N. B. This Table is sufficiently accurate for the
 purpose it is wanted—that of ascertaining moon-
 light evenings.

Of the Changes of the Moon.

f the Month,
 hird the Ho-
 ng of the Sun-
 ier.

Many persons, understanding that the mean time be-
 tween one new Moon and another is 29 days, 12 hours,
 44 minutes and a fraction, imagine that, to find the
 full or quarters of the Moon, they have only to add a
 half or fourth part of that time; and when they do
 not find the changes marked in the Calendar to cor-
 respond with this method, they impute it to mistake
 in the calculation of those changes. It is therefore,
 necessary to put them in mind, that the great inequa-
 lity of the Moon's motions renders the above rule ex-
 tremely inaccurate, so that nineteen times in twenty,
 it must fail in giving the true conjunction or change.

New Moon.

Full Moon.

The Tide Table shews the time of high water on any day of the moon's age nearly, and the stream continues to run one hour and a half after high water, or, in the seaman's phrase, it flows "Tide and Quarter Tide," and this is to be observed in every part of the River.

RULE. Having found the age of the moon at the top of each month in the Calendar, look in the left column of the table for the day from new to the full moon then in the right column the day from the full to the new moon, and in the middle column you will find the time when it is high water ashore.

Times of High Water, on the days of New & Full Moon, at different places of the River St. Lawrence.

. It may be necessary to observe that the Quebec Almanack is not an official publication; and therefore the arrangement of the different officers or public bodies in that publication, cannot in any wise affect any precedence, which either of them respectively may be entitled to. The Printer will however be always ready to make any alteration in the arrangement, which may be suggested upon good authority.

AMERICA. This great Western Continent, frequently denominated the New World, extends from the 80th Degree of North to the 56th of South latitude; and, where its breadth is known, from the 56th to the 136th degree of W. Long. from London, stretching from between 8 and 9000 miles in length, and at its greatest breadth 3690. It sees both Hemispheres, has two summers and a double winter, and enjoys all the variety of climates which the Earth affords. It is wash'd by the two great Oceans; to the Eastward it has the Atlantic, which divides it from Europe and Africa; to the West the Pacific, or great South Sea, by which it is separated from Asia: by these seas it may, and does carry a direct commerce with the other three parts of the World.

This great Continent is divided into two parts, one on the North, the other on the South; which are join'd by the Kingdom of Mexico, forming a sort of Isthmus 1500 miles long, and in one part, at Darien, so extremely narrow, as to make the communication between the two Oceans by no means difficult, being only 60 miles. In the great Gulph which is formed between the Isthmus and the northern and southern grand Divisions of this Continent, lie an infinite multitude of Islands, many of them large, most of them fertile, and denominated the West-Indies, in contradiction to the Countries and Islands of Asia, beyond the Cape of Good Hope, which are call'd, the East-Indies.

UNITED KINGDOM OF GREAT-BRITAIN
AND IRELAND.

This kingdom formerly England, Wales, Scotland and Ireland is situated between $49^{\circ} 50'$ and $50^{\circ} 25'$ of North latitude, and between $7^{\circ} 40'$ West, and $1^{\circ} 50'$ of East longitude and contains about 15,000,000 inhabitants, according to the last Census.

The United Kingdom is a limited monarchy, and hereditary to both sexes. The King must be of the Protestant religion, as established. The King possesses the executive power of government, and, with the Parliament, shares in the legislative. Parliament is composed of the three estates, the Sovereign, the House of Peers and the House of Commons.

The climate is mild, the soil for the most part naturally good, yielding every useful production, wine, oil and silk excepted. The genius and industry of the people, in the arts of agriculture and gardening, in the mode of feeding cattle, breeding horses and sheep, have placed this beyond every other European country in this point.—The woollen manufactures of England, and the produce of her mines, &c. are inexhaustible sources of riches.

The persevering industry and great mechanical ingenuity of its inhabitants, have given Great-Britain decidedly the first place in Europe as a commercial and manufacturing country. The advantage of her insular situation, many excellent harbours, and vast extent of sea line, have highly contributed to her superiority; but her prodigious improvements in every manufacture and mechanical art, joined to her wise laws for the protection of trade, and the high respect in which her mercantile character is held, have advanced her yet more. Next to manufactures, the fisheries are of the greatest importance. The total of the commerce, import and export, employs above two millions of tons of shipping; and the balance in favour of Great-Britain is above three millions on the average.
