Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

- Coloured covers/
Couverture de couleur
- Covers damaged/
Couverture endommagée
- Covers restored and/or laminated/
Couverture restaurée et/ou pelliculée
- Cover title missing/
Le titre de couverture manque
- Coloured maps/
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
- Bound with other materiel/
Relié avec d'autres documents
- Tight binding may cause shadows or distortion
along interior margin/
La reliure serrée peut causer de l'ombre ou de la
distortion le long de la marge intérieure
- Blank leaves added during restoration may
appear within the text. Whenever possible, these
have been omitted from filming/
Il se peut que certaines pages blanches ajoutées
lors d'une restauration apparaissent dans le texte,
mais, lorsque cela était possible, ces pages n'ont
pas été filmées.
- Additional comments:/
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire
qu'il lui a été possible de se procurer. Les détails
de cet exemplaire qui sont peut-être uniques du
point de vue bibliographique, qui peuvent modifier
une image reproduite, ou qui peuvent exiger une
modification dans la méthode normale de filmage
sont indiqués ci-dessous.

- Coloured pages/
Pages de couleur
- Pages damaged/
Pages endommagées
- Pages restored and/or laminated/
Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed/
Pages décolorées, tachetées ou piquées
- Pages detached/
Pages détachées
- Showthrough/
Transparence
- Quality of print varies/
Qualité inégale de l'impression
- Includes supplementary material/
Comprend du matériel supplémentaire
- Only edition available/
Seule édition disponible
- Pages wholly or partially obscured by errata
slips, tissues, etc., have been refilmed to
ensure the best possible image/
Les pages totalement ou partiellement
obscures par un feuillet d'errata, une pelure,
etc., ont été filmées à nouveau de façon à
obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

10X	14X	18X	22X	26X	30X
			✓		
12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

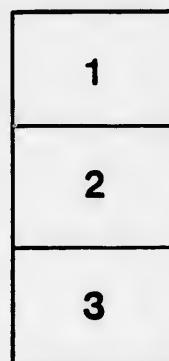

D. B. Weldon Library
University of Western Ontario
(Regional History Room)

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

D. B. Weldon Library
University of Western Ontario
(Regional History Room)

Les images suivantes ont été reproduites avec la plus grande soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filming.

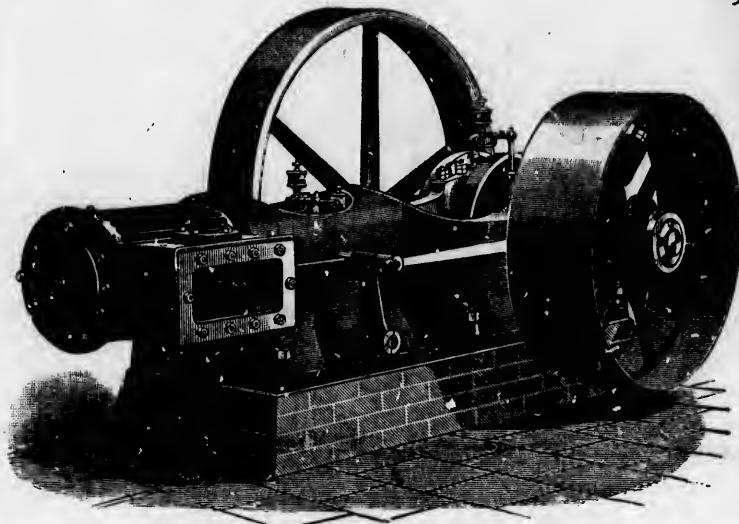

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminent soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par la seconde plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., pouvant être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

BALL ENGINE CO.,

—MANUFACTURERS OF—

AUTOMATIC CUT-OFF ENGINES

EMBODYING A NEW PRINCIPLE

—IN WHICH—

The Governor Weighs the Load,

Office and Works, Erie, Pa., U. S. A.

KINGSLAND, JACKSON & Co.,

AGENTS,

50 S. Canal St., CHICAGO, ILL.

The only Governor in the world capable of maintaining absolutely uniform speed under all changes of load or of accelerating speed with increase of load, if desired.

We herewith publish some speed diagrams made by a Moscope Speed Recorder, as an illustration of the perfect results which we obtain.

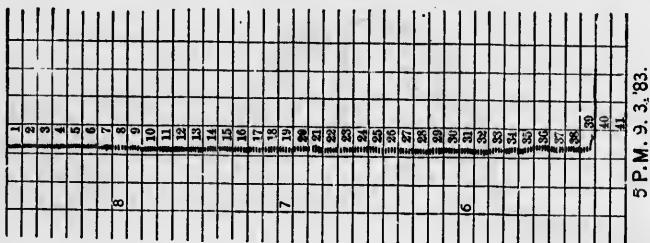

DIAGRAM "A,"

Taken from our 9x12 engine at the Boston Fair of 1883. Taken while making electric light and illustrating, practically, perfect regulation under changes of load and steam pressure.

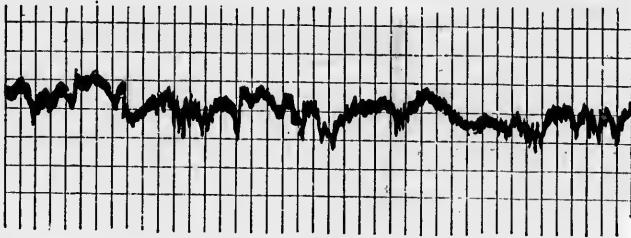

DIAGRAM "B,"

Taken from a 250 horse-power automatic cut-off engine and illustrating the performance of perhaps the majority of engines now in use. We publish it not as a particularly bad case, as the engine was doing its work with tolerable satisfaction, and is doing the same to-day.

The contrast shows what is possible to accomplish with the application of correct principles in governing steam engines.

If interested in the subject, ask for illustrated circular giving full particulars.

The following are fair samples of the diagram we produce and speak for themselves in regard to the fuel economy of our engine.

DIAGRAM NO. 1.

Scale of diagram, 60.
Engine, 9 x 12.
300 revolutions per minute.
Boiler pressure, 80 lbs.
Mean effective pressure, 19.08 lbs.
Indicated horse-power, 21.75.
Net power on brake, 20.
Friction of engine, 8 per cent.
Theoretic water consumption, 24.75 lbs.

DIAGRAM NO. 2.

Scale of diagram, 60.
Engine, 9 x 12.
300 revolutions per minute.
Boiler pressure, 87 lbs.
Mean effective pressure, 47.61 lbs.
Indicated horse-power, 54.27.
Net horse-power on brake, 50.
Friction of engine, 8 per cent.
Theoretic water consumption, 24.21 lbs.

*Illustrated catalogue giving full information will be furnished to
those interested in the subject.*

THE BRUSH ELECTRIC LIGHT AND POWER CO.

THE BALL ENGINE CO., Erie, Pa.:

CLEVELAND, O., August 31, 1883.

Gentlemen—The engine is now running and I find the speed as you claim perfectly steady. Under the most sudden and severe changes of load, I cannot detect any variation in speed whatever, with the best counter I have been able to get. You may use my name in any way you choose regarding this engine if it is possible to do you any good.

Very Respectfully, &c.,

H. E. COOKE, Sup't.

BALL ENGINE CO.:

ONTARIO, June 11, 1884.

Gentlemen—I have engine running all in good shape; beats anything I ever saw. Am saving ten dollars per week in fuel over old engine and doing double the amount of work.

Yours Truly,

E. A. VAN ARSDALL.

**PERFECT REGULATION WHEN USED IN CONNECTION
WITH A WATER WHEEL.**

Office of the EMPORIUM ROLLER FLOURING MILLS, }
EMPORIUM, Pa., February 20, 1884. }

BALL ENGINE CO.:

Gentlemen—It gives me great pleasure to say that your engine is doing most satisfactory work in every respect. I think I have the most complete mill in the State and can make as much flour with a ton of coal as can be made.

I have a water wheel connected by belt and tightener to my mill and can throw the full power of wheel on and take it off at any time, and I have not a machine running by which a change of speed can be noticed.

Yours Truly,

J. P. FELT.

ROXBURY, Mass., Aug. 1, 1884.

BALL ENGINE CO.:

Gentlemen—The 9-inch automatic engine that we bought of you last January has run to our entire satisfaction every day since.

We believe that an account taken at the end of the year will show that the engine will do all that you promised—the same amount of work with one-half the fuel that we were using.

Yours Truly,

W. D. BYRON & SONS.

**ENGINE ADJUSTED TO RUN FASTER WHEN DOING WORK
THAN WHEN EMPTY.**

Office of L. G. SMITH,
MANUFACTURER OF LONG FORK AND SHOVEL HANDLES, }
MCCOMB, O., January 4, 1883. }

BALL ENGINE CO., Erie, Pa.:

Gents—Enclosed find check to balance account. The engine as near as I can count runs 198 without load and 215 with load, which is O. K.

Yours, &c.,

L. G. SMITH.

F. E. PERKINS,
DEALER IN IRON AND METALS, }
PROVIDENCE, R. I., March 7, 1884. }

BALL ENGINE CO., Erie, Pa.:

Gentlemen—Regarding the Automatic Cut-off Engine I bought of you, it is giving us the best of work. We are pleased with it and can recommend it.

Yours Truly,

F. E. PERKINS.
