TENDERS FOR Steam Fire Engine. WE HAVE BEEN VERY BUSY. The tender and are therefore later than with our usual catalogue.

Miramichi Advance. CHATHAM, N. B., OCTOBER 1, 1896. The "Globe's" Triple Alliance. Between such papers as the Chatham Herald, the Fredericton Gleaner and the St. John Globe - to say nothing of Mr. Pitts' paper, the Reporter - the Local Government, as a body, and its members, individually, are pretty constantly represented as doing everything but that which they should do and doing those things which they should leave undone.

day last the total had exceeded that of last year's show at the corresponding date. The exhibits from the North Shore are not numerous, but the few sent are among the best in their classes. Mr. Geo. F. Searle is awarded first prize for the perchon horse Zephyr, while Prefere another perchon, formerly owned by Mr. R. Flanagan takes second. Rev. M. F. Richard of Regenville is a prize-winner with a fine carriage horse although he was subjected to competition that was hardly fair, through favoritism to another exhibitor who was allowed to infringe the rules as to entries. Michael Searle's Shelburn pony and cart captured first prize. Miss Bessie A. Dickson of the Central Farm, Napton, wins a diploma for an embroidered cent piece. The St. Louis Kent, creamery takes two first prizes and also a second for butter. Mr. D. G. Smith exhibits a fly or mosquito-proof sleeping tent of his own invention and make, which he has exhibited by anglers and others, who know what it is to be kept awake at night for the want of such protection as it affords. A large number of North Shore people have been and are among the visitors to St. John during last and this week and the attendance from all parts of the province is very good.

Miramichi, and indeed all North Shore visitors to the Exhibition, were much gratified over the evidence of general appreciation of their leading representative, Hon. L. J. Tweedie, shown by those most interested in the success of the undertaking. His opening address, which was delivered in his capacity of a substitute for His Honor the Lieutenant Governor and Premier Mitchell - both of whom were incapacitated by illness for the discharge of the duty - was highly spoken of. The Gazette, for instance, says: "To-day one of the grand events of the Exposition of St. John was formally given to the people of the city and her visitors. The international exhibition of manufactures and agriculture is, or will be, probably one of the best that has ever been shown in Canada. In the opinion of the Governor of the Province and the Attorney General - both of whom were unable to attend, through illness - the Provincial Secretary, Hon. Mr. Tweedie, made a most appropriate and timely remarks in connection with the opening of the exhibition, and these, together with his other acts and utterances, will further serve to ingrain into the hearts of the people of this Province, that the exhibition will be a success beyond what is possible for anything that St. John ever undertook with a whole heart. It is a matter of pride to the people of the Province that it should be the scene of a grand event, and the present will be no exception to the general rule. The patriotic sentiments expressed by our talented Provincial Secretary are heartily endorsed by the Gazette. The interest shown in the Exhibition by the government as a whole, was marked. In addition to the Premier and Provincial Secretary, the Chief Commissioner of Public Works, the Surveyor General, the Solicitor General and Hon. Messrs. LaBille and Farris were present, and it was a matter of favorable comment that it was the only occasion of the kind in the Province on which every member of the government was in attendance."

VERY HONORABLE - The Liberal Herald, of Chatham, cries vociferously for the blood of Dominion office-holders in Northumberland. It appears that the recently warring factions calling themselves Liberals have patched up a truce, and are now in a state of amicable relations. It is to be hoped that the truce will be permanent, and that the parties will be able to devote their energies to the betterment of the province. The Premier Mitchell is to go to England. Hon. Jas. Mitchell, Premier of the Province and Attorney-General, is to go to England in a short time, partly on public business, and also to consult the best medical authority in reference to the throat affection which has so seriously troubled him for the last few months. It is understood that during Mr. Mitchell's absence, Hon. Provincial Secretary Tweedie will discharge the duties of the premiership while Hon. Chief Commissioner Emerson will be the acting attorney-general. Since his assumption of the premiership Mr. Mitchell has been received by all classes with the most flattering demonstrations of popular regard, and will be accompanied to the Mother Country with the best wishes of the entire Province for a pleasant voyage and speedy restoration to health.

An Abundant Statement. The Gleaner, which is about the last paper in the province to keep anything of the kind of the local Government, published the following last week as a St. John despatch: "Premier Mitchell is fully committed to a general Provincial election as early as possible after another session of the Legislature. There is an uneasy feeling prevalent among officials and enough has been learned during the present visit of members here to make it certain that the above is accurate." The foregoing statement is so absurd on its face as to hardly need comment. It may be worth while however to say that there is not a word of truth in it, and, therefore, no excuse whatever for its publication.

Spain and Her Colonies. Spain's troubles with her colonies seem to be chronic. While she is carrying on a war in which she seems to be gaining little by force of arms and less in the way of credit for her humanity, against the Cubans, the Philippine Islanders are also making a strike for independence and causing a second drain of the blood and treasure of that declining nation. A Madrid despatch says the government is making preparations to send eight thousand additional troops to the Philippine Islands as well as also to increase the garrison on the Island of Fernando Po. As showing the condition of affairs a Hong Kong despatch says: "Steamers which have arrived from Manila, the capital of the Philippine Islands, bring the announcement that Oabito is occupied by fifteen thousand insurgents. Over a hundred monks have been murdered in the island since the breaking out of the insurrection. Many of the victims have been fastened to trees, their clothing having been soaked with kerosene oil and then ignited and the monks burned to death. Rich natives are being arrested daily. Documents have been seized by the authorities in which are given the names of the president and various other officials of the proposed republic."

The St. John Exhibition. Visitors to the present St. John Exhibition, who have also attended previous ones in that city are quite unanimous in the opinion that it is the best yet held there. It is particularly strong in manufactures, machinery, ornamental and agricultural products, while the special attractions, such as fireworks, performing novelties, etc., seem to satisfy the general crowd. The attendance is increasing and on Monday last the total had exceeded that of last year's show at the corresponding date.

venience of the speaker and members; that there is no bar in the common acceptance of the term; merely a small store room for wines and other beverages; that clause 10 of the contract was the caterer, which provides that the restaurant is to be used only by senators and such other persons as have been approved by the speaker and the committee and excludes from it all other persons, has been substantially complied with, and the committee intended to strictly enforce this clause of the contract; that the rule prohibiting the sale of wine and other beverages to any one not a member of parliament will be strictly enforced. The committee recommended that no wine or other beverages be served to any one after 12 o'clock, midnight, and that the restaurant and wine room be closed after that hour.

In the House of Commons on Thursday last, the report of the debate committee, recommending the dismissal of the three translators, Peter McLeod, J. B. Vanasse and Joseph Bouchard, for active participation during the last election campaign was adopted. It is worthy of note that a resolution immediately arose in connection with the question of filling the vacancies. The Debate Committee met next morning to appoint three translators in the place of those dismissed. Mr. Monaghan was appointed to succeed Messrs. A. G. Gault, Montreal, C. J. McNeil, St. John, and R. Fiset, Rimouski. It was moved in amendment that Messrs. Pelland, Nolin and Fiset be appointed. Finally, it was agreed that the dismissed translators should be left in office until the next session of the Legislature, and that the committee would meet again next week to appoint three men whose work should begin next session.

On Tuesday Messrs. H. R. Fiset, J. A. Gault and J. O. Pelland were appointed by the Debates Committee translators to fill the vacancies caused by the dismissal of Messrs. Vanasse, McLeod and Bouchard. "Advances" St. John Letter. Messrs. B. Handy writes from Chicago that in certain communities in that city it is almost a matter of course to let it be known that he is not a follower of the free silver crusade, or that he is not a question of life and death, it is certainly one of being allowed to live in peace and carry on a lawful business. This free silver mania is one of the wonders of the century. The fall of a lunatic asylum should content that night dollars worth of silver, by the government's fiat could be made to pass current in the markets of the world for sixteen dollars par ounce. Where those who are in a hurry to get their money out of the country are strong enough will probably attempt to prevent the friends of sound money from going to the polls. Anarchy will be the result.

The world's population is said to average 100 million to every 100 men, while eight ninths of the sudden deaths are of males. It has been suggested that the recent extraordinary death-rate in New York had been due to the fact that the city is so full of people that the heat is so intense that it is impossible for human beings. So tired did they become of seeing the same faces and hearing the same voices day after day in the course of the long winter months that they were suffering from irritation. At times this irritability became almost insupportable. Finding it almost impossible to get out of the room, several men were seen to go out on long walks over the ice, each by himself. It was an astounding thing, one man said, to see his comrades striding away over the ice from the ship, each in a different direction and carefully avoiding his fellows. Their description of the terrible depression which affected them throughout the long months of perpetual darkness was pathetic. When spring came in their spirits rose, but the cheerfulness was not of long duration, for the constant daylight soon became as oppressive as the winter darkness had been. For fourteen months not a single living thing was seen, not even a sea-bird or a Polar bear. Various species were devised to while away the time. The sewing machine in the saloon was in particular in constant use, and tailoring became a favorite pastime. The sexes of clothes which the members of the expedition wore when they reached Norway had all been made by themselves. Though not in the least of the style, they had, nevertheless, been fashioned in an eminently workmanlike manner. Dr. Blessing, the surgeon, employed his leisure in occupations so diverse that it is difficult to mention and conduct an investigation into the action of the blood.

It Saved One Child. "My little daughter, three and a half years old, suffered three years with Eczema. Her little body was covered with the itching rash, and doctors did me good. Four boxes of Chase's Ointment have entirely cured and saved our child. Her skin is clear and not a sign of rash to be seen." Andrew Alton, Hartland, N. B. Mr. Alton is one of thousands benefited by this unfailing cure for piles and skin diseases.

Mr. Gladstone and the Armenian atrocities. LIVERPOOL, Sept. 24. - At a mass meeting to protest against the Armenian atrocities, Mr. Gladstone said that the British government in 1873 denied that massacres had occurred, but those massacres had since passed into history as facts. The same system of denial is proposed now and will be pressed as long as the power of Europe shall tolerate it. It is to be hoped, Mr. Gladstone declared, the weakness of diplomacy will be strengthened by this strong nation's voice. The diplomatic representative of the British government at the Sultan's court, Mr. Layard, brought their message to the Sultan informing his majesty that the British government was not prepared to judge who would be created against the

alcohol, covered with a saucer, and thoroughly heated over a water-bath without boiling the liquid. It is then carefully removed to another table. Soon the alcohol vapor is condensed into visible minute droplets of rain fall, and the clouds soon gradually lowered and a shower of rain descends. The miniature storm will last an hour. The action is intensified if the warm saucer is replaced by a cold one, white-wine and squalls are produced when the alcohol is very warm and the liquid is warmer on one side the clouds may be seen to rotate around a horizontal axis. The influence of moisture on vegetation has been found by Mr. Edmond Gais to vary greatly at different periods in the growth of the plants. As a rule, water is argued to be needed when the first leaves are appearing, when it is little called for until just before blossoming, when a large supply is demanded. The fruit is best perfected in comparative dryness. Very few plants require constant moisture, and in all experiments tried the plants that were watered at the two critical seasons of first growth and the beginning of blossoming did as well as those which were constantly watered. In the soil raised and raised in the number of fruit, seeds and roots, while dryness tended to promote greater size and perfection of seeds and tubers.

Chase's Kidney-Liver Pills. Chase's Pills have gained popularity because of their efficacy for the cure of rheumatism, prevent Bright's disease, cure Rheumatism and all Catarrhal conditions of the Kidneys and Bladder. They do this because they possess remarkable purgative, tonic and diuretic properties, starting wonderfully soothing remembrance on irritated or inflamed mucous membranes of the kidneys or bladder. One pill a dose. 25 c. The cheapest medicine in the world.

The Voyage of the "Fram". THE LONELINESS OF THE POLAR SEA. Some interesting details of their life in the Polar regions have been obtained from the members of the Nanzen expedition on board the "Fram". The men, one and all, dwell on the festival of daylight which they experienced in once more meeting other human beings. So tired did they become of seeing the same faces and hearing the same voices day after day in the course of the long winter months that they were suffering from irritation. At times this irritability became almost insupportable. Finding it almost impossible to get out of the room, several men were seen to go out on long walks over the ice, each by himself. It was an astounding thing, one man said, to see his comrades striding away over the ice from the ship, each in a different direction and carefully avoiding his fellows.

How To Use Cottolene. The new shortening, like all other things must be rightly used if you wish the best results. Never, in any recipe, use more than two-thirds as much Cottolene as you used to use of lard. Never put Cottolene in a hot pan. Put it in when cold and heat it with the pan. Be careful not to burn Cottolene. To test it, add a drop of water; if hot enough, it will pop. Cottolene, when rightly used, delights everyone. Get the genuine, sold everywhere in tins, with trade-marks - "Cottolene" and "Cottolene's Head in a cotton-plant wreath" - on every tin. Made only by THE N. K. FAIRBANK COMPANY, Wellington and Ash Sts., MONTREAL.

DANGERS OF SPRING. Children die in the spring. Blotches bloom in the spring. Boils break out in the spring. Women weaken in the spring. Men lose energy in the spring. Pimples protrude in the spring. Old people suffer in the spring. Malaria is deadly in the spring. La Grippe spreads in the spring. Doctors' bills grow in the spring. Undertakers thrive in the spring. All diseases germinate in the spring. Scott's Sarsaparilla sells in the spring. "Scott's Sarsaparilla is the most popular and successful spring medicine we sell. L. everybody uses it." - J. D. Todd, druggist, Queen St. W., Toronto. Write Mr. Todd, or any other druggist for particulars.

Scott's Sarsaparilla. You can always feel Gay... no matter how cold or stormy the day is - be you man, woman or child - if you have fallen and winter clothing interlined with Fibre Chamols. This popular style and warm garment sells now for 25c. a yard so that every one can afford to enjoy the comforting, healthful warmth it furnishes - no extra weight or bulk, only a pliable stiffness and cosy warmth of which the coldest winds or frostiest air cannot rob you. See that it is put in all ordered clothing, and look for the label which shows that a ready-to-wear garment has been interlined with it. You really can't afford to do without it.

Jake Gaudard's Reception. Jake Gaudard was given a royal reception at Toronto Tuesday by the procession and presentation by the mayor there were cries for Gaudard, and the champion stood up under the glare of the electric lights. "I am not much of a speech maker," began Gaudard, when the cheering had subsided somewhat, "but I feel proud that I have been the champion to Canada, where it belongs. I hope when I lay down the sculls that there will be a brother Canadian take them up, and I will do all I can to encourage him. I thank you all heartily for the kind reception you have given me, and I will now give Mr. Hanlan a chance to say a few words."

Soars Far Above all Competitors. Marvellous Results Have Brought It Fame and Renown. Paine's Celery Compound the Choice of the Ablest Physicians. It is well that every one should know that Paine's Celery Compound is not an ordinary patent medicine such as the service, sarsaparilla, bitters and other liquid concoctions now so extensively advertised in every direction. Paine's Celery Compound is as far beyond these common preparations as the diamond is superior to cheap glass.

Singular Deathbed Scene. Truth is not only stranger than fiction, but occasionally more humorous than the jests of the humorist. Writing of Elizabeth Fry, the philanthropist and quaker minister, Mr. Hara, in his biography of "The Gargoyles of Eritania," tells an almost incredible incident. During her frequent visits to Norfolk, Mr. Fry by no means ceased from her ministrations, but even in her family she often had to trudge her feet in very stony ground. It is recalled with amusement here, when she was summoned to the deathbed of a Norfolk squire who was nearly
