

A resolution test chart featuring several groups of horizontal and vertical lines of varying thicknesses. Each group is accompanied by a numerical value indicating the resolution. The values include 1.0, 1.1, 1.25, 1.4, 1.6, 1.8, 2.0, 2.2, 2.5, 2.8, 3.2, 3.6, 4.0, 4.5, 5.0, 5.6, 6.3, 7.1, 8.0, 9.0, 10, 11.2, 12.5, 14, 16, 18, 20, 22.5, 25, 28, 32, 36, 40, 45, 50, 56, 63, 71, 80, 90, 100, 112, 125, 140, 160, 180, 200, 225, 250, 280, 320, 360, 400, 450, 500, 560, 630, 710, 800, 900, 1000, 1120, 1250, 1400, 1600, 1800, 2000, 2250, 2500, 2800, 3200, 3600, 4000, 4500, 5000, 5600, 6300, 7100, 8000, 9000, 10000, 11200, 12500, 14000, 16000, 18000, 20000, 22500, 25000, 28000, 32000, 36000, 40000, 45000, 50000, 56000, 63000, 71000, 80000, 90000, 100000, 112000, 125000, 140000, 160000, 180000, 200000, 225000, 250000, 280000, 320000, 360000, 400000, 450000, 500000, 560000, 630000, 710000, 800000, 900000, 1000000, 1120000, 1250000, 1400000, 1600000, 1800000, 2000000, 2250000, 2500000, 2800000, 3200000, 3600000, 4000000, 4500000, 5000000, 5600000, 6300000, 7100000, 8000000, 9000000, 10000000, 11200000, 12500000, 14000000, 16000000, 18000000, 20000000, 22500000, 25000000, 28000000, 32000000, 36000000, 40000000, 45000000, 50000000, 56000000, 63000000, 71000000, 80000000, 90000000, 100000000, 112000000, 125000000, 140000000, 160000000, 180000000, 200000000, 225000000, 250000000, 280000000, 320000000, 360000000, 400000000, 450000000, 500000000, 560000000, 630000000, 710000000, 800000000, 900000000, 1000000000, 1120000000, 1250000000, 1400000000, 1600000000, 1800000000, 2000000000, 2250000000, 2500000000, 2800000000, 3200000000, 3600000000, 4000000000, 4500000000, 5000000000, 5600000000, 6300000000, 7100000000, 8000000000, 9000000000, 10000000000, 11200000000, 12500000000, 14000000000, 16000000000, 18000000000, 20000000000, 22500000000, 25000000000, 28000000000, 32000000000, 36000000000, 40000000000, 45000000000, 50000000000, 56000000000, 63000000000, 71000000000, 80000000000, 90000000000, 100000000000, 112000000000, 125000000000, 140000000000, 160000000000, 180000000000, 200000000000, 225000000000, 250000000000, 280000000000, 320000000000, 360000000000, 400000000000, 450000000000, 500000000000, 560000000000, 630000000000, 710000000000, 800000000000, 900000000000, 1000000000000, 1120000000000, 1250000000000, 1400000000000, 1600000000000, 1800000000000, 2000000000000, 2250000000000, 2500000000000, 2800000000000, 3200000000000, 3600000000000, 4000000000000, 4500000000000, 5000000000000, 5600000000000, 6300000000000, 7100000000000, 8000000000000, 9000000000000, 10000000000000, 11200000000000, 12500000000000, 14000000000000, 16000000000000, 18000000000000, 20000000000000, 22500000000000, 25000000000000, 28000000000000, 32000000000000, 36000000000000, 40000000000000, 45000000000000, 50000000000000, 56000000000000, 63000000000000, 71000000000000, 80000000000000, 90000000000000, 100000000000000, 112000000000000, 125000000000000, 140000000000000, 160000000000000, 180000000000000, 200000000000000, 225000000000000, 250000000000000, 280000000000000, 320000000000000, 360000000000000, 400000000000000, 450000000000000, 500000000000000, 560000000000000, 630000000000000, 710000000000000, 800000000000000, 900000000000000, 1000000000000000, 1120000000000000, 1250000000000000, 1400000000000000, 1600000000000000, 1800000000000000, 2000000000000000, 2250000000000000, 2500000000000000, 2800000000000000, 3200000000000000, 3600000000000000, 4000000000000000, 4500000000000000, 5000000000000000, 5600000000000000, 6300000000000000, 7100000000000000, 8000000000000000, 9000000000000000, 10000000000000000, 11200000000000000, 12500000000000000, 14000000000000000, 16000000000000000, 18000000000000000, 20000000000000000, 22500000000000000, 25000000000000000, 28000000000000000, 32000000000000000, 36000000000000000, 40000000000000000, 45000000000000000, 50000000000000000, 56000000000000000, 63000000000000000, 71000000000000000, 80000000000000000, 90000000000000000, 100000000000000000, 112000000000000000, 125000000000000000, 140000000000000000, 160000000000000000, 180000000000000000, 200000000000000000, 225000000000000000, 250000000000000000, 280000000000000000, 320000000000000000, 360000000000000000, 400000000000000000,

Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- ☒ Coloured covers/
Couverture de couleur
- ☐ Covers damaged/
Couverture endommagée
- ☐ Covers restored and/or laminated/
Couverture restaurée et/ou pelliculée
- ☐ Cover title missing/
Le titre de couverture manque
- ☐ Coloured maps/
Cartes géographiques en couleur
- ☐ Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
- ☐ Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
- ☐ Bound with other material/
Relié avec d'autres documents
- ☐ Tight binding may cause shadows or distortion along interior margin/
La reliure serrée peut causer de l'ombre ou de la distortion le long de la marge intérieure
- ☐ Blank leaves added during restoration may appear within the text. Whenever possible, these have been omitted from filming/
Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- ☐ Additional comments:
Commentaires supplémentaires:

- ☐ Coloured pages/
Pages de couleur
- ☐ Pages damaged/
Pages endommagées
- ☐ Pages restored and/or laminated/
Pages restaurées et/ou pelliculées
- ☒ Pages discoloured, stained or foxed/
Pages décolorées, tachetées ou piquées
- ☐ Pages detached/
Pages détachées
- ☒ Showthrough/
Transparence
- ☐ Quality of print varies/
Qualité inégale de l'impression
- ☐ Includes supplementary material/
Comprend du matériel supplémentaire
- ☐ Only edition available/
Seule édition disponible
- ☐ Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image/
Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Library Division
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

81

The practicability of a Passage to the East Indies by the North Pole, has engaged the attention of the most celebrated Navigators from a very early period as will be seen from the following Sketch;—

The first attempt on record was made in the Year 1497 by Giovanni Caboto, a Venetian, who had received a Commission from Henry VII in 1495. In this Voyage he discovered Newfoundland. —

1500. Corte de Real, a Portuguese Captain, in search of a NW Passage, discovered Labradore. —

1564. One of the Ships belonging to the King of Denmark, that had wintered in Iceland was sent by the Governor in the North; they were prevented proceeding far on account of the Ice...

1576. — Martin Probisher in three Voyages, made several discoveries 1577 of Bays, Straits, Islands, and Capes. — The first land he ap-

1578. — proached on the Coast, was a Cape, which he called Queen Elizabeth Foreland. — In coasting Northward he discovered the Strait which bears his name. — He prosecuted his search for a Passage into the Western Ocean, till he was prevented by Ice, and then returned to England. —

1585. — John Davies, an experienced Navigator, visited the Western

1586 Coast of Greenland, and explored the narrow Sea called Davis's

1587 Strait. — On another Voyage he proceeded as far North as the Island of Disko, and the opposite Shores of Greenland which he named London Coast. — He also discovered Cumberland Strait and upon the whole, the three Voyages of this Navigator are of great consequence. — His furthest point of discovery appears to have been Sanderson's Hope, Lat: 72° whence turning to the West he was impeded by Fields of Ice. —

1593. — Captain Weymouth sailed from England on the 2^d May with.

2 with two Ships, the 18. June he saw Ice, and the Southernmost part of Greenland. He sailed as high as $63^{\circ}35'$ N. Latitude in Davis' Strait. The Severity of the Weather, & mutinous Conduct of the Crew hastened his return home.

1596. The City of Amsterdam fitted out two Ships under the Command of Hemsknut and Rypt. On the 9th June they discovered Bear Island. October 2nd they landed at Spitzbergen where they wintered.

1606. John Knight was appointed to conduct a Voyage of discovery by the Russia & East India Companies; - his Ship was much injured in a Storm, and Knight perished on the Coast of Labrador.

1607 Hudson made his first Voyage, and is said to have proceeded along the Eastern Coast of Greenland as far as Lat. 82° but probably not above Lat. 80° or the furthest extremities of Spitzbergen.

1608. James Hall had already been out three Years successively viz. from 1605 to 1607 in the Danish Service on Voyages of discovery in the Northern parts, and in this fourth Voyage he was killed by a Gr. Under at a place called Rommel's Fiord on the 22nd July.

1609. A Ship called the Amity fitted out by the Russia Company and commanded by Jonas Poole was sent on a Voyage to Cherry Island and also to make discoveries towards the North Pole.

Poole sailed from Blackwall on the 1st March, and after enduring very severe cold and stormy Weather, discovered the Southern part of Spitzbergen on the 16th May having made two useless attempts to get beyond $79^{\circ}50'$ N. Latitude: - the Ice obliged him to return, and look out for fish in order to pay the Expence of the Voyage.

1610. Hudson, was again sent out by the Russia Company: -
On.

On this Voyage he discovered the Straits which bear his Name and that inland Sea nearly equal to the Baltic in size which has been called Hudson's Bay. — This Voyage cost Hudson and the few people who were with him, their lives. —

1611. — Captain Pole was again employed in a small Vessel called the Elizabeth, but after surmounting numberless difficulties, and penetrating to 50° N. Latitude, he lost his Ship at Spitzbergen. —

1612 Captain Tho: Button sailed in Company with Captain Ingrams the highest Latitude to which Buttons researches extended was about 65 degrees. —

1614. — The same Society which had promoted Buttons, & so many former Voyages, sent on the same Errand, Capt. Gibbons in the Discovery, the very same Ship in which Button had made his Voyage but he was scarcely arrived at the Mouth of Hudson's Strait, when a large quantity of Ice encompassed him, and he was carried by the force of the Current, and the Winds into a Bay on the Coast of Labrador in $58^{\circ}30'$ N. Latitude. — Here Gibbons was obliged to remain for the space of 10 Weeks when the Season being now so far advanced, he returned to England. —

1614. — The same Year Fotherby & Baffin were sent out with a single Ship by the Russia Company. — With much difficulty they got with their Boats to the firm Ice which joined to Red Beach, Spitzbergen. — They sailed from Cape Barren. NE. by E. 8 leagues when they met with Ice lying East by South, & West by North. —

1615 Fotherby was again sent out to the North in the Pinnace Richard. — He could not get further this, than the preceding Year. —

1615 Some public spirited Gentlemen sent Capt: Bylot to attempt a

1616 N.W. Passage. — Will: Baffin sailed with him as Pilot, and in this Voyage they discovered several Bays & Coasts, all of them totally unknown to any preceding Navigator. —

1619.

2 4
1619. Gen. Munck sailed from the Sound. May 16th passed through
Hudson's Strait, put into Churchill's River, when out of 64
Persons of which his Crew originally consisted only 3 returned to
Denmark...

So many unsuccessful Voyages seem to have pre-
vented the prosecution of any further attempts to discover a N.W.
Passage for a long period of time. — Some obscure mention is how-
ever made of a Voyage by Captain Wm. Hawkridge; this is the
same person who accompanied Sir Tho^t. Button in his Voyage of
discovery, but it is entirely unknown in what Year this Voyage
took place, though most probably it was subsequent to that of
Bylot in 1616. —

1631. Captain Lucas Fox set sail from Deptford on the 3rd May, in
the M. Ship Charles of 80 Tons. — When off Cape Chidley, the heat
of the Sun was so great that the Pitch on the sides of the Ship began
to melt: When near Nottingham Island he observed that the
Needle had lost its power. — Fox went only to Lat: 55° 13' in Vi-
vis Strait. —

1631 Captain James set sail from Bristol on the 3rd May. — On the
1st June he came within sight of Greenland. — On the 17th he saw
the Island of Resolution. At this juncture the motion of the Needle
was impeded. A strong current set into Hudson's Strait; the
sails & rigging of the Ship were frozen. — Having worked through
Hudson's Strait, he steered to the Western Shore of Hudson's Bay
his Ship having two or three times struck on the Shoals, he ran
her aground on Charleton Island in James' Bay in N. Lat: 52° 3'
where he remained till July 2nd 1632 when he returned to England

1643 By Order of the Dutch East-India Company, Two Ships sailed
from the Island of Ternate (principal of the Moluccas) to explore
the Route from Japan, northward: — they reached only to 4° 7' N. Lat:

1676 Captain John Wood sailed from the Nore, May 28th with two
Ships, the Speedwell & Prosperous; On the 29th June, the Speed-
well struck on some sunken Rocks off the Coast of Nova Zembla

in $74^{\circ} 30'$ N. Latitude, 65° E. Longitude... They saved only a small quantity of provisions, & a few Tools: On the 8: July they were relieved from their perilous situation by the *Prosperous*...

1720. The Hudson's Bay Company sent out M^r Knight & Barlow in a Sloop, but these unfortunate People were never more heard of... W. Krapp who sailed in a sloop of them, in 1722 only brought back proofs of their Shipwreck, but no fresh intelligence about a N.W. Passage... They also sent a Sloop and Shallop to try for this discovery in 1737 but to no purpose...

1741. Two Voyages for discovering a N.W. Passage through Hudson's Bay 1742 were performed in the Reign of George the 2nd, one under the command of Captⁿ Middleton in H.M. Ship, the *Furnace*, and the *Discovery*,

1746 *Pink*... The other under the direction of Captains Smith, & Moore 1747 in the Ships *Dobbs*, & *California* fitted out by subscription...

1761. Captain Christopher sailed from Port Churchill in the Sloop *Churchill* he sailed up Chesterfield Inlet through which a Passage had been so generally expected: He found it only a River

1762. Christopher repeated the Voyage the following summer in Company with another Sloop commanded by M^t. Norton; - but without any success...

1773... The Race-horse and Carcase Bombs were fitted out for the purpose of trying how far Navigation was practicable towards the North Pole... The Command of the Expedition was given to Captⁿ Phipps (Lord Mulgrave) He forced his way on the 1st. August to $80^{\circ} 37'$ N. Lat: But could not proceed farther as he was there opposed by one continued Plain of smooth unbroken Ice bounded by the horizon...

1776. A Voyage was undertaken for the discovery of a Passage to the Northwards between Asia and America under the direction of Captⁿ Cooke and Clerke... Cooke ranged along the Coast of America as far as $70^{\circ} 45'$ N. Latitude & 108° E. Longitude from Greenwich when he found himself entirely surrounded by the Ice, & prevented from either

either proceeding farther on to the Northward, or even following the course of the Coast; for the Ice closed almost every ^{where} on a low desert point of Land which from this circumstance he called, *Joy Cape*.---

At this period the Board of Admiralty sent Lieutenant Pickersgill in the Brig *Lon* to Davis' Strait in order to try also, on that side how far it might be possible to discover a Passage.--- On the 7th July he was off Cape Farwell, & on the 12th off Cape Desolation.---

He now ranged along the Coast of Greenland; On the 17th he entered an Inlet which he named *Muskito Cove*, on the 14th of August at Midnight he was in $68^{\circ} 14' N.$ Latitude, & $58^{\circ} 50' W.$ Longitude, and saw every where great Quantities of Ice which made him tack about and stand to the Southward.---

1777. The following Year, Lieutenant Young was sent on the same discovery, and came back without having discovered a Passage, or any thing like it.---

1818.--- Four Merchant vessels have been hired, and rendered as strong as Wood and Iron can make them.--- Their Names are, the *Isabella*, the *Alexander*, the *Dorothea* and the *Trent*;--- the first two, being intended to proceed up Davis' Strait, under the Command of Capt. Ross;--- the two latter, by the Route of the North Pole under Capt. Buchan; and all four are to make the best of their way to Bering's Strait.--- The *Alexander* & *Trent* are two smaller vessels, the first, commanded by Lieut. Parry; the latter by Lieut. Franklin.---

The Russians have for some time been strongly impressed with the idea of an open Passage round America, and the *Hamtschatta* Frigate, commanded by Capt. Golovnin, who was a Prisoner in Japan has proceeded on the same discovery at the public Expence, which Lieut. Poyebue is employed on, by the private liberality of Count Romanyoff.---
