THE FARMER'S ADVOCATE, 360 Richmond Street,

Ensilage.

LONDON, ONT., CANADA.

A nice little hand book on "Ensilage and Silos," by G. W. Ross, Springfield, Ohio, is worth sending for by any who contemplate building a silo next season. The latest designs, as well as talks bearing on this subject, are all concisely and directly brought out, and quite a correspondence from those who ought to know something on the subject is included.

Errata.

In last month's issue, on account of the press of work, a few errors passed unnoticed. On page 282, the line below the cut should have read, "A View of the Hope Farm, St. Jean Baptiste, Man., the property of Wm. Martin." On page 267, in the middle column, twenty-four lines from the bottom, the clause should have read, "consider it a bye product," not a big product, as printed. In Prof. Robertson's article, entitled the milk of cows, page 290, the composition of milk should read :

	COLOSTRUM per cent.	per cent.
Water	75.8	3.75
		3.80
Casein (Albumen (15.	
		1.70
Ash		

We want Good, Live AGENTS to Canvass for the "Farmer's Advocate" in every locality in the Dominion and United States. Sample copies and subscription blanks free to canvassers who mean business.

Sditorial.

The Portfolio of Agriculture.

It was with much pleasure we heard of the appointment of Mr. John Dryden, M. P. P. for South Ontario, as the future Minister of Agri culture. The time has gone by when any prominent industry should be represented by men who have no knowledge thereof, and to say the present official arrangement will receive popular consent is putting it mild. We think it would be difficult to fill the position with any one who has as large a share of public confidence. It certainly behooves our Government to so arrange the Cabinet that agriculture shall have a share in voicing public measures. Mr. Dryden is both competent to judge what is required, as well as to make himself heard in behalf of the important and extensive section of the population he represents. His speech, with criticisms thereon, made at the banquet given by the President and Directors of the Industrial Exhibition before the delegates, judges and exhibitors of horses and other prominent breeders the day after he took the oath of office, will be given in our November issue.

The appointment of Mr. Thos. Ballantyne, M. P. P. for South Perth, to the Speaker's Chair should also be received as complimentary to the agricultural community with which he has so closely identified himself.

On the Wing.

OUR FOURTH TRIP TO MANITOBA.

Deeming it judicious to visit our branch office in Winnipeg we came through the States to able us to form our opinions from personal observations. We stopped at Chicago, St. Paul, and Minneapolis. Formerly St. Paul was considered too far north to amount to much; now the large number of fine screets, large, handsome, substantial wholesale houses and private residences, the busy hum of trade is to us even more interesting than that of the marvellous city of Chicago. Notwithstanding this, Minneapolis, only ten miles distant from St. Paul, has already exceeded it in extent of business, handsome build ings and population, the latter city claiming 200,000 residents. Why, let me ask, are not cities as large and populous to spring up in Manitoba and in our Western Territories? The wheat crops have built these large cities. We left Minneapolis in the evening and awoke in Dakota in the morning. Here we noticed the wheat crop, a little of which was stacked, but the greater part was in the shock distance between shocks. They stood very thin 20 to 50 names, 35c. each; 50 to 100 names and What struck us most forcibly was the long

upon the ground, but with well filled heads the straw, we judge, would not yield more than eight to fifteen bushels per acre. As soon as we reached the Red River Valley, and in all parts of Manitoba that we passed through, the shocks were much thicker. Over nearly the whole of Manitoba there seemed to be twice as many shocks to the acre as in Dakota, and frequently four times as many. Winnipeg, despite the crushing injury done to it by the land boomers years ago, now shows unmistakable signs that progress has set in; properties are increasing in value. Eighty thousand dollars was paid for one block just after our arrival. One lot that had been sold for \$5,000 but a few weeks ago could this day be sold for \$15,000. Winnipeg is the main city in this great and growing country. Confidence is restored. Growth may be looked for in all the villages and towns, and increased values in land throughout the whole of our western country.

[TO BE CONTINUED.]

A WORD TO AGENTS.

Farmers' Sons and Daughters, Students and Teachers.

Any honest, thrifty person, male or female, can earn good wages and obtain regular employment canvassing for new subscribers to the FARMER'S ADVOCATE. This is honorable work, benefitting the subscriber, the agent and the publisher.

The past year has been a very successful one with us. Our subscription list has grown very rapidly. Our paper is daily becoming more popular all over the Dominion. The regular agents now in our employ are doing exceedingly well, earning for themselves, abov from \$30 to \$100 per month, depending on the energy and industry of the individual. One of our regular men frequently clears \$70 per week. He will clear, one month with another throughout the year, \$100 per month. With a little practice any man equally industrious and earnest could do as well. At what business, without capital invested, can you do as well? Beginning with September we will give to all new paid-up subscribers the balance of this year and 1891 for \$1.00; for \$1.25 we will give the Advocate for the same period and one copy of our splendid picture, "Canada's Pride." With such inducements as these we trust our friends will send us many new names between now and Christmas. If possible start to work immediately, before the other papers are in the field.

The following cash commissions are given to all our agents: From 10 to 20 names, 25c. each;

upwards, 40c. each. Special terms will be made with those who wish to canvass continually. Last season a farmer and his daughter earned \$180 in ten days taking new subscribers for us. Those who would sooner receive live stock or implements than cash commissions can be supplied advantageously. See our prize list advertised in other columns. We will guarantee the safe arrival of every animal and article, and will further guarantee that all prizes will be of good quality and satisfactory in every respect.

Toronto Exhibition.

THE AGRICULTURAL HALL

was well filled with produce of unusual merit. The potatoes, onions, pumpkins and squash were very good indeed. Cabbages were unusually fine and of good quality, but the numbers exhibited were small. The field roots were the best ever seen at a Canadian exhibition. W. E. Stock, of Waterdown, Ont., showed a grand lot of the various kind of turnips, competing in thirteen classes. In his collection were twenty-eight varieties of mangels, carrots and

Mr. Simpson Rennie, Milliken, Ont., competed in ten classes, and also for the sweepstakes in mangels, carrots and beets. His roots were of enormous size, yet very smooth

D. McMillan, Hillsburg, Ont., showed a very large, smooth collection of potatoes, in all fourteen distinct varieties in the classes; also an exhibit of fifteen varieties, five potatoes each, as a collection.

The display of peppers was large and good.

Cauliflowers were few, but large and good, The exhibit of grain was much the same as in previous years in quantity, but the quality was better than usual.

The officials of the

ONTARIO AGRICULTURAL COLLEGE

made a mammoth and very handsome exhibit of grain. The manner in which it was prepared and put up reflects great credit on the officials. None of the other exhibits from similar sources, or from any of the other Provinces, could compare with this one in arrangement or completeness. It contained 328 varieties of cereal grains, of which 56 are fall wheats, 64 are barleys, 85 spring wheats, 95 oats and 28 peas. Nearly all of these are shown in the ear, and they represented the growth of the first and second years since importation, viz., the years 1889 and 1890, they also included 30 new varieties of imported winter wheats and some other kinds of grains obtained from New Zealand, tried for the first time on the farm.

The grain in the sample jars represented the seed as imported from various countries in Europe, Asia, Africa, New Zealand and Australia. Of these grains there are 237 varieties. There were also 66 samples of corn, all of which have been tested upon the farm by the dairy department, a large number of varieties of other kinds of grain grown the present year, in so far as they could be got ready in time for

exhibition.

THE DOMINION EXPERIMENTAL FARMS also made a grand exhibit of grain, grasses, fruits, corn and potatoes. The latter comprised 107 varieties. Twenty varieties of Russian apples were shown, a number of which were quite promising. Each of the Dominion Experimental Farms contributed to this exhibit. The fruit from

BRITISH COLUMBIA

was much admired and attracted considerable attention. There were also 60 varieties of barley, 80 varieties of spring wheat, 9 of fall wheat, oats 70, beans 20, peas 30, rye 10, carrots 20, corn 75, grasses 29, cherries 12, currants 10, lettuce 30, raspberries 30, strawberries 50. The last five were shown preserved in glass jars, or as photographs. Those in charge also exhibited a sample of ensilage, which was put in the silo at Ottawa, September 6th, 1889. It is still in a good state for cattle food.

That well-known seedsman, Wm. Rennie, Toronto, Ont., made a fine display of grains, grasses, field roots, &c., all of which he claimed were grown for him and from seed supplied by himself.

IN THE DAIRY BUILDING.

Manitoba and the Western Territories of Canada made a large and handsome display of grains, grasses and fruits, adorned here and there by skins and stuffed heads of their native animals. The exhibit was continually surrounded by large crowds of spectators, many of whom were interested in Western Canada, looking to it as a place in which to settle,

THE HONEY EXHIBIT.

which was also placed in this building, was mammoth, and in quality better and more varied than ever before. Many tons of the best honey was to be seen here, together with the implements, &c., used in bee husbandry.

THE HORTICULTURAL HALL.

This magnificent building was a veritable fairy land, made beautiful beyond description with lovely flowers and luscious fruits. The very air was fully charged with sweet perfume arising from thousands of flowers on exhibition. The flowers and foliage plants were numerous and beautiful beyond description. The fruit display was very good, though not as large in some classes as in some previous years, yet it was much better than was expected, considering the great scarcity of fruit throughout the Dominion and the bordering States. The apples exhibited were of good quality, but the quantity was not large. Grapes were in larger quantities and better than ever before. Here the event of the season, was the appearance of several plates of most beautiful peaches. The tree which bore them was originated as a seedling at Oakville, a station on the southern division of the Grand Trunk Railroad, twenty-one miles west of Toronto. The stock is being introduced by Messrs. Morris, Stone & Wellington, the well-known proprietors of Fonthill nurseries. It has been named the Fitzgerald peach. It is large, round, high colored and of very inviting appearance. Mr. Wellington assured us that it was much more hardy than any sort yet introduced, and that it was a more heavy and regular bearer. The opinion of disinterested authorities who have seen the fruit is that it is a valuable and very promising sort.

HORSES.

The Toronto Show has again come and gone, and among the vast crowds that have again patronized it, numbers must have enjoyed the horse department. But one thing at once strikes the casual observer, viz., that the show has now out grown its accommodation, and we hope the energetic and efficient management will be able to add more land to assist them in carrying | roadster-bred sires, but we should like to see

on their enterprize. As at present arranged it s impossible for justice to be done to the magnificient display of horses that now yearly are to be seen at this show.

We have a few suggestions to make and criticisms to indulge in: For instance the great difficulty of finding animals when in their stables might be remedied by placing both entry number and number of the stall opposite the name on the catalogue. This would not be as convenient as having the horses classed in their stalls, but a particular horse could then be found without difficulty. Exhibitors never will be persuaded to divide their stock when showing in several classes, as this adds to the work, both in feeding and supervision. To begin, as in the official catalogue, thoroughbred horses are placed in Class 1, and here, among eight entries, Buffalo seems to have been the sensational horse, and is a particularly good one, of the racing type, but with considerable size to back it up. We should like very much to see a special added to this class for weight carriers, or rather such stallions that would cross on mares and produce horses capable of carrying weights of 12 to 15 stone. Although there was a pretty full entry in the class for thoroughbreds, John Dyment was as usual quite a large exhibitor. Wm. Hendrie, Hamilton, and Geo. E. Tuckett, Hamilton, were also among the prominent exhibitors in this class.

ROADSTERS.

Roadster and roadster-bred horses were as usual about the most numerous of any class, and numbered some one hundred and sixty in all. Many of roadster breeding also shunting over into the carriage and coach and Hackney classes. And right here we must beg to differ with the present classification at our shows, for in this show, as well as in others throughout the country, horses are classed by their height more than by their breeding, stallions in this class not to be less than $15\frac{1}{2}$ hands with brood mares the same, while pairs or single drivers could not show if they stood over 153 hands. This is a most absurd way of classing them, for certainly it ought not to disqualify a gentleman's road horse even if he be up to 16 hands, there being an instance of this on the ground, as a particularly good gentleman's road horse took first premium among the single Gladstone, T cart or carriage class, merely because he stood between 153 and 161 hands. This horse was in all respects a No. 1 driver, but was entirely out of his class as a Gladstone horse and T cart horse, as he was too short in the rein to wear a collar and quite too thick at the throat, and entirely destitute of the necessary stylish action or type for this class. We hope that at the next show the classes will be better defined so that special classes for the different vehicles may be added. The Toronto Industrial is now looked up to, not only as the great exhibition, but as a great educator, and nothing will illustrate as plainly to farmers and breeders what the different breeds and types of horses are for, as having special classes for the different equipages. The roadster class, as bred in Canada, is entirely too light and small for practical work, and the present standard is too low to encourage breeding up in size. To attempt to describe the horses that had pretensions to breeding in this class would take more space than we have at our disposal. Something like fifty stallions showed up in the three older sections, proving that there is not a dearth of it imperative that the strict rules of standard breeding be inforced in the stallions awarded prizes. Among the numbers some particularly good ones appeared, and some of their produce had capital form for gentlemen's drivers, and very speedy ones appeared in the driving class, but for what purpose some were on exhibition we cannot understand, as they had neither quality, speed or anything else to recommend them.

CARRIAGE STALLIONS.

No less than 20 aged carriage stallions had entered for the coach class over 161 hands, and comprised horses of many types, but taken in all was probably as good a lot as ever appeared in a Canadian show ring. There were Cleveland Bay, English Coach, French Coach, Canadian Coach, and in others there was quite a sprinkling of trotting blood. When this class appeared it looked as though there was plenty of work for the judges, but they went systematically to work, drawing a short "leet" of six, out of which the three awards were to be given, the first prize going to S. Hisey & Son's imported English Coach, Wild Harry (1265) Y. C. S. B., a horse with capital coaching action, this horse also winning sweepstakes, the second going to Messrs. Marsh & Son's Prince Alexander, an imported Cleveland Bay which won first in the three-year-old class and sweepstakes at this show last year. He is a horse of great substance and capital coach character. The third was won by Shining Light 1178, a very neat imported English Coach, but wanting in size. Two capital horses were also drawn out, one of which was disqualified for want of height, the other an imported Cleveland Bay, shown by Fred Rowe, Belmont. Some French Coachers were also in this ring, but they were hardly in their proper class, as they are more of Hackney type, only with more size than English Hackneys.

Among the Canadian - bred carriage horses shown some very useful animals were to be found, but there was also a great want of attractive carriage among them. And here we might say that the roadster horse very seldom includes size sufficient and action of the right stamp for this class. The Coach horse must have perfectly straight, square action or he will not pass muster, whereas the roadster. bred horse almost invariably straddles with his hind outside his forward feet, which is all right for speed but is altogether too ungainly for the Coach horse, the Mail Phæton, Brougham or any other horse that is required for street or park

The class for three year olds brought out a beautiful horse, Young Peacock, sired by the Duke of Cleveland, dam by the old imported coach horse Peacock. This horse was bred and shown by Mr. Cunning. ton, and he does much credit to his breeder. The rest of the three year-old class, as well as the two-year-olds, had nothing of special notice.

The class for matched teams over $16\frac{1}{2}$ hands brought out some well-matched good specimens. A pair of bays shown by Mr. Tisdale, Brantford, were much admired and won first, Grand & Co., Toronto, second, and a pair shown by Thos. Brownridge, Brampton, third.

The other classes were numerously represented, and were driven in light buggies, Gladstones, wagonettes, and in all sorts of harness, as were the single horses, which varied still more in the manner of harnessing and the styles of vehicles they drew. Of course it would be hard to oblige

breeders to be restricted to the sort of vehicles that their different horses should be driven to, but it is quite necessary that extra classes for turnouts, both single and double, should be added to the breeding classes already defined. This would at once separate them, giving better satisfaction to all concerned. The

SADDLE AND HUNTER

classes were quite strong in numbers, and some exceptionally good ones were on the grounds, but among the rank and file were some of the veriest weeds. Stallions for

GENERAL PURPOSES

embrace a lot that would be quite useful in harness, but not of the slightest use on the breeding farms of the country. The mares and fillies are all right and deserve encouragement, and many of them are just what is wanted to breed to stallions of good breeding in any of the

THE AGRICULTURAL CLASS

is a good one through all Canada, and that at Toronto was no exception to the general rule; but we should like the stallions of this class to show a certificate from some of the stud books. Many of those showing in this class are too light for their own classes, and the temptation to win prizes by shunting down is quite strong. There is no reason that this class should not be encouraged, but the best bred stallions are none too good for this purpose.

CANADIAN DRAUGHT

horses are a living proof of what the imported Clydesdale and Shire stallions have done for our Canadian horses, and the different classes were filled with specimens that are a credit to the breeders of this country, and year after year this this the case in the brood mare, foal and filly classes, many of which are above any of the imported mares and fillies, excepting those brought out for especial show purposes. In looking over the catalogue many familiar names are brought to mind of the successful sires, as well as stallions, that were prize winners themselves in years past.

IMPORTED CLYDESDALES,

the classes of which give much interest to onlookers, as well as to those more closely connected with this great breeding and importing business. Some exceedingly choice representatives of this popular sort have lately been imported. So strong in numbers and quality have Clydesdales become, that it is only the most select that can obtain a foot-hold in our prize rings.

Messrs. Graham Bros'. Macneilage was again to the front in the class for aged stallions. He came out in wonderful form, many of our breeders going as far as to proclaim him the very best ever shown in a Canadian show ring.

Messrs. Robt. Beith & Co.'s Sir Walter, so successful as a three-year-old last season, was an easy second, and has improved exceedingly during the year. Paragon, another stylish, good horse, also shown by R. Beith & Co., taking third

T. W. Evans, Yelverton, showed the Darnley horse Royal Salute, a strong-boned, good, useful

Three-year-old stallions were especially good, and were strong in numbers, 17 being entered. There was much more difficulty in placing the awards in this class. The first was sent to R. Beith & Co.'s Eastfield Laddie, a gay horse of best mare and one of her progeny.

nice quality, sired by Old Times. The Prince Lawrence colt, Eastfield Chief, that won such honors for Mr. Beith at last year's shows as a two-year-old, was given second, Messrs. Graham Bro.'s Gilroy, sired by Master of Blantyre, taking third place. Gilroy is an exceedingly good colt. This is his first appearance in the show ring here. He was the best at the ground of any in the class; is full of life, a grand mover, and just wants a little time to furnish, being a big up-standing fellow.

Dunglass, another good one of Graham Bros., is close to the ground, and looked good enough to have been among the winners.

Just the Thing, a horse that has been forward at several shows prior to this, and has always been among the prize takers, was looking well, but the class was too heavy for him.

John McMillan, Constance, had a good horse bred in the Keir stud; this was a strong horse of great weight.

The two-year-old class was not nearly as closely contested. Messrs. Graham Bro.'s Arbitrator being a clear out standing winner.

The yearling class was quite weak. Messrs. Graham Bros. have imported a lot of grand mares and fillies. In these they were first in every class, taking four reds and a sweepstake.

The beautiful mare and foal owned by the Hon. John Dryden took first in their respective classes, and special sweepstakes for the best mare and progeny.

Of the special prizes S. McKenzie, Brucefield, won first for best Clydesdale stallion and five of his progeny. This was a horse of great scale, but has not the finish that is now required.

were the best lot ever shown in a Canadian show ring, the class being full of horses of great size, substance and useful type, just such as should help to build up our draught horses.

The first went to King Tom, shown by S. Hisey & Son, Creemore, Ont. This horse was in capital form and was moving nicely, and was in condition hard to beat; he is a useful horse of nice quality and plenty of size.

Jas. Gardhouse & Sons' King of the Castle was a good second. This horse had only just recovered from distemper, and was not in as good shape as we have seen him. He is one of the best Shire stallions that ever was brought to Ontario, and is a No. 1 stock horse.

The third was given to Chieftain, a horse shown by Morris, Stone & Wellington, a neat, good horse and good mover.

Young Enterprise was a horse of much width and some particularly good points, but moved a little wide behind; he is owned by E. Small, Jessopville.

Leake Cramp, shown by Ormsby & Chapman, is a four-year-old of nice quality and with particularly good action, but was too light for this exceedingly strong section.

A particularly good lot of young Shire stallions are now coming on for future shows, among which we notice one shown by Ormsby & Chapman, and another by Morris, Stone & Wellington, besides a lot of other good ones.

Mares and fillies also were well represented, Green Bros., Innerkip, winning first with the grand Shire mare Georgia. This mare has plenty of Shire character, and is full of quality; she has been very successful in the show ring in the past; she also won sweepstakes given for

SUFFOLK PUNCH HORSES

appear to be spreading over a wider surface, the principal exhibitors being Jos. Beck and W. Salmon, Thorndale, the former winning in aged stallions, with a good, typical Suffolk, with good action. A. J. Salmon and J. A. Melvine, Winchester; H. Walker & Shantz, Haysville, also

showing stallions.

The Messrs. Mossom, Boyd & Co., Bobcayge showed some good mares and fillies that had lately been purchased of Mr. Jos. Beck.

Thos. Irving, Winchester, was also a prominent exhibitor.

PERCHERONS

made a most creditable display, The Haras National, Montreal, taking first with the black horse Joly, a horse of great size and weight, and as good a specimen of the Percheron draught as ever has been seen at our exhibitions, W. E. Baker, Demorestville, winning second with Brilliant, a very neat three-year-old, the third going to The Haras National Co, who also show several other good horses.

Mares and fillies were not nearly as good as last year, only one mare being shown, and she by W. E. Baker.

HACKNEYS.

Five Hackney stallions, several of which had been recently imported, came forward, but it is quite evident our Canadian horsemen do not yet understand how to handle these horses, as they were not broken to the line properly. In fact, outside our heavy horsemen, there are very few who take any pains in training their horses to show on the line. Horses must be made to move straight if judges are to be able to decide on their moving capabilities, and if a Hackney is not broken to show his action he loses fully half his good points. The lot that showed in Toronto may have been able to move, but they were too

green for anything.

Asa Choate, Port Hope, had the best horse standing still, and so won the red, the second going to Geo. H. Hasting's Young Nobleman, a horse with good knee action but not so good behind. There was little choice in the remaining three which were brought out by Jos. Beck, Thorndale, J. A. Belway, Winchester, and Mathew Carlyle. The beautiful Cob stallion shown by Ormsby & Chapman was shown out of his place, as there was no class for him.

The show of cattle at Toronto on the whole may fairly be said to have been equal to the average of past years, both as to numbers and merit. We have seen larger and better representations of some of the breeds here, but all things considered the showing this year was a very satisfactory one and one which the Province may justly be proud of. We firmly believe, and we speak with a fair knowledge of the facts, that at none of the exhibitions in America can so large and meritorious a display of so many different breeds of improved stock be seen as at the annual gatherings at the Toronto Industrial. All that is required to make the exhibition satisfactory all round is better stabling accommodation, a better classification of the animals as to breeds and ages, and especially a more complete catalogue. The catalogue should indicate at least the date of birth, color, breeder, owner, catalogue. sire and dam, with herd book numbers. The first three of these items are not given in the Toronto catalogue. It would cost very little more to give this information and it would be very helpful to visitors. Another feature which would add greatly to the interest of the exhibition, one which the managers of the Old Country shows make a prominent one, is a daily parade of all the prize horses and cattle in the large ring, in the order of the catalogue, with their numbers displayed on the animals. In these parades it should be a fixed rule, on pain of forfeiture of the prize, that every prize animal be brought out at the time designated in the pro-

It is vexatious to find that in the single instance in which the prize animals are called out, on Friday afternoon, not more than half of

them appear. A notable circumstance in the cattle department of this show this year is that in at least

four of the breeds exhibitors from the Province of Quebec carried off the bulk of the best prizes. This speaks well for the pluck and enterprise of the eastern men and deserves commendation, for they have won, not with inferior, nor even with middling stock, but with animals of strictly first class character, and in the dairy classes — Jerseys and Ayrshires — with strong competition. Ontario men should take a note of these facts and look to their laurels. They cannot afford to let this be repeated.

SHORTHORNS.

We have seen larger and better displays of this standard breed at Toronto, and when we reflect that there are over four hundred breeders of this class of cattle in the Dominion there ought to be more than twenty herds represented at the Metropolitan Exhibition. If only one half of the breeders would prepare one animal for exhibition we should see a larger and better representation of the possibilities of the breed, and it is desirable, for many reasons, that a larger num ber of breeders should take part in these shows. It is not certain that all the best animals are in the hands of a few men. There are doubtless single gems in many herds, which, if they were properly prepared and brought out, would shine successfully in the competition. It is too generally thought that it is not creditable to make a show pulses a sufficient number are taken out a show unless a sufficient number are taken out to compete in nearly all the sections and for the herd prizes. This is a mistaken idea. If a man shows only one animal good enough to win a prize in such a show he has done well and is entitled to rank amongst the successful men, and is a benefactor to his country. In England a large proportion of the exhibitors at the Royal Show come up with their one best beast, and are happy if they find themselves anywhere in

the list of winners. judges for this class at The selection of Toronto was a good one, and with Richard Gibson, W. G. Pettit and Geo. Thompson for a jury the exhibitors must have felt safe and sure that the best were likely to win.

The call for bulls over four years old brought out only two entries, and Mr. Russell's roan Stanley, the sweepstakes bull of last year, was easily assigned first place. He is a bull of fine quality and very thick flesh, and is a good reprequancy and very thick hesh, and is a good representative of the Kinellar type, whence comes his dam imp. Wimple. Mr. Leask's Deacon, a large red bull by imp. Vensgarth, takes second

Three-year-old bulls had only two entries, Mr. Russell taking first prize with imp. Windsor, a red son of the Cruickshank sire Gravesend. This bull has greatly improved, and is smooth, even and of good quality. Messrs. Ballantyne & Son won second prize with messrs. Banancyne a Sow wor Sow Mr. Dryden imp. Prince Royal, imported by Mr. Dryden from the herd of Edward Cruickshank, a lengthy, from the straight bull of good character.

The section for two-year-old bulls, with four competitors, had for first place an easy winner in the Bow Park bull Master Ingram, a roan son of Sir Arthur Ingram and Havering Nonpariel II. He was the first prize yearling last year and has gone on well, keeping himself together in good shape. He ought to be good one if good parentage is any guarantee of the character of the offspring, for it is very rarely that a bull can boast of a better sire and dam.

Mr. Robert Davies, of Toronto, comes second with Northern Light, a red imp. Cruickshank bull, straight and smooth, but wanting in depth and width and masculine character.

Mr. Chisholm's red Gladstone 2nd won third prize, a straight, smooth bull, which, with a few hundred pounds more tlesh, would make a strong show.

Mr. S. J. Pearson showed a very large red bull in this section, Sir Hector Redmond by Sir Redmond, a useful bull.

In yearling bulls there were four competitors, and Cromwell, a roan son of imp. Warrior, bred by Messrs, Nicholson and owned by Mr. Eastwood, of Mimico, a bull of great substance and fine quality of flesh and hair, with capital quarters, flank and thighs, was justly placed first, while Mr. Currie's War Eagle, a red, bred by Mr. Johnston, by imp. Warfare, a de a bodied, substantial bull, with rather harsh hair and

wanting in spring of rib, was placed third, and the Bow Park roan Duke 29th was sandwiched between these for second prize.

There were twenty-one bull calves entered, and while there were a goodly number of promising ones among them, we must say we have seen many better rings of calves here, and it is always a difficult ring to judge where the range of age in months is so great and calves change so much as they grow in their first year, but the judges made a very good selection in Messrs. Nicholson's Crown Jewel 9th, a roan son of imp. Warrior, a lengthy, straight, well-formed calf, with good back, flanks and quarters.

Mr. Ballantyne's Indian Prince, red, by imp. Indian Chief, a Cruickshank sire, won second place, and Mr. John Miller's Strathroy by the imp Sittyton bull Vice-Consul and a Strath-allan cow, a calf of fine quality of flesh and hair, which many thought should have had a higher place, had to be content with third prize.

The silver medal for best bull, any age,

to the Bow Park bull Master Ingram. The females this year were a better class than the bulls, and among them were several very choice animals, especially the Bow Park cow Lady Oxford Waterloo, a beautiful roan cow with a sweet head, smooth shoulders, deep ribs and flanks and level top line, which won first prize in her class and the sweepstakes for best female. Mr. Watt's first prize yearling heifer Matchless 8th, by the famous old Barmpton Hero, hero of many a well-fought field in the last decade, now in his thirteenth year and still

getting good ones, is a heifer of faultless symmetry and splendid quality.

The first prize heifer calf, also shown by Mr. Watt, a roan, by Perfection, one of the best sons of old Barmpton Hero, is in the succession of good ones, a remarkably well-developed calf, promising to grow large, yet as plump as a pear, and full in all her points without a flaw in her make up. It was a hard class to show in too, probably the best in the show, Mr. Russell's Queen Mary and Mr. Ballantyne's Missie 6th taking second and third places. Among those outside the "short leet" might be mentioned Mr. Pearson's level-topped, long-quartered Miss Canada, which only needed a little more preparation to bring her well to the front; Mr. Miller's contribution of Vice-Consul's babies, all as smooth as they are made, and Mr. Nicholson's comely red daughters of Warrior. The herd prizes were assigned as follows:—First to Bow Park, second to Mr. Russell, third to Mr. Davies. The prizes for four calves bred by exhibitor were given:—First to Mr. Nicholson, second to Mr. Miller, third to Mr. Russell.

HEREFORDS.

The competition in this class of useful cattle, we regret to find, is limited to representatives of three herds, those of Hon. M. H. Cochrane and Mr. Judah, of Hillhurst, P. Q., and Mr. Flem-They are grand cattle for beefing, of Weston. ing purposes and the best of graziers. The show of Herefords, in point of quality, is always good when Mr. Cochrane's herd is in it, and he brings them out in the pink of condition. His grand old bull imp. Cassio, the peerless son of the noted Grove 3rd, still heads the herd, and is a wonderful bull, with a breadth and depth, thickness and smoothness that is rarely equalled in any breed. His prepotency as a breeder is also remarkable, as the fine string of daughters which go with him to make up the first prize herd abundantly testifies.

The sweepstakes female Vanity 3rd is a model for a beef animal, and caps the climax of Cassio's cunning as a sire of surprises.

Mr. Fleming's herd wins second prize and Mr. Judah's third, and there are many meritorious animals in both.

POLLED ANGUS.

Quebec has the show in this class all to itself, and Mr. Cochrane and Dr. Craik divide the prizes, the best of them going to Hillhurst.

A magnificent herd is that of Mr. Cochrane, all of them bred by himself, headed by the best black bull we ever saw, the noted Lord Hillhurst, a son of the famous Paris 3rd. He is not only large enough for any thing but carries a wealth of flesh smoothly laid on upon a carcass of extraordinary depth and width carried near to the viched

d calf,

ssell. eful cattle, ntatives of hrane and Mr. Flemle for beef-The show lways good d he brings His grand son of the l, and is a nd depth, ly equalled breeder is f daughters e first prize l is a model

k of Cassio's ize and Mr. meritorious

all to itself, divide the lhurst. r. Cochrane, by the best d Hillhurst, is not only ries a wealth cass of extranear to the

ground, while his four daughters, which go with him to make up the first prize herd, show a wonderful uniformity of quality and character, a credit to their breeder and their illustrious sire.

The reputation of these robust rustlers was well sustained by the two fine herds of Messrs. Keough, of Owen Sound, and McCrae, of Guelph, who divided the prizes, Mr. Keough winning first prize and sweepstakes with his matchless bull Claverhouse, imported by Mr. McCrae, a magnificent beef bull, standing on short legs and carrying monderfully thick, smooth flesh. Mr. McCrae's Stanley, the second prize bull, is also a grand one, and his Count Palatine nearly if not quite his match. Mr. Keough won first prize for his cow Countess of Glencairn, a model cow of the breed, but she had to take second place to her doughty daughter, the magnificent yearling heifer Countess 3rd, by Claverhouse, a wonderfully fine type of thebreed, standing on short legs and having the best of flesh and hair. Mr. McCrae has, in the second and third prize cows, fine specimens of the breed, and in his first prize three year-old cow, imported Carline, a very superior animal. His herd as a whole shows strong character, and if they had had more preparation in the way of blanketing and grooming would have made the competition even warmer than it was, but Mr. McCrae evidently prides himself on the hardiness of his cattle as one of their claims to favour and believes in keeping them in natural condition.

There were only two herds represented in this class. Mr. Harper, of Cobourg, and Mr. Rudd, of Eden Mills, generally have the show to themselves, and they both show good cattle and share the prizes pretty nearly equally.

AYRSHIRES

Made a large showing, there being no fewer than eighty-five entries, and the interest shown in this useful dairy breed is evidently increasing from year to year. Here Quebec comes strongly to the front in the fine herd of Mr. Drummond, of Montreal, who won first and sweepstakes with his typical Ayrshire bull Rob Roy, Mr. Smith, of Fairfield Plains, winning second prize and Mr. McCormack third with his Campbell, a bull of

very fine quality and character.

Mr. Guy, of Oshawa, showed a really good herd, and won a fair share of the prizes, his two-year-old bull Butterfly Duke being awarded first prize, his three-year-old cow second prize, and his yearling heifer first prize.

The cows were a grand lot, and Mr. Drum-

mond's first prize winner Voila 3rd, which was also awarded the silver medal for best female, is a perfect type of a dairy cow in form, with a magnificent udder reaching "fore and aft" to wonderful dimensions.

hard to beat in any show. Mr. Wm. Stewart, of Menie, won third prize with Lady Menie, a very useful cow.

Mr. Brown's recently imported cattle did not receive quite as much recognition at the hands of the judge as outsiders, competent to judge, thought right. They were a grand lot. The herd prizes were placed as follows:— First to Mr. Drummond, second to Mr. Mc-

Cormack, third to Mr. Guy. JERSEYS.

It was generally expected that the display of Jerseys would not be strong this year as it was known that the two herds which won the bulk of the prizes last year would not be on exhibition, but the friends of the butter breed showed their faith in their favorites by bringing out a larger number of cattle than were shown in any other class, the entries numbering 107.

The Province of Quebec took the lead in this breed also. Montreal has become famous in the history of Jersey cattle in America, being the birthplace of the phenominal butter cow Mary

probably unexcelled in America, winning first prize in the herd competition and first prize and sweepstakes for best cow with Jolie of St. Lambert 4th, by Orloff's Stoke Pogis, out of the grand old cow Jolie of St. Lambert, by Lord Lisgar. This is a model Jersey cow-pretty as a picture, but useful as well as ornamental, showing her breeding in her face and looking every inch a worker. Her dam, though well up in years, shows all the points of a perfect dairy cow and a remarkable system of milk veins, with a grand trunk line and numerous branches, all lines leading to the milk vessel.

In the section for aged bulls Mr. Smith, of Grimsby, has the first prize animal Nell's John Bull, a handsome son of Canada's John Bull and Nell of St. Lambert, by Bachelor of St. Lambert. Thirbull also wins sweepstakes for best bull any age, but he had not a walk over for it. Mr. Clark's first prize two year-old bull Mighty Dollar, by One Hundred Per Cent, proving a

formidable opponent. Mr. McLean Howard, of Toronto, won second prize with his two year-old bull Chief of Glen Duart; first prize for bull calf Fawn King, and first for three-year-old cow Cathula, a very

promising young cow.
Captain Rolph, of Markham, showed Canada John Bull 5th, a son of Canada's John Bull, and Marian Pogis, winning second prize in the class of aged bulls, and second in two year old heifers with St. Lambert's Nancy.

Mr. John Maughan, of Toronto, and Mr. A

M. Dodge, of Waubanshene, were also exhibitors and won several prizes.

In the competition for the herd prizes Mr. Smith Reburn was awarded first prize, Mr. Smith second, Mr. Howard third.

HOLSTEINS.

There were 79 Holsteins entered, and we should judge they were nearly all at the fair for they made a big show, and their breeders seem to have full faith in them. They have evidently come to stay and must be counted in with the standard dairy breeds of the country. They certainly have the capacity for doing work on a large scale, and they have a record for having done wonders in the production of large quanti ties of milk and butter too. There were about a dozen exhibitors, and considering that the first prize herd of last year was not on exhibition this year it is certainly creditable to the breeders and the breed that they could make so strong

Smith Bros., of Churchville, Peel Co, showed a herd of very great merit, headed by their fine stock bull Mink's Mercedes Baron, a grandson of the famous cow Mercedes who made such a sensation a few years ago in beating the records. He is a bull of grand constitution, fine quality and good disposition, and will no doubt prove a great acquisition to the herd. This firm also won first prize in the section for cows over four Mr. McCormack showed a grand cow in years old with imported Marian, a grand speciyears old with imported Marian, a grand speciyears old with imported Marian, a grand speciyears the breed, with the conformation of a years old with imported Marian, a grand speci-men of the breed, with the conformation of a men of the breed, with the conformation of a male carrying good fleeces. The ram won the milker, and with an udder and milk veins that indicate the worker her owners claim she is, with a record of 18 lbs. of butter in a week. The first prize for three-year-old cows also goes to the Credit Valley herd for Siepkje 4th.
In the class for aged bulls Mr. Alex. Kennedy,

of Ayr, was awarded first prize for Woodbine Prince, Smith Bros. winning second, and Hallman & Co. third with Prairie Aaggie Prince. These were all first class bulls of the breed and fitting heads for high class herds. Hallman & Co. also carried off first prize in yearling bulls with Royal Netherlands, and Felan & Breckin, Oakville, showed a very nice young bull which won third place.

Smith Bros. were fortunate in winning first honors in the class for bull calves in a large ring of good ones with Cornelia Fensen's Mink's Mercedes, a very handsome youngster.

The sweepstakes for best female went to the imp. yearling heifer Princess Lida II., owned by Hallman & Co., a heifer of very fine quality and promise.

Some very fine specimens of fat cattle, all of Ann of St. Lamberts and a long list of famous cows of the same family.

Mr. W. A. Reburn, of St. Anne de Bellevue, showed a herd of the St. Lambert family which for breeding and individual merit combined is

Alvinston, showed several good ones, and Mr. Watt, of Salem, a number of high-class animals. SHEEP.

325

The number of sheep exhibited was as large as on any previous year, and the quality in nearly every class was decidedly better. The number of entries were as follows - Cotswolds, 38; Leicesters, 55; Lincolns, 37; Shropshires, 68; Oxfords, 38; Southdowns, 43; Merinoes, 46; Horned Dorsets, 23; Exmoors, 8. These figures do not represent the actual number of sheep that were on the ground. One half of the entries in each class represents but one sheep to each entry, while each entry in the female sections calls for two animals. The number of

COTSWOLDS

was not nearly as large as in some former years, but more numerous than last year. The interest taken in this noble breed of sheep is again deservedly on the increase. All the breeders who have exhibited at American and Canadian fairs this year claim that the demand has been very strong from Michigan and the Northwestern States and from various parts of Canada. A large number of this breed has been sold during the past season at very satisfactory prices. The principal exhibitors at Toronto were Messrs. J. G. Snell & Bro., of Edmonton, Ont. Their lot comprised twenty-five head of rare excellence, both in breeding and quality. Never before has this noted firm made so fine an exhibit. Their aged ram, bred in Canada, was a large sheep, weighing over 400 pounds and carrying a very heavy coat of wool. Their imported yearling ram was smooth, massive, thick, even and without coarseness, both in carcass and fleece, Their home-bred yearlings and lambs were a nice lot. Their pen of ewes, six in number, four yearlings and two aged, were very even, of much the same type as the yearling ram described above, but somewhat more rangy. Their imported ewe and ram lambs were a superb lot, of fine quality throughout. They were undoubtedly the heaviest lambs, both in mutton and fleece, on the grounds, while their quality and finish was unsurpassed.
H. Crawford & Sons, Canboro, Ont., exhibited
sixteen head in this class. A nice useful lot they were, but not highly fitted or well prepared for the show ring. Peter Boyington, Dollar, Ont., showed four. If these are a fair sample of his flock we must conclude it is a very useful

were a remarkable good class. In numbers they came second—in quality they ranked high. The popular demand for these sheep has grown rapidly of late. The strongest exhibitor in this class was John Kelly, jr., Shakespeare, Ont., who showed twenty-five head, as even and as good an exhibit of sheep as was on the ground. His aged ram and two aged ewes were, probably with one exception, the best specimens, in any class, shown this year. The ewes will weigh about 325 pounds each, and the ram fully 425. mals, carrying sweepstakes at Detroit and Buffalo in 1889; also at Detroit this year; one of the ewes won the same honors in her class at the same times and places. His other sheep of various ages were a grand lot. Especially worthy of notice were his lambs. The entire flock show great constitutional develop-ment, size and quality. We wish to draw the attention of our readers to the fact that Mr. Kelly bred every sheep he showed, and there was not an indifferent one in the lot. His flock is a standing proof that as good sheep can be reared in Canada as in any country in the world. Wm. Whitlaw, Guelph, was out with a draft of sixteen from his flock of well-known Border Leicesters. A nice lot they were, showing all the good qualities of this fine breed. E. Gaunt & Sons, St. Helens, Ont., showed a flock of sixteen. They were a well wooled lot of good quality. E. A. Somers, St. Marys, Ont., also showed a flock of sixteen made up of the various ages. These were a thick fleshed, massive lot of fine finish throughout. They were shorn late, and had but short fleeces, which presented a very pleasing appearance, being nicely washed and trimmed. A. Easton, Appleby, Ont., showed nine head, and John Wood & Son, Freeman,

LINCOLN

class Mr. Wm. Oliver, Avonbank, Ont., exhibited thirty-one head. His aged ram, he claimed, weighed 500 pounds. This is a heavy, massive sheep, of good quality and very heavily wooled. The other animals in the flock were wooled. The other animals in the nock were large, massive, well wooled and robust. Wm. Walker, Ilderton, Ont., exhibited twelve in this class, and divided the prizes with Mr. Oliver. John Wood & Sons and Robert Shaw were also exhibitors. The

were a grand class. Never before has this breed were a grand class. Never before has this breed made so good or large a display as this year. James Tolton, Walkerton, Ont., was the largest and most successful exhibitor. His pens contained twenty-three sheep, fifteen of which were imported. His imported yearling ram was very good, large, well wooled, thick fleshed and massive. His imported ram lambs were enormous. His pen of six yearling away were of great ous. His pen of six yearling ewes were of great size, thick, deep and superb in wool and car-Three of these won the sweepstake prize this year at Oxfordshire, England, for best ewes of any breed. The aged ewes in this lot, all bred in Canada, were very fine, being large, thickly clothed with flesh and well wooled. Mr. Tolton also showed two thin yearling ewes, a sample of thirty others which they have just imported from England. These were handsome, useful ewes of good quality. Mr. Tolton imported forty-four Oxfords this season. His flock now numbers eighty head. The ewe lambs shown by this gentleman closely resemble the yearling ewes and are very good. Mr. Smith Evans, Gourock, Ont., was out with a flock of sixteen, not as well fitted as those he showed last year, but of good quality. The aged ewes and ram in this lot were very large, massive sheep, well clothed with wool and flesh. All were bred by the exhibitor. Mr. Evans reports numerous sales and the demand good. J. T. Harcourt & Sons, St. Anns, Ont., showed eight, among which were a pair of extra fine ewe lambs among which were a pair of extra line ewe lambs and a very good ram lamb, which should have won second place, being a better lamb than the winner of the second or third place. His yearling ram won second place, and is the sire of the lamb above referred to. Last, but not least, comes the well-known flock of Peter Arkell, Teeswater, Ont. This flock numbered fifteen of various ages, a grand lot throughout. His aged ram, bred by himself, is of great size and rare quality and beauty; he is the best and most handsome sheep on the ground. He won first in his class. The aged ewes, which won first, were also a grand pair. The

were the most numerous class, and were of good quality generally. Some very fine specimens were shown, and but few common or inferior ones were to be seen. Mr. Wm. Beattie showed fifteen. Among this bunch was the first prize very short legs; his fleece is good and his head and legs exceedingly well covered. His yearling and aged ewes are full of quality and very well wooled, which is good in quality and free from The ram and ewe lambs were of the

Messrs. John Miller & Sons, Brougham, Ont. were out with a very fine flock, numbering seventeen. Their two yearling rams are of splendid quality, and are sure to prove good sires. Their imported ram lambs are of good quality and growthy. The winner of the first orize is a lamb of unusual merit; their aged ram is likewise good. The yearling ewes were of the same type as their yearling rams and splendidly wooled, none of which was black. In form and character this lot were such as would produce the greatest amount of wool and mutton for food consumed. D. G. Hanmer & Sons, Mount Vernon, showed nineteen head, which were the best lot of Canadian bred Shropshires on the ground, and reflected much credit on their breeders. They were a thick fleshed, vigorous, well wooled lot of large fine sheep. Levi Skinner, Tyrone, Ont., showed fourteen, which were a thin but useful lot. R. Gibson, Deleware, showed a very nice flock, well wooled and of good quality and breeding, but not in high enough flesh to be

Woodville, Ont., showed 28 head, composed of one aged ram, five shearling rams, six ram lambs, six ewe lambs, six yearling ewes, four aged ewes and six fat sheep. His flock was exceedingly well prepared for the show rings, and were throughout a good lot. The most noticeable feature in his exhibit were his fat wethers, four of which were pure hard. The most noticeable feature in his exhibit were his fat wethers, four of which were pure-bred Shropshires and two cross-breds, got by a Shropshire ram out of good Leicester ewes. The six were very good, and should teach Canadian farmers a valuable lesson, viz., what they can and ought to do in producing good wether sheep suitable for the English market.

SOUTHDOWNS

were an unusually good class. Like all the other Downs they are constantly improving in quality and size. That veteran and successful breeder, John Jackson, Abingdon, Ont., exhibited twenty-eight of different ages. They were an excellent flock, possessing great substance, size and quality, a credit to Mr. Jackson and to Canada. Robert Shaw, Glanford Station, was out with twenty-one head, a well fitted, thick out with twenty-one head, a well litted, thick fleshed lot, lengthy and even. Their backs were particularly well covered with flesh. A. Telfer & Sons, Paris, showed fourteen of various ages. These were deep, long-bodied sheep, carrying good fleeces and possessing size and quality. All were bred by the exhibitors and were the best flock of home-bred sheep in the Down classes. Geo. Baker, Simcoe, Ont., showed sixteen. They were not as uniform as they should have been. Among them were some good specimens. The entire flock is said to be well-bred. The

were better in quality and the competition was keener this year than ever before. W. M. & J. C. Smith, Fairfield Plains, showed twenty: R. Baily, Union, twenty-seven; W. G. Baldwin, Colchester, Ont., eleven, and R. Shaw, eight. The best flock of

HORNED DORSETS

were shown by Tasewell & Hector, Port Credit These sheep were not fitted for the show ring, but were a large, well-bred lot. Wm. Ralph, Markham, Ont., also showed a flock in thin condition.

John Raymond, Southampton, Ont., exhibited flock of

EXMOOR SHEEP.

the first ever imported or shown in Canada. They are a small-horned, white variety, carrying a fleece of medium fineness and length. They have nothing to recommend them to the people of this country above the breeds already here. PIGS.

The exhibit of pigs was remarkable for its excellence. It was far in advance of that of any previous year, both in respect of numbers and individual merit. The pens were full to overat that a wing, and it is evide amount of accommodation must be provided for this department by the Directors of the Industrial Association, for the swine exhibit has now become one of the most important features of the exhibition, as was plainly manifest by the crowd of spectators who watched the judging with lively interest and also thronged the pens during the week.

BERKSHIRES

were, we thought, the best lot ever exhibited in Canada, and the Berkshire men are evidently determined not only to keep up with the times but even to surpass their present standard of excellence. In aged boars, which was perhaps the best of the male sections, five animals were brought out, Messrs. Snell's imported Enterprise, a pig as near perfection as can be, taking first, second also going to a good boar awned by the same firm, Mr. George Green obtaining third, having, we understand, had the instructure of losing, by an accident, one of his best boars a day or so previous to the judging. Among the four yearling boars shown Messrs. Snell exhibited a remarkably fine animal, a champion at the Royal, and by many of the spectators he was picked out as the winner. The judges, however, after careful inspection, fancied him slightly overtrained and eventually awarded the first to among the winners here. John Campbell, jr., Mr. Green's boar who stood better on his pins. Victoria hogs. It is always an invidious task to

In boars under twelve months the first place evidently lay between Mr. Green's and Snell's, the red ticket going to the latter's boar, who thus continues his remarkable career, as he won the champion cup at Winchester, England, for the best boar in the show when only eight months old, a prize which had never been won by so young a pig before. In boars under six months Mr. George Green bore away both first and second prizes, Messrs. Snell having to content themselves with a third.

Five aged sows were brought out, and a good lot they were, but it was in the section for sows under two years that the fiercest contest waged. Here Messrs. Snell's sow, who was the champion at Winchester, England, had as an opponent a grand sow owned by Mr. Green, which many considered equal to her rival. Excitement and speculation was rife round the ring among the partizans of the two sows as to which would come out on top, but, as is often the case, the knowing ones received a surprise, for the judges, considering Mr. Green's sow a trifle overdone, placed her third, and gave second to another sow of Messrs. Snell, the Winchester sow getting first. In the herds Messrs. Snell gained first and second, the former being headed with the first prize aged boar Enterprize and the latter with the first prize under-twelve-months boar.

SUFFOLKS

were fewer in number than last year but an improvement in quality was perceptible, especially in the young boars and sows. The exhibitors were Messrs Featherston, Dorsey, Reid and George, all of whom secured a share of the prizes. In aged boars four were shown, first going to a nice-haired, straight pig owned by Mr. Featherston, second to Mr. Dorsey's boar, a hog of nice quality, and third to Mr. Reid's boar, which last year, we were informed, won first wherever shown. The strongest competition was in the section for sows under twelve months, in which eight were brought out, and a fine lot they were Mr. Dorsey eventually securing first prize and Mr. Featherstone second and third.

The judges for Berkshires and Suffolks were Messrs. M. McArthur, Lobo; John Roach, Toronto, and John Routledge, Hyde Park.

There were only two exhibitors of pigs of this breed, Messrs. Featherston and J. Main, the former of whom had the largest exhibit and secured the greater share of the prize money. The animals shown were a better lot than last year, and many of them were of superior merit, especially in the section for boars under one year, in which five were shown. In

POLAND-CHINAS

there was greater competition, and the whole class was better than last year, not only in number, but also in merit. The entries this year were 44, as against 30 last year, and in addition to the old well-known exhibitors, Messrs. Smith, Dorsey, DeCourcey and H. George, all whom take a fair proportion of the prizes, Mr. Balwin, of Colchester, was present, and also succeeds in getting a share of the money. The class for

LARGE WHITES, CHESTER WHITES AND OTHER

LARGE BREEDS

was, as usual, a large one, notwithstanding an additional separate class had been provided for Improved Large Yorkshires, which last year were included in this class. This year not only were Large Yorkshires and Chester Whites exhibited, but Victoria hogs, a new breed originated in the State of Indiana and introduced to Canada by Mr. A. D. Chisholm, of Oakville, were also present at the Industrial for the first time. Chester Whites were, however, numerically strongest and are fairly entitled to a separate class, as a larger exhibit may reasonably be expected next year with the possibilities of additional breeds, such as Tamworth and Jersy Red, several of which are now in the country, and in a competition of such a variety of breeds it is difficult, if not impossible, to weigh out equal justice to all. Messrs. George and De Courcey were the principal winners in Chester Whites, Messrs. Featherston, Dorsey and Tran in Large Yorkshires, and Mr. A. D. Chisholm in Snell's, ar, who he won and, for y eight en won nder six th first ving to

enter into a comparison between animals, even when their characteristics are similar, but it becomes still more so when they are of different breeds. It will suffice, therefore, to say that the class taken as a whole was very superior and that each of the breeds competing were represented by some grand animals.

IMPROVED LARGE YORKSHIRES

made a most creditable display, both in numbers and quality. The exhibitors of this breed seem fully determined not to let their favorites recede in the public estimation. The animals this year were in better trim than last, and this was noticeable through all the sections. In aged boars Messrs. Ormsby & Chapman's imported Pat, a pig of great length and substance and a former sweepstakes winner, was first. Boars under two years old brought out stronger competition, first going to Mr. Jarvis's Holywell Physician, a nice haired pig with plenty of bone, and which has, we believe, since been purchased for the Ontario Agricultural College; second went to Mr. Feather ston's recently imported boar and one of good quality, and third to Messrs. Ormsby & Chap-Boars under six months were well represented. A nice lengthy boar with good back and plenty of bone (Jarvis) was placed first. Second went to a neat boar owned by Mr. Dorsey, who also captured third, although some felt who also captured third, although some felt inclined to give the preference to a boar not quite in as good condition, owned by Messrs. Ormsby & Chapman. In aged sows Mr. Featherstone took first with the grand imported sow Whiston Pride, Messrs Ormsby & Chapman coming second with an excellent sow of good coming second with an excellent sow of good Sows under twelve months brought out a fine lot, imported Lancashire Maid, who was suckling a litter at the time, being placed first, a good lengthy sow (Ormsby & Chapman) second and third to a very promising young sow (Jarvis), a little over six months old. In herds the first prize went to Mr. Featherstone's herd, which included the first prize aged sow and the first prize sow under twelve menths, second going to Messrs. Ormsby & Chapman's herd, headed by Messrs. Ormsby & Chapman's herd, headed by the first prize aged boar Pat. The judges on Essex, Poland-Chinas, Large Whites, Chester Whites, &c., and Improved Large Yorkshires, were Messrs. S. Butterfield, Sandwich; Joseph Emery, Toronto, and C. H. McNish, Markham. POULTRY.

The exhibit of poultry was superior to any thing shown in any former year at the Industrial. Brahmas were a large class, the light hens being very good and well marked, while the dark section was one of the best for years. Cochins (buff), were a fair class, the first prize hen being a superior bird, but out of feather. Partridge a very good class, the first prize pullet being beautifully and distinctly pencilled whites were a fair lot on the whole. One extra good pullet and cock were first, as was also a prize hen. Blacks were a medium class. Langshans a grand class, especially the first and second prize hens. Dorkins (colored) contained nothing very striking. The silver gray were better, but much out The silver grey were better, but much out of feather, while whites were a good average lot, but few in number. Houdans were hardly up to last year's exhibit, and it would appear that the French breeds are not much in favor with fanciers, for in La Flèche only one exhibitor put in an appear and Créve Course were also a in an appearance, and Creve Cours were also a small class, but nice. Wyandottes (black or white), contained some extra fine birds, especially the first prize cock and hen, and there were also some good pullets. Silver laced were were also some good punets. Sharel faced were a fair class, but nothing extra, and gold laced were below the average. Plymouth Rocks were a grand class, the first prize hen and pullet being especially noticeable. Whites were a good lot and much improved over former years. There was a fine display of Dominiques, the first was a nne display of Dominiques, the first cockerel being an excellent specimen. Indian Games came out in force, and appear to be gaining in popular favor. Game fowls were about the best class ever shown at the Industrial, and a black red cock and cockerel particularly took our attention. Hamburgs were a very strong class, the first prize black cock being a beauty, while the golden pencilled cock and hen were as good as we have ever seen, the pencilling being remarkably perfect. Not much improvement

was perceptible in Red Caps, while Javas were not only few in number, but also of little merit. Leghorns (white), were a large entry, as were also browns and blacks, the latter containing some nice birds, especially in the chicken sections. Rose-combed Leghorns were a fair class. Spanish entries were few in number, and Andalusians contained a good pair of imported birds. Minorcas were much better, and among the exhibits we poticed a fine cock recently imported hibits we noticed a fine cock, recently imported. Polands were a grand lot, equal, if not superior, to anything we have seen. Their crests were superb, that of the first prize silver cock measuring, we are informed, 10x12½ inches across. Bantams have never been excelled at the Industrial, and all kinds were present, from the slim game bantams to the minature Cochin fowl, the Pekin bantam. Turkeys, although not numerically strong, contained some fine specimens, especially amongst the bronze. Geese, with the exception of the prize birds, we thought, a fair average lot. Ducks, especially Pekin, were very superior, as also were the Aylesbury. The Rouen do not appear to be as great a favorite as the two former, whereat we were somewhat sur-prised, as their plumage is very handsome, and they attain in England an immense weight. There was a large display of pigeons of almost all varieties, from the homing pigeon to the slim pouter; also a number of tame rabbits, some of the cages containing does with their young progeny, which attracted great attention, especially among the younger portion of the visitors.

THE DAIRY EXHIBIT.

We do not criticize the dairy exhibit at Toronto by finding fault with the arrangement of the cheese and butter exhibited there, but sometimes an outsider can see where some improvement could be made, and by giving a few suggestive hints, the usefulness of the exhibition of dairy products may be very much increased, especially to those who exhibit, also to those who are engaged in the manufacture of the

Perhaps it is right, in one sense, to have all the exhibits under glass and lock and key, to pro-tect the goods from being injured and damaged by visitors cutting and tasting the cheese and butter. But of what educative value is that way of exhibiting dairy produce either to the makers or visitors. We heard the remark frequently made by interested parties, in looking at the cheese and butter, "we would like to taste the prize cheese and butter, but what good does it do to look at them through the glass we don't it do to look at them through the glass, we don't

We would suggest to the Committee of Management: 1st. That the prizes be large enough so that the owners of all first prize cheese and butter can afford to give a fair portion of the lots which gained first prizes to the Committee of Management of that department for the purpose of being distributed amongst the exhibitors

2nd. That the Committee of Management and visitors. should purchase from the owner of, say the third or fourth prize lots, an equal portion of the lots exhibited as given over by the owners of the first prize lots.

3rd. That an equal portion be purchased from some of the unsuccessful competitors of the lots exhibited by them

4th. That the Committee arrange for a meeting of exhibitors and those interested in dairy produce at some particular hour on some particular day during the exhibition, when these different lots would be brought together and comparisons made between them.

5th. That one or more of the judges be pres-5th. That one or more of the judges be present at said meeting to point out the particular fine qualities and points in which the first prizes excel the others, and give the reasons why the first prize lots gained the first prize, and as far as could be reasonably expected give a description of the week points and deficiencies of the tion of the weak points and deficiencies of the tion of the weak points and dendences of the unsuccessful lots, and also give what suggestions they might think fit as to how the quality of the unsuccessful lots might be improved, and thus by comparisons and information given in some such way as we have suggested, the ex-

interest and usefulness of a dairy exhibit is to be maintained. Our neighbors, on every hand, are putting forth great efforts to head us off, and pass us if they can and secure the first place with their dairy products, which hitherto have been held by our Ontario dairymen.

THE CHEESE EXHIBIT.

Through the kindness of one of the officials of the exhibition I was permitted to try a few lots of cheese that were exhibited. There were about twenty lots of colored, and taken as a whole I don't think there has been much improvement in quality from last season. Several lots were decidedly very faulty both in texture and flavor. In the prize lots there was nothing objectionably bad in any of them, but there was an absence of that nutty, clean, creamy flavor, which a really fine Cheddar cheese possesses. Some of them showed weakness in body and not very firm in texture. There were about the same number of lots of white cheese, and taken as a whole, they were finer than the colored. The prize lots were very fine and several other lots not far behind them. The white cheese were better in body than the colored, and also finer in flavor and texture, but still there was a noticeable absence of that pure, nutty flavor which is so highly prized in fine cheese, but which is so highly prized in fine cheese, but which is so seldom met with in the ordinary make. There were about ten lots of Fruckle cheese and two of Stiltons, which completed this exhibit. In the

BUTTER EXHIBIT

there was a decided improvement in quality, more uniformity in texture and color than formerly. One very marked improvement is in the manner in which the one pound lots were made up. Each of these seemed to have been made up in moulds like the moulds in which bricks are made; it packs nicely and keeps its form well, when put in square tin boxes and enclosed in a wood box made about an inch all round larger than the tin one. If this space is filled with ice butter can be sent to market in fine condition. Each pound is rolled in a clean wet cloth or in paper prepared for the purpose, with the name of the creamery or owner printed on it; this serves as an advertisement, and if the quality is fancy will create a good demand at a price that will be remunerative to the producer.

The exhibits of butter in baskets was very good, showing much improvement upon former years, which indicates that farmers' wives and daughters are improving in the art of butter

Death of a Great Inventor.

Carl August Johansen, the inventor of the Swedish Butter Extractor, recently passed away. It will be remembered in this connection that many of the greatest inventors have passed away just as their great work, which they have labored their lives out on, has been so nearly perfected, as to insure ultimate success. The inventor of a machine to make butter continuously, a granule at a time from milk almost direct from the cow, marks an era in dairying not to be forgotten quickly, and while many who will know of the merits of the extractor will not know who Carl August Johansen was, yet his name will go down to posterity as a benefactor to the dairy interests of the world.

A Clydesdale judge and two Shire judges, in a mixed ring of Clydes and Shires, caused too much friction for comfort in the recent Harrowgate (Yorkshire) Show.

Remember that fancy prices are only obtained for fancy horses, if you expect to get the top of the market you must have the best kind of herses to offer. The only way to get the best is to begin aright by breeding good mares to good stallings. One man can raise valuable horses as stallions. One man can raise valuable horses as stallions. One man can raise valuable horses as well as another. There is no patent or copyright upon raising good stock of any kind. The trouble is that too many breeders are too economical in selecting stallions to which to breed. They let the penny before their eye hide the dollar in the distance.

Clydesdales in Scotland.

Stock.

The months of July and August have been very busy ones. Numerous exportations of good horses and exceptionally good mares have been made to Canada, and there should be strong representations of Clydesdales at all the fairs this fall. It seems hardly possible in the space of this letter to give full details of all the shipments. In general, however, it is universally admitted that the quality of the stock exported this year is higher than it ever has been, although the quantity may have been less. When mares whose value is over £300 are bought for the Canadian market, there is an obvious determination on the part of your importers to maintain a very high average of excellence in your horse stock.

Amongst this season's buyers have been Messrs. J. W. Evans, Yelverton, Ont.; Patrick Curtin, Adare, Ont.; W. H. Graham & Sons, St. Mary's, Ont.; John McMurchie, Jarvis, Ont.; R. Ness, jr., Howick, Quebec; Andrew Harvie, Kirkwell, Ont.; D. & O. Sorby, Guelph, Ont.; Hugh Thomson, St. Mary's, Ont.; Neil Smith, Woodhill; John Gilmour, Montreal; Ben. Allen, Dunlop, Ont.; A. Rupell, Unionville, Ont.; W. Colquhoun, Mitchell, Ont.; John Ralston, Montreal; Messrs. Ormsby & Chapman, Springfield-on-the Credit, Ont., who bought from the Marquis of Londonderry; Graham Bros., Claremont, Ont., Charles Mason, Brucefield, Ont.; J. Stewart, Elderslie, Out.; George Stewart, Howick, Quebec; I. Laing, Fergus, Ont.; J. W. Reid; Jos. White, St. Mary's, Ont.; R. D. Dundas, Springville, Ont.; and S. C Johnston, Manilla, Ont.

The most extensive buyers have been Messrs. Graham Bros., with 21 head amongst which were several magnificent animals, including the prize mares Bessie Bell, by Darnley; Lady Dunmore, by Earl Grange; Pride of Drummuir, by Culloden; Barr Bell, by Barney; and the prize horses The MacKechnie, by MacGregor; International, by the celebrated Flashwood; and Second Choice, by Chastlar, out of the dam of the Queen's famous horse First Choice that was first at the Royal Windsor in 1889. Messrs. Sorby were also extensive buyers, their purchases numbering 14 head, amongst which were the prize stallions Glasnick, Blend and Lord Carling, the latter got by the celebrated Lord Erskine out of a Darnley mare and winner of third prize at the Glasgow Spring Stallion Show, and yearlings by the Dumfries prize horse Barney, Flashwood, the magnificent big horse Prince of Airds, and sons of the celebrated Prince of Wales. Mr. Ness had four or five superior horses, his trump card being undoubtedly the fine horse The MacKelvie, the West Lothian prize horse of this season, and winner of first prize at Stramaer when a yearling. Mr. White had only two horses, but one of them Duke of Argyle, is an extra good specimen. He was first at Campbeltown show when a yearling, fourth at the H. & A.'s., Melrose, and second at Ardrossan in 1889. This year he was second in a very good class at Paisley, and his dam on the following day was cup winner at Campbeltown. Mr. Evans' importation included several prize winners at principal shows and numbered seven head.

The number of horses exported to Canada from

1st January to the end of August 1890 was not less than 137, and more may yet follow. A large shipment of yearlings, numbering 28 head, were exported to Germany last month, and during the season horses have been sold in considerable numbers for sale to Buenos Ayres, but the revolution there has to a great extent spoiled that market which promised to be one of our best.

Mr. James Lockhart, Mains of Stranraer, has had the misfortune to lose his fine young horse, Prince Forunatus, which he had hired for 1891 to the Rhins of Galloway Horse Breeding Association. The cause of death was inflammation

of the lungs.

Mr. James Johnston, Lochburnie, Maryhill, has hired Orlands' second prize two-year old at the H. & A. S. Dundee, to the Lower District of Wigtownshire Horse Breeding Association for 1891, on a guarnantee of 60 mares at £5 10s. each, payable at service, with £6 10s. additional for each mare proving in foal.

ditional for each mare proving in foal.

The harvest weather prospects here up to today and yesterday were anything but favorable,
but this is truly a lovely day with the sun shining
brightly in a cloudless sky.

Scotland Yet.

Glasgow, Sept. 6, 1890.

Producing Mutton for England.

The McKinley bill that has caused so much consternation among our stockmen, and particularly with those who have been in the habit of selling lambs for the Buffalo market, will doubtless force this branch of our live stock trade in a fresh direction. The ADVOCATE has argued that we should feed these lambs at home where feed is cheap and thereby obtain a profit on the food consumed. Those who still desire to part with them as lambs may find plenty of encouragement in the fact that lambs have been most success fully shipped to Great Britain during the past summer, and that the venture has proved particularly advantageous to all parties concerned. The lambs arrived in the best possible condition, and found ready sale with English farmers for feeding on the grass there. They have turned out remarkably well, and no doubt the time is not far distant when our sheep and lambs will be as popular among the feeders of Great Britain as our cattle have proved. At the present prices of sheep in England there is a good margin for profit for the grower as well as the shipper, and it reflects badly upon the shortsighted policy of shifting from one branch of stock-raising to another to obtain larger immediate returns. The neglecting of sheep-breeding and the general reduction of the flocks of Ontario during the latter end of the last decade has prevented us reaping a rich harvest in this line of exporting to England. What we had to spare have gone across as lambs to the United States, which, if they had been shipped to the English markets double profits would have been realized. Canada need not take second place with any country in the world for the production of the best quality of mutton sheep. This industry fits as well into the routine of general farming, as practised throughout the country, as any other branch of stock-raising. Sheep take less winter care, can be housed in cheaper buildings, get on the grass earlier in the spring, shift for themselves later in the fall, and require next to no attention throughout the busy season; and there are numbers of farms that cannot produce cattle to advantage on which sheep could be grown most profitably. A glance at the trade returns as to what our sheep have been doing for us might here be interesting and will show that Americans have been our largest buyers, and although a large number of those sent over the lines may be I flavor and freshness.

credited to sheep exported there for breeding purposes, still, doubtless, the mutton trade with that market has been larger than to England. We find that in 1889 360,130 sheep, with a value of \$1,263,125, were exported, out of which Great Britain only took 53,131 sheep valued at \$344,791. There has been less difference in the amount sent to the United States for the last eighteen years than might be imagined, for in 1872 we sent them sheep to the value of \$1,015,-277, and in 1877, the lowest amount since, we sent them nearly \$500,000, with an average for the last eighteen years of over \$735,000, the highest output being in 1888 when our exports in this line reached \$1,029,410. In 1884 we reached the highest figure to Great Britain, when sheep to the value of \$919,495 were exported the only year that we sent more there than to the United States. The worst feature in the case is, we have no means of supplying present demands. Both countries have been free buyers for what we had to spare, but we want more wethers for English markets and more rams and ewes for the United States. Both these markets stand open to us, all that is required is for us to occupy the position. For the first we must cater to the tastes of English consumers—make more of a specialty of sheep breeding and feeding. What we have done in cattle can be done with sheep. That our mutton has not found as much favor with English consumers is true. We should, therefore, see to it that we feed No. 1 wethers for this trade. Old ewes and rams are not up to the standard for this trade. Some idea of the immense requirements of Great Britain in the fresh meat line will be given in the fact that the 56,628 sheep exported by Canada was hardly a tenth part of the live sheep imported during 1889. To show how much better live sheep sell than frozen mutton we find that in an experiment in shipping from Buenos Ayres, even after being sent this long sea voyage, the same quality of sheep realized double the price of frozen mutton from the same country. As high as seventy shillings, or \$16 78, was paid for good shearlings for mutton purposes during this last season. Is this not encouraging?

The American market is also open for our spare breeding ewes and rams. To breed these more money is required to start a breeding flock, but there is plenty of demand at good paying prices. There is scarcely a farm in Ontario where a flock of sheep cannot be kept to advantage, except in the vicinity of towns where the dog nuisance will not allow this industry to

be developed. Some idea of the vast amount of meat consumed in London alone may be gathered from the fact that the quantity of dead meat received in Smithfield market in 1887 amounted to 260,000 tons, in 1888 to 264,000 tons, and in 1889 to 276,000 tons. Canada has obtained a foremost place in Great Britain's list of meat shipping countries, and as there seems to be no limit to the demand, so there need be practically no limit to Canada's capability of supplying it. Therefore let our farmers be up and doing; let No other us strive to secure this market. country is as advantageously placed for breeding, feeding or shipping. As we have said before, the dead meat trade has never yet been on as good terms as regards prices. Dealers always look with suspicion on frozen mutton, as it does not keep after arriving at the shambles and they have not the general facilities for refrigerator compartments, meat must go immediately from the ice box to the cook or it soon loses its October, 1890

A Noted Cow.

Among the very latest cattle of pure breeding that have come to swell the grand army that is marching forward to improve our live stock and assist in increasing the wealth of our farms are the Holstein-Friesians. The firm grip they have already obtained upon the affections of our dairy farmers is not only on account of the great producing qualities of the cattle themselves, but is also due in part to the enterprising and energetic men that have introduced them. Among those most largely associated in breeding and importing the black and whites are Messrs. Smith Bros., Credit Valley Stock Farm, Churchville, Ont., who have left no stone unturned to obtain the best blood and highest performing families. The subject of the accom-

Mink was awarded first prize, in class for aged cows, at Iowa State Fair in 1884, also sweepstakes; also first at Iowa State Fair in 1885, and the sweepstakes medal; also secured the sweepstakes prize at Kansas City Inter-State Fair in 1885; also third premium in butter test at Minnesota State Fair in 1886.

In 1887 she was awarded first premium, in aged cow class, at the Iowa and Minnesota State

Mink is the dam of the bull now used in the herd of Messrs. Smith Bros., who informs us that the milk records of their cows run from 6,000 to 13,021 lbs. in a year, and as high as 81 lbs. in a day, butter record reaching from 13½ to 19 lbs. a week of all cows that they have tested. They now have over seventy-five head of these cattle on the farm.

Noted Clydesdales.

Col. Holloway, Alexis, Ill., paid our eastern office a visit and invited the staff to inspect the horse Macara, which he expected to pass through London that day. The train having been delayed it was dark before he arrived, but what we could see of him by lamp light, as he he was moved from one car to another, we do not wonder that he was the crack horse at the Royal Show at Plymouth this season. Macara, being foaled and raised in England, was entirely unknown until he measured swords with the then unbeaten Prince of Kyle. Macara is by the noted Macgregor, and does justice to his south country raising. He is quite an Englishman's horse, being wide and thick, and has quality enough to please the most fastidious

THE HOLSTEIN COW MINK (402 H. F. H. B. Adv. Reg. 251).

Milk Record, 96 lbs. in one day, 16,6281/2 lbs. in a year. Butter Record, 3 lbs. 9 oz. in one day on grass alone; 20 lbs. 9 oz. in seven days.

panying illustration, Mink (402), in her threeyear-old form, during the month of August, one of the most unfavorable of the year, made a ten-day record of 5324 lbs. of milk, from which was made 23 lbs. and 6 ozs. of butter. In her four-year-old form she gave 91 lbs. of milk in a day, 841 lbs. in ten days, $2,499\frac{1}{2}$ lbs. in a month, and in the year, 16,628½ lbs. From the ten days' milk was made 29 lbs. and 6 ozs. of butter. This was the best fouryear-old milk and butter record ever made. At seven years, in twenty-four hours, she produced 79 lbs. of milk, from which was made 3 lbs. 9 oz. of butter. This was on pasture alone, and without any extra feed whatever. Her best day's milking was in the spring of 1884, when, in one day, she gave 96 lbs. of milk. She made 20 lbs. and 9 ozs. of butter in seven days.

All small fruits do very well planted in early fall, and it is a good plan to plant then, so as to have that much work off hand before spring comes. The farmer, gardener and fruit grower all have more to do than they want when spring time comes.

In agriculture or horticulture botany will make a person more capable. It will make him a good observer, improve his reason, strengthen his judgment, cultivate his taste, broaden his views, weaken his respect for the traditions of his fathers. It will sharpen his wits, make him a reliable investigator. It will enable him to become a leader instead of a follower.

How many farms are brought up to their fullest capacity of production? Not many I dare say. What would be thought of the manufacturer who failed to produce all that his factories could afford him, letting his capital lay idle and his resources yearly slip through his fingers, simply for the lack of faith to prepare himself with the necessary tools and labor to carry it on?

Scotchman. He is wonderfully good at the ground; has a beautiful head well placed on a grandly-shaped neck, with a back and loin that leaves nothing to wish for. Along with him Col. Holloway takes two of our most celebrated mares, Polly Craig, by Darnley, purchased of her importers, Messrs. E. & G. Charlton, Duncrief, the other from Mr. A. Innis, Clinton. Both these mares are well known in our Canadian shows, and have always won first place wherever shown. Polly Craig weighed 2,240 pounds, the Clinton mare 2,170 pounds, just before being placed in the car that was to take them to their new homes.

Col. Holloway is one of the oldest importers and breeders of Clydesdales in the west. He tells us he has a stud of something like ninety mares, besides stallions and, as is well known, is a firm believer in Prince of Wales and Darnley blood, and is determined to have the best of this breeding.

The Canadian Export Sheep Trade.

The Canadian Gazette, published in London, England, in a recent issue, says :-- "The Beaver Line steamer Lake Superior took to Canada last week probably the best ram that has ever been shipped to North America. The event is in itself one of importance to the Canadian agricultural community, but the circumstances of the shipment will give it a special interest in the eyes of all who are concerned in the development of the export sheep trade.

"The Hon. John Carling, Canadian Minister of Agriculture, in his last report, shows that 369,-131 sheep and lambs were exported from the Dominion during 1889. A large number of these were shipped to the United States. Whay were not more shipped to the United Kingdom? Mr. Dyke, the Canadian Government agent at Liverpool, in his report of the same year, deals specifically with the point. 'In previous reports,' he says, 'I have pointed out that with care and attention, and the introduction of Down sheep into the Dominion, breeders there will find a profitable market for all the sheep which can be exported to Great Britain, despite the increase in the frozen mutton trade; and the present state of the market fully warrants my assertion. I have to note, during the past year, a novelty in the Canadian export trade-namely, the arrival here of a consignment of Canadian lambs. These were by no means of exceptional quality, but they arrived in splendid condition, and the mortality was very small indeed. These lambs were immediately snapped up by glaziers, and will be kept as stores until next year. So profitable was the venture, that arrangements are being made to extend the business considerably. This will be of great importance to the farmers in the Dominion, one of their difficulties having always been the risk of their getting flocks of sheep too large to carry over the winter. If, by the introduction of early maturing sheep, Canadian farmers could produce a lamb 60 lbs. weight to ship to this country in October, I am confident they would find the British markets far more profitable than those of the United States, which have hitherto been relied upon, and the result would be a great development of the export sheep trade. A breeder in England has just published a report of his lambs, which shows that the wether lambs, fed in the ordinary way in the fields, sold at £2 4s. 2d.—between \$11 and \$12 each—at from six to nine months old; probably the average did not exceed seven months. There is nothing to prevent Canadian farmers, with care and attention, obtaining equally satisfactory results.'

"That report has naturally directed attention in Canada to the possibilities of the export sheep trade with this country and to the fact that no great improvement has been made in the breed of Canadian sheep during the last few years. What are really required are sheep of good size, quality, and early maturity; and when Mr. Dyke was last year at the Ottawa Valley Agricultural Show he remarked that a great deal remains to be done to improve the breed of sheep in this region. In order to promote this object he generously offered to send out a pure-bred shearling Shropshire ram to be offered as a prize, at the forthcoming show, for the best pen of sheep produced by farmers in the Ottawa Valley, and suitable for export to Great Britain. The ram which was shipped by the Beaver Line

steamer Lake Superior is the one in ques tion. It was specially selected from the celebrated flock of Mr. Thos. Fenn, Downton Castle Ludlow, Shropshire, and can boast of this illustri ous pedigree:—Sire Hatton's Gem 3536, bred by Mr. J. Beach, sire, Lord Neptune 2687, dam by the 100 guinea Royal Chief 1022; Royal Magnus 2792, by Royal Chief, dam by the 100 guinea Milton's Pride 858; Black Prince 3745, and Duke of Norton 4245. Mr. Thos. Fenn's old-established flock is of high-class repute, both for size and quality. The list of prizes won by his flock, exhibited in the best British show yards since 1870, when the Shropshire Challenge Cup was won with a shearling ram at Shrewsbury, is a very long one. Mr. Fenn's flock has also taken prizes in the leading show-yards of the European continent, and North and South America. The ram sent out will no doubt attract attention in Canada, in view of the fact that the use of such rams will improve the value of lambs or sheep at least 25 per cent., whether intended for export to the United States or Great Britain."

Detroit International Exposition.

After the magnificent show of Canadian live stock at Buffalo last year it must have been very disappointing to Canadian stockmen visiting the Detroit Fair this year to see so small an exhibit sent to represent the Dominion. In fact, with the exception of the sheep classes, in which Canada was well represented, the exhibit from this side of the line was a very small one indeed. In draught horses there were but five shown that were owned in Canada.

The following notes will show our readers to whom the credit of representing Canada at the Detroit Fair of 1890 is due :-

HORSES.

CLYDES AND SHIRES .- In this class the only stallion sent forward from the Dominion was a brown two-year-old, imported and owned by Mr. P. Curtin, of Adare, a thick, short-legged colt, got by the Master of Blantyre. He was awarded second place. In brood mares there was again but one exhibit from Canada. But here what was lacking in quantity was made up in quality, for a grander mare than Polly Craig (6046) [438] would be hard to find. This mare, owned by Messrs E. W. & G. Charlton, of Duncrief, Ont. is a daughter of Darnley (222) and out of a mare by Paisley Jock. Weighing, as she does, 2,200 lbs, she shows at the same time an amount of quality that one would hardly expect see in an animal of her size. We need hardly say she captured the red ticket, while the blue went to a very sweet mare owned by Mr. J. T. Hurst, of Wyandotte, Michigan. This mare, although owned in the United States, may almost be claimed as a Canadian exhibit, as she was purchased by Mr. Hurst from Mr. Levi Lewis, of London, while the grand colt running by her side was sired by the well-known stock horse Bonnie Doon, imported by Mr. P. Curtin.

In the class for one-year-old fillies Mr. Curtin got first place with a nice bay filly got by Callendar out of a McGregor mare. This filly was bought later on by Mr. J. T. Hurst, of Wyandotte, Michigan.

In the class for heavy draught teams Mr. Wm. Hendrie, of Hamilton, showed a very fine pair of Canadian mares, a Shire and a Clyde, that in the opinion of a good many of the spectators were fully equal, if not superior, to the Percherons shown by Mr. J. B. Palmer, and which were awarded the red ticket.

In light horses Mr. Wm. Hendrie made a eapital showing, taking the following prizes: First on tandem, first on carriage team under

15.3 hands, first on park hack, first on ladies' hack, first on saddle horse (English gait), first on thoroughbred stallion, with his well-known horse Strathspey, and second on thoroughbred mare, while Mr. John Shaver, of Brantford, Ont., took the red ticket for a very neat pair of ponies under 14 hands, as well as second prize for a single pony under 14 hands.

CATTLE.

There was not a single representative of our Canadian herds, owing no doubt to the strict quarantine imposed on stock coming from the United States to Canada.

SHEEP. In this class Canada was well to the front, and Canadian flock-masters may well be proud of the record made at Detroit Fair in 1890.

In Southdowns that veteran breeder, Mr. John Jackson, of Abingdon, swept the board, taking every prize in the list.

In Leicesters Mr. John Kelly, of Shakespeare, as usual, took everything he showed for except in the class for shearling rams, in which he took first, the second prize going to Mrs. Ann Newton, of Pontiac, Mich.

In Cotswolds Canada again swept the board, Messrs. J. G. Snell & Bro., of Edmonton, taking first in every class except shearling rams, in which Messrs. H. Crawford & Son, of Couboro', took the red. These gentlemen also got second on aged ram, second on ram lamb and second on ram and his get, Messrs. Snell taking everything

In Oxfords Mr. Jas. Tolton, of Walkerton, was Canada's sole representative, and a worthy one he proved, taking no less than six firsts and two seconds, including first for flock, the balance going to Messrs. Stone & Harris's wellknown flock.

In Dorset Horns Messrs. Tazewell & Hector showed a very fine flock of these favorite sheep, and in spite of the fact that none of their sheep were fitted for show, they were awarded second on ewes and second on ram and his get, the principal American exhibitors being Mrs. Ann Newton and Messrs. Woodard & Jacques. In Hampshires, Shropshires and Merinoes

there were no Canadian exhibitors, but we cannot pass over these classes without noticing the grand exhibit of Hampshires made by Mrs. Ann Newton, and also that of Mr. Geo. H. Ham-mon, of Ypsilanti, Mich., in which class Mr. Hammond took the lion's share of the prize money, the sweepstakes prize going to his ram Windsor King, winner of first at the Royal Show in England, and for which Mr. Hammond paid \$1,000.

In Swine there was no exhibit from Canada owing to the quarantine regulations.

Before closing we would suggest that this Association be more careful in its use of those terms usually used among stock breeders, e. g., the term "blood horse" is always held by horsemen to mean a "thoroughbred," but in this prize list it is applied to all breeds of horses in place of the term pure-bred, thus causing a good deal of confusion, as in the case of Mr. R. M. Wilson, who entered a two-year-old Wilson, who entered a two-year-old stallion and a mare in the coach class, but was disqualified on the ground that they were not registered, the term "blooded" in the rules being taken to mean all pure-bred horses. Mr. Wilson's case created a good deal of dissatisfaction among Canadian horsemen present, as the Association refused to refund his entry fees, which in our opinion should certainly have been refunded.

We would also respectfully suggest to the compilers of the catalogue that the term "foaled" is usually used by horsemen in place of "born," as they have it.

Chatty Letter from the States. [From our Chicago Correspondent.]

The talk about the removal of the Chicago stock yards amounts to nothing, being the invention of real estate speculators. As a matter of fact the stock yards and packing houses are being enlarged and permanently improved to an extent never before equaled.

Beef cattle are selling 50c. higher than a year ago. Native beeves range at \$5 to \$5.37½ for choice, with medium and good at \$4 to \$4.50, but too many half fat and unfinished cattle are coming and they sell at \$3.25 to \$3.75. Moderate enquiry for well-bred feeding cattle, but not so much as when corn prospects were better. Western range cattle have been coming to market less freely so far than last year. Good to choice 1,350 to 1,400 lb. Northwestern range beeves have sold as high as \$4.25 to \$4.50, or about 50c. higher than last year. Sections with poor ranges, however, have furnished excessive supplies of thin and unripe cattle which have sold at \$2.40 to \$2.90, largely to the distillery feeders. Some of the best cattle are coming from Dakota and Montana and were bought in the Panhandle of Texas two years ago. Their owners are making splendid money on them.

Sheep do not seem to be quite as good "property" as they were awhile ago. At least there are more large lots offered for sale than for some time past. Some of the heaviest purchasers in the far west are afraid of feeding such highpriced corn and are offering large flocks for sale. According to the Drover's Journal at least 100,000 sheep have lately been publicly offered for sale in the west. The demand for breeding sheep is very strong, but feeders for the time being are moving slowly.

Horses are doing well. Prices are strong and the market remarkably active considering the season and the large proportion of common stock offered. There is a greater demand for heavy draught horses than can be supplied at present.

That hogs will continue to sell higher than a year ago is pretty generally believed by dealers as well as producers. The expensiveness of corn is the chief cause, but the extraordinary demand for meats and the general advance in prices for all kinds of stores and provisions has something to do with it.

A good many cows, heifers, yearlings and calves are being marketed from the range sections, but not as many as a year ago. There is a reaction in the demand for ranch properties, and some managers think they have sacrificed their herds too heavily.

The advance in prices for nearly all commodities is given as a reason, by the Secretary of the Treasury, for the stringency in the money market. He thinks it is not over speculation, but merely a greatly increased legitimate demand for money. Live stock men are getting more money for their products and their business is in better shape than for several years.

The extension of the order compelling the cattlemen to vacate the Indian Territory with their herds, from Oct. 1 to Dec. 1, is what they wanted and will prove to be ample. To a large extent the cattle in the Territory are old enough for beef and all can safely be cared for in the time given.

Mr. John Hallam, of Toronto, has purchased in Alberta the fleeces of some 17,000 Montanacross sheep, averaging about 54 lbs. This is probably the largest single purchase of wool hitherto known in Canada. Mr. Hallam has bought about 300,000 lbs. of wool in the district. | part of the cargoes of steamers which have been | duty.

Mr. Plimsoll's Onslaught and the Canadian Cattle Trade.

The departmental inquiry which the British Boards of Trade and Agriculture have undertaken into the efficiency of regulations affecting the transatlantic cattle trade is proceeding; and we are glad to know that care is being taken by the High Commissioner and the Canadian authorities generally to assist the inquiry in every possible way, so far as it has any bearing upon the Canadian trade. The attention of the British authorities is being specially directed to the care with which the Canadian regulations provide against overcrowding, as well as the spread of disease among cattle shipped to Europe; and it is significant as illustrating the efficiency of these regulations that Mr. Primsoll practically exempts the Canadian trade from his sweeping allegations. The powers which are vested in the inspectors of the Dominion Department of Agriculture are of an extensive nature. Notice of at least twelve hours must be given to them before any cargo can be received for inspection, and the regulation relating to inspection declares:-

"In order to prevent the danger of contagion or infection resulting from the overcrowding or overloading of animals on board ship in any port in Canada the inspector shall not permit cattle or any other animals to be laden on board any ship in any port until he shall be satisfied that suitable space and provision has been made for the number of cattle or other animals to be shipped on board such vessel, and that a greater number of animals shall not be shipped than such a ship can safely and properly carry; and such inspector shall not grant a clean bill of health to such ship until all such provisions shall be made to his

This ship further comes under the survey of the Collector of Customs, who will not of course give clearance to the vessel until this bill of health is produced. Hence Mr. Lowe, Deputy Minister of Agriculture, declares that "the regulations of the Canadian Government as devised by the Department of Agriculture, and the inspections put in force, render it impossible that anything of the kind (alleged in Mr. Plimsoll's pamphlet as regards the United States cattle trade) could have taken place in respect to Canadian cattle."

But passing from the regulations to the actual record, there would seem to be overwhelming proof of the care taken in the Canadian trade. The record of the regular lines is a highly creditable one. The loss on the cattle-carrying steamers of the Allan, Dominion, and Beaver Lines does not exceed 1 per cent. of the total number carried. The general figures are hardly less satisfactory. The total Canadian exports, with the number of cattle thrown overboard, for the years named were :-

uno j	Total Export.	Lost.	Percentage
1884	61,000	658	1
1885.	08,000	302 354	1/2
1886	65 154	840	11/8
1887 1888	61,195	371 831	1/2
1990	84,732	0.)1	

The figures for the United States trade for 1889 were 292,653 exported and 7,014 thrown overboard, or nearly 24 per cent.; more than double, that is, the Canadian loss. It must, moreover, be remembered that the figures are swollen by the fact that live stock have formed

lost. If this fact is, however, to justify Mr. Plimsoll's proposal that the transatlantic live cattle trade be prohibited, he might as well insist at once upon the stoppage of the transatlantic pass-enger traffic because of the loss of the Oregon or the recent narrow escapes of the City of Rome and City of Paris. Of course we need hardly add that the Canadian Government will welcome any suggestion to lessen even the small mortality which now attends the trade, and will cooperate with the British authorities in any reasonable alteration in the regulations to effect this end. As Mr. Lowe told a reporter at Ottawa the other day: "The Department will Ottawa the other day: "The Department will not, be assured, relax these regulations and inspections. If need be they will be made more effective."—Canadian Gazette.

"Nelse" Morris' Scheme.

While it is not expressed in so many words, there is no doubt that the millionaire butcher, who began his upward career on the butcher's wagon, will at a very early date establish a slaughtering business on the New Jersey coast. As soon as this is running smoothly it is rumoured a branch establishment will be started in San Francisco as well, and in other places should occasion require. The new venture is significant from the fact that it implies that cattle can be shipped to the seaboard on foot, with their extra weight of offal, not at lower rate, but to advantage in the fresh meat business, from the fact that the meat is placed directly on board the steamers and not handled the second time, and the distance from the slaughter house to the consumer is shortened by three days. To an outsider this would sound somewhat chimerical, but the wary German millionaire has not entered upon this scheme without figuring it to the last fraction of a cent, This move will certainly tend to widen the difference in prices between the best and poorest animals on account of the smaller percentage of offal in the former than the latter, which would make much more difference at the end of a three days run than where they were produced. For instance, a bullock dressing sixty lbs. per cwt. will be worth much more per pound than one dressing but fifty. It would seem that the whole trend of circumstances at the present time is in favor of the very best cattle, and only the very best. If stock men will not come voluntarily into line on this point it is more than probable that high prices of feed and low prices of poor cattle will in time drive them into line, or out of the fight entirely. Well bred cattle, fed well from the first day of their life right on to the day they are slaughtered, can be sold at a much higher price than poorly bred animals, half starved through the winter, and unless kept on the prairie, where feed costs nothing, the beef can be made more cheaply in the former instance as well. The dressed beef business is assuming gigantic proportions in the United States, and whether we accept it as an accidental beneficial result of our high tariff wall, or as one of many good results, it must be admitted that the duty is at the present moment the salvation of beefing interests in the Eastern Provinces. Throughout most of their own country the Chicago dressed beef men have driven the local butchers out of the business. Their modus operandi has been to establish a man or men, as the size of the town or city might warrant, and ship him meat to be sold away below what it actually costs to lay it down, until the local man is driven entirely out of the market and the coast clear, when up goes the price higher than before. This state of affairs would certainly exist with us but for the present

The Eastern Townships Exhibition.

The sixth annual Exhibition of this Association was opened at Sherbrooke on the 1st September last and proved a great success. On several occasions the Association has encountered adverse weather, and one year a disastrous fire, when many valuable horses were lost. But this year the elements proved propitious and will no doubt contribute towards recouping the Association, which certainly deserves all credit for its perseverance. In horses the light element prevailed, Senator Cochrane exhibiting several standard-bred trotters, as did also Mr. H. D. Pearse, of Stanstead, who had on exhibition, amongst others, Chance 2:331, by Royal Fearnought, while Messrs. Dusseault and French had Lady Wedgewood 2.19, with a filly by her side sired by Viking, with a record of 2.181. In Shire horses we noticed Messrs Dusseault and Papineau, who won first on their stallion Carleton Times and first and diploma for the best Shire of any age with Lord Ossington, a threeyear-old bay with good feet and legs. In Clydes Mr. R. Ness, as usual, came to the front, winning first and diploma in aged horses with Golden Stamp, who has also taken a similar position on two previous occasions. In yearling fillies Mr. Ness was likewise successful. Shorthorns, although well represented, were hardly in as good trim as some of the other breeds exhibited, many being but in fair breeding condition. In aged bulls Mr. J. F. Learned, of Cookshire, won first with Highlander, a roan of very nice quality and whose success in the show ring is apparently equalled by his influence as a sire. Subsequently he was awarded the diploma for the best Shorthorn bull. In two-year-olds Mr. Mair, of Allan's Corners, was awarded first for a thick-set red bull, and also in calves, for a nice red calf of good quality and smoothness. A promising roan yearling, sired by Rose Lea Baron, and owned by Mr. Chaddock, of Cookshire, obtained the first prize, second going to a white bull a trifle slack behind the shoulder, but a good handler. The first prize yearling heifer was a red of good type and blocky, while the first prize heifer calf, a light roan, was, perhaps, one of the best in the female classes, and if she goes on as she promises will be heard of again. In the sweepstakes for the best female of any age the choice lay evidently between the aged cow (J. H. Taylor), which was low in condition, the yearling heifer and the heifer calf. Some were inclined to have placed the calf first, but eventually the red went to the yearling, both animals being owned by Mr. Learned, and are, we believe, daughters of his bull Highlander. The herd prizes also went to the same owner.

Herefords came out, not only in force, but also in grand order. In aged bulls the well-known Cassio, a wonder, not only from his form, but from the way he stands the continued strain of show-yard preparation, once more took first and afterwards the diploma for the best Hereford bulls, second going to the dark colored young Lushingham 2nd 32398, owned by Mr. Saute, Compton, a bull which, with a little filling out, will probably again figure in the prize list. In yearlings Mr. Pope captured first with a lengthy bull, while a calf possessed of a wealth of flesh, wins first for Mr. Cochrane. In aged cows Mr. Judah's Lowland Lass 24768, which was first wherever shown last year was again placed first. Mr. Cochrane's two-year-old Vanity III. taking him.

first in her class and diploma for the best female. To the same gentleman was likewise awarded the herd prize.

In Polled-Angus Messrs. Cochrane and Pope were the sole competitors, the first in each section going to Mr. Cochrane. Mr. Pope's exhibits, being just off grass, not showing to the same advantage. The diploma for the best bull went to Lord Hillhurst, and that for females to Lady Ida Forbes, who was last year the sweepstakes cow at the Provincial. The diploma for the best bull in any of the beef classes was awarded to Cassio. Messrs. Robertson, Howick; T. Irving, Montreal; and A McCallum, Dunville, were the principal exhibitors in Aryshires, the two fomer winning the majority of the prizes.

Jerseys were shown by Mrs. Crosson, Messrs. Smith, D. Johnson, and Archambault, the lions share going to Mr. Johnson. A class was offered for pure-bred French Canadian cattle, but only two exhibitors competed. Those of Mr. Carr bore a strong resemblance to Jerseys, but lacked in some

instances the black nose.

Pigs were not a strong class. In Berkshires the prizes were pretty well divided between Mr. W. A. Hale and Mr. John Racey, jr. In Yorkshires Mr. Parnell was the sole exhibitor and in Poland Chinas Mr. R. H. Tylee.

Clydesdales at Burn Brae.

Burn Brae Farm is situated in the eastern end of Ontario, only a few miles from the line that separates the two Provinces, Ontario and Quebec. For several years its present owner, Mr. James Esdon, has been breeding Clydes almost exclusively, the stock horse at the present time is Prince Royal of Quebec, No. [646]; he is of medium size and possesses many of the qualities that go to make up a good horse, a grand stock sire, a remarkable sure foal getter, and is one of the best travellers in the Province to-day as a heavy horse; he is well broken to harness. Although Canadian bred be is descended from the best stock on side of sire or dam that was ever imported to the Province of Quebec. Prince Royal of Quebec has been shown four times and won three first prizes and a special.

Among the breeding mares at this farm we notice a three year old filly, imported Eva, Vol. XI., dark bay, star on forehead; an extra good beast. As her pedigree shows, she is very closely bred in the blood of the noted Prince of Wales on both side of sire and dam. Eva was shown last fall and easily won first place; she now has a very promising foal that will make a capital horse in time.

Another breeding mare is Bessie Lee, very large and heavy, has weighed 1,800 pounds in show condition. She is the winner of five first prizes and diploma for best mare any age or breed; she is a splendid breeding mare, as her progeny clearly testify at the present. Her present foal is a very fine horse colt.

Among the younger ones we notice a promising one-year-old, which cannot fail but make a

large, showy, useful horse.

Lily of Burn Brae promises to become a useful brood mare. She has splendid short legs, great length of body, good color, with plenty of spirit. As will be seen by September issue of this paper, these horses must be sold at an early date and at a sacrifice. Write to James H. Esdon, Bainsville, Ont., for particulars.

The sensational horse of last season, Axtell, has forty-eight mares to his credit in his book for this season. These, at \$1000 a piece, makes quite a good sized hole in the price paid for him.

Horse Breeding in Canada.

Climate has a great influence over the forms of our animals, and none more so than that of the horse, and a form is found indigenous to each which best fits it for the purposes required of it. In the arid plains of the East where herbage is scarce a form is grown which enables its brute inhabitants to readily transplant themselves from one spot to another, and as in every situation the flesh of the horse was greedily sought after by the predatory tribes, so where those are peculiarly strong and active the horse is formed peculiarly agile and swift to escape their attack, as well as peculiarly light that his weight might not sink him in the sandy plains, nor his bulk retard him in his flight. Removed to a more temperate climate, where vegetation affords by its luxuriance more nutriment, and where the restrictions of danger have ceased to operate, we no longer see him small and slender, but with equal capacity for swift progression; we find him expanded into a form capable of keeping up that progression with a durability unknown to the original breeds from whence he sprang. Symmetrically formed, as we now see him, he at once evinces his claim to great speed, as an old writer put it. "His osseous or bony skeleton exhibits a base founded on the just geometrical principles, presenting a series of lengthened levers acting by means of a condensed muscular and tendinous organization of great power on angles capable of great flexion and extension, while his pointed form fits him to cleave the atmosphere from which his deep chest enables him to draw by extensive inspirations wind and vigor to continue his exertions." Purity of blood, which in reality means the result of confining to particular races or breeds the means of continueing their species, is observed with equal care and jealousy by the breeders of the English racer as by the Arabians, and turf jockies have asserted that they could discover a taint or departure from his purity to the sixteenth remove. As above shown, climatic influence and changed surroundings have done their part toward developing size, form, and motion in years long since past. It is now for u to see what the more moderate requirements have done for the horse. We will, for instance, take the thoroughbred and trotter. Just as by judicious crossing and clever mating of the English sorts with the Oriental blood produces the English thoroughbred, so has the mingling the blood of the thoroughbred with other sorts produced the American trotter, and although these horses are much the same in size and type, we find the conformation totally changed. The thick, strong, heavy muscled thighs and quarters in the thoroughbred gives way to the long, thin, stifle and lighter shoulder in the trotter, by which he gets in that tremendous stride whereby his speed at the trot is produced, he is built for vast propelling power on a level track with the least possible draught.

It is generally found that where great pains are taken, to especially develope in one line, a certain amount of perfection is the result, and the production of such perfection as is found in the English thoroughbred has had more or less effect on all the British breeds of horses, as well as the horses of other countries; more especially has this been the case with the light legged horses, although many writers claim that this blood has been used to improve the Clydesdale and Shire horses, and bring in color as a proof

Clydesdale r as a proof of the presence of thoroughbred blood, claiming that the old draught breeds were never chesnuts and light bays as we find the Clydes and Shires of to-day, but were originally dark whole

If color can be brought forth in proof of pure breeding the Cleveland horse has it, for in this essential they are most wonderfully prepotent, and although the thoroughbred has been used freely for crossing on mares of this breeding, still they retain their original color, by which they obtain the name of Cleveland Bay, which is, for carriage purposes in England, by far the most fashionable, many English dealers will buy nothing else, but bay with black points.

Another great advantage lies in their being easily matched in color, and as they are much alike in form, all that is required is to have them to mate in size and action. The Cleveland Bay has been long celebrated as one of the best in England. They have been reared to a great extent in Yorkshire, the farmers of which county have always been remarkable for their knowledge in everything that relates to this species of live stock. In activity and hardiness, these horses were considered to have no superior. Capital hunters wers produced by crossing the mares with thoroughbred stallions, but it was on the road they were in greatest repute, one old writer declaring that in the coal country they regularly preformed sixty miles in twenty-four hours without rest except to feed on the road, and frequently preformed this labor four times per week. Before the advent of railways the mail coaches brought this style of travelling to great perfection, and each landed gentlemen, peer or squire, kept a large stud of coach horses and preformed all journeys within a hundred miles with his own horses. The Yorkshire Coach Horse or Cleveland are a breed to which great attention has been paid, and as they trace from the earliest date they should likewise be of great use for crossing purposes. They undoubtedly have numberless good points in their favor, such as size, color, endurance, as well as prepotency. Canadians are apt to look at a horse from a different stand point, speed at the trot, or for draft purposes. A large carriage horse, if he has a good side, plenty of height, length of neck and style, other defects are easily hidden by harness. He may be narrow, but this is not seen from the side; he may appear plain from behind, and yet this is not noticed, although it is wise to keep all these points as well filled as possible, that we may not entirely overlook the useful for the sake of the ornamental. It was the turf that brought the thoroughbred horse to perfection in England, and it is the race track that has made the light harness horse of America such a success, but unfortunately both have brought their evil influences with the good they have accomplished. Although it would seem that England would have an unlimited demand for race horses too slow for winning on the turf, as they would do in the hunting field, but unfortunately we find it otherwise. Hundreds of horses that are too slow on the turf are no use whatever for any other purpose. The light weight race horse which skims over the level course is not built to carry any weight or to go over a rough surface. So also with the American trotter; he may draw a light cart on a highly finished track, but is no use on the road where light draught is required. These points require much consideration. We must recollect that is raising us a nice litter.

each has a finishing up point, and just as cattle have to finish up on the block, so must the horse have a useful side to their lives, or they will not avail to pull in the needful shekels when they come to be sold.

There is one point that our breeders should aim for, and it is at present rather vague, but sooner or later their will be a demand from England for horses for army purposes. It is well known that the officers sent here a few years ago to look out for horses, as a sort of experiment, has turned out quite satisfactory far as the horses were concerned, but it is also true that the British Government dare not in the face of the dissatisfaction it caused among agriculturists there, go farther with the importation of horses from here, but there is no reason that they cannot be sent over by dealers here, they will then be readily purchased in the markets there. In fact all horses of the right class that have been exported have proved very remunerative to those handling them.

The Care and Management of the Brood Sow.

Read before the Dominion Hog Breeders'
Association by Francis Green, jr.

For success in pig raising there is nothing so essential in order to render the undertaking profitable as a good brood sow. She is like the goose that lays the golden egg, but more than one egg at a time. Hence, in selecting a young brood sow, it is of the utmost importance to see that she be possessed of the characteristics which are obviously adapted to that end. It must be understood that I am not referring to the fancy points of any particular breed, but rather to those which are to a great extent applicable to all breeds, and which are conducive to the greatest profit, viz., prolificness and maternal solicitude. In the first place, then, I should insist on great length as well as depth, and the teats should not number less than twelve and more if possible. Length gives more space for the young pigs to suckle and they will not crowd and fight so much, and it is besides usually a concomittant of a good number of teats, while depth I have found to be an indication of a propensity to large litters. In the next place temper is important, although my experience is that even quick tempered sows can be be working round the sows, and nothing is so unpleasant as being compelled to be ready to leap out of the pen at a moments notice. As an instance of the advantage of the kind treatment system, a young sow (one of our recent importation), which was naturally of aslightly quick tempered disposition, but who had become quite docile under kind treatment, was giving birth to her first litter. After they were all come she permitted them, under protest, to suckle, but showed a disposition to snap at them when they approached her mouth. Subsequently she left the young pigs and appeared afraid of them, still keeping up the snapping. I felt some apprehension that she might kill them if left alone, so I resolved to stay with them, and by petting her induced her in a little while again to lie down, while I invited the youngsters to step up and take a drink at the bar, a treat which they at once took advantage of with activity. After some little time the sow accepted her family cares, still under protest, and the following day she took completely to them. Now I have very little doubt that had she not been handled with kindness, both before and at the of time farrowing she would have killed the whole lot. As it is she

Our practice in regard to the feeding and management of the brood sows is as follows: - In summer, up to near the time of farrowing, they are usually fed on a little bean and barley meal mixed with kitchen swill, and in default of swill with water, on a grass run. In winter, we employ the same feed, pulped mangolds (about one-half to three-quarters peck being allowed to each sow three times a day) being substituted for grass. I am aware that mangolds are considered by many breeders, both in England and Canada, as especially deleterious to brood sows, and that it is said that when fed on these roots the young pigs come weak and often dead, but I wish empathically to state that last winter we gave a more liberal allowance than usual, and we never had better or stronger litters or had greater success in raising them. Possibly if mangolds were used as the sole food the results might not have been as good, but in the proportions and quantities fed by us they were eminently satisfactory. A week before the pigs are due we remove the sow to the breeding pen, which is surrounded by a fender composed of planks about nine inches to a foot from the ground. The food of the sow is now usually changed to bran and a little oat chop, particular care being taken at this time that her bowels are kept loose. If there is any appearance of constipation we administer sulphur and perhaps a little linseed oil in her food. Every day up to the day she is due she is turned out for exercise in the yard. When the young pigs begin to arrive we take them from her one by one, and when they are all come we return them to the sow, and if she takes to them we leave them alone for a time. For a few days we feed the sows very sparingly, gradually increasing the food until the pigs are three weeks old, when she should be on full feed. There is one peculiarity which I have observed in sows that are in good condition, and especially those that are excellent mothers, they exhibit great reluctance in getting up and leaving their young, so much so that they will neglect to fulfil the calls of nature. Our invariable practice now in such cases is to take a made tractable by kindness. At farrowing switch and turn out the sows the day after pigtime one is sometimes of necessity compelled to ing, and compel her to take exercise in the yard when they will usually at once relieve themselves, and after this there is no further trouble. Many have doubtless been annoyed by sows laying on their young. Is some instances this is owing to carelessness in the mother, and may be counteracted in a great measure by a fender round the sides. Sometimes, however, this practice arises from the irritation occasioned by lice. This information I acquired, unfortunately, by experience and soon remedied it by a dressing, after which the sacrifice of the innocents was abandoned. The moral of courses is "see that your sows are free from lice at farrowing time, if at no other." Young pigs vary a good deal in the time they commence to eat. Some will come to the trough at two weeks, others not till three and even four weeks. I need not say that the earlier one can get them started the better. Not only will the young pigs grow more rapidly, but the drain on the sow is also somewhat relieved. Our custom is to partition off a small portion of the pen with boards nailed at such a height that the young pigs, but not the sow, can run under and feed out of a small trough, the capacity of the trough being in its length not its depth. Six weeks after farrowing we wean our sows which are then relegated to their old quarters, their feed consisting of a light ration at first, after which the method mentioned in the beginning of this paper is resumed again.

5th Volume Shorthorn Herd Book.

We have just received at this office a copy of the 5th volume of the Dominion Shorthorn Herd Book, for which our thanks are due Mr. H. Wade, the courteous secretary. This volume, which contains 4,388 pedigrees-1,872 bulls and 2,516 cows-also finishes the bulk of reprint of pedigrees published in the ten volumes of Canada Herd Book and the four volumes of the British-American Herd Book. The history of Shorthorns, imported between 1875 and 1880 inclusive, is carried along from the former volumes. A most useful and necessary index of bulls and cows, included in the first five volumes, is added, and, although entailing much expense, was most necessary, as one of the faults of the present herd book is the difficulty of tracing pedigrees in it. The present system of printing the name of the animal, the sire and dam, and the family to which they belong is all right for cheapness, but is a long way behind for conveni-ence. The fact is, Shorthorn breeders should see to it that some scheme be devised by which the work may be accelerated. as we cannot see much prospect of the work of publishing catching up with the pedigrees recorded.

The General Purpose Cow.

BY E J. YORK.

As very many articles have of late been written in favor of the farmer seeking a general purpose cow you will permit me to offer an observation. Few will deny that the same rule that applies to farm implements will hold good when applied to farm stock. It is not yet beyond the memory of the living what an intricate, cumbersome, unwieldy, clattering affair the old-fashioned combined reaper and mower was, many of which still decorate fence corners and out-of-the way yards on various farms, as compared with the neat, simple, easily managed, comparatively noiseless implements met with in the single machines of the present. And who would for a moment go back to the old style? Is not the farmer's watchword of to-day, present practical utility? Now mark, the practical cow, most consistent with civilized ideas and profit, is the special or one purpose cow, she that will, with least outlay for wear and tear, do most towards feeding the millions of humanity, and at the same time furnish the most pallitable and wholesome food. The chief, and indeed about the only argument worth the name, that is urged in favor of the so called general purpose cow, is the fact that, barring casualities with her, the dairyman has a prospect. after he is through with her at the pail, of getting a few hundred more of flabby, third rate carcass to offer to the butcher. As sensible would it be, so it seems to me, for the advanced agriculturalist to go back to the clumsy, old. combined implement referred to above, and for the reason, too, that in the end he could offer a few more pounds of old iron to the dealer, and have a little more kindling wood for the kitchen. Gentle reader, present efficiency and profit, both of a first class order, must be our battle cry. Let the dairyman have present, practical worth. without the additional cost of sustaining 600 lbs. or 800lbs. of useless animal tissue. This general purpose business in the bovine is entirely too near akin to the early practice of every man his own mechanic.

Great Britain has some 30 cattle breeders' organizations. The members raise stock to sell, and not for milk or beef, as farmers do, and they spend about \$200,000 a year in promoting sales.

Horses.

(Continued from September issue.)

In my last paper on this subject I endeavoured to point out what type of light horse could be most profitably raised by farmers. I shall now try to convince my readers that there is a fair margin of profit in raising heavy horses even in these dull times, and in order to do so I shall to a certain extent put the cart before the horse, and begin by pointing out how not to make money in the heavy horse business; doubtless my readers will excuse this way of doing things when I confess that I hail from "the land o' the sod."

Now to return to the subject of "how not to make money in the heavy horse business."

In the first place buy your brood mare to start with on credit, do not forget that; spend a month or so in running round to all the sales within ten miles of you, and then buy a mare that is fifteen years old and has a spavin, because you get her cheap and have a year to pay for her in. Having got your mare it is now necessary to choose a horse to breed her to. Well, you wouldn't go by Bill Jones, would you; he is a neighbor, and his horse is a pretty good looking colt, even if he is out of a scrub mare, and you do not take much stock in these big imported horses, any way; they are too heavy, and you think you would like to raise something for your own use, and last, but not least, Bill says he'll give you a colt for \$6, and an imported horse will cost you \$12. Ah, that's a clincher isn't it; times are hard and we have got to economise some way, or else, by gracious, we'll all end up in a poor house, so we'll decide on using Bill Jones' stallion. And now, supposing we have got the mare in foal, what next. Well, now, its a pretty busy season and you have a good deal of fall plowing to do, and you have always heard it is a good plan to work brood mares, so put her in the team and slam her through, and do not feed her too high it is a good plan to keep a mare a little thin, and besides you can give her a rest after it freezes up, and then you can put her in a nice warm stable without a bit of ventilation of any kind, and as you have threshed by then you can give her plenty of grain and have her in good shape by spring, and if by any chance she should lose her colt or foal one that cannot stand up, why its just a bit of your usual luck, that's all, and next year put her to a Clyde, and the year after use a Percheron, or if you can try and slip a colt from a so-called trotting horse in between them; and then another important point is this, break all your colts the spring they are two years old; it kind of fetches their muscles into shape, and then a good big collar mark or two on a three year old sort of inspires a buyer with a feeling of confidence; he thinks the colt he is looking at must surely have got over its skittishness and learned how to draw. Follow these directions straight through, and if you then manage to make some money raising horses why it won't be your fault any way. Now let us look at this subject in another way and see if there is any plan by which we can follow the breeding of heavy horses with a reasonable hope of success; I think there is, and I think there is more than one reader of the ADVOCATE who can make a a success of breeding heavy horses if he has the pluck to make a start, and then the energy to push his business; but I tell you it takes some pluck to make a start, for the first thing we have to decide is that one good animal is worth two or | their former system.

three poor ones, and then having come to this decision proceed to apply it practically, and instead of continuing to breed from the small light-boned mares that you have, on the ground that you have too many horses already and so cannot afford to buy any more, make up your mind at once and sell two or three of these young general purpose colts that you have growing up, and put the money into a good heavy mare; mind I do not say try and sell them. I say sell them for what they'll fetch. I know it seems hard to sella colt for barely what he cost one. or maybe less, but mark my words it will pay far better to do so than to let him go on eating his head off and not putting a cent on his value. There are any number of farmers throughout this Province that have two or three or four colts growing up of what is generally called a general purpose class, and I would strongly urge such men to sell these colts and put the money into better breeding stock. There are lots of good registered filies to be had in the counties of York and Ontario for from \$160 to \$250, and at such prices they should be within reach of a majority of farmers. And now let me offer a bit of advice to intending purchasers; first make up your mind before you leave home as to the class and stamp of mare you want, and then hunt round until you get her. Do not let any one persuade you into buying a mare that does not suit you, on the ground that she is cheap; and when making your selection remember that the United States is your best market and the Yankees your best customers, and what they want is thick'uns," low set, wide horses with plenty of bone and hair and lots of quality. Don't forget this last point for it is a very important one. You cannot get too much of a good thing, and so you cannot get too much bone as long as it is clean and flat, but dirty gummy legs, meaty shanks and greasy heels are at a big discount now-a-days. Another point worth looking at is this; do not reject a good mare for some fanciful fault, such s a white foot in front or even four white feet. Mind I do not say for a moment not to pay attention to color, for I think it very advisable when possible, always to get a mare with as few white markings as possible, but I would never reject a really good mare because I did not fancy her color. There is a great deal of truth in the old saying that "a good horse cannot be a bad color. BLUE BLOOD.

[TO BE CONTINUED.]

We have found wood ashes, charcoal, salt and sulphur, as well as coal slack, to be relished by our hogs, and, therefore, believe them to be good, when carefully fed, as appetizers and assistants of digestion.

Beef animals over three years old will not be admitted to the Chicago Fat Stock Show after 1890. Since the first show (1878) the limit of "four years and over" has been gradually reduced. The managers don't believe in encouragement to old beef.

Governor Hoard said at the Dudge County Farmers' Institute, Wisconsin: -- "I know of a creamery which last year paid its patrons 85 cents per 100 pounds for the butter fat in their milk, and the patrons received their skimmed milk, worth 20 cents per 100, sweet, to feed. I also know of a creamery which last year paid over \$50,000 to 124 patrons for the butter fat in their milk. They were all individual dairymen prior to that time, and were receiving but an aggregate of \$30,000 for their butter product. The trouble was there were 124 different buttermakers, 124 kinds of butter, 124 colors, 124 different smells and 124 salesmen. By the creamery system there was but one buttermaker, one kind of butter in color, smell and taste, and the butter was sold on the butter market, with a result of \$20,000 clear profit over

The Dairy. The Dairy Competition.

BY GEO. STEELE.

You will perhaps pardon me if I trouble you with another short letter, which will be my laston this great and only milking competition con, ducted by Prof. Robertson. No person whom I have ever met can arrive at the same conclusions as Prof. Robertson in figuring out the products, as given by himself, by his own standard. I wrote you twice on the subject and Prof. Robertson's reply was that he arrived at the conclusion he did by a careful calculation, as much as to say I am right, you are wrong, swallow that and say nothing. This I refuse to do. But seeing that we were to have a visit from Prof. Robertson at Glenboro I thought I would get him to enlighten me there. At the close of his address questions were invited. I asked him to explain how he figured it out. He rose and explained the rules. I again rose to tell him that it was not the rules I needed an explanation of, when I was politely told that the time of this meeting could not be taken up in that way. Prof. Robertson then said that he had written the ADVOCATE again and given a full explanation of every thing.

The September number of your paper arrived to-day, and judge of my surprise when no explanation as to the figuring of the product by his own rules is given. As I showed in detail where Prof. Robertson's figures had led me to before I will not trouble you in doing so again. Suffice it to say that I fail to see when the Ayrshire cows showed over eight per cent. profit, without any addition, how eight per cent additional value for every thirty days only adds five per cent. to the per cent. of profit, when they had nearly five hundred days to their credit The fact remains the same that the Ayrshire milk, by Prof. Robertson's own standard, was worth \$1.63, as against \$1.72 cents for the Jerseys, and I will leave it to any of your readers to say, if the Ayrshire cows produced milk worth nine cents less than the Jerseys when they were over six hundred days calved, as against the Jerseys two hundred days, which is the most profitable. Now, Mr. Manager, I hope you will be kind enough to get Prof. Robertson to make this business plain. If I stood alone in my ignorance I would conclude to let it drop, but there is n one I have ever met who understands it either, and although we have no professors around here we have some very intelligent practical farmers.

Prof. Robertson told us on the platform at Glenboro, as well as through the columns of your paper, that his was the practical standard, the others were fanciful. Yet he tells us in the July number that the Ayrshire milk would have made more cheese, and he tells us in the September number that Ayrshire whey is as valuable as the whey from other breeds, and as 245 lbs. of milk would make more whey than 176 lbs. this practical standard of his could not have been a cheese standard. Prof. Robertson's anecdotes are really amusing. He gave us every particular at Glenboro as to how the old women in Ontario chased the ghost out of the churn, and this last one about the man with the coon dog is really side-splitting, but when a man gets to the top of his profession I thought his mission was more to instruct than to amuse.

The comfort of the animal has much to do with his development, and to be comfortable he must have clean, dry, moderately warm and well ventilated quarters to rest and sleep in.

Our Dairy Competition for 1890.

The competition between the different dairy breeds for the special prizes of a silver service offered by the FARMER'S ADVOCATE as a first prize, and the sums of \$30 and \$20 given by the Association of the Industrial Exhibition as second and third prizes, took place on the 16th to 19th of September (inclusive) at the Toronto

Although 17 herds, of three cows each, were entered for this test on the Secretary's books only three herds competed, viz, two Jerseys and one Devon. One of the Jersey herds was owned by Mr. W. A. Reburn, St. Annes, Q., and consisted of Jolie St. Lambert III. -31721-Jolie St. Lambert IV. -38666-, and Jolie St. Lambert V. -47354- (three sisters). The other Jersey herd comprising Lady Lorne, Miss Stoke Pogies -23385-, and Nettie of Grimsby -37081—. These were owned by Messrs. Smith & Sons, of Grimsby. The Devon herd, the property of Mr. Samuel Harper, of Cobourg, consisted of Susan, Rose of Cobourg, and Polly Perkins. All recorded.

During the test the doors of the shed were locked, and a person left night and day in charge of the cows. No one was allowed to go near the animals unless accompanied by the attendant.

Each competitor had the privilege of feeding whatever quantity or quality of food he desired at specified times—three times a day—when whatever he intended to feed was weighed and charged to him at the price agreed upon by the competitors before the test commenced. The food, and its value, consumed by the different herds is given below :-FOOD AND ITS VALUE CONSUMED BY DIFFERENT

HERDS.

After feeding, on the evening of the 16th, the cows were stripped dry and then milked regularly every twelve hours for the remaining three days, making six milkings. Each cows milk was weighed and sampled for analyses every morning and evening. Seven analyses of each cows milk (63 in all) were made by Mr. Thomas McFarlane, F. R. S. C., Chief Analyst of the Inland Revenue Department at Ottawa, who went to considerable inconvenience and expense

to go to Toronto, where he fitted up a laboratory to do this work. From these analyses the value of the milk from the individual cows was obtained, allowing, as per rules given in the August issue of the FARMER'S ADVOCATE, 16 cents per pound for butter tat and 21 cents per pound for solids other than fat. To this was added the allowance made for length of time after calving and pregnancy, with the following results :-

Value of milk from cows owned by Mr. \$1 94 Value of milk from cows owned by Mr.
Harper
Value of milk from cows owned by
Mr.
Value of milk from cows owned by
Messrs. Smith & Sons. 2 13

Dividing these amounts by the cost of the food gave the following results, which decided the test :--

VALUE OF MILK GIVEN BY THE COMPETING HERDS FOR EQUIVALENT OF \$1.00 IN

	ROOD'		
Name of com-	Value of milk given during test	Cost of food.	Returns for \$1.00 worth of food.
Reburn Harper Smith & Sons	\$1 9417 2.0413 2,1278	\$0.8373 1.0819 1.2836	\$2,32 1.88 1.66

The health of the animals appeared good throughout the test as is confirmed by the even yield of milk given by them and the fact that after feeding they almost invariably quietly lay down. Only in two or three instances I found food remaining in the mangers, which was, however, eaten up when fed the next time.

The quantity of milk given by each animal and its composition and value will be given next month.

The Jersey Cow.

Manitoba has been adopted as a home by men and women of almost every nationality, and irrespective of nationality the people do, to say the least, fairly well, while very many arrive with literally nothing and in a very short time are in a state of comparative independence. In the same manner do the various breeds of cattle become acclimated and settle down to profitable work. The Jerseys have been slow in getting here but seem to have come to stay. Mayor McCleneghan, of Portage la Pairie, has two fine cows and a few choice young animals, including three very fine calves and a choice bull from the herd of Mrs. E. M. Jones, of Brockville, Ont. Mr. McCleneghan is very enthusiastic over his stock, and thinks they are as well adapted to the requirements of the Manitoba dairyman as any other breed, if not even better. Mr. Foster, of Wawanesa, has also a few animals which are said to be good representatives of the breed. Many people who do not know much about the Jersey say "she is all right where only one cow is kept," or "she is all right for a rich man." Now, if she is profitable where one cow is kept, why not where a dozen are kept? And if she is profitable for a rich man, why not for the man of ordinary means. The only reason that can be given why the Jersey is more profitable than any other, where only one cow is kept, is that she will quietly submit to restraint, and may be tethered on the lawn or elsewhere without chafing or fretting, which is sometimes desirable in towns and villages. In fact, in her original home she is said to do even better than where allowed to run at large. The island from which the Jersey comes, and from which she derives her name, is situated about sixteen miles off the coast of France, and is about eight miles long by six wide. The population is said to be twenty nine thousand, two-thirds of which are native

Shoal Lake Creamery.

This creamery is probably the most extensive of any in the Province of Monitoba, producing daily four hundred and fifty pounds of butter of excellent quality. The proprietor, Mr. Robert Scott, gathers the cream with his own teams, four in number, from a distance of twenty miles, twice a week. The butter has heretofore been shipped in tubs, but sealed tin cans will be used in the future. The price paid for cream during July and August was thirteen cents per pound of butter, and during September sixteen cents with a probability of the same being paid during October. Mr. Scott determined when starting this enterprise to run it three years before deciding whether it was a financial success or otherwise. Last year he claims to have lost money, but things are looking better this year, and he anticipates a still better season next year. The Shoal Lake District is well adapted to stock raising and the farmers should see that the success of a creamery there is identical with their own and support it accordingly.

Cooling Milk.

Sometime, but I do not know when, it will be found out by dairymen that, other things being equal, a can eight inches in diameter and twenty inches deep, filled with milk just drawn from the cow, and plunged up to its ears in water at 42°, will cream the milk fully as perfectly as any other can, in whatever cabinet case it may be placed. There is no apparatus that can get more butter fat out of milk than the cow puts into it. The quicker milk can be cooled down to 45° with the least agitation, the better will be the raising of cream. No one can disturb milk after its temperature has begun to fall and secure nearly as much cream as would have resulted if the milk had been undisturbed. Our mothers knew this, but they did not know the "why" when they contended that the pans of milk should remain undisturbed from sundry visits of spoons, cups, and often "tip-ups" that ended in a boy's trying to make his mouth fit a pan-rim. Quick cooling does no more than make the solids in milk-not fat-"heavier," and so forces the fats to the surface. Milk that is quickly and with little agitation cooled to 45°, or slightly below, is put at a point where there can only be very slow chemical change in its elements. We get very little cream from an open pan on a hot night, because milk kept at 80° or above, and open to the air, shows quick change chemically, and the sugars, cheese, albumen, fibrin, and mineral matter generally take on shape and form, and load down the globules of fat so with this compound that only a few can rise, and those few are so mixed with things that should not be that the resulting butter is white and soft and soon goes to the bad.

The above from the columns of the Southern Planter is sound in principle and exact in wording. We reproduce it for the benefit of our readers.

The Saltcoats creamery is making from ten to twelve hundred pounds of butter per week from three hundred and fifty cows. The quality produced is pronounced by Winnipeg commission men equal to the best in the Northwest. The cream is gathered twice a week, and the circuit takes in a radius of twenty-five miles.

Many little things are let go, even when noticed, because they are generally observed either at night, when it is inconvenient or impossible to attend to them, or in the morning when the time must be given to the regular work. A day (not necessarily a rainy one) might profitably be spent in making repairs and correcting little inconveniences and deficiencies of the average barn.

The Farm.

Our Seedsmen and Some Needed Reforms.

BY W. A. HALE.

Socially I suppose those who earn their living as tillers of the soil are as conservative a class of people as any that exists, and patient and long-suffering and ever ready to make more than due allowance for the discrepancies of those who live by their credulity, and slow to admit that there is a limit when patience even ceases to be a virtue.

I do not now wish to touch upon the many wily schemes which certain seedsmen know about, such as renaming old varieties, highly eulogizing a long list of mediocre so-called novelties every new issue of their catalogue, &c., nor do I wish to enumerate the many cases where I myself have wasted much hard work, valuable time and money through either the intentional fraud or the culpable carelessness of my trusted seedsman, but wish to confine myself to the purity and vitality of the seeds as

sold each year. Weary of changing my seedsman so often l cast about to see how my friends and neighbors fared, only to find a repetition of my own experiences, and the complaint, "I was once so badly taken in by so-and-so that I made up mind never to deal with him again,' so nearly fitted my own and every other case that I determined to put the matter to a practical test, sending to six of my old seedsmen for five cent seed packages of cabbage, asparagus and thyme. The results of the experiment were so startling that, doubting the accuracy of my own tests, I submitted the same to an experimental farm, with very much the same results. The packages of similar kinds of seeds varied in weight with the different dealers, as one is to six, and as regards vitality the discrepancies were even greater. The cabbage samples varied in per cent. as follows: -68, 74, 76, 77, 81 and 84; the asparagus 0, 8, 12, 58, 70 and 86; the thyme 2, 4, 5, 18, 27 and 42. Now, these six dealers were all men of good reputation, and yet there was not one who had not a bad sample in one of the three kinds of seeds tested, and yet no one can say that the result of the experiment was accidental. No doubt old, and, in some cases, very old seed was sold, even under the recommendation of "tested seed," and as "being on the cremation plan," &c., &c. Now, if old seed must be sold, that is, if in a well-conducted business it is deemed extravagant to destroy all seeds over one, two or three years, I would suggest that they be graded up to a fixed date, say to the first of January of each year, or the time when the catalogues are being prepared, and guaranteed as being of a certain standard of vitality, and sold at prices corresponding to the test. This test should be made by soil germination, checked by the seed tester, and an average struck between the two as the standard of vitality. This would overcome the difficulty at present existing of seedsmen refusing to guarantee their seeds, as it would give them a safe means of so doing, while it would also insure the grower from the risk now run of sowing seeds which may or may not respond to his most generous and skilful treatment. When we buy fertilizers we pay

and with the different illuminating oils and fluids the Government mark of inspected flash test fixes the value and standard of safety of the article; and if I so wish to regulate my seed drill, that little or no thinning out is required, or at least the labor of doing so is reduced to a minimum, I can by this plan regulate the same to suit samples of any kind of seed, whether it be graded to 30, 60 or 90 per cent. of vitality; and I am perfectly willing to pay for the same in a fair ratio of price as compared with the percentage of vitality in the packages of seed sold. Not long since I saw an advertisement, "Fresh eggs, 20 cents a dozen; strictly fresh, 25 cents." People smiled, but for myself I failed to see where this fun came in ; and when I once more looked over the six handsome seed catalogues confidently sent me by the very men whose veracity had been tried by the seed tester and found wanting, and saw the illustrations of "how all our seeds are tested" and "how the cremation plan is worked," I felt that the egg man had the best of it, and I wished the catalogues had told but half as much of truth, and had classified and sold their seeds as "fresh and strictly fresh.'

Dr. Barnardo's Home, Russell, Man.

During August Dr. Barnardo made an inspection of his Industrial Farm, and appears to have been well pleased with the results attained during the two years which have elapsed since its commencement. We find that 234 pupils have been sent out from England, and of this number 170 have been placed in suitable situations in different parts of Manitoba and the Northwest, where they are giving their employers satisfaction.

At Russell special attention is now being paid to the work of the dairy. Large quantities of roots and other fooder, suitable to the maintenance of neat cattle, are being produced, and extensive improvements in connection with the winter feeding arrangements are about to be made, such as the erection of large steam boxes in which to prepare the daily rations of the milch cows; the addition of a Ross feed-cutter of the most approved pattern, capable of cutting fodder either dry or green at a rapid rate, and a root pulper and grain chopper of ample capacity for the work. The imported Durham bull, Trophy, presented by Lord Polworth, referred to in our May number, has proved himself a very useful animal, and his progeny will undoubtedly be a credit to the Province. The yield of grain crops has been exceptionally good, and the farm, besides supplying a sufficient quantity for the needs of the establishment for the year, will be able to place on the market a fair quantity. Among other extensions authorized by the Director during his visit may be mentioned the establishment of a special sheep farm upon the river sections belonging to the estate; the erection of a small church for the benefit of the residents and of the surrounding neighborhood; the setting up of an electric light plant, with capacity sufficient for the lighting of all the buildings on the farm ; and the construction of a permanent road from headquarters to the village of Russell. As it has been difficult to obtain reliable weather reports from this portion of the Province, an application has lately been made to the Department of Marine and Fisheries for the establishment of a Meteorological station at this point, to be under the control of the officers of the institution. The permanent buildings added during this year consist of a commodious dwelling house for the manager, a horse barn capable of holding twenty horses, and a cattle shed with stalls sufficient for eighty-eight head of stock. We are pleased to notice that the work carried on in this institution is of such a progressive character, and so completely

Outside the general and well known benefits to be derived from tree planting, it is a great relief to the eye to have at least a few symmetrical trees upon which to rest. We may imagine we care nothing about arborculture or forestry, but if placed where we cannot see a tree for a short time it is a great relief to us to be allowed to feast our eyes on them again, while the person with even a reasonable eye for the beautiful will highly appreciate a beautiful tree on the lawn or groups of them around the home. In what way can a man better erect a monument to his own memory than by planting trees? A few years ago, in the east, one of the most exemplary young men in Ontario remarked in a reverential tone, "My poor father planted those trees." Those trees had become "a thing of beauty," and were cherished by the family as a memento as well. Many of the finest ornamental trees are too tender for northern latitude, but the accompanying illustration represents one of the most magnificient ornamental trees that has proved perfectly hardy in the Northwest. The writer was very much pleased indeed, in going over the Brandon Experimental Farm with the Superintendent this spring, to find the Cut-leaved Weeping Birch alive to the terminal buds in each specimen planted. When fully grown this is an elegant erect tree, with slender drooping branches and finely cut leaves. Its elegant, pendulous habit, beautiful foliage and branches must and will make it the most popular ornamental

The Weeping Birch.

Canada's Great National Exhibition.

The Toronto Industrial Exhibition is now

acknowledged on ever hand to be the greatest

live stock and industrial exhibition held in

America. It has become Canada's National

Exposition. Exhibits may be seen there sent

from nearly every part of the Dominion. Yearly it has become of greater and more national importance. Here Manitoba, the Western Territories of Canada and British Columbia exhibit their products, and thus advertise, to the tens of thousands of people which daily attend, the value and fertility of their soil. Much has been done in the past in this way, but we hope greater efforts will be put forward in the future in this direction. This great exhibition advertises our provinces, old and new, as nothing else can. Many European and American visitors of note annually | the sample is especially good, and from an exattend, and carry to their own land reports of what they saw. Opinions of the different sections are formed, not only by foreigners, but by our own people, largely by what they see here on exhibition. Thus it behooves every province to do its utmost to be well represented. Manitoba and the west have done well in this respect in the past, but they should not be content with this. Eastern people expect to see their exhibit enlarge and grow more valuable each year; to have the proper effect it must do so: Ontario and the older provinces must exert themselves in this respect also if they wish to draw wealth from the United States and Europe. The Board, and especially Mr. H. J. Hill, the Manager and Secretary, deserves the encouragement and gratitude of the entire Dominion. To

which are of most interest to our readers. To do this we engaged well-known experts in each department, and have published the prize list, so that farmers in every part of Canada may learn the standing, etc., of our leading breeders when they meet in competition.

The attendance and receipts were much greater than ever before. Their future exhibitions will doubtless exceed this one.

Manitoba Notes.

GRISWOLD, OAK LAKE AND VIRDEN. At this date (September 24th) very fine weather is prevailing. The rush of work at these places is something wonderful. Many are threshing from the shocks, and the amount of wheat being drawn to the elevators is very great. At Virden, on the 23rd, there were four loads of wheat threshed on that morning and delivered to the elevator before eight o'clock. The damage from wet weather is not nearly as great as many had anticipated. At Griswold

amination of different lots being delivered, there will be possibly one-fourth of one per cent. of grown wheat. In the Griswold District there is a large amount of wheat grown, the residents claiming more than in any other district in the Province, but "Portage" is probably ahead of them. Mr. C. W. Speers will have 6,000 bushels of wheat grown by himself, and 8,000 on land rented. Robert Hall, 6,000 bushels of wheat, 2,000 bushels of oats, and 1,000 bushels of barley. Mr. W. J. Good will have about the same yield. Mr. Allan Young has 8,000 bushels of wheat, and about 2,000 bushels of oats, and same of barley, or thereabouts. Jno. Young, 6,000 bushels of wheat and 2,500 bushels of oats. A. G. Hall, 8,000 bushels of wheat and 1,500 bushels of oats. W. Buchanan, 10,000 bushels them is due the credit for thus advertising, as of wheat, and 2,000 bushels of oats. Samuel nothing else can, the wealth and resources of Hanna has about the same yield, or possible a Canada. Because of its great national import- little less. Mr. W. Govenlock has not less than ance we have fully reported the departments 10,000 bushels of wheat. Including these, this Province.

Mr. Geo. Lindsay, postmaster and general merchant, and Mr. Robert Hall count forty farmers in the locality that will have 5,000 bushels of grain each. If the Grain Exchange do not change the grades there will be very little No. 1 hard wheat this year, and for this reason sales for future delivery are slow at present. After the meeting of the committee of the Grain Exchange on the first of October, should the present fine weather continue, wheat will begin to move, and lively times in that line may be expected.

Mr. D. Rowand, head miller for Leach Bros., of Oak Lake, says :- "Notwithstanding the rain we have better milling wheat this season than at any time since 1887."

Threshing is likely to become a serious matter, as it is doubtful if the machines in the country can possibly thresh out the crop before the weather gets too cold.

At Oak Lake almost the entire population are actual farmers or are in some way interested in farming, and, as a consequence, this usually bustling burg wears at present a decidedly funeral aspect.

At Virden we met the Hon. D. McLean who is something of a farmer, having this season seventy-five acres of wheat which promises well, although not yet threshed Messrs. Bouverie & Routledge have a grand farm adjoining the town, which will produce a large amount of wheat this year. This firm has also a stock ranch north of Strathelair, on the M. & N. W. R., where a large lot of cattle are kept, including some choice Shorthorns. On the whole this district is one of the most promising in the entire Northwest, and has, with the usual exception of the Portage Plains, the greatest percentage of cultivated land.

SALTCOATS, ASSINIBOIA, N. W. T.

Saltcoats, at present (Sept., 1890) the terminus of the Manitoba & North Western Railway, is a town of some two years growth only. Much has been done during this short time, and evidence of life and progress is seen in the improvements now being effected. The Saltcoats Creamery Company opened their creamery in the month of July, and already a good business has been done. It is evidently under carful management and should prove a boon to the whole neighborhood. This season to the farmers, has been a successful one, and with the fine mixed farming country here this district should ere long be among the best in the Territories. The M. & N. W. Railway Co. is energetically pushing the line forward, and it is expected that the sight of the cars will gladden the hearts of the "Yorkton" people during this fall.

MINNEDOSA AND NEIGHBORHOOD.

Minnedosa, a town on the Manitoba & North Western Railway, lies nestled among the hills, and for beauty of situation is one of the most favored towns in Manitoba. There are two elevators—the one owned by the Ogilvie Milling Co., with a capacity for about 40,000 bushels, and the other by Mr. Johnstone, with a capacity for about 35,000 bushels. There are three hotels, a boarding house and a large number of well ordered places of business. As places for worship we notice the English, Presbyterian, Methodist and Baptist churches. At the Minnedges Palling Wills council by Manager Palling Wills. dosa Rolling Mills, owned by Messrs. F. and E. Pearson, a large share of business is being done. A good Masonic stone building is being erected at a cost of \$3,500, and will be completed by November first. The Commercial Bank officials have purchased a lot and an excellent building is to be erected in the spring of next year. The Minnedosa Agricultural Society have purchased twenty acres of land on the school section here from the Governmet and a building 32x80 is nearly completed.

Clan William, which lies ten miles to the north of Minnedosa, numbers amongst its many settlers, some of the most prosperous farmers of

Garden and Orchard.

Fruitful Lawns.

The owners of small places sometimes think they cannot afford any space for vacant lawn ground, nor for ornamental trees and shrubs-This need not prevent them from having neat, tasteful and finished grounds, occupying them to some extent with what they deem more useful, in the way of fruit-bearing trees. The lawn being already provided for, pear and cherry trees may be properly distributed, and pruned to produce ornamental effect. The smaller growing pear trees, such as Seckel, will be appropriate, and a few of such cherry trees as Downer's Late and Large English Morello will not disfigure any small grounds if kept in suitable shape. Avoiding shrubs of straggling growth, neatly trained current bushes may line the exteriors. If the lawn is generously top-dressed every autumn, just before winter, with a finely pulverized compost, and the grass during summer is kept short by regular weekly use of the lawn-mower, the growth of the trees will not be impeded like that of neglected trees in rank grass.

Packing Fruit, for London, Eng.

BRITISH TRADE JOURNAL.

Now that powerful corporations are busying themselves with the cultivation of fruit in the Colonies and in Central America, with a view of shipping direct to London, general interest attaches to the result of the competition in fruit packing recently instituted by the Victorian Government. A prize was offered for the best packed box of apples consisting of twelve varieties, eight of each kind to be shipped from Melbourne to London, the prize to be given to the firm or the fruit grower whose consignment should arrive in the finest condition. The boxes were addressed to the Agent General for Victoria in London, Sir Graham Berry, and on the 19th ult. they were opened and examined. Un fortunately the competition was limited to two boxes, one having been sent by Mr. S. A. Nielson of Richmond, Victoria, and the other by Mr. Draper, of Arthur's Creek. Sufficient, however, could be gathered from the two methods of packing adopted to afford a valuable lesson to all engaged in the trade. The first, Mr. Nielson's, was undoubtedly superior and generally successful, although the selection made as regards the variety of fruit was not happy. Of the ninetysix apples which he sent only five were decayed, in four of these (Adams' Pearmain) the decay was but slight. The apples were gathered on March the 15th last and packed on the 20th, and dispatched in the cooling rooms of steamers. They were first placed singly in ordinary paper bags, and they were arranged in layers in the boxes, and the intervening spaces were carefully filled with paper shavings, a sheet of paper being laid between each layer. The box was in two compartments divided by an upright partition preventing too much lateral pressure when tilted on its side, thus there was little risk of crushing or bruising in course of transit. On opening the case the apples were nearly all found in an admirable condition as far as appearance went, and the color was remarkably bright, but the flesh was in many cases very dry and tasteless. The Jonathan variety was one of the best. It is of a rich crimson color, and fairly crisp and pungent in flavor. On the other hand the King of Pippins was juiceless and insipid, and of

The Hoover seems a good baking apple, which, if imported cheaply, would sell well during the early summer months. The Ben Davis, though rich in color, has a pulp quite too rich for English palate. Rymer's are also uneatable on their arrival here, however mellow and palatable they may be at the antipodes. Chamberlain's Late Scarlet turned out well, being juicy and of good skin and bright color. Another apple arrived much like wool. The second box had the apples wrapped separately in tissue paper and that was all, the result was that not a single specimen came out uninjured, and in many cases they were quite rotten. The experiment serves to show that in no case must such a packing as paper or wood-shavings be omitted in packing apples. Probably the soft whin shreads of wood fibre now made by machinery would serve the purpose admirably, and be in the end better and more durable than paper. They have, moreover, the advantage of being readily and cheaply made from many of the woods in which the Colonies It remains of course to be seen whether other kinds of fruit, such as grapes, could be packed in the same way.

Poultry.

The Different Breeds.

Many people will be investing in a few purebred fowls this year, and the stereotyped enquiry, 'Which is the best breed?" will be frequently made. It would be just as sensible to ask which is the best breed of horses as which is the best breed of fowls. As the Clydesdale is adapted to slow, heavy work, and the thoroughbred to light, fast work, so the different breeds of fowls are adapted to different circumstances and environments. If it is desirable to produce eggs alone it is advisable to keep Leghorns, the Rose comb varieties preferred in this country where the winters are so often very cold. Games are prolific layers, but their eggs are on the small side. If it is desirable to keep what may be termed a general purpose fowl, that is one that will prove a fairly good layer, the Wyandotte, either white or laced, or the Plymouth Rock may be kept. The Wyandotte is probably better adapted to this country than the Plymouth Rock, on account of the rose comb being much less liable to be frozen than the single comb of the latter variety. On small lots, and especially in towns, the light and dark Brahmas are probably the best variety, as they can be kept inside a four foot fence without difficulty. While some of the above varieties should fill the bill under any circumstances where poultry should be kept, it does not by any means exhaust the varieties of useful fowls. There is one point on which the beginner is likely to need warning, viz., crossing the breeds. Almost every man who gets a flock of pure-bred poultry thinks they could be improved by crossing some other variety on them. This is a serious mistake, as even if the first cross proves a success, there is no guarantee that the future of the flock will be as good as if it was bred pure from generation to generation. True, a new breed of merit is occasionally brought out, but not once in a hundred times is a cross an improvement on the present breeds. In ninety-nine cases out of a hundred the man who devotes himself to improving existing breeds meets with much more encouraging results than the man who sets out to do something great in the way of crossing breeds. Line breeding is much more profitable, all things considered, than new departures, trying to poor quality, unfit for an eating or desert apple. accomplish what hundreds have failed in before,

Poultry Notes.

BY JAMES ANDERSON.

I am astonished that, as a rule, farmers in Canada seem so averse to raising first-class poultry. I can assure you they stand in their own light, for, after an experience of thirty years, I find there is nothing on the farm that pays better for the food consumed. I find it not only a pleasant occupation but a profitable one. If they would feed the same amount of grain to twenty or thirty fowls as they do to a pig they would find it pays better, as 12c. a lb. can be got at Christmas for fat fowls, and only about half that for pork, and you can fatten poultry in half the time you can pork. I have had turkeys which took first prize at our Christmas fat stock show weighing 30 lbs. a pair dressed ready for the table; geese, 35 lbs.; ducks, 15 lbs., and chickens, 12 lbs., all spring birds. Some of these I sold for 15c. a lb., but none less than 10c. and 12c., and where you fatten a lot of them together there is a great deal less trouble than fattening pigs, and, as I said before, the droppings from these fowls are as valuable, if the apartments are sprinkled with gypsum or plaster of Paris and kept dry, as Peruvian guano. If farmers would use more poultry and eggs on their own tables they would be a great deal healthier than they are. Too much pork, which is the staple food of the Canadian farmer, is very unhealthy. I do not for a moment think it would be advisable that farmers should become fanciers or professional poultry breeders. They have neither the time nor the inclination for it, but their wives and daughters could make it, with a little assistance from the good man of the house, in the shape of supplying food for them, etc., one of the most profitable industries of the farm. The farmer, as a rule, is content with any mongrel fowls he can pick up, but he will find in poultry breeding, as in stock raising, that the pure breeds always pay the best. Poultry can be raised and fattened for 2c. per lb.

It has been ascertained by actual experiment that a hen, if well fed, will lay from 130 to 180 eggs per year; but the difference between a well fed and poorly fed one makes such a difference in the returns that no person ought to hesitate for a moment which system of feeding they will adept. Take 110 each as the average for which gives us over 450 dozen, at ten cents per dozen we have \$45. Now, I am positive \$10 worth of feed carefully managed, with the scraps from the house, will satisfy these 50 hens, so that you have a clear profit of \$35, and you can keep three times that number without the slightest trouble, only increase your feed and give them plenty of room as they will not do to be too closely confined, and you must have a house built expressly for them, as it will not do to have them roosting all over the premises and breeding lice to infest your other stock. I think I have said enough to prove that poultry culture is profitable for a farmer, and in my next will give my experience in fattening poultry for the

INDUSTRIAL EXHIBITION,

TORONTO, ONT., 1890.

HORSES.

THOROUGHBRED HORSES—Thoroughbred Stallion, four years old and upwards—1, Jos G Seagram, Waterloo, "Buffalo;" 2, Jas Noble & Co, Owen Sound, "Gascon" (inp); 3' Jas Mannell, Toronto, "Meteor." Stallion, 3 years old—1, Wm Hendrie, Hamilton, "Tullochgowan" (inp). Stallion, 2 years old—1, John Glikinson's "Faugh-a-Ballagh;" 2, John Dyment, Orkney, "Gladstone." Yearling Colt, entire—1, John Dyment, "King John," 2, Wm Hendrie, "Early Bird;" 3, John Dyment, "Bob King." Stallion, any age—1, Jos G Seagram's "Buffalo." Mare of Gelding, 4 years old and upwards—1, J Dyment, "Bob King." Stallion, any age—1, Jos G Seagram's "Buffalo." Mare of Gelding, 4 years old and upwards—1, J Dyment, "Glily—1, Wm Hendrie, "Pibroch" (imp); 2, Jno Dyment, "Annie D;" 2, "Arrow;" 3, "Vogla," Yearling, Filly or Gelding—1, Wm Hendrie; 2, Jno Dyment, "Combine: "3, "Fanny Kirk Brood Mare, with Foal by her side—1, Wm Hendrie, "Bonnie Bird;" 2, Jno Dyment, "Lucy Lightfoot;" 3, "Maggie May," "Soal of 1890—1, Wm Hendrie; 2, Jno Dyment, "King Joe; 3, "Koing Harry," Best Mare, any age—1, "Wm Hendrie's "Bonnie Bird."

SPECIAL PRIZES — THOROUGHBREDS — For the best Stallion, of any age, with five of his progeny of any sex or age — I, Jun Dyment, Orkney, "King Bob." 2, Jas Mannell, Toronto "Metcor."

Stallion, of any age, with five of his progeny of any sex or age-1, Jno Dyment, Orkney, "King Bob;" 2, Jas Mannell, Toronto "Mettor."

ROADSTER HORSES—Stallion, 4 years old and upwards, not less than 151-2 hands-1, Oakdale Stock Farm, Pickering, "orest Mambrino;" 2, JM Whitlaw, Paris, "Tristam;" 3, Win S Taylor, Elmbank, "Belmont Star," Stallion, 3 years old-1, S Taylor, Elmbank, "Belmont Star," Stallion, 3 years old-1, H G Charlesworth, Toronto, "Honest Wilkes;" 2, F W Kennedy, Ayr, "Norvelle;" 3, Jos Quinn, St Catharines, "Col nedy, Ayr, "Norvelle;" 3, Jos Quinn, St Catharines, "Col nedy, Ayr, "Norvelle;" 3, Jos Quinn, St Catharines, "Col nedy, Ayr, "Norvelle;" 3, Jos Quinn, St Catharines, "Col nedy, Ayr, "King Rose;" 2, Wearling Colt, entire—1, Geo Arnold, Sutton, "King Rose;" 2, Wearling Colt, entire—1, Geo Arnold, Sutton, "King Rose;" 2, Wesley Cline, Binbrook, Ont; 3, Thos Lapslie, Seaforth. Stallion of any age-1, W J Murray, "Ohio Wilkes." Three-year-old Gelding—1, A W Green, Toronto, "Simon G? 2, J B Molnally & Go, Simcoe, Three-year-old Filly—1, Wm H Speers, Oakville, "Nellie Belmont;" 2, Jas Lowrie, jr, Mongolia, Ont; 3, R M Wilson, Delhi, "Alice K." Two-year-old Gelding—1, Claughton Bros, Utica, Ont; 2, J H Austin, Toronto. "Barney," 3, W R Glasby, Toronto, "Wildwood." Two-year-old Filly—1, Jas O'Nell, Birr, Ont, "Whitchoot," 2, Morris, Stone & Wellington, Welland, "Wildflower;" 3, Robt Davies, Tomoto, "Rose," Yearling Filly or. Gelding—1, R M Wilson, "Perfection;" 2, Isaac Wardell, "Maud Belle;" 3, Wm Smith, Scaforth, "Polly B." Broad Mare with Foal of same breed by her side, not less than 15-12 hands—1, A R Johnston & Co, Hanlan, "Laurie Smith," Foal of 1890—1, Jas Kirkland, "Prank Elline," 2, C A Kelly, Foal of 1890—1, Jas Kirkland, "Prank Elline," 2, C A Kelly, Foal of 1890—1, Bay Mare; 3, S Shuaton of Marces (geldings or mares) in Harness, 16-34 hands and under—1, J Ciark, "Spells, "Gelmont Stallion of any Age, with five of his progeny of any age or sex—1, Wm S Taylor, wild Barny," 2, Alexander

with five of his progeny of any age or sex—1, Wm S Taylor, Elmbank, "Belmont Star;" 2, Oakdade Stock Farm, Pickering, "Forest Mannorino."

CARRIAGE HORSES—Stallion 4 years old and upwards, 16 14 hands and over—1, 8 Hisey & Son, Creemore, "Wild Harry?" 2, Alexander Marsh & Sons, Richmond Hill, "Prince Harry?" 2, Alexander Marsh & Sons, Richmond Hill, "Prince Alexander;" 3, A C McMillan, Erm, Ont, "Shining Light," Alexander;" 3, A C McMillan, Erm, Ont, "Shining Light," Alexander;" 3, A C McMillan, Erm, Ont, "Shining Light," Naulion, 3 years old 1, Jos Cunnington & Sons, Mayfeld, "Young Peacock," 2, D Campbell, Bradford, "Excel;" 3, H "Young Peacock," 2, D Campbell, Bradford, "Excel;" 3, H Wilson, years old 1, Wesley Cline, Janbrook, Ont. 2, R M Wilson, years old 1, Wesley Cline, Janbrook, Ont. 2, R M Wilson, years old 1, Wesley Cline, Janbrook, Ont. 2, R M Wilson, Polity, "Swiller, Stallion, any gee—1, J Hisey & Son, Huttonsville, "Frank," Stallion, any gee—1, J Hisey & Son, Huttonsville, "Frank," Stallion, any gee—1, J Hisey & Son, Wild Harry, " Pair of Matched Carriage Horses (mares or geldings), not less than 16 12 hands—1, The B G Tisdale Co, Brantford, "Colonel" and "Major," 2, Thos Brownridge, Brampton; 3, Grand & Co, Toronto, "Par Matched Carriage Horses not less than 15 14 and not more than 16 34 hands—1, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse & Popper; 3, F Homer J, E W Cox, Toronto; 2, Moorehouse, McLun, W Cox, Toronto; 2, Moorehouse, McLun, Y S, Brampton, Hutt

"Nettle." SPECIAL PRIZES — CARRIAGE HORSES — Best Stallion, any age, with five of his progeny of any age or sex-1, Orr & Harrison, Milton, "Ryshawk."

SPECIAL PRIZES — CARRIAGE HORSES — Best Stallion, any age, with five of his progray of any age or sex—1, Orr & Harrison, Milton, "Ryshawk."

HUNTERS AND SADDLE HORSES—Saddle Horse (gelding or mare)—1, Moorehouse & Pepper, Toronto; 2, Grand & Co, Toronto; 3, R Bond, Toronto. Hunter (heavy weight) up to 15 stone—1, Moorehouse & Pepper; 2, Ino Johnson, Toronto, "Orkney: 3, Jas Carruthers, Toronto, "Phyllis;" 4, J H Reed, V S, Guelph, "Duster." Hunter (light weight) up to 12 stone—1, F C Grand & Co; 3, F A Campbell, V S, Guelph, "Duster." Hunter (light weight) up to 12 stone—1, F C Campbell, "Erminie;" 2, Moorehouse N, F C Grand & Co; 3, F A Campbell, V S, Toronto, "Dempsey," Ladies' Saddle Horse, ridden by lady, if possible—1, F A Campbell, "Erminie;" 2, Moorehouse & Pepper; 3, F A Campbell, V S, "Glenora." Family Gircle.

Uncle Sidney's Views.

I hold that the true age of wisdom is when We are boys and girls, and not women and men; When, as credulous children, we know things

because We believe them-however adverse to the laws. It is faith, then, not science and reason I say, That is genuine wisdom—and would that, to-day, We, as then, were as wise, and ineffably blest, As to live, love and die, and trust God for the rest.

So I simply deny the old notion, you know,
That the wiser we get as the older we grow,
For in youth, all we know we are certain of now,
The greater our knowledge the more we allow
For skeptical margin; and hence I regret
That the world isn't flat, and the sun doesn't set,
And we may not go creeping up home, when we
die.

die,
Through the moon, like a round, vellow hole in the

—James Whitcomb Riley.

A STRIKE FOR EIGHT HOURS.

Written for the Rural Press by Clara Spalding

Brown.]

Brown.]

"The carpenters struck for eight hours to-night, Martha. There'll be no more work done till the builders come to our terms."

Mrs. Dayton looked across the table at her husband with a dubious expression on her face.
"Do you think they will give in? I am afraid you will be out of work some time."
"I don't care if I am; eight hours are enough for anybody to work, and it's time the people who have to do the labor of this world showed some spunk and rebelled against being tied down to one eternal grind."

grind."
"But you will lose three dollars a day, and we don't want to run in debt. Mouths must be fed, you know, just the same, and the children's shoes

"There you go, borrowing trouble right and left! What's the use of trying to cross a bridge before you come to it? I guess there'll be a way provided."

what's the use of trying to cross a bridge before you come to it? I guess there'll be a way provided."

Mrs. Dayton said no more, but she looked anxious as she cleared away the tea things, put the children to bed, and finally sat down to a big basket of mending, just as her husband's snores began to penetrate the sitting-room from the adjoining bedroom. She was very tired, but she could not think of going to bed before eleven o'clock. There was always just so much to be done, and only one pair of hands to do it all.

Eight hours a day's work! Mrs. Dayton smiled grimly. What would become of the work of that house if she "rebelled against being tied down to one eternal grind"? Six children, the eldest but twelve years of age, the youngest an ailing baby which she sometimes feared did not receive due attention with so many other cares devolving upon her from early morning until late at night; and Mrs. Dayton was not robust—never had been. She could not "turn off" her work as some women do, but she did the best she could, without complaining.

"If Silas has made up his mind not to go back to work, nothing I can say will change it," she mused. "There's one good thing about it—if he is going to be at home, he can help me in a number of ways."

Comforted a little by this reflection, she plied her needle with renewed vigor, and at last crept wearily into bed, partually arousing her husband, who muttered, testly, "Don't talk to me! I tell you, eight hours are enough," then turned over and started a new series of snores.

"Do you mind holding baby a few minutes, Silas, while I skim the milk?" queried Mrs. Dayton

started a new series of snores.

"Do you mind holding baby a few minutes, silas, while I skim the milk?" queried Mrs. Dayton after breakfast next morning.

Slas had settled himself into his chair with the air of a man who has all day before him and owns no man for a master.

"Hold baby!" he ejaculated. "Do you think I'm here to do women's work? I guess when I get a day off I'm going to enjoy it."

"Hele cirk with a tooth coming through or I

here to do women's work? I guess when I get a day off I'm going to enjoy it."

"He's sick with atooth coming through or I shouldn't have asked it. I really don't know how I can attend to my work and care for him as I ought. There, there, poor little dear, don't cry,"

"Well, if this is the sort of racket I've got to listen to, I'll clear out. Great Scott! just hear him yell! I thought I was going to have a little peace in my own house. You needn't wait dinner for me—I don't know when I'll get back."

The irate man hurridly got out his fishing tackle and strode off to the nearest wharf. The Daytons lived in the outskirts of a large seaport, had their own little cottage, a cow and chickens, and were altogether very pleasantly situated. Mr. Dayton was a good husband in most respects, and would have stared in amazement if any one had suggested that he was not always perfectly kind to his wife. He was thoughtless, like many other men who do not stop to consider how manifold the duties of a housekeeper are. He would have scouted the notion that his wife worked harder than he did, and the idea of lightening her burdens in any way had never occurred to him.

Mrs. Dayton had trained her children to be useful to some extent, but the oldest was a boy, and his ten-year-old sister could only render some assistance in drevsing the little ones mornings and do a few chores after school at night. The week passed by. Mrs. Dayton was disappointed in her hopes of deriving any benefit from her husband's idleness. If she asked him to repair something about the

house he would do it to-morrow, but to-morrow came and it was not done. When churning-time came he was not to be found. He never seemed to notice when she lifted heavy kettles of water or emptied the wash tubs, and she strained her arms as usual putting up the clothes-line. Seeing how disinclined he was to have anything to do with the domestic affairs, she ceased asking for his help.

Silas Dayton was enjoying his vacation. He was a good workman and he meant to make the most of his leisure; so he read and he smoked, took naps in the hammock and indulged in long gossips over the fence with neighbor Jones, a professional man whose office hours were short. Did you ever notice how fond the average man is of gossip? He likes to have his fling about the chattering of women, but at heart he relishes a bit of news. When Almira Smith becomes engaged to be married, or her father sells his pasture lot, or Jim Downs gets a clerkship in a store, he is always glad to hear about it, and two men can beat any, two women of my acquaintance in holding a protracted sidewalk meeting.

Martha Dayton lay awake nights and thought. Saturday morning she arose with an unaccustomed look of determination on her face. In a way that ordinarily mild women sometimes have, she suddenly become firm as a rock in her resolution to adopt a new course of conduct. "I'll begin at six o'clock," she said to herself. The work was accomplished magically that day; every step was made to count, every minute was used to advantage. By three o'clock the house was in order and a generous baking adorned the pantry shelves.

Half an hour later Mr. Dayton came in and found his wife sitting in the parlor, with her new gingham dress on, reacing the morning paper, while the baby crowed on a rug at her feet.

"Expecting company?" he inquired.

"No, I'm just resting."

It was something new for Martha Dayton to be "resting" in the daytime, and it had been years since she had "fixed up" like that, except on the rare occasions when she went out somewhere.

When the supper

front hall. "Haven't seen them for years. They've got a farm about twenty miles from here, it seems, and they've been to town time and again, and didn't know we were living here."

Martha was shaking hands with a stout, freshfaced man and a large, comfortable looking woman, and Jahez was declaring that he knew Si in a minute, and he was mighty glad to see Si's wife and babies.

and Jabez was declaring that he allow minute, and he was mighty glad to see Si's wife and babies.

"Si haint changed hardly any," he continued.
"but you ain't lookin' well. Kind o' dragged out, ain't ye? Better come out to the farm; we'll fat you up."

Silas was secretly pleased to see that his wife was neatly dressed, and seemed less "put out" than usual by company. Jabez Hunter had been one of his best friends in the old days, and now that Jabez had the air of being well used by the world. Silas was anxious to have his wife, children and home appear in a favorable light.

Soon Mrs. Dayton called them into the diningroom where the loug table was spread, and the children already sat in their places, the baby industriously drumming with a spoon on his waiter. With pride, Silas named his boys and girls, who were embarrassed just enough to make their behavior unobtrusive.

"By George, Si, you're a rich man with such a family as this." exclamed Jebez. "Don't it do your heart good to look around and see 'em? I tell Lucy sometimes its pretty lonesome for us out on that big farm where youngsters would have such a good time. Wouldn't you like to go fishing in my trout brook, young man?" addressing Jack, the oldest boy.

"Yes, sir," replied the boy with a broad grin.

boy. 'Yes, sir,' replied the boy with a broad grin. By this time all were settled and Silas' face wore a look of blank astonishment and dismay. Cold meat, cold bread, berries, cake, and a cold custard meat, cold bread, berries, cake, and a cold custard meat, cold bread, berries, cake, and a cold custard meat, cold bread, berries, cake, and a cold custard meat, cold bread, berries, cake, and a cold custard meat, cold bread, berries, cake, and a cold custard meat, cold bread, berries, cake, and a cold custard meat.

meat, cold bread, Derries, case, and a cold custate pudding.
"My wife, it seems, has made a change in the bill of fare," he finally said ill-humoredly; "we are in the habit of having a good Sunday dinner."
"I don't see anything the matter with this," declared Mrs. Hunter.
"Silas has forgotten that I've struck," said Mrs. Dayton. "I've adopted the eight hour plan, and no unnecessary work on Sunday. Men don't work Sundays—why should women when they can avoid it?"

as she sat down making aprons for the children, Silas said: "If you want to go out to the farm, Martha, I think likely I can get Mandy Johnson to come and keep house."

"But the children?"
"You say that the hard and Broods and Stelle."

Martha, I think likely to can got that you can alkeep house."
"But the children?"
"You can take the baby and Freedy and Stella, and the rest will get along all right going to school here." So it was arranged.

When Mrs. Dayton returned, almost a new woman, she found that a compromise had been effected, and Silas was working. She did not attempt to keep up her own strike, but life was henceforward made easier for her. She hired help on extra hard occasions, many little things that had been expected of her were omit'ed, and Silas, now that his eyes were opened, found that he could save his wife from backaches and help her to get a leisure hour in ways that detracted not a whit from his maniliness. The time came when he said to her: "That was a cute idea of yours, Martha—that strike for eight hours. I was mad at the time, but when I saw how much better Jabez Hunter treated his wife than I did you, it made me feel that maybe I hadn't been doing right. I guess I think as much of you as he does of Lucy, and I mean to give you as good a show as I can."

"I am satisfied," said Martha, looking loyingly at her husband; "but I was not before my strike. I was really getting vicious. We are lots happier now, aren't we?"

"I only wish all strikes might end as well as yours did."

Minnie May's Dep't.

MY DEAR NIECES :-

How often we have enjoyed a good laugh over the absurdities of our grandmother's dresses, the wide skirt with the mighty hoop, tiny pointed shoes, half hidden by an enormous bow of ribbon on the toe, the low cut waist and sleeveless arms, and the orthodox waist measure of eighteen inches. When they took their walks abroad a fur or feather boa was donned, and a top heavy, many plumed hat was tied beneath the chin in a big ribbon bow. If winter was the season the hat was of velvet or beaver fur, and a tippet covered their shoulders, and in this uncomfortable garb my lady sallied forth. Never since the days when the indiscretions of Eve made clothing indispensible has woman been so sensibly and so suitably clad as now. The skirt short enough to clear the dirty ground, the strong comfortable shoe, warm, soft jersey underclothing, and cloth ulster buttoned to the feet, we can take our daily exercise and defy the wind or weather. All superfluous weight in skirts has been got rid of, for a weighty skirt is an evil, and all else in the shape of superfluous garments has been discarded; and it is much to be regretted that the corset cannot be reckoned among them. Our bodies, that were made so symmetrical and perfect, have been squeezed out of all shape, until they resemble nothing human nor divine. Apart from the displacing of the viscera, heart and lungs, the corsets should be discarded upon sanitary grounds. A pair of corsets are worn until they wear out, often without being washed. Now, it may be asked, if this is cleanly? There must be absorption of perspiration, and the corset soaks it up and holds it, to evaporate it at its leisure. The shape of male and female infants is just alike until the corset puts in its deadly work. It has not been actually proved that life is shortened by the wearing of corsets, but here are just a few of the evils resulting from their use: -Bad temper, red nose, flushed face, cold feet and hands, dyspepsia, palpitation, tumors, headache and nervousness. It is always said "I do not lace tight." There must be compression, else the breath need not be drawn in to unclasp them, and a long full respiration fellows when the lungs are relieved of the pressure or constraint. So far from a laced figure being elegant it is the reverse. The beholder cannot but

MINNIE May.

Recipes. CUP PUFFS.

Half a cup of white sugar, one-half cup of milk, two eggs, two teaspoonsful of bakingpowder and a pinch of salt; flour enough to make a batter that will fall from the spoon; butter six teacups, and put a spoonful of batter in each, then a little fresh fruit; then fill half full of batter. Apples are nice. Steam an hour in a steamer. They come out of the cups perfect puff balls, light, spongy and digestible. Serve with wine sauce.

PICKLED PEACHES.

One quart vinegar, four pounds of sugar; boil and skim; peel seven pounds of fruit; put it in and boil until a little soft; take them out, reduce the syrup and pour over; cloves may be boiled in the syrup if the flavor is liked.

CORN PUDDING.

Cut from the cobs three pints of tender, young corn; add three fresh eggs well beaten, two heaping tablespoons of butter, salt and pepper to taste; add one teacup of sweet cream. Bake for one hour.

FRIED CHICKEN.

Cut up, as if for stewing : pull off the skin dip in batter, and firy in plenty of hot lard. Serve on a hot dish with a little melted butter poured over.

SALMON SALAD.

Take one-half of can of salmon and pick fine with a fork; add one-fourth of a large cabbage chopped fine, and the chopped white of a hard boiled egg; rub the yolk with a pinch of mustard, a little salt and pepper, and half a cup of vinegar. Mix thoroughly and garnish with parsley.

PRUNE PUDDING.

Soak half a pound of prunes over night; in the morning pit them and beat fine; add one-half teacup of sugar, and the beaten whites of two eggs; then beat all together until very light. For sauce, take the two yolks, one tablespoon of sugar, half a cup of milk and half of water. Give it a boil up, and, when cold, pour over the pudding.

BROWN BETTY.

Pare and slice tart apples; stew and sweeten; put a layer of bread and butter in a pudding dish; then a layer of stewed apples; grate a little nutmeg over; then more bread and butter, and lastly, more apples. Bake a nice brown and serve with cream.

Uncle Tom's Department.

MY DEAR NIECES AND NEPHEWS :-

October is here and we draw the curtains and come nearer the fire and look into the cheerful blaze. These lengthening, dark, cold evenings, how they recall to us, of your Uncle Tom's generation, memories of the past—that dear, sad past forever gone. As we look in the glowing fire, with its warmth and beauty, ay, and its blackened embers here below, our eyes are there but thoughts have carried us away. We see rosy cheeks and bright eyes and laughing lips, which once graced another fireside long ago, now scattered far and wide. All have changed as people change here, and some have laid them down from the world's clamor and work, and rest quietly in that narrow home God's love had prepared for them in some quiet churchyard's

"They come, the shades of joy and woe, The airy forms of long ago; The dreams and fancies known of yore, That have been and shall be no more."

Yes, my nieces and nephews, we older folk have seen and see strange sights in that flickering firelight, when the gloomy night and shriek ing wind and pouring rain recall other scenes and other surroundings. Not all sad are they, though we sigh -sigh for the days that are not and think of that parted class, that scattered group and the old home faces, sigh, yet rejoice, as we look forward to that goal before, to which all mortals come, and in which we find an entrance one by one.

We are hastening forward, and we hear your pulsing tread behind us, and would fain turn back and walk again the road, warning you of the pitfalls and sparing you the difficulties, but it must not be, we cannot wait, time hastens our feet forward and we go, for one by one we each must fill our places now and at last enter the silent halls alone.

Uncle Tom is in a reverie, I hear that young nephew say. I wonder if he remembers that piece of music he and others of my nieces and nephews heard not long ago, called "Voices from Heaven," which so affected some of us as to seem itself one voice from that better country. Touching the heart as it did, it created a long ing for something we have not here. In this flickering firelight are there not other voices, like the voice Hiawatha heard "calling loudly through the darkness "-calling, calling, beckoning you forward and upward and heavenward -calling to truer, nobler actions, to real living, to acting even in

"The living present Heart within and God o'erhead."

Put not away the voices or the beckoning hands, heed them, obey them. Be true to your trust. Your talents are yours, they grow less if not used, but as the blacksmith's right arm grows strong, the sailor's vision acute, the musician's voice melodious with use, so use your talents, your time, your strength; improve in everything, make life worth living and the world better because you are in it, and so

"Make life, death and the vast forever, One grand sweet song." Your Affectionate

UNCLE TOM.

He—"Then you'll not accept my suit Miss Stuckup?" She—"Thanks, no. It's rather too pronounced a pattern, and I've no grown-up brothers it would fit.—Grip.

7. An excuse.

FAIRBROTHER.

2-CHARADE. Now, mark you well the tale of woe Our cousin Ed. does tell;
It must have been in Yankee Town
That accident befel
Which he so TOTAL does relate;
I'm sorry, for his sake.
You offer hove may learn of him, I'm sorry, for his sake.
You ofter boys may learn of him,
And don't make his mistake,
For though you may forgive the "dear,"
Yourself you never can,
LAST shall you FIRST it every day,
As long as you're a man.

ADA ARMAN

ADA ARMAND. 3-ANAGRAM.

It may sound quite ridiculous,
I hope it false may be,
But I have heard that while we live,
We STARS NO MORE shall see.
ADA ARMAND.

4-ILLUSTRATED REBUS.

5-ENIGMA.

In cold, but not in hot. In cover, but not in pot. In locket, but not in ring, In winter, but not in spring.
My whole is a kind of bird,
Whose name you have often heard. 6-PHONETIC CHARADE.

Magnanimous thou Fairbrother art.
To forgive the girl that wounded thy heart;
h. my! ah. ves! 'tis real sad, Oh, my! ah, yes! 'tis real sad, That she jilted you for her other LAST lad,

Experience is oft dearly bought,
And be it a small PRIME a large lot.
We need it in TOTAL that we may
Acquire knowledge of the world's way.
HENRY REEVE.

7-CHARADE (I)

Be FIRST in your doings—not seeming :
Be doing, each day that goes by,
Some little good, not in the dreaming
Of great things to do by and by.

(II)Sow good LAST and taste its fruitage pure:
Sow peace and reap its harvest bright;
Sow sunbeams on the rock and moor,
And find a harvest home of light.

(FINAL.)

"What is the real good,"
I ask in musing mood,
"Order," said the law court;
"Knowledze," said the school;
"Truth," said the wise man;
"Pleasure," said the fool;
"Love." said the maiden;
"Beauty," said the page;
"Freedom." said the bage;
"Freedom." said the sage;
"Fame," said the soldier;
"Equity," said the seer.
"Spake my heart full sadly,
The answer is not here."
Then, within my bosom
Softly this sheard;
Each heart holds the secret,
"TOTAL" is the word.

HENR

HENRY REEVE.

entral

eart;

Y REEVE.

8—Whole I am one of the longest words in the English language.
Whole, I lack symmetry.
Cut off my head, I have symmetry.
Curtail, and I can be divided.
Curtail me again and I am a division. A. Howkins.

> 8-PHONETIC CHARADE. 8-PHONETIC UHARADE.
> Have you heard the poser's song,
> Puzzle away, Puzzle away.
> They're a gay and studious throng,
> Puzzle away. Puzzle away.
> Oft until the midnight hours,
> They doth sit amidst the showers,
> And the dictionary devours;
> Puzzle away. Puzzle away.

As they build the "Form" and "Flat,"
Puzzle away, Puzzle away.
You may wonder what they're at;
Puzzle away, Puzzle away.
Those who burn most midnight oil,
And o'er rhymes and meters toil,
Oft-times get nought for their spoil.
Puzzle away, Puzzle away.

Perseverance crowned at last;
Puzzle away, Puzzle away.
And their loftiest aims surpassed;
Puzzle away, Puzzle away.
As with pen and ink they write,
They are happy, and delight
In getting combinations right.
Puzzle away, uzzle away.

There's a TOTAL in the "Dom."

Puzzle away, Puzzle away.

"Join our band," says "Uncle Tom;"

Puzzle away, Puzzle away.

"Twill be FIRST I know," says he,

"If you'll only trust to me;

LAST and join our jubilee.

Names of those who have Sent Correct Answers to Sept. Puzzles.

A. Howkins, Clara Rilance, Drusilla A. Fairbrother, Mattle Woodworth, Mary E. Woodworth, A. R. Boss, Morley T. Boss, Dorothy Fox, Henry Reeve, Ed. A. Fairbrother, Geo Morrison, Elsie A. Irwin, H. G. Ferguson, Alf. Lylie, Beatrice Moore, John F. Orchard, Elinor Moore, J. Irvine Devitt.

Queer Names.

The London registry of births furnishes some odd things in the way of names. Children of the families of Bath, Lamb, Jordan, Dew, Dear and Smith are christened respectively Foot, Pascal, River, Morning, Offspring and Smith Follows. Mr. Cox called his son Arthur Wellesley Wellington Waterloo. Mr. Jewett, a noted huntsman, named his Edward Byng Tally Ho Forward. A mortal that was evidently unwelcome is recorded as "One Too Many." Another of the same sort is "Not Wanted James." Children of six to ten names are frequent, but probably the longest name in the world, longer than that of any potentate, is attached to the child of Arthur Pepper, laundryman. The name of his daughter, born, in 1883, is Anna Bertha Cecilia Diana Emily Fanny Gertrude Hypathia Inez Jane Kate Louise Maud Nora Ophelia Quince Rebecca Starkey Teresa Ulysis (sic) Venus Winifred Xenophon Yetty Zeus Pepper—one title precisely for every letter in the alphabet.

Deacon Smith—"I trust that you believe in eternity?" Bass (who is having some repairs done at his house)—"Oh, certainly! There must be, else how could that plumber ever get his work finished?"

Kirkejean (the poet)—"Don't you like the sough of the pines, Miss Windmere Windemere (from the west)—"I ain't seen her but we have so many pigs at home I don't care much about 'em''-Judge.

Sick Headache

S a complaint from which many suffer and few are entirely free. Its cause is indigestion and a sluggish liver, the cure for which is readily found in the use of Ayer's Pills.

"I have found that for sick headache, caused by a disordered condition of the stomach, Ayer's Pills are the most reliable remedy."—Samuel C. Bradburn,

Worthington, Mass.

"After the use of Ayer's Pills for many years, in my practice and family, I am justified in saying that they are an excellent cathartic and liver medicine—sustaining all the claims made for them."

—W. A. Westfall, M. D., V. P. Austin & N. W. Railway Co., Burnet, Texas.

"Ayer's Pills are the best medicine known to me for regulating the bowels, and for all diseases caused by a disordered stomach and liver. I suffered for over three years from headache, indigestion, and constipation. I had no appetite and was weak and nervous most of the time. By using three boxes of Ayer's Pills, and at the same time dieting myself, I was completely cured."—Philip Lockwood, Topeka, Kansas.

"I was troubled for years with indigestion, constipation, and headache. A few boxes of Ayer's Pills, used in small daily doses, restored me to health. They are prompt and effective."—W. H. Strout. Meadville. Pa. Strout, Meadville, Pa.

300 PERCHERONS, 100 FRENCH COACHERS

Comprising my importations for 1889, are now on exhibition at

ELLWOOD'S RANCH, DeKalb, Illinois.

This collection embraces all the FIRST and SECOND

This collection embraces all the FIRST and SECOND PREMIUM STALLIONS (with one exception); the First Premium for best Collection of Stallions; a majority of First and Second Premium Mares; shown at the greatest of all Percheron Shows, held at La Ferte Bernard, from May 29, to June 2, 1889.

The quality of this stock is guaranteed superior to any importation that ever crossed the water. In addition to the superior Draft animals which have ever characterized my selections, particular attention has been given to the selection of Coach Stallions, which is the largest ever brought from France by any importer. Conspicuous among this lot is the selection made from the famous stable of Edward de-la-Ville, being the only party that was willing to pay the price that would bring the quality of horses handled by Mr. de-la-Ville to this country, he having been the recipient of more show ring honors than any other owner of Coach horses in Normandy. It will be to the interest of intending purchasers to make a careful examination of quality and prices before buying. I desire to impress upon my customers that, as heretofore, I was the first American buyer in France this season, and my selections are made from the leading Studs, and having the first choice of all of them, I spared no expense to secure the best. All stock fully guaranteed. Favorable prices and terms. For particulars, address,

W. L. ELLWOOD, Proprietor, Dekaib, Illinois.

DeKalb is situated on C. & N. W. Ry. 58 miles west of Chicago.

SHIRE HORSES.

STOCK GOSSIP.

The stock breeders at the Industrial Exhibition, Toronto, expressed themselves delighted with Mr. W. Johnston, superintendent of the stock department

The stock breeders at the Industrial Exhibition, Toronto, expressed themselves delighted with Mr. W. Johnston, superintendeut of the stock department.

Mr. Mullen's noted Shorthorn calf Farmer's Pride = 13250 = was again weighed at eight months old, and "held down" a little over 900 lbs., thus gaining 137 lbs. in the one month.

Mr. W. J. Helliwell, Ralphton, Man., recently purchased from W. S. Lister, Middlechurch, his stock bull Laneer and a number of choice females. This addition to Mr. Helliwell's herd puts him in good shape for future operations.

Messrs, J. McGreger & Co., of Brandon, recently sold to Mr. C. G. Geddes, of Pincher Creek, Alberta, the imported Shire stallion Lord Arthur. Lord Arthur made a successful season for McGregor & Co. this year at Portage la Prairie and vicinity.

Mr. T. C. Patteson, of Eastwood, reports business in Shropshire sheep brisk and the demand equal to former years. Amongst recent sales is that of six rams to South Dakota College, six shearling ewes and a ram lamb to Mr. Thos. Scott, of Philadelphia. Hon. H. M. Cochrane, of Hillhurst, P. Q., reports the following sales at the Western Fair: The Polled Angus bull calf, Lord Forest, to Wu. Stewart & Son, of Lucas, Ont.; first prize yearling bull to Andrew Easton, Bright, Ont; also bull calf to Capt. J. A. Varcoe, of Carlow, Ont.

Those of our readers who are on the lookout for Hereford cattle should remember the date of the sale of Mr. R. J Mackie, Oshawa, Ont., which comes off on the 15th October inst. Some fifty-three head of pure bred Herefords will be offered. Most of our readers are familiar with this herd, which has been quite successful in past years in the show rings of the country. Mr. Mackie has made up his mind to give up farming, hence this sale.

Before this reaches our readers several new importations of Shorthorns will have been made. Messrs. Sharman, of Souris, will have received a consignment of Bootin cattle from D. Alexander, of Brigden, Ont., and Mr. Lang, of Oak Lake, some fine animals from Thos. Russell,

as there are a large number to be offered. For further particulars consult our advertising columns. Henry Arkell, of Arkell, writes to the effect that he has sold his show lot of Oxford-down sheep to George MacKerrow, of Sussex, Wis. They consisted of one three-year-old ram, one yearling ram, three two-year-old ewes and four yearling ewes, one ewe lamb and two ram lambs. Mr. MacKerrow is one of the largest exhibitors in the Western States, and has been very successful in the show ring. Mr. Uriah Privett, as is usual with him for ten years past, has purchased from me sheep for exhibition purposes. He is a very successful exhibitor. Have also sold to Aaron Bardwell, Fargo, New York, three ram lambs. I have also imported for service on my flock two very fine 1 am lambs, through Mr. James Merin, Boyne. Mr. Arkell also reports his Berkshires as doing well. He has sold a Berkshire boar to Robert Douglass, Aberfoyle; one toar and sow to Robert B. Elliott, Port Huron, Michgan. The Berkshire trade has not been as brisk as last year.

and sow to Robert B. Elliott, Port Huron, Michigan. The Berkshire trade has not been as brisk as last year.

Smith Bros., Churchvolle, in writing, says:—"The three cows we entered for the milk test were Correlia Tensen, Marian and Onetta. Cornelia Tensen dropped her last calf January 27th, and from February 1st to September 10th (222 days) she gave 11.867 lbs. of milk, or over 53 lbs. per day for the 222 days. She was tested for butter from 10th to 17th of March, and made in a week 19 lbs. Marian calved March 22nd, and from April 1st to September 10th she gave 7.676½ lbs. of milk, or over 47 lbs. of milk per day for the 163 days. She was tested for butter, beginning 21st April, and in a week gave 19 lbs. Onetta was giving from 53 to 56 lbs. of milk from the 5th to 10th of September, she having calved August 16th. Her butter record was made last year, when she gave 14½ lbs, five months and a week after calving. Her milk record was 10.607 lbs. in 10 months. Our sales during the past year have been more than ever, and the inquiries for first-class Holstein cattle still continues to increase, still we have a fine collection of young bulls and heifers on hand, and our cows number over twenty-five head, besides the fifty head of young stock, including heiters, bulls and calves. We are keeping records of every animal in our herd, so that buyers can ser exactly what each animal gives.

NOTICES.

ONTARIO BUSINESS COLLEGE, BELLEVILLE—For twenty two years this famous institution has maintained the highest position among the business colleges of America, and secured the widest attendance. Twenty-six different provinces, colonies and states have, up to this date, been represented among its students. The principals, Messis, W. B. Robinson and J. W. Johnson, F. C. A., announce in our advertisiting columns that their new 100-page circular is just out. Send for it.

TOBA THE CREAT CRAIN AND CATTLE PROVINCE

HAS WITHIN ITS BORDERS

HONDERS

Industrious men and women. Manitoba is making rapid progress as shown by the fact that

In 1887 there were under crop, " 1890

Increase, - - 419,028 These figures are more eloquent than words, and indicate clearly the wonderful development taking place. NOT A BOOM, but certain and healthy growth-

HORSES, CATTLE AND SHEEP

Thrive wonderfully on the nutritious grasses of the prairie, and, in fact, MIXED FARMING is now extensively engaged in all over the Province. There are still

FREE HOMESTEADS in some parts of Manitoba.

CHEAP RAILROAD LANDS-\$3,00 to \$10.00 per acre. Ten years given to pay for them.

IMPROVED FARMS, from private individuals, at low prices, and on easy terms of payment.

NOW IS THE TIME to obtain a home in this wonderful fertile Province. Population is moving in, and land is amually increasing in value. In nearly every part of Manitoba there are now

GOOD MARKETS, RAILROADS, CHURCHES & SCHOOLS,

AND MOST OF THE COMFORTS OF AN OLD SETTLED COUNTRY. Investment of Capital.

There are very good openings in many parts for the investment of capital in manufactories and other commercial enterprises.

For the latest information, new books, maps, etc., call free) write to

King's Daughters

WRITTEN AND EDITED BY

Mrs. Margaret Bottome,

President of the Order.

A NEW DEPARTMENT IN

IES'HO/

Entirely devoted to the best interests of the order of the "King's Daughters," and of striking interest to every "King's Daughter" in the land. It will be written and Bottome, the founder and President of the Order, who in this department, will give each month "talks" similar to those which she made famous last winter in the drawing-rooms of the best New York houses.

Is a department which is read every month by thousands of girls who buy the Journal for this feature alone. Every point in a girl's life is here treated: what is best for her to wear; most becoming

manners in society; behavior; all told in a chatty manner by one of the brightest writers in the land.

CONTENTS FOR THIS DEPARTMENT IN THE OCTOBER ISSUE:

HOW TO LEARN TO TALK WELL; HOW TO BE PRETTY THIS FALL: MANNERS WHEN AT CHURCH;

A MISTAKE YOU MAKE; SAYING "GOOD MORNING;" MY GIRLS' MOTHERS.

For One Dollar We will mail the Journal from now to January 1, 1892—that is, the balance of this year FREE, and a FULL YEAR from January 1st, 1891, to January 1st, 1892. Also, our handsome 40-page Premium Catalogue, illustrating a thousand articles, and including "Art Needlework Instructions," by Mrs. A. R. RAMSEY; also Kensington Art Designs, by JANES. CLARK, of London.

N. B.-This offer must **positively** be mentioned when sending your subscription, or one year only will be given. CURTIS PUBLISHING COMPANY, Philadelphia, Pa.
