to criticize harshly the methods of one who started out to evangelize the world by excluding the unregenerate and the unbelievers from his meetings, and had the managers of Mr. Ames Land sale, the Gafway ranch lease, stuck to their programme of handpicking the audience the appearance of the honorable gentleman would be entitled only to the notice customarily given to entertainers who hold the boards in that and other playhouses. But as the public were warmly urged by the party press to become partakers in the repast it may not be exceeding the privileges of hospitality to say a word about the viands provided; the more so that the portion which fell to the public was the crumbs which remained after the faithful had

been provided for. The speech of Mr. Ames is pretty well known to readers of the Bulletin It is the speech he delivered once or twice in the House last session; which he delivered later in the Province of Nova Scotia, and which he later called into service in the Provincial elections in Saskatchewan, with thoroughly satisfactory results-to his oppon ents. The speech is illustrated by magic lantern views of forest, lake, stream and prairie, varied by reproductions of letters and documents from the files of the Department of the Interior. The subject matter o the speech is an elaboration of Mr. Ames' suspicion that favoritism was shown by the Government in disposing of timber limits and land to certain parties. That favoritism was shown Mr. Ames scarcely says, though the scarcely is sometimes difficult to

discern. What he says is that he thinks it was shown, and the purpose of the speech and the scenery is to tell why he thinks so In the short period allowed under the old regulations for advertising a limit, he professes to see an advantage to one bidder over another; in the fact that two or more cheques were used to make up the amount of a tender he professes to see signs of official collusion: and on this slender basis of his personal suspicion he invites his auditors to found a general conclusion that the public resources have been bestowed on friends of the Government this appears to be the sum and sub-

There is first the explicit, clearcut: emphatic denial of Mr J.
