exports were imports into the same. There is, however, and probably there always will be, a large discrepancy between the two sets of figures, owing to the carelessness in valuation of exports on both sides of the line.

The export trade.

305. Almost all the exports went to the United Kingdom and United States, the proportion of the whole being 91.86 per cent.; of the remainder, 4.58 per cent. went to Newfoundland, South America and British West Indies. The exports to exceeded the imports from six countries only; viz., British West Indies, Newfoundland, Portugal, Norway and Sweden, Australasia and Dengark. The imports from British Possessions were \$47,055,506, and the exports to the same \$48,018,656, being an excess of exports of \$966,060, and forming altogether 46.97 per cent. of the total trade as compared with 46.20 per cent. in 1886.

Increases and decreases in exports. 309. There was a decrease in value of exports to ten countries, the largest being to France. Ninety-six per cent. of the total increase was in exports to the United Kingdom and United States, the largest portion of the remainder being to Belgium, Germany and South America. The total increase was 5 00 per cent. as compared with a decrease of 4 46 per cent. in 1886.

Value of diamonds exported from the Cape of Good Hope.

311. With the exception of the United Kingdom and India, the aggregate trade of Canada is larger than any other British Colony; but in proportion to population the trade of the Australasian Colonies is far in advance of that of any other British possession. The value of diamonds exported through the post office is not included in the exports of the Cape of Good Hope, but their value is shown in the following statement which gives the value of diamonds passed through the Kimberley Post Office since 1876, by which some idea can be obtained of the richness of the fields. The figures are official:—

1876	\$ 8,796,656	1882	\$19,430,177
1877		1883	
1878	13,007,354	1884	13,662,139
1879		1885	12,116,340
1880	16,390,432	1886	17,056,479
1881	20,324,183	-	
	, ,	Total	\$158,264,189

Value of total trade of British Possessions.

312. The value of the total trade of the United Kingdom and her possessions was \$4,864,405,038, as compared with \$5,029,337,410 in 1885, being a decrease of \$164,932,872, of which amount \$115,693,645 was due to the decline in the trade of the United Kingdom. The total imports exceeded the total exports by \$432,367,074, the excess of imports into the United Kingdom having amounted to \$395,156,081.

Excess of imports and exports respectively in British Possessions.

313. The following is a list of British Possessions in which imports and exports were respectively in excess in 1886:—

Imports exceeded Exports in

United Kingdom. Jamaica. Straits Settlements. Windward Islands. Ceylon. New South Wales. Victoria. Natal. Cape of Good Hope. South Australia. Western Australia. St. Helena. Canada. Queensland. Newfoundland. Tasmania. Bermudas. New Zealand. Bahamas.

Exports exceeded Imports in

India. British Guiana.
Mauritius. Turk's Island.
Lagos. Leeward Islands.
Gold Coast. Trinidad.
Sierra Leone. Fiji.
Gambia. Falkland Islands.

<sup>•</sup> Including Merchandise, Specie and Bullion.

Aggregate trade of principal countries.

315. The total trade of the United Kingdom is the largest in the world, Germany and France taking second and third places; and the following is the order in which the principal countries doing the largest trade stand, with the amount of that trade in each case:—

United Kingdom	\$3,126,541,547
Germany	1,643,773,532
France	1,507,918,600
United States	1,504,671,460
Netherlands	815,609,955
Italy	783,049,400
India	759, 799, 631

Value of trade per head in various countries.

316. In proportion to population the largest trade among foreign countries is done by the Netherlands, the amount per head being considerably larger than that of any other country, the countries next in order being Switzerland, Belgium and Uruguay; but with the exception of the Netherlands, the per capita value of the trade in the Australasian Colonies is higher than elsewhere. Exports exceeded imports in Russia, Spain, Austria, Hungary, Greece, Japan, Egypt, Chili, Mexico and Brazil.

Exports of the United States.

317. The United Kingdom takes the largest share of the exports of the United States: in 1860 the proportion was 52.50 per cent, and in 1887 51.65 per cent.; in the latter year 7.80 per cent. went to other British Possessions, making a total export to British Possessions of 59.45 per cent. In return for this, however, the States only imported 23.84 per cent. from the United Kingdom in 1887 as compared with 39.17 per cent. in 1860, and 10.75 per cent. from other British Possessions as compared with 10.84 per cent. in 1860, so that while the imports from other British Possessions are about the same in the two years, the imports from the United Kingdom show a decrease of 15.23 per cent. since 1860.

318. Considerable interest having been taken in the tables Trade of that were given last year respecting the trade between Great Britain with her Britain and her Possessions, they have been repeated in this sions. issue, the figures of a later year having been substituted for those of a former one. In 1886 the exports from Great Exports. Britain to foreign countries were \$908,116,623, and to British Possessions \$399,396,194, being a somewhat lower proportion than in preceding years, as the following figures show:-

# PROPORTION OF EXPORTS TO BRITISH POSSESSIONS TO TOTAL EXPORTS FROM THE UNITED KINGDOM.

1871	19.59	per cent
1875	27.22	• "
1880	28.46	"
1884	29.83	.6.6
1885	31.47	66
1886	30.55	66

In proportion to population the exports to British Possessions are much larger than to foreign countries, having been in 1886 \$1.92 and 92 cents per head respectively.

319. The following is a comparative statement of the imports into Britimports into British Possessions during the years 1885 and ish Possessions. 1886, showing in each year the amount and proportion per head that came from Great Britain and other countries respectively:—

# IMPORTS INTO BRITISH POSSESSIONS, 1885 AND 1886.

Imports into Brit-ish Posessions from Great Britain and for-eign coun-tries compared.

320. The total amount imported from Great Britain was \$26,559,954 less than in 1885, and the proportion to the total imports was also less, being 52.00 per cent. as compared with 53.85 per cent. in the preceding year. The excess of imports from Great Britain over imports from other countries has been as follows in the years named, viz., in 1884 \$72,371,510, in 1885 \$74,073,065, and in 1886, \$36,833,675, showing a very considerable falling off in the last year. The imports from Great Britain exceeded those from other countries in eleven colonies, the largest importers being India, New South Wales, Victoria and Canada in the order The Straits Settlements only imported \$15,379,746 from Great Britain, and \$82,692,166 from other countries

Propor-tion of im-Posses-sions into Britain to total imports.

321. The proportion of imports from British Possessions ports from to the total imports into the United Kingdom has remained much about the same for a number of years, as shown by the following figures, though the larger proportion in 1886 may be an indication of a tendency to increase:-

> PROPORTION OF IMPORTS FROM BRITISH POSSESSIONS TO TOTAL IMPORTS INTO THE UNITED KINGDOM.

1871	22.03	per cent.
1875	22.57	· u
1880		
1884	24.56	**
1885	22.75	"
1886	23.40	4.6

But the proportion of exports to Great Britain to the total Colonial exports has steadily decreased during the same period :-

Similar propor-tion of exports. PROPORTION OF EXPORTS TO THE UNITED KINGDOM TO THE TOTAL EXPORTS FROM BRITISH POSSESSIONS.

#### POST OFFICE AND TELEGRAPHS.

Trans.er of Post Office to Colonial Governments. 325. By an Act of the Imperial Parliament, 12-13 Vic., chap. 66, the management of the Postal systems in the Colonies of British North America was transferred to the various Provincial authorities, and up to the time of Confederation each Province controlled its own system, under its own laws and regulations.

Post Office Act 1868. 326. After Confederation, these various laws were allowed to remain in force until the 1st April, 1868, when the Post Office Act, 31 Vic., chap. 10, came into effect, establishing uniform rates and regulations for the Dominion.

Postal agreement with United States.

327. In 1875 an agreement was made with the United States, by which a common rate of postage between the two countries was adopted, each country retaining all money collected, and no accounts being kept between the two post offices in regard to International correspondence.

Admission of Canada intoPostal Union.

328. At the Second Congress of the General Postal Union, held at Paris in May 1878, Canada was admitted a member from the following 1st July, and letters, newspapers and other printed matter, samples and patterns, became subject to uniform postage rates and regulations for all places in Europe, and for all other countries that were members of the Union. The existing postal arrangements with the United States were allowed to remain undisturbed, being of a more liberal and advantageous character than the ordinary regulations of the treaty.

Formation of Postai Union.

329. The Universal Postal Union was formed at a meeting held at Berne in 1874 and the first treaty was signed on 9th October in that year; the countries represented being the

several countries of Europe, the United States and Egypt. The object of the Union was to form all the countries of the world into one single postal territory, and to establish, as far as possible, uniform reduced rates of postage, and also to further the interchange of correspondence, by arranging that every country should be bound to convey the mails of other countries by its land or sea services at the lowest possible rates.

330. At the meeting in 1878 the regulations were revised, Meetings and embodied in a Convention which came into force on 1st Union. April, 1879. The Third Congress was held at Lisbon, in February, 1885, and Canada was represented by the delegates of the British Post Office. No material change was made in the Convention of 1879.

331. All the States of Europe and America, some countries countries of Asia and Africa, and all the British Colonies and Posses- joined it. sions, except the Australasian Colonies and South Africa, are now included in the Union.

332. A new agreement between the United States and New Postal Canada was signed at Washington on 12th January, 1888, agree-ment with to come into effect on the following 1st March and to super-the United states. sede the agreement of February, 1875. The principal change in the agreement was the establishment of a parcel post between the two countries, subject to certain regulations for the protection of Customs with respect to articles liable for duty. All the principal provisions of the agreement of 1875 were retained.

333. The following table gives the number of post offices Number of letters, in the Dominion, and the estimated number and number &c., 1867per head of letters and post cards sent in each year, from 1st July, 1867, to 30th June, 1837:—

<sup>\*</sup>Including post cards.

Increase in number of letters,

334. During the past year 239 new offices were opened, and the total number of post offices is now more than double the number at Confederation, there having been an increase of 3,896. The increase in the number of letters sent, as compared with 1886, was: Registered letters, 160,000; and ordinary letters, 3,290,000; making a total increase of letters posted of 3,300,000, being 700,000 more than the increase of 1886 over 1885. The total number of letters sent in 1886, was 56,200,000 more than was sent in the first year of Confederation, being over three times as many. The number of letters sent per head of estimated population was, according to the above figures, a little over 15. Post cards, which were first issued in 1871 have now reached the large total

Postal rates on newspapers.

336. In the figures in the first column for the years 1868 to 1877 inclusive, are included all newspapers and periodicals sent by mail, whether from the office of publication or otherwise. In 1877 a change was made in the regulations. and all newspapers, periodicals, &c.. sent from the office of publication were carried at the rate of 1 cent per lb., and the number carried has, since that date, been estimated in the above table at nine newspapers to one pound. By an Act that came into operation on the 1st June, 1882, all such newspapers were entirely exempted from postage, and have since been carried free of charge, and as no attempt is now made to ascertain the number so carried, the figures given for the years 1883 to 1887, inclusive, can only be considered as approximate. The increase in the number of books, circulars, &c., carried in 1887, as compared with the previous year, was very large, amounting to no less than 4,860,000.

Proportion of 337. In proportion to area the post offices are distributed post offices as follows:—

Prince Edward Island	1	post office to	7 80	q. miles.
Nova Scotia	1	"	16	• "
New Brunswick	1	"	26	"
Ontario	1	44	63	44
Quebec	1	"	138	46
Manitoba	1	"	183	44
British Columbia	1	44	2,917	44
The Territories	1	44	6,296	"

Number of letters, &c., by Provinces 1883-1887. 338. The number of letters and post cards sent in the several Provinces during the last five years, as estimated in the official reports, are given below:—

in the mated in

Territories in which there was an apparent decrease of more than two letters per head, though the actual number of letters sent was larger. This is owing to the census population used in the calculation in 1887 being less than the estimated population used in former years. The increases in the other Provinces were small, in no case amounting to as much as one letter per head. The largest number of letters both numerically and proportionately were sent in Ontario, and with the exception of Prince Edward Island fewer letters were sent proportionately in Quebec than anywhere else. The above figures however, are, as will readily be seen, only estimated on averages, and can only be taken as giving a very approximate idea of the distribution of correspondence in this country.

341. The expenditure has exceeded the revenue continu- Reasons for excess ously during the last 20 years, and with the exception of of expen-1886, the excess in 1887 was the largest during the period. The revenue, however, showed a satisfactory increase of \$133,876, being double the increase of last year. the long distances that have to be covered in this country are considered, as well as the comparatively scanty population of many parts of it, particularly in the North-West Territories and British Columbia, it will easily be understood that it must be some time yet before the revenue can either balance or exceed the expenditure. The successful development of the country has required and will for some years require continual additions to and extensions of the postal system, and in order to provide postal facilities pari passu with the progress of settlement, it is from time to time necessary to establish offices, the expenditure for which must for a number of years be in excess of the revenue derived therefrom. The Postal Service, however, is managed on sound, economical principles, and the importance of carrying out the principle of providing every part of the country with postal communication is so well recognized, that exception is seldom or ever taken to these deficits, it being well understood that as the population increases and the country progresses, it cannot be very long before this service is at least self-sustaining, the revenue from the older and wealthier Provinces covering the excess of expenditure in newer districts.

\$42. As confirmatory evidence of the foregoing it will be Increase found that whereas the expenditure in 1887 increased 2:30 of revenue proportionately per cent., the revenue increased 5.42 per cent., or 92 per larger than that cent. more than the expenditure. The Postmaster General of expenditure. in his report says: "From present indications it may be "reasonably estimated that this process of reduction in the "annual deficit will be maintained in the amounts of postal

"revenue and expenditure for the current year," and it is mentioned that the issue of postage stamps for the first six months of the present year exceeded the issue of the same for the corresponding period of last year by \$102,868.

Postal operations 1867-1887,

343. The following comparative statement, shows not only the extended operations, but also the increased efficiency of the service since 1868, inasmuch as a much larger quantity of mail matter is carried at same expense:—

POSTAL OPERATIONS IN CANADA COMPARED, 1868 AND 1887.

YEAR.	Number of Offices.	Num- ber of Money Order Offices.	Miles of Post Route.	Miles Travelied.	Amount paid for con- veyance of Mails.	Number of Letters, &c.	Number of News- papers, &c.	Total Cost per Head.
					\$			\$ cts.
1868	3,638	515	27,674	10,622,216	543,109	18,100,000	18,884,800	0 31
1887	7,534	933	54,786	24,324,217	1,654,703	90,656,000	85,066,326	0 71

Cost of transmission 1867-1887. 344. In 1868 the conveyance of mails over 10,622,216 miles cost per mile  $5\frac{1}{10}$  cents, and the transmission of 36,984,800 letters, newspapers, &c., cost  $1\frac{1}{10}$  cents apiece; in 1887 the conveyance of mails over 24,324,217 miles cost  $6\frac{1}{10}$  cents per mile, and the transmission of 175,722,326 letters, newspapers, &c.,  $\frac{9}{10}$  of 1 cent apiece, so that there is a decrease in the cost of each article carried of  $\frac{1}{2}$  of 1 cent; and it must not be overlooked that, if newspapers were carried now at the old rate of 1 cent per lb., between \$50,000 and \$60,000 would be added to the revenue each year.

Revenue from postage stamps, the sum of \$2,577,714 having been stamps.

derived e expenditure was paid out in that Province. There was a decrease in the excess of expenditure over revenue in all the Provinces, with the exception of British Columbia, Manitoba and the Territories, and as would naturally be expected, the expenditure in the last named places was in proportion to revenue and population much heavier than elsewhere. The revenue and expenditure in Ontario more nearly equalize than anywhere else, and this Province will soon make its postal service pay for itself.

349. The following are statements of the number of regist- number of tered letters in each year since 1868, with particulars of letters 1867-1887. their disposal since 1879:-

Registered letters that miscarried.

350. There was an increase in the number of registered letters of 160,000, and in the number that miscarried of Only one in every 21,446 letters registered failed to reach its destination, and the proportion would be much larger if those that failed owing to accidents beyond the control of any system of registration were deducted, quite a number having been destroyed by fire or other accidents while under conveyance, and of 34 only was the miscarriage traced to negligence on the part of post office officials, by whom in each case the amounts lost were made good.

Number Dead Let-ter Office 1867-1887.

351. The numbers of letters and other articles sent to the or letters Dead Letter Office in each year, since Confederation, are given below:-

352. There was an increase of 80,258 in the number of Dead Letletters sent to the Dead Letter Officein 1887. The number failed of delivery, fluctuates, but it is only natural that it should increase as the total number of letters increases. Of the total number sent to the office 193 failed of delivery, and were destroyed, being found to contain nothing of value. A large number That conof letters contained money, either in cash, or as cheques, tained money. notes, drafts, bonds, &c., to the amount of \$349,962. The number of letters sent to the Dead Letter Office in the United States in 1887 was \$178,965

353. The following statement shows the general opera- operations of the money order system, year by year, from 1st July, tions of the money 1867, to 30th June, 1887. It will be seen that there has system been a steady and satisfactory increase:-

OPERATIONS OF THE MONEY ORDER SYSTEM INC CANADA, 1868 TO 1887.

YEAR ENDED 30TH JUNE,	Number of Offices.	Number of Orders I <b>s</b> sued.	Amount of Orders Issued.	Amount of Orders issued in other Countries, payable in Canada.	Losses sustained

1886	910	529,458	10,231,189	1,245,957	25
1887	933	574,899	10,328,984	1,495,674	1,179

Increase in number and decrease in average amount. 354. There was an increase in the number of orders sent of 45,441, being 15,226 more than the increase in 1886, and there was also an increase in the amount sent of \$97,795, but the average value of each order has been still further reduced. In 1868 it was \$37.18; in 1885, \$20.79; in 1886, \$19.32; and in 1887, \$17.96. It may be argued from this, that as the country progresses and banking facilities increase for the business and wealthier classes, the money order system is used almost entirely by the working classes, who keep no banking accounts, and the large increase in the volume of business done is a significant sign of the improved condition of the people.

Money order offices by Provinces. 355. The number of money order offices in operation increased by 23; they are distributed among the Provinces in the following order:—

1868

1869 1870

1871 1872 1873

1874

Excess of revenue.

356. The revenue from fees, profit on exchange, &c., amounted to \$79,326, and the expenditure for salaries, &c., in connection with the system to \$76,845, being an excess of revenue of \$2,481.

Orders
payable in
Canada
and clsewhere.

Of the total amount of orders issued in Canada, \$8,093,887 were payable in Canada, and \$2,235,097 were payable in other countries, being a decrease in the first amount of \$52,208, and an increase in the second amount of \$150,004; and of the total transactions with other countries \$2,235,097 were sent out of the country, and \$1,495,673 came in.

357. The large increase in the amount of losses sustained was exused by the absconding of a clerk in the Winnipeg money order office, the loss incurred thereby amounting to \$902; of the remainder \$239 were stolen from various post offices, and \$35 were lost in transmission.

<sup>\*</sup> Including all those British Possessions and a few foreign countries between which and Canada there is not a direct money order exchange.

From the above table it is seen that the principal money order business with other countries is transacted with the United States, the United Kingdom, and Newfoundland. Since the year 1876, inclusive, the amount of money sent by this system to the United Kingdom has exceeded the amount payable in Canada, by \$4,448,122; during the same period, however, the amount sent to the States has only exceeded the amount received by \$114,915; while the amount received from Newfoundland has exceeded that sent to the Island by \$231,134.

Money order business with Italy.

358. The sum of \$102,355 has been sent by this means to Italy during the last three years, being considerably more than that sent to any other country. This is accounted for by the large number of Italian workmen that have been employed in this country, particularly in railway construction. Money orders are now issued in Canada on almost all British possessions, and on the principal foreign countries, either directly, or through London, England.

Ocean mail service. 359. The sum of \$126,533 was paid as a subsidy to the Montreal Ocean Steamship Company (Allan Line) for the twelve months ending 31st March, 1887, for the conveyance of mails to and from the United Kingdom. This mail service has been performed by this company continuously since May, 1856, until the close of 1885, since which time the "Vancouver" and "Oregon" of the Dominion Steamship Company have assisted in the service, about one passage in three being made by one of these vessels. In the first year of service, viz., 1856, the average passage westward was 12 days 20½ hours, and eastward 11 days 2 hours.

Suggested fast service. 360. As the contract for the conveyance of mails with the Allan Line is about to expire, the Government have been asked to consider the advisability of increasing the subsidy, and providing for a line of steamers that will equal in speed, if not surpass those running to New York. It is believed by many that if this was done, a large amount of freight and passenger traffic might be directed from New York, and, in connection with the Canadian Pacific Railway, a popular line of travel established between Great Britain, the East, and the Australasian colonies.

Comparisons of wages 1867 and 1887.

361. The following particulars of the passages in 1867-68 and in 18 6-87 will be interesting for comparison:—

WINTER SEASON.

<sup>\*</sup> The bulk of cargo was loaded at Portland and Baltimore.

362. The fastest passage from Quebec to Liverpool in Fastest 1868 was made in 8 days 14 hours 15 minutes and in 1887 in 7 days 21 hours 10 minutes. In the latter year the passage from Liverpool to Quebec was made in 7 days 14 hours 45 minutes, and the average of the westward voyage was the highest during the season, but as a general rule the eastward passages are the fastest.

363. The following table gives the numbers and number number per head of letters and post cards sent in the principal sent in countries of the world. The figures have been taken partly countries. from official sources, and partly from the Statesman's Year Book, and the calculations have been made in this office. Attention is again called to the extraordinary quantity of mail matter sent in the Australasian Colonies. The Australasian trade is undoubtedly very large in proportion to population, and the correspondence may be expected to be accordingly large, but it does not seem likely that it should be so much larger than, and out of all proportion to that of any other civilized country, and the high figures are pro-

364. The number of offices open in the United States in statistics 1887 was 55,157, but no statistics of the number of letters of the sent are available; the number of pieces of ordinary mail matter handled in the railway postal cars was 5,834,690,875. In proportion to population there was one post office to every 10.88 persons; in Canada the proportion was one to every 6.47 persons.

#### PART II.-TELEGRAPHS.

365. The principal telegraph lines in Canada are in private Governhands, and the Government only own and operate those telegraph lines. lines which have been built by them in furtherance of the public service, between places where the traffic could not be expected to be sufficient to compensate private outlay, but where public interests required that there should be communication, especially in connection with the signal and other stations established by the Marine Department along the shores of the Gulf of St. Lawrence, the Maritime Provinces and British Columbia, and also, for the advancement of settlement, in the North-West Territories.

366. There were 1,590 miles of land lines and 174 miles situation of cable along the St. Lawrence and eastern coasts, 869 miles of land lines in the Territories, and 680 miles of land lines and 41 miles of cable in British Columbia. The principal cable lines on the eastern coasts are in connection with the Island of Anticosti and the Magdalen Islands; and in British Columbia, across the Straits of Georgia, and between Vancouver's Island and Washington Territory.

367. In consequence of the completion of the Canadian Purchase Pacific Railway through British Columbia, and the establish-Columbia

Apparent decrease but actual increasein receipts.

370. As compared with 1886, there was a decrease of \$7,886 in the revenue, and of \$6,826 in expenditure, but this was in consequence of the sale of lines, as mentioned above, in British Columbia, there having been actually an increase in receipts on almost every line. A new line from Cheticamp New lines. to Mabou was constructed during the year, the North Shore line was extended to Birch River, 45 miles below Moisie, and 45 miles of new line constructed in the North-West.

Tele-graphs in principal countries.

Total telegraph mileage in the world,

872. According to the American Almanae, the total length of telegraph lines in the world is 719,415, of which the United States owns the largest portion, or just about one-fourth, but though that country possesses 147,954 miles of line more than the United Kingdom, the difference in the number of messages sent is small, and the Western Union Telegraph Company of America, which possesses 156,814 miles of line and 524,641 miles of wire, sent 2,849,109 messages less than were sent in Great Britain. There are, it will be seen, only six countries that possess a greater telegraphic mileage than Canada, and with the exception of one or two of the Australasian colonies, no other country possesses the same telegraphic facilities in proportion to population.

Canadian Telegraph companies. 373. The telegraph business of Canada is in the hands of the Great North-Western Telegraph Company, the Canadian Pacific Railway Company, and, in the Maritime Provinces, the Western Union Telegraph Company. The following are particulars concerning them in 1887:—

COMPANY.	Miles of Line.	Miles of Wire.	Number of Messages.	Number of Offices.
Great North-Western Tel. Co	5,000	32,710	3,101,584	1,502
Canadian Pacific Railway Co		17,000	500,000	550
Western Union		7,320	391,500	176

Press messages are not included in the number sent by the Canadian Pacific Railway Company, particulars not being available.

Telephones. 374. The telephone system of Canada is almost entirely in the hands of the Bell Telephone Company of Montreal, which has 290 offices, 15,000 sets of instruments in use, 700 miles of poles, and 7,800 miles of wire. No exact record is

kep ave Tele and is I com tal length the United me-fourth, es of line the numnion Tele-,814 miles messages it will be elegraphic one or two ssesses the population.

ent by the not being

st entirely f Montreal, in use, 700 et record is kept of the number of messages or communications, but the average number is about 68,000 daily. The American Bell Telephone Company had in 1887, 353,518 instruments in use, and 128,231 miles of wire. The laying of a telephone cable is projected between London and Paris, and this mode of communication is coming more into use in almost all countries every day.

# CHAPTER VI.

#### CANALS AND INLAND REVENUE.

Supervision of Canais. 375. The collection of revenue derivable from the various canal systems is under the control of the Department of Inland Revenue, while their construction, repairs and maintenance are attended to by the Department of Railways and Canals.

Canal revenue.

376. The total revenue from all sources from the several systems amounted, in 1887, to \$353,110, as compared with \$364,456 in 1886, showing a decrease of \$11,846, the net revenue showing a decrease of \$3,340.

St. Lawrence system. 377. The system of inland navigation in Canada is the largest and most important in the world. The St. Lawrence system alone, in conjunction with the great lakes, extends for 2,260 miles, viz., from the Straits of Belle Isle to Port Arthur, at the head of Lake Superior; of this distance 71 miles are artificial navigation by means of canals, and 2,189 miles open navigation; from Port Arthur to Duluth, which is the principal port in that section of the United States for the produce of the Western States, is a further distance of 124 miles, making altogether 2,384 miles. When it is considered that by this means unbroken water communication is afforded from Port Arthur and Duluth to Liverpool, a total distance of 4,618 miles, the importance of this system and the necessity for its thorough maintenance will be at once understood.

Sault Ste. Marie Canal. 378. Lake Superior and Lake Huron are connected by the St. Marie River, which is not capable of navigation, owing to the numerous rapids. This difficulty has been overcome by the construction of a canal on the United States side of

the has abo Par doll and ceed this

Silver Build Flour Salt... Grain Lumb Uncla the river, which is rather more than one mile in length, and has one lock 515 feet long and 80 feet wide, with a rise of about 18 feet. Provision was made during the Session of Parliament in 1887, by the voting of a sum of one million dollars, for the construction of a canal on the Canadian side, and through Canadian territory. The work will be proceeded with during the coming summer. The necessity for this work will be apparent when it is considered that this country has no means of access to the waters of Lake Superior, except through the United States. It will be seen also from the following table that the traffic through the existing canal is growing to such enormous dimensions, that one canal will soon be no longer sufficient:—

COMPARATIVE STATEMENT OF THE TRAFFIC THROUGH THE SAULT STE. MARIE CANAL IN THE YEARS 1886 AND 1887.

cted by the ion, owing overcome tes side of Period of navigation through Sault Ste. Marie Canal.

379. The canal was only open for navigation for 224 days in 1886 and for 216 days in 1887, and during that time the traffic through was relatively almost as large as that through the Suez Canal, which will accommodate the largest vessels, and is open to the commerce of the whole world.

Traffic through the Suez Canal. 380. The following table gives the number and total tonnage of the vessels passing through the Suez Canal in the years 1882 to 1886. The figures are taken from the Statesman's Year Book 1888.

TRAFFIC THROUGH THE SUEZ CANAL-1882-1886.

YEAR.	Number of Vessels.	Tonnage.
882	3 108	7 199 195
883	3,198 3,307	7, 122,125 8, 106,01 8,319,967 8,985,411 8,183,313
884	3,284	8,319,967
885	3,624	8,985,411
886	3,100	8,183,313

Sault Ste. Marie and Suez Canal traffic compared.

381. If the Sault Ste. Marie Canal had been open for the whole year, and the traffic had maintained the same rate during all that time as it did during the season of navigation, the tonnage passing through in 1887 would have amounted to 8,276,033 tons, which would have been more than the total tonnage through the Suez Canal in the same year.

Canals on St. Lawrence system. 382. In addition to this, the canals on the St. Lawrence system are the Welland, from Port Colborne on Lake Erie to Port Dalhousie on Lake Ontario, 263 miles in length by the enlarged or new line, with 26 locks, and a total rise of 3263 feet; and, along the St. Lawrence, the Galops, 75 miles in length, with three locks and a rise of 153 feet; the Rapide Plat, 4 miles in length, with 2 locks and a rise of 111 feet;

Lawrence Lake Erie length by otal rise of s, 7§ miles he Rapide 111 feet; Farran's Point, three-quarters of a mile long, with 1 lock and a rise of 4 feet; the Cornwall, 111 miles in length, with 6 locks and a rise of 48 feet; the Beauharnois, 111 miles in length, with 9 locks and a rise of 821 feet and the Lachine Canal, 8½ miles in length, with 5 locks and a rise of 45 feet.

383. The difference in level between Lake Superior and Height of tidewater is about 600 feet. The total number of locks on Superior this system is 58, and the total height directly overcome by sea. locks is 533 feet. The greatest navigable depth is 14 feet, and that at present is only to be found in the Welland Canal, the improvements in which are now completed, and the canal will be open for a 14 feet navigation during the present season. The greatest available depth in the other Depth of canals is at present 12 feet, but all improvements are now made with a view to having a uniform depth of 14 feet throughout the systems.

384. The other canal systems of the country are as fol-Ottawa lows:—The Ottawa, which connects Montreal and the city Rideau Canala of Ottawa, and the Rideau, which in conjunction with the Ottawa system, affords communication between Montreal and Kingston, a total distance of 246 miles. The lockage on this system (not including that of the Lachine Canal) is 509 feet, 345 rise and 164 fall, and the number of locks is The Rideau Canal was originally built by the Imperial Government for military purposes. It was begun in 1826 and finished in 1834, at a cost of \$3,860,000.

385. The Richelieu and Lake Champlain system, or Chambly Chambly Canal, extends from the junction of the Rivers St. Lawrence and Richelieu, 46 miles below Montreal, into Lake Champlain, a distance of 81 miles. There are 10 locks, and a rise of 79 feet. By the Lake Champlain Canal, communication is obtained with the Hudson River, and thence 18

to New York, to which place from the boundary line is a distance of 830 miles.

na dr

an

re

Burlington Bay Canal.

386. The Burlington Bay Canal, half a mile in length, connects Burlington Bay and Lake Ontario, giving access to the port of Hamilton. There are no locks on this canal.

St. Peter's Canal.

387. St. Peter's Canal, Cape Breton, Nova Scotia, gives access from the Atlantic to the Bras d'Or Lakes. It is 2,400 feet long, and has one tidal lock. The rise and fall of the tide is 4 feet.

Trent River system.

388 The Trent River system is only efficient for local use. The scheme of making use of these waters to effect a system of through water communication between Lakes Huron and Ontario has been in contemplation for many years, but up to the present time only certain sections have been made navigable, or fit for the passage of timber. The total distance between the lakes is 235 miles, and about 155 miles of this are available for light draft vessels.

Murray Canal. 389. The Murray Canal has been built through the Isthmus of Murray, giving connection westward between the Bay of Quinté and Lake Ontario. It is 41 miles in length, and has no locks.

Expenditure on canals. 390. The total amount spent on canals by the Imperial Government previous to Confederation was \$4,173,921, and by the Provincial Governments, \$16,028,840. At the time of Confederation all the systems became the property of the Dominion Government, who have expended the further sum of \$31,192,795, making a total amount spent for construction and enlargement alone of \$51,395,556, the amount expended for repairs not being included in these figures.

<sup>†</sup> Less refunds, \$387; ‡ \$8,958; § \$15,304; || 39,575; \* \$31,390.

Various increases and decreases. 393. There was an increase of 1,411 in the total number of Canadian vessels passing through the canals, and a decrease of 416 American vessels, making a total increase of 995 vessels, and 8,411 tons. Though there was this increase in the number of vessels, there was a decrease in the amount of freight carried of 114,947 tons. Passengers increased 10,-

preceding under the

and a dencrease of is increase he amount creased 10,- 586 in number. St. Peter's and the Chambly Canals were the only two that returned a decrease in the number of vessels passing through, but there was a decrease in the amount of freight in the Welland, Chambly, Rideau, and Newcastle District Canals. The tolls on the Burlington Canal were abolished in 1886, and no returns were made last year of the traffic through it.

More than half the total freight carried, viz., 63 per cent., was carried on the Welland and Ottawa Canals, the St. Lawrence Canal taking the next largest proportion, viz., 23 per cent.

394. The following table gives the amounts that have been spent on the different canals, during the past five years, for construction, reconstruction, repairs, and staff maintenance:—

Expenditure for construction, repairs, during the past five years, for construction, repairs, &c., 1883-1887.

It will be seen that the heaviest expenditure has been on the Welland, Carillon and Grenville, and Lachine Canals.

Inland revenue. 395. The functions of the Department of Inland Revenue are the collection of excise duties, and of canal, slides, boom and ferry tolls, also fees for the inspection of food, gas and weights and measures, as well as administering the laws relating to the same. The total revenue that accrued to the Department during 1887 was \$6,978,285, which was \$581,954 more than in the preceding year, and was the largest amount that had accrued during the last five years, as it is shown by the following table, which gives the amount that accrued under each head, in each year fince 1883:—

#### CANALS AND INLAND REVENUE.

HEADS OF ACCRUED INLAND REVENUE, 1883-1887.

HEADS OF REVENUE.	1883.	1884.	1885.	1886.	1887.
Excise	\$ 6,282,796 510,969 49,560	\$ 5,545,391 516,349 43,609	\$ 6,438,688 409,886 28,557	\$ 5,883,580 440,677 30,073	\$ 6,466,151 448,806 19,707
Bill Stamps	34,889 6,878,259	36,401	40,504	42,001	43,621

396. There was a decrease in the amount that accrued Increase from culling timber, as compared with 1886, but an increase crease. under all other heads. The Stamp Act was repealed in 1882.

397. The number of proof gallons of spirits manufactured Manufacin 1887 was 5,119,506, as compared with 4,355,736 gallons consumption of in 1886, being an increase of 763,770 gallons; and the quan-spirits. tity taken for consumption was 2,864,905 proof gallons, being an increase of 386,807 gallons as compared with 1886.

398. The increase in the quantity of spirits manufactured Increase is attributed to the new provision of the Inland Revenue facture of Act, which came into force on 1st July, 1887, by which the sale of spirits which have not been manufactured at least twelve months is prohibited, distillers in consequence finding it necessary to increase their stock. Though there was an increase in the quantity taken for consumption, as compared with 1886, there was a decrease as compared with the average consumption for the four preceding years, which amounted to over 3,500,000 gallons. The increased duty, and the increased price consequent on the enforced warehousing for one year previous to sale, will have a tendency to reduce consumption, "and perhaps this may be

esteemed an advantage, especially when it is known to the general public, that the maturing of spirits, even for twelve months, eliminates the most deleterious ethers and noxious elements, which not only injure the stomach of the consumer, but create and stimulate a vitiated taste."

Materials used.

399. In the production of the above mentioned quantity of spirits, 90,872,151 lbs. of grain and 38,750 lbs. of molasses were used, making a total quantity of raw material of 90,910,901 lbs.

Manufacture of mait. 400. The quantity of malt manufactured during the year was 54,662,804 lbs., and entered for consumption 42,680,440 lbs., being an increase, as compared with 1886, of 6,450,109 lbs. and 5,025,732 lbs respectively. Distillers used 4,730,000 lbs. of the quantity entered for consumption, and the remainder was employed in the production of 14,786,235 gallons of malt liquor.

Consumption of tobacco.

401. There was an increase of 309,357 lbs. in the quantity of tobacco entered for consumption, as compared with 1886, but the amount was below the average of six years, as shown by the following figures:—

TOTAL AMOUNT OF TOBACCO ENTERED FOR CONSUMPTION IN CANADA—1882-1887.

	Lbs.
1882	8,377,201
1883	8,965,416

876	1.20	0 17	2.45	2.31
877	0.97	0.09	2.32	2.05
878	0.96	0.09	2.16	1.97
879	1.13	0.10	2.20	1.95
880	0.71	0.07	2.24	1.93
881	0.92	0.09	2.29	2.03
882	1.00	0.12	2.74	2.15
883	1.09	0 13	2.88	2.28
1884	0.99	0.11	2.92	2.47
885	1.12	0.10	2.63	2.62
1886	0.71	0.11	2 83	2.03
1887	0.74	0.09	3.08	2.59
Average	1.22	0.14	2.57	2.11

Decrease in consumption. 404. According to the above, figures the consumption of spirits is decidedly less than it was 19 years ago, and, with the exception of 1880 and 1886, was less last year than in any other year in the table. The consumption of wine also has decreased, but that of beer and tobacco has increased.

Product and export of tobacco in the United States.

405. The average annual product of tobacco in the United States since 1880 has been 498,106,173 pounds, and the average annual export during the same period 239,011,012; the exports in 1886 and 1887 were, however, considerably above the average, having been 231,737,120 pounds and 293,666,995 pounds respectively. Almost the whole of the amount exported goes to Europe, nine-tenths of the whole going to seven countries—Germany, Great Britain, France, Italy, Netherlands, Spain and Belgium, in the order named. The average quantities and proportions for a number of years are shown in the following table:—

Countries.	Twelve Year	rs, 1870–81.	Five Years,	. 1882-86.
	Lbs.	Per cent.	Lbs.	Per cent.
Germany	69, 240, 770	28.2	49,685,100	21.6
Great Britain	50, 105, 427	20.4	44,918,612	19 .5
France	29,506,250	12.0	32,363,593	14.0
Italy	25,631,448	10.5	29, 259, 714	12 .7
Netherlands	19,173,619	7.8	15,568,326	6.8
Spain	14,534,693	5 9	24,427,794	10 %

Average duty on spirits, beer and wine and tobacco.

406. The average amount per head paid annually in Canada for duty on spirits since Confederation has been \$1.00 and on tobacco 38 cents; on beer and wine it only amounted to fractions of 1 cent in each case. The report of the Minister of Inland Revenue gives the amounts per head by Provinces, but it is not possible to obtain any correct figures regarding the actual consumption in each Province, for the Province that has the greatest number of breweries and distilleries will show the largest consump-

ually in has been e it only ie report unts per any corin each umber of onsumption, without reference to the fact that a large quantity of that liquor, paying duty in one Province, is actually consumed in another.

407. In the United States, in 1887, the amount consumed Consumption of per head was, spirits 1·18, wine 0·55, and beer 1·19. The spirits beer and increase in the consumption of beer and the diminution in wine in the United consumption of spirits appear to be general in Europe as some forwell as on this continent.

The following table, which, with the exception of the figures for Canada, have been taken from the Victorian Year Book, 1886-87, give the annual consumption of beer and spirits per head in various countries:-

ANNUAL CONSUMPTION OF SPIRITS PER HEAD IN VARIOUS

Countries.	Gallons.	Countries.	Gallons.
Holland	1·46 1·39 1·34 1·27	Germany New Zealand Canada France South Anstralia Tasmania Austria-Hungary United Kingdom	0.86 0.85 0.70 0.69

# ANNUAL CONSUMPTION OF BEER PER HEAD IN VARIOUS

Countries.	Gallons.	Countries.	Gallons.
United Kingdom	19·38 19·05	Queensland	8.15

The figures for Canada are the average consumption for the last three years. The consumption of intoxicating liquors in Holland is very large, and allowing for increased potency of spirits is considerably in excess of that of any other country.

# CHAPTER VII.

#### RAILWAYS.

408. In India and in all of the principal British Colonies Governwith the exception of Canada, the railways have been prin- to public cipally, and in some cases entirely, built by the Government companwith public money, and large portions of the public debts have been incurred for that purpose, but in this country the Government have only built such lines as were required by public policy, those being the Intercolonial and Prince Edward Island Railways; the first being built in accordance with the wishes of the Imperial Government, and the second to fulfil the pledges made to Prince Edward Island when that Province entered Confederation. The Government, however, has always been active in encouraging private enterprise, and in that way has expended no less a sum than \$129,810,633 in the shape of bonuses at different times to different railways, which sum represents a considerable portion of the public debt, and which as previously mentioned, though directly productive to the country at large, brings in no immediate return to the Government. In addition to the above the Government has at various times made loans to railways, the amount of such loans at present outstanding being \$20,592,026. The Provincial Governments have also contributed aid to the extent of \$21,204,798, and various municipalities to the extent of \$12,812,836. ·

409. The first railway in Canada was opened on the 21st Early rail-July, 1836, between Laprairie and St. Johns in the Pro- ways in Canada. vince of Quebec, its length being 16 miles, but such little progress was made in railway development, that when the first sod of the Northern Railway was turned by Lady

Elgin in 1850, there were but 71 miles in operation. Speaking of that ceremony the *Illustrated London News* said: "The inhabitants of the frozen and hitherto imperfectly "understood region of Canada have not until recently "availed themselves of the modern advances in public im-"provements." Slow though this country undoubtedly was at one time in the matter of railway construction, it has of late years made very considerable progress. In 1867 there were 2,268 miles in operation, and on 30th June, 1887, 11,691 miles, with a total of 12,332 miles completed, being an increase in the 20 years since Confederation of 9,433 miles. In 1868 the paid-up capital amounted to \$160,471,-190, and in 1887 to \$683,773,191.

00 37 04	154 1,031 107
)1	55,447

411. The proportion that each amount bears to the total Proportion of capital is as follows :-

	Per cent.
Ordinary share capital	33.
Bonded debt	28.
Dominion Government aid	19.
Preference share capital	14.
Provincial Government aid	3.
Municipal aid	2.
Other sources	0.3

Twenty-five per cent, of the total capital has thus it will be seen been contributed by state and municipal aid.

412. Though returns of a certain kind we samually made statistics to the Government, they were, previously to 1874-75, more 1875 1887. or less incomplete, and only since that year have my accurate statistics been collected. The following to be gives the train mileage, number of passengers and tos of freight carried, and the receipts and expenditure of an railways in the Dominion for each year since the 1st July, 1874:—

YEAR ENDED 30TH JUNE,	Miles in Opera- tion.	Train Milcage.	Number of Passen- gers.	Tons of Freight.	Ear gs.	Working Expenses.
					\$	\$
1875	4,826	17,680,168	5,190,416	5,670,836	19,470.53	15,775,532
1876		18,103,628			19,358,084	15,802,721
1877	5,574	19,450,813	6,073,233		18,742,053	15,290,091
1878	6,143	19,669,447	6,443,924	7,883,472	20,520,078	16,100,102
1879	6,484	20,731,689	6,523,816	8,348,810		16, 188, 102
1880	6,891	22,427,449	6,462,948	9,938,858	23,561,447	16,840,705
1881	7,260	27,301,306	6,943,671	12,065,323	27,987,509	20, 121, 418
1882	7,530	27,846,411	9,352,335	13,575,787	29,027,790	22,390,709
1883	8,726	30,072,910	9,579,948	13,266,255		24,691,667
1884	9,575	29,758,676	9,982,358			25,595,341
1885	10,150	30,623,689	9,672,599		32,227,469	
1886	10,697	30,481,088	9,861,024		33,389,382	
1887	11,691	33,638,748		16,356,335	38,842,010	

Particulars of increases.

413. It will be seen that there was a very marked increase indeed in the business of the railways in 1887, and the totals in each column are considerably larger than they have ever been before. The earnings per mile in 1880 averaged \$3,418, in 1884 \$3,490, in 1885 \$3,175 in 1886 \$3,106, and in 1887 \$3,322, being an increase of \$216 per mile as compared with the year before, making a decided break in the tendency which was manifesting itself for the earnings to decrease as the mileage was extended average amount of working expenses per mile in 1886 was \$2,166, and in 1887 \$2,363, showing an increase of \$197 per mile, but there was an improvement in the proportion of net receipts to capital cost; in 1886 it was 1.41 per cent. and in 1887, 1.64 per cent. There was an increase in train mileage of 3,157,660 miles, in the number of passengers carried of 837,614, in the tons of freight carried of 685,875, and in the net receipts of \$1,005,527.

Business of Canadian Railways 1886 and 1887.

414. The following is a comparative statement of the business done by Canadian Railways in the years 1886 and 1887, particulars of the principal lines being given separately:—

ked increase 37, and the than they ile in 1880 .75 in 1886 of \$216 per a decided tself for the nded The 1886 was of \$197 per oportion of per cent., ase in train passengers of 685,875,

415. There was again a decrease in the proportion of Proporworking expenses to receipts, amounting altogether to 1 working per cent.; in 1884 the proportion was 76 per cent., in 1885 to receipts. 74 per cent., in 1886 72 per cent., and in 1887 71 per cent., the decrease being gradual but steady. The proportion, however, is still higher than in most European countries, where it ranges from 50 to 55 per cent., higher than in the Australasian Colonies, where in 1884 it was 63 per cent., and higher than in India, where it was, in 1886, under 48 per cent. The decrease, it will be seen, was confined entirely to public lines, there having been an increase among Government lines in the excess of working expenses over receipts from 107 per cent. to 111 per cent. The Canada Southern and the Northern and North-Western were the two roads whose expenses bore the smallest proportion to receipts, and the South-Eastern system and the Central Ontario the largest. Since the commencement of the present year, the Northern and North-Western Railway has been taken over by and been made part of the Grand Trunk Railway system.

416. The excess of expenses over receipts on Government Excess of expenses lines may be attributed principally to two causes, one being over receipts on government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess of expenses over receipts on Government excess over receipts on Government excess over receipts on Government excess over receipts over receipts over receipts over receipts over receipts on Government excess over receipts over that both the Intercolonial and Prince Edward Island Govern-Railways were built from national considerations, and for lines. the advancement of public convenience, the first road running through districts sparsely settled, and therefore requiring considerable time for the development of trafficwhile it will probably be many years before the travel on the Prince Edward Island Railway will be sufficient to cover expenses; and the other being that while every effort is made to secure economy and profit, the public interests are first considered, and many things are done which, while advantageous to the public, are, to say the least, unremunerative to the Government; for instance, the coal

from the Nova Scotia mines is, with a view to developing that industry, carried by the Intercolonial Railway at almost an actual loss. The difficulty also of keeping the track of the Intercolonial free from snow during the winter will always be the source of an expense, to which other roads are not liable in the same degree.

Sources of receipts and expenditure.

417. The following table gives the principal sources of receipts and expenditure on the most important railroads as well as the earnings and expenses per mile. Owing to the absence of details in the cases of one or two small roads, a difference will be found in the total earnings. as compared with the totals of the principal sources, of \$46,216, and in a similar way in the expenditure of \$10,514.

SUMMARY STATEMENT OF EARNINGS ON CANADIAN RAILWAYS, 1887.

	E.	ARNINGS FRO	М		Earn-
RAILWAYS.	Passenger Traffic.	Freight Traffic.	Mails, Express and other sources	Total.	ings per Mile.

SUMMARY STATEMENT OF WORKING EXPENSES ON CANADIAN RAILWAYS, 1887.

RAILWAYS.	Main- tenance of Line, Buildings, &c.	Working and Repairs.	General Working Expenses.	Total.	Expenses per Mile.
4	\$	\$	\$	\$	\$
Canada Atlantic	59,451	99,400	62,515	221,375	1,729
Canada Southern	531 503	945,835	997,913	2,475,251	7,111
Canadian Pacific system	1,618,511	3,311,011	2,369,523	7,299,045	1,708
Grand Trunk Ry. system	2,156,039	4,863,400	4,036,840	11,056,279	4,256
Intercolonial	782,053	1,329,977	716,086	2,828,116	3,214
New Brunswick system	172,500	232,137	127,078	531,715	1,281
Northern and North-Western	254,288	284,182	344,468	882,938	1,790
South Eastern system	133,856	149,544	112,551	395,951	1,523
Other Lines	697, 189	661,309	565,001	1,934,013	848
Total	6,405,390	11,876,804	9,331,975	27,624,683	2,363

418. The receipts from freight traffic formed 63.28 per proportions of cent., and from passenger traffic 30.55 per cent. of the total, sources of while of working expenses 42.99 per cent. were for work- and exing and repairs, 33.78 per cent. for general working expenses, and 23.18 per cent. for maintenance of line, &c. Both receipts and expenses were considerably larger per mile on the Canada Southern Railway than on any other road, the traffic being very heavy in proportion to the length of the line.

419. The next table gives some particulars of the quanti- quantities ties of the leading articles of freight carried by Canadian pal freight railways in 1887. The largest quantities of freight of all kinds were carried by the Grand Trunk system, and of the total freight tonnage carried by all the lines in Canada that system carried 39.48 per cent. the next largest proportion being carried by the Canada Southern, viz. 15.77 per cent. The proportion of freight however to the length of

sources of railroads Owing to nall roads, compared , and in a WAYS, 1887.

leveloping

y at almost e track of inter will her roads

Earnings per Mile. 669 2,661 ,898 ,254 ,189 010 2,950 200 1,776 ,871 2.949 609 1,591 310 995,010 3,322

the road was very much higher on the Canada Southern; on that road it was 7,129 tons per mile in operation, and on the Grand Trunk system it was only 2,486 tons per mile.

Quebec Central	154	6,526,340	42,379
Windsor and Annapolis	84	3,902,280	46,456

<sup>\*</sup> Windsor Branch included.

421. The expenditure on the construction and equipment Expendiof the Grand Trunk system has, it will be seen, been very Grand Trunk and much in excess of that on any other read, the expenditure North-West Coal on the main line during its original construction having and Navigation been exceptionally heavy. The North-Western Coal and Company. Navigation Company's road, which connects the coal mines on the Belly River with Medicine Hat, and which has a gauge of 3 feet only, is the road that according to the above table has been built at the least expense, which is probably explained by the fact of its running through a level prairie country, and that no outlay was required for the purchase

of land. The difference in gauge also probably reduced the expenditure.

Average cost in Canada and some foreign countries.

422. The total average cost per completed mile of all the railways in Canada is \$55,447, which it will be seen from the following table compares favorably with the figures for some principal countries:-

COST OF RAILWAY CONSTRUCTION IN PRINCIPAL COUNTRIES.

Counthirs.	Cost per Mile.	Countries.	Cost per Mile.
	\$		\$
United Kingdom	206,765	Australasia	57,976
Belgium	177,672	Canada	55,447
France	134,826	United States	54,301
Germany	103,349	Cape Colony	44,856
Russia	97,333	New Zealand	42,403
Victoria	66,951	Tasmania	41,026
India	61,250	Queensland	32,383
New South Wales	62,021	South Australia	31,302

423. The following is a statement of the number of acci-Rallway 423. The following is a statement of the number of accidents in Canada, dents in connection with the railways in Canada, including Government railways, for the last 12 years :-

	Killed.	Injured.
1876	109	304
1877	111	317
1878	97	361
1879	107	66
1880	87	102
1881	99	147
1882	147	397
1883	169	550
1884	227	796
1885	157	684
1886	144	571
1887	178	633

Causes of accidents.

424. There was a very large increase in the number of persons killed in 1887, amounting to 34, but of the total number, 128 lost their lives by carelessness, disregard of reduced

f all the een from rures for

NTRIES.

Cost per Mile.

57,976

of accicluding

aber of e total gard of regulations, or some other cause preventable by their own actions, leaving as ' number killed from causes over which they had no control, 50 persons, all of whom were railroad employés. Eleven passengers were killed during the year, all of whom, with one exception, were responsible for their own deaths, 5 being killed by falling from the cars, 4 by getting off trains in motion and 1 by walking on the track. Thirty-nine passengers were injured in various ways, being 20 less than in 1886. No less than 69 out of the 84 persons killed, other than employés and passengers, met their death through walking on the track.

425. In calculating the safety of railway travelling in Passer-Canada, none of the passengers killed in 1887, should per milion carrietly speaking be included, since the companies were ried in Canada. in no way responsible for their deaths, but even if the whole number is taken, it will be seen from the following figures, that this country stands very well as regards safe travelling:—

PASSENGERS KILLED PER MILLION CARRIED-1875-1887.

Y RAR.	Passengers Killed per Million Carried.	YEAR.	Passengers Killed per Million Carried.
1875	0.82 1.40 1.38 1.55	1882	1·07 0·52 4·60 0·82 0·61 1·03

These figures, however, are capable of a large amount of improvement, the safety of travelling having been by no means yet reduced to the minumum that is both desirable

and practicable, as is shown by the figures for the United Kingdom in 1887, which say that only 1 passenger in every 7,637,780 was killed during the year from any cause whatever.

Passengers and freight per head of population and miles of line.

426. The next table gives some particulars concerning the passengers and freight carried relatively to population and length of line in each year from 1875:

PASSENGERS AND FREIGHT CARRIED PER HEAD OF POPULATION AND MILES OF LINE OPEN IN CANADA, 1875-1887.

n n s<sup>1</sup> b

Cu

t

	Passe	NGERS.	FREIGHT.		
YEAR.	Per Head of Population.	Per Mile of Line open.	Tons per Head of Population.	Tons Per Mile of Line open	
1875	1·34 1·40 1·51 1·58 1·57 1·53 1·60 2·12 2·17 2·06 2·06 2·19	1,055 1,075 1,090 1,049 1,006 936 956 1,242 1,098 1,043 953 922 914	1·46 1·60 1·71 1 93 2·01 2·36 2 78 3·06 2 94 2·98 3·12 3 27 3·36	1,175 1,228 1,231 1,283 1,288 1,442 1,662 1,802 1,520 1,432 1,444 1,465	

As regards population both passenger and freight traffic have increased in a faster ratio, but in both cases it will be seen that the total mileage has increased in a faster proportion than has the traffic carried over it.

Freight per head of population in principal sountries.

427. The following table, the figures in which are mostly taken from "Wealth and Progress of New South Wales," p. 361, will give some idea of the tonnage moved per head of population in some of the principal countries of the world:—

e United in every se what-

428. The cost of a railway, it has been said, should not be proportion of the times its annual traffic, that is, that the annual traffic should be 10 per cent. of its capital cost.\* If this standard is applied to Canadian railways, their cost will be found to very far exceed the limit, as in 1887 the gross receipts only amounted to 5.72 per cent. of the total capital expenditure. In the United Kingdom, France and Belgium, the cost of railways is above this standard, while in Germany and the United States it is slightly below it.

429. Almost all the railway companies in the Dominion Gauge of use a gauge of 4 feet 8½ inches. The only exceptions are the Railways. Carillon and Grenville, and Cobourg, Peterboro' and Marmora roads, with a gauge of 5 feet 6 inches, the Prince Edward Island Railway, with a gauge of 3 feet 6 inches, and the North-Western Coal and Navigation Company, where the gauge is 3 feet.

430. The quantity and description of rolling stock in the Rolling years 1886 and 1887 will be found in the next table. With use. the exception of platform cars, there is an increase under each head:—

<sup>\*</sup>Railway Problems, p. 25.

## ROLLING STOCK OF RAILWAYS IN CANADA, 1886 AND 1887.

Rolling) stock hired. 431. The above table represents the rolling stock in use; to ascertain the quantity owned, the following numbers of cars hired must be deducted in each year:—

YEAR.	Loco- motives.	Sleeper and Parlour Cars.	First Class Cars.	and Emi-	Baggage, Mail and Express Cars.	Cattle and Box Cars.	Plat- form Cars.	Coal and Dump Cars.
1886 1887	40 46	8 8	31 35	20 16	20 23	847 376	237 345	50

Canadian Pacific Railway.

482. A concise description of the building of the Canadian Pacific Railway will be found in the "Statistical Abstract," 1886. During 1887 the company completed the laying of the rails on the extension from Algoma to Sault Ste. Marie, known as the Algoma Branch, and the line is expected to be open for traffic in June. By this means the company have direct communication with the American railway system. As provided for by 49 Vic., c. 9, the company after having settled their indebtedness to the Government, issued mortgage bonds on the above branch, which were most favourably received in London. The amount offered was £750,000, and before 12 o'clock on the same day that the prospectus was advertised, applications for £5,000,000 had been received. In order to make communication with the

Completion of the Algoma Branch.

ne Canatatistical leted the Sault Ste. expected company railway any after nt, issued ere most ered was that the ,000 had with the

American railways complete, it was necessary to build a bridge across the River Ste. Marie, which has been done. The bridge was begun in May, 1887, and completed in over the January, 1888, at a cost of \$600,000. It has a total length River. of 11 miles, and is the joint property of the Canadian Pacific Railway, the Duluth, South Shore and Atlantic Railway and the Minneapolis, Sault Ste. Marie and Atlantic Railway. When this branch is in complete running order it will be the shortest route for the conveyance of the produce of the North-Western States to the seabord, and is probably destined to largely increase the importance of Montreal as a commercial port.

433. The company's lines now cover a total mileage of Total 4,960 miles, distributed as follows:—

mileage Canadian Pacific Railway.

Montreal to Vancouver	
Other lines owned—	
Total lines owned	925
I.eased lines—   Ontario and Quebec Section	
Total leased lines	1,129
Total mileage	4,960

434. The following is a comparative statement of the Canadian Photographic Canadian Phot traffic during 1886 and 1887 calendar years:—

ITEMS.	1886.	1887.
Passengers         No.           Freight         Tons.           Manufactured articles         "           Flour         Brls.           Grain         Bush.           Live stock         No.           Lumber         Ft.           Firewood         Cords. Earnings and expenses.

435. The earnings for 1887, calendar year, amounted to \$11,606,413 and the working expenses to \$8,102,295, the proportion of expenses to earnings being 69.81 per cent. The receipts showed an increase of \$1,524,609 over those of 1886, the figures for the last 3 years having been \$8,368,493, \$10,081,804 and \$11,606,412 respectively.

Equip-

436. The equipment of the road on 31st December, 1887. ment, 450. The e-canadian consisted of: Railway.

Locomotives	374

Sleeping and dining cars	48
Pariour and official cars	23
Freight and cattle cars	9,296
Conductor's vans	185
Boarding, tool and auxiliary cars	86

Steamship sertween Vancouver and Hong Kong.

437. The temporary steamship service between Vancouver and Yokohama and Hong Kong freely justified the expectations of the company as to the value and importance of the trade to be developed in that direction. The negotiations with the Imperial Government for the establishment of a permanent line of first-class steamships, suitable for service as armed cruisers in case of need, resulted in an official notification that Her Majesty's Government had decided to grant a subsidy of \$300,000 (£60,000) per annum for a monthly service between Vancouver and Hong Kong viâ Yokohama. In December last the details of a formal contract were practically settled, but owing to negotiations still pending between the Imperial and Dominion Governments, with reference to an improved Atlantic service, the contract has not yet been signed.\*

Pacific Railway than by any other route, and the winter route viâ Halifax is 17 hours shorter than the shortest winter route through the United States, and attention has already been called by the American press to the manner in which this road is cutting into the business of the transcontinental roads of the United States.

439. The company had sold, up to the 31st December, Landsales 1887, a total of 3,272,749 acres out of the 18,206,986 acres by the Canadian remaining to them of the original grant of 25,000,000 acres. Pacific Railway The sales during 1887 were 59,993 acres, at an average price of \$3.39\frac{1}{2} per acre, as compared with \$3.28 per acre in 1886.

440. By clause 15 of the original contract between the Themono-Government and the company it was provided that for 20 clause. years from the date thereof (21st October, 1880) no line of railway should be authorized by the Dominion Parliament to be constructed south of the Canadian Pacific Railway, except such lines as should run south-west or west southwest, nor to within 15 miles of latitude 49 (the international boundary.)

441. Considerable agitation having, during the last two Agree-years, arisen in the Province of Manitoba in consequence cancellaof the enforcement of this clause, it was deemed best in the monopoly interests both of the country and of the company that some arrangement should be made by which, in return for adequate compensation, the company should resign all their rights under the clause, and an agreement was accordingly made between the Government and the company to the following effect:

The company agreed that all restrictions imposed upon the Dominion Parliament by said clause 15 should cease to exist and be forever removed.

 $20\frac{1}{2}$ 

The Government agreed to guarantee the payment of interest for not longer than fifty years from date of issue on bonds of the company to an amount not exceeding \$15,000,000, such interest to be at the rate of three and a half per cent. per annum, the bonds to be secured on the unsold lands of the company, estimated at 14,934,238 acres. The net proceeds of the sales of such lands to be from time to time paid over to the Government to constitute a fund for the payment of the principal of the bonds, the interest, at the same rate of three and a half per cent., on the money so set apart to be applied towards payment of the interest on the bonds.

Other provisions were made respecting the land grant bonds at present outstanding, and the company's roads between Winnipeg and St. Boniface and the American boundary.

The money to be raised by the bonds was to be expended as follows:—On account of capital expenditure on main line between Quebec and Vancouver, in buildings and improvements of various kinds, \$5,498,000; for rolling stock required, \$5,250,000, and for improvements required on the main line and elsewhere, \$4,252,000.

Ratification of agreeanent. 442. The agreement was signed on the 18th April, 1888, and was subsequently ratified by the Dominion Parliament.

Railways in British Posses443. The following table gives the railway mileage in British Possessions, together with the number of persons and of square miles of area to each mile:—

RAILWAYS.

RAILWAYS IN BRITISH POSSESSIONS, 1886.

Countries.	Miles of Railway.	Number of Persons to cach Mile.	Square Miles of Area to each Mile.
United Kingdom	19,332	1,930	6
India	13,390	15,086	65
Canada	12,332	395	293
Australasia (Total)	8,891	383	356
New South Wales	1,935	518	161
New Zealand	1,809	326	58
Cape of Good Hope	1,775	705	120
Victoria	1,753	572	50
Queensland	1,555	208	430
South Australia	1,382	226	654
Tasmania	303	452	87
Natal	220	2,012	85
Ceylon	180	16,349	141
Western Austral.	154	257	6,883
Jamiaca	93	6,488	45

Barbadoes	23	7,686	7
British Guiana	21	13,062	5,190
Malta	8	19,904	15

444. Canada, it will be seen, has nearly 4,000 miles of Proportion of railway more than all the Australasian Colonies combined, railway develop. but on the assumption that a railway only opens up country area. to the extent of about 20 miles on either side, there is yet a vast amount of country waiting for development, as on that basis there are only 493,280 square miles of this country within ordinary reach of railway facilities—only a little more than one-seventh of the total area. In the Australasian Colonies only about one-ninth of the area has been thus developed.

445. The total railway mileage of the British Empire is Total rail-65,383, which on the estimated area of 7,999,615 square miles age of the British gives an average of one mile of railway to every 122 square Empire. miles, and on the assumption in the preceding paragraph

<sup>\* 1587.</sup> 

447. According to the American Almanac, 1888, the total Railway 447. According to the American Aimanac, 1000, the total mileage of railway mileage of the world was 339,028, and of this quanthe world. tity 148,987 miles, or 44 per cent. of the whole length, was Belgium, the German Empire and in the United States. Switzerland possess the largest amount of railway accommodation, and Brazil the smallest. There are no railways in Persia.

448. The railways owned by the Dominion Government Government rattered to the contract of the are the Intercolonial, Windsor Branch, Eastern Extension ways and their finand Prince Edward Island railways, with a total mileage ancial position. in operation of 1,204 miles; and the following statement shows the financial position of each road on the 30th June, 1887 :---

FINANCIAL POSITION OF GOVERNMENT RAILWAYS IN CANADA, 1886-87.

Railways.	Capital paid up	Earnings.	Expenses	Profit	Loss.	Percent- age of Expenses to Earnings.
	\$	\$	\$	\$	\$	
Intercolonial Eastern Extension Windsor Branch P. E. Island	44,995,982 1,284,496 3,741,781	2,596,010 64,107 25,327 155,303	2,828,116 94,254 26,042 204,237		232,106 30,147 715 48,934	108.9 147.0 102.8 131.5
Total	50,022,259	2,840,747	3,152,649		311,902	110.9

449. There was a very decided increase in excess of Reasons expenditure over earnings on Government railways during of expenditure. 1887, the percentage of expenses to earnings being 110.9 as compared with 107.2 in 1885, and the total excess being \$311,902 as compared with \$190,637. This excess was largely attributable to the severity of the snow storms, which entailed an unusually large expenditure, the amount directly spent on the Intercolonial for clearing snow being \$92,000, or more than double the average cost for the last 6 years, and also to a large amount spent on improvements on the same road which would ordinarily be placed to capital account. The traffic on the Eastern Extension was also seriously interfered with owing to the absence of the large

193

he total is quanth, was ire and

accom-

fish trade from the Straits of Canso, American fishermen being debarred from landing their fish in Canada.

Windsor Branch. 450. The Windsor Branch is owned and maintained by the Government, but is operated by the Windsor and Annapolis Railway, who pay one-third of the gross earnings to the Government. The Government's share is generally sufficient to cover the cost of maintenance, but last year a good deal of extra expense was incurred in substituting steel for iron rails and in building a new station. This road runs from Halifax to Windsor a distance of 32 miles, and owing to the heavy cost of maintenance the loss during 1887 amounted to \$715.

Intercolonial Rallway.

451. The main line of the Intercolonial Railway runs from Point Lévis, Quebec, to Halifax, a distance of 688 miles, and in connection with the Canadian Pacific Railway now forms part of the through route between the Atlantic and Pacific oceans. The extensions consist of 192 miles, making a total length of 880 miles.

Traffic on the Intercolonial Railway 1878-1887. 452. The following are figures of the traffic during the past 10 years:—

TRAFFIC ON THE INTERCOLONIAL RAILWAY, 1878-1887.

YEAR.	Earnings.	Freight.	Passengers.
	\$	Tons.	No.
1878	1,378,947	522,710	618,957
1879	1,292,100	510,861	640,101
1880	1,506,298	561.924	581,485
1881	1,760,394	725,577	631,245
1882	2,079,262	838,956	779,994
1883	2,370,921	970,961	878,600
1884	2,353,647	1,001,163	920,870
1885	2,368,154	970,069	914,785
1886	2,383,201	1,008,545	889,864
1887	2,596,010	1,131,334	940,144

Passengers.

No. 618,957 640,101 581,485 631,245 779,994 878,600 920,870 889,864 940,144 It will be seen that the traffic has increased very considerably, the figures for 1887 being in all cases the largest during the period, yet the financial results continue to be unsatisfactory, partly owing to the heavy expenses each winter necessarily incurred in keeping the line open and partly to the extremely low rate at which coal is carried from Nova Scotia into Quebec and Ontario, as well as to the number of improvements that have been charged to working expenses. The quantity of coal carried has increased very rapidly from 570 tons in 1880 to 175,512 tons in 1887, but it is carried at so low a rate as to be unremunerative to the railway.

453. The train mileage was 4,512,599, an increase of Expenses per mile. 472,772 miles, and the expenses per mile of railway were \$3,266, an increase of \$375 per mile.

454. The Eastern Extension Railway is 80 miles in length Eastern and extends from New Glasgow to Port Mu'grave on the Extension Railway. Strait of Canso, and connects with Cape Breton by means of a ferry. It is worked by the officers of the Intercolonial Railway. There was a decrease both in freight and passenger receipts, and the expenditure for renewals of bridges, &c., was very heavy. Expenditure for these purposes may be expected to be costly for the next few years.

455. The Prince Edward Island Railway runs the whole Prince length of the island, a distance of 1541 miles, and, including Edward Island extensions, has a total length of 212 miles. There was an increase in the passenger traffic during 1887, but an unexpected and unexplainable falling off in the freight business. In proportion to its cost, the traffic on this road is very light, and it will probably be several years before the earnings equal the expenditure.

Cape Breton Railway.

456. A line of railway is now in course of construction by the Government through the Island of Cape Breton, a distance of 98 miles, from Point Tupper, at the Strait of Canso, to Sydney. This road will form part of what is known as the Short Line, in which expression is comprised a scheme for connecting Montreal with Canadian Atlantic ports by the shortest route.

# ARTS, AGRICULTURE AND IMMIGRATION.

### PART I.-ARTS.

The Patent Office. 458. The business of the Patent Office continues to increase every year, the number of applications and the amount received from fees during 1887 being in excess of corresponding figures in any previous year, the increase in fees amounting to \$2,184, which however was not so large an increase as that in 1886 over 1885 which was \$4,874.

Transactions 459. The following table shows the different transactions the Patent of the Patent Office in each year since 1st July, 1867:—

BUSINESS OF THE PATENT OFFICE OF CANADA, 1867-1887.

460. The limit of duration of a patent is fifteen years of Patent which period can be reduced by the applicant to five or ten tents. years, on payment of a proportionate fee. In 1882, there were 1,846 patents granted, of which 187 were for 15 years, 26 for 10 years, and the remainder, 1,633, for five years, and of this last number, 1,382 were allowed to lapse at the expiration of the term, showing that the large majority of Canadian patents are not kept in force for more than 5 years.

461. The business in the Copyrights and Trade Marks Copyrights and Branch also showed a very considerable increase, the receipts Trade Marks, being \$1,603 in excess of those of 1886.

The following table shows the large increase in the business of this branch since Confederation:—

COPYRIGHTS, TRADE MARKS, INDUSTRIAL DESIGNS AND TIMBER MARKS REGISTERED IN CANADA, 1868 TO 1887.

Liverpool and Saltaire Exhibitions.

462. A large portion of the collection which had been shown at the Indian and Colonial Exhibition in 1836, was utilized for the exhibitions at Liverpool and Saltaire in 1887, special attention being devoted to illustrating the agricultural resources of the Dominion. The general interest shown in the exhibits was very considerable, and the effect produced is stated to have been very favourable.

## PART II.-AGRICULTURE.

Decrease in importation of pure bred cattle.

463. The decrease in the number of pure bred cattle imported from Europe during 1387 was very considerable, the total number only being 152 as compared with 601 in 1886. This falling off is attributed to the unfortunate outbreak of pleuro-pneumonia in the preceding summer, and also to the want of demand and depressed state of the market for imported cattle in the Western States. There was an increase of 160 in the number of sheep, and a decrease of 4 in the number of pigs imported. That the decrease has been steady is shown by the following comparative figures:—

IMPORTATIONS OF CATTLE, &c., FROM EUROPE, 1884 TO 1887.

YEAR.	Cattle.	Sheep.	Pigs.
1884	1.607	473	26

465. The total importation of animals into Canada for Total importation breeding purposes in 1887 was:

Cattle	549
Sheep	6,539
Pigs	262

The increase in the number of sheep imported into Manitoba and the North-West was very considerable.

466. There was a decided increase in both the number Horses, cattle and and value of horses, cattle and sheep exported, as will be sheep exported seen from the following table which gives particulars of 1874-1887. the export trade since 1874:-

HORSES, CATTLE AND SHEEP EXPORTED FROM CANADA, 1874 TO 1887.

467. Some idea can be formed of the extent and importance Live cattle of this trade when it is seen that the value of the horses, cattle trade. and sheep exported during the last 14 years has reached the enormous sum of \$80,149,214, and as the above table shows, the dimensions of the trade are continually increasing. Previous to 1872 no meat, either live or dead, was exported

from this country to Great Britain, except a certain quantity of salted beef, and the export of live cattle may be said to have commenced in that year—the first shipment being made through the United States owing to there being no vessels trading to Canada suitable for the purpose. Since that time however vessels have been built specially fitted for the carrying of live stock; and this circumstance, by reducing the rates of freight, has contributed largely towards keeping the business a fairly remunerative one in spite of the fall in prices and the reduced demand owing to a much larger home supply. (Statistical Abstract, 1886, p. 274.)

Export of live cattle to Great Britain and the United States.

468. The following table shows how very rapidly the trade has increased since its inception:—

EXPORT OF LIVE CATTLE TO GREAT BRITAIN AND THE UNITED STATES, 1872-1887.

	CATTLE EXPORTED TO					
YEAR.	Great	Britain.	United States.			
	Number.	Value.	Number.	Value.

882	41,519	2,706,051	16,145	452,929		
883	37,894	3,209,176	23,944	613,647		
884	53,962	4,631,767	31,994	1,125,567		
885	69,446	5,752,248	69,196	1,613,908		
886	60,549	4,998,327	26,133	724,457		
887	63,622	5,344,375	45,981	922,358		
Total	447,493	35,357,356	423,801	9,819,018		

The figures are taken from the Trade and Navigation returns, but there would appear to be an error in the value of the cattle sent to Great Britain in 1874, it not being likely that the average value of the animals exported would be as high as \$2,200 a piece. The great difference in the value of the cattle going to the United Kingdom, and in that of those going to the United States, is of course explained by the fact that only first class specially fed beasts, ready for the butcher were shipped to England, while all sorts and conditions of animals are sent across the line, many of them doubtless to be subsequently sent to the same market.

469. The next table gives similar particulars of the ship-Exports of ments of sheep to the two countries:-

to the United Kingdom and United States.

9,819,018

1,613,908 724,457 922,358 Importance of the live meat trade with England.

470. A far larger number of sheep, it will be seen, are sent to the United States than to Great Britain, but for similar reasons to those given above, their value is relatively much smaller, the average value of each sheep exported to the United Kingdom being \$7.59, and to the United States only \$2.84. It will be therefore clearly seen from the two preceding tables how very much more important this trade is with Great Britain than with the United States, the total value of cattle shipped to the two countries since 1872 having been \$45,176,374, of which no less than 78 per cent. represents the value of shipments to England, while of the exports of sheep to the two countries, only 14 per cent. of the number, but 30 per cent. of the value, went to England.

Shipment of cattle to England from Alberta. 471. Rapid as has been the development of this trade, there is every reason to suppose that it will got assume much larger proportions, and a very important event in connection with its future prospects was the successful shipment, in October, 1887, of about 700 head of cattle direct from the ranches in the District of Alberta, at the foot of the Rocky Mountains, to England. The experiment was carried through without any difficulties, and the animals were disposed of in London at what was, considering the extremely low prices then ruling, the handsome average of \$80 per head. The Liverpool Journal of Commerce says: "The effect of this new source of supply upon British and "other meat producers, including the older provinces of "Canada, will be watched with much interest."

Australian mutton and Canadian beef. 472. The mutton supplied from Australia and South America appears to find more favour in the English market than that from this country, and the demand for Canadian mutton is not increasing; but it speaks well for the quality of Canadian beef, when it is able, in the face of the keenest

competition, to not only hold its own, but to find the demand for it steadily growing, and it is a trade which deserves to be encouraged in every possible manner.

473. The quantity of dead meat exported from the Austra-Export of dead meat lasian Colonies to England is increasing as is shown by to Engthe following figures of meat delivered in London:-

AUSTRALIAN AND NEW ZEALAND KILLED FRESH MEAT DELIVERED IN LONDON, 1881-1886.\*

	Owt.
1881	11,300
1882	34,540
1983	93,420
1884	
1885	
1386	

The rapidity with which this trade has sprung into existence may be gathered from the fact that Australian-killed fresh meat was delivered in London for the first time in 1880, and consisted of only 69 bodies of bof and 555 carcases of sheep.

474. The Argentine Republic also, for both live and dead Export of meat threatens to become a very formidable competitor. In the dead meat from the 1853, that country only exported to Great Britain \$50,000 Agentine Republic. worth of mutton, and in 1886, \$1,802,433 worth, and last year its Government passed a law according bounties to the extent of \$500,000 a year for 3 years on the exportation of live and dead meat.

475. Some idea of the quantity of meat required annually Imports of by Great Britain from foreign countries may be obtained United Kingdom. from the following figures of the imports of meat in 1887:—

IMPORTS OF MEAT INTO THE UNITED KINGDOM, 1887.

e quality e keenest Though it has been shown that the competition is not only very severe, but is also increasing, there seems no reason to doubt but that Canada, with the limitless prairies of the North-West for a breeding ground, will continue to successfully hold her own in this trade, and the shortness of the voyage, as compared with those from South America and Australasia, should be an important factor in assisting her te maintain a prominent position on the English market.

Shipment of young stock to Aberdeen for fattin purposes. 476. A new trade in connection with cattle has also been inaugurated in the shipment of young stock to Aberdeen, where they are distributed among the feeding farms in the neighbourhood, and it is found that they fatten very satisfactorily.

Number of horses exported.

477. The total number of horses that have been exported from this country since Confederation is 261,750, of which 252,159 have gone to the United States, 4,943 to Great Britian and 4,648 to other countries. The total number imported during the same period, principally for improvement of stock, is 29,290.

Export of horses to England for army purposes.

478. The apparent success of the horses imported into the United Kingdom from Canada for army purposes, and the satisfaction that they gave, aroused the jealousy of English agriculturists, and the authorities were persuaded to discentinue these purchases, and to turn their attention to encouraging breeders at home. It is, however, extremely probable that the demand will before long be revived, and it is to be hoped that Canadian farmers will lose no time in profiting by the advice and remarks of the officers sent out to purchase, with reference to the style of animal required, that when the time does come again, as it inevitably will, a far larger supply will be found available, than was the case in the first instance, and even if the animals thus produced are not required for army purposes, they will be found

greatly improved for general purposes. The market is sure to come, and there is likely to be much money made out of the trade.

479. The number of ranches in operation was 135, and The ranches in they comprised 4,466,844 acres, and the quantity of stock west, west, in the districts of Alberta and Assiniboia was, as far as returns were available, 101,382 cattle, 6,924 horses and 15,266 sheep. The actual numbers are undoubtedly larger. Owing to the unprecedented severity of the winter of 1886-87 cattle suffered considerably, and many very severe losses were sustained, but it is satisfactory to know that they were trifling in comparison with the losses in Wyoming, Dakota and Montana. Judged by the experience of that winter, there seems no doubt that unacclimatized cattle from the east suffer more from severe weather than range cattle, the losses among the former having been about 25 per cent., and among the latter from 8 to 10 per cent.

450. The work in connection with the establishment and Expertorganization of experimental farms, as provided for by Farm at Ottawa. legislation in 1886 has proceeded very satisfactorily during the past year. The Central Farm at Ottawa is almost in complete working order, the buildings necessary for carrying on the work in the most approved manner are being provided, and there will be every facility for making useful experiments in testing all sorts of cereals, roots and other farm products for the purpose of proving which are the most promising and profitable varieties to be grown in the different Provinces.

481. Sites for the experimental farms for the Maritime Pro- Expertvinces, Manitoba, British Columbia and the North-West Farms in the Prov-Territories have been determined on, one near Nappan, Nova inces. Scotia, one near Brandon, Manitoba, one at Agassiz Station,

oulv n to the cessthe and

orted which Great ımbeı prove-

nto the nd the nglish to disto enemely d, and ime in nt out quired, v will, ras the is pro-

found

British Columbia, and one near Indian Head, N.W.T. It is expected that during the present year the organization of the entire system will be nearly completed, and the several farms provided with the necessary buildings and equipments.

Experiments and tests with seed.

482. A large number of samples of agricultural seeds were received at the Central Farm from farmers throughout the country, sent for the purpose of having their vitality tested, the results of the tests being communicated to the senders. An early ripening hard spring wheat, known as Ladoga wheat, was also obtained from northern Russia, and distributed among the farmers generally, but more particularly in Manitoba and the North-West; the reports concerning it have so far been very satisfactory, and a further quantity has been imported for the purpose of fully completing the experiments.

#### PART III-IMMIGRATION.

(The figures in this section relate to the calendar year.)

Increase in immigrant arrivals. 483. According to the returns published by the Department of Agriculture, the increase in the number of immigrants, during 1887, was very considerable, both as regarded immigrant passengers and immigrant settlers.

Immigrant settlers 18:7. 484. The total number of immigrant arrivals was 175,579, of whom 91,053 were passengers for the United States, while the remaining 84,526 expressed their intentions of remaining in Canada, this being an increase in the number of settlers, as compared with the preceding year, of 15,874. The following numbers are those of immigrant arrivals in

each of the years named, who stated their intention of settling in Canada:

## IMMIGRANT SETTLERS IN CANADA, 1880-1887.

1880	38,505
1881	47,991
1882	
1883	
1884	103,824
1885	79,169
1886	69,152
1887	

185. It is stated that 27,390 persons went into Mantoba and the North-West Territories during the year, and that Settlers in the North-5,705 persons went out, making the net total number of West. settlers 21,685, leaving 62,841 persons as settlers in other parts of the Dominion.

486. Assisted passages were granted during the year to ag, ultural labourers and their families, and to female Discondomestic servants, but the Government have decided to of assisted passages. change their policy in this respect, and no assisted passage tickets have been granted since the 27th of April in the present year, it being now their intention to encourage desirable immigration in every possible way, except that of paying any part of the passage money, or arranging for tickets at reduced rates In a country situated geographically as Canada is, it is impossible to organize any system by which the ultimate destination of the immigrants can be guaranteed. It is hoped that the new policy will not cause any material check in the immigration of desirable classes, and it is to be remarked that the conditions are now different than those which obtained when the assisted passage policy was inaugurated.

487. Some of the Australasian colonies did offer large Assisted inducements in the way of free and assisted passages, but in Au with one exception, they have at present withdrawn from colonies.

1887	2,298

490. All the immigrants by sea arrived in steamers, Arrivals sailing vessels not having been for some years used for this purpose.

491. The numbers of immigrants reported by the agents Difficulty of obtainand by the Custom houses may be taken to be correct as far ing correct returns. as they go, but there not any means of ascertaining with accuracy the arrivals and departures from and to the United States. Where there is such a long line of open frontier, there must always be a considerable movement of population on both sides, of which it is impossible to obtain any record. The nearest possible approximation would be to obtain a record of the ins and the outs on the principal routes of travel, the differences between which would be the net immigration or emigration, as the case may be.

492. It is only possible to form a general idea of the Uncertainty of numbers that yearly settle in each Province; the agents immigrahave no means at their command by which they can follow the immigrants after they once leave the agency, and the subsequent movements of many would probably considerably alter the figures given. The greatest care is taken by the Department and by the agents, that all the returns shall be as accurate as possible, but the only ones that can be thoroughly relied on, except the entries at Custom houses, which are a registration by names, are those of arrivals at the principal sea ports, as Quebec and Halifax, which are also a registration by names and callings, from the ships' passenger lists. No distinction is made in British Columbia between passengers and immigrants, and the figures for that

Province can only be arrived at by estimation. The numbers of immigrants reported by the several agents, while correct in themselves, are subject to subsequent unascertainable movements, and should, therefore, be taken as approximate. The figures from which the totals for the Dominion are made up, are those supplied by the agents at the various points of entrance, and are, therefore, of course, liable to similar alterations, for while a record is kept of all immigrants arriving, no account is taken of those emigrating from the country

Money, and effects

493. A comparative statement of the values of money and brought in effects brought into Canada by immigrants during the years 1885, 1886, and 1887, according to the reports from the various agencies, is given below, to which is added the amount of money brought in by other arrivals reported by Custom houses:-

	1885.	1886.	1887.
Reported at	A gencies \$3,058,592	\$2,458,241	\$2,731,005
do	Customs 1,085,274	997,335	1,148,903
Tot	ol \$4.143.866	\$3,455,576	\$3,879,908

And an examination of the following comparative table will show that the value of money and effects brought in by immigrants is a very important addition every year to the wealth of the country:

VALUE OF MONEY AND EFFECTS BROUGHT INTO CANADA BY SETTLERS SINCE 1875.

	Value.
1875	<b>\$1,344,573</b>
1876	686,205
1877	632,269
1878	1,202,563
1879	1,152,612
1880	1,295,565
1881	4,188,925
1882	3,171,501
1883	2,784,881
1884	4,814,872
1885	4,143,866
1886	3,455,576
1887	3,879,908

It must be remembered, however, that the means of obtaining information of this kind is very defective, and there can be little doubt that the actual value is considerably above the amount reported.

494. The trades and occupations of the immigrants landed and occupations of the immigrant landed and occupations of the immigrant landed and occupations occupations of the immigrant landed and occupations occupation

	Quebec.	Halifax.	Total.
Farmers	2,371	1,018	3,289
Labourers	12,406	4,834	17,240
Mechanics	986	345	1,331
Clerks and Traders	111	108	219
Female Servants	No returns	1,212	1,212
	15,874	7,517	23,391

495. Of the single adults that arrived at Quebec, 13,226 permand were males and 3,780 females. The demand for female help, help and domestic help from all parts of the Dominion continues unabated, and it must be a very long time before there is an adequate supply to meet it.

496. The total expenditure in 1887 was \$313,773, and in Immigration ex1886, \$300,920; there was an increase, therefore, in the year penditure. under consideration of \$12,853.

497. The cost of settlers per head, not including arrivals cost of reported through the Customs, was \$5.74 and including per head arrivals so reported, was \$3.71; the figures for the preceding year, 1886, being \$6.87 and \$4.36 respectively. The following table shows the cost per head of settlers since 1875:—-

Emigration from United Kingdom 1837-1887. 498. According to Mr. Mulhall (Fifty years of Progress, p. 12) the number of persons who have emigrated from the United Kingdom, during the fifty years of Her Majesty's reign, has been 9,101,000, and their destinations have been as follow:—

United States	5,902,000 1,484,000 1,311,000 404,000
• ,	9,101,000

By far the largest proportion, viz., 64.85 per cent., went to the United States, and a slightly larger number went to Australia than came to Canada, the proportions being 16.30 per cent. and 14.40 per cent. respectively. Mr. Mulhall says that the components of the above number were:

# CHAPTER 1X.

## MINERAL STATISTICS.

499. There is hardly a mineral of value, with the exception of tin, that is not known to exist the greater or lesser quantity in some part of the Dominion, but its mineral wealth is to all intents at present an unknown quantity; many parts of the country where minerals are known to be, being, as yet, practically unexplored. Some idea, however, of the rich and varied resources of the country may be gathered from the following classified list of the economic minerals of Canada, as arranged in the Geological Museum at Ottawa, where specimens of all of them are exhibited:—

- (1.) Metals and their Ores -- Native iron, magnetic iron ore, iron sand, hematite, Ilmenite or titaniferous iron ore, limonite (including bog iron ore), spathic iron ore, clay ironstone, native copper, sulphides of copper, sulphide of zinc, sulphide of lead or galena, native silver and ores of silver, gold, platinum, sulphide of antimony, oxysulphide of antimony, and sulphide of bismuth.
- (2.) Materials used in the Production of Heat and Light.—Anthraeite, bituminous coal, lignite or brown coal, Albertite, bituminous shale, petroleum, peat.
- (3.) Minerals applicable to certain Chemical Manufactures, and their Products.—Iron pyrites, sulphuric acid, &c., pyrrhotine or magnetic iron pyrites, apatite or phosphate of lime, magnesite or carbonate of magnesia, calcite or carbonate of lime, chromic iron, oxides of manganese.

- (4.) Mineral Manures.—Gypsum, shell-marl
- (5.) Mineral Pigments and Detergents.—Iron ochres, &c., barytes or heavy spar, soap clay.
- (6.) Salt, Brines, and Mineral Waters.—Salt and brine, mineral waters.
- (7.) Minerals applicable to Common and Decorative Construction.—Limestones, dolomites, sandstones, granite and syenite, gneiss, Labradorite rock, marbles (limestones), serpentines, breccias, slates, flagstones, common lime, hydraulic lime, bricks and brick clays, drain tiles.
- (8.) Refractory Materials, Pottery Clays, and Pottery.—Plumbago or graphite, soapstone, potstone, mica rock, mica, asbestos, fire clays, sandstone (refractory), pottery clay, and pottery.
- (9.) Materials for Grinding and Polishing.—Whetstones, hones, bath-brick, Tripoli, grindstones, millstones.
- (10.) Minerals appliable to the Fine Arts and to Jewellery.—Lithographic stone, porphyrites, Labradorite, albite, Perthite, jasper conglomerate, amethystine quartz, agates, Canadian precious stones.
- (11.) Miscellaneous.--Sandstone for glass-making, moulding sand and clay, carbonaceous shale, artificial stone.

Drawbacks to mineral development. 500. The principal drawbacks to mining development hitherto have been want of capital, and the fact that a number of the enterprises that have been started have been purely of a speculative character, which has thrown suspicion on genuine undertakings, and driven investors to place their funds elsewhere, but as the explorations of the Government Geological Survey are continually making better

known the extent and locality of minerals, and the fiscal policy of the Government is calculated to stimulate production, public attention is becoming more attracted to our mining resources, and it may not be long before the mining industry becomes second in importance only to that of agriculture.

501. Nova Scotia, British Columbia, Quebec, and the pistribunorth and west portions of Ontario are essentially the minerals mining Provinces, New Brunswick not being in this respect so richly endowed, and Manitoba not being known at present to contain any metalliferous ores, though coal has been found in this Province, and in the North-West Territories the coal deposits are inexhaustible, the coal-bearing area being estimated at 65,000 square miles, and the quantity of fuel known to underlie some portions of this area at from 4,500,000 to 9,000,000 tons per square mile. This coal varies from lignite to bituminous coal, and in the Rocky Mountains anthracite coal has been found, beds of which are being worked near Banff, on the Canadian Pacific Railway, by the North-West Coal and Navigation Company, and the Canadian Anthracite Company All the coal supplied to the Canadian Pacific Railway at Brandon and points west, is now exclusively the product of Canada, and the Canadian Anthracite Company are finding a constant demand for their coal in the San Francisco market, and as the Banff mines are nearer to that city than are any of the United States anthracite coal fields, it is probable they will become the principal source of supply for that class of fuel. Anthracite coal has been found cropping out in Queen Charlotte Island, B. C., but though a considerable sum has been spent in perfecting and mining, no good results have as yet been accomplished. "The discovery and successful development "of anthracite coal in the heart of the Rocky Mountains, mid-"way between the coal fields of British Columbia and those

Works referred to. British Columbia and Nova Scotia are, however, at present the principal coal producing Provinces, the beds in the North-West, with the exception of those above mentioned, not being worked to any extent.

502. The figures relating to Canada used in this chapter have been taken almost entirely from a statistical report on the minerals of Canada, compiled by Mr. L. Coste of the Geological Survey. The figures relating to the United States and foreign countries have been principally taken from "The Mineral Resources of the United States, 1886," by David J. Day, Chief of Division of Mining Statistics and Technology in the United States.

Mineral production of Canada 1886. 503. The following statement of the mineral production of Canada in 1886, the latest year for which complete returns are available, will give some idea of the present value of an industry which is still in its infancy:—

<sup>\*</sup> Report of Minister of Interior, 1887.

### MINERAL STATISTICS.

### MINERAL PRODUCTION OF CANADA-1886.

Product.	Quantity.	Value.
		\$
Autimony ora Tons.	665	31,490

Salt	62,359	227,195
Silver	02,000	209,090
Soapstone	50	400
Granite	5,062	€3,30
Marble and Serpentine	501	9,900
Slate	5,345	64,67
FlagstonesSq. ft.	70,000	7,87
Building stones	165,777	642,509
Lime Bush.	1,635,950	283,75
Sands and gravels Tons.	646,552	143,64
Bricks M.	139,345	873,600
riles	12,416	142,61
Miscellaneous clay products	14, 410	112,910
macenaucous ciay products		112,910

The quantity of salt produced was equivalent to 445,421 barrels of 280 lbs.

504. The estimated value of the mineral production in Mineral 1887 was \$12,959,073, but this amount is subject to revision; tion 1887. for details see the end of the chapter.

22

th on the ithin easy e who are anada and lection."\*

ds in the nentioned,

is chapter report on oste of the ited States aken from 1886," by tistics and

production ete returns ralue of an Export of minerals.

505. Minerals to the value of \$3,830,821 were exported in 1886, leaving a balance of \$6,698,540 representing the value used in the country, and the following table shows the total value of minerals exported by Provinces since, 1873:—

Ontario	\$ 8,826,464
Quebec	6,323,576
Nova Scotia	9,473,081
New Brunswick	1,908,601
Manitoba	5,153
British Columbia	22,442,765
Prince Edward Island	5,454
Total	548,985,094

The largest quantities of minerals have been exported from British Columbia, Nova Scotia and Ontario, the first named Province having produced 45.81 per cent., the second 19.34 per cent., and the third 18.00 per cent. of the total amount.

Countries to which minerals were exported. 506. The next statement shows the principal countries to which minerals have been exported since 1874, and the value of the respective exports:—

United States	\$33,437,397
Great Britain	7,212,366
Newfoundland	1,604,977
West Indies	467,866
Sandwich Islands	162,995
Germany	148,413
St. Pierro	141,818
Mexico	138,475
British West Indies	125,411
Other Countries	203,064
Total	\$43,650,692

The United States took 76.24 per cent. of the total exports, Great Britain 16.44 per cent., and Newfoundland

the total 'foundland

3.66 per cent, leaving 3.66 per cent. to be divided amongst other counties.

507. First in importance, as regards value, among the gold minminerals now being worked in Canada, is gold, the production of which is at present confined almost entirely to British Columbia and Nova Scotia, though a small quantity is annually produced in Quebec, and gold has been obtained from some parts of Ontario. It may be that when the country north and west of Lake Superior is fully explored, valuable deposits of gold may be found, as it is known to exist in many localities, and there is at present considerable excitement at Sudbury Junction on the Canadian Pacific Railway over reputed valuable discoveries of this metal, a number of claims have been taken up, and will probably be extensively worked during the present summer. A small amount of gold is also obtained each year from the Saskatchewan River near Edmonton. Gold was first discovered in British Columbia in 1857 in the Thompson River near Nicoamen, and in Nova Scotia in 1860 near Tangier Harbour, since which date the value of the production in the latter Province has been \$8,042,104. British Columbia since 1858 has produced \$50,209,517, as near as can be ascertained, but as only an estimate can be made of the quantity carried away in private hands, the actual amount is probably larger.

508. The following table gives the value of the gold production in the three gold producing Provinces since 1862:—Canada.

VALUE OF PRODUCTION OF GOLD IN BRITISH COLUMBIA, NOVA SCOTIA AND QUEBEC, 1862-1886.

Year.	British Columbia.	Nova Scotia	Quebec.	Total.

386	903,651	455,564	3,981	1,363,196
Total	43,259,431	8,042,104	202,502	51,504,03

The production of gold in the Province of Quebec has been regular since 1862, but figures are not available before 1877. The total quantity of quartz crushed in Nova Scotia since 1862 has been 552,789 tons, which has yielded an average of \$15.70 per ton.

Gold produce of the world.

509. The principal gold producing countries of the world are the Australasian Colonies, the United States and Russia, and the following figures give the total gold produce of the world in each of the years 1882 to 1885:—

#### MINERAL STATISTICS.

GOLD PRODUCE OF THE WORLD, 1882 TO 1885.

Country.	1882.	1883.	1884.	1885
Australasia	Oz. 1,553,542 1,572,199 1,154,603 661,454	Oz. 1,430,501 1,451,251 1,154,603 668,945	Oz. 1,502,543 1,489,928 1,055,452 683,155	Oz. 1,442,437 1,537,930 1,225,414 707,063
Total	4,941,798	4,705,300	4,731,078	4,912,844

510. The gold produce in Australasia in 1886 was gold pro-1,389,048 oz. (Victorian Year Book, 1886–87, p. 471), which, if Australvalued at £4 per ounce, would represent a total value in colonies our currency of \$27,040,154. The gold produce in the United States. United States in 1886 was 1,881,250 ounces, valued at \$34-869,000. According to Mr. Hayter, the total quantity of gold, raised in the Australasian Colonies from 1851 (the year of the first discovery of gold) to 1886, has been 81,024,307 ounces, which may be valued at \$1,577,278,176, and according to Mr. Day the total value of the gold produce of the United States since 1804 has been \$1,743,715,670. From 1804 to 1848, however, the amount is only placed at \$13,248,475.

511. The following table shows the amount of coal pro-Production of duced in British Columbia and Nova Scotia in each year coal in Nova Scotia and British

Columbia.

Total	2,441,352	2,332,403	102,199	4,875,954

513. The imports of coal into the Dominion during 1885 Imports of coal 1886 and 1886. and 1886 were as follows:-

Provinces.	1885.	1886.
Ontario	45,500 12,200	Tons. 1,587,372 343,150 20,046 43,767 3,497 615
Total	1,933,693	2,000,230

514. Newfoundland, the United States and the West Countries Indies are the principal markets for Nova Scotia coal, and coal was the United States take about 97 per cent., of the exports, exported. from British Columbia. This coal is of a very high quality, and is considered the best that is produced on the Pacific Coast.

Superior-ity of British Columbia

515. Mr. Day, speaking of this coal, says:\* "The coal "from this field (Nanaimo) possesses some of the character-"istics of lignite. It bears transportation well, and is deliver-"ed in the market in excellent condition, especially that from "the Wellington mines, which always commands the highest "prices in San Francisco and sells very readily. It is a good "coking coal.

"The quality and condition of the Nanaimo coal gives "it a preference in the market over the Washington "Territory coal.

"The Canadian Pacific Railroad and the entire districts "through which it passes procure their supply of coals " now principally from local interior mines which are rapidly "being opened. Australia will continue to supply the "eastern countries and the islands of the Pacific with all the "coals they may require, and England having export freights " from Chili and Peru, can send coal to these countries cheaper "than they can be supplied from British Columbia, so that "these circumstances will all combine to keep San Francisco "the principal market for British Columbia coal."

Favourable an-alysis of British Columbia

516 In the same work, in a table giving analyses of eighteen different qualities of coal from the mines in Washington Territory and British Columbia, the coal from Wellington mine, British Columbia, is the only one that contains no moisture, the analysis being: Fixed carbon 55.50, volatile matter 34.70, and ash 9.80 = 100.

517. The following table taken from the same book, shows Coal production of the world. The following table taken from the same book, shows the world. the commercial coal produced by the principal countries of the world, for the most part in 1886:

<sup>.</sup> Mineral Resources of the United States, Washington, 1887.

#### MINERAL STATISTICS.

### COAL PRODUCTION OF THE WORLD, 1886.

COUNTRY'	Quantity.	Country.	Quantity.
	Tons.		Tons.
Great Britain	157,518,482	New Zealand	511,063
United States	112,743,403	India (Bengal)	1,200,957
Germany	78,266,288	Borneo	5,860
France	20 044,597	Nova Scotia	1,082,924
Belgium	17,253,144	British Columbia	326,635
Austria-Hungary	17,191,000	Japan	900,000
Rudsia	4,500,000	Australia	2,878,863
Sweden	264,000	Other Countries	10,500,000
Spain	1, 00,000	m . 1	
Italy	220,000	Total	427,007,22

The figures for Nova Scotia have been altered to agree with Canadian returns. Long tons of 2,240 pounds are used with reference to Great Britain, Australia, India, New Zealand and Russia, short tons of 2,000 pounds for the United States, Nova Scotia and British Columbia, and metric tons of 2,204 pounds for continental countries. The increase in the world's production, exclusive of the United States, over that of 1885, was 5,275,295 tons.

It is calculated that even at the present state of consumption, there is coal enough still in England to last for England. 600 years, the Parliamentary report of 1874 estimating the amount at 90,000 million tons.

"518. Copper constitutes one of the most important of the Copper."

"mineral treasures of the Dominion, and is destined to oc"cupy a very important rank amongst its resources. Its

"ores are distributed over vast tracts of country in Ontario,
"in the Eastern Townships of Quebec, in Nova Scotia,
"and British Columbia, and traces of it are met with in New
"Brunswick." There are no copper smelting works in
operation in Canada, and consequently all the ores are
exported for treatment abroad. It is said that smelting

lyses of nines in coal from one that I carbon

k, shows antries of works are to be established at Sudbury in Ontario, in which neighbourhood, are, what are perhaps the largest deposits of copper ore in the world. These deposits have been only very recently discovered.

Exports of copper.

519. During the years 1860 and 1869 inclusive, copper ore to the value \$1,593,978 was exported from Quebec, and of \$2,493,008 from Ontario, but since that year, until 1886, there was no export from Ontario. The total value exported from the two Provinces since 1860 has been \$7,631,145. The exports from the other Provinces have been too small to be worth notice.

It is said the Customs returns of quantity and value have been low, and the amount actually exported has been considerably larger than the above figures. The following table give the exports of copper for the 10 years, 1877-1886:—

EXPORTS OF COPPER FROM CANADA, 1877 TO 1886.

YEAR	Quantity.	Value.	YEAR.	Quantity.	Value.
	Lbs.	\$		Lbs.	\$
1877	1,880,090	245,406	1882	1,864,170	182,502
1878	355,160	36,499	1883	1,400,300	148, 709
1879	408,860	47,817	1884	2,714,400	273,422
1880	1,434,700	192,171	1885	2,626,000	262,600
1881	1,244,780	125,753	1886	2,403,040	249,259

In 1886, 164,040 lbs. of the value of \$16,404 were exported from Ontario, with that exception, the whole quantity during the period went from the Prevince of Quebec.

Iron.

520. Iron is found in great abundance and variety in all the Provinces of the Dominion except Manitoba, but it has nowhere received the attention it deserves, even in rio, in which st deposits of e been only

sive, copper Quebec, and r, until 1886, value exportn \$7,631,145. en too small

ariety in all anitoba, but rves, even in

Nova Scotia, where the ore is of extreme purity, and which is the only Province in which fuel and ore occur close together, the production is limited to the Acadia mines at Londonderry. It is to be hoped that the increased duties imposed on iron and steel by the Government in 1887, will have the intended effect of promoting the active development of this industry.

521. No exact returns of the total production of iron in Production of the Dominion are at present available, but by treating the iron in exports from Ontario as representing the production of that [886, Province, Mr. Coste put the production for 1886 at:

Nova Scotia	Tons. 49,735
Ontario	16,032 3,941
	69,708

representing a total value of \$126,982. According to the reports of the Province of Nova Scotia the production of 1ron ore since 1876 has been 431,625 tons of 2,240 lbs.

522. The following table gives the quantity and value of Exports of iron ore exported from Canada since Confederation: --

EXPORTS OF IRON ORE FROM CANADA, 1867-1886.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Tons.	\$		Tons.	\$
1867	4,194	12,798	1878	4,315	8 84

874	37,388	86,417	1885	15,628	46,30
1875	13,338	28,565	1886	19,164	58,41
1876	9,455	18,397			
1877	3 785	10,528	Total	520,532	1,312,92

The world's production of iron and steel.

523. The following table gives the world's production of pig iron and steel, principally in 1886. Tons of 2,240 pounds are used with reference to Great Britian, the United States, Russia and "Other Countries," and metric tons of 2,204 pounds for continental countries:—

THE WORLDS PRODUCTION OF IRON AND STEEL, 1886.

Countries.	Pig Iron.	Steel.
	Tons.	Tous.
Great Brita'n	6,870,665	2,364,670
Inited States	5,683,329	2,562,502
dermany and Luxemburg	3,489,231	1,360,620
rance	1,507,850	466,913
Belgium	697,110	139,215
Austria Hungary	726,835	256,023
Russia	498,400	225,140
Sweden	464,737	80,550
Spain	139,920	15,000
taly	18,405	3,450
Other Countries (estimated)	150,000	30,000
Total	20,246,482	7,504,083

Production of iron and steel in United Kingdom and United States. 524. Great Britain and the United States combined produced 62 per cent. of the total quantity of pig iron, and 64 per cent. of the total quantity of steel produced in the world, while of steel alone it will be seen that the United States is now the largest producer. The proportions respectively are: Great Britain, pig iron, 33 per cent.; steel, 31 per cent. The United States, pig iron, 28 per cent.; steel, 34 per cent.

Petroleum. 525. Though petroleum has been found in Quebec, Nova Scotia and New Brunswick, and traces of it in the North West Territories, it is in Ontario where the most of the oil has been and is obtained. Bothwell, Enniskillen and Petrolia are the largest oil producing districts, the oil being obtained at a depth of from 400 to 500 feet.

526. The following table, according to Mr. Coste, contains Canadian producthe only reliable statistics of Canadian production of oil that tion of oil. are available, and these figures do not give the total production since the quantity of crude oil used as such is not included:-

PRODUCTION OF CANADIAN PETROLEUM AND NAPHTHA AND COR-RESPONDING QUANTITIES OF CRUDE OIL, 1881-1886.

YEAR.	Refined Oils.	Crude Equivalent calculated.
	hpp galls.	Imp. galls.
881	5,380,081	Imp. galls. 10,760,162
882	5,111,893	11,359,762
883	6,204,544	13,787,875
884	6,730,063	16,825,170
885	5,853,290	14,633,225
886	6,469,667	1",025,439

527. And the following table shows the exports during Exports of Canadian oil. the same period:--

# EXPORTS OF CANADIAN PETROLEUM, 1881-1886.

YEAR.	Gallons.	Value.
		\$
381	501	99
82	1,119	286
183	1,328	710
384	1,098,090 337,967	30,168
385		10,562
886	241,716	9,855

528. The amount therefore of Canadian oil consumed in consumption of oil the country during those six years was 84,056,867 imperial inCanada. gallons. The amount imported during the same period was 7,476,394 imperial gallons. The total consumption in Canada therefore amounted during that time to 41,533,261 gallons, being an average annual consumption of 6,922,210 gallons.

Petroin the United States. 529. Petroleum is found in several other countries in the world, but principally in the United States, Russia, Egypt and Burmah. It was first discovered in the United States, in Pennsylvania, in 1859, and the total production of crude oil since then has amounted to 317,323,580 barrels, valued at an equal number of dollars, the States of Pennsylvania and New York having produced 307,956,250 barrels out of the above quantity. The very unexpected discovery of crude petroleum in enormous quantities in the Trenton limestone of north-eastern Ohio in 1886 will probably have an important effect on the output of that State.

Petroleum in Russia. 530. The earliest records of production of petroleum in Russia commence in 1821, though the existence of oil was known hundreds of years before. The Baku oil fields at the eastern extremity of the Caucasus Mountains are the most important, The total shipment of petroleum products from Baku, from 1883 to 1886, have been:—

	Gallons
1883	145,180,705
1884	262,621,710
1885	300,149,775
1886	~377,006,120

The total production of crude oil in Russia in 1886 was estimated at 650,000,000 gallons, and the export of refined oil in 1887 at 1,500,000 barrels.

q

Petroleum in Egypt and attained any dimensions, but it is probable that the fields Burmah. of Burmah will now be extensively developed.

Salt.

532. "The salt produced in the Dominion is almost all "manufactured in Ontario, the largest number of wells "being situated in the County of Huron, while a few are "being operated in the Counties of Lambton on the south, "Bruce on the north, and Perth on the west."

ries in the sia, Egypt ted States, n of crude els, valued msylvania crels out of ry of crude a limestone can impor-

sia in 1886 ne export of

ave not yet at t**h**e fields

is almost all er of wells ile a few are n the south, 533. Out of the 19 wells working in 1836, six were at First discovery of Goderich where salt was originally discovered in 1865, sait. during boring operations in search of petroleum, when a bed of rock salt 30 feet thick was struck at a depth of 964 feet. "In 1876 a diamond drill was put down near "Goderich, which came upon the first salt bed at a depth pepth of "of 997 feet, and 520 feet below this the drill penetrated "six salt beds aggregating 126 feet in thickness, the thin-"est bed measuring 6 feet and the thickest 35 feet." The most recently bored well is at Wingham, where salt was struck at a depth of 1,090 feet. The principal viells are those of Goderich, Seaforth, Clinton and Kineardine.

534. "The process of manufacture consists of pumping process of the brine from the wells and evaporating by artificial heat ture." in large pans made of boiler plate. From these the salt is "raked from time to time as it crystalises out from the "solution, the pans being only emptied at intervals for "cleaning."

535. The following figures are said to give the total sales of production of salt in the Lake Huron district in the years named, and they inCanada. practically represent the production of the Dominion, the quantity manufactured in Nova Scotia and New Brunswick being exceedingly small:—

	Barrels.	Value.
1883	315,236	\$356,400
1884	280,685	240,096
1885	241,300	183,888
1886	445,421	227,195

The business is not nearly so profitable as formerly, and the extreme decline in value will be at once noticed in the above figures.

Exports of Canadian salt.

536. The exports of Canadian salt since 1875 have been as follow:—

EXPORTS OF CANADIAN SALT, 1875-1886.

YEAR.	Ontario.	Quebec.	Other Provinces.	Total.	Value.
	Bush.	Bush.	Bush.	Bush.	\$
1875	541,669	1,089	42	542,800	66,834
1876	905,522	3,833		909,355	84,154
1877	702,494	2,150		704,644	60,67
1878	403,798	3,297		407,095	37,027
879	587,805	2,616	345	590,766	49,36
880	461,661	1,887	1,093	467,041	46,21
881	336,608	6,600		343,208	44,62
.882	181,007	751		181,758	18,350
883	199,733		1	199,733	19,499
884	167,029			167,029	15,291
885	246,584	210		246,794	18,756
886	224,595		348	224,943	16,88

It may be taken for granted that all the salt exported from Quebec was manufactured in the Province of Ontario.

Salt output in United States. 537. The total output of salt in the United States in 1886 was 7,707,081 barrels, valued at \$4,736,585.

Silver.

538. Almost all the silver ore exported from Canada is obtained from the Lake Superior District. The most celebrated mine has been that of Silver Islet, which was a mere rock in Lake Superior about half a mile from the mainland, its greatest diameter not exceeding 75 feet, and its greatest height above the water 8 feet. This mine was discovered in 1868, and was closed in 1884, and it is estimated that \$3,250,000 worth of silver was produced during that period. Several other mines are now being worked in the peighbourhood of Thunder Bay. Silver has been found in some of the other Provinces, but only to a very small extent.

com Canada is e most celebrath was a mere the mainland, and its greatest was discovered estimated that ng that period. in the neighfound in some tall extent.

539. As all the ore produced is exported, the following Exports of figures should represent the value of the total production in silver ore. each year:—

EXPORTS OF CANADIAN SILVER ORE, 1873 TO 1886.

YEAR.	Value.	YEAR.	Value.
	\$		\$
873	1,243,758	1881	15,11
.874	493,463	1882	6,70
875	472,992	1883	8,62
876	354,178 42,848	1884	13,30 29,17
878	665,715	1886	25,9
879	154,273	-	
1880	68,205	Total	3,594,30

In addition to the above it was estimated that silver to the value of \$167,000 was contained in the copper ores exported from the Capelton mines in Quebec in 1886.

540. The total value of the production of silver in the united United States since 1848 has been \$772,283,217. In 1886 duction of the value was \$51,321,500.

541. Phosphate or apatite is a mineral which is now rephase of ceiving considerable attention, and the demand for which, as a fertilizer, is increasing, and its production is likely to become before long a very important industry. Professor Boyd Dawkins, who visited the mines in Ottawa County, Quebec, in 1884, said in a paper that he read on his return to England on Canadian apatite, that: "It would become one of the most profitable resources of this country." The only two places where it is worked at present are in Ottawa County, Quebec, and north of Kingston, Ontario.

. 542. It is to be regretted that no steps have yet been Raw material at taken for the establishment of works in this country for presentall shipped abroad.

the conversion of phosphate into superphosphate, in which case a large home market might be created for this valuable fertilizer, much to the benefit of the country, while the increase in profit to the manufacturer would be considerable. As it is, at present, all the raw material is shipped abroad, principally to England and Germany, and it is believed that a considerable quantity is shipped back to the United States, both in a crude and manufactured condition. Of the total output of 21,000 tons in 1887, only 200 tons were used in Canada and 300 tons sent to the United States.

Canadian fertilizer factories. 543. The only attempts so far made to utilize Canadian phosphate in this country have been at the fertilizer factories at Brockville and Smith's Falls, and the demand for these products is growing in a very encouraging manner. A mill has been erected at Buckingham for crushing and pulverizing the raw material which reduces it to a fineness equal to flour.

Experiments
with phosphate and
superphosphate.

544. There is considerable difference of opinion respecting the beneficial results to the soil by the application of the raw pulverized material. Experience seems to show that for immediate returns, soluble phosphates, ie., the raw material treated with sulphuric acid, must be used, and where insoluble phosphate, or the raw pulverized material is used, it is absolutely necessary that it be reduced to an impalpable powder. Experiments have been made at different times, more or less favourable to the raw material, and a series of experiments will be made during the coming season at the Central Experimental Farm at Ottawa. Great interest is being excited in this question of the use of crude phosphate; since if its utility be established, it would create a home market, which would not only increase the demand, but would be of incalculable benefit to the agricultural interest.

"factories in Canada, and the education of the farmer in the "use of manures is a cause that invites the best attention,

"both of the capitalist and of the Government."

The Minister of Agriculture in his report, 1887, says: "It is to be hoped that our farming community will see "the necessity of adopting some measures for keeping the "land required for the growth of cereals, up to its standard, "by using fertilizers, and it does seem anomalous that this "rich natural product at our very door, should be shipped "away to Great Britain and the United States, without its "value being recognized by our own farming community."

546. The following table gives the exports of phosphate exports of phosphate from 1877 to 1886:—

## EXPORTS OF PHOSPHATE FROM CANADA, 1877 TO 1886.

Year.	Quantity.	Value.	Year.	Quantity.	Value.
	Tons.	\$		Tons.	\$
1877	2,823	47,084	1884	21,709	424,240
1878	10,743	208,109	1885	28,969	496,293
1879	8,446	122,035	1886	20,440	343,007
1880	13,060	190,086		,	•
1881	11,968	218,456			
882	17,153	338,357	Total	155,027	2,815,335
883	19,716	427,668		,	-,,

Of the above sum \$2,704,447 worth was exported from Quebec, and \$110,888 from Ontario, 96 per cent. therefore came from Quebec. The total shipments of phosphate in 1887 amounted to 21,733 tons.

Production of phosphate in the United States.

547. The production of phosphate in the United States in 1856, principally in the Carolinas was 432,049 tons of 2,240 lbs., of which 159,369 tons were shipped abroad.

Asbestos.

548. Asbestos is a mineral which is only worked in the Eastern Townships, and the shipments of which are steadily increasing in value, as shown by the following figures:—

SHIPMENTS OF ASBESTOS FROM CANADIAN MINES, 1879 TO 1886.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Tous.	\$		Tons.	\$
1879	300	19,500	1884	1,141	75,097
1880		24,700	1885	2,440	142,441
1881		35,100	1886	3,458	206,251
1882	810	52,650			
1883	955	68, 750	Total	10,024	624,489

Production of minor minerals. 549. There is not space in a work of this kind to take up all of the minor mineral productions in detail. The tables at the commencement and close of the chapter of the productions in 1886 and 1887 will be some guide to their annual value.

Mineral production of Canada 1887. 550. The following table published by the Geological Survey of Canada, is a statement of the mineral output of the past year, but it must be remembered that the returns are not all complete, and some of the figures are liable to alteration when revised.

## CHAPTER X.

### MARINE AND FISHERIES.

### PART I .- MARINE.

The Marine Department. 551. The special object of this Department is the protection of our mercantile marine, and of the shipping that frequent our coasts; it is therefore, of the highest consequence that it should be made as efficient as possible, and it is gratifying to know that no pains are spared in order to bring about this result, and to provide security to shipping equal to that of the most advanced of countries.

Number of lighthouses, &c., 1868 552. An examination of the following table will give some idea of the progress made since Confederation. In it are shown the number of light stations, lighthouses, fog whistles and fog horns in every year from 1868 to 1887 inclusive. The light stations in Newfoundland that are maintained by the Dominion are included in these figures:

NUMBER OF LIGHTHOUSES, &c., IN CANADA, 1868-1887.

YEAR ENDED 31ST DECEMBER,	Light Stations.	Lighthouses	Fog Whistles	Automatic Fog-Horns.
1868	198	227	2	
1869	219	233	2	
1870	240	278	4	
1871	264	297	8	
1872	280	314	13	
1873	316	363	17	
874	342	384	18	
875	377	444	22	
1878	107	488	24	
1877	416	509	>5	2
878	427	518	25	4
879	443	542	23	6
880	452	551	22	7
881	462	553	23	9
882	470	562	23	9
883	484	578	23	9
884	507	597	23	10
885	526	617	23	12
886	534	625	23	16
887	561	658	23	24

553. It will be seen that there are no less than 368 light Increase in numstations, 431 lighthouses, 21 fog whistles and 22 fog horns more than there were in 1868, without taking into account the large number of bell-buoys, buoys and beacons that have also been supplied since then.

554. The total number of light stations in the Dominion Total number of on 31st December, 1487, was 5,611; of lights shown, 658; lights of steam fog whistles and automatic fog horns. 47; and of dec., 1887. lights are engineers of fog whistles, assistants and crews of lights, while the whole number of persons employe a outside service was 1,460. The lights, beacons, &c., were distributed among the several divisions as follow:—

555. The Ontario division, extending from Montreal to Ontario Division. Manitoba, contained 179 lights, including two in Manitoba. There were also 246 buoys and 19 beacons. Three new lights and several buoys and beacons were added during the year. The total cost of maintenance for the year was \$75,691, and of construction, \$18,383.

556. The Quebec division is a large and important one, Quebec comprising, as it does, the Richelieu River and Lake Memphremagog, the River and Gulf of St. Lawrence, the Strait of Belle Isle, the north-west coast of Newfoundland and the Labrador coast. In this division there were 149 lights, 3 lightships, 3 supplied with steam fog whistles, 7 steam fog whistles, 10 fog guns, 109 buoys, 59 beacons, and 9 life-saving canoes for service in the ice. The lights were supplied by the steamers "Druid" and "Napoleon III." The expenditure for maintenance was \$148,277.

557. The Nova Scotia division, likewise a very important Nova cae, contained 153 lighthouses, showing 163 lights, 1 Division. lightship, 12 steam fog alarms, 10 hand fog alarm stations,

rotection frequent ence that gratifying ng about ial to that

will give on. In it louses, fog 38 to 1837 that are se figures:

2 fog bells, 3 signal gun stations, 8 automatic single buoys, 5 bell-buoys, 555 other buoys, 8 stationary beacons, 8 lifeboat stations, 3 humane establishments and 4 signal stations. The lights were supplied by the steamer "Newfield." Two new lights were erected and three new self-righting and self-bailing boats have been built, which are awaiting a decision as to their location. The amount expended for maintenance was \$117,808, and for construction, \$5,331.

New Brunswick Division. 558. In the New Brunswick division there were 107 light-houses, including 2 lightships and 13 fog alarms. Three new lights were established during 1887, and 1 fog alarm. The expenditure for maintenance was \$96,425, and for construction, \$5,281.

Prince Edward Island Division. 559. Prince Edward Island division contained 47 lights. The expenditure for maintenance was \$17,852, and for construction, \$384.

British Columbia Division.

560. British Columbia division contained 9 lighthouses and 1 fog whistle; these were supplied by the steamer "Sir James Douglas." The expenditure for maintenance was \$16,230, and for construction, \$322.

Government steamers. 561. The Department has 7 steamers, the property of the Government, under its control, for the purpose of supplying the different lights, laying down and taking up buoys, attending to wrecks, &c., &c., besides the steamer "Sir James Douglas," which discharges the duties of this Department on the Pacific Coast. The total cost of maintaining these vessels during 1887 was \$142,936.

Harbour Police. 562. A police force has been established for a number of years, at the harbours of Montreal and Quebec, for the purpose of keeping order and restraining crimping, to meet the expenditure for which a tax of 3 cents per ton is levied

ingle buoys, cons, 8 lifenal stations. field." Two righting and awaiting a xpended for 1, \$5,331.

ed 47 lights. and for con-

9 lighthouses steamer "Sir tenance was

roperty of the of supplying ng up buoys, steamer "Sir of this Departmaintaining

r a number of c, for the puring, to meet ton is levied

on all vessels at either port, paid once a year by vessels under 100 tons, and twice a year by vessels over that amount. The force in 1887 consisted of 75 men, 36 at Quebec and 39 at Montreal, and the total number of arrests made was 978, being 71 less than in the preceding year. There was an excess of expenditure over receipts of \$17,415, and during the past 18 years the total expenditure has exceeded the total receipts by \$43,973.

563. In order to provide for the treatment of sick and Provisions for sick distressed mariners, all vessels over 100 tons register are and distressed required to pay a duty of 2 cents per ton three times a year, ma vessels under 100 tons only paying once in the same period; fishing vessels are also now entitled to the same benefits as other vessels, provided the dues are paid before leaving on a fishing voyage. No vessel not registered in Canada and employed exclusively in fishing is subject to the payment of this duty. These provisions do not apply to Ontario, but a parliamentary grant of \$500 is made to each of the General Hospitals at Kingston and St. Catharines for the care of seamen. The total amount received from dues in 1887 was \$42,338, being an increase of \$1,487 as compared with 1886. The total expenditure was \$52,262, being \$9,928 in excess of receipts. A considerable number, however, of immigrants and residents are cared for at the Marine Hospital, Quebec, and if the amount expended for them be deducted, the receipts would be in excess to the extent of \$4,887. The total excess of expenditure over receipts during the past nineteen years has been \$12,705.

564. The total number of steamboats in the Dominion was Number 1,031, with a gross tonnage of 174,896 tons; 81 were added spection of steam. to the number during the past year, with a gross tonnage boats. of 3,426 tons, and 48 lost or put out of service. The receipts on account of the Steamboat Inspection Fund during the

last 18 years have exceeded the expenditure by \$4,448. During the year, 831 certificates were granted to engineers.

Masters and mates

565. Since the 16th September, 1871, when the Act came examina- into operation, 1.571 candidates have passed and obtained masters' certificates, and 1,026 certificates as mates; of certificates of service, 926 have been issued for masters and 360 for mates. The receipts from fees amounted to \$1,209, and the expenditure to \$4,856. Since 1871 the expenditure has exceeded the receipts by \$44,806.

Inland and coast-

566. During the calendar year, 101 candidates for inland ing certifi- and coasting certificates passed and obtained masters' certificates of service, and 34 mates' certificates of service, while 66 obtained masters' and 20 obtained mates' certificates of competency.

Wrecks casualties 1887.

567. The total number of wrecks and casualties to sea going vessels of all nations, that occurred in Canadian waters and to Canadian sea going vessels in other waters in the year ended 31st December, 1887, as reported to the Department, was 224, the tonnage involved was 112,846, and the amount of loss, so far as ascertained, \$1,102,628. The number of lives lost was 25, 6 in Canadian and 19 in waters. The disasters to all vessels in Canadian waters and to Canadian vessels on American inland waters were 39, involving 13,137 tons, and causing loss to the extent of \$90,915. The number of lives lost was 21. It is not possible to make any just comparison of the returns for 1887 with those of previous years, as the Department does not receive particulars of all disasters in time to include them in its annual report, which will explain the difference in the figures for 1886 in the following table as compared with the figures given for the same year in last year's Statistical Abstract.

568. The following is a comparative statement of loss for Number of wrecks, each year since 1870, all casualties, whether at sea or on 1887. inland waters, being included in the table: -

COMPARATIVE STATEMENT OF WRECKS AND CASUALTIES. 1870 TO 1887.

YEAR ENDED 31ST DECEMBER.	Casual- ties.	Tonnage.	Lives Lost.	Damage.
1870	335		210	901,000
1871	274	81,035	81	2,100,000
1872	290	99,109	237	2,507,338
1873	350	99,523	*813	2,844,133
1874	308	106,682	109	2,029,968

1876	452	153,368	404	2,942,955
876	468	177,896	153	3,952,582
878	414	161,760	187	3,444,875
879	533	198,364	339	4,119,233
1880	445	179,993	217	3,820,652
881	440	210,719	399	4,922,423
882	451	193,655	271	3, 138, 423
883	366	158,826	259	2,029,752
884	324	119,741	253	2,965,321
1885	346	144,726	198	2,753,667
886	377	150,277	54	1,950,799
887	263	125,983	46	1,193,543
Total	6,722	2,461,084	4,308	50,086,182

<sup>\* 545</sup> persons were lost by the wreck of the White Star SS. "Atlantic."

569. It will be seen that the loss of life was considerably becrea less in 1886 than in any other year in the table, and the life and property. amount of damage was also very much smaller than in any previous year, 1870 only excepted, and since the amount of shipping involved is continually increasing, it would appear as if the improved protection by means of lights, buoys, &c., and the greater attention now paid to the qualifications both of masters and mates, were having beneficial effects in reducing risks both to life and property.

Principal casualties 1887. 570. The most disastrous casualties in 1887, as at present reported, were as follow: The ship "Muskoka," of St. John, N. B., sailed from Java on 1st June last, and has not since been heard of; the schooner "Dionis," of Barrington, N. S., sailed from Lunenburg on 19th August last, and has not since been heard of; the barge "Oriental" went down off Port Dalhousie on 25rd October last with all hands, this vessel was overladen and unseaworthy; and the propeller "California" foundered off St. Helen's Island on 2rd October, 9 lives being lost, at an enquiry held subsequently, the certificates of the master and mate were suspended until the 1st October and 1st August, 1888, respectively.

Meteorological service. 571. The proceedings of the Meteorological Service are referred to on page 14. The Superintendent, in his report, calls attention to the value of the excellent meteorological statistics collected by the Provinces of Ontario and Manitoba, and it is very much to be hoped that the other Provinces will speedily follow their good example.

Expenditure 1887. 572. The following is a general summary of the expenditure of this department during the year ended 30th June, 1887. The expenditure in 1886 amounted to \$980,120, there was therefore a decrease of \$43,068:—

### EXPENDITURE OF DEPARTMENT OF MARINE, 1887.

6,313 4,953 \$937,052 573. The following table gives the number of vessels and Number of number of tons on the registry books of the Dominion on vessels in Canada 31st December, 1887, all sailing vessels, steamers and barges 1887. are included:-

NUMBER OF VESSELS, &c., ON THE REGISTRY BOOK OF CANADA ON 31st DECEMBER, 1887.

Provinces.	Numb	er of	Gross Tonnage, Steamers.	Total Net Tonnage.		
	Vessels	Steamers.				
New Brunswick	1,027	80	9,841	255,126		
Nova Scotia Quebec Ontario	1,586	84 319 610	7,727 56,516 81,724	498,878 189,064 139,548		
Prince Edward Island	225	14	3,114 14,421	29,031 12,789		
Manitoba	. 71	43	4,846	5,811		
Total	7,178	1,240	178,189	1,130,247		

574. There was a decrease as compared with 1886 of 116 Decrease. in the number of vessels, and of 87,519 tons in the total tonnage, and assuming the average value to be \$30 a ton, the value of the total tonnage would be \$33,907,410, being a decrease in value of \$2,625,570. There was an increase of 42 in the number of steamers, but a decrease of 79,629 in steamers tonnage, this being due to the registers of some of the vessels of the Allan Line having been transferred to Glasgow.

575. The next statement shows the number of vessels and vessels of tons on the register in each year from 1873:—

YEAR.	Vessels.	Tons.	YEAR.	Vessels.	Tons.
1873	6,783 6,930 6,952 7,192 7,362 7,469 7,471 7,377	1,073,718 1,158,363 1,205,565 1,260,893 1,310,468 1,333,015 1,332,094 1,311,218	1881	6,394 7,312 7,374 7,254 7,315 7,294 7,178	1,310,896 1,260,777 1,276,440 1,253,747 1,231,856 1,217,766 1,130,247

New ressels. 576. The following is a list of the new vessels built and registered in each province in 1887:—

	Number.	Tonnage.
New Brunswick	18	2,909
Nova Scotia	87	12,310
Quebec	28	2,888
Ontario	66	2,993
Prince Edward Island	7	601
British Columbia		376
Manitoba	8	439
Total	223	22,516

This was a decrease of 6 in number and of 9,691 in tonnage as compared with the preceding year. Assuming the value of the new vessels to be \$45 a ton, the total value would be \$1,013,220.

Decrease in demand for wooden ships.

577. Now that wood has been so completely superseded by iron and steel in the construction of ships, the demand for wooden ships is rapidly decreasing, and the decline in this industry has been very marked in consequence, and as far as can be seen, nothing can happen to revive it. It is not correct, therefore, as in some cases has been done, to attribute this decline in Canada to the policy of the Government, for it has been brought about by causes entirely outside the control of this or any other Government, and it is equally impossible that it can be revived by any Governmental action. Such questions as these are, at the present time, in the hands of scientific men, and it may be that iron and steel will yet be equally superseded by some other material.

Remarks by Mr. Coghlan. 578. Mr. Coghlan remarks to the same effect respecting this industry in New South Wales: "The general tendency "to supplant sailing vessels by steam, and the substitution of iron for wood for the frames and hulls of vessels,

ouilt and

nage. ,909 2,310 2,888 2,993

Increase in shipping. 581. There was a very decided increase in the shipping of this country during the past year, due partly to the improvement of trade and partly to the increased bulk of merchandise. It has been argued that during the years our trade was decreasing, our shipping was increasing, and therefore the shipping returns could not be correct, but it was overlooked that though through the decline in values the monetary value of our trade had decreased, yet the quantity had materially increased in bulk as pointed out in Chapter IV, p. 196. British vessels formed only 10 per cent. of the total number, but they carried 43 per cent of the total freight, 32 per cent of the remainder being carried by Canadian, and the balance by foreign vessels.

British and colonial and colonial shipping 1886. The following is a statement of British and Colonial shipping 1886. The figures are all taken from official sources:—

## MARINE AND FISHERIES.

# SHIPPING IN BRITISH POSSESSIONS, 1886.

Colony.	Tonnage of Vessels Entered and Cleared.	Colony.	Tonnage of Vessels Entered and Cleared.
United Kingdom	62,841,077 9,080,390 8,884,059 8,609,730 8,044,571 7,491,099 7,294,589 4,258,604 3,923,481 3,735,387 3,275,437 2,083,707	Tasmania. Mauritius British Guiana Newfoundland Gold Coast Western Australia Lagcs Sierra Leone Natal Bermudas Honduras Turk's Island	605,057 501,019 448,392 436,070 392,834 281,528 237,247 232,415
South Australia	1,558,476 1,554,593 1,402,114	BahamasGambiaSt. Helena	136,296
Trinidad New Zealand Jamaica	1, 196, 076 990, 903 928, 406	FijiFalkland Islands	105,369 59,762

Malta and Gibraltar being merely ports of call, it will be seen that Hong Kong is the only British Possession outside of the United Kingdom, that has a larger shipping trade than Canada, though the combined shipping of the Australasian Colonies considerably exceeds that of this country.

583. The following table shows the number and tonnage Register of merchant vessels (both steam and sailing) owned by the nage of principal countries of the world, according to the latest available returns. The figures have been taken partly from officials sources and partly from the Statesman's Year Book, 1888:—

· Licensed and enrolled vessels not included.

United States shipping.

584. Canada, it will be seen, stands fourth in the list, but if the licensed and enrolled vessels belonging to the United States which are employed in the river trade and home trade were included, that country would take second place, its total tonnage amounting to 4,105,844 tons. To such an extent has the American mercantile marine declined that, whereas in 1856 75.2 per cent. of the United States imports and exports were carried in American bottoms, in 1887 the proportion was only 13.80 per cent., the value carried having increased in the same period 138. per cent.

#### PART II.-FISHERIES.

Yield and value of Canadian Fisheries 1886 and 1887.

585. Owing to the report of the Minister of Fisheries not having been yet completed, full particulars concerning the fisheries for 1887 are not available, but the following is a summary comparative statement of the yield and value of the fisheries in 1886 and 1887:—

588. The history of the fishery question down to the close Fishery negotiaof 1886 was briefly stated in last year's Statistical Abstract.\* tions. During 1887 matters remained in statu quo, though American fishermen did not come in contact with the Canadian authorities as frequently as in the preceding year. Early in the year, however (1887), negotiations were commenced between the respective governments with reference to some settlement of the question, which resulted in the appointment of a commission which met at Washington on the 15th November, 1887.

589. The Plenipotentiaries appointed by Her Majesty Signing of were the Hon. Joseph Chamberlain, M. P.; the Hon. Sir Washing-Lionel Sackville Sackville West, the British Minister at Washington and Sir Charles Tupper. And by the President of the United States: Thomas F. Bayard, U.S. Secretary of State; William L. Putnam and James B. Angell. After considerable discussion a treaty was agreed upon and was signed at Washington on the 15th March, 1888. A modus

<sup>\*</sup>Statistical Abstract for 1886, p. 328, et seq.

vivendi pending the ratification of the treaty was also suggested by the British Plenipotentiaries. The treaty has been ratified by the Canadian Parliament, and now waits ratification by the Imperial Parliament, the United States Senate, and the Parliament of Newfoundland.

Terms of the treaty and modus vivendi. 590. The full text of the treaty and of the modus vivendi are as follows:—

Preamble.

Whereas differences have arisen concerning the interpretation of Article I of the Convention of October 20, 1818; Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and the United States of America, being mutually desirous of removing all causes of misunderstanding in relation thereto, and of promoting friendly intercourse and good neighbourhood between the United States and the Possessions of Her Majesty in North America, have resolved to conclude a Treaty to that end, and have named as their Plenipotentiaries, that is to say:

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, The Right Hon. Joseph Chamberlain, M.P.; The Honourable Sir Lionel Sackville Sackville West, K.C.M.G., Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary to the United States of America; and Sir Charles Tupper, G.C.M.G., C.B., Minister of Finance of the Dominion of Canada:

And the President of the United States, Thomas F. Bayard, Secretary of State; William L. Putnam, of Maine; and James B. Angell, of Michigan;

Who, having communicated to each other in their respective full powers, found in good and due form, have agreed upon the following Articles:

#### ARTICLE I.

Article i.

The High Contracting Parties agree to appoint a Mixed Commission to delimit, in the manner provided in this Treaty, the British waters, bays, creeks and harbours of the also sugreaty has ow waits red States

us vivendi

he inter-20, 1818; a of Great rica, being iderstandidly interted States crica, have we named

their reform, have

nt a Mixed ed in this ours of the coasts of Canada and c. Newfoundland, as to which the United States, by Artic. I of the Convention of October 20, 1818, between Great Britain and the United States, renounced for ever any liberty to take, dry, or cure fish.

## ARTICLE II.

The Commission shall consist of two Commissioners to be Article 11. named by Her Britannic Majesty, and of two Commissioners to be named by the President of the United States, without delay, after the exchange of ratifications of this Treaty.

The Commission shall meet and complete the delimitation as soon as possible thereafter.

In case of the death, absence or incapacity of any Commissioner, or in the event of any Commissioner omitting or ceasing to act as such, the President of the United States or Her Britannic Majesty, respectively, shall forthwith name another person to act as Commissioner instead of the Commissioner originally named.

## ARTICLE III.

The delimitation referred to in Article I of this Treaty Article II. shall be marked upon British Admiralty charts by a series of lines regularly numbered and duly described. The charts so marked shall, on the termination of the work of the Commission, be signed by the Commissioners in quadruplicate, three copies whereof shall be delivered to Her Majesty's Government, and one copy to the Secretary of State of the United States. The delimitation shall be made in the following manner, and shall be accepted by both the High Contracting Parties as applicable for all purposes under Article I of the Convention of October 20, 1818, between Great Britain and the United States:—

The three marine miles mentioned in Article I of the Convention of October 20, 1818, shall be measured seaward from low water mark; but at every bay, creek or harbour, not otherwise specially provided for in this Treaty, such three marine miles shall be measured seaward from a straight

line drawn across the bay, creek, or harbour in the part nearest the entrance at the first point where the width does not exceed ten marine miles.

#### ARTICLE IV.

Article iv. At or near the following bays the limits of exclusion under Article I of the Convention of October 20, 1818, at points more than three marine miles from the low water mark, shall be established by the following lines, namely:

At the Baie des Chaleurs the line from the Light at Birch Point on Miscou Island to Macquereau Point Light; at the Bay of Miramichi, the line from the Light at Point Escuminac to the Light on the Eastern Point of Tabisintac Gully; at Egmont Bay, in Prince Edward Island, the line from the Light at Cape Egmont to the Light at West Point; and off St. Ann's Bay, in the Province of Nova Scotia, the line from Cape Smoke to the Light at Point Aconi.

At Fortune Bay, in Newfoundland, the line from Connaigre Head to the Light on the South-easterly end of Brunet Island, thence to Fortune Head; at Sir Charles Hamilton Sound, the line from the South-east point of Cape Fogo to White Island, thence to North end of Peckford Island, and from the South end of Peckford Island to the East Headland of Ragged Harbour.

At or near the following bays the limits of exclusion shall be three marine miles seaward from the following lines, namely:

At or near Barrington Bay, in Nova Scotia, the line from the Light on Stoddard Island to the Light on the South Point of Cape Sable, thence to the Light at Baccaro Point; at Chedabucto and St. Peter's Bays, the line from Cranberry Island Light to Green Island Light, thence to Point Rouge; at Mira Bay, the line from the Light on the East Point of Scatari Island to the north-easterly Point of Cape Morien; and at Placentia Bay in Newfoundland, the line from Latine Point, on the Eastern mainland shore, to the most Southerly Point of Red Island, thence by the most Southerly Point of Merasheen Island to the mainland.

in the part width does

exclusion 0, 1818, at a low water s, namely:

ght at Birch
ght; at the
oint Escumntac Gully;
ne from the
nt; and off
he line from

e from Connd of Brunet es Humilton Cape Fogo to I Island, and ast Headland

of exclusion he following

the line from on the South accaro Point; m Cranberry Point Rouge; East Point of Cape Morien; he line from to the most most Southd. Long Island and Bryer Island, at St. Mary's Bay, in Nova Scotia, shall, for the purpose of delimitation, be taken as the coasts of such bay.

#### ARTICLE V.

Nothing in this Treaty shall be construed to include Article v. within the common waters any such interior portions of any bays, creeks or harbours as cannot be reached from the sea without passing within the three marine miles mentioned in Article I of the Convention of October 20, 1818.

#### ARTICLE VI.

The Commissioners shall from time to time report to each Article vi. of the High Contracting Parties such lines as they may have agreed upon, numbered, described, and marked as herein provided, with quadruplicate charts thereof; which lines so reported shall forthwith from time to time be simultaneously proclaimed by the High Contracting Parties, and be binding after two months from such proclamation.

#### ARTICLE VII.

Any disagreement of the Commissioners shall forthwith Articlevil. be referred to an Umpire selected by Her Britannic Majesty's Minister at Washington and the Secretary of State of the United States; and his decision shall be final.

## ARTICLE VIII.

Each of the High Contracting Parties shall pay its own Articlevill Commissioners and officers. All other expenses jointly incurred, in connection with the performance of the work, including compensation to the Umpire, shall be paid by the High Contracting Parties in equal moieties.

#### ARTICLE IX.

Nothing in this Treaty shall interrupt or affect the free Article ix. navigation of the Strait of Canso by fishing vessels of the United States.

#### ARTICLE X.

Article z. United States fishing vessels entering the bays or harbours referred to in Article I of this Treaty shall conform to harbour regulations common to them and to fishing vessels of Canada or Newfoundland.

They need not report, enter, or clear, when putting into such bays or harbours for shelter or repairing damages, nor when putting into the same, outside the limits of established ports of entry, for the purpose of purchasing wood or of obtaining water; except that any such vessel remaining more than twenty-four hours, exclusive of Sundays and legal holidays, within any such port, or communicating with the shore therein, may be required to report, enter, or clear; and no vessel shall be excused hereby from giving due information to boarding officers.

They shall not be liable in such bays or harbours for compulsory pilotage; nor, when therein for the purpose of shelter, of repairing damages, of purchasing wood, or of obtaining water, shall they be liable for harbour dues, tonnage dues, buoy dues, light dues, or other similar dues; but this enumeration shall not permit other charges inconsistent with the enjoyment of the liberties reserved or secured by the Convention of October 20, 1818.

# ARTICLE XI.

Article xi. United States fishing vessels entering the ports, bays and harbours of the Eastern and North-western coasts of Canada or of the coasts of Newfoundland under stress of weather or other casualty may unload, reload, tranship or sell, subject to Customs laws and regulations, all fish on board, when such unloading, transhipment, or sale is made necessary as incidental to repairs, and may replenish outfits, provisions and supplies damaged or lost by disaster; and in case of death or sickness shall be allowed all needful facilities, including the shipping of crews.

Licenses to purchase in established ports of entry of the aforesaid costs of Canada or of Newfoundland, for the homeward voyage, such provisions and supplies as are ordinarily or harbours form to harg vessels of

putting into lamages, nor f established wood or of l remaining tys and legaling with the er, or clear; ving due in-

rts, bays and sts of Canada of weather or r sell, subject rd, when such ssary as incirovisions and case of death ies, including

f entry of the for the homeare ordinarily sold to trading vessels, shall be granted to United States fishing vessels in such ports promptly upon application and without charge, and such vessels, having obtained licenses in the manner aforesaid, shall also be accorded upon all occasions such facilities for the purchase of casual or needful provisions and supplies as are ordinarily granted to trading vessels; but such provisions or supplies shall not be obtained by barter, nor purchased for re-sale or traffic.

#### ARTICLE XII.

Fishing vessels of Canada and Newfoundland shall have Articlexit. on the Atlantic coasts of the United States all the privileges reserved and secured by this Treaty to United States fishing vessels in the aforesaid waters of Canada and Newfoundland.

#### ARTICLE XIII.

The Secretary of the Treasury of the United States shall Article make regulations providing for the conspicuous exhibition by every United States fishing vessel, of its official number on each bow; and any such vessel, required by law to have an official number, and failing to comply with such regulations, shall not be entitled to the licenses provided for in this Treaty.

Such regulations shall be communicated to Her Majesty's Government previously to their taking effect.

#### ARTICLE XIV.

The penalties for unlawfully fishing in the waters, bays, Article creeks, and harbours, referred to in Article I of this Treaty, may extend to forfeiture of the boat or vessel and appurtenances, and also of the supplies and cargo aboard when the offence was committed; and for preparing in such waters to unlawfully fish therein, penalties shall be fixed by the court, not to exceed those for unlawfully fishing; and for any other violation of the laws of Great Britain, Canada, or Newfoundland relating to the right of fishery in such waters, bays, creeks or harbours, penalties shall be fixed by the court, not exceeding in all three dollars for every ton of the boat

or vessel concerned. The boat or vessel may be holden for such penalties and forfeitures.

The proceedings shall be summary and as inexpensive as practicable. The trial (except on appeal) shall be at the place of detention, unless the judge shall, on request of the defence, order it to be held at some other place adjudged by him more convenient. Security for costs shall not be required of the defence, except when bail is offered. Reasonable bail shall be accepted. There shall be proper appeals available to the defence only; and the evidence at the trial may be used on appeal.

Judgments of forfeiture shall be reviewed by the Governor General of Canada in Council, or the Governor in Council of Newfoundland, before the same are executed.

#### ARTICLE XV.

Article IV. Whenever the United States shall remove the duty from fish-oil, whale-oil, seal-oil, and fish of all kinds (except fish preserved in oil), being the produce of fisheries carried on by the fishermen of Canada and of Newfoundland, including Labrador, as well as from the usual and necessary casks, barrels, kegs, cans, and other usual necessary coverings containing the products above mentioned, the like products. being the produce of fisheries carried on by the fishermen of the United States, as well as the usual and necessary coverings of the same, as above described, shall be admitted free of duty into the Dominion of Canada and Newfoundland.

And upon such removal of duties, and while the aforesaid articles are allowed to be brought into the United States by British subjects, without duty being reimposed thereon, the privilege of entering the ports, bays and harbours of the aforesaid coasts of Canada and of Newfoundland shall be accorded to United States fishing vessels by annual licenses, free of charge, for the following purposes, namely:

1. The purchase of provisions, bait, ice, seines, lines and all other supplies and outfits;

2. Transhipment of catch, for transport by any means of conveyance;

3. Shipping of crews.

Supplies shall not be obtained by barter, but bait may be so obtained

The like privileges shall be continued or given to fishing vessels of Canada and of Newfoundland on the Atlantic coasts of the United States.

# ARTICLE XVI.

This Treaty shall be ratified by Her Britannic Majesty, Article having received the assent of the Parliament of Canada and of the Legislature of Newfoundland; and by the President of the United States, by and with the advice and consent of the Senate; and the ratifications shall be exchanged at Washington as soon as possible.

In faith whereof, We, the respective Plenipotentiaries, have signed this Treaty, and have hereunto affixed our seals.

Done in duplicate at Washington, this fifteenth day of February, in the year of Our Lord one thousand eight hundred and eighty-eight.

# PROTOCOL.

The Treaty having been signed the British Plenipotenti-Modus aries desire to state that they have been considering the position which will be created by the immediate commencement of the fishing season before the Treaty can possibly be ratified by the Senate of the United States, by the Parliament of Canada, and the Legislature of Newfoundland.

In the absence of such ratification the old conditions which have given rise to so much friction and irritation might be revived, and might interfere with the unprejudiced consideration of the Treaty by the legislative bodies concerned.

Under these circumstances, and with the further object of affording evidence of their anxious desire to promote

good feeling and to remove all possible subjects of controversy, the British Plenipotentiaries are ready to make the following temporary arrangement for a period not exceeding two years, in order to afford a "modus vivendi" pending the ratification of the Treaty.

1. For a period not exceeding two years from the present date, the privilege of entering the bays and harbours of the Atlantic coasts of Canada and of Newfoundland shall be granted to United States fishing vessels by annual licenses at a fee of \$1.50 per ton—for the following purposes:

The purchase of bait, ice, seines, lines, and all other supplies and outfits.

Transhipment of catch and shipping of crews.

- 2. If during the continuance of this arrangement, the United States should remove the duties on fish, fish-oil, whale and seal oil (and their coverings, packages, &c.), the said licenses shall be issued free of charge.
- 3. United States fishing vessels entering the bays and harbours of the Atlantic coasts of Canada or of Newfoundland for any of the four purposes mentioned in Article I of the Convention of October 20, 1818, and not remaining therein more than twenty-four hours, shall not be required to enter or clear at the Custom house, providing that they do not communicate with the shore.
- 4. Forfeiture to be exacted only for the offences of fishing or preparing to fish in territorial waters.
- 5. This arrangement to take effect as soon as the necessary measures can be completed by the Colonial Authorities.

# CHAPTER XI.

# MILITIA AND DEFENCE.

591. Previous to the confederation of the Provinces, the Defence of defence of this country was entirely in the hands of the before Confeder-Imperial Government, who for that purpose maintained ation. troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble, an account of which would be beyond the scope of this chapter, being, as it is, part of the history of Canada.

592. After Confederation the British Government gradu- with-drawal of ally withdrew all the Imperial troops from this country, Imperial troops. and at present only maintain a garrison at Halifax and a naval establishment there and on the Pacific coast.

593. By the British North America Act the command in Command chief of all naval and military forces of and in Canada was vested in the Queen. vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time Department established, the first Minister being Sir George E. Cartier, ment of Militia. and the first Militia Act was passed in 1868, 31 Vic., chap. 40. This Act was subsequently amended in various ways, Millia but is practically embodied in the present Consolidated Militia Act, 46 Vic., chap. 2, passed 25th May, 1883. By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under sixty, not exempted or disqualified by law, this population being divided into four classes, as follow:—

The first class comprises those aged 18 or upwards and who conunder 30, being unmarried or widowers without children. Militia.

The second class comprises those between the ages of 80 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married or widowers with children.

The fourth class comprises those between 45 and 60.

Persons exempt from service. 594. The following persons are exempt from enrolment and actual service at any time: Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

Number of men and period of drill.

595. The number of men to be trained and drilled annually is limited to forty-five thousand, except as specially authorized, and the period of drill is to be 16 days and not less than eight days every year.

Active and reserve Militia. 596. The militia is divided into active and reserve land and marine force. The active land and marine force is composed of men raised either by voluntary enlistment or ballot, and the reserve force consists of the whole of the men not serving in the active militia of the time being.

Period of service.

597. The period of service is three years.

Military Districts. 598. The Dominion is divided into twelve military districts, in each of which a permanent military staff is maintained, under the command of a Deputy Adjutant General.

Permanent corps. 599. The perimenent corps and schools of instruction consist of "A" troop of Cavalry at Quebec, "A," "B" and

ages of 80 dren.

"C" Batteries, Schools of Artillery at Kingston, Quebec and Victoria, B.C.; "A," "B" and "C" Infantry School Corps, at Fredericton, N.B., St. Johns, Q., and Toronto, Ont., and a School of Mounted Infantry at Winnipeg. A fourth Infantry School Corps is in course of organization at London, Ont. The total strength of these permanent corps is limited to 1,000 men. The present strength is 950 men, exclusive of officers.

600. The Royal Military College at Kingston, which is Royal under the control of the Militia Department, was founded in College. 1875, and has proved a most successful institution. The present number of cadets is 77, which number is likely to be shortly increased to 96. The total number of cadets who have joined has been 280, of whom 116 have graduated and 59 have been gazetted to commissions in the Imperial army.

601. The general officer commanding the militia, in his opinion annual report for 1887. says: "It is most satisfactory in the career, so far, of the graduates of this College, manding." to notice how very successful they have been in civil as well as in military employment." "It ought to be clearly understood that the four years course at this College is calculated to fit a man for almost any appointment in this country, whether civil or military."

# CHAPTER XII

th

Since

610.

# DOMINION LANDS.

Land taken up

607. In the face of the large immigration into the North West Territories last year, the increase in the amount land taken up, was by no means what was expected, the being only a small increase in the area taken up as hom steads, and a decrease under the heads both of pre-emption and sales. The following are the comparative figures:

	1886		188	37.
Homesteads	294,930	Acres	319,500	Acres
Pre-emptions	146,480	"	87,747	"
Sales	133,701	"	113,544	"

Reasons quantity

608. Two reasons are, however, given in the report of Minister of the Interior for the comparatively small a taken up, one being that the extraordinary grain of caused a very large demand for labour, and consequent much larger proportion than usual of the immigration absorbed in this way, and the other that settlers coming to the country appeared to realize to a much greater ext than formerly, the advisability of acquiring some experie of the modes of agriculture suitable to the country, be taking up land. "There is much" says the report "in "soil and climate of Manitoba and the North-West that "quires to be studied by the newly arrived agricultu "even assuming his former experience to have fitted "in every respect for the pursuit of his calling, and "would be to his personal interest that he should acqui "little practical knowledge of the country and its met "of farming before finally taking up land on his nd hor "account." The report further says that "The opinion ar fre "gins to gain favour with those who have paid close a "tion to the affairs of Manitoba and the North-West,

"so far as relates to the grain growing portions of

country at least, 160 acres is the limit of the area which the average farmer can profitably work." The decrease n the number of pre-emptions would appear to be an indiation of the growth of this feeling.

609. The following table gives particulars of the trans- Transacctions in Dominion lands in each year from 1872 to 31st Dominion lands 1872 ctober, 1887, that being the end of the year in this Deartment, except in financial matters:—

re

tol

Wor

The receipts from 1st July, 1887, to 1st February, 1888, have amounted to \$206,744.

Increase in 1887. 611. There was a total increase in 1887 of \$81,038, owing to the large redemption of scrip, but there was a decrease in fees and cash for sales, the receipts from pre-emptions being doubtless small on account of the extension of time granted within which to make payment.

Entries cancelled.

612. The number of entries cancelled has been steadily decreasing; in 1874 62½ per cent. of the homestead and 92 per cent. of the pre-emption entries were cancelled, in 1886 only 60 of the former and 50 of the latter were cancelled. The number of patents issued was 4,599 as compared with 4,570 in the preceding year, and was the largest number yet issued in any one year, the number cancelled was 26.

Patents issued.

Total	70,678 172	431,490
Total	70,678 172	431,490

At the rate of five souls to a homestead, these lands would sustain an agricultural population of 2,157,450.

Revenue 1887.

616. The total revenue of the Department of the Interior for the year ended 31st October, 1887, was:-

Gross revenue in cash	
Scrip redcemed and warrants located	241,331
Total	\$429.819
Total in 1886	
Decrease in 1887	<u>*176.057</u>

Total receipts.

617. The total receipts on account of Dominion lands under the various heads to 31st October, 1887, are as follow:

Homestead fees	\$ 383,939
Pre-emption	185,278
Sales, cash	2,897,212
Timber, grazing and mineral	754,962
Colonization	857,456
Miscellaneous	189,617
	@5 000 ACA

School lands in

618. Two sections of land of 640 acres each in every Manitoba. township in Manitoba are held in trust by the Dominion Government as school lands, for the purpose of aiding and promoting education. These lands are to be disposed of as and when it may seem fit to the Government, and the proceeds applied to the above purposes.

Sales of school lands.

619. A series of sales of these school lands was held in January, 1888, and the following table gives the result of such sales:-

SALES OF SCHOOL LANDS IN MANITOBA, 1888.

The Report of the Minister of the Interior says: "If "the remainder of the school lands of Manitoba and the "North-West Territories could be relied upon to bring, at "the proper time, equivalent prices, the liberality of this "educational endowment would be difficult to exaggerate."

620. Under the Dominion Lands Regulations all sur- Dominion Lands veyed even numbered sections, excepting 8 and 26, in Regula-Manitoba and the North-West Territories, which have not been homesteaded, reserved to provide wood lots for settlers or otherwise disposed of or reserved, are to be held exclusively for homesteads and pre-emptions.

621. Homestead entry per one quarter-section (160 acres) condiof surveyed agricultural land, open to such entry, may be homeobtained by any person who is the sole head of a family, or entry. by any male who has attained the age of 18 years, on application to the Local Agent of Dominion Lands, and on payment of an office fee of \$10,

At the time of making entry the homesteader must declare under which of the three following provisions he elects to hold his land, and on making application for patent must prove that he has fulfilled the conditions named therein.

- 1. The homesteader shall begin actual residence on his homestead and cultivation of a reasonable portion thereof within six months from date of entry, unless entry shall have been made on or after the first day of September, in which case residence need not commence until the first day of June following, and continue to live upon and cultivate the land for at least six months out of every twelve months for three years from date of homestead entry.
- 2. The homesteader shall begin actual residence, as above, within a radius of two miles of his homestead and continue to

make his home within such radius for at least six months out of every twelve months for the three years next succeeding the date of homestead entry; and shall within the first year from date of entry break and prepare for crop ten acres of his homestead quarter section; and shall within the second year crop the said ten acres, and break and prepare for crop fifteen acres additional—making twenty-five acres; and within the third year after the date of his homestead entry he shall crop the said twenty-five acres, and break and prepare for crop fifteen acres additional, so that within three years of the date of his homestead entry he shall have not less than twenty-five acres cropped; and shall have erected on the land a habitable house in which he shall have lived during the three months next preceding his application for homestead patent.

3. The homesteader shall perfect his homestead entry by commencing the cultivation of the homestead within six months fter the date of entry, or if the entry was obtained on or after the first day of September in any year, before the first day of June following, shall, within the first year after the date of his homestead entry, break and prepare for crop not less than five acres of his homestead; shall, within the second year, crop the said five acres, and break and prepare for crop not less than ten acres in addition, making not less than fifteen acres in all; shall erect a habitable house upon his homestead before the expiration of the second year after his homestead entry, and before the commencement of the third year, shall bond fide reside therein, and cultivate the land for three years next prior to the date of his application for his patent.

In the event of a homesteader desiring to secure his patent within a shorter period than the three years provided by law, he will be permitted to purchase his homestead on

months ext suchin the rop ten within nd prenty-five s homees, and so that ntry he d; and

ecure his provided stead on

plication

furnishing proof that he has resided on the land for at least twelve months from the date of his perfecting his homeste entry, and that he has brought at least 30 acres thereof under cultivation.

Any homesteader may at the same time as he makes his homestead entry, but not at a later date, should there be available land adjoining the homestead, enter an additional quarter section of land as a pre-emption on payment of an office fee of \$10.

622. The pre-emption right entitles the homesteader, who Pre-empobtains entry for a pre-emption, to purchase the land so preempted on becoming entitled to his homestead patent; but should the homesteader fail to fulfil the homestead conditions, or to pay for such pre-emption within six months after he becomes entitled to claim a patent for his homestead, he forfeits all claim to his pre-emption.

623. Every assignment or transfer of homestead or pre- Power to create a emption right, made before the issue of the patent, is null that on the patent, is null the number of the patent, is null the number of the patent, is null that the number of the patent, is null that the number of the patent, is null that the number of the patent, is null that the number of the patent, is null that the number of the patent, is null that the number of the patent, is null that the number of the patent, is null that the number of the patent, is null that the number of the n and void, except in cases where any person or company is advances. desirous of assisting intending settlers, when, the sanction of the Minister to the advance having been obtained, the settler has power to create a charge upon his homestead for a sum not exceeding six hundred dollars, and interest not exceeding eight per cent. per annum, provided that particulars of how such an advance has been expended for his benefit, be first furnished to the settler, or if the charge be made previous to the advance, then such charge shall only operate to the extent certified to by the local agent as having been actually advanced to the settler. One half of the advance may be laid out in the erection of buildings on the homestead.

Price of pre-emp-

624. The price of pre-emptions, not included in town site reserves, is \$2.50 an acre. Where land is north of the northerly limit of the land grant, along the main line of the Canadian Pacific Railway, and is not within twenty-four miles of any branch of that railway, or twelve miles of any other railway, pre-emptions may be obtained for \$2 per acre.

Pay-ments.

625. Payments for land may be in eash, scrip, or police or military bounty warrants.

Licenses

626. Homestead settlers, whose land is destitute of timber, to cut timber for may, upon payment of an office fee of 50 cents, procure from the Crown timber agent a permit to cut the following quantities of timber free of dues: 30 cords of dry wood, 1,800 lineal feet of building timber, 2,000 poplar fence rails and 400 roof poles.

Or pur-chase a wood lot.

In cases where there is timbered land in the vicinity, available for the purpose, the homestead settler, whose land is without timber, may purchase a wood lot, not exceeding in area twenty acres, at the price of \$5 per acre cash.

Timber licenses.

627. Licenses to cut timber on surveyed or unsurveyed lands are granted after competition to the highest tenderer. The lands covered by such licenses are thereby withdrawn from homestead and pre-emption entry and from sale.

Coal districts.

- 628. Coal districts have been set apart as follows:—
  - 1. On the Souris River, south of Moose Mountain.
  - 2. On the South Saskatchewan River, near Medicine Hat.
  - 3. On the North Saskatchewan River, near Edmonton.
  - 4. On the Bow River.
  - 5. On the Belly River.
  - 6. On the Cascade River.
  - 7. Wood Mountain.

The price per acre is, for land containing lignite or bituminous coal, \$10, and for anthracite coal, \$20.

When two or more parties apply to purchase the same land, tenders will be invited.

629. Leases of grazing lands in Manitoba and the North- Leases of West Territories can be granted only after public competition, except in the case of actual settlers to whom may be leased, without public competition, tracts of land not to exceed four sections and to be contiguous to the settler's homestead. Leases shall be for a period of not exceeding twenty-one years, and no single lease shall cover a greater area than 100,000 acres.

The lessee is obliged, within each of the three years from the date of granting the lease, to place upon his lease-hold not less than one-third of the whole amount of the stock which he is required to place upon the tractleased, namely, one head of cattle for every twenty acres of land embraced by the lease, and shall, during the rest of the term, maintain cattle thereon in at least that proportion.

After placing the prescribed number of cattle upon his leasehold, the lessee may purchase land, within the tract leased, for a home, farm and corral.

Any portion of the lands forming a grazing tract are open for homestead and pre-emption and to purchase from Government at \$2.50 per acre cash; and in the event of such settlement or sale, the lease (if any) to be void in respect of such lands so entered or purchased.

630. Any person may explore vacant Dominion lands not Mining: locations appropriated or reserved by Government for other purposes. and may search therein, either by surface or subterranean prospecting, for mineral deposits, with a view to obtaining a mining location for the same, but no mining location shall be granted, until the discovery of the vein, lode or

# CHAPTER XIII.

# BANKS AND SAVINGS BANKS.

- 631. The denominations of money in the currency of Canadian Canada were declared by the Act 34 Vic., chap. 4, to be dollars, cents and mills, there being 100 cents in a dollar and 10 mills in a cent. By the same Act the British sovereign, as then coined, was declared to be legal tender for \$4.863.
- 632. Silver coins struck by order of Her Majesty for silver and circulation in Canada, were declared to be legal tender to the amount of tendollars, and copper coins, similarly struck, to the amount of twenty-five cents. The gold eagle of the United States was also declared to be legal tender for tendollars, and multiples and halves of the same for proportionate sums.
- 633. The coins in circulation in Canada are silver fifty, coins in twenty-five, twenty, ten and five cent pieces, and bronze tion. one cent pieces, all of which are struck in England. No twenty cent pieces have been coined for a considerable time, and they are gradually disappearing from circulation, Canada has no gold coinage of its own, but as stated above, British and American gold pieces pass current.
- 634. The notes issued exclusively by the Government are Paper of the denominations \$4, \$2, \$1, and twenty-five cents fractional paper currency, no bank in the Dominion being allowed to issue notes for a less sum than five dollars, or for any sum not being a multiple of five dollars.
- 635. The chartered and incorporated banks of the Dominion Acts and are regulated by the Bank Act, 34 Vic., chap. 5, and subse-provis-

quent amending Acts, by which it is provided, amongst other things,

Capital paid up. That at least one hundred thousand dollars of capital shall be bona fide paid up to the satisfaction of the Treasury Board before any incorporated bank shall commence business.

Amount of notes for circulation. The amount of notes issued for circulation by any bank shall never exceed the amount of its unimpaired capital, under a penalty varying with the amount of such excess.

Part payment to be in Dominion notes.

Any bank when making payment is compelled, if requested, to pay the same or part thereof, not exceeding sixty dollars, in Dominion notes, for \$1, \$2 or \$4 each.

Notes to be a first charge. The payment of notes issued by any bank for circulation shall be the first charge on its assets in case of insolvency.

Limit to dividend.

No dividends or bonus exceeding 8 per cent. per annum shall be paid by any bank, unless, after deducting all bad and doubtful debts, it has a reserve fund equal to at least twenty per cent. of its paid up capital.

Monthly returns. Monthly returns, certified by the President and General Manager, shall be made by every bank to the Government, according to the form and under the penalty provided by the Acts.

Proporof cash in Dominion notes.

Every bank shall, subject to a penalty, always hold at least half, if possible, of its cash revenues in Dominion notes, and never a less proportion than forty per cent.

Private Banks. No person, firm or company, other than a bank incorporated under the above Acts, may use the title of bank, banking company, banking house, banking association or banking institution, without adding the words "not incorporated."

There were forty-one incorporated banks that made Number returns to the Government on 30th June, 1887, distributed porated Banks. as follows: 13 in Ontario, 14 in Quebec, 9 in Nova Scotia, 3 in New Brunswick, and one each in Manitoba and British Columbia. The banks are assigned to the Provinces according to the situation of their head offices, but many of them have branches all over the Dominion.

637. The following is a comparative statement of the Bank assets and liabilities of the various banks in Canada, on the 1886 and 1887. 30th June, 1886 and 1887:—

BANK STATEMENT, 30TH JUNE, 1886 AND 1887.

Liabilities.	1886.	1887.
	\$	\$
Capital paid up	61,841,395	60,815,356
Circulation Deposits—	29, 200,627	30,438,152
Payable on demand	59,324,012	56,663,143
Payable after notice or on a fixed day	52,904,811	57,269,866
Held as security	762,940	550,180
Made by other banks	1,404,827	1,243,421
Due other banks or agencies	3,615,231	2,847,923
Other liabilities	335,232	400,945
Total liabilities	147,547,682	149,413,632
Assets.		
Specie and Dominion notes	18,110,224	15,595,515
Notes of and cheques on other banks	6.736,621	6,193,085
Due from agencies and other banks	19,815,650	19,039,532
Dominion debentures or stocks	4,733,312	3,133,842
Other Government securities	3.407,407	3,518,406
Loans to Dominion and Provincial Governments Loans or discounts for which collateral securities	3,039,099	3,548,960
are held	12,678,919	11,688,123
Loans to municipal or other corporations	15,503,366	16,615,734
Loans to or deposits made in other banks	757,511	415,166
Discounts	131,559,202	138,263,340
Debts overdue, not secured	1,431,307	1,166,334
Debts overdue, secured	1,735,492	1,623,795
Mortgages on real estate, and real estate held by the		
banks	2,148,913	2,020,109
Bank premises	3,511,964	3,570,955
Other assets	3, 253, 362	2,848,566
Total assets	228, 422, 353	229,241,464

The proportion of liabilities to assets was slightly larger in 1887, being 65.17 per cent. against 64.59 per cent. in 1886. The amount on deposit showed an increase of \$1,700,186, discounts an increase of \$6,704,138, almost identical with that of 1886 over 1885 which was \$6,704.976, and overdue debts a decrease of \$376,670.

Proportions of

638. The following statement shows the proportions of assets and the principal items of assets and liabilities to the total amounts in the years 1868, 1877 and 1887:—

## ASSETS AND LIABILITIES-PERCENTAGE OF PRINCIPAL ITEMS.

ITEMS.	1868.	1877.	1887.
Liabilities—	р. с.	р. с.	р. с.
Notes in circulation	18.99	19.22	20.37
Deposits	75.03	75.03	76.62
Specie and Dominion notes  Debts due to the banks	11.40	8.29	6.80
Debts due to the banks	70.26	77.31	75.60

Rate of interest.

639. The rate of interest allowed on deposit by the banks is at present in most cases 4 per cent.

Particu-

640. The next table gives the paid up capital, assets, liabilities, and other particulars of the various banks in operation in each year since Confederation, according to the returns made to the Government, as required by the Bank Acts:-

PARTICULARS OF BANKS IN CANADA, 1868-1887.

643. During the fiscal year 1886-87 the Maritime Bank suspended, and since the 30th of June, 1887, two banks, at that time making returns, have suspended, viz., the Bank of London and the Central Bank. In both cases the trouble was caused by culpable mismanagement, in the first case on the part of the president, and in the second on the part of the directorate and general manager.

Total amount

644. The total amount of money on deposit in 1886 in the ondeposit. Chartered Banks, Post Office and Government Savings Banks, Montreal and Quebec Savings Banks, and in the hands of Loan Companies, was \$179,477,121, equal to the sum of \$36.82 per head of population.

Dividends and prices of princi-pal stocks

645. The following table gives the share value, paid up capital, last six months' dividend, and highest and lowest quotations at Toronto in 1887, of the principal banks and loan companies in Canada. The prices quoted are taken from the statement published by the committee of the Toronto Stock Exchange: -

Business failures 1887.

646. The following is a statement of the business failures in Canada in 1887 by Provinces:-

	Number.	Liabilities.
Ontario	693	\$ 5,357,375
Quebec	390	4,085,926
Nova Scotia	120	716,860
New Brunswick	88	5,350,415
Manitoba	37	264,769
British Columbia	25	135,950
Prince Edward Island	13	162,600
Totals	1,366	\$16,070,595
		***************************************

Business

647. For the purposes of comparison the figures for the last five years are given below:-

	Number.	Liabilities.
1883	1,384	\$15,949,361
1884	1,327	19,191,306
1885	1,256	8,861,609
1886	1,252	10,386,884
1887	1,366	16,070,595
Average	1,317	\$14,091,951

Increase in amount due to failure of the Mari-

648. The amount of liabilities in 1887 was above the average for five years, and considerably above the figures of 1886, but this increase was almost entirely due to the failure of the Maritime Bank in New Brunswick, and of the large lumber firms dependent on it. The average number and amount of failures in New Brunswick during the previous four years was 59 and \$808,576 respectively, and if these figures are substituted in 1887, the result appears as 1,337 failures with liabilities \$11,528,756, showing that but for the exceptional failure, in New Brunswick, the year was a fairly prosperous one, the amount of liabilities being below the average of five years.

Failures

649. The number of failures in the United Kingdom in Kingdom. 1887 was 5,852, being the largest number since 1883.

Kingdom in 1883.

650. The system of Post Office Savings Banks was first Post Office established in the United Kingdom, and proved so success-objects ful that it has been almost universally adopted by other system. nations. The principal object of the system is to encourage the habit of saving among the working classes, by providing a place where they can deposit their surplus earnings at a fair rate of interest and with absolute security, no practical limit being made to the smallness of the deposit. This latter provision is one of the main features of the scheme, as the ordinary banks do not value this class of business, and in many cases will not receive deposits under a sum which would compel many people to hoard their money for a length of time, before they could save enough to place it in a position of safety.

651. The Post Office Act, which provided for the estab-Provisions lishment of this system in Canada, was passed on the 20th Post Office December, 1867, and was limited in operation as regards the Savings Banks, to the Provinces of Ontario and Quebec. Under its provisions a deposit must not be less than \$1 and must not exceed \$300 in any one year, neither must the total amount on deposit exceed \$1,000

652. Government Saving Banks, under the management Governof the Finance Department, have been established in the Savings Banks. Maritime Provinces and in Manitoba and British Columbia, in which banks deposits are allowed to the extent of \$1,000. The number of offices under this system is 50, viz., 29 in Nova Scotia, 14 in New Brunswick, 2 in Prince Edward Island, 1 in Ontario, 1 in Manitoba, and 8 in British Columbia. Arrangements are now being made for the transfer of the Government Savings Banks in the last mentioned Province to the Post Office Department.

653. The rate of interest paid in both classes of savings Rate of interest, banks is at present four per cent, but during the last session

of Parliament, a bill was passed enabling the Government to reduce this rate if it appeared that the condition of the country required it.

Progress of the Post Office system.

654. The Post Office system went into operation on the 1st April, 1868, when 81 offices were epened; at the close of the three months ended 30th June, 1868, there was 2,102 depositors, 3,247 deposits had been made, and the amount on deposit was \$204,559. On the 30th June, 1887, there were 415 offices open, 90,159 depositors, 143,076 deposits had been made during the year, and the total amount on deposit was \$19,497,750. Almost the whole of this enormous increase has taken place during the last eight years, the amount on deposit on 30th June, 1879, having been only \$3,105,190, the average annual increase since that date having been \$2,049,070 The average amount of each deposit received has considerably decreased, having been \$57.81, or \$2.71 cents less than in 1886. The average amount to the credit of each account was \$216.26.

Distribution of offices. 655. On the 1st September, 1885, the system was extended to the Provinces of Nova Scotia and New Brunswick, and the offices are distributed in the several provinces as follow: Ontario 306, Quebec 75, Nova Scotia 21, and New Brunswick 13

Depositors and deposits by Provinces.

656. The following table shows the number of depositors in each province, the amount on deposit, and the proportion of that amount per head of population, on 30th June, 1887:—

In the United Kingdom in 1885, the amount on deposit in Post Office Savings Banks averaged \$6.32 per head of population.

657. It is generally admitted that the amount on deposit signifiin the savings banks of the country is more or less an indication of the saving power of the people, and the increase in these deposits in Canada of late years has been years less deposits. in these deposits in Canada of late years has been very large. Mr. Giffen in his address before the British Association in September, 1887, the purport of which address was to show that in spite of the depression, England had made and was making material progress, said: "Another fact is the steady "increase of savings banks deposits and depositors. These "deposits are not, of course, the deposits of working classes "only, so called. They include the smaller class of trades-"men, and the lower middle classes generally. But "quantum valeant, the fact as to a growth of deposits and "depositors should reflect the condition of the country "generally, in much the same way as the returns of pauper-"ism." If then the figures for this country are taken, relating to post office saving banks alone, it is found that between 1870 and 1877 the number of depositors increased from 12,178 to 24,074, an increase of 97 per cent., and the deposits from \$1,588,848 to \$2,639,937, an increase of 66 per cent.; while between 1878 and 1887, the number of depositors increased from 25,535 to 90,159, an increase of 253 per cent., and the deposits from \$2,754,484 to \$19,497,750, an increase of 607 "Whatever special explanations there may be, "facts like these are at least not inconsistent with a fuller "employment of the population in the last ten years than "in the previous ten."

658. The balance of deposits is not now required, as for-Disposal of merly, to be invested in Canadian Government securities, but forms part of the unfunded debt of the Dominion.

Transactions of the Post Office and Government Savings Banks 1886 and 1887 and of loan companies 1886.;

## CHAPTER XIV.

#### INSURANCE.

#### PART I .- FIRE INSURANCE.

Fire Insurance companies in 1886,

660. During the year 1886 the business of fire insurance in Canada was carried on by 30 active Companies; of these 6 were Canadian, 19 British and 5 American. Inland Marine and Ocean Marine Insurance were also transacted by 5 of them (3 Canadian, 1 British and 1 American). This list of Companies differs from that of the previous year, by the addition of one American Company, viz., the Connecticut Fire Insurance Company of Hartford, Conn., and since the close of 1886 two additional British Companies, the Atlas Assurance Company and the Employer's Liability Assurance Corporation (Limited), have been licensed, the latter for the transaction of fire re-assurance and the former for the transaction of fire insurance generally.

Premiums received and losses paid 1886.

661. The cash received for premiums during the year, in Canada, amounted to \$4,982,335, being greater than that received in 1885, by \$79,875; and the amount paid for losses was \$3,301,388, exceeding that paid in 1885, by \$622,101, The ratio of losses paid to premiums received is shown in the following table:—

# FIRE INSURANCE IN CANADA, 1886.

79.141 26·89 3,429,012 68·59

103,381 66·16 78,389 63·75 23,321 33·03

124,597 55.41 65,923 43.59 395,613 56.59 665. The business done by the British fire companies done by resulted in a balance in their favour of \$287,216, being a British decrease of \$437,763 as compared with 1885, as shown by the following statement:—

Paid for lossesgeneral expenses	1885. \$1,912,873 819,596	\$2,347,433 \$72,595	
Received for premiums	\$2,732,469 3,407,453	\$3,220,028 3,457,244	
Balance in favour	\$ 674,984	\$ 237,216	

The business of the last 12 years, 1875 to 1886, has resulted in an excess of payments over receipts of \$17,305, but this adverse balance is due to the disastrous fire at St. John, 1877, where the losses paid by the British companies amounted to four and one-half millions. It appears certain that another year will see the balance reversed.

666. The Moving is a comparative statement of the By American combusiness done by American companies in 1885 and 1886:—panies.

Paid for lossesgeneral expenses	1885. \$209,693 86,206	1886. \$239,310 97,438
Total	\$295,899 396,683	\$336,748 427,844
Balance in favour	\$100,784	\$ 91,096

667. A similar comparative statement of the business done By Canadian companies is found below:—

By Canadian companies.

Paid for losses general expenses dividends	1885. \$1,985,257 917,879 99,896		1886. \$2,128,943 926,299 114,809

678. The increase in the total amount of insurance in Increase during the force in 1886 over 1885, and in 1887 over 1886 was very last three years. large, amounting to the sums of \$21,353,550 and \$20,364,156, respectively, as shown by the following figures:—

LIFE INSURANCE IN FORCE IN CANADA-1885, 1886 AND 1887.

Companies.	Insurance in Force.			
COMPANIES.	1885.	1886.	1887.	
Canadian	25,930,272	\$ 88,181,859 27,225,607	\$ 101,772,080 28,173,585	
American Total	49,440,735	55,908,230 171,315,696	61,734,187	

679. The Canadian companies' share of the increase in Canadian 1885 over 1884 was 55.63 per cent.; of ti + in 1886 over 1885, companies share of the file companies share of the 63.64 per cent.; and of that in 1387 over 1886, 66.73 per crease. cent.

680. The amounts at risk for both fire and life insurance Insurance are often used for the purpose of estimating the wealth and of estimaprogress of a nation, and the amount at risk for life insur-gressin wealth. ance may be more particularly used to indicate the progress made not only in wealth, but in what may be called surplus wealth. Fire insurance is to a large extent looked upon as a business expense, which must be incurred as necessarily as rent, salaries, &c., and which is therefore paid out of the gross receipts. But with life insurance, people far more generally insure in proportion to their ability to pay the premiums: not until after everything else is paid, and there is a surplus, is the question of life insurance considered. Life insurance therefore being generally paid out of surplus earnings of the people, the following figures indicate the very large increase in their premium paying power

during the last few years, and consequent improvement in their condition:—

Life insurance in Canada 1869-1887.

LIFE INSURANCE IN CANADA. AMOUNT AT RISK, 1869-1887.

ogress of the irteen years, effected from Average amount of policies in force 1886.

682. The average amount of policies in force in 1886 was \$1,741, as shown by the next table, this amount was larger than in either of the two preceding years, which was \$1,659 and \$1,663, respectively:—

AVERAGE AMOUNT OF POLICIES IN FORCE IN CANADA, 1886.

	Policies.			
Companies.	Number.	Amount.	Average Amount.	
CanadianBritishAmerican	52,601 13,454 31,927	\$ 88,148,577 27,225,607 55,257,463	\$ 1,676 2,024 1,731	
Total	97,982	170,631,647	1,741	

The average amount of the new policies was for Canadian companies, \$1,807; for British companies, \$2,192, and for American, \$2,167, the corresponding amounts for 1885 having been \$1,781, \$2,139, and \$1,955.

Decrease in insurance terminated. 683. There was a decrease of \$92,046 in the amount of insurance terminated naturally, *i. e.*, by death, maturity or expiration, in 1886 as compared with 1885, the amount last year having been \$2,165,655; and a decrease of \$253,820 in the amount terminated by surrender and lapse, the total amount so terminated having been \$11,942,792.

Death rate 1880-1886.

684. The death rate was very much lower than in 1885, and was below the average of the last seven years, as shown below:—

INSURANCE DEATH RATE IN CANADA, 1880 TO 1886.

Year ended 31st December,	Number of	Number of	Death Rate
	Lives at Risk.	Deaths.	per 1,000.

885	•2,157,448	803,980	1,723,012	4,684,409
886	•2,450,061	827,848	1,988,634	5,266,543
Total	*18,367,695	11,339,281	23,450,388	53,157,364

<sup>\*</sup>These include the premiums received for their foreign business by the Canada, Sun, and Dominion Safety Fund.

686. The total amount paid to policyholders during 1885 Payments to policy holders. and 1886, was :-

1885. 1886. . Death claims (including bonus additions).. \$1,707,353 \$1,744,268 Matured endowment " 269,001 226,024 Annuitants ..... 7,704 6,800 Paid for surrendered policies..... 213,438 174,631 Dividends to policynolders ... ...... 346,605 700,258 \$2,544,101 \$2,851,981

The amount received for premiums was \$5,266,543, therefore for every \$100 of premium, \$51.15 was paid to policy holders, and \$45.85 carried to expense, profits and reserve; in the preceding year the proportions were \$54.81 and \$45.69, respectively.

Average rate of premiums. 687. The average rate of premiums received for every \$100 of current risk was in 1885 \$3.23, and in 1886 \$3.22, and of claims paid \$1.87 and \$1.22.

Financial position of Canadian companies 1886.

688. The following tables give the condition of the Canadian companies in 1886, showing their assets and liabilities, income and expenditure:—

## CANADIAN LIFE COMPANIES, 1886.

### PART III.-ACCIDENT AND GUARANTEE INSURANCE.

693. Accident insurance business was transacted by seven Accident insurance. companies, viz., 3 Canadian, 3 British and 1 American, and guarantee business by two companies, one Canadian and one British. The business done in 1885 and 1886 was:-

Accident.	1885.	1886.
	\$	\$
Premiums received	145,502	165,384
Amount insured Paid for claims.	24,066,283 59,358	165,384 26,443,366 80,5 <b>3</b> 1.
GUARANTEE.		
Premiums received	62,718	60,820
Amount guaranteed Paid for claims	9,971,050 17,568	9,495,850
Paid for claims	17,568	19,684

694. Plate glass insurance was transacted by 3 companies, Plateglass insurance, insuranc British, Canadian and American, respectively. Two companies only made returns, according to which the premiums received during the year were \$15,252, the amount in force was \$94,691, and the losses incurred \$3,099. Two firms in Montreal transact this class of business, but work on the system of replacement, instead of paying the value of the glass broken, and their returns do not show the amount in force.

695. At the close of 1886 there were 80 companies under Number of the supervision of the Superintendent of Insurance, the companions of the Superintendent of Insurance, the companions of the supervision of the Superintendent of Insurance, the companions of the supervision of the same number as in the preceding year. They were engaged kinds in business as follow:-

1701118			plan	-
44				3
44	inland marine	nsurance		
4.4	ocean marine	44		
4.4	accident	24		
44	guarantee	"		
44	steam boiler	"		
46	plate glass	46		

Deposits with Government.

696. The total amount of deposits held by the Receiver-General, for the protection of policyholders, amounted on 8th July, 1886, to the sum of \$12,007,086.

Total receipts of all kinds 1885 and 1885.

697. The total amounts received for all forms of insurance in 1885 and 1886 were:—

YEAR.	Companies.				
IEAR.	Canadian.	British.	American.	Total.	
1505	\$ 2707.200	\$	\$	\$

690. Hoop iron, not exceeding three-eighths of an inch in width, and being No. 25 gauge or thinner, used for the manufacture of tubular rivets;

691. Horn strips, when to be used in making corsets;

692. Horses, cattle, sheep and swine, for the improvement of stock, under regulations made by the Treasury Board and approved by the Governor in Council:

693. Hoofs, horns and horn tips;

694. Hyoscyamus, or henbane leaf;

695. Ice;

696. India rubber, unmanufactured;

697. India hemp (crude drug);

698. Indigo;

699. Indigo auxiliary;

700. Indigo, paste and extract of;

701. Iodine, crude;

702. Iris, orris root;

703. Iron or steel rolled round wire rods under half an inch in diameter, when imported by wire manufacturers for use in their factories (1887);

704. Iron or steel beams, sheets, plates, angles and knees for iron or composite ships or vessels;

705. Iron liquor, solution of acetate of iron for dyeing and calico printing;

706. Istle or tampico fibre;

707. Ivory and ivory nuts, unmanufactured;

708. Iron masts for ships, or parts of;

709. Jalap, root;

710. Junk, old;

711. Jute, butts;

712. Jute;

713. Jute cloth, as taken from the loom, neither pressed, mangled, calendered, nor in any way finished, and not less than forty inches wide, when imported by manufacturers of jute bags for use in their own factories;

714. Jute yarn, plain, dyed or coloured, when imported by manufacturers of carpets, rugs and mats, for use in their own factories;

715. Kainite, or German potash salts for fertilizers;

716. Kelp;

717. Kryolite;

- 718. Lac-dye, crude, seed, button, stick and shell;
- 719. Lava, unmanufactured;
- 720. Leeches:
- 721. Liquorice root:
- 722. Litharge;
- 723. Litmus and all lichens, prepared and not prepared;
- 724. Lemons, and rinds of, in brine for candying;
- 725. Logs, and round unmanufactured timber, not elsewhere provided for;
- 726. Lumber and timber, plank and boards, sawn, of boxwood, cherry, walnut, chesnut, gumwood, mahogany, pitch pine, rosewood, sandalwood, Spanish cedar, oak, hickory and whitewood, not shaped, planed, or otherwise manufactured, and sawdust of the same, and hickory lumber, sawn to shape for spokes of wheels but not further manufactured:
- 727. Locomotives and railway passenger, baggage and freight cars, being the property of railway companies in the United States, running upon any line of road crossing the frontier, so long as Canadian locomotives and cars are admitted free under similar circumstances in the United States, under regulations prescribed by the Minister of Customs;
- 728. Locomotive tires of steel in the rough (1887);
- 729. Locust beans, for the manufacture of horse and cattle food;
- 730. Madder and munjeet, or Indian madder, ground or prepared, and all extracts of ;
- 731. Manganese, oxide of;
- 732. Manilla grass;
- 733. Manuscripts:
- 734. Meerschaum, crude or raw;
- 735. Mineral waters, natural, not in bottle—under regulations made by the Minister of Customs;
- 736. Mineralogy, specimens of;
- 737. Models of inventions and other improvements in the arts; but no article or articles shall be deemed a model of improvement which can be fitted for use;
- 738. Moss, Iceland, and other mosses, crude;
- 739. Moss, seaweed, and all other vegetable substances used for beds and mattresses, in their natural state, or only cleaned;
- 740. Menageries—horses, cattle, carriages, and harness of, under regulations prescribed by the Minister of Customs;
- 741. Musk, in pods or in grains :
- 742. Nitrate of soda, or cubic nitre;
- 743. Nut galls ;
- 744. Newspapers, and quarterly, monthly and semi-monthly magazines, and weekly literary papers, unbound;
- 745. Nickel;
- 746. Oak bark ;
- 747. Oakum:
- 748. Oil cake, cotton seed cake and meal, palm nut cake and meal;

e provided for; rood, cherry, walvood, sandalwood, shaped, planed, or ame, and hickory

ght cars, being the running upon any adian locomotives aces in the United r of Customs;

ot further manu-

food; epared, and all ex-

tions made by the

ts; but no article pent which can be

used for beds and

under regulations

hly magazines, and

nd meal ;

749. Oil cake meal;

750. Oils, cocoanut and palm, in their natural state;

751. Oranges and rinds of, in brine, for candying;

752. Ores of metals of all kinds;

753. Ottar of roses;

754. Osiers;

755. Oxalic acid;

756. Paintings, in oil or water colours, by artists of well-known merit, or copies of the old masters by such artists;

757. Paintings in oil or water colours, the production of Canadian artists, under regulations to be made by the Minister of Customs;

758. Palm leaf, unmanufactured;

759. Pearl, mother of, not manufactured;

760. Persis, or extract of archill and cudbear;

761. Philosophical Instruments and apparatus,—that is to say, such as are not manufactured in the Dominion, when imported by and for use in universities, colleges, schools and scientific societies;

762. Pictorial illustrations of insects, &c., when imported by and for the use of colleges and schools, scientific and literary societies;

763. Phosphorus;

764. Pelts ;

765. Pipe clay ;

766. Pitch (pine), in packages of not less than fifteen gallons each;

767. Platinum wire;

768. Plaits, straw, Tuscan and grass;

769. Potash, German mineral;

770. Potash, muriate and bichromate of, crude;

771. Precipitate of copper, crude ;

772. Pumice and pumice stone, ground or unground;

773. Quercitron, or extract of oak bark, for tanning;

774. Quicksilver;

775. Quills in their natural state or unplumed (1887) :

776. Quinine, sulphate of, in powder:

777. Rags, of cotton, linen, jute and hemp, paper waste or clippings and waste of any kind, fit only for manufacture of paper;

778. Rattans and reeds, unmanufactured;

779. Recovered rubber and rubber substitute;

780. Red liquor, a crude acetate of aluminium prepared from pyroligneous acid, for dyeing and calico printing;

781. Redwood planks and boards, sawn, but not further manufactured (1887);

782. Rennet, raw or prepared;

783. Resin, in packages of not less than fifteen gallons each;

784. Rhubarb root :

785. Rolled rods of steel under half an inch in diameter or under half an inch square, when imported by knob or lock manufacturers or cutlers for use exclusively in such manufactures in their own factories (1887);

786. Roots, medicinal, viz.:—aconite, calumba, ipecacuanha, sarsaparilla, squills, taraxacum, valerian;

- 787. Rubber, hard, crude, in sheets, plain or moulded;
- 788. Salt cake, being a sulphate of soda, when imported by manufacturers of glass and soap for their own use in their works;
- 789. Salt, imported from the United Kingdom or any British possession or imported for the use of the sea or gulf fisheries, not otherwise provided for:
- 790. Saffron and safflower, and extract of;
- 791. Saffron cake :
- 792. Sal ammoniac:
- 793. Sal soda;
- 794. Sand;
- 795. Sausage skins or casings, not cleaned;
- 796. Scrap Iron and scrap steel, old and fit only to be re-manufactured, being part of or recovered from any vessel wrecked in waters subject to the jurisdiction of Canada (1887);
- 797. Sea-weed, not elsewhere specified;
- 798. Sea-grass;
- 799. Seeds, anise, coriander, cardamon, fennel and fenugreek;
- 800. Senna, in leaves:
- 801. Silex, or crystalized quartz;
- 802. Silk, raw, or as reeled from the cocoon, not being doubled, twisted or advanced in manufacture in any way, silk cocoons and silk waste;
- 803. Silver and German silver, in sheets, for manufacturing purposes;
- 804. Skins, undressed, dried, salted or pickled;
- 805. Soda ash;
- 806. Soda caustic;
- 807. Soda, silicate of;
- 808. Sodium, sulphide of;
- 809. Settlers' effects, viz.:—Wearing apparel, household furniture, professional books, implements and tools of trade, occupation or employment, which the settler has had in actual use for at least six months before removal to Canada, musical instruments, domestic sewing machines, live stock, carts and other vehicles and agricultural implements in use by the settler for at least one year before his removal to Canada, not to include machinery, or articles imported for use in any manufacturing establishment, or for sale; provided that any dutiable articles entered as settler's effects may not be so entered unless brought with the settler on his first arrival, and shall not be sold or otherwise disposed of without payment of duty, until after two years' actual use in Canada; provided also, that under regulations made by the Minister of Customs, live stock, when imported into Manitoba or the North-West Territories by intending settlers, shall be free, until otherwise ordered by the Governor in Council;
- 810. Steel, in sheets of not less than eleven nor over eighteen wire gauge, and costing not less than seventy-five dollars per ton of two thousand two hundred and forty pounds, when imported by manufacturers of shovels and spades for use exclusively in such manufacture in their own factories;

manufacturers of

811. Steel of number twenty gauge and thinner, but not thinner than number thirty gauge, to be used in the manufacture of corset steels, clock springs and shoe shanks, when imported by the manufacturers of such articles for use in their factories;

812. Steel rails, weighing not less than twenty-five pounds per lineal yard, for use in railway tracks (1887);

813. Steel valued at two and one-half cents per pound and upwards for use in the manufacture of skates (1887);

814. Steel bowls for cream separators (1887);

815. Steel for the manufacture of files, when imported by file manufacturers for use in their factories (1887);

816. Steel for saws and straw cutters, cut to shape, but not further manufactured;

817. Spelter, in blocks and pigs;

818. Spurs and stilts, used in the manufacture of earthenware;

819. Sulphate of iron (copperas);

820. Sulphur, in roll or flour;

821. Tails, undressed;

822 Tagging metal, plain, japanned or coated, in coils not over one and a-half inches in width, when imported by manufacturers of shoe and corset laces for use in their factories;

823. Tampico, white and black;

824. Tanners' bark;

825. Tar (pine), in packages of not less than fifteen gallons each:

820. Tea, except as hereinbefore provided;

827. Terra Japonica;

828. Teasels:

829. Tin, in blocks, pigs, bars and sheets, and plates and tin foil;

830. Tobacco, unmanufactured, for excise purposes, under conditions of "The Act respecting the Inland Revenue;"

831. Tortoise and other shells, unmanufactured;

832. Travellers' baggage, under regulations prescribed by the Minister of Customs;

833. Trees, forest, when imported into the Province of Manitoba or the North-West Territories for planting:

834. Tree-nails:

835. Turmeric;

836. Turpentine, raw or crude;

837. Turtles;

838. Ultra marine blue, in pulp;

839. Vaccine and ivory vaccine points;

840. Varnish, black and bright, for ships use;

841. Vitriol, blue;

842. Veneers of ivory, sawn only (1887);

843. Verdigris, or sub-acetate of copper, dry;

814. Vegetable fibres, natural, not produced by any mechanical process;

845. White shellac, for manufacturing purposes;

846.	Whiting	or w	hiten	ing:

- 847. Whalebone, unmanufactured;
- 848. Willow for basket makers:
- 849. Wire of brass or copper, round or flat;
- 850. Wire of iron or steel, galvanized or tinned, number sixteen gauge or smaller (1887);
- 851. Wire rigging for ships and vessels;
- 852. Wood for fuel, when imported into Manitoba and the North-West Territories:
- 853. Woods, not further manufactured than sawn or split, viz.:—African teak, black heart ebony, lignum vite, red cedar and satin wood
- 854. Wool, unmanufactured, hair of the alpaca, goat and other like anin e not elsewhere specified;
- 855, Yellow metal, in bolts, bars, and for sheathing;
- 856. Zinc, in blocks, pigs and sheets. 42 V., c. 15, Schedules B and C;—43 V., c. 18, s. 2;—44 V., c. 10, s. 3;—45 V., c. 6, s. 5;—46 V., c. 13, s. 1;—47 V., c. 30, s. 1;—48-49 V., c. 61, s. 1; 49 V., c. 37, s. 2

The following articles are prohibited to be imported under a penalty of two hundred dollars, together with the forfeiture of the parcel or package of goods a which the same are found, viz.:—

- 857. Books, printed paper, drawings, paintings, prints, photographs or representations of any kind of a treasonable or seditious, or of an immoral or indecent character:
- 858. Reprints of Canadian copyright works, and reprints of British copyright works which have been also copyrighted in Canada:
