This Company, which owns the original Telephone Patents in Canada of Bell, Blake, Edison, Phelps, Gray and others, is now prepared to furnish, either directly or through its Agents, Telephones of different styles, and applicable to a variety of uses. Also to arrange for Telephone lines between Cities and Towns where exchange systems already exist, in order to afford facilities for personal communication between subscribers or customers of such systems. It will arrange to connect places not having telegraphic facilities with the nearest telegraph office, or it will build private lines for individuals or firms, connecting their different places of business or residence.

This Company is also prepared to manufacture telegraph and electrical instruments, electro-medical apparatus, fire alarm apparatus, magnets for mills, electric gas-lighting apparatus, burglar alarms hotel and house annunciators, electric call-bells, &c. Any further information relating hereto can be obtained from the Company.

No. 12 Hospital St., Montreal.

N.B.—All persons using Telephones not licensed by this Company are hereby respectfully notified that they are liable to prosecution, and for damages for infringement, and will be prosecuted to the full extent of the law.

Mercantile Summary.

THE rate payers of Guelph will shortly be asked to vote on a by-law which provides a bonus of \$40,000 for the Guelph Junction Railway.

At the New Brunswick foundry, Woodstock, there have been turned out this year 840 mowers, 375 wheel rakes and 275 steel plows.

THE Canada steel company's works at Londonderry N.S., were offered for sale by public auction last week in Halifax, but there were no bidders.

A COMPANY has been formed in St. Thomas for the manufacture of a superior class of brooms and brushes. It will be known as the Broom & Brush Company.

THE barque *Antioch* arrived a few days ago from Hong Kong, China, with a cargo of sugar for the Moncton N. B. refinery. The vessel was 182 days on the voyage. The cargo, consisted of 20,000 bags.

THE coal shipments from Pictou, N.S., for the week ending August 14th, were as follows: Acadia, 788 tons, Halifax, 8,462 tons, Intercolonial, 2,495, Vale, 168, total, 6,853. Totals to date, 84,747 tons.

THE Port Warden of Montreal has furnished a statement giving a comparison of the shipments of cattle from that port: in 1882 there were 28,491 cattle shipped against 50,845 in 1883 sheep in 1882 64,590 as against 102,347 in 1883. For the four months ending August 2nd, 1884, there were 29,565 cattle and 17,851 sheep shipped as against 28,060 cattle and 32,346 sheep in 1883.

THE St Thomas Times in speaking of the flax harvest now in progress in Elgin county, says that the yield will be from two to three tons to the acre, where last year the crop was a failure. Mr. W. Keith, of the St. Thomas mill, has one hundred and seventy-five men, women and children employed in the harvest, Owing to cotton coming into use for stuffing furniture, flax tow has fallen to \$10 per ton in price. Quantities of seed are shipped to Toronto, Montreal, Quebec and Baden-Baden, and a good deal sold to local druggists.

THE provision trade were hardly prepared for the failure of Messrs. Gibb and Gallow, provision dealers in this city. The members of the firm were considered business men of good character and habits. They have always, we understand, met their bills punctually and stood well in trade circles. Recently, however, their banker curtailed the credit given them to an extent that cramped them extremely. Besides which, we understand, they had locked up money in real estate. They have felt themselves compelled to assign, with liabilities of \$20,000. Their assets are somewhat in excess.

An Order-in-Council has been passed reducing the tolls on the St. Maurice slides one-half.

The Phenix Insurance Company of Brooklyn, has taken over the entire business of the Eastern Marine Insurance, Company.

The firm of A. W. Corbitt & Son, of Annapolis, has dissolved partnership. The business will hereafter be carried on by George E. Corbitt, the junior partner in the late firm.

THREE hundred members of the British Association will arrive on Saturday next by the Allan liners. The Parisian brings 120 and the Polynesian 180. The Polynesian sailed Thursday and the Parisian Saturday of last week.

THE official returns of emigration for the month of July from all British ports, made public in London on the 7th. Instant give the total number of emigrants to America as 21,653. Of these 17,217 were bound for the United States, and 4,443 for Canada.

QUITE a number of entries for exhibits at the Montreal exhibition have been made already by firms in New Brunswick. The following are some of the new entries: C. B. Eaton, of St. Stephen, N. B., leather, Price & Shaw, St. John, N.B., carriages, and M. Russel & Son, Newcastle, N. B.

THE proprietor of asbestos mines in Coleraine, has suggested to the authorities in Montreal who are arranging for the reception to the members of the British Association, that excursions be made to the copper mines at Sherbrooke and the asbestos and other mines in the neighborhood of Coleraine.

THE imports of petroleum into Great Britain this year show a heavy decline on those of the year previous. The imports of this article into the United Kingdom during the first six months of the present year fell off more than 50 per cent., the exact total being 15,522,358 gallons, against 32,202,385 gallons in

We learn with sincere regret of the death in Montreal, of D. McPhie, General Manager of the St. Lawrence & Chicago Forwarding Co., and one of the directors of the Montreal Transportation Co. which concerns have been amalgamated. Mr. McPhie was a well-known forwarder, a good business man and of most estimable character.

LABORERS are wanted in Quebec for the Lake St. John Railway and the efforts of the contractor have not secured as many as he requires; he has been compelled, therefore, to bring on 200 Italians from New York. It is estimated, says the *Chronicle* that 32,000 labourers from this Province alone are now working on the Canada Pacific Railway.

W. C. GAMESFORD, of Seeley's Bay, Ont, where he has been in business for some ten years, is in trouble for a second time. He failed pretty badly in 1879, when he compromised at ten cents in the dollar. For a while thereafter he remained out of business, but resumed, and has long been very slow and unsatisfactory. He has lately been sold out by sheriff.

THE liberal addition made last year to the rolling stock of the P. E. Island Railway, says the *Charlottetown Examiner*, is to be supplemented this year by cars, etc., to the value of \$30,000. The cars are to be made at the railway works in Charlottetown, and will comprise for the P. E. Island Railway 48 box cars and 10 flat cars, besides some rolling stock for the Cape Traverse branch.

It was decided by the Industrial Exhibition directors on Wednesday, to have another fifty-horse power engine put in the machinery hall to drive the electric light generators. The offer of the Toronto Electric Light company to erect a tower 150 feet high, on top of which they propose to put six electric lights of 5,000 candle power,

was accepted. The Consumer's Gas Company notified the board that they would light the main building with gas free of charge.

PRUDENT men insure their lives as well as their property, but there is but little analogy between the two kinds of assurance contracts. In the first, the contingency provided against is certain and the loss will be total; in the second, the contingency is uncertain and the loss likely to be partial. Thus life assurance is the more important of the two.

A NEWS agent on the Canada Pacific Railway, named R. R. Harstone, who formerly was of St. Mary's, Ont., but latterly did business at Winnipeg, had his effects seized under an execution of \$8,000.—The effects of the Brunswick Hotel in Winnipeg are again under the hammer. Its furniture, owned by Howes & Black, was sold on Monday last, we are told, to satisfy an execution.—At Birble, an execution was also issued against the effects of Wm. Holman, a boot and shoe dealer.

THE French sugar industry is on the wane. In the year 1874 France produced 415,000 tons of sugar, Austria 233,000, and Germany 289,000 tons. In 1883 France had not increased her production, while the Austrian had risen to 600,000 tons and the German to 925,000. The struggle, says the *Debats*, under these circumstances, is impossible, and a proposition is now before the Chamber to enable the French manufacturers to stand up against crushing competition. This law protects the home manufacture of sugar by a series of bounties.

A SOREL grocer, named H. C. Charland, has got into difficulties and has assigned to A. A. Taillon. He began storekeeping in 1871, and it is reported made some sort of arrangement with creditors a few years ago. His opening a branch in Yamaaka a short time back, may have helped to embarrass him.—L. N. Lusier, a boot and shoe dealer of St. Hyacinthe, has assigned, owing the very respectable sum of \$10,500, assets apparent only \$4,800. He was understood to be a support account of a Montreal house.—D. C. Tabb & Co., dealers in hardware and house furnishings, in Montreal, have assigned. Liabilities not yet ascertained. The concern had not been in strong credit for some time back.

In addition to the canning of salmon and lobsters, there is a good deal done in New Brunswick in the way of preserving fruit and vegetables. They can corn, tomatoes, berries and meats at the Fredericton and Sheffield factories. Probably 6,000 cases corn, 1000 of tomatoes, and 1000 of blueberries will be turned out this season. The corn and tomatoes are used in the local and western markets, the berries go to Boston and New York, the meats to England; "pork and beans" are also canned. Fifty hands are employed at Fredericton and 25 at Sheffield. Mr. Nutt, of Annapolis, N.S., also does a large business in canning beans and corn.

IN Tuesday's issue of the *London Daily Advertiser* is an account of the detection, by an auditor, of a defalcation by the teller of the London Loan Co., Charles Morley. That young man went to dinner as usual on the Saturday previous, and while gone the auditor began to look into his books. The result was a discovery that the amount of deposit cheques was \$2,000 in excess of deposit entries made. The delinquent had strong nerves, however, and after dinner stuck to his work till closing time; then he balanced his books and left the office, but not before he had got into his clutches \$500 more of the company's money. He was arrested we understand, with this \$500 on him, and is now in custody.

C. DONEY, who three years ago opened as a shoe dealer, in Ottawa, owes \$22,900, and is trying to induce creditors to write off nearly two-thirds of this amount. About a month ago, Mr. Doney secured one of his creditors by giving her a chattel mortgage for \$6,700, and she has taken possession. It is now understood that, if creditors will accept his offer, this creditor will furnish the money to pay them. Doney was steward on a river steamer, then clerk for a few months in a shoe store, but catered for the Senate and manufactured ginger ale, before starting in his present venture. As will be seen, his experience was very limited, and when it is considered that he had at one time, two branch stores running, there is no great room for wonderment at his present position. His assets are \$17,422.

CHARLES MALO, of West Farnham, was formerly a railway navvy, and started a small grocery in the spring of 1882. Being without experience or education his lack of success does not create surprise. He has assigned in trust.—Alex. Langlois, of St. Francois de la Beauce, who succeeded to his father's general store business in 1878, has come to grief, and assigned to H. A. Bedard, Quebec, where the bulk of his liabilities is due. He is by trade a tinsmith, and had been carrying on a branch store at the goldmines.—M. Timmons & Son, manufacturers of cider, ginger-ale &c. in Quebec, are in trouble and are offering a compromise.—Joseph A. Tellier, who commenced business in a very limited way about a year ago at St. Eugene de Grantham, has assigned. He began without capital and had latterly become involved in a lawsuit.

H. A. HARBACK & Co., liquor dealers, in Kingston, have failed a second time. Unfortunately Mr. H. was himself too good a customer for his own wares, and could not reasonably hope to succeed, therefore his failure will hardly surprise any one who knows the facts.—In London, Messrs. Sanborn & Co., dealers in teas, &c., are endeavouring to secure a reduction of 40 per cent. of their liabilities. At one time, Mr. S. was a member of the firm of Wilson & Sanborn, grocers, who failed.—A Newmarket brewer, R. A. Hope by name, appears to have been frightened by the Scott Act or something else, as he is reported to have left the country. Since then his plant, etc., have been seized by the landlord.—The Misses Forsyth, industrious young women in the same town, have fallen behind with their payments, and their stock has been seized to satisfy a judgment.

WHAT is termed by an English journal the largest iron sailing ship in the world was launched from Hamilton's shipbuilding yard at Port Glasgow on the Clyde the other day. She is an iron four masted full rigged sailing ship of the following dimensions: Length over all 340 ft.; breadth, 49 ft.; depth of hold, 25 ft. 8 in.; register tonnage, 3,173. Built under special survey, she is in many respects considerably in excess of Lloyd's requirements, having main and 'tween decks of iron fully laid fore and aft. Her principal mast and yards are made of steel. In an iron deckhouse forward is placed the galley and donkey boiler and engine, condenser, etc. The ship has a monkey forecabin and an iron house aft, covering the steering apparatus and wheel. She has four large cargo hatchways, besides ventilating hatches, and is square rigged on all four masts, has a full East India outfit, and is fitted with all the requirements of the Board of Trade.

THE Brantford Farm and Dairy Utensil Manufacturing Company, of Brantford, was incorporated in 1882, capital \$50,000, nearly all of which was paid up. It seems somewhat singular that

after declaring a ten per cent dividend last year, the company should now be in difficulty. As yet we have not learned the real cause of the trouble. An assignment has been made.—W. H. Manning, hardware dealer, Coldwater, suffered much loss by a fire in his premises in January last, and as his property was not fully insured, he has since found it so difficult to succeed that he has assigned.—A furniture dealer in Hamilton, George Pope, is evidently getting into trouble. Two of his creditors have issued executions against him, and it is probable that he will be compelled to assign.—In the same city, Joseph Tunmore, upholsterer, has, it is said, left his creditors in the lurch. Since he left the country his mother, who held a chattel mortgage, has removed all his effects, so that they have no chance of getting anything.

THE new business done by the New York Life Insurance Co. was greater in 1883 than during any previous year. Its new business has increased regularly for five years, the amount written in 1883 reaching nearly fifty-three million dollars. Notwithstanding the large amounts maturing as death claims, endowments, and Tontines, the amount on the Company's books we are told was greater at the close of the year than at the beginning by some twenty-seven million dollars.

THE St. John *Globe* of last week says: The stock on hand 1st August, of St. John pine, was 23,000 feet, against 8,000 in 1883 and 8,000 in 1882. Of N.B. and N.S. spruce deals the stock on hand at the first of the month was 21,578 standards, in the same period in 1883, 10,869 standards, and in 1882, 9,882. In N.B. and N. S. pine deals, the present stock 1,260 standards. The sales during the past month have been as follows: Birch—By auction, St. John, 14½ inches average, at 16½d. per foot; Dalhousie at 16½d. per foot; Miramichi, at from 18d. to 14d. per foot. Spruce Deals.—St. John, at from £6 to £6 1s. 3d. per standard. Scantling,—At from £5 5s. to £5 10s. per standard.

THE Liverpool circular of Messrs. Farnworth & Jardine, of Liverpool, dated 1st instant, has the following about the timber and lumber trade: "The arrivals from British North America during the past month have been 83 vessels, 63,453 tons, against 46 vessels, 33,094 tons, during the corresponding month last year, and the aggregate tonnage to this date from all places in the years 1882, 1883, 1884, has been 197,270; 158,569 and 209,016 tons respectively. The arrivals during the month have been heavy, and there has been also a large consumption, but stocks are increasing and are much in excess of last year's; prices, consequently, are generally low, and have a downward tendency. New Brunswick and Nova Scotia Spruce and Pine deals.—The arrivals of spruce during the month have been excessively large, and though there has been a large consumption, stocks are now double what they were at the like time last year, prices consequently have declined still further, and it is with difficulty that the present low price of £6 per standard for St. John spruce can be maintained. Lower Port pine deals are in very limited request, and there have been few transactions. Birch continues in good demand, and the deliveries are a little in excess of the import, but prices are easier."

THE Superintendent of the Equitable Life Assurance Society has recently returned to New York from Australia, after having established branches of the society at Sydney and Melbourne, with which several prominent gentlemen in the colonies have become connected, viz: Christopher Rolleston, Esq., C. M. G., late Auditor General; the Hon. Thomas Cadell, M. L. C.; and the Hon. Henry Mort, M. L. C.,

director of the branch at Sydney. Also the Hon. James Balfour, M. L. C., Reginald Bright, Esq., and Arthur R. Blackwood, Esq., who are the directors of the branch at Melbourne. Agencies of the society have been organized at Ballarat and Geelong.

THE Halifax Banking Company, is closing its agencies at Acadia Mines, Springhill and Pughwash at the end of this month, and that at Oxford at the end of next month.

HON. ALEX. MACKENZIE, dating from the foot of the Rocky Mountains, end of the C. P. B. track, telegraphs to Mr. George Stephen, President of the Canadian Pacific Railway Co., "I heartily congratulate you on the wonderful work accomplished. Our trip has been exceedingly pleasant."

SALES of quinine at a dollar an ounce were made in New York last week, the lowest price for many years. Even the announcement of the suspension of the Bohringus, the great Italian producers, and of C. J. Meier, of London, produced little effect on an already depressed business. Since the markets of Ceylon and Java yield so largely the supply of the article exceeds the demand and it will be long before quinine is as stiff in price as it once was. The cultivated trees, when planted, yield their bark within four or five years, and, unlike the native trees in Peru, do not become exhausted, but the bark is taken from them year after year. The quality of the article from the cultivated tree is far superior to that produced from the wild trees. Moreover, the Peruvian forests have become, to a certain extent, exhausted by indiscriminate robbery of the trees wherever found, and the sources of supply have become so remote from the seacoast enhancing the cost of transportation. The world's production to-day is estimated at 4,500,000 ounces, of which Germany and Italy manufacture the most. There is considerable made in England, but this is of a superior quality and not much used. America consumed 40 per cent. of the total production or about 1,800,000 ounces. Prior to the removal of the tariff 1,500,000 ounces were produced in the States, but the effect of the removal of the duty has been to decrease the manufacture and make the United States more dependent upon foreign supplies. It is estimated that now not more than 1,000,000 ounces are manufactured in the New World, but this is in part due to the destruction by fire in Philadelphia of the works of the largest American producers, who now send their bark to Europe to be prepared for the market. From the East Indies the shipments of raw material to the United States were over 6,000,000 pounds.

EDWD. TROUT, MANAGER.

TORONTO, CAN., FRIDAY, AUG. 22, 1884

THE HEROIC TREATMENT OF PANICS.

The President of the American Bankers' Association showed some heroism in his opening address. He undertook to show how bankers ought to meet panics; and he recommended the heroic course of free lending in time of panic. But to be able to lend freely, at such times, banks must uniformly maintain large cash reserves. This, the president recognized and recommended. The policy now generally pursued is exactly the opposite: in a time of panic, the rein is drawn more than ordinarily tight. In support of the theory that it is a wise policy to loan freely during a panic, the example of the Bank of England, in 1826, is quoted. Governor Harmon, telling the story of how that crisis was met by the bank, says: "We lent by every possible means, and in modes that we never had adopted before. We took in stock as security; we purchased Exchequer bills; we made advances on Exchequer bills; we not only discounted outright, but we made advances on deposits of bills of exchange to an immense amount, in short, by every possible means consistent with the safety of the bank, and we were not, on some occasions, over nice. Seeing the dreadful state in which the public were, we rendered every assistance in our power." Nor is this the only piece of evidence which the president of the American Bankers' Association seeks for in the practice of the Bank of England. As a rule, he says, it lends more freely in a panic than in ordinary times. But, he goes on to say, it is distinguished by two things from any bank in the United States: it can raise the rate of interest without limit, and it has "the power to issue its own notes." The exercise of this power, the president of the Bankers' Association does not quite accurately describe. The restriction of the Bank of England not to issue more than a limited amount of notes without holding gold equal to the issue, he says, "has been several times violated, and all the world knows it will be again violated when occasion shall demand." The Bank Act has been suspended, by authority of orders-in-council, not less than three times; but on the first occasion, 1847, the suspension of the Act did not cause a note to be issued beyond what could

have been issued under the Act if it had not been suspended; and under the second suspension, the issue of notes beyond what the law allows, was only £800,000. But, in 1866, the mere report that suspension had been authorized, calmed the panic, even before the government had in fact considered the question. It was the story of the Dutchman over again: as soon as it was known that the Bank of England notes might be issued, nobody wanted them. The fact showed that the feverish demand for notes was artificial; people wanted them because they thought they could not get them, and without having any real or pressing need for their use.

The president of the Bankers' Association, it is evident from this glance at the facts, has misconceived the extent to which relief has been given by an extra issue of Bank of England notes, under successive suspensions, which he calls violations of the Bank Act. But if it was not the actual issue of notes in excess of the legal restriction, it was the right to issue them that calmed the troubled waters. Here it is necessary to guard against a misunderstanding of the word restriction; for absolute restriction in the issue of Bank of England notes there is none; the restriction is in the nature of limitation to the amount of specie held. By increasing the specie reserve, the amount of Bank of England notes can be indefinitely increased. In times of panic, an order-in-council removes that qualified restriction, and allows an addition of notes to be issued without an equivalent addition to the gold reserve. The remedy of the President of the Bankers' Association for panics, in America, includes a similar liberty to that conferred upon the Bank of England by a suspension of the charter. But before this liberty can be exercised, some flexibility which it does not now possess, must be grafted upon the National Bank system, and this, with the repeal of the usury laws, is what he demands at the hands of Congress.

The heroic treatment of panics does undoubtedly derive some countenance from the facts pointed to, in the history of the Bank of England. These facts show that mere potentiality sometimes brings a remedy, without the actual exertion of power; the ability to relieve an artificial want, which has the appearance of being terribly real, sometime suffices, without the necessity of its application. An artificial want may be the most exigent thing in the world; but when, as in a panic, it is born of the imagination, by the imagination it may be cured. But the banker, before he can exert this magic power, must have substantial means of relief in his hands. For this reason, his cash reserves must not be allowed to run below the line of prudence. When this rule is not observed, by an individual bank endowed with ample store of legal discretion, the bank may itself become a focus of panic, and instead of being in a position to apply the heroic remedy recommended, it may itself be driven by stress of weather to seek relief as a means of keeping itself afloat. It is for such exceptional conduct that restrictive laws have been invented. If there were any certainty that the National Banks of the United States would, at all times, keep a cash reserve equal to twenty-five per

cent. of their deposits, there would be no necessity to enact a law to require them to do so. The prudent and the well managed banks would probably keep their reserve up to that line, as a matter of business necessity. One half the legal reserves of the National Banks, outside of New York, may be re-deposited in approved New York banks. New York, in this way, becomes the centre whence specie supplies must be drawn, by the National Banks situated elsewhere, whenever the needs of business call for them. Upon this fact, the president founds the conclusion that the legal reserves in the New York banks are inadequate: "For National Banks located in the city of New York, a full reserve in legal money of 25 per cent. is by the law required. Experience, I think, proves that if applied to the New York banks as holders of the final reserves, this minimum is too small. It is not an adequate cash reserve. It does not furnish the proper sense of strength and security to the banks themselves when the hour of trial comes. The result of experience is the final test of every theory and every action, and guided by this test the minimum of 25 per cent. is too small." The president does not, however, call upon Congress to increase the proportion of the legal reserve; the bankers, he suggests, should voluntarily do what the law does not require at their hands. If there be no flaw in his facts, his conclusion is irresistible, while the remedy he suggests is more agreeable, whatever its effectiveness, than one enforced by legal compulsion.

Having armed themselves in the way suggested, the National Banks would be in a position to apply the heroic remedy when the craven heart of panic communicates its fears to the multitude. But how applied? The answer given is, by "the adoption of some rule to secure a uniform practice in loaning freely in times of panic out of cash reserves." The issue of Clearing House certificates is pointed to as an example of what may be done. But the cases are not parallel. A uniform practice of a liberal dispensing of loans is almost, if not altogether, an impossibility. The conditions are not uniform but widely diverse, and do not admit of uniform treatment. If anything could be done in this direction—even admitting what the banking world is not agreed upon, that the heroic treatment of panics is the best—it could not be done by a close combination and in accordance with unvarying rules; if at all, it could only be done upon a general understanding. And such agreement would be greatly limited by the fact that, at such times, weak banks are very apt to ask assistance from stronger. If the president's theory be correct, the difficulty of reducing it to practice would still be all but insurmountable.

—Considering the amount of business now done by the United States with Mexico, there should be abundant room for Canada to do an export trade with her. Our Montreal letter states that the openings of negotiations for a commercial treaty between the Mother Country and Mexico, are looked upon in that city with much interest. If we can sell there our fishery and field products and manufactures, a large and mutually profitable trade between the Dominion and Mexico should speedily follow.

THE CANADIAN PACIFIC RAILWAY.

Much interest naturally centres in the progress of this great national work; and especially has an anxiety been felt to ascertain whether the government loan of last Session would enable the company to complete the undertaking. Reassurances on this point could not fail to be welcome, and we are glad to find that they have been forthcoming. Some of these, in an authoritative shape, we proceed to present to our readers. First, we turn to the evidence of Mr. Geo. Stephen, President of the Canadian Pacific Railway company. Mr. Stephen, it should be stated, is replying to allegations that the company was drawing upon the loan at an abnormally rapid rate. He says:

"These assertions are that the Company had drawn fifteen millions of the Government loan before the 30th June, besides the regular payments on account of construction; that the Syndicate, as you please to call the Company, 'have not been able to unload any of their stock' and have been making 'increasing demands' upon the Dominion treasury. These statements are absolutely without foundation, both as to those which are direct and those made inferentially. The Company have not received one dollar from the Government beyond the amounts expressly authorized by the Loan Act of last session, and they have made no demands upon the Government except for the carrying out of that Act. And, moreover, the Company see no reason to doubt that the provision made by that Act is sufficient for the completion of the railway. As to the stock, I and my associates in the original contract have at this moment a cash capital investment in connection with the enterprise of over eighteen million dollars, of which more than double the five million dollars we agreed to provide have been employed upon the Canadian Pacific Railway proper, and the remainder in collateral enterprises in connection with and beneficial to the main enterprise. The amount invested with the Company is represented by a portion of the fifty-five millions of stock; and the remainder of that stock is held by more than two thousand shareholders, holding the highest positions socially and financially in Europe and America. The Company holds no part of the sixty-five millions issued, except the reversion of the ten millions on which an advance was obtained, as you are perfectly aware from the returns made last session, and therefore have no stock to sell; and if I and my friends were to sell our individual holdings, which we have neither done nor tried to do, the finances of the Company would be no way affected."

It is not many days since the statement was made, in the Ottawa correspondence of a leading daily, that the Canadian Pacific Railway Company had drawn from the Dominion Government, about 15 millions out of the 22½ millions of dollars at end of June; that the calls of the C.P.R. upon the Government for funds to carry on their work had "proved a source of great embarrassment and accounts for the Government's overdrawn bank account," and that the Government had urged the banks to convert their cash reserves into Government bonds. Of this last statement, we have an authoritative denial from the Treasury Department. As to the truth of the former, the *Canada Gazette* of the 16th instant shows that while the loans made by our banks to the Dominion at end of July were \$2,215,492, the amount of Dominion deposits then held by our banks was \$4,

339,647 or nearly double the loans. The Bank Statement for June showed the deposits to be \$5,802,688 and the loans of the banks \$6,703,374.

A representative of this journal, meeting Mr. Duncan McIntyre of the Canadian Pacific Railway on Friday last, enquired of him as to the alleged condition of affairs between the government and the road. That gentleman's reply was: "There is no foundation whatever for the statements made in the *Globe's* Ottawa correspondence respecting the Company's finances. The provision made at the last session of Parliament, by way of loan to the company, with the remainder of the subsidy then on hand, is ample for the completion of the entire railway from Callander to Kamloops. And I myself would undertake to find responsible contractors to complete the road for that amount of money, and to give all the security that any reasonable man could ask for its completion. The C. P. R. does not need to make, and has not made, any demand upon the Government, either for funds or for the guarantee of loans. And the company has neither asked for nor obtained a dollar from the Government except in accordance with the Act of Parliament passed last session."

"I must say, continued Mr. McIntyre, that it is a matter of astonishment to me, and to many other Canadians, that the *Globe* should make such reckless and injurious statements about the railway and the condition of the country. And when offered proof of its errors, and asked to correct them, it does so in a manner calculated to deepen the original injury."

INJURING CANADA.

We have received a number of communications, from business men and persons of standing in different parts of Ontario and Quebec, taking exception to statements which have been recently made as to Canadian affairs, by several journals on both sides of the Atlantic. As for the reports put forth respecting our industries other than textile, describing their alleged languishing condition, many of these have been contradicted or corrected in letters from the proprietors of mills and factories. But we find that erroneous statements in this and other directions are injuring Canada abroad. Letters which we have ourselves seen, from Liverpool and Manchester, state that the policy of depreciation of Canada, adopted by certain Canadian journals is doing much harm to her interests there. And we have been told by correspondents of Birmingham and Glasgow houses that, according to Old-Country letters, "immigration to Canada is clearly being hindered by the accounts which reach here, taken from your public journals, as to the bad state of your manufactures and the glut of all sorts of labor."

One gentleman tells us that he has seen, in a local paper published in Elgin, Scotland, a warning against going to Canada, "where, according to their own papers things are so bad." And a correspondent in the north of England writes to ask us whether we are really in such a state of "financial and industrial collapse and some American

and even Canadian papers, not only predict but predicate."

A grave responsibility rests upon those who give currency to exaggerated stories of Canadian dulness and decay. The truth about such matters wrongs no one, but to go beyond the truth for the purpose of making a point, when by so doing the country at large is injured, seems to us an inexcusable thing. The work done for this country by our emigration agents, provincial or Dominion, in influencing persons from the older countries to come over and possess our lands, is liable to be largely undone when inflated tales of dire distress are told by faithless heralds amongst ourselves. And these tales are taken up, only too readily, by the American emigration agents, or the emissaries of western railroads in the United States, and used to persuade intending emigrants to avoid Canada and prefer the neighboring Union.

Happily there are now in Canada many prominent men from the United Kingdom who will see for themselves, in the course of visits to our different provinces, and by the personal inspection they are making of our industries, what is the actual state of affairs. But it is none the less humiliating to be dependent on friendly visitors for the correction of false statements sent abroad by Canadian journals.

THE ENGLISH BANKRUPTCY ACT.

The question is beginning to be asked whether the new English Bankrupt law is likely to attain the object its enactment had specially in view: to diminish the expense of winding up bankrupt estates, to secure greater efficiency in the prevention and detection of fraud, to facilitate the collection of dividends by administration orders from such debtors has had previously been reached by judgment summonses. Under the old law, complainants say, composition notes were generally delivered within a month and dividends paid within six months. Under the new law, they add, by way of contrast, a much longer time is consumed in these processes. A case is given to show that the costs, under the new law, would be £918 16s., against £266 10s. 4d. under the old. But it is claimed that when the estates are small, the costs under the new law are less than under the old. Under the new law, complaint is made that the Board of Trade does very little for the costs it occasions, and that it sometimes refuses to allow any thing to contest claims, which lawyers hold to be illegal and unjust. But it may possibly be answered that lawyers in search of a case see things in a different light from the Board of Trade. The powers of the new Act for the prevention and detection of fraud are said to be far weaker than those of the old. An instance is mentioned of a debtor who, while the official receiver was in possession, made use of a duplicate key fraudulently to remove part of the goods, and that the court appeared to be without a remedy: "the officers were very cross with the debtor but that was all." But theft is theft, and no doubt the stealer of the goods could have been punished. Under the new law, the power of imprisonment which previously existed under judgment sum-

monses is abolished. When a debtor has two or three executions against him, he can invoke the protection of the court, after which, on examination, it decides what dividend he is to pay and regulates the instalments. But if the debtor fails to meet the instalments, the court can only expostulate. The Act cuts down the costs of country solicitors to a mere fraction. A case is mentioned on which one of them employed five of his staff for more than a fortnight, day and night—country attorneys never sleep—and the whole could not be made more than £6. Here is one source of opposition to the measure. One thing is certain; no bankrupt Act ever did or ever will give complete satisfaction; for creditors will never be satisfied, when the credits they have extended, sometimes without due caution, expose them to loss. The new English bankrupt Act is too young for a decisive judgment on its merits yet to be formed.

INNOCENT SUFFERERS.

In addition to those fires which are absolutely unavoidable and which are followed by claims honestly prepared, there are many which are plainly owing to the design or to the wilful negligence of the owners of the property, and many others which may have been inevitable, but which are taken advantage of for the purpose of preferring grossly exaggerated and fraudulent claims. Arson, fraud, or wilful negligence are proper bars to the recovery of any portion of the losses or the claims; but it happens very frequently that the amounts, which would otherwise be due from the fire insurance companies, are payable to banks, wholesale merchants, or mortgagees, who have had no personal control over the property nor any hand in its destruction. These parties present themselves as "innocent sufferers," and claim that their interests should be satisfied by insurance companies notwithstanding the "bars" as to the owners arising from the fraud or evil practices of the latter.

Where the insurances are upon buildings included in mortgaged properties, provision is generally made, or is capable of being made, for this state of affairs, because mortgages judiciously made do not usually cover more than from one-half to two-thirds of the values of the properties including the buildings. So that, a fire may leave some margin of value to satisfy, in whole or in part, the mortgage, which is transferred to the insurance company on payment of an illegal claim. But, where the subject of insurance is grain, wool, farm produce, lumber or other property which is liable to be wholly destroyed or so injured as to leave little margin of value for any purpose, no provision is made for subrogation, and the loss is final. Again, when the insurance is upon a stock of merchandise, the values are variable and there are generally so many parties who have claims against the nominal owners and these latter are often so clearly insolvent as to prevent any arrangement for the protection of insurance companies from fraudulent claims by any system of subrogation, that the losses must inevitably fall upon "innocent sufferers" as before.

Now begins a discussion in which the

owner of the burnt property is often the only person free from embarrassment, because he has generally "realized" the value of the destroyed property before the fire, either by spending the money of which the property was the equivalent, or, in some other way benefitting or enjoying himself. Indeed sometimes he is so debt-hardened as to look with unconcern upon the efforts of his creditors to recover from his insurers. But there are too many cases in which the creditors adopt the fraud and combine for its enforcement, sometimes going so far as to threaten insurance companies with loss of business, or to prevent their customers from what they call "patronising" the companies which refuse to join in a fraud by rewarding its perpetrators or by so condoning the offence as to pay the amounts which would have rightly been due if no fraud had been attempted. In fact the writer remembers several cases in which the insurance companies have been the subjects of unmerited reproach and even of persecution on this account, and have been so misrepresented as really to lose their business in some localities. Were the fact that arson, wilful negligence and fraud are bars to the recovery of loss claims, a *legal* fact only and not also of equity and justice, then the "legal fact" might possibly be a hardship—the remnant of some barbaric or Draconian code—and those insurance companies which availed themselves of it might possibly be accused of sharp practice. Therefore, in order that there may remain no illusion or misunderstanding on this subject, it may be well to consider the nature of the contract of fire insurance, the proper functions of fire insurance companies and the results which would of necessity flow from the payment of claims barred as we have described.

The contract of insurance is the voluntary act of the parties to it, by which it is understood and agreed that the insurance company is to protect the owner of the property from non-avoidable losses by fire, and is to pay claims honestly preferred. The contracts of mutual insurance companies which are associations of people for the purpose of insuring themselves and each other, have the same or similar forms of applications and of policies as have stock companies, foreign or domestic, proving that the restrictions are voluntarily assumed when they are not imposed by what has been termed a unilateral contract. The proper functions of fire insurance companies, whether stock or mutual, foreign or domestic, are to collect from the assured such moneys as will suffice to pay the losses and expenses of insurance. The form of collection is immaterial, whether it be by means of assessments on notes, or of straight premiums. In addition to this they arrange for a reserve for use in case of extraordinary fire losses, the Mutuels by assessable premium notes and the others by capital and accumulations. Beside these, a moderate profit must be made, without which there could be no insurance, no inducement to insure or be insured, nor any security for either assurer or assured.

The consequences which must necessarily result, were insurance companies to promote fraud by collusion or by condonation, would be, first the increase of fires and fraudulent claims. This means not merely

present dishonesty but the growth of it by its encouragement, a growth which does not argue its action against insurance companies only, but its incursions into fresh fields and pastures new whenever one road to success is "played out" by being overworked. The next result must necessarily be the increased cost of insurances, which means, in fact, the taxing of honest people for the encouragement and reward of dishonest ones. Then would follow the gradual impoverishment of the country by reason of the destruction of property. These would be accompanied by almost wholesale murder, because those who do not hesitate to set fire to property or to allow it to be burnt by their wilful neglect or carelessness, seldom allow considerations of human life to influence them. It is demonstrable, therefore, that these various results would finally culminate in the suppression of organization for insurance against loss by fire.

—It is not a little remarkable that the working of the new tariff law in the United States, as exemplified in the statements made by the Chief of the Bureau of Statistics at Washington, relating to the fiscal year 1884, instead of reducing the average rate of import duty by ten per cent. or more, has actually reduced the average only one per cent. We read in a New York journal: "It seems that the valuation for customs' purposes of free merchandise imported was \$211,279,657, an increase of \$4,000,000 over 1882-83, and of dutiable, \$456,406,561, a falling off of \$59,000,000. But this decrease is not due so much to a diminution in the quantities of goods imported, or a decline in foreign prices, as to the diminution of charges, inland transportation, commissions, coverings, &c.—expenses which were added to the cost of the merchandise to make the value for duty purposes in 1882-83, but not in 1883-84. Returns of the value of imports, however, are on the whole important only so far as they are an element in determining average rates of duties. It seems that the average rate on all dutiable goods fell from 42.6 per cent. in 1882-83 to 41.7 per cent. in 1883-84, or less than 1 per cent. The statement is illuminating, in view of the fact that the Tariff Commission, in 1882, reported that a reduction of 20 to 25 per cent was desirable."

—The working of the new English patent law shows the necessity of the provision which requires every application to be referred to an examiner. In four months, there were no less than 224 cases of apparent similarity, by which twice that number of applicants were affected. In the United States, the department undertakes to decide whether an application contains anything new, entitling the applicant to a patent. In Canada the patentees are left to fight out conflicting claims between themselves. This may be all very well, but the public are entitled to some protection; and where an application contains nothing new, patent ought to be refused. The multiplication of patents, where the merit of originality is wanting, saddles the public with a monopoly for which there is no warrant or justification.

BANKING REVIEW.

The figures of the July bank statement will be found in condensed form below, and are compared with those for the previous month :

	July, 1884.	June, 1884.
LIABILITIES.		
Capital authorized..	\$71,896,666	\$71,896,666

Loans to Directors or their firms	7,352,697	7,766,984

—The necessity of providing a home market for agricultural produce, emphasized in the United States in the first days of their independence, is again being urged. England is getting supplies of wheat from so many quarters that America may produce

more than she can sell. Such is the fear, real or assumed, which is beginning to find expression. How can the home market be best extended is a question on which opinions differ. There is the original remedy of protection by high duties; but this it is answered, is not the true remedy or a remedy suited to the times. The condition on which any nation becomes an extensive exporter of manufactures is cheapness of production, and cheapness of production is incompatible with high prices artificially superinduced, by means of a tariff having some other object than revenue. Americans are beginning to realize that to enter the markets of the world as exporters of manufactures, they must be able to produce as cheaply as other exporting countries; but they have not yet set earnestly to work to meet that competition, and nobody can tell when they will.

TORONTO BOARD OF TRADE.

A general meeting of the Toronto Board of Trade, was held on 20th inst., the president Mr. H. W. Darling, in the chair. A communication was read from the Planters' Association of British Guiana, South America, respecting more intimate relations with the Dominion, and the supplying of our market with sugar. Letters had also been received from the Chambers of London and Glasgow, with regard to the bankruptcy law. The Glasgow Chamber urged the Toronto Board to bring such pressure to bear on the Government and Parliament of Canada, as would secure the early enactment of a sufficient and satisfactory law for regulating according to equitable principles, the administration of bankrupt estates in Canada.

Mr. Darling stated that the feeling existing among British merchants upon this subject was very strong. Capt. McMaster moved and Mr. W. Ince seconded the following resolution :

Resolved, that the former deliverance of this Board as to the necessity for an Act for the equitable distribution of the estates of insolvent debtors, coupled if deemed necessary, with provisions for discharge, are hereby re-affirmed, that the committee on insolvency, *vis.*, Messrs. Elliott, Blain, McMaster, Ince, Clarkson, and the President, are hereby re-appointed and instructed to act, if possible, in conjunction with similar committees from the Boards of Trade of Montreal and Hamilton, in urging the Dominion Government to place upon the Statute books at its next ensuing session such a measure as was framed by these Boards last year; the present state of the law being alike injurious to the mercantile interests of Canada at home and abroad.

After some discussion, the motion was put to the meeting, and declared carried, Mr. A. M. Smith alone voting against it. Notice had been given at a former meeting by Mr. H. N. Baird, of a resolution affecting the interests of Canadian millers. That gentleman accordingly moved a resolution of which the following is a copy :

"That this Board, satisfied that the milling industry of this country labours under a most unnecessary and unfair disadvantage whenever the wheat crop of Canada is less than the consumptive requirements of the country; and being satisfied further that this disadvantage is due to the tariff discriminating in favor of the American manufacturer of flour, by imposing a duty of 50 cents per barrel on American flour, whereas the duty on American wheat is 15 cents per bushel, and equal to 71 cents per barrel, thereby making it impossible for the Canadian miller to compete with his American rival; be it resolved that as the principle of the Canadian tariff is avowedly to protect the Canadian manufacturer, and as it most markedly fails in this particular, this Board do memorialize the Government to rectify the injustice, by at least equalizing the duties on American wheat and flour, so that the American miller will not have an absolutely protected advantage from the operation of the Canadian tariff."

In the six months last past, said Mr. Baird, 342,000 barrels of flour, valued at \$1,420,750, had been imported into Canada and yet there were grist mills standing idle in Ontario to-day. He claimed that the present tariff discriminated against Canadian millers. The resolution was supported by Mr. Chapman, who urged the adoption of a memorial to Government reciting the facts alleged in the above resolution and the disadvantages to Canadian millers of through freight rates from Chicago to the Eastern Townships. Mr. D. Plewes of Brantford asserted that the year 1883 was one of the worst the Canadian millers had ever gone through, and Mr. S. Neelon, M.P.P., of St. Catharines, declared that while millers had been unjustly dealt with the farmers themselves were not benefited by the present tariff. The discussion was continued by Mr. Spratt and by Mr. Spink. The president, in putting the resolution said: The present state of affairs shewed how much better it would be if the government would refrain from unnecessarily interfering with the commerce of the country, and they had in this case an example of the difficulties the government got into when it undertook to protect all the industries of the country. They were pretty sure, in their efforts, to tread on the toes of some industry, and more or less to injure all the interests, and he thought the government was beginning to realize that. There were some members of the Board who did not believe in a protective policy at all, and if the millers had asked such to support the abolition of the duties on both wheat and flour, they might have got their hearty co-operation. If what Mr. Neelon said was true, and the farmers could be convinced that the duty on wheat was an injury instead of a benefit to them, they could not do better than try to secure them as allies, and the government would doubtless give prompt heed to their united representations on the subject. The prosperity of the millers, however, had a very special interest for the Board, and he thought they had made out a good case for relief in some direction, if it could be done consistently with all the interests involved, and he had no doubt the Board would cheerfully give them all the aid in their power to this end.

The resolution and the memorial were adopted. A new set of by-laws having been rendered necessary by the amalgamation of the old Board and the Corn Exchange, those presented were adopted as a whole, except one clause, notice of amendment of which was given by Mr. G. M. Rose.

TO CORRESPONDENTS.

W. C. Bowmanville.—They are not the same. New Guinea, sometimes called Papua, is a large island of the Australian Archipelago, on which sugar-cane, tobacco, oranges, lemons and coconuts are grown, and sold to Dutch traders. Guiana is a district in the northern part of South America, adjoining Brazil. It is divided into French, Dutch and British Guiana, and has been settled about 300 years. Timber, cotton, coffee, sugar, spices and rum are among the exports. Its chief towns are Georgetown, New Amsterdam and Cayenne.

COMMERCE: Moncton.—1. Could not reply last week in time; the question had not before been raised here, so far as can be learned. 2. Have endeavoured, without success, to obtain the information. The organization named has no figures bearing upon the point. Two or three weeks ago there was given, in the MONETARY TIMES, a list of Canadian manufactures exported. The Customs authorities at St. John or Halifax may be able to give more minute particulars.

J. H. H.; Chatham.—Koumyss or Kumiiss is

a preparation of asses' or mares' milk, obtained by fermentation. It is used as a refreshing drink for invalids or in certain diseased states of the system.

G. W. A.: Warton.—Sorry we cannot give you the figures; our copy of *Hansard* for that year is missing. The *London Advertiser* or *Hamilton Times* will tell you.

F. & C.; Wellington—Will reply next week.

The suggestion that members of the insurance fraternity and literary men, should entertain Mr. Cornelius Walford, M.A., F.I.A., F.S.S., the well-known insurance author and statistical writer, on his approaching visit to Toronto in September, meets with cordial support. A meeting having been held in the board room of the British America Assurance Co. to discuss the project, it was resolved to tender Mr. Walford a sail on Lake Ontario, and to have a complimentary luncheon on the steamer. The committee which has charge of the arrangements consists of Messrs. Wm. McCabe, F. I. A., Capt. Perry, J. D. Henderson, Alf. W. Smith, E. P. Pearson, H. O'Hara, James Hedley, Secretary. The guest attends the gathering of the British Association in Montreal next week.

—The excessive dulness of commercial business in the New England States and New York, says the *Shipping List*, must account for the decline in bank clearings last week, for stock speculation has been fairly active. According to returns received by the *Boston Post* from managers of the leading clearing houses of the United States, the aggregate clearings last week were \$681,547,568, against \$724,371,993 for the previous week. The losses are heaviest in the New England and Middle States and at San Francisco, while all of the gains, with the solitary exception of New Haven, are in the Western States. As compared with the corresponding week of last year the clearings show a percentage of decrease amounting to 31.15 per cent., against a decrease of 10.4 the preceding week. Outside of New York city the clearings show a decrease amounting to 15.8 per cent. against a decrease of 3.4 for the week preceding.

—A Quebec customs official has compiled a comparative statement of that city's trade from 1874 to 1883, inclusive. One of the tables shows the increase for five years—1879 to 1883—in the following articles: Animals, \$565,370; hemp, undressed, 78,455; lard, pork, beef, hams, etc., \$228,209; Wheat flour and flour of all kinds, \$189,560; Molasses, \$142,437. For the same period the decrease in cotton manufactures, is put down at \$244,237; iron and steel manufactures, \$676,908; all kinds of sugars, \$785,177. The imports for the last ten years—1874 to 1883—amounted to \$45,200,425, and the exports for the same length of time, reached \$98,113,198.

—Wingham has a board of trade, with a membership of forty. It held its first meeting on Monday last, when the following officers were elected for the current year:—R. Wilson, agent Bank of Hamilton; vice-president, D. McInnes; secretary, Jas. A. Cline; Council—Messrs. Clegg, Reading, Gordon, Orr, Elliot, Scott, Leslie, Gregory, Mills, Williams, Anderson, and McClymont.

—A letter from New York, dated August 14th, received too late for insertion in last week's issue, gives some additional particulars respecting the present publisher of *Thompson's Bank Note Reporter*:

"In reply to yours enquiring as to the respectability of the publication named, we are

unable to say anything on that point, for the reason that, as far as we can learn, there is no respectability attached to the concern. The proprietor and all there is of it, is Louis P. Haver. He has been trying to form a Company, but so far, we believe, without success. He has made a good living, and probably some money out of his paper; but as to the character of his publication and his business methods, there are not two opinions; it is regarded as a blackmailing scheme, pure and simple, and there is little doubt that abundant evidence can be obtained to prove this. We know of a young man who was for a time in their employ, and since this exposure they have been trying to buy his silence and to get him to abstain from giving evidence before the district attorney, as it is probable action will be taken to prevent their using the mails; this is what they are afraid of. From what we can learn of it, it is a scandalous concern, and their methods, as described, are simply outrageous. If they are refused the use of the mails the game is up. He is a braggart. You need have no fear of any suit. What court would give such an adventurer a hearing? Go for him lively! These are the scoundrels it is your duty to show up. He is simply trying to bluff you into silence. He is in a country where such publications as his and "*The Police Gazette*" can flourish. Invite him to Canada, where the courts will compel him to do an honourable business and help him to become respectable."

LEEMAN'S ACT AND THE STOCK EXCHANGE.—A case under Leeman's Act came before the Court of Appeal the other day, and its further progress will be watched with interest. A stockbroker was instructed by a client to buy 75 shares of the Oriental Bank. The purchase was effected and the shares paid for by the broker after the transfer was made. When, however, the client was asked to take up the shares he refused, on the ground that the contract was not binding, as the numbers were not passed at the time of the purchase, and if the broker concluded the bargain, he did it on his own risk. Thereupon the broker instituted proceedings for summary judgment in a Divisional Court, and the judges there decided that the client should be refused leave to defend, except upon condition of paying the money into Court. And upon appeal, this decision has been upheld, the only doubt in the minds of the court apparently being as to whether there was really any defence at all to the action. Their opinion seems to have been that when the client employed the broker he gave him an implied authority to pay for the stock he was instructed to purchase. But it may be argued for the client, that the authority he gave was intended to be exercised in accordance with the law of the land, and not in accordance with the practice of the Stock Exchange, which is thoroughly at variance with the law. According to Leeman's Act, no transaction in bank shares is valid unless the numbers are passed, and when the case comes for trial it will be interesting to see whether, and if so on what grounds, a bargain which is not legally valid can be legally enforced.—*Economist*.

—We have dealt often before, says the *Travellers' Record*, with the duty of men to preserve their families from the risk of destitution, and

this argument alone ought to be potent with every man; but we wish now to dwell especially on the profit to the insured himself even of an ordinary life policy, where not a dollar will ever be subject to his personal handling. It is no more wasted than the money paid for the house he lives in, or his decorations, or his stocks or bonds, or his farm, or his manufactory, or his yacht, is wasted. Does he consider them worthless, and the money he has paid for them so much robbed from what he might have used for personal enjoyment? Does he intend to spend every cent he earns, to consume it in some way, to live so close that there will be just enough left to bury him with? If not, how can he consider the money invested in a piece of property worth thousands of dollars in cash as soon as he is gone "wasted"? He cannot gloat over his furniture and books and pictures any more, or drive his fast horses, or sail his yacht, or enjoy his dividends, or push his manufactures. They are no more to him than the money obtained on the policy is. If it is worth while to leave the former policy behind, why not the latter? Is not money paid by an insurance company as valuable as money paid by an auctioneer? And is it not better to have the certainty of property, whether you live or not, than the chance of having it if you live long enough to amass it?

MOULDS FOR MAKING CASTINGS.

An invention of Mr. Wm. Shaw, of Wolsingham, Eng. Steel works manager, has for its object to prevent straining in contraction on the cooling of castings, and therefore to avoid the cracks and defects resulting from this straining. It also allows of steel castings being made of a softer class of metal than has hitherto been used, thus preventing internal shrinking. Time and expense are saved owing to no feeding heads having to be made with the castings. The invention is especially applicable to the making of mild steel castings. According to the invention, the moulding box is made in parts, upon which springs and wedges or analogous mechanical contrivances act so as to cause the moulding box to contract as the casting contracts. By this means subsequent annealing of the casting may be dispensed with. Between the lugs of the mould box wedges or filing pieces are placed. Bolts pass through the lugs and pieces: the holes therefore through the said wedges extending to the bottom of the wedge. Springs are placed upon the bolts between the nut and the lugs, the said springs tending to force the parts of the mould box together with power which can be brought to bear by screwing up the nuts. Bolts are passed through the lugs and wedges before the casting is made. After the casting is made the bolts are removed and the wedges are withdrawn, which may be effected by a forked lever being inserted under the heads of the wedges, the mould box is then at liberty to contract with the casting.

IMPROVEMENTS RELATING TO THE HARDENING OF STEEL.

Mr. William Lake, of the firm of Haseltine, Lake & Co., London, has patented a new method, which pertains to the hardening of steel. The method of hardening steel usually practised is to heat the steel and cool it suddenly in a bath of cold water, salt water, oil, or the like. The difficulties attendant upon hardening in this manner are well-known; the steel is liable to crack; it sometimes loses its toughness in the process; and sometimes refuses to take the necessary hardness. This invention is designed to overcome these and other difficulties attendant upon hardening steel by the usual methods. The new material used is marl. A kind of marl which answers the purpose well is found as an earthy deposit in the town of North East, in Duchess County, N. Y. in color it closely approaches that of "cream"; it is soft to the touch when powdered, and is probably rich in carbonate of lime, which element may be of importance in carrying out this improvement. The marl is powdered and mixed with the cold water or other bath used for cooling the heated steel. The exact proportions are not material, but a proportion which is found to work well is one half-pound of powdered marl to a gallon of the water or other bath; it is well to add a couple ounces of the marl weekly for each gallon of the bath. After the marl is mixed with the

bath, it should be allowed to stand ten or twelve hours before using. Practical use of this improvement shows that it is one of great practical value for the purpose in hand.

FISH AND FRUIT CANNING IN NEW BRUNSWICK.

Few persons are aware of the extent of the fish and fruit and vegetable canning industry in the Province of New Brunswick. A few years ago the local trade in canned salmon, lobsters, corn, beans, etc., was entirely supplied by American packers. Now the bulk of all the canned goods in these lines is packed in this Province, or on the Quebec side of Bay Chaleur, and thousands of tons are shipped to Western Canada, the United States and England. The facts obtained by a *Telegraph* reporter show a surprising development in this comparatively new industry in the past few years. "We have five canning factories in the North Shore section," said Mr. Hoegg, "located at New Mills, N. B., and Bonaventure, East Cove, Port Daniels, and Bellaise, in the Province of Quebec. These factories will close down about the 30th of August, when the lobster catching season closes. Over 150 hands are employed. We make all our own cans. This season about 6,000 cases of lobsters have been turned out. Not so much salmon canning has been done as in former years. Fresh salmon can be purchased in British Columbia and Washington Territory at one fourth the figure they bring at the North Shore; we cannot compete with the canning factories on the Oregon, Columbia and Fraser rivers, and they practically monopolize the trade.

All we do in that line is to pack between 700 and 800 cases of spiced salmon for the New York market. This season, however, one firm has packed in ice and shipped to the American market upwards of 100,000 lbs. of fresh salmon.

There is a great deal of competition in the north. At New Mills, Mr. Bain is turning out 200 or 300 cases of lobsters a year. Charles McAllister, at Jaquet River, is probably putting up 1,000 cases. John Wilson & Company would turn out this season between 4,000 and 5,000 cases. The operations of other small packers, would aggregate perhaps 4,000 or 5,000 cases." Henry O'Leary at Richibucto, estimated that he would turn out between 8,000 and 10,000 cases. He has a dozen or more lobster canning factories in the vicinity of Richibucto and carries on an immense business. He ships almost entirely to the English market where very favourable figures are offered this season. Hoegg & Company supply the local, American and European markets in about equal proportions; McAllister sells exclusively to a New York firm who ship to London and Liverpool. The other packers chiefly supply the European trade."

The trade is increasing in every direction, lobsters bring better prices this year than for several years previous. The supply is seemingly inexhaustible, as these animals are very prolific. The average weight of a lobster is about 5½ pounds. Small lobsters are the best. There is far more waste in lobster packing than most people imagine. We only use the tail and claws of the fish. Not more than one-fourth of the lobster is available for canning purposes." The total lobster tonnage canned in the Province this year, would be, say 35,000 cases of seventy pounds each. That would give 2,450 tons, or 982,000 as the total lobster mortality during this year.

FIRE RECORD.

ONTARIO.—Port Elgin, Aug. 15.—Andrew Keller & Nesbitt's foundry and machine shop totally destroyed; loss about \$6,000; insurance on building, \$1,500, on machinery and stock, \$1,000 in the Economical and \$500 in the Huron & Middlesex.—Kingston, Aug. 15.—The old unoccupied Frontenac brewery was burned this afternoon; loss about \$5,000, partly insured. St. Thomas, 14th.—Pennington & Penwarden's laundry destroyed last night; loss \$1800; insured in L. & L. & Globe \$900. Owner of building lost about \$400; covered in Phoenix.—Wroxeter, 16th.—Durnion's saw mill burned; insured for \$1,500.—Port Hope, 16th.—Henry Elliot's grist mill at Onaso burned with sheds and stable; loss probably \$10,000; partly covered; tenant Pillsworth uninsured; spontaneous combustion suspected.—Stratford, 19th.—S. S. Fuller & Co.'s mill took fire, perhaps in the picker room, and burned; loss stated

at \$12,000; insurance \$7,000; office and barn saved with some \$5,000 worth of stock.—Midland, 18th.—A fire broke out in T. Offer's furniture shop, which, with S. Perrin's photograph gallery, Elliott's building and E. English's blacksmith shop was burned. Perrin loses \$1,500, insurance, \$500; Offer \$600, insured \$800; Elliott \$2,000, insured \$1,300; Covery & English not insured.—Brockville, 19th.—A fire began in the rag store of P. O. Lennon, and spread to Perth street, Everett's hotel and wooden stores on George and John streets.—Alvinston, Aug. 20.—A fire destroyed John Glover's boot and shoe store, three stores belonging to Thos. Fawcett, and J. I. Scandrett's billiard hall. Glover lost stock and furniture; insured \$1,800. Thos. Fawcett's loss is insured. His stores were occupied by E. Beall, who loses most of his stock and household goods; insurance \$2,000. G. A. Eastman's insurance on stock \$4,500. J. I. Scandrett insured.—Merrittton, Aug. 20.—O. Olsen's frame dwelling destroyed by fire. Loss about \$500; no insurance.

OTHER PROVINCES.—Valois, Que., Aug. 15.—The barn of Leon Denis totally destroyed by fire. Sixty loads of hay, twenty-eight loads of barley, two horses, a threshing mill, harness and other contents burned. Loss, \$1,600; insurance, \$600.—Montreal, 18th.—Wooden grocery of M. Rengimbal burned, loss on stock \$500; dwelling damaged \$300; building insured for \$1000. Wm. Ratherford's carpenter shop on Chatham street damaged \$300.—Quebec, August 19.—Ellison & Co.'s photographic shop was destroyed by fire. Mr. Fuller, who occupied the shop on the flat below, as a crockery and glass store suffered from water and breakage. All the parties are insured.—Sherbrooke, Aug. 20.—At Lake Megantic a fire broke out in the bakery of Telephore Lemay, which was destroyed. The fire also extended to Mrs. Tremblay's house and barn, two houses of Jos. Boufford belonging to Simon Madeau, and the clothing store of M. J. Smith, as well as Smith's grocery store, with the dwelling of J. McDonald. All these were completely destroyed. Loss about \$10,000. Partly insured.

HOW A BANK WAS SAVED.

"I saved a bank from bursting once myself," remarked a seedy-looking old chap to a Chicago reporter, as he laid down a morning paper which he had perused second-handed. "I admit I ain't very wealthy now; but years ago, before trouble came on me, I had large interests in manufacturing and banking. I was president of the bank in our town when there was a little panic and the people made a run. I went in to see how they were getting along just as the excitement began, and found they couldn't stand it until the close of the banking hours. The directors wanted to suspend, but I objected. I told 'em to leave it to me. Happened it was pay day at my shop. Hustled up there, put a flea in the engineer's ear, and in five minutes the engine broke down. The men were glad to get a holiday, but wanted to get their money. I told 'em we didn't have the currency ready, but would give them checks on the bank. My clerks made the checks out in a hurry, and weren't over particular about losing any time at figuring at odd cents. Well, my two hundred and more men rushed toward the bank, and by the time the big depositors had heard of the run and had got around there was a big line in front of 'em. It took three hours to pay off my men with currency from my safe at the shop, which I carried in at the back door of the bank. In those three hours we raised money enough to pay every dollar due our depositors, and the bank was saved."

—According to returns received by the Boston Post from the leading clearing-houses of the United States, the clearances week ended 8th were \$724,871,998, against \$744,082,494 the previous week. The decline, which is general throughout the country, shows that business of all kinds still continues remarkably dull, even for mid-summer. As compared with the corresponding week of last year the clearings show a percentage of decrease amounting to 10.4 per cent., against a decrease of 6.1 per cent. the previous week. Outside of New York City the clearances show a decrease of 8.4 per cent. against 19.2 per cent. the previous week.

GILMOUR & Co of Trenton have asked the town council of Trenton for a \$10,000 bonus.

DOLLARS AND CENTS.

I'll write you a ballad on dollars and cents,
Every line shall be perfectly true,
And I'm writing these verses on purpose my friend,
To present a few home-truths to you.

A quarter looks small when you're out with
"the boys,"
Fifty cents or a dollar soon goes.
And a ride on the car or a beer is but five,
Which is "nothing"—as everyone knows.

If you squander a quarter each day of your life,
Though it may seem remarkably queer.
If you'd put it away in the bank you would have
\$91.25 in a year.

But a quarter a day ain't half what you waste,
If you count your occasional spree;
What you waste will well pay for your board
and your clothes,
And the rest you can save if you please.

So shut off your treating, and walk when you can,
And give up the excitements you've craved,
And you'll be surprised at the end of the year
At the tidy amount you have saved.
—Toronto World.

A TRICKY INSURANCE COMPANY.

Shortly after a fire the other day, a colored gentleman called on the insurance agent and said:

"Wants my money cap'n."
"I don't owe you any money."
"Ain't yesses'f de 'sho'nces agent."
"Yes, I am an insurance agent."
"Den yer owes me money, fur my sto' burned endurin' de late fire, sah?"
"You were not insured in my company."
"De Debil I wan't."
"Come, get out of here?"
"Hole on, boss, an'lemme 'splain. Wuz Mr. Jones' shored in yer comp'ny?"
"Yes."
"Wuz Mr. Jackson's?"
"Yes."
"Wall an' good. Now my sto' wuz jes betwixt Mr. Jones an' Mr. Jackson. De walls o'dar sto's made de walls o'my sto'. Ef you'd a took dar sto's er'way, my sto' wouder been gone. De inshoin' o'dar own sto's insho'ed mine, doan yer see."
"No I don't see."
"Den I ain't goin'ter git nothin' is I?"
"No."
"I recollect dis, sah an' see whut de cou'tous' ll hab ter say" and turning away, he muttered:
"Ef I'der knowd de comp'ny wuz so tricky, I wou'dn'ter set de blame sto' afire."—Arkansas Traveller.

—From a recent circular of a European dealer we learn that the apple crop "in the United Kingdom, owing to cold weather during the blossoming time, and to dry weather during June will only be a half one. In France the prospects are in favor of an average crop, Canada apples and russets being over the average. In Holland, owing to frost in blossoming time the crop will only be a half one. The crop in Belgium will be light, and, as shipments have already commenced, the supply will be exhausted by the middle of October. In Germany there will be a short crop. In Portugal the crop is good and prices favorable for shipment, but shipments after September will be small. The writer therefore concludes:—

1. That the apple crop of Europe, taking it as a whole, will be considerably under that of last year.

2. That fall shipments of American and Canadian apples to Glasgow and Liverpool should meet with good demand at values ruled by supply.

3. That shipments to London of good solid stock will as in similar seasons, compare favorably in net proceeds with other markets on this side.

The capital of the new glass works company in Napanee will be in the neighborhood of \$200,000.

Commercial.

BRITISH MARKETS.

London, 20th Aug.

Bearbohm's report—Floating cargoes—Wheat, very little enquiry; maize, none offering. Cargoes on passage—Wheat, quiet; maize firmer. Mark Lane—Wheat, slow; maize, steady. Liverpool—Spot wheat, dull; maize firmly held at 5s. 8½. half penny dearer. Paris—Wheat and flour quiet.

Liverpool, 20th.

Breadstuffs, market very quiet, top price flour has remained at 12s. 6d. for the week; Spring wheat was 7s. 5d. on 14th, is now 7s. 2d.; Red winter was 7s. 5d., now 7s. 5d.; common has advanced on week from 5s. 4½d. to 5s. 8½d.; oats 1d. higher at 5s. 6d.; barley 1d. lower at 5s. 5d.; peas steady at 6s. 8d.; pork went up to 77s. 3d. on 15th and to 77s. 6d. next day, where it remains. Lard advanced 1s. 6d. to 41c.; bacon fluctuated, now 52s. 6d.; tallow 36s.; cheese fell on 18th to 52s. 6d., and on 19th to 52s.

AMERICAN MARKETS.

New York, Aug. 20th 1884.

The cotton market shows some weakness; Spot cotton closed ½c. lower; Orleans 11c.; mid-ling uplands 10½c. Futures closed firm. September 10.6 cents; October 10.3c. Breadstuffs quiet; flour unchanged; wheat heavy, No. 2 Red 91½c.; for October 92 to 93c.; No. 1 Red and White State \$1.00; corn dull; oats lower; tallow easier; cheese dull; butter weak.

Chicago, Aug. 20th 1884.

Highest point for September wheat 79½c; closed at 79c. with 81c. for October. Corn—Strong, at 53½ to 54½c.; October, 50½ to 52½c. Oats—Higher, at 25½ to 25½c. Rye—Firm, at 56½c. Barley—Dull, at 64½c. Pork—Quiet, at \$18.50 to \$19.50; September, \$21.50 to \$22; October, \$20 to \$20.25. Lard—Steadier, at \$7.65 to \$7.70; October, \$7.75 to \$7.82½. Bulk meats—Shoulders, \$6.75; short ribs, \$10.30; short clear, \$10.85. Freights—Corn, 1½c.

MONTREAL MARKETS.

Montreal, Aug. 20, 1884.

Business is a shade less active, as much because of the terrible heat we are suffering, and which robs a man of all his vim and energy, as to any other cause. In the country near by the continued heat and drouth are causing much inconvenience and loss. Pastures are parched and bare, potatoes and corn are suffering, wells and streams drying up. Prayers for rain were made in various country churches in this province, last Sunday. The grain crops are sufficiently advanced not to suffer from want of moisture and are being harvested in good condition. The money market remains in the same footing as to rates, but first symptoms of a demand for money from the country to buy grain, are apparent. The stock market is stronger and more active, Montreal selling at 193½; Toronto, 178½; Commerce, 124; Federal 53½; Ontario, 110.

ASHER.—Business in this line is of rather a dull and drooping character and receipts of Pots have been light. Pearls, though coming in more freely, have not met with very ready sale. The market is rather weak, and we quote about \$8.90 for No. 1 pots, \$3.50 for seconds; pearls nominals at \$4.75.

CEMENTS.—Portland Cement, continues steady at \$3.25 per brl.; round lots, \$2.90 to \$3.00; Roman, \$2.75; Canadian, \$1.75; Fireclay, \$2 per bag; Firebricks, \$20 to \$30 as to brand.

DRUGS AND CHEMICALS.—Trade in this line continues to improve and payments, for the season are very fair. The quinine market is fairly demoralized, and at the moment prices are very unsettled, from \$1.80 to \$1.50 is probably about the range for spot sales at the moment, but German is being quoted at \$1.20 to \$1.25 to arrive. Stocks of bleaching powder are very much reduced, and price remains very firm; sulphur is stronger as noted; Carbolic acid has receded a little. We quote: Sal Soda \$1.10 per 100 lbs.; Bt. Carb. Soda, \$2.40 to 2.50; Soda Ash \$1.65 to \$1.75; Bichromate of Potash, per 100 lbs., \$8.50 to \$10; Borax refined, 11 to 12½c.; Cream Tartar crystals, 80 to 81c.; do ground 84c. to 87c.; Tartaric Acid, 54 to 58c. per lb.; Caustic Soda, white, \$2.40 to 2.60; Sugar of Lead, 9 to 11c.;

Bleaching Powder, \$3.25 to \$4.00; Alum \$1.75 to \$1.90; Copperas, per 100 lbs., \$1.00; Ground Sulphur, \$2.75 to \$3.00; Flowers Sulphur, sublim per 100 lbs., \$3.00 to \$3 25; Roll Sulphur, \$2.40 to \$2.80; Sulphate of Copper, \$5.75 to \$6.50; Epsom Salts, \$1.25 to \$1.40; Saltpetre, \$9.00 to \$9.50; German Quinine, \$1.80 to \$1.40; American do., \$1.80 to \$1.40; Howard, \$1 50; Opium, \$4.50 to \$5.00; Morphia, \$2.20 to \$2.80; Gum Arabic, sort, 28 to 38c. White, 40 to 55c; Hellebore, 20 to 24c; Carbolic acid, 60 to 70c.

DRY GOODS.—There are no new features in the situation as regards this line of trade. A considerable number of travellers are home, the bulk of orders is in, the rush of first shipments beginning to flag. Further enquiries confirm the opinion already expressed that the volume of business is behind that of last year, but as this is due to a desire to act cautiously, rather than to any fear for the future, we do not see that there is any room for complaint, but rather cause for congratulation. The final settlement of the Morries troubles has removed a feeling of uneasiness which existed in some quarters, but the situation as far as cottons are concerned, is unchanged from the usual deadness occasioned by over stocks. Some houses report more white cottons selling, though not in large lots. The result of the experiment of the Merchants' Mig Co., in shipping a sample lot of whites to Britain is eagerly looked for. There have been rumors to the effect that the Hudson mill had sold 500 packages of grays in England, at a small loss, but positive information is lacking. Payments for the time of year, are fair. A few houses say they have had some applications for renewals in full, while others say remittances with them are satisfactory for the season.

FISH.—A little is doing in new Dry Cod at \$4.75 to \$5.00, but the supply is light. Some lots of new Cape Breton Herrings are also in the market. Old British Columbia Salmon is quoted at \$15; new North Shore \$18 for No. 1, \$17 for No. 2.

FLOUR AND MEAL.—The intense heat reigning seems to have affected business seriously, and there is almost a total absence of reported sales on 'Change. Values show little alteration, and we quote: Superior Extra, \$5.15 to \$5.25; Extra Superfine, \$4.70 to \$4.80; Fancy, \$4 80 to \$4.40; Spring Extra, \$4.20 to \$4.30; Superfine, \$3.25 to \$3.40; Canadian Strong Bakers, \$4.75 to \$5.00; American ditto., \$5.25 to \$5.60. Cornmeal \$3.25 for yellow, white \$3.50. Granulated Oatmeal, \$5 to \$5.25, per brl.; Ordinary \$4.80 to \$5.60.

GROCERIES.—Trade is very fairly maintained in this line, though perhaps a shade quieter than during the last several weeks, which have been very good ones. But this may be reasonably explained by the fact that harvesting operations are universal, and the "torrid wave" with which we are now being afflicted may also have something to do with it. Sugars are easier if anything, and refiners would probably shade 6½ cents for round lots of granulated. There is a fair demand for Japans, only overland, supplies of which have yet arrived. Good medium grades are cheaper than last year, but lower grades are rather stronger. New Blacks have begun to arrive and show values a little higher than last year. Coffees have been slack for some time past. Molasses is firmer, there is no good Barbadoes in New York, and there has been a steady out-go from local stocks, 32 to 33 cents would be present quotation. Old Currants, of which there has been some importation from London are selling at 5 cents, a quotation for new has been received which makes the price laid down about 5½ cents. Valentias are in only fair supply at 4 to 5c.; a very fair quality of layers is offering at \$1.00 to \$1.10. New canned Lobsters are quoted at \$5.40 the case. There is apparently a failure on the part of tomato-canners to form a combination and it is expected prices will rule low, probably at about \$1.50 in a jobbing way.

LEATHER.—The week has been quieter than the last few former ones, but still a fair amount of trading is being done. Prices are no weaker, which is hardly to be expected when hides are going up as they are, being now worth 10 cents. England is taking all the splits and buffs that offer, and at good prices, and in these lines there is none too plentiful supply. We quote Hemlock Spanish Sole B. A. 25 to 28c.; ditto, No. 2 B. A. 23 to 25c.; No. 1, Ordinary Spanish, 24c. to 25½c.; No. 2 ditto 22c. to 23c.; No. 1 China 28c. No. 2 21c. ditto Buffalo Sole No. 1, 21 to 22c. ditto No. 2, 19½ to 21c. Hemlock Slaughter, No. 1, 26 to 27½c; Waxed Upper,

SOUTHERN, Grass and Grain, from the celebrated makers Hubbard, Blake & Co.

occupied for the last several weeks; warrants too show little or no change. Business is in about the same condition, there are reports of two large sales having been made within last few days, but the bulk of the business doing is in moderate orders only. There is a fair activity in Canada plates at quotations. In tin plates cokes are stronger, owing to a large demand, and home market is firmer; there is some cutting between dealers in Bradley and we reduce quotations somewhat. Pig tin is firmer, necessitating a slight advance. In hardware circles there is little doing, the summer trip being over, and everyone is looking forward to the fall trade with hopes of its being a favorable one. We quote: *Gartsherrrie and Summerles*, \$18.00 to 19.00; *Langloan*, \$19 to 19.50; *Coltness*, \$19.50; *Eglinton*, \$16.50 to \$17; *Dalmellington*, \$17.00 to \$17.50; *Caldar*, \$18 to 19; *Hematite*, \$20 to 22.50, depending on brand; *Siemens*, \$18.50 to \$19.00; *Bar Iron* still \$1.75 to \$1.80; *Canada Plates* \$2.85 to \$3.00 as to lot and brand; *Tin Plates* Bradley Charcoal, \$5.85 to 6.00; Charcoal I C \$4.75 to \$4.90 as to brand; do. I.X \$6.25 to 6.50; *Coke* I C., \$4.25 to \$4.40. *Galvanized Sheets*, No. 28, 6 to 7c. according to brand; *Tinned Sheets*, coke, Nos. 24 to 26, 6½ to 7c.; *Hoops and Bands* per 100 lbs., \$2.25 to \$2.80; *Sheets*, *Boiler Plate* per 100 lbs. Staffordshire, \$2.45 to \$2.55; *Steel Boiler Plate* \$3.25 to \$4.00; heads \$4.50; *Russian Sheet Iron*, 10½ to 11c. *Lead* per 100 lbs.:—Fig, \$3.75 to \$4.00; Sheet, \$3.75 to \$4.00; Shot, \$6 to \$6.50; best cast *Steel*, 11½ to 12½c., firm; Spring, \$8.50, firm; *Tyre*, \$3.25 to \$3.50, firm Sleigh Shoe, \$2.25 to \$2.50. *Round Machinery Steel*, 3½ to 4c. per lb. *Ingot Tin*, 23 to 24c. *Bar Tin*, 25c.; *Ingot Copper*, 16 to 16½c. *Sheet Zinc*, \$4.50 to \$5.00; *Spelter*, \$4.25 to \$5.50 *Bright Iron Wire*, Nos. 0 to 6, \$2.75 per 100 lbs.

PAINTS AND OILS.—A slight advance has taken place in leads at home, but not sufficiently marked as yet to effect local quotations. It is believed, however, that there will be a further advance, as the production has been curtailed of late owing to unremunerative prices. We still quote in the meantime: *White Lead* (genuine and first-class brands only) \$6.25 to 6.75; No. 1 \$5.50 to 6.00; No. 2, \$5 to 5.50; No. 3, \$4.50 to \$4.75. *Dry White Lead* 6 to 6½c.; *Red do.* 5 to 5½c. These prices for round lots. *London Washed Whiting* 55 to 60c.; *Paris White* \$1.25 to 1.50; *Cookson's Venetian Red* \$2.00 to 2.50; *Yellow Ochre*, \$1.50 to 1.75; *Paris Green*, 19 to 20c. In oils there is not much new to note. Linseed remains at about 54 to 55c. for raw; steam refined seal 65 to 67½c.; pale vat 62½ to 65c.; cod oil firm at 60 to 62½, also cod liver at about \$1.30; olive \$1.00 to \$1.05 for pure. Turpentine has advanced and quotes at 50 to 52½ cents.

PROVISIONS.—The market is quieter and prices rather easier, the intense heat being unfavorable to the movement of butter. We quote creamery 20 to 21½c.; townships 19 to 20c.; Western 14 to 17c. There is also a rather weaker market for cheese, with only light transactions; we quote 10c. for fancy, 8 to 9½ for medium. Eggs show a decline and are quoted at 17 to 18c. Pork is in more active demand at a slight advance, we quote Canadian mess \$21 to \$21.50; western do. \$20 to \$20.25; lard 10½ to 11½c.; hams 14 to 14½c.; bacon 13 to 13½c.

SALT.—We cannot add anything fresh to former reports. Elevens still sell at 40 to 42c.; twelves 85 to 87½c.; factory filled \$1.10 to \$1.20, d Eureka \$2.40.

WOOL.—There is a fair trade passing, considering the way things have been going of late, and some moderate lots have gone to hosiery manufacturers principally, but nothing larger than 5,000 lb. lots. A cargo of cape is expected here shortly. We quote: Australian, 19 to 26c.; Cape 16½ to 18c.; Canadian A supers 26 to 28c.; B ditto 22 to 24c.

TORONTO MARKETS.

Toronto, Aug. 21st 1884.

As the stock market continued on its upward progress into the early part of the week, the reaction later was not surprising. The remarkable rise which has taken place within the last two months would tend to show that the crops have been made responsible for a good deal. Below is a table giving the quotations of bank stocks on the 26th of June last as compared with the highest reached thus far in the "boom."

	26th June.	This week.
Montreal Bank....	176½	193
Ontario do.	108	111
Toronto do.	168	179
Merchants do.	102	114
Commerce do.	107	124
Imperial do.	124½	125½
Dominion do.	186	193
Standard do.	108½	114
Hamilton do.	116	118

The lowest point touched by Federal Bank was on the 16th of July when it sold as low as 32½. This stock has advanced 1½ per cent, for the week, closing at 50½ to 51. Ontario Bank also rose 2½ to 110½ bid, with sellers at 111, but the balance of the Bank stocks declined from ½ to 3 per cent. closing weak. For Brit. Am. Ass. stock 3 per cent. higher was offered—98—without any stock offering, but Western Assurance was lower, the last sale being 108. Canada North West Land Co. sold up to 51; but receded at the close to 48 bid. London and Canadian Loan bounded up from 138 to 142, but was offered at 140 later, without buyers.

DRUGS & CHEMICALS.—Quinine is still lower owing to the troubles of a Milan house as noted last week, quotations are now \$1.20 to \$1.30. We discontinue quotations of Paris green and hellebore the season being now over. General business is very quiet.

FLOUR AND MEAL.—The dulness in this branch of trade is if anything more pronounced than a week ago, and prices are consequently somewhat weaker. We have heard of no transactions. We quote: Superior extra, \$4.50 to \$4.60; extra, \$4.30 to \$4.40; spring wheat, extra \$4.20 \$4.25; oatmeal, \$4.25 to \$4.40; cornmeal, \$3.50; bran, per ton, \$12.00 to \$12.25.

GRAIN.—Wheat—Another extremely dull week has passed with transactions almost nil and prices tending downward. We quote: Fall wheat, No. 2, 85 to 90c.; fall wheat No. 3, 75 to 80c.; spring wheat, No. 2, 90 to 95c.; ditto No. 3, 80 to 85c.; oats 40 to 41c.; rye 60c.; corn 58 to 59c.; timothy seed per bush, \$1.80 to \$1.92; clover seed per bush, \$6.50 to \$6.75; flax screened 100 lbs. \$3.25 to \$3.50.

STOCKS IN STORE.

	Aug. 18, 1884.	Aug. 11, 1884.	Aug. 20, 1883.
Fall wheat, bush....	40,541	54,790	74,726
Spring wheat, bush..	56,066	67,381	40,515

The visible supply of grain, viz: stocks in store at chief points on Lake or Atlantic coast, on rail and on Mississippi, also afloat in N. Y. canals for tide-water, is as under:

	1884.	1883.	1882.
	Aug. 9.	Aug. 11.	Aug. 12.
Wheat, bu..	16,543,852	20,401,650	13,483,325
Corn, bu....	4,171,812	10,790,305	5,339,325
Oats, bu....	1,668,468	2,823,948	1,244,155
Barley, bu..	186,615	338,548	38,825
Rye, bu....	211,548	1,375,137	615,744

Total bu.. 22,776,293 35,730,668 20,721,673

GROCERIES.—The August dulness has not abated since our last report, great quietude seems to rule in all lines. We make no important changes in our list of quotations. Remittances are very fair for this period of the year. Our merchants generally are looking for a good fall trade.

HIDES AND SKINS.—Prices continue much the same as last reported. There is said to be a scarcity of hides, but no alteration in prices, which we repeat, is announced: Steers, 60 to 90 pounds, 8c.; cows, 7c.; cured and inspected, 8½ to 9½c.; calfskins, green, 11 to 13c.; cured, 13 to 15c.; sheepskins, 35 to 65c.; tallow, rough, 8½c., rendered, 6½ to 7c.

LEATHER.—Reports from wholesalers and from country dealers agree that matters are exceedingly dull at the present "tween seasons" time. Prices present no very important changes. No large lots are moving. The following will be found to represent current values: Spanish sole, No. 1, 29 to 30c.; ditto No. 2, 27 to 28c.; slaughter, heavy, 28 to 30c.; ditto light, 25 to 28c.; buffalo, 21 to 22c.; harness, heavy, 30 to 35c.; ditto light, 25 to 28c.; upper, No. 1 heavy 35 to 37c.; ditto light and medium, 37 to 40c.; kip skins, French, 35 to \$1.05; ditto English,

70 to 75c.; ditto domestic, 60 to 65c.; ditto veals, 70 to 75c.; hemlock calf, (25 to 30.) 60 to 70c.; 36 to 44 lbs, 75 to 90c.; French calf, \$1.10 to \$1.40; splits, large, per lb., 25 to 30c.; ditto small, 21 to 25c.; enamelled cow, per ft., 17 to 19c.; patent, 17 to 20c.; pebble grain, 14 to 16½c.; buff, 14 to 16½c.; russets, light, 40 to 50c.; gambier, 6½ to 7½c.; sumac, 5½ to 6½c.; degreas, 6½ to 7c.

LUMBER.—The market is very dull at present, no orders are being received from across the lakes, and there is almost no movement. The same dulness prevails in the States, and no activity is expected until October. We repeat our former quotations. Lath are firmer, price now \$2 10, no other changes in prices.

PETROLEUM.—An advance of one cent has taken place in Canadian oils since our last report. Quotations now stand as follows: Canadian, five to ten barrels 16c., Canadian single barrels 16½c. Carbon Safety 19½c., American Prime White 23½c., American Water White 27c.

PROVISIONS.—We have another very quiet week to chronicle. Choice qualities of butter are sought after at our quotations but inferior kinds are difficult to sell. Cheese continues firm; 11½c. was paid at Ingersoll for first half August make. Cable reports a decline of one shilling; the quotation now being 52 shillings. The demand for hog products still continues to be of a jobbing nature. Stocks of bacon here are considerably reduced and holders are firm in their views. Hams are about out of the market. The supply of eggs about equals the demand; quotations are unchanged. The failure of Messrs. Gibb & Gallow, a firm which has long been looked upon as being one of the wealthiest in its line, has created much surprise amongst the trade here. It is expected that the estate will pay 100 cents on the dollar.

WOOL.—We can report no especial features this week, prices continue unchanged and trade is on the quiet side. We repeat quotations: Fleeced, combed ordinary, 15½ to 19c.; ditto., Southdown, 20 to 23c.; Puled combed 17 to 18c.; ditto., Super, 20 to 21c.; Extra, 27 to 29c.

MERITED THANKS.

One of the most agreeable of the many important duties devolving on the officers of a well conducted Life Company, is the payment with all due promptness of death claims; for notwithstanding the utmost care and practised skill in the selection of none but the best lives, the science of life assurance teaches that even among these a certain percentage is sure to die early, and that, therefore, its mortuary department will be called upon to pay claims just as sure as the sun will, on the morrow, rise above and set beneath our horizon, and that it will repeat its morning visits and take its evening departures with unerring regularity until time shall be no more!

And, although the decease of a member of the family almost always brings sorrow into the household, the sadness of the bereaved ones cannot be otherwise than relieved when they reflect that, by the wise forethought of their late bread-winner, some provision has at least been made against their present and future wants, by a policy of assurance in some one or more of the many excellent and reliable life companies doing business in "this Canada of ours."

Mere words of thankfulness, however merited, towards the officers of the insuring company, while at all times commendable, are but hollow mockeries when compared with the heart's inmost gratitude towards the departed, who, in the fullness of his devotion to his wife and children, even amid the cares of business, did not forget to provide for their continued comfort, and to guard against their separation, if not poverty and degradation, while living, by a policy of life assurance!

Yet, though we can but imagine the heart's tender communings in such cases, it may be both interesting and instructive to learn from the following "cards of thanks" that the beneficent mission of the life assurance company is not forgotten, and that the grief which death naturally engenders, but, on the contrary, is often publicly, nay even gratefully, acknowledged:

William Hendry, Esq., Manager Ontario Mutual Life Assurance Co., Waterloo, Ont.

DEAR SIR,—We have to acknowledge the very prompt settlement of our claims for Assurance in your company, on the life of the late Dr. S.R. Rogers, having received per your general agent, Mr. J. G. Beam, cheques for the amount within four days from the completion of the claim papers. Yours truly,

THOMAS ROGERS,
JAS. McMULLEN.

Mt. Forest, Dec. 6, 1883.

William Hendry, Esq., Manager Ontario Mutual Life Assurance Co.

SIR,—The subscriber wishes to convey to the officers of the Ontario Mutual Life Assurance Co., of Waterloo, her unqualified thanks for the promptitude and readiness with which the claim against the above company, upon my late husband's life, was settled: upon the very day the claim papers were completed.

CATHARINE HOLLIDAY.

Reach, May 27th, 1884.

W. H. Riddell, Esq., Sec. Ontario Mutual Life Assurance Co.

DEAR SIR,—Your esteemed favour of yesterday, to settle Life Policies No. 8095 and 8096, came duly to hand. On behalf of the Widow and friends of the deceased, I beg to tender their most sincere thanks to the company for the prompt remittance on receipt of the necessary papers. Yours very truly,

M. C. BOBLEN.

Belleville, June 24th, 1884.

From the office of the Inspector of Prisons and Public Charities for Ontario.

TORONTO, July 11th, 1884.

SIR,—I beg to acknowledge the receipt of your letter of the 8th instant, covering a cheque for \$1000, being the amount claimed under policy No. 1795, on the life of the late Joseph Hang, whose widow, Magdalene Hang, is now an inmate of the Toronto Asylum, and under my guardianship. I have the honor to be, Sir, your obedient servant,

W. T. O'REILLY, Inspector.

W. H. Riddell, Esq., Secy. Ontario Mutual Life, Waterloo, Ont.

SQUARE AND PROMPT.

For a man's business, small or large, to run successfully, all must be prompt exact and clear. His work must be done, his debts paid and collected, his every promise met on time.

A Quaker merchant, Seth Henshaw of Greensboro, Indiana, was famous fifty years ago as the man who always paid his debts on time, and whose word was always true. He bought goods in Cincinnati, but seldom went there, sending his orders and always sending the cash the day it was due, or before. After some years' absence he went to the city himself; the news spread that the prompt paying and honest Quaker had come to town, the great men assembled, and an ovation was held in his honor—greatly to the good man's surprise. It was a day of slack payments and long delayed pledges, and he was a wonder and his credit far better than any other man.

An old merchant in an interior Michigan town, sold out years ago to a young man who had been his clerk, and who had but two thousand dollars of his own. The new merchant of course, wanted to go to New York to buy goods, as no commercial travellers went over the land in those days. He had never been East, was a stranger and needed letters of introduction. His former employer knew this and said to him: "I will write you a letter to a large firm where I think you will make most of your purchases, and if you need credit elsewhere, refer them to me, and you will have no trouble."

He went, delivered the letter, had a friendly reception and a long talk with one of the firm, who questioned him as to his means and wants and had honest answers to his questions. The young man was surprised at the ease with which they, and other firms, gave him all the credit he wanted, but he did not abuse their confidence, or risk his own solvency, by buying beyond a safe amount. Going home he was able to meet every payment when due. Visiting the city again he had like credit and met his dues readily.

So it went on for years his business growing but his word always good as at first. In the counting room of the firm to whom his letter of introduction was sent, and with whom he had dealt to their mutual profit and satisfaction, the leading member asked him one day, after they had settled their accounts: "Did you ever see that letter Mr. — sent us years ago, to introduce you to us?" He replied that he did not know its contents. Turning to his desk the letter was drawn out from an old file and handed to his customer, who read it while the old merchant smiled quietly. It was as follows, omitting the names:

Michigan 185—

"GENTLEMEN—This will introduce to you Mr. —, a young man for years in my employ as clerk, and to whom I have sold my goods and given up my business. You can rely wholly on any statements he may make."

"That" said the New Yorker, "is the best letter of introduction that ever came to us, and the fact that we, and others, have found it to be true, gives you to day a credit as good as that of any buyer who visits our city."

A good name is indeed above all price, and system and promptness, with sagacity and persistent courage and industry, are the only means by which it can be established and maintained.

That young man had adopted a plan which every one should follow. His affairs were always in such shape that he knew, not only what he owed and when it was due, but what his means were and what his profits or losses were. He was always on time, kept all his work and accounts up to the mark, never lagged behind, yet was never severe or exacting, but the soul of kindness to those in his employ or to unfortunate yet honest debtors.

Not only the merchant and the manufacturer, but the farmer who would be easy in mind and make his success as solid as the ground he treads on, should have method in his industry, know the profit and loss on every crop and every field, and pay his debts to the merchant as promptly as that merchant must pay his own debts to the bank.—*Detroit Commercial.*

—The good soda-water man is known by his fix, according to the Philadelphia Record.

—St. John (N. B.) imports for July of this year amounted to \$377,571 which is less by \$109,764 than those for the same month of 1893. Exports amounted to \$481,845 while for July of last year they were somewhat short of this figure \$432,261.

ACTINOLITE CEMENT ROOFING

PATENTED.

The Patent Actinolite Roofing Cement is the best Roofing Material ever offered to the Public.

There is now more of this Cement used in Canada than all other Roofing Cements combined.

Our Cement is suitable for Flat or Steep Roofs. Old Galvanized Iron and Tin Roofs coated with our Cement make them superior to new metal roofs at half the cost.

— ALL WORK GUARANTEED —

W. T. STEWART, Mgr. JOSEPH JAMES, Pres.
9½ Leader Lane.

NOTICE.

The Anchor Insurance Company

Hereby give notice that they have ceased to transact business in Canada, and that in pursuance of Section 18 of "The Consolidated Insurance Act of 1877," it will on the 31st day of October next apply to the Government for the release of its assets and securities, and all Canadian policyholders opposing such release are hereby required to file their opposition with the Minister of Finance at his office at Ottawa, on or before the said 31st day of October.

Dated at Toronto, this 15th day of July, 1894.

THE

UNION MUTUAL

LIFE INSURANCE COMPANY OF PORTLAND, MAINE.

INCORPORATED IN 1848.

JOHN E. DEWITT, President.
HENRY D. SMITH, Secretary. NICHOLAS DEGROOT, Asst.-Secretary.

Government Deposit at Ottawa, - - - - \$130,000 00
Assets, Dec. 31, 1882, - - - - \$6,979,379 77
Surplus over all Liabilities, (N. Y. Standard) - - \$700,311 99
Dividends to Policy-holders, to 31st Dec., 1882, \$4,068,886 15
Total Payments to Policy-holders, - - - - \$19,354,971 76

This is the only Company that issues Policies giving the benefits of the Maine non-forfeiture law, and specifying in definite terms by its Policy Contract, that there can be no forfeiture of the insurance by non-payment of premium after three annual premiums have been paid, until the value provided for is exhausted in extended insurance, and every policy issued, states in plain figures, the extended insurance and cash value as the case may be (after the third year), according to the number of full annual premiums paid. NOT MERELY ESTIMATES BUT ACTUALLY GUARANTEED and after being in force THREE FULL YEARS the policy BECOMES INCONTTESTABLE. Matured policies are payable at once without rebate of interest on receipt of satisfactory proofs of death, together with a valid discharge from proper parties in interest, the Company waving the usual delay of ninety days required by most Companies.

The guaranteed extensions and cash values do not include the Dividends which will accrue to the Policy.
Agents wanted in unrepresented districts.

PORT PERRY FIRE

CARD.

We, the undersigned, desire to express our sincere thanks to the "CITIZENS' INSURANCE COMPANY OF CANADA" for their promptness in sending their cheques in full settlement of our losses by the late fire. Claim papers only reaching Montreal on Monday and their cheques for the same being issued on Tuesday, shows us plainly that they fully appreciate our immediate requirements in this serious calamity by which we so recently suffered.
