out and a good sports page as

Gregg feels that the most im-

portant role of a university

newspaper is to excite the in-

terests of students in events

which are happening in the uni-

versity world. The training of

young journalists can be classi-

fied as a secondary role but one

well.

Text of the brief that Student Council President John Young proposed should be sent to the provincial legislature, urging free tuition for Nova Scotia's freshman university students, is printed on page four.

Further said Young: "The scheme would encourage applications to university...we would get them here and keep

The government of Nova Scotia presently subsidizes 400 dollars per student at Dalhousie per annum, which means 210 million dollars. Forty percent of the Dalhousie student population are from outside the province. The plan would have benefited only Nova Scotian students.

Said Young: "The province would get more mileage out of its universities by the free tui-

tians would be able to attend." The brief stated the two ex-

pected effects of the free first year tuition plan for N.S. universities: "First, standards will rise because the financial position of N.S. universities forces them to limit enrolment, therefore of necessity only those of high academic calibre will be able to enter universities, regardless of financial position."

"Second, it will mean that because more Nova Scotians will be applying to university that the ratio of Non-Nova Scotians to Nova Scotians will be lowered to a more equitable level and thus more Nova Scotians will be attending in absolute as well percentage terms."

The program does not absolve parents totally from financial responsibility since the 600 dollar tuition is only part of the estimated average cost of 1,750 dollars to attend university for

Hersche Gavsie, had this comment: "If you allow more Nova Scotian students, it will become a regional university...a glorified Nova Scotian high school."

Diane Alexander and John Tilley also commented that it would reduce the cosmopolitan atmosphere of Dalhousie.

Said Tilley: "It will be discrimination against students from other parts of the Maritimes, Canada and the world The university will become a very provincial place if out-siders aren't allowed."

Sandy MacDonald called the plan "narrow" and along with Judy Ann Stern, who called the plan "premature," said the money should be put into high

John Findley said that everybody wasn't "fit" to attend university and that the plan would

ing the university a vast clearing house for bodies." Ming Tan said the plan would result in choices having to be made between N.S. students and

Non-N.S. students.

"encourage free loaders mak-

Randall Smith called those who had seized upon the regional issues of the plan "so called intellectuals." He said, "It's a step forward in the right direction to increase our standard of living"..."We are a have not province."

A motion was made by a few of the members to table the motion. This was defeated by a close vote.

"This is the most fundamental thing we've ever discussed on Council this year ... I'm sursaid Gordon Hunter.

He commented that the university will decide who it wants and that no advantage would be gained by choosing.

Said Alan Hayman: "I'm not in favour of the plan ... Why should I pay for the others."

George Munroe said he didn't think the plan was discriminat. this: ing but would help students in N.S. to better themselves.

In his final appeal Young said he wasn't "discriminating but trying to encourage N.S. students to apply and then compete with out-of-the province students." Said Young: "I'm ashamed of

people here from outside the province who spoke against do. ing something for Nova Scotia.. You shouldn't deter a Nova Scotian from getting an educa-

C.B.C. Concert series

He said the only way to get aid was to apply with specific proposals on behalf of residents of Nova Scotia.

When the motion was defeated by three votes Young said: "Jesus, I'm mad." Randy Smith commented: "What an exercise

in intellectual immaturity." The final voting shaped up like

Campus papers should excite interest-Gregg

Gazette Staff

We finally got a pat on the back -- and from an off-campus

In an interview with a Gazette reporter Patty Gregg, National Affairs Reporter in the Maritimes for both national television and national radio news, said that the Dal paper is quite a professional and interesting

Considering that its scope of reporting is limited to the campus, the Gazette manages to produce a worthwhile news-

Referring specifically to the issue of January 19, one which Gregg considered to be especially good, he examined the paper page by page, comment-ing on many of the articles. He praised particularly the article presenting the various aspects involved in the use of birth-control pills. He termed this "a well-rounded presentation and a very good example of what a campus newspaper can do to excite the interest of students in current events."

(Editor's note: The article was lifted from the University of Western Ontario Gazette).

Also receiving plaudits was the questionnaire on the SUB which revealed that a great many students are abominably unaware of developments on campus. This indicated a need for the Gazette Gregg added, and of people to read it.

Both editorials in this issue displayed good political reason-

of some importance. University papers, Gregg stressed, should ignore the hoary traditions of North American journalism. He deplored the attitudes of many editors who often regard the reading public as rather dumb. Reporters, he said, are frequently

advised to keep their writing simple for their readers will not understand words of more than one or two syllables. He recalled that the Toronto Star, where he once worked, fired Ernest Hemmingway, because it was dissatisfied with his writing. Gregg feels that this syndrome is common to many newspapers today.

Only infrequently will you find the odd columnist exhibiting any real interest in writing above the level established by tradition. Pretty writing is termed "purple" and is said to have no place in a newspaper. "I'd like to see some real pretty stuff, though", Gregg said.

Such traditions in journalism, Gregg declared, are a bit outmoded and he feels it is time things were changed. If university papers could bring about these changes, then this isperhaps a third they can play.

Lectures Gregg stated that a university paper as such has only a very small part, if any, to play in the community.

The university itself, he added, has a definite role which it does not fulfill. He said that there is a wall between the university and the body public, isolating the former from its community. He blames the university academics for much of the trouble, declaring that the often erect a wall of esoteric knowledge which prevents people from getting to know them. To illustrate this he used the example of professors of political science who are often used on public affairs programs to predict election results.

These people often talk classic textbook politics which are .Continued on Page 2.

Forecast wrong

Carnival weekend a sellout

By MAUREEN PHINNEY GAZETTE STAFF

Fortunately for Dal, the Gazette's gloomy prediction (Long winter weekend may end if students fail to back Carnival) proved incorrect. Winter Carnival sales were a success.

"We haven't got all the figures in yet, but the loss won't be over \$500," said Carnival Chairman

Attendance figures were very satisfactory. *Over a thousand attended the ball and about 800 .Continued on Page 4.

However, Mr. K'ombudo has been lobbying vigorously since mid-January to gain support for his new party, which attracted 45 lawmen to an organizational lowing that caucus. KELLY HEADS TORIES

An astute Prince Edward Islander, Bill Kelly, Law III, has led the Conservatives through this year's law school election. Kelly's Tories have brought two prominent federal Conservative members to the school to address students: former Trade

Significant points in the Conservative platform, which places major emphasis on solving urban problems, are:

. In Viet Nam: "Canada should cease to sell certain specified war materials to the United States and encourage the sending of medical supplies to ALL participants":

ada (as) the neutral and noble peace-keeper of the world";

. Domestic Policy: A con-cept for "the new society" is proposed, including incentives to encourage home purchasing; campaign to eliminate air and water pollution; study of the domed city and methods of combating environmental difficulties in planning northern cities in the Yukon and North West Territories, and recruiting of immigrants of special backgrounds to fill the needs of

constitution for Canada, and petition the Parliament of the U.K. to repeal the B.N.A. Act, effective when the new constitution came into force.

> BARRY HEADS GRITS From the island kingdom of

Joey Smallwood hails Leo

Barry, Law III, to lead the law school Liberals in the election. Barry is no con man, but some of the Grit policies closely resemble Smallwood's ramblings in his latest book (Peril and Glory, published last month). Principal points in the Liberal platform:

. Federalism: Provide Federal su sidization for cultural excha ge programs between French and English-speaking . Defence. _ gin reduction of our unified armed forces to 50,000 men, and create a Mo-

000 men for purposes of international peace-keeping and in the event of civil disaster. . National Economic Policy: Encourage foreign capital without foreign control, by prevent-

Man and Social Change: Amend the Criminal Code to al-

of family planning information and devices; broaden the grounds for divorce, and recognizing that there are circumstances in which abortion should be legalized under proper medical supervision and recognizing the complexity of this issue, amend the Criminal Code to provide more a xibility

K'ombudo's political fervour stems from his leadership of the United Arab Republic's delegation to the model United Nations General Assembly, held at the U.N. Building, New York, in 1963.

Features of the United Canadians platform include: Federal Investment: Canada

should start a dialogue aimed at

co-ordinated common market of the Americas.

. Foreign Aid: Canada should stop sending money abroad in the form of currency because "it makes it possible for a few ruling families to squander it at the expense of the people. The bulk of the aid should. . .consist of men and materials."

. Vietnam: While not encouraging U. S. citizens to avoid serving in their country's armed forces, but Canada "should recognize the right of these citizens to reject being forced to fight a war they do not be-

. Student representation: One representative for all universities and colleges in every province to be elected to sit in the House of Commons (for a two-year term), and another student to represent the universities in each province in the provincial legislatures.

Crossroads Africa

Students help build youth camp

her last summer vacation travelling through Africa with a contingent of Canadian students. The Gazette - she describes the challenge that comes with helping to build a youth camp at Nyehn, 45 miles northeast of Monavia, the capital of Liber-

By JOAN ROBB Special to the Dalhousie Gazette After we returned to Nyehn, something seemed to gel in the

group. By this time we felt quite close; visitors remarked on our group spirit.

Things were also going better at the work site. For one thing, we had finally got off the ground. It had taken us three and a half weeks before the first concrete block had been laid, and we had to get the walls all finished in three more! There had been continual problems with materials not arriving, or being wrong, with lack of supervision and direction and overstaffing, among other things. It was a real triumph when we managed to figure out some way to erect the steel supports and pour the twelve concrete pillars which were to support the roof. I learned reams about what goes into the construction of a building, including all the millions of little ties that are made with steel rods and fine wire! When every block that was laid brought the walls higher, there seemed some hope that we might get the building near comple-

tion, after all. Relations with our fellow workers were also better during our last few weeks. We had by now gotten used to the pidgin accent and colloquialisms of "Liberian English" and could communicate, if not 100% effectively, at least passably. We could now joke about each other's "laziness" when taking

The last two weeks saw a lot of swapping. I traded my canteen for a hand-made pair of "soh-soh's" (shakers, somewhat comparable to maraccas or cha-chas, which are used to accompany traditional dances) which now hang proudly in my

leyball with the sports equipment Crossroads had sent with us, the toddlers would just run In this report - her third for around and enjoy themselves, and the mothers would sometimes talk to us. We got all sorts of unexpected, spontaneous little gifts--like the afternoon a little boy brought up a bottle of orange pop which his father had sent for the girls, or the time a little guy named Jesse, with a lame leg, a stomach that was distended by malnutrition, mischievous eyes, and a grin that reminded one of a cute little chipmunk, brought three cucumbers from his mother for "the small woman" (that was me), although none of us had ever met his mother.

Inorder to preserve the memory of some of the incidents that made up the summer, we took turns writing in our group journal, and perhaps the feeling of Crossroads can best be conveyed through a few

Wed., June 29: "Up at 6:00 a.m. for our first working day. Since cooking and water-boiling routines had not been set up, we didn't get to the work site till 8:00 a.m. About seven Liberians were working digging the foundation and building the work shed; they had been there since 7 a.m. We divided into three groups and spent the morning collecting rocks, digging, and getting sticks to make a floor in the shed The Liberian sun was very hot, and a very tired group left for lunch at 11:30 The boys showered out in the rain, and are very pleased with our house; cool and screened windows. Tuesday night was one word: hot, for most slept in their sleeping bags. Today John cut us poles, and we erected our mosquito nets, spending a much more pleasant night." -Jack Irwin, Lehigh University

Sunday, July 10: "Today we moved in what has come to be known as the jet-set. Here with 'just Shad' (the son of President Tubman), his brothers, sister and mother and friends we became aware that people are the same the world round. Here in a group of people that form one of the upper levels of the Liberian society we saw the refined, the coarse, the clever, the dull and the bored.

John Fenwick, in his third ses-

DGAC elections soon

DGAC elections are coming up on the seventeenth along with all Student Council Elections. A note about each girl running for a position in the club will be reported next week. Dolores Morell had been elected President by acclamation—congratulations, Dolores.
DGAC interfaculty basketball has ended with the finals held last Tuesday night. Law, Nursing, and Physic competed since they had won 2 games each previously. The final results point-wise were: Law 24, Nursing 19, Physio 14, Alpha Gamma 12, Pharmacy 12, Science 12, Shirreff Hall 12, Dental Hygiene 4, Arts 2, and Pi Phi 3.

Pingpong is being held on free-gym night . that's the 13th, 7:30-9:00 p.m. Snow football will be on the 18th at 2 p.m. on the football field. - Where else? Anyone interested in curling Sunday nights should contact Bob Kaiser at 423-4000 since it is not a DGAC managed activity. Broomball was held last week but the only people who turned up were the organizers - it was at 7 a.m. in the morning! Maybe next time a better hour could be arranged - then it might be fun. Results of the badminton fun night will be in the next

column - it was held February 6th. The plaque to be awarded to the highest scoring faculty is made and all polished up. What do you say you try for it in your faculty? DAL SWIM TEAM'S FINAL HOME APPEARANCE

This Saturday at 7:00 p.m. at the YWCA, the Dalhousie Tigers and Tigerbelles will make their final home appearance of this swim.

Everybody who possibly can should get out and support the team. This meet is a dual meet against arch rival Acadia and Coach Graham says that it will be extremely close and exciting

Our team has a great chance to win the upcoming MIAA Swimming Championships at Mt. A. and thus get a free trip to Edmonton. Let's give the team a great send-off, this Saturday at 7:00 p.m. at

His efforts won the fraternity first place and the Connolly Shield.

Mr. Crocker's outstanding play and other entries in the threeevening event are reviewed for The Gazette.

Bear with me as I don my Linda Gillingwater robes and become last-minute substitute reviewer for the final night of the Connolly Shield play competition held last week at Neptune. It's a great thrill for me, being the first time I've done advance publicity, taken tickets, handed out programs and reviewed the same show. The whole thing has been a rich theatrical experience.

(Here follows a lengthy paragraph in which the writer notes with delight the infinite variety of the various casts, and comments encouragingly on the courage of the Dalhousie Glee and Dramatic Society in holding the show at Neptune and inviting other Halifax universities to participate.

"The Club Bedroom"

The first of the three plays was "The Club Bedroom" by Louis Auchincloss. And since I have my Gillingwater robes on, I shall delicately describe the script as an abortion. Director Doug French's forte is obviously not the choosing of plays. (Now, acting is another story -- come the Forum'' -- he's something to behold.) But that aside, the production was a pleasing one,

Let them go to trade school!

This week nine members of student council showed themselves to be the narrowest of reactionaries. Their actions and comments at the Monday council meeting reflect attitudes that were on the wane 50 years ago.

Acting on emotion and misguided principles these people voted against the abolition of first year tuition fees.

For some the argument was that education is a privilege, and we only appreciate what we pay for. Others took the position that any scheme that would do away with first year tuition fees for residents of this province would flood Dalhousie with Nova Scotians and do away with the university's cosmopolitan nature. These are obviously two very different arguments and must be dealt with

That university education today is aprivilege of the rich, is a fact. But thisis not to say things are as they should be.

A Dominion Bureau of Statistics survey released last year shows that money not intelligence is the deciding factor whether a person will receive a university education in Canada.

In this country 52 per cent of families have incomes under \$5,000. Their chidren account for 25 per cent of the university population. At the same time another 25 per cent of the student body comes from the six per cent of Canadian families that earn \$10,000

One of the first mistakes the proponents of the 'privilege-theory' make is to equate 'free education' with the abolition of tuition fees. They are not the same thing.

It has been estimated that it costs about \$1,700 a year to attend university at the undergraduate level. The fact that this is a conservative estimate is indicated by the figure given as an average tuition cost, \$429.

Now keeping in mind that the proposal under consideration at the student council meeting involved only first year tuition let's imagine a possible case.

Bob G. is the son of an unskilled laborer in Halifax. He has two younger brothers and sister, all living at home. Bob's father experiences seasonal unemployment and can not afford to provide funds for a university educa-

Bob has entrance requirements but his average is not high enough to win a scholarship. Because he is just graduating from high school Bob can only expect to get a two month summer job. The DBS survey revealed that students already in university, on-the-average manage to save \$418 from their summer jobs. Bob can't expect to do this well.

Even if Bob can convince his parents to sign a student loan form for the maximum \$1,000, he is a long way short of the necessary \$1,700.

With free tuition and his summer savings Bob might make it to university.

The second myth that the reactionaries hide behind is -- "Free tuition would mean a lowering of academic standards because everyone would want to go to university.

The fact is that the law of supply and demand would insure that academic standards would rise rather than decline. If the economic barrier is removed and there are more students applying for entrance the university will be forced to raise academic stan-

A third myth is -- "The money has to come from some where. If the government has to dole out tuition for all those lazy wouldbe academics they'll have to get the money from taxes. Why should everyone pay to support a few?

The answer to this one is obvious. It is well known that a person's earning ability rises in direct proportion to educational level. A high school dropout may never pay income tax as an unskilled laborer; the government won't get the money back it has invested in his elementary education. (This is not counting what the dropout may cost the government in

A university graduate - especially a professional person such as a doctor or lawyer - because of his increased earning ability he will pay back the government's investment in him for the rest of his working days through

The government, which is the government of all the people, will use the money to pay for the education of the next generation and providing all of the other public services.

The second argument that free tuition for Nova Scotians would ruin Dalhousie's cosmopolitan character is a joke.

Education in Canada is a provincial responsibility. The province pays the biggest portion of the shot and therefore it is expected that they should give priority to training their own people. At the present time the province is spending an average of \$1,120 on every Nova Scotian in university. Dalhousie alone receives \$2,200,000 towards its operating costs.

In many ways out-of-province students represent a handicap for Maritime universisities. Some estimates place the number of non Maritimers in Maritime universities at 40 per cent. This disproportion hurts the province when it applies for its federal

A large number of the out-of-province students come to the Maritimes because of the grade 11 entrance requirement (grade 12 for Ontario.) Dalhousie raised its standards last year to equal the requirements at other Canadian universities. This step alone is going to make Dal far less cosmo-

However, as long as Dalhousie maintains its reputation as the best university in the Maritimes and has the best (only med and law schools in the region it will attract outside people who want a first class

They are a better class of people.

The Pentagon's fog of words

It has been said that truth is the first casualty in war, and justice the second. A third victim should be added to the list - the English language.

The cold war, the hot conflict in Viet Nam and the press department of the Pentagon have combined to produce an extraordinary jargon which year by year has been seeping into and debasing ordinary language.

A familiar example is the word "escalation". When the United States lands another division in Viet Nam, or bombs Hanoi, it is not intensifying the war; it is "escalating" it.

Conversely, any move to halt the raids on North Viet Nam, or otherwise slowdown the fighting is known as "de-escalation".

Then we have various kinds of "responses" to enemy action, particularly the "flexible" or "graduated" response which apparently means that if the other side confines itself to "conventional" weapons the U.S. won't bring out the atomic bombs.

It is, however, bad form to talk about atomic weapons. They are always "the deterrent"

There is much talk, in this connection, of a "credible deterrent", one believed capable of frightening the enemy. (An incredible deterrent, presumably, would be a missile which can't get off the ground, or a warhead which refuses to explode).

This peculiar language has the basic characteristics of all jargon - the use of odd and complicated expressions where familiar words would do just as well. In part, this no doubt reflects the de-

sire of officials to make their pronouncements sound learned and important. But we suspect there is also the notion that ugly ideas and proposals can be made

more acceptable if they are veiled in queer and unfamiliar language. It is more comfortable, after all, to talk about "10 megadeaths" than about the

actual killing of 10 million people.

Perspective

Here I stand... I can do no other that the laws themselves in

that we will not serve your mage which you have set up. Daniel 3:18

Here are three young men of university calibre challenging the autocrat Nebuchadnezzar that they would not conform to his authority. That they remained adamant to the point of being thrown into the fiery furnace, their protection, and their subequent recovery that led to the conversion of the King, are known by all. What is not realized by only the cursory reader is that every Christian, faithful to Christ, is bound to stand as they did. The images are not the same. There is today no fiery furnace, but the ridicule of being called 'some kind'a. . . obscurantist." The images of today's campus are many, but have chosen only two, and vill shown why a Christian cannot bow to them.

The first is the doctrine of Evolutionism. The claims of he evolutionist are based upon doubtful interpretation of scanty evidence, and sometimes upon no evidence at all. While granting that there has been too much personal acrimony on both sides in the past, which I do not wish again to stir up, it is still imperative to re-examine with scientific scepticism the whole question of evolution, and look further into the problems raised by its acceptance. Is Man just another animal in a constant state of change? Is the material eternal? Can Nature change itself by its own forces? Positive inswers to these questions can

Be it known to you O King, in evolution by natural selection. I believe that this leads Gods, or worship the golden to a hopeless, fatalistic philosophy; that the nature of Man can only be changed by evolution in-

to a higher being - a superman. In reply to these questions the Christian claims that Man is unique, created differently from all other creation in the image, or likeness, of God. However, he fell losing that image. His present nature is changed by being re-made a son of God, not by evolution, but by adoption by God through faith in his son Jesus Christ.

By MICHAEL BURSLEM

The Christian further claims that God created out of nothing, that the material has both a beginning and an end. This understandably is an obstacle to the thinking mind, because the mind is not designed to comprehend 'nothing'. It can only work on the material. As our cat has not sufficient cortical power to prove the Binomial Theorem, Man cannot contemplate the non-material. Can Man saythat the non - material has no existence any more than the cat can claim the Binomial Theorem has none? This leads to the second image which the Christian will not worship. This is Naturalism.

Naturalism is the theory that all matter, inorganic and organic, obey Laws of Nature that are binding and unchangeable. This is the first Article of Belief to the naturalistic scienonly be concluded from a belief tist, for there is no evidence

time have remained constant. The christian scientist, however, maintains that they have changed, as when Christ fed the 5000 with the two small loaves and five fishes, or as when he rose from the dead These changes occur according to the higher laws of the supernature, or supernatural. The problem in talking about the supernatural is that Man has only natural language. Its application to the supernatural leads to many misunderstandings, When a Christian refers to Heaven and Hell as places, it is assumed that he means above the clouds or the bottom of a bot-tomless pit. That he believes in a personal Devil does not mean that Satan is a little fellow with horns and a trident. These are misrepresentations But the Christian will defend to his death that Heaven and Hell are places and that Satan is a personal Devil. How can the Christian be so sure? Bewindow affording a glimpse of the supernatural is through the Bible, which bears the authority Having told you what the

Christian will never bow to, let me now tell you to whom he will bow. He worships the one God, his Father, who has placed in his heart these words-

"Whereas I was once blind, now I see."

"I know that my redeemer lives, and at the last day, in my flesh, I shall see God.

Rejected by Council

Why free tuition?

voted down a proposal by President John Young to send a brief to the Provincial Legislature proposing free tuition for first year students in Nova Scotia.

Here is the text of that brief. Editions of this week's Gazette will be sent to all members of the Provincial Legislature and high ranking officials in the provincial Education Department.

The entire proposal for the Provincial government reads as follows:

In order to enable Nova Scotia to progress and develop, both economically and socially, it is necessary to ensure that all Nova Scotians be able to attain the education that they desire and have the ability to utilize.

As a step to ensure a wider education in general, and to university education in particular, the Dalhousie Student Union would ask the Government of Nova Scotia to consider the following

Tuition fees of Nova Scotian twelve with three freshman cred-University be paid by the Government of Nova Scotia.

By paying the first year tuition fees of University students the government will be encouraging all qualified students to gain a desire, regardless of their fi-9% of the rural population of Canada ever achieves an education beyond high school. As well, only 28% of university students come from the 52% of Canadian families who earn less than \$5,000 a year. In contrast to this, one quarter of the university students come from the 6% of Canadian homes which have family incomes of over \$10,000. The promise of payment of tuition fees for first year students will encourage rural and poor families to send their able children to university and hopefully this will break the cycle of poverty in which these families are bound.

Because facilities are limited at Nova Scotian Universities the increased demand for positions parents or other sources an which will be caused by the offer of tuition payments for first year to \$750 per annum. Thus parstudents will have two noticable ents will be forced as in the past effects on universities in the Province:

First, standards will rise because the financial position of dire need the Canada Govern-Nova Scotian Universities forces ment Loan Plan and the Nova them to limit enrollment: of necessity then only those of a high must be maintained. It would enter universities, regardless of in their first year who having their financial position.

because more Nova Scotians will sity should be discouraged from be applying to university that the borrowing either from private ratio of non Nova Scotians to sources or under the Government equitable level and thus not only accumulated savings. In their will more Nova Scotians be at- further years of university these tending in absolute terms but also students could make a larger will mean that approximately and bursary \$400 per student which is conuniversity for financial and other solution.

Student's Council this week reasons this money is not being put to the best possible advantage in so far as the economic and social growth of Nova Scotia is concerned. Therefore, by paying the tuition fees of first year students it will be possible for the Province to realize a greater utility for the already large sums of indirect subsidization which are contributed to universities in the Province. In order to institute a pro-

gramme whereby first Nova Scotian students would be receiving tuition payments from the government one must consider financial cost which the Province will have to bear. Using the enrollment figures supplied by the Association of Atlantic Universities it is possible to predict that between eighteen hundred accessability to post secondary to two thousand grade twelve students will be applying to Nova Scotian Universities for admission in September 1967. Using \$600 as an average tuition per student it would mean that the total of a free tuition programme for first year students would be residents graduating from grade in the vicinity of 1.2 million dollars. This figure is not an its and entering a Nova Scotian unreasonable one for a Province such as Nova Scotia to bear and in fact is somewhat less than the estimated cost of the bursary program which was instituted within the past year. As well, the increased benefits which university education if they so could be derived from a more highly educated population would nancial position. At present only more than pay back the funds invested by the Province of Nova Many people believe that a par-

ent should contribute to the education of his or hers son or daughter; a programme such as the one we are advocating does not absolve the parent of any responsibility in this direction. It is estimated that for a student to attend university that the cost per annum is 1,750 dollars and it is also estimated that the average student saves from the summer earnings approximately \$400. With a programme which will provide free tuition equalling approximately \$600 per annum would men that the average student would have to find from his amount on the average equalled to contribute in some way to their children's education and at the same time for those that are in Scotia Government Bursary plan academic calibre will be able to advisable we think that students their tuition paid by the Govern-Secondly, it will mean that ment and are attending univer-Nova Scotians attending Univer- Plan and if at all possible should sity will be lowered to a more rely on the parental support or percentage terms. Voice of the Student

Hees visit inspires "Ode to Bees"

As might be expected, the recent visit of Mr. Hees to Halifax (and, of all things, to our very own campus!!) has aroused much resentment in a large proportion of our student body. It is sincerely hoped that by his visit Mr. Hees has not furthered his longcherished hopes of becoming the next leader of the Opposition and, indeed, the future Premier of this

If Mr. Hees wishes to present himself as the ideal public image of the modern "Perfect Politician", which he obviously wants to do in his own typical sickening and narcissistic manner; he appears to overlook the fact that only a short time ago his behaviour in the company of a certain female German partner has not been adequately explained to the complete satisfaction of all upon whose votes he would dependent in any future election.

In view of the strong undertow d adverse feelings attending Mr. Hees' visit I would anguest that you print all or part of this letter and/or, hopefully, the following "Ode" which is written in commemoration' of this shameful event. Please note that the spelling of the word "Bees" is not a ypographical error.

"ODE TO BEES" To the tune of "That Was a Cute Little Rhyme", etc., etc., etc.) There was a young woman from Whose bosom was large for her To The Editor:

It was Savigney, NOT Hees Who caused Dief to wheeze, Though both had their fun while

(English Canadian, in case reader is concerned with biculturalism!!)

N.B. Again it is hoped that this letter will be printed in toto, but please make any necessary changes or deletions without subtracting from the intended mean-

Delay...

To The Editor:

The Gazette never seems to be available until three or four days after the publication date. All very well and good for writeture on coming "Campus Events" is always out of date by the time it reaches the students. For example, the issue of Jan. 26,1967 contains notices for Jan. 27-29, but was not available until Jan. 30. I suggest that you either publish notices well in advance, or, better still, discontinue the feature and leave it to the Dal-O. Gram, which, in my opinion, is operating reliably and efficiently. ful to the purpose of that Union. A Disappointed Dal Student
