The copy filmed here has been reproduced thanks to the generosity of:

Library of the National Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the lest page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies,

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

GENERAL TESTIMONIALS

"EASTLAKE"

GALVANIZED STEEL SHINGLES

PATENTED APRIL, 1885 MARCH, 1687 JANUARY, 1894

The Shingle that others try to imitate. Has no equal in any particular. The "Eastlake" is in use on more roofs than all other, shingles combined. Never fails to give satisfaction.

Can be laid by any one.

The only Shingle that has stood the test of time.

We are well satisfied with the Hayes' Patent Metallic Lathing, which we employed in the plastering of the National Monument, St. Liwrence street. We consider this Lathing a superior article to any we have employed hitherto, and we propose in future to use it in preference to others.

F. DECARY & SON, Plaster Contractors.

GENTLEMEN,

MONTREAL, Que., January 12th, 1894.

I have used a considerable quantity of the Hayes' Patent Metallic Lathing in several first-class jobs, and I am now using it in two first-class houses and find it very satisfactory. I prefer it to any other kind of wire or metallic lathing that I have ever used, and as long as I can buy it at a reasonable price, and the article is kept up to the same standard, I will use it in preference to any other on the market.

Yours truly,

Ottawa DEAR SIRE OTTAWA, Ont., Feb. 19th, 1894. In the early part of last year the Collegiate Institute of this city was destroyed by fire. In rebuilding, the directors of the Institute were anxious that the new building should be as nearly as possible fireproof, and, to carry out their wishes, I resolved to introduce fireproof lathing. I therefore selected your Hayes' Patent Plasmatic Steel Lathing, and saw it properly put on, and well

nailed, and I am now well satisfied with the results. It is now some months since the work was completed, and there is no appearance of cracks or splits, nor likely to be, as there can be no shrinkage." I therefore take pleasure in testifying to the excellent quality of your Lathing, and also to say that it

ought to be peed in all good buildings where fire protection is required.

Yours respert v JAMES MATHER, Architect, etc.

Toronto GENTLEMEN. TORONTO, Ont., December 2181, 1893. I have much pleasure in replying to your request for my opinion of Hayer Patent Metallic Lathing. I have used it for some years now, largely in the University restoration, and in many minor jobs. In every case it has given satisfaction to all concerned. It is easy to put on, easy to put mortar on to, has a firm and solid key, with sufficient stiffness to allow of its use on

joisting at sixteen-inch centres. It is easily adapted to use in forming coves, columns, and mouldings on wooden brackets. I can recommend it in every way. Yours truly,

WM. J. HYNES, Contractor and Plasterer.

GENTLEMEN,

TORONTO, Ont., August 13th, 1890.

This is to certify that I have examined the Hayes Patent Metallic Lathing. I consider it a firstclass article in every respect, both for private and public buildings, particularly as it renders them fireproof. I intend making use of it in buildings I may have in charge. Yours truly,

GEORGE R. HARPER, Architect.

DEAR SIRS.

TORONTO, Ont., August 14th, 1890.

I have examined the sample of Hayes' Patent Metallic Lathing submitted by you, and, in my opinion, it is superior to any I have yet inspected, and I shall be pleased to introduce it in any of my work the first opportunity that presents itself. Yours truly,

GENTLEMEN,

TORONTO, Ont., Dec. 22nd, 1893.

I have much pleasure in bearing testimony to the value of your Hayes' Patent Metallic Lathing, I consider it the best Metallic Lathing on the market, having used it for all conceivable purposes that it could be used for. In places where you are confined for room, such as beams or girders, it can be fixed to the solid, no space being needed for key, which is often a great consideration. For moulddings, however intricate, it readily adapts itself to any form; as, for instance, the Dominion Bank (Head Office), where it is used throughout the banking room for ceiling, walls, columns, etc. I have also used it for prisoners' cells at the Town Hall, Port Hope, where I think they would have quite a time getting through it, as any one would be able to testify who tries to do so.

Yours truly,

I. M. GANDER, Contractor for Plastering.

DEAR SIRE

TORONTO, Ont., August 13th, 1800.

After examining sample of sheet metal Lathing submitted by you, we have no hesitation in saying that we consider it equal to anything of the kind the we have seen or used. We have used other makes of sheet metal lathing in preference to wire, and would not have the slightest misgiving in specifying yours.

EDWARDS & WEBSTER, Architects.

GENTLEMEN.

TORONTO, Ont., December 1st, 1893.

I take pleasure in saying that having used a considerable quantity of your Hayes! Patent Metallic Lathing, and also your "Owl" Brand of Siding Plates and "mistlake" Steel Shingles, I find them to be unquestionably the best articles of their kind in the Canadian or American markets. Your Lathing possesses many advantages over the wooden lath, and your Siding and Roofing, while perfectly locked, are most durable and ornamental. By the use of these articles a wooden building may be made, to a great extent, fireproof, without materially adding to its cost.

Yours truly

HENRY SIMPSON, Architect.

DEAR SIRS

TORONTO, Ont., Dec. 19th, 1893.

Having used your Hayes' Patent Metallic Lathing in a number of buildings, I pronounce it the best iron or metal Lath now on the market—far ahead of any other I have used; and being comparatively cheap, it is within the reach of all parties who propose putting up a good fireproof building.

St. Eustache DEAR SIRS, ST. EUSTACHE, Que., Feb. 15th, 1894. have not given your goods as thorough a trial as some of your customers have, but having used them two years I can say that the "Eastlake" Metallic Shingles you supplied me make a fine-looking roof, which answers every purpose for which a roof is intended, as it keeps out wind, rain, snow, and sparks, and if I had another house to roof I would use "Eastlake" Metallic Shingles, as I find them superior to even the broad sheet, soldered edge, galvanized iron roofs that are so common here.

GEO. T. WOODWARK.

SHERBROOKE, Que., Feb. 17th, 1894. In reply to your enquiry, I may say that some three years ago I had the roofs of my house and extensions covered with your Metallic Shingles; they have proved quite satisfactory in every particular, their appearance being now as good as when placed. I have no hesitation in stating they are proving that they are fully equal to your representations.

Yours truly,

D. McMANAMY, Wholesale Liquor Merchant.

DEAR SIRS.

Elmonte Dear Sirs,

ALMONTE, Ont., Aug. 10th, 1893.

. For a number of years now I have been using your "Eastlake" Shingles, putting them on whenever I had an opportunity, and am glad to be able to state that in every case they have given perfect satisfaction as I have yet to hear the first complaint. Five years ago the writer built a house and covered it with "Eastlake" Shingles and painted them a slate color, which made a handsome roof. Last season we roofed a house with "Eastlake" Galvanized; there were six valleys, and roof was less than square pitch, and although we have had some severe rainstorms since there is no sign of a leak. It also held all through the winter and spring, although at times there was from one to two feet of snow and ice in some of the valleys. I would strongly recommend your shingles to all parties wishing a really first-class roof. Yours truly.

Blackstock DEAR SIRS.

BLACKSTOCK, Ont., Dec. 28th, 1803.

I can recommend your Roofing to be one of the best substitutes for pine or cedar shingles, and consider it much more durable. BRANTFORD, Ont., March 21st, 1889.

I have been handling your Patent Metallic Shingles in Brantford for the last three years, and must say that they are superior in every way to any metallic shingle made. I have never had a complaint from any party that I ever made a sale to, they give general satisfaction; the cost is a little more than wooden shingles on the start, but is far cheaper in the end. I have known fine residences to have been built only three months, and leaking in several places on the roof, but these were covered with wooden shingles. I was bothered this way with my own house until I laid your shingles right over the wooden shingles, and have never seen any sign of a leak since. These have been laid over two years. I can fully recommend your shingles, but I believe there are some worthless metallic shingles in the market, and would caution parties to be sure they get your Patent shingles. I have seen samples of other shingles, and find they are not so durable and cannot be laid nearly so rapid. The locks on the "Eastlake" Shingle are perfect; no possible chance of a leak. I take great pleasure in testifying to the superiority of your shingles.

Yours respectfully,

WM. EDWARDS, Coal, Wood, and Lumber Merchant.

Please forward us at once 20 squares "Empire" Galvanized Shingles. We have put on several jobs of these shingles in the past ten years, and we certainly consider them the most durable roof in the market, as well as being a pretty roof. This lot of shingles is for a residence of our own, and, as we expect to be ready for the roof in about a week, please ship as promptly as possible, and much oblige.

In reply to your enquiry, I beg to say that the Metallic Roofing which you supplied me with has given the greatest satisfaction. Formerly I had a great deal of trouble from leaky roof, but since putting on your Roofing have had none. I consider that it has many advantages over ordinary shingles. It is easily laid, is cheap, insurance rates are lower where it is used, and it looks better than wooden shingles.

DEAR SIRS,
I have been using your goods since 1891, and have always found them as represented. They have given satisfaction in every respect. I covered two buildings in 1891 with your Steel Pressed Brick, which looks as well to-day as it did when put on, and I am confident that a building covered with your Shingles and Siding is practically fireproof.

Yours truly,

DEAR SIRS,

FORT WILLIAM, Ont., Dec. 22nd, 1893.

In reply to yours of the 19th inst., I may say that it gives me great pleasure to comply with your request, and only trust it may be of as much benefit to you as I would wish. During the first year that I used your fireproof building material, the saving effected thereby on my insurance, which is considerable, amounted to more than enough to compensate me for my outlay in purchasing from you. Furthermore, the difference in the cost of veneering a frame building with your material and veneering with brick is so great, and the difference in the effect in cases of fire we may say nil, that your method must at once find favor with those to whom comparative safety at a minimum cost is an important item. I can, therefore, confidently recommend it to the public, and especially to those having large buildings on which, owing to material used, the insurance would be necessarily very large. use of your material would be of especial benefit. Trusting your company may meet with that continued success the merits of your Fireproof Building Material deserves,

Lyn DEAR SIRS. Lyn, Ont., Oct. 11th, 1893.

. . . . I have just settled up with the parties, letting them have a fair trial with the roof. There was a severe rain with a wind which blew a gale along with the rain, which kept up for about thirty-six hours; the roofing was all right and no leaks. I should think that the rain and wind would be equal to about seventy pounds pressure playing against the roof. The parties are well satisfied with the roof, and are giving it a good recommend.

In reply to yours of the 21st inst., asking whether the Metallic Roofing furnished by you to me some years ago is giving satisfaction, I am most happy to state that it is giving me every satisfaction, and, so far as I can see, it is as good as when put on. I intend using your Metallic Roofing on the main roof of my dwelling house, to replace the common wooden shingles. I may here state that we found the steel shingles very easy to apply. I consider that any one who can put on the common shingles can put on your steel ones. There is one great recommendation, that in the case of sparks or the chimney catching fire there is not any danger of the roof getting on fire by the sparks falling from it.

MERLIN, Ont., May 5th, 1894.

The Steel Siding and Roofing I purchased of you one year ago is everything that could be desired. It makes a great improvement in the appearance of my mill, and lessens the rate of insurance about two per cent. per annum: I sincerely believe it would be No. 1 for barn roofs, as the dust settling from threshing on wood shingles is sure to rot them in a very short time. I can highly recommend your Siding and Roofing to the public; first, for safety from fire second, appearance; third, durability.

Yours, etc.,

ISAAC E. SIMPSON.

The first shingles we put on appear to be just as good now as when they were first put on, while some shingles made by another firm, that were put on only three years ago, have never given satisfaction; they have leaked ever since they were put on, and we are glad. that we were not the parties who put them on. As long as we have any shingles to put on we will use yours, as we consider them the best in the market.

· In answer to your enquiry as to the state of the leaded tin roof put on our two stores on Nicholas Street in 1886, and the Steel Plate Roofing put on the three houses on. Lyon Street in 1887, we beg to assure you that at the date of writing this letter the said roofs are as they have been since they were first put on-perfectly satisfactory in all respects. We cheerfully recommend your Roofing to any one wanting a first-class article at a reasonable price.

Faithfully yours,

As I have covered many roofs with your Metallic Shingles, I take pleasure in recommending them as being durable, handsome, cheap, and easily put on. Would also say that they are giving every satisfaction wherever we have used them. I believe they will come into general use. When you take into consideration their lasting qualities, and the difference in insurance, I believe them to be cheaper than wood; therefore, any one who will use wood shingles hereafter, I think, is making a great mistake.

I think that your different kinds of Metallic Shingles are one of the valuable adjuncts to building material. They have the handsome appearance of a slate roof, with the same protection against the fiery elements, are much cheaper and lighter, and all the jobs I have done have given general satisfaction. We have been using your Metallic, Shingles and Siding since we commenced business here in 1889, and are pleased to state that we have yet to hear the first word of complaint, and believe they have given entire satisfaction in every case where used. They are clean, neat in pearance, easily put on, water tight, and apparently no wear out to them. As a protection against fire, we know of nothing better. We can assure you it gives us pleasure to recommend goods worthy of as much merit as yours.

PORT ARTHUR, Ont., Dec. 27th, 1893.

In reference to the good qualities of your "Eastlake" Steel Shingles, I may say that they are the best I have ever seen, being easily put on, and save labor, and, I believe, will last a lifetime. Shingles are fireproof, and do not hold the snow as wooden shingles do; the Siding is a capital thing both for warmth and appearance, and it takes but very little paint to cover it. I have had great satisfaction with all the goods I have received from your firm, and can safely say that your Roofing and Siding will be largely used in this district.

Yours respectfully,

W. J. SCHWIGLER, Mining Exchange Hotel.

DEAR SIRS. PLATTSVILLE, Ont., Feb. 9th, 1894. Dlattsville I used some of your Metallic Roofing Shingles about five years ago, and there is no sign of leakage (which cannot be said of some pine shingles which have not been on half the time), and look as though they might last a great many years.

I covered my large new store with them, and might say that, in my opinion, for neatness in appearance and protection from fire they have no equal. We have put on in the neighborhood of twenty roofs, and have yet to hear of any complaint. We have put them on grist mills, planing mills, a pump factory, and some of our largest and best, houses, and the best recommend we can give is, we believe they have no equal in the market, for the simple reason we cannot find any complaint, and one job secures another. Simcoe Gentlemen.

Simcor County Norfolk, Sept. 3rd, 1884. I have much pleasure in assisting your enterprise. I have two buildings covered with your Metallic Shingles this spring, which I am greatly pleased with as a roofing. I have had some experience with slate and more especially on our County Buildings, and have not found answer in this climate, being affected by the cold, and needing constant repair, and I greatly prefer your Metal Shingles. The County Gaol is covered with tin in the form of a shingle, and has been in use for

thirty-five years, and during the last twenty-five years of my charge of the gaol has not required any repairs, and appears to be good for a considerable time yet. Your method of applying the Metallic Shingles is in my opinion more simple and better.

EDMUND DEEDS, Sheriff, County Norfolk. Since receiving the above testimonial, we have supplied "Eastlake" Galvanized Shingles to replace the slate roofing on the County Buildings referred to.

GENTLEMEN.

Simcoe, Ont., July 16th, 1889.

After putting on many thousand squares of your Metallic Roofing, we would recommend it above any other roofing for our climate. Slates are not suitable, will crack and break with the storms; pine shingles are very unsatisfactory and leaky; while yours never fail to give satisfaction, being thoroughly fireproof, and for durability there is no other roof that will compare with it. Respectfully yours,

St. Mary's DEAR SIRS. St. Mary's, Ont., Aug. 15th, 1893. I have been using your Metallic Shingles and Siding, and they have given the best of satisfaction. I have used them on some very large buildings; for instance, J. D. Moore's large refrigerator, D. H. Mathieson's dwelling, Knox Church, and Carter & Co.'s rolling mill, all of St. Mary's, and on a large schoolhouse at St. Ives, Middlesex, and two large residences in Oxford, and the owners are all well pleased.

DEAR SIRS,

St. Mary's, Ont., Feb. 12th, 1894. It is now over four years since I roofed my house with your "Eastlake" Steel Shingles, and I gladly express my entire satisfaction with the result. The roof, though much broken by ridges and valleys, has proved to be perfectly tight, and proof against rain, drifting snow, and back-water from frozen masses of snow and ice in the valleys. The roof of Knox Church here which was laid with the same shingles is also very satisfactory, both in appearance and in excluding the elements.

I am, yours truly,

J. H. MATHIESON.

SNYDER, Ont., April 2nd, 1894. I covered my mill and shop with your Metallic Shingles nearly two years ago, and they have given good satisfaction. When I had the pine shingles on the mill it would occasionally get on fire in the dry weather, but your shingles stopped that.

Sault Ste. Marie Gentlemen,

SAULT STE. MARIE, Ont.,

We have been using your "Eastlake" Shingles now for two years, and have found them to be good in every particular; in fact, they have given such good satisfaction we are now putting them on the best roofs in town. Wishing you success,

Yours respectfully,

PAULIN & PLUMMER, Hardware Merchants.

DEAR SIRS,

SMITHVILLE, Ont., Aug. 10th, 1893. After using not less than five hundred squares in and around this town, and as far back as seven years ago, I have yet to hear the first complaint from the "Kastlake"

Shingle or Steel Siding, but have had lots of trouble with another manufacturer. The "Eastlake" fills the bill everywhere, and in it you have a sure thing. Yours truly,

H. D. WALKER, Tinsmith, etc.

It is with great pleasure I take this opportunity of offering my humble testimonial to you in reference to the goods of your manufacture. I have had occasion to use them on several important buildings throughout Ontario. It is almost needless to say they have given my clients more than satisfaction, and are more than you claim them to be. I hope that in the near future goods of the sterling reputation that yours have attained will be the staple article on the market. Trusting that our future relations will be as harmonious as those of the past, and wishing you every success in the continuance of your honorable business, I remain, yours respectfully,

DAVID GUNN BAXTER, Architect, etc.

Teeswater Dear Sirs, Teeswater, Ont., April 3rd, 1894.

We have been using your Metallic Shingles and Siding for the last three years, and they have given entire satisfaction to our customers, and we consider them the easiest laid, and the best of the kind in the market.

Yours truly,

FERGUSON BROS, Hardware, Stoves, and Tinware Dealers.

GENTLEMEN,

TEESWATER, Ont., Feb. 21st, 1894.

In reply to your favor, we beg to state that we have now used your Roofing and Siding for three years past, both on our own buildings and for customers, and have found same to give good satisfaction.

I take pleasure in certifying that the roofs covered with your Metallic Shingles have given the utmost satisfaction. A large number of buildings on the Exhibition Grounds have been covered with your Metallic Shingles, and have proved the tightest roofs we have. I also consider your Metallic Shingles and Siding a good fire protector.

Yours truly,

MARK HALL, Architect.

I agree with Mr. Hall's statement as to character of the Roofing material manufactured by this company. They can be used when wood shingles cannot be considered either on the score of appearance or safety against fire. The Siding and Shingles are ornamented in design, while effective as a fire guard.

JOHN J. WITHROW, President Industrial Exhibition, Toronto.

GENTLEMEN.

TORONTO, Ont., Dec. 17th, 1893.

We have used large quantities of your Metallic Shingles and Siding during the past eight years, and have always found themse give every satisfaction, while at the same time we have found by actual experience that your Shingles can be laid considerably quicker than any others on the market. We might mention that we laid about two thousand squares of your Galvanized "Bastlake" Shingles on the new buildings erected on the Exhibition Grounds in this city this season, and the sixty tons of your "Owl" brand of Galvanized Corrugated Iron for the new train shed at the Union Station here is very satisfactory.

Yours truly,

DOUGLAS BROS., Galvanized Iron Workers, etc.

DEAR SIRS,

TORONTO, Ont., April 3rd, 1888.

We have used your Metallic Shingles on buildings here, and consider them a superior covering for roofs of large spans. The roof of the "Cyclorama Building" here, with a clear span of 128 feet, covered with your Material has given the proprietors entire satisfaction. We have used your Material since on other buildings, for roofs and wall covering, with very satisfactory results. In our opinion, your Metallic Shingles are sure to please the public every time, and only require to be better known to be better appreciated.

Yours truly,

KENNEDY & HOLLAND, Architects, etc.

DEAR SIRS,

TORONTO, Ont., March 20th, 1889.

I take pleasure in acknowledging my satisfaction with the work of your company in re-roofing my residence, which is even better than I anticipated, your Metallic Shingles being laid over the pine shingles. It completely fills the bill as an effective and fireproof roof.

Yours tr

GENTLÊMEN,

TORONTO, Ont., March 22nd, 1889.

Shortly after the large Esplanade fire in 1885, we had occasion to use something to cover our new coal sheds to comply with the City Fire By-law, and we decided to select your Metallic Shingles and Siding in preference to others offered at that time. Since then we have used them altogether on buildings erected by us, viz., office, waiting room, and addition to our coal sheds. After our experience of the past four years, we can fully recommend the use of your Metallic Shingles and Siding to the general public.

Yours very truly,

THE ONTARIO COAL CO.

SIRS.

TORONTO, Ont., Dec. 11th, 1803.

In reply to yours of this date, we have used and come in contact to no small extent with the Roofing, etc., manufactured by you, and consider it to be the best article of its kind at present before the public. It is far superior to anything else as regards durability, etc., and we heartily fecommend it to all those who should be requiring anything in this line. Your goods are without doubt second to none.

Yours respectfully,

MEDLER & ARNOT, Building Contractors.

GENTLEMEN,

TORONTO, Ont., Jan. 30th, 1894.

I take pleasure in offering you this recommendation as to the merits of the "Owl" Brand of Galvanized Corrugated Iron supplied me by your company last year. Having used a very large quantity of the material on my rolling mills at Swansea, I find that it makes the most desirable roof for my purpose, the sheets being placed directly on the rafters without the expense of sheeting. The Corrugated Sheets being covered with a first-class coating of zinc, I believe that the proof will last a long time. Trusting that you will meet with every success in this industry,

I remain, yours truly,

M. McDONELL, The McDonell Rolling Mill Co.

GENTLEMEN,

TORONTO, Ont., April 16th, 1888.

In reply to your inquiry as to what satisfaction your Metallic Shingles and Siding have given us on our two elevators, we would state that before purchasing of you we investigated other shingles and siding and ascertained their objectionable features, after which we concluded to give yours a trial, believing from the size of the sheet and the method of construction and interlocking one with the other that your shingles would give the best result. We have now found after two years' trial that our selection was the best we could have made, as the Shingles provide more thoroughly for uneven settling of the building than any other form of roofing or siding. We have never had any of the shingles blow off, nor do we think they can with your system of nailing, although our buildings both stand in very exposed positions.

Yours very truly,

J. B. McKAY & Co., Grain Commission Merchants.

GENTLEMEN.

Tóronto, Ont., March 22nd, 1889.

About ten years ago I had my residence at 690 Dundas Street shingled with the best sawed shingles laid 4½ inches to the weather. The eave projected a considerable distance over the side of the house, causing snow and ice to freeze and back the water in under the shingles, and it leaked down the walls inside the house. I tried several remedies to prevent the leakage without success, until about two years ago I got you to re-cover it with your Metallic Shingles over the wooden shingles, and since then the roof has not leaked. It presents a good appearance, and I consider the money I paid you well expended.

Yours truly,

JOHN MALLON, Wholesale Butcher.

GENTLEMEN,

Toronto, Ont., March 23rd, 1889.

The roof you shingled for me with your Metallic Shingles has given entire satisfaction. Being a very flat roof, it has always been leaky until you shingled it, and your putting the Metallic Shingles over the old pine shingles has been a success.

Yours faithfully,

JOHN WILLMOT, St. Paul's Market.

DEAR SIRS.

TORONTO, Ont., March 29th, 1889.

I have used your Metallic Siding on my office, stable, and on about twenty houses, laid over one ply of building paper. I am well satisfied with the appearance of the Siding. My experience dates four years back, and if I were going to build twenty more houses I would have nothing else, as it always looks well, and is never out of repair. There is no comparison between it and roughcast, and I can highly recommend it for durability and a saving financially.

JOHN C. GRAHAM.

DEAR SIRS,

TORONTO, Ont., Dec. 2cth, 1893.

We have much pleasure in saying that we consider the Roofing, Siding, Lathing, and Ceiling manufactured by you to be very superior articles for the fireproofing of buildings. We have, as you know, lately covered the extensive buildings of the Polson Iron Works Co. on the Esplanade, and also those of Mr. Campbell at Toronto Junction, in addition to placing a very fine ceiling in the warehouse of the Land Security Co., Bay Street, city, all of which have given the best satisfaction, as is the case with all your goods that we have used during the past five years.

Yours truly,

TUCKER & DILLON, Galvanized Iron Workers, etc.

DEAR SIRS,

TORONTO, Ont., April 2nd, 1888. In answer to your inquiry as to our opinion of your Metallic Roofing and Siding, we have it on our buildings both in and out of the fire limit in this city. We have recommended it to our friends, although in so doing we have at times lost the sale of pine shingles. Yours truly,

JOHN B. SMITH & SONS, Lumber Manufacturers.

GENTLEMEN,

TORONTO, Ont., April oth, 1888. Your Roofing Material (to my mind) is the very best thing of the kind in the market. As you know, I have used a large amount upon the Argonaut Club House, Tor n.to Yacht Club House, and several stores and private residences. J. There is no doubt in my mind that it is thoroughly fireproof in every respect. 3

We have used no other kind of shingles but the "Eastlake" since the summer of 1886. We have found them to be cleanly and neat in appearance, thoroughly water-tight as a roofing, a valuable fire protection both as siding and roofing, and even compared with pine shingles their use is economical. For new buildings and repairs to old ones, we have used them on dwelling houses of

ours, and on stables for both roofs and sides in Toronto; also at our farm, and for stables at our London and Brantford agencies. In every way they have given us entire satisfaction.

IN ADDITION TO THE FOREGOING TESTIMONIALS We

MAY Say THAT

EN YEARS AGO, when we started the first factory in Canada for the manufacture of Metallic Shingles and other Fireproof Building Material, we felt that there was an opening for enterprising manufacturers of a suitable material to take the place of wooden shingles and slate, the former being usually made of very inferior material, crossgrained, inflammable, and requiring constant repairs, and lasting only a few years at the most—slate not being adapted to the severe changes of our climate, water getting under them and into the shaly portions, and by freezing either crack off pieces or break the slate, causing the roof to leak, and require expensive repairs, besides not being thoroughly fireproof, and requiring a very expensive superstructure to carry the great weight, and experienced workmen to lay them.

That we have succeeded in producing roofing and other fireproof, durable, and ornamental building material is amply proven by "What the People Say."

We started ten years ago with the determination to manufacture and sell only such material as we knew would give entire satisfaction, and have never failed to keep faith with our customers by supplying material strictly according to representation.

We were, and are, alive to the fact that every order we fill is an advertisement either for or against us, and that as the manufacture of our line of goods constitutes our sole business we cannot afford either to use inferior material, or to slight the workmanship, and we believe that any manufacturer who attempts to deceive the public will sooner or later have to close up his factory and retire from business, defeated by honest competitors who sell only reliable goods.

The designs and construction of the Fireproof Building Material made by us are all original ideas; we never copy the designs or ideas of other people.

No other maker of metallic shingles and siding in Canada can truthfully make such a statement as this. Our goods have been and are still the Standard of Quality, durability, and construction; no imitator has yet produced their equal. Do not permit yourself to be persuaded into purchasing goods which are represented as being equal to ours.

Our goods have no equal in any particular. When you require durable, ornamental, and thoroughly reliable Roofing, Siding, Ceiling, or Lathing, it will pay you to deal with a reliable firm, who have an established reputation for turning out satisfactory goods which have been thoroughly tested.

The material we manufacture is entirely different from any other in the market.

Owing to the construction of our Metallic Shingles, etc., it is quite impossible to make them of anything but the best grade of material, as cheap inferior plates would not stand the stamping and forming. We claim that no other manufactor of metallic shingles uses material equal to ours.

The "Empire" Patent Shingles, made of tinned steel, galvanized after being formed into shape, are the best and most durable roofing made (next to copper), and are the only shingles that are galvanized after being formed into shape.
