The next instant the tramp was sprawling flet on the ground, for the huge bird had struck him fairly on the head and shoulders. With an exclamation of angry surprise, he scrambled to his feet, attempting to "shoo" the gander away. But little did Hezekiah care for that. Hissing fiercely, his redrimmed blue eyes flaming with rage, he flew upon the man's back, catching his hair in his powerful bill, and there he hung, his toenails firmly hooked into his victim's coat and his great wings giving hard blows.

knocked out of his body, the tramp stamped and clawed the air wildly, as he vainly tried to dislodge the savage gander, and Mollie, from the storehouse window, watched the scene in hysterical delight. The Recorder presents its readers with some interesting facts about the past season of the Provincial turf, which will be read with interest by horsemen. Terrel S. (p) by Strathmore, who is owned by J. E. Morse, St. John, is the fastest Provincial owned horse of the season, having made a record of 2 10½. Warren Guy, by Princeer, owned by Harry Lydiard, Kentville, and others in Yarmouth, has been the sensational trotter, having reduced bis record to 2 12½. Lottie P. (p.) by Brazilian, owned in New York, is the fastest Provincial bred animal on the turf this season, having made a record of 2.14½. J. R. Lamy's, Amherst, Minota, and Redden Bros.' Montrose, Charlottetown, made the fastest miles on the Provincial turf this season—2 21½, the former at Halifax and the latter at Woodstock, and S. B. Hill's, St. Stephen, Rowdy, made the fastest mile by any pacer—2 21½, at Woodstock. Peter Clinch, 2.24½, owned by Lee Manning, Chester, is the fastest new comer to the 2.30 list in the Provinces this season, and Romp, 2.26, owned by J. A. Leaman & Co., made the fastest record of any horse starting without having any previous mark. Rampart added two more to the list this season, Romp, 2.26, Andrew, 2.30, and is now the sire of ten in the charmed circle, a record made by no other horse which has stood solely in the Maritime Provinces. Brazilian was the only other Provincial sire to get two in the list this season—Lottie P., 2.14½, and Virginia J., 2.25.

Poor Prospects for International Peace. Berlin, November 24 -On account of the Berlin, November 24.—On account of the limited capacity of Russian naval shipyards, the Russian government has made overtures to Germany for the construction of a number of large warships in Stettin. Germany, however, had to decline, as the German shipyards are overwhelmed with orders, the filling of which will occupy several years. Russia has also been informed that the small capacity of the French shipyards renders the building of Russian warships there impossible for the present. Since the Russian government will make no contracts with British firms, negotiations are in progress with the ernment will make no contracts with British firms, negotiations are in progress with the Krupp and Vulcan firms for the construction of new shipyards in Russia and for the employment of German engineers and workmen until such time as Russia is able to educate her own ship builders. The offers to the Krupp and Vulcan firms are exceedingly advantageous, Russia promising to assume all risks and even guaranteeing a remunerative profit. The Berlin newspapers, commenting on these facts, call this feverish martial activity on the part of Russia an interesting satire on the czar's appeal for international disarmament and universal peace.

Canadian Hay in Great Britain.

Ottawa, Nov. 26.—Replying to inquiries from the Maritime Provinces relative to the market in Great Britain for hay, the Canadian High Commissioner's effice, in London has sent reports to the Department of Trade and Commerce which indicate that in Liverpool at present there is a large quantity of Quandian hay, meeting with a slow sale at about \$12.15 per ton of 2,240 pounds. This is said to be owing to the abundant hay crop in England. It is anticipated that the demand will increase as the season advances. The present price in Glasgow is given by a leading firm at \$14.00, but they express doubts as to whether hay grown in the Maritime Provinces would be of equal quality with that grown in the west.

In the evening the grand ball took place, at which about 200 guests were present including, besides residents of Bridgetown and vicioity, a number from Halifax, Annapolis and other towns, viz:—Miss Taylor, Miss Lithgow, Mr. Jack Taylor, Mr. F. Tron abe, Halifax; Mr. and Mrs. J. B. Mills, Mr. and Mrs. J. J. Ritchie, Mrs. Lombard, Miss Arnaud, the Missee Leavitt, Miss Corbitt, Annapolis; Miss Rose, Ottawa; Mcs. H. W. B. Flint, Yarmouth; Mayor Johnston, Halifax; Mr. Melville, W. I.

A description of the building and its various apartments has been given in a previous issue. The Bank of Nova Scotia offices were closed off, having no entrance into the main building, but with this exception the entire block was thrown open, and the whole brilliantly illuminated by electricity. The council room, a fine apartment with a handsome metal ceiling and sheathed wainseot, and the spacious store occupying the floor below were decorated and set apart for the ball rooms. Two large efficies in the upper flut were furnished as parlors and contained a number of card tables for the many who preferred that form of entertainment to dancing. The supper table, loaded with choice and delicious viands, occupied another room, presided over by deft-handed, whitecapped waitresses and amply serving all the requirements of a "running supper." Ocher apartments served as dressing room.

The Washington Conference.

Washington, Nov. 25.—In the Atlantic fishery branch of the subject now before the Anglo-American commissioners, Canada declined to give the fisheries for free fish and offered, literally as the United States negotiators thought, to grant in return for the removal of the fish duties every possible commercial advantage, save and except the right to fish in Canadian water. The Canadian commissioners, it is understood, have now widened the offer to its fullest extent and have declared their willingness to yield the use of the fisheries and to suspend all the restrictions of the treaty of 1818 which Sir Wilfred Laurier has pronounced obsolete the restrictions of the treaty of 1818 which Sir Wilfred Laurier has pronounced obsolete and unfriendly, provided Canadian fish be allowed to enter the United States free of duty. The offer is mixed up with the lumber question. It is said that if the United States will give free fish and free lumber Canada will yield the fisheries and concede the logs. The proposition is givened with much favor by the United States side. Two classes of people, however, object to it, the Gloucester fish trust and the southern lumbermen. The former hold that it can score a sufficient former hold that it can scoure a sufficient modification of the regulations of 1818 from the Canadian Government, these regulations having been relaxed already without making any free fish concession. The latter do not want free lumber. They have the run of their own market with free trade in the British market and they do not care what becomes of the Michigan men. It is rumored may that the fishery branch of the negotiations has come to a standstill for the present, notwithstanding the liberality of the Canadian offer. But the offer is valuable in that it will be a basis for future negotiations. it will be a basis for future negotiations.

When darkness came she of much speculation to the fishermen whose little cottages were the only residences in Next morning the vessel was gone, but there was a man, or a piece of a man, on the beach. His legs had been cut off above the knees The work had been recently done and by a skilful hand. The wounded stumps were carefully bandaged. The man was appar ently about 19 years old, with soft, flaxen hair and blue eyes. His white skin, delicate features and shapely hands betokened that up. His underclothing was of finest linen and his other garments of good material, but of cut differing from that of any people the fishermen had ever seen. He seemed to be suffering from the effects of some terrible shock. Beside him on the beach were a

small keg of water and a bag of ship biscuit. He was taken to one of the cottages and nursed and cared for. He gradually recovered, but was gloomy and silent. Simplify Home Life.

Women need more than anything else to learn how to economize time and strength, or their ideas of perfect housekeeping and of the duties of wife and mother are becoming so high that an enormous expenditure of nervous force is necessary to attain them under present conditions, says the Brooklyn Eagle. The average matron of to-day tries not only to superintend her kitchen so that there shall be no waste of food, but so that evey arrangement shall be sanitary and scientifically perfect, according to the new light thrown on the subject by domestic ence teaching. Throughout the whole house she aims to maintain a high standard f home comforts and absolute cleanliness. But the superintendence of the housework in all its many branches is the least important of her duties, for she has high ideals of how her children should be trained and she tries to keep in touch with their school life day by day. To be the companion to her husband that she ought, she knows that she must interest herself in his pursuits and hobbies. Add to all this her attempts to keep up with her social duties and outside inter-

ests, and hers is the pace that kills. Neither is she willing to dispense with the mary modern accessories that are deemed essential in the modern artistic home. She is told that the perfect serenity and sweetness of expression of the Japanese women is due to their freedom of care, especially to never married in me loife." their unchanging fashion of dress, their simplicity of diet and absence of fussy furnish ings in the home, but such is her pride in her elaborate system of housekeeping that she has no intention of sparing herself a bit of work even to gain such enviable serenity.

She thinks she is equal to it all, and for a time she is, but the breakdown is sure to come sooner or later. One great lesson she has to learn is that the home life must be simplified in every way possible, that there must be less bric-a-brac and fewer draperies to keep dusted, there must be fewer dinner courses and she must learn to draw the line in outside interests; in other words, she must

The Over-Precise Housekeeper

The first and greatest requisites in a house keeper are system and method. Equipped with these and a tolerably equable temper, she is prepared to face an army of servants. and to bring order out of chaos. But by system and method I do not mean the wretched cut-and-dried precision with which some housekeepers (I regret to say they, with some show of truth, call themselves "oldfashioned") make their homes wretched and forbidding alike to their man-servant, maidservant and to the stranger that is within

their gates.

I can recall some houses in which it has been my hard lot to find myself a sojourner, wherein, should one so much as walk through a drawing-room, the hostess could detect the fact as readily and as unerringly as the red Indian could detect the trail of a settler passing through the forest. A book on the side table, which for countless years had lain with its title up and its length northeast by southwest, may now be headed north northeast by south-southwest. The parlor-maid could never have been guilty of such carelessness. For all those countless years of her colorless and wretched existence each morning she has carefully your hat.

lifted and dusted that same book and placed it in mathematically the same position. Evidently strangers, vandals, perhaps, have been about. And there's that sofa cushion nearly two inches out of place. "Mary! Mary! Do come and put this room into some sort of order again."

Such housekeepers as that should be relegated to the same bourne as the slef-martyred flagellants and the wearers of hore-hair shirts. Perhaps they may derive some morbid enjoyment from their miseries, but they render unhappy all with whom they come in contact. gether."

This is the season when every housekeeper is cleaning rogs. The Turks never shake heavy rugs holding them at the ends, but always grasp a rug at the side. The best way of all is to lay the rug on clean grass or boards, face down. Beat it thoroughly to dislodge the dust, then brush it perfectly clean and hang on a line to air. It is well to select a dull day for this sort of cleaning, as the sun should not be allowed to shine on a the sun should not be allowed to shine on a rug for any length of time.
