It will be a matter of some surprise to our readers to know that, without no doubt whatever but that the securpremonitory rumblings, a large coal ities will be readily subscribed for, in company, with an influential Canadian board, and practically complete organization, has been formed for operation of mines in Ohio and West Virginia The project, which we are told first price. came up for consideration some three or four months ago, has been very quietly investigated and finally undertaken with Toronto and Montreal interests in control. The unsold part of \$1,750,000 of bonds is being offered at par, with bonus of 50 per cent of stock by four prominent investment houses viz.: A. E. Ames & Co., Limited, and F. H. Deacon & Co., Toronto, and Ro-dolphe Forget and Johnston, McConnell & Allison, Montreal. Under such auspices the offering should be suc-

The prospectus is very complete, and our readers are referred to the adver-

tisement in this issue. The reason indicated for the formation of such a company is that the coal consumed in the central provinces of Canada is so largely obtained from the neighboring states that Canadian capital has, to some extent, been in terested for years in those fields, and that it has seemed appropriate that a strong coal company should be formed with ample capital under Canadian control. It is felt that such a comthrough its special connection with the Canadian trade, could supplement the local buying market in the states in a way tending to insure the steadiest possible market for its production year in and year out, thereby securing the greatest economy of oper A favorable opportunity hav ing, it is said, presented itself, the Sterling Coal Company, Limited, is being formed, with the object of acquiring certain mines of bituminous coal now operating under capacity, and further equipping them and develop-ing others, all of these properties being well selected as to specially ad-

## ENGINEERS TO JOIN IN HIGHER WAGE DEMAND

Trainmen Will Today Have Another Conference With G. T. R. and C. P. R. at Montreal.

New York, Jan. 29.—Coincident with the negotiations now in progress between the brotherhoods of conductors of the Mississippi and north of the Ohio and Chesapeake, it was said here today that the Grand Lodge of the Brotherhood of Locomotive Engineers is preparing demands to be made up on the same roads.

Heretofore, the engineers, which is one of the strongest and most independent unions in the country, has held aloof from any united labor demands and steadfastly refused to join the other railway unions in demand for more pay.

Vice-Presidents Murdock and Berry of the Brotherhood of Railroad Trainmen, have arranged conferences to be held at Montreal on Monday with the Grand Trunk Railway and Canadian Pacific Railway to take up final acthe question of increased

# Last of the Half-Price Dress February Furniture Goods Ends Tuesday

Tomorrow a final clearance will be made in our Colored Dress Goods Department. Many remnants and odd ends and lengths have accumulated since our last sale, which must be disposed of to make room for our spring stocks, which are now on the way.

These ends include almost every kind of goods and almost every color, in desirable lengths for odd skirts and girls' school dresses, sacks and waists. This will be your last chance this season for half price ends, as our stock has been sorted, and this will be the ending of all such sales for this season. Some of the best lengths yet will be found on the remnant counter tomorrow. 'Twill be worth while. Come early.

Also a few Costumes or Exclusive Dress and Suit Lengths to be cleared at good reductions—\$12.00 costume for \$5.00, \$20.00 costume for \$10 and \$16.50 for \$10.50, also others reduced proportioantely. MAIN FLOOR-CENTRE AISLE.

# Metalography

Becoming very popular with the home workers. Useful and pretty articles are easily made by following the instructions with each piece. The "Nonrub" blanks (both for hammering and piercing) are cut in the required shapes ready for working, and no training or knowledge

of metal work'is necessary. We also have the tools required for this work, which are also inexpensive. See the finished hammered brass articles now showing at this counter.

February values in Cottons and Sheetings at this store prompt an early beginning to prepare the spring bedding and the summer underwear. Perhaps never before were the values so enticing as this season. We bought very heavily in Cottons and Sheetings months ago, anticipating advances, which have since been made by the manufacturers, far in excess of what we ever dreamed of. But what does this mean to you? It means you save 10 to 20 per cent on prices you would have to pay if cottons were bought at present mill prices.

Eight Persons Were Killed and Twenty Injured When Fast Express Leaves Rails.

London, Jan. 29.—Eight persons were killed and twenty others badly injured when an express train, running between Brighton and London, was wrecked at Stoat's Nest station this afternoon. The express train was travelling at the rate of 40 miles an hour when the locomotive left the rails. The two front cars were flung across the platform, while the Pullman following them was pitched into the air and fell on the station. The remainder of the train was smashed to pieces.

One of the first essentials for a parliamentary candidate is a gift of repartee. When a candidate for a west county constituency was addressing an open-air meeting a cabbage was thrown by a man in the crowd. Affair Will Remain a Mystery, as Mother Refuses an Inquest. Buffalo, Jan. 29.—Unless somethings appens very quickly the body of George Weigand, who was shot in a boat on the Niagara River last Wednesday, will be laid at rest tomorrow without an in-quest or any thorough effort to ascertain quest or any thorough effort to ascertain who fired the shot that killed him.

This is due to the decision of Mrs. Weigand, his mother, this afternoon, not to allow the body to be taken to Canada before the inquest. This decision was reached after consultation with her attorney, and places a serious obstacle in the way of the Canadian authorities in the way of the Canadian authorities in the holding of an inquest and there can be no inquest without a body.

Next to a decision by the district attorney that the whole matter is under the jurisdiction of the Canadian authorities, the most interesting of yesterday's developments in the Niagara River shooting case is the statement of Medical Examiner Danser that in view of the Star steamship Oceanic.

# A Fine Time to Work Out the Food Problem

The wide spread "shriek" about high prices for meat will induce people to plan meals with more reason and better judgment of tood strength and cost.

Many of our strong men, College Athletes and others, learned from actual experience that a vegetarian diet produced better results than a diet including meat.

Many famous names appear in the vegetarian list. Names whose owners are champions and prize winner in their chosen field of athletics.

After all the argument for and against any particular kind of diet, the question can best be solved for the individual by personal experiment.

Certain it is that those who have never tried it, have some facts to learn by breakfasting this way:

pugilistic warfare. Since the two promoters entered into their verbal combat the belief has spread about in most sporting circles of the country that the heavyweight bout is not going to come off. In San Francisco the sentiment is divided. It is the belief that the majority of fight followers, however, that the mill will be pulled off here and that Jimmy Coffroth is to have a hand in the plot, all other reports to the contrary notwith-

The present scheme of wrangling in vogue between Rickard and Gleeson does not mean anything, according to sporting men included in the "know." The best of feeling exists between the local man and the Nevada celebrity, Despite the apparent bitter enmity between the pair, the whole scrap is said to be carried on mercly as a piece of agent stuff, to keep the fars talking until Feb. 15. ### COMPANY'S BUSINESS

Having regard to the coal consumed in the central Provinces of Canada being so largely obtained from the neighboring States, and to Canadian capital having to some extent been interested in these fields for years, it has seemed appropriate that a strong coal company should be formed, with ample capital, in which Canadians should have an influential voice. It is felt that a company so formed could, through its special connection with the Canadian trade, supplement the local buying market in the States in a way tending to insure the steadiest possible market for its production year in and year out, thereby securing the greatest économy of operation. A favorable opportunity having presented itself, the Sterling Coal Company, Limited, is being formed, with the object of acquiring certain mines of bituminous coal now operating under capacity, and further equipping them and developing others, all of these properties being well selected as to specially advantageous situations and conditions. The Directors intend acquiring, accordingly, under terms which have been arranged, the following three groups of coal properties in the States of Ohio and West Virginia, or any two of said groups, with or with-

out additional coal properties, said three groups being: THE HILEMAN GROUP (all operating), being:

The Sterling Mine, on the Pennsylvania Railroad, near Salineville, Carroll County, Ohio;

The Strip Vein Mine, adjoining the Sterling Mine; The Ohio Coal and Clay Company property, located on

the Erie Railroad, near Washingtonville, Mahoning County,

The Delmore Mine, located on the Erie Railroad, near Leetonia, Columbiana County, Ohio (within about 200 yards of the Pennsylvania Railroad, and about six miles distant from the Ohio Coal Mine).

THE BECKWITH GROUP, being :

The Cecil Mine, located on the Baltimore & Ohio Railroad, in Taylor County, West Virginia, about seven miles south of Grafton, and the

Malta Mining Property, also located on the Baltimore & Ohio Railroad, in Barbour County, West Virginia, 30 miles

THE ACADIA property (subject to approval on six months' test), located in Athens and Washington Counties, Ohio, on the main line of the Baltimore & Ohio Southwestern System, and about one-half mile south of the main line of the Toledo & Ohio Central Railroad.

The total area of all the properties amounts to 11,026 acres, of which the coal is owned outright on 8,879 acres, the balance being under very low leasing arrangements, the maximum rate being 5c per ton screened. The tonnage which may be economically developed in these properties, other than the Acadia, is estimated by Mr. Charles Fergie as over 75,000,000 tons, and in the Acadia over 42,000,000, the whole being equal to an output of 1,500,000 tons per annum for a period of 78 years.

The four mines of the Hileman Group and the two properties of the Beckwith Group were visited and reported upon, on behalf of the purchasers, by Mr. W. F. Tye, recently Chief Engineer of the Canadian Pacific Railway, and who had charge of all construction on that railway from 1899 to 1906, and, in addition, all other engineering from 1904 to 1906. Mr. Tye considered the properties especially from the standpoint of railway connections and markets available for the coal, and from a general business standpoint. All these properties were later visited and reported upon, on hehalf of the purchasers, by Mr. Charles Fergie, formerly Manager of the Intercolonial Coal Mining Company, in Nova Scotia, and afterwards for several years Chief Engineer and Superintendent of Mines for the Dominion Coal Company, and since 1907 Consulting Engineer in Montreal. These properties were also visited by members of three of the firms now offering the securities. Mr. Tye also visited the Acadia

At the request of the Directors, Mr. Tye has consented to serve as President of the Company, giving the organization and conduct of its affairs his close and continuing attention.

Mr. Tye has furnished a report in great detail, copies of which may be seen at our offices. The following statement gives a digest of his opinion of the business and prospects of the Company :--

### PRESIDENT'S STATEMENT

The Hileman Group consists of four working mines, which are particularly attractive and valuable because of their loca-They are among the few remaining mines which get a freight rate of 70c a ton to Cleveland. This district has an advantage of at least 20c a ton on freight rates to Cleveland, and to all Lake Huron, Georgian Bay, Lake Michigan and Lake Superior ports over any other district in Chio, and there are only a few remaining mines in the district. There is a continuous market in supplying fuel to the local railways.

and thoroughly understands the coal business. The Directors regard themselves as fortunate in having him available for General Manager of the company. Mr. Hileman's policy having always been to keep out of debt, making his money before investing it in improvements, even where they were economically desirable, his properties have not yet been thoroughly equipped. It is intended to add to their equipment at once, so as to get the highest practical rate of production. The net profits relating to the four mines now operating in the Hileman Group, which represent only one-third of the total

Mr. Hileman, who has been the principal owner of these properties, was born in the district in which they are located

purchase price, will within a few months, with additions to the equipment not costing more than \$70,000, provide for 6% interest on \$1,800,000 of the \$1,750,000 of the bonds now being issued.

It is intended to proceed immediately with the development of the two mines in the Beckwith Group, constructing, in addition to the coal mining equipment, 500 coke ovens. The Directors have excellent engineering reports of the Acadia property, and believe it to be very valuable. In order, however, to make quite sure of the value of the property, the purchase has been made conditional upon tests by the Company's own engineers during a period of six months, the decision as to whether the tests result satisfactorily lying with the Company.

An important factor is that all the mines, being situated, broadly considered, in the industrial and railroad centre of the United States, each mine has a special local market for a considerable portion of its output. The Company's consulting engineer estimates that on completion of the proposed equipment and development the net profits from production will exceed three times the interest on the full \$1,750,000 of bonds.

After paying for the properties in full, the Company will have out of the proceeds of the sale of bonds \$\$68,750 cash for equipment and development, and for working capital, which I regard as ample. After long and careful consideration of the position and prospects of the Company, I believe that the net revenue of the Company should reach such a basis as would warrant declaration of dividends at the rate of 6% per annum upon the stock of the Company during the year 1912.

### MR. FERGIE'S REPORT

A copy of Mr. Fergie's detailed report may be seen at our offices. He goes very thoroughly into the questions involved. His report is to the following effect :-The coal is of good steaming quality, and suitable for the markets available, the Beckwith properties coal being also good

Operating conditions of the Hileman Group of four mines, all now producing, are very simple, and the capacity can be largely increased with very moderate expenditure. The Beckwith and Acadia properties are well situated as to labor and markets, and present no engineering difficulties.

The money required for equipment and to complete development of the three groups, after providing for unforeseen contingencies, is \$666,050.

Estimated yearly profits, after equipment......\$343,500 00 FIXED CHARGES: Bonds, \$1,750,000 at 6%.....\$105,000 00 

Or over 7% on \$2,500,000 capitalization.

Further equipment, if decided upon later, such as additional coke ovens at the Cecil and Malta properties, and additional entries into coal beds, will result in considerably increased net profits.

Pretty Wedding at the Home of the Bride's Parents in Duncrief.

There was a pretty wedding recently at the home of Mr. and Mrs. John G. Kirkby, Duncrief, Lobo Township, when their daughter, Edith May, became the wife of Geo. M. Wedge, Brantford. At high noon, the bride, leaning on the arm of her father, entered the room and took her place at the side of the groom, the young couple being unattended. The ceremony was performed by Rev. Ewen J. McEwen, pastor of the Poplar Hill Baptist Church. The bride was daintily gowned in white embroidered mull, and carried a shower bouquet of roses and lily of the valley, and took her place by the side of the groom. After congratulations the young

couple led the way into the diningroom, where all enjoyed the good things provided. The bride's travelling suit was gray broadcloth, with picture hat to match.

The happy couple left the bride's

home at 3 p.m. amid showers of rice with the best wishes of their many friends, for Hamilton, Toronto and points east. On their return they will settle in Brantford at 39 Fort street.
