THE EARTHQUAKES. -- We publish this morning an account of the earthquakes at San Francisco on the 21st ult, which reached us yesterday by overland mail, at the same hour that the writer arrived here per steamship Active. The letter is one of the series of editorial notes of travel which we have published from time to time during the past six months. Since the letter was written, frequent shocks have occurred, and many buildings damaged by the first shock have sunk so much as to be pronounced unsafe. slide out into the bay, in which case the loss would reach \$60,000,000. The members of the Chamber of Commerce-Messre Raiston. Friedlander and Otis-who telegraphed to New York that the damage was only \$300,-000, are the laughing stocks of the city. The object of this low estimate was to prevent a panic among Eastern capitalists whose means are invested in mortgages upon San Francisco property ; it had, however, a contrary effect. The great city presents sad appearance, One-third of the brick

The Thompson Indian Mission.

EDITOR COLONIST,-Will you kindly allow me through your columns to express my res gret that owing to the recent political ferment it has not been possible to organize the public meeting spoken of by you in a late issue, when it was suggested that I should repeat the address delivered at the Angela College in connection with the Thompson Mission, now under my charge. As I have to return home by to-morrow's Enterprise, I shall take the liberty of soliciting during the day such articles of use and comfort for the Indians under my care, as the charitably disposed may see fit to bestow. As to backing down on Confederation the speaker repudiated it, and gave his explana-tion of the source pursued at the Yale Con-vention, which he held was legitimate. It was when he found that nothing could be done at present with Confederating the Colony with Canada that the matter was dropped. [At this juncture there was high talk about lunatics,' ' asses,' &c., which it was feared ould create much angry feeling.] Mr DeCosmos said his principles would bear in-vestigation ; if they did not, he did not wish restigation ; if they did not, he did not with to be returned—be would support a non-sectarian school system—he was in favor of taxing animproved and unoccupied lands— look for instance, said Mr DeCosmos—from the Indian Beserve to Parson's Bridge! My policy, if elected, would be, not to shape a policy to the injury of any of our interests— a discriminating tariff that would foster every

interest to the injury of none; he totally denied the accusation with trying to sell the Colony at 80 cents a-bead. [We understood the speaker to explain that in regard to the latter there would be a revenue of something like \$24 per head per annum.] Mr Bishop wished to know that in the event of Mr DeCosmos being defeated, whether Mr Green had not the intention to hand over the district, and if Mr DeCosmos had not supplied funds for the purpose. In a previous letter I stated that the only obstacle to the immediate extension of the Dominion westward, was the slatus of the Indson Bay Company to the Northwest fore the I Imperial Government, will sauction their incorporation with Canada; and in rder to get around this difficulty and clean the way for the negotiations, the very last act that passed the Imperial Parliament prior to its dissolution was one empowering the Canadian Government to negotiate and close with the Hudson Bay Company for the immediate extinction of their claims; in case of the disagreement of the contracting parties, the act populitutes the Imperial Government the arbitrator. This arrangement has been accepted by both the Canadian Government and the Hudson Bay Company, and the former only await the termination of the ations in England to send home a delegaion to meet the magnates of Fenchurch street. (this month) The elections will be over in Oct. The delegation will probably leave here in November, and commence operation December hand so deeply are the sympathie of the Canadian people enlisted in our so anxious are they to restore to us our o stitutional privileges that no sacrifice on their part that will ensure our speedy deliveran will be deemed too great, and any unnecessary delay in the negotiations, would render the Canadian Government so anpopular as to compel its retirement. But there hesitancy on the part of Sir John A Mac donald and his Ministry in this matter ; they are as wide awake as the most patriotic Br Columbian to the importance of including the whole of British North America in one grand Confederation. It is the policy of the party now in power, and the necessary delay hich has already occurred in arranging preminaries has been seized upon by the be a change of Ministry. With then the two great parties, of the Dominion committed to our interests, the Imperial Government afford-ing every facility for the transfer, and the

UNION HOOK AND LADDER CO.-At a the golden eggs. For how does the present system work ? In the first place it makes Victoria the dearest place to live in on the North Pacific Coast, and our neighbors accustomed to the prices of Portland and San Francisco complain of the charges of our hotels and restaurants. (I think we heard of this last summer) In the next place the weight of the taxes falls principally upon these least able to pear it. The poor man pays nearly the same amount as the rich man, while the man with a large family contributes out of all proportion set towards wthe general

revenue. Let all consumers beat in mind that out of every hundred dollars spent in providing the absolute necessaries of life, they contribute at least twenty towards the revenue. Lat it also be remembered that merchants doing a large business, and the holders of property, pay taxes only on what each individually consumes. and unless they are very self-indulgent contribute no more to the revenue than the poorest man in the colony, while absentee, holders of property, whether receiving rents, or holding it as a speculation, pay nothing at all. While considering this, let us at the same time

compare our present prospects with those that might fairly be expected under the old free port system ; and I think that all will agree with me that even the two candidates who in their addresses have bronght the matter of the revision of the tariff most prominently forward, do not at present go far enough. Now let ns

see what will be the loss to the colony, if the Island is made a free port, and how it can be made np. I think it can be made up very easily, but here I would speak with diffidence, trusting that this matter may be taken up by some one more able

than myself. Comparing the amount of goods entered at New Westminster for the quarter ending the twenty-fifth o June 1866, and calculating the duties

according to the present tariff; the duties collected at that port before the Union of the colonies amounted to about \$79,600; the duties collected for the united colony in the corresponding quarter of 1868 amounted in round numbers to about \$90,000. The difference between these two amounts may, I think, be fairly taken as an estimate of the proportion of duties borne by this portion of the colony.

The amount to be made up is then about \$19,400 per quarter, or say about \$80,000 per annum. Now, in 1866 the revenue derived from landing permits, the real estate tax and trade licenses, amounted Sold by all Druggists and Stores, at 25 and 60 ons. and

The expense of establishing a market would be small, and the advantages. and consequent profit, would be such as amply to repay those who undertake to set it on foot. To the Corporation there can be no doubt that a market would be a source of revenue in a short time, and in view of the low value of land at present, it seems desirable that no time should be lost in commencing an undertaking which is generally admitted to be much needed. Another matter of equal importance, and of more paramount necessity, so far as public bealth is concerned, is the establishment of a proper system of drainage for the city. with a liberal supply of water for sanitary purposes as well as for use in case of fire : the necessity of these things has often been pointed out to the Corporation, we allude to them again on the eve of a Municipal election, for the purpose of drawing the attention of all good citizens to thenecessity of urging some of the most active and energetic business men amongst them, to come forward in order to inaugurate reform and proper management in Municipal matters, there are many who have time to spare for the public service, and who have energy to take an active part in carrying out improvements in the city, such men should be sought out and brought to the front; it has often been a matter of difficulty to find citizens willing to serve in the Municipal offices, this would probably be otherwise were more interest displayed by the people in matters which affect their comfort and well being. and the health of themselves and their families. I hope, sir, I have made it as clear to many of your readers as it is to myself. how desirable and feasible a return to the old system of unrestricted trade is at present, and when I add, that it is a re-form within our reach, that it is a question that may be calmly debated in Legisla-tive Conncil by all members, official and unofficial, and can be desided at once by the good sense of the majority, I think I have said enough to show that it is a question which may now be fairly agi-tated.
