GOVERNMENT HOUSE, OTTAWA.

TUESDAY, 28th day of July, 1868. PRESENT :

HIS ENCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

N the recommendation of the Honorabie the Min-N the recommendation of the Honorable the Minster of Customs, and in pursuance of the provisions of the 11th Section of the Act 31 Vic., Cap 6, initiated: "An Act respecting the Customs," Its Excellency in Council has been pleased to order, and it is hereby ordered, that the following regulations respecting the coasting trade of the Dominion, be said the same are hereby adopted and established.

Certified,

WM. H. LEE,

Clerk of the Privy Council.

COASTING REGULATIONS.

Cle-k of the Privy Council.

COASTING REGULATIONS.

1 Vessels and boats employed solely in the transport of goods or passengers from one port or place to another port or place within the limits of the Dominton of Canada, shall be deemed to be engaged in the coasting trade, and shall be subject to the regulations governing the same.

2. None but British registered vessels and boats, wholly owned by British subjects, can lawfully be engaged in the coasting trade of the Dominion of Canada, and the names of such vessels or boats and the same of their ports of registry, shall be distinctly painted on the stern of the said vessels or boats.

3. Such vessels and boats, may, without being subject to entry, or clearance as required by law, for vessels trading between parts in the Dominion of Canada, as well as with foreign ports, carry goods the produce of Canada, or goods duty free, or goods duty prace of Untario and Quebec, to any other ports or places of Untario and Quebec, to any other ports or places in the Frovince of New Brunswick, to any other ports or places in the said Province, or from any ports or places in the Brunners or masters of Such vessels or boats. Shall take out a license for the season for that purpose from a Collector of Customs in Canada, and that the owners or masters in taking out the said license shall enter into Bonds of \$500, conditioned that such vessels or boats shall not be employed in the foreign trade, and provided also that the master of every auch vessel or boat shall keep, or cause to be kept, a cargo book in the form prescribed by the Customs Department, to be regutered by the Collector of Customs who grauted the license in which book shall be entered at the port of Inding, an account of all goods taken on board of such vessel or boat, stating the description of the packages the quantities, the descriptions and values of the goods therein, as also of the go istowed loose, and the names of the respective funes of departure from the port of Inding an account of all goods taken on boar

from the port of lading and of arrival at the port of unlading.

4. The master of any such vessel or boat shall produce his license and cargo book to any Officer of Customs, whenever the same shall be demanded and answer all questions put to him, and such Officer of Customs shall be at liberty to note any romark on the cargo book which he may deem proper; and if the cargo book shall not be kept in the manner hereby required, and the particulars of an cargo laden and unladen, duly noted therein, the goods and vessel shall be fortested, and the master shall incur the penalty of \$100.

be to telled, and the master shall incur the penalty of \$190.

5 Before any coasting vessel or boat shall depart from any port of lading in any one of the Provinces of the Dominion of Canada for any other port in the said Dominion, not in the said Province et departure, an account or report with a duplicate thereof, in the form or to the effect following, and signed by the mater, shall be delivered to the Collector, who shalt retain the duplicate and return the original account or report dated and signed by him; and such account or report shall be the clearance of the vessel or boat for the volsee, and the transite and pass for the goods expressed therein, except for goods under bond or goods hable to excise or internal revenue duty, which hall require the entries and warrants for landing to be signed by the proper officers as required by law, and may such account or report be laise, the master who signed at shall foreit the sum of \$100.

Collector of Customs for the

6. Within twenty-four hours after the arrival of any co asting vessel or boat at the port of discharge which requires a transite as above described, and before any goods shall be unisdon, the transite with the name of the piece or wharf where the indig is to be discharged, noted thereon, shall be delivered to the collector, who shall note thereon the date of the delivery; and beat shall not be unladen until the outry has been made at the Custom House, and a warrant granted for the bandling thereof; and if any of the goods on board witch vessel or boat be subject to any duty of excise or internal favenue the sameshall not be unladen, without the authority or remission of the proper officer of excise, but no entry shall be required at the Custom House for any goods brought coastwise the profession in the proper of the proper of the proper of the goods.

7. Vessels and boats employed in the coasting trade and that shall not have taken out a license for carrying goods, and obtained a carge book as above provided, shall report inwards and outwards at the nearest port to their place of arrival or destination and require clearances whenever they depart from any port or place within the Dominion of Candad, and in default of or departing and arriving without due entry inwards or outwards as the case may be. Provided that when a vessel shall sail from any place to the carrying and arriving without due entry inwards or outwards as the case may be. Provided that when a vessel shall sail from any place where there is no Castom House, or officer of Customs, it shall be sufficient for the carrying out of this regulation that the owner or master of such vessel, do, as soon afterwards as possible, forward to the noarrest Custom House as possible, forward to the port of place of the port of place and apport to another Canadian port, may be carried in any British registered vessel o

ROYAL

INSURANCE COMPANY

FIRE AND LIFE.

CAPITAL . - TWO MILLIONS STERLING

FIRE DEPARTMENT.

Nearly the Largest Insurance Company in the World.

ANNUAL INCOME £800,000

ADVANTAGES TO FIRE INSURERS

1st Security unquestionable.

2nd. Revenue of a most unexampled magnitude.

3rd. Every description of property insured at moderate rates.

4th. Prompt and liberal settlement of Losses.

5th. Loss and damage by explosion of Gas made good.

6th. Moderate Premiums.

LIFE DEPARTMENT.

Large participation in profits-equal to 20 per cent. per annum on sum assured-being the Largest Bonus ever continuously declared by any office.

BOONS TO LIFE ASSURERS.

The Directors invite attention to a few of the advantages the ROYAL offers to its Life Assurers:

1st. Exemption of assured from Liability of Partner-

2nd. Moderate Premiums.

3rd. All fees paid by the Company.

4th. Thirty days' grace allowed.

5th. Profits divided every five years.

All new Life Insurances, with participation, effected after this date, will become entitled to an INCREASED SHARE OF THE PROFITS, in accordance with the Resolution passed at the last Annual Moeting of Shareholders.

PARTIAL FAILURE OF THE SILVER MOVE-MENT IN ONTABIO.

THE silver novement in Ontario, which, at the start, seemed to prosper amazingly, now appears, as we predicted would be the case, to be breaking down at various points. In Hamilton, at a meeting of its promoters, the following resolution was carried mani-mously:-"That in consequence of a minority of the "meeting having expressed diseatisfaction at the pre-"sent working of the silver movement, and owing to "the refusal of other trades to co-operate with them, "the arrangements entered into on the 13th ult. cease "from this date." In Kingston and Ottawa also, the movement is reported to have been abandoned; and in Chatham at a meeting of the Town Council, it was decided, nem. con., that eliver should be taken at par in payment of taxes, and that it should be paid out at par for work for the Corporation, and subsequently the silver movement entirely fell through, the much abused coin being taken at par at all stores, and every-where in trade. Where so many different and opposing interests are involved, experience has proved that it is utterly impossible to secure permanently the observance of any such agreement as that by which those desiron of driving away eliver bound themsolves. The simplest way for merchants to protect themselves against less from taking aliver, is to mark up their goods say four per cent above the price at which they could afford to sell them for bankable funds. This was done before, and is done here now. Nearly every retail merchant we know of would be quite willing to allow his customers the current rate MONTREAL SAW WORKS.

of premium if paid for his goods in par funds. This remedy against loss will be found to be at least practicable, and much more satisfactory to customers than being obliged to have a cent ready to hand in with every silver quarter of a dollar they have to disburse.

We have noticed that several of our contemporaries published in Ontario, while criticising—some favorably, others the reverse—a former article in the Trade Review on the silver question, stated that we hoped some black sheep would break through the agreement not to take silver at par. We beg to correct our critics. We wrote that some black sheep would break through that it had been the case in Montreal, and we feared it would be so in Hamilton and Toronto. The result so far seems to prove that we were quite as assacious as some of our contemporaries.

MR. DERBY, THE GRAND TRUNK AND RECIPROCITY.

THE last number of Herapath's Journal contains Mr. E. H. Derby's third letter on the Grand Trunk Bailway, more especially devoted to the consideration of Reciprocity, and the advantage thereof to that rallway. This letter, which we publish elsewhere states fairly enough what benefits the United States and Canada respectively would derive from the establishment of free trade between the two countries, from the want of which, however, he mistakenly believes Canada to be the greater sufferer. On that point, we do not care particularly to say anything. We suppose a very considerable impetus would be given to many manufactures in the United States, were their goods given the monopoly of Canadian markets as far as foreign countries are concerned, and it is hardly to be doubted that to the consumer, Canadian lumber, fish, coal, flour, barley, &c., would be much cheaper were there no duties to be paid on them. But we are quite willing to admit that our trade also would be benefitted very decidedly by a renewal, and on a more ex-tensive scale, of the commercial intercourse carried on under the late Reciprocity Treaty. The carrying interests especially would gain both from the increased freight, but also from the additional number of passengers business would cause to pass from Canada to the States, or vice versa. If the proprietors of the Grand Trunk have any such influence in the Imperial or Dominion Governments as Mr. Derby thinks they ought to have, then we quite agree with him in thinking that that induced would be well exerted in oring ing about free trade on equal terms between two dreds of miles; the goneral interests of both countries would benefit, and the much disappointed bondhold. ors would perhaps be able at last to receive some return from their bliberto unfortunate investments.

THE HARVEST OF 1868.

THE Harvest throughout the Western part of the Dominion may now be said to be over. In some particular places, the crops are not yet all entirely housed, but there is very little grain now left standing. We are now, therefore, in a position to speak with some certainty of the yield which the farmers have obtained. The season will be known as one of extremes. It has been hotter and drier than any summer for nearly a score of years. The crops, too, manifest extremes. The fall wheat and hay are abuudant; the former, in particular, is one of the largest yields which has been obtained for several years. We are convinced this will be found to be the case generally -but, it must be confessed, the quality will not equal the quantity. The intense heat in July ripened the grain altogether too fast, and although this did not prevent the hopes of a good yield from being realized, still the sample suffered considerably. The wheat and hay crops may be set down as above the average; barley, oats, rye and peas are considerably below it In localities where these were sown carly and had attained a luxuriant growth before the heat set in, the return is about an average, but those farmers who. through dilatoriness or other causes, sowed late in the spring, have but a sorry return. Many such fields have been almost a total failure, yielding very little more than the seed placed in them. Accounts regarding the spring wheat-which is one of our most valuable crops-differ considerably. But we feel warranted, after summing up the information received from different sources, in setting it down as an average crop. Many of those townships which grow spring wheat did not suffer so much from the drouth as those situated more inland. They enjoyed occasional showers, and although not what it would have been under a more moderate degree of heat, the crop is by no means a bad one, as many have hastily asserted. Root crops are, at present, not looking over well. Potatoes, turnips, carrots and mangolds, all require more rain. The yield will, we fear, be deficient. So far as potatoes are concerned this result may now be considered certain. Taking the harvest of 1868 as a whole, we believe it will come up to the average. It has fallen short of the great expectations which were indulged in during the beginning of June, than which a finer premise never existed. The great heat and drouth of the summer, have taken millions of dollars out of the pockets of the farming community. But we have reaped a good harvest nevertheless, and have reason to be thank'ul it has turned out so well.

GOLD, BOND AND TRADE PROSPECTS IN THE STATES.

OOKED at from any point of view, the recent rapid rise in the price of gold in New York-the Financial capital of the Republic-is a circumstance of unusual importance. It is of the highest moment to the thousands who hold American bonds, and not less so to the commercial men of the Union, whose long anticipations of a financial crisis seem now more likely to be realised than ever. The gravity of the present upward movement in gold is, that it appears to arise from causes which are likely to be permanent, and to still further augment the difficulty. There have been many rises in the value of the precious metal which have been produced by the bulls and their speculations. It was at first supposed this was a case of the kind. If it had been, a few weeks would have wit nessed the usual fall, the bulls would have pocketed their profit, and all danger would have passed away. But there seems to be only too much reason to fear that far graver causes than speculation have caused gold to run up to 150, as it did a short time ago. Primarily—the great cause is, the scarcity of gold on this continent. And this scarcity at present has been produced by the almost total suspension of European purchases of the 5-20 bonds. For at least four years the sale of American bonds in England, Germany, and other foreign countries, has presented the col-lapse of their financial fabric. The large annual balances of trade against the Republic, had to be adjusted in specie, and the latter was obtained by the proceeds of the tonds sold abroad. So long as the latter continued to be purchased by Englishmen and Germans, no serious difficulty was likely to arise; but it was evident that the day must ultimately come when the demand for such securities would cease This period, so often referred to, has at last arrived, and the great importing houses of New York, Boston, Philadelphia and other cities, find themselves called

upon to procure gold to pay their foreign purchases without the usual supply of that precious article having been obtained from the sale of their 5-20's in Europe. If this be the exact state of the case-and New York advices affirm it to be so-gold gambling and excitement are likely to have another lively time of it across the lines. The question naturally arises: Where are the Americans to get gold sufficient to adjust the "balance of trade" constantly against them? Their purchases of foreign merchandise have declined very little during the past three or four years. This very season-1868-their foreign imports are only about ten millions less than last year, whilst their exports have fallen off to a far larger degree. The difficulty can no longer be blidged over by the sale of bonds-fully \$700,000,000 of which are now held in Europe - and it is difficult to see not only how gold can be kept down to a reasonable limit, but how the most serious financial troubles can be prevented. There are many in New York who are looking forward to the approaching fall with serious misgivings. Not a few declare a crisis to be inevitable, contending that the inflated and unsound system of business carried on during and since the war must now topple over with a crash. Whilst we are not prepared to say that the long-expected American crisis is inevitable before the New Year comes round, we must confess that the sky at present looks exceedingly threatening This arises not simply from the continued heavy importations of the Republic and the threatened gold famine, but also from another circumstance of the gravest importance to our neighbours: we refer to the rude shock which has been given to American credit by the threatened partial repudiation of their national debt. So long as this sort of swindling was only advocated by obscure stump-orators, it attracted little attention. But when members of Congress advocate and support such a scheme, when the Democratic party adopts a plank in its party platform directly pointing to repudiation, and when thousands applaud the nefarious design, the case becomes entirely different. The danger is felt to be more or less great, and with a very unsavory remembrance of the action of Mississippi and other States in days gone by, the American people have no cause to be surprised if their foreign bondholders become alarmed and suspicious of the securities which they hold. We have no hesitation in expressing our faith that the American Government will never consent to the ruin of their national credit and to their country's dishonor, by refusing to pay their bonds in gold; but we do say the popularity of such opinions during the present Presidential Election, is giving a dangerous blow to American credit, and may produce consequences of overwhelming gravity If. in addition to the present scarcity in the gold market to meet foreign balances accruing from their ordinary trade their European creditors-alarmed by the unblushing advocacy of repudiation-were to send over even \$100,000,000 worth of bonds to be realised upon, what figures might not gold touch then? And with a sudden rise of gold to 200 or 250, how many out of the tens of thousands doing business throughout the Union would be solvent in six months thereafter? We do not intend to search for an answer to these queries, for we hope such a frightful calamity may be averted; but we warn our American neighbors that the course of some of their leading statesmen would land the United States in ruin and dishonor, and has already assisted to run up the price of gold to a higher figure than it has touched for many a day. In the interests of Canadian trade, as well as that of our neighbours themselves, we hope to see a speedy fall in the rates of gold again. But we fear the tide tends the other way, and that there is reason to fear an unsettled market until the Presidential contest is over. Should the circumstance falsify our anticipations, none will be better pleased than ourselves.

Georgia Crops.—A gentleman just returned from Houston and Crawford counties reports he never saw better prospects for corn and cotton in his life, than the farmers have in those counties. They have had an abundance of rain lately, and the crops are blooming. The reports that the corn crop was a failure and the cotton a long ways behind, are all a pack of stuff and nonsence. The greatest plenty of corn will be made, and as much cotton, according to the area planted, as any year since the war. The fields are all clear of grass, and otherwise in excellent condition. Of course there is the usual apprehension of rust, rot, worm, blight shedding, earthquakes, pestilence, famine, and the moon turning to green cheese, but in spite of all these, the fields were beautifully green with corn, and cotton is "as thick as autumn leaves in the vale of Vallambrosa." Such is his roport.—Macon Journal.

GRAND TRUNK RAILWAY OF CANADA.— RECIPROCITY.

[LETTER NO. III]

MR. EDITOR,—The stockholders of the Grand Truuk are deeply interested in the question of reciprocal trade, or rather free trade between Canada and the States The latter offer the best market for more than half the products of Canada, for lumber, coal bark, cattle, butter, egge, poultry, oats, barley, peas, beaus, and potatoes; while Canada requires the cotton, tobacco, maize, spirit, antiracite, coarse cottons, carriagee, and implements of the United States. As the railways of the btates move west across the open prairies, as fields are fenced, and log cabins give place to tasteful huses and stables of wood, immense quantities of lumber are required by the Western States. The annual productions of the Union are now rated at £1,400,000, of which three-sevenths are coarse manufactores. Probably in no part of the world is the income of artizans and tarmers so great. The carpenter and bricklayer get 16s, per day. On the prairies one man replacing the hoe with the plough raises on 100 acres £,000 bushels of maize year after year without fertilizers, while in California he pastures his 1.000 shoep, or substituting the resper, drum, and thresher for the sickle bushels of maize year after year without fertilizers, while in California he pastures his 1.000 shoep, or substituting the resper, drum, and thresher for the sickle bushels of wheat from the seas. Area and can afford to deliver it on ship-board at the price of 1s. or 22 per bushel. Within the Union 8,000,000 of families are computed to have an average uncome from investments, skill and labour of £270 per annum, equal to £200 in gold. Their shilliff to consume may be inferred, if we contrast their receipts with the miserable pittance of £10 to £20 a-year, on which half the families of Italy subsist. We may deduce from these facts the value to Canada of such a market, from which it is debarred by duties averaging twenty per cent. It may be urged that the United States suffers from this interdict, and doubless they do, but while all Canada suffers, a part only of t R. EDITOR,-The stockholders of the Grand Trunk are deeply interested in the question of reciprocal trade, or rather free trade between Canada England, to convince her that Canada should be governed in the interest of Canada. While the United States prefer unity to a monarchy with custom-houses and possibly smuggling stations on her borders, and would prefer the Arctic Sea for their northern irontier, they want no unhappy states or d'scontented subjects. Were they gra-ping and rapacious they would not have dispersed the Fenians, and the barriers which England interposes would be no insuperable obstacle to a nation that can put two millions of veterans into the field. As things stand at present is it not the policy of England to deter a little to the wishes and interest of the United States, and what ministers of peace can be more influential than the proprietors of the Grand Trunk Railway? First remove the impediments, then take up free trade. If it ministers of peace can be more influential than the proprietors of the Grand Trunk Railway? First remove the impediments, then take up free trade. If it is still the policy of Eugland to relain her hold upon the trovinces, and to pay the four or five millions which her surveillance costs her yearly; if she does not choose to have them states of our Union, where they would be welcomed and cherished, the best plan I can suggest is, the adoption of the measures proposed a few years since by Ira Gould, Esq., Chairman of the Board of Trade of Montreal, which he set forth as follows: forth as follows

"To us she (England) has said in effect, 'Whatever be our political relations, commercially we must henceforth treat you as we would treat any other nation,' and knowing her necessities, and our own

wants and resources, we do not complain that she has done so.

"From a view of the actual system existing in the United States, and our altered relations with England, it would seem to result as a natural conrequence that the time has arrived for Canada to seek such commercial relations with the United States as will enable us to participate in the benefits we see springing from their system, and which will admit us to a Commercial Union with that country, at the same time that we shall retain our cherished political relations with Great Britain unimpaired and intact. That this can be effected, your Memorialists sincerely believe, and it is in this belief and with this view that they now beg respectfully to submit:—

"That, in the opinion of your Memorialists, it should be the policy and aim of the Provincial Government to seek for and obtain in the best practicable form, and in the speedlest manner, comple e and entire free tr de with the United States, as well in all foreign articles imported into the two countries as in articles the growth and manufacture of the same.

"That, in the opinion of your Memorialists, the adop ion by the Provincial Government of the American Tariff of Duties on all importations from sea, and by the free admission of the productions and manufactures of each country into the other; thus assimilating the commercial interests of the two countries in the way that is most desirable they should be assimilated.

"That amongst the details of this arrangement

"That amongst the details of this arrangement would be included the complete extinction of all Cus-

assimilating the commercial interests of the two countries in the way that is most desirable they should be assimilated.

"That amongst the details of this arrangement would be included the complete extinction of all Custom Houses on both sides of the frontier, retaining only those in Canada at the ports of Quebec and Montreal, and also a just and equitable apportionment of the smount of duties reserved to the Government of each country.

"That for the purpose of perfecting this arrangement, and as a further inducement thereto, the right of free navigation of the St. Lawrence and our inland waters, with the use of our harbors and canals, should be granted to the United States upon the payment of the same tolls and dues as are paid by ourselves.

"Finally, it is the opinion of your Memorialists that such an arrangement as the shove would be greatly to the advantage of Canada, and in nowise inconsistent with that connection which it is our duty, as well as our desire, to maintain with the parent state."

The plan of Mr. Gould is a statesmanlike measure, it would break down the barrier of duties and consular fees and certificates at each terminus, and is in accordance with the recommendation made to Congress by Mr. M'Culloch, Secretary of the Treasury, our great financier, in his message of 1865, when the treaty was expiring. Thus introduced by both parties, it would probably have the sanction of both countries, if other questions are adjusted; and Heavon only knows why they are kept open by England. When the late Richard Cobden, renowned everywhere, was in Canada, he was asked the question whether England would assent to exich a measure, and is said to have replied "that she would shrug her shoulders at the duties, but if she found Canada in carnest would at length consent," and this no doubt would be her true policy, for Canada if opposed might move alone if the shade of the proprietors of the duties. High as the war duties still are in the United States, our e ternational Trunk line a highway of nations

Yours ever, Boston, Mass., July 8, 1868. E. H. DERBY.

The American hard-rubber wood company has been formed in Bridgeport, Con., with a capital stock of \$250,000, and a manufactory of rubber carriages is to be established in that city. An open buggy weighing 125 pounds, whose body is made of one piece of rubber one-eighth of an inch thick, has just been made here, and \$2,000 has been offered and refused for it. The running gear is of wood, but the next carriage made will be entirely of rubber. The material is unaffected by wet or cold weather, and was prepared at a temporature of nearly 300 degrees.

THE GOLD REGIONS.

THE mineral resources of the Hastings district are being slowly developed under circumstances which would discourage any but the most active and enterprising miners. When it was first announced that gold existed in the rocks of Madoc, the statement was received with a great deal of incredulity, and those who were hopeful enough to believe that the those who were hopeful enough to believe that the precious metal was present in sufficient quantities to pay for working were met only with sneers from the sceptical or flat denial from the totally unbelieving. Those who had capital were in this way frightened from investing it in schemes which on their face looked promising enough, and after the first flow of gold-seekers to the new El Dorado the few courageous pioneers who remained had to work against all sorts of adverse influences. They persevered, however, with praiseworthy energy; thoroughly explored the country; sunk shafts where the indications gave promise of favourable results; erected crushing-mills for extracting the metal from the quartz, and in various other ways showed that they were determined fully to test the question as to the mineral wealth of the region.

other ways showed that they were determined fully to test the question as to the mineral wealth of the region.

This practical experience has proved that gold is deposited in greater or less quantities in several town ships in the county of Hastings, that it may be worked with profit, and that it only needs capital, aided by intelligent processes of running and smelting, to make the whole region productive and valuable. Thus far, besides the want of capital as serious drawback has been the cost and difficulty of extracting the gold from the rock, the sulphatic nature of which rendered the process of separation tedious and uncertain. This obstacle, we are assured, has now been overcome by improved smalgamating machinery, so that a fair per centage of the gold contained in the quartz will in future be saved. But the slowness with which returns have rewarded the labor of the miner has in the meantime retarded progress and strengthened the doubts of those who all along have given only scant encouragement to mining operations. The speculative fever which seized upon owners of mineral lands when gold was first discovered also injured the prospects of the country, which can hardly yet be said to have fully recovered from its effects.

It may be that Madoc and the surrounding townships will at the best offer but slight inducements to those who have money which they wish to invest in profitable enterprises. It would be unwise to be too sanguine, and expect better results than other countries have yielded which possess gold-bearing quartz. At the same time oily ignorance will deride the idea that gold is to be obtained for the working, while all who wish overy interest in the country to prosper will be glad to see the wealth of the Madoc region thoroughly developed. To promote this object it is desirable that a sufficient amount of capital should be employed, not to further the scheme of the mere speculator, but to give a stimulus to enterprises which should they prove successful, would be of great benefit to the whole c

RENFREW GOLD DISTRICT.

RENFREW is distant from Halifax 37 miles, 30 of which are performed by rail and the remainder by stage from Enfield Station. Very little systematic by stage from Euneid Station. Very little systematic mining had been done in this district until the opening of the Ophir mine in the spring of 1866. Since then it has risen into the foremost rank as a gold producer. The Chief Commissioner of Mines, in his last report, says:—"From being third in rank last year, and about fifth in years previous, it has placed itself first this year, having produced nearly 900 oz more gold than any other district, and is only second in point of profit to Sherbrooke, each man employed having earned eight hundred and ninety-five dollars and thirty cents (\$895.30) for the year." This is double the average earnings of miners in Australia or California. The gold of Kenfrew for the last month published (June) was twenty-five per cent greater than that of any other district in Nova Scotia. The "Ophir" mine, which has contributed much to these satisfactory results, was started by Mr. C. F. McClure and associates in Boston. It shows what can be done in mining by men who know their business, and exercise prudence and economy. The territory owned by the company embraces nineteen areas, equal to about fifteen acres. The length of the property in the direction of the leads is 930 feet. The principal amount of quartz has hitherto been obtained from the North and South leads, which have been worked to a depth in some places of nearly 200 feet. Last month, however, a new lead was discovered to the south of the old workings which promises greater returns than those previously opened. It is from three to three and a half feet wide, and has yielded on the average two and a half ounces of gold, or \$50 to the ton. Being principally composed of slate, with thin bands of quartz, it is very essily mined, and the total cost of mining, milling and amalgamating, will not exceed \$4\$ per ton. On the adjoining property three new leads have been discovered lying between the south lead and the new lead, which run into the Ophir property, so that there is no lack of ore to sustain the high reputation of the min mining had been done in this district until the opening of the Ophir mine in the spring of 1866. Since

financial report of the Company, dated Boston, 3rd September, 1867.— Receipts from February, 1866, to August, 1867, (both months in-...\$ 84,024 92 w August, 1907, (ooth months inclusive).

Expenses at mine

Expenditures in erection of new
mill and other equipments of
a permanent character.

Paid for additional land 13,000 00 2,910 00 4,523 23 Miscellaneous expenses ×105.4 2 19 \$209,940 34

The capital of the company is \$100,000. We thus see that in twenty months it was more than paid back, leaving the property clear with mill hoisting and pumping gear, buildings, and all other equipments paid for out of the profits, and without a single call upon the shareholders! The mine to day looks better than ever it has done, in the opinion of those who ought to know

wer it has done, in the opinion of those who ought to know.

The "Colonial" Mine, which adjoins the "Ophir," is being worked by some Montreal associates. The same leads are being worked as in the Ophir. From the north lead over \$15.000 have been taken, and 100 tons of quartz will be ruised from it this month. The Ophir company worked close up to the line, and the Colonial have just continued the same strip along the lead into their own property. The lead has here increased in thickness, but continues about the same average richness. On the south lead as haft has been surk to a dopth of 66 feet, and levels driven from it east and west along the course. A good deal of ground has thus been up for stripping, and, judging from the appearance of the quartz which shows frequent "sights" of gold, the yield must be fully equal to that part of the same lead worked on the Ophir. The new Ophir lead has been opened at two different points on the colonial property, and when worked no doubt will yield good returns. In a cross-cut between this lead and the South lead, another is 15 feet, and the third 45 feet. This last is a bed of slate carrying three different leads of quartz. Leads of this character are regarded with great favour by the miners. Although work has only been commenced this month, it is reported to have 200 tons of quartz ready for the cruchler, by the last of September. The mill belonging to the Colonnal Mine is the most substantially built, and best arranged mill in the Province. It has four batteries (of four stamps each) in running order, with foundations, shafting, &c., for two more. Each of these batteries runs independently of the other, thus giving every facility for repairs or cleaning up, without interfering with the general working of the mill The engine was built at Brooklyn and is of 80-horse power, It is, however, contemplated to drive the stamps by water power, as the same stream which works the Ophir can be here dammed up so as to give 16 feet head of water. A great saving will thus be effected. know.
The "Colonial" Mine, which adjoins the "Ophir,"

CROPS OF THE PROVINCE OF QUEBEC.

THE crops of the Province of Quebec will be better than the long diouth led many to anticipate. In the region north and east of this city, the grain generally presents a gratifying appearance, and promisee a good yield. True, in many parts the straw will be short, as a consequence of the absence of rain during the important period between the middle of June and last week of July; but the needed showers since have revived the drooping cereals, and imparted to their growth a healthy stimulus. Under the favourable weather of the last few weeks the grain has headed very well, and there is yet sufficient time in a great portion of this province for the proper development and ripening of backward fields. It is estimated that between this city and River du Loup the yield of oatbarley and wheat, will be a good average, and in the district stretching from the latter point to the Gulf a larger crop than usual is expected to be harvested this year. In the northern and north-eastern sections of the province the spring grains are sown late, and consequently they had not advanced sufficiently to suffer much injury from the drought which proved so damaging elsewhere. These late crops have been favored with fine growing weather at the right stage, and are now well advanced to maturity. In the district east and north of this city, a larger breadth of wheat, barley and oats, was sown this year, owing to these grains during the last couple of seasons. We are told by intelligent agriculturists that though wheat has been raised successfully in this region of late, where its cultivation was long ago stopped by the ravages of the fly, it pays as well to raise oats and other crops. Oats and hay are, on the whole, the safest and most profitable crops for this Province, which is so largely indebted to them for her present prosperity. Wheat in the good heavy soils looks excellent, and will, should the weather contrinue favorable, turn out most satisfactory. Considering that there is more land under grain this season than previously, we a HE crops of the Province of Quebec will be better than the long drouth led many to anticipate. In

wheat appear this season where never seen before, and the prospect is so good that a larger cultivation may be expected hereafter. We believe that east of quebec very little of this grain has ever been raised. The present movement will place in the hands of our harbandmen a new and by no means unimportant resource. We may say that, practically the abrogation of the Reciprocity Treaty has made no difference to our farmers, whose surplus produce goes to the States as before, by Quebec City, resigning, however, higher prices than in the good old time. The American consumer not only pays more for our grain than ever, but the import duty besides, imposed by his own Government — Quebec Chronice wheat appear this season where never seen before Government - Quebec Chronica

FOREIGN TRADE OF THE UNITED STATES

(From the United States Fromomist)

'AL monthly report of the Director of the Bureau of Statistics enables us to bring forward the of Statistics enhose as to bring forward the foreign trade account up to the closs of May. On ting to the niglect of the agents of the Bureau at some of the Custom Houses, the report cannot be considered as strictly accurate, it is however sufficiently so to turnish a close approximation of the trading account We present as follows a statement of imports and exports for the first eleven months of the fiscal year

Imports into the United States

now to remit to Europa fully 40 millions per annum in the way of interest. Within the five months here instanced we have had from 4 to 5 millions of bonds of 1847 sont home for redemption in gold. We have also had to pay to Europe a large amount on account of freights, and putting together all there items, we have perhaps more than an offset to the balance shown on the trading account.

There are some decidedly unfavourable aspects of the trading account above presented. The statistics show that we have a much less surplus of domestic produce for expert than in 1847. For the first five months of 1867 we exported \$162,800,000 of home products, exclusive of gold, during the same period of this year we shipped only \$122700,000 showing a decrease of \$30,100,000, gold value, or 20 per cont. This should naturally have been accompanied by a diminished importation, but the fact is that the importator that period, have been reduced only \$13,000,000, the result being that we have had to export \$12,000,000 morespecte. This, tosay the least, is a very unhealthy movement expectably as our supply of gold is being reduced and bonds are becoming less available as a means of remittance. Infortunately, there are no indications of the application of a remedy for this course of affilits. means of remittance. Unfortunately, there are no indications of the application of a remedy for this

indications of the application of a remedy for this course of affairs.

As the Director's returns do not come to a later date than May 31, we came t accretain the precise movement for the whole country for the months of June and July The course of trade at New York, however, affords a fair criterion of the general movement, and here we find the adverse course assuming a more aggravated form for the last two months. The imports and exports at this city compare thus.—

Imports June and July \$13 1: 9 739 \$40 232 254 Exports, Produce, June x July 23,767,829 29,965,865

Exports, Produce, June x July 23,767,829 29,905,865
It thus appears the imports of June and July are
\$3,147,535 bither than last year, while the exports of
home producers \$6\$ 195,005 less. We have repeat
edity alludea to the danger of this movement, and
again oall the attention of importers to its bearing,
upon their interests, especially so far as by increasing
the exports of gold at may tend to increase the price
of their goods. Of course we shall in the curse of a
few weeks have a large addition to our exports from
the shipping of the cotton crup, but, in the precent
uncertain prospects of that crop, it is very unsafe to
rely upon the deficiency being inade up by that portion of our exports, nor can we trust to the prospect
of increased exports of breadstuffs, for our grain must
go abroad at much reduced prices.

ACTIVITY OF THE LYNN SHOE BUSINESS.

THE PIEST THREE MONTHS UNDER THE NEW LAW

CARBOI IC ACID — Phonol or carbolic acid is eco of the many useful bodies obtained from cos' tar live composition is expressed by the modern formal Ce the O, and though it forms unstable composition with certain metals ruch as potassium, barium, acd lead, it has the character of an alcohol rather than that of an acid it crystallises at ordinary tempers tures, but the crystals deliquece on taking up a metatrace of water. It smells like wood-tar creases, in fact much of the creasete of commerce consists almost entirely of phenol. It does not redden litmus it anteepries and distincting properties are very remainable, and have led to its extensive application to esful purposes. Its squeous solution, preserves solusion substances from decomposition, and will even remote the fond odour from much and other substances already in a state of decomposition. Fish and leaches dis when immersed in the aqueous solution, and the bodies subsequently dry up on exposure to the air without decomposition. We mention these facts, for though phenol has been introduced into the Piemo copens ander the name of Acidum Carbolaum, we have reason to believe that the nature and 'he properties of this important compound are not generally understood. this important compound are not generally understood.

LATEST ENGLISH COMMERCIAL NEWS.

(Cor. N. Y. Financial Chronicle.)

London, Saturday, August 8, 1868.

OTWITHSTANDING the fine weather, a large wheat eron a great record.

NOTWITHSTANDING the fine weather, a large wheat crop, a great proportion of which is how secured, and a further considerable decline in the price of wheat, the trade of the country remains quiet, and there is still a great absence of speculative operations. In no department is there any animation apparent, but the impressin still exists that in consequence of the much lower price of wheat, the autumn trade will be more satisfactory. In some branches that may be the case, but, at the rame time, there is not the rrobability that a resumption of active business will take place during the present year. It is more likely, indeed, that the mercantile body will continue to operate cautiously, and will not incur any considerable risks.

In consequence of the bountiful harvest now in process of being rapidly secured the wheat trade has continued in a most depressed condition, and prices how an average fall for the week of about 3s, per quarter. The supplies of new wheat brought to market have been small, but the quality is fine and the condition of the produce excellent. Some of the samples, however, show the affects of the protracted hot and dry weather, but the produce grown on heavy land could scarcely be better. Taken as a whole, the crop is a very superior one, and is equal to the most abundant seasons. At the procent it is rather early to speak, about the yield of produce per acro, so little of the new crop having as yet, been threshed. There is very little doubt, however, but that it is above the sverage, and will give great satisfaction both to the farmer and miller.

From the information that I have collected on the subject, I do not think that the yield per acre is anything like that of 1863, when an enormous crop was secured; but the breadth of land under wheat cultivation this season is very extensive, and it is owing to that circumstance, in a great measure, that so much wheat has been produced. Had the month of June been, as the saying is "a dripping June," the cars might have been larger, but that month w

Advices from Hungary state that the harvest in that country is finer in quality and larger in quantity even than that of last year.

Parly in consequence of the circumstances that the acceptances of Messrs. Zeigler, Meiss & Co., were returned on Tucsday, the Liverpool cotton market has been dull, and American produce has declined in value to the extent of \$\frac{1}{2}\text{d. per lb.}\$ With regard to the above firm, it appears that they were very large importers of India cotton, and possibly anticlpating a further rise during the rapid upward movement in the early part of the year, had made large purchases at Bombay; but on the arrival of the produce at Liverpool, they found the market so much against them that they were compelled to succumb. The large increase in the quantity of Indian produce affoat, as compared with a few months since, has taken most persons by surprise, the rise in prices at Liverpool during the earlier months of the year having had the effect of hastening the produce to the Liverpool market. The quantity of Indian cotton affoat is now \$\S\rac{3}{2}\) 5275 bales, while the diminution in the stocks of cotton in Liverpool and London, including the supplies of American and Indian produce ascertained to be affoat to those ports, is only \$\frac{5}{2}\) 324 bales, as compared with last year. The had notice of the cotton buyers during the closing months of last year of allowing celton to fall to so low a point that a scrious check was given to the trade at the ports of shipment in the teast and West has been a woorrected. From a supply of Indian produce affeat of only about \$9000 bales (the quantity ascertained to be affoat that from a supply of Indian produce affeat of only about \$9000 bales (the quantity ascertained to be affoat that from a supply of Indian produce affeat of only about \$9000 bales (the quantity ascertained to be affoat that from a supply of Indian produce affeat of only about \$9000 bales (the quantity ascertained to be affoat that from a supply of Indian produce affoat only abou

value of our imports in the five months ending may 31, was £90,167,617, against £88,547,811 last year, and £98,315.826 in 1867.

In the money market there is still much quietness, but the supply of money has rather diminished during the last few days. The demand for gold for export has increased in convequence of the recent foreign loans, and of the approaching French loan, but, at present, it is not to any important extent. All our importations, however, are transmitted to the Continent, in addition to which about £70,000 has been taken out of the Bauk. The approaching French loan seems to be the leading cause of the increasing demand for remittance to the Continent. Yesterday the demand for money was stronger, in consequence of the settlement in the Stock Exchange, but the actual commercial inquiry show no improvement. However, the rates of discount are firmer, and in the open market 1½ per dent, is an exceptional minimum quotation. The tollowing are the prices of money compared with those of last year: those of last year:-

	1867.	1868
Pe	r cent.	Per cent.
3) and 60 days' bills		1# to 14
3 month, billsì	to l}	1 to 1
4 months bank bills1	1 to 2	1 to 2
6 months' bank bills 2	to 2}	2 to 21
4 and 6 trade bills2	to 3	2 to 3

Money on the Continent is still quiet, but a little excitement shortly expected in consequence of the French loan. The rates of discount remain about same. The supply of bullion continues to accumulate in the Bank of France, the total now held being rather over \$10,000000.

THE HIGHWAY OF COMMERCE.

(From the Hamilton Spectator.)

FEW days since the Chinese gentlemen with un-

of tails, who have for some time past been visiting the States, were entertained at Ningara Falls in a fitting manner. We have the safe of what the bill of from the flowery land had rats and mice or friesseed pumpies served up to them in the usual celestial style, or whether, on the occasion in question, they consented to partake of food such as is usually affected by "outside barbarians." One thing is certain, viz., that several members of the Buffalo Board of Trade were present at the dinner, and that the Hon. J. T. Hatch spoke for the commercial men of Buffalo.

Mr. Hatch, in the course of his speech, intimated that there were only three events in the history of this continent which were worthy of any special notice or consideration; and they were, first, the discovery of America by Columbus; secondry, the dec'aration of independence; and last, though, said Mr. Hatch, "certainly not least, the advent of the Chiuses mandarius as heralds of a great commercial movement by the most numerous people on the face of the globe." That Mr. Hatch and his companions kept their countenances when he thus got off this prodigious piece of uningled "bunkum" and "sort sawder" is in the highest degree crediable to thom, as showing how completely their risible muscles are under their control even after dining at Niagara Kalls. There were several other equally amusing little-birds wellowed like bird's inceriable to an American orator's speech that we delive to the content of the control of the control of the prodict of the control of the prodict of the prodict of the control of the prodict of the product of the produc

CAUSES OF THE CATTLE PLAGUE.

HE cattle plague is now creating no little sensation in the United States. At such a juncture the

I in the United States. At such a juncture the opinion of Professor (lamgee, the eminent English vertinary surgeon, may be of interest. An extract from his report says:—

In the first place the malady follows the track of Texas cattle, and is not found beyond. The Texas cattle are themselves healthy, and we have failed yet to see a diseased one. Native cattle, and suckling calves continue to suckle their sick mothers without contracting the disease. In one care a calf suckled its dam till the latter died; it was then pleoed with a cow that also died; and lastly, with a third one that succumbed, too, without indicating the slightest symptoms of ill health.

secondly, I consider that there is no specific animal poison causing the spread of the disease. It is not a

malady belonging to the class of true plagues or epizootics; it has a local origin, from catile grazing on certain lands in Toxa; and if you took cattle South and grazed them where the Texan steers enjoy perfect health, from being acclimatized and accustomed to peculiar pastures, you will find the cattle of the North dying in the Bouth as they are doing at present in the State of illinois

It is not an uncommon circumstance for animals which are themselves healthy being the carriers of discase-producing elements, though there is something unusually virulent discharged by the Texan herds, and discharged only during the summer months.

This malady has been classed in Europe, by some authors, among the forms of anthrax or carbuncurs fevers, which originate spontaneously where there is sufficient heat on ill-drained, retentivesoils, and widely over the marsh lands of Central, Southern and Eastern Europe.

fevers, which originate spontaneously where there is sufficient heat on ill-drained, retentivesoils, and widely over the marsh lands of Central, Southern and Eastern Europe.

But, it is a consolation to know that there is not the slightest danger of any evil arising from the dranking of the milk of the sick cows, and I should have no corupled in esting the fiesh. They are not poisoned by any specific virus calculated to do injury to men or animals, and in laying before you a theory of the origin of this disease I am strengthened by facts which I have gleaned during investigations of similar duorders in Europe.

Abou' spring time and early summer, in all probability, tho Texas cattle eat, as our own do, in some parts of Scotland, the young, succulent shoots of peculiar trees, highly charged with stringent principles. On unbroken ground, highly charged with moisture, and adjoining woodlands, there are, as the hot weather sets in, many things sprouting which animals will not touch later in the season; and in the motts of Texas there is the live oak which grows in the Gulf States, where, indeed, cattle are rearred which have been known in times past to disseminate this disorder, for the cattle of Florida areas dangerous north of a certain line as the steers of Texas. From this peculiar feed, therefore, the animals get their systems impregnated with materials which do not destroy the stock accustomed to a special living in a given latitude, but which, being thrown off in the urine and the excrement, inclinde the "black water" or peculiar form of "envocite hermaturia" which is now killing the cattle of this and adjointy Eutes.

Certain it is that Texas cattle imported here during the winter, from the 15th of September to the 15th of April, induce no disease; and while it is undoubedly sale to have open season for the Texan cattle traine, its probable that in accordance with my suggestion we shall have a ready means of puritying stock on the founter investigation. It is, however, eatisfactory to know that we have to d

DUCASSE, CLAYEAU & CO'S MORTHLY PRICE CURRENT.

LONDON, 15th August, 1868.

MEA.-The market for Black Tess remains in the FREA.—The market for Black Teas remains in the same dull state as during the past two months, and the continued absence of any extensive demand, either for export or the home trade, has resulted in a still further decline in Congous, the ordinary shipping qualities of which, may now be quoted almost as low as at any period during the present year. Southengs and Oslongs remais as previously quoted, but with a very limited business in either descriptions. An increased business has, on the other hand, been observable in Green Teas, and prices have undergone a slightimprovement. A good enquiry exists for Young Hysons of the better qualities, which are very scarce, and anything offering at prices under 2s. 6d. per lb. is readily asteable. An improve demand has taken place in Uncoloured Japans and a good business has resulted, in prices ranging from 1s. 1d. to 1s. 4d. per lb. for common to medium qualities.

COPPLE.—Owing to the large quantities brought forward istely and the still further lots announced for sale, prices have, as generally mitigated, given way, and Plantation Copylon may now be quoted 1s. to 2s. per cwt below the corresponding rates of last month. Hochs, also, for a similar reason has sustained a further decline of 2s. per cwt.

Sudar.—This market has been generally quiet since our last, and slightly easier rates have been a crited. Refined kinds are in consequence lower, and prices now show a reduction of 6d. to 1s. per cwt.

FRUIT.—Little or nothing is doing in these markets, bayen a waiting the arrivals of new fruit, the first arrival of Valencia Hasisus being due here about the 20th inst.

Winker And Stributs.—Business in these articles is same dull state as during the past two months,

20th inst.

Wines And Spirits.—Business in these articles is still of a restricted nature, the excessive heat continuing to present any demand, more particularly in Brandies and Rums, the inter being quite neglected Genera has, however, again advanced.

MONEY MARKET.

ONEY still abundant, though there is rather more demand for book demand for bank accommodation than previously. Sterling Exchange is quiet, with sales of round amounts at 1091 for Bank 60-day bills on London. Private may be quoted 1033 to 109. In New York best bills on London at 60-day's sight are quoted 109; although gold is still being remitted to a greater or less extent, Gold diafa are quoted at par, without much demand.

GOLD in New York has fluctuated considerably between 144 and 146, closing at 144j. Greenbacks are worth 68ic, to 69c.

SILVER is in good supply, but with active demand. Buyers at 4; to 4; and sellers at 4; per cent dis

Whanny, Hill & Ware.

QINCE our last report, the general tone of our grocery market has considerably improved. though buyers are still chary of supplying their wants in full. The improved feeling is evident, more from increased inonity for goods, but as yet few merchants from the West have been buyers, and we do not expect them to make their appearance for two or three weeks to come.

TEAS-Of nearly all grades have improved in domand, and prices are stiff, though so far we cannot change quotations. In Japans and medium Young Hysons, considerable operations have taken place for the Western trade. Japans are now scarce, and for the high grades full prices are readily obtained. Really fine samples cannot be had less than 60cs High grades of Greens are not so well enquired for, but low Young Hysons and Twankays are in first-rate request-The former are held firmly at somewhat advanced rates, though we cannot after our quotations. Colongs have had some enquiry, and really good samples are scarce, say at from 55c to 60c. Blacks are in ordinary demand

COFFEE-Has been neglected in view of the unsettled state of the New York market, the expectation of targe arrivats in United States ports having considerably affected that market, though prices have not Attention in this city has been conflued chiefly to Laguayra and Maracaibo, of which, however, only small sales have been made.

Sugar-Has met with less attention, especially for raw. The refineries, however, have done a fair business in yellows, chiefly of the lower grades. Meantime, holders of raws will not name prices, and transactions being only of a retail nature, our quotations may be looked upon as nominal.

Molasses-Have had good attention, the sales during the past week footing up about 500 puns. Really good Clayed has been sold at from 83c to 87c; ordinary, 25c to 32 c. Centrifugal and First Rous have been sold at 23c. to 25c. Stocks are large, but with present good demand full prices are readily obtained. Bright Muscovado and Clayed, in barrels, are extremely scarce, and much wanted. Sugar-house Syrups are less enquired for, and are offered outside on somewhat better terms than by the refineries.

FRUIT-Has met a fair enquiry, particularly for Layer and Valentia Raisins, the former becoming very scarce, and prices consequently firmly maintained. Holders look for a slight advance on last week's quotations. In Valentizs, we notice some small arrivals by steamer from London, which have been sold at 8jc, a decline of jc. from last week. Any further decline we consider improbable at present. Bunch Muscatels and M R 's, in consequence of the scarcity of Layers, are more enquired for, and prices are firm. Currants, good fruit of last fall are held at to to fe, for round lots, and are scarce. Of inferior grade, there is also but little in market. Nuts of all kinds have but little enquiry.

Figu.-Dry Table Codfish has experienced good demand. The small lots already brought forward have been disposed of at full rates, say from \$4 50 to \$4.75, the former price being for unbundled. They are now beld in the market in second hands for \$5. Hake scarce, and held for \$3 to £3 25. No good herrings in the market.

Oils-Har e experienced a very good enquiry, and sales of over 60) barrels Cod are reported. The price may now be quoted too, and advancing. Pale and Straw Seal offe have also met with good attention, especially the latter, which is now hold according to

sample at from 62:c. to Wo, the former being beld at Oo to 650. No Whale in the market. Refined Petro. louin has been considerably excited, and may now te quoted at 32jo to 35c. for good brands, at which prices soles are readily effected.

Rice-Has had a good local demand, though procipally for small lots. The late arrivals and advices from England have somewhat affected this marke, and we note a decline of at least be from prerious figures. Holders, however, are firm, and unwaiting to give way in price, especially for good samples of Arracan. Stocks at the present time are only as averago.

average.

SALT—Has had good enquiry, but buyers are inclined to hold off with the expectation of obtaining lower prices. There is now no Liverpool coarse on the whart, and for lots to strive owners are asking U.c. existore 70c. to 72 jc. Stoved, nominal.

EPICES—Are without activity, and prices remain analysined.

unchanged.
WINES AND LIQUORS.—In Wines, the principal enquiry has been for inferior Sherries. Clarks are neglected. There has been botter enquiry for tig, and owing to an advance of 2d. sterling in the Erglish market, prices here are somewhat firmer. Size of De Kuyper's are reported, but prices have but transpired.

THE DRY GOODS TRADE.

Stirlie
Stirlie
Stirlie
Stirlie

THERE has been some activity during the pag week, although but few buyers have as yet mid their appearance in this city. Orders from the West are now being received more rapidly, but although numerous, they are as a rule made out with cautor, and for smaller parcels of goods than has been the case for some seasons previously.

Stocks are now full, and the assertment is complete

Stocks are now full, and the assortment is complete woollen and stuff goods being especially well represented. We fear many of these goods will have to be wintered over, but this very fact will prove an indexment to buyers as the selection from which they me to choose is so complete.

As information comes in from various sections of the country, we are led to the conclusion that a good average trade will be done this season, varying must be locality and dependent upon the crops random that locality. Where fall wheat is principally grow, then the farmer is comparatively well off, and the demand for goods will be active; but in some eccious where the crops will fall below the average, there we be a much less than usual demand for Dry Goods, and trade then may be expected to be generally dull.

THE LEATHER TRADE.

Black & Locks Bryson, Campbell.

Seymout, M. H. Shaw F. & Bros.

BUSINESS continues in the same unsatisfactory condition that has been noted recently, withm improvement in demand, and no material change a prices. Any sales effected have been confined a small parcels. Stocks, however, with perhaps the exception of Sole Leather, are by no means excessing and should any activity arise in demand, the mula would soon be left poorly supplied.

THE HARDWARE TRADE.

Craihern & Caverhill. Evans & Evans. Evans, John Henry. Hall, Kav & Co. Ireland, W. H.

Morland, Walson & Co. Mulbelland, & Raber. Robertson, Jaz. Round, John & Sons. Wasslell & Pearte.

DURING the past week we have to report builds as very slack transactions having been like more than of a retail nature.

Pio Inox -Large stocks are held in yard, bet se sales are being made just now. Prices are mer's nominal. Though holders are firm, buyers are boding off, hoping to purchase at lower figures by per arrivals. As freights for the West are advancing. is likely that lots will be sold to arrive, but house must be prepared to accept a little lower rates that they are now asking. There is at present some Cart dian Charcoal Iron effering in this market, 224 coming into competition with Scotch.

BAR IRON.—Stocks are very large and complete, but very few lots are changing hands at the profit time. A trike under our quotations would be take for large lots.

HOOF AND BAND IRON—Are unchanged, and without any setting.

BOLEN PLATES.—Some sizes are becoming we serioe, and firm in price.

The Plates—Are firm at our quotations. Such small.

amail.

CUT NAILS—Are in good supply, but firmer and holders inclined to advance prices. Nails manufactured from an inferior quality of iron are boing and here, and sold at \$2.70, sizes not assorted.

MONTBEAL PRODUCE MARKET.

THE MERCHANTS' PROTECTIVE UNION MERCANTILE REFERENCE REGISTER.

THE MERCHANTS' PROTECTIVE UNION, or

gaulzed to promote and protect trade, by enabling lik subscribers to attain facility and safety in the granting of credits, and the recovery of claims at all points, have to announce that they will, in September, 1983, publish in one large quarto volume:

The Merchand's Photherity Union Mericantile References Registra, containing, among other things, the Names, Nature of Business, Amount of Capital, Financial Standing, and Rating as to Credit, of over 400,000 of the principal merchants, traders, bankers, manufacturers, and public companies, in more than 30,000 of the cities, towns, villages, and settlements throughout the United States, their territories, and the British Provinces of North America, and embracing the most important information attainable and necessary to enable the merchant to ascertain at a glance the Capital, Character, and Degree of Credit of such of his customers as are deemed worthy of any gradation of credit, comprising, also, a Newspaper Directory containing the title, character, price, and place of publication, with full particulars relative to each journal, being a complete guide to the press of every county in the United States.

The reports and information will be confined to thus deemed.

States.

The reports and information will be confined to those deemed worthy of some line of credit; and as the same will be based, so far as practicable, upon the written statements of the parties themselves, revised and corrected by well-known and reliable legal correspondents, whose character will prove a guarantee of the correctness of the information furnished by them, it is believed that the reports will prove more truthful and complete, and, therefore, superior to, and of much greater value, than any previously issued. By the aid of the Mercantile Reference Register, business men will be able to sacertain, at a giance, the capital and gradation of credit, as compared with financial worth of nearly every merchant, manufacturer, trader, and banker, within the above-named territorial limits.

On or cobout the first of each month, subscribers

turer, Inder, and banker, within the above-named territorial limits.

On or clout the first of each month, subscribers will also receive the Monthly Chronicle, containing among other things, a record of such important changes in the name and condition of firms, throughout the country, as may occur subsequent to the publication of each half-yearly volume of the Mercantile Reference Register:

Price of the Merchants' Union Mercantile Reference Register, fifty dollars (SO.) for which it will be forwarded to any address in the United States, transportation paid.

Holders of five \$10 shares of the Capitat Stock, in addition to participating in the profits, will receive one copy of the Mercantile Reference Begister tree of charge; holders of ten shares will be entitled to two copies; and no more than ten shares of Capital Stock will be allotted to any one applicant.

All remittances, orders, or communications relative to the book rhould be addressed to the Merchants Protective Union, in the American Exchange Bank Building, No 123 Broadway, (Box 2266) New York.

GOVERNMENT HOUSE, OTTAWA.

Thursday, 13th August, 1993.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS by an Act passed in the 29th year of
Her Maicate's Roles (2011) Her Majesty's Reign, intituled: "An Act to

With the Soy an Act passed in the Entry Pear of Mer Majesty's Reign, intituled: "An Act to provide against the introduction and spreading of disorders affecting certain animals," authority is given to the Gorenor in Council to take such measures as may appear to be necessary, it order to prevent the introduction of contagious or infectious disorders affecting cattle and other animals, add to check such disorders from spreading, if introduced, And whereas a contagious disease or epidemic, affecting Horned Cattle, pressils in many parts of the United States of America, and is increasing and extending its ravages; and whereas it is expedient, in order to prevent the introduction of the same into the Province of Quebec and Ontarlo, heretofore constituting the Province of Canada, that the importation of Horned Cattle, from the United States of America, should be prohibited—

His Excellency in Connell, on the recommendation of the Honorable the Minister of Customs, and under the authority given by the said Act, has been pleased to order, and it is hereby ordered, that from and after the date hereof, and until this order shall have been altered or revoked, the importation from the United States of America, or his part alton from the United States of America, or introduction the Province of Quebec and Ontario, heretofore constituting the Province Of Canada, or into any part thereof, or Horned Cattle, be and the same is hereby prohibilized.

Price List Free.

SUBSCRIBE TO THE WEEKLY TELEGRAPH. TORONTO.

A Popular Paper at Popular Pri ONLY ONE DOLLAR PER YEAR.

It contains more news and general reading matter than either the Weekly Globe or Leader, at one half the price.

THE people who want to read the cheapest and best Weekly in the Dominion should enclose One Dollar for a year's subscription to the Toronto Weekly Telegraph,—a splendid Family Paper. It contains Interesting Miscellany, Reliable Market and Cattle Reports, copious Telegraphic Reports, attractive Nows, Selections, and more useful information than can be found in any other paper.

As a Pollifical Paper it utters its opinions fearlessly, avoids vulgar sensations, and becomes at once a high-toned and popular paper.

Its European News is carefully selected and condensed, and its Canadian and American News is full and complete from all parts of the continent.

The Family Department contains readable advices on the Fashions. Foreign and Domestic Gossip, Tales, Sketches, Poems, Wit, Humor, Science and Art.

Its Commencial Department is admitted to con-Weekly in the Dominion should enclose One

and Art.

178 COMMERCIAL DEPARTMENT is admitted to contain a more reliable Market Report, fuller Grain, Produce. Cattle, Lumber, Dry Goods, Hardware, and Groceries Reports, than is to be had in any of the so-called large weeklies published in Toronto.
