# CLASSIFIED LIST OF FOSSILS FROM OTTAWA AND VICINITY.

HENRY M. AMI, B.A., SECOND ASSISTANT PALEONTOLOGIST TO THE  
GEOLOGICAL SURVEY OF CANADA.

*Published by permission of the Director of the Geological Survey.*

## INTRODUCTION.

In order to bring together in as systematic and compact a form as possible the numerous species representing the fauna of the Palæozoic and other rocks about Ottawa—heretofore scattered in the various palæontological publications of the Geological Survey of Canada, and chiefly from the pen of the late Mr. E. Billings—it has been deemed advisable to catalogue the same.

The list is a purely local one, and is intended merely as a basis for future operations in this locality.

Valuable assistance was obtained from the elaborate collections made by officers of the survey during years past, especially those of the late Messrs. E. Billings and James Richardson. Only those species which are of local interest appear in the list. The number of these has been considerably increased by the subsequent researches of Messrs. T. C. Weston, Walter R. Billings and A. H. Foord, F.G.S., as also by the evidence obtained after five seasons' collecting in this locality by the writer.

The species are classed under the respective formations to which they belong.

It has been deemed neither requisite nor even advisable to refer the species and genera to sub-orders and families, seeing that at present

so much diversity of opinion exists on the subject. Only the class under which the generic and specific names appear is mentioned, and will, no doubt, prove quite sufficient for all purposes.

There are included in the list 255 species as representing the fossil fauna and flora of our rocks. This number will evidently be swollen considerably by subsequent researches, as the measures are highly fossiliferous and the exposures extremely numerous.

Some species described and recorded by Billings and others, have been excluded from the list because the types are lost or misplaced—these it would be well to bear in mind as *desiderata*.

Several new species of Palæozoic Polyzoa, recently described by Mr. A. H. Foord, and published by the Geological Survey, are incorporated in the list.

The valuable catalogue of Palæozoic Fossils by Mr. S. A. Miller, of Cincinnati, Ohio, has been used to advantage.

### CHAZY FORMATION.

#### PROTOZOA.

*Stromatocerium rugosum*, Hall.

#### POLYZOA.

*Prasopora Selwyni*, Nicholson.

#### BRACHIOPODA.

*Lingula Belli*, Billings.

*Orthis imperator*, Billings.

*Rhynchonella plena*, Hall.

#### LAMELLIBRANCHIATA.

*Cyrtodonta breviuscula*, Billings.

#### GASTEROPODA.

*Pleurotomaria pauper*, Billings.

**ANNELIDA.**

*Serpulites dissolutus*, Billings, or a very closely allied species.

**CRUSTACEA.**

*Isotelus canalis*, Conrad.

*Leperditia Canadensis* var. *nana*, Jones.

**BIRD'S EYE AND BLACK RIVER FORMATION****PROTOZOA.**

*Receptaculites occidentalis*, Salter.

*Stromatocerium rugosum*, Hall.

**POLYPI.**

*Columnaria*, Hall, Nicholson.

*Streptelasma profundum*, Hall.

*Tetradium fibratum*, Safford.

**BRACHIOPODA.**

*Rhynchonella increbescens*, Hall.

*Streptorhynchus filimentum*, Hall.

**LAMELLIBRANCHIATA.**

*Cyrtodonta subtruncata*, Hall.

**GASTEROPODA.**

*Pleurotomaria subconica*, Hall.

**CEPHALOPODA.**

*Cyrtoceras falx*, Billings.

“ *sinuatum*, Billings.

“ *vagans*, Billings.

*Gonioceras anceps*, Hall.

*Oncoceras constrictum*, Hall.

*Orthoceras* (*Ornoceras*) *Bigsbyi*, Stokes.

“ *bilineatum*, Hall.

“ *decrescens*, Billings.

“ *rapax*, Billings.

**CRUSTACEA.**

*Illænus Conradi*, Billings.

“ *ovatus*, Billings.
