When a motion before the Council of Students' comes to a vote the hand raised by the representative from Education has exactly the same weight as the hand raised by the President. Yet when it comes time to elect a new Council, it is almost always the case that even the members of the Education faculty (or any faculty for that matter) are more interested in the Presidential contest than in the election of their own representative. Indeed in the larger faculties it is always the case that the vast majority of the students are entirely unaware of the platforms and personalities of any other than the candidates for President and Vice-President.

That this is true becomes obvious after a brief glance at the "specific proposals" which the faculty candidates gave to the Gazette. In the vast majority of cases they are platitudinous . . . and in most cases they are utterly banal and foolish. The Editors refrain from giving examples only because we consider it fruitless to point out the worst of a bad lot.

the reasons for the lot being so miserable. It is surely not because there are not any good people at this university who might serve on Council. It is not even because there are not any good people amongst those seeking election. Rather it is because it is clear to all, candidate and voter, that the Dalhousie elections. Even those students who in their faculty.

are aware of the great value of student government are for the most part wrapped up in the race for President. They feel that they have done their duty to God and university if they manage to wade through the platform and biographies of the candidates for the top positions.

Yet the fact remains that on Council every members' vote is equal. Thus this lack of interest over the contest for faculty representative means that the Presidential platforms become almost totally meaningless. If a President is elected on a progressive platform at the same time as the majority of the Council members returned are arch-reactionaries, then he is helpless to implement those programs for which the electorate indicated a preference. Indeed he may find himself presiding over the initiation of measures which are totally opposed to the philosophy inherent in his platform. This is exactly the same situation that plagues our cities where the Mayor is often opposed by a majority of his aldermen.

Some people believe that the We are more concerned with only solution to this problem is to bring a party system to the campus. The Gazette disagrees. We feel that it is quite possible for the electorate to create a likeminded Council if it becomes customary for candidates at all levels to issue platforms.

For this year it is the hope of the Gazette that every student (even those in the large faculties) torate does not give a damn will make an effort to become about the minor Council posi- acquainted with all the candidates

black ball for the fraternities

All fraternities are invited to compete for a prize of one hundred blackballs to be awarded to the fraternity which has denied membership to the greaterst number of qualified students over the past decade. There are indications that the contest will prove to be a close one. The superior students who inhabit fraternities have yet to tax the limits of their finite minds in inventing reasons for exclusion from their institutions.

Alpha Gamma Delta and Pi Delta Phi, the two female fraternities, submit the name of a pledge to an alumnus of a chapter located in the pledge's hometown. The alumnus investigates the community reputation of the pledge and sends a report to the Halifax chapter. The members of the local chapter then meet to discuss their personal impressions of the pledge as well as the alumnus report, and to conclude whether of not the pledge is to be classified as a social misfit. We wonder whether virginity is a basis for exclusion, not to mention creed, colour, or social status.

Sigma Chi created an ingenious scheme by which to exclude negroes. All applications for membership are submitted to the international headquarters located in the Southern United States. The application is required to state the racial origin of the applicant. Any member of the fraternity is empowered to blackball any other member in any other chapter in North America. The members of the Halifax chapter recognizing the futility of recommending negroes to their southern brothers; and so negroes are not invited

Phi Delta Theta sleeps in the same bed as Sigma Chi. Ironically in the 1964 Pharos, the members of Phi Delta Theta are whiter than any other fraternal group that was photographed. Perhaps their secret motto is "Whiter than

All of the fraternities have perverted Darwin Darwin's "survival of the fittest" was founded on a process of natural selection, the fraternities believe that the "fittest" can only be identified by a process of unnatural selection. The members represent themselves as Dalhousie's desirable students, and attempt to discover their equals so that they can glory in one another's general excellence. A student who is blackballed is a social outcast. He does not measure up to the high standards which the fraternity members countenance in one another. The standard of rejection may be the colour of one's skin; an ability to attract girl friends of present fraternity members; non-virginity; virginity; temperance; intelligence; or any other characteristic that fraternity members regard as being incompatible with their perfect society. It is probable that any pledge who opposed the

concept of blackballing would be unanimously blackballed, for he would be attacking the basis of fraternal institutions. Without the blackball, the social rejects could freely enter into the great society. The virgins and non-virgins, the coloured and the seductive, the temperate and the intelligent, would descend on fraternity doors and pollute the excellence that presently prevails.

We trust that the fraternities will participate in this contest with the same vigour that has mared the creation of their segregated societies. We know that they will find our award to be attractive, for past records suggest that they will require a generous supply of blackballs in future years. If the prize of one hundred blackballs is one that they are unwilling to harbour in their fraternities because it offends their selective tastes, we will substitute an award of one hundred spitballs.

The time has come for Dalhousie students to demand that the university authorities give us a voice in the affairs of this academic community. Specifically we must begin immediately to press for student representation on the executive committee of the Board of Governors.

Radical as this proposal might seem, it is absolutely necessary if we are to ensure that the concept of the university as a community of interests i.e. (faculty, alumni, students) is to become reality. If the brave talk of student leaders is to be something better than hollow mockery then the students must be represented on the governing body of the university. Officially that body is the Board of Governors; practically speaking it is the executive committee of that group.

It goes without saying that a university does not exist without students. By the same token a university does not exist as a community if one group (the students) is denied a viable role in the decision making apparatus of that university. If a university is not a community then it is a directed society dominated by one interest group, and as such is nothing more than a glorified high school.

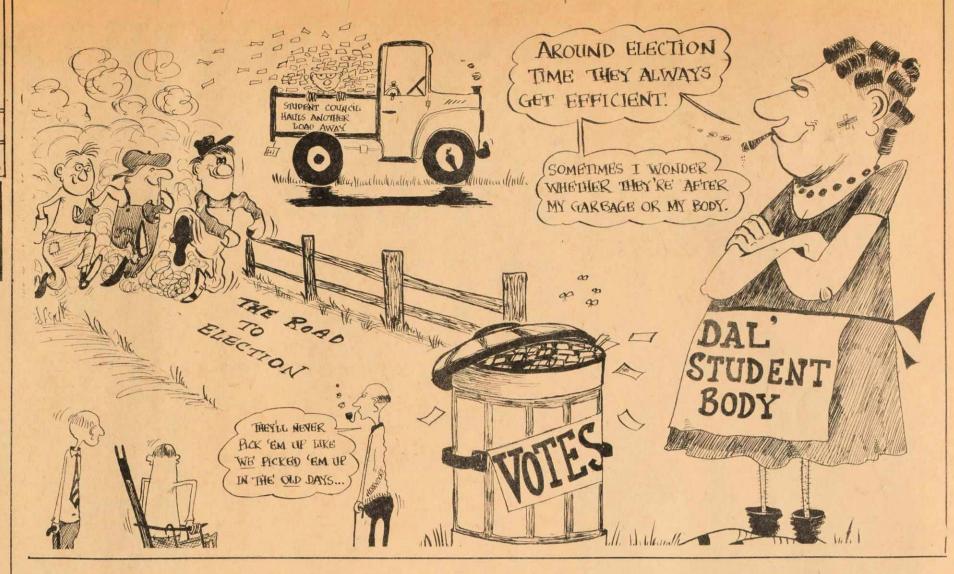

As well there are eminently practical reasons for placing a student representative on the executive committee of the Governing Body. As the university population continues to expand, and as the activities of the student union grow apace with it, then it becomes extremely useful for a liaison

person from the student body to be on this executive committee. Further if this liaison is to be effective the best political science principles indicate that it is imperative that the student be a full-fledged voting participant of this committee rather than a barely tolerated junior member who is sent out of the room when the bankers and lawyers present wish to discuss important mat-

Naturally these same arguments hold true for faculty representation on the executive committee and we look forward to the day when this will come about. At present it would seem more likely that since faculty members would likely be more "useful" to the committee they will undoubtedly become members of it sooner than will students. Nonetheless if the validity of the community concept is recognized then it becomes advantageous for the faculty to recognize that their fight for representation is essentially the same as the students' fight.

So far the students seem to have funked the battle. They have been content to leave it to the more radical members of the professorial staff. It is high time that we joined forces to convince the powers-that-be that the most sensible thing, from a conceptual and practical point of view, is to give representation to both faculty and

students on the executive committee. We trust that the incoming student council will put this matter high on their agenda.

ivory tower customers - who wins?

The next few years are likely to be crucial for the Canadian univeristy community. As the cost of university education rises it becomes more and more urgent that this country finds a new concept of higher education. If we are to avoid the obvious dangers of universities restricted to the wealthy then it is imperative that we put university education within the financial reach of everyone.

This means lowering the fees, that goes without saying, but it also means that an entirely new idea about university administration will emerge. Since it will no longer be possible to run the universities like business corporations then it follows that the influence of the financial magnates on Boards of Governors will be reduced with a corresponding increase in influence going to the professors. Already the Canadian Association of University Teachers is agitating for a greater administrating say and the trend seems to be in this direction. Certainly from the point of view of an academic community nothing but good can come from an increase in power for the academics. . . i.e. the professors - and the students.

Surprised? It is not particularly common for North Americans to consider university students as academics - or indeed as anything other than over-sexed high school kids. However, if the necessary fundamental change is to take place in higher education in this country an essential prerequisite is that Canadian students mature to the point where they can take an active part in university affairs. This is essential if we are to achieve what Paul Goodman calls a "community of scholars" in which all parts of the university mesh together into a community structure . . . into a structure which by its very definition cannot permit one section of the university (the students) to be dictated to by any other section administration OR faculty.

Of course, it has been argued, and argued well, that students cannot have a real voice in the policy direction of the university because they are too young to be able to make reasonable value judgements about that policy. The fear is that if the students were "running" the university the academic year would be mostly one big break for a continuous Winter Carnival, Students, it is said. are too immature to appreciate the necessity of their studies.

The problem here is that by not enabling the student to play a vital role in the university he is thus socially irresponsible and this irresponsibility hampers his education and may even hold over into "civilian" life when he is bewildered by the political process in the nation itself. After all. universities do not exist, even for those taking highly specialized natural sciences, as factories designed to impart countless numbers of facts to passive spectators. The learning process re-

quires participation and what is more it requires that each individual exercise a measure of responsibility in the community about him. People learn to think by being challenged; no one is challenged if he is being led around by the hand. Undoubtedly there are dangers in students exercising responsibility for university affairs; however, there are greater dangers if we lag behind other countries and refuse to change our concept of the university to that of an academic com-

Not that this implies that the students would be "running" the university, for this is patently absurd. Students are not equipped to administrate (nor are for that matter many of the faculty) and they haven't the experience to solely determine policy. But they can have a say in policy and for

the good of the universities they should. This means that the next decade must seevery dynamic student leadership across Canada. The right people must be found to serve on Student Councils. We are desperate for Council members who are capable of translating the aspirations of students into workable programs.

This week Dalhousie goes to the polls to elect a new Council. The immediate task of this Council will be to communicate to the administration by all reasonable means (including demonstrations like the one at Manitoba) the utter seriousness of "freezing the fees". The larger task of the Council will be to begin to logically work out the implications of the student community. It is imperative that all Council members, and particularly the President, be of the calibre to continue the professionalism which was the best part of student government this year.

On Friday we all have a responsibility to vote ... to vote for greater responsibility.

Kings is for queens ... and princes

Dalhousie Gazette

Concerning the editorial on King's of February 5, I would like to say that many of your observations are extremely valid, but that others

are distortions, and overlook certain points. First of all, I agree that the constitutional status of the student councils there is an archaic mess. It must be corrected, (At the same time I would remind you that measures are afoot to change things). There would be justification for the present method of choosing the Senior Student (Council President) if it resulted in better leadership. Having been on the King's student council a few years ago I know this is not the case. Furthermore, the Senior Student is placed in a difficult position because he is in part a representative of the university, thus compromising his responsibility to the students. Also, I am sure that the president of King's does not appreciate being thrust into such a awkward position as he now is by these antiquated electoral procedures.

Still, I must take issue with your conclusions. There would be danger of King's losing its identity and its student activities in any further amalgamation with Dalhousie. The students and the graduates of King's could not possibly consider amalgamation until this obstacle is overcome. Would Dalhousie be willing to maintain King's activities on their present scale? A more positive step to aid King's than amalgamation would be the elimination of the restrictions Dalhousie places on

King's whereby King's can register students only in the faculties of arts and science. Such a change would thus alter the fee-sharing arrangements between King's and Dalhousie, and would thus give King's a larger revenue, enabling it to improve its financial position, and ultimately might lead to needed improvements in the residence.

Your concluding statements, much to my regret, are rather biased. There is absolutely no basis for the fallacious assertion that King's students "tend to act like high school students", any more than there would be in making the same statement about Dalhousie students. Certainly, if the situation does exist it is by no means "seem unmoved by events that are shaking the university community", but it is rather absurd to put the Gazette in this category, as you do by implication. Furthermore, any King's student who wishes to "take a greater part in the corporate life of Dalhousie" (whatever that corporate life may be), can do so if they care to pay Dalhousie's

On the whole your editorial was much more objective than most Gazette editorials have been over the past few years. I am sorry that in the concluding paragraph you felt compelled to lower yourself with your banal and unfounded distortions. I trust you will be open-minded enough to print this letter.

D. F. Chard

espionage student government

SPECIAL TO THE GAZETTE By CARLTON STAFF WRITER GORDINI

P.H. stepped from the Air France, "Caravel" jet at Orleans Airport, just outside of Paris, Halfway through customs a tall striking blond wearing a custom's uniform suddenly began fingering him in a most amiable fashion. Startled, P.H. boldly fingered her

As events transpired she was a Miss Leblanc, an operative working for the Committee on pro-De Gualist Terrorist Activities, code name ASPERGE.

But none of this was known to P.H. as he sat comfortably relined in the passenger seat of the Gordini, his hand lovingly fondling her thigh. By dinner time neither P.H. nor the blond could take their eyes off each other; a crackling electro-magnetism had already made them one. She had suggested that they dine in the intimate seclusion of her uptown salon, but P.H. had preferred a quiet meal at the fashionable Parisian restaurant, Chop-Chops.

In a cloistered corner of the restaurant they sat masticating in quiet reverie, the candle-light glimmering on the highly polished arborite table-top. Halfway through the fourth course the blond knee moved imperceptably beneath the table and slid knowledgably between P.H.'s knees. There was a long moment of breathless expectation, it was like Prince Philip docking the Royal Yacht Britannia, then P.H. let his breath out in a long piercing sigh," "Oh Miss Leblanc' screeched his stifled falsetto.

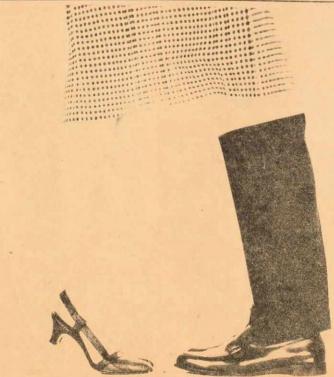

At her apartment, P.H.'s pleasure began. While he watched, passion mounting in his breast, she put on a gigantic fur coat and slowly, tenderly, began to shower his quivering back with blows from a studded leather belt.

With the utmost delicacy and understanding she used her amorous skill to assist P.H. in his sexual pleasure. Wit agonizing definess, she used dull kitchen scissors to remove his big toe. The cigarette butts that she laid against his solid thighs and buttocks, were laid with awe-inspiring tenderness. And finally, came the tempestuous consumation, as P.H. saw the bathroom ceiling dissolve to blackness, water bursting into his lungs, as she feverently held his head against the bottom of the over-flowing bathtub.

She smiled her broken smile, and began the fifth course, but not lead the students in protest was no sooner well under way when she let out a low piercing over increased tuition fees, to the whistle, the sound of a whale breaking air, and slid to the floor. legislative buildings, then the She was quite dead. Three inches of bamboo sharpened to a Gazette is quite right in offering

merciless point and fired with the force of a ten-pound sledge at the base of her spine had done the job.

"Dawn has been too hasty in coming," thought P.H., as he crawled weakly down the Champs-Elysee. But he was satiated, satis fied, crippled; it took one last final surge of reserve energy to get out the ringing cry: "TAXI!"

Secret agent P.H. employs deceptive disappearing trick with the help of co-agent Melonie Whitethighs, to escape from hordes of raging admirers.

Mr. Morleys article "We were wrong" offers the student body, pardon me, student union a positive opportunity which must not be lost. If the student council will

to step in and do the job that the 'Herrndorf Herd" is failing to do, i.e. express the will of the students. The next move is up to the Council; let us hope they move instead of mull and meditate until the flood tide is past.

Dear Sir:

I would like very much to find out how the decision to abandon the Munro Day break was arrived at. It evidently was not done by student demand, and several Professors have expressed surprise and some dismay about it. Thus it seems that the decision to continue classes has been made solely by the Administration. There has not to my knowledge been any justification of this action which is at this time extremely unpopular with most of the student body. Is there a valid reason for dropping this valuable intermission, or is it another unwelcome example of the lack of communication between the students and Administration of Dal-

FISHERIES

RESEARCH DIVISION DIRECTOR

OF RESEARCH

The Marine Department requires a Director of Research for the Fisheries Research Division. Wellington. The initial salary will be 2900-3100 pounds per

Fisheries research, carried out by the New Zealand Government, has been reorganized as a separate division of the Marine Department, with emphasis on basic fisheries research and separate from the development, extension, management and technology functions, which are the responsibility of an associated division of the Department.

An excellent opportunity exists for a capable and experienced fishery biologist, with a capacity for administration and leadership, to develop a new unit under very favourable circumstances, with Government priorities being given to research expansion, provision of new laboratories, research vessels and associated

There has been some basic work carried out in New Zealand on demersal species and on invertebrates; however, the present and continuing need is for substantial expansion of the basic biological studies on which valid management practices can be founded.

Priority is being given to building up a fully qualified graduate staff, and a technical staff to an initial total of 30.

The Director's immediate re- going." sponsibilities will include the recruitment of staff, formulation of a research programme, and the planning of laboratory and ship facilities.

Salary 2900-3100 pounds with prospects of higher remuneration in the expansion scheme. Conditions of appointment include provision for payment of fares and other travelling and accommodation expenses. There is opportunity to join an advantageous superannuation scheme. Further details are available

getting along with people, I met a terrific fellow in 2nd year Fine Arts. He's a painter and a poet and a folksinger. His name is Howie McTool but everyone just calls him "Tool". His closest friends call him "Cool Tool". I went on a study date with him on Wed., but we really didn't get that much studying done because he was showing me how to "bar-up" on a guitar. You should hear him play "Railroad Fred". (The song is really called "Railroad Bill" but "Tool" re-wrote it.) We're going to Citadel Hill on Sat. There's a museum up there. I miss you.

> Taffy. Oct. 30, 1964

Man, has this month been a blast. "Tool", Eileen, Turk (that's Eileen's boyfriend) and I cut out to a cool patch called "Peggy's Cove", and I want to lay it on Daddy-o, that I dig this place like WOW. Like, did we exist out there. "Tool" says that when he makes the scene at the Cove he feels like he wants to really, I mean really, BREATHE, Dig? Turk and Eileen took a mickey of rye and drank it. I didn't want to look like a

I realize that I have not ans wered one of your letters in over a month but there has been so much going on and so much has happened. I feel that I have grown up more in the last month than I have in all my 18 years. It is as though I was a blind girl when I arrived here on Sept. 26 or was it the 25th. Whatever you do, dear Mother and Father, do not worry a minute about me I am completely confident about taking care of myself, Remember, I am a big girl now. I must ask you not to be angry with me after reading this next para-

"Tool" and I broke up early in November. He and Eileen have been going together since then. I am engaged to Eileen's old steady, Turk. (His real name is Nigel Turkford). It's funny how things turn out but all along Nigel was for me and "Tool" was for Eileen. Please don't be angry. You must understand that I love Turk, and Turk loves me. I know what love is. Love is wanting and being wanted, I will only see you both for a few hours on Christmas Eve as Nigel and I are going to Omaha to be married. All my love, Taffy.

P.S. Don't worry about college tuition for the second term. We're staying in Omaha. Nigel has a good job. He's a professional ripcord tester. Nigel has always wanted to fly.

See-Saw Has It's Ups And Downs

By MIKE WALTON Gazette Feature's Editor The Neptune Theatre's winter season began with a bang last Friday night. The series opened with TWO FOR THE SEESAW, a comedy about a lawyer and a dancer who balance their emotional and sexual ups and downs

common interests. Although the production is an excellent evening's entertainment, the play places no strain on the intellectual resources of the playgoer, nor, one suspects, on those of the playwright responsible for it. This reservation, of course (some wouldn't count it a fault), is a reflection

by temporarily merging their

on the script, not on the acting. Essentially, the play itself is distillation of THE SEVEN YEAR ITCH and THE WORLD OF SUZIE WONG, with perhaps a dash of LOOKBACK IN ANGER to give it "significance". The implication is that the script is a hackneyed hodge-podge of theatrical cliches that have been exploited in popular drama over the past five or ten years which it is. The audience, needless to say, loved it. I must admit that I enjoyed it too, but with serious reservations about the sentimental histrionics which I noticed one or two nearby fe- the better part (she gets most of the more poignant parts, and as- astonishingly good job with his like this, and can only conclude follow.

sume that most of the males (after all, it would be hard to that since Mr. Follows does an present were as intrigued as I was when Roberta Maxwell took her dress off. It was presumably the latter point of interest, along with such spicy dialogue as "sonofabitch" "goddam" and "did he lay you?" that prompted the warning "Recommended for Adults Only" in the program notes. Nevertheless, I cannot imagine the sensibilities of even the most tender-minded Halifax kiddy being perverted by anything

in this play. The presentation of the play reflects a great deal of credit on everyone concerned, with the exception of playwright William Gibson. It is an especially difficult project, in that the whole action is sustained by only two characters. Roberta Maxwell as Gittel Mosca, a motherly, semiunemployed dancer who can't ing a humiliating marriage in Nebraska, give performances which almost mitigate the thin- of his whole life. ness of the script with which they are working. Their characterizations are almost above reproach, except that Miss Maxcasionally, a fault hardly worth marred a great deal of the play. mentioning. Miss Maxwell has

imagine a less promising background than that of a Nebraska lawyer if you were going out of your way to create a dull char-

One virtue of the play is its incisive study of a kind of simultaneous self-deception and deception of others, a phenomenon which though common, usually Surely this process of isolating an aspect of human nature and presenting it for the inspection of the audience is one distinction of good drama. Unfortunately, TWO FOR THE SEESAW only manages to do this once, at least to my satisfaction; the point at which this occurs is early in the play when Gittel exposes Jerry Ryan's unwitting manipulation of others for his own ends. In this case, it is dance, and Ted Follows, as Jer- a ploy to get into bed with Gittel, ry Ryan, lawyer licking his but her clever observations on wounds in New York after botch- Jerry's tactics make him realize that this sort of manoeuver-

The worst point of the play occurs where Jerry has a tantrum when on the telephone with his wife: " . . .you've got your well's Bronx accent lapses oc- hand in my BOWELS . . . (deep shuddering sob, trying manfully to pull himself together). I'd feel sorry for any

ing has determined the pattern

impeccable job, playwright Gibson is at fault. Miss Maxwell's lines were for the most part much better (she had most of the funny ones), although their effectiveness depended largely on her handling of them. Even her 'Yah, hallo . when answering the telephone is hilariously funny. Her part is also goes unnoticed in the real world. enhanced by her husky voice and sexy good looks. The set used in this play cer-

tainly helps to make a successful production from an indifferent script. The action takes place entirely in Gittel's flat and Jerry's room; each location occupies about half the stage, so that a telephone conversation takes place with both parties on the stage at the same time. The handling of properties ingeniously reflects the action (such as it is) for instance in the way the decorations in Jerry's room correspond to the state of his relationship with Gittel as the play

I am surprised that the Neptune did not select a better play with which to initiate the winter season; nevertheless, the fact that its production of TWO FOR THE SEESAW is such good entertainment reflects nothing but credit to the company, and males being moved to tears at the laughs); Mr. Follows does an actor who had to tackle lines augurs well for the plays to

Lose Weekend Game 65-53

the Xaverians prevented the Tigers from taking over third place tain the pressure as St. FX sud-

Varsity Evens Record

For the majority of fans at the S.R.O. Dal Gym the contest turn-The Tigers played very poorly in the first half enabling the visitors to gain a substantial the intermission drew the Bengals to within four baskets at one point but then their drive faltered.

The game began evenly as the teams traded baskets during the early minutes of play. However, the Xaverians soon capitalized on Dal's weak offense and defensive lapses to roll up the score. At the end of the first quarter X was leading by fifteen. The Tigers making only nine points during this period, shot very poorly and were unable to attempt follow up shots as X controlled the boards. Despite their inadequate offensive showing Coach Yarr stated after-wards that if their first half defense had been stronger the Tigers might well have won. He noted that four or five Xaverian baskets were the result of inexcusable defensive mistakes.

The Tigers exhibited no ferociousness until late in the second period when they reduced X's twenty point lead to fifteen. However, the team lost its spark when Tom Beattie was forced to leave the game with a twisted ankle. The visitors hit for two more field goals and led 41-22 as the half ended.

During the second half the complexion of the game changed. The fixed-up Tigers not only prevented a rout but methodically began to cut into the X lead. They outscored the Xaverians by five in the third period despite the fact that Larry Archibald was out for seven minutes having his damaged fingers taped. As the final period opened X had several

hockey game Mt. Allison scored at the 10 second mark and went on to down the Tigers 1-0. In this years winter carnival action St. Thomas scored at the 11 second mark and added another marker minutes later - this time the vastly improved and improving Tigers were more than equal to the task as they bounced back 5 straight goals to post an important 4 point victory.

Coach Selder seems to have found the first line combination as his newly formed trio of Smythe-Stoddard and Dimaj accounted for four of the Tigers' goals. Ron Smythe fired two bringing his season total to 11 and also picked an assist while Drmaj notched his sixth. After some weak moments in

front of goalie Ron Sieniewicz early in the first period the Tigers defense jelled to play one of their stronger games of the season. Although they lapsed a couple of times leaving St. Thomas forwards unguarded in front of the Tiger cage the defense corps cleared the puck better and set up the forwards with good passes. Perhaps the prettiest goal of the day came on such a pass from Rudy DeRose to Smythe who waltzed in all alone on Bill Nestor, STU goalie. The Dal forwards put on their

best display of forechecking of the season as they battled the Tommies up in their own end of the rink for a good 60% of the game. After two good fast skating periods the third period developed into a close checking somewhat ragged affair. The Tigers had a two goal lead going into this period and were taking no chances. Individually besides Ron

Smythe, who skated miles and the Tigers' Ian Oulton played a standout game. Besides scoring a beautiful goal in the second period Oulton was the backbone of the improved defense corps. As he has done all year, the P.E.I. native played a good steady game, and from this corner, behind Smythe, would have to be the second star of the game. Barry Ling and J.J. Cruickshank also put in yeomen service as they effectively killed off the seven penalties the Bengal's

The Tigers now have two weeks on February 20 when they tangle with the hurried excuse that they U.N.B. pucksters have been recently hit by injuries and should be ready for the taking when they meet the Bengals.

Yarr's basketballers were again gone and needless to say - no plagued with the inability to get Pep Cats. on the score board in the early behind by about 20 points in the needs help and badly to fulfill first half and then although out- their place and purpose on Camscoring its opposition in the sec- pus. ond half didn't muster enough to pull the game out of the fire.

perhaps were surprised by an overflowing with over 150 people early St. F.X. press but instead being turned away. The legal of applying their own press fell limit of around 700 were admitback into their normal defense, ted before game time — but even Instead of working on high that number seems to be too scoring Dave Barry, trying to many. On Saturday afternoon the get him to draw fouls the Bengals exits were jammed, people were chose to shoot from the outside. Sitting or standing everywhere

Their shooting obviously off the Tigers quickly fell behind as Paul Chennard and Buckawiecki fired from outside while Barry completely covered both backboards taking 13 rebounds in the first

The Bengals passing and general floor manner was to say the least disappointing for the over floor crowd. Time and time again floor length passes went astray, and the score mounted. Granted the Tigers lost Tom Beattie late in the first half, and Larry Archibald for a time in the second but they just did not seem to have it.

Norm Vickery played by far his best game as a Tiger. Besides leading Tiger scorers with 15 points Norm was all over the court blocking shorts, stealing passes while grabbing 19 rebounds against the tough X-men. Bicking was awarded the Halifax Winter Carnival trophy for his great game.

Dal's problems could perhaps best be summarized by one word - experience or lack of it. The freshmen laden Tigers seem overawed by big games, go cold and then forget game plays and their offensive formations. Playing against X who man for man have the best shooting team in the league such weaknesses cost ball games. Poise and experience don't come overnight but take time. This season may be that period of time.

Today the Bengals tackle the St. Dunston's Saints while tomorrow they take to the floor against the UNB Raiders in what could be a real game. The first game between these two teams at UNB was not decided until some late game heroics by Larry Archibald and this weeks' match could be a cliff hanger. UNB should not be underestimated.

On Pepcats - believe it or not Dal has an organization known as the Pep Cats - or as the student handbook says "the Spirit committee of Dalhousie." Supported, sponsored, and subsidized by the student council the Pep Cats have only been noticed by their absence from this Years' Varsity Games. When the leader of the Pep

Cats was contacted and asked whether this group would be attending a basketball game the off and their next game will be inquirers were curtly rebutted the U.N.B. Red Raiders. The (the Pep Cats) had no music, and he, the leader, did not even know where the instruments were. As a fleeting comment he remarked that they would be going to the hockey game on February 6. In the X Basketballgame Coach Well February 6 has come and

It would seem from this corner moments. In the League opener that certain parties should get against St. Mary's the same on the ball as obviously this thing happened. The Bengals fell spirit committee of Dalhousie"

Hockey Tigers Defeat Tommies

I think -

BASKETBALL SMU at ACADIA although the Axemen had trouble with a vastly improved St. FX team they should down the hard running Huskies. With Kranack and Rode covering the boards and with a stronger defense Acadia should post their 9th victory in con-

ST. DUNSTAN'S at DAL the luckless Saints were clobbered again last weekend and should fare only marginally better against the Tigers. With Vickery, Beattie, and McSween dominating the backboards and with stronger defense the Bengals should win their fifth game in nine conference outings. Dal by

UNB at ST. MARY'S the Red Raiders came close in their last game with Huskies (St. Mary's won 74-72) but should find the going rougher at SMU with the advantage of home court and a healthy Buzz McHale, the Huskies should run away from the methodical Raiders. SMU by 10

ST. DUNSTAN'S at ST. F.X. the Dunnies won't be able to contain Dave Barry, perhaps the best big man in the league with Bisson and Chennard shooting from long range, the X-men should bomb the hapless Dunnies. St. F.X. by 30 or more.

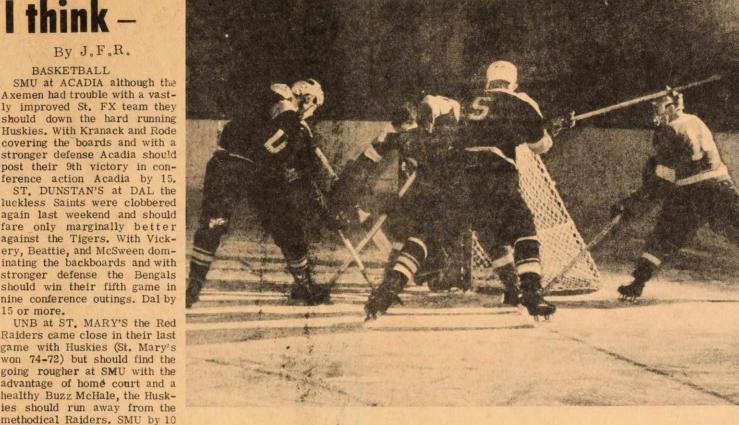

UNB at DAL the Bengals will have to improve their showing of last Saturday to down the underrated Raiders. UNB played a very disciplined game and the game could be won or lost on defense. With more height and more depth to the Tigers they should emerge victorious in a hard-fought closely-played game. Dal in a squeaker. HOCKEY

UNB at MONCTON UNB have been hit with a couple of serious injuries sidlining first line players but should have enough to down scrappy Moncton. The Red Bombers clobbered Moncton 12-2 in their first meetin and should again win handily. UNB ST. FX at ACADIA after los-

ing to St. Dunstan's the X-men should make no mistake in repeating an earlier win over Acadia. Notwithstanding their loss St. F. X. probably have the strongest team in the conference and with McQuaid and Ferrenzena leading the scoring, X should win in a walk.

STU at ST. DUNSTAN'S the Dunnies ranked first in the nation, should have little trouble with the Tommies. St. Thomas won't be able to stop Billy Mc-Millan the conference's leading scorer who should fatten his lead atop the scoring race, while the Dunnies will lengthen their lead atop the standings.
