MAY IT PLEASE YOUR EXCELLENCY :

The undersigned has the honor to present to Your Excellency the Tables of the TRADE AND NAVIGATION of the Dominion of Canada, for the Fiscal Year ending 30th June, 1872, as prepared from Official Returns, and laid before him by the Commissioner of Customs.

All which is respectfully submitted.

S. L. TILLEY,  
*Minister of Customs.*

OTTAWA, 22nd February, 1873.

To the Hon. S. L. TILLEY, C. B.,  
Minister of Customs, &c., &c., &c.

SIR,—The Returns received from the various Ports of Entry of the six organized Provinces of the Dominion, for the Fiscal Year ending on the 30th of June, 1872, present an aggregate result demonstrative of the steady and progressive advancement of the country in commerce and enterprise.

In the Report I had the honor of laying before you last year, the value of the goods entered for Consumption, the Duties collected thereon, and the value of Exports for the Fiscal Year ending 30th June, 1871, compared with the previous year, are stated as follows, viz :—

	Entered for Consumption.	Duties.	Exports.
1869-70.....	\$71,237,603	\$9,462,940	\$73,573,490
1870-71.....	86,947,482	11,843,655	74,173,618
Increase in 1870-71	15,709,879	2,380,715	600,128

In making a similar comparison of the Fiscal Years 1870-71 and 1871-72 we have the following results, viz :—

	Entered for Consumption.	Duties.	Exports.
1870-71.....	\$86,947,482	\$11,843,655	\$74,173,618
1871-72.....	107,709,116	13,045,493	82,639,663
Increase in 1871-72	20,761,634	1,201,838	8,466,045

Showing a total trade in Imports and Exports of \$190,348,779 in 1871-72 against \$151,121,100 in 1870-71, or an increase of \$29,227,679 in the aggregate trade of Canada during the former Fiscal Year over the latter.

The increase noted in my Report of last year as marking the import trade of Canada from Great Britain and from the United States, severally, as shown by the Customs Returns for the Fiscal Years 1869-70 and 1870-71, has steadily continued in about the same ratio during the Fiscal Year ending 30th June, 1872, with this additional good feature in the Returns that the increase which in 1870-71 was confined to the Imports extends in 1871-72 to the Exports.

This will appear more fully in the following Comparative Statements, which present in a synoptical form the whole foreign commerce of Canada as deduced from the Official Returns from the 124 Ports of Entry of the Dominion, in which are included the minor imports and exports at 65 sub-ports.

These statements show : 1st, the value of goods entered for consumption, and from what countries the goods are imported. 2nd, the value of goods exported, and to what countries exported ; and 3d, the total trade with each country in Exports and Imports, as

shown in the previous statements. In each of these statements are also shown the ratio of increase or decrease in the Consumption, Exports, and aggregate Trade, by countries, and the proportion or ratio which the Trade with each country mentioned, bears to the whole Trade of the Dominion.

We gather from the foregoing statement that 59 per cent of the aggregate importations into the Provinces of Ontario, Quebec, Nova Scotia, and New Brunswick, during the last Fiscal Year, were from Great Britain, and 32·62 per cent from the United States of America; our import trade with both these countries amounting together to upwards of 91 per cent of the whole importations into those Provinces. This ratio would have been still further increased had the imports into British Columbia and Manitoba been included; but the trade of these new Provinces was necessarily excluded from the comparative part of the statement, owing to the recent date at which they became integral and important portions of the Dominion of Canada.

The ratio of increase in the importations from France and Germany, although the present amount of the trade with each of those countries is not in itself momentous, is nevertheless deserving of especial notice, and so also the increase in the imports from the British West Indies. France takes the lead in the value of its exports to Canada, but the large ratio of increase, 62½ per cent, in the importations from Germany in 1871-72 over the

previous year, are indications of the tendency to increased commercial relations with that country. The falling off in the import trade with the Spanish West Indies may readily be accounted for by the civil war which has prevailed and is still prevailing in Cuba.

The reason assigned in my remarks upon statement No. 1 for not including the Imports of Manitoba and British Columbia in the comparative part of that statement, applies, of course, equally to the Exports of those Provinces. In looking, however, at the abstract of table No. 6, to be found on page 390 of this volume, we find among the countries to which the products of the Province of British Columbia are now exported, an indication of the Trade which the Dominion of Canada is destined, at no very remote period, to carry on directly on a larger scale with those rich and populous countries of the eastern hemisphere that occupy the western shores of the Pacific Ocean, and with that multitude of peopled islands constituting the Polynesia of modern geography. Such facts

and such prospects forcibly indicate the importance—an importance which in a commercial point of view alone could not be over estimated—of the construction of the Canadian Pacific Railway, which is to bring the Trade of Asia and Australia to our great inland navigable waters, and through them connect the sea-borne commerce of the Pacific and Atlantic Oceans.

Statement No. 3, which follows, represents the whole Trade of the Dominion for the two Fiscal Years ending respectively, on the 30th June, 1871 and 1872, as shown by the value of the goods entered for consumption, and the value of the goods exported added together. As regards the four elder Provinces of Ontario, Quebec, Nova Scotia and New Brunswick, the comparative statement is made with reference to the countries with which they collectively traded, and the per centage of increase or decrease of this aggregate Trade is noted, as also the proportion or ratio which such Trade with each of the countries named bears to the whole Trade of those four Provinces with Great Britain and her Possessions, and with Foreign Countries. The Provinces of Manitoba and British Columbia although included at foot to complete the statement of the whole Trade of the Dominion for the year 1871-72, are not computed in the deducing of ratios.

This Statement establishes that in 1871-72, 47·17 per cent of the whole external  
viii

trade of the senior Provinces was carried on with Great Britain, 35-63 per cent with the United States of America, and the remaining 17-20 per cent with all the other countries named.

It is worthy of remark that the Trade with the British North American Provinces, outside the Dominion,] that is to say Newfoundland and Prince Edward Island, is the next in point of rank after Great Britain and the United States, and that the British West Indies follow in order, thus exhibiting between Canada and Great Britain, and between Canada and Britain's other Possessions in this hemisphere, an aggregate amount, of purely British Trade, of \$94,681,398.

Looking at our Transmarine Trade as contra-distinguished from our trade with the United States through our Inland Waters, I would refer to Tables Nos. 17 and 18 where will be found in detail the Number and Tonnage of Vessels *entered and cleared SEAWARD* at Canadian Ports during the Fiscal Year 1871-72.

A summary of those tables affords the following results, viz :

	SHIPS INWARDS.		SHIPS OUTWARDS.	
	No.	Tons.	No.	Tons.
With Cargo..	{ British, ..... 5,158	1,514,004	7,712	2,099,148

	{ Foreign, ..... 1,111	358,751	285	101,514

Showing an aggregate of 3,613,152 tons of British Shipping against 1,130,776 tons of Foreign, employed in the Import and Export carrying Trade of Canada *seaward* during the last Fiscal Year. The vessels entering and clearing in ballast represent a tonnage of 1,202,776, of which 742,511 were British, and 460,265 Foreign.

The whole number and tonnage of *sea going* vessels arriving at and departing from Canadian Ports during the Fiscal Year, 1871-72, was 20,256 vessels representing 5,945,704 tons.

Turning from the *seaward* Trade of Canada to its Trade over its Inland Waters with the United States, which is confined to the Provinces of Quebec and Ontario, though partially extending to Manitoba (not included in the statements), we find that a considerable Tonnage is engaged in that Trade, as shown by the following summary :

	NO. OF VESSELS INWARD.	TONNAGE.
British, .....	11,150	1,975,572
American, .....	6,286	1,606,576
	<u>17,436</u>	<u>3,582,148</u>

American, .....	5,878	1,456,742
	<u>16,233</u>	<u>3,279,308</u>

The aggregate tonnage employed in that part of our Trade which is thus carried on through our Inland Waters directly with the neighbouring Republic amounts to 6,861,456 tons, forming with the sea-going shipping a collective amount of 12,808,160 tons employed in the Foreign Carrying Trade of the Dominion.

Table No. 25, p. 521, exhibits the number and tonnage of steam and sailing vessels built, and of those registered in the Dominion during the last Fiscal Year.

A comparison of the totals of the table referred to, with the corresponding table for the previous year gives the following result for each Province named :

	BUILT.				REGISTERED.			
	1871.		1872.		1871.		1872.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.

Total .....	389	106,101	411	114,665	540	121,724	563	127,371

In Ontario the number of the vessels built is the same in both years, but the tonnage is larger in 1872, giving an average to each vessel of 137 tons, instead of 141.4 which it was in 1871. Quebec has fallen off both in numbers and tonnage. Nova Scotia is the only Province in which any marked increase has taken place in ship-building. The number of vessels built in 1871 was 146, in 1872, 188, an increase of 28.76 %; the increase in the tonnage was about 19½ %. In New Brunswick the chief feature in that branch of enterprise consists in the increase shown in the size of vessels; 108, built in 1871, measuring an aggregate of 33,353 tons, whilst 93, built in 1872, give 36,464 tons, showing an average tonnage of the ships built last year of rather more than 393 tons, against 308.82 the year previous.

The recapitulation of table No. 16 on page 454, shows the value of goods in warehouse on the 30th June, 1872, as being \$9,267,410. This amount, however, includes the value of teas and coffee in Bond on that day, but which were ex-warehoused on and after the 1st of July following, and went into consumption duty free, the duties on both those articles having been repealed by Parliament in the Session of that year. The amount also includes large quantities of grain warehoused under the Regulations of the 16th May, 1870, for the manufacturing of flour in Bond—for which grain, (then subject to duty) Bonds were given by the importers, and warehouse entries passed, many of which are still outstanding although the duties were repealed on the 14th April 1871, the importers having neglected to furnish the Customs with the requisite Certificates of Export to entitle them to the cancelling of the Bonds. These values which are technically and properly brought into the Warehouse Returns, but which are not, for the causes stated, substantively in Bond, would largely reduce the amount of the goods in warehouse as shown by the statement referred to.

Apart from the reasons just stated for reducing the apparent amount of goods in warehouse as represented by the official statements referred to, it may be remarked that this large amount of goods in Bond does not appear to be ascribable to any excessive

importations during the year 1871-72. A comparison of the gross value of the goods imported, with the value of the goods entered for consumption, (table No. 12, page 442) shows an excess of only \$3,721,412, of the whole importations over the value of goods actually entered for consumption; whilst the excess of the importations in the previous year (1870-71) over the goods entered for consumption, was \$9,145,499.

The revenue from Customs collected in each of the four principal Provinces shows for the last two years the successive ratios of increase following—

Nova Scotia, .....	17.41 “	00.74 “
New Brunswick, .....	19.43 “	05.14 “

The proportion which, in each of the six Provinces, the collections bear to the whole Customs duties collected in the Dominion during the last Fiscal Year, was for

Ontario, .....	29.64 per cent.
Quebec, .....	47.34 “
Nova Scotia, .....	10.25 “
New Brunswick, .....	09.78 “
Manitoba, .....	00.36 “
British Columbia, .....	02.63 “

The gross amount of duties collected shows an increase over the previous Fiscal Year of 10.15 per cent. In my Report of last year, that per centage of increase for 1870-71 over 1869-70 stands at a much higher figure, *i. e.*, 25½ per cent, a contrast which might be the result of diminished Trade, but which in the present instance, argues reduced taxation, coupled as that difference is, with largely increased imports and general commercial prosperity, as evidenced by the Returns of the Trade of the Dominion, which I have now the honor of laying before you.

The whole humbly submitted,

R. S. M. BOUCHETTE,

*Commissioner of Customs.*

February, 20, 1873.

To the Honorable

The Minister of Inland Revenue.

SIR,— Herewith I have the honor to submit statements of Revenues collected by this Department during the fiscal year ended 30th June, 1872, together with the usual statistical details respecting the sources from whence the revenues were derived.

The total revenue accrued in this year shows an increase over that of 1870-71 of \$491,008; or somewhat more than  $9\frac{1}{2}$  per cent. as compared with an increase of  $16\frac{1}{4}$  per cent. the previous year. Of this increase \$460,989 is due to Excise, being an increase of  $10\frac{3}{4}$  per cent. There is an increase of \$13,829 or nearly  $2\frac{1}{2}$  per cent. from Public Works. The revenue from the Supervisor of Culler's office has increased by \$11,284, something over  $17\frac{3}{4}$  per cent., and there is an increase of \$4,906—less than  $2\frac{3}{4}$  per cent.—from Bill Stamps.

Excluding that portion of the cost of the staff employed for the collection of boom and slide dues, which is chargeable against the Provincial Governments of Ontario and Quebec, on account of duties performed in the collection of Crown timber dues, and excluding also the expenses connected with the Supervisor of Culler's office and the revenues derived from the culling of timber, the cost of collecting is 3.36 per cent. The cost of the inside service is .54 per cent., so that the total cost of the Department is  $3\frac{9}{10}$  per cent. on the revenues collected. The cost of collecting the Excise revenues—\$4,730, 758—was 3.13 per cent., and the cost of collecting the Canal revenues was 5.39 per cent. In the above computation I have included, as a part of the cost of collecting, that portion of the net proceeds arising from Excise seizures and penalties that has fallen to the share of the seizing officers.

The following summary comparison—in continuation of that which was given in the report for 1870-71—will show that the accrued revenues have continued to increase though not to the same extent as in the previous year.

	1867-8	1869-70	1870-71	1871-72
Excise.....	\$3,078,212	\$3,664,465	\$4,301,389	\$4,763,278
Public Works.....	486,811	543,596	579,132	592,961
Culling Timber.....	70,886	66,475	63,228	74,512
Bill Stamps.....	119,712	136,276	184,255	189,161
	3,755,621	4,410,816	5,128,004	5,619,012

It will be seen on reference to comparative statement No. 13 that with the exception of petroleum, every article subject to excise has yielded an increased revenue as compared with the previous year.

## SPIRITS.

The increase in the consumption of spirits, as compared with 1870-71, is 350,704 proof gallons, and the increase in the revenue derived therefrom is \$220,793. At the commencement of the year there were in warehouse 1,486,546 proof gallons, and on the 30th June, 1872, there remained in warehouse 140,842 proof gallons. The demand for consumption and export was therefore 345,704 gallons in excess of the quantity manufactured. The quantity exported was 432,047 gallons as compared with 271,332 gallons in the previous year, and with 316,137 gallons exported in 1869-70. The demand for export is therefore increasing, and after making the deductions due to that increase, it appears that the demand for home consumption was in excess of the demand for 1870-71 by 184,989 proof gallons.

I have inserted a statement at the end of this report (A page xvii.) showing the comparative consumption of both imported and home made spirits of all kinds per head in 1861 and in 1871, the computation being based on the census returns of those years. From this statement it will be seen that the consumption has *decreased* during the decade from 1.66 proof gallons to 1.592 proof gallons per head of the total population. This is equal to a decrease of  $4\frac{1}{10}$  per cent. From the same statement it will be seen that the consumption of imported wines has *increased* during the same period from .099 gallons to .205 gallons per head, equal to  $101\frac{6}{8}$  per cent.

## MALT AND MALT LIQUOR.

The quantity of malt taken for consumption has increased from 27,671,496 lbs., in 1870-71, to 29,981,677 lbs. in 1871-72. In the former year duty was refunded on 229,051 lbs., used in combination with sugar, &c., for the production of beer subsequently entered for exportation. In the latter year duty was refunded on 1,420,180 lbs., similarly used, so that the quantity retained for consumption in Canada was 27,442,477 lbs. and 27,561,467 lbs., respectively, giving an increased revenue from this source of \$1,289. But there is also an increase in the quantity of beer made from malt used in combination with syrup, glucose, sugar, &c. In 1870-71 there were made from these articles 65,450 gallons, and in 1871-72 the quantity increased to 559,184 gallons. Upon these quantities duty was collected at the rate of  $3\frac{1}{4}$  cents per gallon, and the increase in the revenue from this item was therefore \$16,046; giving a total increase from malt and malt liquor retained for consumption in Canada of \$17,335, or 6.27 per cent.

The total quantity of malt liquor manufactured in 1871-72 was 9,557,328 gallons, exceeding the quantity produced in 1870-71 by 1,100,232. In the last mentioned year there were about 66,000 gallons exported. In 1871-72 the exports are estimated at 157,800 gallons; so that there was an increase in the quantity retained for consumption in Canada of about 1,008,432 gallons.

The total quantity of malt manufactured during the year is 42,308,857 lbs., as against 32,968,738 lbs., produced in 1870-71. The quantity in warehouse at the commencement of the year was 9,782,518 lbs., and at the end of the year there remained in warehouse 13,381,439 lbs., so that the production was a *excess of the demand* for

export and consumption by 3,598,858 lbs. In 1870-71 there were entered for export 6,524,850 lbs. In 1871-72 the entries for export amounted to 8,765,786 lbs.,—an increase of 2,240,956 lbs., or 34½ per cent. As compared with 1869-70 this increase is 57 per cent., and as compared with 1868-69 it is 684 per cent.

Referring again to the statement A. at page xiii. it will be seen that the consumption of malt liquor has increased during the decade ended with 1871 from 1.972 gallons to 2.505 gallons per head of the total population, being an increase of 27 per cent.

#### TOBACCO.

The accrued revenue from this article is \$1,248,285. This exceeds the revenue of 1870-71 by 217,342. The quantity taken for consumption exceeds that of the previous year by 1,379,488 lbs. But with reference to this large increase it is proper to state that the quantity entered for consumption in May, 1872, was considerably more than double the quantity taken during any previous or subsequent month, and that these entries were passed while Parliament had under consideration the removal of the tea duties. It may therefore be assumed that parties holding considerable quantities of manufactured tobacco in hand hastened to clear them out of warehouses in anticipation of an increased duty on tobacco, as a partial compensation to the general revenue for the loss of the tea duty. This inference is supported by the marked decrease in the duty collected on tobacco during the subsequent months. Under these circumstances it would not be safe to accept the apparently greatly increased consumption of the year as a fair indication of a corresponding increased demand by the actual consumers.

The total quantity of tobacco manufactured during the year ended 30th June, 1872, was 8,175,099 lbs. The quantity of all descriptions, including cigars, remaining in warehouse at the commencement of the year was 3,045,838, and at the close of the year the quantity in warehouse was 1,953,641 lbs; so that, subject to such conclusions as may be drawn from the facts above stated, the quantity manufactured during the year fell short of the demand for export and consumption by 1,092,197 lbs.

The entries for export during the year were for 701,819 lbs. In 1870-71 they were for 689,532 lbs., showing a very small increase in this branch of the trade during the year, but as compared with 1869-70 the exports have increased 72½ per cent.

The statement at page xiii. shows that the consumption of tobacco per head of the total population increased from 1.804 lbs. in 1861, to 1.985 lbs. in 1871, or 10 per cent.

Statement B. at page xviii. has been prepared to show the quantity of cigars and tobacco imported and entered for consumption, and the quantities manufactured and entered for consumption during a series of four years ended 30th June, 1872. Previous to April of that year the duty on cigars was levied at a specific rate per thousand—the excise duty varying from \$1 to \$5, according to quality. The customs tariff varied from \$3 to \$6. The Excise duty on manufactured tobacco was five cents per lb., on common Canadian twist, and ten cents per lb., on all other qualities. The Customs duties were 15 cents per lb., on all qualities, with 15 per cent *ad valorem* added. Under the Act of 12th May, 1870, which took effect as to duties in April of that year, an uniform excise

duty of 30 cents per lb., was imposed on cigars without reference to quality, and the duty on manufactured tobacco was increased to seven cents on common Canadian twist, and to 15 cents per lb., on all other descriptions. The Customs tariff was at the same time increased to 45 cents per lb., on cigars, without reference to quality, and to 20 cents per lb., with twelve and a half per cent. *ad valorem* added, on manufactured tobacco.

The statement above referred to shows that under this tariff the consumption of imported cigars has increased as to quantity 344.14 per cent., and that the Customs revenue derived therefrom has increased 412.9 per cent., while of those manufactured in Canada the quantity entered for consumption has increased 60.5 per cent; and the Excise revenue collected on them has increased 138.61 per cent.

During the same period the consumption of imported tobacco has *decreased* 78.2 per cent., and the Customs revenue collected thereon has *decreased* 66.3 per cent. The quantity of Canadian made tobacco entered for consumption has increased 52.13 per cent., and the Excise revenue has increased 129.93 per cent.

With reference to the total consumption of imported and home manufactured tobacco the result is an increase of 294.2 per cent in the quantity of cigars, and an increased revenue therefrom of 341.36 per cent. The total consumption of manufactured tobacco including the leaf entered for consumption as such, has increased 40.75 per cent., and the revenue therefrom has increased 103.98 per cent.

The above comparisons are made with the consumption and revenue of 1869, the year next preceeding that in which the tariff was changed.

#### PETROLEUM.

The revenue from Petroleum has decreased \$13,268. Of this \$10,819 is due to the deduction of the inspection' fees. The remaining loss represents the reduced quantity entered for consumption and the smaller number of licenses issued. The quantity taken for consumption in 1871-72 was 4,398,315 gallons, as compared with 4,437,709 in the previous year.

The exports in 1871-72 were 8,076,885 gallons, as against 5,531,780 in the previous year—an increase of 46 per cent. The quantity in bond at the commencement of the year was 1,165,054 gallons; at the end of the year the quantity had been reduced to 543,631 gallons. The production has not therefore kept pace with the demand for export and home consumption.

#### PUBLIC WORKS.

##### *Canals.*

Although the revenue received from public works during the fiscal year has increased in the aggregate, there has been a decrease of \$21,836 in the Canal revenue. This decrease is more than accounted for by the loss of revenue on the Welland Canal, which is \$36,118 loss than it was in the previous year. The difference between the two amounts is a gain on the other canals.

The cost of carrying—including tolls—on the several routes that are in competition for the carrying trade between Lake Erie and tide water, has a material influence with shippers in determining the route by which they will ship their property. I have therefore prepared some statistical statements showing the quantities of the principal articles carried over the competing lines. I have done so in the belief that the facts thus exhibited may be useful in arriving at just conclusions as to the considerations that should prevail in determining the tariff of tolls to be collected on our Canals, and as to the extent to which the direction of freight is influenced by the tolls levied on it when passing through the canals.

In 1870 the State of New York reduced the tolls on the State Canals as follows :—

On Flour, from 6 mills per mile, per 2,000 lbs., to 3 mills.				
„ Wheat,	6	do	do	3 „
„ Corn,	5	do	do	3 „
„ Barley,	6	do	do	3 „
„ Oats,	5	do	do	3 „
„ Rye,	6	do	do	3 „
„ Railway Iron,	3	do	do	2 „
„ Other Iron,	3	do	do	1 and 3
„ Foreign Salt,	5	do	do	5 „
„ Domestic Salt	3	do	do	2 „
„ Bituminous Coal 1·5		do	do	1 „
„ Anthracite do	2	do	do	1 „
„ Iron Ore	2	do	do	1 „

The Erie Canal is the chief competitor with the Welland Canal for the transport of vegetable food and heavy merchandise, and the statements I have prepared relate principally to the comparative increase or decrease in the movement of those articles over the two routes. It will be observed that they are made to cover a series of four years, commencing with the year immediately preceeding the reduction of tolls on the New York State Canals, and including, as far as the information I have obtained will allow the season of 1872. The comparisons, as to increase or decrease, are made with 1869.

The comparative increase or decrease in the tonnage of flour, wheat, barley, corn, oats and rye moved on the two routes may be stated as follows :—

	1870.		1871.		1872.	
	Increase %	Decrease %	Increase %	Decrease %	Increase %	Decrease %
New York Canals.....		2·95	44·66		29·15	
Welland Canal.....	18·38		31·87		22·58	

The movement of *Heavy Goods*, including iron, salt, coal and iron ore, shows the following result :—

	1870.		1871.		1872.	
	Increase %	Decrease %	Increase %	Decrease %	Increase %	Decrease %
New York Canals..	15.09	.....	1.12	.....	18.01	.....
Welland Canal.....	.....	1.23	5.81	.....	.....	5.11

Comparing the tonnage of similar articles of vegetable food cleared downwards at Buffalo and Tonawanda with the quantities cleared eastward at Port Colborne, we have the following result :—

	1870.		1871.		1872.	
	Increase %	Decrease %	Increase %	Decrease %	Increase %	Decrease %
At Buffalo & Tonawanda.....	1.45	.....	67.02	.....	68.03	.....
At Port Colborne...	17.30	.....	32.96	.....	25.52	.....

The tonnage that passed through the Welland Canal in transit between ports in the United States shows—in the same articles of vegetable food—an increase of .08 per cent. in 1870 ; an increase of 13.46 per cent., in 1871, and a decrease of 6.62 per cent., in 1872. Of heavy goods there was an increase of 1.20 per cent., in 1870 ; of 5.32 per cent. in 1871, and a decrease of 18.88 per cent., in 1872.

As a supplement to the above, it may be stated that the tonnage of vegetable food cleared eastward at Oswego by canal, showed a decrease of 10.72 per cent., in 1870, an increase of 11.97 per cent., in 1871, and a decrease of 37.2 per cent., in 1872.

As bearing upon the same question, a statement is added (page xxiii) showing the tonnage of all descriptions of vegetable food transported over the Canals compared with the tonnage transported over the two principal lines of railway competing for the trade between the Lakes and the seaboard. From this statement it will be seen that the quantity carried by the railways has increased at a greater ratio than the quantities carried by canal. This greater ratio of increase may be, and doubtless is, in some measures due to the increased local trade taken at way stations, but it is also largely and mainly due to the increasing share the railways have obtained of the through business.

On reference to the official returns made to the State authorities, I find that of the total tonnage of freight carried to tide water by the railways above mentioned, and the State canals, the canals carried in 1859, 68.9 per cent.; in 1869, 47 per cent.; in 1870, 38.9 per cent., and in 1871, 38.96 per cent. The quantities were as follows:—

Total Tonnage.	Proportion carried by Canal.
1859— 5,485,076 Tons .....	.6890
1869—12,453,174 „ .....	.4705
1870—15,148,274 „ .....	.3895
1871—15,844,152 „ .....	.3896

Hence it appears that in the first year in which the great reduction of tolls on the State Canals took effect, of the total quantity of freight carried to tide water the proportion carried by the canals fell from 47 per cent., to 39 per cent., and that during the previous decade the proportion fell from nearly 69 per cent., in 1859, to 47 per cent., in 1869—a decrease of 12 per cent in the years during which there was no material change in the rate of toll, while during the first two years in which the reduced rates of toll were collected, the decrease was 8 per cent.

As above shewn the tolls levied on flour, wheat, barley, and rye in 1872, were only one half of what they were in 1869; on corn and oats the reduction was two-fifths.

Under these reduced tolls the quantity of flour moved has decreased 71 %; the quantity of wheat 39 $\frac{3}{4}$  %; and the quantity of barley has increased 22 %. The quantity of oats and rye do not show any material difference, but the quantity of corn has increased nearly four-fold.

On railway iron, domestic salt, and bituminous coal, the toll has been reduced one third; on anthracite coal and iron ore the reduction is one half, and on foreign salt there is no change.

Under these reduced tolls the quantity of railway iron moved has increased 1 $\frac{3}{4}$  %; anthracite coal 30 %; iron ore 99 $\frac{1}{2}$  %; and foreign salt 16 $\frac{1}{3}$  %; but the quantity of domestic salt has decreased 5 $\frac{1}{2}$  %, and the quantity of bituminous coal 21 $\frac{1}{3}$  %.

The quantity of grain transhipped at Port Colborne, during the seasons of 1871 and 1872, is given below. The total number of grain laden vessels lightered at Port Colborne in 1872 was 166, as against 268 in the previous year. The number entirely discharged without entering the canal was 119 in 1872, as against 100 in 1871. The quantity of grain lightered was as follows —

	1871.	1872.
Wheat.....	20,829 Tons.	9,425 Tons.
Corn.....	9,885 „	7,405 „

The quantity discharged from vessels at Port Colborne which did not enter the Canal was as follows :—

	1871.	1872.
Wheat.....	33,090 Tons.	21,121 Tons.
Corn.....	22,572 „	43,163 „

Except that there has been an increase of \$11,283.61 in the accrued revenue of the Supervisor of Cullers office, and that the revenue exceeded the expenses of the office by \$7,970, there does not appear to be any other circumstance in connection with the remaining source from which this Department collects revenue to which it is necessary to direct special attention.

All of which is most respectfully submitted.

A. BRUNEL,  
*Commissioner.*

DEPARTMENT OF INLAND REVENUE,  
January 30th, 1873.

A.—STATEMENT showing the Comparative Consumption of the undermentioned Articles—now subject to Excise Duties—in 1861 and 1871, respectively.

DESCRIPTION OF ARTICLES.	1861.—For the Provinces of Upper and Lower Canada, the population by Census of same year, being 2,507,657.			1871.—For four Provinces, Ontario, Quebec, New Brunswick and Nova Scotia, the population by Census of same year, being 3,484,924.			Increase or decrease, % per head.

NOTE.—On Flour, Wheat, Barley and Rye, the tolls levied in 1872 were only one-half of what they were in 1869. On Corn and Oats the reduction was two-fifths.

Under these reduced tolls the quantity of Flour moved has decreased 71 %, the quantity of Wheat 39½ %, and the quantity of Barley has increased 22 %. The quantity of Oats and Rye does not show any material difference, but the quantity of Corn has increased nearly fourfold.

On Railway Iron, Domestic Salt and Bituminous Coal the tolls have been reduced one-third. On Anthracite Coal and Iron Ore the reduction is one-half, and on Foreign Salt there is no change.

Under these reduced tolls the quantity of Railway Iron moved has increased 1½ %, Anthracite Coal 30 %, Iron Ore 99½ %, and Foreign Salt 16½ %. But the quantity of Domestic Salt has decreased 5½ %, and the quantity of Bituminous Coal 21½ %.
