

Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

No. 1.

SEMI-ANNUAL CIRCULAR.

REGULATION 43 OF THE BOARD OF EDUCATION.—The Chief Superintendent shall, in his discretion, forward to the Trustees of each District a Semi-Annual Circular, containing official notices, educational information, and especially a detailed statement of the Provincial Grants paid to Teachers, and the apportionment of the County Assessment Fund to Trustees. These Circulars shall be permanently filed by the Trustees, and shall be accessible to Teachers in each District.

EDUCATION OFFICE,

Fredericton, N. B., Feb'y 15, 1875.

THEODORE H. RAND,

Chief Superintendent.

Apportionment of Provincial Grants and County Funds for the Summer Term ended October 31, 1874.

In St. John and Portland there were 102 teaching days in this Term; in Fredericton, Woodstock, St. Stephen, Milltown, and St. Andrews, there were 103; and in all other School Districts, 113. In apportioning the Provincial Grants and County Fund to the Cities and Towns above-named, the time the Schools were open and the attendance made were raised to the basis of 113 days — the full term required of the Schools in the country.

In the following statement names in SMALL CAPITALS indicate the Teachers who received the Superior School Grant. This Grant cannot exceed \$150 per Term. Names in *Italics* indicate the Teachers who taught in poor Districts, and whose Grants, and those to the Trustees from the County Fund, were increased one-third over the ordinary amounts. The Grants to Class-Room Assistants (c. r. a.) are one-half the ordinary Grants to Teachers, according to the class of License. The ordinary Common School Grants per Term (and ratably according to the portion actually employed in teaching), are as follows: M. 1, \$75; M. 2, \$60; M. 3, \$45. F. 1, \$55; F. 2, \$45; F. 3, \$35.

Drafts in favor of Teachers and Trustees were issued by the Chief Superintendent, early in December last, for the amounts named in this CIRCULAR.

COUNTY OF ALBERT.

† From the University Grant.

A STAFF OF QUALIFIED TEACHERS—SUPERANNUATION.

THE supply of qualified teachers, and their retention in the school service, is a problem which no Province or State on this Continent has satisfactorily solved. In the business of education, the man or woman who educates is everything. A qualified teaching staff is, therefore, necessary to the wide diffusion of sound education. This truth has been clearly apprehended and deeply felt by those entrusted with the administration of public systems. While too much attention can hardly be bestowed upon school-houses, furniture, text-books and apparatus, it is evident that these, however skilfully devised, stop short of the requirements of the case. The matter lies deeper. The living agent, the teacher, is the power which actually determines the efficiency of all other instrumentalities. What is manifestly required, therefore, as an essential part of a common school system, is a staff of efficient teachers, men and women skilled in the difficult business of teaching. This is the very heart of the whole thing. Failure here is not made good by houses, books, or other appliances: it is failure out and out.

“The teacher is the school.” My experience and observation, both on this Continent and in Great Britain and Ireland, have forced the sentiment of the old maxim into my blood. I should not discharge my duty satisfactorily to myself, if I failed to give expression to the strength of my convictions on this point. Let any intelligent person fix his mind for a little on the best teacher he ever knew. Let him call to mind the sweetness of that teacher’s ways, the clearness of his methods, the accuracy of his knowledge. How skilfully he put one in possession of one’s own powers. How soon his pupils began to respect themselves, and to have confidence in their own abilities. How delightful to them was study, and how soon they learned, and with what an outcome of genuine power, that the boundless world of knowledge was not his alone, but theirs, and all men’s. Place now such a teacher in every school in New Brunswick: what possibilities of noble endeavor and achievement could be denied to a people reared under such guidance! And yet the Legislature of New Brunswick, having called into existence a system of free education, is under obligations to do its utmost to secure this very result. Just as far as we approximate it, and no further, shall we attain the object for which any public educational provision can legitimately exist.

I wish to suggest for the consideration of the Legislature what appears to me to be fundamental in this matter. It is this: the deliberate adoption of such measures as are calculated to bind the whole brotherhood and sisterhood of teachers of this Province together in a recognized profession. I here take it for granted that the business of teaching can fairly be shown to meet the conditions demanded of the general professions, though differing, of necessity, in some of its aspects from them all. I shall, therefore, proceed

*

at once to specify the two conditions which, in my judgment, are essential to its actual assumption of such a character before the public. The first condition is this :—

1. *None but persons who prove themselves qualified in a prescribed degree must receive authority to engage as Teachers in the Public Schools.*

This condition is fundamental. Now it is certainly possible to ascertain with sufficient accuracy whether the attainments of any applicant for authority to practice in any recognized department of the profession, are such as to warrant, without injustice to any, the issue of that authority in accordance with established principles applicable alike to all. A common authority must guard the door of admission to the profession, and the character of this common authority, and the uniformity of its operations, must be such as to preclude all suspicion of favoritism, and command in all respects the confidence of the public.

This first condition has been, I trust, fairly met by the action of the Board of Education, as set forth in Regulation 30 throughout. . . .

This Province, then, is in a position to consider with care the second condition referred to. It is this :—

2. *Teaching must afford such pecuniary guarantees as shall permit qualified persons to make it their business for life.*

I do not refer especially to the obligations resting upon the local communities in this matter. These obligations are great, and must, of course, be assumed before we shall have a staff of qualified persons making teaching their life work. These obligations will be acknowledged and discharged very much in accordance with the estimate placed by the Legislature of the Province upon the **QUALITY** of the work performed in the Schools. This estimate can find effective expression only in the means adopted by the Province to insure to the people that the character of each teacher's work shall be regularly and adequately tested, and publicly made known by the giving or withholding of suitable rewards. Granted such were done by the Province, it is plain that the local communities would thus be continuously appealed to by the importance assigned to the business of teaching. I make no doubt in saying that it is the duty of the Province to lead in this matter, and with solicitude to foster an abiding educational interest in the minds of all the people. I shall, therefore, confine my suggestions to such pecuniary guarantees as, in my view, the Province can fairly undertake in this behalf, and ere long ought to undertake. The guarantees which I propose to every successful teacher,—*i. e.*, to every teacher whose quality of work attests his success year in and year out—are definite pecuniary emoluments in the event of ill-health or old age overtaking him while engaged in the school service of the Province. These emoluments should be proportioned to the teacher's success and his period of public service.

It is obvious that Provincial guarantees thus conditioned involve the periodic classification of the **SCHOOLS** by competent men,—involve, in short, an efficient system of School inspection by the Province. I do not stay to demonstrate that a well-ordered system of inspection is the right hand and

eye of a public school system, since it is equally necessary whether the pecuniary guarantees of which I speak be provided or not, and since the provisions of Section 13 of the Manual of the Common Schools Acts, and Regulation 42 of the Board of Education, manifestly contemplate such a system of inspection as is required to secure the object immediately under consideration :—

SEC. 13.—From and after the period of five years from the time this Act goes into force, the Provincial aid to Teachers and Assistants, qualified and employed as aforesaid, shall be regulated in part according to the class of license, and in part according to the quality of the instruction given in the School as determined by the semi-annual examination of pupils by an Inspector, as follows: For the School year, or rateably as above, Male Teachers of the first class, one hundred and ten dollars; of the second class, eighty dollars; of the third class, sixty dollars: Female Teachers of the first class, seventy dollars; of the second class, fifty dollars; of the third class, forty dollars: in addition, each Teacher whose School shall be reported by the Inspector, in respect of quality of instruction, as entitled in any half year to the first rank, shall receive for the half year at the rate of forty dollars per year; the second rank, at the rate of twenty-five dollars; the third rank, at the rate of ten dollars, or rateably as above: each such Assistant shall receive a sum equal to one-half the grants to Teachers.

FROM THE REGULATIONS OF THE BOARD.—The sum placed at the disposal of the Board of Education for Inspectors' salaries is insufficient to secure the services of professional Teachers for the office. It is believed that the interests of education will be best promoted by the employment of Inspectors, for a limited period, chiefly in the work of making practically known to the people the provisions of the law, the steps to be taken to secure its advantages, the requirements respecting school accommodation, the careful and proper adjustment of boundaries, and in short, all matters necessary to enable every District to become so familiar with correct modes of procedure as to ensure the regular support of schools. As soon as this condition is reached, the work of inspection proper will require special attention, and demand professional qualifications for its successful discharge, as contemplated by the following Regulation :—

UNIFORM CERTIFICATION OF CANDIDATES FOR INSPECTORSHIPS.—In view of the operation of Section 13 of the Law, all candidates for the office of Inspector thereunder shall have taught for a period of at least three years, and shall have obtained a license of the Grammar School Class in accordance with Regulations 30 and 31; and upon appointment to office, each Inspector shall spend one term at the Provincial Training School, or such time as the Board of Education may require, with a view to a more perfect acquaintance with the methods of School Management and Teaching to be employed in the schools of the Province.—*Reg. 42.*

Taking it for granted that the schools of a population not exceeding 40,000 will be assigned to each Inspector in the discharge of the duties contemplated by Sec. 13 of the Law, I shall briefly outline the manner in which they may be periodically classified in respect of the *Quality* of work done in them. I would group all school subjects under two heads,—*Obligatory and Optional.* The obligatory subjects would be (say) such as reading, spelling, writing, arithmetic, geography, English grammar and composition. The optional subjects would include all others now taught in our schools, with the elements of vocal music, industrial drawing, and physical science.

The Board of Education would adjust and publish a programme of proficiency in obligatory subjects, and another in optional subjects. I am aware of the difficult and responsible task involved in the preparation of these programmes; but it is practicable. The great point to be had in mind is to save the programme from stimulating mechanical teaching, to grasp subjects vitally and not by mere externals, and to lift principles to the surface, and not mere forms. To entitle any school to be classed at all, not less than 75 per cent. of the number of pupils on each class-roll should be presented for inspection. To entitle a school to the first rank 65 per cent. should pass in the obligatory subjects, and an equal per centage of those engaged with optional subjects should pass in two subjects of this programme,—it being obligatory to teach two of such subjects (if the condition of the school permitted,) but the teacher having the option as to which two they shall be. Only one text in physical science should be allowed in any term. If only 50 per cent. of any class (of pupils) passed in two subjects, a school should be entitled to be placed in the front rank if the number of passes averaged 65 for the school. But if this partial failure were repeated in the same subjects in another class (of pupils), the school should not rank as first even if eligible in all other respects, because this repeated double failure would argue inefficient teaching of these subjects.

To entitle a school to the second rank, 50 per cent. should be required instead of 65, and one subject from the optional programme. Repeated double failure, on the basis of 25 per cent. instead of 50, to disqualify the school for second rank, even if otherwise entitled to it.

To entitle a school to the third rank, 40 per cent. of enrolled pupils should be required to pass in the obligatory subjects, and repeated double failure out and out, in any two subjects, should preclude the school from classification.

The number of passes in each subject, multiplied by 100, divided by the number on the class-roll, gives the per centage of passes in that subject; and the mean of these per centages gives the standard according to which the rank of the School would be determined. The outline I have now given is, of course, to be understood as merely approximate. The plan I have suggested is framed expressly with the view of avoiding the evils which educationists too truly, in my opinion, allege to inhere in the English plan. The foremost teachers in Scotland assured me that the chief objection now existing in that country to the English plan, was that it ignored the correlation of the various subjects of study, and virtually barred the way to the employment of the most successful methods of dealing with the fundamental subjects. Experiment after experiment has been made, and it has been shewn beyond all question, that schools confined to the study of the three R's make less progress in these subjects in the same period of time than those having a more liberal course of study. There is abundant proof that the soundest instruction in the essential branches is compatible with an extended course of instruction in other subjects. The plan outlined does not countenance the notion that a dry mechanical knowledge of any branch

is the thing to be sought after, but it does assume three important things :—First, that good teachers can so inform the minds of their pupils that these pupils shall be able readily to command their knowledge and set it forth ; secondly, that competent men can be had to perform this work of fairly testing the knowledge possessed and valuing the knowledge exhibited by any given number of pupils ; and thirdly, that the central authority shall watch with untiring vigilance the inception, growth, and maturing of the whole system. These assumptions are warrantable ones, and are obviously involved in the provisions of the 13th Section of the Law.

The outline I have now given indicates the general system of school work and supervision which must in a few years result from the operation of the Common Schools Act. I now return to the consideration of the pecuniary guarantees to teachers, in view of ill-health or old age, and which may be so grafted on the school system at this point as to contribute powerfully towards securing the permanent employment of the best teachers. I respectfully submit that the Board of Education should be empowered to annex to the terminal payments provided by Section 13 the following *SPECIAL PECUNIARY GUARANTEES TO TEACHERS, in the event of loss of health in the service, or disability from old age :*

1. A School (or Department) passing in the first, second, or third rank, shall entitle the teacher to a yearly allowance from the Board of Education equal to the following amount, per year, for every year of service performed under this guarantee :—

MALES.	FEMALES.
First Rank \$	First Rank \$
Second Rank \$	Second Rank \$
Third Rank \$	Third Rank \$

Where the series of passes made includes different Ranks, the proportionate average amount affixed to these different Ranks shall form the yearly unit ; but when the whole series of inspections of a school (or schools) taught by any teacher shews less than seventy-five per cent. of passes in some Rank, there shall be no claim to the special pecuniary guarantee, until this per centage is restored.

2. Teachers who shall have taught for a period of at least five years, on an average, in each district in which he or she has been employed under this guarantee, and the whole series of inspections of whose schools shews seventy-five per cent. of passes in the First Rank, shall be entitled to receive a yearly allowance from the Board equal to the following amount per year, for every year of service performed hereunder : Male Teachers \$—, Female Teachers \$—.

It is specially to be observed that the Rank of the School has no legal connection with the Class of the Teacher, but is wholly dependent upon the *QUALITY* of the work professed by the School, under the operation of an Obligatory and Optional programme of instruction. This leaves ample room and verge for the recognition of every form of teaching ability, and affords no shelter for talented indolence.

It is my conviction that the suggestions offered include in essence, and must evolve in operation, a fulness of sound results far beyond what the first blush of the subject might disclose. I shall briefly attempt to put these suggestions to the test. And in doing so, I wish anew to direct attention *to what it is we wish to accomplish*. It is this simply: the right education of the people of our Province,—not the right education of the few and the wrong education of the many, but a measure of the veritable thing itself for all. This is the aim, nothing more, or less, or else. Any proposition, come whence it may, that seeks incorporation into a school system, is to be condemned, if it can be shewn that its operation will not always and ever be a means to this end. But if it fairly passes this test, it is genuine, and all should unite for its incoming and welcome. Do, then, the two suggestions I have ventured to offer in behalf of a teaching profession in this Province so touch the complex sources of School life as to evoke concurrently all the forces of the school organism in the spread of sound education? I think a satisfactory reply to this crucial question may be rapidly outlined:

For the Province to demand specific qualifications as the basis of conferring authority to teach, involves the determination by the Province of the nature of these qualifications, the ensuring of suitable facilities for their attainment, and the careful examination by competent persons of all applicants for license. Thus, at one stroke, scholastic and professional preparation is quickened over the whole country, and quickened for all time.

Persons who are not capable of demonstrating a reasonable degree of fitness for the work of teaching will not seek to enter upon it, or seeking, will be debarred. Young men and young women of good parts observe that the Province has work for them to do,—work which she impressively declares to be of great moment, and which unqualified persons will not be commissioned to undertake; and their sympathies are enlisted in this department of the public service.

There is ever being born into the community a host of true souls, such as real teachers are made of, who are ready to renounce the prospect of becoming wealthy, for the sake of doing service in a great and worthy cause. All that is needed is the public assurance that the material wants of themselves and theirs shall be provided for in a manner tolerably in keeping with the functions to be discharged. Let this class of persons once know that the Province is pledged to make public declaration of the quality of the teacher's work, and that those who do good work can devote their lives to it without being exposed to distress and want in their days of weakness and old age, and the Province will have their services in the school rooms of the land. And let me here remark, that the special pecuniary guarantees which I have suggested are not pay for the services done, but simply the removal of an obstacle which would have prevented the service being done; and the recognition of the importance and value of the service.

To keep the door of the profession wide open for the admission of the best talent of the country, and at the same time to keep another door open

for the quiet withdrawal of those who, from whatever cause, are not successful teachers, is a problem that must be solved before sound education can be widely diffused. But the careful classification of all teachers by the Province, and the periodic classification of their schools under the conditions and in the manner suggested, with the accompanying guarantees, would set the door of entrance wide open, render those happy who love the work, and ever motion the remainder towards the door of exit. And just here, by way of example, I wish to put a current proposition to the touchstone of this test. Both on this Continent and in Europe a superannuated teachers' fund is thought to be a most desirable thing. In this opinion I fully concur, but not in the principle on which any fund known to me is administered. Take the Ontario fund, which illustrates a feature common to all that have come under my notice. Every teacher may pay in a certain trifling sum each year, and thereby become entitled, in the event of disability, to draw out annually a sum equal to \$6 a year for every year he has been employed. The Legislature of Ontario grants in aid of this fund some \$4,000 annually. Now, the benefits of this fund do not flow to the recipients as the recognition by the Province of the *excellence* of service rendered. The benefits are open to good, poor, and indifferent teachers alike. Hence persons who lack the energy necessary to make a decent livelihood in other callings, discover that their country's forethought has met their needs exactly. The result is, they are powerfully drawn towards 'keeping school.' They can eke out the present as well at teaching as at anything else; while the fund so thoughtfully created for the cloudy day ahead begets in them a persistent continuance in the work. The shifts of which they are capable pass comprehension. Their existence in the profession drives many worthy persons out of it, and keeps more from entering it. These "specks in the garnered fruit" generate decay. Poor teachers multiply, and the school system is weighed down with them. This is the obvious tendency of a fund so administered, and unless powerfully counteracted must retard the spread of sound education among the people at large. But, unless I greatly mistake, the pecuniary guarantees I have suggested meet the very case these superannuated funds were created to meet, and on principles which pass the test. These guarantees are for excellence of work,—excellence not of to-day, or of to-morrow, but throughout the entire period of service. Those whose schools fail of being ranked at all, or of maintaining the minimum status, are not doing a tolerable measure of the educational work required. The publication of this fact by the Province withholding the pecuniary guarantees given to others, must result in stimulating such teachers to diligence and effort, or in causing them to make room for better teachers. The migratory habits of teachers can also be effectively checked by the operation of these guarantees, so far as it is desirable to check them.

I think I have sufficiently indicated the far-reaching character of the simple suggestions I have offered, and shown their adaptation to the end in view. I am impressed with the thought that the administration of the entire school system of the Province should be regulated by a few funda-

mental principles within the comprehension of all, yet so gathering up into themselves every detail and directing the application of every force, that the operation of the system in every part shall unceasingly proclaim that the sole object sought is the widest diffusion of sound education.

It will be observed that the views now presented have an exclusive bearing upon our future Teachers. I see no way of creating and administering a general fund for the relief of teachers already disabled, or who will soon be superannuated, which is not open to very grave objections. Several cases deserving of relief (one being that of a teacher who has faithfully taught upwards of forty years in New Brunswick), have been presented to the Board of Education during the past year. But the Board has no power to grant any aid. It appears to me that the most satisfactory mode of meeting the cases that now exist, and those which may arise before any such general plan as that which I have outlined could become operative, would be for the Legislature to empower the Board of Education to deal with each case on its merits, and to grant such relief as the Board may think deserved. No general provision, applicable alike to all cases, would be wise, since, I am bound to say, I have reason to believe there would be some applicants who are wholly undeserving of any aid. I trust this recommendation may be favorably considered by the Legislature.—*From the Chief Superintendent's Report.*

CANADIAN AND ENGLISH HISTORY.

Specimen sets of our Series of Readers have been sought by a large number of the Superintendents and Educators of the Eastern and Middle States, and the Board of Education for Prince Edward Island has prescribed these Readers for use in their Schools. The Board arranged for the publication of the History of Canada by the first of the current Term. The book has been delayed, however, but its immediate publication is anticipated.* In this book the history of the several Provinces is treated, mainly, according to its relative importance. It is intended that the History of Canada shall be begun when the pupil enters the Fourth Reader. He will thus obtain, as a side-light, an outline knowledge of the whole course of British History at the same time that he is studying the History of Canada. During the past year Thompson's History of England, edited by the eminent historian, Edward A. Freeman, D.C.L., has been prescribed as a text-book. This little work, casual in method and Saxon in style, is intended for study by those pupils who have mastered the text-book of the History of Canada and the outlines of British History contained in the Fourth and Fifth Readers. It will be observed that the texts of History are so arranged as to ensure considerable historical study in every district, and at the same time are adapted to the different conditions of the Schools. *From the Chief Superintendent's Report.*

* This text-book is now ready. See advertisement on the cover of this Circular.

The sound of long U.

In order to assist Teachers in eradicating from their schools the mispronunciation of long *u*, when preceded by certain consonants, we have prepared the following Memorandum which, it is believed, will prove very helpful to them.

$$\left. \begin{array}{l} u, \\ cu, \\ *cw, \\ ieu, \\ ieu, \end{array} \right\} = \text{you or yu}$$

I. The long *U* is commonly pronounced correctly in all words in which it, or its equivalent diphthong, is preceded by *b, c, f, g, h, m, p, v,* or *y*.

EXAMPLES:—Bugle, tribune; Cube, excuse, skew; Fume, few, feud; Gewgaw; Huc, hew; Mute, mew; Pure, pew; View; Yew. Also in words beginning with long *u*.—Use, ewe.

Observe that in these words the long *u*, or its diphthong, is correctly pronounced as *uu*, e. g. bugle = *hūa-gle*, not boogle; cube = *cyube*, not coob; mute = *myute*, not moot; huc = *hyue*, not hoo.

II. But long *U* is commonly mispronounced, in many of our schools, in all words in which it, or its equivalent, is preceded by *d, n, s,* or *t*.

EXAMPLES.

1. Long *u* preceded by *d*:—Duke, dupe, duty, dutiful, due, dew, during, durable, duration, endure, adduce, educe, induce, reduce, seduce, adicu, bedew, subduo, e. g.:

	MISPRONOUNCED.	INSERT <i>y</i> BEFORE THE <i>u</i> AND PRONOUNCE THUS:	
Duty,	dooty or fjewty.	-yu-ty,	dyu-ty, Duty.
Due, }		-yue,	dyue, Due.
Dew, }	doo or jew.	-yew,	dyew, Dew.
Duke,	dook or jewk.	-yuke,	dyuke, Duke.
Endure,	endoor or enjewr	-yure,	dyure, Endure.
Adieu,	adoo or ajew.	-yieu,	dyieu, Adieu.

2. Long *u* preceded by *n*:—Nude, numeral, numerate, numeration, numerous, innumerable, nuisance, nutrition, avenue, neuter, neutral, neuralgia, new, news, newspaper, renew, newt, e. g.:

	MISPRONOUNCED.	INSERT <i>y</i> BEFORE THE <i>u</i> AND PRONOUNCE THUS:	
Nude,	nood,	-yude,	nyude, Nude.
Neuter,	nooter,	-yeu-ter,	nyeu-ter, Neuter.
New,	noo,	-yew,	nyew, New.

3. Long *u* preceded by *s*:—Sue, suet, pursue, pursuit, suit, suitable, suitably, suitor, assume, presume, superfine superficial, superintend, superstition, supervise, e. g.:

	MISPRONOUNCED.	INSERT <i>y</i> BEFORE THE <i>u</i> AND PRONOUNCE THUS:	
Sue,	soo or †shu.	-yue,	syue, Sue.
Assume,	-soom or -shume.	-yume,	-syume, Assume.
Superfine,	sooper or shuper	-yuper-	syuper- Superfine.

4. Long *u* preceded by *t*:—Tune, tuneful, attune, tube, tubular, tuberoso, tumult, tumor, tumid, tulip, tunic, tutor, tuition, Tuesday, institute, institution, obtuse, constitution, constitution, constitutional, restitution, costume, stew, steward, Stuart, Stewart, student, studious, stupid, stupor, -tude as in magnitude, multitude, fortitude, solitude, e. g.:

	MISPRONOUNCED.	INSERT <i>y</i> BEFORE THE <i>u</i> AND PRONOUNCE THUS:	
Tune,	toon or †chune.	-yune,	tyune, Tune.
Tube,	toob or chube.	-yube,	tyube, Tube.
Institute,	-toot or -chute.	-yute,	-tyute, Insti-tute.
Costume,	-toom or -chume.	-yume,	-tyume, Costume.
Stew,	stoo or -stchu.	-yow,	-tyow, Stew.
-tude,	-tood or -chude.	-yude,	-tyude, -tude.

REMARKS.—The long sound of *u* preceded by *l* is between that of *oo* in *room* and *yu*, approaching the latter more closely than the former; plume, flume, flute, lute, lure, allude, lew, lurid, revolution, conclude, conclusion, allusion, blue, blew, clue, clew.

The long sound of *u* preceded by *r* in the same syllable is that of *oo* in *room*; true, truth, rue, rule, cruel, gruel, imbrue, brew, draw.

* Except in *sew, skew, strew, sciver*, and as under REMARKS.

† In these latter pronunciations the long sound of *u* is correctly given, but the sound of the preceding consonant is improperly changed. *S* has the sound of *sh* before *u* in *sure*, (and in some words ending in *-sure*), and in *sugar, sumach, and sensual*.

TRUSTEES SHOULD BE CAPABLE MEN.

Trustees have frequently been exceedingly slow to perceive that they are members of a Corporation, and that their acts are without authority when done in an individual capacity. They have tenaciously clung to the idea that each Trustee was a Corporation, and that each such Corporation was "free and equal." The Secretary of the Trustees, also, has, in numerous instances, deemed himself authorized, of his own motion, to perform all the duties of the Corporation. Such misconceptions of duty and authority have resulted in confusion and difficulty in the Districts concerned. In all such cases no pains have been spared to secure the careful administration of the Law, and the services of the Inspectors have been especially valuable in this behalf. Both in respect of the Trusteeship and the public School Meetings of ratepayers, the Common Schools Act has, during the past three years, been subjected to a pretty severe strain. All doubt, however, of the ability of every District to secure, after due experience, Trustees capable of efficiently discharging the duties of the office, have passed from my mind. The people are rapidly perceiving that only their best and wisest men should be elected Trustees of Schools. This result will be seen, in review, to have been no mean part of the beneficent outcome of the Common Schools Act.—*From the Chief Superintendent's Report.*

OFFICIAL NOTICE.

UNDER the authority of the twenty-third Regulation of the Board of Education, a Teachers' Institute will be held in the Temperance Hall, Fredericton, on Wednesday, Thursday, and Friday, the 7th, 8th, and 9th of July, 1875. The first session will begin at 10 o'clock, A. M. There will be three sessions each day.

The Teachers of the Public Schools in the
COUNTIES OF YORK AND SUNBURY
are requested to be present *at all the sessions* of this Institute. In the event of any Teacher being unable to comply with this request (see Reg. 23), it is required that a written statement of the cause of absence from any session be transmitted to this office.

*Education Office,
Fredericton.*

THEODORE H. RAND,
Chief Superintendent.

N. B.—The Institute will be open to all Teachers in the Province who may be able to attend. The examinations of the Public Schools of Fredericton take place on July 2nd, 5th and 6th; and professional exercises are conducted daily, throughout the summer, in the Provincial Training School. The exercises of all these schools are open to the observation of Teachers.

T. H. R.
