in Russia.

THE ADVANCE UPON CABUL. Russia's Activity in Fomenting Out-

breaks in Afghanistan.

LONDON, Sept. 21. — The Standard's ahore correspondent telegraphs that the freedis have signed a fresh agreement to usure the safety of the roads through the Khyber, Kotal and Michni passes.

Two Clydesdale stallions were shipped for America on board the steamer Spain for breeding purposes, and the steamer Britannic took three brood mares and two bals for New York.

15 per cent.; missed, 4,456, or 19 per cent.; total, 70,478. This stal is divided between regulars, regulars, and militia. If it be borne in that that in Asia particularly a number are placed hors de combat through sickas, who are not included in the above than, it will be admitted that the losses the Russians during the compains of the Russians during the compains of the secondary of the secon

regulars, and militia. If it be borne in third that in Asia particularly a number are placed hors de combat through sicked.

The same admitted that the losses the Russians during the campaign referred to are almost unparalleled.

CATTLE DISEASE IN AUSTRIA.

The Bavarian Government have forbiding the importation of Austrian cattle into avaria by way of Switzerland, on account the prevalence of foot and mouth disse among cattle in the latter country.

RUSSIA'S CORN SUPPLY.

A report from Odessa to the Foreign fice says:—"For the English market, assian corn cannot, under the present attem of cultivation, contend with America, notwithstanding the low value of the able and the low freights. There is stock on hand at Odessa of upards of 100,000 qrs., and there is much im in the country waiting for better is stock on hand at Odessa of uparts of 100,000 qrs., and there is much im in the country waiting for better is stock on hand at Odessa of uparts of 100,000 qrs., and there is much im in the country waiting for better is the unfit condition in the property of the conference of the conference between Bismarck and Andrassy has resulted in the selling of previous negotiations. An agreement that the conference contended in the sealing of previous negotiations. An agreement has the selling of previous negotiations. An agreement has the surest guarantee of European peace.

LONDON, Sept. 23.—The Austrian press give Bismarck and hearty welcome, not only as a great states and hearty welcome, not only as a great states and hearty welcome, not only as a great states and referman newspapers without as a warm friend of Austria.

LONDON, Sept. 23.—The Austrian press give Bismarck and Andrassy as mutually satisfactory. The question of a written or unwritten alliance is intended in the sealing of previous negotiations. An agreement has the unwillingness of the Emperor will reverse to conference really resulted in the sealing of previous negotiations. An agreement has demanded in the sealing of previous negotiations. An agreement has RUSSIA'S CORN SUPPLY.

A report from Odessa to the Foreign fine says:—"For the English market, lassian corn cannot, under the present tem of cultivation, contend with America, notwithstanding the low value of the able and the low freights. There is much sin in the country waiting for better its. Holders, however, cannot afford to it much longer. The objection in the clish market to South Russian is the unfit condition in the hit is too often shipped. Uncorn can be produced cheaper brought to Odessa in better condition, cost of transport and paying on board teduced, South Russian corn will soon longer, except in exceptional cases, find tarket in England and Western Europe, ag unable to compete with American, than and Austrian corn. During the past it, for instance, owing to the deprecial value of the rouble, purchasers in fland had to pay only one pound for at at the normal rate of the rouble they all have to pay one pound seven shilts and sixpence. Yet, even thus, the stricans were able to undersell the Russian corn."

THE IRISH LAND AGITATION. A BRITISH CONVOY WAYLAID, despatch from Allahabad says the gols waylaid a returning British confour miles east of Shutargardan, and off with forty-seven mules after killing mards and sixteen muleteers.

ADMIRAL INGLEFIELD'S SUCCESSOR.

LONDON, Sept. 24.—Vice-Admiral Sir Leopold McClintock has been definitely named as the officer who is to succeed Sir Edward Inglefield in the command of her Majestry's ships on the North American and West Indian station. Sir Leopold is an old Arctic explorer, and a very popular officer in the Drawlet of the superior description of the Troubles in Landard Drawlet of the superior description of the Proposition of the Special Association.

THE AUSTRO-GERMAN ALLIANCE.

A despatch from Berlin states that Prince Bismarck is expected to return to that city from Vienna on Thursday, Among the provisions of the new Austro-German alliance completed in the conference between Prince Bismarck and Count Andrasy are the lowering of the railway rates and duties on merchandise passing between the two countries. These arrangements will go into effect on January 1st. The commercial side of the new alliance, which is all that has so far been author itatively made public, is regarded with intense interest in St. Petersburg, as being the only outward and visible sign of a military and political combination of a character menacing to Russian designs on the map of Europa. The action of Prince Bismarck is commented upon in all circles in Berlin as being a bold and necessary check to the unbridded ambition of Russian diplomats.

FAILURE OF A LONDON GRAIN FIRM.

It is reported that an important London firm engaged in the Galifornia grain trade has failed.

would extend to him the right of a royal prisoner of war. All the important Zulu chiefs have now surrendered, or made their peace with Sir Garnet Wolseley, and the task remains of perfecting by wise civil measures what has been accomplished by this long, disastrous, and costly war.

Care Town Sept. 2.—Coterno will come have important the control of the Home Government. His capture has a quieting effect among the natives, and danger of rupsure with the Pondos has passed away. A final assembly of the great chiefs, counsellors, and people of Zululand was to be held at Ulundi to-day, when the terms of peace were to be proclaimed, and each of the chiefs selected to rule ever the territories was to sign an agreement. According to this agreement each undertakes to forego the importing of arms from any quarter whatsoever, and importation of merchandise from the sea-coast is also ferbidden. The making of war and succession to the chieftainship will be subject to the approval of the British Government. When British subjects are accused ef crimes, trial and sentence will defend on the Resident's approval. The alienation of land will be absolutely forbidden in all respects. These chiefs will be acvereigns, each in his own territory. A chief will not be compelled to admit missionaries and the prohibition of the alienation of land will not be relaxed in favour of grants to missionaries. The British Residents will be instructed to advise the chiefs, but to exercise no authority over them. If the chiefs disregard the terms of the agreement, Residents will report their conduct, but will have no power to give orders. The course of the White Umvalosi river, from Kambula Mountain to the sea, will divide the northern from the southern Residency divisions. Many of the Chiefs receiving territories are representatives of ancient tribes, who were subjugated by the Zulus, and they rejoice at the recovery of their independence.

MATTERS IN BURMAH. Departure of the British Resident from Mandalay.

ENGLAND AND AMERICA.

The Situation in the Cotton Districts-Strike in the Iron Trade. Strike in the Iron Trade.

GLASCOW, Sopt. 24.—The pig iron market is active, and prices are higher than at any time in the past 18 months. The revival is almost solely due to large orders from America.

LONDOW, Sept. 24.—Notices of a 5 per cent. reduction in the wages of cotton operatives at Wigan, affecting 16,000 persons, expires to-day. The question of a strike has been referred to the parent union at Manchester. Work will be suspended until the decision. The operatives at Astron ballot to-day to decide whether they will continue on strike. The mill owners at Oldham declare that the short time movement has reduced the price of raw material at Liverpool.

The workmen at Conset, Jarrow, Stockton and Hartlepool have struck against the award of the urbitrator in the great dispute in the north of Engand and Cleveland iron trade.

A Lahore special says that the Afghan tribes occupying Gundamuk threaten The Cabul robels are levying forced loans on merchants.

A correspondent at Ali Kehyl reports that an important Embassy has arrived from the Ameer of Afghanistan, bringing assurances of his fidelity.

A holy war is being preached in the Khorst Valley, and among the Mongolians. Great preparations are being made by the rebels, and vigorous resistance may be expected at Cabul.

London, Sept. 22.—A correspondent at Allahabad reports the camp of the 72nd Regiment at Shutargardan was attacked on the 19th inst. A few casualties are reported.

on the 19th inst. A few casualties are reported.

A Calcutta despatch says the Government is not satisfied regarding the Ameer's conduct. The Ameer has caused the execution of the commander of the mutineers. Public opinion is strong against the Ameer for not protecting the lives of the members of the Embassy. He has forfeited forever the respect of his subjects.

ANDRASSY AND BISMARCK

A mutually Satisfactory Conference at Vienna.

A despatch from Mandalay, Burman, to leave with his party as soon as he can without betraying undignified haste or an without betraying undignified haste or an without sure transported by the Court without running serious risk. As for hacking Resident, but the sure transport of Satisfactory Conference at Vienna as the Satisf

London, Sept. 18.—Lord Beaconsfield delivered a speech at the agricultural banquet in Aylesbury to-day. Referring to the American competition with Great Britain, he said the greatest apprehension was felt in the United States that they could not compete with Canada, owing to high taxation and high wages. Since the surrender of the territories of the Hudson's Bay Cempany, Canada had become possessed of an illimitable and fertile wilderness. Nearly all the chief landhelders in the extreme Western States of America had sold out and gone to that wilderness and begun cultivation there. He had heard on high authority that Canada expected to outstrip the United States in the competition for the European markets, and he, therefore, advised the farmers of England not to be precipitate. Another high authority had informed him that under all the circumstances, the markets of the United States would be disturbed, and that with the impulsive character of humanity in that country the Canadian wilderness would soon be occupied by millions.

A Rome de Ch says it is reported that negotiations of Germany have abruptly terminated.

intact. The lope is not well. In the Kieff districts of Russia, and to Last a Fortnight. are generally fertile, the price of wheat and rye per 30 pounds weight, which was 80 and 50 copecks respectively in 1878, is now 125 and 75 copecks.

marck presented to him amountaing that it was absolutely sary for Germany to support against Russia in the East. The F endorsed the views set forth in the orial.

Ten Years of Horrible Torture.

—Mrs. Sarah Hanlon, of East 33rd street, New York, for ten years bore, as patiently as she could the agony of a leg swollen to four times its natural size, which was red and raw, and from which constantly cozed a blistering secretion. One week's application of Giles' Liniment Iodide Ammonia restored the hideous member to complete soundness.

Giles' Pills cures headache.

OUR BOUNTSOUS HARVEST.

The failure of the harvest in Britain will afford an outlet for the abundant crops with which we have been so highly favoured during the present season. This necessity being our opportunity will necessarily bring to this country increased prosperity.

WELCOME HOME.

in concluding that a steady foreign demand will be male for this now famous product of Canada.

ASRICULTURAL INPLIMIENTS.

No branch of industry has made more progress among us than the manufacure of agricultural and labour-saving implements, but for them our truly bountful harvest at home could not have been satisfactorily garnered, and the excellence of the Canadian agricultural implements is now appreciated, not only in Br.tain, but also in most of our sister colonies. I trust that our Canadian manufacturers may always sustain the pre-eminence to which they have attained.

The novel and interesting exhibit of living and preserved fishes forms no insignificant feature of this Exhibition. Although this may be the first display of the kind brought prominently before the notice of the public, the importance of the science of the natural and artificial propagation of the fishes of the country has nevertheless become fully recognized. The rapid development of this enterprise in Canada has given an impetus to fish culture throughout the world. This industry necessarily becomes the work of the Government of this country, on account of the immense areas of water which cover this Dominion. It is nevertheless peculiarly adapted for application by farmers and others who may have living water on their preserves for affording to them an additional luxury for their tables, and providing a supply in our markets of an eagerly sought for article—wholesome fish food.

REVIVAL OF TRADE.

Indications are not wanting at the present

THE BANK OF MONTREAL Appelatment of a General Manager.

Montreal, Sept. 23.—This afternoon Mr. C. F.
Smithers, joint Manager of the New York agency,
was appointed General Manager of the Bank of
Montreal. Mr. Smithers began his banking career
in the Bank of British North Americs, entering the
service of that institution about the year 1845, and
after several years of faithful work, he accepted the
position of Inspector of the Bank of Montreal in
1858, with which institution he continued his connection until 1863, when he accepted the managership of the Montreal agency of the London and Colouial. Upon the closing up of the Canadian business of that bank, Mr. Smithers re-entered the service of the Bank of Montreal in 1869, as Manager of
the New York office, and has continued to fill that
office down to the present time with the exception
of a short period, during which he engaged in the
broking business in New York. Mr. Smithers will
enter upon his new duties in the early part of October, although Mr. Aggus will continue the responsibility of the management of the Bank until
the close of the half year, October 31st.

GOLD IN NEW BRUNSWICK. Discovery of the Precious Metal on the Nashwank River, York County.

Biscevery of the Precious Metel on the Nathwank River, York County.

Sr. John, N.B., Sept. 23.—Gold has been discovered on the Nashwank river, York Co. A party numbering five persons went up the river about forty miles from Fredericton to the spot whence specimens had been brought. The country is wild and wooded, and a vein of quartz rues down to the bank of the Nashwank. The party found on examination that the vein towards the river was crumbly, and there among the sand saw shining grains of yellow metal. The party then began to search on the surface and found two dozen grains of pure gold, varying in size from a mustard seed to a swan shot. The land on which the gold was found belongs to Mr. A. Gibson, and he has taken immediate steps to put a quartz crushing mill up. The gold region is about two miles below the Napadoggin stream, and there is every reason to believe that quartz rich in gold extends through a wide track. The quartz was shown experienced gentlemen, who pronounce it richly loaded with gold. The grains picked up were valued at \$10.

FALL FAIRS.

Exhibitions at Whitby and Cebeurg.
Whyrsy, Sept. 19.—The County of Ontario Agricultural Society's exhibition uponed here to-day. There was a large attendance, and the number of entries exceed those of last year by about 500.
Coscurae, Sept. 19.—The annual fall show of the Horticultural Society was held in Victoria Hall on Wednesday last, both afternoon and evening. The display of fruit, plants, ladies' articles, etc., was a very excellent one. Although not so varied and profuse as in former years, some of the articles shown were really fine.

THE CANADIAN INDIANS.

As a general thing Ladies who make any pretentions to refinement desire to have soft white hands. We believe that there is nothing will tend more to produce this effect than the constant use of Murray & Lanman's Florida Water mixed with the water in the basin. It removes redness and roughness. The ladies of Cuba and South America were the first to discover the extraordinary virtues of this floral water as a cosmetic, and have long since discarded the use of all others.

PRICE FOUR CENTS.

Return of Sir John Macdonald from England.

FRIENDLY RECEPTION AT QUEBEC.

Quebec, Sept. 21.—The steamship Peruvian arrived this morning at 8.30 at Point Levis, having on board Sir John Macdonald, Sir A. T. Galt, Hon. J. B. Robinson, and five English delegates invited by the Canadian Government to visit and report on our unsettled land. When the steamer rounded the point and fired her guns, the Government police boat, with a committee of citizens composed of Hon. Messrs. Garneau, A. P. Caron, M.P., Charlebois, President of the Club Cartier, T. C. Casgrain, Vice-President, Wm. Sharples, Robert McGreevy, Joseph Hamel, P. Tourangeau, R. Alleyne, Q.C., and John Costigan, M.P., who, being in Quebec, was invited by the committee to be present, put off from the Queen's wharf and made the Péruvian at Point Levis. The committee went on board the steamer, when Hon. P. Garneau welcomed Sir John Macdonald, and tendered him a public dinner in the name of the citizens of Quebec.

Northern Queen arrived here eas's this most higher Suit Ste. Marie and local ports. She reports a sad boat accident between Bruce Mines and Thessalon river, by which it is supposed three persons were drowned, namely, Mr. Geo. Chisholm and his second son, of Bruce Mines, and Mr. Cooper, of the Crown Lands Office, Toronto. It appears that Mr. Chisholm and his son were engaged to take Mr. Cooper to Thessalon river in an open boat. Several days elapsed, and no tidings of them being received, a tug was sent in search, when Mr. Chisholm's trunk and the cars and rudder of the beat were search, when Mr. Chisholm's trunk and the oars and rudder of the boat were found on the beach about half way between Bruce Mines and Thessalon river. The boat has not yet been found, and as she was heavily ballasted with stone, it is pre-sumed she sunk, and that the three occupants were drowned. The very stormy at the time.

LATEST HOME NEWS.

It is stated that a manufactury of brass goods is to be established at Monoton, N.B.

A Battleford letter says the Indian can-nibal named Swift Runner was sentenced to death on his own confession. A farmer from the Eastern Townships was yesterday swindled at Montreal of \$235, by a confidence man.

The entries for the Nova Scotia exhibition closed on Saturday. About 3,000 articles are entered for competition. Mr. Alonzo B. Cornell, the Republic The entries for the Nova Scotia Povincial Exhibition now number 2,500. Many more are expected before the books close. It is stated that a number of American capitalists will establish a line of steamers between Montreal and Cape Vincent next

The recent gold discoveries in Queen's County, N.S., have led to search for ore in all parts of that county, resulting in the discovery of both iron and copper ore. It is stated that M. Say, a wealthy
French gentleman, and father of the French
Minister of Finance, is about acquiring the
Douglass property, on the Beauport road,
Quebec, with the intention of coming to
live in Canada.

Among those on board the steamer Lily, which sunk between Edmonton and Victoria, Manitoba, were Lieut. Governor Laird and suite, Mrs. Forget and the Rev. Mr. Walton and family. The Governor's party procured small boats and rowed 300 miles to Battleford.

Ing from Hunger.

Humboldy, N.W.T, via Winnipeg, 21st Sept.—
Col. Oeborne Smith's party passed here, 140 miles from Battleford and 30 miles from Fort Cariton, today, en route for Battleford. The destitution among the Isdians is very great. Several slight breaches of the peace have occurred, but nothing very serious as yet. The busials are not coming in, and it is feared the winter will be a hard one among the tribes. Colonel Smith is pushing on to Battleford with all possible haste, in order to equip companies of infantry at that point. The traders throughout the Saskatchewan valley report that the Indians are suffering terribly from want of food, but so far they have not made any hostile movements.

ADMIRAL INGLEFIELD'S SUCCESSOR. LONDON, Sept. 24.-Vice-Admiral Sir Leopold Mc-Clintock has been definitely named as the officer who is to succeed Sir Edward Inglefield in the command of her Majesty's ships on the North American and West Indian station. Sir Leopold is an old Arctic explorer, and a very popular officer in the branch of the service to which he belongs.

THE AUSTRO-GERMAN ALLIANCE.

A despatch from Berlin states that Prince Bismarck is expected to return to that city from Vienna on Thursday, Among the provisions of the new Austro-German alliance completed in the conference between Prince Bismarck and Count Andrassy are the lowering of the railway rates and duties on merchandise passing between the two countries. These arrangements will go into effect on January 1st. The commercial side of the new alliance, which is all that has so far been author itatively made public, is regarded with intense interest in St. Petersburg, as being the only outward and visible sign of a military and political combination of a character menacing to Russian designs on the map of Europe. The action of Prince Bismarck is commented upon in all circles in Berlin as being a bold and necessary check to the unbridled ambition of Russian diplomats.

this long, disastrous, and costly war.

CAR TOWE, Sept. 2.—Cetewaye will come hereimmediately to avait the orders of the Home Government. His capture has a quieting effect among
the natives, and danger of rupture with the Pondos
has passed away. A final assembly of the great
chiefs, counsellors, and people of Zululand was to
be held at Ulundi to-day, when the terms of peace
were to be proclaimed, and each of the chiefs
selected to rule ever the territories was to sign an
agreement. According to this agreement each
undertakes to forego the importing of arms from
any quarter whatsoever, and importation of merchandise from the sea-coast is also ferbidden. The
making of war and succession to the chieftainship any quarter whatsoever, and importation of merchandise from the sea-coast is also ferbidden. The making of war and succession to the chieftainship will be subject to the approval of the British Government. When British subjects are accused of crimes, trial and sentence will depend on the Resident's approval. The alienation of land will be aboverigns, each in his own territory. A chief will not be compelled to admit missionaries and the prohibition of the alienation of land will not be reliated in favour of grants to missionaries. The British Residents will be instructed to advise the chiefs, but to exercise no authority over them. If the chiefs disregard the terms of the agreement, Residents will report their conduct, but will have no power to give orders. The course of the White Umvalosi river, from Kambula Mountain to the sea, will divide the northern from the southern Residency divisions. Many of the Chiefs receiving territories are representatives of ancient tribes, who were subjugated by the Zulus, and they rejoice at the recovery of their independence.

VIENNA, Sept. 23.—The Austrian press give Bismarck a hearty welcome, not only as a great statesman, but as a warm friend of Austria.

BERLIN, Sept. 23.—The German newspapers without exception hail Bismarck's visit to Vienna as the surest guarantee of European peace.

LONDON, Sept. 23.—A correspondent at Vienna says it is understood the conference between Bismarck and Andrassy was mutually satisfactory. The question of a written or unwritten alliance is immaterial, because the conference really resulted in the sealing of previous negotiations. An agreement has been made that Germany and Austro-Hungary shall firmly support each other in every event. Count Andrassy was authorized by the Emperor to declare at the beginning of the conference the unwillingness of the Emperor to conclude a defensive alliance. Bismarck, in an interview with the Emperor, stated that the Emperor William had authorized him to make a similar declaration.

A despatch from Vienna says the conference between Bismarck and Andrassy has resulted in an agreement that German and Austrian interests in all pending European questions are identical, and that the condition of Europe is such as will leave no doubt that the two empires will be able to assert "hese interests peaceably.

Bismarck and Andrassy made an arrangement concerning their respective tariff regulations and means of communication between Austria and Germany. Bismarck visited the Papal Nuncio here. VIENNA, Sept. 23.—The Austrian press give Big A Vienna correspondent has good reason to be-lieve Count Andrassy received the assurance of English sympathy with the understanding arrived at with Germany. The Emperor Francis Joseph in an audience given Bismarck said Baron Van Hay-merle would maintain friendly relations with Ger

siderable portion of the Irish harvest is President, in the chair. There was a large rreparably lost, but it fine weather should attendance of members. THE PRESIDENT'S ADDRESS. The PRESIDENT delivered his annual address. After some introductory remarks,

A meeting on the land question was held at Tipperary, Ireland, on Sunday. Eighteen thousand people were present. Resolutions were passed, calling for an abatement of rents, and the establishment of a peasant dress. After some introductory remarks, he said:

A NATIONAL SAPOSITION.

On no previous occasion has the Council of this association been able to accomplish the object of bringing together the growth and products of several of our sister Provinces and forming one grand Dominion exposition; and although some of the Provinces had seen fit not to co-operate in this wise and desirable undertaking, yet the marked benefits which must necessarily be felt by all from their united action will go far towards bringing together at no distant period every portion of this widespread Dominion, now reaching from the Atlantic to the Pacific, causing the Provinces to form a unit in sentiment and in ambition for friendly rivalry, when the next great national exhibit of Canada shall take place. The present time for inaugurating and forming the nucleus of a national exposition of the indu trial products of this country has been a very auspicious one, on account of the marked intraest taken in this exhibition by his Excellency the Governor-General, and the lustre thrown upon it by the presence of her Royal Highness the Princess Louise. This combination of fortunate circumstances will produce results that will be beneficially felt alike by this Association and the country at large, by uniting in one common object for the improvement of our country, the people and those who are so nearly alied to the Crown. Many have expressed the opinion that the Industrial show which has been open for the past three weeks at the City of Toronto would somewhat injuriously affect this one, both in the display of exhibite and in the attendance of the people, but I am pleased to state our Association exhibition has on the present occasion sustained its usual high standard, and has shown itself well worthy of the prostige it has received from the prosence of royalcy and from the liberal patronage given to it by the great masses of the people. The entries for competition mich have been more fully verified, were it not for the happy thought which arose of he said :-Mr. Wm. Shaw, the leading Home Rule member of the House of Commons, County of Cork, has written a letter refusing to participate in the proposed Irish National Convention. THE FAMINE IN CASHMERE Corruption among officials—A Ghastly

THE CATTLE EXPORT TRADE.

Remarkable commercial results, in which the Canudian farmer is deeply interested, are now taking place between Canada and the Mother Country, which no one now listening to me could have satisficipated a short time ago. The traffic in live cattle has already attained wonderful dimensions, startling both to us and the people of Great Britain. This is but the beginning of a trade that must enrich us and benefit them. The same is equally true with regard to horses. Cavalry officers, and others acquainted with the subject, have noticed the adaptability of our Canadian horses for military purposes, and, in fact, their suitability for general use in England has now become established. Not only is there a wide field open to us in the Old Country, but the demand in the United States for all the superior classes of these animals is steadily on the increase, much to the benefit of the Canadian producer.

OUR BOUNTBOUS HARVEST. OUR BOUNTBOUGH HARVEST.

The failure of the harvest in Britain will afford an outlet for the abundant crops with which we have been so highly favoured during the present season. This necessity being our opportunity will necessarily bring to this country increased prosperity. THE CHEESE MARKET.

The market for our dairy products although it has been singularly depressed of late, has negertheless, within the past few days, recovered itself. The upward tendency of the cheese market has relieved the minds of many of our anxious farmers, and we hear that some have already reaped no scanty harvest

Annual Meeting of the Pro
equally beneficial results. The failure of the harvest in Britain has been followed by a similar falling off in the fruit crop. If we may judge of the superior description of our fruits in the Horticultural Hall to day, sufficient proof is not wanting to justify us in concluding that a steady foreign demand will be made for this now famous product of Canada.

De ma is for this now famous product of Canada.

AGRICULTURAL IMPLEMENTS.

No branch of industry has made more progress among us than the manufacure of agricultural and labour-saving implements, but for them our truly bountiful harvest at home could not have been satisfactorily garnered, and the excellence of the Canadian agricultural implements is now appreciated, not only in Br.tain, but also in most of our sister colonies. I trust that our Canadian manufacturers may always sustain the pre-eminence to which they have attained.

THE FIRM DISPLAY.

which they have attained.

THE FISH DISPLAY.

The novel and interesting exhibit of living and preserved fishes forms no insignificant feature of this Exhibition. Although this may be the first display of the kind brought prominently before the notice of the public, the importance of the science of the natural and artificial propagation of the fishes of the country has nevertheless become fully recognized. The rapid development of this enterprise in Canada has given an impetus to fish culture throughout the world. This industry necessarily becomes the work of the Government of this country, on account of the immense areas of water which cover this Dominion. It is nevertheless peculiarly adapted for application by farmers and others who may have living water on their preserves for affording to them an additional luxury for their tables, and providing a supply in our markets of an eagerly sought for article—wholesome fish food.

makets of an eagerly sought for article—wholesome fish food.

REVIVAL OF TRADE.

Indications are not wanting at the present moment to show that the sad commercial depression which has so long overshadowed our own and all other countries is about being removed. The revival of trade in the United States and elsewhere must necessarily advance our prosperity. (Cheers.)

THE BRITISH COMMISSIONERS,
who are at present in this country seeking information in regard to the means that may be instituted for relieving the agricultural distress in Great Britain, will no doubt, from the practical knowledge they have already obtained, make a report not unfavourable to Canada as being a suitab e home for the British emigrant. (Cheers.)

ADVANTAGES OF A DOMINION EXHIBITION. In connection with our present great exposition, I desire to put forth a suggestion that a Dominion exhibition would be a benefit to our Canadian agricultural interests. This might be held every fourth year. Legislation might be obtained to restrain all central or industrial competing shows for that year, and Government aid might be properly given to the several local exhibitions during the intervening years. (Cheers.)

IN CONCLUSION.

I shall now conclude by intimating te you with much regret that other duties will prevent my further connection with the Board of Agriculture. I now desire to thank you for the patient consideration you have given me, and your Council, also for the honour it conferred upon me in electing me President of the Agricultural and Arts Association of Ontario. Veterinary College of the Province was progressing main and rest himself until Tuesday morning, on motion of Rev. Dr. Burnett, seconded by Mr.

THE NEXT PLACE OF MEETING Mr. KYKERT said an attempt had been made by Toronto to centralize the exhibition, to which he was opposed. He favoured the perigrination system, unler which it would go to Hamilton next year. He would move:—"That in the opinion of the meeting the practice of holding the Exhibition in different parts of the Province shall continue."

Mr. DORL said he would second the metion, but he could not agree with the statement that Toronto desired to centralize the show. Guelph and London had local exhibitions, and why should not Toronto the Owner City of the West have its local to, the Queen City of the West, have show? He was a director of the Toronto Exh tion, and he could say that Exhibition was by

held at Hamilton.

MAYOR ROACH, of Hamilton, gave the necessary
guarantee that the building accommodation should
be sufficient, and promised the erection of a half for
machinery, a dairy building, and an art gallery.
The motion was carried.

Mr. Young, M.P.P., moved that the exhibition be ontinued open for two weeks next year, the nechanical portion of the exhibition to be open uring the latter week. Hon. David Christie seconded the motion.

THE BANK OF MONTREAL. Appointment of a General Manager. Appointment of a General Manager.

Montreal, Sept. 23.—This afternoon Mr. C. F. Smithers, joint Manager of the New York agency, was appointed General Manager of the Bank of Montreal. Mr. Smithers began his banking career in the Bank of British North America, entering the service of that institution about the year 1845, and after several years of faithful work, he accepted the position of Inspector of the Bank of Montreal in 1858, with which institution he continued his connection until 1863, when he accepted the managership of the Montreal agency of the London and Colonial. Upon the closing up of the Canadian business of that bank, Mr. Smithers re-entered the service of the Bank of Montreal in 1899, as Manager of the New York office, and has continued to fill that office down to the present time with the exception of a short period, during which he engaged in the broking business in New York. Mr. Smithers will entirer upon his new duties in the early part of October, although Mr. Angus will continue the responsibility of the management of the Bank until the close of the half year, October 31st.

GOLD IN NEW BRUNSWICK. St. John, N.B, Sept. 23.—Gold has been disc red on the Nashwaak river, York Co. A pa and there among the sand saw shining grains of yellow metal. The party then began to search on the surface and found two dozen grains of pure gold, varying in size from a mustard seed to a swan shot. The land on which the gold was found belongs to Mr. A. Gibson, and he has taken immediate steps to put a quartz crushing mill up. The gold profile in short two miles below the Nanadograin. steps to put a quartz crushing mill up. region is about two miles below the N stream, and there is every reason to be stream, is and the stream to be stream to b This is the first occasion in which the youngest of

uplay of fruit, plants, ladies' articles, etc., wa
y excellent one. Although not so varied a
fuse as in former years, some of the artic.
wn were really fine.

This is the first occasion in which the youngest of our sister Provinces has made an exhibit in connection with our Association. The display from Manitoba must be convincing in itself of the agricultural wealth, and of the other varied resources of that Province. The show of cereals, of all kinds of roots and vegetables, of the products of the mines, the forest and the fisheries, claim for Manitoba the foremost place for the intending emigrant, where, from the richness of the soil, happy homes can soon be made, and agricultural wealth speedily obtained. Great praise is due to the zeal and energy put forth by the people of Manitoba in gathering together the rich products of their country, and transporting them such a distance, and placing them in competition with the older sections of the Dominion. The admirable spirit which has been shown by the Agricultural Association of Quebec in so laudably giving as they have done their support to this Exhibition, and in foregoing the right of holding a show in their own Province entitles them to our warmest thanks, and it is most desirable that this friendly union of feeling should continue in the future for the advancement of the agricultural interests of both Provinces.

THE CATTLE EXPORT TRADE.

special committee to endeavour to influence the dovernment to construct the Murray canal.

A sad accident occurred at Collingwood yesterday afternoughout the Saskatchewan valuely report that the Indians are suffering terribly from want of food, but so far they have not made any hostile movements.

As a general thing Ladies who make any pretentions to refinement desire to have soft white hands. We believe that there is nothing will tend more to produce this effect than the constant use of Murray & Lanman's Florida Water mixed with the water in the basin. It removes redness and roughness. The ladies of Cuba and South America were the first to discover the extraordinary virtues of this floral water as a cosmetic, and have long since discarded the use of all others.

Count de Bury has been elected by acclamation a councillor of Ward 5, Portland, N.B., in the room of James F. Fellows, of hypophosphites fame, resigned.

WELCOME HOME.

PRICE FOUR CENTS.

Return of Sir John Macdonald from England.

FRIENDLY RECEPTION AT QUEBEC.

QUEBEC, Sept. 21.—The steamship Peruvian arrived this morning at 8.30 at Point Levis, having on board Sir John Robinson, and five English delegates in vited by the Canadian Government to visit and report on our unsettled land. When the steamer rounded the point and fired her guns, the Government police boat, with a committee of citizens composed of Hon. Messrs. Garneau, A. P. Caron, M.P., Charlebois, President of the Club Cartier, T. C. Casgrain, Vice-President, Wm. Sharples, Robert McGreevy, Joseph Hamel, P. Tourangeau, R. Alleyne, Q.C., and John Costigan, M.P., who, being in Quebec, was invited by the committee to be present, put off from the Point Levis. The committee went on board the steamer, when Hon. P. Garneau welcomed Sir John Macdonald, and tendered him a public dinner in the name of the citizens of Quebec.

Sir John Macdonald after shaking hands with the committee and acknowledging the welcome, said after his long absence from the capital, it would be necessary for felt coming back to Quebec was like coming home. The old city was fuil of recollections for him. He had met with his first successes here, and his Quebec friends had always assisted his Ontario friends in making him what he was. It would give him great pleasure to accept the dinner they had tendered him, and if they would give him a fortnight in which to attend to affairs of State, he would be happy to come down to Quebec on any day in the following week that they might deter-

mine on.
Sir John Macdonald then went on board the police boat, crossed over to Quehec and drove immediately to the residence special train, and will be accompanied by Robitaille, Mr. A. P. Caron, M. P., and a few of his most intimate friends were adbe learned his journey to England has been effect on the future of Canada. Sir A. T. Galt and the five English dele gates did not stay over in Quebec, but pro-ceeded by train with the other passengers going west. Hon. J. B. Robinson stays in Quebec for a day or two.

Three P. ople Lose their Lives Near Bi uce

OWEN SOUND, Sept. 21.-The steame ports. She reports a sad boat accident between Bruce Mines and Thessalon river, by which it is supposed three persons were drowned, namely, Mr. Geo. Chisholm and his second son, of Bruce Mines, and Mr. Cooper, of the Crown Lands Office, Toronto. It appears that Mr. Chisholm and his son were engaged to take Mr. Cooper to Thessalon river in an open boat. Several days elapsed, and no tidings of them being received, a tug was sent in search, when Mr. Chisholm's trunk and the oars and rudder of the boat were ound on the beach about half way between Bruce Mines and Thessalon river. The was heavily ballasted with stone, it is pre-sumed she sunk, and that the three occupants were drowned. The weather was

invariably the wrong way, and to turn was a difficult feat in the confusion. After was a dimicult feat in the confusion. After some delay the Marquis and Princess were provided with a conveyance, but the staff were obliged to fall back on a vehicle placed at their disposal by private citi-

The journey to the Town Hall was at length made, and there the display was worthy of the community. The building, which is a remarkably fine one, having a large portion with massive Corinthian columns, was liberally adorned with evergreens and flag decorations. Scrolls worked out in blue and white, and placed over the entrances, contained the words "With joy we greet you," with "Welcome Lorne" and "Welcome Louise" on each side. The adjoining houses were profusely decorated, and the streets in the vicinity were bright with streamers and flags. Two companies of the 40th Battalion constituted the guard of honour under command of Lieut. Col. Graveley. There was also a cavalry escort of the Cobourg squadron under Lieut. Colonel Bolton. Upon the platform were the Mayor and members of the Town and County. Councils, Hon. James Cockburn, M.P., Judges Boswell, Clark, and Dumble, Sheriff Waddell, Mr. Geo. Field, M.P.P., the President of Victoria College and staff, Mr. John Sutherland, ex-Mayor, Mr. D. H. Minaker, Rev. Dr. Waters, Mr. Wm. Ayer, Mr. R. Mulholland, Dr. Kerr, Rev. Mr. Jeffrey, Dr. Burns, Lieut. Col. Rogers, Dr. Calingford, Dr. Power, Col. Chambiers, Mr. Barrin, &c.

In the neighbourhood of the town hall the streets were crowded with people and a platform receted so as to obtain a good view of the proceedings was well filled. The assurance given on a streamer stretched across the street that Canada is an integral part of the Empire, caught the public fancy and received its approval. The proceedings commenced with the presentation of addresses.

A DRIVE THROUGH THE TOWN. AT THE TOWN HALL.

ds left the mid loud the band

A DRIVE THROUGH THE TOWN. A number of presentations having been made, the visitors drove through some portions of the town, and passed the University and Science Hall, and the Ladies' Academy, the last-named building being specially decorated. His Excellency inspected the guard of honour, and, joining the Princess, they resumed their railway journey. It was expected that an address would have been presented from Lindsay, but no one attended to do so.

BELLEVILLE

was the last place at which a public reception was given the viceregal party, Kingston having already nobly fulfilled its pleasant duty in this regard. The Belleville reception was a pronounced success, the excellent arrangements deserving special remark. The ceremonies in this city as at Port Hope, took place on an elevated platform oven to public view. elevated platform open to public view. A dais was erected at a point near the railway and facing an open space, which was densely packed by onlookers. The guard of honour was composed of two companies of the 49th and 15th regiments under command of Cols. Lazier and Brown, M.P. mand of Cols. Lazier and Brown, M.P.
The bands of the corps were in attendance.
Upon the platform were Mayor Robertson, the city aldermen, Senator Reed,
Mayor Boulter, M.P.P., Warden Pearce,
Bishop Carmen, Vicar-General Farley,
Rev. Messrs. Burke, Turnbull, McLean, &c.
On the promenade down the platform the
party passed under a pretty arch, which
contained the words, "Come again" executed in flowers on a background of evergreens. St. George's, St. Andrew's, Irish
and Canadian flags floated near by, and the
British Standard was run up on a flagstaff.
There were, moreover, many private decorations, and the general appearance was
one of gaiety and good humour. Haverley's New York Juvenile "Pinafore" Company occupied an enclosure on the side of
the platform, and sung the National
Anthem with excellent effect. The company assembled to receive the Governor-Misses lings prepany assembled to receive the Governor-General and Princess, comprised the Mayor and city aldermen, Judges Sharwood and Lazier, Sheriff Taylor, W. A. Shepard, Chairman of the Board of Education, &c. The Mayor presented an address and his Washleson received.

Chairman of the Board of Education, &c.

The Mayor presented an address and his Excellency replied.

Several presentations were then made, and the party returned to the train. While his Excellency inspected the guard, her Royal Highness stood out on the platform of the viceregal car and received a thorough ovation. In their enthusiasm, some of the warking people supremying the car held. working people surrounding the car held out their hands to the Princess, and she graciously shook hands with several of them. The train left amid renewed denonstrations of popularity.

Prescott was reached at 7 o'clock, and

Ottawa at 9 o'clock. MINING ENGINEERS.

The American Institute at Montreal MONTREAL, Sept. 18.—This morning the nembers of the American Institute of members of the American Institute of Mining Engineers, accompanied by a goodly number of ladies, visited the museum of the Geological Survey, under the guidance of Prof. Selwyn and Dr. Sterry Hunt. The visitors greatly enjoyed their visit. The principal objects of interest to them was the magnificent specimens of graphites and mineral ores. The samples of gold deposit from Oldham mines in Nova Scotia were also fruitful topics of interest. Upon entering into conversation with several gentlemen, your reporter was surprised at finding that Canadian mineralogy seemed to be well understood, as also the yields of the rich bearing mineral regions of the Dowas at to be well understood, as also the yields of the rich bearing mineral regions of the Do-minion. Not the least among other sub-jects worthy of special note was the general approval of the excellent quality of our Montreal limestone.

The gentlemen next visited the Moun-tain, and were delighted with the fine broad sweep of landscape seen from its annumit.

The Tewn Clerk of Brockville Short in his Cash.

Brockville, Ont., Sept. 17. — Very BROCKVILLE, Ont., Sept. 17. — Very serious rumours are afloat in reference to the bank account of the town, which was under the charge of the Clerk and Treasurer, John Taylor, jr. Auditors are now making a thorough investigation. The town holds bonds as security to the amount of \$4,000, issued by the Guarantee Company of Canada. The Finance Committee requiring some funds, and Mr. Taylor telling a different story to each of the committee as to the amount on deposit in ing a different story to each of the committee as to the amount on deposit in bank, led them to make an investigation.

Mr. Taylor, it is said, is on the other side of the river. Col. Wylie is acting Town

THE BRITISH COMMISSIONERS.

Majors y ; Capts

Their Opinion of Lands in Ontario-Programme of their Fature Movemental BELLEVILLE, Sept. 18.—The Hon. Robert Read states that the British Agricultural Commissioners were much pleased with what they saw of the Province and its products as exhibited at the Toronto and what they saw of the Province and its products as exhibited at the Toronto and Guelph exhibitions. After observations of the system of farming pursued at Markham, Brampton, Guelph, and Hamilton, they expressed the opinion that the lands are generally good and well farmed. They go to Manitoba, Kentucky, Texas, and, perhaps, California, returning, if time permits, to the Dominion and the Eastern States. They intend to reach home by Christmas,

CANADA'S GREAT

Financial Statement

The following rough statement from the manager of the Association proves conclusively that the enterprize has been an undoubted financial success. The number of visitors to the show has been far in advance of any Provincial Fair held in this city, and Toronto, in the matter of attendance, has heretofore led the van. As a consequence, the amount of money collected for admissions into the grounds was some \$3,000 or \$4,000 larger than ever taken at any Provincial show.

\*\*FINE ARTS DEPARTMENT.\*\*

A rapid walk through this section of the Exhibition leads to the very gratifying conclusion that sketching and painting oil and water colours in this section of the country are not among the lost arts. Indeed, as year by year the artists who exhibit here show signs of improvement in style and taste, so, this year, there is a marked change for the better in the class of works shown. There are, as there are in every art show attached to an exhibition, some very portures which show a lack of knowledge and artistic skill on the part of their producers. But the large majority of the works exhibited are really praiseworthy. Miss Strickland, of Oshawa, comes all the way to Guelph to show paintings of here in oil and water colours. She is a rising artist. A group of crayon portraits by Mr. Clement Read, of Guelph, attracts much attention. Mr. Read is an invalid, and he way to Guelph to show paintings of here in oil and water colours. She is a rising artist. A group of crayon portraits by Mr. Clement Read, of Guelph, attracts much attention. Mr. Read is an invalid, and he draws in a half sitting, half lying posture. His pictures are good, but a few hints as to light and shade would do him no harm. Among the sketches one in pen and ink by Miss Saunders, of San Francisco, takes the lead. The subject is by no means a humerous one; it is "Satan playing at chees by Miss Sophie Taylor and Mr. W. L. Judson of that city. Both these artists have made a mark as painters in oil. Another London artist shows a portrait of Hon. Edward Blake. It is rather too highly coloured, and an immense amount of work has been lavished upon it. Mr. Judson's masterpiece seems to be his negro group, which represents three laughing Ethiopians matting on a low branch of a tray of the produced in the produced in the produced in the produ

A REMARKABLE HALLUCINATION. - For

A REMARKABLE HALLUCINATION.—For the past few days, a rather intelligent looking man, of middle age, has been hovering about the Police Court, evidently desirous of procuring an interview with some of the officials. Yesterday morning he succeeded in button-holing a prominent detective, when, with an air of mysterious importance, that soared away above and beyond the plains of sublimity, he made the following statement:—He was standing opposite the Globe Hotel on Yonge street about ten days ago, when a flash of lightning, with as delicate a touch as that of a feather, struck him on the tympanum of his left ear, and in a moment he was gifted with remarkable powers of locomotion. At the same time were sent back to hospital in Natal. In addition to medical care, the organization was the means of furnishing its patients with many little comforts not strictly embraced within its stated sphere. The noble work of the Society is gratefully recognized by the English press.

Mr. Parnell, who is making a tour in Munster, recently addressed a meeting in Limerick, at which some very emphatic expressions were used by both the speaker and his audience. In response to his query as to what the tenants were going to do in case the landlords refused a reduction of rent, the response was: "Shoot the VISIT OF HER ROYAL HIGHNESS TO THE INPANTS' HOME.—Upon the day previous to her departure from Toronto, the Princess Louise paid a visit to the Infants' Home, an institution in whose welfare her Royal Highness appears to have a deep interest, inasmuch as she is the patroness of the hospital for the relief of the same class of unfortunates in London, England. The Princess was accompanied by Lady The Princess was accompanied by Lady Sophia Machamara and Capt. Bagot, A.D.C. She was received, on alighting from her carriage, by the lady managers and lady superintendents. Among those present were Mrs. Justice Osler, Vice-President; Mrs. Grantham, Treasurer; Lady Howland, Miss White, Mrs. Edmund Osler, Mrs. J. B. Young, Mrs. Maule, Mrs. Manton and Mrs. Parsons. Her Royal Highness was conducted through the various departments by Miss Gwyn, the lady superintendent, and Dr. Burns, the senior physician, and evinced great interest in all she saw, and plainly showed a familiarity with all the details necessary in the management of such a charity. Before familiarity with all the details necessary in the management of such a charity. Before leaving she left her autograph in the visitors' book, and expressed her satis-faction regarding the attention and com-forts bestowed upon the inmates. At the time of the visit of the Princess there were 45 infants and 19 nurses in the Home, and notwithstanding the large number of innotwithstanding the large number of in-mates very little sickness prevailed. The management confidently expect that at the close of the official year, the 30th inst. they will be able to show a decrease in the death-rate of about 15 per cent.

AN UNFORTUNATE STEAMER -A Serious AN UNFORTUNATE STEAMER.—A serious accident happened to the engine of the steamer City of Toronto as she was starting on her second trip to Niagara about three c'clock on Saturday afternoon with several hundred passengers on board, but fortunately nobody was hurt. The steamer had backed out from Yorge street wharf, and after proceeding eastward about three hundred yards the captain rang the alarm bell ordering the engine to start forward. This was done slowly and with the usual caution, and after ten or twelve revolutions of the wheels had been made, the captain rang the bell for the engineer to "open out," which means to give her more steam. At this instant the captain heard a click, and knowing that something was wrong with the engine he rang the bell to shut off steam. The next moment there was a crash and all was over, except the excitement which had been produced, but the Captain allayed this by assuring the passengers that they would all be landed safely. Upon examination it was found that the strap uniting the connecting rod with the crank had broken and that the other end flying back suddenly, had disconnected the engine, twisted the piston, and knocked the crosshead, which is of cast iron, into pieces, and starting the stays at the top of the beam and bending them out of position. A large piece of the crosshead fell on the deck and made a small hole in it, but did not go through. Altogether the accident was serious so far as the damage to the machinery was concerned, but it might have been much worse if Captain Milloy had not been so prompt in giving orders to shut the steam off, and in assuring the passengers of their safety. He then signalled a tug and sent the passengers ashore, after which the steamer was towed to Tinning's wharf, where she now lies. The accident, of course, has caused the city to be laid up for the season, but she was about to be laid up in a few days. The damage to her machinery is estimated at, perhaps, \$1,000. accident happened to the engine of the steamer City of Toronto as she was start-

Butter-Making in July and August. Butter-making can be carried on in hot weather as successfully as in June by using the Gilt-Edge Butter Maker. It reduces time of churaing one-half. Increases production 6 to 10 per cent. Storekeepers pay 3 to 5 cents a pound extra for butter made with it. Sold by druggista, grocers, and general storekeepers. Send stamp for "Hints to Butter-Makers." Address Butter Improvement Co., Buffalo, N. Y. OUAQUAGA DAIRY, SUSQUEHANNA \(\frac{1}{2}\) VALLEY, N. Y., May, 28th, 1879. BUTTER IMPROVEMENT CO., Buffalo, N.Y.: GENTLEMEN,—Please accept a sample of butter made from "hay-fed" cows and with the use of your Gilt-Edge Butter-Maker, without its use the butter made was almost as white as lard, while with its use (as you will observe from the sample sent yon) the butter is of a very beautiful, even gold colour, leaving nothing to be desired in that direction. Several of my neighbour dairy farmers have tried your powder and are loud in its praise. It passes in market as "creamery butter," and is worth from 3 to 5 cents per pound more than dairy butter.

H. C. BRYANT. Butter-making can be carried on in hot

THE DOMINION EXHIBI

A Survey of the Diffe Departments.

OTAWA, Sept. 22.—The Provinci hibition can hardly be said to have menced yet. To-day has been devot the work of preparation, and comparate visitors appeared on the ground from morning till night the sound of and hammers and the shouting of her and grooms at stubborn and refractor hibits were almost deafening. An arworkmen were busy in all parts of grounds and buildings, and a cont stream of vehicles followed the Elgin Bank street roads, conveying the thou and one articles which are essential thibitions to the common centre of at hibitions to the common centre of attion. The few visitors who put in an parance during the day arrived and parted by the steamers. The roads absolutely free from mud and almost from dust, and if the weather should fine during the next four days as it been for the past twenty-four hours Provincial Exhibition of 1879 will endid success. The city is fast splendid success. The city is fast fi with visitors. Every train brings its sands, especially the trains from the and from the Upper Ottawa. Since the time that the Provincial Exhibition held here, there has been a great imp ment as well as increase in the facilitie conveying visitors to and from the ca Since then the North Shore railway been built, placing the po tion of Quebec Province we age hours reach of Ottawa and the hours' reach of Ottawa, and the from all eastern points by this most p lar route is exceedingly low, in ma contrast to the high fares charged by companies which convey passengers the West. The Canada Central has been extended since 1875 to Renfrew Pembroke, and the population of Pembroke, and the population of Upper Ottawa country, to most of w a Provincial exhibition is a novelty pouring into the city to see the sights mingle in the gaieties of the week, extension of the North Shore Railwa Aylmer, where it connects with Union Forwarding Co'ssteamers also as a walling the crowd of sights. Union Forwarding Co's steamers also as in swelling the crowd of sights If, therefore, the weather be at all fit is probable that the capacity of the cap to accommodate visitors will be taxe its utmost, and it is more than prob that the capacity of the grounds, narro as they have been by the erection of sev new buildings, will be over-taxed. A thing approaching the throngs which tended the Industrial Exhibition would the Ottawa grounds to overflowing. the Ottawa grounds to overflowing, tainly, if they should come, they will enough here to interest and instruct the especially in the agricultural departm where the show of cattle is remarks. fine, and comprises a large number of vehoice animals from the Province Quebec. Our Western stock breeders find no mean competitors in their Mont friends. The herds of well-bred stock, which the Eastern Townships are fam which the Eastern Townships are fam are not represented, but there is eno stock from the sister Province to si that in this department, at all events, neighbours are not far, if at all, beh as. There is very gratifying evidence the agricultural display from the Otta valley of the good effect which the P vincial exhibition has on the farming of any section where it is hard.

munity of any section where it is he Perhaps no part of Ontario has made s rapid improvement in this direction at the exhibition of 1875 as the Ottawa trict. The improvement, however, almost confined to agriculture. THE MAIN BUILDING.

The eight wings of the main building, we the central hall, were lumbered with pack cases and a variety of manufactured p duots this morning. To-night there is improvement in the appearance of thin but the work of displaying articles is no means completed. The gallery is gettifast into shape. It contains books, both binding specimens, sewing machines, a needlework. The most noticeable pied ladies work so far is a screen embroisered in silk and worked and exhibited Lady Tilley. This is the handsome piece of work that has been seen in an e hibition for many a day and words on to describe it. The screen is in the folds, each of which bears an admirab arranged scene. On the first is THE MAIN BUILDING. folds, each of which bears an admirab arranged scene. On the first is Southern scene, representing a rive by the side of which grows to date palm. Handsome plumages a seen amongst the foliage. The secon fold presents a South African view willions and giraffes as the main features numerous birds of paradise are perchet upon the heartfully designed trees. with groups of birds at the corners. To centre piece is elegantly worked. It r presents "Prince Prettyman" waking to "Sleeping Beauty." The design in all the he colours very artistic.

Another good show in the gallery is the ottawa Auxiliary Bible Societ is a number of bibles in a variety

On the ground floor E. B. Eddy, the rell-known proprietor of Eddy's mills, a Hull, makes an admirable display of his natches, pails, doors and sashes. He hows six different kinds of matches, it manufacture of which no less than 1 ne manufacture of which no less than 15 iris are employed. The match factory arms out 10,500 gross of matches per day na glass case Mr. Eddy shows a tremen ous quantity of matches standing upright and done in coloured composition, forming very handsome design. It has border black, blue and brown. Then there is white records are supported in the control of the cont white ground, upon which is printed is atches the figures 1854 in blue, the worddy in black, and the figures 1879 in reals in all sizes and of all qualities a

ally in black, and the figures 1879 in red ails in all sizes and of all qualities ar lown. Among them are several paper pails hich appear to be durable and light ewel posts, doors, sashes, and other several paper pails hich appear to be durable and light ewel posts, doors, sashes, and other several paper in the mills of the most of the most interesting pieces of ork in wood is a table shown by Mr. J. McLaren & Co., of Ottawa, also show eximens of their doors and sashes.

One of the most interesting pieces of ork in wood is a table shown by Mr. J. B. Hannum, of Hull. The table is in less than 120,000 pieces of wood, and e wood of which it is made of nineteen ferent kinds. The design on the face the table is a bird's-eye view of Eddy's llls, in which Mr. Hannum is employed. r. Hannum spent the evenings of five ars of his life in making this prodigious see of work, and he very justly links that his time has been well ent. He also shows a number inlaid workboxes. He is now engaged making a picture in pieces of wood of e Parliament buildings. He has been veral years at the work, and expects to lish it, if he is spared, in three years. at manner in which he does the work is it. On a fine dwark and expects to its it. On a fine dwark and expects to the second of t veral years at the work, and expects to the hit, if he is spared, in three years. He manner in which he does the work is is: On a fine day he goes to the front of e buildings, and sketches a portion of em, remembering the tints and marking ill the design. He then returns to his me, and selects the wood of a tint to to the building, cuts it into blocks of right size, and glues it on to the ards, which form the back bone of his ture. An immense amount of patience required to perform such a work, a , and no one but a true artist could e so correctly the perspective and colour does Mr. Hannam. The picture of the Mills was shown at the Centennial. Picture of the Parliament Buildings be shown at the next Provincial Show.

MARBLE AND GRANITE. Under this head specimens of Grenville, aprior and Fitzroy marble are shown by rious exhibitors. Some marble is also own from an island on the Gatineau. It mostly of a greenish and dark grey lour. As a rule it is excellent marble, t in some pieces flaws are visible. CANADIAN POULTRY AND PET STOCK
ASSOCIATION,—A meeting of this Association was held last week in Thomas' Chop
House, the President, Mr. John James, in
the chair. The meeting was addressed by
Mr. W. H. Doel, of Toronto; Mr. Black,
of Montreal; Mr. James Fullerton, of
Strathroy, and others. The Chairman
stated that this Association was not
started in opposition to the Provincial
Society, but specially to help its own
members. The meeting was in favour
of the system of exhibiting single
birds. After presenting to Mr. Doel a
vote of thanks for his efforts to make the
poultry show of the present Exhibition a
success, the meeting closed. It is understood that the Association intend holding
an exhibition early next year. CANADIAN POULTRY AND PET STOCK

an exhibition early next year. A REMARKABLE HALLUCINATION.-For the past few days, a rather intelligent looking man, of middle age, has been hover-ing about the Police Court, evidently deing about the Police Court, evidently desirous of procuring an interview with some of the officials. Yesterday morning he succeeded in button-holing a prominent detective, when, with an air of mysterious importance, that soared away above and beyond the plains of sublimity, he made the following statement:—He was standing opposite the Globe Hotel on Yonge street about ten days ago, when street about ten days ago, when a flash of lightning, with as delicate a touch as that of a feather, struck him on moment he was gifted with remarkable powers of lecomotion. At the same time a detective placed in his hands instructions from County Attorney Fenton to proceed to Winnipeg to arrest a man on a charge of lunacy. He immediately availed himself of his nearly acquired research. of lunacy. He immediately availed himself of his newly acquired powers, reached Winnipeg in eight seconds, and returned to Toronto with the prisoner, after an absence of twenty seconds. For this service he received \$3,000, which he alleges Mr. Fenton handed him in \$20 gold pieces. On Friday next he leaves for San Francisco on a similar errand, and expects to be absent about half an hour, as he has several important matters to attend to while there. VISIT OF HER ROYAL HIGHNESS TO THE

INFANTS' HOME.—Upon the day previous to her departure from Toronto, the Princess Louise paid a visit to the Infants' Home, an institution in whose welfare her Royal Highness appears to have a deep interest, inasmuch as she is the patroness of the heavital for the relief of the severe of the hospital for the relief of the same class of unfortunates in London, England. The Princess was accompanied by Lady Sophia Macnamara and Capt. Begot, A.D.C. She was received, on alighting from her carriage, by the lady managers and lady superintendents. Among those present were Mrs. Justice Osler, Vice-President; Mrs. Grantham, Tressurer; Lady Howland, Miss White, Mrs. Edmund Osler, Mrs. J. B. Young, Mrs. Maule, Mrs. Manton and Mrs. Parsons. Her Royal Highness was conducted through the various departments by Miss Gwyn, the lady superintendent, and Dr. Burns, the senior physician, and evinced great interest in all she saw, and plainly showed a in all she saw, and plainly showed a familiarity with all the details necessary in familiarity with all the details necessary in the management of such a charity. Before leaving she left her autograph in the visitors' book, and expressed her satis-faction regarding the attention and com-forts bestowed upon the inmates. At the time of the visit of the Princess there were 45 infants and 19 nurses in the Home, and notwithstanding the large number of in-mates very little sickness prevailed. The management confidently expect that at the close of the official year, the 30th inst., they will be able to show a decrease in the death-rate of about 15 per cent.

death-rate of about 15 per cent, AN UNFORTUNATE STEAMER. - A serior accident happened to the engine of the steamer City of Toronto as she was startsteamer City of Toronto as she was starting on her second trip to Niagars about three c'clock on Saturday afternoon with several hundred passengers on board, but fortunately nobody was hurt. The steamer had backed out from Yorge street wharf, and after proceeding eastward about three hundred yards the captain rang the alarm bell ordering the engine to start forward. This was done slowly and with the usual caution, and after ten or twelve revolutions of the wheels had been made, the captain of the wheels had been made, the of the wheels had been made, the captain rang the bell for the engineer to "open out," which means to give her more steam. At this instant the captain heard a click, and knowing that something was wrong with the engine he rang the bell to shut off steam. The next moment there was a crash and all was over, except the excitement which had been produced, but the Captain allayed this by assuring the excitement which had been produced, but the Captain allayed this by assuring the passengers that they would all be landed safely. Upon examination it was found that the strap uniting the connecting rod with the crank had broken and that the with the crank had broken and that the other end flying back suddenly, had disconnected the engine, twisted the piston, and knocked the crosshead, which is of cast iron, into pieces, and starting the stays at the top of the beam and bending them out of position. A large piece of the crosshead fell on the deck and made a small hole in it, but did not go through. Altogether the accident was serious so far as the damage to the machinery was concerned, but it might have been much worse if Captain Milloy had not been so prompt in giving orders to shut the steam off, and in assuring the passengers of their safety. He then signalled a tug and sent the passengers ashore, after which the steamer sengers ashore, after which the steamer was towed to Tinning's wharf, where she now lies. The socident, of course, has caused the city to be laid up for the season, but she was about to be laid up in a few days. The damage to her machinery is estimated at, perhaps, \$1,000.

Butter-making can be carried on in hot weather as successfully as in June by using the Gilt-Edge Butter Maker. It reduces the Gilt-Edge Butter Maker. It reduces time of churning one-half. Increases production 6 to 10 per cent. Storekeepers pay 3 to 5 cents a pound extra for butter made with it. Sold by druggists, grocers, and general storekeepers. Send stamp for "Hints to Butter-Makers." Address Butter Improvement Co., Buffalo, N. Y.

OUAQUAGA DAIRY, SUSQUEHANNA VALLEY, N. Y., May, 25th, 1879.
BUTTER IMPROVEMENT CO., Buffalo, N. Y.
GENTLEMEN.—Please accept a sample of BUTTER IMPROVEMENT Co., Buffalo, N.Y.:
GENTLEMEN,—Please accept a sample of butter made from "hay-fed" cows and with the use of your 'Gilt-Edge Butter-Maker, without its use the butter made was almost as white as lard, while with its use (as you will observe from the sample sent you) the butter is of a very beautiful, even gold colour, leaving nothing to be desired in that direction. Several of my neighbour dairy farmers have tried your powder and are loud in its praise. It passes in market as "creamery butter," and is worth from 3 to 5 cents per pound more than dairy butter.

A HORROR IN BOSTON.

A Tenement House Fired While the In mates are Asieep.

Boston, Mass., Sept. 18.—Shortly aft midnight a fire occurred in a three-stor tenement house on Gold street, South Bo r from trying to ying, "I believe the least grain of you. What reatenement house on Gold street, South Bo ton, occupied principally by German nearly all of whom were asleep at the tim The fire broke out in the rear portions the lower story, and made such rapid hea way, that before those in the upper stori could descend, all avenue of escape was coff. The scene was one of the greatest di tress, as the imprisoned victims appear on the roof and at the windows in a va on the roof and at the windows in a vastempt to seek safety. Several we burned to death, and others were badly i jured. Mary Huldreth was burned death; her husband was also badly burne Ferdinand Mayruth jumped from the roof the burning building and was kille. The occupants of the house on the frifloor were an aged couple and Mr. Gilles and wife. On the second floor was a Geman family, consisting of father, mothe and three children, named Piciffer. It the third floor were Ferdinand Merot wife, two children, and George Holdres. The wife and two children were all aslet when the incendiary kindled the from When the fire was discovered by the polic man, flames were breaking out of the fror door, having burned through the stairs at aid I, "that you e, for I had not man, names were breaking out of she indoor, having burned through the stairs at rendered them impassable. The awakene inmates, before the firemen could arriwith a ladder, had either leaped from the windows, gone to the roof, or droppy suffocated. The dead number five, which is the stair of the stairs at the s windows, gone to the roof, or dropps suffocated. The dead number five, whin may be increased to seven or eight. The old couple on the first floor escaped. The Gillespie family escaped, excepting the wife, who might have escaped by walking it feet, but became bewildered as swooned. She was the first person four when the firemen entered. Her recover it hardly possible. The Pfeiffers occupies the second floor. Rose, a niece, we found at a late hour lying in the entry. Mrs. Pfeiffer and two childricants of the upper flow had the least chance. Meroth, as soon he saw the peril, lifted his son Charle aged fourteen, out of the window, allow him to drop forty feet, then instructed him t orgotten Dublin heard of thing. will let me know

A Provincial Health Society has formed in Halifax, as a result, we of the sanitary discussion got up an Antigonish doctor. an Antigonish doctor.

Avoid all strong purgative pills, which is only exhaust the mucous secretions and wear out nature. Peristrature Lorent are just the opposite; they restore the digestion, quicken the liver, and tone up to whole system; thus ouring Dyspers. Pick from stems and wash thoroughly with the bands not into a pound judge would instantly disserted.

the bills of either sex would be a fatal blemish. The head of the duck is dark

and glistening, it is done thoroughly. Pet up in glass or small stone jars, and each jars, and each jars, and each jars, and each jace.

CURRARY JAM.

Pick from stome and wash thoroughly with the hands, put into a preserving fostile and boil fifteen or twenty minute, sirring often and skimming off any scum that may arise; then add sugar in each proportion of three-fourths pound sugar to one pound fruit, or, by measure, one could she were and another one pound fruit, or, by measure, one could be she the proportion of three-fourths pound sugar to one pound fruit, or, by measure, one could be she that the proportion of three-fourths pound sugar to one pound fruit, or, by measure, one could be she that the proportion of the proportion of the set of sugar to one pint mashed fruit; jobil thirty minutes longer, sitring almost one and onthing. We will only remark that when intended for fattening, ducks should have only a trough of water instead on standity. When done, pour in small jars or glasses, and cellers east, or secure it was the she was a standard to the proportion of the pro

oack ought to be a rich greenish black quite up to the tail feathers, the curls in which are a rich dark green. Wings a greyish brown, with distinct purple and white ribbon mark well-developed. The flight-feathers must be grey and brown—any approach to white in them is a fatal disqualification, not to be compensated by any other beauty or merit. Legs a rich orange. Nothing can exceed the beauty of a drake possessing the above colours in perfection. Chairman, W. Hendrie, Hamilton; Jno. White, Milton; J. B. Wiser, Prescott; Dr. Smith, Toronto; Mr. Pringle, Cobourg; Mr. Williams, Toronto; A. Wilson, Davenport; Jas. Mead, Toronto; Messrs. Copland and Duggan, Toronto; Col. Parker, Windsor; Sheriff Mercer, Chatham; Mr. Wells, Aurora; Mr. Carroll, St. Catharines; Dr. Grange, Guelph; Mr. Donaldson, Toronto; W. Dixon, Mr. Donaldson, Toronto; W. Dixon, and J. L.

Mr. Donaldson, Toronto; W. Dixon Galt; Mr. Waddell, Hamilton; and J. L. a drake possessing the above colours in perfection.

"The bill of the duck should not be so long as in the drake, and orange brown as a ground colour, shading off at the edges to yellow, and on the top a distinct splash or mark of a dark colour approaching black, two thirds down from the top; it should there be rounded off, and on no account reach the sides. I may also remark that any approach to slate colour in the bills of either sex would be a fatal Lyon, Toronto.

The meeting adjourned, it being understood that the Committee would be at the call of Dr. Smith.

EDUCATIONAL NOTES.

Stevensville, County of Welland, has just erected a handsome new public school.

Mr. J. W. Graham, formerly teacher in the Lindsay schools, has been promoted to be head master of the Collingwood Public Schools.

The attendance at the St. Catharines public schools during the months of June and July was as follows:—June, average attendance, 1,016; July, 878.

The colly two second class applicants for

The only two second-class applicants for teachers' certificates who were successful in the County of Victoria at the last examination were Mr. Thomas Swift and Mr. Daniel Scully, of the Separate School, Lindsay.

Court Judges decided that the Act was make the fruit well, and proceed as in curmany the fruit well, and proceed as in curmany the blackberry jam is made exactly like

At the University of Edinburgh local examinations this year, 864 candidates appeared; of these 619 were examined in preliminary subjects and 335 in preliminary subjects alone; of the above candidates 482 passed in preliminary subjects, 263 passed for ordinary certificates and 149 passed for honours and senior certificates, 96 obtained 75 per cent of the marks and were awarded prizes.

Further Evidence in Regard to the Merita of Dr. Thomas' Eclectric Oil.

CREEK CENTRE, Warren Co., N.Y., March 25, 1879.

CREEK CENTRE, Warren Co., N.Y.,
March 25, 1879.

Dear Sirs,—I am happy to be able to write to you. I was troubled with Asthma for four years before using your Eclectric Oil; and for many nights after retiring, I had te sit up in bed, my sufferings being intense, while the Cough was so severe that the bed-clothing would be wet and saturated with perspiration. My wife hearing of your Eclectric Oil, sent to Madison Co. N.Y., for a bottle of it, but I had taken so much medicine without benefit, that I had no confidence in drugs, and so for some time it lay without being tried. At last my wife insisted on my using it, and I was persuaded to do so. The first dose relieved me considerably, and I continued taking it in small doses for a few days. I took two bottles in all, which effected a complete and perfect cure, as I have not had any attack now for nearly a year. I have recommended the Eclectric Oil since to many friends who have been benefitted by it in a remarkable degree, and all speak highly of it as a medicine. I can recommend it myself truthfully, as I know of no other medicine that will cure the Asthma but your Eclectric Oil.

EABY-FARMING IN FRANCE.

For some time past (says Galignami) strange rumours have been current in Clichy as to the existence of a sort of "ogress" who was in the habit of taking possession of little children who never appeared again. Inquiries prosecuted in the matter reveal a serious case of baby-farming in its worst aspect. A certain young woman, the "ogress" in question, has been in the habit of accosting young mothers and of offering to take charge of their babies at the rate of 15fr. a month. In this manner she got together nine, who were all kept in one room, and of whom eight have died. In these cases, which are the only ones known at present, every probability points to starvation having been the cause of death.

LONGEVITY IN THE ISLE OF SKYE.

dand and the farmer started on a fair trate at Verviers, before whom he was irrange rumourn have been current in a clicity as to the existence of a sort of "ogress" who was in the habit of fairing possession of little children who sever appeared again. Inquiries presented in the masses in all the Roman Catholic churches and chapital of the seven have an in the habit of accosting young mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of offering to his charge of the mothers and of the mothers and of offering to his charge of the mothers and of offering to mother and of the mothers and of the mothers

The photograph of this surviving relic of a past century has been recently taken, and as she is in very humble circumstances, any profit arising from the sale of it will be devoted to procuring for her such comforts as her extreme old age and declining strength require. Copies of the photograph, 2s 6d each, may be had from Messrs. T. & R. Annan, 153 Sauchiehall street, Glasgow, who have kindly undertaken the sale of them for her benefit.

# PRODUCE Fruit, Provisions, Etc.

CONSIGNMENTS SOLICITED.

THOMAS IRVINE & CO. LIVERPOOL, ENG. Established 1847. Reference—Bank of Liverpool. 388-13

London—Fleating cargoes—Wheat and maize, there is a continental demand; cargoes on passage—wheat, excited; maize, slightly better. Mark Lane—Wheat and maize, in strong demand, and considerable business done; good cargoes No. 2 spring wheat, off the coast, was 47s 64, now 42s 64; do red winter wheat, was 50s to 50s 64, now 55s 64; do mixed American maise, tale quale, was 25s 34, now 25s 6d. London—Fair average Californian wheat, just shipped, was 52s, now 52s 6d; nearly due was 52s, now 52s 6d; and track on Friday and \$1.10 on Tuceday. Spring also has been in demand, but held even more persistently than fall; uninspected sold at \$1.05 on track on Friday and \$1.10 on Tuceday. Spring also has been in demand, but held even more persistently than fall; uninspected sold at \$1.05 nor No. 2, but no sales reported. The only transaction reported all week was a sale of No. 2 spring on Tuceday at \$1.10 f.o.c. The rearriet to day was inactive, and seemed to be the turn easier; fall average mixed American maize, for prompt shipment, was 25s now 35s 6d. Imports into the United Kingdom the past week—Wheat, 390,000 to \$35,000 qrs; maize, 95,000 to 100,000 qrs; flour, and the street to-day 5the spring of the street to-day fall sold at \$1.12 to \$1.13, and spring at \$1.08 to \$1.11. to \$1.15, and spring at \$1.08 to \$2.5, and \$1.12 to \$1.13, and spring at \$1.08 to \$1.11. to \$1.15, and spring at \$1.08 to \$2.5, and \$1.12 to \$1.13, and spring at \$1.08 to \$2.5, and \$1.12 to \$1.13, and spring at \$1.08 to \$2.5, and \$1.12 to \$1.13, and spring at \$1.08 to \$2.5, and \$1.12 to \$1.13, and spring at \$1.08 to \$2.5, and \$1.12 to \$1.13, and spring at \$1.08 to \$2.5, and \$1.12 to \$1.13, and spring

PRODUCE.

The market cannot be said to have been active since our last, but it has been in a state of very great excitement with prices rushing upwards daily, and showing an advance for the week of 15 to 25c on flour, and seven to eight cents on wheat. The advance has been due to continued small offerings here and continued advances outside. An active enquiry has prevailed, and a large quantity of both wheat and flour would have been readily taken had it been offered; but there has been readily taken had it been offered; but there has been really very little of either available, and shat little holders have not felt inclined to sell. Thus inactivity has continued to prevail and will probably remain the rule until outside markets have become settled; but as the States' markets to-day are receding and the advance at home within the last three weeks has been very great we may not have to wait the states and the state of the states are related at the states and the states are related at the states are related process. The supply has been related process and the general run from \$5 to \$0. The states are related process are related process. The supply has been related process are related process are related process. The supply has been related process PRODUCE. been very great we may not have to wait long for quietude. Stocks of grain, but not those of flour, have been increasing since our last and stood on Monday morning as follows:—Apples, \$1 to \$1.25 per barrel; pears unchanged at \$1 per basket; peaches are up to 75c or \$1.00 per basket; plums active at \$1 to \$1.25 per bushel; grapes, \$2 to 4c per lb.

Flour, 200 bbis; tall wheat, 20,837 bushels; spring wheat, 57,687 bushels; cata, 700 bushels; cata, 700 bushels; spring wheat, 57,687 bushels; cata, 700 bushels; cata, 7 spring wheat, 57,687 bushels; cats, 700 bushels barley, 42,658 bushels; peas, 1,672 bushels rye, 1,200; corn, std bushels, against correspondin date last year:—Flour, 350 bbls; fall wheat 17,032 bushels; spring wheat, 12,922 bushels oats, 16,985 bushels; barley, 77,630 bushels; peas, 1,195 bushels; rye, ns2; corn, 400 bushels. Outand 6d on club wheat, of 9d on corn, and of 3d on peas. This continuance of the upward movement seems to have been due in a great measure to the fact that, in consequence of the lateness of the harvest there has been scarcely any home-grown grain on the market; and although the imports alone seem almost equal to the average consumption, still the absence of home supplies cannot but make itself felt. The deliveries of English wheat in the week ending on the 13th inst. amounted to \$4,500 quarters, at 45s per quarter during the same week last year. The imports for the same week were 350,000 to 255, 4000 quarters of wheat and 95,000 to 100,000 barrels of flour, making a total supply equal to from 455, and, quarters of wheat and so,000 to 100,000 barrels of flour, making a total supply equal to from 455,000 to 455,000 quarters of wheat, against a consumption of 411,000 to 420,000 qrs, showing a surplus of about 45,000 qrs. The quantity of wheat and fleur in transit for the United Kingdom, on the 18th Sour 45,000 qrs. The quantity of wheat and flengt in transit for the United Kingdom, on the 18th inst., showed as change on the week, and amounted to 1,575,000 qrs, against 1,773,000 en the 5th inst., and 1,255,000 at the corresponding date last year. The approximate quantity of grain on passage for the United Kingdom for orders, expected to arrive dusting the four weeks from Sept. 4 to Oof. 2, is:-Wheat, \$32,000 qrs, comprising 24,000 qrs-from the Danube and Black Ses; 104,000 from American Atlantic ports; \$0,000 quarters from California, and 154,500 qrs from Chili and Australia, along with 44,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, all from American Atlantic ports; \$0,000 quarters of malze, \$0,000 quar

Is 9d per quarter advance, owing to the reserve of holders consequent on the description of holders consequent on the description of holders consequent on the description of holders consequence of were asked for wheat, but the demand was slack. At Odessa also trade was quiet in consequence of phanced pretensions on the part of heiders; but these wave does not be part of heiders; but these wave does not be part of heiders; but these wave does not be part of heiders; but these wave does not be part of heiders; but the same wave does not be part of heiders.

At Odessa also trade was quiet in consequence of enhanced pretensions on the part of heiders; but these were due chiefly to bad reports of the new crop; it was said that shipments from Odessa during the coming harvest-year would not be more than three-fourths of those in that one just closed. In the States, markets have been decidedly excited all over, and prices rapidly advancing. But this excitement and animation have been largely due to the anxiety of the short interest in October and November options to cover, and to do so they have sold markets and said that the said and saids and said to see the spot and saids and said the said in lots of 500 boxes. Ourrants of medium quality have sold in lots of 500 barrels at 4c. Prunes have been incitive. Quotations are as follows, the outside being for retailers lots. Raisins, layers, \$1.35 to \$1.50; with the said of the short interest in October and November options to cover, and to do so they have sold as saids and said to see the situation would seem to warrant; a leading western authority thinks that the advance cannot long be maintained in face of increasing receipts. The visible supply of grain, comprising the stocks in granary at the principal points of accumulation at lake and saboard ports, and the rail shipments from Western lake and river ports on the 13th inst., and other dates indicated, was as follows:—

1879. 1879. 1879. 1878. 1878.

BUTTER—A steady demand has been maintianed for good shipping qualities but offerings have been frather small; prices have been firm and thending upwards. Sales have been made of poor to medium qualities at from 8 to 9c; of good shipping lots with white thrown out, at from 9½ to 10½c and of selections at from 1½ to 12½c, the latter price being for very choice and decidedly exceptional. The markets seem to have been generally well cleared out, but the enquiry for good qualities has been sustained up to the time we write, and for them the above prices would probably have been paid to-day. Lots for the local market, however choice, do not bring over 12 to 12½c. Street receipts have been small and prices firm at 16 to 18½ for pound rolls and 12 to 18½

ed in round lots.

BACON—Stocks have now run very low, and prices have been running up, with an decreased demand. Cumberland has risen to 7½c for tons and 7½c for cases, and long-clear to 7½ c for. So. Short-rib has been sold during the week at 7½c, but we are not sure that it could be had at this price to-day. Green bellies sold at 7½c for a ton and a half, but smoked and canvassed have been unchanged at 9½ to 10c.

HARS—The active demand of the last few weeks has fallen off; prices remain unchanged at 1½ to 13c for smoked and canvassed, and 10½c for pickled.

LARD—Has been quiet and unchanged at 9c for pails; at 8½c for tinnets, and 8c for tierces in small lots; one trade lot of pails sold at 8½c.

HOGS—There have been rather more offering, but lots; one trade lot of palls sold at \$4c.

Hoss—There have been rather more offering, but all have been wanted, and prices have been firmer at from \$6 to \$6.25 on the street.

Salx—No change in prices since our last. Liverpool in car-lots of coarse to arrive could be had at 70c, and small lots at 75c. Liverpool dairy in unbleached bags at \$1.40 to \$1.25, and in bleached bags at \$1.40 to \$1.45.

Hors—There seems to have been nothing doing, and the prices may be regarded as purely nominal.

DRIED APPLES—Can be had at \$4c, but no enquiry is heard, and this quotation stands for an almost nominal price.

TRADE—Has remained very quiet all over,

BREVES—The market has continued to be largely supplied with the lower grades, but with scarcely any fine cattle offering. Export cattle, however, have not been wanted, as weak prices in England and an advance in ocean freights have rendered shipment unprofitable unless at a heavy decline; prices of this grade may therefore be regarded as nominal. The best cattle in the market have in fact been second-class, consisting of light steers and helifers and heavy oxen and bulls; offerings of them have been quite equal to the demand, and prices have been weak at \$2.25 to \$2.75. Third-class have continued to be abundant and slow of sale at \$2.25 to \$2.75.

SHEEF—The supply has continued to be fully equal to the wants of buyers, more particularly from the fact that advanced rates of ocean freight have checked the demand for shipment. Prices have consequently been weak and show a decline. First-class for shipment, that is wethers averaging 180 lbs and upwards, would not bring over \$4 per cental, or \$5.50 to \$6 each. Second-class have been very slow of sale and easier at \$3.50 to \$3.75.

LAMBS—Receipts have been large, though not CATTLE. very slow of sale and easier at \$3.50 to \$3.75.

LAMBS—Receipts have been large, though not equal to those of the preceding week. Prices have shown very little change on any sort. First-class, dressing not under 40 lbs, have sold fairly well, but as before at \$3 to \$3.40. Second-class have remained slow of sale and weak at \$2.50 to \$2.75. Third-class have been nominal.

Calves—The quietude usual at this season has continued in force since our last; there has been a steady sale for really choice, but any other sort have been without buyers. First-class, dressing from 130 lbs upwards, have found a steady sale at 6 to 7c per lb, or from \$7 to \$9 each. Second-class, dressing from 75 to 110 lbs, have been slow of sale at \$4 to \$6 each. Third-class have not been wanted at any price, and may be set down as unsalable.

sales of job-lots have been lew and small; one lot of the latter of the control o

TREET—ADAMS—At Chatham, on the 15th inst., by the Rev. A. McColl, Mr. Charles A. Terry, of Chatham, to Miss Annie Adams, of Dover.

McLEAN, Seaforth, Secretary, JAMES BIGGINS, Clinton, President F. GRAHAM, Goderich, Auctioneer.

Whitcomb's Remedy ASTHMA,

Rose Celd and Hay Fever. The late Jonas Whitcomb of Boston, visited Europe a few years since for the benefit of his health, which was impaired by frequent attacks of Spasmodic Asthma. While under the treatment of an eminent German physician his asthma disappeared; he procured the recipe which had done so much for him. This remedy has been used in thousands of the worst cases with astonishing and uniform success. It contains no injurious properties whatever. TESTIMONIALS.

St. Louis, Nov. 10, 1877.

Messrs. J. Burnert & Co.: The relief the Jonas Whitcomb's Asthma Remedy afferded me was perfect; I have not had a bad night since taking it, and I have in no case found any relief until your Remedy came to hand. I most cheerfully recommend it te anyone troubled with Hay Fever or Asthma, for it is the only remedy ever used by one troubled with Hay Fever or Asthma, for it is the only remedy ever used by me with any good effects.

Yours truly,

WM. T. MASON,

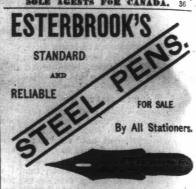

Of Mesers. MASON & GORDON, Lessyers,
