

THE ACADIAN.

HONEST, INDEPENDENT, FEARLESS.

Vol. II.

WOLFVILLE, KING'S CO., N. S., FRIDAY, MARCH 7, 1884.

No. 11.

FACT.

Little drops of printers' ink,
A little type "displayed."
Makes our merchant princes
And all their big parade.

Little bits of stinginess—
Discarding printers' ink—
Busts a man of business,
And sees his credit sink.

—Present Age.

TELEGRAPHY and PHOTOGRAPHY

We copy the following from the *Philadelphia Photographer* of 1871. It will be read with interest as it shows the beginning of two of the greatest of modern inventions. We can well and truly echo "what hath God wrought."

Our New Year number is embellished by the portrait of Prof. Samuel F. B. Morse, the oldest friend and votary of photography in America and the inventor of the ever mysterious and wonderful telegraph. A few months ago the unveiling of the statue of Prof. Morse, erected in New York to perpetuate his memory, together with the proceedings at the time was so fully commented upon in our daily papers that the matter is still fresh in the minds of our readers; the name of this great public benefactor is still lingering upon their lips and the loud buzzes which were given vent to on that memorable occasion are still being echoed and re-echoed over the whole land. Prof. Morse himself a born artist has always been a friend of art. In 1837 and 1838 while Daguerre and Niepce were plodding over the fugitive fairy images which appeared upon their sensitive plates, trying to devise some means to fix them so that they would not grow black with shame when exposed to light. Prof. Morse was busied over another problem which if solved was to walk hand in hand with photography and astonish the world. He sat in his rooms at Washington with his ten miles of wire coiled up hard by, through which he communicated messages, to the astonishment of the hosts of visitors who called upon him with congratulations and encouragement, urging him to test his invention on a more extensive scale. But in the midst of this order came the doubt as to the distance which was equally shared by Prof. Morse himself, who however proposed to overcome the difficulty by the establishment of relays of batteries whenever they should be needed. In looking at this period after a lapse of nearly forty years and when the electro-magnetic telegraph has embraced within its coils nearly every part of the civilized world it appears wonderful that there should have existed doubt as to the propriety of Congress

affording its encouragement and aid to an invention which appeared to be fraught with such practical utility. But the record of times shows that not only did a doubt exist but that the whole scheme in its incipency was considered by many but little better than the delusions of mesmerism and its projector an enthusiast too wild to command the attention of grave legislators and pugilistic Congressmen. Not until 1843 did he meet with much success when \$30,000 was voted him by nearly a tie vote in Congress to enable him to construct a line between Baltimore and Washington. By the month of May 1844 the whole line was laid and magnets and recording instruments were attached to the ends of wires at Mount Clara Depot, Baltimore, and at the Supreme Court Chamber in the Capitol at Washington. When the circuit was complete and the signal at one end of the line was responded to by the operator at the other Mr. Morse sent a messenger to Miss Ellworth (who was the first to tell him of the passage of his bill by Congress, and whom he had promised should send the first message over the wires) to inform her that the telegraph awaited her message. She speedily responded to this and sent for transmission the following which was the first formal dispatch ever sent through a telegraphic wire connecting remote places with each other: "WHAT HATH GOD WROUGHT." The original of the message is now in the archives of the Historical Society at Hartford Connecticut. From that time many dark days as well as bright ones greeted Prof. Morse in his efforts to make the telegraph what it is. He went to Europe meanwhile and there exhibited his invention to the most learned men of science such as Arago, Humbolt and to crowned heads and it was during this visit as he will tell us shortly he met Daguerre.

We have alluded to the period which properly be denominated his artist life. This commenced about one year after he graduated at Yale College. When under the charge of Washington Alston he went to Europe to begin his labors as a student of art. He reached Europe August 7, 1811 and returned to his native land precisely four years after—embarking from Liverpool in 1815, upon the very day of the year he had landed four years earlier. During this time he was a student at the Royal Academy over which Benjamin West presided and numbered among his friends not only this distinguished artist but many of the most eminent artists and literary men of the day. West, who had an especial regard for his own countrymen, was on particularly friendly terms with Morse and Charles Leslie. These two young students, who had many views in com-

mon, took apartments together and while they prosecuted their art-studies upon common basis had access to the same social circles. While West was particularly engaged he directed his servant Robert to refuse admission to most persons, on these occasions Leslie and Morse were made exceptions. To them he was always when alone at home, no matter how busily engaged.

Returning to his native land after completing his studies, Mr. Morse first settled in Boston, but afterwards removed to Charlestown, South Carolina. From there he went to New York to live, and there conceived the wondrous invention of which he is the renowned parent. After a life of great activity, intermixed with no little personal annoyance and many pleasant remembrances, at the advanced age of seventy he retired from the active duties of life and since then has devoted himself to the gratification of the tastes of cultivated gentlemen and the exercise of a generous hospitality. His country residence, situated in a most picturesque spot amidst deep ravines and lofty forest trees upon the banks of the Hudson a short distance from the town of Poughkeepsie, is built in the Italian style of villa architecture, and contains a high tower and extensive piazzas, clustering with vines and flowers. In this delightful spot, adorned with all the chasteness of an artist's taste in the midst of a charming and affectionate family and a large circle of sympathising friends, the evening of life is passing away in quiet and undisturbed repose. He has seen the earth belted by his wondrous wires and still lives in good health to enjoy his old age.

Last summer we asked the privilege of putting his picture in our Magazine together with that of the first camera he used in photography. He at once gave us the promise that he would do so and ask his old friend Mr. Bogardus to make the negatives for us as soon as he returned to his city residence in the Fall. He was then in Poughkeepsie at his summer residence, Locust Grove. In October he made good his promise and sat for three double negatives as immovably as any one possibly could. We wrote him our thanks and stated that there was one more favor to ask in order to complete the gratification of our readers and us in the matter, namely his own account of his connection with photography. He promptly responded in his own handwriting, as follows:

New York, Nov 18th 1871

Edward L. Wilson, Esq.,
Dear Sir: In your letter of the 10th inst. you ask of me a sketch of my connection with the photographic art, I cheerfully comply with your request. In 1838 I visited Europe with telegraphic invention and early in the Spring of 1839 in Paris I

formed the acquaintance of M. Daguerre, whose discovery of fixing the image of the camera obscura, in connection with M. Niepce, was creating a great sensation in the scientific world. A proposition at this time was before the French Chamber of Deputies to grant to Messrs Daguerre and Niepce a pension, on condition that their process was given to the public. M. Daguerre had very freely shown to high officials the results of his process, but by the advice of the distinguished Arago, who had charge of the pension proposal in the Chambers, he abstained from any publicity of his results until his pension should be secured. At this same time my telegraph was exciting in the French Capital a similar sensation. I had made my arrangements to leave Paris without seeing these photographic results. He at once entered into my feelings and said, I think you will find no difficulty in obtaining a sight of them, drop a note to M. Daguerre and inviting you to see his results at his diorama where he had his laboratory and the day after accepted my invitation to witness the operation of my telegraph, and it is a noticeable incident that during the two hours in which he was with me his diorama and laboratory and the beautiful results I had seen the day before were consumed by fire. In my interview with him, however, I requested him as soon as his pension bill was passed and the publication of his process was made, to send me a copy of his work which he courteously promised to do and accordingly in the summer of 1839 I received from him probably the first copy which came to America. From this copy in which of course were the drawings of the necessary apparatus I had constructed the first daguerrotype apparatus made in the United States, my first effort with it was on a small plate of silvered copper about the size of a playing card procured from a hardware store, but defective as it was I obtained a good representation of the church of the Messiah in Broadway, taken from a back window in the New York City University, this was of course before the construction of the New York Hotel. This I believe to have been the first photograph ever taken in America. Perceiving in its earliest stages that photography was an invaluable and incalculable aid to the arts of design, I practised it for many months, taking pupils many of whom at this day are among the most prosperous photographers. I early made arrangements to experiment with my eminent friend and colleague in the University, Prof. John W. Draper, building for the purpose a photographic studio upon the top of the University. Here I believe were made the first successful attempts by Dr Draper in taking photographic portraits with the eyes open I having succeeded in taking portraits previously with the eyes shut for it was considered at that date that the clear sunlight upon the face was necessary to a result. And here it should be stated that in reply to the question which I put to M. Daguerre can not you apply this to portraiture he gave it as his opinion that it would be impracticable because in obtaining his results on still objects the time necessary was from fifteen to twenty minutes and he believed it impossible for any one to preserve an immovable position for that length of time. The quick or instantaneous processes were not discovered. Thus you have in brief my connection with the art which owes its existence to Messrs. Daguerre and Niepce

(Concluded on Fourth page.)

THE ACADIAN,

SEMI-MONTHLY

DAVISON BROS., Publishers and Proprietors.

A. M. HOARE, Editor,

WOLFVILLE, KING'S CO., N. S.

TERMS OF SUBSCRIPTION.—The ACADIAN is published on the second and fourth Friday of each month at

50cts. per Annum

in advance. Single copies 2 cents.

STANDARD TIME.

On the first day of March the City of Halifax and many of the towns of the Province adopted the time of the 60th parallel, which is exactly one hour faster than the time used by the W. & A. R. and fifteen minutes faster than true Halifax time. A bill is also to be introduced before the House of Assembly to have it made the legal time of the Province. In Wolfville, Mr. Geo. V. Rand has set his clock by that time and also the People's Bank and the Western Book & News Co. We hope the Institutions will soon adopt the same time and also the Churches. The Presbyterian church has already done so and the others should follow at once.

ENTERTAINMENT.

A company from Kentville composed of Mr. and Mrs. Barnett, Mr. and Mrs. Shadwell, Miss Pyke, Messrs. Medcalfe and Margeson gave a musical entertainment under the auspices of the Kentville Episcopal Church on Tuesday evening Feb. 26th. The music was all of a very high order. The violin and concertina solos as also the vocal music showing high artistic skill. All who were well up in musical art were doubtless delighted with it. It is, however, a great question in our mind if the majority could appreciate it. We are largely of the opinion that persons visiting Wolfville make a great mistake in not performing at least a small portion of the popular music of the day. To a large number the high class of music that is usually performed here while very difficult and showing great proficiency in this noble accomplishment, is as unintelligible as so much Greek or Latin would be, and is as much appreciated as a particularly fine essay or eloquent speech would be if delivered in either of those languages. We are not all professors of music and perhaps of those that usually attend seventy-five per cent go home feeling that it was very nice but they would have liked much better something they could more easily understand. It is of course a great misfortune not to be able to feel on this subject as a few do, but the number of misfortunate ones is greatly in the majority and for their benefit performers, catering to the public, should descend occasionally from their great heights and show a slight amount of condescension. One thing is certain, there is a medium between the very sublime and the utterly ridiculous which might be ventured upon without in the least compromising either the performers or the few highly educated

listeners.

THE PIBROCH.

Through the enterprise of Mr. D. A. Munro we were favored with a visit from the renowned "Jeck" Patterson, of Halifax, with his bagpipes with the music of which he made the Rink resound on Friday and Saturday last. By reputation we know Mr. Patterson to be a great musician in his own line but we doubt if pipe music will ever become the popular attraction of this part of the province. However it was a novelty and as such was duly appreciated. The Kentville *Bulldozer* says he "blew such a screagh." We are glad to hear it for we couldn't exactly place the name of it. We might also correct the *Bulldozer's* statement and say that the Bagpipes have been heard in Wolfville at least twice inside of five years. We refer to the time when His Excellency the Marquis of Lorne was here in 1880 and again last summer when the two itinerant musicians favored us with selections on the Bagpipes and Flageolet. Try again man.

FRESHET IN GASPEREAU.

Owing to the heavy rains and the large quantity of ice in the river the Gasperaux overflowed its banks doing a large amount of damage. The interval on each side is torn up badly. Mr. Rufus Forsyth's orchard is damaged to the extent of about two hundred dollars by the ice barking the trees. The flooring in Messrs. John Eldridge's and I. N. Coldwell's barns was floated up and their stock had to be removed to higher ground. On the north side the water rose higher than ever before coming up to Mr. E. A. Davison's new house and also depositing large ice-cakes on the road at the "tail race bridge." The Simpson bridge was carried from its place and taken quite a distance and was afterwards broken in two by wreckers for the purpose of getting the iron out of it. There is some talk of taking action against them for the wanton destruction of public property. Altogether it was a bad affair and will cost considerable money to repair damages. It is said that on the south side the water did not rise so high as on former occasions and not so much damage was done.

Testimonial of 1st Norton Church to its late Pastor Rev. Dr. deBlois.

WOLFVILLE, March 1st 1884.

At the Conference Meeting of the Church this afternoon the following resolutions were moved by Rev. Dr. Sawyer, seconded by Dr. Higgins and unanimously passed:

Whereas, this church has been called to mourn on account of the death of its pastor Rev. Stephen W. deBlois, D. D.

Resolved, that while we deeply feel the loss that has now come upon us, we do nevertheless thankfully acknowledge the goodness of God in enabling his servant to continue through the long period of twenty eight years a faithful and successful pastor, honored and beloved by his church and the community in which he lived.

That in view of our brother's devotion to the duties of his calling in public

and in private, his ability as a preacher, his desire at all times to minister to the spiritual comfort of the sick and the sorrowing, his prudence in directing the affairs of the church in times of difficulty and trial, and his readiness to promote every good work, that the fruits of the Spirit might abound in this church and congregation, it is our duty as it is also a pleasure, to place on our records our high estimation of those gifts, by which our brother was made a good minister of Jesus Christ, so that his labors through a protracted pastorate were continuously blessed in strengthening christians in the faith and in turning many unbelievers unto the Lord.

That, it becomes us to cherish the remembrance of our departed brother's patience, cheerfulness, helpfulness, and Christian trust so uniformly manifested by him during the long and painful illness which preceded his death, as well as the courtesy, kindness, forbearance and love of peace, which characterized him as a man and a christian through the entire period of his connection with this church, and which so greatly endeared him to its members and to all with whom he was associated.

That we hereby express our deepest sympathy with the family of the deceased in their sad bereavement, and the assurance of our prayers that the grace which was the support of departed brother, may be their consolation in this time of sorrow.

Resolved that the clerk be directed to communicate a copy of these resolutions to the family of the deceased.—*Christian Messenger.*

ANNAPOLIS ITEMS.

On Friday evening 22nd ult. a committee held a social "hop" in Fullerton's Hall. Music was furnished by the Annapolis Brass Band, and an enjoyable evening was spent. The proceeds, minus all expenses, went for the benefit of the band.

On Tuesday evening 26th ult. some of the ladies of the town who did not get enough dancing at the "hop" on Friday evening, got up a Surprise Party at Mrs. J. P. Edwards'. With the presence of about fifty couples, together with Mitchell's Band, the party was voted a complete success.

The Annapolis Dramatic Society has been giving the town several rare treats during the winter. We understand they intend giving another soon entitled: "War to the knife." The company deserve great praise for the masterly manner in which the other plays were performed and show "great native talent."

The Annapolis Royal Rink Co. held on Thursday 28th ult. a very exciting race in their rink. The prize, a silver cup, was gained by Mr. F. C. Whitman of this town. As a race was something new in Annapolis quite a number of people were in attendance, notwithstanding the severe storm. A boys' race was also held on the following Monday, which was almost equally as interesting. There were three prizes offered, a pair of skates, a pocket knife and fifty cents worth of rink tickets, which were carried off respectively by Masters William Miller, F. Hall and W. McLaughlin.

Local and other Matters.

"Crushed Again!" (Patience.)

ASSIGNMENT.—Mr. G. A. Porter, grocer, assigned to Mr. Owen Dickie on Feb. 26th.

Since our article on Standard Time was set up the Acadia Institutions have adopted it, the time being changed on Thursday.

The Hash Brigade of the Starvation Army has at last settled down. A new head has been put on the Commissariat Staff and the mutiny has about subsided.

SCOTT ACT.—Mr. Jas. Mac Intosh of Kentville was convicted last Thursday 28th Feb. of violation of the Scott Act and fined \$50 before Stipendiary Magistrate J. W. Hamilton.

On Wednesday evening 27th ult. while Mr. A. A. Jones and his son of Grand Pre were away from home some miscreant broke one of his windows. When will those rowdies be taught a practical lesson? (COM.)

[We are afraid we shall not live to see that day. Ed.]

CUSTOMS.—We understand that the name of this Out Port is to be changed from "Horton" to that of "Wolfville" at an early day. In view of the persistency of some Customs Brokers in bonding our goods to Port Williams, this will be hailed with delight by all importers.

I. O. O. F.—A new lodge was instituted at Hantsport on Thursday evening Feb. 28th by D. D. G. M. Jesse P. Smith of Windsor, assisted by members of "Pesaquid" Lodge, of Windsor, Orpheus Lodge, of Wolfville and others. The new lodge was named "Edwards," after the popular conductor of the W. & A. R. who is a prominent oddfellow in several ways.

Remember the Tournament at Wolfville Rink on Tuesday evening March 11th. The requisite number of entries have been made for all the contests and an exciting time may be expected. A Brass Band will be in attendance and the Band, Electric Light and Fancy Skating will commence at 7.45 sharp, all who desire may skate after the contests, about 9 o'clock. Admission 25 cents

D. A. Munro.

Local and other Matters.

March made a very loud bow in entering upon its arduous duties for 1884. We hope it will cease its boisterousness now and be a quiet respectable month.

We regret to learn of the very serious illness of Mr. Rufus Forsyth of Gaspereaux who has been suffering from a severe attack of Pneumonia. He is now convalescent.

We see by the reports of the proceedings of the House of Commons at Ottawa that the member for King's (Mr. Woodworth) has crossed swords with the Hon. Edward Blake and has come out victorious.

Don't forget the Skating Tournament next Tuesday night. It is exciting considerable comment just now and a close competition will be had in all the races. Hantsport Band is among the attractions.

RELIGIOUS.—The Methodist Congregation of this place has been holding a series of special meetings during the last two weeks, under the leadership of their pastor, Mr. Butterick. They have succeeded in creating quite an interest, and a rich ingathering is expected to result therefrom.

There has also been a great revival in Gaspereaux under an evangelist named Young. Twenty nine candidates received the ordinance of baptism by immersion in the Gaspereaux River at White Rock last Sunday.

WOLFVILLE PLANING AND MOULDING MILL.—Mouldings of any shape or size to 9 inches wide, and stair rails on hand or made to order. Also pine boards planed and matched. Dry pine lumber always on hand.

D. A. Munro.

Wolfville, Oct. 12th, 1883.

The two Hartford colts owned by Drs. Bowles and Bars and whose actions have been looked upon with much interest by the sporting part of the village as giving great promise for the future have been sold to Mr. C. R. Bill and will be sent to the States as a matched pair. We are sorry they have gone out of the county but hope they will uphold the standard of Nova Scotia on the other side of the National Policy line.

The Kentville Bulldozer is still making its weekly appearance brimfull of quack medicine advertisements, stale jokes and glaring local errors. The last stroke of smartness was in the notice of the death of the late Capt. Curry which it gave as "Capt. Eben Harvey" and also a frightfully bungled item in reference to the Gaspereaux flood of which the only correct parts were that there was a freshet and Simpson bridge was carried away. We imagine that it would take a great many grammars and spelling-books to endow it with anything like a visible amount of even common sense.

Wolfville, Oct 10th, 1883.

WOLFVILLE SKATING RINK,

Open every afternoon from 3 till 5.30 o'clock; and Monday, Wednesday and Friday evenings from 7 till 10 o'clock.

(Continued from First page.)

and in which I profess to be only a humble follower. The wonderful improvements which have since been made by scores of ingenious men in various countries have established the photographic art as one of the most useful as well as beautiful discoveries of the age. As to a sketch of my life I would refer you to a biography in Harper's Monthly of January 1863 which so far as facts are concerned is the best I have ever seen.

With respect, your obedient servant
Samuel F. B. Morse.

We regret that we cannot reproduce the letter in his own handwriting but a fac-simile of his signature will be found on the mount. His writing is bolder and clearer than that of most men half his age. Our best and united thanks are assuredly due to him for the pleasure and gratification he has given us, and for the early befriending of our art. When Photography was a tender infant holding up its tiny hands, crying for some one to take it up and nurture it in this country, the artistic feelings of Prof. Morse were touched and he brought the infant carefully across the ocean to its native home where it has thrived and grown immeasurably. For this we laud Prof. Morse and his memory shall be perpetuated in our minds as the Father of American Photography.

Has a fine stock of Cloths which will be sold Cheap.

JOHN W. WALLACE,
BARRISTER-AT-LAW,
NOTARY, CONVEYANCER, ETC

Also General Agent for FIRE and LIFE INSURANCE.
WOLFVILLE, N. S.

A. C. REDDEN,

IMPORTER AND DEALER IN

Pianos & Organs

AMERICAN & CANADIAN.

From the Medium Priced

To the Highest Grades.

"The best is the cheapest" but the cheapest is seldom best.

A. C. Redden is actually giving much better bargains than you can get direct from the makers themselves.

He is selling the MASON & HAMLIN Organ direct from factory to his customers \$5 to \$50 less than they could do at the factory.

Compare his prices with theirs and you will see that this is true.

Address:—**A. C. REDDEN,**
Wolfville,

General Agent for Nova Scotia for the Beautiful "BOSTON" Sewing Machine.

Be sure and write for prices and terms before buying elsewhere.

Wolfville, Nov. 3rd. 1883.
