

The Church.

"Her foundations are upon the holy hills."

"Stand ye in the ways and see, and ask for the Old Paths, where is the good way, and walk therein, and ye shall find rest for your souls."

VOL. XIX.

HAMILTON, C. W. NOVEMBER 16, 1855.

No. 16.

POETRY.

THE HEAVENLY LAND.

Beyond the bounds of time,
Across the sea of life,
Where passion's billows foam and toss
In angry strife—

There is a land so bright,
That mortal cannot gaze,
But wondering stand upon the verge
In lost amaze.

The hills of glory tower
Majestic and sublime,
Above the snow-capped peaks of earth,
The Alps of Time.

Four-square the city stands,
The tower walls that rise
Are gleaming bright with precious stones
Of Paradise.

No shadows here are thrown
By lightning flash along the sky,
Or thunders roar.

The air is pure and bright,
All is serene and calm,
Nought ever enters there that can
The holy harm.

But from the throne of God
There flows a crystal stream,
And heaven's pure light upon its clear
Bright waters beam.

And where that river flows
The tree of life appears,
Yielding its monthly fruits throughout
Eternal years.

Beneath the shady bowers,
Robed in immortal green,
Glow fiercer flowers than mortal eye
E'er has seen.

Death finds no victims there,
No pain and droop and die,
For God's own hand wipes every tear
From sorrow's eye.

There night shall never come,
Nor heaven's long day be o'er,
God and the Lamb shall be their light
Forevermore.

Throughout that wide domain
Joy beams in every eye,
While angel voices join in praise
To God most high.

And with their robes of white
They worship him who pardoned them,
Through Christ, the Lamb.

Lead, my love, with them abroad,
In this heavenly day,
When heaven and earth, at thy command,
Shall pass away.

—Coleridge.

BENEFITS OF DROUGHTS, AND THE MODES IN WHICH THEY IMPROVE LAND.

It may be a consolation to those who have felt the influence of the late long and protracted dry weather, to know that drought is one of the natural causes that restore the constitution of crops, and renovate the soil. The distinction of the mineral matter of cultivated soils (taken place from two causes) is as follows:—

1. The quantity of mineral matter carried off in crops, and returned to the soil in manure.
2. Mineral matter carried off by rain water to the sea, by means of fresh water streams.

These two causes, always in operation, and counteracted by nothing, would in time render the earth a barren waste, in which no verdure would quicken, and no solitary plant take root. A rational system of agriculture would obviate the first cause of sterility, by always restoring to the soil an equivalent for the crops, and the second cause, by the application of manure, in all cases, Providence has provided a way of its own to counteract the deficiency of man, by insinuating drought at proper periods, to bring up from the deep parts of the earth food, on which plants might feed; when rain should again fall, the manner, in which drought exerts their beneficial influence is as follows:

During dry weather a continual evaporation of water takes place from the surface of the earth, which is not supplied by any from the clouds. The evaporation from the surface creates a vacuum, so far as water is concerned, which is at once filled by the water rising up from the subsoil of the land; the water rising up from the subsoil is replaced from the strata below, and in this manner the circulation of water in the earth is the reverse to that which takes place in wet weather. The progress to the surface of the water in the earth is effected itself springing in the drying up of springs, and of rivers and streams which are supported by springs. It is not, however, only the water which is brought to the surface of the earth, but also all the soluble salts which are dissolved in the water. These substances are salts of lime and magnesia, of potash and soda, and indeed whatever the subsoil of deep strata of the earth may contain.

The water on reaching the surface of the soil is evaporated, and leaves behind the mineral salts, which will here be enumerated:—

1. Lime; 2. Silica; 3. Magnesia; 4. Oxide of iron; 5. Oxide of manganese; 6. Oxide of zinc; 7. Oxide of copper; 8. Oxide of lead; 9. Oxide of silver; 10. Oxide of mercury; 11. Oxide of platinum; 12. Oxide of gold; 13. Oxide of nickel; 14. Oxide of cobalt; 15. Oxide of chromium; 16. Oxide of manganese; 17. Oxide of iron; 18. Oxide of zinc; 19. Oxide of copper; 20. Oxide of lead; 21. Oxide of silver; 22. Oxide of mercury; 23. Oxide of platinum; 24. Oxide of gold; 25. Oxide of nickel; 26. Oxide of cobalt; 27. Oxide of chromium; 28. Oxide of manganese; 29. Oxide of iron; 30. Oxide of zinc; 31. Oxide of copper; 32. Oxide of lead; 33. Oxide of silver; 34. Oxide of mercury; 35. Oxide of platinum; 36. Oxide of gold; 37. Oxide of nickel; 38. Oxide of cobalt; 39. Oxide of chromium; 40. Oxide of manganese; 41. Oxide of iron; 42. Oxide of zinc; 43. Oxide of copper; 44. Oxide of lead; 45. Oxide of silver; 46. Oxide of mercury; 47. Oxide of platinum; 48. Oxide of gold; 49. Oxide of nickel; 50. Oxide of cobalt; 51. Oxide of chromium; 52. Oxide of manganese; 53. Oxide of iron; 54. Oxide of zinc; 55. Oxide of copper; 56. Oxide of lead; 57. Oxide of silver; 58. Oxide of mercury; 59. Oxide of platinum; 60. Oxide of gold; 61. Oxide of nickel; 62. Oxide of cobalt; 63. Oxide of chromium; 64. Oxide of manganese; 65. Oxide of iron; 66. Oxide of zinc; 67. Oxide of copper; 68. Oxide of lead; 69. Oxide of silver; 70. Oxide of mercury; 71. Oxide of platinum; 72. Oxide of gold; 73. Oxide of nickel; 74. Oxide of cobalt; 75. Oxide of chromium; 76. Oxide of manganese; 77. Oxide of iron; 78. Oxide of zinc; 79. Oxide of copper; 80. Oxide of lead; 81. Oxide of silver; 82. Oxide of mercury; 83. Oxide of platinum; 84. Oxide of gold; 85. Oxide of nickel; 86. Oxide of cobalt; 87. Oxide of chromium; 88. Oxide of manganese; 89. Oxide of iron; 90. Oxide of zinc; 91. Oxide of copper; 92. Oxide of lead; 93. Oxide of silver; 94. Oxide of mercury; 95. Oxide of platinum; 96. Oxide of gold; 97. Oxide of nickel; 98. Oxide of cobalt; 99. Oxide of chromium; 100. Oxide of manganese; 101. Oxide of iron; 102. Oxide of zinc; 103. Oxide of copper; 104. Oxide of lead; 105. Oxide of silver; 106. Oxide of mercury; 107. Oxide of platinum; 108. Oxide of gold; 109. Oxide of nickel; 110. Oxide of cobalt; 111. Oxide of chromium; 112. Oxide of manganese; 113. Oxide of iron; 114. Oxide of zinc; 115. Oxide of copper; 116. Oxide of lead; 117. Oxide of silver; 118. Oxide of mercury; 119. Oxide of platinum; 120. Oxide of gold; 121. Oxide of nickel; 122. Oxide of cobalt; 123. Oxide of chromium; 124. Oxide of manganese; 125. Oxide of iron; 126. Oxide of zinc; 127. Oxide of copper; 128. Oxide of lead; 129. Oxide of silver; 130. Oxide of mercury; 131. Oxide of platinum; 132. Oxide of gold; 133. Oxide of nickel; 134. Oxide of cobalt; 135. Oxide of chromium; 136. Oxide of manganese; 137. Oxide of iron; 138. Oxide of zinc; 139. Oxide of copper; 140. Oxide of lead; 141. Oxide of silver; 142. Oxide of mercury; 143. Oxide of platinum; 144. Oxide of gold; 145. Oxide of nickel; 146. Oxide of cobalt; 147. Oxide of chromium; 148. Oxide of manganese; 149. Oxide of iron; 150. Oxide of zinc; 151. Oxide of copper; 152. Oxide of lead; 153. Oxide of silver; 154. Oxide of mercury; 155. Oxide of platinum; 156. Oxide of gold; 157. Oxide of nickel; 158. Oxide of cobalt; 159. Oxide of chromium; 160. Oxide of manganese; 161. Oxide of iron; 162. Oxide of zinc; 163. Oxide of copper; 164. Oxide of lead; 165. Oxide of silver; 166. Oxide of mercury; 167. Oxide of platinum; 168. Oxide of gold; 169. Oxide of nickel; 170. Oxide of cobalt; 171. Oxide of chromium; 172. Oxide of manganese; 173. Oxide of iron; 174. Oxide of zinc; 175. Oxide of copper; 176. Oxide of lead; 177. Oxide of silver; 178. Oxide of mercury; 179. Oxide of platinum; 180. Oxide of gold; 181. Oxide of nickel; 182. Oxide of cobalt; 183. Oxide of chromium; 184. Oxide of manganese; 185. Oxide of iron; 186. Oxide of zinc; 187. Oxide of copper; 188. Oxide of lead; 189. Oxide of silver; 190. Oxide of mercury; 191. Oxide of platinum; 192. Oxide of gold; 193. Oxide of nickel; 194. Oxide of cobalt; 195. Oxide of chromium; 196. Oxide of manganese; 197. Oxide of iron; 198. Oxide of zinc; 199. Oxide of copper; 200. Oxide of lead; 201. Oxide of silver; 202. Oxide of mercury; 203. Oxide of platinum; 204. Oxide of gold; 205. Oxide of nickel; 206. Oxide of cobalt; 207. Oxide of chromium; 208. Oxide of manganese; 209. Oxide of iron; 210. Oxide of zinc; 211. Oxide of copper; 212. Oxide of lead; 213. Oxide of silver; 214. Oxide of mercury; 215. Oxide of platinum; 216. Oxide of gold; 217. Oxide of nickel; 218. Oxide of cobalt; 219. Oxide of chromium; 220. Oxide of manganese; 221. Oxide of iron; 222. Oxide of zinc; 223. Oxide of copper; 224. Oxide of lead; 225. Oxide of silver; 226. Oxide of mercury; 227. Oxide of platinum; 228. Oxide of gold; 229. Oxide of nickel; 230. Oxide of cobalt; 231. Oxide of chromium; 232. Oxide of manganese; 233. Oxide of iron; 234. Oxide of zinc; 235. Oxide of copper; 236. Oxide of lead; 237. Oxide of silver; 238. Oxide of mercury; 239. Oxide of platinum; 240. Oxide of gold; 241. Oxide of nickel; 242. Oxide of cobalt; 243. Oxide of chromium; 244. Oxide of manganese; 245. Oxide of iron; 246. Oxide of zinc; 247. Oxide of copper; 248. Oxide of lead; 249. Oxide of silver; 250. Oxide of mercury; 251. Oxide of platinum; 252. Oxide of gold; 253. Oxide of nickel; 254. Oxide of cobalt; 255. Oxide of chromium; 256. Oxide of manganese; 257. Oxide of iron; 258. Oxide of zinc; 259. Oxide of copper; 260. Oxide of lead; 261. Oxide of silver; 262. Oxide of mercury; 263. Oxide of platinum; 264. Oxide of gold; 265. Oxide of nickel; 266. Oxide of cobalt; 267. Oxide of chromium; 268. Oxide of manganese; 269. Oxide of iron; 270. Oxide of zinc; 271. Oxide of copper; 272. Oxide of lead; 273. Oxide of silver; 274. Oxide of mercury; 275. Oxide of platinum; 276. Oxide of gold; 277. Oxide of nickel; 278. Oxide of cobalt; 279. Oxide of chromium; 280. Oxide of manganese; 281. Oxide of iron; 282. Oxide of zinc; 283. Oxide of copper; 284. Oxide of lead; 285. Oxide of silver; 286. Oxide of mercury; 287. Oxide of platinum; 288. Oxide of gold; 289. Oxide of nickel; 290. Oxide of cobalt; 291. Oxide of chromium; 292. Oxide of manganese; 293. Oxide of iron; 294. Oxide of zinc; 295. Oxide of copper; 296. Oxide of lead; 297. Oxide of silver; 298. Oxide of mercury; 299. Oxide of platinum; 300. Oxide of gold; 301. Oxide of nickel; 302. Oxide of cobalt; 303. Oxide of chromium; 304. Oxide of manganese; 305. Oxide of iron; 306. Oxide of zinc; 307. Oxide of copper; 308. Oxide of lead; 309. Oxide of silver; 310. Oxide of mercury; 311. Oxide of platinum; 312. Oxide of gold; 313. Oxide of nickel; 314. Oxide of cobalt; 315. Oxide of chromium; 316. Oxide of manganese; 317. Oxide of iron; 318. Oxide of zinc; 319. Oxide of copper; 320. Oxide of lead; 321. Oxide of silver; 322. Oxide of mercury; 323. Oxide of platinum; 324. Oxide of gold; 325. Oxide of nickel; 326. Oxide of cobalt; 327. Oxide of chromium; 328. Oxide of manganese; 329. Oxide of iron; 330. Oxide of zinc; 331. Oxide of copper; 332. Oxide of lead; 333. Oxide of silver; 334. Oxide of mercury; 335. Oxide of platinum; 336. Oxide of gold; 337. Oxide of nickel; 338. Oxide of cobalt; 339. Oxide of chromium; 340. Oxide of manganese; 341. Oxide of iron; 342. Oxide of zinc; 343. Oxide of copper; 344. Oxide of lead; 345. Oxide of silver; 346. Oxide of mercury; 347. Oxide of platinum; 348. Oxide of gold; 349. Oxide of nickel; 350. Oxide of cobalt; 351. Oxide of chromium; 352. Oxide of manganese; 353. Oxide of iron; 354. Oxide of zinc; 355. Oxide of copper; 356. Oxide of lead; 357. Oxide of silver; 358. Oxide of mercury; 359. Oxide of platinum; 360. Oxide of gold; 361. Oxide of nickel; 362. Oxide of cobalt; 363. Oxide of chromium; 364. Oxide of manganese; 365. Oxide of iron; 366. Oxide of zinc; 367. Oxide of copper; 368. Oxide of lead; 369. Oxide of silver; 370. Oxide of mercury; 371. Oxide of platinum; 372. Oxide of gold; 373. Oxide of nickel; 374. Oxide of cobalt; 375. Oxide of chromium; 376. Oxide of manganese; 377. Oxide of iron; 378. Oxide of zinc; 379. Oxide of copper; 380. Oxide of lead; 381. Oxide of silver; 382. Oxide of mercury; 383. Oxide of platinum; 384. Oxide of gold; 385. Oxide of nickel; 386. Oxide of cobalt; 387. Oxide of chromium; 388. Oxide of manganese; 389. Oxide of iron; 390. Oxide of zinc; 391. Oxide of copper; 392. Oxide of lead; 393. Oxide of silver; 394. Oxide of mercury; 395. Oxide of platinum; 396. Oxide of gold; 397. Oxide of nickel; 398. Oxide of cobalt; 399. Oxide of chromium; 400. Oxide of manganese; 401. Oxide of iron; 402. Oxide of zinc; 403. Oxide of copper; 404. Oxide of lead; 405. Oxide of silver; 406. Oxide of mercury; 407. Oxide of platinum; 408. Oxide of gold; 409. Oxide of nickel; 410. Oxide of cobalt; 411. Oxide of chromium; 412. Oxide of manganese; 413. Oxide of iron; 414. Oxide of zinc; 415. Oxide of copper; 416. Oxide of lead; 417. Oxide of silver; 418. Oxide of mercury; 419. Oxide of platinum; 420. Oxide of gold; 421. Oxide of nickel; 422. Oxide of cobalt; 423. Oxide of chromium; 424. Oxide of manganese; 425. Oxide of iron; 426. Oxide of zinc; 427. Oxide of copper; 428. Oxide of lead; 429. Oxide of silver; 430. Oxide of mercury; 431. Oxide of platinum; 432. Oxide of gold; 433. Oxide of nickel; 434. Oxide of cobalt; 435. Oxide of chromium; 436. Oxide of manganese; 437. Oxide of iron; 438. Oxide of zinc; 439. Oxide of copper; 440. Oxide of lead; 441. Oxide of silver; 442. Oxide of mercury; 443. Oxide of platinum; 444. Oxide of gold; 445. Oxide of nickel; 446. Oxide of cobalt; 447. Oxide of chromium; 448. Oxide of manganese; 449. Oxide of iron; 450. Oxide of zinc; 451. Oxide of copper; 452. Oxide of lead; 453. Oxide of silver; 454. Oxide of mercury; 455. Oxide of platinum; 456. Oxide of gold; 457. Oxide of nickel; 458. Oxide of cobalt; 459. Oxide of chromium; 460. Oxide of manganese; 461. Oxide of iron; 462. Oxide of zinc; 463. Oxide of copper; 464. Oxide of lead; 465. Oxide of silver; 466. Oxide of mercury; 467. Oxide of platinum; 468. Oxide of gold; 469. Oxide of nickel; 470. Oxide of cobalt; 471. Oxide of chromium; 472. Oxide of manganese; 473. Oxide of iron; 474. Oxide of zinc; 475. Oxide of copper; 476. Oxide of lead; 477. Oxide of silver; 478. Oxide of mercury; 479. Oxide of platinum; 480. Oxide of gold; 481. Oxide of nickel; 482. Oxide of cobalt; 483. Oxide of chromium; 484. Oxide of manganese; 485. Oxide of iron; 486. Oxide of zinc; 487. Oxide of copper; 488. Oxide of lead; 489. Oxide of silver; 490. Oxide of mercury; 491. Oxide of platinum; 492. Oxide of gold; 493. Oxide of nickel; 494. Oxide of cobalt; 495. Oxide of chromium; 496. Oxide of manganese; 497. Oxide of iron; 498. Oxide of zinc; 499. Oxide of copper; 500. Oxide of lead; 501. Oxide of silver; 502. Oxide of mercury; 503. Oxide of platinum; 504. Oxide of gold; 505. Oxide of nickel; 506. Oxide of cobalt; 507. Oxide of chromium; 508. Oxide of manganese; 509. Oxide of iron; 510. Oxide of zinc; 511. Oxide of copper; 512. Oxide of lead; 513. Oxide of silver; 514. Oxide of mercury; 515. Oxide of platinum; 516. Oxide of gold; 517. Oxide of nickel; 518. Oxide of cobalt; 519. Oxide of chromium; 520. Oxide of manganese; 521. Oxide of iron; 522. Oxide of zinc; 523. Oxide of copper; 524. Oxide of lead; 525. Oxide of silver; 526. Oxide of mercury; 527. Oxide of platinum; 528. Oxide of gold; 529. Oxide of nickel; 530. Oxide of cobalt; 531. Oxide of chromium; 532. Oxide of manganese; 533. Oxide of iron; 534. Oxide of zinc; 535. Oxide of copper; 536. Oxide of lead; 537. Oxide of silver; 538. Oxide of mercury; 539. Oxide of platinum; 540. Oxide of gold; 541. Oxide of nickel; 542. Oxide of cobalt; 543. Oxide of chromium; 544. Oxide of manganese; 545. Oxide of iron; 546. Oxide of zinc; 547. Oxide of copper; 548. Oxide of lead; 549. Oxide of silver; 550. Oxide of mercury; 551. Oxide of platinum; 552. Oxide of gold; 553. Oxide of nickel; 554. Oxide of cobalt; 555. Oxide of chromium; 556. Oxide of manganese; 557. Oxide of iron; 558. Oxide of zinc; 559. Oxide of copper; 560. Oxide of lead; 561. Oxide of silver; 562. Oxide of mercury; 563. Oxide of platinum; 564. Oxide of gold; 565. Oxide of nickel; 566. Oxide of cobalt; 567. Oxide of chromium; 568. Oxide of manganese; 569. Oxide of iron; 570. Oxide of zinc; 571. Oxide of copper; 572. Oxide of lead; 573. Oxide of silver; 574. Oxide of mercury; 575. Oxide of platinum; 576. Oxide of gold; 577. Oxide of nickel; 578. Oxide of cobalt; 579. Oxide of chromium; 580. Oxide of manganese; 581. Oxide of iron; 582. Oxide of zinc; 583. Oxide of copper; 584. Oxide of lead; 585. Oxide of silver; 586. Oxide of mercury; 587. Oxide of platinum; 588. Oxide of gold; 589. Oxide of nickel; 590. Oxide of cobalt; 591. Oxide of chromium; 592. Oxide of manganese; 593. Oxide of iron; 594. Oxide of zinc; 595. Oxide of copper; 596. Oxide of lead; 597. Oxide of silver; 598. Oxide of mercury; 599. Oxide of platinum; 600. Oxide of gold; 601. Oxide of nickel; 602. Oxide of cobalt; 603. Oxide of chromium; 604. Oxide of manganese; 605. Oxide of iron; 606. Oxide of zinc; 607. Oxide of copper; 608. Oxide of lead; 609. Oxide of silver; 610. Oxide of mercury; 611. Oxide of platinum; 612. Oxide of gold; 613. Oxide of nickel; 614. Oxide of cobalt; 615. Oxide of chromium; 616. Oxide of manganese; 617. Oxide of iron; 618. Oxide of zinc; 619. Oxide of copper; 620. Oxide of lead; 621. Oxide of silver; 622. Oxide of mercury; 623. Oxide of platinum; 624. Oxide of gold; 625. Oxide of nickel; 626. Oxide of cobalt; 627. Oxide of chromium; 628. Oxide of manganese; 629. Oxide of iron; 630. Oxide of zinc; 631. Oxide of copper; 632. Oxide of lead; 633. Oxide of silver; 634. Oxide of mercury; 635. Oxide of platinum; 636. Oxide of gold; 637. Oxide of nickel; 638. Oxide of cobalt; 639. Oxide of chromium; 640. Oxide of manganese; 641. Oxide of iron; 642. Oxide of zinc; 643. Oxide of copper; 644. Oxide of lead; 645. Oxide of silver; 646. Oxide of mercury; 647. Oxide of platinum; 648. Oxide of gold; 649. Oxide of nickel; 650. Oxide of cobalt; 651. Oxide of chromium; 652. Oxide of manganese; 653. Oxide of iron; 654. Oxide of zinc; 655. Oxide of copper; 656. Oxide of lead; 657. Oxide of silver; 658. Oxide of mercury; 659. Oxide of platinum; 660. Oxide of gold; 661. Oxide of nickel; 662. Oxide of cobalt; 663. Oxide of chromium; 664. Oxide of manganese; 665. Oxide of iron; 666. Oxide of zinc; 667. Oxide of copper; 668. Oxide of lead; 669. Oxide of silver; 670. Oxide of mercury; 671. Oxide of platinum; 672. Oxide of gold; 673. Oxide of nickel; 674. Oxide of cobalt; 675. Oxide of chromium; 676. Oxide of manganese; 677. Oxide of iron; 678. Oxide of zinc; 679. Oxide of copper; 680. Oxide of lead; 681. Oxide of silver; 682. Oxide of mercury; 683. Oxide of platinum; 684. Oxide of gold; 685. Oxide of nickel; 686. Oxide of cobalt; 687. Oxide of chromium; 688. Oxide of manganese; 689. Oxide of iron; 690. Oxide of zinc; 691. Oxide of copper; 692. Oxide of lead; 693. Oxide of silver; 694. Oxide of mercury; 695. Oxide of platinum; 696. Oxide of gold; 697. Oxide of nickel; 698. Oxide of cobalt; 699. Oxide of chromium; 700. Oxide of manganese; 701. Oxide of iron; 702. Oxide of zinc; 703. Oxide of copper; 704. Oxide of lead; 705. Oxide of silver; 706. Oxide of mercury; 707. Oxide of platinum; 708. Oxide of gold; 709. Oxide of nickel; 710. Oxide of cobalt; 711. Oxide of chromium; 712. Oxide of manganese; 713. Oxide of iron; 714. Oxide of zinc; 715. Oxide of copper; 716. Oxide of lead; 717. Oxide of silver; 718. Oxide of mercury; 719. Oxide of platinum; 720. Oxide of gold; 721. Oxide of nickel; 722. Oxide of cobalt; 723. Oxide of chromium; 724. Oxide of manganese; 725. Oxide of iron; 726. Oxide of zinc; 727. Oxide of copper; 728. Oxide of lead; 729. Oxide of silver; 730. Oxide of mercury; 731. Oxide of platinum; 732. Oxide of gold; 733. Oxide of nickel; 734. Oxide of cobalt; 735. Oxide of chromium; 736. Oxide of manganese; 737. Oxide of iron; 738. Oxide of zinc; 739. Oxide of copper; 740. Oxide of lead; 741. Oxide of silver; 742. Oxide of mercury; 743. Oxide of platinum; 744. Oxide of gold; 745. Oxide of nickel; 746. Oxide of cobalt; 747. Oxide of chromium; 748. Oxide of manganese; 749. Oxide of iron; 750. Oxide of zinc; 751. Oxide of copper; 752. Oxide of lead; 753. Oxide of silver; 754. Oxide of mercury; 755. Oxide of platinum; 756. Oxide of gold; 757. Oxide of nickel; 758. Oxide of cobalt; 759. Oxide of chromium; 760. Oxide of manganese; 761. Oxide of iron; 762. Oxide of zinc; 763. Oxide of copper; 764. Oxide of lead; 765. Oxide of silver; 766. Oxide of mercury; 767. Oxide of platinum; 768. Oxide of gold; 769. Oxide of nickel; 770. Oxide of cobalt; 771. Oxide of chromium; 772. Oxide of manganese; 773. Oxide of iron; 774. Oxide of zinc; 775. Oxide of copper; 776. Oxide of lead; 777. Oxide of silver; 778. Oxide of mercury; 779. Oxide of platinum; 780. Oxide of gold; 781. Oxide of nickel; 782. Oxide of cobalt; 783. Oxide of chromium; 784. DETAILS BY THE "ASIA" THE WAR. DEFEAT OF THE RUSSIANS AT KARS.

Though there has, as yet, no report been received from the Generals commanding in Kars, the subjoined narrative leaves no doubt of the heroic and successful defence of the garrison. The English officers headed the Turks with great bravery.

Yesterday evening there arrived here an express with letters of the 30th September from Kars. The letters were written in the evening, and contained the intelligence that on the morning of that day the Russians invested Kars on all sides in full force.

The batteries at Kars opened a murderous fire on the besiegers. Three times did the Russians gain a footing in the Turkish intrenchments—and three times were they driven out by the Turks at the point of the bayonet.

Colonel Lake distinguished himself in the contest, not only by his courage, but by his skill. It was he who drove the enemy from the Inglis Tabia. Eight hundred Russians were slain before a redoubt defended by four hundred Turks.

columns were told off for this purpose. They were also formed in battalions by columns under the command of Lieut.-Gen. Prince Gagarin, and also a general reserve; lastly, a special detachment was to act according to special arrangements.

The attack of Major-General Bazine was crowned with success; but unfortunately, almost at the commencement of the onslaught several of the principal chiefs and commanders under their orders were killed or wounded.

The result of this was that the unity of the operations were broken, and the most brilliant efforts during a sanguinary combat lasting several hours could not re-establish it.

General Mouraviev having convinced himself of this caused the reserve to advance, and under its protection ordered the assaulting columns to effect their retreat. The obstinacy with which our troops fought is beyond all praise.

THE BRITISH CAMP AND ARMY.

CAMP OF THE ALLIED ARMIES ON THE TCHERNAYA.—Tuesday, Oct. 9.—On the Sebastopol side of our line [for now there is no more front and rear as when the siege was going on] everything remains in statu quo.

The French are still pushing on to the right, and now reach the upper part of the Bolbek river. The Russians are retiring before them. From every side we hear that the enemy is falling back by detachments upon Porokop, and the gradually diminishing extent of the encampment, which can be observed over the Inkermann heights, appears to give support to these assertions.

only labour is rather great. Besides these underground huts, the ruins of the houses of Kamara are repaired, and made again fit to receive stores.

The French nearly every day make reconnaissances in the direction of Aidout, and towards the river, but without meeting with any considerable force of the enemy.

The French keep excellent order in the villages they occupy—no soldier is allowed to go into a house, to the great satisfaction of the people, who, like all Oriental people, are very particular about their domestic privacy.

The French are still pushing on to the right, and now reach the upper part of the Bolbek river. The Russians are retiring before them. From every side we hear that the enemy is falling back by detachments upon Porokop, and the gradually diminishing extent of the encampment, which can be observed over the Inkermann heights, appears to give support to these assertions.

A REMEDY FOR LOW SPIRITS.

In spite of all the gaiety and the cheerfulness which appears on the surface of things, there are not a few persons who, without any special cause to cause it, are frequently in what are termed low spirits.

The troops continue remarkably healthy. Their duties are comparatively light. Excepting the guards for the divisional staff establishments, the usual regimental guards, and those in the part of Sebastopol occupied by the British, they are chiefly employed on fatigue duties.

Change I had wrote to you a considerable change took place all along our line. It is one of those changes which, without materially altering the relative position of the two parties, serves to determine more distinctly their respective situations, and thus puts an end to the vagueness and uncertainty which must have struck every looker-on as the characteristic feature of the epoch which has elapsed since the fall of Sebastopol.

There is very little to be seen of the Russians in that neighborhood. They have entirely left the left bank of the Tebouliou, and their most advanced Cossack videttes are down on the road where it approaches the gorge formed by the Mackazte plateau.

On the 22nd the allies, 20,000 to 40,000 strong, a rancor from Euzatoria on Toustant. The arrival on the 22nd at the heights of Ashaga Jamin; but seeing the movement of the Russian Lancers on their left flank, they retired behind Akatch. Between Kintaba and Nicolaid nothing new has occurred.

The who of the militia has been ordered on the 22nd to reinforce the army of the South under Gen. Lamoignon. The Car is at present at Elzabze-zraz.

The following is from Marsolles:—The embarkation for the East continues here. Within a few days about 10,000 men have left our port, and the local journals announce that from 3000 to 4000 of the 82nd Regiment, the artillery and the siege train, arrived from the 13th to the 17th for the same destination.

It is confidently affirmed that Porokop will be completely in the power of 30,000 men, it is stated to be disembarked to the north of Porokop, while another corps is to be placed before the fortress, to invest it on the other side.

UNITED STATES.

Of the number of the New York Herald containing the announcement of the fall of Sebastopol, more than 200,000 copies were sold.

MINUTEMEN OF THE UNITED STATES NAVY.—It is mentioned as a fact worthy of notice that the naval armament destroyed by the Russians themselves, to prevent it from falling into the hands of their enemies, exceeded in number of guns the whole naval force of the United States.

An extraordinary decrease has taken place in the number of German emigrants to America during the present year. In 1854, no less than 76,000 passed by way of Bremen a number which has been reduced in the present year to less than 20,000.

To KEEP SILK.—Silk articles should not be kept folded in white paper; as the chloride of lime used in bleaching the paper will probably impair the colour of the silk.

BARNUM ON ADVERTISING.—In a speech lately delivered at Burlington, Vt., among other things, he advised every one to take a newspaper and to advertise their business, and to keep posted up in the general affairs of the world.

BIDDING THE TONGUE.—Resolved, by the grace of God, never to speak much. I often speak too much; and not to speak at all, rather than to no purpose: always to make my tongue and heart go together, so as never to speak with the one what I do not think in the other: always to speak of other men's sins only before their faces, and of their virtues only behind their backs.

The last number of Silliman's Journal contains an account of that remarkable curiosity, the pitch lake of Trinidad, W. I. It is situated on the western shore of the island, near the village of La Brava, which is built on a foundation of hard pitch.

The water in the streams and small pools is pure and soft; fish are numerous in them, and alligators make their abode in them. The water appears to be in its vicinity, and about a mile northward there is a bed of brown sand 20 feet thick, and appears from its dip as if it passed under the lake.

According to a letter from St. Petersburg the Emperor Alexander's mind is becoming afflicted. He has grown exceedingly religious since his troops have been very warmly hailed in the provinces, and he is taking the Providence to accord to him a victory.

It is likewise stated that his train includes more priests than generals.

A LAKE OF PITCH.

The pitch lake of Trinidad, W. I. It is situated on the western shore of the island, near the village of La Brava, which is built on a foundation of hard pitch. The lake stands about 90 feet on a plateau above this village, in circular, and half a mile in diameter, surrounded on all sides with a dense forest.

The water in the streams and small pools is pure and soft; fish are numerous in them, and alligators make their abode in them. The water appears to be in its vicinity, and about a mile northward there is a bed of brown sand 20 feet thick, and appears from its dip as if it passed under the lake.

According to a letter from St. Petersburg the Emperor Alexander's mind is becoming afflicted. He has grown exceedingly religious since his troops have been very warmly hailed in the provinces, and he is taking the Providence to accord to him a victory.

It is likewise stated that his train includes more priests than generals.

It is likewise stated that his train includes more priests than generals.

"SUSPICIOUS MOVEMENT."—A correspondent of the Paris Presse:—"There is a suspicious movement throughout Italy. The Pope, it is reported, declines to trust himself in Rome, where he was to return this week, and proposes to remain for the present at Castel Guadolo.

Beacon fires, as in 1820 and 1848, have been seen occasionally at night on the mountain near Radiconia, communicating with others near Monte Fiascone and Viterbo, and on the Appenines above Lucca and Massa, northward. The withdrawal of the Austrian troops from Tuscany, the junction of the Sardinian army with the Allies, and the sight of the Italian tricolor on the Mediterranean waters, in honoured alliance with the two great nations, France and England, have assuredly given an impulse to those who desire to follow the example of Constitutional Sardinia."

Hamilton, Friday, November 18th 1855.

The Church. ST. JAMES'S ENDOWMENT.

A Churchman lives for the Church and in the Church, it is the home of his heart's dearest affections, he feels that it is well nigh the only reality in life, the only fact which tinges the shadows of time with the glowing hue of eternal verities.

These thoughts are suggested by the painful thought, alas, as respects this Diocese, the ordinary fact that during our recent visit of several days to Toronto, we heard the sound of no church-gong bell, nor saw the doors of one single holy sanctuary open for prayer and praise, either public or private.

The Church alone seems unaffected by this unwonted stir of life; the Clergy, when dependent on their people, miserably supported, left to feel that they alone, of all the liberal professions, are bitter sufferers by the very prosperity that is enriching their flocks; Her debts unpaid; Her very towers unfinished; and above all, Her doors closed six days out of seven, because Her lukewarm children feel no desire to thank the author of their abundance, or to pray that their riches may not be the means of shutting for ever the gates of heaven against them.

BISHOPS.—A NEW ARTICLE OF IMPORT. Our attention has been called to an article in a late number of the Canadian Manufacturer under the above caption. We republish it as it contains much that deserves the serious consideration of our readers.

We are not aware that any of the students at Trinity College who have entered on the Divinity Course have been induced to turn their studies into other channels; but we are happy to be able to state, on the best authority, that the number of young men holding Divinity Scholarships and other declared Theological Students in that excellent and prosperous institution, at present amounts to Twenty-eight.

large has a claim. When the Clergy or Laity come up to Toronto from the country, they have often an hour at their command, which they could not so easily have at home, had they even the opportunity of daily service there, which, alas, they have not; hence they look for an opportunity of worshipping God even on the week day in the chief city of the Diocese. They also crave to do so with an order and solemnity, and a sublimity which they cannot of course expect to enjoy in our country Churches.

But St. James's has for the present, the honor of being the Cathedral Church of the Diocese; hence, on this account also, the majesty of Almighty God requires that in this the Church, the mother Church, for the time being, of the Diocese, His worship, should, as soon as practicable, be held daily, morning and evening as His Church, and especially the Anglican portion thereof, has ever enjoyed, not to do so would seem to us to imply something like marked contempt, and this we well know, the earnest minded Rector of St. James's would shudder to contemplate.

Our readers will perceive that we do not agree with those who have thought a division of St. James's endowment desirable. The first object of all worship should be the Divine Glory; the second the Church's profit. Now we feel assured that both of these objects are best answered by securing at least, in the chief Church in the Diocese the constant worship of the Most High with all those circumstances of dignity, beauty, and taste which God and His Church have sanctioned, such as the noble building; illuminated windows, and chastely, yet richly ornamented interior, with the constant accompaniment whenever the voice of prayer and praise is heard, of the solemn organ, and the full and well instructed choir.

place us in our proper position as regards the Romish Schism in Toronto; it would teach the people the duty of honoring God, it would increase that invaluable feature of the Communion of Saints which consists in United supplication and prayer; it would lead the sincere in our country parishes to the Church by the holy glory of its Diocesan centre, while it would greatly strengthen the hands of the rural clergy, in their efforts to lead their people to more constant worship and thus to elevate the tone of their piety. This then we esteem the true use of St. James's large endowment.

May it Roverend Rector be so enabled to carry out this most desirable arrangement at once; to bless the Church beyond all calculation, and secure to himself the glorious fulfilment of the promise, "Them that honor me, I will honor," and again, "Whosoever therefore shall confess me before men, I will confess also before my Father which is in Heaven."

But, let us not forget to be thoughtful, that amidst these causes of despondency, we learned one fact, at last, that is calculated to cheer our hearts, it was this,—that, as we hope by the overruling of a gracious Providence, who cares for his people infinitely more than they do for themselves, the revenue arising from the endowments of the Rectory of St. James's Church, Toronto, is rapidly increasing.

Now our satisfaction arises from the fact that this surplus will afford a legitimate means of establishing the DAILY SERVICE with that dignity which it becomes Diocese that has been so highly favored as ours, to celebrate the worship of their Incarnate God in at least one of its Churches. Upon a Church, the revenue of which is so great, as we understand that of St. James's will soon become, we also think that the Diocese at

large has a claim. When the Clergy or Laity come up to Toronto from the country, they have often an hour at their command, which they could not so easily have at home, had they even the opportunity of daily service there, which, alas, they have not; hence they look for an opportunity of worshipping God even on the week day in the chief city of the Diocese.

But St. James's has for the present, the honor of being the Cathedral Church of the Diocese; hence, on this account also, the majesty of Almighty God requires that in this the Church, the mother Church, for the time being, of the Diocese, His worship, should, as soon as practicable, be held daily, morning and evening as His Church, and especially the Anglican portion thereof, has ever enjoyed, not to do so would seem to us to imply something like marked contempt, and this we well know, the earnest minded Rector of St. James's would shudder to contemplate.

THE LATE LIEUT. COLONEL KENNEDY.

Lieut. Col. Arthur Kennedy of the 10th Hussars, was the third son of the late John Kennedy, Esq., of Conny, County Down.

Lieut. Colonel Kennedy died at Hallybrann, Randalstown, County Antrim, on the 15th September last, aged Seventy-four years.

Mr. Kennedy was uncle to the Rev. J. Kennedy, Missionary at Mersea, C. W.

ATTEMPT TO BURN THE PORT SARINIA GAOL.—A most malicious attempt was made on the 8th instant to burn the Gaol and Court House at Port Sarinia.

HAMILTON ASSIZES. Nov. 7th. Carr vs. Caldwell. Action for slander; verdict for plaintiff, 1s. damages.

Richard Cault, charged with stabbing Duncan Cauder, near Dundas; found "guilty of stabbing with intent to do bodily harm" sentenced to five years in the Penitentiary.

William Graham, James Kidd, James Riley, and Thomas Penderville—Larceny—Four months in gaol, with hard labor.

Samuel Cooper—Larceny—One month in gaol, with hard labor.

John Connel—Larceny—Four months in gaol, with hard labor.

Alex. Sharpe—Larceny—Three months in gaol, with hard labor.

Daniel Hanley and James Spears—Highway robbery—Five years each in Provincial Penitentiary.

T. Norman—Stabbing—Two years in Provincial Penitentiary.

John Blakeney—Stabbing—Four months in gaol, with hard labor.

William Adams—Horse stealing—Four years in the Provincial Penitentiary.

John Markle—Necessary before the fact, in the Assault and Robbery on a blind man—Two years in the Provincial Penitentiary.

Donnelly, a little boy of 7 or 8 years of age, whose head did not reach over the dock, was brought up, "No Bill" having been found, he was discharged, with an indignant rebuke from His Lordship to the parties who had brought the child there.

FALL, 1855.

JOHN CHARLESWORTH. WOULD respectfully intimate to the public generally, that his Stock of FALL AND WINTER DRY GOODS are being received by the various arrivals from the British and Foreign Markets.

Dry Goods Department. Will consist in part, as follows:—Bunnet and Cap Ribbons, Muslin and Lace Stripes, Habit Silks, and Colours, Laces and Edgings, Gloves, Hosiery and Haberdashery, Clothing, Ornaments and Circassian Cloths, Printed Calicoes and Delaines, Double Twilled Colours, and a great variety of other Fancy Goods for seasonable Dress.

millinery Department. Will be well supplied with all that is requisite for the season, in Caps, Head Dresses, Mantillas, Cloaks, Bonnets, &c. in great variety.
