Although representing no particular Church the Rev. Joseph Cook of Boston, United States, received an ovation at the ecent meeting of the Congregational Union. Anyone who has read his famous "Monday Lectures" cannot be surprised at this. In response to loud calls Mr. Cook briefly addressed the meeting in a speech full of point and pith. Speaking of religious life in America he said he believed there was not more than one hypocrite in twelve. He did not regard that state of things as hopeless: at any rate it was not so in the days of the Apostles. The one traitor, however, amongst the the twelve Apostles did have the grace to go and hang himself. way in which the Roman Catholic clergy in Belgium are fighting the free schools shows some curious facts. The Vicar of Izel, to take one instance, has been " instructing" the boys and girls in his confirmation classes that it is a religious duty to disobey their parents if their parents tell them to go to the Government school. The parish priest of Cross-Fays informed his congregation from the pulpit that fathers and mothers would do much better for their children if they allowed them to run about the streets and the fields all day, than if they sent them to schools which were not under the religious rule of the Church. "If wives cannot persuade their husbands to remove their children from such schools," said he, "it is the duty of the wives to separate from such husbands." In many places the priests directly inform their hearers from the pulpit that every educator who derives his or her mission from the State is a recurse of God: and the children are taught screams and yells when they met her out ed to that class of sinners who sold their souls to the devil for a couple of francs; the teacher was giving his lessons, in order that none of his devilish doctrines might enter into them and destroy their

A BROKEN WING.

I walked in the woodland meadows, Where the sweet thrushes sing, And I found on a bed of mosses A bird with a broken wing. I healed the wound, and each morning It sang its old sweet strain; But the bird with a broken pinion Never soared as high again.

I found a youth's life broken By sin's seductive art, And, touched with Christ-like pity, I took him to my heart He lived with a noble purpose And struggled not in vain; But the soul with a broken pinior Never soared as high again.

But the bird with a broken pinion And his life that sin had stricken Raised another from dispair. Each loss had its compensation, There are healings for each pain; But a bird with a broken pinion Never soars as high again.

WHY SHE NEVER DRANK WINE.

"Of course we must have wine. Just think how perfectly shabby it would

The remark was made by a beautiful girl as she danced out of the conservatory with a spray of pink blossoms in her band.

"It is my first party, and I want everything splendid. And auntie," turning to a sweet-faced woman, with large, love-gleaming eyes, and an almost alabaster purity of complexion, "you must wear that rose-colored brocade. It is just the rage now, and your hair will trim beautifully. I am so glad we are to have plenty of flowers."

Helen Brayton was just from school, where she had been since she was ten years old. Of course she knew little of life; but her father was a wealthy man, without an interest in Christ. As I and her dream of "everything splendid" was about to be realized. Aunt Agatha was her mother's sister, a scholarly woman of whom she knew little, save that she was a trifle eccentric, giving away nearly all of her income and never so much as touching wine.

Mrs. Brayton leaned back in her luxurious chair, and rested her eyes with a mother's delight on Helen's face.

"If we have wine, Aunt Agatha cannot came," was said slowly.

"Cannot! Why so?" with a shrug of her pretty shoulders. "She will not be obliged to taste it."

Mrs. Brayton beat her satin-slippered foot against the Persian carpet. It was a question she could not decide. Mr. Brayton had given her carte blanche. He had not time to attend to it, he said. In calling in Agatha she had not thought | first to speak. of wine. With exquisite taste and wonderful tact in arrangement, her services would be invaluable. All the morning she had been trying to persuade the really elegant woman to consider this as an exceptional case. Not that she cared for it: neither did Mr. Brayton. But what would people say? Mrs Brayton was not one with moral courage to oppose Madame Grundy. She could not endure to be called shabby, especially when the money in hand would enable

her to be profuse. All the while Helen stood at the back of Aunt Agatha's chair talking of the pink and silver brocade. "Nobody will know it was ever worn. I am sure it would never show a seam."

A servant entered bearing a silver waiter, and on it a small card. Helen colored, and Mrs. Brayton excused herself and went down to the parlor.

"Do say you will not mind this time, auntie?" plead Helen.

"And thus break my promise?"

"Did you promise, auntie, never so much as to drink a drop?"

"I promised never so much as to

drink a drop; neither would I stand by and see another drink." "That is going a little too far, I think,

auntie. If another drinks it will not hurt us."

"I am not so sure," returned Aunt Agatha. "Whose card was that Dick brought in ?"

"Henry Fargo's," answered Helen; with a vivid blush. "If Henry Fargo should drink wine

to excess, would it not hurt you?" "O auntie! he never could," with a

face from which all color had fled,

"If I have been rightly informed, one of his brothers died a drunkard." persisted Agatha Fleming. "That was Will. He was always a

Thus it went on until ones. he was ready to establish himself in business, and I was looking forward to becoming a happy bride. One night there was a quarrel, in which Herbert struck a brother lawyer and himself received a fatal stab in return. They had been drinking to excess, but when I reached Herbert be was rational. Never shall I forget his face as he said, "The doctor says I must die. If I had never tasted wine, Agatha, this would not have been.'

"They had not told me that the wound was fatal. I buried my face in the pillow and sobbed outright. In that moment I would gladly have given my own life could I by that means save Herbert. My agony made him worse. They took me from him, and only permitted me to return when I promised to command myself. When I entered the room Herbert was lying with his eyes shut. As I approached I saw that his lips moved. Was he praying? I tried to think so, for I had been brought up to think it was a dreadful thing to die kneeled by his bedside he put out his hand.

"'I have asked God to make it easy for you, Agatha. You warned me against drink; but I did not see the danger. Now I must die. But you will think of me sometimes, and, thinking of me, you will not fail to warn others against wine.

"I had promised to be calm, and to be calm I tried to point him to Christ. I cannot tell just how it was, but in death there was a smile on his face, as though at the last he caught the gleam of celestial wings. The thief on the cross received assurance-" This day shalt thou be with me in paradise.' I trust it was so with Herbert."

Silence brooded over the room. Helen did not lift her head. Agat hawas the

THE BRICKLAYER AND PARSON.

A Manchester curate, walking along street in the dinner-hour, passed a lot of bricklayers smoking their pipes, and he heard one of the men say :

"I'd like to be a parson, and have now't to do but walk along in a black coat, and carry a walking-cane in hand, and get a lot of brass."

There was an approving laugh all around, whereupon the curate turned quietly around, and the following conversation ensued:

"So you would like to be a parson? How much do you get a week?"

"Twenty-seven shillings." "Well I am not a rich man; but I will give you twenty-seven shillings, if you will come with me for a week and see what my work is like."

The bricklayer did not like the proposal, but his mates told him it was a fair offer, and he was bound to accept it. So he reluctantly followed the parson down an alley, 🖘

The man hesitated.

"O, but you promised to accompay me wherever I went," urged the curate. "And where be you going next?" asked the bricklayer.

"To see a poor family huddled in one room, with the father dead of scarlet tever in it, and themselves all down with it; and, after that, to see another parishioner with typhus. And to-morrow there will be a longer round."

Thereupon, the bricklayer begged to be let off. Twenty-seven shillings would be poor pay for that kind of work, and he promised he would never speak

THE TOMB OF THEMISTOCLES.

As if to have stood on the Plain of Marthaon was not enough for one day's delight, we must needs start off after dinner (and by train, too, on the only railway in Greece!) to the Piraus, to place of the man who, whatever his faults, was the first to see what Athens had it in her to accomplish, and to open her eyes, and guide her hands to the fulfilment of her destiny. Making our way as best we could in the darkness past the shipping and the dockyards. then through the straggling houses, which lie scattered above the harbor to seaward, and where, each house being provided with a fierce and obstreperous dog, we had some difficulty in escaping with a whole skin, we at length came out upon a narrow foot-path leading through waste moorland along the seashore. A scramble of five minutes or so through boulders brought us to a point where the coast turned slightly southward, and left us looking across south-west to the island of Salamis and the mountains of the Morea. Hard by lies the great Athenian. His tomb commands the scene of the battle, which rivals the fame of Marathon, and which would hardly have been fought at all save for him. Hitherto the night had been dark, and the moon chary of her light; but now, as we looked, she shone forth triumphantly, and amid flocks of white cloudlets, which here and there relieved the blue-blackness of the heavens. At our feet gleamed the dark waters of the gulf, just trembling in the breeze, and beyond the gleam the cone of Ægina rose sheer into the silent air-Ægina, the eye-sore of the Piræus.' Behind Ægina, and sweeping round to the right, loomed the hills of Argolis and Achaia. Nearer at hand lay Salamis, her jagged outline well defined against the sky. Between her and the shore little Psyttaleia, whose name lives in the record of the battle, asserted its existence by the steady ray from its light-house, shining across the mouth of the harbor. Looking inland, the lights of the Pirseus added to the scene fresh interest, both of picturesqueness and of association, as showing that not less now than in old days, the place was full of the stir and hum of men.— Blackwood's Magazine.

Etta went to Johnnie, still waiting for the atlas, with a slow step. These two demands upon her time would take up the afternoon, and she had planned a visit to a dear friend whom she had not seen for some weeks. But she went about her tasks, nevertheless, and soon dismissed Johnnie, who ran off with his nicely covered atlas, and an emphatic assurance that she was "the best sister in all the world.

Then she sat down to the embroidery, but this progressed so rapidly that by four o'clock the last stitch was taken. and Etta folded up her work with a we have nothing nice for tea. I would ask Hannah, but you know how cross

"Oh, mother!" said Etta, "I was going to see Mary Ames. Couldn't Carrie or Sarah make the biscuit and cake this time?"

"I asked Carrie first, but she said she was too tired to do anything," replied her mother. "As for Sarah, you know how careless she is. She would let the biscuit burn, and forget to put molasses in the cake, I dare say. No. Etta. if you don't do it I must."

This was enough. Down to the kitchen went Etta, thinking regretfully of her friend, and the pleasant hour they would have had together. But the weighing, measuring, and mixing soon engrossed her attention, and it was not pay our homage at the last resting until after five that she was able to escape to her own room, to make herself presentable. Meanwhile her sisters sat in the parler, attired in cool lawn dresses and all ready to entertain the Selwyns when they arrived. By the time Etta had made her toilet, another summons came from her mother. "Etta, dear, won't you just see that the tea table is nicely arranged? Margaret is so careless sometimes." So Etta paid a visit of inspection to the dining room, and there found enough to occupy her

for some additional time. When at last the guests were summoned to the prettily spread and tempting meal, Etta was hardly noticed as she slipped into her place, while Carrie and Sarah engrossed the attention of the visitors. But she did not repine at this, because it was always so, and she remained in the dining room when the repast was finished to attend to the va rious duties, as was her went, without a murmur. It was so natural, such a settled custom, that she should be the helper and the care taker, and that her sisters should be ornamental and useless, that Etta's brow was quite unruffled when at last she joined the party in the parlor. When it was time for their guests to leave, Mrs. Eaton proposed that the girls accompany them part of the way. Carrie and Sarah agreed to this at once, but Etta hung back. Her little sister would miss her, she knew. for it was her invariable custom to sit with the child for a half hour every night and tell her a story. So she excused herself and saw the others depart, not without a regretful feeling, it is true, but yet with no idea of evading her self-imposed duty.

And this history of part of a day was the history of Etta's whole life-always occupied by the cares and duties which should have been divided between the members of the family, but which fell so easily upon her willing shoulders. Is not this a frequent experience? Is there not in many honseholds an Etta? -Christian Intelligencer.

GENTLENESS.—One day in winter a heavily laden team was going along one of the streets of Boston. It was just after a snow storm. Pretty soon the wagon got stalled in the snow and the horses, cursing them and lashing them with his whip, got a shovel and cleared away the snow from before the wheels. Then he stepped up to the shaft horse, and patting him gently, said in a kind voice, "Now, Billy we are in a fix; you'll do the best you can, won't you?' The horse really seemed to understand what was said to him, and rubbed his head against his master's shoulder, as if to say, "All right, I'll do my best." Then he started with a will, and carried the wagon straight through the snow. to Animals, was going by, and saw what Etta hesitated. "You can wait a took place. JOSEPH THE WISE RULER.—Gen. 41:

TIME—Joseph was released from prison and promoted to the second place in the kingdom, B. C. 1716, when he was 30 years

EXPLANATORY.

Pharaoh. A general name for the king of Egypt. Aphophis was probably then the Pharaoh of Egypt. I have set thee over all the land. This appears too greatly at variance with probability to be tol. erated, even in a romance. In the East, however, this is all different; and an advancement so great and so abrupt is still, although not common, of sufficiently frequent occurrence, that instances more or less analogous would, in the reading of this history, occur to every Eastern mind.

In the East, the seal alone has the effect which we give to both the seal and the signature. People in the East do not sign their names. They have seals in which their names and titles are engraven, and with which they make an impression with thick ink on all occasions for which we use the signature. To give a man your seal, is therefore to give him the use of that authority and power which your sig-nature possesses. Vestures of fine linen. Denoted the rank and station to which he was exalted, as it appears that dresses of this fine fabric were only allowed to be worn by people of the highest rank and distinction in Egypt. Put a gold chain about his neck. This was a badge of office worn in Egypt by the juage and the prime minister. It had a similar use in Persia and Babylonia (Dan 5: 7).

Made him to ride in the second chariot. Thus arrayed, Joseph is placed in Pharaoh's second chariot (next to Pharach's), and in the midst of a splendid procession conducted through the city of Heliopolis. That music attended this procession is highly probable. The Egyptian band consisted of the harp, the single and double pipe, the flute, guitar and tambourine, Bow the knee. The heralds that went before him cried, Abreck! This word Abreck, recording to the best authorities, signifies pure prince. It was intended, then, to signify that Joseph was now recognized as a native Egyptian,—that he was no longer a foreigner, but as one born in the land.

Zaphnath-paaneah. It was not unusual in ancient times to give new names to persons on particular occasions. Zaphnath is he who receiveth Neith, i. e., the inventrix of the art of weaving, and the goddess of wisdom. Faaneah. This name means he who flies from (avoids) pollution, especially adultery. So that the first name conferred by Pharaoh upon Joseph commemorated the divine wisdom to which he owed his exaltation, and the second his innocence of the crime for which he had so long suffered imprison-ment. Asenath. Either "devoted to Neith," the Egyptian Minerva, or compounded of the two names Isis and Neith. Poti-pherah. The priests were the highest and most privileged class in Egypt. Intermarriage with this caste at once determined the social position of the wondrous foreigner. Heliopolis was the Rome and Oxford of ancient Egypt, the capital of its hierarchy and its university, the centre of its religion and learning.

Went throughout all the land. Made an immediate survey to determine the site and size of the storehouses required for the different quarters of the country.

The earth brought forth by handfuls. That is, in vast abundance. This, or even more than this productiveness, is not at this day unusual in Egypt. There was not a place in the then known world so well adapted to the production of corn (grain) as Egypt. This plenty was eccasioned by the annual rising of the waters of the Nile, to an unusual height. The waters deposit on the land a rich loam which they bring down with them from the mountains above. It is this deposit which may be considered as constituting the wealth of Egypt.

And he gathered up all the food. During the seven years of plenty Joseph gathered up all the surplus food and placed it in granaries. By what means the government obtained possession of the corn, we are not informed. Some are of the opinion that the surplus corn was bought up by Joseph, which might be done, at a time of such abundance, at a comparatively

Unto Jeseph were born two sons ... Man assel. The first son he called MANASSEH, which means forgetting-or forgetfulness. " For God, said he, hath made me to forget all my toil, and all my father's house." It does not mean that these things were obliterated from his mind-for the very act is one of remembrance. He cherished no resentful remembrances against those who had been the instruments of his affliction. The memory of his troubles was comparatively lost in the happiness that had now succeeded.

The name of the second Ephraim. Which means fruitfulness. No man had ever more occasion than Joseph to know the fruitfulness of affliction. God cuts even to the quick the branches of the vine that he wills to bear much fruit. We may search history, we may explore the knowledge and experience of our own lives, in vain, for any instance of much fruit for God or for man having been yielded by unafflicted men. For God hath caused, &c. It is a beautiful and interesting circumstance in the history of Joseph, that

he has God ever before his eyes. The seven years of dearth began to come. That famine has frequently occurred in it has freed me of rheumatic pains, and although Egypt, is notoriously a matter of history. As the plenty was occasioned by extensive and unusual overflowings of the river, so the dearth was occasioned partly by the failure of the overflow and partly by the it speak highly of it. prevalence of the south-east wind. The rise of the water much below the usual mark would prevent the sowing of a suffi. upon me, No. 92 Craig Street, Montreal. cient quantity of grain, and the preval-

ence of the south-east wind would tend to destroy even that which was sown, after it came up. In all lands. The neighboring countries, Canaan, and probably parts of Syria, Arabia and Africa.

Joseph opened all the storehouses. The granaries are frequently represented on the monuments. They appear to have been public buildings, usually of vast extent, and divided into vaults, some of which had arched roofs. Sold unto the Egyptians. The money he obtained for the corn he brought into Pharaoh's house (chap 47: 14), thus enriching the king's exchequer to a very considerable extent. But money soon failed, and the Egyptians came to Joseph for food, saying, "Give us bread" (chap 47: 15). He replied by effering them bread in lieu of their cattle; and "they brought their cattle uato Joseph." But the cattle, too, failed. And Joseph bought all the land of Egypt for Pharaoh; for the Egyptians sold every man his field. It may be asked, Would it not have been more generous to have given them food, and allow them to retain their flocks and heads? That provision was made for the most indigent, we cannot doubt. These transactions originated in the proposals of the people themselves, and Joseph only agreed to their own terms. To have supplied the people with corn when their cattle were disposed of, House has made without an equivalent, would have been injurious both to themselves and to the interests of the state. To give food to a people tends to destroy their independence of mind, and to foster habits of indelence. The country was divided into many districts or provinces, in consequence of which the supreme power was comparatively feeble. He did not reduce them to a state of slavery, or take away their land from them. On the contrary, he gave them corn on the condition that henceof the crown, paying to Pharaoh one-fifth of the produce (chap 47: 23, 24). All this was done for the general good (to make them one strong nation), to which each particular person in his turn was Brown & Co's obliged to contribute.

CASTOR OIL FOR AXLES .- Castor oil is undoubtedly the best, and therefore the cheapest, for iron axles, which should always be wiped clean. Col. Curtis informs us that his market waggon would run only twenty miles before requiring to be regreased when lard was used, but with castor oil it ran sixty miles, and was good for twenty more-a big difference, and worth remembering. He further remarks that a wheel well lubricated will turn onehalf easier, and wear as long again, a gain of 150 per cent., by the liberal use of oil.

Hardly any one who has a large acquaint-

ance or who reads the obituary or death

notices in the public prints, can fail to have noticed how fatal a disease congestion of the lungs is, especially in this city. It really seems sometimes as if it caused half of all the deaths that occur. Each fall it appears to grow more dangerous. This season it has been very virulent, owing, probably, to sudden changes. Conthe lungs invariably begins with a cold, to which scarcely anybody attaches any importance, and the cold is neglected until it results in the painful, and always alarming disease. "Only a cold!" echoed the renowned Abernethy. " A cold is always to be feared. Colds have killed more men than battles have.' There seems to be no way of guarding against congestion of the lungs. One person is as subject as another to it. general attention to hygienic laws, have no power to prevent it. Congestion of the lungs slays a giant as quickly as it slays a pigmy; an accomplished athlete as quickly as a puny invalid. One meets this morning a friend flushed with youth -energy. Within a few days he is dead. Congestion of the lungs has cut him down. Persons who care to live-and the fact that they do live shows that they care to-cannot be too watchful of the be unings of congestion of the lungs, whi a is one of the most insidious and form dable foes of human existence. Mr. Fell vs, the inventor of Fellows' Compour Syrup of Hypophosphites, which is so a servedly popular everywhere, says : With at offering any argument to enforce my orinion, I most positively assert as fact, so long as the patient continues to breathe, no matter how languidly, though abandoned by the physician, the case is by no means hopeless. Fellows' Hypophosphites administered with cod liver oil, as directed, will act beneficially and effectively. It excites the movement of the secretions, stimulates the nerves and muscles into action, and develops the process of expectoration, cleaning out the tubes and air passages, induces appetite, strengtuens and restores the sufferer to health. Let the reader, whether physician or layman, reflect, that this is written not for mere mercenary considerations, the writer has known many cases, has witnessed many cases treated by his Syrup, and has treated several himself with his syrup, in no single instance unsuccessfully, all were restored to health, and in several instances they were pronounced beyond the possibility of recovery by attending physicians.

In May last I was taken with a violent bleeding which brought me to my bed and my life was despaired of for many weeks; violent symptoms appeared, night and morning coughs, night sweats, shert breath, and a return of the spinal trouble. My physician stopped the bleeding and then ordered God Liver Oil and Lime: and I used various preparations, but they did me no good. I lost all hope of life, and was an object of pity to all my friends. Last September I purchased a bottle of your Enal-sion, before it was all taken I was better. I then bought a dozen bottles and have taken all with the life, and was an object of pity to all my friends. Last September I purchased a bottle of your Emulsion, before it was all taken I was better. I then bought a dozen bottles and have taken all with the following results: Cough subsiding, night sweats stopped, appetite returned, pains in spine disappeared, strength returning, and my weight increased from 118 to 140-pounds in sixteen weeks. I have taken no other medicine since commencing with your Emulsion and shall continue its use used I am perfectly well. I gave him a bottle, and he bought two more, then got a dosen and says that it is food and medicine for him. He was given up to die a year ago; but he is improving now wonderfully. My recovery is exciting the surprise of many people, and I shall do all I can to make known your valuable medicine.

Very truly yours, HF SLOCUM, Lowell, Mass.

About the 25th of last April I got a bottle or your EMULSION, and at that time I was so prestrated that no one who saw me thought I could live but a few days at most. I could retain nothing on my stomach and was literary starving. I commenced the use of the EMULSION in small doses; it was the first thing that would stay on my stomach; I continued its use, gradually increasing the dose; and from that hour I commenced mending, and now am able to ride and walk and am gaining flesh and strength rapidly. I have advised other parties to try it, and some two or three have already ried it. I am sure I shall entirely recover.

THE NEW HYMN BOOK.

Our hand rests, as we write, upon a new Hymn-Book,-"The Methodist Hymn-Book, compiled and published by authority of the General Conference of the Methodist Church of Canada." We have taken up this new book with strange emotions. Our love for the old book had been so deep; its associations with our childhood at home and at church so numerous and so pleasant; its influence upon our earlier christian life so valuable; that we could never grow enthusiastic over the preparation of a successor. To put its half-worn copies away into the hiding-place of old Bibles, too shattered for use and too sacred to burn, seemed an act we could never perform. It is true that we have at times asked ourselves if we were not getting old; for, as some of our readers know, a disposition to cling to old church-buildings, old houses and old notions, even when persuaded that a change may be desirable, is a symptom of the coming of the "yellow leaf."

In the meantime the Conference committee has been at work, preparing its selections for the press, to be multiplied by that untiring agent into many thousands of copies. The advanced copies of these are already upon the counters of our Book Rooms in Toronto, Montreal and Halifax, and the agents of each are sorely perplexed by orders, which no effort on the part of printer or binder can enable them without delay to fill. Their obligation to use all possible speed in the issue of the various editions of the new book is rendered imperative by the fact that our English Conference Office several years ago ceased to print that with which we are all familiar. and have provided their congregations with another less likely to be popular with us than the one just announced.

Have our readers seen the new Hymn-Book? If not, let them withhold any utterance until they have carefully turned over its pages. As they open it their eyes will rest upon the old familiar line; "O for a thousand tongues to sing," and as they move on toward the opposite cover they will find one dear old hymn after another greeting them, from a new, but more appropriate page, until every prejudice, if such have been indulged. shall have vanished. Possibly the winnowing fan in its revolutions may have swept away a few whose absence may be regretted, but the number of these must be very small.

With very rare exceptions indeed the three hundred additional hymns will be welcomed by all Methodists. Bernard of Clugny's "Brief Life is here our portion" and his "For thee O, dear, dear country" will not be rejected; nor will his "Jerusalem, the Golden," nor Dickson's "Jerusalem my happy home" be received with hesitation. Bishop Heber's grand old missionary hymn-"From Greenland's icy mountains" and Edward Perronet's "All hail the power of Jesus' name" and Phillip Doddridge's "Grace, 'tis a charming sound" and James Montgomery's "Forever with the Lord" with other hymns of similar age, are sung by Methodists over all the world and yet have never been in the hymnbooks of Canadian Methodists until now. The Episcopal Church had appropriated Charles Wesley's beautiful hymn, "O Lamb of God once wound ed", which henceforth we as well our English brethren may use with all the freedom of a birth-right blessing. Only the other day we had to produce a hymn-book to prove to a friend that one of the hymns, now introduced for our use, had no place in our late book.

Of new hymns, equally honorable mention may be made. Lyte's "Abide with me," and Keble's 'Sun of my soul," and Charlotte Eliot's "Just as I am," and Mrs. Van Alstyne's "Safe in the arms of Jesus," need no introduction to Methodist worshippers. And we believe that Baring Gould's "Onward, Christian Soldiers," and Frances Havergal's "Take my life and let it be," &c., and similar hymns, will beat be rendered when sung as we trust ther often will, by congregations alive compilers.

with the genuine spirit of old fashioned Methodist revivals.

In spite of our love for the old book. we thank the Committee for the new. It is a noble book of praise. We have only glanced at its treasures, readers will find pleasure in searching for them. The arrangement is also excellent. Successive additions to the previous book had caused some confu-The publishers, too, have done their work in excellent style. A few typographical errors in one edition have been detected, but will not be repeated. We are sure that for public worship, for the class and prayermeetings, and at the family altar, our new book will come into early use. For a time, perhaps, our itinerant and local preachers and leaders may find it necessary to announce hymns in both books, when found in both, but this will be but for a time.

THE APPROACHING CENSUS.

Our contemporary, the Christian Messenger, in referring to the ensuing Dominion Census, which it appears is to be taken at the same time as that of Great Britain, on the 3rd of April, 1881, closes its article with the following paragraph bearing on the question of religious, or rather denominational, statistics:

It has been decided to make the same classification of "Religions" as in 1871. The clergy of the Church of England have complained that the term Cathelics belongs as much to the Anglicans as to the Roman Catholics. Several other religious parties have offered objections, but the difficulty of making any change without making it worse has induced a resolve, we believe, in the authorities to let it remain as formerly.

We are not aware on what authority the statement in the first sentence of this extract is based. We are sure that if the statement is correct, it is so only in some loose, general sense. If the census forms are not modified in conformity with changes in ecclesiastical nomenclature and relations which have occurred since 1871, one of the largest Protestant organ izations of the Dominion, the Methodist Church of Canada, will find its members and adherents entirely unprovided for, while the "Wesleyan" and "New Connection" columns must remain a blank, no religious bodies answering to those names now existing in the country. We are quite unwilling to believe that the forthcoming census tables will net recognize the important historical fact of the union in 1874 of the Wesleyan and New Connection Churches under the title of the Methodist Church of Canada. If certain "religious parties have offered objections" without avail, as our contemporary states, we assume it has been when they have called in question the names of other denominations, not when they have simply aimed to secure the correct designation of their own. While referring to the subject, we would express a strong hope that by the employment of capable and intelligent commissioners, enumerators and tabulators, the Government will obtain for the people of the Dominion a substantially accurate and reliable census.

In its denominational statistics, that of 1871 abounds in palpable errors and defects. One of the most striking of the former is that to which public attention was directed by the Rev. Dr. Cramp, shortly after the first publication of the census (vol. 1), and by which the Free Baptist people of Annapolis County are represented as more than five times as numerous as the adherents of the regular Baptist organization? The figures given are, Free Will or Christian Baptist, \$,462, Baptists 1,565, which are certainly hard to reconcile with the fact that the former denomination has not more than one or two small churches, it any, in the entire

By giving as an unnecessary sub-heading the general term "Methodist," that census caused our own body to suffer a loss in apparent numbers of nearly 20.000 in the Dominion. There were no Methodists as distinguished from the Wesleyan Methodists in Nova Scotia and New Brunswick, yet there appear to have been 1862 of these in the former Province, and 3439 in the latter. Yot in all geographies and histories to which we have referred for the population of the Provinces by denominations, we have invariably found the number of Methodists given without any account being taken of those who would seem to have been nothing but Methodists. The primary fault of this defect is with which if continued in conjunction with the proper title of our Church in the forthcom-

A SAD CASE.

One of the most terse of apostolic counsels was that given to Timothy: "Lay hands suddenly on no man." The force of this piece of epitomized counsel is just now being felt by our Baptist friends in Prince Edward Island. A young English evangelist, of attractive gifts, spent a year in the Island, and at the end of that time received a call to the pastorate of a Baptist Church. At the council of neighboring pastors called for his ordination, he appointed to formulate charges, to be rewas challenged with the authorship of a letter respecting a recent associational meeting at Tryon, and published in a Charlottetown paper. In this letter he was highly eulogized; a gentleman who had expressed dissatisfaction with his credentials was spoken of with rudeness, and the proceedings generally were treated in a most flippant style. This challenge he met with a solemn denial, and added arguments to prove by internal evidence that he could not be the author of what he called a "scurrilous letter." An adjournment of twenty-four hours was asked by his challenger, to enable him to procure the manuscript, and then a brief additional delay was requested. As the ordination services were being commenced the paper was brought in, and a reconsideration was moved but not sustained. At the close of the ordination, the manuscript of the letter was compared with other specimens of his writing, and a conclusion reached that he was its real author.

The issue of that sad scene may be told in few words. A few days later, after what must have been keen suffering, the newly-installed pastor wrote a letter in which he admitted the authorship ot the letter in question, confessed his guilt in persistent denial of the fact, and at the same time tendered his resignation. A second meeting of the council was called a week after, and that body denounced his sin, accepted his profession of repentance, but with an apparent failure to recognize the evil of his act, and the influence of two disputants in a country grocery. Imtheir own, concurred in the decision of that church in "rejecting his resignation for the present." They seemed to forget that repentance for such an act may win back the Divine favor and furnish helped toward the crest of a dangerous a claim to church-membership, while it may never restore to a fallen minister power to preach the Gospel with any prospect of success.

It is not our purpose to condemn the actors in this sad affair, though severe words might well be written. We sym pathize with the religious body most immediately affected by it. It one member be weak all the members suffer. With no special reference to it, we take the opportunity to speak a few words of caution against undue haste in taking into confidence those persons who claim a public religious recognition in the absence of most satisfactory credentials. Our country districts are sometimes infested with religious "tramps," who win, without reason, the regard of the more innocent, and often make things exceedingly unpleasant for the pastor who refuses to open to them his pulpit doors. Some years ago a man boasted in one of our smaller provincial towns that he belonged to no church. 'Elder - baptized me, and let me run," was the sum and substance of his commission; yet he received no slight welcome from some who should have known better. Nor can we wonder at any weakness on the part of our people, when we remember how even the ministry have at times shown into their pulpits certain persons whose record, as afterwards made known, has since caused them, to say the least, very unpleasant recollections.

No attempt need be made to reconcile the counsel to "Be not forgetful to entertain strangers," &c. with the advice to · Lay hands suddenly on no man," for the purpose of thrusting him into management of the social service or occupancy of the pulpit. The "why and wherefore" will never be refused by men who are

Professor Swing, who, since his separafrom the Presbyterians, has had charge of a church beyond denominational lines, is likely to be followed into an unattached position by a Methodist minister some prominence in the same city-Chicago. For some years, Rev. H. W. Thomas, D.D., has been suspected of heterodoxy. Two years ago he was warned by a series of Conference resolutions to be more careful in his statements of doctrine. This warning was followed by a doubtful kind of obedience. On the eve of the session of the following year, to gave special those who prepare a misleading heading, prominence to his peculiar views, and this year, just before the Conference, as if determined to keep himself before the ing tables, will result in still greater con- public, he discussed from the pulpit the points at issue. published, he refused to withdraw from the ministry of a church with the leading doctrines of which he held himself still to be in accord. A committee of five ministers, appointed to consider his paper, recognized the pure character and intellectual ability of Mr. Thomas, but reported him to be "essentially out of harmony with the doctrines" of the Church. consequence of the near approach of the close of the Conference, a committee was ferred to his presiding elder. At his own request no appointment was given him, and he therefore occupies a supernumer-

Having attained an evident purpose, and placed himself in the way to greater notoriety, Dr. Thomas has no idea of idly waiting for a verdict. A simple wish for liberty to interpret Gospel truth as he judged best would have led to a quiet withdrawal, but pre-arranged plans indicate the presence of other motives. It is understood that no Methodist church in the Conference, by a majority of its official board, has invited Dr. Thomas to its pastorate, but previous to the meeting of Conference the action of that body was anticipated, and a movement set on foot to raise a salary of \$5,000, in view of his preaching in a public hall to an unattached congregation. A Congregational church at Springfield, Ill., has also extended him an invitation to its pastorate.

With both ministers and people Dr. Thomas has been highly popular. Kindhearted and genial as a man, as a pastor successful, and of undoubted wealth in gifts, he has many triends, even among those who have little sympathy with his doctrinal views. His trial in December will no doubt elicit a wide-spread interest. Yet it will be but a gladiatorial show, in which the world will rejoice to see Scripture bearing upon the most solemn topics used to little more advantage than that with which a group of loungers listen to mediate action would, probably, have been better for both. The Rock River Conference will, no doubt, be true to Methodism, while Dr. Thomas will be wave of popularity, which will bye and lett many others, unnoticed and alone, it not a wreck."

meeting, we found no representatives from Mr. Morrow has left no memoranda, no outside of the village (which name the circuit bears), but five men, who never saw or handled a cent of circuit money, were there by nomination, as stewards, while the man who handled the circuit subscriptions was only a collector and not steward at all. Can a superintendent nominate five men as stewards, who have really nothing to do with money matters?

At a trustee meeting, on a circuit where pew rents are in vogue, the trustees appointone of their number to keep their accounts, virtually their steward. Does that give him a seat at the quarterly board? See Discipline, p. 71; sec. 231.

"Enquirer" will pardon delay in the appearance of his note. It has not been intentional. The four collectors mentioned in his first question are, to all intents and purposes, stewards, although in case of any legal question the mode of their appointment might possibly be challenged.

The neighboring Quarterly Board described by "Enquirer" is certainly a singular one. We can scarcely deem it possible that a steward should have nothing to do with circuit moneys, while the man who undertook his work should be excluded from a seat at the board.

The representative from any trustee board to the quarterly official meeting, must be elected by the board of which he is a member, for that special purpose.

If any of our young ministers, depressed by the wear and teac of a large country circuit, are threatened with an attack of the blues, these words of a veteran minister may serve as a tonic. We quote from

tion of " Educated Young Ministers" in the New York "Advocate." Our young minisquestion which has been raised their careful consideration. We say with Dr. Curry, "that the young man who turns away from an appointment, for want of pay, that offers him his board and \$200 or \$800 a year, is not of the kind that is needed for the Methodist ministry." And the Doctor offers this suggestion to the bishops and presiding elders: "No greater kindness can be done to a young minister than to see to it that his early ministry shall be to him a school of self-denial, a process of discipline in moderated expectation, and of practical assurance that eminence is yet to be achieved by earnest labors. More than one promising young minister has been effectually spoiled by too early advancement to prominent places; and of all the agencies for softening the spinal columns of such young men, large salaries and 'cultured' female society are among .he most certainly effective. A few years of honest labor among the simple and earnest working classes-farmers, mechanics, and trades people-are likely to be quite as useful as the same number of years in the sem**BDITORIAL NOTES.**

Provincials generally will be rather pleased than disappointed by the election of Garfield as President of the United States. His exact majority cannot for a little time be known, but his election is determined beyond doubt. Assuming latest reports to be correct. Garfield and Arthur have secured 222 out of the 369 votes of the Electoral College,-a majority of 85. A full and complete Republican victory is accorded by all the Demo cratic papers. A "Solid North" against a "Solid South" will not tend to that repression of sectional feeling which is so desirable. November 25th is appointed a day of Thanksgiving in the neighboring Republic. The burden of rejoicing will be felt no doubt by Republican officeholders, now re-instated for another Presi-

STEPHEN JUDKIN BRANGMAN

died at his residence. St. David's Island, Bermuda, April 27th, 1880, at the advanced age of 73 years, leaving behind him a widow, sou, daughter and three grandchildren to revere his memory and mourn his loss. In his early life Mr. Brangman was not brought under any direct or powerful religious influence, but in the year 1832 he began to attend the public ministry of the word under the Rev. John Crofts, who that year began to preach in a private house on St. David's. From that time the purpose of his life seemed fixed, and in 1837, when the Rev. Theophilus Pugh was stationed in Bermuda, Mr. Brangman associated himself with the Methodist Society. He married in 1845, and four years afterwards accidentally injured his right knee. The injury was so severe that for a period of seven years he could not walk without artificial support. On one occasion after wearily and painfully making his way to and from worship, which was still held in a private house, he said he would give a piece of land on which to erect a place of worship. The land was subsequently given and the Church built. It has since become the birthplace af many souls. For sometime previous to the erection of the church the services were ordinarily and regularly held in Mr. Brangman's house, which he offered for such sacred use and to which he welcomed all comers with a kindness and cordiality that won many hearts.

For many years he was under the pressure of severe suffering, and while prostrate on his bed sought to lead those around him to the cross and the Saviour assuring them that although they might live without God, they could not die with-

In the family and in public Mr. Brangman's life was that of a consistent and earnest Christian. He has passed from family and friends to the company of the blessed above. He has ceased from his labors and his works follow him.

MRS. AND MISS E. WEDDALL, OF FREDER-ICTON, N.B.

Mildred Weddall was born in Gainsborough, Lincolnshire, England, in the year 1806. Her maiden name was West. It was her sad lot, very early in life to be left without a mother, and with the care feel Jesus very near." of a younger sister. But even thus early she had learned the great lessons of afterwards was devoted and consistent, as | might feel the cleansing blood of the Savigured. In the year 1839 she was united in words His guidance and support. marriage to the Rev. Richard Weddall, with whom she left England in 1840 for the toils of a missionary life in Honduras Bay. Too often the Christian zeal and noble courage displayed by the wives of missionaries in accompanying their husbands to difficult fields are either undervalued or overlooked. A missionary's wife must perform her heroic part without the incentives or rewards of the missionary himself. He has the excitement and the stimulus of a great work, all lacking in her case. She must attend to the daily duties of the household in a strange and insalubrious elimate, without any public recognition or encouragement.

Rejoicing in the success attending the labors of her devoted husband, her spirit was in a measure sustained under her heavy burdens; and this period of heavy toil and severe privation was often alluded to in her last illness with feelings of gladness and love. But the enervating influence of the climate, combined with the increasing care of a young family, rendered a change imperative. And after five years unremitting labor amidst much privation, and affliction through failing health, she came with her husband to Nova Scotia, where for many years she faithfully performed the duties of a minister's wite. But the salubrious climate of that Province was unable to efface fully the disastrous effects wrought in the Spanish Main. For the last four years her sight had been failing until within the last year of her life she was entirely deprived of it. On the 13th of September, 1879, she had a stroke of paralysis and was confined to her bed till her death. Frequent visits at this period enable the writer to speak with confidence of her increasing faith, accompanied with a touching humility as she spoke of the all-precious merits of her Redeemer, and of her entire dependence thereon. Owing to great weakness there was a lack of that exultant joy which sometimes marks a christian's death bed. yet there was always that expectation of the Master's coming which led her frequently to anticipate the joys of heaven and the happy reunions which would take place. The later years of her life had been marked by many sad bereavements. One after another, several of her children whom she dearly loved, had been taken away, followed by the sudden and unexpected death of her husband; and at this period her second daughter was lying ill and was a source of much anxiety, expecting to hear of her death continually; and though in the next room unable either to see her, or to help her. Truly she might have said with David: All Thy waves and Thy billows are gone over me. But she bore all these accumulated afflictions and losses with true Christian resignation, often exclaiming as she reviewed them, "My Heavenly Father does all things well." And thus passing through the furnace, purified by these fiery trials, exhibiting that humble confidence in her Saviour so we'll described in the hymn she was ever delighted to

of January, 1880. During the illness, and previous to the death of Mrs. Weddall her second daughter was called home.

To its services she was strongly attached, for its extension she deligently labored and in its prosperity greatly rejoiced. During the last few weeks of her life she prayed earnestly for her friends and family. On turning over a few papers after her decease we found evidences of her own faith and trust in expressions pencilled for others.

Her faith as far as we can judge never wavered. Her confidence was firm, her joy abundant, her praises frequent. Her life exhibited a modest, retiring Christian deportment, positively refreshing. The discipline of dying made the soul appear still more beautiful. The harder the frost, the brighterwere the colors of the fading leaves. We learned the power and potency of Christian hues of character, worked in on the white background of gospel light, as we bade her a last-" good-bye." THE LABRADOR MISSION.

For many years a minister of the Newfoundland Conference has been appointed to labor on the southern part of the coast of Labrador. In fact Red Bay has become one of our Mission Stations, and Bro. Bowell has been laboring there and in the neighborhood for nearly three years

The influence of the Spirit was felt in each of the services, so that to preach the word was a pleasure to the preacher, and to

listen to it a satisfaction to the hearers. Taking this as a starting point, some four and twenty harbors between this and Francis Harbor, extending over a space of two hundred and seventy miles, were visited and with but one or two exceptions preaching services held in each. In order to make our efforts a success, it was necessary to adapt ourselves to circumstances; hence our services would be sometimes held in a store—sometimes in a tilt, the greater part of which would be built of turf-at other times on the deck of a fishing schooner. Every opportunity of preaching the gospel was seized, and often were we warmly thanked for coming so far to care for the souis of these fisherschooner, with some sails spread across the fore-boom for a screen, and a porkbarrel with the British ensign covering it wife our of Recording steward-John H. for a reading desk, we had quite a happy Taylor-passed away in the 36th year of time in preaching to those gathered on her age, leaving her devoted husband and the deck. The work throughout was most pleasant, and when the time came for us to return home we felt assured that we had not labored in vain.

There is one thing however which is greatly needed to do this work satisfactorily; that is a steam-launch, with which a Missionary could move from place to place with much greater satisfaction than he can at present. When it is remembered that there are no roads on this coast, and that travelling has to be done altogether by boat, it will be easy to understand that great risk is oftentimes run by exposure in open boats on these wild shores. Much time would often be saved by it, for not unfrequently has the writer had to remain in a place several days long er than he desired, simply because he was obliged to wait for the people to put him to another. If such provision were made he could move when and where he thought necessary. Such provision must be made if the work is to be done satisfactorily; there are important places yet unvisited, and to which it is our duty to pay attention.

Believing that in the Methodist Church

The spiritual needs of the thousands who are scattered along these shores during summer months combine to enlist your sympathy in this undertaking. All communications relative to the mat-

NEW CHURCH AT SOUTH RICH-MOND, N. B.

During the pastorate of the Rev. William Harrison, it was resolved to supersede the old church at McKenzie's Corner by a structure more in keeping with the necessities of this prosperous community. Subscriptions were obtained, plans prepared, and the work completed without a single tea meeting or bazaar, and without leaving a balance of debt to be discharged by further effort, and all within hemselves.

The church is 48x30 feet on the ground. The walls are 16 ft. high and rafters 32 ft. long-naking the church 42 ft. from the sills to the top. The windows are furnished with gothic tops. The body of the church inside is 41x29, with 25 ft. ceiling, supported by four framed arches with gables or buttresses at the lower end, and with key stone in the centre. There is a small gallery over the front entrance, and ante-rooms, reached by two flights of winding stairs. The side pews are placed at a slight angle. The platform is eleva- No. 8. ted but a short distance above the floor. upon which is placed a very neat and finely finished desk. The cost of the building is between fifteen and sixteen hundred dollars. The work is finished in a highly satisfactory manner, and reflects great

credit on Mr. More, the architect. The dedicatory services were held on the 17th inst. On the previous evening the annual meeting of the Educational Society took place. This was the concluding service for the old building, and was in every way worthy of the cause, the people and the occasion. The house was crowded, and the meeting having been opened by prayer by the Rev. Mr. McKay, Presbyterian, with whom and whose congregation we and our people "dwell together in unity," -addresses were delivered by Revs. Dr. Stewart and W. W. Colpitts. At the con- and 22. list of subscriptions. On the morning of the Lord's day an large congregation assembled in the spacious and beautiful new church. Every available seat, and every place for standing was occupied, while some sought to hear at the opened windows, and a large number of others, for want of room, left

to attend the Presbyterian meeting. The Revs. E. C. Turner, superintendent of the Circuit, and Wm. Harrison, took part in the dedicatory service, and the Mr. Hanscom, M E Minister of Houlton, Maine, offered the dedicatory prayer. The Rev. Dr. Stewart preached the dedicatory sermon, taking for his text Heb. xii. 28, 29. The sermon was an eloquent exposition of Gospel truth, accompanied with much spiritual power. In the afternoon the Rev. Wm. Harrison delivered a most appropriate sermon from the words, "I was glad when they said unto me let us go into the house of the Lord," The large congregation was glad to greet a former pastor, and he was evidently grateful for this completion of an

important undertaking. The Rev. Mr. Hansoom preached in the evening from "Isaiah's vision," to another audience which filled the house to its utmost capacity. The sermon was one of great power and gracious influence. On Tuesday evening the annual missionary meeting was held, and was ably addressed by Revs. E. Mills, M. R. Knight, A. B., and Dr. Stewart. All of these brethren were well prepared for their work, men. On one occasion, on board a and presented such views of their subjects as must have given a new impulse to the cause of Christ among us. Meantime, with the old Gospel, a loving and generous people, and a new and "beautiful," and, as we trust, what may prove, "a holy house," we feel that we may prosecute our work, thanking God and taking

Christianity does not need any credit. It pays as it goes; and it is stronger through its agency, the church, when that does the same thing.

NEW BOOT AND SHOE STORE.

WE have just opened in the Store lately occupied by C. R. THOMPSON, No. 16 Granville Street, door South of the LONDON HOUSE, a splendid Stock of

BOOTS and SHOES The greater part of which have been MANUFACTURED BY OURSELVES, AT THE INDUSTRIAL SCHOOL.

Expressly to suit the times, showing the purchasers the very best value for the smallest amount of money—and feel certain—that we can give better value than any house in the trade, in support of which, we call the attention of the public, to some of the advantages we possess.

FIRST-We make our Staple Goods by HAND at the INDUSTRIAL SCHOOL, and are thus able to produce a much better article than those made by Machinery. SECONDLY-By making our Goods and sellin them ourselves, you get them first hand, hence you

have only to pay for the material and one small profit. THIRDLY-As you buy from the maker his responsibility to you is greater than if he had purchas ed the goods of another and was selling them again.

If the style and size of the boots does not suit, you can have them made at a trifling additional cost We sell for CASH and cash only to keep strictly to this we cannot send out for approval, all parcels being paid for before they are sent. Should they not suit we will return the money:

Consequently the cash buyer is not compelled to pay those bills that are lost as the result of the CREDIT SYSTEM. These with many other advantages we could mention, warrant us we think in reas-

serting that we can give better value than any house in the trade. COUNTRY MERCHANTS who buy in small lots for Cash, would do well to give us a call before purchasing elsewhere. FISHERMENS and MINER'S BOOTS a Specialty.

DE. GATES .- DEAR SIR .- I write you in behalf of your invaluable CERTAIN CHECK. I cannot say too much in its praise. I was very much reduced by Diarrhea; had tried all the various remedies recommended for that complaint, and still kept growing worse and worse. I was then recommended to try your CERTAIN CHECK. My case was one of the worst kind, and I used one whole bottle before I obtained relief. I bought another bot tle, and when I had taken one-third ofit-I was restored to my usual good health.

COMPOUND SYRUP OF

HYPO-PHOS-PHI

FOR THE RELIEF AND CURE

WASTING DISEASES

Consumption, Bronchitis, Asthma, General Debility, Brain Exhaustion, Chronic Constipation, Chronic Diarrhæa, Dyspepsia, or Moss of Nervous Power. It is unequalled in the treatment of Palpitation of the Heart, Trembling of the Hands and Limbs, Loss of

Appetite, Energy or Memory

It acts with vigor, gentleness and subtlety, owing to the exquisite harmony of its ingredients, akin to pure blood itself. Its taste is pleasant, and its effects permanent. Its first apparent effect is to increase the appetite. It assists digestion, and causes the food to assimilate properly—thus the system is nourished. It also, by its tonic action on the digestive organs, induces more copious and regular evacuations. The rapility with which patients take on flesh while under the influence of the Syrup, of itself indicates that no other preparation can be better adapted to help and nourish the constitution, and hence be more efficacious in all depression of spirits, shaking or

trembling of the hands or body, cough, shortness of breath, or consumptive habit.

The nerves and muscles become strengthened, and the blood purified.

In the summer of 1864, I was suddenly effected by a copious expectoration of muco-purulent matter. I had been declining in health for some months, and, being exceedingly nervous, the symptoms caused alarm. As my business was that of a dispensing chemist, the shop was constantly visited by medical men, all of whom tendered their advice. During 1864 and 1865 my chest was examined by ten first class physicians, some of whom pronounced the case Bronchitis; some, not wishing to cause alarm, or unwilling to venture an opinion, gave no decision; some stated . . equivocally that I had Tubercular Disease of the Lungs, and located the trouble where the pains were felt. By professional advice, I used, in turn, horse-back exereise, country life, eggs and ale in the morning, tonics, Bourbon whiskey, cod-liver oil, electricity, tan, and various inhalents, but the trouble increased. Expectoration became more profuse and offensive. Night-sweats set in. Cold chills, diacricon, dyspacea, cough, blood-streaked expectorations, loss of sleep, loss of appetite, less of memory, loss of ambition, accompanied by general prostration, showed themselves. Under the microscope the blood was found to contain but a small portion of vitalized corpuscles; the heart's action was feeble; the pulse intermittent; the stomach could not digest properly, so that flatulency and acidity was the result. Finding the symptoms indicated Consumption, I determined to use every effort to stay its progress, and, if possible, to cure it. I selected the most powerful tonics and moderators, and combined them with the vital constituents of the human body. For months I endeavored to amalgamate them before my efforts were crowned with success. I connect speak too plainly or too strongly of the effects produced, and the benefits I.

ed from the composition. At first my appetite increased; the expectoration became easy, and there the fæces became more copious and less frequent; cold chills ceased; night-sweats lessened; I gained in weight; the backing cough left me; refreshing sleep returned; my spirits became buoyant, the mind active and vigorous. I continued taking the Syrup month after month; but owing to the damp, foggy climate of St. John, my recovery was necessarily slow, although I could observe a gradual return of strength for three years, during which time I continued taking the remedy. My present weight is one hundred and eighty-eight, being thirty-eight above my usual. I have no symptoms left denoting disease. The only notable sign during twelve months was the expectoration. New that has stopped, and I consider myself well. The reader may ask, How do you know your difficulty to have proceed d from ulcerated or tuberculated lung? I answer, In the most certain of all modes for ascertaining. In March last I coughed from the right lung a piece of PHOSPHATE OF LIME, half the size of a pea, which could have come from no other place, and which the highest authority in Lung Diseases (Laennec) states is the result of tubercle, which has been cured. Added to this, I had the leaden-colored, purulent, blood - streaked expectoration, and the opinion of one of the best diagnosticians in the country. I believe I have experienced all the symptoms incident to the two first stages of Consumption, and have successfully combatted them, so that I do not despair of any case where there is left sufficient lung tissue to build upon. I can only add that the mere monetary consideration of increased sales would never induce me to publish this report, but a sincere sympathy for the poor Consumptive, with whose misfortune I believe it villany to trifle.

The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of Pain-Killer, they suddenly discover that they are "sold out." "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the Pain-Killer; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine Pain-Killer, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the
