## LAW RESPECTING NEWSPAPERS

Subscribers who do not give express no-  
tice to the contrary, are considered as wish-  
ing to continue their subscriptions.  
If subscribers order the discontinuance  
of their papers, the publisher may continue  
to send them till all arrearages are paid.  
If subscribers neglect or refuse to take  
their papers from the office to which they  
are directed, they are held responsible till  
they have settled their Bill, and ordered  
their papers to be discontinued.  
If subscribers remove to other places  
without informing the publisher, and the  
paper is sent to the former direction they  
are held responsible.

**DREADFUL FIRE AT MONTREAL!**  
Quebec, July 13.—Montreal has been laid  
in ruins by a fearful fire. The fire raged  
from 10 a. m. on Thursday last until Friday  
night. It originated at a Stone Building in  
Maine-street, Lawrence Suburbs, and con-  
tinued on, downwards, to the Montreal Jail.  
The destruction of property is immense—  
there are various estimates of the loss sustain-  
ed.—The Montreal Herald, supposes the amount  
of insurance to be about £65,000, and  
showing that nearly 1100 houses have been  
consumed, and calculates the entire loss at  
£210,000.—The Pilot says that 2000 houses  
have been destroyed; the Gazette mentions  
them at 1200, and the number of persons  
rendered homeless at from 12,000, to 15,000,  
and estimates the total loss of property at  
£400,000. Several splendid rows of build-  
ings were totally consumed—among them  
Cornwall Terrace, on St. Denis-street, and  
Durham Terrace, St. Lewis-street. The  
Roman Catholic Church, known as the Bi-  
shop's Church, was burned, together with the  
Bishop's Place. Chinders from the fire in St.  
Lawrence street, lodged upon the roof of the  
out-houses attached to the Hayes house, late-  
known as the Theatre; in an instant the  
whole building was one sheet of flame, and  
notwithstanding the untiring exertions of the  
firemen, was soon reduced to ashes. All the  
fine three story stone buildings on Dathouse  
Square, including the Moss House, and the  
residence of Hon. George Moffat, shared a  
like fate. St. Thomas Church, and Molson's  
Brewing establishment, on St. Mary's street  
were also consumed. In rear of Dathouse  
Square, the fire raged through Champ De  
Mass, thence in an irregular direction to  
Campan-street. The Barricks in St. Paul  
and Commissioner streets, were in eminent  
danger, but were saved by blowing up some  
intervening buildings;—the sufferings of the  
houseless poor, can be better imagined than  
described. "The Government has appropri-  
ated £500 for the immediate relief of the  
sufferers. The Montreal Corporation has vot-  
ed £1000 for the immediate relief of those  
who are in want, and we see that to-day's  
Quebec Chronicle calls on the city fathers to  
vote a sum in aid of the sufferers, and a  
meeting of the citizens is now being held to take  
measures for assisting Montreal in her dif-  
ficulty, as she generously assisted us in ours.  
The fire was purely accidental, and the dry-  
ness of the roofs added to a scarcity of water  
and the blowing of a very high wind, render-  
ed human aid almost useless in stopping the  
progress of the flames.

**CONFLAGRATION AT BOSTON.**  
Last Saturday, Boston was the scene of  
one of the most destructive conflagrations  
with which that city has been visited for  
many years. The fire broke out in an unoc-  
cupied stable, in "Bank-Top road," an alley  
leading from the foot of Belmont street, near  
Broad street. Although it was discovered  
just as it issued from the building, the flames  
defied all baffling efforts.—The Bee says:—  
The Sailor's Home, one of the noblest in-  
stitutions in our midst, is a smouldering ruin;  
the Mariner's Church a noble pile, lays in  
ashes. Over one hundred and fifty families  
are turned shelterless into the street, many  
of whom have barely saved the clothes on  
their bodies. About six hundred persons are  
thus thrown at once upon the charities of our  
city. The Roylston School House, one of the  
finest in the city, a most elegant building,  
is a heap of sad ruins. Several large blocks  
of houses are entirely destroyed.  
The efforts of the Firemen, to an almost  
superhuman extent had been bestowed upon  
the Mariner's Church. It was thought that  
the massive Boardman Block might check  
the every where else conquering flame. Ex-  
pectation on this point, however, ended in dis-  
appointment. The flames, massive mass  
angry, rolled up their sea of fire and ere long  
the beautiful Church edifice fell a victim to  
the insatiable element. In ten minutes from  
the time the first flame lit upon its substance  
the roof fell with a thundering sound, follow-  
ed soon after by a portion of the ponderous walls;  
nothing was saved.  
From Boardman Block and the Church  
the flames loomed up rearwards with destruc-  
tive fury, and soon encompassed in their fiery  
grasp that beautiful and slightly structure the  
Roylston School House. All efforts—and  
here again the gallant firemen were super-  
human in their devoted labors—proved fruit-  
less. The fire spread from room to room,  
and story to story, and in a short time the  
building was added to the vast number which  
already lay in ashes. It was a fearful sound  
to hear the broad roof fall to the distant foun-  
dation, and see the walls partially follow to  
the gulf of fire below.  
Fortunately the flames were subdued at  
this point, though the primary school house,  
adjacent came near destruction. This proved  
the places where the great element that away-  
ed so destructively for 8 hours was conquered.  
The Roylston School House was built a  
year or two since at a cost, we are informed,  
of about \$50,000. It belonged to the city,  
and was well insured. Most of the furniture,  
books, and philosophical apparatus were sav-

There were thirty three buildings consu-  
med. The loss is estimated at about \$250,  
000. About one half is covered by insurance.  
It is shared by extreme wealth and extreme  
poverty. The buildings were mainly owned  
by men of large wealth—the loss for the most  
part is among the very poor—who are be-  
reft of everything, save children and misfor-  
tune.  
Several firemen were more or less injured  
and generally very severely.  
The Sailor's Home cost \$30,000. There  
was insurance on it for \$12,000, on the fur-  
niture \$3000. The proprietor John O. Chee-  
ney, was in the harbour with his family, on a  
pleasure excursion, during the conflagration.  
He arrived in time only to see the sad havoc  
which the ruthless element had made.

**A RATTLESNAKE STORY.**  
Last fall, a woman residing in the vicinity  
of Worcester, was picking berries in a field  
near her house, having with her her only  
child, a bright eyed little fellow of less than  
a year old. The babe sat upon the ground  
in an open space, amusing itself in grasping  
at a clump of yellow weed that grew within  
reach, and eating berries brought him from  
time to time by his mother.  
The latter, at length, intent upon gather-  
ing the fruit, passed a sick which hid the  
child from view. She was about to return to  
him when hearing him laughing and crow-  
ing in great glee, thinking he must be safe  
as long as he was so happy, she remained a  
little longer where she was.  
Suddenly the little voice ceased, and after  
another minute's delay the young mother  
stirred upon the rock and looked over, ex-  
pecting to see her baby asleep; and instead  
of which, he was sitting perfectly motionless,  
his lips, parted, and his wide open eyes fixed  
with a singular expression upon some object  
which at first she was unable to discern.  
Yet who can judge of her horror when on  
closer scrutiny she perceived some four feet  
from the infant, a rattlesnake, with its glit-  
tering eyes fastened upon his, and nearing  
him by an almost imperceptible motion!  
The sight of her darling's peril so nearly  
paralyzed her, that for an instant she half be-  
lieved the dreadful fascination had extended  
to herself; but the certainty that unless she  
was the instrument of salvation to her child,  
he was instantly lost, in some degree restored  
her powers. She glanced wildly around for  
something that might be used as a weapon,  
but nothing appeared, and already the veno-  
mous reptile had passed over half the space  
which divided him from his victim. Another  
moment and all would be lost! What could  
be done?  
In her hand she held a broad iron pan, and  
springing from the rock, quick as thought she  
covered the snake with it, and stood upon it  
to prevent his escape.  
The charm was broken; the child moved,  
swayed to one side and began to sob. At the  
same time the mother recovered her voice  
and screamed for aid, retaining her position  
until it arrived, when the cause of her terrible  
tright was despatched.

**DEATH OF A TIGER HUNTER.**—We an-  
nounce with regret the death of Captain  
Charles Colby, of her Majesty's 85th reg-  
iment, and commanding the convalescent de-  
pot at Murree, under the following distressing  
and warning circumstances:—On the 30th  
of last month Captain Colby went out tiger  
shooting at the foot of the hills on which the  
Murree depot is situated, and having come up  
on a large male tiger fired at and wounded  
him, as he supposed mortally. Upon this he  
drew near with his elephant, and descending  
approached the animal, which lay to all ap-  
pearance dead, but which, on his coming close  
to it, sprang upon him and mangled him  
dreadfully. He was rescued by the Mahouts  
and other natives of the shooting party, some  
of whom immediately started for Rawul Pin-  
dee to give information of the occurrence, on  
the receipt of which two medical officers at  
once mounted an elephant and repaired to the  
scene of the accident, which they reached  
early the next morning. They found Cap-  
tain Colby dreadfully wounded, and judged  
amputation of the left arm absolutely in dis-  
pensable, expressing their opinion and deci-  
sion to the sufferer, who immediately consented.  
The operation was at once performed  
near the shoulder, but so great had been the  
loss of blood and the injuries the tiger had in-  
flicted that the patient quickly sank and ex-  
pired the same evening.—Bengal Chronicle  
April 12.

**Lunacy amongst Married and Single.**—  
It has been ascertained that amongst 411  
male patients admitted into the Colney Hatch  
County Lunatic Asylum, there were 170 mar-  
ried, 203 single, twenty five widowed and  
eight not ascertained. Amongst 669 female  
patients admitted, 188 were married, 365 sin-  
gle, 106 widowed, and twenty four not ascer-  
tained. These instances may be cited in ad-  
dition to the many existing proofs of the ten-  
dency of "single blessedness" to foster insan-  
ity, especially among the female sex.

**GOVERNORS OF COLONIES.**—A list has been  
printed in a Parliamentary paper of the names  
and salaries of the governors of colonies.  
There are forty eight names in the list. The  
highest salary is given to the Earl of Elgin,  
as Governor General of Canada, who has  
£7,000 a year, and the lowest to the Lieuten-  
ant Governor of New Ulster, who has £400  
a year, and several at £5,000, a year.

**ANECDOTE OF THE DUKE OF WELLINGTON.**  
The lately appointed Bishop of Nova Scotia  
applied to the Government of that Province  
to allow the soldiers of the garrison to pre-  
sent arms to him, which Sir John Harvey  
permitted him to hear from the Command-  
er in Chief. The old Duke's answer was,  
"The only attentions the soldiers are to pay  
the Bishop, are to his sermons."

**CALIS, July 13.—BRUTAL ASSAULT.**—A  
most villainous and brutal assault was made  
upon the person of a daughter of Mr. Tim-  
othy Crocker, of St. Stephen, on the 5th inst.,  
near the dwelling of widow Kelly, on the road  
from her father's to the village, by a half-  
breed Indian. After taking hold of her  
person he attempted to drag her into a clump  
of trees which were close by, and finally suc-  
ceeded after a severe struggle. He here at-  
tempted to violate her person, by choking  
her, gagging her, and putting his fingers in-  
to her mouth to keep her from making a  
noise, and this was what probably saved her  
life; he got what he did not anticipate, a ter-  
rible beating, which caused him to draw  
himself out as quick as possible, and the scream-  
ing screams were heard by two men  
conveying infants into lovers and fathers and  
mothers, render youth the operative gener-  
ations, decide men's fortunes and distinctions,  
convert active men into crawling drivellers,  
and bury all preceding generations. Thirty  
years raise an active generation from nonen-  
tity; change fascinating beauties into bearable  
old women, convert lovers into grandfathers,  
and bury the active generation, or reduce  
them to decrepitude and imbecility. Forty  
years alas! change the face of all society.—  
Infants are growing old, the bloom of youth  
and beauty has passed away, two active gen-  
erations have been swept from the stage of  
life, names so cherished are forgotten, and  
unsuspected candidates for fame have started  
from the exhaustless womb of nature. Fifty  
years—why should any desire to retain af-  
fections from maturity for fifty years? It is  
to behold a world of which you know noth-  
ing, and to which you are unknown. It is to  
weep for the generations long since passed—  
for lovers, for parents, for children, for  
friends in the grave. It is to see every thing  
turned upside down by the fickle hand of  
fortune and the absolute despotism of time.  
It is in a word, to behold the vanity of life  
in all the vanities of display.

**CANADA WHEAT AND FLOUR.**—The char-  
acter of Canadian wheat, with our Roches-  
ter and Oswego millers, stands very high.  
The soil of the Canadas is well adapted to  
the production of the best quality of this sta-  
ple, and most of the wheat growing region  
of that country partakes principally of a  
clayey bottom, highly impregnated with am-  
monia and azote, which are known in chem-  
istry as the most nutritive constituents of  
soil for the production of superior wheat.

From Dr. Robert D. Thompson's analysis  
of wheat flour, published in the United States  
Patent Reports for 1848, we find that Cana-  
da flour contained 13.15 per cent. of the nu-  
tritive principles, gluten and albumen; be-  
ing about 2.11 per cent. more than the best  
samples grown in the United States. This  
difference is owing, we presume, in part, to  
their long and protected winters; the heavy  
snows that fall during that season, prevent  
the hard frost from penetrating the soil, and  
thus protect the roots of the young plant  
from being thrust apart and thrown to the  
surface of the earth. In many of our western  
States, where our winters are milder, the re-  
verse is more frequently the result.

If Canada millers would take the pains  
that our New York millers do, to have their  
flour received in market in a nice, clean con-  
dition, and with appropriate fancy brands like  
their competitors, their sales would be much  
increased, both in the United States and  
Liverpool markets.

Having had an opportunity of inspecting  
that superior brand, made at Dundas, by Mr.  
Ewart, and branded "Dundas Mills Extra,"  
we feel ourselves warranted in pronouncing  
it British America's best sample in the New-  
York market, which is the opinion also of a  
flour inspector in that city.—American Miller.

**MR. GOUGH.**—We have several times  
spoken in warm terms of the eloquence of this  
gentleman, and of the services he has ren-  
dered to the cause of temperance. His lec-  
ture in the Presbyterian Church last night  
was equal to any he has ever delivered. He  
had, he always has, an im-  
mense audience, in fact as many as the  
church could contain. Mr. Gough lectures  
at Port Hope Tuesday evening, and he will  
lecture again in Coburg on Wednesday and  
Friday evenings. He is worth fifty Maine  
Laws.—Coburg Star.

**THE IMMORTALITY OF DOWAGERS.**—An  
old maid might fidget herself to death, and  
so might a widow of fifty; but, directly she  
gets above sixty, regard her as one of the  
immortals. Widows above that age won't  
die. They live as if they meant to be im-  
mortal. Their whole proceedings smell of  
immortality. They'll talk about death, and  
live all the longer for it: the very exertion of  
talking about it tends to promote longevity.  
They'll sometimes drop off, if you happen to  
be rich; but the poorer you are, the longer  
they'll live. They are the most obstinate  
people on earth. They'll do nothing to kill  
themselves when above sixty. They settle  
themselves down, and begin life again: it is  
their spring of immortality. Life insurances  
then, are a bad speculation: you literally  
insure their lives then; for, if they know it

they won't die at all! We may well call  
old age second childhood. It is then these  
knowing ones start off afresh, and begin the  
world again with a better chance than ever.  
Every child born in the family gives them  
new life. Children are the dolls of second  
childhood, with which the old children play  
with as much delight as they played with  
the dolls of their earlier infancy. You can't  
by any means persuade them to die! They  
know better! They have a life's experience  
to guide them! Now, I've an immortal old  
grandmother," he continued, "I don't want  
her to die; but if I did, she wouldn't! She's  
been reckoned immortal for the last thirty  
years, and seems more immortal now than  
when I first knew her. She goes like a  
clock; and knows not only how to wind her-  
self up, but how to keep the machinery in  
order. I'm her favorite grandson; but what  
of that? When I have a son, he'll be sure  
to cut me out; and when he has a son, he'll  
be cut out himself, as a natural matter of re-  
tributive justice! If she doesn't go off in  
fifty years or so, I shall really begin to enter-  
tain the belief that she has discovered perpe-  
tual motion.—Lady Felicia, by Henry  
Cockton.

**LIFE.**—Change is the constant feature of  
society. The world is like a magic lantern,  
or the shifting scenes of a pantomime. Ten  
years convert the population of schools into  
men and women, the young into fathers and  
matrons, make and mar fortunes, and bury  
the last generation but one. Twenty years  
convert infants into lovers and fathers and  
mothers, render youth the operative gener-  
ations, decide men's fortunes and distinctions,  
convert active men into crawling drivellers,  
and bury all preceding generations. Thirty  
years raise an active generation from nonen-  
tity; change fascinating beauties into bearable  
old women, convert lovers into grandfathers,  
and bury the active generation, or reduce  
them to decrepitude and imbecility. Forty  
years alas! change the face of all society.—  
Infants are growing old, the bloom of youth  
and beauty has passed away, two active gen-  
erations have been swept from the stage of  
life, names so cherished are forgotten, and  
unsuspected candidates for fame have started  
from the exhaustless womb of nature. Fifty  
years—why should any desire to retain af-  
fections from maturity for fifty years? It is  
to behold a world of which you know noth-  
ing, and to which you are unknown. It is to  
weep for the generations long since passed—  
for lovers, for parents, for children, for  
friends in the grave. It is to see every thing  
turned upside down by the fickle hand of  
fortune and the absolute despotism of time.  
It is in a word, to behold the vanity of life  
in all the vanities of display.

**ANIMAL CHEMISTRY.**—How seldom do we  
give a thought to the organization of the  
"house we live in," or the manner in which  
it is strengthened or undermined! We seem  
to think that it can take care of itself as well  
without our aid as with it, and better too,  
perhaps. We don't reflect that, after all, we  
are mere animal chemical machines, and  
that various substances combined in the hu-  
man stomach present the same phenomena  
that they would in the receivers of a chemist's  
laboratory. For example, we see it stated  
that without lime the secretion of milk fails;  
the bones and teeth become soft or are ar-  
rested in their development; without soda,  
no bile can be formed; without phosphorus  
and magnesia, the nervous tissues lose their  
energy and the impaired condition of the  
brain is evinced by loss of memory, frightful  
headaches and impending paralysis.

Greatly paleness, prostration, faintings  
and coldness, attend the lack of carbon; de-  
prived of sulphur, the hair would rapidly  
cease to grow, and the absence of iron is  
marked by lividity, disordered digestion, pas-  
sive dropsy, and other symptoms of an ane-  
mic or chlorotic character. The food we re-  
ceive daily furnishes the natural source of  
these elementary substances, and serves dur-  
ing health to repair the waste of these mat-  
ters through the skin, kidneys, and other ex-  
cretories, consequent upon the voluntary and  
vegetative functions of the economy. Hence  
the equilibrium is preserved. Inordinate use  
of particular organs induces a disproportionate  
consumption of their substance, and  
hence of the elements from which this sub-  
stance is formed. Excesses in watching,  
thought, and muscular effort, for examples,  
by overtaxing the brain and muscular fibre,  
render these tissues rapidly effete, and there-  
fore cause an exaggerated demand for their  
particular pabulum, as phosphorus and iron.

**FOUR DAYS LATER FROM ENGLAND.**  
The American steamship Arctic arrived at  
New York on Sunday last, with dates to the  
30th of June. She brought out 123 passen-  
gers.  
The Asia arrived at Liverpool on the 27th.  
The commercial news is dull. Cotton was

drooping, and business was more sluggish in  
the manufacturing districts. The Flour mar-  
ket was firm, while Indian-corn had advan-  
ced from 1s. to 2s. per quarter.  
The Imperial Parliament was to be pro-  
pounded on the 1st July, and directly after-  
ward dissolved. The writs for a new Parlia-  
ment were to be sent out immediately after  
the dissolution, returnable in the month of  
August; but it will probably not be called  
together before the middle of August; but  
it will probably not be called together before  
the middle of October.

A deputation from the Canada, Nova Scot-  
ia, and New Brunswick Railway Company  
had an interview with the Colonial Secretary  
on Saturday, but the result had not trans-  
pired.  
It is announced that the Roman Catholic  
Synod of England will be opened on the 6th  
July, at St. Mary's College, near Birming-  
ham.

It appears certain, that the British Govern-  
ment will enforce rigidly all the clauses of  
the Emancipation Act. The Government,  
through Mr. Walpole, have informed Dr.  
Newman that the recent proclamation refer-  
red to all practices contrary to the strictest  
letter of the law. The Irish Roman Catho-  
lics declare they will not obey the law, and  
the Priests who conform to its requirements  
have been insulted in the street.

**IRELAND.**—The commissioners appointed  
to inquire into the relative merits of Galway  
and Poynes for packet stations, is proceed-  
ing diligently in the business.  
The enthronization of Dr. Cullen, as Ro-  
man Catholic Archbishop of Dublin, took  
place on Tuesday the 29th, at the church of  
the Conception, Dublin.

**FRANCE.**—Political affairs are quiet.—It is  
stated that the property of the Duc de Au-  
ville, which he inherited from the Prince de  
Conde, is to be forthwith placed under se-  
questration.

A letter dated June 21 from Petit Rou-  
ssin, states that the periodical inundation had again  
caused immense damage in that country, at  
a time when the farmers were just about to  
reap their harvest. In the village of Petit  
Roussin the houses are under water, the fields  
submerged, and the inhabitants had been  
obliged to flee.

Orders had been received at Toulon to  
place on the stocks next year at that place,  
two ships of the line, two steam frigates of  
50 guns each, 3 steam corvettes and tenders.  
The Commander of the French fleet in the  
Levant contradicts the report that pirates  
are at present infesting those seas. It is an-  
nounced that a mine of platinum has been dis-  
covered in the neighbourhood of Valen-  
ciennes.

**INDIA.**—Bombay dates to the 22d May had  
reached France. No important event had  
occurred since the previous dates from that  
place. It is generally understood that noth-  
ing more will be done in Barmah till after  
the rains. The whole force will remain in  
the country, and the war be resumed with  
vigor the moment the season permits. The  
India papers are already hinting at the proba-  
ble annexation of the whole peninsula. Dis-  
turbances still continue along the north-west-  
ern frontier, and military preparations of an  
extensive nature are in progress. Several  
forts had been attacked or captured in the  
Lizara country, and operations are in pro-  
gress which, it is thought, will terminate the  
war in a week or two. The difficulties with  
the Nizam are still unsettled.

The electric telegraph has been put into  
successful operation in India.  
LATEST FROM LONDON, June 30.—rumour  
is current here, that an attempt was made to  
assassinate the Emperor of Austria at Noos-  
warden, near Pesth, but the assassin missed  
his aim and immediately blew out his own  
brains.

In Greece there has been a religious re-  
volt, headed by a fanatic priest, caused by the  
recent understanding with the Patriarch of  
Constantinople, for putting the Greek church  
under his control. The revolt was soon sup-  
pressed.

Trade was very dull at Paris. The French  
legislative body was closed for the first ses-  
sion on Monday at 2 o'clock by a message  
from the President, which was warmly re-  
ceived, though it contained little but fine  
phrases. The President declares that the  
Constitution has given proof that it is strong  
and free, and he enjoins the corps legislative  
to tell their communes how good the people  
of Paris are—and how strong the army is.—  
With what joy even revolutionists have wel-  
comed the return of the eagles to the army—  
those eagles the symbol of authority and glo-  
ry, particularly. They are called to remem-  
ber how the Army of Sidiere knelt down nev-  
ertheless before the image of God, presented  
from the heights of the altar, and thence to  
order that France has a government which  
rests on the people, the source of all power—  
on the army, the source of all force, and on  
religion, the source of all justice.

The budget for the financial year shows an  
expenditure of 1493 million francs, and an in-  
come of 1459 million francs, thus exhibiting a  
deficit of 34 million francs.

# SUMMARY OF NEWS.

**CANADA.—THE WEATHER AND THE CROPS.** For the past week the heat has been excessive, the thermometer ranging from 80 to 90 in the shade. There have been several very heavy thunder showers, which at intervals have cooled the air. During the storm on Thursday many fences were blown down, and several large trees on the pleasure grounds of G. O. Stuart, Esq., St. Poy road, were levelled to the ground. We are informed that the heavy rains have done considerable damage to the new sown turnips. The hay and grain crops, on the high lands, have a most luxuriant appearance, although, in the stronger and more retentive soils, they are not so far advanced. The hay fields are greatly overrun with that most noxious weed the ox-eyed-daisy, which is very injurious to hay. We are happy to hear favourable accounts of wheat. Potatoes still continue to present a most healthy appearance. Great quantities of newly planted cabbage have been destroyed by the maggot. Our markets are well supplied with all sorts of vegetables from Montreal. [Quebec Gazette.]

**THE MONTREAL SUFFERERS.**—A despatch from New-York states, that a public meeting had been called in that city, to be held on Wednesday, in West-street, for the purpose of taking immediate measures for the relief of the sufferers by the recent terrible fire in Montreal. We trust our Citizens will also contribute as much as in their power towards so charitable an object. The thousands who are now homeless and homeless in the sister City have claims upon our sympathies which should not be forgotten. If we recollect aright, a handsome sum was raised in this city a few years ago for the relief of the sufferers by the great fire in Quebec, but owing to some cause or other, it was never forwarded, and was afterwards placed in the Bank of British North America for safe keeping. We have never heard what has become of it, or if it was ever used. If not, now is the time to forward it to Montreal. Something should be done at once, and the sum we refer to cannot be better expended than at the present moment. We therefore trust our philanthropic men will be up-and-doing. [New-Brunswick.]

**CALIFORNIA GOLD.**—The Journal of Commerce estimates the total production of the California mines up to the present time, at nearly \$200,000,000.

**IMPORTANT DISCOVERY.**—The Prince Edward Island Gazette says:—We have been informed by very respectable authority, that while some men were employed in cutting down a hill on the Whim Road, leading to Murray Harbor, they discovered a quantity of leaden ore, which has been pronounced by those who have seen it to be nearly the pure metal.

**LUSUS NATURÆ.**—A very remarkable freak of nature has just fallen under our observation. Capt. Joseph Lovett, of this city, had a hen of the common kind, which had grown so heavy and unwieldy, as to be unable to get about, and it was concluded to kill her. This being done, there were taken out of her thirteen eggs; nine of them whole, and four which were broken by throwing her down on the ground when she was killed. The nine eggs weighed two pounds and a half, and the other four appeared to have been equally large. If so, the whole would have weighed three pounds ten ounces! One of the eggs weighed 6 oz., another 5½ oz., and the whole averaged over a quarter of a pound each! The largest were nearly the size of a goose's egg. [Worcester Spy.]

**RUN PAPER.**—The Messrs. Farwell of Boston, are about to commence the publication of a two cent Journal, to be neutral in politics, to be mainly engaged in advocating the repeal of the liquor law, the license system to be substituted. It starts with 6000 four-dollar subscribers. [Temperance Telegraph.]

Two persons were burned to death on board the steamer City of Manchester, as she was going up the Bay to Philadelphia a few days ago, on her voyage from England, under the following singular circumstances. It appears the bar-keeper went into the spirit room to draw some liquor, and the cock being hard to turn, he struck it with his foot to get it free, when the light which he held in his hand was thrown down by the shock, communicating with the spirit, which was running from the cask, and instantly enveloped the room in flames. Before the poor bar-keeper could escape, he was so shockingly burned that he soon after expired. The steward, who ran to save the life of his friend, was also so badly burned that he has since died. The flames were promptly extinguished by means of a fire annihilator.

The name of the bar-keeper was Thomas McAnnally. He was 21 years of age, and the support of a widowed mother. The steward's name was John McMillen, and he leaves four or five orphan children.

**VESSEL ABANDONED, AND OWNER WANTED.** His Honor the Administrator of the Government has received a letter from the British Consulate at St. Michaels, informing him that a vessel, supposed to belong to New-Brunswick, was found abandoned at sea by a Portuguese brig-of-war, and taken into that port. A copy of the letter and the description of the vessel is subjoined.

**Secretary's Office, 12th July, 1852.** The following letter and statement are published with a view of conveying to the owners of the vessel and cargo therein described, such information as may enable them

to prefer their claim to the same in due form. J. R. PARTELOW.

British Consulate, St. Michael's, June 4, 1852. SIR,—I beg leave to acquaint your Excellency, that the Portuguese brig of war, "Serra do Pilar," arrived at this place on the 1st inst., having in tow a brigantine, loaded chiefly with deals and barrelled fish, and found abandoned at sea, which appears to belong to New-Brunswick.

I therefore enclose a report of such marks of identity as I have been able to collect, in the hope that your Excellency will be pleased to make it public in your Province, and so give the owners of the ship and cargo an opportunity of claiming them.

The Customs Department have taken charge of the property, and will sell it in the usual way. The proceeds will be kept in deposit, and paid, if claimed within a year, to the persons entitled to them. The claimants must forward originals or copies of the ship's register, and of the bills of lading, and manifest of the cargo, attested by a Portuguese Consular Agent. If there be no Consular Agent on the spot, the attestations should be made, and this fact certified by your Excellency.

I have, &c. THOMAS CAREW HUNT, His Excellency Sir E. W. Head, Bart. &c. Report of a Ship found at sea, and brought into the Port of St. Michaels.

Rig—Brigantine, topsails found standing lower masts painted green on deck, the rest painted white; iron work of mastsheads, red Hull, fir built, coppered.

Length, inside uprights, 75.9 "over all, 81.4 Breadth, inside sheer plank, 17.5 "outside, 20.10 Depth of hold by the pump, 7.1 Round house close aft, painted green, stanchions green stern square, name-board without name, star-board half of stern painted white, larboard black, remaining parts of the two lower planks of the starboard bulwarks painted white.

No figure head standing. Windlass common upper part marked "New Brunswick Foundry, 164." Stream anchor and chain found on board Fore combing of main hatchway gone. Cargo, deals and barrelled fish, the latter branded as follows:

1. T. Elliott. 2. A. Hamm. Alewives, ins 200, June 355. 3. J. Dunn. Mackerel, ins. 200 1851.

The number of casks of each brand not yet known.

**UNDervaluing GOODS.**—We understand that it has become quite a common practice for goods to be entered at the Treasury for duties at prices apparently much below the ordinary cost. This is chiefly done by foreign importers, who are thus enabled to undersell the ordinary importer. The other day a large quantity of agricultural implements were entered at a cost of 7s. 6d. per dozen, for what other people pay 45s.

As the duty is 30 per cent., a saving of 25 per cent. would in this case, be made, which would enable the operator to undersell the regular importer, and yet have a handsome profit. By the Revenue Act, the Treasurer is authorised to take possession of any goods he may think undervalued, on payment of ten per cent. advance on the invoice. This has lately been done, we believe, in several instances; and we hope the Treasurer will follow out the course with firmness, and put a stop to a practice, which would either force importers to become rogues, or throw the whole trade into the hands of unscrupulous speculators. [Courier.]

**U. S. STEAM MARINE.**—A report from Mr. Corwin, Secretary of the Treasury, shows that the steam tonnage of the U. States is 4,622,6 or more than double that of Great Britain, employing as officers and crews, 29,057 men. The reports show that the steamers of the interior on the lakes and rivers, there were lost in the single year of 1851, one hundred and eighteen steamers and six hundred ninety-five lives lost. Of all the steamers in the United States, about one tenth part are annually destroyed by fatal accidents.

**FATAL ACCIDENTS.**—On Monday morning last, the body of a labouring man, named Dougherty, was found drowned in the Mill pond, in Carleton. The last that was seen of him in his life time, was on Sunday night about 11 o'clock, when he was in a state of intoxication.

On the Wednesday following, a man named John Hamilton, who has been employed for some time past in the saw-mill owned by Messrs. Dunham and Ellen, in Carleton, was engaged in tightening a band, owing to the great velocity with which a six feet diameter drum was revolving, a portion of it—one quarter—flew off at a tangent, and struck the poor fellow on the head, frightfully mutilating and killing him instantly. We understand the deceased was an industrious, worthy man, and that he leaves a wife and one child, to mourn their untimely loss.—B.

**REMOVED.** The Herald Washington correspondent says:—It is generally understood that Mr. Crampton, the British Minister, is about to pay Mr. Webster, a visit at Marshfield. Mr. Webster, it is also stated, contemplates proceeding next month to St. John, N. B., and thence to Shediac, on the Gulf of St. Lawrence, and further what measures had been taken for placing at this disposal her British Majesty's steamer-frigate Devastation, which had been ordered to Prince Edward Island for the protection of the Fisheries in that

quarter, in which vessel he will have an opportunity of cruising for a short time for the benefit of his health.

## THE STANDARD.

WEDNESDAY, JULY 21, 1852.

ST. ANDREWS & QUEBEC RAILROAD.

The rapidity with which the work on our railway progresses, is matter of congratulation to all who take any interest in that important work. The repairs at Katie's Cove have been made in the most substantial and workmanlike manner, as well as in other parts of the line; but this it might be expected from men who thoroughly understand their business, and who have the means to carry it on. Mr. King's corps of assistants has been augmented. The "Margaret & Rachel," now due, is hourly expected with the machinery, &c. required in the construction of the work. We must not omit mentioning the harmony and great good will which exists among the hands employed on the line; the best understanding appears to prevail with employer and employed; and the men express themselves satisfied with the wages and time allotted for their work, as well the punctual payments. We sincerely trust that this agreeable state of things may continue, and as "actions speak louder than words," we are warranted in believing that it will be perpetuated. All that is required to overcome every obstacle is—enterprise, skill and energy, and these qualities Mr. King possesses in an eminent degree.

We are pleased to notice by the Carleton Sentinel, that Real Estate in Woodstock is advancing, owing it is said to the flattering prospect of our railroad. The Sentinel says, a person purchased a farm in the lower part of Woodstock about three years ago for £700—and after deriving the benefit of it during that time, sold one part of it for £200, and the other day disposed of the remainder for £1050, thus realizing the handsome profit of £550 on his bargain. Lots in that vicinity have risen even higher than here, where large crews of men are daily employed on the works. All right; the people of Woodstock know what they are about.

"ONE OF THE PEOPLE."—We have received a communication with the foregoing signature; but owing to its length, and the lateness of the hour at which we received it, we cannot insert it in our present number. In our U. S. exchanges, we observe accounts of a great number of accidents which took place on the American anniversary of Independence.

The Rev. Mr. McDevitt, who has presided over the Roman Catholic congregation in this town for upwards of three years, has been removed to St. John; he carries with him the good wishes of his congregation, and all with whom he was acquainted. The Rev. James Quinn has been appointed to this Parish. Mr. Quinn is long and favorably known here, having formerly been Pastor of the R. Catholic church in this place.

The nomination of Candidates to fill the vacancy in the representation of the City of St. John, in consequence of the retirement of John Johnston, Esq., took place on Wednesday last. Messrs. John Jordan, Wm. M. Howe, and Geo. G. Gilbert, Esqrs. were proposed and addressed the electors. Mr. Howe, it is stated, has withdrawn from the contest, and rumor says that Mr. Gilbert stands the best chance of being elected.

The City Council of Quebec have voted £100,000 in aid of the North Shore railroad between that City and Montreal.

FROM MONTREAL PAPERS we learn, that upwards of 1,200 houses were burnt during the recent conflagration in that City, and that the amount of property destroyed is between £350,000 and £400,000. The supposed amount of insurance to be about £68,225. By this fire nearly 15,000 persons have been rendered homeless. The Government of Canada have voted £2,500, and the Montreal Corporation £1,000, for the immediate relief of the sufferers by this calamity.

The Americans, it appears, are determined to take advantage of the new Navigation Laws, and place steamers on the river St. John. Already they have the J. D. Pierce plying on that river; and last week another steamer, named the Woodstock, was placed on the route between Fredericton and Woodstock. Still they are not content, as they are building a new and tighter steamer for the same route. Verily, Uncle Sam, this is free trade with a vengeance—but all on one side.

The Hon. Daniel Webster, the great American Statesman, is to visit this Province during August.

The Semi-annual Examination at the Grammar School, took place on Friday July 2d, before the President and Directors. The pupils were examined in Homer, Cicero, Virgil, Cæsar, Doletus, Euclid, Algebra, Geography, English and Roman History, Arithmetic, &c.

The writing, and manuscripts in Trigonometry and Mensuration were much approved of. The following resolution was passed:— "The Examination gave general satisfaction to the Board."

The classes in the above-mentioned institution, will re-open on Monday, Aug. 2.

### RIOT IN ENGLAND.

The steamship Asia arrived at New York on Thursday last, with Liverpool dates to the 31 instant, three days later. She brings the intelligence of a serious riot which has occurred at Stockport, a manufacturing town of about 30,000 inhabitants, near Manchester. During the riot, the Roman Catholic Chapel was burned, and some sixty persons wounded. The cause of the disturbance is not stated in the telegraph despatch received at the News Room, but in our next issue we shall be enabled to publish the full particulars. Parliament was prorogued on the 1st instant, and a dissolution would take place immediately.

Another infernal machine is said to have been discharged in Paris, but at whom we are not informed. The markets present no new feature. Flour continued active at former prices. Dates from Australia are to April 22d, and are favorable. Five arrivals at Liverpool from that country in one week brought 60,000 ounces in gold.

The telegraphic cable between Dublin and Holyhead does not work, and a surveying party are engaged in searching for the injury. The Pope has remonstrated against the heavy demands made by Austria on the papal power for maintenance of the troops. The Pope is threatened with dropsy.

We found the following jeu d'esprit in our "communication box."

### A SEASONABLE RHYME.

For "children of the larger growth."

The Market House Bell hath a tongue, and it speaketh to his comrade the Clock.

Dickory!—Dickory!—Dock!

A word with you friend Clock;

Tell me I pray, the time of day,

Dickory!—Dickory!—Dock!

Ding!—Ding!—Dong!

Don't you hear my melodious song?

Which ascends to the sky from my turret on high?

Ding!—Ding!—Dong!

Dickory!—Dickory!—Dock!

What! not answer me friend Clock?

Are you asleep? let's have a peep,

Dickory!—Dickory!—Dock!

Ding!—Ding!—Dong!

Ah! now I see what's wrong,

Oh! shame on the Town, to let you run down

Ding!—Ding!—Dong!

Dickory!—Dickory!—Dock!

Where's he who winds thee, Clock?

Three Pounds a year, is lost I fear!

Dickory!—Dickory!—Dock!

Ding!—Ding!—Dong!

I should not stand it long,

Petition the town to take you down

Ding!—Ding!—Dong!

A still small voice' from the clock replieth—

"I have as true friend Bells to speak—

With thee just now, wait till next week."

**HEARD OF BY TELEGRAPH.**—A pretty young woman of fifteen, accompanied by a man of thirty, eloped from St. John N.B. last week and took passage on the Admiral. When the pair arrived at Portland they were arrested by City Marshal Little, who had been put on the qui vive by the Telegraph, and the girl was returned to her parents per favor's express, commercially speaking, in "good order and well conditioned, as per Margin." [Carleton Sentinel.]

**MARRIAGES.** At St. John, on the 15th inst., by the Rev R. Knight, Mr. James W. Montgomery, to Miss Isabella Coxeter, all of this city.

At Lincoln, on the 18th June, by the Hon. Geo. Hayward, Mr. Daniel McLean to Mary, third daughter of Mr. Samuel True, of Woodstock, in the County of Carleton.

At Blissville, on the 13th inst., Mr. James Patterson, of St. George, in the County of Charlotte, to Jane eldest daughter of Mr. Christopher Patterson, of the former place.

**DEATHS.** At St. John, on the 16th inst., after a lingering illness, Mr. James Magee, aged 72.

## PORT OF ST. ANDREWS.

July 18.—Brig Queen Victoria, Campbell, London, dealt by F. A. Babcock & Co.

Capt. Harper, of the brig Jane Avery at this port, reports that his vessel got on shore near Machias, and is making 8 inches of water per hour. Also, that the ship Argo, Mills, of Liverpool, for St. Stephens, from New York, and the barque Achilles, of Whitby, from Shields, for St. John, are both totally lost near Machias.

The barque Zanoni, on shore at West Quoddy, has been got off and taken into Eastport. (St. John pap.)

### ST. ANDREWS AND QUEBEC RAILWAY.

**CONTRACTOR'S OFFICE.**  
St. Andrews, 21st June, 1852.

**MESRS. JAMES SYKES & Co.** are pre-  
pared to receive tenders for TIMBER, of  
the following description—  
**HEMLOCK,** 3 foot by 9 inches, in lengths  
of 16, 24 and 32 feet,  
Delivered at various points on the line from Bar-  
lett's Pond to North-West Branch near Wy-  
man's Mill.  
Tenders addressed to J. Sykes & Co., St.  
Andrews, will be received till 1st July, 1852.  
G. W. KING.

(Circular.)  
**Crown Land Office, May 7, 1852.**  
THE Commissioners appointed under Act 12  
Victoria, cap. 4 (commonly called the La-  
bour Act.) are hereby informed that the Regu-  
lations under the Act have been amended, and will

### Valuable Properties for SALE OR TO LET.

**THE Dwelling House, Stores and  
Wharf, in the town of St. Andrews,  
formerly known as the Jones' property.**  
The Dwelling House, Out-Houses  
and Wharf, in said town, formerly known as  
the O'Neil property.  
100 Acres of Land in St. James', about  
one hour's drive from Milltown, St. Ste-  
phen.

100 Acres of Land in St. Patrick, through  
which the St. Andrews & Quebec Rail-  
road is projected, and in which, or in its  
immediate vicinity, will be established as  
Depot, which will very materially enhance  
its value.

15 Acres of Land within five minutes'  
walk of the town of St. Andrews, a deli-  
cious situation for a Country Seat. If not  
shortly disposed of, it will be laid off in  
suitable lots for building purposes, and let  
on leases of improvement.

The subscriber begs to announce to the  
Public, that he has had his Lands, which  
are within ten minutes' walk of Chamcook,  
laid off, and will sell or lease Building Lots  
on advantageous terms. It is evident, that,  
owing to the Railroad passing through it  
possessing a safe and commodious harbor  
accessible at all seasons to vessels of the  
largest tonnage, with an unlimited and un-  
rivalled water power, on which there are  
already some manufactories, with others on  
the most extensive scale proposed and on the  
eve of springing into immediate operation,  
that Chamcook is one of the most desirable  
situations within the British North Ameri-  
can Colonies, for the Capitalist, the Me-  
chanic, and operator. In view of which,  
the said Building Lots are offered to the  
Public. Terms reasonable.
