Mercantile Summary.

Six thousand packages of impure and adulterated teas were seized within four weeks at the port of New York.

NEARLY \$6,000,000 of the last United States bond call of \$10,000,000 which matured August 1st. has been redeemed.

THE shareholders of the Molsons Bank have been notified that a dividend of four per cent. has been declared for the current half year.

THE Hudson's Bay Company shipped, on the 6th inst., per Allan Line consigned to its office London, England, 232 bales of raw furs, valued at \$60,000.

M. McIntyre, doing a small grocery business in Cornwall, has been in hot water lately, being sued by his mother &c. He has settled his difficulties by compromising at 40 cents on the

The well-known wholesale grocery firm of Sloan, Jardine, & Mason has been dissolved by the retirement of Mr. Alex. Jardine. The remaining partners, Messrs. Sloan & Mason, will continue the business under this style.

THE Furness Line steamer Newcastle City, which sailed on Saturday for London G. B. from a lower province port, took 47,080 cases and 104 half cases of canned goods, 172 head of cattle and a quantity of other goods. The total value of her cargo was \$228,915.

For a good many years Israel Lemay has been a well-to-do hotel keeper at Beauharnois; lately he moved to Valleyfield, where he has not been so successful, having just assigned. He owes \$3,000, which he wishes to compromise at the rate of 25 cents on the dollar.

LETTERS patent have been issued incorporating 'The Owen Sound Dredging, Towing, and Wrecking Company" with a capital of \$40,000. The Provisional Board of Directors consists of Mr. S J. Parker, President; Mr. D. A. Creasor, Vice-President; Mr. D. Morrison, Secretary; and Mr. Ed. Todd, Treasurer.

THE United States peanut crop, now approaching maturity, will, it is said, be the largest ever gathered in that country. The general estimate places the yield at 3,500,000 bushels, while some dealers expect that it will not fail far short of 4.000,000 bushels. The largest crop previously grown was in 1881, when it reached 3,000,000 bushels.

WRITING to us from Kingston, under date of August 25th, Mr. H. A. Harback, whose failure we noted in last issue, says. "Since your local correspondent has made the public aware of my "moist" proclivities, will you BUTTONS,

LACE GOODS,

FRILLINGS,

TAILORS' BRANDS.

ETC., ETC. kindly insert the following: In my first failure one of the valuators of my stock, being a tenant of the Sheriff, became a purchaser, my credi-

A LARGE number of coal dealers was in session at Buffalo yesterday. It was there rumoured that an immediate advance in the price of coal is to take place.

Ar a recent meeting of the creditors of Bogue, Brault & Co., wholesale dry goods, Montreal, the insolvents made an offer of 40 cents on the dollar. The liabilities are about \$35,000.

THE Welland Canal is to be dredged to uniform depth of fourteen feet. The work, which, we understand, is to be commenced at once, will be completed about the middle of 1886.

THE cargoes of the three smuggling schooners, Marquis of Lorne, Viking, and Ardora will be disposed of at auction in Quebec to-morrow. The total value is in the neighborhood of \$20,000.

THE Coal Shipments from the Port of Pictou for the week ending August 23, are as follows: Halifax Co. 8,061 tons, Intercolonial Co. 2,286 tons, Acadia Co. 2,458 tons, Vale Co. 216 tons. The total for the week is 8.021 tons, and total to date 96,180 tons.

A special general meeting of the shareholders of the Canada Cotton Co., has been called for Sep. 10th, to authorise the issue of \$250,000 of debentures, secured by mortgage on the mill premises, and to provide for the redemption of existing debentures.

THE directors and shareholders of the St. John Cotton Company met together on Monday of this week for the purpose of considering the best means for raising funds for the prosecution of the Company's business. A committee was appointed to attend to the matter.

MADAME JULIE FOURNIER, trading at Chambly, Que., under the name of J. A. Maurice & Co.,said Maurice being her husband-has assigned. Liabilities about \$6,000, assets about \$5,000. Maurice has been in business for some twenty years, and has been markedly unfortunate, having failed at least twice before.

Ir is intended to increase the capital stock of the Black Diamond S. S. Company of Montreal. to \$500,000, and a meeting of shareholders is called to sanction a by-law to this effect. The Company has two fine new steamships running between Montreal and lower province ports, and is meeting with a considerable degree of success.

PORT PERRY is making laudable endeavors to efface the ravages made by the late fire. The town's folk are rebuilding at a rapid rate, the erections being mostly of brick and of a substantial character. It is earnestly to be hoped that the authorities have learned a lesson from the recent disaster and will take immediate steps to provide an efficient water service for the extin_ guishment of fires.

THE Northwestern Lumberman says the prospect is that there will be more railroads constructed in Dakota, Nebraska, Montana and Wyoming during the next two years than there ever were before. The Chicago & Northwestern, the Chicago, Milwaukee & St Paul, the Chicago & Rock Island, the Illinois, and other companies have projects that will out Dakota and the other regions named through and through with railroads.

The following are among the dissolutions of the week:-Edward Plant retires from the wholesale glass and oil firm of Parsons & Co., Ottawa, C. E. Parsons and R. O. Smith continue under old style. In Toronto Mr. E. C. McClung has joined Messrs Jas. Brayley & Co's. millinery house; the style will now be Brayley, McClung & Co. The firm of McDonald, McNally & Co. has been dissolved by the withdrawal of Mr. P. J. McNally, Mr. McDonald will continue alone.

WHAT is described by the Yarmouth Times, as being the finest steamer ever built in that country has just been launched by the Burrell-Johnson Iron Company. The new vessel is owned by the Anglo-French Steamship Company and is to ply between Halifax and St. Pierre et Miquelon via Cape Breton ports. Her dimensions are 154 feet keel, 27 feet beam, 17 depth of hold and about 428 tons register. She will be classed A 1 for eleven years in English Lloyds.

LATEST reports from two hundred hop growing towns in New York, Maine, and Quebec indicate the crop at least one-fourth short, but this is believed to be an under estimate. The average for Maine is 78, Vermont 80, Quebec and New York 70. Buyers have been offering 25 to 30 cents per pound, but growers are confident of higher prices, and are disposed to hold for 35c. to 50c., especially in New York, where 40c. and even 50c. has been offered in a few instances for new hops. The new crop is said to be of an extraordinarily fine quality.

As indicated by the following comparative statement of imports and exports, Port Hawksbury (N.S.) appears to have been making encouraging advancement during the last eight

Year.	Exports.	Imports.
1877	89,909	23,575
1878	21.556	24.754
1879		19,869
1880		10,129
1881	61 520	15,150
1882	88 804	13,403
1883	119 4 4 5	17,176
1994	110,440	17,176
1884	.250,868	41,150

Exception is taken to a statement, which appeared in our issue of the 15th, referring to the monetary affairs of Mr. John Cunningham, Duart, Ont. His solicitor, while not denying that Mr. Cunningham speculated in grain in Chicago, assures us that he lost no money thereby. This we are glad to know, for the experience of most men, who are rash enough to dare the "ups" and "downs" of Chicago grain speculation, has been unhappily, the very reverse. We regret that a wrong impression should have arisen from the paragraph in question.

FROM a maritime exchange we learn that since the suspension of Messrs. Parks & Son's Uotton Factory and the stoppage of a large part of the machinery in the St. John Cotton Company's mill, a great many of the English operatives, who were able to do so, have gone back to England. There is yet a number of these people who want to return, but not having the means to do so, are unable to go. The local government has been asked to aid them. A Bedford, Mass., firm has offered employment to 60 of them provided they are competent hands.

THE new C. P. R. elevator, which stands at the entrance to Owen Sound harbor, was completed a few days ago. The merchants of that town presented Mr. J. W. Ross, the gentleman who has had charge of the construction, with a handsom gold watch as a token of their satisfaction. The watch bore the following inscription, "Presented to W. J. Ross, by Owen Sound friends, on completion of C. P. R. Elevator, August, 1884. The elevator is ranked as one of the first in the Dominion: it has the facilities for elevating grain at the rate of 8,000 bushels per hour.

AT the annual meeting of the St. Croix Cotton Mill Company, of St. Stephen, N. B., held on Wednesday last, the statement presented showed that the sales during the year had amounted to nearly \$500,000 and the output of some lines of goods had been found inadequate to the demand. Although the business of the year has not resulted in any profit yet, the stockholders have ed the action of the directors in issuing \$181,600 worth of stock. The old board was re-elected.

Between August 12th and 16th the shipments of Sugar by the Moneton Refinery amounted to 1.700 bbls.

A commission agent in Halifax, W. D. Bently is reported to have left the city owing sundry accounts, for which writs have been issued. The Sidney & Louisburg Railway Co., is the largest creditor.—W. F. Shedd a lobster packer, in that city and Pictou, has assigned.

In the North West there are a few failures to note this week. M. G. McLean, general storekeeper in Calgary, assigned some ten days ago. He claims to have a stock of \$6,000 and book debts \$2,000 with which to pay liabilities of \$7,000. The creditors will probably wind up the estate. -G. C. Reid & Co., general store-keepers, of Keewatin have also assigned with liabilities of \$2,800 and assets slightly in excess of this sum. -About a week ago we noted the embarrass. ment of T. H. Jones, a fish dealer in Winnipeg. He is now endeavoring to effect a compromise.

THE City of St. Thomas furnishes the principal failures this week, there being no less than three to record. Chas. C. Hackett, dealer in gent's furnishings, etc., who began business in March last, under the style of Hackett & Co., has already assigned.—The hardware firm of F. C. Paulin & Co., has asked an extension of one year without interest or security. It is thought that this offer will be accepted .--**G**. L. Howell a grocer is the next on the list. His statement of assets and liabilities has not been prepared but the failure, it is expected, will be a bad one. The trouble in this case seems to be due to an ambition to become an extensive landed proprietor. Mr. Howell is not the first trader to suffer loss from this cause.

A TRADE sale of 100,000 dozen pairs of hose and 50,000 dozen gloves was held in New York last week. The gloves did not bring as good prices as were hoped for. Ladies' Taffeta gloves, in navy and slate \$2.40 and \$2.60 a dozen, black of the same quality brought \$3.80. La Ristori silk gloves were not much sought after and commanded only \$2.50 per dozen. Full regular fancy liste sold \$3.50 a dozen, while silk clocked goods from \$3.40 to \$3.50. English Vigogn half hose \$2 and the better qualities \$3.30 to \$3.60. Merinoes were below these figures. Gentlemen's gloves were slow of sale at low prices. White Berlin campaign gloves went at 95 cents a dozen, and the same quality in blacks only 521 cents. Gentlemen's cashmeres from \$2.85 down. There were few buyers for wool cuffs and mufflers and the prices paid decidedly low. Some ladies' cashmere gloves brought from \$1.50 to \$1.70. The low prices are attributed, it is said, to an overstocked market.

AT a meeting of the creditors of the Ontario Car & Foundry Company held in London on the 21st., it was moved and carried that the assignee close up the affairs as soon as the orders on hand have been filled, or within six months in any event. The assignee and committee may, if they find it to the material benefit of the creditors, close up the Company in less than the prescribed time. Mr. Muir has been asked to make a cash offer, or its equivalent, within sixty days. The assignee's statement shows liabilities of \$294,781 composed as follow: Federal Bank over draft, \$17,432; Ontario Car Co., paper \$100,000; discounts, \$122,595; bills payable, \$35,342; open accounts, \$19,412; total, \$294. 781. Assets. open accounts, current and good, \$14,638: open accounts doubtful and slow, \$58,808; dump cars (21) leased, \$9,800; street cars (10) in stock, \$6,700; material on confidence in the future. The meeting confirm- hand at car works and foundries, \$125,000;

paper under discount, \$122,595; capital paid up \$201,600; invested in real estate, buildings, tools and machinery etc., \$150,000; total assets, \$482,086,00.

STATISTICS of the foundry and engineering shops known under the name of Krupp's Works, at Essen, make known that in 1860 the foundry employed only 1,764 men; in 1870 the number had increased to 7,084; to-day some 20,000 are employed. There are 29,000 souls who actually reside in dwellings attached to the works, while the number of furnaces in blast is 11, and of other smaller furnaces 1,542. There are 439 boilers, 82 steam hammers, and 450 steam engines, representing a total of 185,000 horse power. At Essen alone there are nearly 37 miles of railway lines, 28 locomotives, 883 waggons, 69 horses, 191 carts, 40 miles of telegraph line, 35 stations, and 55 Morse instru-

which certainly cannot be applied to the author of the following scurrilous letter:

St. Thomas, Ont., August 23rd 1884.

To Cobban Manufacturing Co., Toronto, Ont.
Yours of the 22nd., with money returned to hand. I think to use a vulgar expression you are just a little fresh, I want you to destinctly understand that I am not by any means, in the family way to your house. You can make your family way to your house. You can make your terms anything you like, it makes no difference to me. I never requested your travler to call on me there are lots of other houses in Canada, that there are lots of other houses in Canada, that have always paid one hundred cents on the dollar, that are gentlemen to do business with and do not asume any cockey airs. It would be well for you to understand that people do not care a d—what your terms are all they want is to be treated white and as other people treat them. Enclosed please find the money returned with 24c. extra and if you will keep your hand on your head untill I remitt you the 75c. which I do not owe it certanley will be warm. not owe it certanley will be warm.

Yours respectfully,
N. WEBB.

This man, we are told, has been in the habit of purchasing from the house in question, small bills of goods, the aggregate of which would not exceed \$40 per annum. He knew perfectly well the terms upon which the goods were sold-3 per cent. or 3 months—but preferred, with the utmost sublimity of impudence to make it 5 per cent. and invariably settled on this basis. He had been written and spoken to without avail, until patience ceasing to be a virtue, his last remittance was returned with the request that the proper sum be forwarded. His reply may be read above. The Company should make him a present of one of its hand-mirrors in which he will see, or then we are very much mistaken, not only a very fresh-to use his vernacularbut a very vulgar fellow.

CANADIAN CREDITS IN ENGLAND.

Commercial associations in England complain of the conditions of Canadian credit, as experienced in its influence on that country. They say English creditors do no: pracically stand on the same footing as Canadian creditors; and they make urgent demands for the re enactment of a bankrupt law. On the 15th inst., Sir Leonard Tilley, in the Exchange Buildings, at Liverpool, received a deputation of Liverpool, Manchester and Bradford Exchanges, when the subject was brought forward, Mr. Richard Lowndes complained that, since the repeal of the Canadian banks upt law, in 1879, it had become impossible for English creditors to ascertain their footing in relation to insolvent debtors. The best commercial lawyers found the conflicting laws of the several provinces too much for them. Creditors at a distance thought they fared worse than others, at the hands of dishonest debtors. The preferences which Canadian creditors get, the president contended, ought to be rendered illegal; and provision for the prompt and equitable distribution of the assets of insolvent traders should be made. Sir John Macdonald, when in England, in 1881, had admitted the necessity of preventing preferences. But the Dominion Government was then looking to the result of the intended legislation, in England. The Ontario law for the prevention of preferences, Mr. Lowndes said, had been well received in England; but the state of the law in the Maritime Provinces was most unsatisfactory; under these laws occurrences took place which threaten seriously to affect the trade between Great Britain and that part of Canada, by leading to the withdrawal of many from the trade and the discouragement of others. The deputation was of opinion that the proper remedy was to be found in a well considered bankrupt law.

The views of the president were enforced by other members of the deputation. Mr. Coke described as successful the experiment for which Sir John Macdonald had been waiting. "They would all agree," he said, "that the new English Bankrupt Act was the most satisfactory one yet introduced." The complaints of its working, he said, "arose from the lawyers who did not get have," and especially called upon Sir Leonard Tilley to bear this in mind, in any consideration he might give to the new English Act.

Sir Leonard Tilley reminded the deputation that the Canadian Bankrupt Act became so unpopular that both parties voted for its repeal, and he did not encouarge the expectation that the present parliament would consent to re-enact it, but he was ready to say, "that if it were in the power of the Dominion Parliament to propose a law for the distribution of assets, there would be a majority in favor of it." This implies a doubt about the right of Parliament to enact a law, merely dealing with the distribution of assets, though it has express power to pass a bankrupt law. Sir Leonard however, did not dwell upon this doubt; he merely touched on it, in the slightest way. And he promised that, on his return to Canada, he would "bring before his colleagues the strong expression of opinion, both in London and Liverpool, in favor of the enactment of a Bankrupt Act, and the grounds upon which an appeal was made for such a measure." He went further, and expressed the hope " that they might see their way to enact such a law as would give protection to the creditors and an equal adjustment and distribution of assets." This leaves Sir Leonard's opinions and intention somewhat doubtful. If Parliament is disposed only to enact such a law as, in his opinion, it has not the power to enact, it is difficult to see how the remedy is to come, either the doubt about the competency of Parliament in the premises must be removed, or the Government must use its influence to secure the enactment of a bankrupt law, in contradistinction to a law for the distribution of the assets of insolvent estates. In either case the subject is, from Sir Leonard's point of view, beset with difficulties, and the only hope is that some means may be found of causing the difficulties to vanish.

The deputation also took objection to the form in which many Canadian duties are levied. The president of the Liverpool Chamber of Commerce took the ground that ad valorem duties enabled "dishonest traders to defeat the more scrupulous by undervaluing their goods." The frauds were almost impossible of detection. A rise or fall of prices altered the proportion of the duty to the value; but this difficulty, he suggested, could be overcome by readjusting the duties from time to time. When Mr. Lowndes described that as the greatest difficulty to which specific duties give rise, his point of view was exclusively that of the trader. He overlooked the fact that the consumer, for whose convenience the trader exists, has his point of view too, and that it is one that concerns the equity of the incidence of the tax. The complaint that specific duties bear no fixed relation to the value of the articles on which the duty is put; that the consumer of low priced goods pays a greater tax in proportion to the value of what he buys, is well founded, and as the poor man buys the cheap article, the tax falls with greatest weight where the strength to bear it is least. The convenience of specific duties is not denied, but it is balanced by their injustice. That injustice is

perpetrated under the ad valorem form are incidents which are present 31.3 honest trader presents a fraudulent' invoice. There are practical difficulties in both forms of duty. The Canadian tariff is not confined to either form but makes use of both. Sir Leonard Tilley thought the customs' department would not object to substitute specific for ad valorem duties. But specific duties, had, he thought, been carried as 'far as possible; for when there was a difference in the value of the articles, such as cottons, specific duties were unfair to the poor man. In the case of iron, the same objection, he said, would not lie; though he must know that all kinds of iron are not of uniform

The interview of this influential deputation with the Canadian Minister of Finance may possibly bear fruit, in the shape of some legislation dealing with bankrupt estates. Such legislation is not less called for by Canadian than by British creditors; a fact which would seem to show that the extent of the preferences given to Canadians is exaggerated. The difference between the Canadian and British creditors lies in the form of the law which they are severally desirous of seeing enacted. The Canadian Boards of Trade ask for a law for the equitable distribution of bankrupt estates merely. In asking for any law for equitable distribution they declare their willingness to be cut off from preferences of any kind. The British Chambers of Commerce desire to see a bankrupt law enacted, and so far as they have indicated any preference, it has been in favor of the present English law. It is certainly a remarkable circumstance, if Canadian creditors are getting undue preferences from Canadian debtors, that they should desire the enactment of a law that would render such preferences impossible. Either form of law would have this effect, the bankrupt Act which English Chambers of Commerce prefer, or an act for the distribution of insolvent estates without a discharge clause. Sir Leonard's promise, such as it is, seems to have reference to a bankrupt law, with the discharge clause, possibly on the assumption that this is the only one Parliament is competent to enact.

TEXT OF THE BOUNDARY DECISION.

The judicial committee of the Privy Council, while holding that the award of the arbitrators is not binding in the absence of the necessary legislation, finds "so much of the boundary lines laid down by that award as relates to the territory now in dispute between the province of Ontario and the province of Manitoba, to be substantially correct, and in accordance with the conclusions which their lordships have drawn from the evidence laid before them." A definition of the western and something less than half the northern boundary then follows:

"That upon the evidence their Lordships find the true boundary between the western part of the Province of Ontario and the south-eastern part of the Province of Manitoba to be so much of a line drawn to the Lake-of-the-Woods, through the waters eastward of that and west of Long Lake which divide British North America from the territory of the United States, and that pull out of the estates they used to inherent in this form of duty; but the frauds there through the Lake-of-the-Woods to the

most North-western point of that lake as runs northward from the United States boundary, and from the most north-western point of Lakeof-the-Woods a line drawn due north until it strikes the middle line of the course of the river discharging the waters of the lake called Lake Seul or the Lonely Lake, whether above or below its confluence with the stream flowing from the Lake-of-the-Woods towards Lake Winnipeg, and their Lordships find the true boundary between the same two Provinces to the north of Ontario and to the south of Manitoba, proceeding eastward from the point at which the beforementioned line strikes the middle line of the course of the same river last aforesaid to be along the middle line of the course of the same river (whether called by the name of the English River or as to the part below the confluence by the name of the River Winnipeg) up to Lake Seul or the Lonely Lake, and thence along the middle line of Lake Seul or the Lonely Lake. to the head of that lake, and thence by a straight line to the nearest point of the middle line of the waters of Lake St. Joseph, and thence along that middle line until it reaches the foot or outlet of that lake, and thence along the middle line of the river by which the waters of Lake St. Joseph discharge themselves until it reaches a line due north from a line drawn due north from the confluence of the Rivers Mississippi and Ohio which forms the boundary eastward of the Province of Manitoba."

No opinion as to the necessity of con-current legislation by the Dominion of Canada and the provinces of Ontario and Manitoba, is expressed, but the passing of an act by the Imperial Parliament to make the decision binding and effectual, is recom-The Crown, acting on the advice mended. of the Privy Council, approved their lordships' report.

The most north-western point of the Lake of the Woods is one which cannot be difficult to find; and that point once settled, the line is to be drawn due north until it strikes either English river or Winnipeg river, for it is not known, in the absence of a survey, where it will strike. The English river is an affluent of the Winnipeg, and the junction makes something like a right angle. But whether the line strike below or above the junction, it is to follow the middle of the stream to Lake Seul or Lonely Lake, through the middle of that lake to its head, when the height of land between the watercourses that discharge into Lake Winnipeg, and those which flow into James' Bay, is reached. Over the portages to the middle of Lake Joseph, the line is to take the shortest course; the middle of Lake Joseph to the point of discharge into Albany river is to be followed; thence the line to be followed is the middle of Albany river "until it reaches a line due north from a line drawn due north from the confluence of the rivers Mississippi and Ohio, which forms the boundary eastward of the province of Manitoba." And there the delineation ends. So far the due north line of the Quebec Act is recognized; but it skips Ontario, and is only made to do duty to the north of that Province, when it becomes the eastern boundary of Manitoba. Manitoba gets, in this way, an extension on the east, of some seven This due north degrees of longitude. line, if continued to Hudson's Bay, would strike that water some fifty miles east of the mouth of the Severn. Ontario gets sub-

the west, and incidentally she gets a definition of something less than half the length of the northern boundary. The territory thus secured is not the widest part of that in dispute, but it is the best.

This country definitely becomes acknowledged as a part of Ontario just at a time when it is being made accessible by the construction through it of the Canadian Pacific railway. Branch lines will, in time, when the nature of the country and the progress of settlement warrant the outlay, be built in various directions. This extensive region contains innumerable lakes; the soil varies from good to muskeg, and the timber from good merchantable to poor and small; there are many possibilities in the way of minerals. Many parts of this region are more than a thousand feet, some fourteen hundred feet, higher than the mouth of the Albany river; and the Arctic flora sometimes found to the north of Lake Superior, is due to the fact that every 300 or 400 feet of elevation is equal to one degree further We do not concur in the opinion north. that the country is worthless; but allowing that a good deal of it answers this description, there must be a large area capable of being put to economic uses, and ministering to the wants of man.

THE HARVEST.

For two or three weeks past, the satisfactory nature of the current harvest has been a topic of general remark. The yield of wheat, which is unusually good in Ontario, has, in the popular estimate, seemed to overshadow that of every other cereal. But there is no serious shortage any where, and the harvest may, it appears, be generally regarded as an abundant one. The Ontario Bureau of Industries has made a summary of the probable yield, and sends us a bulletin, dated the middle of August, from which we take the following:

The total yield of grain in Ontario for 1884, according to the conclusions of the Bureau, was 113,710,600 bushels, taken off 4,448,785 acres land, as compared with 108,-043,977 bushels cut from 4,588,909 acres in the previous year, a gain of 5,666,623 bus. hels on an acreage 140,000 less. average of 20 bushels of wheat per acre is gratifying, surpassing as it does the census year, and the estimated Ontario average drawn therefrom. The fall wheat, says the bureau, shows 211 bushels to the acre and the spring wheat 18 bushels, the total quantity of wheat exceeding 1883 in the proportion of 31,730,340 bushels to 21,370,-068 bushels. Barley, though sown somewhat less broadly, shows a rather better yield per acre, and nearly 18 millions of bushels are expected, against 18½ millions last year. The grain is heavy, but in certain districts somewhat dark in color. upon fifty million bushels of oats are expected, as compared with fifty-four and a half millions in 1883. It is not unlikely, considering the good effect of late rains in July, that this crop may "better expectation." The acreage of rye is limited, and the expected crop not much more than half that of 1883. Peas are a good crop, a "bountiful crop" says Mr. Blue, the pea bug having

We append the table of probable yield for the two years.

	1884	1883
	Bushels.	Bushels.
Wheat	81,780,844	21,370,068
Barley	49,383,000 1,630,417	18,414,337 54,578,609 8,012,240 10,678,728

"The hay crop was injured to some extent by the frosts of the last week in May, and more seriously by the drought of June. The yield is seriously by the drought of June. The yield is estimated at 3,044,912 tons, or about 1,000,000 tons less than last year. The appearance of the estimated at 3,044,912 tons, or about 1,000,000 tons less than last year. The appearance of the corn crop is not promising, due partly to inferior seed, and partly to the low temperature prevailing throughout June and July. The fortune of the crop depends on the weather of August and September. The area planted is 174,834 acres. Beans have suffered from the drought and the cool weather and they will mature a and the cool weather, and they will mature a week or ten days later than usual. The plants, The plants, however, are strong and healthy, and being well loaded a good crop is likely to be gatheredloaded a good crop is likely to be gaunered—him estimate being 552,953 bushels from an area of 24,877 acres. The reports of the root crops are generally favorable. Potatoes are excellent, and mangolds and carrots are fairly good. Turnips made slow growth at first, owing to the dry magather but the recent rains have been very weather, but the recent rains have been weather, but the recent rains have been very beneficial. The area in potatoes is 168,862 acres; in mangolds, 18,341 acres: in carrots, 10,980 acres; and in turnips 104,108 acres. The total area in roots is 302,291 acres, or about 8,500 more than last year."

NEWFOUNDLAND TRADE.

A good deal of attention has lately been directed to Newfoundland in connection with the important railway enterprise recently projected there. The traffic upon that portion of the line already completed, both with respect to goods and passengers, exceeds, we are told, expectations; and it is anticipated that the portion from St. John to Carbonear, 80 miles, will be finished this year. As to the population of the country to be served by this railway, we learn that while St. John's is close upon 30,000, that of the districts and towns, which the road will put in connection with the capital exceeds 40,000. It is English capital, it appears, which is building the line, and the statement is made that "the Newfoundland Railway has passed from the hands of the American syndicate, which obtained the charter, to those of the English bondholders."

While it is true that the exports of Newfoundland consist most largely of fishery products, it is also true that mining and agriculture are growing industries. Although it may be the case to-day, that, as in a previous century, Newfoundland is known to the average reader as

"Some place far abroad,

Where sailors gang to fish for cod." its capabilities of export include other things than fish and their products. A recent statement of the outwards trade for the year ended with the 1st of July, 1883, given by a correspondent of the Montreal Gazette, shows that the policy of the present Government takes the direction of developing the other resources of the island, so as to provide for the increasing population. "The country is more prosperous than it has ever been previously, and the people, as a whole, are in more comfortable circumstances. Home industries have been fostered and are rapidly advancing; a railway, now in course of construction, will open up the fertile lands for settlement; the splendid dock, advancing rapidly towards completion, will greatly prostantially, all that was awarded to her in done much less harm this year than usual. mote the interests of the capital, and mining

industries are extending." The latest annual statement, issued last month by the Chamber of Commerce at St. John's, gives the value of exports at £1.997.698 18s., equal to \$7,996,795, as compared with an average value of \$7,661,000 for the three years preceding. The items are as under: EXPORTS FOR THE YEAR ENDING JULY 1st, 1883. 1,232,822 qtls. dried codfish 23s. £1,417,745 800,350 seal skins, 5s...... 4,266 tuns seal oil, £33.... 75.087 10 0 140,778 0.0 102 " whale oil, £33... 3,489 cod oil, £34... 118,626 0 0 284 " refined cod-liver oil, £64 ... 1.666 11 tuns other oil, £32... 13 " cod dregs, £15... 61 " cod blubber, £4 352 0.0 195 0.0 244 4,319 tres. peld. salmon, £5 23,000 lbs. do., in tins, 7d. 21.595 0.0 670 16 8 257,600 lbs. frozen ditto, 6d. 6,440 84,842 bls. p. herring, 17s. 6d. 13,150 bls. frozen ditto, 5s. 74,236 15 0 3,285 0 0 15,100 bis. irozen ditto, os. 1,576 "pickled trout, 40s. 627 "eod roes, 15s... 276 qtls. dried haddock 18 7,774 lbs. whalebone, 7s. 6d. 8,152 470 5 0

> 20,424 £1,997,698 19 0

248 8 0

4 0 0 0

2,915

21 568

64,275

Or.....\$7,996,795 84

Of this total, six millions in value at least consists of the flesh or the products of the codfish; the contribution made by mackerel and halibut being very trifling. Sealskins are a prominent item and seal oil even more so. Pickled herring, salmon and trout constituted half a million dollars' worth of the exports, copper ore and regulus about a quarter million. For purposes of comparison it may be well to append the value of exports from Newfoundland for recent years:

862,528 lb. p. lobster, in tins 6d

12,855 tons copper ore, £5..

425 tons regulus, £12.. Unenumerated articles

18837,996,795 18828,228,291 18807,131,095 1870 6,984,543

The exports of the colony are thus increasing but slowly. Yet they are becoming more varied; and though they do not grow in as rapid a ratio as that of the increase of population, there are encouraging signs of the development of the island and of stimulus to what have hitherto been its dormant resources.

-The Lumber Manufacturers' Association of the North Western United States, has been discussing, at Chicago, the question of over-production. The stocks of lumber and logs are unquestionably greater than they were a year ago; and present prices leave very little profit. The meeting refused to bind the members of the association to stop their mills, with a view of bringing about an equilibrium between demand and supply, but it recommended such a course to be taken. The whole situation was discussed with great apparent frankness. The different mills were so differently circumstanced that no general rule could be applied. Some were going to stop for a while, others were not in a position to do so, either having contracts to fulfil or not being able to trust their logs to the force of a spring freshet; some could afford to hold larger stocks than others; and not a few were obliged to sell whenever opportunity offered.

The statistics before the meeting were very incomplete; but the general fact of overproduction was admitted by nearly every one. As to the extent of the surplus, opinions were very divergent; some contending that it was not large, others arguing that it was sufficient to last a whole year and more. It is evident that not only has there been overproduction, but that it will continue for some time. Canadian lumberers were not represented at this meeting, and nothing was said about the ratio between production and consumption, in this coun-There can be no doubt, however, that a state of things similar to that existing in the Western States, would be found here. When production outruns demand, the true remedy is to slacken off till stocks are brought down to a manageable compass.

-As bearing on the sufficiency of the Government loan to enable the Pacific Railway Company to complete the work of construction, is the fact that Mr. Van Horne has seen occasion to revise the original estimates of the cost of the Rocky Mountain and Lake Superior sections. is no doubt that the Chief Engineer of the company, after recent examination, has come to the conclusion that the estimate of the original cost was put much to high. And Mr. Van Horne is not the only engineer by whom this opinion has been expressed. The first estimates were made by the Government; and whether it be that a private company can do the work for less money than the Government, which may be taken as certain, or that there was an over-estimate at first, or both, the present announcement is a hopeful feature. First estimates fall short of the mark much oftener than they prove too high; and surprises like the present are rare. A like surprise did, however, come, when the Victoria bridge approached completion; a repetition of that piece of good fortune will be most welcome.

-Six hundred stalwart Canadian boatmen are wanted by the British Government, for the expedition which is to go to the relief of Gordon. During the Red River rebellion, General Wolseley learned the use of these men, in the kind of service now required in Egypt, and no doubt it is upon his advice that the demand is made. French Canadians, or Indians, were asked for; and French Canadians will, for the most part, be sent. The number required can easily be obtained; and no doubt they will render essential service to the expedition which they are required to join.

-The Qu'Appelle Valley Farming Co. is trying the experiment of farming on a large scale. The farm, which is best known after the name of its manager, Major Bell, as the Bell farm, has 5,000 acres of wheat under crop, 2,000 under oats, and 500 of flax. Altogether there are 7,500 acres under crop, and next year it is expected that there will be over 10,000 acres. On the farm is being built an elevator with a capacity of 50,000 bushels. This experiment of farming on a large scale, and with the advantage of all the appliances which capital can give, will be watched with interest.

-Messrs. D. Morrice & Co., have exported to order 500 bales of Canadian cottons. The price obtained is said to be a little higher than the lowest received in Canada. This transaction, we fear, cannot be taken as evidence that Canada is in a position to meet the competition of the world in neutral markets. If this were the case, the surplus stocks could easily be disposed of; protection would have done its work, and henceforth free trade in cotton goods would be possible. What is necessary to know, in connection with this transaction, is whether the price obtained is one for which cotton can be manufactured and a living profit made. If the sale is not made on a sacrifice market, this outlet might have been found before, and accumulation of stocks prevented; if it is, as it almost certainly is, the transaction may be a necessity and a convenience, under the circumstances, but it is not one that can fairly be quoted as proof that Canada can meet the competition of the world in cotton

Last year, the State of Connecticut taxed 27 life insurance companies no less than \$1,-312,853. Three Connecticut companies, the Ætna, the Connecticut Mutual and the Phoenix, have paid other State taxes than those of Connecticut since 1874, the enormous sum of \$1,633,174, which, added to what was paid to their own State, makes a total of \$4,711,495. The taxes paid by the 27 companies to their own State now average about 2 per cent.; the fluctuations being from less than 1 to 15 per cent. These taxes fall upon the companies as far as they affect contracts existing when the taxes were imposed. otherwise they fall upon the insured, and act as a discouragement to thrift and foresight. The pernicious tendency to raise a large proportion of the revenue on commercial corporations, which exist in several States, shows that the State taxation too often takes the indirect form, doubtless because, in that form, revenue can be raised with the minimum of popular objection.

-The Monetary Times has already shown that the transcontinental railway which will get the cream of the through traffic between Europe and China and Japan must be prepared to do it on the best terms. It is now announced that the Canadian Pacific Railway Company will put itself in a position to become a formidable rival for this traffic; and with that view will put on steamers between the Pacific terminus of the road and China and Japan. This enterprise will contribute to success in this rivalry. nature of British and American commercial treaties with China and Japan will have some bearing on the course which the trade will take. It is not always advantageous for railway companies to own steamers—generally perhaps it is not-but the conditions of competition seem to favor that course, in the present instance.

-That the Canadian Pacific Railway will be completed by the 1st January, 1886, continues to be confidently and authoritatively asserted. When that is done, it is not improbable that the Sault Ste. Marie section, from Algoma Mills, will be added. An

American road is now being pushed eastward in the husband, who, in such a case, is not likely members and associates, will be conveyed by to the Sault, an enterprise which would have no adequate object unless there were a prospect of the extension of the Sault branch of the Canadian Pacific. But this is something in the future. Interest centres in the completion of the Canadian Pacific Railway proper; what supplementary work may be done afterwards has little present interest for Canadians.

SEDUCTION.

The proposal which has been so often discussed in the Dominion Parliament to make seduction under certain circumstances a criminal offence has attracted considerable attention to the subject. Whether that course is the proper remedy is a matter of doubt, but that some change in the law is necessary, must be evident to everyone. Seduction, unless coupled with a promise of marriage, entitles the party really offended against to no redress whatever in the eye of the law. The actions for seduction, so frequently brought into our courts, are all instituted by the parent or other guardian of the unfortunate victim. Their right to recover is based upon the theory that by what has taken place they have been put to pecuniary loss by reason of the inability of the person se duced to do her accustomed work and perform her accustomed service. True, the jury in awarding damages is not bound to pay strict regard to the actual amount of loss thus sustained, and as a matter of fact takes the sentimental part of the case largely into its consideration in estimating the damages.

While this is true, the loss of service is the only legal foundation of the right of action, and if the circumstances are such that there could have been no such loss the action cannot be maintained. This point is exemplified in a recent decision by the Common Pleas Division of the Ontario High Court of Justice where the plaintiff, who sought redress in the girls interest, was her grand uncle. It appeared that her father and mother had died when she was about twelve years of age, when she went to live with the plaintiff, and that as soon as she was able to perform demestic service she went from there to various persons, and was at the time of the seduction at service, a situation which she had occupied for three years previously. At the time of the offence she was about nineteen years of age. After the seduction she left her situation, went to Detroit for a couple of weeks, and then returned to the plaintiff's home, where she resided until her illness, when she went to an hospital where the confinement took place. While with the plaintiff she worked as one of the household, did whatever was required of her and was treated as if she were at home with her guardian. Under these circumstances it was held that the plaintiff had no right of action whatever, and of course the girl herself had none. The right of action, if any existed, was said to be vested in the person who was her employer when the offence was committed. Assuming that that person refused, as he might very properly, from his point of view, refuse, to become a party to such an action, it does seem that this is a clear case of wrong for which the law provides no redress.

Another class of cases in which difficulties of the same kind have arisen, is where a girl marries and it is subsequently discovered that she was seduced before marriage, in consequence of which the husband, very properly of course, refuses to continue the conjugal relation. It would seem to be very doubtful whether under these circumstances the right of action against the

to seek pecuniary redress in the interest of one whom he has discarded. The simple remedy for this state of things would appear to be, to endow the victim herself with the right of action. the majority of cases, as they occur, it is true that it makes no practical difference, as the father or guardian secures redress in his name; but this is no reason why that redress should be entirely denied in cases where it happens that there is no one who, in the eye of the law, is entitled to maintain a suit. The whole subject is a deplorable one, but it is one with which every community must grapple in some shape, and there really appears to be no reason why the rules of the law, with reference to it, should not be based upon some rational principle.

DISTINGUISHED VISITORS.

The ordinary summer and autumn travel to Montreal has been, this year, supplemented, and the holiday activity of the city increased, by the gathering in that city, during the present week, of the British Association for the Advancement of Science, and the annual meeting of the Canada Medical Association. The last-named would, of itself, have attracted a considerable number of the medical profession from all parts of Canada, as is usual wherever its meetings are held. But the overshadowing attraction is the concourse of distinguished men, in all branches of science, which the yearly gathering of the former ensures. It is pleasing to know that the bold idea of having this year's gathering in Montreal instead of in some city of the United Kingdom, originated with a Canadian, the Lord Bishop of Ontario. The last president was a well-known mathematician, Professor Cayley, L.L.D., F.R.S.; and the president-elect is the Right Hon. Lord Rayleigh, D.C.L., F.R.G.S., &c., Professor of Experimental Physics at Cambridge, and known in former years as Mr. Strutt. The buildings and grounds of McGill College, the David Morrice Hall, and we believe also the handsome Presbyterian College, have all been allotted for the purposes of the meeting, which will include almost a thousand scientific men, members or associates. The wives and daughters of many of these have accompanied them across the Atlantic, and not a few American and British professors and doctors are in attendance as delegates at the various sections.

In the group of portraits of leading members published in Harper's Weekly we recognize the well-known features of two Canadian scientists, Dr. Dawson, of McGill College and Dr. T. Sterry Hunt, both vice-presidents, while the list of Sectional Officers includes Dr. Daniel Wilson, in Anthropology; Prof. J. Clark Murray, in Economic science and statistics; Dr. Bell and the Abbe Laflamme in geography; Profs. Osler and Ramsay Wright in biology; Prof. Selwyn in geology; Prof. Pike and Mr. Thos. Macfarlane in chemistry; Prof. Cherriman and Mr. Chas. Carpmael in Mathematical and Physical science, names which will be readily recognized in Canadian scientific circles. The citizens of Montreal have made most hospitable arrangements for the entertainment of their distinguished guests. Excursions, either free or at reduced rates, are arranged, in order to give opportunity for visiting Quebec, Ottawa, Toronto and Manitoba. The Government of Ontario, we understand, makes the members of the Association its gues's for a visit to the Agricultural College of Guelph during the coming week, and an excursion party, limited to 300, is to be conveyed free over the Ontario and Quebec road to Toronto. Finally, according to the official

train from Montreal to the Rocky Mountains, free of charge; and, so far has Canadian liberality been carried: "Trans-Atlantic members of the Association, who have not already visited the North-West, and who are not included in the special excursion, may, if they so desire, obtain free passes to the summit of the Rocky Mountains by the Canadian Pacific Railway, enabling them to make the journey by regular trains."

If, therefore, the strangers do not "have a good time," the fault can hardly be said to be ours. The result of this great gathering cannot well be other than beneficial to Canada in affording so many able and prominent men the opportunity of seeing for themselves what Canada is like.

PREVENTABLE FIRES.

Mr. Edward Atkinson, President of the Boston Manufacturers' Mutual Fire Insurance Company is among the visitors to the science meeting of the British Association in Montreal. To this gentleman's thorough and scientific investigation into the causes and prevention of fires, is due the credit of the great reductions effected in the rates of insurance on particular manufacturing risks, which under certain specified conditions his company insures. By patient and laborious work, he first tabulated the losses his company had sustained for a period of 28 years. He then classified, with great care, the origin and cause, so far as known, of each fire, and found that nearly one-half of them was due to spontaneous combustion and the use of broken lanterns. He offered prizes to the students in the Massachusett's School of Technology, for investigation into the comparative danger arising from the different kinds of oils used in mills. Various methods were resorted to in order to solve this interesting question. The most successful experiment was that of saturating pieces of cotton waste with the different kind of oils, enclosing each in a separate metallic case together with a thermometer. Some popular oils were soon proved to be extremely hazardous, while others were found to be comparatively safe—and a few quite safe. Mr. Atkinson took advantage of the knowledge thus obtained and insured such mills, only, as used the non-hazardous oil. Animal oils were found to be the most dangerous and mineral oils the least.

An improved lantern was invented the use of which greatly reduced the number of fires; the old lanterns were at once abandoned. It appeared that many fires occurred during the night when one workman only was employed in making repairs. A rule was at once adopted requiring all repairs during night or day to be done by two workmen at least, on the ground that if there was only one, he could not extinguish the fire and give the alarm at the same time, whereas in the other case, one could give the alarm, while the other attempted to extinguish the incipient fire. This was also found to work satisfactorily in reducing fires. The rule is that one of the workmen must be competent to start the engine and pumps promptly.

One thing was clearly made manifest, that fires were more frequent during the night, and when work was suspended than at other times. The 4th July, thanksgiving day, Christmas and other holidays, were found to be notable for fires. Increased care and vigilance during such times were insisted upon by the mill mutuals. This eminent underwriter recommends strongly the use of wooden doors sheathed with tin, to divide one part of a risk, in a large wrong doer is vested in anyone, unless, perhaps, excursion programme, 150 ladies and gentlemen, upon as being much superior to those made of building, from another. These doors are looked

iron, which are apt to warp with the heat from a large fire. The following is a summary of the rules which are the outcome of Mr. Atkinson's labours.

1st. That the parts of a building should be each as independent as possible, so that fire may be restricted within manageable bounds, and prevented from communication beyond such bounds.

2nd. That floor and roof timbers be solid, open and smooth, so as to burn slowly.

3rd. That floor and ceiling be one solid piece of wood, without concealed spaces where fire may course, or where rats and mice may build nests of oily rags.

4th. That all elevators, stairways and other openings from floor to floor. be cut off by hatches or doors, automatic in their action if possible.

INSURANCE NOTES.

The New England Insurance Exchange has declared war upon oil stoves. The use of gasoline stoves for heating or cooking is absolutely prohibited, and special permits must now be obtained for the use of kerosene oil stove burning in a gaseous form. The oil stoves burning by means of wicks are permitted, as heretofore. The action has been taken in view of the constantly increasing number of fires reported from oil and gasoline stoves. They are considered very hazardous, and their use is not only prohibited in houses but for drying and heating shops.

The General Manager of the Grand Trunk Railway, announces the amalgamation of that Company's Employees' Insurance Fund with the Great Western Railway Provident Society, to be known hereafter as the Grand Trunk Railway Insurance and Provident Society. The employees of both roads who, on the 1st of July, 1884, were contributors to either fund participate in the privileges of the new society. The new society provides a benefit of three dollars a week which includes sickness as well as accident. The benefits payable in case of death range from \$250 to \$2,000, divided into six classes. The directors of the road aid the society to the amount of \$10,000 per annum, while in addition to this there is a balance on hand of \$20,000 to the credit of the old fund which will form a rest for the new organization.

The Hartford Courant tells this story: "A life insurance policy holder who took out a twenty years endowment policy in 1864 had received notice each year, of the time when his annual payment was to be made, and had made nineteen payments. Expecting to make another, he was surprised not to receive a notice, and some of his neighbors told him there was something wrong, and made remarks unfriendly to life insurance generally. He came to Hartford the other day, in hot haste, to see what sort of a swindle he was the victim of. His surprise was very great indeed, when he was told that nineteen payments carried his policy through, though by the terms of the contract, the twentieth payment could be collected, and, in view of this fact, no notice was sent. He had paid up all that could be asked of him, and in December he will receive in cash the face of his policy. He went home very much delighted, and by this time has told his much concerned neighbors that he is only sorry he did not take out a larger policy in the company."

Under the new regulation for Government life insurance in England, a novel experiment is being tried. Insurances for sums not exceeding \$25 are now granted at any post-office savings bank without any medical examination. If,

however, the insured should die before the second annual premium becomes payable, the amount of the first premium and no more, will be paid to his representative; should the insured die after the payment of the second, but before the third premium becomes due, the representatives will be paid only half the amount of the policy. After the payment of the third premium the policy is entitled to full benefit. It is nevertheless provided that in case of death within two years of an insured who has been medically examined, if it can be proved to the satisfaction of the Postmaster-General that the death was caused by accident, the full amount of the policy will be paid.

At the twelfth annual Convention of the National Association of Fire Engineers and Heads of Fire Departments, to be held in Chicago on Sept. 9, the following are among the general topics to be discussed:

What are the advantages to a city of a paid fire department over that of a called and paid fire department combined?

Report a blank form for keeping a statistical record of fires, alarms, losses, insurance; also remarks in regard to the causes of all fires, where known, and recommend legislation on the subject.

As there are many towns without the least sign of preparation for protection against fire, and great destruction is necessarily the result, report an economical plan for such; and should legislation be recommended on the subject?

On the importance of educated men being appointed to positions in paid fire departments; report a plan for adoption.

Is it important that automatic steam pipes should be introduced into extra hazardous establishments, viz, lint rooms in cotton mills, cotton seed mills or drying houses?

What are the essential requirements to constitute an efficient officer in a fire department?

Commenting upon the subject of fire protection the New York Bulletin says :- "Notoriou ly, a majority of the smaller towns and villages of the United States" and these remarks apply with equal force to Canada "are absolutely without any adequate protection in this matter of fire service. And, just as notoriously, these same imperilled towns are always ready to vote down propositions for either fire service or water works, trusting as they do (and have too much reason to do) to thoughtless or friendly insurance managers who are silly enough to insure communities so blind and reckless as to be under serving of insurance. As we have often had occasion to remark, this matter of providing precautions against fire, or facilities for the extinction of fires, does not come within the province of fire insurance companies. Their business is, first, to collect premiums adequate to the risk they run, and then pay losses as they occur. If a community-large or small, city, town or village-provides no method, or no adequate method, of fire extinction, it is for the underwriter to adjust his rate for insurance accordingly, and so on down to the city which, at whatever needful expense, invests money in engines, fire-alarm telegraphs, firemen, etc., up to the full requirements of risk called for by population, area and peculiar manufacturing bazards. All the interest insurance companies can fairly be expected to have in the matter is to make the mean and reckless and improvident community pay the full price for the extra hazard they impose upon property thus foolishly exposed to destruction."

The annual session of the "National Insurance Convention of the United States" will be beld at the Grand Pacific Hotel, Chicago, commencing on Wednesday, September the 24th, 1884, at 11 a.m.

HALIFAX TRADE.

"There are two principal causes for the prevailing dulness and depression ir the trade of this City," said Mr. J. R. Lithgow to a Herald reporter: (1) The over production and consequent cheapness of sugar. (2) Steam by land and by sea, supplanting sailing vessels. The first of these is well-known, as is also its effects upon our West India and fish trade. Germany and France have been producing immense quantities of beet root sugar, which finds its way to England, United States and Canada, taking the place and bringing down the price of cane sugar. As a consequence the West India sugars are being ruined, and the West Indies so impoverished that they cannot buy fish and pay anything like the prices they did a year or two ago. Then, again, although their sugars do not bring near the cost of producing them, they who buy them, our West India merchants among others, cannot sell them at a profit, cannot even make a freight on them for their vessel, hence the fish sent out not paying and the sugar trade leaving a loss, a very bad business is the result, and a place like Halifax so much dependent on a profitable West India trade feels the effects of the existing state of things. Had there been a good demand for West India sugars at paying rates it would have made a vast difference to the trade of Halifax as well as to the West India planters. Halifax to-day feels the effects indirectly of an over production of beet root sugar."

Referring to the second he said: " Nova Scotia trade used to be done by hundreds of ecasters, carrying goods between its numerous ports and P. E. Island, United States, Newfoundland, etc. Nine-tenths of this is now done by railways, and a few steamers. Look at the coals brought to Halifax by rail, formerly freighted by dozens of vessels, many of which took back return cargoes. A couple of steamers running coastwise now do the work that a lot of sailing packets formerly did. So two or three steamers between Halifax and Boston and New York, freight, what would employ a small fleet of schooners. Then again, all the principal places in Nova Scotia have steam communication by land or sea with the whole world, as much so some of them as Halifax. They do their trade independently of Halifax, and we feel the effects of this loss of business."

TO CORRESPONDENTS.

F. & C., Wellington; Will our correspondent please let us know what case he has reference to as having been before the Court of Chancery. We know of none of recent date.

-The conviction of the directors and managers of the Bank of Lyons, which failed nearly three years ago, shows that wrong doers, in that country, are not sheltered by their position from condign punishment. Savary, ex-deputy, and formerly Under-Secretary of State, was sentenced to five years' imprisonment, to pay a fine of 20,000 france, and to suffer ten years' suspension of civil and political rights. He has absconded. Zielenski, the manager, was rentenced to five months' imprisonment, and to a fine of 8,000 francs. Bellantan, the sub-manager, was sentenced to four months' imprisonment, and a fine of 5,000 francs. The rest were fined from one to ten thousand francs. In America, including Canada, this form of crime unfortunately meets greater immunity. The French example is, however, worthy of imitation; for so long as wrong goes unpunished, it is sure to continue to be committed.

-The directors of the Royal Insurance Co'y met together in Liverpool, on the 1st of August, to mentally digest the figures of the annual report for 1883. That the undertaking was a pleasant one no one who has perused the statement of the fire branch will doubt. The net premiums received amount to £982,737, which is a gratifying increase of £38,472, or a profit of £100,000. The losses amount to 61.4 of the premiums or £603,432, a less sum than was absorbed last year. The directors have created what they call a "Conflagration Fund" and to which as a first instalment they place the sum of £200,000, being a part of the amount derived from the increased value of securities. The shareholders need not be surprised if they do not find the next report to show such large gains. The Chairman, in his address, sp. aks of the numerous fires that took place in the early part of this year, many of them of very serious character." He takes anything but a gloomy view of the matter, however, for we find him saying "whatever our losses may prove to be in one year, I am quite satisfied that they will be made up in subsequent years." The exhibit of the Life Department is a good one. The premiums from £403,384 worth of new assurances reached £14,027, which, added to the revenue from policies previously in force, makes a total of £252,879. About 51 per cent. of the premiums will provide for the expenses and the commissions absorb 4.4 per cent. The total funds of this successful Company now stand at £5,245,105 or something over \$26,000,000.

—The Wall Street bank was opend on Monday for the first time since its suspension. As soon as the court orders the resumption of payment, depositors will, they have been informed, receive a portion of their money. It is thought that depositors will eventually be paid in full, while shareholders likely to be partially reimbursed.

-Late dispatches from Vienna announce the failure of a large sugar refiner, R. Weinrich, with liabilities of \$4,000,000. The failure is said to be the natural outcome of the overproduction of beet sugar in Europe.

-A half yearly dividend at the rate of ten per cent. per annum is announced by the London & Canadian Loan and Agency Company.

FIRE RECORD.

ONTARIO.—Goderich, Aug. 24.—The arcade skating rink was totally destroyed by fire tonight. Loss fully covered by insurance in the North British and Mercantile.—London Tp. 22nd.—Kennedy's barn and outbuildings and contents were destroyed by fire, and 1,000 bushels of wheat, 400 of oats, 250 tons of hay, two horses and four pigs were burned. Loss \$8,000 to \$10,000, partly covered in Grange Insurance Company. Toronto, Aug. 25.—The chambers, a large wooden building on the island owned by George Jackson, and occupied by W.

H. Cooper, was burned to the ground this
morning. Loss on building and furniture about H. Cooper, was burned to the ground this morning. Loss on building and furniture about \$5,000. Fully covered by insurance.—Parkdale. 27th.—The losses by late fire here are, Todd, \$1,000, no insurance; R. Hayes. \$1,000, insured in Guardian; Edward's, \$1,500, insured; Jas. Hickey, \$2,300 insured in Western.—Gravenhurst, Aug. 26—A fire completely destroyed McBurney & Co.'s milland lumber yard. Loss on lumber, about \$30,000, mill and machinery \$20,000; insured about \$35,000.—Hamilton, 27th.—Mrs. Jno. Ferries' residence and contents destroyed. Loss about \$20,000; insured in L. & L. & Globe \$5,000 aud \$2,000 in company unknown. Esquesing Tp.,24.—Douglast and in L. & I. & Globe \$95,000 and \$2,000 in company unknown. Esquesing Tp.,24.—Douglas' barn on lot 4 con. 8th struck by lightning and burned with entire crop. Loss, \$3,000; insured \$8 .——Peterboro', Aug. 25.——Peterboro', Aug. 25.——Store of R. Kingan, Griffin's shoe and and arris' pawnshop

burned. Mr. Kingan's loss covered by insurance \$1,000 in Western on building, on stock \$2,000 in London and Lancashire, \$2,000 in Royal and \$2,500 in Fire Assurance Association; Mr. Griffin, \$2,000 in the City of London on stock, Griffin, \$2,000 in the City of London on stock, but Mr. Harris' loss about \$300, no insurance.

—Westminster Tp., 24th—The barn of H. Jones, jr., lot 20, con. 5, was burned to the ground with contents. Loss, \$2,000; no insurance.

—Aldborough Tp., 24th.—The barn and outbuildings of David Widmer, lot 12, 6 con., totally consumed with spagning aroung machinery. totally consumed with season's crops, machinery, wagons, etc. Loss about \$3,500; insured in London Mutual for \$1,500.—Osaca, 22nd.— -Osaca, 22nd. Elliott's grist mill and contents burned. \$10,000 not insured.

OTHER PROVINCES .- Ellshouse, N. S., 24. The sawmill owned by T. Ellenskausen and operated by F. W. Beckman, on the St. Croix river, together with 200,000 feet of sawn lumber and a large boarding house adjoining, was totally destroyed by fire. Suspected incendiary.—Quebec, Aug. 24.—Martinus Saw Mill with contents burned. Loss heavy.—Shediac, N.B., 19th.—James Kelly and Wood Avards houses burned, the former was insured \$800.

THE CATTLE EXPORT QUESTION.

In view of arguments recently employed to secure the shipment from Canadian ports of United States cattle, an extract from the High Commissioner's report to the Dominion Government (just printed by order of the Commons) will prove interesting reading. It exemplifies the difficulty that already exists in retaining for Canada her present excellent position as country entirely free from cattle diseases. T Commissioner says :-

There have been one or two cases in which cattle have been reported as arriving from Canada infected with disease, but on examination the rumors turned out to be without foundation, and Canada remains in the particufew countries from which cattle are received freely in Great Britain, and are allowed to move about with only the same restrictions that are imposed upon English stock.

In August last three cargoes of cattle arrived from Quebec on board the steameships Oregon, Nepigon and Auger Head, and were stopped at Liverpool by the Inspector of the Privy Council, as being infected, it is stated, in the first place, with splenic fever, and subsequently it was reported that Texas fever was the disease from which they were suffering. Having learned that the Privy Council had sent an efficer from London, who had corroborated the report of the Inspector at Liverpool and that the Privy Council had ordered the whole cargo of the Nepigon to be slaughtered on the spot, and knowing that Canada was within measureable distance of being scheduled, I proceeded at once to Liverpool, armed with a letter from the Secretary of the Privy Council, to Professor Duquid, the veterinary surgeon who had been sent from London, and who was there instructed to submit all the evidence for my inspection and furnish me with every facility to examine the whole

Under my direction, half a dozen animals were slaughtered in my presence, and I succeeded in demonstrating to Professor Duquid that they were entirely free from disease.

The cargoes of the two other steamers were

similarly inspected and with the same result.

similarly inspected and with the same result.

I requested Professor Duquid to send an amended report at once to London, and having returned to London that night, I met the Secretary of the Privy Council early on the following morning, and after a full discussion of the whole question with him and averaged vectors. the whole question with him and several veterin-ary authorities of the Privy Council, an order was sent, cancelling the previous one and freeing all three cargoes from any restrictions.

Mr. Peel, the Secretary of the Privy Council, Mr. Peel, the Secretary of the Privy Council, thanked me warmly for the personal attention I had given to this important matter, and expressed himself as much gratified by the result. A case was also reported during the last year in which some cattle from Canada were stated to be infected with the foot-and-mouth disease at Bristol.

Enquiries, however, into this matter, elicited the fact that the animals were passed as being in good order at Liverpool, and that they were deposited, on arrival in Bristol, in a yard in which some beasts from Ireland had previously been placed, and it was in this way that the Canadian cattle caught the infection.

It has been reported that Canadian sheep affected by scab, have been found in some car goes that have arrived. I believe, however, it is the fact that these were rejected and refused to be passed by the veterinary inspector at the port of Montreal. But it happened that there was no impediment to their being imported to the United States. They were, therefore, sent to Portland, and from that port shipped as Canadian sheep; the port of exportation being, however, from the United States.

Considering the exceptional position in which Canada is placed at the present time, with regard to the exportation of animals of all kinds to Great Britain, it becomes a matter of national importance that every care should be taken both by the farmers and shippers, to prevent any animals being shipped which may be infected with disease or which may be, to any extent, unhealthy, whether the ailment from which they are suffering is infectious or not. It is gratifying to all the friends of Canada to see that are ing to all the friends of Canada to see that such an important industry is growing, and when it is stated that the imports of live cattle into Great Britain, from all countries, average 350,000 per annum, in addition to about 1,000,000 sheep and 16,000 swine, it will be seen what an admirable and growing market is available for all kinds of stock that may be raised in Canada. The value of the imports of live cattle, in 1882, was over £9,000,000, in addition to dead meat of the value of £6,000,000, and other agricultural products valued at £12,000,000. stated that the imports of live cattle into Great

As an inducement to the Government to sent to allow Wyoming and Montana cattle to be shipped from Canadian ports it is represented that a million of cattle a year will be transported over Canadian railways and shipped from Mon-The statement is preposterous, the figures given by the High Commissioner showing the import of cattle into England and Scotland from all countries is only 350,000 per annum.
But even if the railways of Canada were
to carry a million of United States cattle

which animals being shipped from which animals, being shipped from Canadian ports would be classed in England as Canadian cattle, and would thus receive the benefit of the exceptional health pssition which Canada enjoys—this would be poor com-pensation to Canada should this export of foreign cattle eventually cause her to lose her exceptional advantages. One result would certainly ceptional advantages. One result would confollow. All western and southern United States cattle would soon become Wyoming or Carrying disease with them. It Montana cattle, carrying disease with them. It is as much as we can do in Canada to keep our own herds free from disease; we certainly cannot undertake to regulate all the United States as well. We know where we stand now; but if Mr. Frewer's views were to prevail we might wake up some morning to find that our railways had lost the promised traffic and that Canada had been placed on the list of "scheduled" countries. In fact, we might purchase this railway traffic at far too dear a price.—Montreal Herald.

THE DARKNESS BEFORE DAWN.

The conditions of the times is not premotive of cheerfulness. The process of liquidation involves a continual diminution of the estimated values of property, so that everybody feels comparatively poor, and a good many people are apprehensive of becoming positively so. It seems an interminable while since things first began to settle down to hard bottom. The business inflation of 1879 did'nt fairly break out The till towards the end of the year; it reached its height and began to subside within six months thereafter, and it ended abruptly on the day of the great national tragedy of July 2, 1881. The interval of more than three years has been marked by a dull, wearisome decadence, relieved by occasional spurts of artificial activity, brief of duration and fruitless of benefits. During the greater part of the time we have been on the down grade. Commodities of all kinds have been falling in price and increasing in quantity.

There is scarcely a great staple—we cannot for There is scarcely a great staple—we cannot for the moment call to mind a single one, except cotton—that has not gone down very much below its average value, and some things are cheaper than they ever were before. The mechanical industries of the country are un-profitable, and a considerable number of ablebodied men have been thrown out of employment. These are the discouraging features of the situation, and it is not at all surprising that they have impaired confidence to such a degree that a great many business men have lost heart and hope. The spirit of enterprise is completely chilled. Prudent men are intent upon trying to save what they have left. They are afraid to venture upon any undertakings which involve the assumption of additional liabilities. Capitalists hoard their money; they haven't the courage to lend it. The principal depositories are full to overflow, and securities that have hitherto been regarded as perfectly safe are offered at rates which assure tempting returns of interest to investors and few of them can be marketed. The volume of currency is no greater than it was five years ago, when the population was 15 per cent. smaller than it is now, and yet there is a larger amount of funds lying idle than there ever was before. The condition of affairs is, in some respect, anomalous. It seems like famine in the midst of plenty, scarcity in the midst of abundance. A sort of paralysis has resulted in a stupor which is destructive of the capacity for vigorous exertion and hardy activity.

The rigid and severe adjustment of values, which has been going on so long, will be productive of results so beneficial that ultimately nobody who had powers of endurance enough to bear the sifting will regret that it took place. It has been thorough and searching. Few persons, we imagine, realized how complete the work of renovation would be. Depreciation of values seems calamitous. It does wear severely, alike on the patience and the purse, to be obliged to sell property at less than cost. Still, if it can be replaced on correspondingly advantageous terms, the evils of the transition will be apparent rather than real. Losses occasioned by the decline of prices of merchandise are legitimate risks of business. They may bear hard on individuals, but they do not decrease the general wealth. All that goes out of the pockets of producers in that way goes into the pockets of consumers. There is no aggregate loss.

we reasoned that leather must appreciate in value, because there had then been for twelve months, as there now has been for eighteen, a continuous and very considerable curtailment of production. We assumed, moreover, that consumption must increase relatively with population, which is at the rate of about three per cent. annually. Our premises were correct our conclusions were erroneous, because we did not make allowance enough for the effect of the general depression on the distribution, if not

upon the use, of leather fabrics.

However that may be, we do not see anything to mourn over in the present condition of the trade. The tanners will lose some money in the stock they have in the vats if prices remain as they are, but they can replenish at much lower figures than they have been accu-tomed to, if raw materials fall proportionately. The shoe manufacturers can make as many goods as they have orders for, and it isn't necessary they should speculate in futures by making any more. Low prices, when we get settled down to them, will be best for the people and safest for the merchants. The most important object is to have them equal; if shoes are cheap, the material to make them of should be cheap; if leather is cheap, hides must be bought cheap, if all branches of the trade are to flourish. It may be that labor will be low also; it looks very much that way now. But if the worldly man can buy all the necessaries of life at figures which will more than make up for the disparity between his old wages and the new, he can have no fault to find. As soon as these all phases of the situation are recognized and understood there ought to be an end of strikes, and perhaps even the croakers will feel inclined to hide themselves from the public gaze.

—Shoe and Leather Reporter.

PUBLIC CONFIDENCE.

Commercial men talk and write glibly concerning "public confidence," and its presence, its absence, or its return, are continually spoken of as an essential feature of the business situation, but it is a question worthy of thoughtful consideration, in view of the recklessness with which this essential and fundamental element of trade operations has so often been abused, whether the true significance of the influence has been really and rightly appreciated by those whom it most concerns. Money is said "to make the mare go;" it is called, with respect to all business enterprises, the "sinews of war;" but, after all, is not public confidence the foundation stone of commercial activity. It is, indeed, a difficult thing to describe or define, but yet its potency as an important factor in business is well known and recognized. Its strength is undeniable, for it links together in an endless

chain of mutual dependance vast interests, and does much to sustain general prosperity, but yet it is so fragile that a breath of suspicion caught up and magnified and multiplied, may easily shatter it. It is susceptible of quick destruction and recovers slowly, and should never be needlessly assailed. How important a part it plays in commercial affairs of every day has been amply demonstrated by the occurrences that precipitated the Wall street flurry in May last. Primarily the scarcity of available money was at the root of the difficulty, but money was scarce because confidence was wanting. Some appear to believe that the difficulty has been that there was not money enough in existence, and hence, that relief was to be obtained by the Government putting out a few more millions of greenbacks. During the panic a great deal was attempted to be made of the fact that the Secretary of the Treasury had made another bond call, and instant relief was expected to follow this announcement, but subsequent events have proved that cement, but subsequent events have proven there was no lack of actual money, but that a violent shock to public confidence had caused it to fly to places of absolute safety, and so long as it the storm raged no offer of interest could coax it from its intrenchment. If there had been ten times the amount of money in existence the experience would have been the same. It was not an actual scarcity of money that was the matter, but the want of confidence in men as well as in values, and until this had become in some manner restored, the timid representatived of value kept to its hiding place. Since then the situation has improved, confidence has been situation has improved, confidence has been slowly returning, and, as a consequence, money has again been seeking the channels of trade. Like Cæsar's wife, confidence must be always be above suspicion, for this is the normal condition of its existence, and with it credit may be expanded within healthy limits, but once startled or abused by a breath of uncertainty and it contracts with a suddenness that threatens destruction to the whole structure that it so subtily yet so firmly binds together.—N. Y. Shipping List.

SOLICITING TRADE.

The practice of soliciting trade through the agency of travelling salesmen has become so firmly established that it seems almost quixotic to entertain the idea that it can be interrupted to entertain the idea that it can be interrupted or checked. It has become a part of the commercial system; it applies to all classes and varieties of merchandise; the tradesmen of the country have now got so accustomed to have samples brought to them that they no longer think it necessary to go after them. We cannot relinquish the belief that the plan has many objectionable features: there can be no doubt that jectionable features; there can be no doubt that it is exceedingly expensive; it adds greatly to the cost of doing business; we are of opinion, moreover, that the tax it extorts falls much more heavily on producers than consumers. Nevertheless those who object to the custom must strongly have been compelled to adopt it, for, if the majority will fall in with it, the minority must. There were evils about it when it first came in vogue that time will ameliorate. In the earlier stages of the innovation the natural inference of buyers, when goods were pressed upon them, must have been that such eagerness to sell could only have been prompted by apprehensions of superabundant and declining prices. They couldn't readily understand why a man in Massachusetts should send a representative all the way to an interior town in Texas with samples unless he had a strong motive for getting rid of his wares with as little delay as possible. Consequently they were sure to drive as keen a bargain as they could. It will not be denied, we presume, in any quarter, that the profits of trade have been whittled down considerably since this method of disposing of goods was originally this method of disposing of goods was originally resorted to. It may be taken for granted that instances of delinquency in payments are not fewer than they were before. To sum up the matter, then the disavantages of the traveling system are at least threefold. First, larger system are as least surcetous. First, larger capital is required; second, greater expense is incurred; third, less profit is realized. Other obvious objections will occur to every reader, First, larger such as that it is not as desirable to deal with a such as that it is not as desirable to deal with a customer through an agent as it would be directly, and that in case of disagreements about terms of sale or quality of goods, the parties who make the contracts are not the ones who fulfil them. Still, it seems to be a settled thing that the system is to prevail, and in the course of time its defeats may be partially remedied, if of time its defects may be partially remedied, if not wholly eradicated. It has scarcely passed the formative stage as yet, particularly in our went over it in 1877."

trade, and it would be singular if the pioneers in the experiment did not encounter some mishaps while it was growing into universal use.— Shoe and Leather Reporter.

A SHORT HISTORY OF TWO PER CENT.

Seldom, if ever, in the whole history of bankng has money been so cheap as this week. A quarter of 1 per cent per annum (1½d. a day interest on £1000, or only 13s 8d. a day for the loan of £100,000) is so strange—we had written impossible—a condition of affairs, that it will transfer the score to work it are a conditions. tend the sooner to work its own cure. Country bankers cannot afford to have balances eating their heads off in London at even 1 per cent. and their London agents who receive money on such their London agents who receive money on such terms, and relend at 1. or in default of a better price, let the money lie idle, are equally desirous of being rid of it. That the "official minimum" is not now below 2 per cent. is owing to the circumstance that the Bank of England never has published a quotation below that figure; but under present conditions they must accommodate their private customers below that rate, or practically, for the time, surrender their dis-No other State Bank, except count business. the Bank of France, has ever lowered its rate to 2 per cent. level, and the periods during which 2 per cent. level, and the periods during which that rate has lasted, carry a moral which may with advantage be pointed out just now. The following, therefore, are the dates and duration of a 2 per cent. rate at the Bank of England:— Rate lowered Duration to 2 per c. on 1852—April -April 22..... 1862-July 1867_ -July -July 13..... 70 56 1875. Aug. -April 1876-July 12..... 47 1878--Jan. 81..... 56 -April 1879-10..... 210 1884---June

Two per cent. not only means that the demand for money is small, that prices are low, and that speculation is at a standstill; it means also that there are many securities which bankers have for the time closed their doors against, as, for instance, they have now done against American and Canadian railways.—*Economist*, July 26th.

THD ERIE ROAD'S CONDITION.—Mr. Powell says: "The statement that the Erie Company ought to have \$4,000,000 to \$5,000,000 of funded capital to pay floating debt and make its finances comfortable is correct. The non-payment of the June coupon is now justified, the state have been so low and the trade of for the rates have been so low and the trade of the trunk lines is so dull that the net earnings of the current financial year will show the second mortgage interest fully earned. If you ask as to the coupon for the future, the payment must depend on the future net earnings. Prophesying is a thing which each must do for himself. In respect of future earnings, however, it must be borne in mind that they may perchance have to be availed of to some extent, for the future equipment trust instalments, if not otherwise provided for. We have at present to deal with the facts of the present, and the chief fact of the present is that there is a floating debt caused by three or four principal items:
advances to the Chicago and Atlantic Road, advances for coal mines and coal railroads in the Bradford District, advances for improvements on the Hudson River at Weehawken, and equipment trust instalments, for none of which have any sufficient permanently funded ways and means been provided; so the company was caught by the May panic, and the trouble was accentuated and aggravated by the Grant & Ward disaster. It is now clear enough that the owners of the road, not only shareholders, but also second consolidated mortgage bondholders, ought to see to the providing of sufficient permanent funds for disembarrassing the company. manent funds for disembarrassing the company. The method in detail of funding the floating debt ought to be framed in New York, and it is our desire that it should be devised here; it is altogether most fitting that it should be so. The Erie line is a great New York property, very important to this wealthy city, and New York should not think of playing second fiddle when it ought for all reasons to insist on playing first. As to the condition of the Erie, I have been over the road, and I found it in good running order—immeasurably better than when I went over it in 1877."

Commercial.

BRITISH MARKETS.

London, Aug. 27th 1884.

Beerbohm's report. Floating cargoes—Wheat, inactive; maize, none offering. Cargoes on passage—Wheat, heavy; maize, dull. Mark Lane—Wheat and maize, very slow; good cargoes red winter wheat, off coast, 35s. to 35s. 6d., was 35s. 1d. to 36s.; good cargoes No. 1 California wheat, off coast, 35s. 6d., was 36s.; good cargoes No. 2 spring wheat, off coast, 34s., was 34s. 6d. No. 2 red winter, shipment during present and following month, 34s. 3d., was 34s. 6d.; do. prompt shipment, 34s. 3d., was 34s. 6d.; English and Franch country months have 54s. English and French country markets heavy.

Liverpool, Aug. 27th. 1884.

Breadstuffs, firmer, but not quotably higher. Flour, 10s. to 11s. 6d.; spring wheat, 6s. 11d. to 7s. 1d.; red winter, 7s. 0d. to 7s. 3d.; No. 1 Cal. 7s. 4d. to 7s. 9d.; No. 2 Cal., 7s. 0d. to 7s. 2d.; corn, 5s. 6d.; barley, 5s. 6d.; oats, 5s. 5d.; peas, 6s. 8d.; pork, 77s. 6d.; lard, 40s. 0d.; bacon, 50s. 0d. to 51s. 6d.; tallow, 36s. 0d.; cheese, 50s. 6d.

AMERICAN MARKETS.

NEW YORK. Aug. 27th 1884.

Cotton, firm; uplands, 10 13/16c. Orleans, 11 1/16. Flour, firm. Rye ficur and cornmeal, steady and uncharged. Wheat, No. Chicago, 86½c.; No. 2 red, 85½ to 90½c.; No. 1 red and white State. \$1.01; No. 2 red for September, 89½ to 91½c.; for October, 91½ to 93c. Rye, unchanged. Barley, steady. Malt, inactive. Pork, unsettled; new mess, \$18.50. Lard, firm at \$7.90 to 8c. Butter, firm, at 16 to 16½c. Cheese, quiet and unchanged.

CHICAGO, Aug. 27th 1884

CHICAGO, Aug. 27th 1884. CHICAGO, Aug. 27th 1884.

Flour, quiet; Wheat, stronger; Aug. 78½ to 79½c.; September, 79½ to 80c.; October, 80½ to 81½c.; No. 2 Chicago, spring, 78½ to 79½c.; No. 2 red, 82½c. Corn, unsettled; 52½ to 53½c.; August, 52½ to 53½c.; September, 52 to 52½c.

Oats, sctive, 25½ to 25½c.; August, 35 to 35½c.; September, 25½ to 25½c.; Rye, firm, 56c. Barley, firm, 62 to 62½c. Pork, dull, \$18.50 to \$19. August, \$27.50; September, \$19. Lard, irregular, \$7.50 to 7.55; September, \$7.421 to \$7.55 lar, \$7.50 to 7.55; September, \$7.421 to \$7.55. Freights, corn, 12c.

MONTREAL MARKETS.

Montbeal, Aug. 27, 1884.

Trade is quiet. Dry goods travellers are all home, and the warehouses show no signs of bustle, most of the first fall orders being filled. In groceries there is still a very fair movement, and in pig iron there is an improvement, but other lines are unmarked, by any amount of activity. Payments are on the dull side, but this is not unusual to the season. Failures are singularly few, and of an unimportant character of late. The drought complained of last week, has been relieved to some extent by showers, but frost has been experienced in some sections. Stocks are duller than a week ago, and prices weaker, the rise then noticed having had apparently no real foundation. Latest sales are Montreal at 1911; Merchants, 1121; Commerce, 1212; Ontario, 112; Richelieu, 59 to 60. The

is still very much demoralized, and weaker if is still very much demoralized, and weaker if anything, prices being altogether nominal, other lines show no marked change. We quote Sall Soda \$1.10 per 100 lbs.; Bi. Carb. Soda, \$2 40 to 2.50; Soda Ash \$1.65 to \$1.75; Bichromate of Potash, per 100 lbs., \$8.50 to \$10; Borax refined, 11 to 12½c.; Cream Tartar crystals, 30 to 31c.; do ground \$4c. to 37c.; Tartaric Acid. 54 to 58c. per lb.: Caustic Soda. tar crystals, 30 to 31c.; do ground 34c. to 37c; Tartaric Acid, 54 to 58c. per lb.; Caustic Soda, white, \$2.40 to 2.60; Sugar of Lead, 9 to 11c.; Bleaching Powder, \$3.00 to \$4.00; Alum \$1.75 to \$1.90; Copperas, per 100 lbs., \$1.00; Ground Sulphur, \$2.75 to \$3.00; Flowers Sulphur, sublim per 100 lbs., \$3.00 to \$3.25; Roll Sulphur, \$2.40 to \$2.60; Sulphate of Copper, \$5.75 to \$6.50; Epsom Salts, \$1.25 to \$1.40; Saltpetre, \$9.00 to \$9.50; German Quinine, \$0.00 to \$1.40; American do., \$000 to \$006; Howard, \$000; Opium, \$4.50 to \$5.00; Morphia, \$2.20 to \$2.30; Gum Arabic, Sort, 28 to 33c. White, 40 to 55c; Hellebore, 20 to 24c; Carbolic acid, 60 to 70c.

DRY Goods.—In dry goods circles the present is a very quiet time, and the week, since last writing, has been devoid of interest. Travellers are all home and letter orders are few. The exhibition, will, it is hoped attract a certain number of buyers to town, and some western men are expected on the cheap excursion which men are expected on the cheap excursion which takes place the first week in September, but until travellers get out on the sorting trip about the begining of October, there will not probably be any degree of activity. City retail trade is also quiet, and remittances rather sluggish.

FLOUR.—The market continues to rule dull with few transactions reported "on change." We quote: Superior Extra, \$4 60 to \$4.65; Extra Superfine, \$4 40 to \$4.50; Fancy, \$4.25 to \$0.00; Spring Extra, \$4.10 to \$4.15; Superfine, \$3.25 to \$3 35; Canadian Strong Bakers' \$4 75 to \$5; American do., \$5.25 to \$5.60.

Figh.—New Dry Cod is dropping in slowly, and is a shade easier being quoted at \$4.50 to \$4.75; there is little doubt that the catch will be below the average. New Cape Breton Herrings are beginning to arrive in fair supply, and are being sold at \$5 to \$5.25. New North Shore Salmon, \$18 for No. 1, \$17 for No. 2; British Columbia, \$15.

GROCERIES -The volume of business is being fairly maintained and most houses report satis-factorily as to the amount of orders coming in, payments too are on the whole encouraging. In Teas there is an active demand for Japans bringing about 20 cents, which are not obtainable, and better grades are somewhat neglected, though relatively cheaper than the commoner grades. Advices from Yokohama, Hiogo and Nagasaki all speak of the scarcity of cheaper lines, and aonounce an advance of from \$2 to \$3 a picul in low priced goods. The first cargo of new blacks is reported in New York. In Sugars prices still rule low, 6\(\frac{1}{2}\)5. being refinery prices for granulated, yellows too are beginning to accumulate, and prices are easier if anything. In grocery raws we do not hear of anything doing. There is still a very marked difference in the ideas of holders and buyers of Molasses, and there is little doing in this line. Rice continues in demand and the mill has not yet overtaken able, and better grades are somewhat neglected. in demand and the mill has not yet overtaken the demand, price as before. Currents are very scarce, stocks ordered some time ago not having yet arrived. Estimates of the new crop place the yield at about same figures as last year, but first shipments will likely be a fortnight earlier than last season. Filberts, scarce, a shipment of 100 bags received by a house here this week were exhausted in one day. Lobsters scarce and firm in price; Sardines dearer, and will cost 10

LEATHER -Trade is assuming a quiet aspect, and outside a fair enquiry for splits, and No. 2 Spanish, there is not much business to repor Montreal at 191½; Merchants, 112½; Commerce, 121½; Ontario, 112; Richelieu, 59 to 60. The money market is unchanged.

Ashes.—Since last writing the market has ruled rather dull and depressed, with few transactions of any importance; No. 1 pots are quoted at about \$3.75; seconds \$3.50 to \$3.60. Sales of pearls were reported a day or two ago on private terms at something under \$4.50, but the nominel figure is \$4.50 to 4.75.

Cements.—Portland Cement continues steady at \$3.25 per brl.; round lots, \$2.90 to \$3.25 per brl.; round lots, \$2.90 to \$3.25 per brl.; round lots, \$2.90 to \$3.35 to \$3.60. Drugs and Chemicals.—Business in these lines is only moderate at the moment, and a good many travellers are home; remittances are somewhat sluggish. The market for quinine is There is still a considerable export of splits

50c; Harness, 24 to 38c; Buffed Cow, per ft., 14 to 16c. Enamelled Cow, 15 to 16c. Patent Cow, 15 to 16c. Pebbled Cow, 11 to 15½c. Rough, 28 to 28c. Russet & Bridle, 45 to 55c.

METALS AND HARDWARE. -- Shortly after writing last report, advices from the home pig iron market announced an advance of two shillings a ton in favorite brands, for the American mar-ket, which is still maintained. The American market is also reported stronger, probably due to a proposed general suspension of production there. Business locally is rather more active, sales of some considerable lots were reported last week, and there is an improved enquiry. Stocks here are not at all large, and now that

summer has turned the middle, those intending to buy will likely make up their minds as to their orders, before long. Warrants continue to be cabled at 41/6d. Bar iron remains in statu quo. There is a good deal doing in Canada plates at quotations, though we hear of some cutting; tin plates are in only fair demand. Pig lead has advanced slightly at home, tin and copper rather easier. We quote: Gartsherrie and Summerlee, \$18.50 to 1900; Langlaan, \$19 to 19.50; Coltness, \$19.50; Eglinton, \$16.50 to \$17; Dalmellington, \$17.00 to \$17.50; Calder, \$18 to 19; Hematite, \$20 to 22.50, depending on brand; Siemens, \$18.50 to \$19.60; Bar Iron still \$1.75 to \$1.80; Canada Plates \$2.85 to \$3.00 as to lot and brand; Tin Plates Bradley Charcoal, \$5.85 to 6.00; Charcoal I C \$4.75 to \$4.90 as to brand; do. I.X \$6.25 to 6.50; Coke I C., \$4.25 to \$4.40, summer has turned the middle, those intending Charcoal I C \$4.75 to \$4.90 as to brand; do. I.X \$6.25 to 6.50; Coke I C., \$4.25 to \$4.40, Gulvanized Sheets, No. 28, 6 to 70. according to brand; Tinned Sheets, coke, Nos. 24 to 26, 62 to 7½c.; Hoops and Bands per 100 lbs., \$2.25 to \$2.30; Sheets, Boiler, Plate per 100 lbs. Staffordshire, \$2.45 to \$2.55; Steel Boiler Plate \$3.25 to \$0.00; heads \$4.50; Russian Sheet Iron, 10½ to 11c. Lead per 100 lbs.:—Pig, \$3.75 to \$4.00; Sheet; \$3.75 to \$4.00; Shoet, \$6 to \$6.50; best cast Steel, 11½ to 12½c., firm; Spring, \$3.50, firm; Tire, \$3.25 to to \$4.00; Shot, \$6 to \$6.50; best cast Steel, 11½ to 12½0., firm; Spring, \$3.50, firm; Tire, \$3.25 to \$3.50, firm Sleigh Shoe, \$2.25 to \$2.50. Round Machinery Steel, 3½ to 40. per lb. Ingot Tin, 21½ to 22½0. Bar Tin, 24c.; Ingot Copper, 16c. Sheet Zinc, \$4.50 to \$5.00; Spelter, \$4.25 to \$5.50 Bright Iron Wire, Nos. 0 to 6, \$2.75 per 100 lbs. 100 lbs.

PAINTS AND OILS.—A well-defined advance in leads has taken place in Britain, equal to about leads has taken place in Britain, equal to about ten shillings a ton, but our quotations as given still hold here. The paint and color trade is quiet, and remittances only middling good. In oils too, there is comparatively little doing, and the tone of the market is weaker. Linseed remains at 54 to 55c. for raw; Steam Refined Scal, 60 to 63c.; Pale Vat, about 58c.; Cod Oil 58 to 60c for Gasne. in lots: Cod Liver. \$1.25. Seal, 60 to 63c.; Pale Vat, about 58c.; Cod Oil 58 to 60c. for Gaspe, in lots; Cod Liver. \$1.25 to \$1.30; Turpentine as before. We quote: White Lead, (genuine and first-lass brands only) \$6.25 to 6.75; No. 1 \$5.50 to 6.00; No. 2, \$5 to 5.50; No. 3, \$4.50 to \$4.75. Dry White Lead 6 to 64c.; Red do. 5 to 54c. These prices for round lots. London Washed Whiting 55 to 60c.; Paris White \$1.25 to 1.50; Cookson's Venetian Red \$2.00 to 2.25; Yellow Ochre, \$1.50 to 1.75. to 1.75.

Provisions.—In butter there is not a great deal doing as exporters do not see their way to buy for the European market. For choice and fancy there is a good demand for local con-Townships 18 to 20c.; Morrisburg 16 to 18c.; Western 14 to 17c. as to quality, cheese is dull and weeker chirarents above a considerable fall. and weaker, shipments show a considerable falling off, 9 to 9\frac{3}{2}c. is quoted for fine to finest.

Pork is steady at \$21 to 21.50 for Canadian mess; Western \$20 to 20.50; hams 14 to 15c.; lard 101 to 111c.; Eggs about 17c. for really good.

Salt.—There is no change whatever in either prices or amount of business doing. Coarse Elevens remain at 40 to 42 cents, and are the only kind being dealt in. Factory Filled, \$1.10 to \$1.20. No Turks Island in the market.

Wool.—The latter part of last week developed some fair sales, but this week so far, trade has been quieter, and no particular activities looked for just now. A cargo of Cape wool is expected here next week. We still quote Cape, 161 to 18c.; Australian, 19 to 26c.; Canadian A. Super, 26 to 28c.; B. ditto, 22 to 24c.

TORONTO MARKETS.

TORONTO, Aug. 21st 1884.

During the week the stock market has been quite sensitive. There were rapid fluctuations, alternately indicating weakness and strength, resulting in a slight improvement in quotations though prices generally are about two points lower than the highest reached a couple of weeks since. Large operators are endeavoring to steady the market to enable them to unload the blocks of stock bought during the recent advance. Federal Bank has been an exception, and has been strong throughout, buyers offering 561 to-day, against 501 last week, and sellers asking 581 as compared with 51. The announcement of the disposal of the large claim on a

lumber account in Michigan having effected quite a "boom." The terms have not been made public, though it is understood that the payments will be slow. Miscellaneous and loan societies stocks have participated in the general inactivity, prices, however, being fairly well maintained

BOOTS AND SHOES.—There are not many buyers coming to town these days but travellers report that the prospect for a good season's trade is encouraging; stocks on country shelves are being worked down to a satisfactory degree. Manufacturers are now running full time and are kept very active in filling fall orders.

are kept very active in filling fall orders.

Grain.—Wheat—Business continues to be of the same dull and uninteresting character. There have been very few, if any, sales recorded. We repeat previous prices. We quote: Fall wheat, No. 2, 85 to 90c.; fall wheat, No. 3, 75 to 80c.; spring wheat, No. 2, 90 to 95c.; ditto No 3, 80 to 85c.; oats, 40 to 41c.; rye, 60c.; corn, 58 to 59c.; timothy seed, per bush., \$1.80 to \$1.92; clover seed, yer bush., \$6.50 to \$6.75; flaq, screened, 100 lbs., \$3.25 to \$3.50.

well occupied and prices remain unchanged. Ingot tin keeps very firm at the recent advance, and pig iron warrants are looking up. Remittances are reported as being better than the

HIDES AND SKINS .- A good enquiry exists for HIDES AND SKINS.—A good enquiry exists for hides; stocks are light and prices firm. Sheepskins have declined, 60c. is now being paid. Tallow is in fair demand and steady. We quote: Steers, 60 to 90 pounds, 8c.; cows, 7c.; cured and inspected, 8½ to 9½c.; calfskins, green, 11 to 13c.; cured, 13 to 15c.; sheepskins, 60c.; tallow, rough, 3½c., rendered, 6½ to 7c.

Provisions—Butter has been in good demand and choice could be readily placed at 16c. The receipts have been rather light and more could be used. Cheese is somewhat easier, to-day's cable quotes 50s. though factory men in the west still hold August make at 11c. Commenting on the cheese market the New York Bulletin ages. "The steam of this product in this says: "The status of this product in this market within the past few days has undergone some important and noteworthy changes. It is but about ten days ago that attention was called to the feverish, uncertain state of the trade, and the perplexities with which a large number of operators were beset; but the barriers now appear to be generally broken down, and to appear to be generally broken down, and to reveal an outlook presenting many promising features for the buying interest. During the upward flurry a good deal of capital was made out of drouth reports from the central portion of New York; yet we find even as late as as last week our Utica correspondent expressing surprise over the liberality of the offering in that section, in the face of repeated representations of a shrinkage; while from every other portions of the State and from Canada the evidence point to a full, if not really liberal production past, present, and prospective. Of the amounts that have passed from the receivers' hands also, we commence to see slightly ominous accumulations—not very large here as yet, but com-mencing under the temptation of refrigerator facilities, while Montreal is reported to be carry-ing at least 100,000 boxes, and the landing and afloat supplies for Europe are finding no compensating outlet, many important lots having failed to draw a bid." Trade in hog products continue very dull, stocks are much reduced and we have

draw a bid." Trade in hog products continue very dull, stocks are much reduced and we have only a jobbing trade to report. Eggs are rather easier, 15½c. is now the outside quotation. There is nothing doing in dried fruits.

Drugs and Chemicals.—"To over-production" remarks the N.Y. Shipping List, "may be attributed the present unfavorable condition of the Shellac market. The stock here to day is about 15,000 cases all grades, while in London the quantity held approaches closely 50,000 cases. In view of this excessive quantity the price has steadily declined during the past year, until now the lowest rates in the history of the article prevail. At Calcutta, manufacturers have repeatedly asserted their inability to produce at the prices prevailing, and have often threatened to close their works. This depression in business is confined to no one quarter, but the entire world appears in sympathy. A reduction in the stock is necessary before the market can rise to a point of stability, and it is useless to expect any permanent change in the position of the article while the storehouses of the world are filled to repletion.

Woot.—The demand from factories is slightly filled to repletion.

WOOL.—The demand from factories is slightly improved, but the orders yet are principally small. Fleece is unchanged; combing ordinary 15½ to 19c.; ditto, Southdown, 20 to 22c.; pulled combing, 17 to 18c.; ditto., super, 20 to 21c.; extra, 27 to 29c.

LEATHEE.—This market seems to be in about

Leather.—This market seems to be in about the same position as when we last wrote and previous figures still rule. Spanish sole, No. 1, 29 to 30c., ditto No. 2, 27 to 28c.; slaughter, heavy, 28 to 30c.; ditto light 25 to 28c.; buffalo, 21 to 22c.; harness, heavy, 30 to 33c.; ditto light, 25 to 28c.; upper, No. 1 heavy 35 to 37c.; ditto light and medium, 37 to 40c.; kip skins, French 65c. to \$1.05; ditto English, 70 to 75c.; ditto domestic, 60 to 65c.; ditto veals, 70 to 75c.; hemlock calf, (25 to 30) 60 to 60c.; 36 to 44 lbs., 75 to 90c.; French calf, \$1.10 to \$1.40; splits, large, per lb., 25 to 30c.; ditto small, 21 to 25c.; enamelled cow, per ft., 17 to 19c.; patent, 17 to 20c.; pebble grain, 14 to 16½c.; buff, 14 to 16½c.; russets, light, 40 to 50c.; gambier, 6½ to 7½c.; sumac, 5½ to 6½c.; degras, 6½ to 7c.

Flour and meal.—There has been no business reported upon which to base prices and the fol-

reported upon which to base prices and the following quotations are purely nominal. We quote: Superior extra, \$4.50 to \$4.60; extra, \$4.80 to \$4.40; spring wheat, extra \$4.20 to \$4.25; oatmeal, \$4.25 to \$4.40; cornmeal, \$3.50; bran, per ton, \$12.00 to \$12.25.

CARD

We, the undersigned, desire to express our sincere thanks to the "OITIZENS' INSURANCE COMPANY OF CANADA" for their promptness in sending their cheques in full settlement of our losses by the late fire. Claim papers only reaching Montreal on Monday and their cheques for the same being issued on Tuesday, shows us plainly that they fully appreciate our immediate requirements in this serious calamity by which we so recently suffered.

675.000

—The earnings of the Russian railways during the financial year 1888 are set down at 233,000,000 roubles. being an increase of 18,000,000 roubles over 1882, and 11,500,000 roubles over 1878, which was considered an exceptionally prosperous year for the railway companies of the Empire.

—A message of 69 words was forwarded by the governor of Victoria announcing the opening of the Melbourne Exhibition on that day. In transmission the route was over the lines of five different companies and it took but 23 minutes to reach London, The total distance traversed was 11,398 miles.

—The Port Huron & Northwestern Railroad is now five years of age. It has 221 miles of track independent of sidings, thirteen locomotives, twenty-seven passenger and two parlor coaches, and 297 freight cars. It also has 395 names on the pay roll, and pays out for wages over \$10,000 each month, two-thirds of which amount goes to the city of Port Huron.

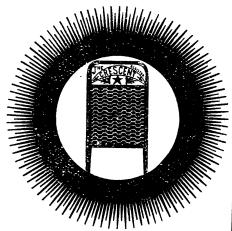

—The Brazilian coffee growers and exporters are agitating the question of doing something to counteract the influence of New York and Havre coffee exchanges. It is the general opinion in Rio de Janeiro that if the New York market can be controlled, the market at Havre will also be held in check, as the latter is influenced largely by the former. It is proposed to accomplish this end by building a large warehouse where coffee can be stored, and then issuing negotiable certificates, as is done in New York and Havre.

—The present value and highest quotation in Exchange memberships for 1882-3 are given by the N. Y. Bulletin as follows. A great shrinkage is shown:

	Present Price.	Highest Price. 1882-3.

NORTHEY

TORONTO.

-SEND FOR CIRCULAR.—

The Glasgow Herald,

IS THE LEADING COMMERCIAL PAPER, AND THE GREATEST ADVERTISING MEDIUM IN SCOTLAND.

Besides its full General, Shipping and Political News, it is the *only Newspaper* in Scotland which gives cablegrams daily of the

American Produce, Oil, Cotton Markets, &c

The Money, Share, Produce, Sugar, Iron, Oil Manufacturing and other Reports, from all quarters, are full, authoritative and reliable.

The Herald circulation is much more than double that of the morning papers of the West of Scotland altogether.

Posted daily to Canada and the United States for 26/ per half year.

GEORGE OUTRAM & CO., Publishers.

The Glasgow Weekly Herald, an excellent Family Newspaper, posted to Canada or the U.S., 4/4. per half year.

Railways.

THE DIRECT FROM

FOR ALL POINTS IN

New Brunswick, Nova Scotia, Cape Breton & Newfoundland.

All the popular Sea Bathing, Fishing, and Picasure Reserts of Canada are along this line. Paliman Cars leaving Membreal on Membry, Wednesday and Friday run through to Halifax, and on Tuesday, Thursday, and Saturday to St. Jehn, N.B., without change.

Close connections made at Pointe Levis or Chandiere Junction with the Grand Trunk Baliway, and at Pointe Levis with the Richelien and Ontario Navigation Company's steamers from Montreal.

Elegant First-class, Pullman and Smoking cars on all through trains.

First-class Refreshment Booms at convenient distances.

tances.

IMPORTERS and EXPORTERS will find it advantageous to use this route, as it is the quickest in point of time and the rates are as low as by any other. Through freight is forwarded by final special trains, and experience has proved the fintercolouisal route to be the quickest for European freight to and from all points in Canada and the Western States.

Tickets may be obtained, and also information about the route and about freight and passenger rates from

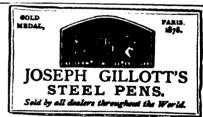

about the

This is the only Company that issues Policies giving the benefits of the Maine non-forfeiture law, and specifying in definite terms by its Policy Contract, that there can be no forfeiture of the insurance by non-payment of premium after three annual premiums have been paid, until the value provided for is exhausted in extended insurance, and every policy issued, states in plain figures, the extended insurance and cash value as the case may be (after the third year), according to the number of full annual premiums paid. NOT MERELY ESTIMATES BUT ACTUALLY GUARANTEED and after being in force THREE FULL YEARS the policy BECOMES INCONTESTABLE. Matured policies are payable at once without rebate of interest on receipt of satisfactory proofs of death, together with a valid discharge from proper parties in interest, the Company waving the usual delay of ninety days required by most Companies. most Companies.

The guaranteed extensions and each values do not include the Dividends which will accrue to the Policy.

Agents wanted in unrepresented districts.

BRAYLEY, McCLUNG & CO.,

(Successors to JAS. BRAYLEY & CO. and McCLUNG & BRIGGS)

BEG TO ANNOUNCE THEIR

GRAND OPENING!

ON TUESDAY

The 2nd SEPTEMBER and Following Days.

B. McC. & CO. have no hesitation in saying that their combined purchases, the whole of which will be shown in their present warerooms on Wellington street, will be ahead of anything in the trade for Value, Styles, and Close prices. Their whole stock has been bought for Cash, and they intend giving the Trade the benefit

arising from this.

Without giving the details of their usual departments, which are well known to the Trade, they may state that in all their leading features such as Velvets, Velveteens, Satins, Ribbons, Crapes, Ostrich and Fancy Feathers, Ladies' Hats, Wool Goods, and Mantles, THEY WILL SHOW A LARGER STOCK, AND BETTER VALUE THAN ANY HOUSE IN ONTARIO, WHILE THEIR MILLINERY DEPARTMENT WILL BE WHAT IT HAS BEEN FOR SOME SEASONS PAST. AHEAD OF ANY HOUSE LARGE OR SMALL, IN THE DOMINION.

Starting on a new basis with improved facilities, thoroughly understanding their business in all its features, having a competent staff in every department, they are determined to stand at the top of the tree.

Notwithstanding the malicious reports circulated by parties who are afraid of their competition, and the bombastic advertising indulged in to mislead the Trade, they feel sure that their Goods, their Prices, their Principles, and their Treatment of their Customers, will tell as it has told in the past, in making their House what it is to-day,

THE MOST POPULAR MILLINERY HOUSE IN CANADA.

Come and see us next week. You will find a grand Stock of new goods in every Department!

BRAYLEY, MCCLUNG & CO.

9 & 11 Wellington St. E., TORONTO.
