

New Series. No. VIII. Whole No. XVII.

**CUNNABELL'S
NOVA-SCOTIA
ALMANAC,**

For the Year of our Lord

1850.

BEING THE SECOND YEAR AFTER BISSEXTILE OR
LEAP YEAR, AND THE THIRTEENTH AND
FOURTEENTH OF THE REIGN OF
HER MAJESTY QUEEN VICTORIA.

HALIFAX, N. S.

PUBLISHED BY, W. CUNNABELL,

No. 3, CONNORS' WHARF.

Sold also at the Stationery Stores in the City, and at the
principal Stores throughout the Province.

ADVERTISEMENT.

THE publisher of the Nova-Scotia Almanac, has been induced, from several considerations, to put out the present No. in a more condensed form than those hitherto published; and as the price is placed in accordance with the diminished number of pages, he trusts the change will be favourably received by his numerous patrons.

The number now presented to the public contains the usual astronomical calculations—which have been carefully prepared for nautical and general purposes; lists of names connected with the principal public offices; useful, entertaining, and miscellaneous readings; Interest, Sterling and Dollar Tables; together with a continuation of the *Chronological Summary*, and other information suited to the pages of an Almanac. The publisher confidently anticipates that in this number the deficiency in size will be amply compensated for in the reduction of price, and the general quality of its contents.

PRINTING, ADVERTISING, &c.

Orders for Book, music, plain and fancy Printing, executed in a superior style, at the office of *W. Cunnabell*, No. 3, Connors' Wharf, Halifax, N. S.

The Advertiser and Business Directory is published by *W. Cunnabell*, on Monday, Wednesday and Friday mornings. This paper is circulated gratis, on the plan adopted in Great Britain. The carriers are instructed to leave copies of each No. at all the public offices, counting rooms, stores, hotels and boarding houses, work shops, and other places of business in the city, and also on board of each of the vessels lying at the wharves. Advertisements will be inserted at a fixed price; the charge will be moderate, and regulated according to their length.

THE WESLEYAN.

A Family Paper, bearing this Title, and devoted to Religion, Literature, General and Domestic News, &c., &c., is now in course of weekly publication, for the Districts of British North America. Terms only ten shillings per annum, exclusive of postage—half in advance.

This Paper has obtained a wide circulation, and is decidedly popular,—supplying a medium of communication, the necessity of which has been long felt by the Provincial population.

The patronage of Wesleyans and others, who are desirous of introducing into their families a cheap and useful periodical, is solicited. Orders may be forwarded to the Editor, Halifax, N. S. direct, (*post-paid*, and with the advance) or through any of the Wesleyan Ministers in the Provinces.

The Wesleyan is Published for the Proprietors, by *W. Cunnabell*.

CUNNABELL'S NOVA (4) SCOTIA ALMANAC.

ORIENTAL AND OCCIDENTAL STARS.

♀ Venus will be visible for a few mornings as a Morning Star, at the commencement of the year; and an Evening Star from the middle of March to the end of November.

♂ Mars will be an Evening Star till September; then he will come in conjunction with the Sun.

♃ Jupiter will be a Morning Star from January 1st to the end of the month, and an Evening and Morning Star till May; then an Evening Star till September, when he will be in conjunction with the Sun; afterwards a Morning Star to the end of the year.

♄ Saturn is an Evening Star till March, when he will be in conjunction with the Sun; afterwards to the end of the year a Morning Star.

OCCULTATIONS,

Likely to be visible in Nova Scotia.

Moon and Jupiter, January 3rd.	Moon and Jupiter, March, 25th.
Moon and Jupiter, January 30th.	Moon and Jupiter, April 22nd.
Moon and Jupiter, Feb'y 26th.	Moon and Jupiter, May 19th.

EMBER DAYS.

February 20th, 22d, 23d.	September 18th, 20th, 21st.
May 22d, 24th, 25th.	December 13th, 20th, 21st.

TIME OF HIGH WATER.

We have given in the column for High Water at Halifax, both morning and afternoon tides, as being more generally useful. The time of High Water at the following places may be found by adding to, or subtracting from the Halifax tides:—

Pictou, subtract. 0h 30'	Windsor, add 4h 30'	Cape Canso, add 4h 30'
Annapolis add 2h 30'	Sambro, add 30'	Shelburne, add 1h 0'

NOTICE.

In the Calendar pages the Sun's rising and setting are in apparent time at Halifax; the Sun's Declination is given for apparent noon at

Greenwich time of High Water given for apparatuses of the Moon

Agriculture

ACTION OF viz:—32 per cent. ashes of poplar 4 per cent. of the vital constituent wheat can never wheat, and so all soils possesses the farmer. Fodders them more mosphere.

Greenwich time. The Moon's rising, setting and southing, and time of High Water are in Halifax mean time. The Equation of Time is given for apparent noon at Greenwich, for every day. Also the Phases of the Moon, at the head of each month, are in Halifax mean time.

Agricultural, Domestic Economy, &c.

ACTION OF LIME.—Lime exists in plants in various portions, viz:—32 per cent of the ashes of oak wood is lime; 27 per cent. of the ashes of poplar is lime; 14 per cent. of the ashes of peas is lime; and 4 per cent. of the ashes of our wheat plant is lime. Lime is an essential constituent of wheat. It *must* therefore be in our soils, or our wheat can never be matured. Lime therefore is a *direct food* for wheat, and so also for other plants. This important element of our soils possesses several qualities most essential and highly beneficial to the farmer. For instance, when applied to heavy clay soils, it renders them more open and easily worked, admitting the action of the atmosphere.

In all soils containing the sulphate of iron, lime will decompose the sulphate of iron, and thereby form Plaster of Paris, a material well known. When we apply lime in its caustic state, it acts as a solvent, destroys the texture of matter in contact with it, or changes its nature. But when by exposure to the air this power is lost, and it becomes slaked, then it is food direct for plants.

Twenty bushels of wheat, if produced from a single acre, will take from that acre about seven pounds of lime. Then, as a bushel of lime weighs about seventy-two pounds in a caustic state, it will weigh when slaked about one hundred pounds, by the absorption of water; therefore, *one bushel* of lime is sufficient for *fourteen acres* of wheat, or thereabouts, but as this supply is for one crop only, and as weeds and other vegetation will rob the wheat of its due share, I would apply ten bushels to the acre, and feel that it is sufficient for four or five years.

For light soils I would recommend a mixture of lime and muck, applying twenty to twenty-five bushels of this mixture to an acre. But never mix lime with your manure heaps; this is a ruinous practice, because it expels from your manure its chief power. It destroys the ammonia, a salt which it is our aim to preserve.—*Hon. John DeLafield.*

INDIAN CORN.—On almost every farm there is a considerable quantity of partially fermented barn-yard manure which is scarcely in a fit state for the grain and root crops, and which may advantageously be applied to the land at this season of the year for the corn crop.—The more freely the land is manured the greater will be the yield, provided that pains be taken in the cultivation; the product will, also, be governed by the fertilizing properties of the manure applied to the crop. Of all the varieties of manures applicable for corn, that produced by swine fed in pens is the best: the ground to be manured at the rate of fifty cart loads of hog-pen manure per acre. The great

Random Readings.

SENTIMENTAL, AMUSING, AND INSTRUCTIVE.

The Earth's Journey.—In winter we are nearest the sun, and in summer farthest from it; for the difference in the season is not occasioned by the greater or less distance of the earth from the sun, but by the more or less oblique direction of the sun's rays. The length of the path travelled over by the earth is estimated at 567,019,740

miles, and, as this immense distance is passed over in a year, the earth must move 17 miles a second—a rapidity so far exceeding our conceptions, that it gave very just occasion to the pleasant remark of Lichtenberg, that, while one man salutes another in the street, he goes many miles bareheaded without catching cold.

The Sexes.—The finger of God himself has marked out the impulses, the habits, the character of the two sexes. Man has vigour, woman refinement; man has the reasoning faculty best developed, woman the perspective; man has the power of abstraction, woman rarely possesses it; man is the creature of calculations, woman of impulse; man is capable of deep research—he proceeds slowly and cautiously, measuring every distance, and counting every step of his progress; woman bounds along with rapid feet, observing the most prominent objects in her path, and from them forms conclusions often erroneous, but always ingenious.

Greatness.—A great man is made so for others, not for himself,—to relieve the poor, comfort the afflicted, protect the oppressed, correct the vicious, deliver the captive.

“When I am a man,” is the poetry of childhood; “when I was young,” is the poetry of old age.

Definition.—An investigation was held, the other day, by the directors of a school, into the conduct of some

found that they are not as subject to disease on the virgin soil as when grown in land, long under cultivation. Early planting has been found productive of the most flattering results; indeed, many crops have entirely escaped disease from having been planted between the 1st and 10th of May; and by harvesting them by the 20th of September. It is not only important that potatoes should be planted early, but also that

the earliest varieties that can be had should be selected. Some of the earliest varieties have not been known to be attacked with disease, which probably may be accounted for upon the principle that the potatoes ripen, and the stalks become thoroughly dead, before the usual season arrives for the tubers to be attacked with disease. The use of gypsum, to be sown broad-cast upon the plants, when a few inches high, and frequent hoeing, either by hand or horse power, will hurry the crops forward to early maturity. It will be found, upon trial, that the great point to be aimed at, in the cultivation of this important

teachers towards the scholars. Among the witnesses examined was a bright little fellow about ten years of age, who was asked whether he thought his teacher was "partial?"

"Nor, thir, he aint," he answered, promptly enough.

"Do you know what 'partial' means?"

"Of coath I duth," said the young rogue, quite indignant at this imputation upon his intelligence.

"Well, what is it?"

"Vy, if he wops all the boys like thunder, and wops 'em all alike, I doesn't call that bein' partial, duth you?"

Sincerity.—To peactice sincerity is to speak as we think; to do as we profess; to perform what we promise; and really to be what we appear to be.

Why do you not hold up your head, as I do?" inquired an aristocratic lawyer of a labouring farmer. "Squire," replied the farmer, "look at that field of grain; all the valuable heads hang down like mine, while those that have nothing in them, stand upright, like yours."

The only way to be permanently safe is to be habitually honest.

Ladies and Oxen.— "The constitution of our females must be excellent," says a celebrated physician. — "Take an honest ox, encase his sides with corsets, and require labour of him—he would labour indeed, but it would be for breath."

Blessings and Happiness.—I say to the young wife, "Study your husband's comfort; not only obey him, but anticipate his wishes and make his home happy, by rendering yourself a complete housekeeper as well as an agreeable companion, a prudent counselor, and a true friend."

M. De Marolles said of a censorious neighbour, "His mouth costs him nothing, for he always opens it at the ex-

edible, is early planting, selecting of early varieties, thorough cultivation, and early digging, or cutting off or pulling up the tops before the plants evince strong symptoms of disease.

SEASONS FOR FELLING RESINOUS TIMBER.—In cutting timber of all kinds advantage should be taken of the season which will favour their duration and strength. Thus oak and most other kinds of non-resiniferous trees, as far as the knowledge of practice extends, are stronger and more durable when felled in early winter, at the time the pores contain but little sap. On the contrary, the timber of pine,

pense of others. I wish that some day he should bite his tongue, for then he would poison himself."

It has been said of birds that they are the poor man's music; and we may observe of flowers that they are the poor man's poetry.

Demonism of the Heart.—The most deadly hatred of all, is that which pauses in the execution of its plan, the more effectually to ensure its completion. There is something doubly revolting in the idea of such self-command; we can better forgive the frenzied violence,

than the cool and deliberate brooding of a vindictive heart.

Exercise.—Man was never created for inactivity; his organs require action, and his limbs motion. Too much sleep deadens and enervates the body; exercise enlivens and strengthens it, gives new vigour to the principle of life, urging the circulation of all the fluids through their many channels, facilitating the secretion of the different humours and the rejection of those which must compromise life if allowed to remain within the frame. But the good effects of exercise are not confined to this point alone; it also prevents or removes the concentration of the vital powers on the brain or stomach, the common result of too much sleep; it establishes and maintains the equilibrium in all the parts, and kindles in some degree the spark of human heat.

A miserable looking horse, nothing but skin and bones, with hardly a breath of life in him, was seen standing in Water street. A wag of a boy had pasted upon the sides of the poor animal a placard with the following notice with large letters, "Wanted a peck of oats. Apply within."

A man who had a severe fall, was asked by the surgeon, "Have you sprained yourself near the *fibula*?" "No, sir," answered he, "near the *market-place*."

There is a Rabbinical tradition related by Fabricius, that when Noah planted

by the dairy uten the same results ard, &c. CURE FOR SC two tablespoonful for three or four B

CUNNABELL'S NOVA (13) SCOTIA ALMANAC.

The vine, Satan attended and sacrificed a sheep, a lion, an ape, and a sow. These animals were to symbolise the graduation of inebriety. When a man begins to drink he is meek and ignorant as the lamb; then becomes bold as the lion; his courage is soon transformed into the foolishness of the ape; and at last he wallows in the mire like a sow.

A Hard Name.—A man named Stone exclaimed in a crowd, "I'll bet I have the hardest name in the company." "Done," said one of the company; "what's your name?" "Stone," cried the first

"Hand me the money," said the other, "my name is Harder."

Bethel, an Irish barrister, was the opposing counsel in a cause in which McNally, the celebrated witty barrister, was employed. Bethel made several rude personal observations on McNally, who, on that account, interrupted his opponent in his speech. Bethel, vexed at this, at last exclaimed, "Brother McNally, you have taken the liberty of forcing your remarks in the middle of my statement, and have several times broken the thread of my discourse."—"Brother Bethel," said McNally, "why didn't you wax it better." Bethel's father had been a shoemaker, and his son was ashamed of him.

The three most difficult things are, to keep a secret, to forget an injury, and to make good use of one's leisure.

"Do you ever see any of the popular novels?" said a city dame to a country cousin. "No, ma'am, but plenty of poplar trees."

"Yours is a very hard case," as the monkey said to the oyster.

What kind of a face should an auctioneer have? A face that is *forbidding*.

"I see you're on the watch," as the thief said to the guard chain.

After the younger Mr. Pitt had made his speech in the House of Commons, Sir Robert Walpole, in a sarcastic tone, remarked:—

"I apprehend the young gentleman

nose." "Father," said a sporting youth to his revered parent, "they say trout will bite now." "Well, well," was the consoling reply, "mind your work, and then you'll be sure they won't bite you."

Glorious Revenge.—If you feel inclined to exercise your vengeance against one who has deeply injured you, take the first opportunity of doing him a service; if he have any feeling, you will wound him to the quick.—*O. P. Q.*

Tarring and Feathering.—This ludicrous but painful punishment would appear to be an European invention, as one of Richard Cœur de Lion's punishments for sailors was, if any man were convicted of theft, or 'pickery,' he should have his head polled, and hot pitch poured upon his pate, and upon that the feathers of some pillow or cushion shaken aloft, that he might thereby be known for a thief.—*Holinshed.*

Uncommonly Thin.—When the Duke de Choiseul, a remarkable meagre man, came to London to negotiate a peace, Charles Townshend being asked whether the French Government had sent the preliminaries of a treaty, answered "he did not know, but they had sent the outline of an ambassador."

A Hard Cough.—A friend having visited Curran one morning, and perceived that he coughed with difficulty, told him so, on which Curran said, "It is strange that I should, for I have been practising all night."

comber, of Wilton, informs us that for more than ten years past he has used gum camphor, dissolved in New England rum, to destroy lice on cattle. It does the work effectually, as we can testify; it may be applied at all times, even in the coldest weather, without injuring the cattle.—*New England Farmer.*

CUNNABELL'S NOVA (17) SCOTIA ALMANAC.

Great deeds are great legacies, and work with wondrous usury. By what man has done, we learn what man can do, and gauge the power and prospects of our race. A great career, though baulked of its end, is still a landmark of human energy.

Why is a lady, while decorating her fingers, like one in distress?—Because she's *wringing* her hands.

Woman's "Empire State" is matrimony. Here she is always in her majority—always *reigns*, and (as scurrilous bachelors say,) sometimes

storms!

What was the difference between Noah's Ark and Joan of Arc? One was made of Gopher wood, the other was *Maid* of Orleans.

What town in England is Jenny Lind's sister like?—Cirencester (syren's sister). "What, Mr. Speaker, what shall I say to my constituents?" exclaimed a wrathful member of Congress, on the passage of a bill to which he was utterly opposed. "What shall I say?" he repeated; but found it impossible to get beyond the interrogatory. "Tell them," replied the waggish Speaker, "that you tried to make a speech, but couldn't."

Politeness.—It is a graceful habit for children to say to each other, "Will you have the goodness?" and "I thank you." I do not like to see prim artificial children; there are few things I dislike so much as a miniature beau or belle. But the habit of good manners by no means implies affectation or restraint. It is of some consequence that your daughter should know how to enter and leave a room gracefully; but it is of prodigiously more consequence that she should be in the habit of avoiding whatever is disgusting or offensive to others, and of always preferring their pleasure to her own. Nothing tends to make people so awkward as too much anxiety to please others.

"I never had these panes before," as the mended sash said to the glazier.

comes out of the reservoir, but the thick tar—and gradually mix as you would mix water with the mortar or plaster, until the heap is about the consistence of pretty thick mortar. In forming my yards and sheds for cows, and those attached to loose boxes for horses, two years ago, in order that all the fluids should draw towards a tank, I employed this compound on a surface formed with stone broken very small and a small quantity of gravel scattered over them and then roll-

breakfast on a sunshiny morning. To see the blossoms opening their painted bosoms to the beneficent rays which give them their colour and their loveliness, welcoming the calm blessing of the light, as if with gratitude, and seeking in their tranquil state of being, for nothing but the good gifts of God, might well afford a monitory lesson. How calm do they stand in their loveliness, how placid in their limited fruition of the elements that nourish them—how, in their splendid raiment, do they sparkle in the sun, how do they drink up the cup of dew, and gratefully give back honey and perfume in return!

Taking Care of No. 1.—A negro having purchased a hat, was observed to take it from his head on the fall of a shower of rain, and to manifest particular anxiety to preserve it from the wet. On being remonstrated with for his supposed stupidity in thus having his head exposed, he wittily observed, "Hat belongs to me—head to, massa."

The mind, no more than a child, should be trusted out of leading strings; with judgment to guide, and discretion to guard, if it does not attain happiness and distinction, it will at least avoid misery and disgrace, to which an unrestricted imagination and uncontrolled sensibility will too often lead.

Examine not the pedigree nor patrimony of a good man.

A young lady from the country being invited to a party, was told by her city

which will be found, upon trial, to be a simple, still an invaluable remedy for rheumatism. Take a pint of the spirits of turpentine, to which add half an ounce of camphor; let it stand till the camphor is dissolved; then rub it on the part affected, and it will never fail of removing the complaint. Flannel should be applied after the part is well fomented with turpentine. Repeat the application morning and

GUNNABELL'S NOVA (21) SCOTIA ALMANAC.

cousin to fix up and put her best foot foremost, in order to catch a beau, "she lookd so green in her country attire." The country lass looked comically into the face of her rather faded relative, and replied, "Better green than withered."

What are you looking for?—A man was angry with his wife, as was often the case, either because she talked too much, or contradicted him, or for some other reason; in short, he was out of humour with her, and resolved not to speak to her for a long, long

time. He kept his resolution for a few days very strictly. One evening he is lying in bed and wishes to sleep: he draws his nightcap over his ears, and his wife may say what she will, he hears nothing of it. The wife then takes a candle, and carries it to every hole and corner; she removes stools, and chairs, and tables; and looks carefully behind them. The husband sits up in bed, and gazes inquiringly at her movements: he thinks that the din must have an end at last. But he is mistaken. His wife keeps on looking and searching. The husband loses patience and cries, "What are you looking for?" "For your tongue," she answers, "and now that I have found it, tell me why you are angry." Hereupon they become good friends again.

The only passion which age does not blunt is avarice; which, the longer we live, only becomes the keener.

"My dear boy," said a kind-hearted country school-mistress to a pupil whose quarter was about up, "My dear boy, does your father design that you should tread the intricate and thorny path of the professions, the straight and narrow way of the ministry, or revel amid the flowery fields of literature?" "No, marm," said the juvenile, "dad says he is going to set me to work in the tatur patch."

The old Dutch painters of flowers mostly worked on a black ground. The value of this arrangement may be easily

leave it till cold. In this way the colours are rendered permanent, will not fade by subsequent washing. So says a lady who has made the experiment herself.

COMPOST—It is in the power of every cultivator of the soil to increase the quantity of his manure at least one half. He may also, by proper management, greatly augment its value, or, what is tanta-

and pleasantly ascertained by examining natural flowers by the light of a lantern on a dark night. The exquisite beauty of nature's floral gems, when thus exhibited, can scarcely be understood without making the experiment.

Never reproach a man with the faults of his relatives.

No one can ever become learned except by his own application.— Modes and opportunities of education may facilitate our progress; but on the whole, our attainments must be resolved into our own diligence.

To abound in all things, and not know the right use of them, is positive penury.

Scolding is the pepper of matrimony, the ladies are the pepper-boxes.

Reynolds, in his "Life and Times," says:—"Met also a free and easy actor, who told me that he had spent three festive days at the seat of the Marquis and Marchioness of —, without any invitation, convinced (as prov'd to be the case) that my lord and my lady not being on speaking terms, each would suppose the other had asked him."

Conscience is the best friend we have; with it we may bid defiance to man; without it all the friends in the world can be of no use to us.

Riches should be admitted into our houses, but not into our hearts.

To do good for evil is the perfection of conduct.

"Perpetual complaints," to use the simile of an old writer, "are like unto a new cart, which creaks and cries, even when it has no burden but its own wheels; whereas that which is long used, and well oiled, goes silently away with a heavy load."

Confidences are more frequently reposed in persons through a want of discretion than from excess of friendship, and are oftener betrayed through incontinency of speech than from motives of treachery.

The smiles of youth form channels for the tears of age.

in this. Their yards are not only located so as to be constantly "drained" of their liquid wealth, but their manure heaps are exposed to the weather as tho' it were of no consequence whether the fructifying constituents of the excrement were dissipated in the air, or retained for the benefit of their soil and crops. A farmer who should be informed that his neighbor's cattle had broken into his enclosure,

CUNNABELL'S NOVA (25) SCOTIA ALMANAC.

During the last war with Great Britain, the captain of a Newburyport privateer wrote to his owners that he had been in an engagement, but had received but little damage, having only one of his hands wounded in the nose.

Two old gentlemen were complimenting each other on their habits of temperance. "Did you ever, neighbour," said one, "see me with more than I could carry?" "No, indeed," was the reply, "not I. But I have seen you when I thought you had better have gone twice after it."

The following is a copy of a will left by a man who chose to be his own lawyer:—"This is the last will and testament of me, John Thomas; I give all my things to my relations, to be divided among them the best way they can. N. B. If anybody kicks up a row, or makes any fuss about it, he isn't to have anything. Signed by me, John Thomas."

To perpetuate by meditation the remembrance of wo, is to embalm a viper that has stung you.

A gentleman having prevailed on a young lady, to whom he was engaged, to give him her miniature, promised his in return as soon as he could find a good artist. The lovers, meanwhile, had quarrelled. The gentleman, desirous of making peace, said, "I have just seen a fine miniature; mine shall be executed next week, if you say so." "It is a matter of equal indifference to me," she replied, "which is executed, you or your miniature, for I have resolved to accept neither."

Reading and Thinking.--Those who have read of everything are thought to understand everything too; but it is not always so. Reading furnishes the mind only with materials of knowledge; it is thinking makes what we read ours. We are of the ruminating kind, and it is not enough to cram ourselves with a great load of collections; unless we chew them over again, they will not give us strength and nourishment.

Briarean.—La!" said Mrs. Par-

to the sun and air, he is incredulous. Yet such is doubtless the fact. We are happy to perceive, however, that in many sections of our country, barn-cellars, for the more perfect preservation of manures, are gaining favor. Stercoraries, where valuable composts may be made, are also becoming quite common, and even those who are too indigent

ington, "what monsters them cotton-factors must be. I'm told one on
em has as many as a hundred hands!"

A Mathematical Lover.—A young lady, a few days ago, re-
ceived a love epistle from an illiterate swain, which commenced,—
"Dearest angle of my soul," &c. "Well!" she exclaimed, tossing
the missive into the fire, "that corners me, certainly!"

"Be prosperous and happy; never require our services, and we will
remain your friends" This is not what society says, but it is often the
principle on which it acts.

All is hollow where the heart bears
not a part, and all is peril where princi-
ple is not the guide.

A certain discounteer was lately exhi-
biting to an unhappy client his pictures
and fine furniture, amassed peacemeal
from various distresses, like the miscel-
laneous collection of a broker's shop.
Pointing at last to a bust of himself, he
asked, "Don't you think it's like me?"
"Exactly," was the reply, "the very
heart is of stone."

Prodigals are persons who never learn
the difference between a sovereign and a
sixpence, until they want the latter."

Good-nature, like a bee, collects hon-
ey from every herb. Ill-nature, like a
spider, sucks poison from the sweetest
flower.

Why is old cheese, better than cold
steel?—Because it is *mitier* than the
sword!

Happiness doats on her works, and is
prodigal to her favourite. As one drop
of water hath an attraction for another,
so do felicities run into felicities.

If you do not wish to fall in love with
a girl, don't commence flirting with her.

Courting for fun is like boxing for fun.
You put on the gloves in perfect good
humour—with the most friendly inten-
tions of exchanging a few amicable
blows; you find yourself insensibly warm
with the enthusiasm of the conflict: un-
til some unlucky punch in the "veskit"

spoonful of brandy, and a pint of gin; mix all together; with a sponge
or flannel, spread the mixture on each side of the silk, without greas-
ing it; wash it in two or three waters, and iron it on the wrong side;
it will then look as good as new.

HOW TO RENDER CLOTHS, SILKS, &c. WATER PROOF.—Take
one pound, each of common alum, (sulphur alumus,) and of sugar of

decides the matter, and the whole affair ends in a downright fight. Don't you see the similarity?

E n v y.—The envious man is in pain upon all occasions which ought to give him pleasure. The relish of his life is inverted; and the objects which administer the highest satisfaction to those who are exempt from this passion, give the quickest pangs to those who are subject to it. All the perfections of their fellow-creatures are odious.—Youth, beauty, valour, and wisdom, are provocations of their displea-

sure. What a wretched and apostate state is this; to be offended with excellence, and to hate a man because we approve him! The condition of the envious man is emphatically miserable! He is not only incapable of rejoicing in another man's merit or success, but lives in a world wherein all mankind are in a plot against his quiet, by studying their own happiness and advantage. A sage being asked how he had derived his knowledge, replied, "From the blind, who never place their feet till they have tried the firmness of the soil: I observed before I reasoned, and I reasoned before I wrote."

Sam Slick's Last.—Judge Haliburton was holding a Court the other day, and in the commencement of the proceedings it became necessary to empanel a jury. One worthy burgher, upon being called, requested the Court to excuse him, on the ground that he was affected with the *itch*, at the same time holding out his hands to the judge, and displaying the visible evidence of his cutaneous affliction. The judge, after closely inspecting the hands of the juror, directed the clerk as follows: "The Court decides that the juror's case is a valid one, and therefore directs that he be *scratched off*."

Reason requires culture to expand it. It resembles the fire concealed in the flint, which only shows itself when struck with the steel.

Time is the rider that breaks youth.

REMEDY FOR INDIGESTION.—Boil half a pint of white wheat three hours in a quart of water, or a little more if necessary. Drink half a pint of the liquid two or three times a week.

BEE T ROOT BREAD.—A baker of Vienna has made a discovery which may prove of high importance—the use of beet root in making bread. Two loaves, one consisting of one half, the other of five eighths.

beet root, the remainder being of wheat flour, were baked on the 30th October, and on the 20th November retained all the taste and appearance of a good household bread. The bread is made in the usual manner, only with less water and a little more salt. The beet root must be grated at the moment of making use of it.

CIDER.—The following recipe is said to be worth, to farmers, the price of a gross of our Almanac:—"Take a pint of pulverised charcoal, and put it in a small cotton bag, then put it in a barrel of new cider, and the cider will never ferment."

RATS.—To drive Rats from your premises, buy one pound of chloride of lime, and scatter it dry into every rat-hole and place that they visit, in the cellar and other parts of the house, in and under the cellar wall, and they will soon leave you. Don't put it on very near any articles of family provisions.

CHRONOLOGICAL SUMMARY.

The last No. of the Nova Scotia Almanac contains a summary of events which occurred in 1845, and in preceding numbers incidents are recorded from the earliest period of our provincial history, up to the commencement of that year.

During the winter of 1845-6, considerable interest was manifested—both in this Province and those of New Brunswick and Canada—in reference to the contemplated Rail Road between Halifax and Quebec, which gave promise of an early commencement of that great enterprise.

1846.—*January 1st.*—Exciting news reached Halifax, from the United States, relating to the Oregon Territory; with a report of a

great debate in Congress, on that question, and the adoption of resolutions to organize the militia and maintain the Oregon. A sum amounting to nearly £200 was realized at a Bazaar, for benevolent objects, held at Masonic Hall, Halifax, on New Year's eve, by the Ladies of St. Andrew's Church. 6th.—A festival was given at Windsor, to the scholars of the Wesleyan, Presbyterian and Baptist Sunday Schools, at that place; nearly 300 children attended on the occasion, and after the repast were addressed by Rev Messrs. Miller, Murdoch, and De Wolfe. 10th.—The Provincial Legislature was opened by Lord Falkland. 20th.—News received at Halifax, from England, announcing the resignation of the Peel ministry, and the assumption of power by Lord John Russell, and the principal members of the late Whig Cabinet; followed almost immediately by its abandonment, and by the re-installation of Sir Robert Peel, and nearly all his former colleagues. 21st.—Hon. William A. Black took his seat as a member of the Legislative Council. —The Hot House of the Horticultural Gardens, Halifax, was destroyed by fire; loss about £400. 28th.—Hon. S. G. W. Archibald, Master of the Rolls and Judge of the Court of Vice Admiralty, died, aged 60 years.—An exciting debate took place in the House of Assembly, on dispatches from the Colonial Secretary, relating to the Civil List and casual and territorial revenue of the province.

February 14th.—A highly interesting debate,—(which was continued in the House of Assembly for 6 days), on Mr. Marshall's Bill to disqualify Collectors of Excise and Customs and other officers from sitting in the Assembly,—was closed, and the Bill referred to a Committee of the whole House by a majority of 9. 15th.—H. M. Ship *Endymion* was struck by a squall, on her passage from England to Bermuda, which carried away her foretopsail yard, and seven men who were on it were dashed into the sea and drowned. 20th.—Important dispatches from the Colonial Office, on the Halifax and Quebec Railway, were laid before the House of Assembly, by the Hon. Attorney General, and subsequently published in the city papers. 22nd.—The 77th Regiment arrived at Halifax, from the West Indies. 23rd.—Wreck of the brig *Laurel*, of Halifax, which struck on a reef of rocks called "the Sisters;" the captain had his leg broken, several of the men were more or less injured, the supercargo narrowly escaped, one man was frozen to death, and the mate and another man drifted to sea in the jolly boat. 26th.—William Cash, a native of Kilkenny, Ireland, died at Antigonish, aged 106 years. 27th.—Dr. Thomas Sterling, of Halifax, died, on his passage from Halifax to Bermuda, on board the Mailboat *Roseway*. Barque *Catherine*, lost, on her voyage from Halifax to Liverpool, G. B.

March 3rd.—A letter in the Cross, from the Rev. Mr. McIsaac, of Chizetcook, stated that much distress prevailed among the poor people of that settlement. 8th.—The whale ship *Rose* returned to Halifax—after an absence of three years—with 1100 barrels of sperm and 800 of black oil.—The House of Assembly, in Committee, passed a Bill relating to the Treasury and funded debt, which also provided for the importation of a new plate, and a new issue of Province notes, to replace the old ones. 12th.—The 43rd Regiment left this garrison for England. 13th.—The Report of the Railroad Committee, and resolutions moved by the Chairman, (the Hon. Attorney General), were submitted to the House, recommending the necessary steps,—by surveys,

—by surveys,

estimates, correspondence with the Governors of New Brunswick and Canada, and other means—for promoting the success of the projected Halifax and Quebec Railroad. 16th.—A fire broke out in Barrington Street, Halifax, at an early hour in the morning. from the house adjoining Mr. Donaldson's new store, corner of George Street—and the inmates narrowly escaped with their lives. 17th.—Peter Spearwater, Sen. Esq., of Shelburne, lost his life by falling through the ice, in the neighbourhood of his residence. 20th.—Lord Falkland prorogued the Provincial Legislature, after a stormy and protracted session of ten weeks, which was marked by frequent exhibitions of party spirit, not only among the members but also from without; for questions of order; for manifestations from the gallery, and expressions of disapprobation, in some instances, towards members after adjournment.—A great scarcity of fuel prevailed at Halifax during this month; coal sold at from 9 to 11 dollars per chaldron, and wood at from 23s. to 30s. per cord. 30th.—A ship of 500 tons burthen, called the Barbara, was launched at Lyle's ship yard, Dartmouth.

April 8th.—A dwelling house and a large steam house on the Cape known as Foster's Farm, Annapolis, owned by Mr. Samuel Harris, were destroyed by fire., 13th.—John Campbell, a private of the Rifles, was tried in the Supreme Court, Halifax, for the murder of his wife, by a blow on Christmas eve with a scrubbing brush, she being in a state of intoxication, and using unwarrantable means to obstruct and provoke him while performing his work in the barrack room. The case excited much interest, and from the nature of the evidence the general opinion, and also that of the Court, appeared to be that Campbell was not actuated by malice. The jury returned a verdict of not guilty, and the prisoner was discharged. 18th.—An Address was presented to the Rev. William Cogswell, Curate of St. Paul's Church, Halifax, signed by upwards of 60 of the Parishioners, previous to his absenting himself "for a period from the scene of his labours and usefulness" for the improvement of his health. 19th.—Barque Lady Falkland, of Yarmouth, lost at sea, in consequence of coming in collision with the Martha, of Gournsey; the captain and crew narrowly escaped. 24th.—A tremendous gale was experienced at Canso—a number of vessels were driven ashore.—Hon. Alexander Stewart appointed Master of the Rolls for the Province of Nova Scotia. 26th.—Six buildings were destroyed by fire, which broke out at McGill's cooper's shop, in Lower Water Street, Halifax. 28th.—The corner stone of Salem Chapel, Argyle Street, Halifax, was laid by the Rev. Dr. Belcher, with appropriate ceremonies.

May 1st.—The steamship Unicorn sailed from Halifax, with her first mail for Newfoundland. 3rd.—News received at Halifax, of the adoption of resolutions in both Houses of the U. S. Congress for the amicable settlement of the Oregon question, and of a formal declaration of war, by the Mexicans, with the United States. 5th.—The remains of the Right Rev. Dr. Burke were disinterred from the grave where they had rested for so many years in the old Catholic Burial Ground, Halifax, and transferred to the little Chapel in the new Cemetery, and on the 6th were again committed to the earth with due solemnity. 7th.—The schooner Ellen Jane, with a valuable cargo, destroyed by fire in Halifax harbour. 11th. Hons. D. Crichton, of Pictou, H. G. Pineo, of Pugwash, and J. E. Fairbanks, of Halifax, were appointed members

of the Legislative Council. 13th.—A narrative of the wreck of the Brig. C. W. E. R., and sufferings of her crew, was published in the Morning Post of this date. This vessel sailed from Halifax, Aug. 8, 1845, for Demerara; on the 19th she was struck by a heavy squall and became waterlogged—the crew remained on board, in a state of extreme suffering from constant exposure and short allowance, (their food consisting chiefly of onions and molasses,) until the 30th; when they were taken off by the ship Eupharasia, of Newburyport, Capt. Charles Buntin, from Baltimore, bound to Valparaiso. After remaining on board of the ship nearly four months, they were landed on the 29th December, at Talcahuana, in the neighbourhood of Cape Horn, and were provided for by the British Consul at that place, by captains of whaleships that were there, and some friends who got up a subscription for them. 15th.—News received at Halifax of the commencement of hostilities between the American and Mexican armies, on the Rio Grande.—Mr. Lewis Smith was gored to death by a large English Bull, at Port Hood, C. B. 24th.—Charles Williams was stabbed at Windsor, with a butcher's knife, (by a person named Joseph Bennett,) which caused his death. 26th.—A public meeting was held in Pictou, for the purpose of taking some action to prevent the desecration of the Sabbath, consequent upon the post office arrangements. 27th.—The schooner Nonpareil was launched at Lower Horton; intended as a packet between Windsor, Horton and Parrsboro'. 28th.—The corner stone of the Catholic Church at Ferguson's Cove was laid by his Lordship the Right Rev. Dr. Walsh, assisted by the Rev Messrs. Connelly, Doyle, Nugent, and McIsaac. 30th.—Messrs. A. T. Seamen's steam mills, at Minudie, Cumberland, were totally destroyed by fire. Loss about £1000.

verpool, G B, on every alternate Saturday in Dec., Jan'y., Feb'y and March; and on every Saturday in the other months of the year.

The Mails for the United Kingdom are despatched from Halifax, every alternate week in the months of January, February, March and April; and in every week during the remaining months of the year. The Mail Steamers leave New York and Boston for Halifax, alternately, every Wednesday in May, June, July, August, September, October, November, and December, and every alternate Wednesday in the other months of the year:—arrive at Halifax, from Boston on Thursday, and from New York on Friday, evenings, or very early the succeeding mornings; and leave immediately for Liverpool. The Mails are closed at Halifax on Thursday and Friday evenings, alternately, at 9 o'clock. Should the Steamer arrive before that hour, the Mail is closed immediately upon her arrival. Letters are forwarded *via* United Kingdom, to Austria, Azores, Australia, Baden, Bavaria, Belgium, Bohemia, Brazil, Buenos Ayers, China, Constantinople, Cracow, Denmark, Egypt, France and Algeria, German States, Gibraltar, Hamburg, Hanover, Helligoland, Holland, HongKong, Hungary, East Indies, Ionian Islands, La Plata, Lubec, Madeira, Malta, Mauritius, Naples, New Grenada, Northern States of Europe, New South Wales, New Zealand, Oldenburg, Papal States, Poland, Portugal, Prussia, Sardinia, Spain, Turkey, and Van Dieman's Land.

The Mails for the United States are made up immediately on the arrival of the Mail Steamer from Liverpool.—Postage on letters 4½d. and newspapers, 2½d.—Must be pre-paid.

The Mails for Bermuda are made up on the arrival of the Mail Steamer from Liverpool bound to Boston. Letters are forwarded *via* Bermuda, for Chagres and the Pacific, Chili and Peru, Havanna, Honduras, Laguayra, Mexico, Venezuela, and the British and Foreign West India Islands.

The Mails for Newfoundland, (and Cape Breton during the summer months), fortnightly, are made up on the arrival of the Mail Steamer from Boston, during the months of May, June, July, August, Sept., Oct., Novr. and Decr.; and on the arrival of the Mail Steamer from Liverpool, during the months of Jan'y., Feb'y., March, and April. Letters for St Pierre and Miquelon are forwarded to Sydney, C B, from whence they are despatched by the French Packet.

The Land Mails (by Eastern Route) for Amherst, Antigonish, Arichat, Guysborough, Londouderry, Merigomish, New Glasgow, Parrishoro, Port Hood, Pugwash, Plaister Cove, Pictou, St Peters, Sydney, Truro, Wallace, Prince Edward Island, New Brunswick, Canada, and the United States, are made up on Wednesday and Saturday afternoon at 4 o'clock; and for Gay's River and Shubenacadie, on Wednesday afternoon at 4 o'clock—arrive from on Monday and Friday morning at 10 o'clock.

The Land Mails (by Western Route) for Windsor, Wolfville, Kentville, Lawrencetown, Bridgetown, Annapolis, Digby, Weymouth and Yarmouth, are made up on Monday and Thursday afternoon, at four o'clock (and arrive from on Monday and Friday morning at 10 o'clock); for Newport, Windsor, Wolfville and Kentville on Tuesday morning at 8½ o'clock; and for Windsor only on Wednesday, Friday and Saturday morning, at 8½ o'clock.

The Land Mails (by Shore Route) for St Margaret's Bay, Chester, Lunenburg and Liverpool are made up on Tuesday and Friday afternoon at 4 o'clock; and for Bridgewater, Barrington, Shelburne, and Yarmouth on Tuesday afternoon at 4 o'clock—arrive from on Wednesday and Saturday morning, at 11 o'clock.

STAGE COACHES AND STEAMERS.

The British and North American Royal Mail Steam Packets leave Halifax for Liverpool, G. B., every alternate week during the months of January, February, March and April; and in every week during the remaining months of the year.—Leave for Boston and New York, alternately, every alternate week in the months of December, January, February, and March; and every week in the remaining months of the year. Hon. S. Cunard, Agent at Halifax.

A Steamer (carrying H. M. Mails) runs between Halifax and Bermuda, fortnightly, leaving Halifax immediately after the arrival of the Mail Steamer from Liverpool, G. B., bound to Boston. Hon. S. Cunard, Agent at Halifax.

A Steamer (carrying H. M. Mails) runs between Halifax and Saint John's, Newfoundland (calling at North Sydney, Cape Breton, going and returning, during the summer months,) leaving Halifax immediately after the arrival of the Mail Steamer from Boston, during the months of May, June, July, August, Sept., Oct., Nov., and Dec.; and on the arrival of the Mail Steamer from Liverpool, G. B., during the months of Jan'y, Feb'y, March and April. Honble. S. Cunard, Agent at Halifax.

Steamers, during the Summer Season, run between Windsor and St John, N. B.; and Annapolis and St. John, N. B.; and from St. John to Eastport, Portland, and Boston; and also to Fredericton & Woodstock.

The Steamer "Rose" runs during the Summer Season between Picton and Charlottetown, Prince Edward Island, carrying the Mails and Passengers.

A Sailing Packet runs between Windsor and Parrsboro'; and Lower Horton and Parrsboro', from the 1st of April to Christmas. B DeWolf & Son, Agents at Windsor.

The Liverpool Packet, Matt. McLearn, master, runs weekly between Liverpool and Halifax.

Western Royal Mail Coach.

King & Ingles, Contractors.

Leave Halifax—On Monday and Thursday afternoons at half-past 4 o'clock, for Windsor, Kentville and Annapolis.

On Tuesday morning at 9 o'clock for Windsor and Kentville.

On Wednesday, Thursday, Friday and Saturday mornings, at nine o'clock, for Windsor.

ADVERTISEMENTS.

TO INVENTORS AND MECHANICS.

Fifth Year of the best Mechanical Paper in the World!
A NEW VOLUME OF THE

SCIENTIFIC AMERICAN

Is commenced about the 20th of Sept. each year, and is the best paper
for Mechanics and inventors published in the world.

Each volume contains 416 pages of most valuable reading matter,
and is illustrated with over 500 Mechanical Engravings of new inven-
tions. The Scientific American is a Weekly Journal of Art, Science,
and Mechanics, having for its object the advancement of the interests
of Mechanics, Manufacturers, and Inventors. Each number is illus-
trated with from five to ten original Engravings of new Mechanical
Inventions, nearly all of the best inventions which are patented at
Washington being illustrated in the Scientific American. It also con-
tains a Weekly List of American Patents; notices of the progress of all
Mechanical and Scientific Improvements; practical directions on the
construction, management and use of all kinds of Machinery, Tools, &c.

It is printed with new type on beautiful paper, and being adapted
to binding, the subscriber is possessed, at the end of the year, of a
large volume of 416 pages, illustrated with upwards of 500 mechani-
cal engravings.

Terms: Single subscription, \$2 a year in advance; \$1 for 6 months.
Those who wish to subscribe have only to enclose the amount in a let-
ter, directed to

E. G. FULLER,
33, Hollis Street, Halifax.

FULLER'S GENERAL PERIODICAL LITERATURE AGENCY.

DEPOT AT THE AMERICAN BOOK STORE.

E. G. FULLER begs to inform his numerous patrons and the public generally, that he still continues to furnish the following Periodicals, at the prices affixed.

Subscriptions invariably required in advance, and to be paid in United States currency, or its equivalent.

No. 31 AND 32, RAZOR ROW,
Upper Water Street, Halifax, N. S.

Star Life Assurance Company.
CHIEF OFFICE, 44 MOORGATE STREET, LONDON
CAPITAL, £100,000 STERLING.

Ninety per cent of the Profits divided among the Policy holders,
ENTITLED TO PARTICIPATE.

THIS COMPANY at their fifth annual meeting in April last, declared the first Bonus, which has equaled any and surpassed most other companies in London, as the annexed scale will show:

Age at date of policy.	Sum Assured.	Amount paid to the office.	Bonus added to sum insured.	Amount now payable at the death of the Assured.
25	£1000	£106 9 2	£ 76 8 2	£1076 8 2
35	1000	139 15 2	85 7 1	1055 7 1
45	1000	188 10 10	98 0 0	1098 0 0
55	1000	283 19 2	122 18 9	1122 18 9
65	1000	418 2 6	169 1 7	1169 1 7

Two Policies at this Agency, on which three annual Premiums only had been paid, had a Bonus added to them of upwards of 60 per cent. on the amount paid in—the class of persons hitherto insured at the “Star,” being generally regular living and temperate persons, the average number of deaths have been found 21 per cent less than had been allowed for. This Society is chiefly, but not by any means exclusively, devoted to the Assurance of the lives of members of the Wesleyan Societies, and of the friends and hearers of that religious connection. Assurances however, are effected upon all assurable lives, and the rates will be found as low, if not lower, than other companies.

The following are some of the Annual Rates, for £100 Assured:

Age.	With Participations.		Without Participations.	
	Whole Life.	One Year.	Seven Years.	Whole Life.
15	£1 13 2	£0 17 0	£0 19 5	£1 11 8
20	1 17 4	0 19 5	1 2 0	1 15 1
25	2 2 7	1 3 4	1 5 1	2 0 1
30	2 8 9	1 7 1	1 8 9	2 5 10
35	2 15 11	1 10 9	1 12 11	2 12 6
40	3 4 11	1 14 5	1 16 10	3 1 0

On Policies for £500 or upwards, for the whole term of life, the parties have the privilege of a credit for one half the amount of Premium, for the first five years.

The restrictions and privileges in this Society are much the same as others.

The attention of the public, and particularly of the Wesleyan Body in this Province, is requested to this advertisement; it being positively the duty of every person (having others dependent on them) to insure their lives, and so uncertain is life and health, that delays are often found to be most disastrous. The only time to Insure is while health is enjoyed.

Prospectuses and all necessary Blanks furnished gratis, by the agent at Halifax.

MORRISON'S UNIVERSAL MEDICINE,

Sold in Halifax, only by A. & W. MACKINLAY,
 General Agents for Nova Scotia.

Published by James Dawson & Son, Picton,

THE HARMONICON,

Third Edition, containing Fifty additional Tunes, and a new Introduction.

The sale of two editions of the Harmonicon has sufficiently proved its utility and popularity as a collection of Sacred Music, suited to the use of the churches in British America. In preparing the present edition, however, the publishers have not rested satisfied with the past success of the work, but have made improvements which they trust will greatly increase its usefulness and extend its circulation.

The "Introduction to Vocal Music" of former editions has been replaced by the excellent "Elements" of the Boston Academy's collection which the Editors and Publishers of that work have permitted to be reprinted for the Harmonicon.

More than fifty carefully selected tunes and pieces have been added to the work, and above half that number of tunes omitted, which had fallen into disuse since the former editions; and it is to be hoped that the present edition will be found to be free from such blemishes.

This edition is printed from *new stereotype plates*, on good paper, and is strongly bound.

Sold by the Publishers in Picton, and by Messrs. A & W. MacKinlay and C. H. Belcher, Halifax. Price FIVE SHILLINGS.

Life and Fire Insurance.

ARCHIBALD SCOTT, AGENT AT HALIFAX.

FOR THE FOLLOWING COMPANIES:

Office No. 30, Bedford Row.

Eagle Life Insurance Company of London, established in 1807. Assets of this Company exceed half a Million Sterling, exclusive of the paid up Capital—4-5th of Profits divided to Policy-holders every five years. Premiums paid quarterly, half-yearly, or annually. Medical Examiner, Matthias Hoffman, Esq, M D.

Connecticut Mutual Life Insurance Company of Hartford, Established in December, 1816. Medical Examiner, Robt Hume, Esq, M D. This Company makes Annual Division of the whole Profits from the excess of a Capital already obtained of \$200,000, and which amounted last year to 60 per cent of the premiums paid.

When the premium amounts to \$50, half need only be paid.

Married women may insure the lives of their husbands, free from all demands of Creditors, and if the wife dies before the husband the policy continues and goes to her children at his death. Policies issued from December 1846 to September 1849—6000.

Insurance may be effected with this Company, against the dangers of a voyage by Sea, *without taking out a Life Policy.*

Etna Insurance Company of Hartford. Capital \$250,000.

Hartford Fire Insurance Company of Hartford. Capital \$200,000.

Protection Insurance Company of Hartford. Capital \$300,000.

These Companies were incorporated in the years 1810, 1819, and 1825, and have acquired a high character, for promptness and liberality in settling losses, and continue to insure Real Estate and personal property against *Loss or Damage* by fire.

Blank forms of application, and every information afforded to part desirous of insuring, by the above named Agent, whose whole attention is bestowed to Insurance business. Halifax, N S, 1850.
