Translated for the Evening Post.

14.

We left poor Quint at the close of the last chapter, making a rapid geological exploration down the sand hill. Poor Quint?

When in a poetic position, (which care glorify mankind, and make a heaven of earth,) some prosaic incident occurs, who, that hast the feetings of a lamb, would not be angry? And yet the poor life of man is but a romance mingled with verse, an opera without music, a thing out of which few draw any niedom, and therefore it happs in that even the most gentle souls, become sometimes fierce, and shake their slik wool like a limb's mane.

This Mr. Quint sid, as he happily raised himself in his feet at the foot of the mountain, at decaped the assaults of various rolling stones by scienific jumps. But, in the midst of the anger, he knew not whether to curse most his misfortune, or thank m-st his good tuck, for having accomplished his audacious descent without breaking an arm or a leg.

or hank m'st his good uca, it has a his adactous descent without breaking an arm or a leg.

Climbic g the mount in again, and seeking Bessie, was not to be thought of. Probably the good child had wisely saved herself by flight, during the horrible avalauche. Beside, Mr. Quint could not conceal it that he black silk breaches were not in a state to show to the eyes of his beloved. He ought to be happy, if he could hide the spots and rents in them, and reach his home in broad day without being seen.

He cried with rage! Even philosophers loore their philosophy under certain circusstances.—
There has no man yet been found, wise in every hour of the day. Mr. Quint, the Bruyers and Theophrast of his vale, Mr. Quint, the Bruyers and Theophrast of his vale, Mr. Quint, so learned in human nature, would certainly not have brought those tears in the account, had he described his own character. And yet it would have been the truth! But such tears are not shed in the market place nor at the tratable.

The following day. Mr. Puk appeared at Quint's

"Stop:" screamed Mr. Pyk, "there you are wrong. Such a thing must be done quickly, Lazy quickly, but in proper order. There are things in the world that must be taken quickly to have the masteced, to wit: a medicine, an assemble and a wife. Just so with christening, marriage and burial. These are the three shapters in the book of life, or the tittes of a chapter, that are all much alike. By haptism, we renounce the devil; by marriage, old Adam; and by death, all teats and sorrow. Awen. It remains with you. The betrothal can be made a year hence, if you like."

"No!" said Mr. Quint, "by my body it shall not. Do as you will, I commit sysself to you entirely. I am the happiest creature under the sun. I have naught in the world against the betrothal, but on'y against the pompous display of parson, lawyer, and witnesses. I hate out nation, complimenting, one emonious airs. The Trases has felt it accessary to remind all economists, that there is such a thing as a national debt, for the payment of which it behoves us to make some preparations; and that a surplus of 22,000,000 per annum, would pay off all our debt in live centuries. That sum, in fact, would effect the redemption of the debt in much less time, for £1 per annum, at 3 per cent., will, an 86 years compound interest, amount to L2900 old, which, multiplied by £2,000,000, will make the sum of £780,000,000—about the amount required. The These, however, very frankly confesses, that there is easen to the contrast of th commiseration and without consideration) to be freed from a burden of taxation which impeded its efforts, and which was only just and durable so long as the equivalent of protection was grant-ed. The Hon. Member turnished the House so long as the equivalent of protection was granted. The Hon. Member turnished the House with an able expose of the progress of taxation during the time of war and high prices, and contended, now that peace had, to all appearance, become a sattled condition of our national existance, that prices had fallen, and that the repeal of the Corn Laws had cheapened the necessities of life—that, therefore, public salaries and Government expenses should be adjusted to the attered circumstances of the times. Lord John Russell met the latter motion by inferentially imputing to its mover a desire to interfere with the claims of the public creditor. His Lordship should have renembered that this argument, was used with greater reason by the Conservatives during the Corn Law agistation. Government was warned that, by rheapeaing the produce of the land, they were adding to the burden of taxation, and to the relative profits of the hundholder. And it is, therefore, with no good grace that they now remonstrate, when the producers (who have been deprived of half their income by direct legislation) complain, that they have the same taxes to pay out of the remaining half, which they formerly paid with difficulty out of their undivided profits. Every one must agree with the Premier in recognising the sacred claims of the fundholder; but there is no reason why Ministers, and all public functionaries having large salaries, should receive the same amount per anoun under Free-Trade and low prices, which was necessary under Protection. Men who congratulate the country, that, the coefficial to the country, that, the coefficial their income by with country, that, the coefficial their income by with now go as far and low prices, which was necessary under Protection. Electro Magnetical Light. Such is the name assigned to an inve as peculiarly his own. Mr. Pain, according to the published statement, has devoted successfully the patient researches of an intelligent mind to the attainment of an object long coveted-that of held in solution by negative electricity; that he is able to transform the whole of any given quantity of water into either Oxygen or Hydrogen gas, as he chooses. When he has generated Oxy gen gas, at the positive pole of his battery, from jar of water, the remaining water is not at all changed in its properties - it is simply diminished in quantity; and the same is true of the water from which Hydrogen gus has been made at the negative pole; and that the gases when produced can be preserved in the same manner as other gases, and can be used in the ordinary gas pipes and fixtures. The expense is only the wear of the machine and the

To the Editor of The Montbeal Courier:
Sir.—When the navigation of Lake Champlain is sufficiently open to permit steamers to resume their trips from
St. Johns, we shall experience the benefits of a quicker communication with Bosten and the Eastern cities, by the facilities of rapid transit which the railway lines terminating in Burlington afford. Hitherto the journey has been ing in Burlington afford. Hitherto the Journey has been so fariguing, that the travellers proceeded to New York, and thence North by the seaboard—now they will strike through the superb mountain scenery of Versnout, saving money, time, and personal inconvenience. A railway terminus invariably creates an Hotel, and the Burlington terminus forms an exception to the rule. Mr. Hart, and the processing and attantion landboot in view of the enan enterprising and attentive landlord, in view of the ap-proceduling passenger traffic, opened an excellent Hotel within a hundred yards of the steamboat landing at Burington,—the accommodations are ample, the table we'll supplied, and the charges moderate. As very many of our people, who may travel for business or pleasure, have not people, who may travel to wisited Burlington—and as the railway facilities, which that locality now boasts, must draw them in that direction—permit me to recommend Hart's Hotel as their tempo-

Canada.

It is presumed subscribers to American Papers do not generally realise, in many instances, that the Subscription Price is only about one-third of the cost of obtaining them. For example, a Paper published at \$1,00 per annum in the States, costs, delivered in Montreal, a fraction less than \$3,00, including American and Canadian Postage; a Paper published at \$2,00 areans to \$4,00 and a Paper published at \$2,00 amounts to \$4,00, and in either case, where the paper is delivered at the residence of subscribers, an additional penny is required, thereby increasing the expense marry one dollar.

one dollar.

The Agent purposes, if a sufficient number of Subscribers can be obtained to any Paper of merit published at \$2,00 per annam and upwards, to deliver it at the Depot in Montreal at the publisher's prices, or at the residence of subscribers, with one half penny each time to be paid to the distributor. If sufficient encouragement is given, a good Daily Paper will be supplied upon nearly the same advantageous terms.

person, which makes the collision wise, THE VALUABLE PROPERTIES OF COFFEE.—
Lord Sector mays. "It comforts the beats, and helpst the digestion." Many other written, both brouch and kindinh, describe its valuable properties. They say it relieves heatsche; and Doctor Thorton, in his Lectures on Botany, says, "Those persons who regularly drink Coffee, can never be subject to putted fever; in fact, a cap of Good Coffee, exhibitates the mental and hodily faculties, and nothing can be more refreshing to the man who studies, or the laborious mechanic."
Admitting that the important qualities described in the above quotations are contained in Good Coffee, it is then of paramount importance to the public of Canada to know where they can obtain the article in the most pure and best prepared sinte, and as there can be no doubt that to procure the ESSENCE of COFFEE in the highest state of perfection, the Berry must be carefully rousted and ground. SAMUEL COCHRAN bega to direct the attention of the Public to the process

Marriage requires the (ulfilment of several conditions, in order that it may be really the cause of mit that happiness. Could the veil, where covers the origin of domestic rettchedness, he reneed, and its true source in every instance disclosed, in how many could it be traced to physical disqualifications and their attendant disappulorments. Excesses are always injurious, the gift which, when used in mioderation, is fraight with utwantage, becomes, when obused, the predition amoved of mitchia, and of greater or less injury to the constitution and vital powers. The particular successed, on the nature and consequences of which the Treatice professes to dilate, are productive of greater minery to this basism frame than any other to which it is outsided.

This Work contains an accurate and complete account of the Assistery and Physiology of the Reproductive Organis, and of their relative conditions in health and disease. Not are these the sole contents of the work: the means of secape, as well as the fitter of the danger, are pointed out in clear and intelligible imaguage. It deservedly returnes the closest attention and state, for such about a missing distance of the physical carabilities of which sweet man as domestic and of the physical carabilities of which sweet man as should be physical carabilities of which sweet man as the basish, and of the physical carabilities of which sweet man abound the land. attention and study, for sugar subject can be of rates important o than the preservations of bushis, and of the physical carabilities of which every must should be pursued. FOREST PILLS,

FOREST PILLS,

(A Sarasparilla preparation of unexampled efficacy.)

These Pills are prepared from the best Sarasparilla,
combined wish other Vegetable properties of the
highest Madeimal virtue. They are warranted not
to contain any Mercury or Mineral whatever. They
purge without griping, nansisting, or weakening;
can be taken at any time without hinderence from
business, change of diet or danger of taking cold.
They neither have the taste or smell of medicine,
and are five times more effectual in the cure of
diseases than any Pills in use.

But a short time has elapsed since these great and
good Pills were first made known to the Public, jet
thousands have already experienced their good effects.
Invalids given over by their Physicians as incurable,
have found relief, and been restored to sound and
vigorous health from their use. MONTREAL, 8th April, 1850.

Bir.—I am convinced that the Plantagenet Spring Water, as an antacid larative and a statute for the tonies, is valuable indeed; and it is after its use, for eight months or more in my practice, that I can thus apeak.

Samt. B. Schmidt, M. D. To C. Laroeque, Esq.

MONTREAL, March 30, 1860. I have recommended the "Plantagenet Water" to a great number of my patients, and have found it to act as a gentle apericat—a small quantity producing that effect in many constitutions, and this I consider a very great ad-

goulde aperient—a small quantity producing that encer is many constitutions, and this I consider a very great advantage.

R. L. MACDONNELL, M. D.,

Lecturer on Chinesel Medicine McGill College.

My Drar Str.—I have pleasure in complying with your request, that I should inform you of my opinion in regard to the medical value of the Plaintagenet Spring Water.

It is now about twelve months since I became familiar with its employment in practice, and my observation of its effects fully confirms the accuracy of the opinion which I expressed to you in April, 1849, and which I based at the time upon its chemical composition, as revealed by the analysis of Mr. Hunt.

I have used the water tather freely, and have never been disappointed in my expected result. It has genily operated on the bowels, freely relieving them, and this more or less actively, in accordance with the quantity and will be found serviceable in all cases, especially requiring that indication to be fulfilled.

My experience of it in cutaneous affections is more live opinion of censive efficacy. I do not doubt, from the presence of Iodine and Bromme in the water, as associated with Magnessis, that it will prove serviceable in these cases also. It would require a more extended observation than that of a few months to cenfirm his opinion.

As an ordhary larative in pregnancy, I know of none safer, more paintable, or more generally acceptable to patients.

I remain,

Lecturer on Materia Medica, Mcckill College.

Montreal, Marcir 22, 1800.

Since August, 1848. I have recommended the Plantagenet Water in a variety of Chronic complaints, and with good effect. It has proved very useful in Dyspepsia, Rheumatism, and Serotula. Weakly and hervous persuis, and those in whom there was an increased action of the lowest and kidneys, took but half a tumbler at a time, repeated every hear or two. When possessed of more strength, and there existed a tardy state of the secretions, the water was more depictually parakent of; and in cases of Plethora, where a disposition to conspection predominated, with a tendency to fever and irritation, it was taken to the extent of several pints a day.

It would be a most happy circumstance if "Mineral Waters," generally, were to supersede, and be substituted for, the thousands o. vite and permicious compounds, under the style of Patent Medicines, with which a certain class of the community goge themselves, to their manifest injury, and to the advantage, soiely, of the unsecrupulous manufacturers.

Opinion of Dr. J. B. Randall on the merits of Wistar's Balsam of Wild Cherry.

We have been induced, in consequence of the benefits received from this medicine, to add out testimony in favor of its extraordinary heading properties. We take great pleasure in stating, that we have frequently used it ourself, and administered it to others during the past year, in cases of obstinate coughs, colds, soreness of the chest, &c., and always with the most happy result. We therefore cheerfully recommend to all afflicted with the above diseases, to TRY the Balsam of Wild Cherry.

The New York Evening Mirror says:—"Wistar's Balsam is still working wonders in curing the most desperate pulmonary diseases. We have not only witnessed its effects, but have seen a great many certificates, which place the efficacy of this invaluable medicine begond all presistion. It was a custom among the cay wetters of Year England to drink freely of Wild Cherry tee, and drank freely in corning and evening. The old Puritan Fathers used to regard it as "the sovereignest thing on earth" for all sorts of complaints; and there can be no doubt but the Balsam propared by Dr., Wistar is one of the very best gricles for Consumption shat has yet been thesoevered."
