# S.R.C. Recommends 1951-52 Levy be Increased

## U. N. B. Debaters Win Discussion

The U. N. B. debating team consisting of Ruth Nicholson and Bob Sansom won a 2-1 decision over Pine Hill Theological College in Halifax Friday, Feb. 23. It was resolved that "Increased immigration would be beneficial to Canada", with U. N. B. having the negative side. A good sized crowd attended, and many expressed the opinion that it was a very good debate with the teams well-matched and the arguments advanced by both sides interesting and well-developed.

M. MacMahon, the first speaker for the affirmative, declared that Canada needed manpower, especially for the army and for industries. Immigration, he felt, could supply this need.

Bob Sansom stressed the fact that Canada could absorb only 226,000 people annually, and that our natural increase equalled this number. Immigrants, little versed in democracy, became an easy prey for political machines. Skilled workers would be the most desirable immigrants, but by coming to Canada they would weaken the countries of Western Europe by depleting their labour supply, and thus they would indirectly harm Canada.

Dr. MacInnis, the second Pine Hill speaker mentioned the cultural contribution of immigrants, the increased consumer market they created, and the need for more people to occupy our agricultural land.

The second speaker for the negative, Ruth Nicholson, outlined the dangers of allowing immigrants into Canada faster than our facilities can handle them. Our problems of housing and of overcrowded schools and hospitals would be aggravated. With Quebec's attitude as it is, any increase of immigration would hinder the attainment of national unity.

A heated rebuttal followed the main speeches. Pine Hill claimed that they were restrained from using too forcible words by the fact that they were theology students and that there was a woman on the opposing team. U. N. B. was hindered by no such limitation, and the battle of wits in the rebuttal entertained the audience highly. After the decision, the judges, debaters and their friends were entertained at a coffee party.

## Residence Dance Is Big Success

Last Friday evening, March 2, Sigma Lambda Beta Rho held their second formal dance of the year. The Residence Society worked their dance in on a busy week-end but this did not keep the event from being a complete success. Although held within a week or two from two other formal dances, the residence hop was well attended with approximately forty house members and their guests appearing.

The music was provided by the Criterions as usual with several of the latest hit parade numbers being included on the program. Although decorations were sparse, they were well appointed and their simplicity added to the attractiveness of both the pool and the dance floor. The perpetual streamers adorned the dining hall

(Continued on Page Eight)

## Several Motions on Various Sports Come Up for Wide Discussion at Meeting; Same Sport Schedule

At a general meeting of the S. R. C. held last Wednesday, it was recommended that the S. R. C. levy for the year 1951-52 be increased and that no intercollegiate sports be dropped from the roster.

The annual Athletic Banquet is to be held in the Lady Beaverbrook Gymnasium with a nominal fee of fifty cents per person being charged.

An idea was put forward for an A. A. A. dance to be held at the Lord Beaverbrook Hotel following the banquet. This dance is to be supported by the S. R. C. if it materializes.

The original question brought up at the meeting was the proposal that five major intercollegiate sports be retained and the

eight remaining ones be dropped. In an informal survey of the campus opinion on the question, the general feeling seemed to be that all sports be retained, with the possible exception of one of the football teams.

A motion was put forward by Bob Sansom, Freshman S. R. C. Rep., that the student levy be raised two dollars, but was ruled out of order by Ron Stevenson on the grounds that this year's council cannot constitute next year's S. R. C. policy.

It was then moved and carried that the S. R. C. recommend the 1951-52 levy be raised two dollars.

A motion was made by Wally Bridcut, seconded by MacDonald, whereby English Rugby would be abolished for the year 1951-52. A

heated debate on the question ensued; and to curtail lengthy discussion, it was moved by Alder Gerow that a vote be taken on the question — the motion being defeated by a substantial majority.

A motion was made that tennis be dropped from Intercollegiate Sports. This motion was later withdrawn.

It was then moved and carried that no Intercollegiate Sport be removed, and that the recommended levy increase fill the deficit in the S. R. C. budget, making it possible for U. N. B. to carry its present lineup of Intercollegiate Sports without interfering with the Intramural Sports.

## Fourth Annual Red 'n Black Revue will be underway tonight; Hope to surpass former records this year

As the walls of Teachers' College resound to the words to "Let's Go, Chase Your Blues Away," the 4th Annual Red 'N Black Revue will be underway. Many people have worked hard and long so that this year our show will equal or surpass the great mark set by the previous Revues.

A combination of music and acting has been juggled and rejuggled until at last we believe we have acquired the tempo of the show that we desire. Now that the show is ready for performance, there appears the work of an Emcee and this year the position will be held by Dan MacArthur whom many of you will remember as playing the male lead in the Dramatic Society's production, "The Taming of The Shrew".

We won't single out any of the leading players but will leave that for you to do when you sit back and enjoy yourself at this year's Red and Black Revue.

### The Program

A chuck-full program will be presided over this year by Dan MacArthur, an intermediate forest-

er, whose record on stage while at the university shows him more than ready to do the role of Emcee justice.

The ever-popular and leggy girls chorus line is showing more and finer form this year, and will do two numbers, a Charleston, and a military routine. Mrs. Sheila Roberts is directing the girls, and being assisted by Jackie Haines.

No less than nine skits will illustrate the theme of the show, "college life since the '30's" in uproarious style. They deal with the '29 Crash Farmers, Sophomore Court, a Restaurant and the Girls Residence in brilliant burlesque, and routines already show professional polish.

### The Soloists

But threatening to steal the show this year are two new soloist finds and two Revue veterans whose vocals punctuate much of the brisk moving musicals. Under the direction of Walter McGinn, local pianist they are Flo Sears, sultry torch-singer, Ted Cleland, who brings a tenor voice to the show to top anything heard there so far; and Noreen Donahue and Kay Mac-

Callum, whose past performances speak for them.

### Sneak's Preview

Showing his Brunswickan press card to the guard, one of our reporters was allowed to pass through the heavy steel doors to see the dress rehearsal of this year's Red and Black Revue.

Judging from his report we would say that this year's show will be every bit as good as previous ones. We think that the best item is a skit directed by Stan Jobb entitled "A Sophomore Court". The best individual item is that of Flora Jean Sears who sings torch style. Her directors' remarks at rehearsal "shake it but don't break it". Barbara Bell takes over John's spot with a few more verses of "You'll Get Used to it". Our only criticism is on Dan MacArthur's jokes, some one should tell him a few good anecdotes.

The Rhythm Alley group which has been practising adds the final touch to a well-balanced program. Pit-music will again be under the direction of Walter McGinn and Herbie Weber.

## Elections slated for Tuesday; Be sure to get out and VOTE!

The annual elections for the various student offices on the campus will be held next Tuesday March 13th. The polls will be open from 9 a.m. until 5 p.m. and voting will be divided into faculties. The Arts and Science students will vote in the Arts building, Foresters in the Forestry building and Engineers in the Electrical Engineering building.

Friday afternoon there will be platform speeches in the Memorial Hall, provided permission can be secured from Dr. Trueman to cancel lectures for the time required. If permission is granted and the speeches are to take place, further information con-

cerning them will be posted on the bulletin boards.

The platforms of some of the candidates will be found on page three of this issue of the Brunswickian. It is hoped that these will be read and judged wisely. Also, if election speeches are possible on Friday afternoon, each student of this University should take it upon himself to attend and acquaint himself with the views, opinions and promises of the candidates. Remember these are the people who will represent you in the various campus offices. They will have the job of managing the student activities next year. It is the duty of the student body to

see that the best possible candidate is elected to each position. This can be done only through the careful judgment and voting of, not a few students, but every student on the campus. Indifference or laziness on the part of the student body can lead only to a drop in the quality of student administration present on the campus. Now is the time to do your arguing and discussing instead of complaining next year about the policy or the job done by a person whom you selected as your representative. Vote for whoever you honestly think is the best person for the position but be sure to vote and vote wisely.

## New Scholarship Is Established

FREDERICTON, Feb. 26.—The Associated Alumni of the University of New Brunswick has established a new scholarship for U. N. B. students in memory of the late Dr. C. C. Jones, long time chancellor and president of the provincial university. To be called "The Dr. C. C. Jones Memorial Scholarship", the award is valued at \$250 annually. Acceptance of the scholarship by the university senate was announced today by U. N. B. President A. W. Trueman.

Plans call for the new scholarship to be paid annually out of alumni funds until such time as it can be established in perpetuity. Conditions of award, decided upon at the Associated Alumni's winter meeting in Saint John last month, restrict the Jones scholarship to second-year students in any regular course at the university. It will be based upon the record of the student in his first year as follows: first division standing in freshman mathematics, general standing in all other subjects of the freshman year, and the worthiness of the student. The first scholarship will be awarded in October, 1951.

Dr. Jones, who died in 1943, is well-remembered by generations of U. N. B. alumni, who studied under his direction and saw him guide the university from 1906 to 1940, a period of steady growth for the provincial institution. Dr. Jones was the academic head of U. N. B. longer than any other man in the university's 151-year history, having been chancellor from 1906 to 1931, and president from that year until his retirement in 1940. He was also professor of mathematics, giving regular courses.

Cecil Charles Jones first entered the University of New Brunswick as an undergraduate from Boundary Creek, N. B., in 1894. He held the learned degrees of B.A., M.A. and Ph.D. from U. N. B., as well as honorary LL.D.'s from Toronto, Bates and McMaster Universities and honorary D.C.L.'s from Acadia and King's of Halifax. During his long years of service he was a member of numerous government and civic commissions. He served a period as vice-chairman of the Conference of Canadian Universities and was a member of the Royal Colonial Institute and the American Mathematical Society.

(Continued on Page Eight)

## Budget Grant Is Secured

A petition signed by over 150 interested students was effectual in securing a \$76 budget grant to the University Debating Society at a regular meeting of the Students' Representative Council recently. Debate on the budget, which had been twice turned down by the Council was re-opened as the petition was presented by the Society President Fred Allen.

Assent to the budget on the part of the Council was almost unanimous after the petition had been presented. The budget had been turned down on the understanding that interest in debating was not sufficient on the campus to warrant support of the activity.

### Motion Lost

Also coming up for discussion at last week's meeting was a motion to amend the constitution, notice

### Education . . . .

One of the peculiarities of life in the modern world is that we have to set aside a week for promoting the work of every charitable and otherwise, institution imaginable. For the past twelve years Education has been no exception. It appears that Education has become like religion, something that we take out of moth-balls once a year for public exhibition. But Education is everybody's business and should be of paramount concern to us every day of the year.

Why should Education be of such vital importance to us? The most remarkable thing about modern Education is its complete failure to do its job. Never in history has there been such a need for mature, enlightened thought and action as in this age of power and demagogues. Never has there been such a lack of truth and understanding. Yet again, never has Education been so widely disseminated, but never have there been so few educated people. One could add to the list of failures of modern Education. Is it necessary? Surely such a disastrous situation demands everybody's attention.

Perhaps the answer is that there has not been too little education, nay, rather the wrong kind of education. Let's look at the situation here at U. N. B. Every year we graduate foresters, chemists, psychologists, engineers, economists, ad infinitum. But do we graduate educated men and women? People who are able to discern the true from the false? The answer must be an unequivocal no. The great majority of people who leave this university with a degree are specialists in one field of study but are as unlightened as savages in fulfilling the normal responsibilities of educated men and women.

If we are to graduate an intelligent body of citizens; people who are not inarticulate robots, we must revive an interest in the humanities — Literature, Languages, History and Philosophy. At present these studies touch but a small proportion of the college population, and they seem to roll off these people like water off a log. They are practically ignored by all the professional faculties which concentrate their energies on intensely specialized vocational training. It is hardly necessary to say that in their own fields they do excellent works, but vocational training has little to do with preparing students to be intelligent citizens. And are these not the only people who can salvage the tattered remains of our civilization?

There is no more fundamental educational problem facing us today than this — to discover a working compromise between intense, specialized, professional training and a training that aims at producing good citizens. Intelligent citizenship depends on some real acquaintance with the history of men and their institutions. It is almost unrelated to vocational training.

Never did the world have greater need of wisdom in human relations, and it is a need that will not be met by vocational training.

## Letters To The Editor

The Editor,  
 The Brunswickan,  
 Dear Sir,

Although several weeks have slipped by since the publication in the Brunswickan of my article on the S. C. M. I feel myself obliged to publicly correct the rather gross mistakes contained therein.

In the first place, I was writing about the STUDENT CHRISTIAN MOVEMENT — not about a fictitious Student Christian Mission. (The names of the S. C. M. and the University Christian Mission which was recently held on our campus must somehow have got mixed up.) In the second place, I described the S. C. M. as "living and expanding" — not "living and expounding". In the third place, I mentioned Christianity as being based on "clear thought" — not necessarily "clean thought" as the Brunswickan put it. In the fourth place, I said S. C. M.'ers were "seekers" — not "suckers".

Notwithstanding the humour in the last mentioned mistake, I trust that in the future the occurrence of such mistakes will be prevented. This would be greatly appreciated on my part since it would relieve me of the burden of having to write you special letters clearing up the confusion and misconceptions caused by printing mistakes in any article of mine.

Yours truly,  
 STIG HARVOR.

Ed. Note: Since there has been a change in the Editorial Staff, I have no knowledge of the article to which you refer, but I hope this will not occur again.

## Opportunity For Service Great

(By Prof. Love)

Education as a university subject has been in the course of studies at the University of New Brunswick since the late 1920's. In line with the trend in other Canadian provinces and in keeping with the higher standard required for secondary teacher training, courses open to anyone holding a B.A. or B.Sc. degree, leading to the degree of Bachelor of Education which carries with it the New Brunswick High School license which were established in 1950. Eleven students, the B.Ed. class of 1951, are following the studies required for the degree. In addition some thirty undergraduates are taking courses in Education as credits for the degree of B. A. The department employs two full time professors with four teacher counsellors who supervise and instruct in practice teaching. Courses in Psychology and a course in Physical Education are provided by the departments concerned.

The work of the department of education is closely related to the work of the Summer Session which is conducted on the campus. Although the Summer Session is primarily for teachers, many students take advantage of the programme offered by taking extra courses and by clearing supplements. The Teachers' College Summer Session is conducted with the University Summer Session and in 1950 over five hundred teachers are using the Summer Sessions to obtain the Masters' degree and four are now working under the University Graduate School on these involving investigation of important educational problems. Over seventy-five others are taking the extension courses in Saint John pursuing courses for the B.A. or B.Ed. degrees.

Opportunities of employment for teachers with fairly good pay are plentiful. There is a deficiency of over seven hundred qualified teachers in New Brunswick this year. Salary scales in administrative and teaching positions go up to over five thousand per year. Those who feel that they might like to teach should investigate the possibilities. There is no profession in which the need is more pressing and the opportunity for service greater.

## Figures Don't Lie

It has long been assumed by the Universities and leading educators that matriculation examinations are quite reliable as a measurement of a student's ability to succeed in college as well as a measurement of that student's knowledge. Others, however have claimed that different methods could be found with equal or greater validity in judging whether or not a student would have the necessary ability to pass successfully through college.

With these points in mind, the Education class in statistics recently conducted an investigation into the matter. The project was divided into four groups, each to find the correlation between two different factors.

At this point it is necessary to give an explanation of the data used in the survey. The marks of the last three years of the graduating classes of 1949 and 1950 at U. N. B. were averaged and tabulated. Also listed were: 1. the average that these same students made in their junior matriculation exams, (2) the average of the marks they made in English Literature, English Language, Algebra and Geometry from their matriculation results (3) and finally the results from the Thurston Aptitude Test which was given at the beginning of the Freshman year. It is also necessary to state that in obtaining the correlations the Pearson Product Method was used.

The first of the above mentioned groups was to find the correla-

tion between the average attained by a student on matriculation and the average mark made by the student during his sophomore junior and senior years.

The second group had the job of finding the correlation between the average marks for English and math combined on the matriculation and the average of the last three years at U. N. B.

The third group found the correlation between the scores made by the students on their Thurston Aptitude Tests and their averages for the last three years at U. N. B.

The fourth group found the correlation as the third group between the Thurston Aptitude Test scores and the average mark of the last three years but with this difference; they found the correlation of the veterans as one group and that of the non veterans as another. These two correlations were to be compared to the existing differences if any were to be noted.

The results from the project showed that the correlation between matriculation average and the college average was plus .37. That of college average and the English and the math average (taken together) was plus .44, while that of the college average and math and English taken separately was plus .34 and plus .29 respectively. The correlation between the Thurston Aptitude Test and the college average was plus .10. The final correlation between the Thurston Aptitude Test and the college average for veterans was plus .075 and for non veterans plus .09. In addition the last group found that the percent-

## STUDENT

Fellow Students:

The policy of the government by student not by the platform date who is succeeding elections. I therefore, to set what I shall or elected to the point of the A. A. in that position, mined by the will on this campus and personal prejudice.

There are, however, principles which I consider the proper function of A. A. They are:

(1) proper support of the sports teams.

(2) co-operation of A. A. and the Student Department.

Every student can rest secure that, if I am elected best to carry out student body. My experience as a member of A. A. should be a valuable in serving you, the manner which we can win and comm.

In closing, I wish to state the fact that the student should be the one who receives the full support. This support properly realized will vote in the coming election.

Thank you,  
 J.C.  
 If I am elected President of the Student Body, I will do my best to improve the student body and the support of the students on all Varsity and where the student interest.

## STUDENTS' PLATFORMS OUTLINED

Fellow Students:

The policy of the A. A. A. is governed by student opinion and not by the platform of any candidate who is successful in the coming elections. I find it difficult, therefore, to set down a list of what I shall or shall not do if elected to the position of President of the A. A. A. My actions, in that position, would be determined by the will of the students on this campus and not by my own personal prejudices.

There are, however, a few principles which I consider vital to the proper functioning of the A. A. A. They are as follows:

(1) proper support of all Intramural sports.

(2) co-operation between the A. A. A. and the S. R. C. in all respects and in particular with regard to the support of Varsity teams.

(3) efficient contact between the A. A. A. and the Physical Education Department.

Every student on the campus can rest secure in the knowledge that, if I am elected, I shall do my best to carry out the will of the student body. My three years experience as a member of the A. A. A. should be a valuable aid to me in serving you, the students, in a manner which would stress efficiency and common sense.

In closing, I wish to emphasize the fact that the A. A. A. President should be the candidate who receives the fullest student support. This support can only be properly realized if ALL students vote in the coming elections.

Thank you,

JOHN C. CURRIE.

If I am elected to the position of President of the A. A. A. I will do my best to keep up, and improve the student participation and the support of athletics by the students on this campus, in all Varsity and Intramural sports where the students show keen interest.

At the present time there is talk of cutting the number of Varsity sports at U. N. B. I am firmly against this unless there is a decided drop in student participation and interest among the students in certain sports. As it stands now there are some sports on the campus not receiving full support. If sufficient interest cannot be shown to justify financial support from the S. R. C. I say drop that sport.

However if all sports do show sufficient interest as they have for the past three or four years I think that the levee should be raised so that they can be maintained. Students at this University pay one of the smallest levees in Canada and even then we get many things free that they would be charged for in other universities. A student pays his levee with his fees. He never sees it so a small increase, as far as I am concerned, would not hurt his or her pocketbook. Not only could athletics be kept at their present standards but other activities would be able to receive more financial support from the S. R. C.

Being an Upper Canadian I am naturally in favor of a game that I have known all my life, Canadian Football. However I will support English Rugby all the way because I want to support the sports that the students want to play and see played.

In closing I would like to remind you that athletics play an important part of a student's college life. I will do all in my power to see that the average student receives support in the sports that they want on this campus.

S. D. VALENTINE.

Intermediate Civil Engineer.

Although never a member of the S. R. C., I have followed with keen interest the activities of the body during my stay at U. N. B. I believe myself capable of filling the position of Vice-president and if elected will perform my duties to

the utmost of my ability in the sober hope that I may live up to the example set by the predecessors in the office.

I have read the constitution of the S. R. C. and noted its contents, especially the duties of the Vice-president. My first function would be to organize the freshman class and, with the co-operation of the President of the sophomore class and his associates, direct the initiation. It is my contention that the initiation should be a more meaningful affair. Since the prospects are for an unusually small freshman class next year, I think that they should be inducted with the greatest of vigour with a view to them forming the nucleus of a rejuvenated "school spirit". If these are properly carried off, the resulting spirit should revive the interest in school activities which seems to have been sadly lacking on this campus of late.

By virtue of his office the V. P. chairs the applications committee and is a member of the management board of the "Brunswickan". These duties I would execute with the utmost of diligence. Since I have been associate editor of the "Brunswickan" and have had some experience in newspaper work, I would take a particularly keen interest in the latter office.

If called upon to chair the meetings of the Council in the absence of the President, I would feel qualified to do so.

Lastly, as a member of the S. R. C. I should undertake to treat my duty as representative as a trust. I would conduct myself in meetings always with a view to student sentiment, in an earnest attempt to represent them properly. I would avoid hasty decisions and face all discussions with an open mind.

TOM DRUMMIE.

Economics Student

The position of the president of the S. R. C. is primarily that of an impartial chairman. Therefore he must not be a policy maker. He has no decisions to make since it is not his position to make decisions. These must be made solely by the council. He must, however, oversee discussion at meetings, direct it and keep it in the proper channels and in this manner encourage the council to act in an efficient manner.

Above all, the president, must insist that each and every item of the agenda is given fair consideration. This is for the best interests of the students for under this condition no particular body of students can feel neglected since its particular problem will be given equal consideration with any other.

The president must study and understand the problems that the council confronts so that he may introduce them properly. He must ascertain that all the representatives become fully aware of the problem at hand.

Mediation is also one of the roles of the president. He must be ready at all times to meet and hear everyone. Part of his role consists in meeting presidents as well as students.

## John Fisher To Visit Campus

The U. N. B. Forestry Association takes pleasure in announcing that, through a stroke of good fortune and the enterprise of Garry Hewitt a freshman forester, Mr. John Fisher will visit the campus on Friday, March 13th.

Mr. Fisher, who is on a speaking tour of the Maritimes, will be in Fredericton on that date to address the Canadian Forestry Association at a luncheon meeting. Despite his busy schedule he has kindly agreed to give a talk in the Memorial Hall at 4.30 p.m.

A cordial invitation is extended to all persons on the campus to come and hear Canada's famous wandering reporter.

## Visiting Speaker Addresses Students

FREDERICTON.—Dr. James S. Thomson, dean of divinity at McGill University, Montreal, was the latest in a series of speakers to address the University of New Brunswick chapter of the Chemical Institute of Canada. Dr. Thomson arrived in Fredericton Friday, March 2, and delivered his talk in the mathematics lecture room of the Forestry and Geology Building that evening.

Dr. Thomson is touring Maritime chapters under the sponsorship of the Chemical Institute of Canada. He spoke to local members on the subject "The Scientific Revolution". The visiting speaker is well-known as a student of theology and philosophy and is a former president of the University of Saskatchewan.

It is with these thoughts in mind that I offer myself for the presidency of the S. R. C. If elected I will attempt to carry out the preceding to the ultimate best of my ability, impartialness, efficiency, fairness, and diplomacy shall be foremost in my mind at all times should I be elected. On this basis I solicit your vote for president in the S. R. C. elections next Friday.

(Sgd.) J. RAYMOND ROY.

The policy of the A. A. A. has been laid down by the S. R. C. for the year 1951-52. This group has decided to keep all sports on the Campus. Therefore, I intend to keep a close liaison between the A. A. A. and the S. R. C.

On intramural sports, I am very much in favour of increased subsidization. This will be possible if there is an increase in the Students Levy. I am also in favor of even more participation in the field of intramural sports.

As Vice-President of the A. A. A. this year, I received valuable instruction in the management of the Association, both financially and administratively.

The principles that I have set down for myself will require hard work and I am willing to work hard for the advancement of athletics on this campus.

WALTER R. FLEET, JR.

During the past year, the S. R. C. has been faced with many varied contentious issues. The outlook for next year promises much of the same. Student enjoyment will not drop appreciably and finances promise to be the greatest determining factor in the policy governing student activities.

Without doubt, the Students' Council will face a stormy year. Several questions still face the Council from the past. The football problem still exists.

With such situations in store for the year, it is absolutely necessary that the presiding officer of the Council maintain an impartial attitude at all times. It is on this main promise that I solicit your votes. The Students' Representative Council was formed with the idea of having responsible student government over student affairs. This must be a guiding principle governing the behaviour of the chairman of the Council.

I seek your patronage on the understanding that the Council will be continually guided with the best interests of the students in mind. Protection of minority rights and respect of the majority will be maintained.

DONALD S. McPHAIL.

## Prof. Scheult Guest Speaker

Prof. Louis R. Scheult was the guest speaker at the regular fortnightly meeting of the Forestry Association last Tuesday evening, February 27th. This was the first occasion that the Forestry Association had had the opportunity to hear Prof. Scheult, who is lecturing to the post-graduate foresters in Logging. He held the attention of all present by the interesting and whimsical manner in which he presented some of the basic problems confronting the logging industry today. It is hoped that next year we shall have the good fortune to hear him address us again.

Prior to Prof. Scheult's talk, a somewhat lengthy business session was conducted by President Rorie MacLeod. First matter on the agenda was the report by the Furnishings Committee. The idea of trying to secure some comfortable furnishings, such as armchairs, chesterfields, etc., for the Reading Room was given the green light by Dean Gibson. It was moved that the above committee write various pulp and paper companies for donations and if that brought little or no response, they should contact forestry graduates to see if they could help us start this ambitious project.

Don McAuley reported that he had seen Mr. Blair with regard to assisting the Boy Scouts in obtaining their Forestry Proficiency Badges. The idea was apparently welcomed by Mr. Blair, who will give us more details at a later date. Members interested in lending a hand are requested to contact Don.

A reminder, that summer employment forms should be completed and returned to the Dean's office, was made by President MacLeod.

Amendments to the Association's Constitution, also the election of officers for 1951-52 are on the agenda for the next meeting. Following this, a Forestry Quiz programme will be conducted with Johnny Lloyd as M.C. Coffee and doughnuts will be served at the conclusion of the meeting.

Father: "What was the most difficult thing you learnt to do while you were at U.N.B.?"  
Frosh Engineer: "Oh, I had a pretty tough time learning how to open beer bottles with a quarter."

Cow — a creature with four hanger downers, four stander uppers, two hookers, and a switcher.

### THE DEFENCE RESEARCH BOARD REQUIRES ENGINEERS

The Defence Research Board requires graduate Engineers, for full-time employment in the following specialized fields:—

**Electrical Engineers** — Five positions — for Laboratories at Halifax, N. S., Valcartier, P. Q., and Ottawa, Ont.

**Mechanical Engineers** — Ten positions — for Laboratories at Valcartier, P. Q., Halifax, N. S., and Suffield, Alta.

**Chemical Engineers** — Four positions — for Laboratories at Halifax, N. S., and Valcartier, P. Q.

**Metallurgical Engineers** — Two positions — for the Board's Laboratory at Halifax, N. S.

The initial salaries for applicants with Bachelor Degrees will not be lower than \$2,760 per annum. Allowances will be made for applicants having experience and additional academic qualifications.

# U.N.B. Retains N.B. Intercollegiate Hoop Crown

## Decisive Win Over Mt. A.

For the third successive year the U. N. B. senior varsity basketballers walked off with N. B. Intercollegiate Basketball Championship. After a close one point win over Mount Allison University at Sackville the Hillmen severely thrashed the Garnet and Gold at the Lady Beaverbrook Gym a week ago last Saturday. U. N. B. won the local game 54-34 while winning the home and home series by a score of 108-87.

Despite a rather mediocre season varsity proved that they had the goods when the heat was on. After overcoming the first quarter jitters the Hillmen settled down to play perhaps their best game of the year. Coaching duties for this game were taken over by Stan Thomas as Ted Owens had come down with the flu.

The star of the game as well as high scorer was Sophomore John Glass. Not only did he display brilliant shooting from the floor, scoring five out of seven shots, but he held the whole team together with his sensational floor play. The other contributing factors to the U. N. B. victory were Jerry Boulton whose sensational corner set shots netted him 14 points, to tie for high scoring honours with Glass, and Bob Smith who accounted for 10 points.

On the whole the defensive rebounding of both teams was very good with Hanusiak and Glass providing a stone wall defence which left the Garnet and Gold with little chance of scoring on rebounds. However both Smith and Hanusiak proved very dangerous under the Mt. A. basket and frequently bested the Mt. A. guards to score on rebounds.

The scoring punch for the losers was Freshman Harry Baxter who played a very cool and heady game to net 10 points. He was tie for high scorer with Ian Stohart whose accurate shooting from outside also accounted for 10 points.

At the outset the visitors quickly shattered the U. N. B. one point margin as they drew away from the Red and Black by three and four points at times in the first quarter. However the Hillmen settled down to lead at the end of the first half by a 24-19 count.

After that the smooth working zone defence of the Red and Black stopped Mt. A. effectively, forcing them to shoot frequently from the outside.

The only injury of the game was suffered by Baxter of the Garnet and Gold squad when he crashed into the wall late in the third quarter injuring his wrist.

U. N. B.'s victory was chalked up in spite of the absence of George Buchan who was out with the flu.

Mt. A.'s foul shooting was extremely poor as they connected only twice in eleven attempts while the Red and Black hit eleven times in nineteen attempts.

Line-ups:  
U. N. B.—Boulton 14, Hanusiak 7, Miller 8, Glass 14, Shepard, Stairs, Garland, Little 2.

Mt. A.—Baxter 10, Goss 2, Stohart 10, Mills 3, Tuttle, Rawlins 2, Nickelson, Ward 7, McConnel, Hargreaves.

There was a young lady named Lynne,  
Who thought that to neck was a sin,  
But when she got tight,  
It seemed quite all right,  
So all the boys filled her with gin.

...

"Mary," said the lady of the house, "Did I hear you kiss someone in the kitchen?"

"Well, ma'am the junk man said he came over for a little oven."

## Varsity Whips Army 58-34

U. N. B. hoop teams split over the week end as the U. N. B. senior varsity whipped the Fredericton Army by a decisive 58-34 count while the U. N. B. junior varsity had the tough luck to lose to the Newcastle Rockets by a one point margin, 46-45.

The main game between the Army and U. N. B. senior varsity was an easy win for the Red and Black. Varsity went out in front from the opening whistle and never was in any serious danger. The winners led at half time by a 42-14 count. Play picked up somewhat in the third quarter in an otherwise listless game. The final score was 58-34, favour of Varsity.

Hanusiak led the winners with 15 points while the high man for U. N. B. juniors was a much closer affair. The winners got away to a good start and proceeded to go out in front of U. N. B. by a wide margin. In the first half the shooting of the U. N. B. juniors was very poor while Newcastle was hitting for a good percentage of their shots. At the half the Rockets were out in front by a 20-12 margin. In the third and final quarters both teams were neck and neck with U. N. B. in particular stepping up their shooting. However, the juniors just didn't seem to have Lady Luck on their side and lost by a slim one point margin 46-45.

Fong led the Rockets with 16 points as well as playing a very good all-round game. For the losers Clark was high man with 19 points while Patterson and Garland followed with 8 counters each.

Line-ups, U. N. B. vs. Army.  
U. N. B.—Boulton 9, Buchan 2, Garland, Stairs 5, Hanusiak 15, Smith 6, Shepard, Little 4, Glass 9, Miller 8.

Fredericton Army: Bowlin 4, Ganong 6, Spenser 3, Gough 2, McCarthy 10, Harvey 3, Crockett 4, Gorman 2.

U. N. B. vs Newcastle Rockets:  
U. N. B.—Simpson 6, Clark 19, Garland 8, Shepard 4, MacKenzie, Patterson 8, Whitehead.

Newcastle — MacWilliams 14, Cassidy 2, Ronan, Fong 16, Nevins 10, Mersereau, Chambers 4.

This coming Saturday U. N. B. will meet the Nova Scotia winner, as yet undecided, at the gym in the first game of a home and home, total point series for the Maritime Intercollegiate basketball crown. St. Francis Xavier are current holders of that title.

## Combines Win Mixed League

The mixed bowling league has wound up for the 1950-51 season with the Combines coming out on top. The results of the spring term's mixed bowling are as follows: Foresters 19 points; Gutter-snipes 11; Combines 9; Beds 8; Science 4 and Arts 1. The first four teams qualified for the spring term playoffs.

In the semi-finals of the spring term playoffs the Foresters met the Bed, defeating them 4835 to 4586 while the Combines won over the Gutter-snipes 4500-4375.

In the final round of the spring term the Combines made themselves the spring term champions by winning over the Foresters 4532-4494.

The Combines then went on to meet the fall term winners Science and defeated them 4933-4612 to become 1950-51 Intramural Mixed Bowling Champions.

The members of the championship team are: Capt. Audrey Baird, Shirley MacLeod, Marjorie Forbes, Silvia Brown, Turney Manzer, Dave York, Henri LeBlanc and George Williamson.

## Swim Team to Meet at Acadia

Once more the Red and Black swim team will be defending the Maritime Intercollegiate Swim championship. Having won the championship three out of the last four years U. N. B. has high hopes of making another repeat performance this year.

The 1951 meet will be held at Acadia University in Wolfville, N. S. The colleges who will be out to wrest the title from the Hillmen are Dalhousie and Acadia. The meet itself will take place on the 8th of this month and the Varsity squad will leave here on the 7th with the first stop at Saint John. The boys will make the rest of the journey by boat.

This year's team is relatively inexperienced with Don Bell and Don Biggs the only remaining members of last year's squad. Other members of the team are Freshmen Don Fowler, Don Gregg and Wendal Halsall along with Bob Coke, Bob MacLean and manager Don Macauley.

In regard to swimming U. N. B. has more than established a name for itself. Not only did the Hillmen win the Maritime Intercollegiate Championship last year but they established new records in all events but one during the 1949-50 MIAU swim meet. In addition Don Bell holds the Canadian Intercollegiate 100 yard free style record. Finally U.N.B. made second best time in three other swimming events in Canadian Intercollegiate Swimming.

It is expected that George Noble, Tony Taylor and Laurie Hunter members of last year's team may be on hand to welcome the boys when they arrive in Saint John.

## Bowling Team Places Seventh

U. N. B. has placed seventh in the Canadian Intersvarsity Telegraphic Bowling Meet for women. Jeanette Webb of U. N. B. placed eighth in high singles scores standing. The meet was organized by the University of Alberta and was sponsored by the Women's Athletic Association of the University of Alberta. The final results of the meet are: Team scores, McMaster University, 2782; University of Manitoba, 2688; University of Alberta, 2688; University of Saskatchewan, 2669; University of Western Ontario, 2601; Brandon College, 2412; University of New Brunswick, 2303; Macdonald Institute, 2156 and St. Patrick's College, 1975. Singles scores, University of Saskatchewan (Margaret Campbell) 637; University of Alberta (Lucille Catlow) 617; McMaster University (Lillian Szuminski) 616; Macdonald Institute (Nancy Dickinson) 605; University of Western Ontario (Fairley Dadd) 602; Brandon College (Carol Eyferd) 569; University of New Brunswick (Janette Webb) 554; St. Patrick's College (Lona Charbonneau) 505.

Each college held its own meet and then telegraphed the results to the University of Alberta who declared a winner. Each team was made up of five players who bowled three games. Fifteen, ten and five points were given for first, second and third places respectively for team scores while five, three and one points were given for first, second and third places respectively for the individual singles score. The points awarded to the individual competitors for singles score were added to the points given for the total team score. In the case of a tie the points were evenly divided. Following this scoring scheme the final results and standings were: First place, McMaster (Continued on Page Eight)

## Intramural Playoffs On

The first round of the spring term intramural hockey playoffs have been completed with the Intermediate Foresters, the Silver Streaks, Freshman Cardinals and Freshman Dodgers coming out on top.

In these first playoff games the winners really won and the losers really lost. The Intermediate Foresters left no doubt as to their superiority over the Soph Combines whom they whipped by a convincing 11-1 count. The Foresters scored almost at will in this game with Fanton and Bird getting hat tricks. Sewell, Wintle, Lloyd, Bushell and MacKinnon all came in for one goal each. The lone counter for the Combines was notched by Clark. In a second game the Silver Streaks whitewashed the second and fourth year Engineers 13-4. The Streaks had the game completely in hand at all times and didn't leave the Engineers very much in the picture. High scorer in the game was McCaffert of the Streaks who accounted for five goals. Duke added three more for the Streaks while Craig and McDougal each got two. The other goal for the winners was scored by Hystop. For the Engineers Dec, Christian, Risteen and Avery each scored once. The game had one bad aspect for the Streaks as Murray McDougal, one of their better players suffered a very bad eye injury.

The other two games were both won by shutout scores. In one contest the Freshman Cardinals defeated the Residence by a 9-0 count. Shorty MacDonald was the mainstay for the Frosh as he chalked up five goals. The other goals for the winners were notched by Boder, Bunting, Lyons and Stewart. The final game was won by a 4-0 count by the Freshman Dodgers over the Alexander Combines, winners of the B section league. MacFarlane led the winners with two goals while the other two were scored by Richard and Gregg.

In the semi-finals of the playoffs, played a week ago Monday at the arena the Silver Streaks met the Freshman Dodgers while the Intermediate Foresters played the Freshman Cardinals. In the consolation semi-finals the Residence met the Soph. Combines and the Alex Ghosts played the second and fourth year Engineers.

The semi-final games were sweeping victories for the Streaks and the Foresters. The Silver Streaks racked up a 7-1 victory over the Dodgers. Titus and McAffrey scored two goals each for the winners while McDougal, Duke and Shaw each racked up one goal. The lone score for the losers was notched by Gregg on an assist from MacNamara. In the other semi-final game the Intermediate Foresters shut out the Cardinals by an 8-0 count. Bushell was the scoring ace for the winners as he beat the Cardinal goalie four times. Sewell added two more goals while Bird and Wintle each notched one.

In the consolation play the Residence defeated the Soph. Combines by default while the Alexander Ghosts edged the second and fourth year Engineers by a 1-0 count. Mott scored the sole goal on an assist from Campbell.

The spring term finals featuring the Streaks and the Foresters were played last Monday as well as the consolation final between the Residence and the Alexander Ghosts. If the Foresters beat the Streaks they will be the winners for the year because of their win in the fall term playoffs. If the Streaks win, then a final game between them and the Foresters will be needed to decide the year's winner. If the Streaks force another game it will be played next Monday.

# Varsity Pucksters Bow Out of N.B.-P.E.I. Finals

## St. Thomas win 13-7 on Round; Kelly Netminder in Third Period

Last Friday night at the newly opened Sinclair Rink in Newcastle, the U. N. B. Senior Varsity hockey squad absorbed an 8-1 drubbing at the hands of a faster and smoother working St. Thomas University team in the second game of a two game, total-goal series for the N. B.-P. E. I. Intercollegiate Hockey Championship. By virtue of the win, the Green and Gold take the round 13-7 after losing to U. N. B. 6-5 in Fredericton the previous week. St. Thomas now advance to the Maritime finals against the Nova Scotia winner as yet undecided.

Play was fast and furious with St. Thomas holding a wide edge in territorial play throughout the till. Only four penalties were called by referees Stewart and MacLean, three to Varsity. In the first period Ron McDevitt traded punches with George Kennedy in the St. Thomas end. Both were given five minute major penalties for fighting. Apart from this the play was very close as the teams played wide open hockey all the way.

The Green and Gold opened the scoring when the game was five minutes old as Dick Mockler picked up a Mel Barry pass in the center ice zone and skated in alone to beat MacLellan. The St. Thomas squad added three more counters before the period ended without a reply from the Red and Black.

Each team scored once in the second stanza in which U. N. B. were outshot 15-4. Pat Barry of the Green and Gold scored the prettiest goal of the night when he picked up the puck behind his own cage and skated end to end to connect on a hard shot from the left wing boards. Tim Kenny scored Varsity's only goal late in the period as he drove a 40 footer past Barma in the St. Thomas twines after taking a pass from aggressive Art Lorimer.

Unable to continue after the second period because of illness Clyde MacLellan of U. N. B. was replaced in goal by Irish-born

Terry Kelly. MacLellan had been suffering for some time from a touch of pleurisy and was now finding it difficult to breathe. However, Kelly took over in spectacular fashion making sixteen stops and allowing but three goals to get by. Up front little Ron Ketch was the sparkplug for the Red and Black.

Armand Despres led the St. Thomas attack with three goals and two assists while Mel Barry picked up one marker and had four assists. Dick Mockler scored two while single counters were made by Gil Cyr and Pat Barry.

Early in the first period Jack Thompson had his collar bone broken when checked into the boards at centre ice. He could not be accommodated in hospital at Newcastle and was forced to return to Fredericton with the team after the game.

Lineups:  
U. N. B., goal, MacLellan, Kelly (third period); defence, Wagar, Ouellette; centre, Ketch; wings, Kennedy, Lorimer; subs, Colquhoun, Hallet, Thompson, Elliott, Kenny, MacDonald, Lyons, Bliss.

St. Thomas, goal, Barma; defence, P. Barry, McDevitt; centre, M. Barry; wings, Despres, Mockler; subs, Cyr, Noel, Charest, Clement, Foran, Kane, Levesque Cullinan.

Officials, Stewart and McLean. First period—1, St. Thomas, Mockler (M. Barry) 9.05; 2, St. Thomas, Despres, (M. Barry) 10.50; 3, St. Thomas, Cyr, (Mockler, M. Barry) 11.05; 4, St. Thomas, Despres (P. Barry) 18.00. Penalties, McDevitt (major), Kennedy (major).

Second period—5, St. Thomas, P. Barry 1.40; 6, U. N. B., Kenney (Lorimer) 7.35. Penalty, Ouellette.

Third period—7, St. Thomas, Despres 10.05; 8, St. Thomas, Mockler (M. Barry, Despres) 16.10; 9, St. Thomas, M. Barry (Despres, Noel), 19.15. Penalty, Ketch.

## Intramural Playoffs Underway

Playoff time has rolled around in intramural basketball. This year the teams in the A section will play off for the championship while the B section teams will play for the consolation. The winning B section team will have the right to challenge the A section winner. The first playoff games were played last Wednesday. In the first game in the A section the Kimies beat out the Foresters 53-47 in a rough, rugged contest. The winners were led by Will Cockburn and Fred Butland who scored 18 and 17 points respectively. Bob McLaggan was top man for the Foresters with 17 counters. In the second A section game the Residence B team swamped the Residence A squad 64-25. Billy Ayer and Ben Baldwin were top men for the winners with 15 points each. Jack Cassidy topped the losers with 8. In the final A section contest the Faculty edged the Arts section team 42-38. Denny Valenz paced the Faculty to victory with 16 points while Jack Patterson was top man for the losers with 14 counters.

In the B section the Tarfu whipped the Jr. Engineers 39-37 in the closest game of the evening. Cayford led the winners with 13 points while Rogers was high man for the Engineers with 12 counters. In the second game the Frosh won from the Newman Club by default while the game between the Mooseheads and the Alumni was postponed until Tuesday.

The semi-finals of the playoffs will continue this evening.

## Voc. Wins High School Cage Tourney

Once again the Lady Beaverbrook Gymnasium was the scene of the annual N. B. interscholastic basketball championships. Last Saturday afternoon, playing before a capacity crowd the Saint John Vocational School downed the Saint John High School 39-31 to win for the first time in its history the coveted N. B. interscholastic basketball championship trophy which was donated by U. N. B. St. John High, coached by a former U. N. B. great, Dave Stohart was a slight favorite but the inspired Voc Cagers were just a little too much for them on this particular occasion.

Lawrence F. Hashey presented the trophies at the conclusion of the tournament. The winners in the three day spectacle were: N. B. interscholastic champs, Saint John Vocational School; runners-

## U.N.B. Team Places Third In Badminton Tourney

The University of New Brunswick finished in third spot in the 1951 Maritime Intercollegiate Badminton Meet which was held at the Lady Beaverbrook Gymnasium on 22nd of February. In addition to the Maritime meet an invitation meet was also held. The winner of the tournament, which was conducted on a round robin basis was Dalhousie University who had 23 points. They were closely followed by Mt. A. who had 22 points. U. N. B. come up with a third spot having a total of 11 points while Acadia finished in fourth place with 9 points.

Paddy Ryan represented U. N. B. in the men's singles play while Bob Merritt and Alan Mitchell were the U. N. B. men's doubles team. In the women's singles play Joan Goodfellow represented the Red and Black while Mardi Ryan and Jackie Vey made up the U. N. B. women's double team. U. N. B. had the misfortune to lose their men's single entry at the last moment as Jim Strickland was forced to withdraw from the meet due to the flu.

The lone Red and Black win was chalked up by Bob Merritt and Alan Mitchell who came up with the Maritime Intercollegiate

up, Saint John High School; consolation winners, Mt. Allison Academy; winners of the foul shooting contest, Fredericton High School, the foul shooting itself being won by Dick Whalen who scored 13 out of a possible 15; members of the all-star team, Bruce Martin, Saint John High School, Bill Nolan, St. John High, Ralph McLennan, St. John Voc, Bill Harrison, St. John Voc and Arthur Melvin, St. John Voc.

Doubles crown. Merritt and Mitchell defeated Dalhousie, Mt. A. and Acadia in the doubles play.

The other intercollegiate winners were: Ladies' singles, Joanne Beaubien, Dal; Men's singles, Vic Burstall, Dal; women's doubles Phyllis MacGowan and Kathy Skinner, Mt. A.

In addition to the intercollegiate meet an invitation meet was also played. The winners of the invitation meet are: Men's singles, Vic Burstall, Dal; women's singles, Joanne Beaubien, Dal; men's doubles, Bob Mills and John Keating, Mt. A.; mixed doubles, Vic Burstall and Joanne Beaubien.

## Residence 1 Win League

League play in the intramural water polo league has finally terminated with the playoffs slated to get underway next Saturday at the pool.

The winner of the league play was the Residence 1 team who edged out their nearest rivals, the Foresters by 5 points.

The final standings are as follows:

Residence 1	31 points
Foresters	26 points
Residence 2	17 points
Consmen	14 points
Mooseheads	10 points
Aqua Pura	3 points

In the semi-finals of the playoffs the Residence 1 team will meet the Consmen while the Foresters will take on the Residence 2 squad. The winners of these two games will meet the following Saturday afternoon to decide the year's championship.

### Action May Be Taken At U. B. C.

VANCOUVER, B. C. — (CUP) — The engineers of the University of British Columbia are on the rampage again. Forcibly taking over the offices of the UBC publication, Ubysey, the engineers daringly attempted to publish an unauthorized engineers' edition of the Ubysey last week.

The next step of the engineers who claimed to have the support of the Engineers Undergraduate Society, was to attempt to kidnap all Ubysey staff members, but they succeeded in capturing only one Monday editor Ann Langbein. Then an aroused Ubysey staff

under Editor-in-chief Ray Frost produced a one-page "extra" exposing the engineers' tactics.

The next move was up to the Ubysey staff. John MacKinnon, Alma Mater Society treasurer, sent a letter to the printer, relinquishing financial responsibility for the engineers' issue. In spite of this the engineers, determining to publish the paper even if it meant footing the bill themselves, continued to work.

Later they struck again. Les Armour, an editorial writer, was assaulted by a group of engineers. Armour later phoned the police and may press charges for assault.

The engineers then hurriedly abandoned their newspaper project. Hustling his cohorts out of the shop, Don Duguid, EUS president, declared: "The sooner we get out of here, the better for all of us." The manager then closed up shop.

But the engineers were not through. Moreen Donaldson, student president was then kidnapped in an attempt to obtain financing for the engineers issue. She held out, however, until her release later in the day.

John MacKinnon, Alma Mater Society treasurer, also refused to finance the extra expenditure for the Ubysey Staff's "Extra." The publicity staff, however, published the extra edition at their own expense.

Their publishing attempts thwarted, the engineers raided the women's dormitories, breaking through the windows and carousing down the corridors.

At present the results of this escapade are uncertain, but action may be taken, according to the Ubysey.

### STUDENT KILLED

Paul Allen, a 21-year-old student at the University of Ottawa was killed after hitting a tree in the downhill event of the CIAU ski championship meet in Ottawa. Allen suffered a fractured skull and died later. It is the first death ever recorded in one of these university ski meets. An inquest will be held.

Established 1889

### Modern Art . .

During one morning last week, when a couple of EDUCATION lectures got a bit boring, one of our class-mates resorted to the pleasant pastime of "doodling". The resulting "masterpiece" showed a close resemblance to much of the "modern" art we are inflicted with nowadays. Definitely, the "doodling" was a fine example of "Creative" Art! However . . . to continue our story — this "inspired" (?) student showed the result of his "doodling" to one of his friends — who happened to be interested in Art. The two characters of our narrative are Colin McCabe and Bob Hanson. Both these fellows regarded the "doodling" as a joke at first. Then Hanson borrowed the "doodling", drew it to a much larger scale, painted the "masterpiece" and entered it in the recent local Art Exhibit as a proposed design for a stained glass window.

Colin suggested to Bob the title "Pandemonium in Straight Lines" for the design, and that's the name under which the painting was entered. At the Exhibit the "design" drew much comment. Many who inspected the painting thought it—"exceedingly beautiful", "an inspired work of art", "a clever example of design". How many of us would have expected the McCabe-Hanson duo-artist team to rise to fame? If they can do it, so can the rest of us.

### Figures Don't Lie

(Continued from Page Two)

Age of veterans who graduated in first division was 10.7 while that of non veterans was 12.2. In second division there were 44.8 per cent of the veterans and 44.5 per cent of the non vets.

The following conclusions were drawn from the above results. First it appeared that the large number of required subjects for matriculation and college entrance need not be so strongly stressed. Rather, special emphasis should be placed on mathematics and English as core subjects with the rest of the curriculum developed along the lines of individual preferences or community needs. Later if the student were deficient in a basic knowledge of some specific field the university could provide it.

Secondly according to our results it appears that the Thurston Aptitude Test is a poor means of measuring a student's ability to cope with college subjects. And finally, contrary to popular opinion non veteran students did better work in college than veterans. However to be fair it should be stated that the test comprised of twice as many veterans as non veterans and this later group considered more select because it contained a large percentage of students on special scholarships obtained as the results of their high standing in matriculation. For work of this nature it is considered that plus .4 is a significant. However the results obtained between the Thurston Test and college average were so low on this project as to be insignificant.

When God gave out brains, I thought He said trains and I missed mine.

When God gave out looks I thought He said books and I didn't want any.

When God gave out noses, I thought He said roses, and I ordered a big red one.

When God gave out legs, I thought He said kegs, and I ordered two big fat ones.

When God gave out ears, I thought He said beers, and I ordered two long ones.

Chee—ain't I a mess!!  
Some Co-ed!!!

Definition of a rhumba—an asset to music.

Professor, rapping on desk, "Order!"  
Entire class, "Beer".

Dorothy Dix says if all the co-eds were laid end to end she wouldn't be a bit surprised.

Webster says that taut means tight. I guess that I got taut a lot in college after all.

### Hoodlums Invade Residence

SASKATOON, Sask. — (CUP) — Masked hoodlums have invaded Saskatchewan Hall, girls' residence at the University of Saskatchewan. Appearing to want to cause no more than a scare, the unknown band gained entrance through a side door and windows of the Hall.

The invaders rushed through the corridors of the building awakening the girls with their yells. They took the girls from their beds in some cases and threw the bedding out the windows.

While some stood on watch others turned on the faucets and the tubs soon overflowed.

Finally, someone sounded the fire alarm and the girls who had not already been aroused, got up in response to the alarm. Four fire engines answered the call, but the culprits had by this time disappeared.

It is believed that the raid was in planning for several months.

Inside help is suspected but no information has come to light through questioning.

ALK OF LIFE SINCE 1817

Truce Effected On Campus

Winnipeg—(CUP)—A wave of kidnappings and counter-kidnappings rocked the campus of the University of Manitoba in the wake of a successful attempt by medical students in preventing the crowning of an Engineering Queen at the Engineers' Dance last Friday night.

The Meds abducted all six candidates for the crown of Engineering Queen and crowned one of them, Ann Graburn, Queen of their Faculty.

Chagrined by the complete ruin of their plans, the Engineers retaliated by seizing 5,000 copies, the entire circulation of the Manitoban, student semi-weekly, which featured a story describing the Meds successful coup.

Engineering students trailed the truck which delivered the Manitoban to every University building and affiliated colleges, nabbing each bundle of papers before any could be broken open and distributed.

The seized edition was a special put out by Home Economics students. When the latter learned what had happened, forty members of the entire female faculty stormed the Engineering Building and kidnapped the president of the Engineering Students' Society.

A counter-kidnapping immediately followed, although the Engineers were able to rescue their president from "a fate worse than death." A Home Economics student was taken into custody but was released a short while after. "She was too much to handle," one of her abductors said.

Inter-faculty warfare threatened to engulf the entire campus when Agriculture students entered the Engineering Building. The latter fray on the side of their sister was spared from becoming the scene of a serious fracas by the alertness of its inhabitants, who promptly locked all doors.

The editors of the Manitoban intervened at this point and, after conferring with the Engineering Students Council, effected a truce whereby the Engineering students promised to have the paper redistributed in good order, stamped with the letter "E".

Girls Stage Return Raid

SASKATOON — (CUP) — A retaliatory raid by women students on a men's residence was thwarted recently by University of Saskatchewan authorities.

The residents of Saskatchewan Hall, a woman's dormitory, planned to "get even" with their male neighbors in near-by Qu'Appelle Hall. The co-eds blamed the boys for the recent raid on Saskatchewan Hall which resulted in physical assault on some girls, plugged-up plumbing, broken windows, and the arrival of firemen and Mounties.

Authorities learned of the co-eds' plans before the projected reprisal could be carried out, and forbade the raid. No disciplinary action was taken against the women who planned the counter-attack.

Ottawa Paper May Fold Up

OTTAWA — (CUP) — Financial difficulties may curtail the publication of the Fulcrum, English language student paper of the University of Ottawa.

The Fulcrum can pay only part of its costs through advertising. The rest is covered by appropriations from the student body. The Federation has spent or promised its entire budget for the rest of this year, and no more is available for the paper.

Fulcrum Editor Dubreuil, when asked about the possibility of balancing the budget by running more advertising, stated, "The paper couldn't stand it."

"Advertising would have to be increased two and a half times and we have already had too many complaints from readers about the advertising we are carrying now."

"In addition the business staff said it was not possible to obtain additional advertising at this time of year."

EDMONTON — (CUP) — The campus of the University of Alberta is in a cloak mystery.

A group of unknown persons printed an unauthorized issue of the Gateway, official undergraduate journal. An investigation has already begun and it has been revealed that the issue was printed in a small town outside of Edmonton.

He: "Knowest thou how to bringge uppe thye childe?" She: "Certainly sluggard." He: "Then snappe to, for thye childe is at the bottome of ye cisterne."

Professor: "When a girl tells you that she'll be your wife in name only, it's just a case of mating you half way."

Mother (to college-bound daughter): "Now remember, dear, if you drink, pet and smoke, men will call you 'fast'!"

Daughter: "Yeah, just as fast as they can get to a phone."

INJURED IN LAB

WOLFVILLE, N. S. — (CUP) — Fred Fisher, a chemistry student at Acadia University, was injured when a distillation apparatus blew up in the chemistry laboratory recently.

Fisher was working on a distillation process when the apparatus, nearly all glass, exploded in his face and sent him sprawling to the floor. The freak accident sent Fisher to the hospital unconscious.

Doctors were unable to determine the seriousness of his condition as they were not sure whether the several cuts and abrasions which covered his hands and face still contained broken fragments of glass.

Dr. O. V. B. Miller Heard in Address

Dr. O. V. B. Miller, director of school services, was guest speaker at the regular monthly meeting of the education association held recently. In his address he outlined the history and discussed the aims of the New Brunswick curriculum.

Following this Dr. Miller answered the questions of the group and participated in an informal discussion concerning the curriculum. Many points regarding the new four-year high school course were clarified for the members during the evening. Refreshments were served by the feminine members of the association.

JUST FOR FUN

For years the two sexes have been racing for supremacy, now they have settled down to neck and neck.

A romantic pair were in the throes of silence as the car rolled smoothly along an enchanting woodland path, when the lady broke the spell:

"John dear," she asked softly "can you drive with one hand?"

"Yes, my sweet," he cooed in the ecstasy of anticipation.

"Then," said the lovely one you'd better wipe your nose, it's running."

Much is blamed on the stork that should properly be blamed on a lark.

Engineer: If I start at a given point on a given figure and travel the entire distance around it, what do I get?

She: Slapped.

She was a luscious blonde, and when the tire went flat she hailed a passing motorist. He stopped.

"Wonder if you would help a girl trouble?" she inquired. "Sure, sister," he said. "What kind of trouble do you want to get in?"

Young man (when the embrace was over): "I'll be frank with you. You're not the first girl I ever kissed."

Sweet Young Thing: "And I'll be equally frank with you. You have a lot to learn."

THE FINANCIAL ASSISTANCE PLAN OF THE DEFENCE RESEARCH BOARD FOR 1951-52

The Defence Research Board is now accepting applications for financial assistance from high ranking Canadian students registered in Science or Engineering, who will graduate from University in 1952, preferably at the Master's or Ph D Levels.

The conditions of acceptance will be the same as for 1950-51, but the monthly payment will be \$162.00. Application forms may be obtained from the Registrar or Placement Officer.

Apply to: The Director of Research Personnel, Defence Research Board, Department of National Defence, "A" Building, Ottawa, Ontario.

"— and the bottom line says Player's Please!"

He: "Where can I get hold of you?" She: "I don't know, I'm awfully ticklish."

A fair young girlish Russian Was loved by a strong armed Prussian. From the sofa one night Came a scream of delight The Prussian the Russian was Crussian.

Boy Friend: "Are you free this evening?"

Girl Friend: "Well, not exactly free, but very inexpensive."

### An Analysis of ... The Truth About Man!

Men are what women marry. They have two feet, two hands and sometimes two wives, but never more than one idea at a time.

Like Turkish cigarettes they are all made of the same material; the only difference is that some men are a little better disguised than others.

Generally speaking, they may be divided into two classes—husbands and bachelors. An eligible bachelor is a mass of obstinacy entirely surrounded by suspicion. Husbands are of three varieties—prizes, surprises and consolation prizes.

Making a husband out of a man is one of the highest plastic arts known to civilization. It requires science, sculpture, common sense, Faith, Hope and Charity—especially Charity.

It is psychological marvel that a soft fluffy, tender, violet-scented thing like a woman should enjoy

kissing a big, awkward, stubby-chinned, tobacco-and-bay-rum-scented thing like a man.

If you flatter a man, it frightens him to death and if you don't flatter him, it bores him to death. If you permit him to make love to you, he gets tired of you in the end, and if you don't he gets tired of you in the beginning.

If you agree with him in everything you soon cease to interest him; if you argue with him you soon cease to charm him. If you believe all he tells you he thinks you are a fool and if you don't, he thinks you are a cynic. If you wear gay colors, rouge and a startling hat, he hesitates to take you out. If you wear a little brown beret and a tailored suit, he takes you out and spends the evening staring at the woman in gay colors, rouge and startling hat.

If you join in the gaieties of life and approve of his smoking and drinking, he swears you are driving him to the devil and if you don't, he vows you are too snobbish and nice.

If you are the clinging vine type

### Mademoiselle Helps

Summer's on its sunny way, and something in all of us wakes from indoor-and-ego hibernation, wants to come out. Maybe you've been talking social consciousness all year in dorm sessions and are restless to put your preaching into practice. Could be you're confused about a career and need to plow job fields. Maybe you want to see new places and faces or paper the walls of your wallet. Whatever the drive, you're more than ready for something worth while and new.

For enterprising college students MADEMOISELLE has uncovered a variety of volunteer or paid possibilities among which you're almost certain to find at least one that dovetails with your prime interest or will open up for you a whole new field of activity which may not have occurred to you.

As never before there are work opportunities these days for the summering college student in community service, in government, in industry, in agriculture, in the arts. There are even some jobs to be had abroad if you get your bid in early enough.

The Jobs and Futures department of MADEMOISELLE has investigated these and many more with you in mind. You can get the details in **Make Your Summer Count**—Work in the April issue, an article which will serve as your guide to the most stimulating and profitable summer you have ever had.

### Bowling Team

(Continued from Page Four)  
ter University, 16 points; second place, University of Alberta, 10½ points; third place, University of Manitoba, 7½ points and fourth place, University of Saskatchewan, 5 points.

Some of the less observant members of the faculty maintain that we Engineers are lazy. The absurdity of this train of thought is indicated by the fact that we would rather chase a fast girl than a slow one.

he doubts whether you have any brains, and if you are modern and advanced, he doubts whether you have a heart. If you are silly, he longs for a bright person, and if you are brilliant and intellectual, he longs for a playmate.

A man is just a worm. He comes along, wriggling about for a while—and finally some chicken gets him.

—Western Gazette.

### Residence Dance

(Continued from Page One)

and balloons centred by a fountain played upon by colored lights were the main decorations in the pool. The lights gave a soft, mellow atmosphere to the pool which was exceedingly conducive to relaxation.

Guests of honor for the evening were Mr. and Mrs. Ted Owens and Mr. and Mrs. "Doc" Roberts. Dr. Jones, Dean of Residence, was also present and acted as host for the guests.

Towards midnight a light lunch was served. This resulted in slight crowding of the last few dances since the "King" was scheduled for 12:30 in accordance with the Student Social Committee standing rules. Consensus of opinion has it that the dance was too short. Most members present maintain that they thoroughly enjoyed themselves and are already planning the next dance that is on the condition that they are able to get permission from the authorities that be. The dance, they say is the best on the campus bar none and they are very enthusiastic about having it perpetuated.

### New Scholarship

(continued from page one)

During Dr. Jones' term as chancellor and president the University of New Brunswick forged ahead. The department of forestry was established in 1907 largely through his efforts. The Memorial Building was erected in 1925, the Forestry and Geology Building in 1929, and the Library in the same year. In 1930 the Lady Beaverbrook's Building, to serve as a men's residence, was completed, and during his last year of office plans for the Lady Beaverbrook Gymnasium were completed and its construction started.

Another development which can be largely attributed to Dr. Jones was the inauguration of an endowment fund for the university in 1926. Due to his efforts substantial subscriptions were obtained. He served as a trustee of this fund until his retirement.

### Budget Grant

(Continued from Page One)

of which had been given by Senior Class Rep. Alder Gerow at the preceding meeting. The motion, which would have effectually cut the size of the Council in half by allowing two reps per class, was lost after considerable discussion.

In support of the motion, it was pointed out that the council was larger than many of those at larger Canadian Universities. The Council felt that it was not sufficiently unwieldy to warrant paring down.

### Other Items

Other items to come before the Council included a ruling by the Faculty Social Committee on the number of non-students to be admitted to the Conversations this spring. It was decided to admit a maximum of 50 non-students to the Spring Ball, which will now be held on March 16.

The Council also voted an amount of money to the Ski Club which will be used to purchase magazines and other items for Bob Girardin, St. F. X. skier injured in the recent Ski Meet, and now a patient in the Victoria Public Hospital.

### March 16th Set for Con

The date for the Con has been definitely set for the 16th. This year there will be fifty guest tickets available. These may be purchased by students from Jackie Webster at three dollars per couple. Music will be supplied by the Criterions with the theme of the dance being Easter.

Western Europe and Yugoslavia. For details see the April issue of MADEMOISELLE.
