WASH FOR TREES.

Take equal quantities of lime and fresh cow dung, mix these up with urine and soap suds to the consistence of paint; when well stirred together, lay it on the trunk and limbs of your fruit trees, as high as can be conveniently reached, with a painter's brush; this will effectually destroy all vermin that may infest the trees, as well as heal any bruises which they may have sustained.

A practical husbandman, of the highest authority, assures us, that the golden rule of agriculture, to use such manures as will make heavy land lighter, and light land heavier, cold land hotter, and hot land colder, must never be lost sight of. He who knows and follows this rule, and he only, is a farmer.
