Mercantile Summary. THE vote on the by-law in the town of Palmerston guaranteeing the debentures of the Farmers' Co-operative Pork

Agency Co., amounting to \$25,000, was carried by a large majority.

THE price of crude rubber has been advancing for a good while. Another advance of 5c. per lb. was declared last week. The finest Para rubber is now worth \$1.05 the pound in New York, which is the highest price reached for twenty years.

THE results of smelting operations by the Hall Mines, Limited, of British Columbia, are as thus given us: In the four weeks, ending March 6th last, 2,458 tons of ore were smelted, yielding matte coutaining, approximately, 54 fons copper and 36,890 ounces silver.

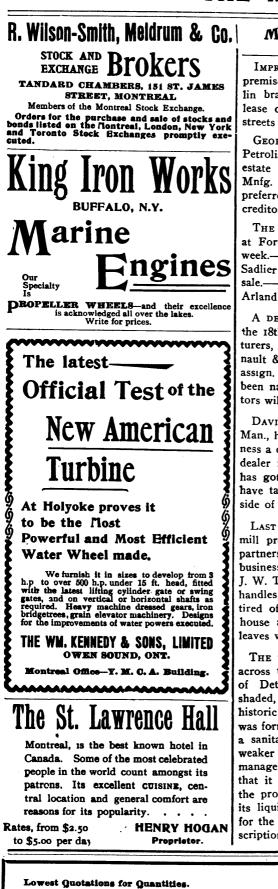

According to a Chicago despatch of last Saturday, as a consequence of the increase in the price of steel and the consolidation of large steel and iron industries, the plough manufacturers of the United States are forming a combination. A stock company, capitalized at \$60,000,000 under the laws of New Jersey, will shortly be incorporated.

THE Canada Paper Company held its annual general meeting in Montreal last week. The statement of the year's business and report for 1898, were submitted to the shareholders and found satisfactory. The following gentlemen were re-elected directors for the current year: Messrs. John MacFarlane, Andrew Allan, Hugh McLennan, H. Montague Allan, Hugh A. Allan, W. D. Gillean and Chas. R. Hosmer. The directors chose Mr. John Mac-Farlane, president; Mr. Andrew Allan, vice-president; Mr. W. D. Gillean, assistant managing director, and Mr. John C. Young, secretary-treasurer.

AFTER keeping a general store for several years in Harriston, T. G. Seli & Co. moved to St. Mary's in July, 1897. At that time they showed a surplus of \$8,000. They had a branch store in Gorrie for a short time, which proved to be a mistake. After a couple of writs had been issued against them they made an assignment. Last November John M. Hamlin purchased the general stock of Thos. Hawkins at Port Albert. Previous to this he had been in the baking business. Now he assigns. The sheriff has seized the tailoring stock of Currie & Co., Sarnia, amounting to nearly \$10,000, and it will be sold.

ANOTHER of the American commercial combines is the Shipbuilding Trust, said to have been completed at Trenton, New Jersey, on March 17th. It is said to have gathered together all the ship-building plants on the Great Lakes excepting the Union Dry Dock Company of Buffalo and, the Davidson Yard, at Bay City, Mich. The charter of the company, as drawn indicates that not only are the ships to be built, but metals are to be mined and materials made. The company begins business with \$3,000,000 of cash capital, which is equally divided between James B. Dill, of New York city; Frederick W. Kline, of Cleveland, O., and W. T. Coleman Carpenter, of Orange, N.J.

Mercantile Summary.

IMPROVEMENTS are to be made to the premises of the Bank of Hamilton's Berlin branch, both inside and out. The lease of the corner of King and Queen streets has just been renewed for ten years.

GEORGE WATSON'S creditors met at Petrolia last week, when the assets of the estate were taken over by the McClarv Mnfg. Co., of this city, who assumed the preferred claims and paid the other creditors 75c. on the dollar.

THE general stock of H. L. Morphy at Forest will be sold in London next week .---- On the 27th inst. the stock of Sadlier Bros. at Wiarton is advertised for sale.---Two days later the shoe stock of Arland & Co. will be sold.

A DEMAND of assignment was made on the 18th by Farley & Fourigny, manufacturers, of Victoriaville, on P. Boissonnault & Fils, traders of Quebec, who will assign. Mr. George Darveau, broker, has been named provisional guardian. Creditors will meet on the 27th instant.

DAVID RIDWAY, baker, etc., at Russell, Man., has assigned. He had been in business a dozen years.--Edward F. Gerster, dealer in cigars, etc., Vancouver, B.C., has got into trouble and the mortgagees have taken possession of the stock. Outside of them he will not owe much.

LAST November, Brown & Powell, sawmill proprietors at Fordwich, dissolved partnership, the latter continuing the business. He has already assigned .-J. W. Templeman, manufacturer of proom handles, etc., at Burk's Falls, has become tired of the place, although he owned a house and little factory, quits work and leaves what he has for creditors.

THE town of Sandwich, near Windsor. across the river from the American city of Detroit, is an old-fashioned, well shaded, pleasantly situated and somewhat historic place. Some time ago a company was formed to erect at this attractive point a sanitarium that would be beneficial to weaker mankind and profitable to its management. The company now finds that it is unable to proceed further with the project, and Mr. F. W. Macpherson, its liquidator, Windsor, invites proposals for the acquisition of the assets, or a subscription of stock.

"LION" PENS The Lion Series of Steel Pens have had a very extensive sale in Canada

for years and need no recommendation. Guaranteed to be of the finest quality, they have won an honest fame on their own merit. Neither the business office nor the desk of society is properly equipped without "Lion" Pens. SIF your stationer does not handle "Lion" Pens write to the selling agents-

Mercantile Summary.

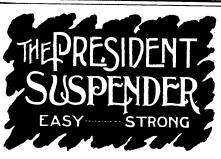

KENTVILLE, N.S., was full of commercial men last week, no less than twentyeight registered at the hotels, says the Chronicle.

THE Cape Breton Boot and Shoe Co. have accepted a bonus of \$5,000 offered them by the town of Pictou, and expect to shortly remove their plant thither.

THE coopers of the Petrolea barrel works in London, Ont., went out on strike on Saturday on the refusal of the company to grant a 5 per cent. increase. For some time past the men claim to have been working under difficulties.

THE Acadia Copper Mining Company, whose areas are on the Amos' Blenkhorn property at Nappan, are sinking two new shafts, one to the East and another to the West of the old one. Although down only a few feet, the indications are of a very pleasing nature, and the stockholders have good reason to be well pleased with this promising property.-Amherst, N.S. Gazette.

THE subject of reciprocal trade relations with Canada was discussed on the evening of the 15th inst., at the dinner of the Boston Boot and Shoe Club. Hon. John W. Chandler said that reciprocity in the broadest manner is necessary for the development of our seaboard cities. and none more than Boston. Canada, in particular, offers great attractions for such relations. We need her coal and lumber, and she our manufactures. Hon. Charles S. Hamlin urged reciprocal relations with all the countries possible. New England should not spare any effort to bring about such relations, with Canada in particular, a country which is one of our best customers. "Let us see to it," he said, "that we keep up the prestige of our port. It is the natural outlet of the great North-West and Canada, and with the proper facilities should rival New York."

YELLOW SUCARS Of all Grades and Standards.

SYRUPS Of all Grades in Barrels and Half Barrels

SOLE MAKERS Of high lass syrups, in tins, 2 lbs. and 8 lbs. each. It is reported from St. John, N.B., that the difficulties of the wholesale dry goods house of W. C. Pitfield & Co., have finally been arranged by a composition at 45 cents, 20 cents cash, and 25 cents secured. payable in 6 and 12 months.

CORBEIL & LEVEILLE, sash and door manufacturers, Montreal, have filed consent to assign. In 1897 they compromised liabilities of \$25,500 at 30 cents on the dollar.—J. E. Labrecque, a Montreal grocer, has also consented to assign. owing about \$2,000.—A similar course of action has been adopted by John Dewitt, jr., flour merchant.

By a majority of 749 in a total vote of 847 the property owners of Owen Sound have approved the by-law granting to the Messrs. Hay a ten-year loan of \$15,000 to assist in rebuilding and enlarging their chair factory, destroyed by fire on January 26th. Machinery is already in operation in the new rooms, and a large 70 horse-power engine has been received for the sawmill.

IN September, 1897, M. P. Fralick bought the shoe business of J. B. Waller at Niagara Falls South. In doing this he had the financial assistance of his father. After finding that he could not make any money he went into an assignee's hands. —-After nearly twenty years' tailoring in London Thos. Pethick finds himself in trouble, for he cannot meet his payments. He offers creditors 50 per cent. of their claims. If this is not accepted an assignment will be made. He carries a stock of nearly \$10,000 worth of goods, and his liabilities have not yet been ascertained.

THE failure is reported of J. C. A. Sioui, dry goods dealer, Quebec. He is a native of the Indian village of Ancienne Lorette, and started storekeeping about a year ago, calculating on doing business with a country connection. He was unfortunate in being burned out last month.

A GENERAL merchant of Magog, Que., A. G. Dolloff, became infected with the Klondyke fever last spring, and left his business in the care of his wife, while he went off to tempt fortune. He returned home last fall, and his affairs had evidently not prospered during his absence. Now a demand of assignment has been made upon him by the Eastern Townships Bank.

As the result of several recent suits H. Roberge, postmaster and general dealer at St. Evariste de Forsythe, Que., has assigned. He has not been thought a closely attentive business man, and was apparently more or less dependent upon assistance from his father .--V. Ulric Fiset, of Ancienne Lorette, Que., reported lately as insolvent, is offering his creditors 30 cents.---C. A. Oullette began a small general business at Cap St. Ignace, Que., in 1895, and has never shown signs of much prosperity. A recent suit by a Quebec creditor seems to have hastened his assignment.---Another short-timer is G. E. Harvey, who started a grocery business at Pointe au Pic, Que., last spring, and who has now assigned.----George Lavoie, St. Octave de Metis, Que., who failed several weeks ago, is offering 30 cents.

TORONTO STOCK TRANS-ACTIONS.

The stringency in the money market still continues, with the result that business on the Toronto Stock Exchange continues dull with further declines in the prices of most stocks.

W. S. BIGLOW of Wales, Ont., for some years a clerk with a leading firm there, began a grocery business on his own account less than a year ago, but has already come into the hands of the assignee. -Weber & Son, in the stationery line at Cornwall, Ont., have assigned.------R W. Begley, of Smith's Falls, Ont., long in the tinsmithing business, is in business difficulties, and is trying to effect a compromise at 20 cents, cash. Liabilities are \$4,550, with assets estimated at \$2,970.

UPON the petition of Abner Kingman. a winding up order has been applied for in the matter of the Laprairie Pressed Brick Co.,. whose headquarters are in Montreal. The company was chartered six years with an authorized capital of \$150,000, of which it is said \$140,000 was subscribed and paid up. The company experienced drawbacks the first few years, but were supposed to have been doing fairly latterly. The board included several leading contractors, Messrs. Peter Lyall and Joseph Brunet among the number, and other prominent business men were interested.

A PROFITABLE INVESTMENT

A FIGUIIABLE INVESTMENT for the purchase of new site and the erection of new factory to extend manufacturing business now in To-investors address, over real signatures. Box 59, care of The Monetary Times, Toronto.

The Council of the town of Cobourg are prepared to receive tenders for the purchase of debentures of the town authorized to be issued by the by the act of 1898, Ontario, Chapter 39, amounting in the whole to the sum of \$144,000, bearing in the whole to the sum of \$144,000, bearing interest at the rate of 4 per cent per innum, payable half yearly, and maturing in from 15 to 35 years.

Sealed tenders marked "Tenders for Debentures," Mayor of Cobourg, will be received until 8 p.m. of Monday the 1st of May next.

For further information, address Alex-

The Council do not bind themselves to accept the highest or any tender.

HERBERT BOGGS,

Chairman of Finance Committee.

Cobourg, 22nd March, 1899.

SEALED PROPOSALS

<section-header><text><text><text><text><text><text>

F. H. MACPHERSON,

Liquidator, Windsor, Ont.

THE vote at Midland, Ont., to grant a bonus of \$50,000 to the Canada Furnace Company, of Montreal, for the establishment of charcoal pig iron smelting works, was carried by 258 for and 16 against.

An American company have secured an option on a large tract of land on the New York and Ottawa Railway, near Newington, where there are valuable peat bogs. They will turn the product into peat, and place it on the market.

THE Crow's Nest Coal Company has secured the contract to supply the British fleet at Esquimalt with coal for the present year. The amount of consumption is not less than 300 tons per month, and some of the vessels when leaving the station carry away with them more than that for one trip.

THE Record of last Friday speaks in quite a blue strain (for a St. John paper), as to the condition of outward bound Atlantic freights thus far this winter season. It is stated that the Head Line has despatched its last boat this season from that port. "Even the fast mail steamers have not been able to get full cargoes of package freight and grain, and have been forced to load in part with lumber. These statements concern the people more at the present moment because of the movement on foot to increase the wharf accommodation on the west side." Why do this, The Record asks, if there is not business enough for the accommodation there already is ?

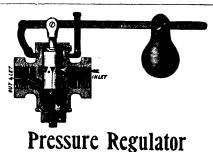

FURTHER trouble is reported among the smaller boot and shoe manufacturers at Quebec. The suspension is announced of Bouchard Fils & Co., who began business in 1897, and who through failures of western jobbers last year, had to compromise at 40 cents. They have apparently not done any better since. The senior of the firm had previously been for many years a fairly successful pork butcher -P. Boissonault & Fils, have assigned; the senior retired from the firm of Bouchard, Vermette & Lachance, with some small capital. Like the above named firm they also made losses last year by Toronto jobbers, and then compromised liabilities of about \$18,000 at 40 cents.

KENNETH R. MCKENZIE, who has done a general store business of fair proportions for the past twenty years at North Sydney, N.S., and who has heretofore paid his way in full, though frequently reported slow, now communicates with his creditors, through his lawyer, and makes a proposition to pay 25 per cent. of his indebtedness. Failing an arrangement on this basis, it is intimated an assignment will be necessary .---- A. R. Murray, in the grocery business at Pictou, N.S., since 1892, has assigned.-The estate of Ida B. Woodbury, general store, Kingston, N.S., is in an embarrassed shape, and propositions of a compromise have been made to creditors. Mrs. Woodbury, who had been in business for some time prior to her marriage in 1886, died last year, and previous to her death had secured her principal creditor, in St. John, N. B., by bill of sale for \$5,500. General liabilities are placed at similar figures.

Debentures.

Municipal Debentures bought and sold, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

GEO. A. STIMSON & CO., 24-2c King St. West Toronto, Ont.

Where it is desired to have a uniform, low steam or water pressure on a machine or heating system regardless of what higher pressure may be on the boiler, use a Pressure Regulator.

No other system can approach it in Effi-ciency for excluding the wind, rain, snow and dust. It fully meets every requirement of an Ideal Entrance Door.

Also manufacturers of the Celebrated Arctic Refrigerator.

TORONTO, FRIDAY, MARCH 24, 1899.

THE SITUATION.

Governor Brady, of Alaska, went to Washington, some time ago, to complain of what he calls Canadian encroachments on the Alaska frontier and to ask that American troops be sent to take possession of lines "and maintain our [American] sovereignty over the soil which we claim." He also talks loosely about "what we have always regarded as the boundary." Half the misunderstandings about boundaries, which survive their settlement and become historical, as most of these questions between Canada and the United States, have originated in popular suppositions of what is the due of one or the other country, with very little reference to the actual facts on which their determination ultimately depended. In these complicated questions, popular suppositions are not only of no value; their only effect is to retard settlement for a while, and afterwards to leave behind bad feeling for which there never Was any real foundation. Is Mr. Brady the same Governor who, some two years ago, took the ground that Alaskans wanted to retain all the land they had considered theirs? The sending of soldiers to enforce disputed claims would not settle the difficulty, but would be almost certain to increase it. According to Secretary Hay, writing Feby. 28, " there are two localities in which a boundary has been provisionally established" pending the final settlement of the whole boundary question ; one " on the Stikine River " and the other "at the passes north of Dyea and Skaguay." He also lays it down, very properly, that "until the two Governments shall reach an accord as to the definitive boundary, it would appear that the point provisionally located on the Stikine River should be respected by both Governments as a modus vivendi, without prejudice of the final fixing of the line." Mr. Hay reduces the question to the consideration, whether the understanding of January and February, 1898, has been disregarded by the British agents in the Stikine Valley; and unless this appears there is no ground for addressing complaints or enquiries, on the subject, to the Government of Canada. Governor Brady might take note of the saying of Talleyrand, surtout pas [trop] de zele in a cause which he bases on the vaguest suppositions. Since his return from Washington, governor Brady has been saying things which he had better left

A prominent banker recently expressed the opinion that railway bonuses instead of having come to an end are likely to be continued. There may be sections of country in which it is desirable that railway facilities should be obtained, and private capital will not undertake the enterprise. What Canada wants is more Booths to undertake to build railways on the simple merits of the undertakings. But when Booths are not forthcoming we must do the best we can without them. There may be cases in which provincial, municipal or Dominion aid to railways, in some form, may be desirable. But the present practice of making gifts of public money to private persons has surely about reached its term. The Ontario Government has given a bonus of \$8,000 a mile to the Ontario and Rainy River Railway, and the promoters are asking for \$1,000 a mile more; they are also knocking at the Treasury door of the Dominion with a demand for \$6,000 a mile. With \$10,000 a mile a great deal can be done. If it be too late for Ontario to pursue a new policy in connection with aid to this railway, the Dominion, unless it be committed to the promoters on the old lines, has an opportunity to insist that any aid it may lend shall be put into some shape that will not sacrifice the public money to private interests. At Washington they do these things better ; and though what Washington does, we with our smaller traffic may not always be able to do, we may at least make the scandal of strict railway bonuses a thing of the past; not necessarily by withholding all public aid, but by putting the money advanced on a footing which will enable the public contributors to stand on something like the same level as the promoters of private capital.

One day's cables, this week, brought accounts of experiments on balloon steering and wireless telegraphy. The balloon has clock-work and a sail for motive power, and a steering apparatus for guidance. The initial experiment took place in England, near London, and if complete success was not attained, the inventor explained that gusty winds created an exceptional condition. Wireless telegraphic experiments are not new, and though wonderful things have been promised in their name, we are probably a long way from the time when a man, standing in the city of Halifax, N.S., could destroy a fleet on the other side of the Atlantic. The actual step made is far short of this, but it is something that a wireless telegraph placed on board a stranded ship on Goodwin Sands, was able to telegraph to the foreland. The intelligence thus transmitted made it possible for the stranded vessel to get the assistance of tugs and lifeboats which would otherwise have been unavailable.

A very curious thing is reported to have happened in connection with the license fees on brewers. The plan of the Ontario Government, introduced by Treasurer Harcourt, had a varying scale running from \$250 to \$1,500. Some brewers, on whom the higher amounts would fall, thought their lesser rivals were to get off too cheaply, and asked the Government to raise the minimum from \$250 to \$500. The Government was convinced by this argument, while it remained not the less convinced of the equity of its own ascending scale. The amended bill, therefore, while granting the request of the executive of the Brewers' Association to raise the minimum to \$500, made the whole gamut in harmony with this amendment, and the result was that some who only desired to have the pleasure of seeing their rivals struck harder, found themselves surtaxed to double the amount of the increase which they desired to see put on the smaller fry. It is quite true that some, perhaps most, of the larger brewers

pay higher municipal taxes, relatively than the smaller, but this is the result of the location, and must therefore be considered a matter of option. It is a matter in which the taxing power has no choice, and which it cannot well undertake to rectify by discrimination.

Charges of corruption of members of the British House of Commons, in connection with the question of the flash test of illuminating oil, in which the American Standard Oil Company is busy, are freely bandied about in England. Similar accusations have scarcely been heard within the memory of living men. If they assume a sufficiently serious shape to cause a regular enquiry to be made, the belief is that there will be as many expulsions as there may be members proved guilty. If these charges prove true we must adopt a new standard of judging the virtue of public men; the strength of the temptation may count for more than has hitherto been accorded to it ; in that case, American corruption will be accounted for in a way that has not hitherto been in general use. Legislators at Washington, if exceptionally corrupt, may become so from the strength of the temptations to which they are subjected. If the same corrupting influences that hover about the lobbies there can make themselves felt in the British Parliament, we must be content to conclude that, given the same corrupt political atmosphere, members of the British Parliament do not, as a whole, escape the contagion. Into different degrees of corruption it would be impossible to go, in the absence of the whole of the facts on which it would be possible to make a comparison. It will be cause for profound regret if any of the charges now made should prove to be true. Exceptional crime may occur anywhere; the mode in which the criminals are dealt with marks the decadence or hopeful condition of a people.

At the annual dinner of the Henry George Club, Toronto, one of the orators objected to other taxes than those on land, saying they stood in the way of the progress of manufactures. What would become of many of our manufactures if all taxes were raised from land and none were gathered through the custom house?

THE LATE NEGOTIATIONS OF THE TARIFF.

Sir Wilfrid Laurier began his reference to the recent negotiations with the United States by doing justice to a colleague who is now no more, Lord Herschell. He referred to the statement made last autumn, and he might have added, several times since repeated, "that Lord Herschell was trying to settle some of the questions at issue by a sacrifice of Canadian interests. There never," he said with the emphasis which the subject demanded, "was a more false statement made in the press." Speaking from personal knowledge, he said, "Lord Herschell thought of Canada not only with enthusiasm but conviction and devotion." We have, from the first, steadly refused to believe in the fiction; it is the child of older fictions, arising out of border settlements in the past; fictions which are still ignorantly believed and which are so ingrained that there is little reason to hope for their complete eradication.

arten de services de la contraction de la contra

> On tariff policy, Sir Charles Tupper, leader of the Opposition, let it be known, in his speech on the address, what are the conditions on which the Government can have the support of the party of which he is the chief spokesman. These conditions are that they must cling to the National Policy as their life-buoy, and accord to every interest "legitimate protection." If they do this, he

promised them, "they would have all the support the Opposition could give them." The announcement was ratified by Opposition cheers. Substantially, and with one notable exception, Sir Charles appears to be satisfied with the adoption by the ruling party of the policy of Protection; that exception relates to the way in which he claims that the so-called Preference has worked out. "At the end of the first year " [of Preference], he says, "there were only \$500,000 less imports into Canada, but \$20,000,-000 more imports into Canada from the United States." Speaking of the Premier he added, "he lowered the duties on iron, he lowered the duties on wheat and on flour, he made corn free, and he increased the products sent from the United States to Canada by over \$20,000,000 per annum." Part of this result the speaker attributed to the new free list. In this list he counted a much larger number of articles that favored the United States than those in which the British trade is interested. The new free list he said is 72¹/₂ per cent. of the whole free list, old and new, and under the new articles only 17¹/₂ per cent. of the free list is favorable to British trade. This is Sir Charles Tupper's way of showing that Preference works untoward results.

No speaker or writer on the tariff, so far as our observation goes, has pointed out there are within its folds two Preferences, one direct, avowed, the creation of design; the other unavowed, unintended, but not less direct, and far more effective. The second Preference is in the free list. The avowed and intended Preference is a difference of 25 per cent. in the duties, in favor of Great Britain; the unavowed, unintended, incidental Preference is freedom from taxes. This freedom is not in terms exceptional; nominally it applies to all, but in operation it favors the country which happens to supply the largest number of the free articles. That country is the United States. It so happens, not by intention, but as a fact. This free list quite overbalances the other and only designed Preference, with the result that a tariff which was intended to favor England really favors the United States.

Sir Charles Tupper is somewhat severe in his criti-He cism of the negotiations on the Alaska boundary. assumes that the Americans did not want to settle the It seems to us rather that they wanted to proquestion. vide by a condition precedent and the constitution of the Board of Arbitrators that they must win. The condition precedent was that, even if the award went against their claim, they were not to surrender any territory which they had erroneously supposed to be theirs. This, no doubt And then an means: "Heads I win, tails you lose." arbitration in which there was no casting vote would not promise much. Whatever value Sir Charles' criticism may have is in showing that the Opposition, in our Parliament, sustains, on these points, the British negotiatiors. Sir Charles thinks that the object of the adjournment was to afford opportunity of the British and American Governments, by direct diplomacy, to settle this frontier question before the Commission meets again. And the premier admitted that this was the case. We only hope this may happen; for of all questions between the two countries this is the most important. In that way, as well as before the Commission, the view of Canada could be presented and pressed. Sir Charles thinks that when the American negotiators assumed the attitude mentioned, the British commissioners ought to have broken off negotiations. So long as there is any hope of success, from a re-assembling of the Commission, the policy of trying again presents itself to us as the true one.

One statement made by Sir Wilfrid Laurier, we must confess, we read with some surprise. He is reported as saying, in so many words, "the feeling of Canada to-day is not in favor of reciprocity," with the United States. The morning journals agree in reporting these exact words; and one of them tells us, in a parenthesis, that the statement elicited loud Conservative cheers. These cheers are not qualified as ironical; the principal spokesman of the Government here says nothing of cheers. The statement cannot be called exactly a slip, but it is evident from what went before, that it is somewhat confused with a kind of reciprocity qualified as unrestricted. The simple truth is that Canada was never in favor of this extensive kind of reciprocity. But that she is in favor of limited reciprocity, in selected articles, such reciprocity as the International Commission has been trying to set up, is too certain to admit of doubt. Of course there are here, as in all communities, individuals, who having personal interests to serve, place them above the public weal. These persons are undoubtedly opposed to reciprocity for personal reasons. Some of them have their minds so distorted by greed that they would risk every extremity of international misunderstanding, if they found personal profit in national disaster. These are the people who invented the silly falsehood that Lord Herschell was disposed to sacrifice Canadian interests.

By implication, by blaming in an antagonist what he construed as the advocacy of retaliation on the items of pine logs, spruce logs and nickel, Sir Wilfrid condemned that policy. Perhaps he took this way of saying to lumbermen and others that they must not expect the Government to take this line, and that they would only lose their time in advocating it. Certainly he could not hold himself at liberty to do what he blamed in another, that other protesting that he had not done the thing charged against him. Like a skilful fencing master, Sir Wilfrid guarded against saying what he would or would not do in these particulars. The only thing clear is that he could not act upon a policy which he rather went out of his way to stigmatize as objectionable.

Mr Foster undertook to give the percentage of duties under different tariffs:

"In 1898 the percentage of duties upon imports for home consumption was 30.28, in 1894 it was 30.87, in 1895 it was 30.87 per cent., and in 1896 it was 30.70 per cent. Now, in 1897, the first year of the present Administration, but before their tariff had come into operation, it was 30.04 per cent. That was to say, in 1897 there was an alleviation in the duties upon imports for home consumption of exactly 8.100 of 1 per cent. The year 1898 came and the percentage was 29.48. Seven months of the present year 1899 had passed, and in those seven months the percentage had been 28.89 per cent. What were the gains? The year 1897 showed a gain over 1896 of 5.100 of 1 per cent., 1898 showed a gain over 1896 of 57.100 of 1 per cent., and the seven months of 1899 showed a gain over 1896 of 1.18 per cent."

These comparisions are important, if they be strictly accurate; if defective, they will of course be challenged. Speaking of the tariff, as a whole, Mr. Foster, himself the Prince of Protectionists, said "there was scarcely one item which was not modelled on the basis of the principle of Protection." The dealing with the specific duties was slightly in the other direction; the number of articles on which specific duties are found in the present tariff is 147, having previously been 175. Though the incidence of specific duties is inequitable, falling with greatest weight on the consumers of cheap goods, who can buy no better, all Governments are compelled to resort to them, in a greater or less degree, on account of the certainty of collection which they give.

IRON AND STEEL SHIPBUILDING IN CANADA.

Nova Scotia and New Brunswick were, in the palmy days of wooden shipbuilding, among the most successful of ship-owning communities. They carried the flag to all parts of the world, and made money by their ships. A change in conditions came, wooden shipbuilding decayed when the iron ship appeared, and Yarmouth, Pictou and Quebec declined, shipbuilders on the Clyde, the Tyne, and other British rivers provided iron ships and steamers, then steel ships and steamers, until wooden vessels were comparatively out of the race. What may be called intermediate steps were taken : composite ships were built at Maritime Province yards-having ribs and timbers of oak with beams and braces of metal; good ships, handsome ships, but there was no denying the superiority of the ships all of iron or steel for the world's wants. They did not rot, they were less likely to burn, they were relatively more buoyant and carried more cargo, and so for twenty years or thereabout, the wooden shipping of the St. Lawrence and the Bay of Fundy and the Northumberland Strait has been steadily passing away.

But is there adequate reason why, when the old country builds iron and steel ships by the thousand to supersede ours, that we should not also build iron and steel ships and steamers for our own and the world's use? Anyone who asks this question-and we hope and believe that many Canadians have asked it-will be helped to an answer if he will send to Bedford Chambers, Halifax, for a copy of the Industrial Advocate for March, in which is a striking article on "Provincial Shipbuilding and Ship Owning," by J. M. Carmichael of New Glasgow. This gentleman starts with the postulate that " A large part of the skill necessary to the construction of a steel ship, be she barge, tug, cargo steamer or ocean liner, is of the same class (of skill) as was required for a wooden ship." Not to go into the details of his meaning, we simply note his assertion that "for some important parts of the work, the actual workman who acquired an education in the old shipyards will be found eminently useful in the new yards." And we can quite well understand that not only in designing, in specifying frames and floors, deck beams and spars, but in the hundred other particulars of fitting, in which the building of an iron or steel ship does not differ greatly from that of a wooden ship, the experienced ship-builder or fitter from Pictou, Halifax, Windsor, Maitland, Chatham, St. John or a score of other ports is available by the hundred to-day.

Is it pretended that he is not of use in an iron ship yard, that his skill is out of place in the construction of steel vessels? Let us hear what Mr. Carmichael, himself a shipbuilder, has to say upon the point. Says this gentleman, in explaining that modern competition requires that a ship shall be just strong enough, and not too strong, because the ship that is too strong is too heavy, and therefore out of the race:

It is perfectly true that in the construction of a large modera steamer we would be helpless without the aid of the draughtsman with his calculations and his formula, but after all, the main thing required of the master builder, even in this day of advanced scientific knowledge, is that he shall know all about a ship. When it comes to the moulding of the frames and shaping the plates, his knowledge will stand him in quite as good stead with iron as with wood, although the actual work must be done by iron workers. The next step is the erection of the structure, and here the foreman with his squad of ship carpenters will find the skill acquired in the construction of the old wooden walls just the thing needed to erect the steel ship, "well and truly." The same men who from long experience could tell at a glance whether the timbers were fair and straight and whether the plank they held in their hands would fit, can do the same thing when they have angles and plates to deal with. The ship is the same and their work is but slightly different. As a matter of fact almost every plate is sheared to shape in the steel works and the chief technical part of the iron work is bending them and the frames to the form of the ship. The punching of the rivet holes and the riveting of the whole structure together, while certainly important, is the most mechanical part of the work.

While not undervaluing the part played by the ironworker, he contends that there is a large place for the skill of the man who is simply a shipwright. "After the shell is built there come a multitude of details in no wise different from what is required in a wooden ship."

Can we build efficient ships of steel, that is, ships which will compete with those built elsewhere? Can our designers model ships to combine speed with the maximum carrying capacity? Are our shipwrights skilful enough to so construct them that the design of the architect will be carried out without defects? Are our ironworkers careful enough to put the structure together in a workman-like manner? Have we enterprise and observation to appreciate and adopt the improvements made by others and to originate new designs of our own? In short, have we the genius of shipbuilders?—Such are the questions Mr. Carmichael puts, for, as he truly says, it is no light thing to build a great modern ship.

For answer he cites considerations such as these: Nova Scotians did not fail as shipbuilders in the era of woodships, but were among the best in the world. Labor is the most important factor in shipbuilding, and "our main reliance must be on the intelligence, sobriety, versatility and maritime instincts of our men." The fact that ship plates are not made in Canada is declared to be "no more an obstacle to the construction of ships than it is an obstacle to sugar refining that we do not grow raw sugar." It is idle, he declares, to ask whether we can build steel ships we have built them. As to whether we can compete in the matter of cost of producing them, this of course is the crux of the whole discussion. But we must devote another article to this very interesting paper.

CANADIAN AND AMERICAN DAIRY EXPORTS.

Under the above caption the progress of the cheese and butter trades done by the Republic and the Dominion during the past several years is reviewed by the New York Journal of Commerce. Reference is made to the increase of the Canadian export butter trade from 1871 to 1881 and the subsequent phenomenal decline which was arrested only at the commencement of the present decade. It is stated-that:

"The butter exports from the United States in 1877 were over 21,000,000 pounds, and in 1898 four million pounds more. But in the meanwhile the cheese export had fallen off a little less than one-half—from 107,364,666 pounds to 58,167,280 pounds. In 1877 we exported three times as much cheese as Canada did, and in 1898—the Canadian figures are for the calendar and ours for the fiscal year—Canada exported nearly four times as much as we did."

It is pointed out by the N.Y. Journal that one reason for the increase of the Canadian export is the pains taken to maintain the standard of quality. But, it adds, "that cannot be the entire explanation, for the Canadian cheese export has been constantly growing and the anti-filledcheese legislation, which is said to have been absolutely effective, is only six years old. Yet it is certainly a striking fact, and one that ought to interest the American farmers who have been complaining of low prices of wheat and corn, that the exports of Canadian cheese have increased nearly six-fold in the twenty-one years in which our own cheese exports have fallen off a half.

"The explanation of our small increase in butter exports and of the decline of Canadian butter exports until 1890 is probably to be found in the increasing use in England of Danish butter. . . . In the calendar year 1896 Great Britain imported 840,000,000 pounds of butter, of which 40 per cent. came from Denmark, 15 per cent. from France, over 10 per cent. from Sweden, over 7 per cent. from Holland, about 5 per cent. each from Victoria and Russia, over 4 per cent. from the United States, under 4 per cent. from Germany and under 8 per cent. from Canada. If the values are fairly stated in the official figures of imports our butter was better than the Canadian, though surpassed by the Victorian as well as the Danish. According to these import statistics the Danish butter was worth 22.2 cents, the Victorian 21.6, the American 18.8 and the Canadian only 16.7 cents a pound."

BANKING RETURN.

We give below a condensation of the figures of the statement of Canadian banks for the month of February, 1899. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, etc.:-

VILLAGE FIRES AT NIGHT.

It is our neighbor's house which is in danger of taking fire. It is the next village that ought to take measures against conflagration. But it is never our house, nor our town that is in any immediate danger from the fire-fiend. And so we have much more time to sympathize with our neighbor who loses dwelling and furniture, much more time to criticize the village ten miles away than to put our own house in order or to look after the fire appliances of our own town. It is hard to exaggerate and equally hard to understand the easy-going negligence of communities as to the dangers of fire. Mr. C. E. L. Jarvis, fire adjuster in the Maritime Provinces, has put his report upon the Digby fire in the form of a pamphlet, and added to it a homily on the need of municipalities being prepared for fire. He Perceives that this lack of preparation is the weak point in villages and small towns. We quote from his interesting Paper :---

" In a village without appliances, at the first alarm of fire all the men available run with their buckets and axes, and wonderful good work is often done with such primitive weapons. This village progresses, and a small steam fire engine is procured; a fire breaks out, and the engine is hauled, with difficulty, by hand. The engineer, or Possibly from reasons of sickness or absence, some substitute gets up steam, and the pump is started; but some valve does not work, or posaibly the suction hose has not entered the water in the tank, but has alid to one side on the ice, and no water is drawn; then the tubes become red hot, and the fires have to be drawn. In the meantime the fire is rapidly gaining headway, and the villagers, instead of valiantly using their buckets and axes as formerly, are standing around to see their pride, the machine, work. This village has, in the course of time, become a town with a mayor and councillors; waterworks are introduced; trials are made; high church steeples are wet down; all fear of fire vanishes from the minds of the townsmen ; insurances are discontinued, or reduced, as insurance premiums are considered to be very excessive when sufficient water is available to "drown out any fire;" but at a late hour, on some windy night, like in the instances of Windsor and Digby, a fire breaks out and some unusual circumstance prevents, at its early stage, the full use of the water, and before everything is ready to fight fire with, it has spread beyond the control of a small fire brigade with limited quantities of hose, etc., and a confla-Station ensues. This is not an argument to adhere to the original bucket brigade, but a note of warning to give more attention in having all fire-fighting appliances, no matter what they may consist of, in constant readiness, day or night, to attack a fire at its commencement, and to impress on fire departments the value of each minute in getting to work."

FINANCIAL MATTERS.

Somewhat stately figures, those of the monthly balance sheet issued by the London City and Midland Bank, Ltd. They show that on February 28th, the current, deposit, and other accounts were £31,883,524; the cash in hand and at the Bank of England, £4,126,109; money at call and short notice, £5,296,902; investments, £6,123,952; bills of exchange, £3,722,553; advances on current accounts, loans on security, and other accounts, £16,418,683.

Mr. Andrew J. Wilson, the London writer who loves to slander Canada, is on the rampage just now it seems. But it is something English which has disturbed his spleen. The Lendon Review says of him: The gifted editor of The Investors' Review, not content with slating the whole of the United States, and wrathfully protesting against the American insurance companies, and against a good many of the British offices, has now turned his attention to the Rothschilds in what he calls "The Copper Trust," and other iniquities. He is now in the position of the gentleman who went out into the woods to hunt a deer and found a lion instead. But Mr. Wilson has saved his skin so far, wherein he is lucky.

According to London advices the Cape loan of some three million pounds has been taken at prices some £5 per cent. less than a year ago. Tenders for the issue of £3,107,400 Cape of Good Hope consolidated 3 per cent. 40-year stock, opened at the London and Westminster Bank, Ltd., on March 18th.

amounted to £5,147,200. Prices varied from the minimum of £97 to £99. Tenders at £97 will receive about 4 per cent. of the amount applied for, and those above that price in full. The average price obtained, the cable states, was £97 28. 3d. The price was rather better than was anticipated, as market conditions have changed since January, 1898, when £102 188. 9d. was obtained for a like issue.

With a view to eliciting opinions upon the earning power of investments in the near future, one of the great American insurance companies, the Equitable Life, sent out in January a circular letter to sixty or seventy leading bankers, railway and financial men asking each "what rate of interest you consider it safe for a life insurance company to count upon realizing on its total assets, invested in such securities and mortgages as an institution of this kind should hold, during the next twenty years." The replies have been published in the shape of a neat pamphlet. The variation in opinion on the point is considerable. Some half dozen gentlemen, among them Edward Atkinson and J. H. Eckels, speak of 21/2 to 3 per cent., the former rate in certain contingencies. The majority of the replies mention 3 per cent. or over, and indeed 3 per cent. may be called the average rate which forty prominent business men of the United States think likely to be realized beyond doubt. The Secretary of the Treasury and his New York assistant, Mr. Jordan, mention this figure; so do Drexel & Co., Vermilye & Co., August Belmont, Cornelius N. Bliss, John S. Kennedy and Chauncey M. Depew, who constitute a fairly representative group of American financiers. Another dozen persons or firms, among them H. W. Cannon, J. Edward Simmons, Louis Fitzgerald, of the Mercantile Trust Co., mention "3 to 31/2." But there are at least twenty replies to the circular which name 3¹/₂ per cent., 334 per cent. and even 4, as likely to be realized. The figure last named is mentioned as a maximum earning by Thomas L. James, president of the Lincoln Bank; John Carr, of Boston, thinks 4 will be realized; Marshall Field, of Chicago, concludes that "not less than 3¹/₂" can be counted on and Henry Clewes is of the opinion that the Equitable may safely ccunt on an average return of 3¹/₂ per cent.

BRANDON AND NEW WESTMINSTER.

An esteemed correspondent in British Columbia who had observed our criticisms as to the wayward procedure of Brandon in trying to squirm out of financial obligations, asks if we have nothing to say as to the very different attitude of New Westminster when overtaken by a disastrous conflagration. We reply that we had something to say thereon as long ago as 24th February, when we noted the proposition of the city, page 1120. It asked for time to pay full interest on its debt of \$953,000, none of which falls due until 1939, and it took the set.sible plan of setting before bondholders the true state of the case and requesting permission to postpone certain payments. This honest and business-like process commanded instant approval, and the legislation required to give it effect, the concurrence of bondholders being secured, was soon obtained. It is not necessary for us to point the moral of this for Brandon, the moral lies on the surface. New Westminster, temporarily crippled by disaster, approaches creditors properly and asks time to pay in full; Brandon, prosperous and waxing fat, says to creditors, "Here, we are paying you too much interest; you come down in your rate or else-we shall see what you will get."

THE LUMBER TRADE OF WINNIPEG.

An advance in price of sawn lumber, and a material present improvement in the conditions under which business in that commodity is being done this year in that city, moves the Winnipeg Commercial to a retrospect of the local lumber trade. It has been "in bad shape" for a year, it appears; thanks to the actions of persons calling themselves merchants but whose main idea in building up a business or retaining it was to cut prices.

"A year ago a new list for the season was prepared, but this list was never closely followed, and heavy cutting in prices was the rule all last season. The result of this was that business was carried on at an actual loss by some of the city dealers, and the most favorably situated did little better than pay expenses. It is estimated that the city dealers threw away, by severe cutting in prices last season, at least \$30,000, which they would have received had business been carried on on a fair basis as to margin of profit. As much as ten per cent. reduction was given freely from the list price, and when it is understood that the margin of profit on lumber is under 20 per cent, it will be seen what a cut of 10 per cent. means."

It may be in order to enquire whether the banks in Winnipeg furnished the means to carry on this quarrelsome and suicidal waste under the mistaken name of business. If they did it knowingly let us hope they are pleased with the result. As to the foolish cutters who not only lost money themselves, but kept more sensible merchants from making money, one car.not feel any sympathy with them. But they have turned over a new leaf it seems, having awakened to their folly. A new list has been prepared, showing a moderate advance in prices, and the penitents "will try," the Commercial says, to refrain from giving away their profits during 1899. Dimension stuff is generally 50c. higher; cull planks and No. r cull boards \$1 higher; stock boards, \$1.50 extra instead of \$1 extra; red pine, first and second siding, flooring and ceiling \$1 higher. British Columbia red cedar shingles are quoted \$2.25 for No. 1 and the plice asked for American Pacific Coast shingles is \$2.10 in Manitoba. It seems that the large business done last year in importing lumber from the United States into Manitoba is causing Minnesota lumber concerns to look to that province for business. Formerly only one Minnesota concern worked this field, but this season three companies have representatives in Winnipeg-The Pine Tree Lumber Co., the Crookston and St. Hilaire Lumber Co., and the Brainerd Lumber Co.

CONFEDERATION LIFE ASSOCIATION.

There are some features about the last report of the Confederation Life which justify attentive consideration. This company is one which, while not boasting so loudly as certain others continues to show a rate of growth that is steady if not as rapid in the matter of new business as of some who are willing to pay more to secure risks. The company's policy valuations have been made at 31/2 per cent. interest for the last three years, and at 41/2 for the years preceding. For the last four years the income from interest and rents has sufficed to pay the net death claims and leave \$153,000 to the good. And for a series of years the cash profits paid policy-holders have averaged \$86,319 per annum. Here are three facts which have an unmistakable bearing upon the earning power of the company. They go to show that policy-holders have a good guarantee that sensible provision has been made for their protection and that a rate of earning is established upon which they may well congratulate themselves.

Gains are shown in premium income, interest income, new risks written and total business in force. What is more important still, there is a gain in assets and a gain in cash surplus and in total security for policy-holders. Not the least of the achievements of the year is it that the increased business of 1898 has been done at a lessened ratio of expense. This, in these late days when expense has been regarded by some companies as a minor matter compared with the acquisition of ricks, is a matter upon which the management is to be complimented. The mortality of the year has proved very favorable, death claims being some \$59,000 less than in 1897. Policy-holders received last year \$455,973 and the cash surplus of the company by Government standard is now \$416,206. Such results prove that the policy-holders of the Confederation Life are entitled to consider their investments therein satisfactory, and their prospects of a very pleasing nature.

LONDON LIFE INSURANCE COMPANY.

The London Life shows gains during 1898 in new business and business in force, in net receipts and in assets. On the other hand, the claims paid for the year were unusually large in the general branch of the company's business, and there was no increase in surplus, the **t**ompany's assets being measured by a more stringent standard than that of the Government. It is something to be proud of, when a great American company is told by some sixty United States financiers that it cannot expect its assets to earn more than $3\frac{1}{2}$ per cent. interest in the next ten or twenty years, to find the London Life able to declare average earnings of $5\frac{1}{2}$ per cent. on the mean invested assets. And furthermore, no losses were made on the investments of the year, which is a good tribute to the care with which they were looked after. We notice that some of the speakers at the meeting mentioned the possibility of doing a larger business than the \$5,210,000 of General and Industrial policies, and that this had evidently been considered by the management. It was sensibly remarked, however, that extent of business is not everything, and that it is quite easy to pay more for business than it is worth. The London's progress has thus far been steady and safe; it may just as well be kept so.

AETNA LIFE COMPANY.

Aother year's business shows the Aetna Life well to the front in all the particulars that go to make a sound and economical life company, one that has not only the strength to protect its policy-holders but the earning-power to ensure that they shall obtain the best possible results from adequate premiums, regularly paid. The business of 1898 yielded increases in premium of \$172,925; in the total income, of \$366.343; in assets of \$2,642,053 and in surplus, \$357,178. The assets in its forty ninth year amount to \$50,227,000 and the surplus to policyholders is \$7,245,052. This good old company during the twelve months of 1898 issued and revived 11,609 life endowment and term policies for \$21,979,183. Its life department shows insurance in force amounting to \$157,392,932, and its accident insurance in force at the beginning of the present year amounted to \$109.7 861,120. The Aetna has paid policy-holders since its organization \$109,503,000, or nearly two and a quarter million a year. It paid them almost five millions last year.

TRAVELERS INSURANCE COMPANY.

This well known accident company continues to prosper, as is abundantly manifest from its annual statement for 1898. have already noted that since organization the company has paid to policy-holders nearly \$37,000,000. And on January 1st of this year it had in force policies amounting to \$97,352,821 The having written during 1898 new insurance for \$16,087,551. scope of the accident business is indicated by the payment last year of 16,260 claims for the sum of \$1,254,500. In both the life and accident departments the annual statement is gratifying. The assets total \$25,315,442, while the liabilities (including a4 per cent. reserve on its life policies of \$18,007,596 and a reinsurance reserve on accident business of \$1,399,373) amount to \$21,209,625, leaving a surplus as regards policy-holders of \$4,105,817, and a net surplus, above current liabilities and capital, of \$3,105,817. The Travelers gives reliable indemnity. and whoever holds one of its policies has a good asset.

FOR GROCERS AND PROVISION DEALERS.

Rumor has it that a settlement in the United States sugar war has closed, and prices will soon be on a nominal basis once more.

Report has it that an English tobacco buyer is coming out to look into the quality of the tobacco grown in Essex County, Ontario.

A project to erect a creamery at Melbourne, Que., is said to be assured of success. The village council has granted e^{x^2} . emption from taxation for ten years.

The Toronto ice dealers are said to have agreed that two dollars per ton be the wholesale rate for ton lots and over, and fifteen cents per 100 lbs. to the retail trade, taking not less than 100 lbs. per delivery.

The weather has been more favorable for sugar grinding in Cuba, but February and March, which are the months when the cane yields best, have already gone, and the deficit in the crop so far is 80,000 tons, as compared with that of last year.

Exports of Canadian cheese across the ocean continue to be large. The total shipments since the close of navigation in 1898, according to our Montreal correspondent, were up to the close of last week, 442,981 boxes, as against 386,652 boxes for like period in the previous year. Mr. Leaman of Halifax, has bought, and had shipped to him within the last three months, over four thousand dollars' worth of beef cattle from the parishes of Sackville, Point de Bule and Fort Lawrence, and he would have bought as many more if he could have got the class of beef he wanted, instead of importing from Ontario as he is constantly doing.--Moncton, N.B., Transcript.

A sensible husband said to his wife, "Susie, don't spend a cent with merchants who don't advertise in the papers." The wife, who was a business woman, replied: "You old goose, I learned better long ago than to go where I was not invited. You would be an old bachelor now if you had not invited me to be your wife. Catch me going to a store without an invitation. I guess not."

Rough weather has greatly interfered with lobster fishing on the Nova Scotia coast, and much gearing has been destroyed. The diminution in the export of live lobsters from Halifax to Boston this season, compared with last, is very great. The shipments this year amount only to 315 crates, the year before they were 852 crates, and in 1896 says the Herald, the shipments at this season were no less than 1000 crates.

Whereas the prices paid for sardines along the Atlantic ccast of Canada has been very uncertain, fluctuating as it did from 50c. to \$20 per hogshead, there is now a proposal from the American Sardine Co., to contract with the weir owners for the catch of the weirs for a period of years at a fixed rate. Something of this depends, however, on whether the factories **can** be got to work together under one management.

It is said to have cost the Grocers' Association of Montreal \$1,100 to get the Grocers' Bill passed through the Quebec Legislature. And this is considered a good investment, for that new law authorizes any one to open a drug store, if he employs a chemist in it. The association is not in very good financial shape, for the annual report of the treasurer showed that the membership fees for the last year amounted to \$484.94, and that the expenses reached \$1,212.32, leaving a deficit of \$817.38.

MINING ITEMS.

The mayor of Fort William, Mr. John Me^{χ} cllur, tells the Globe that he and his brother Peter sold a zinc mine on the north shore of Lake Superior to a Belgian syndicate last spring. It is situate on the C.P.R. between Rossport and Schreiber. The mineral occurs in a hornblende schist as a zinc blende, and the ore runs about 50 per cent.

Two shafts have been sunk, and teams cart the ore to the line of the C. P. R., where it is sacked and shipped to Belgium. After paying the charges for transportation it is stated that the ore nets \$40 a ton in Belgium.

An important man is Mr. H. M. Whitney, of Boston, head of the new Dominion Iron and Steel Company, as well as the Dominion Coal Company. He has been asking for entire exemption from payment of the provincial royalty for a period of five years on the coal used by the Iron & Steel Company. The Hon. Mr. Murray stated in the House last week that the Government had decided to grant half the exemption for eight years, which he deemed acceptable to the company and satisfactory to the country. The Dominion Coal Company pays a royalty of twelve and a half cents a ton. The Dominion Iron & Steel Company will use enormous quantities of coal.

INSURANCE MATTERS.

The newly elected chief of the Rossland fire brigade is Donald Guthrie, of Montreal, who was to leave Montreal for Rossland last week.

The vice-presidency of the Royal Victoria Life Insurance Company vacant by the death of Sir J. A. Chapleau, has been filled by the appointment of the Hon. L. J. Forget. The new member of the board is E. B. Osler, M.P.

Action was last week taken by the Grand Lodge of the Sons of England to effect a substantial increase in the insurance rates of the Sons of England. The increase was agreed to by practically all the delegates, the reason being that the Grand Lodge desires to place the insurance rates as near as possible the rates recommended by the inspector of insurance. The new rates will only apply to new members—the old rates will prevail with present members of the order. It has been decided not to press the corporation bill during this session in view of the Government's promise to introduce a general measure affecting friendly societies. Dr. Hodgetts, of Toronto, is the newly elected Grand President.

Industrial accidents exhibit an alarming increase in England, During the year 1898, no fewer than says the Daily States. 70,691 work people were injured as against 58,192 in 1897. This can be attributed to the Workman's Compensation Act passed by the British' Parliament about a year ago. It compelled employers to pay pensions to their employees crippled or injured from an accident in their trade. The employers, not caring to assume such a risk, turned it over to the Employee's Liability Incurance Companies. The workmen, knowing that they would be provided for, relaxed their usual vigilance, causing a large increase in the number of accidents. This evil has assumed such proportions that large employers are refusing to hive men over 50 years old, or anyone known to have any defects such as the loss of a limb, defective sight or hearing. And so it has turned out that a law intended to benefit the working men has resulted in the discharge of thousands of them.

BOOKS RECEIVED.

The C. H. Mortimer Publishing Company has sent us a copy of the Canadian Hand Book of Steam and Electricity. This little volume of 150 pages has been prepared, as the preface assures us, with a view to meeting the requirements " of persons desirous of qualifying themselves to undertake the successful management of electrical and steam appliances." The first 100 pages are devoted to explanations, perhaps we should say definitions, of square and cube root, common fractions, decimal fractions, practical measurements, the fundamental principles of steam engineering and the measuring of electric energy, horsepower calculations, strength of boilers, and the abilities of pumps. The remainder contains a series of chapters upon corrosion and scale in boiler feed waters, with four tables illustrating resistance of copper wire, the properties of water and saturated steam-the whole carefully indexed. The compiler of this book means well, no doubt; that is to say, he would like, after the Ontario and American Educational modern system of cram, to show a short-cut to the technical knowledge that makes fit engineers or electrical experts without giving the pupil the trouble to learn in the blacksmith-shop, the engineroom, the electrical laboratory, what is so essential to be learned if one is to be a thorough workman. We may be oldfashioned, but this we know, that the crying need of boiler and engine shops and electrical shops to-day is not the man of bcok-learning but the man who has "been through the mill," as the saying goes; the man who can do good mechanical work with his two hands and leave the theoretical part for his foreman or his superintendent. And this is precisely the sort of work which no man can learn from books.

--The omission of a word in our notice of the Federal Life Assurance Company caused us to say last week "the surplus to policy-holders is now \$108,000 entirely apart from guarantee capital." The latter part of the sentence should have read "apart from uncalled guarantee capital." The surplus apart from capital is \$17,784 and including \$91,000 paid capital is \$108,784.

CLEARING-HOUSE FIGURES.

The following are the figures of Canadian clearing houses for the week ended with Thursday, March 23rd, 1899, compared with those of the previous week

CLEARINGS	Mar	ch 23rd, 189 v.	March 16th, 1899
Montreal		15.353,866	\$ 15,887, 4 81
Toronto		9,002,516	8,447,138
Winnipeg	• • • • • • •	1,516,305	1,480,780
Halifax			1,163,067

Meetings.

CONFEDERATION LIFE ASSO-CIATION.

The twenty-seventh annual meeting of the Confederation Life Association was held at the head office of the company, Yonge, Richmond and Victoria streets, Toronto, on Tuesday, March 14th, 1899, at 2 p.m.

at 2 p.m. There was a large attendance of those interested in the affairs of the association.

Hon. Sir W. P. Howland, president, was appointed to act as chairman, and Mr. J. K. Macdonald, managing director, as secretary.

After the usual formalities, the following report and statements of the affairs of the association for the year 1898 were presented.

REPORT.

The directors herewith lay before the policy-holders and shareholders the report of the business for the year 1898, and in doing so they feel that both policyholders and shareholders will find ground for congratulation with the results of the operations for the year. The business generally has been well maintained, and a satisfactory volume of new business has been secured on the lines which have guided your directors in the past. There were received during the year

There were received during the year 2,381 applications for a total new insurance of 3,3,83,393; of these 2,251 for 3,164,443 were approved; 118 for 205,-450 were declined, not coming up to the company's standard, and 12 for 13,500 were deferred for further information. Including bonus additions, the new business for the year was 3,186,450. The total business in force at the close of the year was 20,677,418, under 19,950 policies on 17,106 lives.

The claims arising from death among the insured were very favorable, and considerably under those for the previous year. There were 90 deaths, calling for the sum of \$183,931, under 112 policies. The valuation of the policy and annuity obligations of the association has

The valuation of the policy and annuity obligations of the association has been made on the conservative basis used for the two previous years, namely; a rate of interest of $3\frac{1}{2}$ per cent. for all business written since 1895, and $4\frac{1}{2}$ per cent. for business written prior to that date.

The usual financial statements are herewith submitted, and they will be found to exhibit the position of the company at the close of the year. The auditors have continued to make

their auditors have continued to make their audit each month, and their report will be found appended to the financial statements.

By reference to the financial statements, it will be noticed that substantial payments have been made to the policyholders in the way of profits, the sum of \$85,390.22 having been paid during the year. Taking the last four years, a total sum of \$345,276 has been paid to policyholders in this way, giving an average of \$80,319. During the same four years the net interest and rents received have been sufficient to pay the net claims arising from deaths and leave a surplus of \$153,-840; and, during the same period, the expense ratio has been gradually brought down, a result, in view of the volume of new business maintained and the existing conditions, your directors believe, will bear most favorable comparison. Your directors, after careful consideration, concluded that the improvement in

Your directors, after careful consideration, concluded that the improvement in business generally would warrant them building on the vacant land on Queen street, which forms part of the head office block, and they have accordingly erected a three-story brick building containing eight stores and two flats, the latter used as show rooms. All were occupied as soon as finished. The balance of the vacant land south of the stores has been ground-rented, and the lessee has erected a brick building thereon for ware-house purposes, so that what was nonproductive is now yielding a very fair return, in addition to paying taxes and all other charges.

Your directors also, though receiving a good rental for the Yonge street shops in the head office building, deemed it wise, when the corner store became vacant some time ago, to make changes in the construction of the fronts on Yonge street and part of Richmond street, by which the heavy piers, which were undesirable from a commercial standpoint, will give place to a construction that will admit of more window space, and by that means be more suitable for the purposes for which the space is likely to be used. These changes are now being made, and will shortly be finished, and the whole space has been let at satisfactory rentals, and will be oc-cupied as soon as the changes are com-pleted. It will also be satisfactory to learn that the head office building is filling up with good tenants at fair rentals and with good prospects.

Reference was made in the last an-nual report to the returns from the properties taken over in the city of Toronto, and your directors are now able to report a still further improvement in the turns, with better prospects for the pres-ent year, both as to rents and sales. The directors are pleased to report continued diligent and faithful services on

the part of our field staff, and also of the employees generally.

All the directors retire, but are eligible for re-election. W. P. HOWLAND, President.

J. K. MACDONALD, Mng. Dir.

AUDITORS' REPORT.

We beg to report that we have completed the audit of the books of the association for the year ending December 31st, 1898, and have examined the vouchers connected therewith, and cer-tify that the financial statements agree with the books and are correct.

The securities represented in the assets (with the exception of those lodged with the Dominion Government, amounting to \$84,500, and those deposited with the Gov-ernment of Newfoundland, amounting to \$25,000), have been examined and compared with the books of the association, and are correct, and correspond with the schedules and ledgers.

The bank balances and cash are certified as correct.

W. R. HARRIS, R. F. SPENCE,

Auditors.

Toronto, March 4th, 1899.

Sir W. P. Howland, president, in moving the adoption of the report and financial statement, said:

"It affords us sincere pleasure, gentle-men, to be able to present you with the report and statements in regard to the business and the position of the com-pany, which you have just read. They attord evidences of satisfactory progress and success in every department of the company's business. The new business secured during the year, notwithstanding the increased competition, was somewhat in excess of that obtained in the previous year, and at the end of the year we had insurances in force aggregating \$29,677,-418, an increase of \$1,345,413 over the amount in force at the end of 1897. This large and satisfactory amount of business has all been obtained while the expense ratio of the company has been less than that of the previous year, which proves that the business of the association conunues to be of a permanent and reliable character. The death claims for the year aggregated \$183,931, which were \$59,893 less than those of the previous year. Our hnancial statements show an increase in income for the year of \$40,670. There was paid to policy-holders during the year the large sum of \$455,973, and our cash surplus over all liabilities, according to the Government standard of valuation, is \$416,206, an increase over the previous is \$416,206, an increase over the previous year of \$50,367.

"We consider that these facts fully justity us in the belief that they will prove eminently satisfactory to our policy-holders and shareholders, and will ensure the continuance of the generous support which the company has received from the public." Mr. W. H. B

Mr. W. H. Beatty, vice-president, in seconding the adoption of the report, said:

"I will just make one remark, which I am sure you will be delighted to hear, and I think it will be particularly gratify-ing to the gentlemen of the field staff, namely, that this year, down to the present time, the business secured is largely in excess of that for the corresponding period of last year and is greater than that of any previous year."

Mr. W. Macdonald, in moving the resolution thanking the president and directors of the association for their faithful attention to the affairs of the company during the past year, said: not think, in view of the report which we have just heard read and the re-marks of the president and the one remark made by the vice-president, that a resolution of this kind ought to be considered of a formal character. As a policy-holder, I have a great deal of satisfaction in substantial reductions made upon my premiums out of the profits, and I have been a shareholder with very considerable satisfaction to myself, and while it is true that the president, vice-president and directors are in one sense doing no more

than their duty in looking carefully after the affairs of the association, as has been done last year, yet I think that it is due to them that there should be an earnest word of appreciative thanks, seeing that the duty has been so well discharged as in the present case. I therefore hav much pleasure in moving this resolution. in the present case. have

Rev. Mr. McGillvray, in seconding this resolution, said: "I share very fully with the pleasure of the mover of this resolution in rising to second it. My pleasure does not reach quite as far as that of the does not reach quite as tar as that of the mover. He is both a policy-holder and a stockholder. I only have the privilege of being a policy-holder in the Confeder-ation Life Association, but I feel in that particular I have, in common with all policy-holders, a very good and a very safe investment, and if it does not yield any very immediate returns it is gure to any very immediate returns, it is sure to

any very immediate returns, it is sure to yield very satisfactory returns in due time, if not to myself, to others. "No one can read the statement or hear it read without being fully satisfied with the very satisfactory way in which the business of the association has been conducted and processited during the year. conducted and prosecuted during the year.

"It is interesting to notice that the inmillion mark and that the income from interest and rents has been more than sufficient to pay all the death claims during the year.

"Speaking for the policy-holders, and as one who has now been a policy-holder for twenty years, I have very great pleasure in expressing my entire satisfaction with the way in which the business of the company is conducted, and the splen-did exhibit which has been presented to us of the past year assures one that the greatest possible care has been bestowed upon our affairs by the directors and officers of the association, and with very great satisfaction I second the resolution proposed by Mr. Macdonald.'

A resolution, thanking the officers, the members of the agency and office staffs for their faithful service in the interests of the association during the past year was proposed by Mr. W. H. Gibbs and seconded by Hon. James Young, and replied to by many of those present, the members of the field staff generally ex-pressing themselves as highly gratified pressing themselves as highly gratified with the very encouraging report of the operations of the association for the past year, which has been presented to the meeting

All the retiring board of directors were unanimously re-elected, and at the meet-of the new board, held immediately after the adjournment of the annual meeting, Sir W. P. Howland, C.B., K.C.M.G., was re-elected president, and Messrs. Edward Hooper and W. H. Beatty, vice-presidents.

LONDON LIFE INSURANCE COMPANY.

The twenty-fourth annual meeting of the shareholders and policy-holders of the London Life Insurance Company was held at the company's office, Lon-don, Ont., on Thursday, the second day of March, 1899. There were present: The president, Mr. John McClary, in the chair; the vice-president, Mr. A. O. Jeffery; J. G. Richter, manager and secretary; W. F. Bullen, Wm. Bowman, T. H. Smallman, A. S. Emery, J. E. Jeffery, George F. Jewell, of London; Judge Bell, Chat-ham; G. M. Harrison, Glencoe, and others. others.

The notice calling the meeting was read by the secretary, after which the minutes of the last meeting were read and confirmed, and the directors' report and financial statement for the year ending Dec. 31st, 1898, submitted, as fol-lows: lows:

REPORT.

The directors of the company beg to submit annual report and duly audited financial statement for year ending Dec. 31st, 1898.

During the year, 12,204 applications for insurance, amounting to \$1,553,593, were accepted, and policies issued therefor.

The net premium and interest receipts of the year were respectively \$206,514.72 and \$34,667.78, or a total of \$241,182.50, being an increase of \$25,082.84 over the previous year.

The sum of \$58,700.08 was paid for Ine sum of \$58,700.08 was paid for death claims, and \$6,080.06 for surren-dered policies and cash profits, making a total of \$65,680.14 paid policy-holders or their heirs during the year. The insurance in force on the com-pany's books at the close of the year after deducting cll reinsurances amounts

after deducting all re-insurances, amount-ed to \$5,210,519.28, under 2,232 "Ordi-nary" and 34,094 "Industrial," or a total of 36,326 policies, an increase of 3,638 policies for insurance of \$478,018 for the year.

The assets of the company, exclusive of uncalled but subscribed capital, amount to \$770,038.58; an increase of \$01,-861.80 for the year. The interest and other payments falling due during the year were in the main satisfactorily met year were in the main satisfactorily met. No losses in respect of investments were incurred during the year, and no real estate came into the company's possession by foreclosure or otherwise.

The liabilities of the company, under existing policies, and in all other re-spects, have been provided for in the most ample manner, the whole amount-ing to \$700,750.16. The surplus security to policy-holders, exclusive of uncalled but subscribed appited is therefore \$60.2000 subscribed capital, is therefore \$69,-288,42, and after deducting paid-up capital, there remains a net surplus, over all liabilities and capital, of \$19,288.42.

Surplus security to policyholders\$ 69,288 42 Capital paid up\$ 50,000 00 Surplus over all liabilities and

capital 19,288 42 To the Shareholders of the London Life Insurance Company:

Gentlemen,-I hereby certify that I have completed a careful audit of the books and accounts of the London Life Insurance Company for the year ending Dec. 31st, 1898, and find the same correct, and in accordance with the above statement, the reserve fund and all other liabilities being fully provided for, I have examined the securities and find them in order, and the books of the company are well and neatly kept. GEO. F. JEWELL, F.C.A Audi

Auditor. London, Ont., Feb. 14th, 1899.

The president, Mr. John McClary, in rising to move the adoption of the re-port, said:

Gentlemen,—The directors' report, and the accompanying financial statement, which have just been submitted, are, as usual, so full and clear as not to require much, if anything, by way of explanation. The results of the year show that steady The results of the year show that steady and substantial progress has been made in almost every particular of importance. The new business of the year was some-what in excess of the new business of the previous year, and the net increase of business in force at the close of the year shows the substantial gain of nearly IO per cent. over the business in force at the end of previous year. The net pre-mium and interest receipts also show an increase over the like receipts of the previcus year of over 11 per cent., and the assets of the company have increased over 13 per cent., as compared with the assets at end of 1897.

In the matter of disbursements, the In the matter of disbursements, the amount paid policy-holders or heirs would naturally be expected to increase somewhat from year to year in the case of a growing company. Owing, however, to a number of policies becoming claims the past year in the "Ordinary" branch being for larger amounts than the aver-age of the policies in force in that branch, the aggregate claims of the year in that amount paid policy-holders or heirs would naturally be expected to increase somewhat from year to year in the 'case of a growing company. Owing, however, to a number of policies becoming claims the past year in the "Ordinary" branch being for larger amounts than the aver-age of the policies in force in that branch, the aggregate claims of the year in that branch have been somewhat abnormal, as compared with the average claims of previous years. That the company's financial position has not been materially

affected by this occurrence is a practical demonstration of its financial soundness and favorable earning power. The liabilities of the company have, as

heretofore, been provided for in the most ample manner. All of the company's in-dustrial policies, and a considerable pro-portion of its ordinary business as well, having been valued upon a one-half per cent more stringant interset basis than cent. more stringent interest basis than the Government standard. Had the lia-bilities been made up on a less stringent basis than has been done, the surplus over all liabilities and capital would naturally appear much larger than as shown on the company's basis. With these remarks I beg to move the

adeption of the report. The vice-president, Mr. A. O. Jeffery,

in seconding the motion to adopt the report, said: I desire to add a few observations to

those made by the president. The reserve held for security of policy-helders, and which has now reached helders, and which has now reached \$670,254.06, is apportionable \$326,835 to the "Industrial" business, and \$343,419.06 to the "Ordinary" business; the amount added last year being \$60,346.01 "Indus-trial," and \$34,600.30 "Ordinary," or a total of \$04.046 at total of \$94,946.31.

The interest earnings, apportioned on basis of respective reserve investments would be "Industrial" \$16,501.86, "Ordiwould be industrial \$10,501.80, Ordi-nary" \$18,165.92, so that the total receipts from premiums and interest would be re-spectively: "Industrial" \$162,114.90, "Ordinary" \$79,067.60.

The interest earned in the past year averaged 5½ per cent. on the mean in-vested assets; this, in view of the con-tinued decrease in the rates obtainable on good class investments, is a very fav-orable showing, and the fact that no losses in respect of investments have been made during the year speaks well of the care and good judgment exercised by those responsible for the investment of the company's funds.

Judge Bell said:

Speaking as a policy-holders' director I have every confidence in the company, and I take this opportunity of expressing approval of the careful manner in which its affairs are being conducted. A large volume of business could no doubt be done if such was considered advisable. This would, however, necessitate larger expenditures and proportionately less profits to policy-holders, for the time being at any rate, and it does not necessarily follow that the results of the future would make up for the present expendi-tures in excess of the legitimate earn-

The company's auditor, Mr. George F. Jewell, in supporting the report, express ed his continued satisfaction and confidence in the manner in which the busi-ness was conducted, and felt assured that under the control of the present board of directors and their able manager, no really favorable opportunity of extending the business would be overlooked, and that whatever progress was made would be positive and substantial. The diligent and able prosecution of the work in the past was the best guarantee that he could

wish for the future. The adoption of the report was sub-mitted to the meeting and unanimously carried.

A hearty vote of thanks was tendered

At a subsequent meeting of the di-rectors, Mr. John McClary was re-elect-ed president, and Mr. A. O. Jeffery, vicepresident.

THE AUSTRALIAN MINTS.

The Engineering and Mining Journal gives the gold production of the Austra-lian colonies last year as \$62,923,837; an increase of \$10,095.793, equal to 19.1 per cent, over the year 1807 cent., over the year 1897. The two Australian mints turned out

last year in coin and bullion, bars valued as follows: Melbourne, £5,815,610; Sydney, £2,618,205; total, £8,433,815, an increase of £427,353 over the previous year. The new mint at Perth, in Western Australia, will be ready to begin operations before the middle of the current year.

The Australasian colonies exported a large amount of gold in 1898. The full returns are not yet at hand, but the total is estimated at $\pounds 13,500,000$, of which about $f_{3,500,000}$ went from Sydney direct to San Francisco. These shipments from Australia on London orders were quite a feature in the gold movement of 1898.

> THE LESSONS OF HARD EXPERIENCE.

Where just now are the orators who one year ago proclaimed rates were too high? Has the cut been deep enough one year ago proclaimed rates were too high? Has the cut been deep enough to suit them? Are they happy over the state of things they helped to bring about? If so, we wish them all the joy they can get out of it. The above is from President Whiting, of the Orient, who continues: We have had rate wars, general reductions and some extraorgeneral reductions, and some extraor-dinary cuts to meet non-board competi-tion, much of it that would make even a hardy and muscular non-boarder limp and weary. We now ask whether it is not about time for underwriters to get together like sensible men, and restore rates to a figure where ordinarily they would bring a profit, put again in force the restrictive clauses that have been abrogated, and stop writing long term policies in second-class cities and country villages. It is going to require quick acorder to show good results for this year, but it can be done with energy and resolution. In any event, let us stop mak-ing ourselves ridiculous before the public

A PLEA FOR DIVERSITY OF INDUSTRIES.

In a recent issue, the Nebraska Con-servative states that the corn-producing States show much evidence of prosperity. It has come to stay, provided it is pro-perly cared for. Condensation is neces-sary for its continuance. Just as the greatest success is achieved by industrial concentration, so will the best results be obtained by the people in corn-produc-ing States in manufacturing grain into flour, cereal food, starch, glucose, and similar articles. The same net results can be had in these industries, says Bradstreet's as already secured by the Bradstreet's, as already secured by the condensation of corn into beef and pork. The corn-growing States should not only have the producer's profit, but the manu-facturer's. It is much wiser to retain this money than to send it out of the coun-try. What the agricultural States need most is diversity of industry-factories, mills and plants of all kinds employing labor, and, at the same time, teaching the young new occupations, are very desirable.

-A large hotel at Sorel, Que., the inswick, was burned last week. Brunswick, was burned last week. The loss exceeds \$50,000; with only \$15,-000 insurance.

THE assignment of K. R. McKenzie, grocer, North Sydney, C.B., anticipated for some days, was completed on March 18th. D. D. McKenzie, barrister, being appointed assignee. The liabilities are likely to be \$20000 or more larged in likely to be \$20,000 or more, largely in Halifax.

-A despatch of Monday last from Cleveland, Ohio, announces the completion of a combine which includes practically all the cast-iron pipe foundries of the United States. The capital is \$30,-000,000.

Commercial.

TORONTO MARKETS.

Toronto, March 23rd, 1899.

DRY GOODS .- During the past week some fair sorting orders have been re-ceived by the wholesale houses. This This trade, however, is now pretty well finished, and only "between seasons" business can be looked for until the fall campaign commences. This will begin within a few weeks, as lines of samples

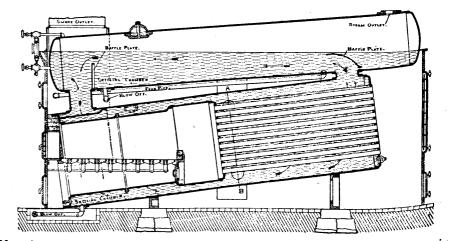

trade. In woolens there is a tendency to a better selection of stuffs on the part of the wholesale houses, and much of the inferior goods that have in recent years found ready buyers is being rejected. Cottons for autumn are unchanged in price, and samples are now being given to the wholesale trade. Manufacturers' agents say that not in years has there been so ready a response to their canvass for orders, and already, after little more than a week's work, large orders have been booked.

GRAIN.—The market is very quiet, and deliveries at country points are only nom-inal. For red and white wheat of On-tario, 67c. is quoted at outside points. Barley is lifeless. The same may be said of oats. Buckwheat is guitaged unof oats. Buckwheat is quiet and un-changed. Rye has fallen in price, and is now quoted at 52c. per bushel.

GREEN FRUITS.—Trade has shown distinct improvement, as a result of weather conditions. Lemons are actively weather conditions. Lemons are actively enquired for, and are quoted \$2.50 to \$3 according to quality. Oranges have moved more freely with prices ranging from \$3.50 to \$7 per box, according to quality. Large exports of apples have recently been made to the United King-dom for the Easter market, but it is not expected they will bring fancy prices. Some of the fruit is said to have gone forward in poor condition forward in poor condition.

GROCERIES.—Trade generally shows some improvement. It is true that in Lenten requirements the demand has fallen off, but the approaching close of this season has brought with it increased orders for other goods. In sugars values are unchanged. Refiners, it is understood, are complaining of importations from the United States, but we are told that the recent advance in the American market put an end to imports, so far as Toronto is concerned, from across the line. It should be understood in this connection that those who imported were almost entirely the large consumers, and several confectioners are understood to have laid in heavy supplies of this com-modity recently. The tea market has been somewhat excited. Large sales are reported to have been made to Chicago parties by a prominent Canadian house. As a result of these sales, covering, it is reported, 1,300 chests of India and Ceylon are freely coming to hand. Prospects bare of this description. It is of interest all point to a bright and active autumn to note that for the first time in the his-

Mumford's Improved Boiler

Robb Engineering Co., Limited, AMHERST, N.S. WM. McKAY, Traveller, Seaforth, Ont.

tory of the importations of India and Ceylon teas into the United Kingdom markets, there has been for the present season a falling off amounting to about 3.000,000 pounds. This, it was stated, was due to the increased quantity of India and Ceylon teas being taken by other countries, particularly Russia and Germany; in fact within the past year or so several large houses have established special agencies in Colombo. Canned vegetables and fruits are meeting with rather better enquiry.

HIDES AND SKINS.—The local market is quiet and unchanged. The offerings of hides continue to be very dirty and grubby, and are not worth within ¹/₂c. per lb. the price of autumn hides. In view of this, the small decline in price, which has recently taken place, is an indication of strength rather than weakness. We quote green hides 8¹/₄c. basis and cured 8¹/₄ to 9c. basis, per lb.; sheepskins are quiet at 80c. to \$1 per skin. The offerings of calfskins are now very much freer, prices holding unchanged, with No. I quoted Ioc. per lb. From Chicago, March 20th.—We gather that a fair, firm market was reported for packer hides. According to latest information the purchases of branded hides amounted to 50,000, and full values were paid. Business for the day was reported as only limited, closing at 11¹/₂c. for Texas, 10¹/₄c. for but brands, 9¹/₂c. for Colorados, 9³/₄c. for but brands, 9¹/₂c. for Colorados, 9³/₄c. for branded cows, and 10³/₂c. and 10³/₄c.

PROVISIONS.—The market is quiet. Hog products are not in active demand. Dressed hogs are quiet at \$5.05 to \$5.15 per cwt. Butter is steady with dairy quoted at a range of 10 to 15c., and creamery 19 to 21c. There is not a free offering of choice dairy butter. Cheese is in good demand with autumn makes worth 10 to 11c. per lb. The receipts of eggs are not free, but a rush is looked for on the Easter market. At present, dealers quote 13c. per dozen.

WooL.—For weeks the local wool market has been quiet and without special change. Fleece is dull and difficult of sale. The mills show some interest in milled and foreign wools. From London, March 16th.—There has been active competition for greasy merinos from all directions, and a few suitable parcels were taken by the American and Russian buyers. There was strong competition for scoureds by the German and Yorkshire buyers. Fine crossbreds were purchased by the home trade at high rates. A lot of medium scoured Cape of Good Hope and Natal wool was well represented, and sold briskly at 7½ to 10 per cent. above the January sales. The total number of bales sold to date aggregate 94,500 bales, and there remains have purchased only a few hundred bales so far, but they are carefully watching the series for anything offered suitable for their wants.

MONTREAL MARKETS.

Montreal, 22nd March, 1899. ASHES.—Business has been extremely dull of late, and a leading dealer tells us he has not bought a barrel since last retinue fairly steady at former quotations, namely, \$4.40 to \$4.45 for first pots, seconds, \$4.10 to \$4.15, and about \$4.90 for pearls.

CEMENTS AND FIREBRICKS.—The existing weather conditions, more wintry in character than at any time this season, have checked the enquiry which the mild weather of last week induced, and few transactions are reported. All European advices lead to the belief that makers will exact stiff prices for spring purchases,

and local quotations are very firm at late fields that have been bare all figures.

DAIRY PRODUCTS.—The figures of cheese exports for last week were again unusually large for the season, and are even much ahead of the preceding week, totalling 45,140 boxes, as against 19,867 boxes for the same week a year ago. Since the close of navigation in 1898, the total shipments have been 442,981 boxes, as compared with 386,652 boxes for the same period a year ago. The market is even firmer than last week, and sales of finest have been claimed at 103/4 to 10%c. Butter remains about on the level of last week, fine creamery being quoted at about 20½c., rolls are more plentiful at 14 to 15½c. per pound.

DRY GOODS.—The extremely wintry weather of the past several days has checked sorting business in this line of trade, but the wholesale houses are still fairly busy, and though the great rush of shipments are over, there is still a good many spring goods yet to be delivered. Payments are reported fair to good, with few failures. English letters bring no special news beyond stating that all recent advances are firmly held.

FURS.—The London March sales are now in progress, and will be completed this week. The Hudson Bay Company's sale, which always leads off, showed scme big advances in price on a year ago, which, according to cable advices, were somewhat modified at the Lampson sales, but remain still strong, and as far as present reports go, the advances are shown as follows: Otter, 5 per cent. advance on last March; cross fox, 15 per cent.; red fox, 40 per cent.; lynx, 40 per cent.; wild cat, 10 per cent. lower, and fisher, 10 per cent. lower, while beaver sold same as January, 1899. These advances were largely anticipated in recent lccal buyings, and it is not calculated that there will be much if any revision of recent quotations, especially as goods bought from this out will have to be carried over till next year.

GROCERIES.—Business is reported fair, though recent heavy snow-storms have interfered somewhat with travellers' movements in off-rail districts. Letters from different interior points say the country wears a more wintry aspect than At any time during the season, and the

helds that have been bare all withen hitherto, now show a good covering of snow. The change, however, is wel-comed by many, as it will afford a week or two of good sleghing, of which, in some sections, there has been practically winter none all winter, and it will also be of much benefit to the sugar makers, whose operations are about to begin. With regard to general grocery values there is little new. The demand for refined sugars is reported quiet by refiners, but quotations hold at recent advance, granulated selling at factory at from \$4.35 to \$4.40, as to lot, yellows, \$3.75 to \$4.15. American sugars, as brought in here, are also selling at some similar advance. The demand for molasses is now lighter, the usual more active Lenten demand being now satisfied; jobbers generally are now selling at the cut price of 29c. per gallon for single puncheons, though Barbadoes advices quote 12c., which means about 31c. laid down. Some fair parcels of teas have changed hands on spot during the week, and some good business is also reported with Western houses. There is much firmness in all houses. There is much firmness in all lines of blacks, some extra good values are said to be offering in good medium Japans.

Buckwheat	30,358	32,845

HIDES.—The hide market is off a peg this week. This is wholly due to the poor, grubby character of the stock now offering. Dealers are buying on the basis of 8½c. per lb. for No. I beef hides, and are quoting 9c. to tanners. Calfskins and lambskins are coming in more freely; for the tormer 10 and 8c. are still the figures, and for the latter 10c. Sheepskins, 70 to 75c. each.

LEATHER.—Some boot and shoe houses have their fall samples out, and already report some good orders from British

Columbia, but others in the trade report the 1st prox. The firm quotations in all they will have their hands full well on into May in filling orders for spring goods. In leather business continues of moderate character, with good English demand for sole, and values very steady. American union crop sole is reported ad-Var:ced a cent. Heavy dongolas scarce. We quote: Spanish sole, B.A., No. I, 24c.: No. 2, 22 to 22½c.; No. I ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. I slaughter, 26 to 28c.; No. 2, do., 24 to 25c.: common 20 to 21c.; waxed upper I slaughter, 26 to 28c.; No. 2, do., 24 to 25c.; common. 20 to 21c.; waxed upper, light and medium, 30 to 35c.; do., heavy. 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; Western splits, 21 to 24c.; Quebec do., 16 to 18c.; juniors, 16 to 17c.; calf-splits, 30 to 35c.; calfskins, (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; rus-set sheepskins linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff, 15c.; 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff, 15c.; Pebble cow, 11½ to 13c.; polished buff, 12 to 13c.; glove-grain, 12 to 12½c.; to 45c to 45c.

METALS AND HARDWARE.-There has been a little further easing off in some of the extreme recent advances in metals, but on the whole values generally are very stiff, and higher quotations are re-ported in some new lines. For steel boiler plates \$2.75 to \$3 is now asked, manufacturers of springs and axles have withdrawn cuotations and for small lots withdrawn quotations, and for small lots of Summerlee pig iron \$22 is now the re-Ported price. Tin plates are very firm, and \$3.25 the general asking price for cokes, though one large dealer is said to be quoting lower for larger lots. Iron piping is said to be higher again. We quote: Summerlee pig iron, \$21 to \$22; Hamilton, No. 1; \$17.50 to \$18; No. 2 do.. \$16 to \$16.50; Fer-rona, No. 1, \$17 to \$17.50; machinery scrap, \$12 to 13; common ditto, \$11 to 12; bar iron, Canadian, \$1.40 to \$1.45; British, \$2 to 2.15; best refined, \$2.40; Low Moor, \$5; Canada plates—Ponty-pool or equal, \$2.25, 52 sheets to box; 60 sheets, \$2.30 to 2.35; 75 sheets, \$2.40; all polished Canadas, \$2.45; Terne roofing plate, 20 x 28, \$5.90 to 6; Black sheet iron, No. 28, \$2.25; No. 26, \$2.20, No. 24, \$2.10; No. 17, \$2; No. 16, and heavier, \$2.15; tin plates—Bradley char-coal, \$5.60 to 5.70; charcoal, I.C. Allo-way, \$3.40 to \$3.50; do., I.X., \$4.00; P.D. Crown, I.C., \$4 to \$4.25; dot, I.X., \$4.50; coke, I.C., \$3.25; ditto, stan-dard, \$3 for 100 lbs; coke, wasters, \$2.70; galvanized sheets, No. 28, ordinary \$rands, \$4.25 to 4.50; No. 26, \$4; No. 24, \$3.75 in case lots; Morewood, \$5 to 5.10; tinned sheets, coke, No. 24, 6c.; No. 26, etc., the usual extra for large sizes. English hoops, \$2 to 2.15. Steel boiler for Dalzell and equal; do., three-six-English hoops, \$2 to 2.15; tank iron, ¼-inch, \$1.50; three-sixteenths, do., \$2; tank upwards, \$2.40 to \$2.45; Russian sheet quote: Summerlee pig to \$22; Hamilton, No. iron, \$21 teenths inch, 2.75 to \$3; tank iron, ¼-inch, \$1.50; three-sixteenths, do., \$2; tank upwards, \$2.40 to \$2.45; Russian sheet iron, 9c.; lead, per 100 lbs., \$4.25; sheet, \$4,50 to 4.60; shot, \$6 to 6.50; best cast-stee!, 8 to 10c.: toe calk, \$2.25; \$1.90; round machinery steel, 2.25 to \$3. as to finish; ingot tin, 25½ for L. & F.; Straits, 25 to 25¼; bar tin, 27½ to 28c.; ingot copper, 17½c.; sheet-\$6.75; Veille Montagne spelter, \$6.75 to mony, 10½c.

keeps good in these lines, and already some spring shipments have been made to replenish country stocks, while active preparations are in order for the despatch of accumulated orders when spring freight rates come into effect on

lines continue, and no changes are re-perted. We quote: Single barrels, raw, and boiled linseed oil, respectively, 50 and 53c. per gal.; two to four barrels, 49 and 52c.; 5 to 9 barrels, 48 and 51c.; net 30 days, or 3 per cent., for 4 months' terms. Turpentine, one to four barrels, 68c.; five to nine barrels, 67c.; net 30 days. Olive oil, machinery, 90c.: Cod oil, 34 to 36c. per gal.; steam refined seal, 37½ to 40c. per gal.; steam refined seal, 37½ to 40c. per gallon. Castor oil, 8½ to 9c. in quantity, tins, 9½c.; machinery castor oil, 7½ to 8c.; Leads (chemically pure and first-class brands only), \$5.87½; No. 1, \$5.50; No. 2, \$4.17½; No. 3, \$4.75; No. 4, \$4.37½; dry white lead, 5½ to 6c. for pure; No. I, ditto, 5c.; genuine red ditto, 5c.; No. I red lead, 4½ to 4¾c.; Putty, in bulk, bbls., \$1.80; smaller quantities, \$1.95; .25-lb. tins. \$2.05; 12½-lb. tins, \$2.30. London washed whiting, 40 to 45c.; Paris, white, 85 to 90c.; Venetian red, \$1.50 to \$1.75; yellow ochre, \$1.25 to \$1.50; spruce ochre, \$1.75 to \$2. Window glass, \$1.80 per 50 feet for first break; \$1.90 for second break. Paris green, 13c. in 50 and 100-lb. pack-ages; 14c. in 25-lb. packages; pound packages, in boxes, 15c. WOOL.—Woolen manufacturers seem to be recognizing the fact that the advance lines continue, and no changes are re-ported. We quote: Single barrels, raw,

WOOL.-Woolen manufacturers seem to be recognizing the fact that the advance in wools has come to stay, and are now described as being more disposed to buy, one firm reporting recent sales equal to about half the cargo of Cape wools, now due in about a fortnight. Importers Importers are very firm in their quotations, and hold Capes, at 16 to 18c.; Natals, 18 to 20c., with few here, and B.A.'s, 34¹/₂ to 37c. The London sales close to-morrow, 37c. The London sales close to interest, and have more than held the advance noted at the opening.

THE MONETARY TIMES

THE WORLD'S SHIPPING.

Lloyd's tables of British and foreign shipping for the past year states that the total addition of steam tonnage during the year has been 1,111,769 tons gross, and of sailing tonnage, 29,053 tons gross; or, in all, 1,140,821 tons gross. So large an addition of steam tonnage has not been recorded in any previous year. About ninety per cent. of the tonnage added to the register consists of new vessels, not one of which has been built abroad. The largest items among the other additions to the register are those of vessels transfered from British colonies and from other countries to the United Kingdom. These together amount to 97,920 tons, or less than nine per cent. of the total. The gross deduction of tonnage from the register, steam and sail, was 931,528. About 33 per cent. of the steam tonnage and 32 per cent. of the sailing tonnage, included in these figures, have been removed on account of loss, breaking up dismantling, etc.

The tonnage transferred to foreigners reached the large total of 588,508 tons, exceeding the figures for 1895, 1896 and 1897, by 229,371 tons, 249,233 tons and 200.714 tons, respectively. The steam 200,714 tons, respectively. The steam tonnage, which has been deducted on this account, amounts to no less than 434,725 tons, and includes the Northern Pacific fleet, which were transferred to the United States, and the sailing tonnage to 153.783 tons, or about 62 and 65 per cent. respectively, of the total deductions in each case. In the main, the vessels each case. In the main, the which are transferred to foreigners are construction. The not of very recent construction. The United States and Norway were the biggest purchasers of British ships. The United States acquired 42 vessels of 118,-957 tons, and Norway 113 vessels of 109,-957 tons, and ivorway 113 vessels of 109,-885 tons. Other purchasers were: Ger-many, 74,812 tons; Italy, 66, 438: Sweden, 47,173; France, 26,706, and Austro-Hungary, 22,336 tons. In addition, 37,-285 tons have been transferred to the Paitick coloring. New weeds built in British colonies. New vessels built in the United Kingdom for colonial and foreign owners are not included in these returns. On the whole, during 1898, the steamers of the official register of the United Kingdom have increased by 245 vessels of 415,108 tons, while sailing ves-sels have decreased by 344 vessels of 205.-815 tons.

FIRE-PROOF WINDOWS.

A curious circumstance was noticed, about a year since, when several buildings, in which Luxfer Prisms were installed, suffered destruction by fire. In every window the plate glass disappeared completely, but the prisms remained intact. This accidental discovery inclined the company to further experiments, and fire-proof windows, made of small squares of plate glass in electro-glazed panels, have been put on the market, backed by the strongest commendation of the Chicago and New York underwriters. The Rookery and several others of the largest buildings of these cities have adcpted the system.

The principle is that small sections of glass, glazed electrolytically in pure copper—the copper forming a network of diminutive I. beams over the entire sheet—have abundance of support throughout its area, and although cracked and shivered under action of intense heat and water, obstinately resist displacement. The adverteent

The advantages are many. Here is a fire proof window, which always admits light. There are no long rows of heavy shutters to close nightly, no possibility of disaster should an employee neglect his duty. The Luxfer fire-proofing is made to any size, and may be fitted either in metal sashes or in wooden sashes, covered with fire-proof materials. The Luxfer Prism Co., Limited, 58 Yonge street, Toronto, is making arrangements for public tests, under the supervision of the Fire Department and local underwriters.

MUNICIPAL FINANCE.

Mr. E. J. Barbeau contributes to the Revue National an article on the municipal debt of this province, not unworthy of the high reputation borne by its author in the financial world. As a basis of fact, whereon to found his criticisms, Mr. Barbeau gives the following table, the first column showing the tax in each municipality per \$100 of assessed real estate, and the second the debt per head of the population:

per nead of the population	1:	
-	-	Debt
	Tax	per
per	r \$100.	head.
Coaticook	\$1.35	\$ 18
Hull	1.25	20
Jeliette	•	-
Lachine	0.42	34
Moisonne	0.75	33
Maisonneuve	1.05	81
Levis	0.87	36
Montreal	1.25	95
Quebec	1.00	9
Sorel	0.35	40
Ste. Cunegonde	I.00	•
St. Hyacinthe		55
St. Tahua	0.50	47
St. Johns	v.75	19
Sherbrooke	I.20	27
Three Rivers '	0.85	55
Valleyfield	1.00	. 9
Westmount	0.50	162
	0.50	102

Mr. Barbeau points out that the amount of the debt per head does not always give an adequate idea of its burdensome character. Great Britain easily carries a national debt of \$100 per head, while Italy and Spain are overwhelmed with \$80. A wealthy and progressive city may bear with ease a burden of debt which becomes oppressive to a small municipality, the population of which is composed al-most entirely of wage-earners. Westmount probably feels its debt of \$162 a head less than Ste. Cunegonde feels \$55. The smaller municipalities, which are going into debt to subsidize railways and industries, give Mr. Barbeau the great-est concern, and he hopes they will check the inclination to grant bonuses, which in many cases do not give the advantages expected. He fears that some of them will go too far and seriously compromise their position. The warning is a timely one, and it is to be hoped that it will not go unheeded.

As to Montreal, Mr. Barbeau is not blind to the advantages the city enjoys through municipal administration, especially in the way of light and water supply and protection against fire. But he thinks that in street improvements the city has yielded to the prevalent inclination towards extravagance. He is dismayed at the competition among the committees in spending money. It seems simply a question of which committee can ask and get the most. It is in this way that deficits are created, which have to be wiped out by the loans or supplementary taxes. In Mr. Barbeau's opinion, the chief cause of this extravagance is not dishonesty, but incompetence; and there is no doubt that he is right. Dishcnesty can be guarded against, and kept in check, if not prevented; but "against stupidity the gods themselves contend in vain."

The cardinal principle of municipal government that everyone who pays taxes should have a voice in the spending of them—cannot be successfully attacked. The trouble in Montreal is that many of the voters do not realize that it is their money the aldermen are wasting. As the taxes are levied for the most part on real estate, it is a very general idea that municipal extravagance does not concern the majority of the population who are only tenants. The fact is, of course, that the taxes are only levied on the real estate as a matter of convenience; the landlords simply collect them from the tenants and hand them over to the City Treasurer. It is really the occupier who pays, and the realization of this simple fact would do much to remove the apathy that now exists about municipal affairs. It ought to be self-evident that if the taxes on real estate are increased, tenants will have to pay more rent; but there are real estate owners who think they pay the taxes out of their own pockets, and tenants who regard the threat of increased taxation on real estate as if it did not concern them.

THE NORTHERN FUR COMPANIES.

Latterly all the employees of the Hudson Bay Company were caught young; only lads born in the solitudes of the highlands could habituate themselves to the life of loneliness; only constitutions of iron, hardened under hereditary conditions, could endure so tremendous **a** strain.

It may be assumed that the first adventures consisted chiefly of Englishmen, although the Scottish invasion of England had set in with the accession of King James. But it is certain that afterward, both with the Hudson Bay Company and its great Canadian rival, the names of factors, traders and prominent partisans, with scarcely an exception, were Scottish.

The story of trade and discovery in the North-west of America reads like a muster roll of the clans, and mainly of the northern clans of the second order. There are MacTavishes, MacGillivrays, Mc-Kays, McLellans, McDougalls, with Frasers and Stuarts and the French Frobishers. A Mackenzie, a Fraser, and a Thompson gave their names to as many mighty rivers. That came in the natural course of things. The company found its best recruiting grounds in the highlands and enlisted the martial spirit of the mountaineers for a country where local feuds were forgotten.—Blackwood's Magazine.

CROW'S NEST COAL CO.

A special and the annual meeting of the shareholders of the Crow's Nest Pass Coal Company was held last week in Montreal. Among those present from Toronto were: Robert Jaffray, Elias Rogers, W. T. Murray, and E. Strachan Cox. Owing to the illness of Mrs. Cox, Senator George A. Cox was unable to attend the meeting. 54,000 shares out of 60,000 were represented.

By-laws were passed authorizing the increase of the capital to \$2,000,000, the increase (\$500,000) to be alloted to the shareholders at par, in the proportion of I to 3, and transferring the head offices to Toronto. Transfers of shares will be made there forthwith, no further business being done in Montreal

business being done in Montreal. Messrs. E. Strachan Cox and D. W. Baillie were appointed scrutineers, and the following were elected directors: Hon. Senator Cox, Robert Jaffray. Elias Regers, H. M. Pellatt, Thomas Walmsley. J. W. Flavelle, of Toronto; J. A. Gemmel, Q.C., Ottawa; David Morrice, William Hanson, S. Finlay, of Montreal; Wm. Fernie, of British Columbia, and J. D. Chipman, of New Brunswick. The statements of the manager and

The statements of the manager and treasurer were of a most auspicious character, and the prospects of the company were referred to in glowing terms.
