Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

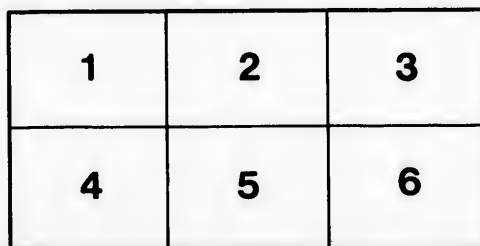

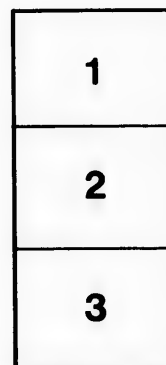

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

1776—CENTENNIAL—1876.

Never in the History of Nova Scotia was such an opportunity presented to every householder as in this Centennial Year, to refurnish or to add to their household effects.

We have now on hand the largest and best assorted stock of first-class

FURNITURE

ever offered in the Dominion, which we are selling at prices that defy competition. Never were prices so low! They have at last struck bottom, and now is the time to buy.

CHAMBER FURNITURE A SPECIALTY.

35 different styles and prices, from \$20.00 to \$200.00 per suite, some very handsome.

Parlor Suites

in great variety, from \$50.00 upwards, solid Walnut frame with first class upholstery in Hair Cloth, Reps, Broccader, &c., &c.

CANE AND WOOD SEAT CHAIRS AND BEDSTEADS we have by the million, our \$1.00 Cane Seat Grecian is by far the cheapest and best in the market.

OUR \$2.00 HARDWOOD BEDSTEAD cannot be beat in America.

OUR NEW STYLE SOLID COMFORT UPHOLSTERED EASY CHAIR for \$6.00 beats anything ever offered for the money.

Iron Bedsteads, Mattresses, Lounges, Sofas, Bureaus, Tables, Pails, Tubs, Washboards, Glasses, Clothes Wringers, Bird Cages, Children's Carriages, in great variety, Spring Bed Bottoms, &c., &c.

Our Reputation as the Cheapest First Class Furniture Establishment of the Province we are bound to sustain. Orders by Mail carefully attended to.

SUPER-PHOSPHATES OF LIME!

Patronized by the President of the Board of Agriculture of Arts,
 and other large Farmers.

GRAND SUBSTITUTES FOR BARN-YARD MANURES.

They will suit any kind of land that needs manuring, and any kind of
 crop, as they contain most of the elements necessary for their growth.
 Their liberal use in *early* Spring is almost a sure preventive against
 injury from dry seasons.

They will produce good crops of Wheat from lands that have become
 exhausted, and are invaluable as a top dressing for Fall Wheat after a
 severe Winter.

They will probably double the Hay crop if judiciously applied.

They will greatly increase the yield of Indian Corn, which is one of
 the most profitable crops that can be grown.

They will almost double the Potato crop, if judiciously used in suffi-
 cient quantity with proper cultivation, and in many cases prevent rot.

They are a specific for Mangels, Carrots, Turnips, and all root crops,
 and if applied in sufficient quantity will yield a large return.

Will take about 300 to 500 pounds per acre for an ordinary crop, and
 will not cost much more per acre than *hauling and spreading* barn-yard
 manure at a busy season of the year.

Manufactured at the Brockville Chemical and Super-phosphate Works,
 Brockville.

Can be shipped to any point on the railroads at a low special mileage
 rate of freight.

Put up in Barrels of 250 lbs. each. 8 to the ton. Price at Brockville
 per 2000 lbs.: Unammoniated X, \$32; Ammoniated XX, \$40; Ammonia
 and Potash XXX, \$50; Phosphatic Guano XXXX, \$56; Pure Dissolved
 Bone, \$40; Pure Bone Dust, \$35.

NERS!

First Reason consists in the method of fastening the glass, the simplicity and practicability of which cannot fail to give general satisfaction, as in case of breakage at sea any person who can unscrew a nut can replace the glass, thereby causing a great saving and avoiding much inconvenience.

Second—The method of fastening the door is a most important improvement on the old one. You can readily see (as shown in cut) that by a single motion you fasten the door at the top and bottom, and compress it into *rubber strips*, with which the door recess is faced; this prevents an indraught of air above the level of the light, a flicker or unsteadiness of flame, causes a brighter light, and renders the smoking of the glass impossible.

Third—The ventilation is a not less important reason, as owing to the principle upon which it is based, it renders extinguishing the light an impossibility. One trial will convince the most incredulous.

The Fourth and last, but by no means one to be forgotten, is the fact that those SUPERIOR LANTERNS are placed in the market at as "low a price" as any. This alone should induce ship owners and masters to give them one trial, after which we feel convinced they would not sail without them.

MORNING AND EVENING PLANETS.—1877.

♿ MERCURY—will be an Evening Star until about the 20th January, and in conjunction with the Sun on the 26th. It rises on the 1st February 54 minutes before the Sun, and continues a Morning Star until the third week in March. On the 6th April it will be in conjunction with the Sun,—then an Evening Star from the middle of April until the 19th May, when it sets 53 minutes after sunset. It will again be in conjunction with the Sun on the 26th May; a Morning Star after the 5th June; in conjunction with the Sun July 20; an Evening Star from the beginning of August; in conjunction with the Sun September 26; a Morning Star from the 1st October; in conjunction with the Sun on the 13th of November; and an Evening Star from about the middle of December.

♀ VENUS.—On the 1st January Venus rises 2h. 26m. before the Sun, and will be a Morning Star until the beginning of March. It will be in conjunction with the Sun May 6. Sets on the 1st June about half an hour after sunset, and continues an Evening Star for the remainder of the year. It will be above the horizon between 2 and 4 hours after sunset from the beginning of November to the end of December.

♂ MARS—rises on the 2nd January about 3h. 45m. morning, and will be a Morning Star until the second week in September, when it souths between sunset and midnight. After that it will be an Evening Star during the rest of the year. It will be above the horizon the greater portion of each night from the beginning of August until the middle of October; it then sets about 2h. 20m. morning.

♃ JUPITER.—From the beginning of January until about the 20th June Jupiter will be a Morning Star. On the 1st January it rises at 6h. morning, and on the 20th June it rises 7h. 37m. afternoon, souths 11h. 56m. and sets June 21 at 4h. 15m. morning. After that it will be an Evening Star until the end of December. During June and July it rises in the early evening and sets between midnight and sunrise.

♄ SATURN.—Until the middle of February Saturn will be an Evening Star. It rises about an hour before the Sun in the beginning of April, and continues a Morning Star until the 9th September; it then souths before midnight, and will be an Evening Star the remainder of the year. On the 1st August it rises at 9h. 5m. afternoon, and will be above the horizon throughout each night until about the end of September.

ECLIPSES IN 1877.

In the year 1877 there will be three Eclipses of the Sun and two of the Moon.

The Sun's Declination and Equation of Time are given for Noon; the Moon's Declination for Midnight—Mean Time at Greenwich.

FOR THE LENGTH OF THE DAY.—Add 12 hours to the time of the Sun's setting, and from the sum subtract the time of rising.

FOR THE LENGTH OF THE NIGHT.—Subtract the time of Sun's setting from 12 hours, and to the remainder add the time of rising next morning.

THE TIDES will be found in Calendar pages, and in *Tide Table*, page 78.

WEATHER GUIDE.

The following Table (the result of many years' actual observation) is ascribed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters.

Moon.	Time of Change.	In Summer.	In Winter.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens	Between midnight and 2 in the morning.	Fair.	Hard Frost unless wind be S. or W.
	Between 2 and 4 morn.	Cold with showers.	Snow & stormy.
	" 4 and 6 "	Rain.	Stormy & rainy.
	" 6 and 8 "	Wind and rain.	Stormy.
	" 8 and 10 "	Variable.	Rain if wind W. Snow if E.
	" 10 and 12 "	Showery.	Cold and high wind.
	At 12 Noon, and to 2 in the afternoon.	Very rainy.	Snow or rain.
	Between 2 and 4 after.	Variable.	Fair and mild.
	" 4 and 6 "	Fair.	Fair.
	" 6 and 8 "	Fair if wind be N. W. Rainy if S. or S. W.	Frosty if wind N or N.E. Snow if S. or S. W.
" 8 and 10 "	Ditto. Ditto.	Ditto. Ditto.	
" 10 and midnight.	Fair.	Fair and frosty.	

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week; the nearer noon any of those changes happen, the more foul and wet will be the weather that will follow.

JANUARY.—We know that even the most experienced farmers and gardeners are in the habit of consulting their CALENDAR every month in the year, for in every month there is some kind of work that can be better or more conveniently done than at other times, and neglect of which will entail loss or inconvenience. The great use of the Calendar is not to instruct but to remind. In January the weather is often unsuitable for all kinds of open air work, at least until the snow comes to make chopping comfortable. The short day light limits even the time that can be employed about the barn yard. The industrious farmer is thus shut up to his workshop or house, and can give more attention than usual to his horses and cattle. If he has fattening stock and plenty of roots, attention to them will take up a large portion of his time. During the long evenings the farm books and accounts may be put in order, the fields may be mapped out for the season's cropping, and an estimate formed of the manure and seed required. Scientific

Agriculture is now rapidly taking the place of common farming, and young men who are ambitious to take places in the front rank can only do so by scientific study. If they cannot afford to take a winter at college for the acquisition of such subjects as Mathematics, Mechanics, Chemistry, Botany and Anatomy, upon which Scientific Agriculture is founded,—the best plan will be to lay out a course of reading in these subjects, which may be pursued in the winter evenings. The Clergyman or Doctor or Schoolmaster of the district will certainly know something of such subjects, and will usually be willing to give advice or a helping hand to any deserving youth. The peculiarities and distinctive properties of the different breeds of cattle may likewise be read up at this season, and the descriptions of the books compared with the thorough-bred animals which will now be found in neighbouring barns is most parts of the Province. is kept the Stock Register should be gone carefully over at this season, so as to be ready for the entry of the spring calves as they drop in. The full pedigree of the dams and sires should be entered first. A convenient form of record of the calves &c., is a foolscap book ruled in columns for the following items, so that one line will contain the history of an animal, viz:—1, Number; 2, Name; 3, Sire; 4, Dam; 5, When calved; 6, From whom or how obtained; 7, How disposed of. Where difficulties occur in making up a pedigree, application may be made to the Secretary of the Board of Agriculture, who keeps a set of reference Herd Books for this purpose.

FEBRUARY.—This is the month in which cattle are most likely to begin to fall off; and when once the beginning is made, it is up-hill work to attempt to stop it. Ears may be faulty, and the cold is severely felt, the root cellar may be troublesome to get at, and the ani-

mals miss occasional meals, the wells may be frozen and the way to watering places may be so slippery that the cattle cannot reach them without discomfort or positive accident. In order to overcome these and many other difficulties that appear in February, it is a good rule to give extra time and attention to the stock. In feeding grain and meal always mix them into cut hay, otherwise they do not undergo the second mastication, but pass through the alimentary canal before a large portion of their nutritious material has been absorbed. Cattle should go out every day to water. If kept on the board floors all winter they are apt to become lame, partly from want of exercise, and partly from excessive growth of their hooves, which in spring-time will be found projecting forward like Chinese slippers.

Eagar's Peruvian Bitters produce Health, Strength and Vigor.

MARCH.—The first outdoor preparation for cropping is to be made this month. Every farm should have a garden plot to furnish the family with vegetables, and summer vegetables—many of them—cannot be successfully raised without being started in an early hot bed. The instructions given on a former occasion are just as applicable this year:—This is hot bed month, and how to make a hot-bed is a secret worth knowing. Select a sheltered spot, protected from animals, lying to the sun, and near a well or water butt. Build on this space a neat pile of manure, of such a size that when the frame is put on top, there will be a clear foot of manure outside all round. Cow manure will not heat at this season. Horse manure will not heat at this season, if the animal has not been fed upon oats or some kind of grain. Keeping these facts in view you

can select your manure, or make such a mixture as will give the degree of heat required. Spread over the manure, inside the frame, about four or five inches of very fine soil; this should have been prepared in the Fall, and kept dry under cover all winter,—otherwise it is likely now to be a hard frozen mass. The glass sashes are then to be put on and kept close till the hot bed heats; the steam and heat will start the seeds of weeds, which may be allowed to grow. Air is then given, and when the heat modifies, weed and rake the surface and sow your spring seeds,—cauliflowers, cabbages, celery, tomatoes, &c., for the kitchen garden; and stocks, verbenas, petunias, asters, balsams, and such like annuals for flower-garden ornament. The seeds will bear a good deal of heat before they emerge from the soil, but as soon as the first leaves begin to appear the frame must be aired daily, taking care to avoid cold draughts.

APRIL.—Should the season prove early, and the soil be in a condition to admit of cultivation, all those crops that do not suffer from early spring frosts and require a long season or the cool weather of spring for their successful culture, should now be put in. For such crops the soil has of course been prepared and probably manured during the previous fall. The crops that especially require early sowing are peas, broadbeans, parsnips, onions, carrots. Towards the close of the month, the fields generally may be in a condition for working. Field peas, horse beans, tares, oats, and wheat should be put in as early as possible.

Wherever the land is dry potatoes cannot be put in too soon. We have seen splendid crops of potatoes raised where they were planted so early that heavy snowstorms intervened before they came above ground. The gardens should be gone over, and all small fruits, such as currants, gooseberries, strawberries, raspberries &c., carefully dressed. If manured the previous fall so much the better. All unfrozen manure should be carted out upon the fields whilst there is still a crust of frozen soil to support the wheels.

EAGAR'S COUGH BALSAM.

MAY.—We believe that early sowing and planting is the great secret of successful farming in Nova Scotia, and it is only possible to the active and energetic man. The farmer should be so busy this month, taking advantage of every fit day, as to feel that he has scarcely time to look into the Almanac. Still let him not forget to do so. We consult his convenience by merely jotting down brief memoranda:—Plough every day that ploughing can be done; take out manure as expeditiously as possible; sow or plant everything that has not been already sown or planted in field or garden, with the following exceptions,—corn, tomatoes, bush and pole beans, cucumbers, squashes, turnips, cabbages, all of which require to be put into ground already warm. One great difficulty we have had to contend with is want of

manure. But now we may supplement our barn yard product by superphosphate or by ground bones, which are supplied at the bone mill at Wellington Tannery, Graft apple trees, &c., finish top-dressing of grass, put fences in order, plant fruit and ornamental trees, clean out cellars. After planting is done, whitewash with lime all the buildings, especially the interior of stables and cow houses. The lime withdraws carbonic oxide, a poisonous gas, given off from the lungs of animals, and thus preserves the purity of the surrounding atmosphere. If the "breaking up" of spring time has left a few holes or runs in the road in front of your farm, it may be profitable policy to fill them up, and not wait for the statute labour or road commission man, who will not probably come until you have broken some wheels and shaken your own nerves and those of your family to a greater extent than a day's work.

Eagar's Cholera Mixture cures Cramps, Dysentery, Diarrhoea.

JUNE.—The drill crops put in during April and May will now require attention, first in the way of hand hoeing, where this has to be done, and secondly by the use of the horse hoe or cultivator. But there are still some crops to be planted or sown. Put out cabbages and cauliflowers, but only in light soil that has been well worked and well enriched. The *Haltica*, or turnip flea, is the great enemy of the cabbage; all efforts at his destruction have failed, and the only effective way of waging war with him is to treat him generously by sowing, between the cabbage rows, common white mustard, the young seedling plants of which are

far more palatable than cabbage. Tomatoes also may be set out later in the month. Ground cherries do best when they come up from seed in the soil, which they will do for years. Finish planting everything now in field and garden, such as Indian corn, bush and pole beans, cucumbers, squashes, turnips. Tender plants may now be put out in the flower beds. Do not touch strawberry plants by weeding or hoeing, and do not now hoe around raspberry canes, otherwise the fruit will not form. Celery may be planted out at the end of the month.

JULY.—Turnip sowing may still be done. Some prefer to sow their Swedes this month, and the soft Turnips need not be sown till the end of July. The ground should have undergone a thorough pulverization. Light sandy soil is the best for turnips. They start best after the ground is warm, but the bulbs swell most rapidly during the cool dewy nights of Autumn. The soil cannot be worked too deep or made too fine for turnips. Town manures are valued for this crop; and crushed bones have been applied with the best effects, either when covered in the drills in the manner of ordinary dung, or when sown by machine along with the

seeds, so as to be in immediate contact with the latter. Guano has been largely used of late years. Superphosphate is very efficacious. One point of turnip culture that is often neglected in Nova Scotia, although well understood elsewhere is that the seed should be put in the moment the soil is prepared. If the earth of the prepared drills gets dried up in the sun before the seed is committed to it how can the latter be expected to germinate. Hoeing and weeding of all drill crops should be carried on actively this month and completed before haying time. Get your haying apparatus and implements in order. Get the kitchen and flower gardens in good order before haying begins, as there will be "no time" then.

AUGUST.—Haying is the chief operation during the early part of this month, and everything else is usually sacrificed to it. This is necessarily the case where hay is the principal or only important crop, as on many of our farms. What is required is a mixed husbandry, so that cattle may not be fed on hay all winter and pastured in summer, but fed in winter on straw and roots and coarse grain, and in summer partially or wholly on green fodder in-doors. This is the only way to enrich a farm, or to attain to anything like high farming. We therefore

recommend our readers to note at this season how convenient it is to have a field of tares or green oats or barley or Indian corn or rape, or any other green, eatable thing for the cattle to grow or fatten upon when the pastures are all burnt up. After haying there will be work in the garden and especially in the orchard. Look after the ripening fruit, destroy caterpillars, if any still remain; pick the early August apples, and send them into market. When the rains come beds of strawberries may be made up. See that the ground is well drained and enriched with old manure. Mushrooms now appear in the horse pastures.

SEPTEMBER—Those enterprising farmers who are looking forward to taking prizes at the Fall Exhibition will now be busy with their live stock. Feed is the main thing to fit an animal for Exhibition, but there are other matters to be attended to as well, such as careful grooming and kindly treatment. It will be proper now to estimate what stock should be kept during the ensuing winter, so that any surplus may be sold off, either in present condition or after being fattened off with some extra feed which is easily accomplished at this season on waste

material, when grain is being cleaned and roots taken up. Sheep should be dipped or washed with some suitable sheep dip, if there is any appearance of ticks, as the eggs hatch out in winter time and the young ticks are very troublesome to the sheep, causing loss not only of wool but of condition and health. It is a good plan to wash or smear twice a year, in Spring when the wool is taken off and in Fall when the eggs are being laid in the wool. Sheep to be healthy and profitable should be free from ticks.

Eagar's Cholera Mixture cures Cramps, Dysentery, Diarrhoea.

OCTOBER.—Where roots are cultivated (and they ought to be on every farm to a much larger extent than they are at the present time in Nova Scotia), the farmer's chief work this month will be in taking up his root crops. We have said nothing about grain, because every farmer is likely to look after that, and harvest it carefully. But in regard to root crops there is a good deal of misconception. To take up and store roots successfully is a simple art when properly understood, but the frequent destruction of roots in the cellar shows that it is not always understood or carried out. Potatoes should be dug in dry weather, and allowed to dry completely on the surface before being put

together in heaps or in the cellar; the best way is to put them on a barn floor and exclude the light, otherwise they will become green and acquire a bitter taste and poisonous qualities. Mangels, turnips and carrots should be topped and the fine root fibres cut off. Before storing they should, in like manner, be exposed to dry air that the wounds may heal over; if put at once into the cellar, the wounded tissue will begin to ferment, and a large portion of the roots will be rotted by contact. If facts such as these are kept clearly in view, no farmer need lose his roots. Of course the cellar must be kept well aired and dry, and frost carefully excluded.

NOVEMBER.—Agricultural societies are apt to forget that their arrangements for the following season, in regard to animals, are most profitably made at this time of year. Every society keeps, or ought to keep, a sufficient number of male animals for the use of members. If the selection and purchase of these be deferred till spring time, large prices have to be paid, and the demand is usually so great that suitable animals cannot be obtained. For beef cattle the Short Horn Durham breed is the best; their growth is more rapid than that of any other kind. For milk alone, Ayrshires are to be preferred, Devons make the best working oxen, they are quick, active, and easily fed. For domestic cows in the city the creamy Aldernays or Jerseys are most suitable. In King's County there are several breeders of pure Short Horns, such as Messrs Eaton, Margeson, Bowser, Chase,

Jacques, Chipman, and a few in other Counties,—as Mr. Fraser, at Shubenacadie, and Professor Lawson, near Bedford. The principal breeders of Ayrshires are Messrs Blandhard, Trusa, Colonel Starratt and Messrs Balcom and Longley, Paradise, Dr. Lewis, Halifax, Mr. Burrell, Yarmouth, Rev H. P. Allen, and Mr. Wiggins, Windsor. Messrs Anderson, Duffus, Esson and Black of Halifax have taken great pains to haport pure Jersey stock, which is also possessed by Mr. Lengworth of Trusa, Mr. Patten, Ebron, Yarmouth, and probably some others. Colonel Laurie's Herd of Devons at Oakfield, the finest in the Dominion, is well known. We mention these Herds in order that Societies and Agriculturalists desirous of purchasing may know where to find suitable animals.

EAGAR'S COUGH BALSAM.

DECEMBER.—There are now seventy Agricultural Societies in this Province, with a Membership of nearly five thousand. These societies are organized under the Central Board of Agriculture, and each Society is entitled to draw from the provincial Treasury (through the Board) an annual grant in aid to promote its operations. The special purpose of a society is to improve the live stock of its district, which is accomplished by obtaining and keeping for the use of Members superior male animals, such as bulls, rams and boars. Societies may also introduce seeds of new varieties of grain, roots, and also improved implements not previously used in the district. Exhibitions are held by some Societies or by the Societies of a county combining. The whole of the societies of the

DEPARTMENT OF LAW AND JUSTICE.

SUPREME COURT OF CANADA.

Chief Justice—Hon William Buell Richards.

Judges—Hon William Johnston Ritchie, Hon Samuel Henry Strong, Hon Jean Thomas Taschereau, Hon Telesphore Fournier, Hon William A. Henry.

Registrar and Reporter—Robert Cassels, Jr.

This Court and the Exchequer Court were organized under the provisions of 38 Vict. cap. 11.

The Supreme Court has both original and appellate jurisdiction—Original, as to (1) habeas corpus in criminal and extradition cases; (2) judicial opinions to the Crown; (3) private bills and petitions therefor referred by the Senate or House of Commons; and (4) civil suits in which the validity of a Dominion or Provincial Act is questioned. Appellate, in appeals (1) from the Exchequer Court; (2) from the Provincial Courts; (3) in habeas corpus cases; and (4) in election cases.

THE EXCHEQUER COURT OF CANADA.

The Exchequer Court has original jurisdiction (1) in revenue cases, (2) in civil suits when the Crown for the Dominion is plaintiff, (3) controversies between the Dominion and a Province, or between two Provinces.

The Judges and officers are the same as in the Supreme Court.

SUPREME COURT OF NOVA SCOTIA.

Letter Carriers' Delivery.

The Delivery of Letters by Carriers is as follows: in the business portions of the city, and as far South as Inglis and North as Gerrish, *Three* deliveries daily, Sundays excepted, commencing at 8 a.m., 12 noon, and 4 p.m.; in the Northern and Southern portions of the city, beyond Gerrish (North) and Inglis (South), *Two* deliveries daily, Sundays excepted, commencing at 8 a.m., and 4 p.m.; and in the Northern, Southern, and Western Suburbs, and Richmond, *One* delivery daily, Sundays excepted, commencing at 8 a.m.

Letters for these deliveries will be received at the General Office up to within 15 minutes of the commencement of each delivery.

Letters and Papers should be addressed to Street and Number at which to be delivered.

Change of Residence should be promptly notified to the Postmaster in writing.

The public are requested to adopt the house door letter-boxes, the use of which will result in greatly increased rapidity in the delivery of letters.

No person need call at the office for letters, for all may have mail matter left at their residences regularly, without risk or charge.

Notice to Box Holders.

An order to have letters placed in a box belonging to another person cannot be recognized, unless such letters are addressed to the box or to the care of its holder.

Letters for a private member of a firm should be addressed to the care of the firm or number of the box.

A letter addressed to a particular street will be taken out by the Letter Carrier, whether the person to whom it is addressed has a box or otherwise.

Box holders should be careful to authorize only a limited number of persons to receive their letters, and only those in whom they have full confidence.

Credit for Postage, &c.

The clerks in this Office are forbidden to give credit for postage, and the holders of boxes and others are requested not to ask them to violate their instructions.

The regulations of the service require that the exact amount of postage shall be tendered to the Clerk at the window in current coin if necessary. Change will, however, be given for public accommodation, *whenever practicable.*

A Letter or Packet *once posted becomes the property of the person to whom addressed,* and must be forwarded to its destination. On no application, however urgent, can it be delivered back to the writer.

LIGHT HOUSES

On the Coasts of Nova Scotia and New Brunswick.

WEST FROM HALIFAX.

CHERBUCTO HEAD—On the Head. A *revolving* light, showing its greatest brilliancy every minute. Lat. 44° 30' 21" N. Long. 63° 30' 49" W.

AN IRON BELL BUOY, painted *black* and surmounted by a cage, has been moored south-east by south, one quarter of a mile from the Blind Sisters, off Sambro, to the westward of the entrance to Halifax Harbor.

SAMBRO ISLAND—On the S. W. side of the entrance to Halifax Harbor. A fixed *white* light, elevated 115 ft. above the sea, visible in clear weather from 20 to 25 miles. White Octagonal Building. Lat. 44° 26' 11" N. Lon. 63° 33' 30" W. In thick or foggy weather, signal guns from ships will be answered from the signal station by firing *two* guns in quick succession, and the same reply will be made from the island to the sound of a steamer's whistle. A Steam Fog Whistle is being erected.

BETTY'S ISLAND.— On South Point revolving *red* light, attaining its greatest brilliancy every two minutes. Elevated 75 feet above the level of high water, and in clear weather should be seen at a distance of 14 miles from all points of approach. The tower is a square wooden building, painted white, with two horizontal red bands, and has keeper's dwelling attached. Lat 44° 26' 22" N. Long 63° 45' 54" W.

PEGGY'S POINT—East point of entrance to St. Margaret's Bay. A fixed *red* light, about 65 feet above high water. Square white Building standing about 40 yards from the shore. Lat. 44° 29' 30" N. Lon. 63° 55' 0" W.

CHESTER LIGHT ON IRON BOUND ISLAND—Entrance to Mahone Bay. One fixed *white* light, visible from all points of approach. The Lantern alone is visible: Building hidden by trees. Elevated 50 feet above high water. Lat. 44° 26' 20" N. Long. 64° 41' 45" W.

MARGARET'S BAY—On the south point of Green Island, Margaret's Bay. Lat. 44° 22' 45" N. Long. 64° 2' 45" W. The light is a revolving *red* and *white* light, showing alternate red and white flashes every minute and a half, and making a complete revolution every three minutes. The light is 59 feet above the level of high water, and in clear weather will be seen at a distance of 15 miles.

MAHONE BAY—On Hobson's Nose Island, A fixed *red* light. The tower is a square wooden building, 20 feet high, painted white.

CROSS ISLAND—Upon the S. E. point of the Island. Two lights placed vertically 41 feet apart, the lower light is fixed; the upper one flashing at intervals of a minute, visible 14 miles. Building red, Lat. 44° 18' 43" N. Long. 64° 9' 57" W.

BATTERY POINT—East side of entrance to Lunenburg Harbor. A fixed *white* light, visible 12 miles. White square building. This harbor is easy of access, buoys are placed in the bay and entrance to the harbor on the Sculpin Rock, Haddock Shoal, Battery Point Shoal, and Head Shoal. In approaching the harbor from seaward the Buoy on Sculpin Rock, painted *red* and *black* in horizontal stripes, may be left on either hand, giving it a berth of two cable's length. The other buoys are painted *black* and must be left on the port hand going in. Iron can buoys in summer, spar buoys in winter.

IRON-BOUND ISLAND—Entrance to LaHave River. A *bright flash* light, of 20 seconds duration, followed by eclipses of 30 seconds. The Lantern is

Long 60° 40' 18" W. The light should never be brought to bear to the eastward of N N E or to the southward of S S W nor approached nearer than 1½ miles. A boat for assistance.

MAINADIEU—On the west end of Scattari Island, a fixed *red* light is exhibited at an elevation of 90 feet above high water, and can be seen at a distance of 9 miles. The tower is a square wooden building, 40 feet high, and painted white. The illuminating apparatus is Catoptric, and consists of 4 lamps and reflectors. Lat 40° 0' 30" N. Long 59° 47' 30" W.

LOUISBURGH—On Lighthouse Point, N side of the entrance to the harbour. A *white* fixed light, 85 feet above high water, visible 16 miles. Square white building, with vertical black stripes. Lat 45° 54' 31" N, Long 59° 57' 15" W.

QUETIQUE ISLAND—St. Peter's Bay on South Point of the Island, North side of the east entrance to Lennox passage, Richmond County, Cape Breton. Fixed *red* light.

CAPE LE ROND—East end of Madame Island on the Cape West side of entrance St. Peter's Bay, Richmond County, Cape Breton. Fixed *white* light. Lat 44° 34' 45" N, Long 60° 53' 0" W.

SARLE ISLAND, EAST END—Fixed *white* light. The tower is octagonal, 86 feet high, painted white and brown, vertical stripes. Lat 43° 58' 30" N, Long 59° 46' 6" W.

SANTY ISLAND, WEST END—An octagonal white building, showing a revolving light which revolves in three minutes, showing three flashes at intervals of half a minute, then a cessation of light during 1½ minute in each revolution. In thick or foggy weather or snow storms a steam fog whistle is sounded 2 seconds in each minute, leaving an interval of 52 seconds between each blast. Lat 45° 57' 0" N, Long 60° 8' 0" W.

Light House Building.

GUYNON ISLAND off Cape Gabarus, South-East Coast of Cape Breton.

ON THE COAST OF NEW BRUNSWICK.

MACHIAS SEAL ISLAND—S W by W ½ W from Grand Manan, lie the Machias Islands. On the eastern island two light houses are erected, showing fixed lights, distant from each other about 200 feet in the direction of E S E and W N W, by which they are easily distinguished from all other lights on the coast. Elevated about 54 and 55 feet above high water, visible 15 miles. A gun is fired every four hours during a fog. Both buildings white.

GRAND MANAN ISLAND—On Swallow Tail Point, N E side of the island. A white fixed light, 148 feet above high water, visible 17 miles. Building white, Lat 44° 45' 22" N. Long 66° 44' 4" W. This is a conspicuous mark in the S Channel between Brier Island and Grand Manan.

GANNET ROCK—The Gannet Rock is 66 feet above high water, and has a light house upon it, painted black and white in vertical stripes. A revolving light (visible 12 miles), lies S W by S distant 3½ miles from the southern point of Three Islands, and S S E ½ E 7 miles from the S W head of the Grand Manan. A gun is fired to answer signals during a fog. There are a number of small ledges and sunken rocks about it, which are always breaking. The light stands conspicuously in the immediate vicinity of all the sunken rocks and dangers, extending from the old Proprietor to the Seal Islands of Machias, a distance of about 20 miles. Between the northernmost and southernmost of the Murr Ledges there is a range of dangerous rocks and shoals, many of them above water, and which extend westward from the light house about 4 miles. From this range farther westerly, about six miles, lies a dangerous breaker, called the Bull. This may be avoided by keeping three remarkable leadlands, near the S W end of Grand Manan, open.

CAMPO BELLO—On the N E extremity of the island. A white fixed light, 64 ft. above the sea, visible 15 miles. Building white with a red cross. This light enables vessels to enter Head Harbor at all times. It is also a guide to vessels entering the main channel, to West Isles, Moose Island, and the inner Bay of Passamaquoddy.

POINT LE PRAEU—Upon this projecting head land two fixed white lights, one above the other, distant 28 feet. The lower lantern is fixed to the outside of the building, and throws its light quite inshore, both to the eastward and westward into Mae's Bay. The highest light is 81 feet, visible 15 miles. Building red and white in horizontal stripes, 5 ft broad, and bears from the easternmost Wolves E by N, 11 miles.

ST JOHN, N B HARBOR—On Patridge Island at the entrance of the river and harbor. A white fixed light, 120 feet above high water, and visible 20 miles. Building red and white in vertical stripes. A Steam Whistle is sounded 10 seconds in every minute during fog and snow storms, audible 4 to 6 miles. There is also a BELL BUOY at the extremity of the ledge at the eastern end of the island, which is very useful to vessels in thick or rough weather. The bell can be heard 3 miles.

PICKFORD & BLACK'S (late J. and R. B. SUTTON'S) Wharf—51 Upper Water Street. See page 11

QUACO HEAD—On a small rock lying off Quaco Head. A revolving white light, 58 feet above high water, showing twice full and twice dark in a minute, visible 15 miles. Building red and white in horizontal stripes.

CAPE ENRAGE—On the point of that name in Westmorland nearly opposite Apple River Light in Cumberland. A plain white light, 151 feet above the sea, visible 15 miles. Square white building.

GRINDSTONE ISLAND—On Grindstone Island, Chignecto Bay. Lat 45° 43' 13" N. Long 64° 27' 25" W. 60 feet above high water. Octagonal white tower.

Signals are made on the lower yard, now used exclusively for sailing vessels, as repeats :

For a Square Rigged Vessel, two balls of a size, one at the outer, the other at the inner halliard, close up.

A Ship, a large ball at the end of the yard, with a small one at inner halliard.

A Barque, a large do, at the end, with a small one dropped at inner halliard.

A Brig, a small ball at the end of the yard, and large one at the inner halliard.

A Brigantine, a cross close up at the outer halliard. Two or more do, a cross half hoisted.

A Topsail Schooner, a cross close up at the inner halliard.

Two or more schooners, a cross inner half hoisted.

The upper yard of the Ship Staff is used solely to designate Steam Vessels thus :

Two large balls close up, one at the outer and the other at the inner halliard, E or W, a steamer reported in that quarter.

A small ball at the outer, and large one at the inner halliard a second class Packet or merchant Steamer.

A large ball at the outer, and a small one at the inner halliard, a Man-of-War Steamer or Royal Mail Steamer, or large Merchant Steamer.

Lanterns are hoisted at night to denote a steamer reported.

Red light on outer and white light inner on E. yard-arm denotes Steamer East reported.

Green light outer and white light inner on W yard-arm—Steamer West reported.

Red light above white, 12 feet apart, mail from England.

Green light above white, 12 feet apart, mail for England.

White light above red, 12 feet apart, Newfoundland mail.

White light above green, 12 feet apart, Bermuda mail.

Green light above red, 12 feet apart, English Man-of-War.

Red, green and white, 12 feet apart, enemy's Man-of-War.

The coloured lantern is always shown at yard-arm, and the white one at the inner halliard, E or W, according to the quarter the Steamer is reported in.

When a Steamer is sighted the inner (white) light is taken down.

Numbers are indicated the same as on the lower yard.

When the description of vessel is ascertained, the following descriptive colors will be hoisted at the masthead, and the inner ball taken down :

A Union Jack—a Flag Ship.

Man-of-War Screw Steamer, a white pennant with a blue ball in the centre, over the Union Jack.

Man-of-War Paddle Steamer, a white pennant with a blue ball in the centre under the Union Jack.

Troop Ship, white pennant two blue crosses.

Dominion blue Ensign, under steamer pendant, Dominion gunboat.

A red flag pierced white, Royal Mail Packet from England.

A blue and red four quarters, with white ball in upper blue quarter, mail for England.

Of Nova Scotia.**

The undersigned is prepared to contract for the sale of the above Company's superior

STEAM, MANUFACTURING & HOUSE COALS,

Delivered free on board vessels at the Company's Wharf, in Pictou Harbor, and at the Railway Terminus, Richmond, in Halifax Harbor; also, at any Station on the Intercolonial and Windsor and Annapolis Railways.

THE ACADIA COAL

Is durable, free from sulphur, makes no clinker, and is not injurious to fire surfaces.

THE HOUSE COAL

Burns with a bright flame, makes no soot, and is entirely free from sulphur, and does not throw off unhealthy fumes while burning.

Specially adapted to Cooking Stoves and Ranges, and can be used for broiling and toasting, and for all other purposes for which Charcoal is employed.

NUT COAL

Specially prepared for the newly-invented Soft Coal "Base Burners."
