PUBLIC MEN PRESENT

Members of Parliament, Judges and Civil Servants Paid Respects.

By a Staff Reporter.
MORRISBURG, Ont., Sept. 29.—The premier of Ontario had been laid to rest in the tomb of his fathers. In a little old-fashioned cemetery on a hillside fronting a stretch of the St. Lawrence River, the body of the late Ontario statesman was buried late this afternoon and a whole countryside turned out to do him reverence. A fitful rain storm which had threatened all day gathered as the burial proceeded, and at the moment when the mourners assembled about the grave, broke in a smart patter of drops. For ten minutes the congregation stood with bared heads as the last rites were read out. The body was then lowered into a vault in the Whitney family plot and the service was over.

ANTWERP, Sept. 29.—It is reported here that the Germans have destroyed a quarter of the City of Tournai, in Hainaut, Belgium, levied a war contribution thereon of two million francs and arrested a number of notable citizens.

Tournai, whose population is somewhat over 35,000, is noted for its wool and cotton spinning industries. It is probable that the notable citizens mentioned in the despatch as having been arrested, were taken as hostages, according to the German custom, to enforce the payment of the war contribution.

Official Reports indicate That Von Kluk is in Desperate Plight, But That Deadlock is Unbroken—Russians Will Probably Invest Cra-cow Before End of Week.

Canadian Press Despatch.

LONDON, Sept. 29, 9.50 p.m.—The fighting of the past few days, which took the form of heavy offensive operations, has not changed to any marked extent the positions of the opposing armies in northern France. Some hard blows have been struck by each side, but the armies remain practically where they were when the Germans stopped their retirement and commenced to entrench themselves.

The lengthy official communication issued today by the French general staff makes this plain. The lines of the allies are roughly sketched in the statement, and it is gathered that the French right still rests on Pont-a-Mousson and from there turns southward to cross the Meuse near St. Mihiel, where the Germans are engaged in pushing a contingent forward.

Wings in Close Touch.

In the west the wings are in very close touch, the Germans holding Laslogny, which lies between Ribecourt and Roye, which are in possession of the French and also Chaulnes, which is in an almost direct line between Roye and Albert.

It is here that the allies have been attempting a wide turning movement to prevent which the Germans have apparently sent out strong opposing forces.

The French announcement says the Germans have continued their day and night attacks only to be repulsed, but it is evident that they are showing plenty of fight and are making a supreme effort to break through the lines working around their right.

To the north of the Aisne two well-entrenched armies still face each other, neither being able to make much headway, while in the centre the artillery duel continues in the district between the Argonne and the Meuse. The French claim slight progress, an indication that they are making heavy attacks to compel the Germans to withdraw from St. Mihiel, where they might bend, if they did not break, the French front.

The French also report that they captured a number of prisoners yesterday, but do not say where this capture was effected. Both sides profess to be well satisfied with the position which they are making, and are wearing on the troops. "Naturally fresh troops are being brought up continually, but it is dangerous for either side to withdraw many men from the fighting line, even to give them a short respite.

German Right Strengthened.

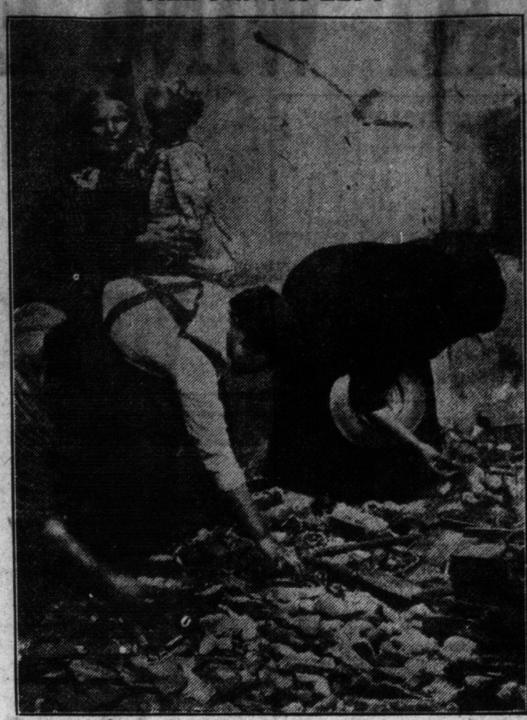

The Germans have already strengthened their right at the expense of the rest of their line, and many more men will have to be sent to assist them when they are due to be disclosed. They may arrive in time to turn the balance in favor of their side.

Russians Near Cra-cow.

Having invested Przemyel, the Russians are reported to be making their way not only thru the Carpathians to sweep across the plains in North Hungary, but, in strength, toward Cra-cow, which they should reach before the week is out, unless the Austrian field army should succeed in checking the advance. Their arrival at Cra-cow would be the signal for a battle along the Russian-German frontier.

Their extreme right, and they have considerably reinforced their front extending north of that fortress thru Kallez, Russian Poland, to Thorn, in the province of West Prussia. Further north they have crossed from East Prussia and have got as far as the River Niemen, where they are reported to have suffered a reverse.

The two armies, however, are in close touch right across the country, so that a battle along this extended front cannot be long delayed. The Russian emperor's immense armies will oppose the Germans at every point and will themselves try to invade Germany in more than one district.

WAR SUMMARY

While the French and British official announcements indicate satisfaction with the situation along the battle front in France and confidence in the outcome, an unofficial report from Paris declares that the German right has been broken and is being pursued by the allies. This report also declares that the Germans have been surrounded in the Somme department and that Pozzins had been recaptured. The official press bureau at London while making no objection to the publication of these reports, declined to take any responsibility for the correctness of them.

In the far east there are signs of such activity on the part of the Japanese, who are engaged in a movement, by both land and sea, against the German concession of Kinschuan, in Shantung Province, China. The Japanese have occupied the heights outside of Tsingtau, the capital, overlooking the Germans' main line of defence. Chinese troops have blown up the railroad bridge at Tayuho, six miles west of Weishien, which has also been occupied by the Japanese, and are apparently opposing Japanese military operations in Shantung Province.

The meagre reports of the Russian campaign against Austria and Germany indicate a period of comparative calm, while the great armies of these nations are getting into position for offensive and defensive.

A British cruiser squadron, in command of Rear Admiral Sir Christopher Cradock, who recently commanded the British warships in Mexican waters, has arrived at Puna, Straits of Magellan, and is believed to be on its way to the Pacific.

The Italian Government has issued a warning to Italians who have taken, or intend to take, service in the army of any country now at war, that it is breach of neutrality and is punishable by imprisonment.

Late despatches declare that the Germans have begun their attack on the first line of the Antwerp defences, that they have recaptured Malines, occupied Moll, an important railway junction, and are bombarding Lierre, a few miles from Antwerp, where many houses have been destroyed.

Great Changes Coming in Banking

The Canadian bank system is up for discussion and will be discussed until it has all been thrashed over again. For years everything was taken for granted; now everything about banking in Canada is to be re-examined, tested, tested even with the acid test. As a result our banking system will be changed, will be re-adjusted to modern experience and practice. That does not mean that our banks are to be injured; but they are to be made more useful. And what will be the fundamental principles that will come into play?

And when we speak of the banking of a country always remember that we have in mind the currency of a country, and by currency we mean the money circulating medium of the country, and by banking we mean the receiving of deposits and lending of money and the lending of credit; and probably this latter the greatest of these three. Now then, as to the new principles; what are the principles that will play a part in Canadian banking as thus defined?

First, that the currency absolutely, and banking relatively, are public services and must be regarded as such, and that the state must control the one and regulate the other, and that the public interest in both overrides any other interest. Our parliament, therefore, must make a law in regard to banking, and our ministers of finance must be the public head of the organizations, and while the shareholders are entitled to reasonable profits and even a reasonable accumulation of rest money, it must always be recognized that the service to the public is the main thing, and especially if the currency to be supplied as a national currency, and if the bulk of the capital used comes from the public in the way of deposits, or as we prefer to call them, the savings of the people.

And the second principle that will come into more pronounced play in Canada is that inasmuch as that credit which is at the base of all banking rests largely on the collective credit of the nation and the assets of the nation it ought to be controlled and used for the benefit of the public at large by means of a national bank which would be in a position to lend this credit of the nation to banking in credit and the medium of these transactions of rediscunt to be national notes. In other words, a national bank is a bank of rediscunt, for the use of the public thru the agency of chartered banks, and our law must, therefore, provide that the charges for the use of this credit be reasonable to the public and reasonable profitable to the banks, and must be available at all times, and especially in times of stringency.

As to the currency in this country, that is now issued by the banks. In the light of the experience of our neighbors, the United States, and of all the leading countries of Europe, except that of Great Britain, and even in the light of the experience of Great Britain in the present war, it does seem to be established without contradiction that the currency of the country must be a national currency, and that bank note currency must be withdrawn. Bank note currency antagonizes a national currency, and we have had a wide experience of that in this country. In less than two years there will be nothing but a national currency in the United States, and we believe that this will be realized in Canada in a very short time. In other words, banking is to be, as we said above, recognized as a great public service, to be organized, upheld and publicly regulated for the benefit of our districts, our occupations, our products and purposes of government. And as thus defined, there is benefit to the public, a reasonable return to any capital invested in by shareholders in chartered banks, and a reasonable interest return to depositors who put in their savings.

Now these must be the underlying principles; but there are other matters that have to be discussed and one of the first that will come up is that of centralizing the banking system as against what is called a local banking system. We do not propose to discuss this question on this occasion, but in order to show that it is a matter of concern, we propose to reprint an editorial from a western paper.

WEAKNESS OF BANKING SYSTEM.

The weakness of the Canadian banking system is not that here and there an incompetent bank manager presses some person rather hard for money owing the bank, and thus prevents desirable development. The weakness is in the system of Canadian banks which centralizes the management of all the financial institutions, and places the control thousands of miles away from the point of investment.

It cannot be denied that such a system has some advantages. It makes for stability, the possibility of failure is somewhat exaggerated. But the United States system of a series of local banks scattered thruout the entire country is much better for a country in the development period.

Under our system the bank manager in a small western town is no great factor in the banking institution. As a rule his experience is not very great, and his powers are curtailed. He has no particular interest in the town in which he is located. He is working for promotion and hopes some day to be removed to a bigger town. He does his part by encouraging industry by loans, and in every possible manner advancing the interests of that town. The result is that the banks across the line are much more generous, particularly to the farmer, than the banks of Canada. Here the farmer finds great difficulty in getting money. There he has no difficulty if he has the land and his prospects are good. Here a farmer gets but few loans and small ones. There it is not the exception for the banks to finance a promising man. Here the farmer finds certain set rules, which the local bank manager cannot go around. There the bank manager has fewer rules, and loans to the man who asks for a loan. Here, before the banks will do anything to promote such a promising industry as the live stock industry, it must organize a society and get the backing of men of money in the cities. There it is the most usual thing for the banks to hand over the money and do the whole thing themselves.

The weakness of the Canadian banking system is that it is centralized in Montreal and Toronto, and banks do not give a half for the little towns on the prairie or any place else. Their object is to make money, which is quite right. If they can use their money to better advantage than loaning to the farmers, they will not lend to the farmers, which is not surprising.

The United States system is better for the country in the development stage. We said we would not discuss at this moment the merits of the local systems as against the central system; but we do say the two systems must be thrashed out over again. There may be merits in both practices. In the United States they are not only in favor of big and little banks, central and local banks, but one feature of the laws now coming into force in the United States is that there shall be twelve great national rediscunt reserve banks scattered over the United States in place of a collection of powerful, private corporation banks concentrated in New York. The great reserves, the savings of the people, are to be more or less distributed among twelve "reserve cities." That means for one thing that the whole of the savings of the nation are not to be stored alongside of the New York Stock Exchange and its questionable practices.

The regulations are now exceedingly stringent, and a number of foreigners were forced to leave the city today.

QUEBEC, Sept. 29.—The following is in part the farewell message issued in pamphlet form by Col. Sam Hughes to the Canadian contingent.

War of Defence.

"Lust of power; the subjugation of the inferior and law-abiding neighbors; autocratic aggrandizement, have caused this war. In its cause the allies are just.

War of Defence.

"Belgium and Holland have long excited Prussian ambition for ownership. Austria has desired extension towards the Buxine and Aegean Seas—insane lust of conquest bringing ruin, rapine and misery in its train.

War of Defence.

"It has been long predicted that when the Kiel Canal would be completed, Germany would begin the long dreaded war. The Kiel Canal was completed early in July. War was begun before the end of that month.

War of Defence.

"Soldiers! The world regards you as a marvel. Within six weeks you have done what the regular armies of the latter countries could take the field.

War of Defence.

"Every night a sortie is made and every morning brings its quota of dead and wounded, sometimes as many as 1000, making a heavy drain on the garrison; but the usefulness of these expeditions cannot be exaggerated.

War of Defence.

"Every man among you is a free will volunteer. No one has been invited. No more typical army of free men ever marched to meet an enemy.

War of Defence.

"That you will be brave, self-sacrificing, and collectively wherever your courage and steadfastness are proved in the field, is the conviction of all Canadians.

"Black Rats" of Antwerp Make Nightly Raids—Danger of Starvation.

Belgian Sorties Scare Germans

"The situation in Brussels is one of great uncertainty," said Mr. Hawkin tonight. "Food is the gravest danger of starvation. There is scarce and 150,000 people are applying for rations, which the German administration is finding difficult to supply. There is the further danger that the workingmen of the city may rise in revolt."

Belgian Sorties Scare Germans

Mr. Hawkin was greatly impressed by the spirit of the Belgian troops at Antwerp. Regarding conditions there he said:

"Every night a sortie is made and every morning brings its quota of dead and wounded, sometimes as many as 1000, making a heavy drain on the garrison; but the usefulness of these expeditions cannot be exaggerated.

JOSEPHUS NELSON LARNED

IN HIS WONDERFUL

History of the World

NOW ON DISTRIBUTION BY

THE TORONTO WORLD

Interprets and explains the Norman Conquest and how it made the English Speaking Peoples the Greatest in the World!

On October 14, 1066, Was Fought the Battle that Made World-History, "The Battle of Hastings."

On a summer's morning in fair Normandy, now highest to a thousand years ago, a tanner's daughter went far into the forest plucking flowers and singing by the way.

Duke William was their son, and he became, in man's estate, the King of Merrie England. And now the blood of George, fifth of that name to sit an English throne, prickts just a little fiercer and more fast, because high-mettled with the ruddy drops, rutilant in his Hanoverian veins.

Came a bright October day, in Christian calendar, year thousand-sixty-six, and saw foregathered on the Sussex sands a vast array of Norman knights and men-at-arms.

In that year Saxon Harold was the King of England. Far to the northward he had made new march to meet the King Haradrada and his men of Norway.

And Norman William moved to meet him with his fifty thousand men. For Harold, with his lesser host, would not come down. From nine by morning sun till three hours after tide of noon went on the battle.

And thus the Normans won the fight at Hastings. And at the feast of Christmastide that year in London town they crowned Duke William, King of England!

WEDNESDAY MORNING, SEPT. 30

Forehandness.

A distinct revival in business has been evident for some days past. Business men who have been under the narrow and who are aware of the tense condition of the money market are scarcely willing to admit anything very tangible, but they do not deny that there is an improvement.

It is like the first almost imperceptible movement of the spring on a March or April day, and comes with a trickle of water and a sense of increasing vitality. Down town yesterday there was a note in the air that almost corresponded to the challenge of the bull-frog when the spring has loosened things up.

It is a good sensible thing to look around these days and to try and understand where Canada is at. We have more wheat and apples than we can eat or than we can get into our houses.

We are still in the ring and putting in solar plexus punches. Things are coming our way. The odds are with us and the money is up on us.

This is what tends to the restoration of confidence. Confidence is credit. A man either has credit or he has not. If he has it, he can get it.

Then again, they have to understand

that upon their efforts depends not only their own career but the fate of their country. Canada consists of its people, its merchants, manufacturers, workers of one kind or another.

The Debit Side

At first glance one might be unable to see why any country far removed from the scene of conflict should not profit financially from the great war.

But there is a debit side to the ledger. The manufacturer has lost his market in many lands; he may also be crippled by the scarcity of his raw material, and his difficulty in collecting for the goods already sold and delivered to countries in or near the conflict.

What is true of the United States we venture to think is true of Canada, namely, that the war has benefited many farmers by higher prices, but has greatly dislocated trade and crippled business enthusiasm.

Progress of the Primary

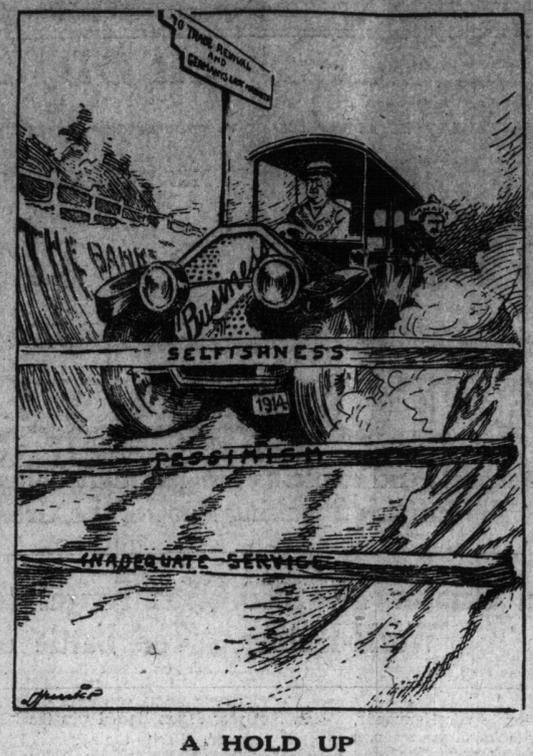

On Monday the three political parties in the State of New York named their candidates for United States senator, governor and other state officers by a state-wide primary.

The New York statute may be defective in details, but it is significant that no one proposes going back to the old delegate system.

A War of Ideals

Not without reason do the apostles and evangelists of Prussian militarism and the German people because of them hold the United Kingdom as their representative antagonist in this war.

The British Empire has been developed not in accordance with a preconceived theory imposed by powerful minds saturated with the belief that

A HOLD UP

the government and the state are things apart from the people and superior to the people. As it now exists it is the result of a natural growth following closely that of the motherland herself.

Great Britain for an explanation of the origin of the legend of Archangel. Right here in Canada everybody believed on the same circumstantial but intangible evidence, that Australian and Indian contingents had been transported in the dead of night and with all the other appanages of silence and mystery from Vancouver to an eastern seaport.

COURT ALLOWS APPEAL

Guardian Trust Will Sue for Money to Support Italian's Family.

Mr. Justice Middleton at Osgoode Hall yesterday handed down judgment in the Joseph Sheard estate case. He ordered that the legacy left by the testator to a trust company, with authority to pay over the income to Miss Sheard, with the approval of the official guardian, should be paid to the principal at any time if necessary.

Of Weak Mentality. Mr. Rowell, K.C., who appeared for the daughter, argued that the words "for her proper support and maintenance" did not in any way cut down the absolute gift, but merely indicated the motive or purpose of use present in the mind of the testator.

Appeal is Allowed. The court of appeal allowed the appeal of the Guardian Trust Company as administrator of the estate of Antonio Andriola from the decision of Mr. Justice Britton, who dismissed its suit against the Dominion Construction Company for \$10,000 damages.

ONES HERE TO 'FRUIT-A-TIVES'

Cured Both Stomach Trouble and Headaches.

"PALMERSTON, Ont., June 20, 1913.—I really believe that I owe my life to 'Fruit-a-tives.' Ever since childhood I have been under the care of physicians and have been paying doctors' bills. I was so sick and worn out that people on the street often asked me if I thought I could get along without help. The same old stomach trouble and distressing headaches nearly drove me wild. Several years ago I got a box of 'Fruit-a-tives' and the first box did me good. My husband was delighted and advised a continuation of their use.

"Today I am feeling fine, and a physician meeting me such a street noticed my improved appearance and asked the reason. I replied, 'I am taking Fruit-a-tives.' He said, 'Well, if 'Fruit-a-tives' are really what you look so well, go ahead and take them. They are doing more for you than I can.'"

"Mrs. H. S. Williams."

"Fruit-a-tives" are sold by all dealers at 50c a box, 6 for \$2.50, trial size 25c, or sent postpaid on receipt of price by Fruit-a-tives, Limited, Ottawa.

FISHERIES TREATY NEGOTIATIONS OFF

Canadian Government, Wearied by Long Delay, So Notifies U.S.

By a Staff Reporter. OTTAWA, Sept. 29.—Hon. J. D. Hazen, minister of marine and fisheries, has notified the United States Government that the proposed treaty between Canada and the United States regarding the taking of food fish in boundary waters is now definitely dropped and Canada assumes freedom of action to make such regulations as her own as she deems necessary.

The treaty was drawn up four years ago by Dr. David Starr Jordan for the United States and Prof. Prince for Canada. The Canadian Government agreed to it, but opposition was raised by certain interests in the United States and approval of the treaty by congress was delayed from time to time. The present administration at Washington when it came to power seemed anxious to have the treaty adopted, but the opposition continued, and the time allowed by Canada for ratification had been exceeded. The Dominion Government has decided to wait no longer. Canadian fishermen were handicapped in some ways, it is said, by the unsettled condition of affairs and the government will make new regulations at once.

The Great Northwestern Telegraph Company announces that, commencing October 1st, deferred cable service will be resumed with all countries with which it was in effect prior to the commencement of the European war, except that in regard to the service extends for the present only to Great Britain, Gibraltar, Holland and Norway. In the case of Australia, New Zealand and Tasmania, deferred messages must temporarily be routed to London, owing to interruption of the British Pacific cable.

DEFERRED CABLE SERVICE RESUMED

The monthly board meeting of the Women's Auxiliary will be held at St. George's Hall, West Toronto, on Thursday, Oct. 1, not on the 15th, as previously announced.

The Thursday Night Club of the Political Equality League will be addressed by Miss Ray Leviney at the house of Mrs. F. M. Mackenzie on the evening of Oct. 1, at eight o'clock.

Those great musical artists, and there are many of them who are fortunate enough to leave Europe before the trouble began, are congratulating themselves that they are in England and America. Advice from New York is to the effect that not many of the most famous will be heard on this side of the Atlantic this season. Among these are the baritone voice of wondrous beauty and sweetness, yet with sufficient strength as to suggest grand opera powers. He also possesses fine dramatic ability, and the charm of his selections are heightened by dramatic interpretation. He is a gifted with great purity of diction and a perfectly clear enunciation and sense of style, and his pronunciation of foreign tongues show that he has a real speaking knowledge of the languages.

Another great artist who will be seen here also in November is Pavlova, with her company of Russian dancers and grand orchestra. Owing to the great demand for this attraction the famous dances will only make two appearances here instead of three as originally contracted for.

Be Careful of Your Food. The convenience of Young's Lunch, at the corner of Yonge and Queen streets, entrances on both streets, makes it an ideal place for the average downtown business man to get his lunch. There is no time lost in the service, because it is a self-serve canteen lunch, and the pure cream, butter and milk is supplied daily. Every effort is made by the management to ensure purity of food, and this, combined with prompt service and reasonable charges, makes it the most attractive place to take one's meals.

GOES TO OTTAWA. On the eve of his departure for Ottawa, William Milne, an old and respected servant in the civil service D. L. O. office, was presented with a handsome brass book rack as a memento of the high esteem which his fellow-clerks felt for him. James Boddy made the presentation and expressed deep regret on behalf of the department that he was leaving.

war, Gen. Venustiano Carranza says: "I will gladly take such action if it is ratified by the general conference; if not I will fight with the same energy that I employed in combating the usurpation of Huerta. I will fight reaction and the old regime which appears now to be headed by Villa, who, it may be, is an unwitting tool in this as was Orozco in his fight against Madero."

CALGARY, Sept. 29.—"With a greatly increased demand for everything, immigration greater than ever before and a return of that old-time prosperity to which the country is so accustomed, the whole Dominion in general and the great western provinces in particular should enjoy, at the close of the present war, a period of prosperity which will set the country on its feet that it need never again have cause to fear, and as for the people themselves, if they will only realize that there is no reason whatever for talking about alarming conditions that do not exist and will only exercise a little caution and keep up hope and courage, at the same time avoiding speculation, they will be further ahead in a few months than they would have been if conditions throughout the world had remained normal."

CANADIAN STUDENT HAD LUCKY ESCAPE

Got Away From Germany as American — Known Britons All Arrested.

Special to The Toronto World. TWEED, Sept. 29.—Ross Tuttle of Tweed, who was a student in Germany and recently escaped from the theatre of war, underwent some interesting experiences before arriving safely under the Union Jack. When the war broke out he was living at Gottlingen, the military centre for that district. Mr. Tuttle is a son of Dr. Tuttle of Tweed. On Friday, August 4, word was received of Great Britain's declaration of war and before morning most of the British subjects had been arrested and put in jail. Those arrested consisted of Canadians, South Africans and Hindus. However, Mr. Tuttle was missed. In a few days notice appeared in the papers saying that all foreigners including Americans must report to the police in order to secure special passes which would enable them to leave Germany.

BRITAIN IS NOT JEALOUS OF GERMANY, AVERS FALCONER.

Several Nations Have Found Prussia Had a Malignant Disease. The menace of Prussian militarism as a force threatening modern civilization was dealt with by President Falconer in his opening address to the students of the University in Convocation Hall yesterday afternoon. "The Germany that we knew and admired," said the president, "has been trampled down by the rule of a ruler. The present attitude of the Briton to Germany is not one of jealousy. Britain has no more desire to take her commerce from her by force than she has to seize her intellectual development. We are one of several nations who have found that another nation had a disease dangerous to the rest of the world. That disease is Prussian militarism."

There were some splendid watermelons, which were very reasonable, the prices being especially so, as you would get three large, firm white heads for 25c, the smaller ones going at two for 10c.

MONTREAL GRAIN AND PRODUCE. MONTREAL, Sept. 29.—The local situation in grain today has shown no change from the demand from abroad was again very light and little or no new business was reported. The local demand for oats did not improve with the export prices quoted and dealers here seem quite satisfied to wait.

The increased price in cheese has curtailed the demand from foreign buyers to a large degree, and little or no new business for export was done. A few small orders were reported by local houses, but no big movement is taking place. Butter was easier at Saturday's decline. The feeling prevails here that for at least a short while the present prices will continue to hold, as the market was easy and unchanged. Eggs were quiet but steady.

WORLD'S SUPPLY OF WHEAT LARGE. Prices Crumbled After Rise on Report of Closing of Dardanelles.

CHICAGO, Sept. 29.—Wheat prices flattened out today after a decided bulge, due to reports of the closing of the Dardanelles. The huge increase of the world's available supply, which was chiefly responsible for the collapse of the market, is being felt here.

Closing prices were weak at 5/8 to 2/8 under last night. Corn finished 1/4 to 1/8 down, oats off 1/4 to 1/8 and provision from 30c decline to an advance of 2/8.

Prices crumbled rapidly in the wheat pit as soon as announcement was made that world stocks had been enlarged almost four times as much as at the corresponding time a year ago, and that the total was now nearly 5,500,000 bushels heavier than last year's aggregate. At the end the bears had the further advantage of reports that the Dardanelles would remain within a few days of the Russians had captured the fortress of Premysl.

Corn swayed with wheat. Fine weather for maturing the new crop tended likewise to accelerate the late decline. Reports of the collapse of the government of Greece could not be confirmed, and in consequence the oats market, which had been tending up-grade, suffered sharp break.

Foreign selling of January and February hard unsettled provisions. Nearby months were relatively strong.

GOOD DEMAND FOR APPLES. OTTAWA, Sept. 29.—Cables received by the fruit branch of the department of agriculture show an excellent demand for apples in Great Britain. Reports from Nova Scotia points, also Regina, Edmonton and points in British Columbia are also satisfactory.

GRANTS PROBABLE. The three-Toronto regiments may be aided by city grants. Tomorrow the board of control, which already approves of the proposal, will discuss it in detail. The Queen's Own, Highlanders and Royal Grenadiers are the regiments named.

BUSINESS RULED CATTLE MARKET

Over Two Thousand Head Held Over From Preceding Day.

QUALITY STILL POOR Hog Prices Reported Weak With Prospects of Further Decline.

Receipts of live stock at the Union yards on Tuesday were 871 cattle, 1670 hogs, 1147 sheep and lambs, 109 calves and 14 horses.

It will be seen that there were 871 head of cattle, besides 2200 left over from Monday, which would make about 3000 all told still on sale. Trade was slow, market dull and prices still low.

No choice butchers' and few good ones on sale. The highest price we heard of was \$8.50 for a light steer.

Commission salesmen reported sales hard to make, and prices lower all round. Stockers and feeders, in sympathy with the fat cattle, were slow to bid, at a little lower value.

Milkers and springers were the only class of cattle that held firm values. Calf values were lower, in sympathy with those of lambs, by fully 50c per cwt.

Sheep and lambs sold at about the same prices as Monday, but quality considered. Hogs were barely steady, and it looks as the values would still go lower.

Butchers' Cattle. Loads of good butchers' were worth \$8 to \$8.25; medium, \$7.50 to \$7.75; common, \$7 to \$7.25; inferior, lightweights, \$6.25 to \$6.75; choice cows, \$9.75 to \$10.25; cow, \$6.25 to \$6.50; medium, \$5.75 to \$6; common cows, \$4.75 to \$5.50; canners and calves, \$2.50 to \$4; light bulls, \$5 to \$6.25; heavy bulls, \$5.50 to \$7.50.

Stockers and Feeders. The market for stockers and feeders was slow, with prices easier, in sympathy with fat cattle. Choice steers sold at \$7 to \$7.25; good steers at \$6.50 to \$6.75 and stockers at \$5 to \$5.25.

Milkers and springers were good property and sold at firm values at \$70 to \$90 each, the bulk going at \$70 to \$80 each.

Veal Calves. Choice calves sold at \$8 to \$10.50; good at \$7 to \$8.50; medium at \$6 to \$8.50; common at \$7 to \$7.50; inferior, rough, eastern calves at \$5.50 to \$6.50.

Sheep and lambs. Ewes sold at \$5.50 to \$6.25; yearlings at \$6.50 to \$7; culls and rams at \$4.50 to \$5; light bulls, \$5 to \$7.50; heavy bulls, \$5.50 to \$6.50.

Simpson's October China Sale

This yearly exhibition and sale of Imported China and Glassware is looked forward to as the right time to furnish a new home or renew the household stock of chinaware. While all kinds of domestic and decorative Chinaware are here the emphasis is on table ware. The frequent function of meal time is most influential. The way food is served has more effect on appetite and temper sometimes than the food itself. So the "dainty dish" which formerly meant the PIE has come to mean the PLATE. This sale supplies a wealth of dainty dishes at fabulously low prices.

Limoges China Sets from less than six to more than sixty dollars will specially interest you, for Limoges is in France and, judging from experience in your kitchen, an artillery bombardment is not good for a china factory. When present stocks are exhausted French China will be scarce and dear. The "word to the wise" is, replenish now.
