

FILE 388

HIA - HIX

28th March 1938

My dear Dr. Higgins,

I have passed on to Dean Fleming your letter about Mr. George Humphreys, who desires to apply for admission into the School of Medicine. As you know, they always have a great many more applicants than they can accommodate. I am asking Dean Fleming to consider the case sympathetically and I hope that Mr. Humphreys can meet the qualifications for entrance.

Dean Fleming will write to you himself. I am sure they will need to have complete details of his education up to now, in order to find out whether he is qualified. Out of a long experience, the School realizes that it is not in a man's own interests to allow him to enter unless he has a fair chance of keeping up to work required of him.

Yours very sincerely,

Dr. C. H. Higgins,

Mr. L. W. Douglas
Principal, McGill University
Montreal, P. Q.

Dear Mr. Douglas:

Thank you very much for your letter of the 28th,
and I have just received a letter from Dean
Fleming.

I have taken the matter up with Mr. Humphreys
and he feels that the expense of going to McGill
will be greater than he can afford, as he must work
his way through, getting but little help from his
mother.

From present indications it is quite possible
that he will defer any action until another year.
Meanwhile if anything develops in this, I shall
see that you are advised.

Wishing you and yours a Happy Easter, I am,

Yours very truly

Chas. H. Higgins

Hiram W. Hixon Esq.,
115 East 82nd Street,
New York, N.Y.

Dear Mr. Hixon:-

Please accept my best thanks for your letter of May 27th, as well as for the reprint of your article entitled "Is the Earth Expanding or Contracting"; together with the accompanying photograph of the moon's surface.

The conditions of the deeper part of the Earth's crust are as yet unknown, but investigation is gradually, year by year, throwing additional light upon them, and I hope that eventually we may be able to unravel the tangled skein and understand the many problems which present themselves in connection with the investigation of this subject.

Again thanking you for your interesting communication,

I remain, dear Mr. Hixon,

Yours very sincerely,

Acting Principal.

Dear Mr. Hixon:-

Please accept my best thanks
for your kindness in sending me the typewritten
copy of your interesting article entitled "Is the
Earth Expanding or Contracting"?

I have read this through with
much interest and have, following your request,
passed it on to Dr. J. Austin Bancroft, Dawson
Professor of Geology at McGill University.

Again thanking you,

I remain,

Yours very sincerely,

Acting Principal.
