SARAH B.
Bred by C. W. WILKINSON,
FISHER'S ISLAND N.Y.
FIRST AT PITTSBURGH & TORONTO.
Score 95.

BARRED PLYMOUTH ROCK PULLET, SARAH B.

FIRST AT PITTSBURGH, PA., 1893, AND TORONTO, CAN., 1899. Scored by FELCH & BRIDGE,
at 95 points. EXHIBITED BY FISHER'S ISLAND FARM, FISHER'S ISLAND, N.Y.

Cyphers Incubators still on top. At Ottawa Fair we were awarded \$10 in Gold and Diploma for best Incubator and Brooder in operation.

There are Incubators and there are Incubators but there is but one

The Cyphers Brooders are Equally as good

Cyphers Incubator

and but one place in Canada to get them, viz:

C. J. Daniels, TORONTO

DON'T be persuaded by the other fellow to buy "something just as good," because the Cyphers has no equal. Don't buy another make because it is a dollar or two cheaper than the very best (Cyphers); that dollar or two will soon be spent in extra time sitting up nights watching that unreliable regulator that varies from 100 to 116 or 120 degrees.

Professor L. G. Jarvis in his last year's test of Cyphers Incubator at Experimental Farm, Guelph, says, "The temperature in the Cyphers Incubator did not vary one half point all through hatching season." These experimental stations know a good thing when they see it. Cyphers Incubators are the only machines used at Experimental Farms both at Guelph and Ottawa.

The Cyphers Incubator is also absolutely fireproof; other makes catch fire, never the Cyphers.

The Cyphers hatches out a larger percentage of good, strong, healthy chicks than any other incubator on the market. Take the Cyphers machines and don't do as many of our customers have done, bought two or three other makes of incubators and then had to buy the Cyphers from us to hatch chickens with. The Cyphers is a strictly first-class machine in every respect and will last a life time. No moisture required as the machine supplies its own moisture.

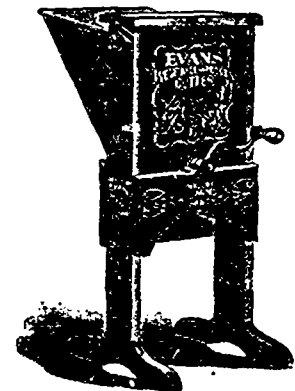

Crank or Balance Wheel.

We are headquarters for all kinds of Poultry Supplies—incubators, Brooders, Egg Testers, Clover Cutters, Bone Mills, Mica Grit, Oyster Shell, H O Poultry Food, Granulated Bone, Superior Meat Meal, Blood Meal, Spratts' Crissel, Cut Clover Hay, Clover Meal, Panacea, Sheridan's Condition Powders, Dr. Hess' Louse Killer, Lee's Liquid Lice Killer, Lambert's Death to Lice, Granulated Charcoal, Evan's Root Cutters, Sanitary Drinking Fountains, Grit and Shell Boxes, Leg Bands, Conkey's Cure for Roup, Poultry Netting, Picket and Wire Fence. Fourteen varieties of Standard bred fowls, eggs and stock for sale at reasonable prices.

Lice and Mites on your poultry? Paint roosts with Lee's Lice Killer. All done. Next morning look, and see all mites and lice lying dead on roost boards. Many customers report finding them in piles a half inch deep where each fowl roosted the night before. Seeing is believing. Same with hogs. Paint rubbing posts or sprinkle floor of sleeping pen. All done. No more lice, mites or fleas. No handling, no labor. Cheap. Only \$1.00 for a gallon can. Want some?

THE CANADIAN POULTRY REVIEW

DEVOTED TO POULTRY, IN ALL ITS BRANCHES

FOR THE FANCIER, THE FARMER AND THE SMALL BREEDER.

VOL. XXII.

124 VICTORIA STREET, TORONTO, OCTOBER, 1899.

No. 10

NOTES AND COMMENTS

A CONSIDERABLE change will be noticed in the make-up of this month's Review, necessitated by the greatly increased business we are now getting. The pages may look a little smaller, but this has been caused by the reduction in the margin alone to permit of sixteen page forms being printed instead of half that number as formerly.

The body type instead of being set by hand is now cast in lines on a type casting machine, this saving valuable time and giving better and more satisfactory results. We look for a particularly busy season during the next six months, and are now prepared for it. We want every reader's assistance. This paper is yours, help it.

Mr. Butterfield is loud in his praise of Sherbrooke Show and its management, and considers it a model for others to copy. About 1,500 birds were exhibited, excellent in quality. No entries are taken after advertised date.

At Ottawa Mr. Ulley informed us that at the recent Quebec show about 1,000 birds were on exhibi-

tion. Mr. Ulley acted as superintendent; Mr. Butterfield judged. The Governor-General, Lieutenant-Governor of Quebec, and Sir Wilfrid Laurier were interested visitors to the poultry house, and stayed a considerable time. Many sales were made. The strongest classes were light Brahmas, barred Rocks, white Wyandottes and game. Silver and golden Wyandottes were fair, Hamburgs, Polands and Bantams moderate.

We were sorry to see at Toronto that Mr. Oke was still suffering from the effects of a lingering illness. The genial "Dick," we trust, will soon be quite himself again.

At Toronto Mr. Rice sold four white Leghorns to go to Sacramento, Cal., and Mr. Bennett disposed of nearly all the barred Rocks he had on view.

Dr. Hutton was able to dispose of all his light Brahmas, and there were numerous other sales, which we failed to get.

The show committee of the Toronto Poultry Show, to be held December 18 to 22, 1899, to whom has been entrusted the running of Toronto's next winter show have engaged the old Walker building on King street, opposite Victoria

street, and this will give ample room to display the birds to the best possible advantage. They have decided to charge no membership fee, an innovation for Canadian shows, as they feel that this fee often deters many from showing.

Another new idea is adopting a novice class for the majority of the varieties, thus giving the beginner an opportunity to win his spurs, and not break his heart, as is often done, by his competing against the old timers, the word "novice" being applied to both the exhibitor and the bird, but the restriction will only be on a certain class of shows.

The awarding of the prizes will be by selecting by comparison six of the best birds in each section where the entries number twelve or over, and then the judge scores these six, the score card being the deciding factor in the awards. In the smaller classes all the birds will be scored. Everything points to a most successful show.

Mr. Bonnick has disposed of his entire stock of buff Rocks, Mr. Bedford being the purchaser.

While at Ottawa we took the opportunity of visiting Mr. Gilbert's department on the Dominion Experimental Farm, where we

found everything in good order and beautifully clean. Mr. Gilbert labors under a disadvantage in that the houses were built before his arrival on the scene, and while well adapted as show houses, built of the best material and in the best manner, they are illy adapted to practical everyday use, and of course beyond any ordinary breeder's purse. This we learn is to be overcome in part by the building of a specimen practical house and yards as a model. We are indebted to Mrs. Gilbert for her kind hospitality during our all too brief stay. Mrs. Gilbert, by the way, has been asked to judge the dressed poultry at the coming big fat stock show. No one better suited for the task could be chosen.

Mr. M. T. Burn was a large winner at the recent New York State Fair.

We met Mr. Mat. Richardson at the ring side at the dog show in Hamilton. He does not altogether confine himself to feathers.

Mr. J. W. Roberts, St. Thomas, has bought all Mr. W. J. James' stock of black red game and his interest in same.

C. J. Daniels & Co. were awarded \$10 in gold and diploma at Ottawa for display of incubators and brooders. They also had a neat stand and business seemed to be good.

The diploma for best collection of poultry was also won by this firm with Mr Fortier as the runner up

From 6th to 31st of August, the last of the summer months, from fourteen hens Mr. Jas. H. Howson gathered 214 eggs, an average of 8½ per day. Our correspondent omits to inform us what the breed is.

As the next Ontario will positively be Mr. Browne's last show he is most anxious to be able to send the Government a report that will beat all previous records. Our readers, no matter where residing, are most urgently requested to send him brief snappy essays on whatever subject seems to them to be of the most use. Do it at once, and have it off your mind. Choose practical subjects.

We are indebted to Dr. T. Shannon McGillivray, of the Canadian Pheasantry, Hamilton, for a pleasant two hours on a visit to his city some days ago. We there saw young pheasants of various breeds by the hundred, tame and in the best of health and feather, so that proof is not needed that the Doctor's unique method of feeding is a success. A large consignment of pheasants is now on the way from Belgium. A strict account of all expenses is kept, and it is a satisfaction to know that even such a hobby, undertaken purely as a relaxation from the work of a large medical practice, has very much more than paid its own way. As Dr. McGillivray remarked, there are no culls in pheasant breeding, each and every one is saleable.

Mr. Thos. A. Browne desires us to thank every officer and member

of the Poultry Association for the confidence accorded him and adds:

"I am at a loss to know how to act or what to do under the circumstances, there are conflicting interests, but I have been considering my position, and as you are well aware that the Poultry Association of Ontario secretaryship was one of thorough enjoyment to me, and my regard for the members was very great, and I look upon the action of the Directors as only another of the many expressions of their respect for me and appreciation of my services in their behalf.

Having accepted the position at their hands for the coming show, together with their kind expression above referred to, I cannot see any other course open but to fulfil my part of the contract, but it must be on the understanding that at the close of this year I will be permitted to retire.

See to it, therefore that you select a successor for the annual meeting in January next, and let him be, if possible, a non-exhibitor, then give him the same support I received, and all will be well.

I will make all the improvements in the books, etc., that have come to me by my experience of years and leave everything in good shape."

At the invitation of W. E. H. Massey, Esq., president of that immense concern, the Massey-Harris Company, Limited, the poultrymen visiting the Industrial were invited to visit his model farm, Dentonia Park Farm, a little east of the city. A four-in-hand was placed at the disposal of the visitors, and met them at the Woodbine. Amongst those present were:

Messrs. Meyer, Willitts, W. Fox, McNeil, Rice, Oke, Bartlett, Essex, R. Fox, Lake, Mann, Anderson and several others. Mr. F. K. Webber, the manager of the poultry plant acted as guide. An enjoyable time was spent and a vote of thanks tendered Mr. Massey for his kindness. Cheers for Mr. Massey and Mr. Webber were the finale. The buildings and stock we hope to review after a personal visit, which a prior engagement prevented us from enjoying on this occasion.

ANIMAL MATTER A NECESSITY FOR POULTRY.

U. S. EXPERIMENT STATION WORK.

It is well known that poultry when allowed to range at will eat considerable quantities of animal matter in the form of insects, worms, etc.

How necessary this animal matter is to the health of fowls, and especially ducks, was strikingly brought out by the recent experiments at the New York State Experiment Station. Two lots each of chickens and ducks, as nearly alike as possible, were used in these experiments. One lot in each case was fed a ration of mixed grains and skim milk or curd containing no animal matter, the other a ration of mixed grains, with animal meal and fresh bones or dried blood. The two rations were about equally well balanced, although the "animal-matter" ration contained a little less protein than the "vegetable-matter" ration. The distinctive difference between the two rations was that in the one case

two-fifths to one-half of the protein came from animal sources, while in the other it all came from vegetable sources.

Two trials were made with chickens.

In each trial more food was eaten by the lot receiving animal protein, the gain in weight was more rapid, maturity was reached earlier, less food was required for each pound of gain, and the cost of gain was less.

During the first twelve weeks of the first trial (starting with chickens one-half week old) the chicks on animal meal gained 56 per cent. more than those on the vegetable diet, although they ate only 36 per cent. more; they required half a pound less of dry matter to gain 1 pound, and each pound of gain cost only 4¼ cents, as compared with 5½ cents for the grain-fed birds.

During the next eight weeks the cost of gain was 7½ cents and 11½ cents, respectively. The animal-meal chicks reached 2 pounds in weight more than five weeks before the others; they reached 3 pounds more than eight weeks sooner, and three pullets of the lot began laying four weeks earlier than any among the grain-fed birds.

With the second lot of chicks, starting at six weeks of age, the differences were in the same direction, though not quite so striking, thus showing that the great advantage of the animal nitrogen is in promoting quick, healthy growth and early maturity rather than increasing the tendency to fatten. . . .

The results were most convincing, almost startling, in the case of ducklings fed the contrasted rations. . . . Before the experi-

ment had been long under way it was noticed that the animal-meal birds were developing rapidly and evenly, but the grain-fed ducklings were becoming thin and uneven in size. It was sometimes almost pitiful to see the long-necked, scrawny, grain-fed birds, with troughs full of good, apparently wholesome food before them, standing on the alert and scrambling in hot haste after the unlucky grasshopper or fly which ventured into their pen, while the contented-looking meat-fed ducks lay lazily in the sun and paid no attention to buzzing bee or crawling beetle. The 32 meat-fed birds lived and thrived, but the vegetable-food birds dropped off one by one, starved to death through lack of animal food, so that only 20 of the 33 were alive at the close of the fifteenth week of contrasted feeding. They were then fed for four weeks on the meat-meal ration, and made nearly as rapid gains as the other lot at the same size two months before, but they never quite overcame the disadvantage of their bad start on grains alone. . . .

In conclusion, then, it may be said that rations in which from 40 to 50 per cent. of the protein was supplied by animal food gave more economical results than rations drawing most of their protein from vegetable sources. The chief advantage was in the production of rapid growth, although the cost of production is also in its favor. While inferior palatability may have had something to do with the marked results, especially with the ducks, the whole bearing of these experiments and others not yet reported seems to indicate that the superiority of the one ration is due to the presence in it of animal food.

JUDGING BUFF BREEDS AT THE INDUSTRIAL EXHIBITION.

Editor Review :

In conversation with many breeders of buffs we were unable to follow the judgment of all of these classes. In the Cochins the first cock was clearly red, "red as fire," some said, and no "golden buff" feathers were visible in him, the dark surface color extending to the skin. These red or cinnamon birds are relics of by-gone days not to be conjured up, but rather to provide a toothsome meal for the fancier's family. These dark birds are so far behind the times that I am sure Mr. Butterfield would no more think of placing a first prize on a Langshan or black Hamburg where the purple tinge took the place of the bottle green than we

do. Then why encourage breeding such birds by placing them over birds of the correct shade? One of the most successful breeders of buff Cochins writes that they have always found these dark under-colored birds (and you cannot obtain dark under-color except when accompanied by a dark surface) produce mottled or mealy chicks, and fade out much more than the lighter or golden shade.

In the Leghorn hens the same took place, the first and third going to the light shade, whilst second was given to the dark.

I am sure it is only due the supporters of these varieties that if premiums are to be awarded to birds of such color it is only right that our Canadian judges should advise us through your columns so that we will know what to mate. Though the Standard states that

"one shade of buff should not have preference over another, provided it be uniform," yet no one can call these winners any shade of buff.

Mr. Judge let us hear from you.

A. W. B.

The advertisement in September number of Review did the trick, as I have sold out all my stock and fixtures as advertised, and this only the 18th of the month, therefore you need not insert the advertisement in October number. There seems to be a lively demand for good poultry, and wish I was not compelled to give up breeding for the present. However, I shall remain a reader of your valuable paper, and at some future time may be able to join the ranks again.

Wm. F. LOWE.

Almonte, Sept. 18, 1899.

GOOSE BREEDING.

Editor's Note—We are indebted to Mr. A. A. Brigham, Ph.D., director of the Rhode Island Agricultural Experiment Station, for advance proofs of this most valuable and comprehensive article on "Goose Culture," and also for procuring for us duplicates of some of the engravings to be used in connection with the Report. The copies of Review containing this series of articles should be carefully preserved for future guidance. The first part appeared in November Review.

(Continued.)

It is better to have two pails, each half full of water than one filled to the top. Goslings can then only get water for drinking, which is all that is desired. Care should be taken that the scalded food is always sweet, and does not stand that is desired. Care should be taken that the scalded food is long enough to become sour and unwholesome. It should be scalded just long enough before wanted for feeding to become entirely cooled. The corn meal and the beef scraps should be of the very best quality, and mixed in the proportion of one part of scraps to four parts of meal, by measure, and a little salt should be added, just enough to season it, care being taken not to use too much. A wooden "feed trough" about four feet long, and some eighteen inches wide and deep, with flaring sides, is most convenient for mixing. A common iron spade is used as a mixer. Enough boiling water should be used to swell the grain and leave it moist and crumbly, but not wet when cold. Feed in the morning what dough the goslings will eat up in an hour after feeding.

At noon feed whole corn in the same way, but, at night a considerable larger quantity of dough can be given them, as they will eat more sometimes during the night, when the weather is cooler, than during the whole day. A little powdered charcoal should be mixed with the dough about twice a week. Pieces of board, with a strip nailed on the edge, make good troughs in which to feed them. If at any time more dough should be given them than they eat up, it should be removed from the pen before giving them a fresh supply.

White flint corn or white corn meal is prized by some, who believe that it produces a whiter flesh or fat, which gives the bird a more desirable appearance. In Europe finely ground oats or barley mixed with milk is used for fattening, and thought to have the same effect on the color of the fat formed. No green food is given after the first day or two. They should have a constant supply of gravel, crushed oyster shells, and broken charcoal. The latter is especially desirable on the score of health, and it is also thought to assist in obtaining a white fat, so desirable for the market. Decayed stumps, or pieces of partially rotted wood, are greedily eaten by geese when fattening, and a moderate supply seems to do them good. It requires usually from seventeen to twenty days' steady feeding to fatten goslings. If fed much longer than that their appetites are likely to fail, and they are also inclined to moult, which of course seriously interferes with fattening, and would also make the bird hard to pick and unsatisfactory when dressed. Any goslings which are

not fat when taken from the fattening pen are usually allowed to run outside for a week or two, where they have plenty of green food and only a moderate amount of grain, and are afterward put through the fattening process a second time. Some fatteners, about two hours before killing the birds, allow them to eat what they will readily consume of sweet, fresh, green food, like green oats, or sweet corn. They claim that this fills the birds up, and they present a more plump appearance and sell better in the market. Goslings should be slaughtered when taken from the fattening pen, or soon afterward. They should never be shipped or carted away from the place alive. If this is done and they are then dressed, the fat will have a dark appearance, as though the birds were not in a good, healthy condition, and they will hardly be saleable. If fat at the time of shipping or carting, they should be pastured upon grass until the dark fat has been absorbed, when they should be again fattened for killing.

No shelter from rain is required in the fattening pen during the summer or fall weather, and geese are almost never fattened for market during the winter. Geese intended for market are now usually fattened and killed not later than the middle of November, at which time the dealers put large quantities in cold storage for the winter and spring trade. One large dealer writes that when real cold weather arrives the flesh and muscles of both sexes rapidly harden and become tough, so that, when kept into the winter and then killed, they do not give satisfaction to the consumer. Goslings hatched in July and kept until January or Febru-

ary, and then fattened and put on the market, will be classed by the dealers as old geese, and bring a very inferior price. Since the almost universal use of cold storage, some dealers are having even their mongrel geese for the Christmas trade fattened and killed at Thanksgiving and kept a month in cold storage, instead of having them killed at Christmas as was formerly their custom. Goslings, while being fattened, should be kept as quiet as possible. They should not be disturbed by the presence of strangers or dogs. It is well to have the same person feed them regularly, as they get accustomed to him and expect their food at certain times. The attendant should be very quiet and moderate in his movements about the yards. Some kinds of geese are more nervous when confined in the fattening pens than others, and at times a flock will get in the habit of running from side to side of the pen, or "churning," as the fatteners term it, when the least unusual thing occurs. Under such circumstances they fatten very indifferently. Several hundreds may be fattened in a pen together, provided it is sufficiently large for them, and that proper care is exercised in distributing the food and water so that all can share alike.

KILLING AND PICKING.

Young geese should be well fed the night before they are to be killed for market, and as before stated, some fatteners feed freely of some sweet green food, like green oats or sweet corn, about two or three hours before killing. The room to be used for dressing geese should be provided with a box to receive

the feathers, at which two pickers can conveniently sit, one on each side. The box should be about twenty inches high, and perhaps two feet wide. A board across one end of the box makes a convenient place for a pail of water, used frequently by the pickers for wetting the hand. For killing, a stout knife with a double-edged blade about four inches long, tapering to a point something the shape of a dagger blade, is commonly used. Everything being prepared, a number of goslings can be caught and placed in boxes convenient to the picking room. The bird to be killed is taken by the operator and held between his knees, the head resting in the left hand; a firm cross cut is then made in the upper and back part of the mouth, severing the main arteries of the head. The bird is then taken by the legs and a quick sharp blow on the head with a flat paddle, made from some hard wood, stuns the bird. Picking begins immediately. The operator sits in a chair beside the box, with the bird, back down, across his knees, the head being firmly held between the knee and the side of the box. The feathers are first removed from the under part of the bird, beginning at the abdomen and working toward the breast. All the feathers should be removed as the work progresses excepting possibly a few pin-feathers, which will have to be taken out later with a knife. The down can be best removed by wetting the hand and passing it quickly over the skin of the bird. Care should be taken not to tear the flesh, as the skin of some goslings is very tender. Birds with dark feathers, particularly of Brown China, and sometimes of African

blood, pick harder and tear more easily than Embden or other white-feathered varieties. The feathers should be picked from the lower third of the neck, leaving about two-thirds of the length of the neck next to the head unpicked. The wing feathers beyond the first joint are also left, and in picking mongrel geese the tail feathers should also be left on the bird. When many pin-feathers are found on the birds, they have to be removed with a sharp knife. White pin-feathers can be shaved off as the part remaining in the skin will not show, but black pin-feathers must be removed entirely. The operator takes the skin of the bird between the fingers of the left hand and makes a slight longitudinal cut in the skin on the side of the pin-feather, when it can be easily removed. A common shoe-knife is most convenient for this purpose, and should be kept very sharp, as a razor edge is necessary to do quick and satisfactory work. Removing the pin-feathers one by one is, of course, a slow process, but it has to be done, that the birds may present a good appearance. In picking, only the saleable feathers are put into the box, the wing and tail feathers and any soft pin-feathers being thrown upon the floor. Professional pickers usually receive ten cents each for picking green geese.

(To be Continued.)

The 4th edition of James Rankin's Book, **NATURAL AND ARTIFICIAL DUCK CULTURE,**

is just out. It has been enlarged, revised and illustrated. A question bureau has been added, designed to answer all questions concerning the diseases, cure, management and feeding of the duck from shell to market. Price 25 cents.

Address H. B. DONOVAN, Toronto.

THE CAROLINA DUCK.

BY H. S. BABCOCK, PROVIDENCE, R.I.

THE Carolina, Summer or Wood Duck as it is variously called, is one of the most beautiful species of the duck tribe, the most beautiful, I think, with the exception of the Mandarin, to which it bears considerable resemblance, and to which it is no mean rival. It is not perfectly domesticated, though it is becoming so year by year, and the time seems to be assured when this beautiful bird will become thoroughly domesticated.

For years it has been thought to be strictly monogamous, but domestication seems to be breaking down this characteristic, and a single drake in some cases has been known to mate and breed with three or four females. This result is a striking example of the changed characteristics which a change in environment produces.

Another effect produced by more perfect domestication is that the Carolina duck breeds more freely than it was wont to do in confinement. At first it was difficult to get it to breed at all, but in these later years this difficulty seems to be wearing off, and in time there will probably be no difficulty in this respect.

While Carolina ducks are good eating, what there is of them, yet it is their great beauty which recommends them to the fancier. They are really too handsome to eat. Beauty has a utility of its own, a mission which it performs, in rendering life more glad some. Few people are aware how large an element beauty is in the life of

each individual. It is employed upon our furniture, our household effects, our knives, forks and spoons, our dress fabrics, and indeed upon nearly every article of use. And why should we not allow a place for it among our poultry, for there, as everywhere, its influence refines our natures and softens the asperities of our conditions.

Note the description of the adult drake: Bill red, margined with black; eyes orange; crown and front of head, with crest, bronze green changing to violet, marked with a line of white running above the eye and another band of white extending from behind the eye; throat white with crescentic shaped collar, cheeks and sides of the upper front of neck, violet; breast claret color, spotted with white, with a large white crescent near the shoulder shaded by another of black; sides of body are penciled with undulating lines of black on yellowish drab ground color; back is dusky bronze with green tinge. Speculum, or wing spot, blue and green. This imperfect description of the drake is sufficient to establish the truth that here is beauty of a high order. But the bird needs to be seen to be properly appreciated. Words convey but an imperfect idea of the beauty it possesses.

The eggs are small and white, like polished ivory, one writer says. In the wild state they are usually laid in some hole in a tree, and it is said the mother carries the ducklings to the ground after they are hatched by seizing them in her bill.

Not for the market poultryman are these dainty birds. Let him have his gross-bodied, deep-keeled big ducks. But the fancier will

find them an unfailing source of delight, their beauty refreshing his soul.

EASTERN ONTARIO POULTRY ASSOCIATION.

THE annual meeting of the directors of the Eastern Ontario Poultry Association was held at Ottawa on September 20. Mr. C. J. Devlin was elected president in place of Mr. Higman, resigned, and Mr. Campbell Smith was elected one of the vice-presidents in the place of Mr. Higman.

The prize list was revised and several additional classes added. The prizes were increased to one dollar and a quarter first prize; seventy-five cents second, and where there were five or more entries a third prize of twenty-five cents. The rule requiring that a certain number of entries should be required in order to win the prize money in certain classes was repealed.

It was decided to make immediate arrangements to order the wire coops for which the Government had made a special grant.

Mr. F. H. Benjamin was appointed assistant secretary, and Mr. W. Gray, superintendent, for the next exhibition, which will be held at Ottawa.

There were several visitors present during the directors' meeting, including Mr. Ulley, of Montreal; Mr. Donovan, of Toronto; Mr. Thompson, of Allan's Corners, and Mr. Howison, of Brockville.

6000 FERRETS.

Pure blood furnished, not skin. Finest strain in the land. Bred from good workers. Small, medium and large breeds. Trained. Will kill rats and hunt rabbits. Price low. Safe arrival guaranteed. Book "Care and Working," free.

S. & I. Farnsworth, N.Y. London, O. 1899

BANTAMS AT THE INDUSTRIAL TRIAL.

THE Bantam classes are a feature at Toronto, where a liberal list is provided, and the best birds in the country compete.

Second black-red cock is sounder in breast than the first. We missed the two grand birds shown by Mr. Barber in the winter. There was nothing here approaching the first cockerel then.

First hen is leggy and neat; third smaller than second, and fully as reachy but hardly in as good feather. Barber's cockerel (we forget his position in list) is reachiest of any by far, carries his body badly. First pullet quite a baby, neat. Third might have changed with second. Brown reds good. First cockerel reachy, long enough in feather. First pullet very neat, and others good. We have seen better pyles and duckwings. Whites very good, especially females. Some lack brightness of leg color. First and third cockerels excel in this, but are far too creamy in color. Nice birchens won in the A. O. V. class. Polish a nice little lot. The beardless with proper combs and the right leg color are coming. White Japs hardly as good as last year. First hen the best of the lot, very low set and far ahead of second and third. Second cock best color, but

tail not fully grown. Chicks fair. A. O. C. Japs contained some good black-tailed and a neat pair solid blacks. Booted few and all whites.

White Cochins large classes and good, as were the blacks, in the latter two grand pullets were first and second. In buffs the judge picked out a very shapely bird, with good foot feather but high in color, for the winner. Second fails to him in shape, size and condition, but is far nearer the right color. First hen small and very shapely, the best in the buff classes, which were but fair as a whole. Chicks a moderate lot.

A novelty was a pen of light Brahma Bantams that won in the A. O. V. class.

Black Rose Combs good. Very neat, stylish little cock first, grand lobes and tight-fitting comb. Second small. First hen very neat, beautiful lobe. Second close up. Chicks very nice indeed. White rose combs not many but good. Excel in purity of color.

Sebrights, both gold and silver, were good classes.

A little flesh food once a day will now be relished by the young Bantams, and helps them to feather out. Beef liver, well boiled, left drain, and then scraped, is as good as anything you can give.

Bantam chicks must have a dry, warm pen these cold, wet nights. Chaff or oat hulls make the best of litter.

Send us some items for this department, breeding experiences, etc. Help others.

Rankin Bros. were unfortunate in losing the golden Sebright cock they had at Toronto. He took cold and a rapid development into roup carried him off.

Feed your waste tomatoes to the Bantams. and see how they will enjoy them. They like them just as much as you do.

Tell your Bantam friends they can get Review a year for 50c. or three years (outside Toronto) for \$1.00.

GAMES AND GAME BANTAMS

Also FOX TERRIER DOGS

OUR RECORD AT THE PRINCIPAL SHOWS:

Jan. 1891—New York. 18 firsts, 7 seconds, 4 V.H.C., 4 H.C., 3 ten dollars in gold, also 3 five dollars in gold. 1893—The World's Fair, Chicago. On 45 entries, won 33 firsts, 7 seconds, and 3 thirds. 1895—January—Buffalo, N.Y., 19 firsts out of 29 on Games. First on Game pen, also ten dollars in gold for best collection, also a good share of firsts on Bantams. 1896—January—The Ontario Show at London. We won more specials than all the Game and Game Bantam breeders, including the Champion Game Cup, the Cham-

plion Game Bantam Cup, and a waggon load of other specials, too numerous to mention. 1898—September—The Toronto Industrial, 16 firsts, 11 seconds, 12 thirds and two medals. 1898—September—The Western Fair, London, 14 firsts, 12 seconds and 10 thirds. 1898—September—Ottawa Central Fair, 16 firsts, 14 seconds and 15 thirds. "Ontario," Toronto, 1899, 9 firsts, 13 seconds, 14 thirds, and 6 specials. At the great New York Show, 1899, 8 firsts, 6 seconds, 3 thirds, 4 fourths and 7 specials.

INCUBATORS AND BROODERS.

We invite correspondences for this important department of commercial poultry raising, which is growing so rapidly in Canada.

MR. A. G. Gilbert, the manager of the Poultry Department of the Government Farm at Ottawa, purposes taking up the artificial hatching and raising of poultry, and work will soon be begun on the needful buildings and pens. We may look for something good from his experience, as he will run the department on strictly business lines.

EXCLUSIVE ARTIFICIAL INCUBATION.

The question has been suggested whether the general and continued use of incubators and the consequent persistent disuse of hens for hatching, will not tend to lessen and perhaps ultimately destroy their natural inclination to sit, thus eventually rendering all breeds practically "non-sitters," and compelling us to adopt artificial incubation whether we will or not.

We have never considered the subject from this standpoint, and are not fully prepared to say either that there may or may not be some occasion for the apprehension. We all know what unnatural results have sometimes been accomplished by breeding; some of them carefully sought after, and others reached incidentally, or accidentally, but none the less wonderful.

Take, for instance, the duck whose fondness for water is proverbial, and yet when bred year after year and for generations solely for rapid growth, and deprived of water except for drink, that they may lose no time or flesh in unnecessary exercise, but give their undivided attention to attaining a weight of five or five and a half pounds at nine or ten weeks old, this natural desire and liking for water and swimming accommodations and privileges sometimes seems to have been so thoroughly bred out of their very nature that we have known of instances where, as an experiment, they had to be forcibly driven into the pond, and instead of remaining there and enjoying it, they acted like so many old hens, frightened nearly out of their wits, and took the first opportunity to get ashore, and made the best of their way home. They knew nothing of aquatic delights, personally, nor had they ever been told of them by their parents who were equally ignorant on the subject as themselves. Neither had their unsophisticated ears been regaled with any traditional "tales of the ocean," from their grand or great-grandparents; consequently, they seemed in blissful ignorance of everything except their humdrum life of confinement, eating, drinking and growing, which to them was doubtless equivalent to "eating, drinking and being merry."

Now this instance, and similar ones, of unnatural results from peculiar modes of breeding, may seem to be pointers in the direction of our querist, but we can hardly regard them as anything more; and in corroboration of this opinion, we may point to our own

In the country, village, or in the suburb money may be made in the poultry business by the employment of correct methods. You can't afford to keep hens to hatch and brood your chicks. A better and more economical plan and one more certain of good results will be found in the use of the

RELIABLE INCUBATOR & BROODER.

The remainder of the story and plan of procedure is in our Book on Incubation and Poultry. Send 10 cents for it.

BARRED PLYMOUTH ROCKS.

In the pen a cock and four pullets, purchased and selected for me by the well-known poultry expert, Mr. Jarvis, of the Ontario Agricultural College, Guelph, who has also acted as judge for many years in the leading poultry shows of Canada and the United States. The Cock is Thompson, bred at Canton, Ohio. It won first as a cockerel. Again under Bridge it this year tied for first place for cock in very strong competition. One pullet took first at Canton, Ohio. The other was one out of the pen which took first for the best breeding pen. The cock was also pronounced by Mrs. Comyns-Lewer, editor Feather World, London, Eng., who visited the great Toronto Poultry Show this year, as the most perfect type of the Barred Rock she had seen on the American continent.

Settings: 13 eggs, \$3.

Buff Rocks, choice 13 eggs, \$3.

NEWTON COSH,

800

Box 218, Brantford, Ont.

strain of Plymouth Rocks, which of course naturally belong to the class of good sitters, but for many long years every hen found in the nest on the last trip of the attendant through the houses at dusk, was supposed to be there for no good purpose, but was seized and condemned as a sitter, and as violating the rules of the farm, and summarily cast into prison (of which institution we have a miniature one in each apartment of every poultry house on the place) to be liberated again in three or four days, or upon making a suitable apology and promising to sin no more. But yet, after this thorough treatment, lo these many years, the only visible effect in the direction of the non-sitting theory is, that in our strain, this propensity to sit, is much more readily and quickly broken up, than it would otherwise have been, and that they resume laying almost immediately. Probably the majority of them, if permitted to sit, might not stick to their sitting long enough to hatch, although during every year some two or three of our pullets will manage to steal their nests somewhere in the bushes, and hatch a brood of chickens, more or less numerous, in spite of skunks and other nocturnal enemies who delight to steal the eggs almost as fast as laid. We cannot, therefore, lose any sleep in apprehending that the continual use of incubators, and the disuse of sitting hens, will so

discourage "bidly" from availing herself of her high prerogative, as to materially affect any poultryman now meandering on the surface of our planet.—W. H. Rudd, in Poultry Monthly.

POULTRY ASSOCIATION OF ONTARIO.

MEETING OF THE DIRECTORS

THE Directors Board of the Ontario Poultry Association met during Toronto show in the Board room on the grounds, Mr. J. R. Stratton, M.P.P., in the chair. Others present were: Messrs. W. J. Bell, Hutton, Brown, Trew, Bogue, McNeil, Senior, and Dr. A. W. Bell.

The chairman on rising prefaced the business with a few congratulatory remarks, and thanked the association for the honor done him. A letter was read from Mr. Thos. A. Browne resigning his position as secretary. On motion of Messrs. Trew and Brown he was urgently asked to retain the position until the close of the present (official) year.

The classification of last year was adopted in full.

Dr. Bell stated that at the request of several exhibitors he would ask for the augmentation of the prize money in the larger classes.

After discussion it was moved by Dr. Bell, seconded by Mr. McNeil and carried, that in classes of twelve entries or over the prize money shall be \$3, \$2, \$1 and 50c.

The judges of previous years were re-appointed, viz., Messrs. take are as follows: Mr. Butterfield, Brahmas, Cochins, Langshans, barred Rocks, and all Bantams; Mr. Jarvis, Dorkings, white and buff Rocks, Leghorns,

Polands, turkeys, ducks and geese; Mr. Smelt, Wyandottes, Dominiques, Javas, Spanish, Minorcas, Andalusians, Redcaps, French, Sultans and A. O. V.; Mr. Johnson, Pigeons and pets.

The local association is to get the usual sum of \$100, the door receipts and the privilege of publishing the prize list for the running of the show.

The appointment of a superintendent was left to the President, Mr. Trew and President of the Peterboro' Association.

A letter from Mr. Tozer, of London, referring to the special prize offered at the late show on brown Leghorns was ordered fyled.

Dr. Bell contended that several items charged in the Ontario accounts should come out of last year's balance. No action was taken.

Moved by Mr. Trew, seconded by Mr. Bogue and carried, that Mr. McNeil be paid part of his expenses, i.e., \$20, as delegate to the A. P. A. meeting at Boston. The show will be held at the usual time, the second clear week in January. The president, in thanking those present for their attendance, promised all sorts of nice things for Peterboro'.

Mr. R. Oke acted as secretary.

POULTRYMEN CAN RAKE IN DOLLARS BY USING

Hersee's Reliable Poultry Food.

We say by feeding this food that it is just as easy to produce more eggs as it is to make a cow produce more milk. Poultrymen and farmers everywhere are using this food. Shortens moulting and prepares your bird for the show. Most wonderful food known. Ask for it and take no other. 15c. and 25c. a package. Sold by leading dealers, or sent direct.

WELLAND, ONT.

1099

CANADA'S GREATEST FAIR.
TWO THOUSAND SEVEN HUNDRED
BIRDS ON EXHIBITION.

THE Toronto Industrial Exhibition Poultry Show was this year not quite so large in numbers as that of 1898, but the falling off was mainly in the pigeon and cage bird classes and in the breeding pens, where the committee had done some chopping down. We are indebted to the indefatigable Dr. Bell for the following comparison of the two years:

**COMPARISON OF POULTRY ENTRIES,
1898 AND 1899.**

| | | |
|-------------------|-------|-------|
| | 1898. | 1899. |
| Old birds | 715 | 755 |
| Young birds | 764 | 771 |

| | | |
|---------------------------------------|--------------|--------------|
| Breeding pens (number of birds) | 576 | 452 |
| Turkeys, geese and ducks (old) | 104 | 94 |
| Turkeys, geese and ducks (young) | 94 | 64 |
| Ornamental | 94 | 71 |
| Cage birds | 132 | 113 |
| Pigeons | 413 | 273 |
| " Homing | 161 | 91 |
| | 3,053 | 2,684 |

Mr. Daniels had the building and pens all in readiness for the reception of the exhibits, and the use of more netting in lieu of boards made a big difference in the light. A coat of whitewash—warranted to come off on one's clothes—also tended to brighten and sweeten

the building and coops. The weather after the first day was cool, and the birds appeared to stand confinement well. The feeding and watering was well looked after.

The judges got promptly to work and finished in good time. We do not remember ever seeing so many white birds of a bad color, doubtless due to the dry, hot season, assisted by the feeding of yellow corn.

Barred Plymouth Rocks made enormous classes, but taken as a whole we have seen them much better. First cock is a stout, good bodied bird, neat headpiece, good legs and nice color. Second loses to him in size. We rather preferred third, larger, neater in head,

stout shanks, tail not in. Fourth small, bright in color. First hen is quite Cochiny enough, broad, deep body, neat head, old coat on. Second stands higher off the ground, dark. Third, a bit smaller, but brighter in color. Fourth a good one. A hot class. Too many cockerels too young. First, a neat one of decent color, nice head-piece. Second up on his pins, white in lobe, grand shanks, neat head, wants time. Third and fourth good.

Taken as a whole, we were rather disappointed in the cockerels, we are appearing to be losing almost all breast shape.

First pullet large and mature, in grand feather, nice bright color, shanks a little too much shaded in front; a good one. Second quite young. Third and fourth bigger, but darker. The pens a show in themselves. Lake won the collection medal.

Buff Rocks.—First cock big and broad, could do with more breast; nice even color, tail not in. Second runs him close; larger, broader in breast; on the whole preferred him. Third not so good in shape and color. First hen we greatly liked, even in color, large and of good shape, comb a bit twisted. Second not so good in shape, nor yet quite so fit. Third large, not in show shape. First cockerel nice even light color and fair shape. Second a good one that runs him close. Third larger, too red and uneven. First pullet a lovely even color one, neat in shape and well shown. Second also good, fails to first in shape of breast. Third large, dark.

White Rocks an immense lot, and quality grand. First cock very white in color, good shape, might

have brighter shanks. Second not yet fit, brassy, a nice one. Third same. First hen a good one, in fair feather; comb quite large enough; nice shanks. Second blocky; neat head, good color. Third a big hen, excellent color, light shanks; we made her a winner. First cockerel a large well grown one, neat head good color, carries tail too erect. Second close up, grand shanks. Third also good, and pullets a nice lot, second best legs. First pen nice whites of good sound color, second good buff chicks.

Black Minorcas.—First cock a really typical Minorca, grand color, good broad back, comb good in shape and erect, lobes a bit rough, well shown. Second not so fit, comb stands off head at back, tail not in and might have changed places with third, a good shaped one, but very rough in lobe. Fourth and fifth have been good ones, not now in show shape.

First and second hens both large birds, as were those in the winning pen; all typical. Third smaller but in nice feather. Second pen contained one hen of extra merit, a large good bodied one.

First cockerel good in color and lobe; we do not like his comb. Second and third fair. We made an unnoticed one (Clemo) the winner, not a good class.

First pullet a neat one all over, good color, lobe and shanks. Second and third a neat pair, not as mature.

White Minorcas were few, of fair quality.

Dark Brahmas not large classes but good.

Light Brahmas made big classes, and we are glad to see this grand old breed prospering again. First cock a big one and good in black,

but showing creamy in white, comb too erect at back. Second larger, purer in color and in better fit; others good. First hen in fine fit; good color and coverts, neat head. Two, three and four good all round. Chicks a nice lot; we much liked first pullet, that with age should greatly improve. A great many raw yet. Fourth cockerel we liked as well as any.

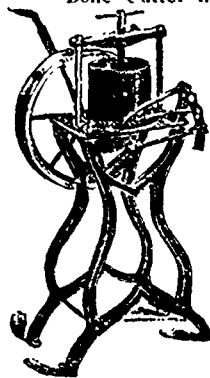

Buff Cochins.—First cock we didn't like at all, too red in color and too coarse in head. Second is much neater in head, and is lighter in color, and fairly even, higher off the ground than first. Third a decent one. An unnoticed one (Bell) is grand in color all over, carries a lot of feather, tail not in; easily the best in class. First hen a typical Cochin, a mass of soft feather and even in color, excels in cushion. Second good, but a long way behind first. Third and fourth good. A nice even pair of chicks won, second pullet carries lots of feather. Cock in first pen a nice even color, good colored tail carried a trifle too erect.

Partridge not large classes but good. In whites we have seen the old birds looking in better fit; a good lot. First and second chicks two nice pairs, and shown very fit, carry lots of feather. Second pullet a bit better in cushion than first. Third has not the age. Blacks were good though not numerous.

Black Langshans.—As there appeared to be a good deal of criticism regarding the judging in the cock class, we took a good look at them. First was shown in good feather, is a bird of grand lustrous color, green to his tail tips, neat headpiece, not high enough on his legs. Second a bigger bird, not quite so grand in color, better legs

Green Bone Cutters.

THE Webster & Hannum Green Bone Cutter, formerly made at Cazenovia, N. Y., is now being manufactured and sold by the undersigned. This Bone Cutter has always been a favorite with poultrymen on account of its many advantages over all other machines. With our unsurpassed facilities for manufacturing, it will be better than ever.

The new cutter-head is practically *indestructible, absolutely self-feeding and self-regulating*, as to the supply of bone fed to the knives. It will cut meat and gristle equally as well as bone. Made in sizes suitable for hand or power use. Read what F. E. Dawley, Director, Bureau of Farmers' Institutes, New York State, says of it:

"I would urge every one who keeps fowls to feed green bone if they are after profit, and from experience would say, get a Webster & Hannum Cutter to do the work with. I am not at all interested in the sale of the W. & H. Cutter, and have paid full price for the one I use, so have no axe to grind." F. E. DAWLEY.

Mr. Dawley raises poultry "by the acre." The only Bone Cutter receiving award at World's Fair, Chicago. *Send for our free booklet, which tells you how to keep poultry for pleasure or profit.*

E. C. Stearns & Co., Box 16, Syracuse, N. Y.

C. J. DANIELS, 221 River Street, TORONTO.

Has the Sole Canadian Agency for the above firm.

Second younger, not quite so high in color, raw. Third larger, not even enough. First pullet very even in color, just a bit dark, grand tail, nice shape. Second darker but fairly even. Third young, light shade, but has not yet got her full color. Fourth nice in color, greenish color in shanks. Pullets a nice lot. Blacks a small class of good birds; second cockerel bigger than first, but leggy.

Silvers and goldens were good, especially the pullets in the former, in which distinct marking is now more pronounced.

Polands, of course, were good, though in some classes, especially in unbearded golds, we have seen better.

Glad to see some new men in white-crested blacks, who won with good specimens.

Hamburgs good all through, but little competition.

Spanish few but good.

Andalusians not large classes, but quality high, especially the winners.

Buff Leghorns did not make as large classes as we have seen, but quality was high. First cock nice color, grand legs, good comb, rough lobe. Second better in lobe but smaller and not so even in color. Third stylish, but too dark. First hen is a nice soft buff all over, in splendid trim. Second looking well, not so large, darker. Third more like type of first and fourth, was not in shape. First cockerel a large, well grown bird, sound tail, bright color, grand legs, erect comb, with too many serrations, moderate lobes, a good bird that won well. Second was gone on Friday a.m. when we took our notes. We liked color of third, nice comb, fair lobes, good colored tail. First and second pullets a

rougher in face. If first is the correct type then third might have been second—low set and in good feather. First and second hens in same pen, a grand colored pair of good size, one shows quite enough cushion. In chicks the judge picked out the short legged ones again, so was, at any rate, consistent in this. Karn won the collection medal. Whites but few, fair quality. chicks now show their correct leg color.

Dorkings were a really good lot, and numerous outside the whites.

Javas few but good; blacks, whites and mottles shown.

White Wyandottes were a large lot; taken as a whole we have seen higher quality though the winners were good. First cock a good broad bird, low-set comb, good legs and color, not through molt. Second loses to him in shape and depth. First hen good in color

and legs, neat comb, hardly fit yet. Second larger, not so bright, third we liked as well. First cockerel well grown and neat. Second should have been thrown out for foreign color (red) in wings, which was plainly evident. Third yellow on top, neat shape, and fourth the same, only more yellow. First pullet a very nice one; neat, good color, nice shanks and beak. Second also good, not so mature. Third not quite so good in shape, excellent color.

Buff Wyandottes.—Too many red in this class. First cock an easy winner, blocky, even in top color, comb large, some white in lobe. Second fails to him in shape, not in so good feather. Third smart, good legs. First hen large and of good shape, mottled in color and same remark applies to two and three. First cockerel has grand legs, fair color, lacks breast.

nice even colored pair, well grown and well shown, good legs and lobes, combs large. Second a bit ashy in tail. Third and fourth also were not so mature nor so good in lobes, good legs. Take them as they are now the best won. Pens good, a nice even lot won.

Black Leghorns.—Large classes and show a good deal of improvement. First cock a typical one, with grand color, good comb, poor lobes. Second, good. Third, small and neat, a bit high in tail carriage. First hen, grand color, in fine fit. Second, larger, hardly as good in shape, well shown, excellent color. Third, good. Chicks all through a nice lot, though we expected to see something better in leg color.

Browns good all through and lots of them. Whites had too many bad in color; a bad year for this. The winners, old and young stood well out; outside of these there were not many good ones.

French, outside of Hondans, which this year were exceptionally good and large classes, were few though the quality was high.

Rhode Island Reds were blocky birds of great vigor. We greatly liked the type and shape of first cockerel.

Orpingtons a nice lot. We were glad to see some new exhibitors. Well grown buff chicks were first and first; they look dangerously near to white-legged Rocks.

Red Caps.—Few compared with last year's big classes. So it goes.

Rose Comb Leghorns.—Not large classes, but good. The whites want to be white, not creamy, as is the first pullet and others.

Game.—Black Reds a hot lot. First cock is reachy, long head, stands on good feet, in poor fea-

ther. tail mostly out. Second tail also out; a good upstanding bird, as is third. Three good ones. First hen is hard feathered and leggy, as is second, though not quite so close in feather. Third a big hen, not in shape. First cockerel stands well up on good legs and feet, hard in feather, neat close, whip tail. Second, reachy, wants age. Third, ditto and shows a lot of white in face. First pullet exceptionally reachy, good color, long head, stands well up. Third beats second in tail and reach.

Duckwings and **Brown Reds** were poorly filled classes, though the stuff was good.

Pyles a better lot. We greatly liked first hen, a typical game, hard and tight in leather, good head and tail. First cock stands well up on bright, yellow legs.

Indian Game.—A big lot of good birds. Mr. Parsons was unfortunate in having all his old bird entries smothered on their way to the show; a great loss to him.

Silkies and **Sultans** were good. The **A. O. V.** class, filled with **Anconas**, **Frizzles**, etc.

No pheasants were shown, and many were the enquiries made for them.

Turkeys, ducks and geese were not as numerous as last year, though good. Some nice **Indian Runner** ducks shown here for the first time.

Several incubator manufacturers were present with machines, including the **Cyphers**, which hatched 101 chicks from 120 eggs—a nice strong lot—the **Toronto**, the **Safety**, etc.

Mr. Daniels made a nice display of bone mills, vegetable cutters, grit, shell, and the hundred and one other things he deals in, and busi-

ness was brisk with him all during the show. **Lee's Lice Killer** had a big run.

The following are the awards:

Barred P. Rocks.—Cock—1st, A. H. Lake, Toronto; 2nd, Armstrong Bros., Fergus; 3rd, Geo. W. Miller, London; 4th, R. Mackay, Hamilton; 5th, Henderson & Billings, St. Marys. Address

MORE PREMIUMS HAVE BEEN WON

by these two strains during the last four years, when competition was hottest, than all others combined. The \$250 Madison Square Cup and the \$25 Elmira Cup were won by these strains.

We can spare now, from our breeding stock, 15 Minorca hens at \$3 each, 15 more at \$4 each and 20 Exhibition hens at special rates, 10 B. P. Rock hens, well barred to the skin, \$3 each, 1 cock and 4 hens, C. I. Game, \$20, 2 Trios B. Javas; \$10 per Trio; 3 black Cochlin Bantam cocks and 6 hens, \$2 each. All hatch of 1897 and 1898. Every one offered will breed winners if well mated. We wish now to reduce stock.

Eggs from all varieties balance of season, including our best, \$2 for \$13. Show birds from all, special rates, 1000 chicks to select winners from in the fall.

Poultry Farm at Dalen, N. Y. Nan o the Review.

J. Y. BICKNELL, 314 Vermont St., Buffalo, N. Y.,
or C. S. WHITING, Darien, N. Y.

My Score Cards and Rubber Bands will be furnished by the Editor of the REVIEW and duly saved.

Talking Points of Interest.

Large size, clear plumage, yellow legs and vigorous constitution should make Mueller's strain of Barred Plymouth Rocks and S. C. Brown Leghorns worthy of your attention. Your inquiry will be promptly attended to. Stock for sale at all times.

Box 391, Waterloo, Ont.

SPRING RUN POULTRY YARDS

DR. W. A. CRUM & L. A. LOGSDON, Carey, Ohio, U.S.A

Have always won the Lion's Share

of prizes in the leading shows, on their white and Buff P. Rocks, White, Silver and Buff Wyandottes, and Toulouse and Embden Geese. At the great Toledo show, and at Carey and Sycamore, Ohio, they swept the platter. If you want stock that will win or eggs that will hatch winners for you, send us your order. **BIRDS SCORED TO 96½.**

Send for circular giving prices with show record. Mention REVIEW. 400

CUT PRICES

As I have hatched all the chickens I can possibly attend to I will sell

Eggs the Balance of the Season at Half Price, \$1.50 per 13, \$3 per 26, in Mixed Settings.

Polish and Hamburgs, all varieties, and Houdans. Customers desiring eggs all from one variety may have them on payment of 50c. per 13, or 75c. per 26 extra. **Eight chicks from 13 Eggs Guaranteed, or replace at half price.** As breeders and first prize show birds at \$8 a trio, less than one half their value. G. B. Polish, W. B. W. Polish, Buff L. Polish, W. C. B. Polish, G. Un. Polish, B. Hamburgs, J. S. Hamburgs, S. P. Hamburgs, G. P. Hamburgs. Not a bird under 90 points. If birds are not satisfactory I will cheerfully return money, less express.

H. E. BECKWORTH, Prop., Polish Poultry Yards,
Box 251, BLENHEIM, ONT.

BUFF COCHINS.

All my chicks are from my two winning females at the late Industrial, where only 4 birds were shown by me winning 3 premiums.

A. W BELL,

536 Ontario St.,

TORONTO.

BUFF WYANDOTTES AND PLYMOUTH ROCKS.

I WILL SELL MY ENTIRE STOCK OF THOSE VARIETIES without reserve. I have many birds that are fit for the hottest company, and have won the HIGHEST HONORS at all the leading shows in Canada (including Ontario). I have also a choice lot of young stock bred from winners that will be sold very cheap. Write your wants. I am sure I can satisfy you. 900

A. O. V. Ornamental Bantams.—Cock—1st and 2nd, Donovan; 3rd, McNeill. Hen—1st and 2nd, Donovan; 3rd, McNeill. Cockerel—1st and 2nd; pullet, 1st and 2nd, Donovan.

Bronze Turkeys.—Cock—1st, W. H. Beatty, Wilton Grove; 2nd, W. T. Hanksaw, Glenworth; 3rd, Hodgson. Hen—1st, Beattie; 2nd, Stewart & son; 3rd, Hodgson. Cockerel—1st, Wm. Main, Mill; 2nd, Beattie. Pullet—1st, Beattie; 2nd, Main.

White Turkeys.—Cock—1st, Beattie; 2nd, W. E. Wright, Glenworth; 3rd, C. E. Smith, Fairfield Plains. Hen—1st, Beattie; 2nd, Wright. Cockerel, 1st; pullet, 1st, Beattie.

A. O. V. Turkeys.—Cock—1st and 2nd, Luxton; 3rd, G. Tyndall, Toronto. Hen—1st, Smith; 2nd and 3rd, Luxton. Cockerel—1st and 2nd; pullet, 1st and 2nd, Luxton.

Emblen Geese.—Cock—1st, O'Brien & Colwell, Paris Station; 2nd, Dentonia Farm; 3rd, O'Brien & Colwell. Hen—1st, Dentonia Farm, 2nd, O'Brien, 3rd, Dentonia Farm. Cockerel—1st and 2nd, pullet, 1st and 2nd, O'Brien.

Toulouse Geese.—Cock—1st, O'Brien & Colwell, 2nd, Bogue; 3rd, O'Brien & Colwell. Hen—1st, O'Brien & Colwell, 2nd, Hodgson. Cockerel, 1st and 2nd, pullet, 1st and 2nd, O'Brien & Colwell.

A. O. V. Geese.—Cock—1st, O'Brien & Colwell, 2nd, Smith; 3rd, Luxton. Hen—1st, O'Brien & Colwell; 2nd, Smith; 3rd, Luxton. Cockerel—1st, O'Brien & Colwell; 2nd, Luxton; 3rd, Smith. Pullet—1st, O'Brien & Colwell; 2nd, Luxton.

Rouen Ducks.—Cock—1st, John Colson, Guelph, 2nd, Bogue; 3rd, O'Brien & Colwell. Hen—1st, O'Brien & Colwell, 2nd and 3rd, Colson. Cockerel—1st, O'Brien & Colwell; 2nd, Bogue. 3rd, O'Brien & Colwell. Pullet—1st, O'Brien & Colwell; 2nd, Bogue. 3rd, O'Brien & Colwell.

Aylesbury Ducks.—Cock—1st, Bogue, 2nd, O'Brien & Colwell, 3rd, Stewart & Son. Hen—1st, Bogue; 2nd and 3rd, O'Brien & Colwell. Cockerel—1st and 2nd; pullet, 1st and 2nd, O'Brien & Colwell.

Pekin Ducks.—Cock—1st, Bogue, 2nd, Colson; 3rd, O'Brien & Colwell. Hen—1st, Bogue; 2nd, O'Brien & Colwell; 3rd, Colson. Cockerel—1st, Dentonia Farm; 2nd, Bogue; 3rd, O'Brien & Colwell. Pullet—1st, Bogue; 2nd, Dentonia Farm; 3rd, O'Brien & Colwell.

Cayuga Ducks.—Cock—1st, Howitt & Powell, Guelph; 2nd, Smith; 3rd, Hodgson. Hen—1st and 2nd, Smith; 3rd, Hodgson. Cockerel—1st, Smith; 2nd, Hodgson; 3rd, Howitt & Powell. Pullet—1st, Hodgson; 2nd, Smith; 3rd, Howitt & Powell.

A. O. V. Ducks.—Cock—1st, Smith; 2nd, Devins & Co.; 3rd, J. Campbell, Todmoden. Hen—1st, Devins & Co.; 2nd, Campbell; 3rd, Luxton. Cockerel—1st, Colson; 2nd, Luxton;

PERSIATIC Poultry Powder

Is a safe and sure remedy for all kinds of
Lice on POULTRY.

It is harmless to hens and chickens. Dust your birds with PERSIATIC POULTRY POWDER and INSECTS CANNOT LIVE.

A leading poultry breeder says he tried everything and could not keep his valuable birds from being lousy, nor keep them clean, until he tried PERSIATIC POULTRY POWDER.

25 CENTS PER CAN

Persiatic Poultry Spray

Is the only effective Spray for removing insects in Poultry Buildings.
SOLD BY ALL DRUGGISTS. TRY IT. 25 CENTS PER BOTTLE.

GRAHAM'S GOLDEN WYANDOTTES AND WHITE LEGHORNS

Are as good as the best and better than most. Some good ones for sale now, old and young. Also for sale cheap, 3 white Wyandotte hens and 1 black Langshan hen. The latter a beauty.

A. W. GRAHAM,

Nurseryman,

St. Thomas, Ont.

REPRESENTATIVE POULTRY ASSOCIATION OF CANADA.

ORGANIZED AT THE INDUSTRIAL EXHIBITION, TORONTO.

THE organization meeting of the Representative Poultry Association of Canada was held in the Farmers' Institute official tent on the Exhibition grounds, Toronto, on Monday, 4th September.

The Secretary of the Toronto Association having received communications from other poultry associations, upholding the proposal, named the following as having expressed the intention of sending delegates :

Stratford, to be represented by Mr. J. L. Corcoran; Brantford, to be represented by Mr. J. C. Montgomery; Galt, to be represented by Mr. J. W. Porteous; Peterboro', to be represented by Mr. Collins or Mr. Leary; Bowmanville, to be represented by Mr. Moorcraft; Petrolea, to be represented by Mr. Mann; Hamilton, to be represented by Mr. McPhie.

There were present thirty-seven representative poultrymen, who evinced much interest in the proceedings and whose suggestions to the delegates were extremely valuable.

Mr. Durston suggested that a chairman be appointed.

Mr. Montgomery (Brantford) proposed that Mr. Essex (Toronto) act as chairman, and that he give an outline of the objects of the projected association. Mr. Mann (Petrolea) seconded the proposal, which was put to the meeting and carried.

Mr. Essex, having thanked those

present for the honor, referred at some length to the reasons for organization, as follows :

"The object of the proposed organization is to foster the poultry industry of this country. There is a certain want of confidence in this industry which must be overcome. There are thousands of poultrymen in the country, thousands of fanciers, yet the exhibitors are limited to tens, or hundreds. Several reasons are put forward to account for this state of affairs. Some fanciers are withheld from exhibiting by want of confidence in the judges; others believe that the associations controlling the shows do not hew close to the line in the matter of closing entries, and receiving birds at stated dates, and they naturally fear that the old exhibitors would, in such case, have an advantage. Then there is the fear of the dishonest poultryman, who, I am glad to say, is rapidly becoming extinct under the influences of our poultry journals. These things retard the progress of the industry, and only a strong representative body can deal with such cases. Once the confidence of the public is gained, you will see a great addition to the ranks of exhibitors and a great addition to the number of local poultry associations. In this connection I may refer you to the first reason given on the circular relating to this organization, as issued by the Toronto Poultry Association, which says, 'It will increase the membership of existing organizations, and lead to the formation of additional poultry associations, because no person will be entitled to its privileges, except as a member of a local poultry association.' You see it is not proposed

to form an association of individuals, but simply to combine the efforts of associations now formed, or to be formed. An individual has no power to join this organization; therefore, every poultryman must be a member of some local association. If there is no local association he must procure the assistance of other fanciers and form one. Upon this supposition is based the reason I have quoted. There is room for an addition to the number of associations now existing. Let me refer you to the report of the Ontario Poultry Association—the report of 1898. In the list of exhibitors I find fifty-seven places or districts represented, but only fifteen poultry associations; that is to say, forty-two places contain exhibiting poultrymen who have no local association. To increase the interest in poultry, and to increase our profits this should be seen to, and only representative organization can attain this object.

"Take a look at the second reason for this confederation, which says: 'It will, by fixing show dates, prevent clashing of shows, and by forming circuits, will greatly lessen the expense of exhibitors attending them, and will enable the smaller associations to hold shows without fear of failure from want of exhibitors, as they will be in the line of circuit—the number of shows will be greatly increased thereby.'

"You all know how Petrolea and Toronto chose the same dates for their shows, I believe Ingersoll also; anyway, we know there is a lot of letter writing and talk through the journals about clashing dates; and often dates are named early in the year (too early for the convenience of those naming them), so

that nobody else in the locality may interfere with the show. These troubles may be amended by the efforts of delegates from every association. It cannot be done this year. It is not proposed to be done this year, as dates have already been fixed for next winter, but for the show season of 1900 and 1901 it can be done. Every association intending to hold a show will send its delegates to the annual meeting, probably in September at the Industrial, and will make application for the dates desired by his association. The delegates will form a circuit, not that it need be limited to one circuit—that will be left to the judgment of the body of delegates—but the circuits will be formed, bearing in mind the applications and requirements of each association represented (and those only); every association will have equal power, each being represented by one delegate only. Any local association, which does not join this organization, will not be represented on the board, and will have no say in the formation of the circuit; it will be formed purely and simply for the benefit of members. The effect of the circuit will be to attract fanciers who now exhibit at, perhaps, one or two shows, and induce them to follow around. Expenses will be reduced. Take, for instance, Mr. Foster, of Brampton, or Mr. Cox, of Brantford, if they attend ten shows in the course of a winter, it is likely they have had to return home and start anew six or eight times at least. That is expensive. Where railway fares, express rates, etc., would ordinarily amount to, say, \$25 or \$50, it would not be more than half that amount under the circuit system, because

there is not half the distance traveled, nor half the expense of hotels. Much time is wasted in the first instance, a day going to the solitary show, another day returning, which time is all saved under this proposal. Small local associations will hold shows because they will be in the line of circuit. They know the exhibitors are following the circuit, and there is no fear of want of entries. It would be a boon and a boom to the industry.

"One of the proposed rules says: 'It shall be the duty of the delegates at the annual meeting to decide disputes and adjudicate upon corrupt actions.'

"This is simply a safeguard. Any complaint of dishonesty, etc., will naturally come before the local association. If it is decided to be of such importance that the other local associations are also interested, it will be referred to this organization. It is all very well to say that there are no dishonest poultrymen—whence then all the

"I notice fanciers over the other side are following our example; they hold similar opinions. Mr. D. Lincoln Orr, a prominent fancier of New York State, writes the 'American Fancier,' suggesting that they organize just such an association as we are now discussing. He gives as reasons there for the following: Legislation would be looked after; they could deal vigorously with all the crooks in the business, protect both the buyers and the sellers, and, generally, he makes a great plea to the fanciers of the state to organize.

"Gentlemen, we are not alone in our endeavors. The most progressive fanciers will be the first to organize, and we must not be behind our friends across the

border. Our organization was projected three or four months ago. You saw the proposal in 'The Reliable Poultry Journal' and 'The Canadian Poultry Review.' I am glad that so many associations have responded. We cannot act alone. Suppose Toronto holds a show, and the judge does not do satisfactory work, the knowledge of this is limited to Toronto, but once form this association and each delegate will report yearly. If the judging is unsatisfactory, it will be known to every association in the country. This confederation will be able to recommend the engagement of good honest men, and will show up the failure to do good work on the part of others.

"Finally, 'By its influence it will be the means of improving the accommodation and arrangements for poultry at fall fairs.' Is there any attraction for visitors to the poultry department at fairs in the medley of coops of all shapes and sizes, all stages of delapidation, some dirty, some clean; some with water tins, some without. This effect is the result of exhibitors having to provide their own show coops and water tins. Sometimes an erring fancier brings no coop, but brings disease; he borrows his neighbor's water vessel, and the neighbor goes home with a winter's work ahead of him ridding his stock of roup, croup and every other contagious trouble. This organization can remedy this by its influence. Union means strength, and strength means more attention paid to our requirements.

"May I instance this great Industrial Exhibition? How is it that each year this wealthy association has got to borrow my coops and your coops in which to pen the

surplus birds? How is it that requests for additional space and coops are met by the response that they want no more fowls, and will give us no more accommodation? Do you know that the piano manufacturers made a similar application and were refused? Then they said, "We won't exhibit," which brought the Exhibition Association to time, and the piano men have now the best accommodation on the grounds. Union and strength did it. One poultry association cannot do it, but a union of poultry associations can, and will.

"There are numerous other reasons why we should organize. The first point to be settled, gentlemen, is, Will we organize? I thank you for the interest you have displayed in my few remarks."

Mr. Montgomery (Brantford) thought that if the matter had been as clearly explained in the circular as Mr. Essex had now done, every association would have been represented. The nature of the proposal was now clearly impressed upon him, and he was greatly in favor of it. He would suggest forming two circuits—East and West.

Mr. Montgomery then moved, seconded by Mr. Mann (Petrolea), that we organize a confederation of poultry associations to be called "The Representative Poultry Association of Canada." All present

being in favor, it was declared carried unanimously.

Mr. Essex moved, seconded by Mr. Mann, that Mr. J. C. Montgomery, president of the Brantford Poultry Association, be president of this association. (Carried.)

Mr. Mann was appointed vice-president on motion of Messrs. Montgomery and Essex.

Mr. Essex then left the chair and introduced the chairman, who presided.

Mr. R. Durston (Toronto) was appointed secretary and treasurer for the year.

It was decided that the membership fee payable by local associations be \$2.

The president asked Mr. R. H. Essex to draft by-laws, which he agreed to do, proposing that they be sent to all associations who become members, so that such associations might consider and revise them; they might then be ratified at the next annual meeting.

The thanks of the association were tendered to Mr. F. W. Hodson, Superintendent for Farmers' Institutes, for his kindness in affording the use of his official tent for organization.

ROBERT DURSTON,

Secretary-Treasurer.

Associations desirous of becoming members will kindly enclose fee, \$2, and application to R. Durston, 42 Austin Ave., Toronto.

OTTAWA'S BIG SHOW.

AS it was five years since we had been able to visit the Ottawa Fair, the increase in both quality and numbers of the poultry came as a revelation. The best from both east and west in many classes fought it out at Ottawa, and the local birds more than held their own.

Mr. Benjamin, the hard worked superintendent, assured us there were about 1,600 birds of all kinds on exhibition. Five years ago there were, if memory serves us right, about 700.

During all this time, if we except last year, Mr. Benjamin has occupied the onerous and, we fear, thankless post of superintendent, so that he feels that now he can retire from the harder work and devote his time to the preliminary and clerical work. That a good man to look after this part is a necessity was plainly evidenced. Many of the cards were incorrectly written, and this caused no end of trouble. Everything should run smoothly right from the start to make up a successful show.

If a good man is given charge of the building, one who will make his employees work—which they are paid for—who will supervise rather than to attempt a caretaker's part, if Mr. Benjamin is given the office work, and lastly, if entries are not taken right up to the last day, Ottawa can equal any show in Canada in quality and quantity. Her geographical position, the link between east and west, and the late date of the show will always assure this. But exhibitors must be assured that their interests will not suffer.

The old coops in centre of build-

MAGPIES, OWLS, TUMBLERS,

I am going to move on the first of November and have no place to keep pigeons. On that account I am forced to give up the fancy, and therefore offer my whole loft for sale.

THE MAGPIE LOFT contains 29 birds 24 old and 5 1899 youngsters. The lot is made up of two pair of reds, one red cock, one blue cock, one yellow hen. The balance are blacks. The youngsters are also black. All the birds I have ever shown are in this lot and here is one of the grandest chances for one to get a first-class strain of Magpies. The stock came from the well-known loft of Geo. W. Spohn, of Philadelphia, and my loft has won more Prizes in the last three years than any other loft in Canada.

THE OWL LOFT contains nine birds made up of two pair of Eng. Silver, 1 Eng. red cock, 1 Eng. blue cock, 1 white Afr. hen, 1 pair white Afr.

THE TUMBLER loft contains 1 pair reds, 1 pair blacks, 1 black cock, 1 black checker hen. Also a strawberry-winged TURBIT cock, grand bird, imported. Also three show-cases at \$6.00 and \$4.00.

Look up the prize-lists for the past three years and see the windings of these birds, and if you want any of them write me. You can get them cheap.

NORMAN S. JONES, 8 Hughson St. HAMILTON, ONT. 1099

ing are played out, and need re-newing. The new ones, with wire netting front attached to frame and made to slide up, are really nice, but better provision must be made for the supplying of food and water.

Many well known faces were seen around the show building, both from east and west. Mr. Mil-lard and Mr. Stewart were down in charge of a large exhibit from Lon-don. Mr. Barber, very quiet this time, Mrs. Barber, Mr. Daniels, Miss Daniels and H. B. D. from Toronto. Mr. Cayford, growing quite aldermanic in appearance, from Montreal; Mr. Fortier, from St. Therese; Mr. Oldrieve and Mr. Reid, from Kingston; Mr. Ully, from Montreal; Thompson, the duck man, from Allan's Corners, and many others.

Polands were fair classes and quality good. Game made a big lot, and quality well up. Brown reds better than usual, and black reds fine. Pyles good, duckwings fair. Indian game made big classes and quality was high. Some nice whites in this class. Hamburgs, pecially blacks, good. Javas a small lot but good; blacks won. First hen we much liked. Minor-cas a decent lot, and a long string of them. Many in poor condition for showing.

White Leghorns only fair. First cock, a good shaped one, is not fit, bad in color, poor rough lobes and bumble-footed. Second, poor in legs and comb a bit over; we thought might easily have won. Hens fair, first and second easily ahead. The youngsters better, and winners good in color. Browns a much better lot, in which we liked first pullet, a good colored one, free from shafting. Blacks numer-ous and good. Buffs not as many

as we expected to see, but good. First pullet is even in color, with a good tail, where she beats second. First and second cockerels both nice. Rose-comb browns a big lot and good, as were the whites, too many of the latter are creamy in color. Spanish and An-dalusians fair.

We were surprised to see the large entry in Ornamental Ban-tams, considering the poor classifi-cation offered. Rose-combs a big class, a nice pair of whites had no show. We much liked first hen, a tidy black, small neat shape and good color. Second, nice lobe, not as good shape. Cocks, first and second both good, and chicks nice, in which the judge chose those with best developed lobes. Seb-rights, especially silvers, good. Ja-panese good, too bad to ask all colors to compete. First cock, good, colored white; second, neat black tail; third, white. Hens fair. First and first chick good black tails; second and second chicks black tails, too yellow in color; third pullet nice white, of good color and streets ahead of second. Third cockerel fair white, with bad comb.

In Cochins again all classes compete, a bad mixture. First cock a good white in nice fit; sec-ond, good colored black; third, white. First hen a black, good in shape and color; second, nice shaped white; third, black. Cock-erels all nice blacks. First pullet fair color buff, with long, pinched tail, a long way behind second and third, real good blacks. A. O. V. a regular hotch-potch. First cock a birchen game; second, white game; third, Poland. First hen white game; second, Poland Chicks

first and first, game; second and second, Polands; third and third, poor birchens.

Dorkings large classes and good, as were the Langshans.

In white Cochins the entry was large and birds good. Blacks few and good. In buffs the cock we wrote so favorably in Toronto re-port won. First hen the Toronto winner. The others and chicks good.

Partridge, not many but good.

The show of Plymouth Rocks and Wyandottes was really good in all colors, the winners of many of the other shows competing.

Game Bantams a big lot and competition keen.

Black reds good, and brown reds beter than usual, old birds best.

Turkeys, ducks and geese were a show in themselves. A few pair pheasants and peafowl were the centre of attraction.

In the variety class Silkies won, then Sumatras, other Silkies left out.

Pit game a strong and hardy looking lot.

EXHIBITORS.

Thorpe & Scott, and Sage & Garside, Lon-don; G. F. Bastien, Rigaud; Hugh Wyatt London; E. R. Frith, Maxville; Wm. Stewart & Son, Menie; A. Thompson Allan's Corners. Robert Ness, Howick; A. F. PRIZE LIST.

Brahmas, dark.—Cock—1st and 3rd, Thorpe & Scott; 2nd, Sage & Garside. Hen—1st and 3rd, Thorpe & Scott; 2nd, Sage & Garside. Cockerel—1st and 2nd, Thorpe & Scott; 3rd, Sage & Garside. Pullet—1st, Thorpe & Scott; 2nd, Sage & Garside; 3rd, Bastien. Light—Cock—1st, Wyatt; 2nd, Frith; 3rd, Stewart & Son. Hen—1st, Bastien; 2nd, Wyatt; 3rd, Thompson. Cockerel—1st, Wyatt; 2nd, Ness; 3rd, Bastien. Pullet—1st and 2nd, Wyatt; 3rd, Ness.

Cochins, partridge.—Cock—1st, Mutchmor; 2nd and 3rd, Wyatt. Hen—1st and 3rd, Wyatt; 2nd, Mutchmor. Cockerel—1st, Mutchmor; 2nd, and 3rd, Wyatt. Pullet—1st, Mutchmor; 2nd and 3rd, Wyatt.

Cochins, buff.—Cock—1st and 2nd, Bell; 3rd, Stewart. Hen—1st and 3rd, Bell; 2nd, Stewart. Cockerel—1st and 2nd, Stewart; 3rd, Nantel. Pullet—1st and 3rd, Stewart; 2nd, Nantel.

Cochins, black.—Cock—1st and 2nd, Millard. Hen—1st and 2nd, Millard. Cockerel—1st and 2nd, Millard. Pullet—1st and 2nd, Millard.

Cochins, white.—Cock—1st, Millard; 2nd, Mutchmor. Hen—1st, Millard; 2nd, Mutchmor. Cockerel—1st and 2nd, Millard; 3rd, Bastien. Pullet—1st and 3rd, Millard; 2nd, Mutchmor.

Langshans.—Cock—1st, Daniels; 2nd, Mutchmor; 3rd, Garland. Hen—1st, Mutchmor; 2nd, Daniels; 3rd, McConnell. Cockerel—1st, McConnell. Pullet—1st, McConnell; 2nd, Daniels. Dorkings, silver grey.—Cock—1st, Stewart & Son; 2nd, Daniels; 3rd, Cummings. Hen—1st, Daniels; 2nd, Kettlewell; 3rd, Reid. Cockerel—1st, Ness; 2nd, Daniels; 3rd, McGarrigle Bros. Pullet—1st and 2nd, Ness; 3rd, Stewart & Son.

Dorkings, other varieties.—Cock—1st, Neilson; 2nd, Stewart & Son. Hen—1st, Neilson; 2nd, Stewart & Son; 3rd, Daniels. Pullet—1st, Osborne.

Houdans.—Cock—1st, Reid, 2nd, Fortier, 3rd, Stewart & Son. Hen—1st, Fortier; 2nd, Stewart & Son; 3rd, Reid. Cockerel—1st, Fortier; 2nd, Daniels; 3rd, Bastien. Pullet—1st, Daniels, 2nd, Fortier; 3rd, Bastien.

Wyandottes, silver.—Cock—1st, Arthurs; 2nd, Blake, 3rd, Bastien. Hen—1st, Arthurs; 2nd and 3rd, Blake. Cockerel—1st and 2nd, Arthurs, 3rd, Ulley. Pullet—1st, Blake, 2nd, Arthurs; 3rd, Ulley.

Wyandottes, white.—Cock—1st, Kettlewell. Hen—1st, Kettlewell, 2nd, Millard. Cockerel—1st, Kettlewell; 2nd, Byshie; 3rd, Palen. Pullet—1st and 3rd, Byshie, 2nd, Millard.

Wyandottes, golden.—Cock—1st and 2nd, Daniels, 2nd, Blake. Hen—1st, Daniels, 2nd, Stewart & Son; 3rd, Oldrieve. Cockerel—1st, Oldrieve, 2nd, Daniels. Pullet—1st, Daniels; 2nd, Oldrieve.

Wyandottes, buff.—Cock—2nd, Reid. Hen—1st, Reid.

Plymouth Rocks, barred.—Cock—1st, Miller; 2nd, Willis; 3rd, Devlin & Jacques. Hen—1st, Devlin & Jacques; 2nd, Miller; 3rd, Willis. Cockerel—1st, Devlin & Jacques, 2nd, Miller; 3rd, McKenzie. Pullet—1st and 3rd, Devlin & Jacques; 2nd, Miller.

Plymouth Rocks, white.—Cock—1st, Bendon; 2nd, Bastien; 3rd, Gray. Hen—1st, Gray, 2nd, Mason; 3rd, Fender. Cockerel—1st, Miller; 2nd, Daniels; 3rd, Thompson. Pullet—1st, Millard; 2nd, Daniels; 3rd, Gray.

Plymouth Rocks, buff.—Cock—1st, Daniels; Hen—1st, Daniels, Cockerel—1st, Daniels; 2nd and 3rd, Parsons. Pullet—1st, Daniels; 2nd and 3rd, Parsons.

Game, black red.—Cock—1st and 3rd, Barber;

2nd, Oldrieve. Hen—1st and 2nd, Barber; 3rd, Oldrieve. Cockerel—1st, Barber. Pullet—1st, Barber.

Game, brown red.—Cock—1st and 3rd, Barber; 2nd, Oldrieve. Hen—1st, Mutchmor; 2nd, Barber; 3rd, Oldrieve. Cockerel—2nd, Oldrieve. Pullet—1st, Oldrieve.

Game, duckwing.—Cock—1st and 3rd, Barber; 2nd, Oldrieve. Hen—1st, Oldrieve; 2nd, and 3rd, Barber.

Game, file.—Cock—1st, Mutchmor; 2nd and 3rd, Barber.

Game, Indian.—Cock—1st, Daniels; 2nd, Wilson; 3rd, Stewart. Hen—1st, Hillman; 2nd, Stewart; 3rd, Neilson. Cockerel—1st, Neilson; 2nd, Daniels; 3rd, Secker. Pullet—1st, Hillman; 2nd, Neilson; 3rd, Daniels.

Game, Pitt.—Cock—1st and 3rd, Benjamin; 2nd, Neilson. Cockerel—1st, Neilson; 2nd, Benjamin; 3rd, Daniels. Pullet—1st, Benjamin; 2nd, Neilson; 3rd, Rook.

Hamburg, black.—Cock—1st and 2nd, Fortier, 3rd, Reid. Hen—1st, Tozer; 2nd, Reid; 3rd, Fortier. Cockerel—1st, Tozer; 2nd, Daniels; 3rd, Fortier. Pullet—1st, Daniels; 2nd, Tozer; 3rd, Murphy.

Hamburgs, pencilled.—Cock—1st, Daniels; 2nd, Neilson; 3rd, Stewart. Hen—1st, Neilson, 2nd, Daniels; 3rd, Stewart. Cockerel—1st, Stewart; 2nd, Neilson. Pullet—1st, Neilson; 2nd, Mutchmor; 3rd, Stewart.

Hamburgs, gold spangled.—Cock—1st, Neilson. Hen—1st, Reid; 2nd, Neilson. Cockerel—1st, Barber. Pullet—1st, Barber.

Hamburg, silver spangled.—Cock—1st, Fortier; 2nd, Osborne; 3rd, Cumming. Hen—1st, Fortier; 2nd, Osborne; 3rd, Stewart. Cockerel—1st and 3rd, Odell. Pullet—1st, Stewart; 2nd, Fortier; 3rd, Odell.

Javas.—Cock—1st, Reid; 2nd, Daniels; 3rd, Mutchmor. Hen—1st, Daniels, 2nd, Mutchmor; 3rd, Reid. Cockerel—1st, Daniels. Pullet—1st, Daniels.

Black Spanish.—Cock—1st and 3rd, Reid; 2nd, Neilson. Hen—1st and 2nd, Reid; 3rd, Neilson. Cockerel—1st, Reid. Pullet—1st, Reid.

Andalusians.—Cock—1st, Osborne; 2nd, Mutchmor; 3rd, Reid. Hen—1st, Osborne; 2nd, Reid. Cockerel—1st, Blake; Pullet—1st, Blake; 2nd, Osborne.

Minorcas.—Cock—1st, Stewart; 2nd, Frith; 3rd, Osborne. Hen—1st, Frith, 2nd, Mutchmor; 3rd, Gilbert & Jardine. Cockerel—1st, Daniels; 2nd, Osborne; 3rd, Frith. Pullet—1st, Frith; 2nd, Willis; 3rd, Daniels.

Leghorns, S. C. White.—Cock—1st, Reid; 2nd, Fortier; 3rd, Gilbert & Jardine. Hen—1st, Stewart; 2nd, Gilbert & Jardine; 3rd, Reid. Cockerel—1st, Reid; 2nd, Gilbert & Jardine; 3rd, Reid. Cockerel—1st, Reid, 2nd, Gilbert & Jardine; 3rd, Neilson. Pullet—1st, Neilson; 2nd and 3rd, Stewart.

Leghorns, S. C. Brown.—Cock—1st and 2nd, Norris; 3rd, Palen. Hen—1st, Palen; 2nd, Mutchmor; 3rd, Norris. Cockerel—1st, Norris, 2nd, Stewart, 3rd, Tozer. Pullet—1st, Neilson; 2nd and 3rd, Palen.

Leghorns, S. C. Black.—Cock—1st, Fortier; 2nd, Daniels, 3rd, Osborne. Hen—1st, Osborne; 2nd, Daniels; 3rd, Fortier. Cockerel—1st and 2nd, Daniels, 3rd, Fortier. Pullet—1st and 2nd, Daniels, 3rd, Osborne.

Leghorns, S. C. Buff.—Cock—1st, Miller. Hen—1st, Miller. Cockerel—1st and 2nd, Bedford; 3rd, Miller. Pullet—1st, Miller; 2nd, Bedford; 3rd, Neilson.

Leghorns, Rose Comb Brown.—Cock—1st, Oldrieve; 2nd, Stewart; 3rd, Tozer. Hen—1st, Tozer; 2nd, Oldrieve; 3rd, Stewart. Cockerel—1st and 2nd, Oldrieve; 3rd, Tozer. Pullet—1st and 2nd, Oldrieve; 3rd, Stewart.

Leghorns, other variety R. C.—Cock—1st, Tozer; 2nd, Stewart; 3rd, Daniels. Hen—1st, Neilson; 2nd, Stewart; 3rd, Tozer. Cockerel—1st and 2nd, Stewart; 3rd, Neilson. Pullet—1st, Neilson; 2nd, Osborne; 3rd, Tozer.

Pollish W. Crested Black.—Cock—1st and 3rd, Fortier; 2nd, Mutchmor. Hen—1st and 2nd, Fortier; 3rd, Mutchmor. Cockerel—1st,

Bastien, 2nd, Fortier. Pullet—1st, Fortier; 2nd, Bastien.

Pollish, Gold.—Cock—1st and 2nd, Fortier; 3rd, Stewart. Hen—1st and 3rd, Fortier; 2nd, Daniels. Cockerel—1st, Fortier; 2nd, Stewart; 3rd, Reid. Pullet—1st and 3rd, Fortier; 2nd, Stewart.

Pollish, Silver.—Cock—1st, Daniels; 2nd and 3rd, Fortier. Hen—1st, Fortier; 2nd, Stewart; 3rd, Daniels. Cockerel—1st, Fortier. Pullet—1st, Fortier; 2nd, Stewart.

Pollish, other varieties.—Cock—1st, 2nd and 3rd, Fortier. Hen—1st, 2nd and 3rd, Fortier. Cockerel—1st, 2nd and 3rd, Fortier. Pullet—1st, 2nd and 3rd, Fortier.

Red Caps.—Cock—1st, Daniels; 2nd, Stewart; 3rd, Denison. Hen—1st, Daniels; 2nd, Denison; 3rd, Osborne. Cockerel—1st, Daniels; 2nd, Osborne.

Red Caps, other varieties.—Cock—1st, Tozer; 2nd, Fortier; 3rd, Daniels. Hen—1st, Tozer; 2nd, Fortier; 3rd, Daniels. Cockerel—1st, Daniels, 2nd, Fortier; 3rd, Donovan. Pullet—1st and 2nd, Daniels; 3rd, Fortier.

Bantams, Black Red.—Cock—1st, Gray; 2nd, Oldrieve; 3rd, W. Barber. Hen—1st, Gray; 2nd, Mutchmor. Cockerel—1st, Rook; 2nd, Barber, 3rd, Reid. Pullet—1st, Barber; 2nd, Rook; 3rd, Oldrieve.

Bantams, Brown Red.—Cock—1st, Oldrieve; 2nd, Mutchmor; 3rd, Barb. Hen—1st, Barber; 2nd, Oldrieve; 3rd, Gray. Cockerel—1st and 3rd, Mutchmor; 2nd, Barber. Pullet—1st, Mutchmor; 2nd and 3rd, Oldrieve.

Bantams, duckwing.—Cock—1st, Mutchmor; 2nd, Oldrieve; 3rd, Rook. Hen—1st, Oldrieve; 2nd, Mutchmor; 3rd, Barber. Cockerel—1st, Mutchmor; 2nd, Barber; 3rd, Rook. Pullet—1st and 2nd, W. Barber; 3rd, Gray.

Bantams, Pile.—Cock—1st, Barber; 2nd, Mutchmor; 3rd, Oldrieve. Hen—1st, Mutchmor; 2nd and 3rd, Barber. Cockerel—1st and 2nd, Barber; 3rd, Oldrieve. Pullet—1st, Barber; 2nd, Mutchmor; 3rd, Gray.

Bantams, Rose Comb.—Cock—1st, Murphy; 2nd, Reid; 3rd, Oldrieve. Hen—1st, Mutchmor; 2nd, Murphy. Cockerel—1st and 3rd, Murphy; 2nd, Oldrieve. Pullet—1st, Murphy; 2nd, Reid; 3rd, Fortier.

Bantams, Sebright.—Cock—1st and 2nd, Stuart. Hen—1st and 3rd, Stuart; 2nd, Fortier. Cockerel—1st, Stuart; 2nd, Oldrieve; 3rd, Fortier. Pullet—1st and 3rd, Stuart; 2nd, Fortier.

Bantams, Japanese.—Cock—1st, Donovan; 2nd, Oldrieve; 3rd, Tozer. Hen—1st, Oldrieve; 2nd, Tozer; 3rd, Donovan. Cockerel—1st, Tozer; 2nd, Oldrieve; 3rd, Fortier. Pullet—1st, Tozer; 2nd, Oldrieve; 3rd, Donovan.

Cochins.—Cock—1st, Mutchmor; 2nd, Stuart; 3rd, Oldrieve. Hen—1st, Stuart; 2nd, Donovan; 3rd, Mutchmor. Cockerel—1st and 2nd, Stuart; 3rd, Donovan. Pullet—1st, Plant; 2nd, Donovan; 3rd, Stuart.

Other Varieties.—Cock—1st, Gray; 2nd, Donovan, 3rd, Robinson. Hen—1st, Donovan; 2nd, Robinson, 3rd, Reid. Cockerel—1st, Donovan; 2nd, Fortier; 3rd, Mutchmor. Pullet—1st, Donovan; 2nd, Fortier; 3rd, Mutchmor.

Turkeys, Bronze.—Cock—1st, Cumming; 2nd, Thompson; 3rd, McMaster. Hen—1st, Thompson; 2nd, McMaster; 3rd, Cumming. Cockerel—1st and 3rd, Jones; 2nd, Ness. Pullet—1st and 2nd, Jones; 3rd, Ness.

Turkeys, any other variety.—Cock—1st, Cumming; 2nd and 3rd, Thompson. Hen—1st and 3rd, Thompson; 2nd, Cumming. Cockerel—1st and 3rd, Thompson; 2nd, Empey. Pullet—1st, 3rd, Thompson; 2nd, Empey.

Geese, Toulouse.—Gander—1st, Thompson; 2nd, McMaster, 3rd, Cumming. Goose—1st and 2nd, Thompson; 3rd, McMaster. Gander of 189—1st, McMaster; 2nd and 3rd, Thompson. Goose of 189—1st and 3rd, Thompson; 2nd, McMaster.

Geese, Embden.—Gander—1st and 2nd, Thompson; 3rd, McMaster. Goose—1st and 2nd, Thompson; 3rd, Hurdman. Gander of

GUELPH, THE SMITHFIELD OF CANADA, WILL HOLD THEIR Eighteenth Annual Exhibition

under the auspices of the

Guelph Fat Stock Club and Poultry Association,

At the VICTORIA CURLING RINK, on the 6th, 7th and 8th of Dec., 1899

Open to the World. We have added extensively to our Prize List, for which we will pay liberal prizes.

Our Special Prize List will be one of the largest ever offered at any show in Canada.

Entries close Dec. 2nd.

AS. MILLER, Pres.

For Prize Lists and particulars, address

L. G. JARVIS, Judge.

J. McCORKINDAL, Sec'y

189-1st and 2nd, Thompson; 3rd, McMaster. Goose of 1899-1st, Hurdman; 2nd and 3rd, Thompson.

Geese, other varieties.—Gander—1st, Thompson; 2nd, Stewart; 3rd, Reid. Goose—1st, Cumming; 2nd, Thompson; 3rd, Reid. Gander of 1899-1st, Reid. Goose—1st and 2nd, Thompson; 3rd, Reid.

Ducks, Pekin.—Drake—1st, Ackroyd; 2nd, Thompson; 3rd, Cumming. Duck—1st, Ackroyd; 2nd, Thompson; 3rd, Neilson. Drake of 1899-1st, Thompson; 2nd, Neilson; 3rd, Ackroyd. Duck of 1899-1st, Ackroyd; 2nd, Thompson; 3rd, Neilson.

Ducks, Rouen.—Drake—1st, Stewart; 2nd, Reid; 3rd, Neilson. Duck—1st, Stewart; 2nd, Neilson; 3rd, Reid. Drake of 1899-1st, Stewart; 2nd, Thompson; 3rd, Bower. Duck—1st, Stewart; 2nd, Thompson; 3rd, Neilson.

Ducks, Aylesbury.—Drake—1st and 3rd, Stewart; 2nd, Thompson. Duck—1st, Stewart; 2nd, Reid. Drake of 1899-1st, Reid; 2nd and 3rd, Stewart. Duck—1st, Stewart; 2nd, Reid.

Ducks, other varieties.—Drake—1st, Thompson; 2nd, Cumming; 3rd, Reid. Duck—1st, Daniels; 2nd, Thompson; 3rd, Cumming. Drake of 1899-1st, Thompson; 2nd, Reid; 3rd, Cumming. Duck—1st and 3rd, Thompson; 2nd, Reid.

Incubator and Brooder—1st, Daniels; 2nd, Gray.

Exhibit of poultry appliances—1st, Daniels.

H. B. DONOVAN, Toronto.

POULTRY ADVERTISING.

BY FRANK B. WHITE.

[Paper read at the meeting of The National Fanciers' Association, August 2, 1899, at the Sherman House, Chicago.]

(Continued.)

KNOW that some of the large poultry breeders expend considerable money in newspaper advertising. Some of it pays; some of it does not pay. The mystery to me has been that it pays at all when I have investigated the methods employed in the handling of it.

Advertising is not a mystical, mysterious proposition. The ordinary laws of cause and effect apply in advertising just as they do in mechanics or to the sciences. Some of the best advertising that I know of is by keeping in close touch with old friends. When you have once sold a man be so concerned in his

success that he will feel that you are personally interested in his welfare and you will make him a walking advertisement for you and when he is ready for more he will remember how well you have treated him and will come back to you rather than to send his order to an untried breeder. He will talk for you at the poultry shows and with his neighbors. The newspaper, therefore, becomes only a means to an end; a mediation, however, that is of vital importance as much depends upon the first meeting as to whether you do business or not; the newspaper can introduce you politely and rightly to the class you most desire to reach, or it may indifferently and disinterestedly present your business to a disinterested class—the curiosity class—the unsubstantial class. Continue to use your good papers. They are making friends and business for you.

I have said that the successful man is the one who becomes so

through advertising and I know of no conditions where this truth applies with greater force than it does with the poultryman. You have to depend so much upon the honesty of the individual. The judges will score the bird and the score card may be all right, but unless you all have a great deal more confidence in judges than I have I would not pin my faith too much upon what the judges' score card says. There are exceptions, of course, to this rule, but I am speaking now along general lines. We have some good poultry judges; some mighty poor ones. It will always be so until there is some system of advertising the good into prominence and advertising the poor out of their job. So you see advertising is double-barreled; it can make a man or it can break him. And that leads me right back to the question of the honesty of the individual.

I believe that the man who is willing to go a good long way to rectify a mistake and satisfy a customer, is the man who will make his advertisement pay best. One who is in it to get every dollar he can, irrespective of results, is the fellow who is advertising himself out of business. And this Association, in my judgment, can do nothing better than to uphold and encourage the good, the true, the honorable, and denounce the rascal and the fakir.

There is another phase of this question that has occurred to me several times and I am particularly reminded of it at this time because of the good work of this Association has done in establishing a permanent exhibit at Lincoln Park. I believe that the poultry press is accomplishing great good. I be-

lieve that something ought to be done to educate our people to eating poultry rather than the coarser meats, and the magazine, the farm and home paper, the family journal, should be used with that end in view. When we have good prices we usually have good times; when a good line of advertising is being done a good business follows.

This Association could not expend a large amount of money in advertising because it has nothing to sell. Its membership would be benefited but there would be no source of revenue to the Association to meet the advertising bills. I believe that it could inaugurate without cost a system of editorials that would be far reaching in effect and produce great results not only to our own membership but to the poultry fraternity on the whole, and after all it is the broad field that we are concerned about in this poultry business. This Association is a factor in assisting to better the general conditions as well as that of the individual. Personally I am interested in seeing not only good poultry in Illinois, but in California and Massachusetts as well.

I wish that there might be some method of handling the poultry product commercially in a way that would lift it above commonality and place it where I believe it belongs, as one of the best and most substantial products of the land. When we consider that three hundred million dollars is Uncle Sam's part of the poultry business, it is not difficult to understand why so many of our best business men are giving heed to the question. The dairy product of the country is getting the advantage of us in that it is putting up its product for

domestic use—its butter and milk, in finer shape than it did in former years and more pleasing to the good housewife. Some of our standard creameries are putting up butter in delicate packages and commanding from three to twenty-five cents more a pound than butter of equally as good quality of other institutions. It is simply because they expend a little in advertising and a nice label and a neat package. I believe that thousands of people in the city of Chicago would be willing to pay five, ten or twenty cents more a dozen for eggs if they could be assured that they came direct from the poultry yards and were guaranteed by a reliable poultryman to be fresh. To do this there could be a package containing, say, one, two, three or five dozen, each gotten up neatly and attractively, with the guarantee printed on it, to the effect that every egg was fresh, and in case one discovered that one was not, within a given time, a dozen should be given for every one thus found. Do you think for a moment that our best families would not willingly pay the extra price rather than to take their chances with the ruff-raff that comes through the corner grocery, disinterested method of handling them? A stale egg is an abomination.

A dressed fowl, should be, in my judgment packed in a neat box, wrapped in paraffin paper, neatly labeled, and not hung up, exposed and thrown about as if it were of no consequence. And if it were so packed and the name of the poultryman printed neatly on the package, don't you think that our good wives would be eager to have them in preference to those that are taken out of the barrel, dirty,

skinny, filthy, even though the price might be one-half? Every one that you thus sold would become an advertisement for you and there would soon be an inquiry. An enterprising farmer in central New York conceived this idea some time ago and has no trouble in getting five cents a dozen more in the Syracuse market for his eggs from a merchant. If I were out of business and wanted something to do that would pay me big, I would arrange with a dozen good poultry breeders to supply me with eggs at a given price, and I would have my regular customers and make five to twenty cents a dozen on them year in and year out. But I would put a little work on it; a little advertising in it; and I would do it in first-class shape—do it well and command good pay for my

labor; cheap things are not wanted; it is quality that counts.

I stated that I handled advertising the same as the merchant did his wares. I should qualify this by stating that I buy and sell space that way. The knowledge necessary to construct a good advertisement to prepare a good circular or other advertising literature cannot be bought over the counter. Advertising men are just as truly born as are poets, and of the great army of so-called "advertising men" that the country possesses today, but few have attained the successful degree. And I might say in this connection that this accounts for so many advertisers making a failure. They have been poorly advised, started wrong or they try to copy somebody else instead of talking their own business. You may be the brightest man on

earth and know all about the science of breeding, etc., but if you are not satisfied of your own ability to prepare and execute a line of advertising, you had better call on some one who does. Consult the publisher of your poultry paper and let him tell you how best to reach your clients, or confer with some one who has made a success, either for themselves or some one else; but do not think that the same rules that he has employed will apply to your case. You must work out your own advertising salvation, and this requires back-bone, good and stiff. It is a daring proposition, but "nothing ventured, nothing gained," and there is no need of your standing idly by and seeing the other fellow get all of the business, and wonder why your advertising does not pay you when you are doing it hap-hazardly, half heartedly or incompletely. My advice to anyone contemplating advertising is that they read carefully and persistently the suggestions on advertising subjects contained in our advertising journals; a number of good ones are now issued. Be sure you are right, then go ahead.

There is expended upwards of one hundred thousand dollars a year in poultry, poultry supplies,

ROUP CURE GUARANTEED. ROUP

CONKEY'S ROUP CURE is the only remedy that will cure roup in all its forms as long as the fowls can see to drink. For canker, especially in pigeons, this cure excels all others. It is simply put up in drinking water and the fowl takes its own medicine. The lives of two chickens is enough to pay for one tube which will cure a hundred or more. Directions in every package. If this fails we will refund the money. Sent postpaid. Small size 50 cents. Large size \$1.00.

PETALUMA INCUBATOR CO., Petaluma, California,

Pacific Coast Agent G. E. CONKEY & CO., Cleveland, Ohio.

C. J. DANIELS, 221 River St., Toronto, Ont., CANADIAN AGENT.

Please mention this paper. Do not send stamps.

Use Guest's Roup or Tonic and Condition Pills.

If your fowls or pigeons have Roup, even if almost dying, give one Pill every day, for four or five days.

They are especially suited for Roup, Rousy diseases, Bad Moulting, and Pledging, Weak Young Pigeons, Chickens, Turkeys or Ducks, &c. For general Unhealthiness in Birds, either young or full grown. Skin diseases, Inflammatory diseases, Colds, with great difficulty of breathing. Indigestion, Cramps, Pip, when apoplexy is feared, and going Light, if given before the vital organs are too much affected. As a tonic give an occasional dose when required. For pain and Inflammation in the Egg-producing organs. When used for Egg-bound, oil must also be applied in the usual way. From weakness and prostration from overlying. For Scour or Diarrhoea in Chickens, young Pigeons, Turkeys, etc. Canker. Leg-weakness.

Since the introduction into Canada of these Pills, the Agent has received numerous letters from Fanciers all over the Dominion endorsing the Pills in the highest manner.

READ THIS—Dear Sir,—I can recommend them to be the best. I tried several other receipts, but no good. I had one hen nearly blind, I gave her three Pills. She is now in good trim. Send me another packet.—B. J. YORK.

WARDVILLE, ONT., JAN., 1897.

Dear Sir,—Please find enclosed one dollar for your celebrated Roup Pills. A brother fancier met me in the street to-day, he wished to get the pills as he has some sick birds. He used them last winter and found them good. A good article always will recommend itself.—JOHN FINCH.

SEAFORTH, ONT., OCT., 6th., 1886.

Sold in Packets for 25 cents and one dollar. Address James H. Cayford, Box 1168, Montreal.

incubator and brooder lines of advertising through agencies alone. These institutions have all become prosperous through advertising. The foundation and ground work of their business is advertising. Is not that testimony enough for you of its worth?

You do not have to do a large amount of it if you have a few birds but if you have some choice ones you can afford to do a little. Of course stock is necessary. I have presumed that you knew that. Unless you have something worthy of advertising it would not pay you. A poor thing will never pay as an advertising proposition. It may for a moment, but the buying public soon takes its measure. But an article of worth not only pays, but creates and establishes your reputation in your particular line of trade and carries your good name beyond into wider circles, yielding profits in years to come.

The man who has a fine bred fowl
Is not ashamed to show it,
And if he is the proper kind
He'll let the people know it.
But though he advertise his birds
With all his strength and might
He's losing money, wasting words,
Unless he does it right.

FOR SALE AT YOUR OWN PRICE OR I WILL EXCHANGE

for hens or pullets in Plymouth Rocks, Leghorns or Wyandottes. A good chance to get rid of your surplus stock or disappointments. I do not want exhibition stock, but merely stock to put on a farm. I have the following exhibition fowl I will exchange for any of the above varieties: Trio of Black Javas; pair White Minorcas, pair Andalusians, two pair W. C. Black Polands, trio Rose Comb White Leghorns, trio Black Hamburgs, pair Silver Sebright Bantams, trio Golden Sebright Bantams, trio Black Rose Comb Bantams, two trilos Buff Cochins Bantams, White Cochins Bantam hen. Or in Pigeons: Pair White Dragons, pair Silver Dragons, blue

POULTRY EXHIBIT AT THE WESTERN FAIR.

WE are informed that the entries in this department exceeded those of last year, which no doubt was due to the fact that an increase had been made in the prize money, which is always a drawing feature. The quality was fully equal to that of any previous exhibition, many of the Industrial winners had to "come down off their perch" here and be content with the blue, and in many instances were not in the money. Especially is this true in young stock in the American classes, which were well to the fore. In Brahmas there was a nice exhibit in both colors. Plymouth Rocks were out in goodly numbers, the awards in the barred variety going principally to the Toronto winners, in whites and buffs there were some exceptionally fine specimens penned, the awards going principally to western breeders. Wyandottes were out strong, with many fine specimens. Leghorns also a big class. Hamburgs, Games, Polands, French and Bantams, composed principally of Industrial winners, which no doubt

will be commented upon in Toronto report.

There was also a grand display of Pheasants, which were much admired by the thousands of people who visited the poultry department.

Supt. "Jack" Saunders is to be congratulated on the pleasing appearance of his department, which was tastefully decorated with an abundance of evergreens and flowers interspersed with Union Jacks. The building was greatly admired by everybody. R. Oke.

EXHIBITORS.

Game, Duckwing.—Cock—1st and 3rd, Barber; 2nd, O'Brien & Colwell. Hen—1st and 2nd, Barber.

Game, Pyle.—Cock—1st and 3rd, Barber, 2nd, O'Brien & Colwell. Hen—1st and 3rd, Barber. Cockerel—1st, Swaffield; 2nd, Sherlock; 3rd, Beattie. Pullet—1st, Sherlock; 2nd, Beattie, 3rd, Swaffield.

Indian Game.—Cock—1st, O'Brien & Colwell; 2nd, Kinder. Hen—1st, Cox, 2nd, O'Brien & Colwell. Cockerel—1st, Cox, 2nd, O'Brien & Colwell. Pullet—1st, O'Brien & Colwell; 2nd, Cox.

Game, any other variety.—Cock—2nd, G. Bogue. Hen—1st, Tozer, 2nd, and 3rd, Bogue.

Bantams, Black Red Game.—Cock—1st, Barber. Hen—1st, Turville; 2nd, Barber. Cockerel—1st and 2nd, Turville; 3rd, Barber. Pullet—1st and 2nd, Turville; 3rd, Barber.

Bantams, Brown Red.—Cock—1st, Turville, 2nd, Barber; 3rd, Bonnick. Hen—1st, Turville; 2nd, Bonnick; 3rd, Barber. Cockerel—1st and 2nd, Turville, 3rd, Bonnick. Pullet—1st, Bonnick; 2nd and 3rd, Turville.

Bantams, Duckwing.—Cock—1st, Turville, 2nd, Barber. Hen—1st, Turville, 2nd, Barber. Cockerel—1st and 2nd, Turville; 3rd, Barber. Pullet—1st and 2nd, Turville; 3rd, Barber.

Bantams, Pyle.—Cock—1st, Mitchelltree; 2nd, Barco, 3rd, McLeod. Hen—1st and 3rd, Mitchelltree; 2nd, Barber. Cockerel—1st, Barber; 2nd, Mitchelltree. Pullet—1st, Mitchelltree; 2nd, Barber.

Bantams, Golden S. Bright.—Cock—1st, Oke; 2nd, McNeill. Hen—1st, McNeill, 2nd, Oke; Cockerel—1st, McNeill, 2nd, Oke. Pullet—1st, Oke; 2nd, McNeill.

Bantams, Silver Sebright.—Cock—1st, Oke; 2nd, McNeill. Hen—1st, McNeill, 2nd, Oke. Cockerel—1st, Oke, 2nd, McNeill. Pullet—1st, Oke; 2nd, McNeill; 3rd, Tozer.

Bantams, Black African.—Cock—1st, McNeill, 2nd, Oke, 3rd, McMullen. Hen—1st, Oke; 2nd, McNeill; 3rd, Tozer. Cockerel—1st, McNeill, 2nd, Oke, 3rd, McMullen. Pullet—1st, McNeill; 2nd, Oke.

Bantams, Buff Cochin.—Cock—1st, McNeill; 2nd, Oke. Hen—1st, McNeill; 2nd, Oke. Cockerel—1st, McNeill, 2nd, Oke. Pullet—1st, Oke; 2nd, McNeill.

White Cochin.—Cock—1st and 3rd, McNeill; 2nd, Frazer. Hen—1st and 3rd, McNeill, 2nd, Tozer. Cockerel—1st and 2nd, McNeill; 3rd, Tozer. Pullet—1st and 2nd, McNeill; 3rd, Tozer.

Black Cochin.—Cock—1st, Moore, 2nd, McNeill; 3rd, Frazer. Hen—1st, Moore; 2nd, McNeill; 3rd, Tozer. Cockerel—1st, Moore; 2nd, McNeill. Pullet—1st, Tozer; 2nd and 3rd, Moore.

White Japanese.—Cock—1st, McNeill; 2nd, Tozer, 3rd, Oke. Hen—1st, Oke; 2nd, McNeill. Cockerel—1st, McNeill, 2nd, Oke. Pullet—1st, Oke, 2nd, McNeill.

Black Tailed Japanese.—Cock—1st, McNeill, 2nd, Oke. Hen—1st, Oke; 2nd, McNeill. Cockerel—1st, Oke, 2nd, Tozer, 3rd, McNeill. Pullet—1st, Oke; 2nd, McNeill, 3rd, Tozer.

Polish.—Cock—1st, McNeill, 2nd, Oke. Hen—1st, McNeill; 2nd, Oke. Cockerel—1st, Oke, 2nd, McNeill. Pullet—1st, Oke, 2nd, McNeill, 3rd, Tozer.

Polish, any other variety.—Cock—1st, McNeill; 2nd, Oke. Hen—1st, Oke; 2nd, McNeill, 3rd, Bonnick. Cockerel—1st, McNeill, 2nd, Oke, 3rd, Bonnick. Pullet—1st, Oke; 2nd, McNeill; 3rd, Bonnick.

Plymouth Rocks, Barred.—Cock—1st and 3rd, Miller; 2nd, Lake. Hen—1st, Lake; 2nd and 3rd, Miller. Cockerel—1st and 3rd, Miller; 2nd,

Henderson & Billings. Pullet—1st, Lake; 2nd, Miller; 3rd, McKay.

Plymouth Rocks, White.—Cock—1st, G. Bogue; 2nd, Cox. Hen—1st, Brown; 2nd, McKay, 3rd, Bogue. Cockerel—1st and 2nd, Gould; 3rd, Millard. Pullet—1st, Millard; 2nd, Hill; 3rd, Gould.

Breeding pen.—1st, Hill.

Plymouth Rocks, Buff.—Cock—1st and 3rd, Scott; 2nd, Henderson & Billings. Hen—1st and 2nd, Scott. Cockerel—1st, Bonnick; 2nd and 3rd, Scott. Pullet—1st, 2nd and 3rd, Scott.

Leghorns, Single Comb, White.—Cock—1st, Cox; 2nd, Meredith & Dunlop; 3rd, Lee. Hen—1st, Cox; 2nd, Tozer; 3rd, Lee. Cockerel—1st, Cox; 2nd, Lee; 3rd, Graham. Pullet—1st, Graham; 2nd, Cox; 3rd, Hill.

Leghorns, Brown.—Cock—1st, O'Brien & Colwell, 2nd, Hill, 3rd, Carroll. Hen—1st, Hill; 2nd, Tozer; 3rd, Shore. Cockerel—1st, Tozer; 2nd, Hill. Pullet—1st and 3rd, Hill; 2nd, Tozer.

Breeding pen.—1st, Hill.

Leghorns, Black.—Cock—1st, Brown. Hen—1st and 2nd, Brown. Cockerel—1st, Bonnick; 2nd and 3rd, Brown. Pullet—1st, Bonnick; 2nd and 3rd, Brown.

Leghorns, Buff.—Cock—1st, Kinder; 2nd, Miller; 3rd, Berner. Hen—1st, Berner; 2nd, Kinder; 3rd, Bartlett. Cockerel—1st, Berner; 2nd and 3rd, Miller. Pullet—1st and 3rd, Berner; 2nd, Miller.

Leghorns, Rose Comb Brown.—Cock—1st and 3rd, Henderson & Billings; 2nd, Tozer. Hen—1st, Tozer; 2nd, Ferguson; 3rd, Henderson & Billings. Cockerel—1st, Tozer; 2nd, Henderson & Billings; 3rd, McMullen. Pullet—1st and 3rd, Henderson & Billings; 2nd, McMullen.

Breeding pen.—1st, McMullen.

Leghorns, Rose Comb White.—Cock—1st, Oke; 2nd, Tozer. Hen—1st, Tozer; 2nd, Oke; Cockerel—1st, Oke; 2nd, Tozer. Pullet—1st, Oke; 2nd, Tozer.

Polands, White Crested Black.—Cock—1st, McNeill; 2nd, Bogue; 3rd, Middlemiss. Hen—1st, Bogue; 2nd, McNeill, 3rd, Middlemiss. Cockerel—1st, McNeill; 2nd, Bogue; 3rd, Middlemiss. Pullet—1st, McNeill; 2nd, and 3rd, Middlemiss.

Polands, Golden.—Cock—1st, Bogue; 2nd, McNeill, 3rd, McNeill; 2nd, Bogue. Cockerel—1st, Bogue; 2nd, McNeill. Pullet—1st, McNeill, 2nd, Bogue.

Polish, Silver.—Cock—1st, Bogue; 2nd, McNeill. Hen—1st, McNeill, 2nd, Bogue. Cockerel—1st, Bogue; 2nd, McNeill. Pullet—1st, McNeill, 2nd, Bogue.

Polish, White.—Cock—1st, Bogue; 2nd, McNeill. Hen—1st, McNeill, 2nd, Bogue. Cockerel—1st, McNeill; 2nd, Bogue. Pullet—1st, McNeill; 2nd, Bogue.

Polish, Golden or Silver Bearded.—Cock—1st, Bogue; 2nd, McNeill. Hen—1st, McNeill; 2nd, Bogue. Cockerel—1st, Bogue; 2nd, McNeill. Pullet—1st, McNeill; 2nd, Bogue.

Polish, White Bearded.—Cock—1st, McNeill, 2nd, Bogue. Hen—1st, McNeill, 2nd, Bogue. Cockerel—1st, Bogue, 2nd, McNeill. Pullet—1st, McNeill, 2nd, Bogue.

Polish, Buff-faced.—Cock, hen, cockerel and pullet—1st and 2nd, all McNeill.

Honduras.—Cock—1st, A. Bogue; 2nd, G. Bogue. Hen—1st, A. Bogue; 2nd, G. Bogue. Cockerel—1st, A. Bogue; 2nd, Milton & Mitchelltree. Pullet—1st, Milton & Mitchelltree, 2nd, A. Bogue.

Croze Coeur.—Cock—1st, Oke. Hen—1st and 2nd, Oke. Cockerel—1st, Oke. Pullet—1st, Oke.

La Fleche.—Cock—1st and 2nd, Oke, 3rd, G. Bogue. Hen—1st and 2nd, Oke; 3rd, G. Bogue. Cockerel—1st and 2nd, Oke. Pullet—1st and 2nd, Oke.

Sultanas.—Cock, hen, cockerel and pullet—1st and 2nd, to Oke.

A. O. V. Fowl.—Cock—1st, Tozer; 2nd, McNeill; 3rd, Fraser. Hen—1st, McNeill; 2nd, Tozer; 3rd, Fraser. Cockerel—1st, McNeill; 3rd, Fraser. Pullet—1st and 2nd, Min-

2nd, Tozer; 3rd, Dickinson. Pullet—1st, McNeill; 2nd, Tozer; 3rd, Dickinson.

Langshans.—Cock—1st and 2nd, McCurdy, 3rd, McConnell. Hen—1st, McConnell; 2nd, and 3rd, McCurdy. Cockerel—1st and 2nd, McCurdy; 2nd, McConnell. Pullet—1st and 2nd, McCurdy, 3rd, McConnell.

Dorkings, Silver Grey.—Cock—1st, Bogue; 2nd, Cox; 3rd, Shore. Hen—1st, Bogue; 2nd, Shore; 3rd, Cox. Cockerel—1st, Bogue; 2nd, Shore; 3rd, T. & H. Shore. Pullet—1st, Bogue; 2nd, T. & H. Shore, 3rd, H. Shore.

Dorkings, Colored.—Cock—1st and 2nd, Bogue. Hen—1st and 2nd, Bogue. Cockerel—1st, Bogue. Pullet—1st and 2nd, Bogue.

Dorkings, White.—Cock—1st and 2nd, Bogue. Hen—1st and 2nd, Bogue. Cockerel—1st, Shore; 2nd and 3rd, Bogue. Pullet—1st and 2nd, Bogue; 3rd, Shore.

Wyandottes, Golden.—Cock—1st and 2nd, Wray Bros; 3rd, Graham. Hen—1st and 2nd, Wray Bros; 2nd, Graham. Cockerel—1st and 3rd, Wray Bros; 2nd, Graham. Pullet—1st and 3rd, Wray Bros; 2nd, Saunders.

Wyandottes, Silver.—Cock—1st, 2nd and 3rd, Arthur. Hen—1st, 2nd and 3rd, Arthur. Cockerel—1st, 2nd and 3rd, Arthur. Pullet—1st, 2nd and 3rd, Arthur.

Wyandottes, Black.—Cock—1st, G. Bogue, 2nd, Oke; 3rd, A. Bogue. Hen—1st, Oke; 2nd, McMullen; 3rd, Axtell. Cockerel—1st, Axtell; 2nd, Oke. Pullet—1st, Axtell; 2nd, Oke.

Wyandottes, Buff.—Cock—1st, Perrin; 2nd, Cook. Hen—1st and 3rd, Perrin; 2nd, Cook. Cockerel—1st, Cook. Pullet—1st and 2nd, Perrin; 3rd, Cook.

Wyandottes, White.—Cock—1st, Kettlewell, 2nd, Hill; 3rd, Bogue. Hen—1st, Kettlewell; 2nd, Bogue; 3rd, Hill. Cockerel—1st and 2nd, Kettlewell; 3rd, Hong. Pullet—1st, 2nd and 3rd, Kettlewell.

Breeding pen.—1st, Kettlewell.

Dominiques.—Cock—1st, G. Bogue; 2nd, Fink. Hen—1st, Fink; 2nd, Bogue. Cockerel—1st, Bogue; 2nd, Fink. Pullet—1st, Bogue, 2nd, Fink.

Javas, Black.—Cock—1st, Oke; 2nd and 3rd, Cox. Hen—1st, Oke; 2nd and 3rd, Cox. Cockerel—1st, Cox; 2nd, Oke. Pullet—1st, Oke, 2nd, Cox.

Dominiques, A. O. Color.—Cock—1st and 2nd, Oke. Hen—1st and 2nd, Oke. Cockerel—1st, Oke. Pullet—1st, Oke.

Black Spanish.—Cock—1st, Henderson & Billings. Hen—1st, Henderson & Billings. Cockerel—1st and 3rd, Henderson & Billings; 2nd, G. Bogue. Pullet—1st, Bogue, 2nd and 3rd, Henderson & Billings.

Minorcas, Black.—Cock—1st and 2nd, Minshall; 3rd, Mayhew. Cockerel—1st, Minshall, 2nd, Roberts; 3rd, Stable. Pullet—1st, Minshall; 2nd, Webber; 3rd, Roberts.

Minorcas, White.—Cock—1st and 2nd, Laekle. Hen—1st and 2nd, Laekle. Pullet—1st and 2nd, Roberts.

Andalusians.—Cock—1st, Little, 2nd and 3rd, Munroe. Hen—1st and 2nd, Little; 3rd, Munroe. Cockerel—1st, Milton & Mitchelltree, 2nd and 3rd, Munroe. Pullet—1st, Milton & Mitchelltree, 2nd and 3rd, Munroe.

Breeding pen—1st, Nlle & Neal.

SHERBROOKE FAIR.

THE POULTRY EXHIBIT LARGER THAN EVER.

THE poultry exhibit at this fair, held September 4th to 9th, was again a decided success in every way, the number of birds being in excess of last year, and the quality of the stock much superior.

Although the building was enlarged last year, the space will another year have to be further increased, in fact the association is determined to make the poultry department at the Sherbrooke Fair second to none.

Mr. Sharpe Butterfield, of London, Ont., acted again in the capacity of judge on everything but the pigeons. This is the fourth year that Mr. Butterfield has judged in Sherbrooke, and if possible, gave better satisfaction than ever, and fully seven-eighths of the exhibitors have already expressed their desire to have him here again next year, which certainly speaks well as to his judgment in placing the cards.

Mr. Jas. Ainslie, of Montreal,

judged the pigeons, which numbered twice as many as in any former year, he also gave good satisfaction.

The following is a list of the exhibitors and their addresses, with awards:

LIST OF EXHIBITORS.

Dr. J. H. Bastien, Rigaud, Que.; Thomas Sanbury, Waterville, Que.; N. Bonneville, Danville, Que.; E. R. Frith, Maxville, Ont.; F. C. Brown, Quebec, Vt.; W. B. Nantel, St. Jerome, Que.; A. Thompson, Allan's Corners, Que.; J. O. Archambault, Sherbrooke, Que.; Robt. Ness, Howick, Que.; L. N. Denway, Kingscroft, Que.; F. S. Wetherall, Cookshire, Que.; W. H. Reid, Kingston, Ont.; H. H. Willis, Granby, Que.; A. P. Mutchmor, Ottawa, Ont.; R. B. Millard, London, Ont.; T. W. Norris, Newport, Vt.; A. Kilgour, Sherbrooke, Que.; J. W. Neilson, Lyn, Ont.; H. J. Elliott, Danville, Que.; W. M. Osborne, Brockville, Ont.; J. E. Wadsworth, Sherbrooke, Que.; N. M. Hubbard, Barton, Vt.; P. B. Wilson, Sherbrooke, Que.; F. H. Bender, Quebec, Que.; A. A. Gilmore, Athelstan, Que.; E. Morin, A. F. Fraser, Sherbrooke, Que.; H. E. Parsons, East Angus, Que.; Robt. Sawyer, East Angus, Que.; L. J. D. Gauthier, Cookshire, Que.; W. M. Ford, Huntington, Que.; W. J. Wilson, Montreal; H. E. What the New Ads. say this Month.

In this column we note from month to month new display advertisements, changes for same and the advent of yearly "For Sale" ads.

William Thorn has several varieties for sale, and draws attention to the prizes awarded some of his stock.

Post Perin—see ad on back cover—gives a list of some wins in buff 'Dottes worth reading.

Victoria Poultry yards offer some grand young stock in buff and white 'Dottes, and give a list of recent wins as well as those of the 1888 Industrial.

Liverpool Poultry Yards draw readers' attention to their Industrial winnings, and have winners, and other birds not so good to dispose of.

A. H. Lake announces that again the barred Rock Industrial medal fell to him. He has young and old stock for sale.

J. W. Kedwell, who takes space on the front cover for a year, has Plymouth Rocks in barred, buff and white, and has them good. He has show and breeding birds at the right prices. He makes a "special offer" on Rouen Ducks that should find a taker at once. They are dirt cheap.

Minshall's Minorcas won well at Toronto and London. See lists for awards. He assures us every bird he showed was bred by him, and pointedly adds owned by him.

J. E. Bennett, the barred Rock man, gives a list of some recent wins, and offers some fine hens as well as young stock for sale.

C. J. Daniels draws attention to the fact that "Cyphers" won the \$10 in gold and Diploma at Ottawa. If you want anything—write Daniels.

Toronto Poultry Association announce dates, and give a list of Judges. No members' fee charged. Big list of specials. For all particulars watch Review.

A. W. Graham has golden 'Dottes and white Leghorns, good as the best, to sell.

See Chas. Mueller's new ad for pointers re his specialties barred Rocks and brown Leghorns.

C. J. Daniels is now agent for Stearns' Green Bone Cutters (late Webster & Hannum's). He will be glad to send particulars.

Dr. A. W. Bell has grand buff Cochon chicks to dispose of, all from his two Industrial winners.

H. J. Cook desires to sell his entire flock of buff Rocks and buff 'Dottes, and has many good ones amongst them. Cheap for quality. Write him your wants.

Black Langshans of the best quality. See John F. Hill's ad for particulars. They are bred from winners of many prizes.

Before now we have written highly of Perstak Poultry Powder and Perstak Poultry Spray. This is a good time for a general cleaning up, and a liberal portion of these on fowls and houses will give your birds a winter's ease from vermin. They are harmless to fowls, but death to lice. It may be had from dealers or direct from the factory at Stouffville.

Owing to removal Norman S. Jones must dispose of all his pigeons, and offers the entire lot at bargain prices. Amongst them are many winners, including his famous lot of Hopples, all colors.

H. H. Willis draws attention to his wins, and offers chicks and yearlings in Barred Rocks and Black Minorcas for sale. Also a Mann Bone Mill.

S. M. Cemo & Co. are obliged to sell all their stock and fixtures, and have many good birds that should find ready buyers. Write them for full description.

Berner's Buff Leghorns. See what their owner has to say this month. He has good ones to sell.

NEW YORK STATE FAIR FOR 1899.

All admit this to be the par excellence of the early fall shows yet held in the East. The quality of stock and perfection of management are praised on all sides. No one had a sure thing, and many surprises came to us in the winning of honors by the unexpected. The judging was done by Messrs. Drensteadt and Zimmer, to the satisfaction of all. Mr. Santee judged the Minorcas, and Mr. Jagoe the waterfowls to oblige these gentlemen. All admit the work well done. The following is a list of entries: Single entries, 1,240; breeding pens, 116—5 each, 580; turkeys in pairs, 7—2, each, 14; geese in pairs, 23—2 each, 46; ducks in pairs, 47—2 each, 94; other fowls in pairs, 28—2 each, 56; pigeons, 240; rabbits and pets, 20. Total, 2,290.

WINTER SHOW DATES.

The dates so far chosen that we can learn of are as follows. Show committees should try as far as possible to avoid clashing of dates as it must necessarily tend to lessen entries.

| | |
|------------------------|-----------------------------|
| Woodstock..... | Dec. 6, 7, 8. |
| Hamilton..... | Dec. 13, 14, 15, 16. |
| Ingersoll..... | Dec. 13, 14, 15. |

Breeders' Directory, 1-5 col. card, 1 year, \$8; half year, \$5.

Advertisements contracted for at yearly or half yearly rates if withdrawn before the expiration of the time contracted for will be charged full rates for the time inserted.

Back and front cover pages a matter of special correspondence.

These are our only rates for advertising and will be strictly adhered to. Payments must be made invariably in advance. Yearly advertisements, paid quarterly in advance, changed every three months without extra charge.

All communications and advertisements must be in our hands by the 15th to insure insertion in issue of same month. Address,

H. H. DONOVAN,

124 Victoria Street, Toronto, Ont.

FOR SALE OR EXCHANGE.

Advertisements of 27 words, including address, received for the above objects, at 2 cents for each and every insertion, and 1 cent for each additional word. Payment strictly in advance. No advertisement will be inserted unless fully prepaid.

TWELVE ADV. \$2.50

An advertisement of 30 words will be inserted EACH MONTH for one year in this column for \$2.50, paid in advance. Advertisements may be changed every month if desired.

This Coupon is good for one advertisement of 20 words in the "For Sale and Exchange" column.

THE CANADIAN POULTRY REVIEW.
Toronto.

To meet the wants of advertisers who are continually using this column, and who find it a great trouble to be constantly remitting small amounts, we have adopted the plan of issuing Coupons (as above) good for 20 words each, 4 for \$1. Anyone buying these Coupons can use them at any time in lieu of money when sending in an advertisement. Not less than four Coupons sold.

THESE RULES must be followed.

1. Payment MUST be made in advance, the amounts are too small to permit of book-keeping.

2. Write copy for ad. on a separate sheet from any other matter, and on one side of the paper only.

3. See that ad. is fully prepaid as per rate above.

4. Say plainly how many times ad. is to be inserted.

5. Give heading under which it is to appear.

6. Charges must reach us not later than the 15th. New advertisements not later than 20th of each month.

Unless above rules are followed we cannot guarantee correctness.

Mr. J. H. Cayford, Box 1168, Montreal, is our Agent and Correspondent for the Province of Quebec. Any correspondence relating to subscriptions or advertising may be addressed to him.

Send a Stamp for reply.

Enquiries not of a business nature must be accompanied by a two cent stamp for reply.

This paper is mailed regularly to its subscribers until a definite order to discontinue is received and all arrears are paid in full.

Bantams.

For Sale—A choice lot of young and old white Cochon Bantams. Also a few breeding cocks and hens of Blue Andalusians cheap. Pullin & Kerr, Box 279, Galt, Ont.

For Sale—Black African, white, black and buff Cochon Bantams in old and young stock. See November REVIEW for prizes won at Brantford Southern Fair. Brantford Bantam Yards, 7 Niagara Street, Brantford.

Trio of Golden Sebrights—2nd cock, 1st hen and mate, at Guelph Central, heavy competition. Small grand laing, for sale cheap, guaranteed. C. Eisele, Guelph.

Bantam Winners—White Cochin cock 93%, \$3; 2 hens, \$2.50 and \$1.50 each; black cock \$2.50; Silver Sebright cock 93%, \$3.00; 2 Golden cockerels, \$1.50 each; trio Black Minorcas, 1st fall fair, \$3.00. **Hankin Bros., Owen Sound**

Bants For Sale—Golden and Silver Sebrights, Black, Buff and White Pekins, Black African, Black Tail Japanese, White Polish, Pyle Game and Golden Bearded Poland. Satisfaction guaranteed. **Bert Hicks, Woodstock.**

Plymouth Rocks.

For Sale—Barred Plymouth Rocks, 3 cocks, 10 hens, 25 cockerels and pullets. A few must be sold to make room, first come first served. **J. W. Porteous, Galt, Ont.**

For Sale—Trio fine yearling buff Rocks, also white Rock cock, bred by Mr. Bailey, a positive, stay white bird. Also yearling white Rock cock, 1st at London, and 4 yearling white Rock hens, and 3 large pullets. Cheap for want of room. **George Bogie, Strathroy, Ont.**

Our Barred Rocks—Win at Toronto and London. We have ten fine barred cockerels for sale at \$2.00 and \$3.00 each. Some fine Buff Rocks for sale. **Henderson & Billings, St. Mary's, Ont.**

Barred Roc Sale—100 cockerels, Wells and Miles strains. Extra value on pens or trios. Must sell to make room. **Payton & Rounds, Woodstock, Ont.**

Dogs.

For Sale—St. Bernard pups. Plinthum stock. Both sire and dam prize winners. Nothing cheap about them until price. Also 16 beautiful Collie pups, from imported sire Anohairna Boy, handsome Chris, and Strathcona. Full pedigree given. Price \$5 to \$10. Write for particulars. These pups are second to no pups bred in this country although low priced. **Mrs. P. Hart, Belleville, Ont. 1199**

Scottish Collie Puppies—A number of very grand ones, sired by imported Otterburn Conqueror or my best imported bitches, that will be sold to bona fide poultry men and farmers at from \$10.00 to \$20.00, about a quarter their actual value; also a number of older ones. Apply at once to **C. Y. Ford, Kingston, Ont. N. B.**—This strain can be easily trained to take care of poultry, cattle and sheep.

Do You Keep a Dog?—THE CANADIAN KENNEL GAZETTE will tell just how to care for him, and will also give you all the news of the month, portraits from life of the best dogs living, and many other good features. \$1 a year for a copy. Address **H. B. Donovan, Publisher, Toronto.**

Sale Or Exchange.

For Sale or Exchange—A number of homing pigeons, pure bred, choice birds, any color; or will exchange for pure Pouters, black pied or blue pied, or white Pouter pigeons. **W. J. Gordon, Pickering, Ont. 200**

Trio Buff Wyandottes, \$5—Buff Wyandotte and buff Rock cockerels, \$1 and upwards, Golden Wyandottes to exchange for other varieties, make offers. **Brown & Buchner, Kingsville. 1199**

Golden Wyandottes—(Graham, Magill), White Minorcas (Jerome), Wooden hen and brooder, fancy Canaries and Pigeons. Want White Minorcas Pekin and Game Bantams, Pigeons and Fox Terrier dog, and offers. **Alvin Brioker, Listowel, Ont.**

For Sale or Exchange—Some very fine barred and white Rocks and Pekin Ducks. Also one pair of Indian Runner Ducks. All bred from the choicest stock. I have a medium sized hind bitch, good on rabbits and foxes, which I will exchange for fowls or bone cutter. **John Colson, Guelph, Ont.**

For Sale or Exchange—One 50 egg size incubator in first-class order. White Fantail Pigeons from imported stock. Buff Leghorn cockerels, Barnes strain, black Leghorn cockerels, or will exchange for standard bred fowl. Wyandottes preferred. **J. B. Woodhall, Box 91, Theford, Ont.**

For Sale—Golden B. Poland cockerels, black Leghorns, and black Hamburg cockerels. Trio Coocon Bantams. Also Mann's bone cutter, cost \$15 for \$10, or will exchange for good show birds. **Victor Fortier, St. Theresa, Que.**

Abbott Bros.

EAST OF ENGLAND LIVE STOCK AND POULTRY FARMS,

Thuxton, Hingham, Norfolk, England.

The largest and most successful prize poultry breeders in the world. Almost all varieties of Poultry, Ducks, Geese, Turkeys and Bantams are kept, and have taken more cups, medals, diplomas and prizes than any other breeding establishment in England. Also

fancy and common English Pheasants. Messrs Abbott Bros. being frequently called on to judge at the largest poultry shows in England, have rare opportunities of purchasing for customers any variety of poultry which they do not keep themselves.

ALSO BREEDERS AND EXPORTERS OF THE MOST

Fashionable Hackney Horses

Stallions and Mares of all ages and several prize-winners for sale, all registered in the

Hackney Stud Book.

PURE BRED DAIRY SHORTHORNS AND RED POLLED CATTLE

THE OLD FASHIONED BOB-TAILED SHEEP DOGS.

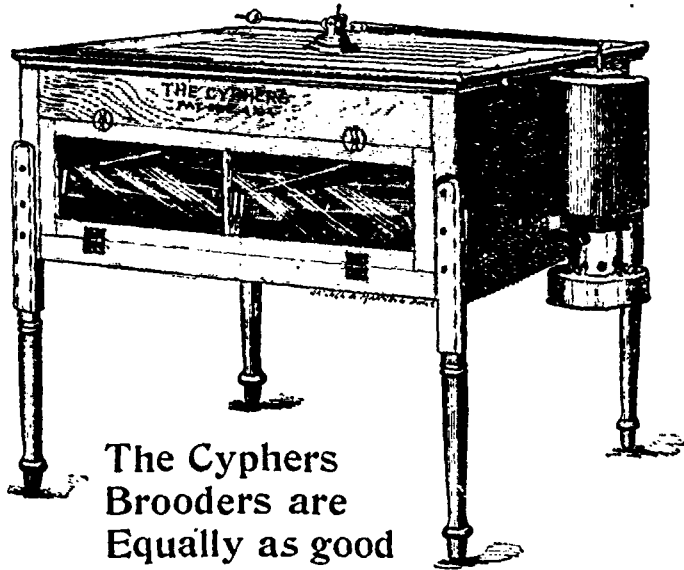

Prize winners and first class specimens always on hand.

This is the largest and oldest established Poultry Farm in England. Illustrated De-

scriptive Catalogue, containing list of prizes and testimonials from customers in all parts of the world free on application.

Cyphers Incubators still on top. At Ottawa Fair we were awarded \$10 in Gold and Diploma for best Incubator and Brooder in operation.

There are incubators and there are incubators but there is but one

The Cyphers Brooders are Equally as good

Cyphers Incubator

and but one place in Canada to get them, viz:

C. J. Daniels, TORONTO

DON'T be persuaded by the other fellow to buy "something just as good," because the Cyphers has no equal. Don't buy another make because it is a dollar or two cheaper than the very best (Cyphers); that dollar or two will soon be spent in extra time sitting up nights watching that unreliable regulator that varies from 100 to 116 or 120 degrees.

Professor L. G. Jarvis in his last year's test of Cyphers Incubator at Experimental Farm, Guelph, says, "The temperature in the Cyphers Incubator did not vary one half point all through hatching season." These experimental stations know a good thing when they see it. Cyphers Incubators are the only machines used at Experimental Farms both at Guelph and Ottawa.

The Cyphers Incubator is also absolutely fireproof; other makes catch fire, never the Cyphers.

The Cyphers hatches out a larger percentage of good, strong, healthy chicks than any other incubator on the market. Take the Cyphers machines and don't do as many of our customers have done, bought two or three other makes of incubators and then had to buy the Cyphers from us to hatch chickens with. The Cyphers is a strictly first-class machine in every respect and will last a life time. No moisture required as the machine supplies its own moisture.

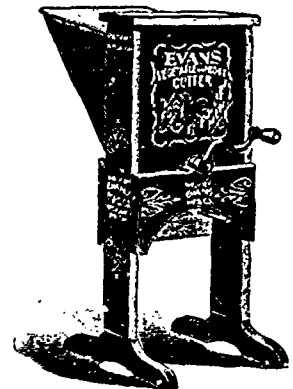

Crank or Balance Wheel.

ing is believing. Same with hogs. Paint rubbing posts or sprinkle floor of sleeping pen. All done. No more lice, mites or fleas. No handling, no labor. Cheap. Only \$1.00 for a gallon can. Want some?

We are headquarters for all kinds of Poultry Supplies—incubators, Brooders, Egg Testers, Clover Cutters, Bone Mills, Mica Grit, Oyster Shell, H. O. Poultry Food, Granulated Bone, Superior Meat Meal, Blood Meal, Spratts' Crissel, Cut Clover Hay, Clover Meal, Panacea, Sheridan's Condition Powders, Dr. Hess' Louse Killer, Lee's Liquid Lice Killer, Lambert's Death to Lice, Granulated Charcoal, Evan's Root Cutters, Sanitary Drinking Fountains, Grit and Shell Boxes, Leg Bands, Conkey's Cure for Roup, Poultry Netting, Picket and Wire Fence. Fourteen varieties of Standard bred fowls, eggs and stock for sale at reasonable prices.

Lice and Mites on your poultry? Paint roosts with Lee's Lice Killer. All done. Next morning look, and see all mites and lice lying dead on roost boards. Many customers report finding them in piles a half inch deep where each fowl roosted the night before. See-

Bone, Vegetable and Root Cutter.
