

Miramichi and the North Shore.

DANCE.—A committee of young men... dancing a social dance at the Temperance Hall, Chatham on Tuesday evening next.

25th SEPTEMBER.—Collector Fin... giving notice that all rates for the year 1892 are now payable.

OFFICE STRAIGHTS' DOGS.—The dog owned by the late Policeman Steadman... which followed the deceased.

THE WEEKS.—The hulls and materials of the barges wrecked down by the late storm are being sold.

BOOK-BINDING.—Persons having magazines, or other periodicals to bind, old books to be rebound, or any similar work...

A FISHING PARTY.—Messrs. T. Amos Godwin, T. A. Peters and J. Henry Leonard came in this morning from the Tabusintac, where they have been fishing for over a week.

A MURDER TRIAL.—The two prisoners, "Black" and "Jim," in prison at Dorchester for the murder of Police Officer Steadman at Moncton, are to be tried together at Dorchester on Sept. 13th by Judge Fraser.

MR. A. B. SWEETZ.—On Monday, Sept. 28th, in the Y. M. C. A. Hall, Mr. A. B. Sweetz, formerly of Moncton, will give a reading of his book, "The Story of a Boy's Life," which has been studying at the School of Dramatic Art in Boston.

DOMESTIC SCHOOLS.—The new quarters and furniture will cost the district about \$2,000.

ACCIDENT.—Mr. Richard H. McWilliam, housekeeper at Messrs. Scott, Culler & Co., was injured at his mill at Indianville on Tuesday. He was standing near a lathe when one of the wooden rollers became detached and was hurled with tremendous force right in his face, breaking his nose and cutting his face very much.

A LUNATIC KILLED.—Robert Henderson, a lunatic belonging to Kent Junction, escaped from the Asylum Amos St. John, last Tuesday, and was walking on the train near Sand Cove when he was struck by the engine of a plow train on the shore railway.

THE NELSON PICNIC.—The R. C. picnic in connection with St. Patrick's, Nelson, took place last Monday. Although there was a drizzling rain in the morning, yet from ten o'clock to five in the afternoon, the day was most delightful.

WIDOWS' BURIALS.—St. John had three burials in three days last week. Thursday night the parish of Simon Jones was celebrated, Friday night that of William Girvan, and Saturday night that of Joseph Scammell.

SCHOOL MATTERS.—It appears to be understood that Mr. John March becomes city superintendent of schools in place of the late Mr. Haver, that Mr. Manning, one of the masters of the Grammar school becomes secretary in place of Mr. C. G. Caspary. Mr. P. D. Chisholm has resigned his position in the Grammar school and goes into the insurance business.—Globe.

THE METROPOLITAN.—An Ottawa dispatch says: "The statement going current in that city is that the death of the Metropolitan Bishop of Canada, who is dangerously ill at Fredericton, N. B., he will be succeeded by the Bishop of Ontario, the incorrect. The canon law is that the senior Bishop, in this case the Bishop of Ontario, may act as Metropolitan Bishop for three months, but within the next three months must call a meeting of the Bishops of the Dominion to elect the Metropolitan. A majority of the Bishops, whether all are present or not, is required to elect."

THE NEWFIELD DISASTER.—The government steamer LaCadenese, Capt. Bengey, arrived yesterday afternoon from North Cases, the scene of the wreck of the government steamer Newfield. She will tow two tubboats to assist in raising the steamer. It is said that the vessel is in a bad state and will be hardly worth repairing.

North Shore Notes.—"Ramblin'" writing to the St. John Globe, says: "Rambling through the lower part of the county of Gloucester, I could not help but admire the beautiful fields of wheat, barley, oats, potatoes and fax. The grain is ripening nicely. Potatoes are large and dry; they have not suffered in any way from the frosts. The farmers all say that their grain is better than last year's, and that the soil is very light—not much better than last year's crop. The fishing so far this season has been poor. The catch of cod will be fully one-third less than last season. Fall herring have not yet made their appearance. Mackerel began to school on the coast about the first week in August and a few good catches were made, but the school was broken up by the arrival of the fish on the 10th of August, which visited that section of the province, drove the fish ashore, and destroyed a large number of nets, traps and boats. This means a heavy loss to the fishermen."

ACCIDENT.—A sad accident occurred in town on Thursday afternoon last, whereby Ernest Logie Williston, aged six years, and four months, son of Mr. John B. Williston, lost his life. He was lifted by a large boy into one of the oak trees in the garden of the house owned by the late Mr. Williston for the purpose of gathering acorns, and when about fifteen feet from the ground caught hold of a dead branch which broke and he fell to the sidewalk below, falling upon his head and fracturing his skull. When picked up by Mr. James Troy he was unconscious and remained so until his death a short time after. Much sympathy is felt for the afflicted family in their sudden bereavement.—Advocate.

ALLEGED PLUNDERER.—The Boston Herald says that Henry F. Brownson, of Detroit, the son of Dr. Orestes Brownson, publishes a letter in the Church Progress and Catholic World of St. Louis, in which he accuses the late Dr. Richard C. Dughey, the author of "Mary, the Mother of Christ, in Prophecy," has been taking extracts from the writings of his father without giving acknowledgment for them. Three days and two nights, not knowing the moment that they would be driven on shore. All on board of the little vessel suffered much, but the little vessel was not wrecked. The storm made havoc on the marshes, giving up the fishing boats and destroying the hay. Bridges were washed away, and in some places I noticed that there were mounds buried under the heavy forest. The Newport lumber looks and a lot of hay was lost. Some of which are to be used on Salmon Beach, Pokeshaw and Grand Asee.

PERSONAL.—Messrs. T. A. Peters, T. Amos Godwin and H. Leonard were in town on Thursday on their way home from the Tabusintac Club's water. They went to the water on Tuesday 16th when the water was high, and consequently had not good success. Geo. H. Ham, Esq., travelling passenger agent of the Canadian Pacific Railway was in town on Friday and again on Monday.

FRANK H. RISTEN, Esq., the coming biographer of the province, was in Chatham on Sunday. Mr. E. C. Fisher of St. John, is making an official tour of the Miramichi in the interest of the province. He is, therefore, superfluous, perhaps, to say that Tuesday's excursion was unanimously pronounced by the many who participated in it, the most enjoyable within their extended experience in that form of recreation, social and intellectual pastime. The most of the occasion, a doubtless, the most generally popular on the Miramichi, and we think there is not another to do honor to whom so many of our men of business would leave their daily callings in such numbers. The day was one of the finest we have had this season, and it was an indication that even nature itself was in an auspicious mood for the occasion.

MR. JOHN MCKEAN has been in town for the last few days, and we are glad to learn that he intends returning to Newcastle and resuming business, and expects to open in the old stand with a full line of boots and shoes. He will have a course of two or three weeks.—Advocate.

Miramichi Advance, Chatham, New Brunswick, September 1, 1892.

THE various factories aggregates some 25,000,000. The process of manufacture of the extract looks like that of sugar refining. The bark is ground fine, then leached and the tannic acid dissolved and taken from the bark, the impurities being separated from it. It is then refined in vacuum pans, surplus water being removed. The last stage is barrelling for shipment. The process takes about 40 hours from the time the bark is put into the factory. J. C. Miller, the manager of the Amos St. John branch, and J. W. Miller, of Millerton, N. B., in charge of the barrelling department in New Brunswick. J. W. Miller says that the other day accompanied by Mr. Miller. They left via the steamer Miramichi for Montreal on a brief trip to the commercial metropolis.—Montreal Herald.
