

SAYS SAUNDERS NUISANCE IS GIVING TROUBLE

D. W. Clinch Explores Great Game Territory at Head of Miramichi

SEES MUCH SAWDUST

Complaints Have Been Made, He Says, But No Action Has Been Taken—Nets Being Used Also, He Says—G. T. P. To Open Up Fine Section.

Tuesday, June 27. D. W. Clinch, secretary of the Provincial Guides' Association, returned to the city last evening from Bristol (N. B.), after an inspection trip to the head waters of the Miramichi river. He went to the forks of the river and with Murdoch MacKenzie, the president of the Guides' Association, poled a dug-out canoe up the north branch and Redell brook to its source. It was the first time he had visited this section of the country and he was much delighted with the possibilities for sport. He learned that two salmon weighing ten pounds each, and many sea trout of four pounds weight had been caught there recently. This place, he said, had been little explored by sportsmen and he held there is practically virgin. When the G. T. P. begins to open up the river, the north branch of the Miramichi about three miles above the forks.

Mr. Clinch said he saw abundant signs of game and that last year what few parties did go there had shots at moose, and two parties got ten and eleven salmon for each person last summer. He found considerable agitation over the extensive netting of fish at the mouth of the river. It prevents the fish from going up and in his opinion should be outlawed. Through the efforts of Murdoch MacKenzie, the marine and fisheries department of the federal government has agreed to stock the head waters of the river with salmon fry, a move which will meet with the commendation of all sportsmen, and many others.

Mr. Clinch found that the old trouble with sawdust has not been altogether stamped out yet. He said that yesterday morning he saw on the south branch of the river just above the forks, quantities of it. Complaints have been made, he said, but no action has been taken.

NEW BRUNSWICKER BADLY CRUSHED DIES IN LOWELL, MASS.

John N. Pendergrass Well Known in This Province Where Several Rela- tives Live—How Accident Occurred.

A Lowell (Mass.) paper of Tuesday, June 27, has the following:
"John N. Pendergrass died at the Lowell hospital Sunday morning after a long illness on June 16 at the stable of Friend Brothers' bakery, corner of Chestnut and Westford streets. The death is a particularly distressing one. Deceased was thirty-eight years of age.

Mr. Pendergrass was a janitor and spare driver of horse drawn vehicles for the Friend company. He had been employed there for about six years and was a remarkably faithful and painstaking workman.

On June 15, having returned from the circus grounds, where he had been to pick up empty boxes, he went to the place where the electric automobile delivery wagons are kept and found a small boy on the seat of one of them. The boy in question was busy with various of the levers and started the machine. Mr. Pendergrass reached to take him from the seat and in doing so the machine started in front of an eight-inch beam at the time and the machine crashed squarely against him. Notwithstanding the intense pain he was suffering he reached over and operated the lever, stopping the machine.

"Workers in the bakery went to the scene at once and found Mr. Pendergrass frightfully mangled about the abdomen. He was taken at once to the Lowell hospital, where it was found that one hip and the pelvic bone were broken badly. There were other internal injuries, of so serious a nature that little hope was given for his ultimate recovery. The end came during Sunday night.

FUNERAL OF DR. L. H. MORSE LARGELY ATTENDED

Digby, N. S., June 29.—(Special)—The funeral of the late Dr. Louis H. Morse, which was one of the largest ever seen by Digby, took place from the Baptist church this afternoon with interment in the Baptist cemetery. The services were conducted at the church by Rev. Thos. S. Brown, pastor of the Baptist church, assisted by Rev. A. J. Archibald, of St. John, a former pastor here, and Rev. G. W. Schurman, pastor of the Bear River Baptist church, all three being intimate friends of the deceased.

The service at the grave was conducted by Rev. Mr. Roy and the officers and members of King's Chapel Lodge, many brother Masons being present from other lodges.

COUNTRY SWELTERS IN TERRIFIC HEAT

Temperature 103 in Toronto

Hospitals Busy With Prostrations and Sunstrokes

Thermometer Reached 102 in Boston, and New York, Philadelphia and Other Towns Experience Record Weather.

Special to The Telegraph. Toronto, July 3.—The worst is over. Every hour saw the thermometer steadily climbing until between 3 o'clock this afternoon the weather office reported 103, which is five degrees higher than yesterday's top level. At 8 o'clock the meteorological man gave out the glad news that the temperature had fallen to 102.

Until yesterday the temperature never reached 100 in the history of Toronto. The 24th of August, 1884, was the hottest day previous to this summer. At that time it was 99.3 degrees. On July 17, 1886, it was 96.6; July 1, 1872, 98; July 10, 1887, 97.3; September 2, 1888, 97.1; August 6, 1892, 99; July 27, 1891, 97.1.

It is therefore ten years ago since the temperature was above 97 degrees. This afternoon it was six degrees above that point, but the weather man said we are now on the down grade.

The police and hospitals report an exceptionally large number of sunstrokes and prostrations today, far more than yesterday. In many cases the patients are delirious and cannot tell their names or any particulars. The weather man tonight says a thunder storm and cooler weather is coming.

St. Catherine's People Quit Work

St. Catherine's, Ont., July 3.—All the manufacturing departments different factories, closed down this morning owing to the hot sun. Yesterday today was the worst in the history of this section. The thermometer's highest record yesterday was 99 in the shade. The churches were practically deserted last night. Today business is at a standstill.

Many Deaths in New York

New York, July 3.—The siege of oppressive hot weather continues throughout New York state.

To the maximum of 94.5 degrees, which the heat was officially recorded yesterday, there and a half degrees were added by today's maximum of 98, recorded at noon. To the list of ten lives which succumbed here in yesterday's torrid tide, as many more were added today. The government meteorologists officially reported sun upwards of a score. In Herald square the bulb registered 105, while the glass on the World building marked 110.

Updated points reported similar woes: At the Cornell weather station in Ithaca, a temperature of 101 degrees, the highest since the station was established thirty years ago, was officially reported. At 3 o'clock the thermometer in New York city registered 98, warning the tenement dwellers to seek early, if they would find cooler lodging in the crowded parks and open spaces of the east side district.

From the thirty-story tower of the weather bureau there was still no relief in sight tonight for tomorrow. "Fair and continued warm," was the early forecast, but whether it would be worse for the holiday the officials would not venture to predict.

Record Heat at Newark

Newark, N. J., July 3.—Today was four degrees hotter than any other recorded here since the weather bureau was established. The official thermometer stood at 103 at 3 p. m., while bulbs on the street registered 111 degrees. Eight deaths and scores of prostrations were reported to-night.

Pittsburg Mills Shut Down

Pittsburg, July 3.—The thermometer was going up all day starting at 4 a. m. when it was 73 and touching the high point of 97 at 3 p. m. Many prostrations and deaths are reported, the list of decaying in particular being a very long one. Many of the mills are beginning to shut down on account of the danger of the iron workers collapsing in the unbearable heat.

104 at Cleveland.

Cleveland, Ohio, July 3.—The heat record for the summer was broken today when between 5 and 6 o'clock this afternoon the maximum weather bureau temperature on high building was 94, while in the Kiosk in the public square a temperature of 106 was registered. A number of prostrations were reported.

KING GEORGE'S CORONATION

The King and Queen on their progress through London on June 22. This picture was taken for the Square, and is one of the five real coronation pictures to reach here.

NAVAL PRIZE BILL PASSES SECOND STAGE IN COMMONS

Sir Edward Grey Declares if Britain Were at War With Continental Power Uncle Sam Would Furnish Food Supply.

London, July 3.—The naval prize bill, which is tantamount to approval of the declaration of London, the international agreement covering prizes in naval warfare, passed its second reading in the house of commons today. An amendment introduced by John G. Butler, Unionist member for York, to defer consideration of the bill until reported on by a committee of experts, was defeated after a prolonged debate by a vote of 201 to 231. The bill passed without division.

The feature of the debate was Sir Edward Grey's speech in support of the bill in which he referred to the attitude of the United States. He argued that as that country holds the view that "under restricted conditions sinking should be allowed, it would be useless to attempt to bring in a law abolishing it."

He contended that in case England was at war with a great continental power, the great neutral power whose interference would be useful was the United States, which was greatly interested in supplying food to this country and was possessed of a fleet of sufficient strength to make interference effective.

"The United States," he insisted, "would never have signed the declaration of London if they believed in time their commerce would be interfered with."

"The United States," said Sir Edward, "have been no reluctant party to signing the declaration of London and the prize court convention. They have thereby taken a deep interest in promoting the establishment of an international prize court and in their view acceptance of the declaration of London is essential to the establishment of a successful working of the international prize court."

"The belief that the United States government regards the policy of a prize court convention and the declaration of London with indifference is a very dangerous misapprehension which it would remove if we were at war with a continental power. That continental power, knowing perfectly well the risk and desiring to avoid the danger of any friction with the United States, the great maritime neutral power interested in our food supply, would in all likelihood prefer to accept the rules of the declaration of London and be prepared to refer to arbitration any question which arises with regard to it."

NEWCASTLE BOY BATHER DROWNED

Eleven-year-old Harry Jones the Victim—Man Stunned by Lightning in Bank of Nova Scotia.

Special to The Telegraph. Newcastle, N. B., July 3.—The eldest son of Harry Jones, aged eleven, was drowned about 6 o'clock this afternoon while bathing in Swift water, a little below Ritchie's mill. The body has not yet been recovered.

A terrific thunder storm and furious downpour of rain with some hail occurred this afternoon. The chimney of the McEvoy Hotel was struck but no damage done. A gentleman in the Bank of Nova Scotia, talking with the manager, was struck but only stunned for a few seconds, and he soon recovered.

WILL THIS AFFECT THE PRICE OF COAL?

Commerce Commission Re- duction of Freight Rates from Pennsylvania to Tide Water.

Washington, July 3.—The Interstate Commerce Commission today ordered reductions in rates on anthracite coal from the Wyoming region in Pennsylvania to Perth Amboy (N. J.), 440 water-averaging approximately eleven cents per ton. Reproduction for a period covering ten years and amounting to several hundred thousand dollars was awarded by the commission against the Lehigh Valley Railroad.

LIGHTNING DAMAGES MONCTON RESIDENCE

Moncton, July 3.—(Special)—This was another oppressively hot day. This evening about 9 o'clock a heavy electrical storm passed over the city and considerable rain fell. Some damage was done to wires and a house on Waterloo street, owned by John W. Rose, was struck. Part of the roof was torn off and the electric bolt entered the house, tearing off the plaster in one of the rooms, but fortunately doing no other damage. The storm had the effect of cooling the air considerably.

OTTAWA COCAINE FIEND THREATENED TO KILL FATHER

Craved-Man Attempted Life of Officer Who Arrested Him—Had Supply of Morphine in His Pocket.

Ottawa, July 3.—Joseph Berthiaume was arrested at his father's home on Lake street, Hull, this morning by Constable Daoust and brought to the jail charged with threatening his father with an axe. Berthiaume, who is a cocaine fiend, has been using the dope rather strongly of late with the result that his mind was unbalanced.

When Constable Daoust went to the house this morning he was greeted with a beer bottle flying past his head. Berthiaume then locked himself in the bedroom, and threatened to kill any person who tried to arrest him. The constable kicked in the door and jumped back just in time to miss being struck with a crowbar that the crazed man had in his hand. The constable then jumped on his back and slipped on the handspring.

DONATES \$50,000 TO QUEEN'S UNIVERSITY

Dr. Douglas, of New York, Keeps Promise of Gift When Institution Was Freed of Church Control.

Toronto, July 3.—Queen's University, Kingston, has received from Dr. James Douglas, of New York, a check for \$50,000 for the endowment of the chair of Colonial history of which William L. Grant, son of the late Principal Grant, is the first professor.

TORONTO CHILD LIKELY FATALLY BURNED

Toronto, July 3.—(Special)—While playing with matches at her home, 948 Concord Ave., Rose Levy, a little girl about five years old, set fire to her clothing and was badly burned all over her back and her hair was practically burned off. It is feared she may not recover.

CATHEDRAL BURNED AT FREDERICTON

WAITED IN VAIN FOR BRIDE-ELECT

Lady Constance Foljambe Changed Her Mind at the Last Minute

WAS TO WED MINISTER

Fashionable London Audience and Groom to be Lingered in Church an Hour, But the Fickle One Had Taken a Train Out of Town.

Canadian Press. London, July 3.—Lady Constance Foljambe, a half-sister of the Earl of Liverpool, controller of the King's household, abandoned society by failing to appear at a fashionable church in London, at the time appointed for her marriage to Rev. A. H. Hawkins.

The edifice was filled with society people, who waited an hour wondering what the message Lady Constance had simply changed her mind and decided that she did not wish to be married.

NINE PERSONS DROWNED IN NEW ENGLAND SUNDAY

Boston, July 3.—Nine drowned yesterday among the many in New England who sought relief from the heat by a plunge in ocean, lake or river. There were four deaths due to upset of boats or canoes. One bather was rescued during an attack of heart disease only to die ashore.

Charles Lovett, of Beverly, was drowned at Beverly Beach. He was seized with cramps 300 feet off shore.

William Smith, of Ware, lost his life in view of a score of others at Palmer. They thought he was doing stunts. Alfred Lafreniere, of Springfield, attempted to swim the Connecticut river. A deaf mute who was his companion, failed to hear his cries. He was seized with cramps 300 feet off shore.

TO HUNT BRITISH COLUMBIA BEARS WITH BOWS AND ARROWS

Atchison Kans., July 3.—James M. Charles and E. Z. Jackson, attorneys and amateur archers of this city, left today for British Columbia where they intend to hunt bears with bows and arrows. At Victoria (B. C.), they will be joined by Will H. Thompson, a Seattle attorney, and Harry Richardson, of Boston, champion archer of the United States.

CANADA'S DRINK AND TOBACCO BILLS GROW

Ottawa, July 3.—During last year, according to government figures, the people of Canada drank an average of 8.29 gallons of spirits per head, 2.42 gallons of beer and 1.04 of wine, and smoked 3,011 pounds of tobacco. This is a considerable increase over the returns for the previous year.

Struck by Lightning Monday Night

Only Charred Remains of Walls Left Standing

Crash Came Near Midnight During Terrific Thunder Storm—Little is Left of Structure, Which Cost More Than £30,000—The Flames Seen First by Men on Tugboat.

Special to The Telegraph. Fredericton, N. B., July 4.—In the worst electrical storm that ever swept this part of the province, the Church of England Cathedral, one of the finest church buildings in eastern Canada, was struck by lightning tonight and totally destroyed by the fire which followed. Not a thing was saved of the handsome decorations in the interior of the church. To make matters worse the firemen and those who turned out to assist were practically helpless, for the storm in some way had not only disabled the fire alarm system, causing a delay in the arrival of the department, but in some way had interfered seriously with the water pressure. The crash came half an hour before midnight and at 2 o'clock this morning nothing was left of the once magnificent building but the charred remains of the four walls.

The storm which swept Fredericton during the evening seemed to come in three distinct squalls. Rain fell in torrents, the thunder was deafening and the lightning blazed forth with abounding vividness. Many of the people were terrified and, although few could venture out on account of the darkness of the storm, it seemed certain that the remains of the building in the town would suffer. The storm began about 9 o'clock, and soon after there came a severe squall, during which the lightning was sharpest. It was then that the cathedral was destroyed.

The first to notice the flames were some men on a tug boat passing up the river near the railway bridge. They blew the tug's whistle for several minutes. This attracted some attention and when it was followed by the clanging of the loud toned bell in the tower of St. Dunstan's church, everyone in the town knew that something serious had occurred. By this time there was a recurrence of the storm, but it was not so severe and from all parts of the city people hurried to the scene of the fire. The flames were eating their way into the walls of the structure, and it was soon seen that nothing could be done to save the building. There was no danger of the fire spreading as the cathedral stood in a plot of ground by itself some distance from the river bank.

Was Costly Structure.

The church was built in Bishop Medley's time, about sixty years ago, at a cost of more than thirty thousand pounds sterling. It was built of stone, and a great deal of new hardware was used in finishing the interior. This material was brought from the old country. The church was famous for its magnificent fixtures and altogether was considered one of the finest church buildings in the maritime provinces. Only last year a new organ was installed at a cost of several thousand dollars.

Another Account.

Fredericton, N. B., July 4.—(Special)—Christ Church Cathedral, the diocesan church of New Brunswick and Fredericton was gutted by fire early this morning and damaged to an estimated amount of \$75,000. A later estimate may alter the figure, but the damage in any event will be severe. The steeple of the church fell and the interior is seriously damaged and the interior is practically destroyed.

The magnificent organ is damaged to an unknown extent, and the stained glass windows on the sides of the building were broken. The large windows at the eastern and western ends of the edifice escaped serious injury.

The chimneys and clock in the tower were completely destroyed.

The fire was caused by lightning and started in the western end of the church. The flames obtained tremendous headway before being observed. The fire spread along the inside of the roof and shot up the tower as though through a miniature fire.

The lightning was accompanied by a severe storm which passed over the city tonight. The fire alarm system was made useless and the citizens were made aware of the fire only by the glare of the flames, which lit up the country for miles.

The firemen had a hard fight and put the fire out only after three hours work. The fire broke out about midnight.

Christ Church Cathedral was consecrated in 1853 and is a monument to the late Bishop Medley the late metropolitan of Canada, who began the erection of the edifice in 1846 on coming to the diocese. The church was one of the handiwork in the maritime provinces. Its valuation was upwards of \$200,000. The insurance was in the neighborhood of \$75,000.

FORMAL LOWER THE MARRIAGE PRELIMINARIES

Saturday, July 1. This week weddings have been the all absorbing topic. Those which took place in the city and adjoining counties were interesting from a social point of view and to relatives, friends and acquaintances at large.

Notable among the fashionable June weddings was that which took place in the Grand main street church at 4 o'clock Wednesday afternoon when Miss Annie Alexander, daughter of Mr. and Mrs. W. Hagen Barnaby, Princess street, and Mr. Thomas Edwin Edgar, manager of the John for the Canada Fairbanks Company, were married by the Rev. F. S. Porter, pastor of the church, in the presence of a large number of invited guests and other friends, in the body of the church.

The High school closings at St. Vincent's and at the High school on Union street were attractive. On Thursday Frederick Manning was the valedictorian at the High school on Thursday morning. At St. Vincent's this year the valedictory address was omitted, a farewell address taking its place. On Thursday evening the association of the High school and St. Vincent's Alumnae association an informal dance was enjoyed.

Mr. Francis Walker, son of Dr. Thomas Walker, Prince street, resided at the hotel last Tuesday the degree of Doctor of Philosophy. Dr. Walker and son Francis are on their way to spend a holiday in England.

Mr. George F. Smith, and Norman Guthrie and children, arrived in the city last Saturday from Ottawa. Mrs. Harry Drury is the guest of her son, Leonard Tilley, Rothsey. Mrs. Tilley entertained at the club house on Monday in her home Wednesday of this week.

Mr. James F. Robertson was hostess at tea on Tuesday at his handsome residence at Rothsey. Mrs. Lucien deBury and little daughter, guests of Mr. George Keating, King street. Mrs. Miller and daughter, Miss Elizabeth Miller, passed through St. John on Tuesday on their way to the coast.

Other weddings of interest to friends in St. John were that of Miss Edith Cleveland Carter, only daughter of Dr. W. S. Carter, chief superintendent of education, and Mr. Wilfred Hanbury, of Brandon (Man.), son of Mr. John Hanbury, of Vancouver (B. C.), which took place in the Cathedral on Wednesday, June 28. On the same day at Newcastle the marriage was celebrated of Miss Bessie Ferguson, eldest daughter of Mr. and Mrs. Ferguson, of

HAMPTON

Hampton, N. B., June 27.—Capt. L. A. Peters, St. John, spent the weekend as the guest of his sister, Mrs. N. E. Peters. Mr. Wm. J. Brown, Mrs. Brown, Miss White and Miss Wilson, St. John, drove to Hampton in an automobile on Sunday and took tea with Mr. and Mrs. George Brown.

Mr. Gordon Flewelling, St. John, spent the weekend with relatives here. Mr. J. Edgar March, of Fredericton, was the guest of his uncle, Mr. J. A. March, from Saturday to Monday.

Mr. Richard Dole, of the Bank of New Brunswick at Fredericton, has been promoted to the management of the bank at Halifax (N. S.).

Mr. Warren Winslow, Chatham, is a guest of Mrs. Appleby, West End (opposite the Catholic church) for the month of July and August.

Mr. Francis Travers is the guest of Mrs. Manning Doherty, in the city. Mr. Doherty is occupying Lady Tilley's cottage.

Mr. Ronald McAvity and Miss Ena MacLaren are weekend guests of Mr. and Mrs. Charles Coster at Woodman's.

Mr. Douglas Adams has returned to Toronto. Yesterday afternoon there was a large turnout to witness the military inspection of men and horses of D Squadron, 8th Hussars, by O. C. Major A. J. Markham.

Mr. West's many friends were sorry to hear that he had sprained his ankle on Tuesday. Mr. and Mrs. Royden Thomson, and family are expected from the city on Friday to spend the summer here.

Miss Blanche, of Ottawa, is here, guest of Mr. and Mrs. Fairweather and others. Miss Walter Treuman and little son, Master Kenneth, are spending a few days with friends in St. John.

Mr. Richard Desmond and Helen Hitchcock have returned to Hampton Village after spending a period in the west. The Hampton base ball team is to play the thirty-first game in the Kings County League with the St. George's team.

Mr. and Mrs. Percy Rising have returned home from their wedding tour. Rev. C. F. Wiggins, of Sackville, was the guest of Rev. Mr. Converse last week.

Mr. Morton Smith and daughter left for England this week. Mrs. Frederick Everett, of Fredericton, was the guest of Mrs. Ranney Murray last week.

Mr. and Mrs. George Robertson, who have returned from their wedding tour, are at Anderson. Mr. John Harper is the guest of Mrs. George Murray, Pitt street.

DORCHESTER

Dorchester, June 28.—Miss Doris McGrath returned last week from Halifax, where she had been a student at the convent. Mrs. Donald Frieman and two children, of Campbellton, are in town, the guests of Mrs. J. T. Dickie.

Mr. G. A. Powell returned from Boston on Tuesday. Mr. Shenton and Mrs. L. A. McAlpine left on Tuesday to visit friends in Moncton.

Mr. and Mrs. C. H. Eason, Mr. and Mrs. Simon Jones, of the Harrison, and Mr. Alexander McMillan left on Thursday on a fishing trip to the Nepisiguit.

Mr. Richard Dole, of the Bank of New Brunswick at Fredericton, has been promoted to the management of the bank at Halifax (N. S.).

Mr. Warren Winslow, Chatham, is a guest of Mrs. Appleby, West End (opposite the Catholic church) for the month of July and August.

Mr. Francis Travers is the guest of Mrs. Manning Doherty, in the city. Mr. Doherty is occupying Lady Tilley's cottage.

Mr. Ronald McAvity and Miss Ena MacLaren are weekend guests of Mr. and Mrs. Charles Coster at Woodman's.

Mr. Douglas Adams has returned to Toronto. Yesterday afternoon there was a large turnout to witness the military inspection of men and horses of D Squadron, 8th Hussars, by O. C. Major A. J. Markham.

Mr. West's many friends were sorry to hear that he had sprained his ankle on Tuesday. Mr. and Mrs. Royden Thomson, and family are expected from the city on Friday to spend the summer here.

Miss Blanche, of Ottawa, is here, guest of Mr. and Mrs. Fairweather and others. Miss Walter Treuman and little son, Master Kenneth, are spending a few days with friends in St. John.

Mr. Richard Desmond and Helen Hitchcock have returned to Hampton Village after spending a period in the west. The Hampton base ball team is to play the thirty-first game in the Kings County League with the St. George's team.

Mr. and Mrs. Percy Rising have returned home from their wedding tour. Rev. C. F. Wiggins, of Sackville, was the guest of Rev. Mr. Converse last week.

Mr. Morton Smith and daughter left for England this week. Mrs. Frederick Everett, of Fredericton, was the guest of Mrs. Ranney Murray last week.

ROTHSEY

Rothsey, June 29.—The summer school and conference for Sunday school workers, being held this week at Rothsey College, is proving very helpful. Rev. Dean Schofield, of Fredericton, is presiding over the sessions and with Rev. President Powell, of King's College, Windsor, as the principal speaker.

Mr. and Mrs. Royden Thomson, and family are expected from the city on Friday to spend the summer here. Miss Blanche, of Ottawa, is here, guest of Mr. and Mrs. Fairweather and others.

Mr. and Mrs. Royden Thomson, and family are expected from the city on Friday to spend the summer here. Miss Blanche, of Ottawa, is here, guest of Mr. and Mrs. Fairweather and others.

Mr. and Mrs. Royden Thomson, and family are expected from the city on Friday to spend the summer here. Miss Blanche, of Ottawa, is here, guest of Mr. and Mrs. Fairweather and others.

SUSSEX

Sussex, N. B., June 29.—A wedding that has been looked forward to for some time took place Tuesday evening at 8 o'clock at the residence of the bride's mother, Mrs. William Maggs, when her daughter, Mrs. Albert Maggs, was united in marriage to William Douglas Turner, B. A., one of Sussex's rising young lawyers. Rev. J. T. Emery officiated at the ceremony in the presence of near relatives and a few friends. Miss Bessie A. Parker played Mendelssohn's wedding march as the bride entered the drawing room on the arm of her brother, Mr. Arthur Maggs, by whom she was given away. The bride wore a handsome gown of cream satin de chene with pearl trimmings and a bridal veil of Brussels net; she also wore a pearl and diamond pendant, the gift of the groom, and carried a shawl bouquet of roses and maiden hair fern. Little Miss Phyllis Wier, daughter of Mr. and Mrs. George Wier, acted as flower girl and was daintily gowned in white tulle, and carried a basket of pink carnations. The parlors were beautifully decorated on the occasion with pink roses, ferns and palms. The bride, who is one of Sussex's most popular young ladies, received many gifts in cut glass, sterling silver and china. Among the guests were: Rev. J. T. Emery, Mr. and Mrs. Dawson, Mr. and Mrs. H. E. Gold, Inspector and Mrs. Steeves, Mrs. J. R. Robinson, Mrs. J. E. Keith, Mrs. A. McNeil, Mrs. Nellie Turner, Miss Turner, Mrs. Turner, Miss Lena Turner, Mrs. Silliker, of Baie Verte; Miss Annie Huestis, Miss Ella Ross, Miss Mary Ross, Miss Gretchen Mills, Miss Sylvia Mills, Miss Marie Ross, Miss Phyllis Wier, Miss Clara G. Turner, Miss Florence Smith, Hampton; Miss Pearl Stockton, Miss Louise McLeod, Mr. J. H. McDonald, Mr. Fraser, Mr. A. J. Gray, Mr. Otis Sherwood, Mrs. Townsend. Miss Murray, Wolfville, is the guest of Miss Helen Scott. Mrs. Corbett, St. John, is the guest of Mrs. Corbett, St. John. Miss Ethel Davis left Monday for Sherbrooke (Que.), where she will be the guest of friends. Mr. and Mrs. T. T. Tower, of Springdale (Mass.), are guests of Mrs. Charles Perry. General Drury was here this week inspecting camp. Miss Margaret Ross and Miss Bessie Ross, St. John, are guests of relatives here. Among the guests at Hornbrook's for camp are Mrs. Good, Woodstock; Mrs. Thomas, Fredericton Junction; Mrs. Woodbridge, Boston; Mrs. Hopkins, Andover; Mrs. F. W. Woodcock, Mrs. McParlane, Fredericton; Mrs. Taylor, Hartland; Mrs. McLaughlin, Woodstock. Mrs. E. A. Charles returned on Wednesday from an extended visit to her son, Mr. Charles Charles, of Point de Bute. Professor Walter Murray, Mrs. Murray and daughters, of Sackville, are guests of Dr. and Mrs. L. R. Murray. Miss Anna Greenwood, Boston, is here to spend the summer with her parents, Mr. and Mrs. George Brown, Sackville. Mrs. R. A. Brown, Salisbury, visited friends here Monday. Mrs. James Pringle Fredericton, is here for camp and is the guest of Mrs. John MacE. Mr. and Mrs. John Lloyd and the Misses Lloyd were here the first of the week. Mrs. W. H. Plummer. Mrs. S. H. Langford and Miss Langford are spending a few weeks in St. John. Mrs. Leigh Langstroth and children, St. John, are guests of Mrs. Langstroth's parents, Mr. and Mrs. E. C. Pines, St. John. Mrs. R. D. Hanson, Fredericton, is the guest of her sister, Mrs. J. J. Daly. The Misses Duncan, Salisbury, are guests of Mrs. Wm. Bonnell. Mrs. Watson and Miss Agnes Watson, St. John, are guests of Mrs. Thomas Davies. Master Malcolm McIntyre has invitations out for a party for this afternoon from 4 to 6 o'clock. Miss Sara Byrne has returned from Riverview. Mrs. Joseph Titus, Bloomfield, is visiting here. Mr. and Mrs. George Prescott, Mr. and

near, returned home last week accompanied by two her school friends, Missa Beryl Cook and Betty Richards.

SACKVILLE

Sackville, June 29—A very pleasant social event is to be enjoyed this evening by some twenty-five of our young people to drive to the home of Mr. and Mrs. Seth Balmer, a few miles from town and where Miss Flora McDonald, a linen sewer, will be the hostess.

Mr. Walter Ryder, of Acadia, who is taken charge of the Baptist church at Sheoague, Centre Village, is expected to spend a week in Bathurst.

Mr. and Mrs. D. A. F. returned last week from their trip to Fredericton, where they were on a business trip.

Mr. and Mrs. Robert McLeod, of P. T. Hennessey, of Providence (N. B.), is the guest of Mrs. W. A. P. McFadyen.

Miss Alice Sterling, of Fredericton, spent the week-end in Sackville, where she will attend the hospital there for treatment.

Miss Ida MacLoney and Miss Blanche Moffat, Amherst, visited Mrs. A. B. Bice on Monday.

Methodist missions, left last week for England, accompanied by his daughter, Alice. Miss Jean Rainie, left recently for Shediac, where she is guest of Miss Mary Evans.

CAMPBELLTON

THE DEMOCRATIC OUTLOOK

But one stubborn fact blocks the way of the Democratic League—and that is the ignorance, stupidity and evil reputation of the men at present in control of the party.

With the three main competitors interested observers. When the Democrats wanted Mr. Roosevelt and his name last year their rejoicing was unfeigned and sincere.

The New York Post, always Democratic, says in a recent issue: "The men that voted for Dix last November because they were tired of the Republican tariff policy, or disliked Roosevelt, or were disgusted with the Republican 'Old Guard,' knew they were taking a risk; but to take a risk is one thing, and to see their worst fears fulfilled is another."

The Democratic party is today in a strong position in Washington, and in a position of still greater strength before the country. The leaders have shown a grasp of affairs and problems that astonished their friends and bewildered their opponents.

ADVERTISING THE PROVINCE Joseph Howe used to prophesy that the day would come when Nova Scotia would maintain half-a-million men upon the sea.

DOMINION DAY Saturday, July 1. With today the Dominion of Canada reaches perhaps the happiest birthday in its history.

with confidence to their future growth and prosperity. Judging from the attitude of our local government the politicians composing it are not troubled about any such foolish dreams as agitated Howe. They have apparently adopted the view that the West must fill up before we can expect any considerable influx of population.

If that is true the present laissez faire policy is a wise one. But is it true? In there any province in Canada that has more to offer to industry and thrift than this one? There is no province that in proportion to its size offers better opportunities to the farmer than the Province of New Brunswick.

There is no reason why our province should not maintain a population equal to the present census of the whole Dominion. English and Scottish farmers settling here would find the conditions in many particulars similar to those they had left, and they would find the opportunities for attaining to economic independence greatly superior.

ON GOING WITHOUT In an earlier age of the world the goodness of men ran in the groove of remuneration. They sought discipline by pain and would build up character by hardship and restraint.

The increased amenities of life have increased the self-indulgence of all classes multiplied sources of amusement, and made us to run after pleasures until we are made. We compass sea and land to add to our comforts, and have succeeded in developing a morbid dread of disease, of pain, of death, and quite an undue apprehension of loss.

British family are more than ever close and harmonious. Here, as in other countries of the Empire, there are some who cry out because Imperial unity, as they understand it, does not progress swiftly enough to suit their conception of the necessities of the case.

Politics is the great field for suggestion and it is a legitimate device if honestly used. Swindlers nearly always develop great practical dexterity in the use of suggestion, without being able to understand the science of it. It is the great art of the demagogue. A man who wished to be nominated for an office went before a convention to make a speech. A difficult question agitated the party. He began by saying that he would state his position on that question frankly and fully.

THE DECLARATION OF LONDON The Declaration of London is arousing a great deal of opposition in British commercial, legal and parliamentary circles. Mr. Balfour declares that it most seriously weakens the naval position of the Empire, and gravely threatens the food supply in time of war.

REGENERATING THE CITIES The process going on in many cities today is nothing short of regeneration. The ugliness of towns usually arises from the fact that they are like original chaos, without form and void.

NOTE AND COMMENT The population of Australia during the last ten years has increased by only 57,694. It is believed that Canada's increase during the same period will exceed 2,000,000 and probably reach 2,500,000.

A Montreal writer says the clergy and the police are two classes in Canada who work for wages a little less than the unskilled laborer can command.

London correspondents of Canadian newspapers are still speculating as to why Sir Max Aitken received the King. One guesser says it may be that the King has been so impressed with Sir Max's personality and career that he personally singled him out for distinction.

The Toronto Star's correspondent who is with the Borden party, wires from Red Deer, Alberta: "Another specimen of the rara avis in the West, the protectionist farmer, appeared at Lacombe this afternoon, and following upon this discovery of two of the species at MacLeod last week."

A Popular Dynasty. (Toronto Globe). Frederic Harrison, the philosopher, who remembers the coronation of Victoria, puts on record his view that monarchy is in a personal sense vastly more popular than it was in 1837.

Zinc—After washing, polish with kerosene cloth.

Uncle Walt The Poet Philosopher The village smithy still is found beneath the chestnut tree, but from it comes no clanging sound of hammer swinging free; the villagers have gathered round to see what they may see. THE VILLAGE. See, the smith, he is a man of might, of JERRY BLACKSMITH and sinewy frame; and from his plugh he takes a bite, and starts in to declaim: "Well, boys, it really was a sight, the way we won that game. We had a man on every base when I stepped up to bat; the pitcher's curves were hard to trace—he knows where he is at—but I just looked him in the face, and knocked the blamed ball flat. Well, stranger, what is it you say? Your horse is needing shoes? Oh, take your cheap old plug away, you give a man the blues; I am too busy here today to shoe old kangaroos. Yes, boys, that hit brought in them all, and struck the bleachers dumb; I really thought that pitcher'd fall—it knocked him out of plumb! Oh, when it comes to playing ball your uncle's going some!" The farmers seek the smithy door to have their ploughshares ground; they make the worthy blacksmith sore—they should be in the pound; they interrupt him o'er and o'er and get his nerves unbound.

INTE POUL PRESERV N. Use of "Water-glass" and Satisfactory Water glass, chemically silicate, continues in its reliable and satisfactory use upon the farm, times desirable to store away, is entirely practical average farm poultry storing eggs for home use, in a time of low present, to at least put supply for home cooking enabling him to market more of his winter eggs. It is carefully and correctly held for an entire year or those qualities thoroughly and successfully years, as given below by adherent to. A cellar is a good place, though any dark, dry, cool place will do. It is not to be placed in a room where the water glass, which is a proper mixture of the water and water glass, should be kept. The water glass and the water should be thoroughly mixed, and the mixture should be kept in a clean, dry, and cool place. The water glass should be used in a proportion of 15 down eggs. The proportion should be made from 100 parts of water glass to 1000 parts of water. The mixture should be kept in a clean, dry, and cool place. The water glass should be used in a proportion of 15 down eggs. The proportion should be made from 100 parts of water glass to 1000 parts of water. The mixture should be kept in a clean, dry, and cool place.

SAVES EAST SHOULD BE RELEASED

Big Expenditure Warranted

British Journalist Suggests a Wide Campaign

Editor of "Canada" Believes Maritime Provinces Should Co-operate, Spend \$250,000 in Five Years and Send Sound Delegation to England—Would Pay Well, He Says—West Getting it All.

A five year publicity campaign costing \$250,000 to be carried on by the co-operation of the three provincial governments of the maritime provinces and a joint deputation to Great Britain for the purpose of addressing the chambers of commerce of many of the larger cities, is suggested by J. Cogger, a British journalist who is in the city in the interests of Canada, an illustrated weekly published in England for the real estate dealers and capitalists. Mr. Cogger is one of the editors of the paper.

He is much impressed with the prospects for development in the eastern provinces and says a lamentable ignorance exists in Europe with regard to conditions in the maritime provinces. Until recently he was on the staff of the Manchester Guardian, one of the greatest of the daily commercial newspapers in Great Britain, and is paying his first visit to Canada. Coming from the greatest industrial centre in the Old Country, Manchester, where within a 100 mile radius of the Royal Exchange there are 10,000,000 people at work, engaged for the most part in the great industries which have world-wide reputation, he is astonished to find that the British manufacturer has not yet sufficiently realized the excellent market that can be found in Canada for high-class British goods, and the enormous growth of this market that will undoubtedly take place in the near future.

When interviewed at the Dufferin last evening, Mr. Cogger said: "It is sadly true that a great deal of ignorance exists in Great Britain and Europe with regard to the eastern provinces generally. The average man believes that these provinces are somewhere near the North Pole, and that ice, fog and snow reign supreme. This is accounted for in the first place by the general ignorance concerning geographical conditions on this side of the water, and in the second place by the paragraphs which appear in the European press from time to time telling of wrecks on the ice-bound coasts of Nova Scotia and New Brunswick. Although the great natural conditions appear weekly if not daily in the English papers, the mind does not lose the impression one gains by reading these notices of shipwrecks mistle ice and snow.

"There is no doubt in my mind that this ignorance, unfortunately so prevalent, may be alleviated by a well thought out scheme of publicity. I would suggest that the eastern provinces co-operate in sending a five year scheme of publicity to cost about \$250,000, and that a deputation be sent to Great Britain for the express purpose of advising about twenty or thirty chambers of commerce concerning the great advantages of the maritime provinces. There are any number of precedents for this procedure—and it pays.

Should Have Authority. "It is needless to say that this deputation should proceed with the recognition of all the governments as this will strengthen their hands very much. When they arrive in London they should proceed to a good hotel and at once register at the Canadian Club, afterwards interviewing Lord Strathcona, the able high commissioner for Canada. It would also be in order for them to call on the various government officials who would be useful to the deputation in many ways. That being over, it might be wise to invite the

KEEP YOUR MUSCLES LIMBER And Relieve Soreness with Father Morriess's Liniment.

athletes owe their prowess to the natural bodily superiority, to the systematic conservation of Nature's gifts, particularly by means of regular rubbing with a good liniment. We are not at all athletes in any walk of life. If we keep our muscles limber, the walking will be much easier.

Father Morriess's Liniment has repeatedly cured and soothed cuts, bruises, frostbites, chapped hands, chilblains, sprains and strains, sore muscles, backache, toothache, earache, and similar affections. In connection with No. 7, it is valuable in rheumatism, while it is a helpful adjunct to the Lung Tonic in sore throats and chest colds.

This well-tested and reliable Liniment is mild and smooth to the skin and does not blister. It is clean and has a wholesome, agreeable odor, unlike other preparations.

In every family medicine chest, there should be a bottle of Father Morriess's Liniment. It is sold by all druggists and is also available in bulk at the following prices: 25c a bottle. At your dealer's, or from Father Morriess Medicine Co., Ltd., Montreal, Que.

Some Dimensions of the World's Largest Steamer Reception Room Extends Full Width of Ship—Swimming Pool and Racquet Court—The Hull Subdivided Into Fifteen Watertight Compartments.

Some additional details concerning the new White Star triple screw steamer Olympic will be of interest to the Telegraph readers. The ship would tower 132 feet above the highest building, namely the new Woolworth building, New York, which is 750 feet high, while she has a 92 foot beam. A striking introduction to the ship is the entrance staircase, the latter being 16 feet wide, extending over 90 feet and serves seven decks, five of which are also reached by three electric passenger elevators. The stairways are modeled after the style prevalent in the reign of William and Mary.

The reading and writing room is a lofty apartment, with large square-pained windows, the decorations being inspired by the unique style of the 17th century. The painted side-walls are finished in fat white, and ceiling with a delicate-molded moulding. The hooded fireplace, surmounted by mirror and electric clock, and the numerous easy chairs and lounges, make a charmingly home-like picture. The restaurant is decorated in the manner of the Louis Seize period, with a rich rose and Barri floor-carpets and elegant Aubusson chairs and large windows hung with white silk. The reception room extends the full width of the ship and is centrally located. It is especially attractive as a rendezvous for afternoon teas and musicals.

The chief object of interest in the dining saloon is the fine French chandelier, one of a series entitled Chasse de Guise, at the National Gallery Meuble. It is decorated in the same style as the grand dining saloon, which seats 500 passengers, and is the largest apartment on any steamer, extending the full width of the ship and with beautiful leaded glass windows on both sides, closely reproduces the effect of the windows in a large mansion. The unique feature of the most comfortable table.

On the airy upper promenade deck "A" just aft of the smoke room, is the verandah and palm court, from which the spectator can look out from windows unobscured by the ship's structure, and rest on the verandah, or extend the full width of the ship and with beautiful leaded glass windows on both sides, closely reproduces the effect of the windows in a large mansion. The unique feature of the most comfortable table.

The unusual steadiness of the Olympic made possible the installation of a squash and racquet court, this being the first and only one of the kind on any steamer. The court is on the main deck, which is the topmost of all, with large spacious windows, and in which exercise can be taken regardless of weather. In the staterooms every wish of the passenger has been anticipated and every creature comfort provided. The Olympic's sister vessel, the Titanic, of similar dimensions and beauty, is now under construction at Belfast, Ireland.

Electric Cranes. The New York Marine Register of June 28 has the following description of the new giant: The new White Star liner Olympic arrived at New York on June 21, from Southampton. The dimensions of this vessel and her sister ship, the Titanic, now under construction at the yards of Harland and Wolff, Ltd., Belfast, are the largest ever built. The Olympic's length is 852 feet, breadth over all, 92 feet 6 inches; height over boat deck, 94 feet; height from bottom of keel to boat deck, 107 feet 4 inches. The height from bottom of keel to top of captain's house, 105 feet 7 inches; height of funnels above casing, 72 feet; height of funnels above boat deck, 81 feet 6 inches; height from top of funnel to keel, 173 feet. Number of water-tight bulkheads, 15; passengers carried, 2,500; crew, 800. The indicated horsepower of the triple-screw turbo-revolving machinery fitted to the Olympic and Titanic is about 48,000, and will give a continuous sea speed in service of 21 knots. There are three passenger lifts or elevators in the first class and one in the second class. The bridge deck promenade is 520 feet long, the main dining saloon, 360 feet runs the width of the ship, is over 90 feet broad by 114 feet long and seats 632 people. Its interior decoration is done in the style of the early seventeenth century. There is also an "A. la carte" restaurant decorated in the style of Louis XV. The other public rooms are all grouped on the promenade deck and include a writing room, 41 feet square, a lounge in Louis XV. style, 62x90 feet and a smoking room, 36x61 feet. The swimming pool is 22x15 feet in size, and the squash court 30 feet long extending through two decks. The palm court and veranda are situated aft on the upper promenade. The lower promenade deck may be enclosed in glass if the weather is bad. The second class quarters are well fitted. On the promenade and bridge decks are situated the second class library and smoking room. The second class dining saloon is a large one, seating 400 persons. It extends from side to side of the ship and is paneled in oak. The Olympic has accommodations for 1,500 third class passengers and there are also 473 persons and there are a large and comfortable room, social hall and sheltered promenade on the lower deck. The full complement of the Olympic and its future sister ship, the Titanic, will be about 3,700 persons, made up as follows: first class passengers, 500 second class and 1,500 third. The officers and deck crew number 283, and the engine room complement is 322, and the steward's department 471. Every modern appliance relating to safety has been used in the construction of this steamer. The double bottom extends the full length of the vessel. The hulls of both the Olympic and Titanic are subdivided into fifteen compartments separated by water-tight bulkheads of steel. The reciprocating engine room is the largest compartment in the ship, being about 60 feet long, while the turbine room is 57 feet long, the boiler rooms are generally about the same length, and the holds are 50 feet long. The bridge deck amidships has a length of 850 feet, while the bridge deck forward has a length of 100 feet long, and the poop is 100 feet long. There are three masts, with rigging in connection with the cargo arrangements. Aft on the poop there are electric cranes for the cargo.

THE BAPTIST CONVENTION IN HARTLAND Meeting Will Be Held There This Month—Some of the Topics—Maritime Convention in August.

Washington, June 19.—The most noteworthy result of the biennial conference of the International Institute of Agriculture, which was held in Rome, was the adoption by the forty-eight countries participating of the American system of presenting crop reports. This action is a long step toward the realization of the dream of the world, the promoter of this great organization, of doing away with "this giant evil, the evil caused by unnecessary price fluctuations." It was for the purpose of removing this evil that the Institute was organized, and it is now a stable organization, supported enthusiastically with the money of the nations of the world, and the ambassador to Italy to attend some of the sessions and thus perfectly represent the United States. Such representation was courteous but not practical, and when the committee on agriculture was organized to enable a representative delegation to go from here to Rome it named the strongest man available. These were Representative David J. Foster of Vermont, chairman of the delegation and former chairman of the committee on foreign affairs of the House of Representatives; Charles F. Scott of Kansas, former chairman of the committee on agriculture of the House; Victor H. Olmsted, chief of the bureau of agricultural statistics; Dr. E. Dana Durand, director of the United States census, and General Edgar R. Cabot Lodge, who had been one of the most prominent persons in the world. The delegation at the banquet tendered by Mr. Lubin and won high praise from his associates.

Representative Foster returned to Washington on the 19th, and on the 20th he was for the new cause and deeply convinced of the value of the Institute to the farming interests. "It may be said that the United States has little to offer in the matter of farming from foreign countries," said Mr. Foster to the Transcript correspondent, "and in some respects no doubt this is so, but if I could take our American farmers to the United States, I think they would agree with me that we have something to learn. If we should cultivate our crops as they do in Italy, we would produce enough to feed the world. One of the Canadian delegates said to me that he never was so surprised in his life as when he saw the Italian farm laborers going through the fields of wheat and oats and actually feeding the soil, and the results are astonishing. Every inch of soil is utilized. Grapevines are trained to run along the fields and the waste is made into mulch. The mulch is left bare in this country, mulberry leaves are grown to feed the silkworms which the farmer keeps in his house. "I tell you it was a mighty impressive scene, and I think that if we could only assemble to discuss agriculture; not with the old idea of 'I came, I saw, I conquered,' but to serve—to develop the greatest industry on the face of the earth. There is a ninety-five per cent of the world's population in the third world, and it is working to secure for the world an abundance of food products at reasonable rates and for the farmer reasonable compensation for his work. The International Institute of Agriculture is bound to be, as Mr. Lubin said it would be, a great factor in civilization. "Let me tell you just one little incident to illustrate how practical this work is. It is in regard to the wheat crop. The wheat crop in which the United States is the very advanced work of the United States department of agriculture. The story was told by Mr. Buck, one of the representatives of the British government in London. He said that in his province a certain forage-plant of great importance as a food for animals had been severely affected by blight. Crop after crop would be started, only to fail before it ripened and become a total loss. Through the publication department of the Institute they were supplied with certain documents of the United States department of agriculture, in which this subject was discussed. From these we learned that if the seed was treated in a certain way before sowing the blight would be eliminated. We tried this process and met with complete success. The result of the first trial was the saving of a quarter of a million dollars in his province alone. "I presume," continued Mr. Foster, "that the most important work done by the conference was the adoption of the American system of crop reports, thus introducing uniformity of reporting among practically all the countries of the world. This system, as you know, is a product of the United States. We not only have developed a high point of perfection in the final estimates are found to be not more than one per cent out of the way, but we invented the system. It is based on the standard of 100 for normal conditions, and reports are made with reference to that. Formerly, to give a rough illustration, Russia would send in a report that her wheat crop was 'excellent,' Germany that hers was 'very good,' Australia that hers was 'going very well.' These expressions were wholly indefinite and unscientific and conditions supposed to be were often found to vary mar-

Great Work Being Done by Rome Institute Most Important So Far, Perhaps, Is the Adoption of the United States Crop Report System by Nearly All Nations—How David Lubin Succeeded in Arousing Interest in His Plan to Improve Conditions of Agriculture.

terially. Under the American system, simple as it sounds, if a report is turned in that wheat is '80,' we know that it is just 11 per cent below the normal, and a knowledge of what that 11 per cent means. Henceforth we shall be able to publish a single numerical statement of crop conditions all over the world, and in such form that all peoples, speaking whatever language, can understand it at a glance. The London Times emphatically stated that what the Institute accomplished this year would be entitled to the gratitude of the nations of the earth, even if it accomplished no more."

The Institute itself is a permanent bureau with headquarters in Rome, and with offices assigned to each of the representative of the subscribing countries, forty-eight in number. These men as a rule are of high scientific attainment, skilled translators are employed and the Institute issues three monthly publications, one dealing with crop conditions, one with diseases of plants and a third with topics of general interest to agriculture. Congress men will be asked to subscribe for 1,000 copies of these publications to be distributed to the various experiment stations and state organizations in the United States, in the hope that they will subscribe for the journals themselves thereafter. These official publications, according to the European custom, are permitted to accept advertisements, and the Institute is exploiting dry farming, of which system an American, Mr. Campbell, of Kansas, is the father. The Institute is also a kind of clearing house for the publications of the agriculture departments of different nations. Matter is re-translated and thus made available all over the world.

David Lubin, the founder of this great organization, is one of the unique characters of the world. A Hebrew, born in Europe and once a workman in a Massachusetts watch factory, he went to California and made a fortune, part of which he has devoted to the promotion of the International Institute of Agriculture. Unusually unorthodox in manner and abnormally frank of speech, he is yet a tremendous personality. He was regarded as a dreamer of the wildest dreams when he first espoused the task of interesting the governments of the world in this project, but now he has won them all. "Mr. King, now you know you're only a third-rate king, but if you will listen to me I will put you into the first class," Lubin is reported to have said to King Victor Emmanuel on the occasion of their first interview. "I don't like to see a monarch appear in the matter of farming," Lubin said to the king another time. It was this unprecedented frankness of utterance, the consuming earnestness which impelled the man thus to blurt out his private fortune estimated at \$60,000 a year. He does not attend the sessions, as only delegates are admitted to them, but his interest in the organization is deep, and his encouragement has made it a success. The United States government contributes \$5,000 a year for the support of the work. Mr. Lubin himself is the permanent American representative at Rome, and it is said that he never touches a cent of the salary of \$5,000 per annum, which he is entitled to draw.

Two Severe Shocks Sunday People, Panic-Stricken, Rush from Buildings to Streets

No Serious Damage Done, But Several Structures Were Injured—Most of California and Nevada Felt the Effects of the Quakes.

San Francisco, July 1.—Two earthquake shocks, the heaviest since the big one of 1906, and separated by only a few seconds, jarred the central portion of California and western Nevada today. The first sharp shock, which occurred at 2:01 o'clock, was followed in a few seconds by one of similar intensity, each lasting about five seconds.

Only trivial damage had been reported from any section, but in San Francisco and other cities in the affected area, several buildings were damaged. In San Francisco, the earthquake was felt in the city, and in some places, especially in the city, the ground was shaken. In some places, the ground was shaken. In some places, the ground was shaken.

BOYS HAD NARROW ESCAPE ON RIVER Four Westfield Lads Clung to Overtaken Boat Until Rescued by Ralph Belyea.

Monday, July 3. Changing for their lives to their overturned boat, four lads from the Westfield school were rescued after some anxious minutes in the water near Westfield about 11 o'clock yesterday morning. The boys had put out from shore with Charles Knowlton's boat, the Locomotive, and were making good progress, enjoying the fun, until a sudden squall caught them unprepared. In spite of their efforts when they found themselves in danger the boat turned on her side before the wind and the lads found themselves in the water. To save themselves all four got firm hold on the drifting boat and clung desperately until help arrived.

Ralph Belyea was the first to sight them and putting on full speed with his motor boat he approached the group. One by one he pulled them aboard, much relieved but otherwise none the worse for their adventure.

CHATHAM GIRLS PASS MUSICAL EXAMS

Fredericton, N. B., June 30.—The municipality of York is now free from debt. Secretary Bliss having paid off the last debt of \$3,200. This was part of \$30,000 issued in aid of the Fredericton Branch Railway in 1908. It is likely the council next week will celebrate the event in some way.

DEATHS FLETCHER—At Upham June 27, 1911, Nina E. Fletcher, daughter of J. C. and Ella Fletcher, aged eleven months.

SUSSEX GRAMMAR SCHOOL

Exercises Largely Attended—The Graduates and Prize-Winners—An Interesting Programme—Donors of Presents to Make Them Annually.

Sussex, June 30.—The closing exercises of the Sussex Grammar school which took place today were marked with success in every particular. The spacious assembly hall was crowded to overflowing with visitors and parents long before the hour (10.30) which was announced for the opening exercises.

THE SUSSEX SCHOOL BUILDING

R. P. Siewers, who congratulated her on her great success. Mathematical prize, \$10 in gold, donated by Judge J. M. McIntyre for grades IX and X, was won by Frank Keirstead, grade IX. Hugh McDonough, of grade X, was a close second. Walter J. Mills made the presentation.

The principal, Mr. Belyea, and his efficient staff of teachers are deserving of much credit for the high standing the school has attained.

Chorus—Out on the Deep—By the school. Reading—Spot June Land—Grades I and II. Chorus—Rule Britannia—School. Exercise—Flower Song—Grade I. Exercise—Scarf Drill—Grades IV and V. Song—Dumb Bell Drill—Grades VI and VII. Exercise—Mother Goose—Grade III. Exercise—Physical Drill—Grades IX and X. Song—A Summer Night—Selected.

HOW THE ANNEXATION SCARE HAS COLLAPSED

(Toronto Globe). As the time approaches for a final decision upon the reciprocity agreement, either in parliament or at the polls, evidence accumulates that the attempt of its opponents to stampede the people by the cry that reciprocity in natural products means annexation has failed utterly. It never had any real grip of the electorate.

The Empire managed to exist before most of the new advocates of imperialism learned of it. In fact, the expression is being shouted from the housetops as the last word in British statesmanship. This talk about unity of trade being essential to the policy of policy and hence to the unity of nations is simply the language of sixty years ago modernized to meet present political conditions.

The Canadian's rebuke is as aptly as that of Bishop Mills, and indicates that the Conservatives of British Columbia will fight reciprocity entirely on its merits as a trade agreement and not because they believe that the loyalty of Canadians depends on their trade relations. To the friends of reciprocity in natural products the accumulating evidence that the question will be settled by the people as a question of economics is most encouraging.

OBITUARY. FINE LEATHER FOR HOLIDAY. GEORGE HECTOR PLEADS GUILTY. "AMERICANIZATION OF THE WEST" AN EASTERN SPECTRE.

Mrs. Robert Tait. Dalhousie, N. B., June 29.—The funeral of Mrs. Tait, widow of Robert J. Tait, formerly a prominent shipbuilder in northern New Brunswick, took place here today. Rev. Mr. Kirk conducted the funeral services, and interment was in St. John's Presbyterian cemetery. The pallbearers were George Haddow, Charles Stewart, Charles Powell, Thomas G. Scott, Daniel McDonald, George Miller.

C. E. Vaughan. Saturday, July 1. C. E. Vaughan, who will be remembered by older residents of St. John as a shoe manufacturer—here twenty-five and thirty years ago—a member of the firm of Vaughan & McDonough—died at Lynn (Mass.) on Thursday, after a few days' illness. Mr. Vaughan, after leaving St. John, settled in Lynn, where he was actively engaged in shoe manufacturing until his death. He was a frequent visitor to St. John, and had many friends who will be surprised and grieved to hear of his death. Mr. Vaughan was survived by his wife and two sons—John H. Vaughan, in this city, and Frank Vaughan, in Lynn. John H. Vaughan and Miss Susan B. Vaughan of this city, are brother and sister. Arthur, of Boston, and William, of Barre, of this city, are half-brothers. The body is being sent here for burial. Interment will be at Fernhill, after the arrival of the Boston train this morning.

James Minehan. The death occurred at his home, 200 Union street, yesterday of James Minehan, a well-known citizen of St. John. He was in his 69th year and for many years conducted a meat stand in the market building. He is survived by his wife. The funeral will take place from his late residence tomorrow afternoon at 2.30 o'clock.

WEDDINGS. Spike-Everitt. Andover, N. B., June 28.—On Wednesday at high noon a very fashionable wedding took place at Trinity church, Andover, when Miss Johanna Everitt was united in marriage to Charles Henry Spike by the Rev. J. R. Hopkins. The bride looked very pretty as she entered the church on the arm of her brother, William Everitt, who gave her away. She wore a pretty costume of champagne shantung silk with gold and brown trimmings, with large white picture hat, and carried a bouquet of lily of the valley.

LOCAL NEWS. Correspondents who send letters to The Semi-Weekly Telegraph and who wish to have them returned if they are not printed, must send stamps for return postage.

Francis & Vaughan. 19 KING Street.

NEGRO REMANDED AND MAY BE SENTENCED TOMORROW. FLEURY ACQUITTED.

Frenchman, Tried on Charge of Stealing Clothes from West End Hotel, Found Not Guilty—The Davidson Case to Come Up This Morning.

Two criminal cases were disposed of at the adjourned sitting of the June Circuit court yesterday afternoon with Justice Barry presiding. George Hector, charged with criminal assault on Mary Ann Davidson, an elderly woman of Willow Grove, entered a plea of guilty and was remanded. Charles Fleury, aged 21, was tried and acquitted on the charge of stealing a coat and vest from the Carleton House, west of the city.

Both Hector and Fleury were remanded to the city jail. The case of the Frenchman, tried on the charge of stealing clothes from the West End Hotel, was found not guilty. The Davidson case will be tried this morning.

George Hector. When the court resumed at 2.30 o'clock there was a large crowd of spectators on hand. The first case taken up was that of George Hector, the negro lad. He was represented by G. Karle Logan and Solicitor-General McLeod appeared for the prosecution. His case was very quickly disposed of. On hearing two serious charges of assault read over to him he immediately entered a plea of guilty. Questioned by Judge Barry, he said that he had consulted with his counsel before coming to court and in entering a plea was acting on his advice. He was remanded to the prison, which will likely be imposed tomorrow.

Fleury Acquitted. Charles Fleury, a Frenchman, was next arraigned on the charge of stealing a coat and vest from the Carleton House, west of the city. The prisoner was unable to speak English and the services of an interpreter were procured. Considerable difficulty was experienced in finding a person capable of acting in this capacity and after about an hour's delay C. Lezer, an employe in the post office, appeared in court and offered his services. The prisoner entered a plea of not guilty and the following jury was sworn in to try the case, William Brodie, James Morrison, Dominique Hayes, Norbert Noble, H. G. Green, Alexander Corbett, Wilfrid Day, R. J. Armstrong, F. R. Patterson, Sydney Gibbs, F. Law and Walter Irvine. Homer D. Forbes appeared for the prisoner and Solicitor-General McLeod for the prosecution. Killen and Messrs. Gilbert, pawn brokers, were the witnesses examined by the prosecution. The evidence was similar to that given at the preliminary hearing. Mr. Wholly told of purchasing the clothes in the Carleton House and identified a coat and vest produced in court as his. Messrs. Gilbert told of purchasing the clothes in court from the prisoner. Detective Killen gave testimony as to the arrest. The prisoner went on the stand in his own defence and denied the charge. He said that he purchased the coat and vest from a Russian. The addresses by his honor and the jury were very brief. The jury retired at 9.40 and after about a half hour's deliberation brought in a verdict of acquittal. The prisoner was immediately discharged.

PUNS GOOD AND BAD. (Washington Post). The best pun in the English language is Tom Hood's: "He went and told the sexton, and the sexton told the bell." The worst pun is that of the man who fell into a ditch, and rose with the remark: "I have made an out of the above."

AMERICANIZATION OF THE WEST. (Montreal Witness). It is the object of some Canadian newspapers in the pay of privilege crudely to insinuate—or rather it is crudely done—that reciprocity will not pass the United States Senate. However, a well-informed writer asserts that according to a count made by the President's staff, reciprocity will have sixty votes in the senate. The president is credited with having himself expressed the conviction that at the end of the debate, which is at times somewhat acrimonious, the bill as it came from the house will be carried by a two-thirds vote. The debate is bringing out utterances which may have an important bearing on the tariff questions as a whole, and which are shaking the protectionist structure pretty badly. If the bill passes in the United States there is no fear that it will not pass our parliament, and, once passed, there is likely danger that any party will revoke it. Writing about the danger of reciprocity, which some in Canada may have heard among the privileged, a Boston contemporary says: "Distrust of it is due mainly to the fact that the influence behind reciprocity in the United States is not thoroughly understood. Canada asked repeatedly for greater freedom of trade with the United States, and was refused. Her pleadings for a fair trade arrangement extended over a period of forty years, and were in vain. Then, and it must be confessed with some suddenness, the United States yielded, and became more solicitous even than Canada for a reciprocal agreement. In the meantime Canada had been growing and pro-

AMERICANIZATION OF THE WEST AN EASTERN SPECTRE.

People on the Prairie Scoff at the Fears of Over Influx of Settlers from the U. S.—Foreigners Met With Every-where, But They Are in the Melting Pot, and Are Becoming Real Canadians.

(Special to the Toronto Star From a Staff Correspondent). Medicine Hat, June 23.—Once upon a time some metaphorically inclined speaker or writer referred to the United States as a melting pot, and the name stuck, as accurate descriptions in tabloid form tend to do. Whether the Canadian West has been called that yet or not the writer does not know; if it has not it should be, for the melting process, the fusion of scores of races into one big new people, is going on in the prairie provinces just as rapidly and even more thoroughly there than it ever did in the country to the south.

The welding together of a polyglot mass of people, strangers to the dominion in every sense of the word, is a process that takes time, and is productive of uneasiness to those who have not watched it in progress. In Toronto, and in the other big eastern centres, people naturally see little of it, though it is going on even there. Foreigners here are not so numerous as in the prairie provinces, and the gradual assimilation which goes on there is hidden from the eye of the great majority of people. Out here it is different. It is productive of uneasiness like the poor, is ever with you; you cannot escape them, try as you will. At the market, on the street, at political meetings, and above all, at the railway station you rub shoulders with almost every nationality ever created. You wonder where they all came from, what they are all doing, and above all, what is to become of them.

Obviously enough, when you come to think of it, the only one of these diverse elements about which you worry is the people of eastern Canada who are worshipping the so-called "American." The man who has been crossing the border into Canada from across the line in such numbers in the last three or four years. He, the man who is supposed to be the most like us in every respect, is the only one who will not become of us, they say, and the "Americanization" of the West is a bugaboo, a ghost, which has been raised in our country. Let it be said before we go any further that this ghost, born in the east, walks in the east alone. Some way the prairie air and the prairie sunshine does not seem good for the man who comes from the east, and who is supposed to be the most like us in every respect, is the only one who will not become of us, they say, and the "Americanization" of the West is a bugaboo, a ghost, which has been raised in our country.

Of course, there are a few who need their naturalization papers out, but you do not need to go out of Ontario for these. Naturally there are more from other lands are swinging in from hundreds and thousands every year. But from what one can gather, after many and many inquiries, the east has no reason to worry about the swarming of British institutions in the food of United States immigration out here. History is repeating itself in the Canadian west, the conditions which obtained in the western states half a century or so ago are just being repeated today throughout our country. The United States did not worry about "Canadianization" of Minnesota, or the Dakotas, and yet we sent thousands into those states in the hard times of years ago, and the people in Canada have a fear that is eternally true: "Where your treasure is, there will your heart be also." About the problems of loyalty of really to a country which they have voluntarily left, they are not at all anxious to hear. At Qu'Appelle your correspondent met one of the "American invaders," a young Iowan, now representing a New York insurance company, and traveling from Winnipeg to the west. He had a letter in his pocket from the United States, which was a letter of an "American" Canadian west. "Take my own case," he said, "I came to Canada five years ago, and I was an 'American' in spirit, as filled with admiration for the country in which I was born as any man ever was. Yet today I am a Canadian citizen, and an ardent of it. Nobody made me become one. I took the step quite voluntarily. I am not a farmer, and I had no need to secure my living by the soil. My business is in the city, and I have no need to be in the country. No, you can tell all the eastern people who are here that they need not fear us in the west. Of course, some of us have our Fourth of July celebrations, and I remember that I helped to organize one when I first came to Qu'Appelle. But that meant after that the Canadians in Chicago had a celebration on the King's birthday, and I never heard that anybody was the worse for it."

The melting pot must continue its work in its own way. It is in this way that the melting pot of Canada is working its beginning of time. They cannot be hurried, only the fire of time can do the work. Satisfaction shines in every face, the best and on earth stretches in limitless miles in every direction. There are green every night, rain is falling, and everything is fresh and green. In Canada the newcomer finds established laws as good or better than those he left, and what is more he finds them in his own hand. He holds them to the United States as of no value, and one meets many of them who would worry for him.

Money Secured to Road from Coast to the Official Announcement. Montreal, July 6.—The William Mackenzie and Sons, together with Colonel D. C. McArthur, have secured financial construction of the entire Pacific to Atlantic. It was that within thirty months would enter into Montreal erect a magnificent centre.

REPORTS GOOD FISHING CATCH MARITIME. Dominion Inspector Said Not Affected on Account Storage Facilities. Ottawa, July 6.—A. Finlayson, inspector of fish hatcheries, reports from a trip through the provinces, where he has the government hatcheries, that the fishing stations and the lobster good. This will not, however, price of fish as the cold makes it possible to regulate fish very little if any in the price of fish, even if exceptionally large.

Passed Its Dividend. New York, July 6.—The Foundry Company today quarterly dividend of 11 cents was issued after a statement issued after the said: "When dividends directors hoped and expected business and earnings would warrant continued dividends, but railroad purchased very little equipment."

CASTORIA For Infants and Children. The Kind You Have Always Bought. Bears the Signature of J. C. Watson.

Mrs. Charles Glynn, of New York, who has been visiting Mrs. McCormick's Three Mile House, will leave this morning to spend the summer at her former home in Prince Edward Island.

Contracts Have Been Considered. Parliament Has Worked of Work. Reciprocity. It is Expected That Will Be Occasion Session Opens Decks for Treaty Debate. Special to The Times. Ottawa, July 6.—The contract for the first ten war vessels navy will be awarded to a Canadian shipbuilding firm, headed by Sir Henry based on any authority. The awarding of the contract is probably some weeks anything definite is known of securing the contract of the ships, but pending the minister of naval affairs, Brodeur, who has been in the admiralty experts in pending discussion of the in the cabinet council no sign as to the successful acquisition. If conditions will warrant government is desirous of having new ships constructed of wood. Nearly all of the cabins be built in Ottawa next week. The return here on the part of the government is accumulated during the programme for the balance. Nearly half of the government is planned for the session put through and four weeks can easily be put, after on July 18, in clearing off before the decks are cleared in cleaning up and the reciprocity agreement.
