"July 1st, 1825.—Messrs. John Donaldson, John Richardson, William Porter, and William Parker, offered to contract for part of the Deep Cut, except quicksand, ruck, or hard pan. (Section No. 1.)

Jame 28th.—Messrs Thomas Paterson and John Coulter, offer for Section No. 5 on the summit ridge, to the bottom, also No. 6, "all excepting rock and quicksand."

July 1.—David Thompson, Duncan Kennedy, James Mc-Naughton, Peter McArthur, David Thorburn (now one of the Directors for the Colony) and Andrew Thompson, offer to take Sections No. 1 to 6, and to complete the same "with the exception of quicksand or hardpan."

July 1.—David and Richard Thompson, for Section 2, make the same exception.

July 1.—Alexander Campbell and Co., for Section 1, excluding water, quicksand, hardpan, and rock.

July 1.—J. B. Lowry, excepts such obstacles "as rocks, quicksands, or an unequal quantity of water," in offering for Section 5.

July 1.—Wm. E. Perrine, Sylvester Lothrop, S. Hecox and John Drake, at the harbor in the Chippawa, would charge \$1 per cubic yard if they came to," quicksand"

The above contractors, and Robert Blevins, Thomas Benedict and others, offer for 6 sections at less than 25 cents—but to have a dollar if they came to "quicksand."

July 2.—Norton, Camp, and others propose, for "quick-sands" from 34 to 40 cents.

July 1.—Simpson, Brainard and Co. would take double price for excavation of "quicksand" and "all excavation of rock, hardpan, and quicksand, and all necessary extra pumping and ditching," to be at the apprisal of the Engineers, &c.

October 25 —Pratt and Simpson, provide that "quicksands" &c. are to be prized by the Engineer, if any are found.

October 25.—Henry Robinson and Co. except in their offer, "rock, quicksand, and hardpan."

October 25, 1825.—E. S. S. Pelt, offer for several sections, but provide that "rock, water and quicksand to have extra pay, if found."

October 25.—T. Brundage also excepts quicksand, hardpan, and rock:

"As does John Richardson, in his offer to excavate Section 14.

July 2.—Fenton and Williams propose to construct a lock at the Chippawa, and do certain excavation'; and, they add, "run our own risk of rock, hardpan and quicksand." Affred Hovey went their security and John H. Dunn's signature shews that their contract was accepted. It never was fulfilled.

John and James Clowes offer for 6 Sections, requiring no addition for "quicksand," Sza. except where met with in the lower level.

July 1.—Bell, Richardson and Co. annex a proviso to their proposals, that if "any quicksand or hardpan should appear in the within sections the Commissioner shall value the same."

So early as the 15th of July, 1828, I find a bill and a return of 258 men, 7 yoke of Oxen and three horses, who "had worked by the direction of Mr. Barrett, deepening part of the canal," "in consequence of a large portion of the banks giving way." Yet, singular enough, no attempt was made to ascertain the nature of the bottom by sinking wells, although experience might have warned them as it had many an honest contractor.

There were other contractors who made exceptions of quicksand in offering for the excavation of the Deep Cut, viz:—the three Hartwells, 2d June, 1825; Elijah Kilbourn, July 1, 1824; Samuel Horn, Elihu Ewers, Wm. Buell and John Goodin, July 1, 1825; George Conolly, John Richardson, and Francis Galbraith; Abra Dibble, James Johnstone, and Alex. Vanalstine.

Excavation of the centre Ditch is worth seventy-five cents & cubic yard to bottom.

Excavation of whole width is worth fifty cents # cubic yard finished complete to bottom, with the exception of quicksand, water, &c.

LORY DAVIS.

May 26th, 1827.

Mr. David Thomson writes from the "Deep Cut, "10th Nov. 1828; From the last slip to Chippawa, "the clay below its surface is such that water reduces it to a soft substance that cannot resist the head "vy banks."

On the 26th of May, 1827, the Board met at the Deep Cut—Present, Dunn, two Boultons, Robinson, Wells, Keeffer, and Clark.

Oliver Phelps offered to contract for "the whole of the remainder of the Deep Cut at 25 cents, with an allowance of 2 cents additional per cubic yard for machinery." This the Board agreed to—and Mr. Phelps then executed the agreement to complete the work according to the said terms in six months from 26th May 1827. He did not fulfil his contract, no trace of which I can find in the canal office beyond the envelope in which it appears to have been wrapped. Hovey and Ward had subscribed liberally to the Canal Stock. Pheips, within a few days after he got Ward and Hovey turned out of the work subscribed for ten shares only—these he had transferred to him by Mr. Merritt. I do not believe that Ward & Hovey were the partners of Mr. Merritt the Agent; but it is also said that he was the partner of Phelps, which I think far more probable, altho I do not know that it was so.

On the 16th of May 1827, Mr. Phelps writes to Mr. Merritt, anxiously desiring that the contract for the Deep Cut excavation (over and above his 34 locks contract) should be taken from the other contractors and given to him and makes a variety of propositions, offering also about \$20,000 value in property in security.

On the 21st he again writes with a variety of propositions and apologies to the other contractors.

And again, on the 26th, suggesting that the excavation might be to his management as one concern. And another letter on the 2nd of June on the same

subject. He was to complete the excavation of the whole of the Deep Cut that same year, 1827.

Mr. Phelps is said to have excavated about 500,000 yards of earth at the Deep Cut, on his contract between June 1827 and December 1828—the prices per scale ranged from 20 to 34 cents. but this quantity is at variance with other statements which will be given in evidence.

On the 7th July 1827 he gave a bill of sale of his oxen, horses, teams, &c. to the Welland Canal Company, to whom he had also mortgaged his real estate in security of monies advanced him on the locks and Deep Cut contract.

The following deduction by the Canal Board from the money that had been lent this speculator, left him still \$30,000 in debt to the Company.

Resolved, 1st Feb'y, 1830—That the following sums be placed to the credit of Oliver Phelps on his contract at the Deep Cut, viz:

To allowance finishing Rowley's job after he left	\$ 800
For do. on cattle, teams, &c. continu-	
ing the same on land,	500
For loss on sale of cattle, the same allowance	
having been made to other contractors when Mr. Phelps took the work,	2,491
To wintering the same after the work stopped,	1,077
For superintendence at the aqueduct, as per agreement with Vice President and	
Agent,	1,000
For two years services as profferred,	2,000
£1967,	\$7,868

31st May, 1832.

PRESENT

Messrs. Dunn,
Macdonell,
Rundal and
Butler—4.

Mr. Phelps business was submitted to the Board, which was considered of too much consequence to receive any decision of the present meeting, and it is therefore referred to a future and full Board of Directors. In the meantime the Engineer is directed to state most fully the whole of the particulars in relation to those locks done under the contract of Mr. Phelps of which there appears to be a variety of opinions as to the mode of construction and deviation from model laid down for adoption, according to contract.

6th June, 1832.

PRESENT

Messieurs M'Donell,
Butler,
Greighton,
Warren, and
Randul—5.

Mr. Phelps' application was further deferred.

Resolved, That upon the application of Mr. Phelps the mortgages on his property held by the Company be given up to him. Extract from the Minutes of the Board, May 1, 1833.

PRESENT

Messieurs M'Donell, Keefer, Butler, and Creighton-4.

- "14. Shews a list of the accounts due to the Company on their books; and as it is more than likely but a small part of the same will be collected—
- "Ordered, That those accounts be closed, and an account opened, to be entitled 'Bad Debts,' and that the balances be transferred to the debit of the same, crediting said accounts with any amounts which may hereafter be received, and also with whatever old balances appear in the Company's books to the credit of any individual."

Under this supposed authority, the following entries are made on the debtor side of the account:-

" PROFIT AND LOSS."

M. Phelps also applied for the privilege of water for his stills.

Extract of a Letter from Oliver Phelps to the Honorable President and Directors of the Welland Canal Company, dated Deep Cut, 1st September, 1827.

- "I have, therefore, commenced building a large stone distillery, to run 100 hushels per day; size of building to be 66 feet by 60, with one or two run of single geared stone in one end, for chapping the grain. I have also a well of 70 feet in depth, 15 of which is water, and will afford two barrels a minute. I wish to pump this water by means of water power, which will supply all the principal uses of the distillery.
- "To accomplish the above purposes, and use on my farm, I humbly trust your Honorable Body will not deem it a liberality improperly bestowed, to grant me a deed of so much water as will pass through one of the cast iron paddle gates, which is 3 feet by 21-2; and as a remuneration to the Company, I will deed to them the ten or twelve acres of land occupied by the Canal across my premises, and also an acre of ground at each of the five locks, if wanted by the Company for hydraulic purposes"

St. Catharines, 6th July, 1827.

WM. H. MERRITT, Esq. My Dear Str.

It is with heartfelt emotion that I say to you the course that has been taken with us, destroys me. Was I the only suf-

* Since prosecuted, and a part recovered from him in the United States. No prosecution was commenced against Mr. Phelps; but so strict was the Company in some cases, that it was ordered to bring an action against Mr. Tretter, of this town, for a supposed balance or debt of a few pounds, if an action would lie.

feror, my lips would be closed. But, alas!! it is not the case—
I have a tender and affectionate wife, with her little ones, who look to me for their support; for whom T was blessed with a comfortable living previous to my present disaster. Unfortunate, unfortunate. I submit; it is the frown of Providence. My creditors must prey upon my effects so long as there is a crumb to feed their gorgeous appetites; not only so, but looked on with contempt and disgrace. I must be looked upon as unfit or incompetent, lacking energy or judgment, or both, and not worthy to be entrusted with any work of importance hereafter. I see the force; I feel the effects; I have acted in good faith, discharged a clear conscience, for which I can answer to my

Adieu.

S. WARD.

(OFFICE COPY.)

LOCKFORT, April 1, 1833.

W. H. MERRITT, Esq., St. Catharines, U. C.

I am disappointed in not meeting you at this place. You will recollect that the last time we met was at this place, when you told me that a judgment against your Company would be of no value. The favor that I now ask of you is, answering a plain question, whether it will be good at any future time, and if so,

You will recollect that at the commencement of that project, I entered heart and soul in it. I put my all at stake; more than \$25,000 was expended before a dollar was received—this was effected through the confidence I had in you, and an influence I had at that time with some of our best business capitalists and most efficient and persevering operators. The course taken by the Beard of Directors in connection with prejudicial independent. most efficient and persevering operators. The course taken by the Board of Directors, in connection with prejudicial influence exercised by Mr. Barrett over David Thomas, in making his estimate of the value, made a beggar of Ward (who died in consequence of it, in the opinion of his physicians, friends and neighbours.) The loss I sustained, and the circumstances that I was left under, you need no information from me on that point; General Beach lest no time and colors for the personal Republication of the property delication. neral Beach lost no time, and only a few thousand dollars.

If a sense of feeling, as a man, of duty, or of justice, prompts you to answer the question I ask, and give me your impartial and candid advice, I carnestly and most respectfully request it.

Your obedient servant,

ALFRED HOVEY.

198. Your 18th charge, respecting the Hydraulics, will require to be supported by a detailed statement of facts. Are you prepared to submit such a statement to this committee?

A number of important documents which throw considerable light on the transactions connected with the Hydraulics, were reported to the House, appended to the first report of the Directors on the part of the Province, about a month ago.

The House of Assembly appointed a special committee, last winter, which reported by Dr. C. Duncombe their chairman, that it was inexpedient to sanction the re-purchase of the Hydraulics until fur-ther enquiries had been made. These investigations have since taken place. When Mr. Yates and Mr. Merritt found that the Hydraulic Company could not be incorporated, they wished to bargain with the Canal Board to take the Hydraulics back again and these were the terms which Mr. Yates' nominees in the direction made with themselves in their Hydraulic partnership capacity for the re-conveyance.

They agreed that Messrs. Yates, McDonell and Creighton should retain as their own the valuable village lots and farm on the summit level of the canal, near the brow of the mountain, together with a supply of water from the canal forever, to propel the

machinery of mills they had built in that first rate situation, viz :-

- 2 Run of Stones for their Grist-Mill,
- 2 Mill Saws, an over-shot Wheel,1 Carding Machine,
- 1 Fulling Machine,
- 1 Circular Lath Saw,
- Shingle Machine, and
- 1 Macheine for cutting Ships' knees.

Also, all the money they had previously obtained for Mill privileges and land sales.

And 140 acres, being lot 27, at Gravelly Bay or Port Colborne, the grand entrance of the ship Canal from Lake Erie, an invaluable property, being re-markably well fitted for town lots in a situation which must become a populous city if the Welland Canal is kept open.

The money, property, and water power, thus retained from the Canal Company, I consider to be worth, at a moderate valuation, £10,000.

In addition to this £10,000 the Canal Board were asked to give their bonds, as a Company, for other £17,500, currency, bearing interest at 6 per cent., as a further inducement to Messrs. Yates McDonell, and Creighton, otherwise the Hydraulic Company, to give up the residue of their purchase, upon which I have not been able to ascertain that they had ever paid one shilling. And the bonds were given by the Canal Directors to the Water Company accordingly!!

The transaction is thus recorded on the day book.

- "Bonds payable, Dr. to Alexander McDonell, agent for Hy-draulic Company.
- "For the (Canal) Company's bonds, payable to order of Alex. McDonell—dated 1st September, 1834—numbered 1 to 70— payable 1st January, 1874—with 6 per cent. interest, payable half yearly, on 1st of January and 1st of July—commencing 1st January, 1834—70 bonds at \$1000 each—£17,500."

Here was a bold and it is as yet a successful attempt to extract, perhaps £27,500 from the impoverished exchequer of the Welland Canal Company, in the shape of lands, water-power, cash, and canal bonds transferable and bearing interest, and that for what may be said to be less than no consideration at all. The Canal Company were to have had conveyed to them the remainder of their own property and water power, which had been alienated by the sham sale, also the undivided two-thirds of \$6 acres of lands purchased of Oliver Phelps (a defaulter to the Canal for \$30,000 and upwards,) and the improvements made on their lands at Marshville, of a value so triffing as scarcely to be worth naming.

Mr. Thompson of Wainfleet's letter, given below, shews the sense he had of the value of the Marshville improvements. It is as follows:

WAINFLEET, October 14th, 1835.

Dear Sir:

I delayed answering your letter of the 2nd instant, with a hope of gathering the proper information from those capable of giving it. I am still uninformed, and therefore can only give my own opinion, which, from my not being accustomed to Mills, is hardly to be relied on. The Grist-Mills at Marshville, I would suppose, must have cost something like £500; and is of some calus. The Saw Mill might have cost £250, but cannot not be a few warm when the them the North Control of the same than the standard of the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same than the same tha be of any more value than the Irons, for it cannot run on account of back-water, the tail race could not be enlarged so as to discharge the water without an immense expense, which it could not

warrant—and moreover, water cannot be spared there to drive it. The whole, in my opinion, would prove a bad investment at half the sum above quoted.

Dear Sir,

Your obedient servant,

(Signed)

D. THOMPSON.

W. L. MACKENZIE, Esq. D. W. C. C.

The item £4,333 5s., in the credit taken as in part for the interest on the original purchase of the water power, is made up of the interest on the Bonds of the Company, given to Mr. Yates and his nephew for the nominal consideration of yielding up the least valuable part of a property he never paid a farthing for!!

The Mills at Allanburgh on the top level, thus withheld from the Company by some of its Directors, are infinitely more valuable privileges than those at St. Catharines and on the short levels on the face of the mountain, because the canal summit level is many miles long, and in seasons when the Mills and Machinery on short levels would be stopt for want of water, the Allanburgh Mills would be continued night and day. I understand they have been kept going night and day all last summer, although now and then with great inconvenience to loaded schooners passing on the canal. The feeder canal to Dunnville was widened and deepened at great cost to the country, in order that the Hydraulic privileges might be rendered more valuable to the Stockholders and the Colony.

The docunient purporting to be a deed to the Welland Canal Company, from Alex. (Yates) McDonell, Esq. on the part of the Hydraulic Company, is signed by him, but not by the President of the Canal Company, nor is the seal of the Corporation affixed to it. The date is Nov. 17th, 1834, the consideration money named, £37,500. Mr. McDonell re-conveys to the Company, in Humberstone, lots 27, 28, 29, 30, 31, 32 and 33 in the 4th concession, 27 in the 5th, the North halves of 29, 30, 31, 32 and 33 in the 3rd, and South parts of 23, 24 and 25 in the 5th, = 2,440 acres.

In Wainfleet, 13000 acres. In Thorold, the West half of 29, and the West half of 30, = 100 acres. In Grantham, the undivided 3rds of 36 acres, part of lot 16, 6th concession, (the Phelps property.) (excepting certain village lots at Port Robinson, and at Marshville, 150 acres, sold to Guy Atkins; John Akin 50 acres, and village lots to several persons; also to Henry Harper 100 acres, Wainfleet; to Mr. Wm. Simpson 100 acres in do.; and in St. Catharines, 5 village lots to O. Phelps, = 1\frac{1}{2} acre; 4 do. to R. E. Burns, = 1 acre.) Also all the other lands that had been conveyed to the said Alex. Yates McDonell by the Company, except the lands at Allanburgh that had been conveyed to the Company by S. Swayze and Garrett Vanderburgh, and the surplus water of the canal.

There is a bond and mortgage to the British Government, which affects every thing, I believe, except the lands.

I endeavored to ascertain the amount of money the Hydraulic Company had raised from the sale of lands and the lease of water power, besides what they retained in their own hands; but whatever it was it must have far exceeded the value of the shares of Phelps's 18 acres or of any improvements made on the property that has been returned to the Company.

CANAL OFFICE, ST. CATHARINES, September 24th, 1835.

ALEX'R McDonell, Esq. St. Catharines.

SIR.

I should be glad to receive at your earliest convenience,

- An account of the monies received by the late Hydraulic Company for water power and privileges during the time it had the control of these matters, stating also by whom the payments were made.
- 2. Any information you can give relative to the obligation the canal company or yourself are under to compensate Mr. Davidson for the loss of the Lot No. 27, 1st con. Gravelly Bay—I received from Mr. Street yesterday a copy of your Bond to him on that subject, and as the matter has been referred to the Provincial Directors for a long time past, I hope you will afford them the means of reporting, so far as it is in your power.
- 3. I am desirous to know whether you have given any titles or agreed to give any titles for part of the Lot at Gravelly Bay; I mention this because there is the greatest probability that a decidedly unfavorable report will be made to the Legislature touching the proceedings relative to the water power and alienation of lands.

I am, Sir. Your respectful and Obedient Servant, W.

W. L. MACKENZIE.

To this letter Mr. M. received no answer.

The moment the House of Assembly and the Company had decided that the grand outlet of the canal was to be at Port Colborne, they ought to have secured it at a fair price, for the benefit of a body of stockholders who have paid nearly \$500,000 in good faith, altho' receiving no dividends the benefit of such of the adjoining lands as were for sale, at a fair price. Instead of doing so, Mr. Merritt the Agent secured for himself from 100 to 200 acres on the one side of the canal, while the 140 acres on the other side were made over to Mr. McDonell. The 140 acres had been drawn by some other person; but as no patent had issued from the Crown, the Company made interest with the person who appeared to be entitled to it under a bond from his father, and the Vice President gave a bond in his favor for \$1,000 to Mr. Street he having purchased a farm in another place from that gentleman, which that sum would have repaid. Upon an assurance from the Company that the Davidsons, the true owners, would be fairly dealt with and receive an equivalent, the Executive Council recommended that a patent should issue under the great seal to the Welland Canal Company, who got the deed in March, 1834, and almost immediately after conveyed it to their Vice President, Mr. Alexander Y. McDonell, Mr. Yates's nephew, and representative. This they did by the following minute:

Sth MAY, 1834.

PRESENT.

Messrs. Merritt,
Macdonell,
Koefer,
Duncombe, and
Creighton.

"The Company have agreed to convey to the Hydraulic Company the land in Humberstone, which was promised to them by government, the doods for which were not then executed:

"Ordered—That the President be authorised and requested to execute a deed for Lot No. 27, in the 1st Concession of Humberstone, to Alexander McDonell, Esq. the agent for the said Hydraulic Company, in compliance with their original agreement."

See also minutes of 26th October, 1830, and 11th May, 1831.

Instead of settling with Davidson or his family, Mr. McDonell asked the Canal Company to bestow on him (Davidson) another of the farms yet in their possession, as some compensation for the injustice done him by the Governor and Council in conveying his (Davidson's) property to the Canal Company.—The effect of this proceeding would be to give Messrs. McDonell, Yates, and Co. the Gravelly Bay lot free, and to Davidson other 200 acres of the Company's lands for allowing McDonell to keep it! Davidson petitioned the Legislature last winter, but until lately the merits of his case were not generally understood.

In the report of the Board of Directors, dated March 1st, 1833, and signed by Alexander Mc-Donell, Wm. Chisholm, Wm. Elliott, Geo. Keefer, Ogden Creighton, and Thomas Butler, they inform the Legislature and the country (page 22,) that "Port Colborne has been retarded in consequence of "the Company not getting a title to the land adjoin-ing the harbor. As soon as this difficulty is dis-"posed of, a number of individuals are ready to "erect buildings; and from its favorable position, a " large town will suddenly supply the place of a "sunken marsh, wholly unfit for cultivation, but "which has, by the operation of the canal, been ef-fectually rendered valuable." This much for In 1834, as soon as the government had given the Company a title to the site of this future city, the Board made it over by deed to Mr. Mc-Donell their Vice President, in trust for himself, Mr. Creighton, and Mr. Yates!!!

The situation for mill power at Gravelly Bay or Port Colborne, at the ship lock into Lake Erie, may possibly prove an important one, and perhaps if it had been offered on a lease to the highest bidder, on reasonable conditions, would have yielded a handsome income, but the favoritism which has all but destroyed the usefulness of other sections of the canal, was not slow in reaching Port Colborne. Mr. A. Y. McDonell got the front farm on one side of the harbor, and Mr. Merritt grasped at the front farm on the other; then, without any order of the Board, or lease, or indeed any authority whatever, Mr. Merritt, the contractor, Capt. O. Creighton, a director, H. B. Ostrum, foreman to Merritt, Mr. McDonell, the Vice President, Thomas Scott, and H. Slate, took possession of the best situation for mills and machinery, and began to build as extensively as if it had been their own private property. I remonstrated with Mr. Merritt in July on the impropriety of his being so deeply connected in speculations which he had admitted the stockholders were desirous their President and Agent should avoid, but it was of no use. At length, in September last, a letter applying for the mill site was placed before the Board, signed by Hiram State for the parmers. Mr. Thorburn and I contended that Directors ought not to be concerned in such speculations, and as the

Legislature had declined to sanction the bargain of the water power, their application was refused.—Messrs. Merritt, McDonell, and Creighton could not well vote a lease to themselves, and Mr. Thorburn and I went in the negative, until the Legislature should express an opinion. The President addressed a letter to us, but we took no steps in the matter, heing a minority at the Board. In 1830 Mr. Merritt was asked, "What may be the value of the water privileges owned by the Company? His reply was, that "Within two years they will bring us £1,500 a year." It is now five years and I am not sure that the Company have realized £750 in all since the commencement.

St. Catharines, 2nd September, 1835.

To Mesers. Mackenzie and Thornuan,

Gentlemen: —Fearing the opinion you express in relation to water privileges will prove injurious to the interests of the Company by preventing the erection of machinery by creating distrust and lessening confidence in the proceedings of the Board.

With a view of promoting those improvements generally, I have taken a share in the Colborne Mills—which is erroneously supposed to possess extraordinary advantages. To test the truth of which it is my desire to relinquish all interest in them, as well as all other interest I possess in any water privileges on the line. In order that they may be disposed of to the best advantage for the interest of the Company, by repaying me the amount of my outlay.

I am Gentlemen,

Your obedient servant,

W. H. MERRITT,

President W. C. C.

Messrs. Merritt and Creighton came forward again, the next Board, and were for voting themselves the lease, but Mr. Thorburn and I opposed them, and Mr. Butler said he would await the action of the House of Assembly. So we foiled them for that month. In my absence at Quebec last November, they again applied to themselves, in their capacity of Directors, and authority was at length given to Mr. Merritt to lease to the two Messrs. Merritt and their associates, the valuable falls and mill sites at Port Colborne, in the following form:—

"Whereas individuals have made application for water privileges on the line of the Canal, in pursuance of the order of the
Board, and some, in good faith, have proceeded with their
erections; it is ordered, that the President (Mr. Merritt) be
authorized to make out leases to all such applicants on the
ssual terms."

Mr. Thorburn alone could not make much opposition to other four, all interested in granting themselves leases, so he protested and declined to vote. They passed another resolution to grant Thomas Butler a lease as follows:—

"Whereas Thomas Butler, Esq., has applied to the Bourd for "a lease of water power at his mills, (Merrit's,) agreeably is "the resolution of the Board upon this subject—Resolved, that the President be authorized to grant Thomas Butler his lease "without further delay."

So that while the State of New York is passing laws solemnly prohibiting persons who are concerned in the Canal management from holding or leasing water power on Canals which yield great revenues; what of individuals who have risen in Canada on the ruins of our inland navigation system are allowed to sit in conclave to contrive how best to divide among themselves the best hydraulic situations, for nothing, or at little more than a nominal consideration, and at a time, too, when the Legistic

ture has declined to admit their right to make such leases, and ordered an enquiry. They form standing orders to meet their own convenience, and say that the public has an equal chance.

I select from the late Mr. Rundall's report concerning the mill site which Messrs. Merritt, M'Donell, Creighton, and friends have seized hold of, his opinion, given when he was acting as the Parliamentary Commissioner, in 1830, before Port Colborne or the Canal ending there came into existence:

"At whatever place on the lake the ship canal shall terminate, there will be a full of probably six or seven feet, with a never-failing supply of water for mill purposes—a most important acquisition, should the navigation terminate in the Sugar-load settlement; for on the lake shore; in a distance of forty miles above Fort Eric, there is but one mill site, which, though an indifferent one, was obtained by laying upwards of six hundred acres of fertile land under water many years ago, presenting an impleasing spectacle to the eye, and generating fever among the settlers."

Whether the Mill Company have or have not obtained a lease, or whether the fall of water has or has not equalled the expectations of the persons who compose that Company, I have had no means of ascertaining.

Copy of a Minute in Council, approved by His Excellency the Lieutenant-Governor, upon the Petizion of Mr. James Davidson for a grant of Lot No. 27, in the 1st Concession of the Township of Humberstone, heretofore located by Wm. Dickson, late of Stamford, deceased.

In Council, 8th May, 1833.

It is respectfully recommended, that the order in Council of the 14th November, 1831, he resuinded, and that the Petitioner be recognized as the true claimant to whom the Welland Canal Company shall be required to transfer any lot, unlocated, upon the line of the Canal, which may be selected by him, subject to the approbation of the Commissioners appointed during the last to report upon the Welland Canal.

10HN BEIKLE,

Clerk Executive Council.

Copy of a Minute in Council on the Petition of James Davidson respecting Lot 27, in the 1st Concession of Humberstone.

In Council, 8th May, 1833.

It is respectfully recommended that the order in Council of the 14th Nov'r, 1831, be rescinded and that the Petitioner be recognized as the true claimant to whom the Welland Ganal Company shall be required to transfer any lot unlocated upon the line of the chall which may be selected by him, subject to the approbation of the Commissioners uppointed during the last session to report upon the Welland Canal.

On the petition of A. McDonell the following order in Council, 20th March, 1834.

Recommended that the patent prayed for, do issue to the Wolland Canal. They having complied with the terms of the order in Council to the Lot in question.

DEAR SIR :

In looking further into the matter, I find the two subsequent orders in Couucil, which I send you herewith copies

Yours truly.

JAMES STANTON.

Executive Council, 17th March 1835 On the issuing of the patent from the Crown for Lot No. 27, in the front of Humberstone in the county of Liucoln in the District of Niagara, in the mame of the Welland Canal Company, I agree to pay Samuel Street, Esquire, or order the sum of £250, currency for the said Welland Canal Company for value received by the said William Davidson's transfer of all right in and to a certain bond made to him and by one James Davidson obligatory to transfer on the issuing of the patent in the name of the said James Davidson as heir-ut-law of the late William Dickson, and providing the said. William Davidson delivers to me for the said Welland Canal the bond of the said James Davidson to him so made as aforesaid.

The said sum of £250 to be paid to the said Samuel Street or order for and on account of William Davidson, when the deed for the said Lot No. 27, in the township of Humberstone in the first concession on Luke Eric shall issue in the name of the said Welland Canal Company, and provided also that the said William Davidson shall on or before the expiration of five days from the date hereof surrender and deliver unto Alex. Macdonell the undersigned, the said James Davidson's bond unto the said William Davidson, conditioned for the transfer of the said Lot unto the said William Davidson his heirs or assigns, and assign the same to the said Welland Canal Company.

Witness my Hund and Scal at Wainfleet this 21st day of December, 1832.

(Signed) ALEX. McDONELL, [L.S.]

In presence of

[L.S.] PATRICK McEWEN. }

Articles of Agreement made this 9th day of June in the year 1834, between the President and Directors of the Welland Canal Company and Alexander McDonell, John B. Yates and Ogden Creighton of the second part.

company at the a place called Allanburgh and he lot and property at Gravelly Bay—And also that the said Alexander except the part lying on the montain, and all leases for property at Alexander McDonell who holds the same for the party of the second part—And whereas the said Alexander McDonell executed a mortgage for the said consideration money, and accompanied by a Bond as collateral for the same amount payable in ten years from the first day of January 1832, with the interest thereon, payable yearly on the first day of January—And whereas further it has been thought advisable on the part of said Company to re-possess the greater part of said property so as to enable the Company more fully to controul the operations on said Canal. It is therefore agreed by and between the parties aforesaid in consideration of the sum of £17,500, the said Alexander McDonell shall re-convey to the said Welland Canal Company a 1 the aforesaid Hydraulic Power and Real Estate, except the part lying on the mountain near the East end of the summit level at a place called Allanburgh and the lot and property at Gravelly Bay—And also that the said Alexander execute to the said Company a conveyance of such property except that reserved at Allenburgh as aforesaid, the said conveyances to be executed when required by said company after the following conditions shall be complied with. The said Company on its part agrees to execute in due form of law a discharge of the Bond and Mortgage, aforesaid, the said conveyances to be executed when required by said Company after the following conditions shall be complied with. The said Company on its part agrees to execute in due form of law a discharge of the Bond and Mortgage, aforesaid, the said conveyances to be executed when required by said Company after the following conditions shall be complied with. The said Company hear in parts day of July and January at the office of the Welland Canal Company to company to company and countersigned by the Focartary, and that the same be then transferrable

It is further agreed that if in consequence of any Legislative alteration of opinion heretofore expressed in relation to such an arrangement, the Legislature shall at their next Session by resolution express an opinion that such re-purchase is not necessary, the said Welland Canal Company shall be desirous to rescind this agreement now made and shall within three months after give due notice thereof to the said party of the second part, stipulate in case the property shall be placed in the state in which it now is, they will consent to such a measure and will return to the Welland Canal Company all the Bonds or Obligations which shall have been issued and received as aforesaid.

And Whereas the income from the property thus reconveyed and sold to the Welland Canal Company may not equal for a short time the semi-annual interest on the obligations the said party of the second part agree that if the amount of the reserved rent money received, or sales and proceeds of sales of timber or any product of the land shall not equal the semi-annual interest on the obligations aforesaid—they will pay an amount sufficient to pay such deficiency to the Trensurer of the Company by way of rent for the property and water at Allanburgh and the lot at Gravelly Bay.

In witness whereof, the said Welland Canal Company have caused the Seal of the said Company to be affixed to this Agreement, and signed by the President; and the said party of the second part have set their Hands and Seals at the Canal Office in St. Catharines on the day and year aforesaid.

 Secretary W. C. C.

199. What have you to state in support of the fifteenth charge?

The Canal Directors have sent four missions to London. 1st. The Hon'ble Peter Robinson, 1825; 2nd. Mr. Hamilton Merritt, 1828; 3rd. Mr. J. B. Yates, 1830; and 4th. Mr. H. B. now Chief Justice Boulton. The latter was more properly Mr. Merritt's agent, for the seal was putby him to the power of attorney, which Mr. Boulton carried home, contrary to the rules of the corporation, and without the knowledge of the then President of the Company, who was much displeased when he come to learn the nature of the transaction.

It appears that at the Canal Board, held at S. Catharines, in September, 1825, a question was brought under consideration relative to the sale of £100,000 of stock in London; that Messrs. Irvine, of Quebec, and S. McGillivray, of Montreal, were to arrange the documents to be sent to England to induce capitalists to subscribe—that to the venerable Archdeacon Strachan had been referred the task of compiling the report for London, which he had done-that no regular meeting of the Board had met to adopt his performance, and that at this casual meeting Mr. Henry J. Boulton proposed himself as the Agent to proceed to London, on condition of having his reasonable expenses, not exceeding £300 sterling, defrayed by the Board. The Canal Board consented to his going, in case the next regular monthly Board should think fit to adopt Dr. Strachan's report, agree as to the tenor and form of the power of attorney to be given him, and authorize the President to sign and affix the Company's seal to it, accompanied with suitable instructions. No sooner, however, had the canal Board separated than Mr. Boulton drew £300 sterling, of the Company's funds from New York, persuaded his friend Mr. Hamilton Merritt to affix the seal of the corporation to a power of attorney, authorizing him (Boulton) to dispose of the £100,000 stock, and collect the cash in London, and without waiting for the confirmation of the President or the approbation of a regular meeting of the Directors to these proceedings, he set off for London, via Quebec, Montreal and New York, and endeavoured to persuade Messrs. Irvine and McGillivray to alter the Archdeacon's report without the knowledge of the Board of Directors, so that he might pass it off in London as the act and report of the Canal Board.

(OFFICE COPY.)

Simon McGillivray to Hon. James Irvine.

MONTREAL, October 4th 1825.

My dear Sir:

After I had the pleasure of seeing you at Saratoga, I proceeded to the Westward, and on my return from Detroit, and after visiting York, in Upper Canada, being at length about to take a view of the Welland Canal, according to the intention which I mentioned to you, I induced Mr. Dunn, the President of our Board of Directors, to accompany me, and on the 19th ult., sailed for Ningara, where, on our landing, we heard of Mrs. Dunn's arrival at New York from England, and our worthy President instantly set off to meet her—leaving the Canal concerns to the care of his colleagues, all of whom excepting yourself, (namely, Mr. Solicitor General Boulton, Mr. Keefer, and Mr. Merritt,) I found assembled at St. Catharines.

I mention the composition of our meeting thus minutely, because our proceedings were of rather an important nature, and as they have not yet received that collective confirmation from the Board, to which I understood they were to be submitted. I am desirous that every member of the Board should have the opportunity of exercising his judgment upon them, or at least on that very important part of them, on which I am now principally to address you.

Our first proceeding was to fill the vacancy made at our Board by Mr. Buchanan's retirement, which we did by electing the Hon. Wm. Allan of York, whom I consider a valuable acquisition to our Board. To this election Mr. Dunn had previously assented, and I anticipate entire approbation from you. We determined that the Locks of our Canal should be 22 feet in width, instead of 20, as formerly proposed, and that for the reception into the harbor at the 12 mile pond, of the largest vessels on Lake Ontario, the entrance Lock into that harbor should be 32 feet wide, 125 feet long and 10 feet deep, besides the lift of 5 feet into the pond. We determined to make a dam and waste weir accross the River Welland to regulate its level, and to adopt the Grand River to the Welland, thus making Lake Eric at once the summit level, and the feeder of our Canal, and in order to preserve to the Company tho benefit of a never-failing supply of water, thus ensured, and of the numerous mill seats along the course of the Canal, from the commencement of the descent to its entrance into the Lake, we resolved to take possession of the whole of the land on both sides of the Canal, for that distance, to the length of 2 chains back from the bank theroof, or the bank of the ravine, through which it is partly to be conducted. All these measures I conceive to have been very highly proper, and the merits of them all had been previously discussed, and virtually decided—nor was it likely, from the peculiar composition of our Board, that a more numerous meeting could be found to adopt them formuly. The next proceeding to which I have to request your attention, was a more sudden measure, and as at present a little more responsibility of it rests upon myself than I am quite satisfied with, I wish by submitting the matter entirely to your con sideration, to induce you to share this responsibility with me.

The documents which in June last were promised to be propared for you and myself to arrange finally, and to transmit to England, in order to obtain the capital of £100,000, which we still require, have, it seems, been all along in preparation, and are not yet quite ready. One important part of them, the proposed Report had recently been referred to Dr. Strachan, who had, when I got to York, prepared a very able and satisfactory,

though rather a voluminous paper on the subject, and this paper was one of the documents under consideration at our meeting at St. Catharines—as also the manner of transmitting and managing the proposed appeal to England Our colleague Mr. Boutton, having at present some disposable time, in consequence of the return of the Attarney General, proposed himself to undertake this mission to England, on condition merely of his reasonable expenses (not exceeding £300) being paid, and we at once passed a resolution accepting his offer. It was arranged that the report which we had read should be revised, and a few passages modified—that a further meeting of the Directors should be held, to decide finally on that and other papers, and to give Mr. Boulton though rather a voluminous paper on the subject, and this paper modines—that a variate meeting of the Directors should be held, to decide finally on that and other papers, and to give Mr. Boulton the necessary instructions and authority for his proposed mission, and that he should then come down to receive recommendations, &c., from you and myself, to our friends in London, by whose means it is hoped the capital may be obtained

Mr. Boulton has been rather quicker in his motions than I was quite prepared for. I only arrived here on the 1st instant, and by the same day's post I received the inclosed letter from him, with an amended copy of the Report. Yesterday he himself made his appearance, and to-day he embarks for Quebec, to confer with you on the subject. He has not brought down the original Report. There has been no meeting of the Directors to approve of the alterations which have been made, or to confirm any prove of the alterations which have been made, or to commit any of our proceedings at St. Catharines. And the Engineer's Reports, Plans, &c. are not yet arrived, so that we are rather unprovided with documents of any kind, and Mr. Boulton is anxious to sail for England by the packet ship of the 16th from New York. He argues that we are authorised to draw up and manage the whole thing, but I do not entirely agree with him, and in the recessfying of corporate hedies on very impartant subjects. I am the whole thing, but I do not entirely agree with him, and in the proceedings of corporate bodies on very important subjects, I am unwilling entirely to depart from form, or to incur too much personal responsibility. In this mission Mr. Boulton must have certain credentials and certain instructions. Now, if you and I are to give recommendations, or if you pleace, credentials, it at least appears to me that the instructions should have something of a formal character—such as the signature of the President, and that the Report should have been finally agreed to at a meeting of the Board. In his anxiety to reach England by the 15th or 16th November, Mr. Boulton has over-leaped these forms, and is in fact going upon a roving commission, unless some authority and instructions shall be framed for him; and the question is, what are they to be? and hy whom are they to be given? Mr. Boulton informs me that certain documents with the plans, &c., are to be here in a few days, and if he can satisfy you as to any substantial mode of proceeding under the circumstances of the case, I shall agree to whatever you approve. agree to whatever you approve.

I am not starting imaginary difficulties, and in this matter-which has already been too long deferred, I admit the benefit of expedition, but I am equally anxious that Mr. Boulton's docu-ments should be satisfactory in every respect, because, otherwise, I fear his mission will fail, and if so, we shall do harm instead of good.

I wish it was in my power to accompany Mr. Boulton to Quebec, but at present, having only just got home, after an absence of six weeks, I cannot possibly get away. I therefore leave the matter to yourself and Mr. Boulton, and I shall be glad to hear the result of your deliberations.

I remain with respect, My dear Sir, Very truly your's, SIMON McGILLIVRAY.

(AN OFFICIAL COPT.)

MONTERAL, October 12th, 1825.

Hon. J. H. Dunn, and HON. WM. ALLAN.

Dear Sire:

Dear Sirs:

Nir. Boulton has at present a power of attorney to raise £100,000, if he can, and to negetiate for it with whom and in what manner he may think fit. I may be mistaken, but I think the very extensive nature of this commission would startle cacking capitalists, who, he it remembered, are a very timid and suspicious race as to all things out of their reached and heyond their knowledge. When a new Company is once formed and its stock at a present and its stock at a present in the first instance, would consider it one of the bubbles which at present almost every day are dues in London, and with which every project not very reproduces in London, and with which every project not very re-

spectably introduced is in danger of being classed. My opinion speciably introduced is in danger of being classed. My opinion therefore is, that Mr. Boulton's power of attorney and blank scrip receipts from the Welland Canal Company, will obtain few subscriptions in England, unless they have other support. My iden was to have addressed a general letter to certain intelligent and leading individuals in the city of London, who, if they could be once induced to ombark in this project, would at once ensure its success, and from the mere circumstance of their names being an entire of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the coun engaged in it, would at once fill your subscription, and bring your stock to premium. To these individuals, however, ample informution must be given, and the chief benefit I expected from Mr. Bonkon's mission, was that his local information would be useful in explaining the particulars of the case to them; for I did not dream that he or any agent should be authorised to raise money, or issue scrip receipts except in encert with, or under the direction of a committee of such individuals, and I appreliend that his being authorised so to do would tend to prevent public confidence from being placed in the project.

The nominal and legal par of Exchange is we'l known, 5s to the dollar in Canada and 4s 6d in England, but the real and equithe dollar in Canada and 4s 6d in England, but the real and equivable rate of Exchange, in time of peace is regulated by the real value of the dollar in England (where it has no lawful value), which is very nearly 4s 2d or equal to Bills of Exchange on England at 8 \$\psi\$ cent premium—at this rate our shares which are £12 10s currency would be £10 8s 4d st'g, and all future instalments and dividends would be payable at the same rate, which would avoid fractions in calculating any rate \$\psi\$ cent (£10 &s 4d being 2500d, on which 1 \$\psi\$ cent would be 2s 1d and so on,) and if there were any loss or pain ou any fluctuation in exchange is there were any loss or gain on any fluctuation in exchange, it would be for the general account of the Company.

The instructions to Mr. Boulton must, to a certain extent, be discretionary, and, to a certain extent, depend on the opinion of the friends who may be inclined to support him in England, and yet he ought to be restricted by some instructions, else those who yet in ought to be restricted by some instructions, else those who give powers without instructions, will be considered very extraordinary persons. To conclude this hasty and irregular scrawl, (but really I have not time to reconsider it,) I recommend the whole subject to your scrious consideration, and if you recuest the assistance of Dr. Strachan and the Attorney-General, I dare say they will afford it, in coming to some decision on the points which I have suggested, in order to be embodied in Mr. Bouland, international attack international attack in the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of ton's instructions, and then I shall be happy to introduce hims and to vouch for his mission wherever my introduction may and to voted for his mission wherever my introduction may-avail; but at present, with every thing left to my own mere sug-gestion, without documents which ough; to have been before me, and without time to bestow the attention which so important a subject requires, I trust you cannot be surprised or dissatisfied with the line of conduct which I deemed it right to adopt.

I remain, with regard,

Dear Sirs,

Yours, very truly. SIMON M'GILLIVRAY.

(AN OFFICIAL COPT.)

MONTREAL, 14th October, 1825.

Hox. J. H. Duxx, and HON. WM. ALLAN.

Dear Sire:

In further reference so the subject of the Welland Canal, and the instructions to be sent to hingland, it appears to me that we must for some time at least have a resident agent there, busides Mr. Boukon, and as such agent must be paid, he ought at the same time be the Secretary of the London Comagent there, norman viri. Journal of the London Committee; but that body will of course appoint their own Secretary, and we therefore should think; of a person likely to be considered eligible by them. Mr. Galt is the first person that occurs to me, both from some previous connection with the Province and with the Directors of the Canada Company, some of whom are the persons who ought, if possible to be of our committee.—No money dupit; however to pass thro the hands of any Director or Agent. The deposit on subscribing and the subsequent instalments ought to be paid into a bunking house in London; and drawn from thence by bills of exchange signed by three members of our Beinfi, and which should be paid into the Bankt of Upper-Canada in compliance with that clause of our Act which provides the all our funds are to be there deposited. The Bankt will of course allow us the current rate of exchange; or if they do not, the Bankt of Montreal will, and thus, injection case, the money can be safely deposited at York. In the case of dividends ney can be safely deposited at York. In the case of dividenda

hereafter, a similar course can be pursued, the amount declared on the English part of the capital can be remitted in one sum to the Banking House in Lendon and the Agent there, who will keep regular transfer books, will issue certificates to the Stockholders, to entitle them to receive their dividends at the Bankers. Thus I think a machinery may be constructed, not very complex, and yet ensuring that sort of regularity with which the proceedings of all public bodies ought to be conducted, and in which I fear our proceedings hitherto have on some occasions been wanting.

I trust I shall not be considered unnecessarily panetilious in remarking upon the recent proceedings founded on my own suggestions as to Mr. Boulton's mission, but they really appear to mover deficient in regularity. Three Directors, of whom Mr. B. was one, at a casual meeting, resolved that Mr. B. be requested to proceed on this mission, and that his reasonable expenses, not exceeding £300, be paid. The resolution, however, contains this limitation, viz: "subject to such instructions as he shall hereafter receive from the Board";—without, however, waiting for such instructions—without waiting for a regular meeting of the Board—or any confirmation of the resolution in question, Mr. Boulton at once draws for the £300, and Mr. Merritt puts the scal of the corporation to a Power of Attorney, under which it appears to me Mr. B. might, if he pleased, and if he could get the thought fit, and leave the Company answerable for it. As to the £300, I am aware that an order for the payment appears on the minutes, but I deny that any such order was given, and Mr. Merritt will recollect, when he mentioned to me afterwards that such an order had been signed by Mr. B. that I expressed surprise and disapprobation; though I did not think fit to interpose, and only said I should have nothing to do with the proceeding. I beg I may not be understood to mean or to insinute, that in all this there was any thing intentionally wrong, but if we suppose it possible that any of our successors might be capable of abusing the trust confided to them, then I maintain that this loose system of proceeding may form a very dangerous precedent, unless some regulation be made to prevent any recurrence of it. There should be a particular regulation as to the custody and manner of applying the common scal. The scal should never be applied but by an express order of the Board, and in presence of a least two Directors, and the Secretary of officer certifying or rather delivery may then be regularly attested by witnesses, like any other instrument.

As to the proceedings of the Board, those which apply to transactions generally, must be final when once adopted because they amount to a contract with other persons, which we have no right to alter—such for instance as in the case of an Insurance Company granting a policy—or in our own case, the agreeing to a contract. But in any special or important matter, or new proposition, which may come before the Board, and be approved, I think there ought to be a by-law, or standing order, that until such matter or proposition shall have been communicated to all Directors within the Province, and confirmed by a subsequent regular meeting of the Board, it shall not be considered as finally adopted, nor shall any proceeding or engagement be founded thereon.

I commend all this to your consideration.

And I remain, Dear Sirs,

Yours faithfully,

SIMON McGILLIVRAY.

Extract of a Letter from Hon. Wm. Allan to W. H. Merritt, Esq. dated York, 15th Oct. 1825.

"In short it appears to me that Mr. Boulton is not provided with any thing but your grant of £300 st'g, and that he took care to get without loss of time for fear of another Board objecting to it, which I should certainly have done."

YORK, 17th October, 1835.

(An OFFICIAL COPY.)

W. H. MERRITT, Esq.,

St. Catharines.

Dear Sir:

I wrote to you in haste last post day, after receiving letter from Mr. M'Gillivray, on the subject of Mr. Boulton go-

ing to England without any documents, plans, or reports of any description. He seemed to consider that Mr. B. had been much too premature in all his proceedings, and that it was not intended he should go till the thing had been again submitted to a full should go till the thing had been again submitted to a full. Board, &c. I hope, if you had any documents that was to follow Mr. Boulton, (or to be sent to Mr. M/Gillivray,) that you lost no time in forwarding them; as otherwise, Mr. Boulton's mission will go for nothing, and he will pocket your £300 stersling for going home to attend to his own bussiness. Dr. Strachan drew up a report for the President, which he, Mr. Dunn, took over with him to St. Catharines. Pray, have you any such thing in Dr. Strachan's hand-writing, or, indeed, in both, as Mr. Dunn repulsed to return the conv to Dr. Strachan both, as Mr. Dunn repulsed to return the conv to Dr. Strachan any, such thing in Dr. Strachan's hand-writing, or, indeed, in both, as Mr. Dunn promised to return the copy to Dr. Strachan. That report was a heading or subscription. At Home, was to be a part of Mr. Boulton's instructions. There was a letter, written by Mr. M'Gillivray, from Buffalo, on 26th August, addressed to Mr. Dunn, as President, at St. Catharines, containing a letter from Sir James Carmichael Smith, which Mr. M'Gillivray says he understood was not delivered to him; pray, do you know any thing of it? Since the receipt of this letter from Montreal. uny thing of it? Since the receipt of this letter from Montreal, I have thought a good deal about the new contract that has been long advertised to be made on the 26th. Will you be so good as let me know by next post what you suppose the amount of the contract will be, or nearly. If it is for the whole line of the Canal, it must be very considerable. I suppose it is only for excavating—it has nothing to do with locks, &c. And I wish to show also if there is funds comatable! I mean actually as much stock now taken up, as the instalments, when paid in at different places, will meet the payments, or if you depend at all on any part of the stock reserved to be taken up at Home. I understood you there was £100,000 reserved for Home. If there is not funds enough to authorize this contract, independent of this stock you amicipate to be taken when Mr. Boulton goes to England, I certainly will not be one to engage with any person; because, although your contracts may be in the name of the Welland Canal Company, whereby any individual making it may be exempt from personal responsibility, nevertheless I would not engage in any way without seeing the means was fully provided for the payment, (more than if I was personally liable,) and I am not very certain but if we made contracts with people without having funds to justify it, we should as individuals be personally liable. Will you also inform me how your former contracts run. They are, I presume, between the Welland Canal Company and the contractor—no person as a Director is named. also appears to me necessary to have some more funds in the Bank here comatable than we have. I find that the Bank is Bank here comatable than we have. I find that the Bank is in advance nearly £2,000, in consequence of the drafts drawn some time ago by Mr. Dunh, or the Vice-President, on New York, not having been given to the Bank, although they drew on the branch at Niagara for the amount, which they poid, supposing those drafts to have been given to the Bank. I think there ought always to be at least £1,000 in hand here to command upon any emergency but at all events the Bank will not advance one shilling beyond their funds. The extent of what you are authorized to draw for at Montreal, Quebec, and New York, ought, in my opinion, to be drawn on or about the first of each month. These are things you, no doubt, can satisfy me about; but unless you can show there are funds sufficient to authorize new contracts to be made, I would not be one that will make any. I hope Mr. Dunn will meet us, as I shall be over, please God. I am well, God. I am well.

> I am, Dear Sir,

> > Your obedient servant,

W. ALLAN.

Extract of a Letter from W. H. Merritt, Esq., to Hon, J. H. Dunn, President of the Welland Canal Company, dated St. Catharines, 31st October, 1825.

"In the latter part of this day, I received the communication from Mr. M'Gillivray to yourself and the Hon. Wm. Allan, and lose no time in replying to and giving my opinion thereon.

"In the first place, there is a great misunderstanding between Mr. Keefer, myself, and Mr. McGillivray, respecting his concurrence to the immediate payment of the £300 to Mr. Boulton.—When Mr. Keefer mentioned to me that Mr. Boulton had made out the draft, I stated that I had never been paid until the mission was fulfilled, and in justice to myself must state most distinctly that I never would have consented to that payment had I not have conceived it had Mr. McGillivray's approbation.

"2ndly. It was clearly stated in our minutes, that a subsequent meeting should be held, but in consequence of the audden departure of Mr. Boulton, and his stating to me in his letter that he would be off immediately and procure either Mr. Allan's or your signature to the l'ower of Attorney, and likewise conceiving the business could be arranged with Mr. McGillivray in Montreal, and that not signing and sending it, would creute or cause delay on my part, I did so without hesitation

"I explained in writing to Mr. Allan the cause of my not sec-ing the letter addressed by Mr. McGillivray, it was given to Mr. Boulton and probably he has it with him."

#### Extracts from the original Letter.

Yonk, November 5th, 1825.

W. H. MERRITT, Esquire,

St. Catharines.

Dear Sir:

Mr. Dunn and myself have had a meeting on the subject of the Mr. Dunn and myself have had a meeting on the subject of the canal business, and he entirely disavows altogether the proceedings respecting Mr. Boulton which the more they are considered the worse they appear, Mr. McGillivray disclaims them also, therefore, what is to be done? When I come to look at the power of Attorney you gave me a copy of, which I now return—(which you say you affixed the seal of the Company to) I am quito astonished, and am very certain it was drawn out and worded by himself. You inclose me a copy of the minutes of the Board of Directors, said to be held on the 14th November, 1324, but I think you must have meant 14th April. 1825—Mr. McGil. but I think you must have meant 14th April, 1825—Mr. McGillivray was not in the country in 1824. The power to Mr. Boulton is in complete contradiction to its contents—in the one it is ordered that the deposits from Stockholders in Great Britain are all to be paid to a Banking House named in London, and the power given to Mr. Boulton, under the office seal, is to authorise him to ask, demand, and receive, from all and every person, the amounts of their several subscriptions, and to give all needs an account of their several subscriptions, and to give all needs on accounts. amounts of their several subscriptions, and to give all needtul and necessary receipts, acrips, and discharges in behalf and on account of said Company, and to appoint one or more agents. In fact, it authorised him, if he pleased, and if he could get the money, to raise any sum he thought fit—apply it to any purpose he thought fit—and leave the Company suswemble for it. Now, what Mr. McGillivray says, is this, as to the £300—I am aware that an order for the navement appears on the minutes has I do. that an order for the payment appears on the minutes, but I de-ny that any such order was given, and Mr. Merritt will recollect, when he mentioned to me afterwards that such an order has been signed by Mr. Boulton, that I expressed surprise and disappro-bation, though I did not think fit to interfere, and only said I should have nothing to do with the proceedings.

In fact, it appears to me that every thing has been done too hastily—and so irregular, not according to the general rules.—
There should be no order or proceeding of a Board acted upon till the minutes and orders had been read and confirmed by a subsequent meeting, that, I believe is the practice in all public bodies. That partly arises from the circumstance of the office and all the business that is done being where it is—and, in course, except yourself and Mr. Keefer, or any other Director that may reside there, that will always be the case, things hurried over and away. EWLY.

I am perfectly disinterested, except so far as there is any cause for complaint or disappointment by any persons concerned—all who have any share of management or direction will be blamed. I am certain it is never the case wherever there is a common seal belonging to an incorporated body, it cannot be used except by the President or Vice President if there is any; and that under the President or Vice President if there is any; and that under the authority and direction of the Board, and entered on the minutes. My idea, in which Mr. Dunn agrees fully, with respect to what should be done at home—we ought to have an agent there exclusive of whatever Mr. Boulton may do. No money whatever ought to pass through the hands of any Director or Agent; the deposits on subscribing, and the subsequent instalments ought to be paid into a Banking. House in London, and drawn from there by Bills of Exchange signed by two ar more members of the Board here, and which should be paid into the Beak of Upper Canada in compliance with the clause in our fact, which provides that all our finds are to be deposited in the Bank.

There is another circumstances which strikes me will not bear examination as I percive the stockholders at New York are impelled displeased. It was only a casual meeting of three Directors of whom her. Boulton was one where a resolution was passed called

a request for him to proceed to England, and that his reasonable expenses not exceeding £300 be paid—the resolution, however, contains a limitation, viz; "subject to such instructions as he shall hereafter receive from the Board"—without waiting for such instructions—without waiting for a regular meeting of the Board or any confirmation of the resolution, he draws for the money. With respect to what Mr. Proctor says, he suggested to the President to draw on him at ninety days through the Cast money. With respect to what Mr. Proctor says, he suggested to the President to draw on him at ninety days, through the Canada Bank, or get the Bank at York to loan on the stock which is gone to London; the latter is quite out of the question—could they suppose that the Bank would lend such sums as are required upon anticipation of selling £100,000 of stock there.

I um, Dear Sir,

Your most obedient servant,

W. ALLAN.

(OFFICE Cory.)

To all whom these presents shall come—The Welland Cunal Company in the Province of Upper Canada, Incorporated by Act of Parliament—send

Exists ne that the said Company have constituted and appointed and by these presents do constitute and appoint Henry John Boulton of the Town of York, in the Province aforesaid, Esquire, His Majesty's Solicitor General for the said Province, to negociate with any person or persons, bodies politic or corporate in England for the subscription of such and so many shares in the capital stock of the suid Company as he may think proper, and for that purpose to open Books in the name of the Welland Company for the subscription thereof in the site of Levi Canal Company for the subscription thereof, in the city of Lon-Canal Company for the subscription thereof, in the city of London or elsewhere as he may deem expedient, and also to ask, demand, and receive from all and every person and persons the amount of their several subscriptions and to give all needful and necessary receipts, scrips or other discharges therefor on the half and account of the said Company, and also to appoint one or more agents, for and on the behalf of the said Company to receive subscriptions or otherwise as he may indee to be the or care agency, for any otherwise as he may judge to be for the interest of the said Company, hereby ratifying and confirming all and whatsoever the said Henry John Boulton shall do or cause to be done in the premises.

In testimony whereof, the said Welland Canal Company have caused their common seal to be hereto affixed at Saint Ca-tharines, in the District of Ningara in the Province afore-said, this 27th day of September. 1825.

W. C. COMPANY, [L.S.]

Countersigned.

WM. HAMILTON MERRITT,

Secretary.

(OFFICE COPY.)

Yonk, November 7th, 1825.

W. H. MERRITT, Esquire, St. Catharines.

Dear Sir:

St. Catharines.

Dear Sir:

As you have now put the whole line of Canal under contract, it becomes necessary for us to be on a more substantial footing than it appears we are at present. Mr. Boulton may, and he may not sell the stock. I am not without my fears and doubts—he, I think, was the most improper person to be employed on such a mission, and when the speculators in London see one individual with such power and authority as Mr. Boulton possessed himself of, is one strong reason, in my mind, that there should be some apprehension. I told you at first, when I heard the matter at St. Catharines (for other reperts I thought not true) my opinion, and which I see no reason to alter, and which I most sincerely lament. I am very serry such a transaction should have happened whilst I hold the office I do in the Welland Canal, and from this feeling I am induced to make these remarks. I however, must disclaim all connection with it, and I trust I shall be exhonorated by the Company. I have written my mind and expressed my sentiments to Mr. McGallbring, on it, and at the same time requested to know from himself. Irvine what they recommend as to reschiding that Power of Attorney we which Mr. Boulton helds, with the seal of she Company actached, which is a dangerous instrument in any person's possession, and must prove a loose system in our concerns. I have also.

so written Mr. McGillivray on other important matters connected with the Welland Canal,

Our first step, now, is to less no time in our application to the House of Assembly, for which purpose I beg you will come over as soon as you can. I see many good reasons to make the application as early as possible, this will relieve our friends at New York, and it is incumbent on us to do something, if we do not, I think there will be some difficulty in prosecuting the work for the want of our installments at New York. The money market at New York may grow worse, and all these circumstances we have a right to anticipate and guard against. I will thank you to bring over the cash book and also the journal of proceedings—this, I wish for my own satisfaction, and see our money concerns placed in a clear point of view. Be so good as bring with you all other information that may be wanted in our transactions with the House of Assembly. I think the seal of the Company should be deposited with the President, I am confirmed in this opinion from recent circumstances—I will thank you therefore to bring it over with you.

I am, dear Sir, Your's very truly,

JOHN H. DUNN.

Extract of a Letter from W. H. Merritt, Esquire, to the Hon. J. H. Dunn, President of the Welland Canal Company, dated St. Catharines, 10th November, 1825.

C Since writing and inclosing the petition intended for the Legislature by this day's post, your letter of the 7th has been received; and must observe to you as I mentioned to Mr. Altan, the Power of Attorney was countersigned by me as Secretary on the authority of Mr. Boulton as Vice President, and under the expeciation he would get your or Mr. Altan's signature affixed to it, besides I assure you for one, after Mr. McGillivmy's proposing the measure for Mr. Boulton to go home for the purpose of obtaining the stock, I had not the least hesitation in placing unlimited confidence in him to make every necessary arrangement respecting the funds; more especially as it has ever been the practice of the Board of Directors to do so heretofore. Mr. Boulton it is true drew out this Power of Attorney himself—I had a similar one to obtain the stock formerly, and I hope most sincerely that Mr. McGillivray may not think it necessary to rescind that Power of Attorney without sending him another, otherwise a very great delay will again arise.

"I perceive by the turn this business has taken from Mr. Boulton's precipitate departure, that the whole censure is endeavoured to be placed on myself—I am perfectly willing to receive my share, as I am aware our proceedings were premeture, but as I conceived Mr. McGillivray was the person to whom we looked up for obtaining the London stock, I tacity agreed to the measures he proposed, and part of the design or execution should be imputed to me with the exception of the Power of Attorney—this was done under Mr. Boulton's representation, and under similar circumstances any other person would have done the sampling. If there are so many difficulties in procuring this London stock, besides the fear I apprehend of creating dissatisfaction among ourselves—it would have been much more to the interest of the Company to have had nothing to do with it—every thing clee has gone on with the greatest regularity, and without trouble or confusion."

Extract of a Letter from Simon McGillivray, Esquire, a Director of the Welland Canal, to Honorables William Allan and John H. Dunn, dated Montreal, November 13th, 1825.

DEAR SIRS :

I am aware that much may be said in favor of local management, but local management in order to obtain general confidence, must not be confined to any particular interest. Unfortunately for the Welland. Canal, the gentlemen in the Niagara District, who stand highest in public estimation, and in the council of the Province are from the prejudice of local interests, hostile to the endertaking, and the only gentlemen, of sufficient consideration in

society to have been appointed members of our Board from amongst the resident Stockholders, have undeniably local interests, which, in some cases, may be considered to sway their opinions. On this point some rumours have reached me, which I do not believe, which I will not repeat, and to which I allude only as a further reason for observing, in all cases, the cautious regularity in our proceedings, which may enable us, at all times, to trace every transaction to its source, and to give a sufficient account of every head of expenditure on our books. Now, the books which I saw that St. Catharines did not contain so regular a system of accounts, nor such a check on expenditure, as would be creditable to us, or, perhaps, satisfactory to our constituents, in the event of any question arising in regard thereto; and, considering all these circumstances, as well as the personal convenience of the Directors, resident at York, I have to express my concurrence in the suggestion of removing the office of the Company to York, and employing a regular accountant to keep the books, records and transactions of the Corporation, in a regular and business-like method. The resident Agent at St. Catharines can superintend the operations at the Canal, as heretofore, and pay such disbursements as he may be authorised to do by the Board of Directors; but we owe it to our constituents, and to our own character, that all decisions of important matters, should be really the proceeding of the Board and not of an Agent, on our behalf, or on the confidence of such a proceeding afterwards receiving an expost facto confirmation, when, perhaps, it may be too late to prevent an inexpedient measure; as, for instance, in the case of the Power of Attrorney to Mr. Boulton.

To give to any individual such a Power of Attorney as Mr. Boulton now holds under the seal of our Company was I must always think a most unwise proceeding, but to rescind the same after being once given, is a matter which requires some consideration. I do not suppose there is any DANGER of Mr. B. making an improper use of this document, and indeed it would not be easy for him so to do, because people in England do not so casily part with their mohey, as to advance it on the security of an unknown Canadian Corporation; besides, that if it be supposed possible that Mr. B. could be capable of so acting, then a resolution to rescind the Power of Attorney would not destroy the document which is actually in his possession, and which he would still have the power of using if we assume that he is capable of so acting. The danger, if any, I take to be that Mr. B. or any gentleman in his situation might be offended by the suspicion implied in the revocation of his power, and it appears to pass a resolution appointing an Agent, and referring to Mr. Boulton as a Director, to give to this agent and to the Committee who may be induced to act in the matter all such information as his local knowledge may enable him to afford; and at the same time recommend to him by letter not to produce or attempt to act under the Power of Attorney which is considered, "by the Board as an instrument not likely to be satisfactory to the expected stockholders, or to the Committee who must in the first instance at least take the management of the funds to be contributed by such stockholders."

This I think would prevent any exposition of the power from being made, and I presume you and our successors will take care that no such case shall again arise.

I remain with regard,
Dear Sirs,
Faithfully your's,
SIMON McGILLIVRAY.

(OFFICE COPY.)

At a Meeting held at York, November 22d, 1825.

PPESENT—Hon. John Henry Dunn, President, Hon. William Allan, Vice President, and William Hammilton Merritt, Esq., Director.

The Board considering it will be necessary for the Welland Canal Company to have a resident Agent in England, provided the Stock is taken up which was reserved for that market in the first insuance.

1st Resolved—That Henry J. Boulton, Esquire, His Majesty's Solicitor General, now in London, and one of the Directors of this Company, be requested to offer the situation of Ayent under the direction of the committee who may be appointed, to Mr. Gali, who is now Secretary to the Canadian Land Company.

In order that the affairs of this Company may be conducted in London in such a manner as may be likely to meet with general approbation to all concerned, and as the Canada Land Directors will, no doubt, feel the vast importance of this Canal to the Canadas, it would, in the opinion of the Board, be highly important that some of those gentlemen should be solicited to undertake the management of the Welland Canal Stockholders in Great Britain.

2d Resolved—Therefore that a committee be formed in London, consisting of not less than 5 gentlemen and that from Mr. Galt's personal knowledge of the Province, that he be recommended to this committee as a proper person to fill the situation of Agent, to conduct the affairs of the Welland Canal Committee in London, and that Mr. Galt's reasonable remuneration be fixed by the said committee.

(OFFICE COPY.)

BROCKVILLE, 4th August, 1826.

THE PRESIDENT OF THE W. C. C.

Welland Canal Office,
St. Catharines;

S.n.

I have the honor to onclose you for the information of the Board of Directors of the Welland Canal Company a copy of a letter from Mr. Galt declining (as I auticipated in my letter of the 3rd May last) the Agency of the Company in London on account of the total absence of any credentials which could warrant any person acting under them.

Upon receiving Mr. Galt's reply, I consulted with Dr. Strachan then in London, who perfectly agreed with me in thinking that it would only expose the Board to animal version, and myself to mortification to attempt any thing further and I immediately made arrangement for leaving England without having accomplished the object of my mission.

Should the Board be inclined to send Mr. Galt proper authorities and credentials to act upon he will undertake negotiating the business in London, and altho' the times are extremely unfavorable for raising money for any purpose, yet I am of opinion he may succeed in getting the stock taken up, though I consider the result doubtful.

Had the proper credentials been forwarded to me, when they might and ought to have been transmitted, I could have had the matter decided one way or other, before I left London, and I have reason to think I could perhaps have accomplished my object, but being totally unprovided with authority, I could only speak generally of the affairs of the Company without making specific propositions.

I only arrived here this day, and am leaving as soon as possible for Cornwall to attend the Assizes, and therefore have written more hastily than I could have wished.

Your obedient servant, H. J. BOULTON.

(OFFICE COPY.)

Yonx, November 22nd, 1835.

II. J. Boulton, Esquire,

London.
Sin:

A meeting of the Board of Directors took place this day, and the accompanying resolution transmitted for your information and guidance. I have to state, by order of the Board, that they conceive that the document which you hold, in the shape of a Power of Attorney, and to which is affixed the seal of the Company, is, in their opinion, a highly objectionable paper, and which they feel is an illegal proceeding, as it appears to have been executed without the proper authority and sanction of the Directors. It appears to the Directors that it is in direct contradiction to the resolution passed on September 20th, 1825, which is here enclosed, and altogether ill-calculated to execute the undertaking which you are entrusted with. They have directed mot o request, for many reasons, that you will not make use of this their power, to any person, upon any account whatever—at the same time they expect you will make every exertion in accordance with the above resolutions to dispose of the stock, and to afford every information to the committee or agent, and to render that assistance to the purpose of your mission, that the Welland Canal Company have a right to claim from you.

By order of the Board.

I am, Sir,
Your most obedient servant,
J. H. DUNN,
President Welland Canal Co.

Extract of a Letter from Mr. Proctor, Agent for the New York Stockholders, to Mr. Merritt, dated January 7th, 1826.

"I hope soon to have your reply to my letter on the subject of the stock. I hope Mr. McGillivray will soon be here to take his departure for London, for I expect, or rather hope, nothing will be done till he mrives. It is to be regretted that Mr. Boulton had anything to do with it, and the sooner his power is cancelled the better. Reports are that he was going home on his own business—therefore, as a Director, it was his duty to look after the business without any compensation, except what the Directors might afterwards think proper to allow him."

(Office Copy.)

27, Bury Street, May 3rd, 1826.

THE PRESIDENT OF THE

WELLAND CANAL COMPANY, St. Catharines, Upper Canada.

Sen

After calling four times upon Mr. McGillivray for papers which Mr. Merritt informed me, by letter of 22nd November last, were immediately to be forwarded to me, through lim, respecting the Welland Canal, I received from him, on the 19th ultimo, the resolutions of the Board of Directors of the 22nd November, 1825, together with some copies of documents, unauthenticated, either by the seal of the Corporation, or the signature of any of its officers, and most of which I brought with me last autumn.

Therefore, after waiting six months for instructions, which, in November last, were declared absolutely necessary, I am nearly where I was when I arrived, so far as proper detailed instructions with properly authenticated documents are concerned.

The only information I am put in possession of, by thus waiting, is the estimate for the remainder of the route between the Deep Cut and Lake Ontario.

The delay in transmitting these papers, however, such as they are, I consider an unpardonable neglect in those who knew the importance of expedition, and were entrusted with the conduct of the affairs of the Company in Canada.

One paper, among others, was handed me by Mr. McGillivray, purporting to be a letter written by the President, dated 22nd November last, remarking upon the irregularity and illegality of the proceedings of some body, but as it was an open sheet of paper, addressed to nobody, and alluding to no one by name, 1 could not presume that the Board of Directors had sanctioned it. or intended it for any use; and the more so, as it alludes to a resolution therein said to be inclosed, which did not even accompany it, and therefore I could not consider such an irregular and unbusiness-like production in any other light, than a piece of paper which had accidentally found its way into the bundle.

I consequently remain, through the carelessness of those entrusted with the affairs of the Company, without proper and authentic documents. There is not even a report properly authenticated.

From the tenor of a correspondence shewn me by Mr. McGillivray, between himself and some of the Directors, I should not regret the want of authentic and regular documents, if the interests of no others than the writers, were concerned in the success of my endeavors, because I should then at once relieve myself from any further concern about the matter, and leave it to its fate; but I have considered that the unbandsome insinuations contained in the letters of two or three individuals should not deter me from continuing to use my exertions for the benefit of the stockholders at large.

As these individuals, however, were Directors at the time I left Canada, I further consider that it comports best with my own dignity not to accept of any thing from a Board of Directors, amongst whom there is any dissent, although the sum was fixed upon which was to pay my expenses to Engalnd, in as full a Board as ever sat on the affairs of the Company. I have, consequently, inclosed a draft to the Cashier of the Bank of Epper Canada for the balance of the £300, appropriated to my use, after deducting £20, to pay for lithographing the plans and printing-expenses, leaving all renumeration for my services to the Stockholders, towhom, I shall be happy, at all times, to afford any explanations they may require relative to my conduct, though lishest never condescend to do so to such of my fellow Directors as have

so far forgotten the rules of common justice as to express unfounded opinions upon that conduct in my absence.

I request the Board will understand, however, that I shall continue to use my best endeavors for the interest of the Company—
By the next post I hope to be enabled to report some favorable progress.

I have the honor to be,

H. J. BOULTON.

It being near 3 o'clock in the morning, and having several letters to write before Mr. Justice Boulton who takes this packet, leaves here at 8. I must beg the Board to excuse my not copying the enclosed before I sent it having no time for that numbers.

Your obedient servant,

H. J. BOULTON.

TO THE PRESIDENT OF THE WELLAND CANAL.

It appears by the minutes of the 6th Oct. 1826, that Mr. H. J. Boulton having called the attention of the Board to Mr. McGillivray's letter of the 14th Oct. 1825, where he mentions that the meeting at which Mr. Boulton was appointed to go to England was a casual not a regular meeting, Messrs. Keefer and Merritt stated that they considered it to be a regular meeting, and that it had been sanctioned as such on the same day.

# Certificate by Messrs. Merritt and Keefer.

YORK, 5th October, 1826.

"There was no minutes entered on the Books of the Board respecting said report, but it was understood in conversation at the Board that Mr. Boulton should consult with the Hon. Doctor Strachan and the Attorney General (Mr. Robinson,) and revise the report. When it was to be taken to Montreal and receive the sanction of Messrs. McGillivray and Irvine, and then be printed.

WM. HAMILTON MERRITT, GEORGE KEEFER.

## The Welland Canal Company,

To Henry John Boulton, Esq. Dr.

		Ĺ			~
	To my expenses from York to Quebec and thence to New York,  To passage from thence to England,	£	18 36	8 2	9
1826 June18	To my expenses in England from 5th Nov. to this date, st'g £153 0 0 Paid my passage and servants to New York, 38: 0 0				
Augus	Add 1-9th for currency. 21 5 0= Premium and interest for 6 months on this sum p'd in England equal to 12 6 cent Expenses from New York to Canada,		212 25 6	Ξ,	9
1827	To sundry business done for the Company as their counsel during 2 years to date,	-	12 310	10	0

Received the above H. J. BOULTON.

Mr. Boulton went to New York at another time to fulfil a duty easily to be done by letter. He charged £100, and got the money. Although all parties admit that Mr. Boulton's appropriation to his own use of £300 sterling, of the canal funds, was an improper transaction; and although, when goaded by the reproofs of the President, he returned the money and declared he would leave the whole question of his remuneration to the decision of the stockholders at a general meeting, I find that he never did appeal to the Stockholders, but took the opportunity of the meeting of a Board at the Deep Cut, in May, 1827, composed of his friends and relations to ask the money back again; and he got it.

The Board was composed of himself, his relative Chief Justice Robinson, his brother Mr. D'Arcy Boulton, Mr. Keefer, Colonel Wells and Mr. John Clark. This was their unanimous resolution:

# Minutes, 16th May, 1827.

Mr. Henry J Boulton presented an account of his expenses to England, amounting to £310 19s.9d, currency, when it was referred to the minutes of the 20th September, 1825, wherein a sum not exceeding £300 sterling, was granted for the said mission:

"Resolved—That the undermentioned accounts be paid: H J.Boulton's mission to England, £310.19; 9d"—&c. &c. &c.

So Mr. Boulton contrived at length to obtain the expenses of a journey to England to do his own business, out of the funds of a Canal, undertaken in a great degree for the purpose of enhancing his waste lands in value, and on which he had conferred no advantage. Although he was elected a director in 1825, and was named Vice President, an office not before thought of, it does not appear from the canal leger that he had paid one farthing on his stock subscribed. It was not until the 30th of June thereafter that he ventured to invest £18 15s. in the work, in part of his shares. The scheme of the canal act of incorporation appears to have been Boulton's in conjunction with Mr. Merritt.

It will be recollected that the winter of 1825, when Mr. Boulton arrived in London, was the period of the great depression of the money market which occasioned such great distress and so many failures. Had it not been so, the danger anticipated by Messrs. Dunn, Allan and McGillivray of Mr. Boulton's obtaining £100,000, under a loose Power of Attorney of his own drawing, and of his applying it to any purpose he thought fit, might have been converted into a reality.

The Canada Land Company purchased an extensive tract in the London District on Lake Huron at almost a nominal price, and they own besides much valuable landed property, the price of which had been increased by the Welland Canal For its advantage they promised to take considerable stock in the canal or lend it £6,000. I have perused an extensive correspondence between Messrs. McGillivray, Gait, Easthope, Boulton, Dunn, and others, on the subject of the aid promised by the Canada Company to the Canal, and consider the conduct of its managers to have been as Mr. Dunn, in one of his letters, happily expresses it, "extremely shabby."

The only service performed by Mr. Boulton, that I can find out, was his correspondence with Mr. Gait: I annex an account of the proceedings of the Canada. Company with Mr. Boulton's letter:

(OFFICE COPY.)

13, St. Helen's Place, 9th June, 1826.

Mr Sol. Gen'l Boulton.

Dear Sir,

Until the fate of the Canada Company should be determined, you were informed that I would return no answer to your letter of the 26th April offering me the situation of agent to the Welland Canal Company—it is therefore unnecessary for me to make any apology on account of the delay which has taken place.

I would have embraced with satisfaction this offer, both on account of the benefit which the undertaken is likely to produce to the Province, and of the interest I originally took in the extended scheme of the works; but I can no where discover among the papers left with me, (and which I herewith return) any credentials by which an agent would be safe to act for a corporation, nor indeed any regular delegation of authority at all—under these circumstances I am reluctantly obliged to decline the business.

Permit me to remark that I do not very well see in the proceedings of the 22nd November in what manner it was expected of me to act. You are authourised to offer me the agency, but then it would seem to follow that I am only to be recommended for that situation to a committee, and that my remuneration is to be dependent on the estimate which that committee may make of my services. The times are gone by when subscriptions to public companies were sought after and the mode of managing these things has relapsed to the old fushion of application and the knowledge of parties likely to embark in the particular undertaking proposed to them. I should therefore have charged the regular commission of 21 per cent. on what I raised, independentaltogether of any allowance which the committee might have adjudged for the after duties of the agency.

I remain,
Dear Sir,
Your most obcdient
Humble Servant,
JOHN GALT.

(OFFICE COPY.)

WELLAND CANAL OFFICE, St. Catharines, March 26, 1829.

John Galt, Esq.

Guelph:

Sen,

The Board of Directors have desired me to acquaint you that they have obtained an Act of the Provincial Parliament of Upper Canada to enable them to borrow the money agreed to be advanced by the Court of Directors of the Canada Company, 31st July, 1828.

By Mr. McGillivray's letter of the 20th August we were referred to you, and by yours of the 9th October we infer your answer, obtaining this act was the stipulation on which we were to obtain the loan of £6,000 sterling. We will therefore feel obliged it you will inform us in what way we are to draw for the money.

W. H. MERRITT.

(OFFICE COPY.)

WELLAND CANAL OFFICE, St. Catharines, July 16, 1829.

To the President of the Canada Company,

London:

SIR

In order to enable the Welland Canal Company to avail themselves of your offer, an act was applied for and obtained, a copy of which is now transmitted. It was passed on the 20th of March last. In the mean time such arrangements were made as enabled us to prosecute the work with great activity at the opening of the present season, but in these arrangements the £6,000 has been reckoned upon as part of our resources of which we might avail ourselves by depositing the required security.

We have now executed a bond to the Canada Company, as we are authorised to do by the Act above referred to—a copy of that bond is herewith transmitted—the original being in possession of the Commissioners of the Canada Company.

In order to place fully and we trust satisfactorily before the Company the present state of the canal, we forward a report recently published by the Directors. The work is rapidly approaching to its completion, and sanguine expectations are entertained of the results which must follow.

Under these circumstances we have ventured to draw upon the Canada Company in the confidence that they will fulfil their promise of assistance to this great public undertaking, for indeed unless they do, very serious inconvenience will be sustained, as the reputation and success of the work call for its completion without delay.

J. H. DUNN, President.

(OFFICE COPY.)

Executive Council Office, York, 26th Octr. 1829.

W. H. MERRITT, Esq. &c. &c. &c.

Sm.

I am directed by the Executive Council now sitting to request your attendance to-morrow fore-noon at eleven o'clock, and that you will bring with you for the information of the Council any correspondence or documents that may relate to the interest proposed to be taken in the Welland Canal by the Canada Company or Mr. Ellice.

I have the honor to be,
Sir,
Your most obedient
Humble servant,
JOHN SMALL,
C. E. C.

(OPPICE COPY.)

York, 9th November, 1829.

WM. H. MERRITT, Esq.
St. Catharines:

My DEAR SIR,

The inclosed I received by the last Post-when you have read it give it to Mr. Black for the information of our next Board. I am glad to hear so good an account of the progress of the water. I shall endeavor to be with you as early as I can. I think it extremely shabby of the Canada Company. It is not fair to throw the blame upon us, when they must know the failure arises from other causes.

Yours truly,

JOHN H. DUNN.

(OFFICE COPY.)

CANADA COMPANY.

At a Court of Directors of this Company held on Thursday, 31st July, 1828.

JOHN EASTHORE, Esq. M. P. in the chair.

It was Resolved-

That the recommendation of the committee of correspondence to take five hundred shares in the Welland Canal would in the opinion of the Court of Directors be advisable to adopt—provided the same can be done with legal propriety referable to the power and conditions of the charter.

That it be referred to the committee of correspondence to advance a sum not exceeding six thousand pounds either by subscription, loan, or upon such terms as may be found expedient and secure.

[Signed]

JOHN EASTHOPE,

Chairman.

#### R. SPANKIE'S OPINION.

1st. Whether the Welland Canal Company can lawfully raise money on Bond, and give any and what security for the principal and interest so borrowed?

It is apprehended that a corporation like this, as a corporation generally (if not restrained) may borrow money and give bonds and other securities that will bind the common property. I think also they might mortgage the tolls in this case to the extent below which they cannot be reduced by the local legislature.

There appear indeed to be difficulties in the way of satisfactorily carrying into effect the arrangement and securities for a loan in this case. The Directors of the Welland Canal Company have no express or implied power by the act to borrow money on such terms, or to affix the common seal to securities—nor does it appear to be within their ordinary functions and authority. I think however they might be legally empowered by a general meeting to borrow money on Bond with Mortgage security on the tolls, and to affix the common seal to such instruments

which would be available upon the Company's pro-

It certainly however would be more advisable to have the sanction of the local Legislature, in order to avoid all question on the subject.

Secondly—Whether the Canada Company can legally purchase and hold shares in the Welland Canal Company? and if you should be of opinion that they can, then

Thirdly—Whether they can subscribe for more than S0 shares.

2nd. I do not think the Canada Company can legally purchase and hold shares in the Welland Canal Company both with reference to the act establishing the latter, and to the objects of their own association, though an advance of money for the canal seems sufficiently authorised by their charter.

3rd. At all events they cannot hold more than 80 shares.

(Signed) R. SPANKIE.

Temple, 13th August, 1828.

CANADA COMPANY'S OFFICE, Guelph, Octr. 9, 1828.

To the Secretary of the Welland Canal Company,

St. Catharines:

SIR

By a resolution of the Court of Directors of the Canada Company, I am informed that the Company is disposed to advance £6000 towards the Welland Canal on certain conditions and stipulations. I shall therefore be glad to see you on the subject if you can make it convenient to come here before the middle of, next week, when I may have occasion to be in York should you not come this way, the business can be arranged at York, where I propose to remain till the arrival of Sir John Colborne, who comes out in the packet ship, the Corinthian.

I have the honor to be, Sir.

> Your most obedient servant, JOHN GALT.

(OFFICE COPY.)

Letter to W. H. Merritt, dated Canada House, London, May 29th, 1829.

My DEAR SIR:

I have to acknowledge the receipt of your letter of the 3rd of April, which being, (although addressed to me individually) in reality a communication to the Directors of the Canada Company, I as such laid it before them.

I have to state to you in reply that you have been misinformed in regard to Mr. Galt's reports having done any disservice to the Welland Canal Company with the Directors or the Canada Company, or according to my behef with Mr. Ellice, and that for the best of all reasons, because the only reports sent home by him to my knowledge were sent before your

visit to England, and therefore were previous to the consent you obtained from Mr. Ellice, and from the Directors to advance certain sums by way of loan to the Welland Canal Company.

Leaving Mr. Ellice therefore to answer for himself, I beg to remind you on behalf of the Directors of the Canada Company, that the consent which you obtained from them to advance a sum of £6000 was upon certain conditions which your Company has failed to comply with, and which I fancy will prevent the completion of the transaction.

Those conditions were-

1st. That the legal difficulties stated in the opinion of Mr. Sergeant Spankie (whereof I furnished you with a copy) should be removed by a new Act of the Provincial Legislature. This was stated to you to be an indispensible preliminary.

2nd. That the security specified in the same opinion should be regularly given for the money so to be advanced; and

3rd. That the Welland Canal Company should give an answer to the Court of Directors of the Canada Company—such answer to be received in London on or before the 31st of January, now mast.

In regard to the first of these conditions, you only say—"Our Legislature has done no good."

In regard to the second, you say nothing-and

In regard to the third, no answer whatever has been received from the Welland Canal Company.

Under these circumstances, I consider the arrangement depending on those conditions to be at an end, and so far my communication to you, on behalf of the Court of Directors, is concluded—but individually, and in order to prevent useless trouble, I will add my own opinion, that any further application to the Canada Company for the aid you seek to finish the Canal, will be unavailing.

This opinion is founded not so much on circumstances connected with the undertaking itself, of which I still continue to think favorably, although many are discouraged, on circumstances connected with the proceedings and plans of the Canada Company. Had the conditional arrangements made with you in August last, been acted upon in time by the Welland Canal Company, the Directors of the Canada Company would, of course, have completed them; but, whether any renewed application of the same nature would now be entertained, is quite a different question.

I remain, &c.,

SIMON McGILLIVRAY.

(OFFICE COPY.)

Letter to the Honorable Wm. Allan, Esquire, dated Canada House, September 3rd, 1829.

Your letter of the 14th July has been received and laid before the Court of Directors, and the

bill therein mentioned as having been drawn by the President of the Welland Canal Company has been presented for acceptance.

The Court regret to be under the necessity of refusing to pay this bill, but in the present circumstances of the Company, they cannot further entertain the question of granting a lean to the Welland Canal Company, or yet taking shares in that undertaking.

You will receive herewith copy of a letter from Mr. McGillivray to Mr. Hamilton Merritt of the 29th of May last, which the Court consider sufficiently explanatory of this matter, and to which they accordingly refer. It appears singular that the Directors of the Welland Canal should have neglected or acted as if they were not aware of the conditions upon which alone the proposed loan was to have been granted, since exclusive of the ample instructions sent to Mr. Galt on the 21st of August, 1828—a copy of Mr. Sergeant Spankie's opinion was sent to Mr. Merritt before his departure from England, with an intimation that "as corporate bodies can only act according to legal advice, the Court of Directors must, as an indispensable preliminary, require a new Act of the Provincial Legislature authorising the

"Welland Canal Company to give to the Canada." Company an effectual security for the proposed loan."

If such an Act has been passed, a copy of it should have been transmitted to the Court, in order to shew that it does authorise the granting such effectual security, because altho' entertaining due respect for any document passing through the hands of the Attorney General, as the Bond delivered to you appears to have done, yet the Court could not in any case advance money upon an inference, and in consequence of the conditions required as indispensable preliminaries having been thus entirely lost sight of by the Directors of the Welland Canal, or not stated to them by their Agent Mr. Merritt, their present bill must have been refused, even if there were ample funds fully disposable to provide for it, so that an inconvenience arising from its being returned falls fairly to be settled between the Directors and Mr. Hamilton Merritt.

The Court have entered into this explanation in order to satisfy yourself and Mr. Dunn, that there is no breach of agreement imputable to them in returning his bill, because it was drawn without authority. It is not deemed requisite to send you new copies of the papers transmitted last year specifying the conditions of the original agreement, because the present circumstances of the company would prevent the Court from now granting this loan on any conditions, and these circumstances it is presumed might have been sufficiently known to Mr. Dunn in his character of Receiver General, to have prevented his placing much reliance an the payment of his bill as President of the Welland Company.

I have the honor to be, &c.,

JOHN EASTHOPE:

Chairman.

(OFFICE COPY.) .

CANADA HOUSE, London, September 24. 1829.

The Hon. John H. Dunn, Esq., President of the Welland Canal Co.

Sin:

By desire of the Court of Directors of the Canada Company, I have the honor to acknowledge the receipt of your letter of the 16th July, advising the bill drawn by you as President of the Welland Canal Company, and transmitting a copy of the Bond placed by you in the hands of the Hon. Wm. Allan, the receipt of which is acknowledged by that gentleman in a letter to the Court of Directors reccived some days previously to yours.

In reply I am instructed to transmit to you the inclosed copies of my letter of the 29th of May last to Mr. Merritt, and of the Court's letter to Mr. Allan of the 3rd instant, and to inform you that the Court cannot re-consider the determination already announced in these letters.

The Directors regret the disappointment which this may cause to the managers of an undertaking of such public utility, and in the success of which they feel so deep an interest, but they cannot admit that the inconvenience arising from such disappointment is imputable to them.

If the Directors of the Welland Canal had at once accepted the conditional arrangement made with Mr. Merritt in August 1828 (subject to the contingency of obtaining the desired Act of the Provincial Legislature) and if such acceptance had been received in England on or before the 31st of January, for which there was ample time, they might so far have claimed the benefit of that arrangement, on complying with the required conditions so soon as they should be legally competent so to do, but seven months subsequent to that period having elapsed without any communication being received on the subject, it seems undeniable that the proposed lenders had a right to consider the arrangement at an end, and that it would have been an act of prudence as well as of courtesy on the part of the borrowers to refrain from drawing for the money until they should have received authority for so doing, in the new circumstances in which they were placed. Mr. Merritt's letter to me of the 3rd of April, (14 days after the passing of the Act of the Provincial Legislature) was not the sort of communication which should have been made by the Canal Directors, if they had then meant to confirm and claim the benefit of the previous conditional arrangement, although that letter might perhaps have been intended as such, and it was, under that impression promptly answered. If therefore it was so intended, it would have been well to wait for the answer before taking it for granted that they were authorised to draw for £6,000, and if they had so waited they would have prevented the inconvenience which may now arise from the return of your bill.

In this matter the Directors of the Canada Company beg to be understood as not acting on any punc-titio, but merely with that discretion and carcum-spection which their public duty requires. If it 10 feet is first removed?—The plan I usually adopt

were even a reasonable expectation that they should for such a length of time beyond their contract have held funds at the disposal of the Welland Canal Company, yet certainly the circumstances of that Company are not exactly the same as they were when the contract was made. The change of plan. of the Canul may be an improvement, as it is alleged, to be, but it has arisen out of a serious disaster, and it greatly retards the completion of aship navigation, and the receipt of the tolls therefrom on the whole distance from Lake Ontario to Lake Eric. It therefore so far deteriorates the proposed security of a mortgage on those tells, and on referring to the recent Act it appears that although the Welland Canal Company are authorised to transfer the tolls and profits as a security for the loan advanced by Government, yet for further sums to be raised by loan they are not authorised to grant mortgages of tolls and profits, but merely to issue transferable bonds; and if any question should arise about the payment of such bonds, it might be practically difficult to recover the same otherwise than by purchasing canalistock which you'll recollect the Directors of the Canada Company were advised they could not lawfully do.

These considerations would necessarily prevent the Court of Directors from now advancing this money, even if the application had come before them in a more regular and business-like shape than even it has done, and it is therefore needless to assign any other reasons for the determination already announced to you through Mr. Allan, and which it might have been expected would have been anticipated from circumstances certainly known to both you and him, if not to the other Canal Directors, but probably to all of them; involving the state of the Canada Company's funds and the capability of paying the instalments promised to His Majesty's Government, so that with reference to these circumstances only, any other result than the return of your bill could scarcely have been expected.

I have the honor to be,

Sir.

Your most obedient servant, SIMON McGILLIVRAY. Chairman of the Committee of Corresponds.

John Perry. Clerk and Accountant.

TUESDAY, 1et March, 1836.

Committee met.

PRESENT.

JAMES EDWARD SMALL, Esq., Chairman, Messieurs Chisholm,

Parke. Gibson, Thorburn Solicitor General. Shaver,—7.

MR. HALL again called, and further examined. By MR. MERRITT.

is to add about a cent to each foot as you descend; say for the first ten feet if you commence with ten cents, for the 2nd ten feet 20 cents per cubic yard—the 3rd 30 cents, and in such proportion.

201. What do you conceive the value of excavating the Deep Cut from the surface to the depth of 10 feet, at its present width?—I should think from 10 to 15 cents per cubic yard.

# [By Mr. MACKENZIE.]

202. Do you think the Deep Cut Contracts given to Harvey & Ward and afterwards given to Mr. Phelps were at fair and reasonable prices?—If the price for the first ten feet was under 15 cents, I would think it fair—and so on in proportion.

[The roitness withdrew.]

THURSDAY, 3rd March, 1836.

Committee met,

#### PRESENT.

JAMES EDWARD SMALL, Esq., Chairman.

Messieurs Chisholm. Gibson, M'Donell.

> Parke. Roblin. Shaver,

Solicitor General, and Thorburn.—9.

MR. HALL again called, and further examined.

It appears by the above statement that the Tender of Rudyer Hays & Co. is the lowest for doing all the Sections from 1 to 6, being at the rate of 15 cents per cubic yard.

That Messrs. Clowes is the next lowest tender, being at the average rate of 18 cents per cubic yard—and that Ward, Hovey and Co. have offered to do the whole at 25 cents per cubic yard, including all rock, hardpan, quicksand, and grubbing.

-	-					-

Simpson & Son, 32, whole, '20 tow path.) Phelps 25 cents, and 2 cents for machinery, being	371-2
the lowest tender.	والمائمة

The books and sections should shew the heights and quantity excavated by each Contractor previous to this re-lecting; the same documents will exhibit the prices and quantity for the remainder, which Mr. Merritt has prepared.

From this statement it appears that the tender of Rudyer Hays & Co. is the lowest for doing all the sections from one to six, being at the rate of 15 cents per cubic yard-that Messrs. Clowes is the next lowest tender, being at the average rate of 18 cents per cubic yard; and that Hovey, Ward & Co. have offered to do the whole at 25 cents per cubic yard, including rock, hardpan, quicksand and grubbing.—At the 2nd letting of the residue of the Deep Cut, 26th May 1827, Mr. Pholps was the lowest tender, being 27 cents per cubic yard, including 2 cents for machinery. I may add further that Mr. Phelps proposed to the Board to execute all the work within the time specified, and for the prices stipulated, and that the Company shall not be troubled with any further begging. Hu offered the security of his houses, lands, a portion of a steam vessel, worth not far from \$20,000; that is Mr. Phelps' statement to the Board as his secu-rity. Upon the 24th November 1827, Mr. Phelps complained to the Board of his loss in prosecuting the work from wrong calculations made by him, such as drawing of water for cattle, short measurements, &c., he states that the work cost him from 25 to 26 cents from top to bottom; this price he has taken as a busis for the following calculation. viz:-

WORK DONE.	Sub-conti	REMAINS C.YARDS.	Contract Prices.		
	Next deepest, Do Do		"	49,000 50,000	32 cts. 32 34 35 36

#### [By Mr. MACKENZIE.]

204. Mr. Phelps appears from the books of the Company, to have not only been allowed the price stipulated in his contract, but also to have been loaned about £10,000 of the Company's funds to enable him to carry on the work without the employment of his given capital, and leaving extra allowances of \$5000 at one time and between 7 and \$000 dollars at another, the works being subsequently stopped by the slides. Do you think he was fairly dealt with by the Company under these circumstances?—I think the prices allowed by the Company of 27 cents per yard are fair for a certain depth.—Mr. Phelps in his statement considered 26 cents a fair price for the whole. The Engineer who attended the work is the only person in my opinion that can give an answer to the last part of the question, as he will be able to state the exact quantity of work done by Mr. Phelps at the respective depths.

[Bx Ma. Marattr.]

205. In reply to question No. 202, you say if the price for the first ten feet is under 15 cents you would

think it fair, and so on in proportion—Did you not intend this to apply to your answer to question 200?—I think it should apply to all works where deep cutting is required, and the subsoil of an uniform nature.

206. What is your object in stating to the Committee the offer made by different people when the question was asked you as a professional Engineer. What is the value of the work according to the best of your judgment?—My only object is to state the prices that were then tendered and to show that the original contract price with Hovey & Ward was at the rate of 25 cents per cubic yard, including all contingencies. The value of the work from top to bottom according to scale for 50 feet deep is, @ 10 cents for first 10 feet=30 cents—a 15 cents for do. =35, but these rates comprehend the summit cutting; a less average must be assumed for the extremes; which can only be ascertained by a detailed calculation of the whole extent.

207. Has the offer made in the first proposals guided your judgment in your answer to question

No. 202?—My judgment has been regulated not only by the proposals in July 1825, but also by May 1827.

208. From the date of the last proposals do you not believe they have reference only to the contract taken, or work done by Mr. Phelps?—The proposals of July 1825, have no reference to Mr. Phelps' Tender, Contract, or work done; but those in May 1827 have. Mr. Phelps' tender was the lowest and was accepted.

209. What was the average of the tenders received at this time, May 1827?—37 cents per cubic yard.

210. Do you think the average of those proposals a fair price for the work in the situation it then was?—I can only judge from Mr. Phelps' tender, who had more practical experience than I had on that subject. The situation of the Canal works at that or any other period is not shewn upon the sections, as is usual in such works, I have, therefore, no correct data from which to judge of the extent or depth of previous excavations.

211. Do you take your judgment of the value of work by the tenders made by any individual?—No, I would take it from the nature of the excavation—because what would be the fair value in one situation might not be so within a few yards distance.

212. Do you know the nature of the excavation here alluded to, and the depth when it was commenced?—I know the general nature of the excavation, but do not know the depth at which Mr. Phelps commenced, neither the depth he excavated to, excepting the evidence of Love Newlove, who stated that Mr. Phelps did not go below the water edge or tow path.

213. If Mr. Phelps went to the bottom contrary to the opinion of Newlove, would it alter your judgment of the value of the work?—My opinion has been regulated by Mr. Phelps' tender, which proposed to go to the bottom of the cut—whether this is the upper bottom or that 18 feet below, or part of both, the sections should shew, but they do not.

214. As you know the nature of the excavation, describe it at the time Mr. Phelps took the contract?—I only know the nature of the excavation from having lately seen the banks down to the water level, which appeared to be strong adhesive clay.

215. As a professional man, do you say the work performed by Mr. Phelps on the Deep Cut is not worth more than 27 cents per yard?—I do not say it is not worth more—from what I have seen of the Deep Cut I should not undertake the centre of it from top to bottom at 27 cents per cubic yard.

216. Were the sums mentioned in the above question No. 204 charged to Mr. Phelps in his account?—I do not know whether they were or not—the books will show.

[By Mr. MACKENZIE.]

217. You have stated the average of the tenders made in May 1827 at 36 cents per cubic yard—do you know that all the persons who so offered were capable of fulfilling their contracts or judges of the work they proposed to fulfil?—The only persons whose names are known to me who offered for those contracts are Donaldson & Phelps. I did not know any of the parties until lately, and cannot tell whether

they were judges of the work or capable of fulfilling their contracts.

218. If Contractors like Mr. Phelps have been cautioned that the Board will be guided in all cases by the stipulations of their written contracts; that the stipulations so far as they extended would be considered as governing all cases which might arise in the performance of the work under them; that it would be the duty of the Contractors to fix with caution the prices for which they would propose to perform it, and that no greater prices would afterwards be allowed them to the disadvantage of others—wo'd nota material departure from that system in practice be likely to produce very great evils?—I can see no use of a contract unless it is strictly adherred to. Unless contracts are binding there can be no certainty of expenditure upon any work; whenever a contract is altered or varied, good reason should be shewn for so doing.

219. After all the cautions that can be given them some Contractors will doubtless judge erroneously of the value of work or of their own skill or ability to perform it; others will carelessly and imprudently conduct the works, and suffer loss where more industrious, skilful, and economical men could have made a fair profit, and the like will take place in private life and extend itself throughout all the various pursuits in which men engage. Ought the Directors of a work like the Welland Canal to make up any deficiency in prudence and forethought of such Contractors by departing from the provisions of their contracts and giving them large allowances not contemplated when those contracts were made—and would it be possible for those Directors to satisfy the public in case they should depart from their agreements, and allow large bonuses to such Contractors, that they were acting fairly and impartially as well towards the persons whose tenders had been refused, as towards the Stockholders and the Country, whose funds are to be taken to pay such bonuses?—I would only say it is usual that when a departure from a contract takes place, and any alteration made either to increase or diminish the work, that the same is done in writing. It would be difficult to fix limits for the regulation of managers and contractors for public works. In all cases they should exercise their best judgment and act impartially between parties.

220. If it be admitted that the stipulations of contracts may be departed from in such cases as that of Mr. Phelps, or such cases as are alluded to in the last question, would not the only alternative be to extend relief to all persons who may assert that they have sustained losses by their contracts; and who cannot be proved guilty of gross negligence and mismanagement?—Matters of that kind are generally left to the decision of the Engineer and the Board of Directors. The Engineer to state the facts, and the Board to form a decision from those facts.

221. Has any decision of the Engineer and Board of Directors been shown you in the case of Mr. Phelps to authorise the making him an allowance of £7,658 of borrowed money over and above his contract price and the other allowances?—There may be such statements in the office, although during yesterday's research I did not observe any; to the best of my recollection I have hitherto seen no such statement.

222. Supposing it were attempted by the Board to inquire into the alleged pecuniary loss of a Con-

 ${f R}$ 

tractor like Mr. Phelps, is it at all probable that entire reliance could be placed in a statement of accounts furnished by a party feeling a deep pecuniary interest in the effect to be produced by such statement on the minds of the Director—Or is it probable that in such cases the disbursements on the Canal Contracts can be separated easily by them from their other expenditures; especially in a case like the present, where the contractor had two large and important contracts going on at the same time?—I think it would be very difficult to give a true statement of those mixed contracts, or of the profit or loss sustained by the contractor.

223. Suppose one man to take a contract for 30 cents, and by his superior skill and economy realises a handsome profit, and another less prudent takes a contract exactly similar and loses by it. If you remunerate the loser ought not an equal amount beyond his contract to be given to him who made a handsome profit by his superior skill and talent?—It might probably be an act of justice, but not an expedient mode of settlement, as two adjoining contractors might upon this principle unite to deceive the Company—one to show a gain of more than was reasonable, the other a loss as much as he could.

## [By Mr. Menritt.]

224. Were the persons who made the proposals in 1827 the same people who had hitherto done the work, and would they not be reasonably supposed to entertain the most correct opinion of its value at the time?—I am not aware of any of the parties being so employed, but as Hovey & Ward's tender for the whole was accepted, they may have been upon the works as sub-contractors.

225. Admitting they had been so employed, would they have been the best judges?—From their experience I think they would—also that they would not offer at too low a rate.

226. As Newlove has given evidence before the Committee what was the price contained in his offer?

40 cents for the remainder of the work.

227. Your first answer is very well in theory, but has not your practical experience shown you that in a work of the magnitude of the Welland Canal it becomes absolutely necessary to vary the prices in contracts? And is it not usual and customary to do so in every work in America?—It is sometimes necessary, but should be practised as little as possible, as many contractors within my experience have offered for works below their value, not from a deficiency of knowledge, but that they may first secure the job and afterwards negotiate for better terms.

#### [BY THE COMMITTEE.]

228. In what cases, and under what circumstances does it become necessary to vary from the original contract?—Suppose the cutting and banking of a Canal one or more miles in extent is to be made, the cutting and banking in ordinary soils may be determined by contract; but in cases of lining the bottom and sides of the Canal with clay when the soil is porus this cannot at all times be determined, neither its thickness nor its price, a variation in the width of the Canal will affect the prices in most cases. But contingencies of this description are generally provided for in the contract, although their expense or extent be not ascertained. Cases occur in building locks,

acqueducts, waste-wears, &c. where it is sometimes necessary to deviate from the original plan from a variation of their foundations, such as sand in place of clay, partial rock foundations, sudden emergencies in consequence of water &c. But the principal reason for varying contracts is their non-fulfilment.

#### [By Mr. Merritt.]

229. Is it not absolutely necessary for the Board of Directors to be invested with the necessary power to make allowances on contracts, and is it not frequently done on all works of this description?—It is a very necessary power, but should be used with great caution.

230. Do you know that the Directors decided on the amount they paid Mr. Phelps from any statement produced by him?—I can say nothing about it further than is shewn by minutes of the Board from page 86 to 181, year 1828; there may be other documents that I have not seen.

# MR. OLIVER PHELPS called in and examined. [By MR. MERRITT.]

230.(*) Did I not converse with you freely while putting up your machine in the Deep Cut, respecting the contractors endeavoring to extort what I thought an unreasonable price for the excavation? Yes, you did.

231. Did I name to you a price I thought the Directors would be willing to give from top to bottom for the Deep Cut; and ask you if you would not contract for some part of it, and if so what was your reply?—Yes you did; the price you named was 30 cents and I replied that I did not wish to contract for any part of the work at the Deep Cut.

232. Did I not come to you after you had tried your machine and ask you to shew me by calculation what it would cost per yard to remove the earth by this method?—Yes, I was sick with the fever and ague at Vanormans. I told you that I must decline making calculations, as I was a contractor with Hovey & Ward for the locks, and that by so doing I should give offence to them. Mr. Merritt came to me a second time and I declined. He came to me the third time, and said that all the men on the line were making similar calculations of what the work could be done for with the machine they were erecting, and that I must do the same if I expected to be entitled to the premium which was offered of \$500 for the hest machine that could be creeted for excavating the job.

233. Did I, on hearing your objections to this calculation, assure you that they were groundless, as Messrs. Hovey & Ward had given up their job, that they were only working for the time being at the estimate of the Engineers as well as their sub-contractors?—Yes, and I then made out a calculation.

234. What state did you find the Deep Cut in when you took hold of the work—what was the state of the whole width of the Canal as laid out, and of the dirch and banks?—The state of the Canal as it was began was some places not within 3 or freet of the line, and others perhaps a little over the line; there were roads where they carted out the earth on each side, I should say from 6 to 10 rods distance between

each road; on each side of the Canal these roads began not many feet outside the line of the Canal, and as they descended into the Canal, did not go down with a slope of 1 to 1 but formed an inclined plane each way sufficient for teams to draw up the earth. The ditch in the centre cut professedly to wash out the deep cut, was narrow, some places much deeper than others, and filled with water forming ponds. As the banks, the earth was carried off from 20 feet 10 or 12 rods distant from the line and laid in every possible shape and form, with the back part the highest, carrying all the water that fell on the banks into the Canal, and many holes left that were filled with water from 2 to 5 feet deep.

235. What was the average cutting of the whole Deep Cut?—As per minutes received from Alfred Barrett, the Engineer, it was 46 feet  $\frac{80}{100}$ .

236. What part of the Deep Cut did you excavate? What was the average cutting of that part excavated by you? At what average below the surface did you begin in 1827? Did you bottom your part of the Deep Cut?—I excavated 77 chains of the North end—the average cutting was 49 feet  $\frac{85}{100}$ ,—I began below the surface 17 feet  $\frac{29}{100}$ ,—I did bottom my part of the Deep Cut.

237. What part of the Deep Cut was excavated by Hartwell, Pratt, and Simpson, Thompson and others? What was the average cutting of the Deep Cut? At what average below the surface did they begin in the spring of 1827? How near the bottom was the average of those jobs when the slips took place?—55 chains of the South end was excavated by Hartwell, Pratt and Simpson, Thompson and others, the average cutting of which was 42 feet 100—they began 11 feet 100 below the surface, they went on an average as near as I could judge, and I was employed in helping the various contractors to finish their part to get the water through, within about 6 feet of the bottom.

238. What is the established custom of estimating deep cutting and the relative value of the first 10 feet to each foot below?—As far as my knowledge has extended, the first 10 feet have been fixed at such a price that an addition of one cent per foot from 10 feet to bottom would give the amount of the work of the whole according to the different kinds of soil. The Chesapeake and Delaware Canal being in a sandy and easy soil began with 10 cents per foot for the first 10 feet, and increased one cent per foot to 75, being the deepest cutting.

239. Suppose the whole Deep Cut was estimated at 25 cents per cubic yard, at what price must the first 10 feet be worth, allowing the addition of one cent to each additional foot in depth?—The first 10 feet would have to be fixed at 15 cents, or in other words 47 feet cutting on the above calculation would amount to 25 cents and 160 for the whole.

240. What would that part of the work excavated by Hartwell, Pratt and Simpson, Thompson and others, amount to at that rate from 12 feet below the surface to within six feet of bottom, as was the case when the slips took place?—Had they began at 12 feet below the surface, and had the average cutting been 53 instead of 42  $\frac{54}{100}$ , it would have amounted to 28 cents and  $\frac{14}{100}$ .

241. What would that part excavated by yourself

amount to at the same rate from 17 feet below surface to bottom?—It would have amounted to 25 cents and  $\frac{13}{100}$ .

342. After you engaged in the work on the Deep Cut did the other contractors appear friendly, or did they endeavor to throw obstacles in the way against the progress of the work, and did you complain of it at the time?—They did, and I complained of it to the Agent and the Board.

243. Did your first month's estimate turn out satisfactorily—and if not, to what do you attribute the principal cause?—It did not turn out satisfactorily—I had nearly as many men engaged as the following month, and I attribute the falling short of my expectation and what I had reason to expect to the lines on the sides being run anew.

244. Were the sides of the Canal cut to the line as laid out or not? What space was there between the stakes and where the ground was broken, at the end of your first month's work, and how long was it before you brought it down to a level with the other work?—The cutting performed by others previous to my taking the job was not in all places cut to the line. My first object was to straighten the line and oring the work all down together, and accordingly began on the sides—at the end of the first month the strip of ground which I brought down in order to trim it to the line was sufficiently wide in many places to admit a cart and oxen to pass on it; and it was not until the end of the second month that I brought it down to the level of the other work, and many places where those roads led in on this part of the job the side cutting was from 12 to 15 feet wide. The first month's estimate was 35,131 yards—second month 69,355 yards—third month 94,150. On one section of two chains I had five teams and drivers and shovelers to load them were employed two weeks on the sides, and that the first estimate I was brought a little in debt. The reasons were that I worked wholly on the sides, and none on the centre.

245. What was the method of taking estimates, and do you attribute the error in Mr. Barrett's estimate as intentional, or to the side lines not having been taken in ?—I do not consider it was intentional on the part of Mr. Barrett.

246. Was the part of the Deep Cut finished by you of a harder description of soil as you increased in depth than when you began?—Yes, it was a harder soil—there were many streaks of hard parthat could not be ploughed, but had to be picked—there were many large stone and rocks which took from 4 to 12 yoke of exen to draw out of the ditch—there were some so large that they had to be blasted; this however did not continue below the towing path except quite at the North end.

247. How many yoke of cattle was employed to each plow team when you began? and how many plow teams had you engaged at any one time?—When I began the usual number of yoke of oxen to each plow team was from 4 to 6—not long after, I was compelled to increase the number to 10 to each team, and I had from 9 to 10 such teams engaged at one time, and they all had as much as they could well do.

248. When did you first represent to the Board that it was doubtful whether you could finish it at

the contract prices, but that you would perform the work in the most economical manner, and give all the property into their hands?—The Board and the Agent frequently represented to me during the first summer that they were doubtful whether I was able to finish the work at the price I had engaged. I do not recollect representing to the Board that I thought I should not be able to finish it at the contract price, until the fall of 1827. When I came to Toronto with Mr. Merritt I did promise to finish the work in a most economical manner, and give all the property into their hands.

249. Did not the Directors, shortly after their meeting at the Falls, hold a meeting at the Deep Cut for the purpose of examining the books of your office, and after the slips took place recommend the sale of teams?—The Board of Directors did hold a meeting at the Deep Cut, and examined the books and accounts, and the expenditure on the Deep Cut, and manifested an entire satisfaction of the manner in which the books were kept, and the Chief Justice Mr. Robinson at that time further stated to me that the Directors always intended to deal fairly by me, and that I would not be a sufferer in the end. I did go to the Directors immediately after the work stopped, and asked them what disposition they would have made of the teams and property on the Deep Cut; they recommended a public sale of the whole by auction, and notes taken payable to the Welland Canal Company—the teams and property were all sold and turned over to the Company's hands.

250. Did you offer to me at any time after the slides took place at the Deep Cut, and after you had finished the aqueduct, that if the Company would pay you what you could prove you had brought into the country, that you would give up to them all the property you possessed in Canada?-I did several

251. Did you not shew me certain calculations soon after the work closed, shewing that your whole debt did not make the cost of your work more according to its real value than others had been paid, and what was my reply? I did shew you calculations which I hand in to the Committee as follows, showing that my work had cost less than others, or that there were an actual difference of 5 or 6 cents in the cost of theirs and mine, or the worth of each at the same calculation or of the depth of cutting and the average depth we began.

A calculation upon the average depth cutting of Deep Cut, supposed to be about 47 feet ;—the first ten feet cutting the average width will be

The average cost at the above calculation will amount to 26, 1-6 of a cent per yard.

How far the annexed calculations may correspond with the calculation of the Engineer, I am not able to say, and I have not submitted it to interfere with their calculations, but only to lead to some just and equitable examination. One thing I am certain of, and can produce sufficient proof that the calculation is nearly similar to many such works in the States; the Chesapeak & Delaware Canal commenced at 10 cents for the first 10 feet, and then rose a cent per foot until it amounted to 75 cents per cubic yard, being 75 feet deep. Neither do I submit this statement or calculation to operate against any other contractor, but I am satisfied that if a fair examination is made and the amount of earth left in below towing path on other jobs, at a fair rate, to place it on a footing with mine, which was all bottomed, there will be an actual difference in the worth of the average of the other jobs and mine of 5 or 6 cents per yard. have shewn the deepest cutting of mine, and on the opposite side the average of the whole as near as I can judge without any minutes, which is 47 feet, and I think the deepest cutting of any jobs south of mine is not more than 45 feet, at any rate not 47 feet, so that if each contractor had bottomed their jobs as I did mine, there would be an average of 3 cents per yard difference, and when their bottoms are deducted it will make five cents, but only let the subject be fairly investigated, and I will submit to whatever shall be allotted me. One thing I am certain of, that all of us contractors on the Deep Cut can truly say we have labored hard, and lost money.

> I remain very respectfully, The Company's ob't servant, OLIVER PHELPS.

Was, H. Merritt, Esq.

29 cents average cost of the deepest cutting.

Your reply was that there were contested accounts with other contractors of a less equitable nature, and that the notes for the cattle were not all collected, and further Mr. Barrett the Engineer you supposed had all the calculations necessary to make an equitable settlement when the whole could be closed.

252. Do you think the slides in the Deep Cut were occasioned by the earth being placed too near the bank, and in what manner was your earth deposited?—I do not think that the earth being placed near the Canal, operated to occasion the slips—the manner in which I found the earth as I have before described was such as to leave large ponds of water standing near the edge of the Canal; and the manner in which I placed the earth was to raise the part nearest to the Canal a little the highest so as to give a gradual slope from the Canal carrying all the water that fell on the banks quite to the back side of the earth taken out of

the ditch, being a distance from the Canal of 10 to 15 rods, which I consider tended to prevent the slips, for I think not 1000 yards and most likely not more than 100 yards of the earth taken out of my 77 chains has ever slipped into the Canal to this day, and not a slip took place on that part of the work which I finished until long after the work was given up and the new line established.

253. Were you a contractor with Hovey, Ward & others, to build 34 locks on the Welland Canal? and what was the plan and specification on which that contract was predicated?—I was. The plan and specification which Mr. Lewis exhibited, on which the contracts were predicated were as follows—The locks were to be built with face and rear timbers and round ties without any hollow quoin posts, the projection in the face timber being rounded out to receive the gate. The quantity of square timber was about 18000 feet to each lock—the quantity of wrought iron was about 8 or 9 cwt. to each lock—there was not in the specification any cast ironfor the paddle gates, neither was there any plank for planking the floor of the locks. The quantity of square timber used in each of the locks when finished was about 31000 feet to each lock—Round ties was nearly 7000 feet—the wrought iron about 35 or 36 cwt—there was 30 cm. of cast iron in each lock, contained in 4 paddle gates of 750 lbs. each, and about 3000 feet of plank.

254. Were the principal additions of timber, iron, and labor added by Messrs. Thomas & Barrett before you sub-contracted the workmanship of the locks to Squires and others —They were—they were made in the season of 1.826, and a number of the locks were completed in that season.

255. Have you any statements of Mr. Barrett's as to the worth of the extra labor which was added after the sub-contractors made their contracts with you?—I have. (Witness handed in the following:)

## WM. M. DOTY ON LOCKS.

Posts and Braces to locks,—670 @ 6 cents,	11 00 10 00 6 00 8 58
Lock No. 11 without waste weir \$1000.  Deduct for note	105 73 17 00
	88 73

WM. M. DOTY,

In account with O. PHELPS.

On account of Lock No: 32	400 00	\$ 400 00
Ditto ditto 31 Extra on ditto	1050 00 105 73	
		1155 78
Carried forward		1555 73

	1555 73
Brought forward	1155 73
Ditto Lock No. 11, without waste weir 1000 00 Deduct floor lining omitted 40 00	
960 00 Add extras	1048 73
Lock No. 10 the same	1048 73 1048 73 1048 73
	6906 38

I do hereby certify that the above allowances for extra work, &c. are correct and in accordance with the allowances made Mr. O. Phelps by the Welland Canal Company, in my opinion.

I believe the above prices to be equal to 1050 dollars for a lock of 10 feet lift with a waste weir of 40 feet in length.

ALFRED BARRETT.

St. Catharines, 26th March, 1836.

Engineer, W. C. C.

256. Have you ever refused to make any allowance whatsoever to those sub-contractors which the Engineer deemed to be just and right?—I never have. (Witness here handed in the following letter):

DEEP CUT, 14th May, 1828.

Gentlemen to whom Mr Doty is indebted:

Mr. Doty has this day been to me to grant him some assistance, and I am willing to do all in my power to enable him to settle overy honest debt as far as I can consistently, but there seems to be some difficulties in the way at the present time which prevent him from paying and me from accepting, which I will state; since I contracted with Messrs. Tayler and Doty I have been directed to make many important alterations in the locks which has added to the expense. The additional materials will, I think, amount to one hundred dollars on each lock, and the additional labor is very considerable, and this whole expense of materials and labor has not yet been estimated and it seems to have been objected to be done until the locks are finished. Neither Mr. Doty nor myself know what weare to be allowed. Mr. Doty and the other men who are builders in his situation think the extra work on each lock is worth two hundred dollars over and above the materials, which if allowed would make from 8 to 10 hundred dollars difference with Mr. Doty; and it seems that on account of the water he cannot finish the locks at the Village

this month, and if Mr. Doty's creditors should deem it expedient to wait on him until the first of July he could then have five or six locks finished, and could have his locks accepted and his extra work estimated and paid; but should they compel him to stop at this time it will be out of his power, as he informed me, to pay them; I would therefore recommend his creditors in the village to ascertain all that he is owing there, which is the principal that he owes, and let this letter and agreement remoin in the hands of some one that you may appoint, that all may share equal in what can be paid the first of next month; and I doubt not but all may receive the whole amount due the fore part of July, as which time a settlement can easily be made, which as it is now very difficult Mr. Doty and myself have both agreed that I pay him nothing further except the labor and board of his hands and his own labor at one dollar and 25 cents including board and his own labor at one dollar and 25 cents including board and his now labor at one dollar and 25 cents including board and his hall feel disposed to do all in my power to accommodate Mr. Doty, and to enable him to get along, but have already been informed that I had paid more on the locks than I had ought in their present state, and as I paid Mr. Mylne about two hundred dollars more than his work will be estimated at, I shall not at the present time pay any thing more or accept more, but should you all agree to give Mr. Doty the indulgence, we will perform he above agreement.

OLIVER PHELPS.

257. Did ever any of those sub-contractors complain to you that Mr. Barrett was unwilling to allow the full worth of the extra work?—They did frequently.

258. Did you ask each sub-contractor to make out his statement of what he thought the extra work was worth that you might lay it before Mr. Barrett?—I asked them to make out a statement of what they thought the extra work was worth—They did so, and I laid it before Mr. Barrett. The average statements were \$200.

259. What did you think of the correctness of those estimates of extra work made out by sub-contractors, and what of that made out by Mr. Barrett?—I think the estimate made out by the sub-contractors was extravagantly high. I think that Mr. Barrett's statement is nearly correct—from having an account given me of the different work and furnishing the materials, I made a calculation which went some 8 or 10 dollars above Mr. Barrett's. I will beg to present Mr. Squires' account. (The witness here handed in the following document:)—

St. Catharines, 25th February, 1836.

OLIVER PHELPS,

Per ORRIN S. PHELPS.

260. Did you at all times endeavor to follow the directions of the Engineer as far as possible, and did you direct all your sub-contractors to do so?—I did. Whenever I saw a stick of timber worked into the lock, or attempted to be, that was at all unsound, or any tie that I thought was too small and inefficient, my invariable rule was, not barely to tell them that that would not answer, but take an axe and with my own hands cut it to pieces so that it would not be worked in, or if worked in cut it in two, so that it would have to be taken out.

261. Were the locks accepted and your contract closed when Mr. Barrett made the final estimate, and in what year?—They were accepted and contract closed; and I cannot say in what year.

262. How long since were the first locks finished?
—In the Fall of 1826.

263. What length of time did you understand from Mr. Thomas, Mr. Geddes and other experienced

Engineers that the upper part of a wooden lock would last?—Generally about ten years.

264. Did you build the last 4 locks at the Deep Cut? did the sub-contractors who complained that you pocketed their money put in proposals, especially Mr. Squires? and at what price?—I did. I put in proposals at \$3,600 per lock. The proposals of Squires was \$4,500—being \$900 above my proposition. The locks of the Deep Cut were of the same length and breadth as the 32 locks—the only difference was the dovetailing of the corners, except they were 2 feet less lift, these being 8, and others mostly 10 feet lift.

265. Have you ever or at any time asked any particular or individual favor from any Director, or intimated in any way to any Director that they would receive an individual benefit from your contracts?—
I never have.

266. Did you make a contract with George Keefer

Esquire, for furnishing you a certain parcel of timber as a material for building locks?—I did so, early in the Fall of 1825.

267. What were the kinds of timber which he was to furnish and deliver, and at what prices?—The kinds of timber were—1st, Round ties 15 feet long and 9 inches diameter at the top, at 6s. 3d. or 100 feet running measure—Back timbers 1 foot square at \$3,50 per hundred, or \$35 per thousand feet—Face timbers at \$4 per hundred or \$40 per thousand feet cubic measure—the timber to be generally pine and oak—mitre sills—hollow quoined posts, and gate timber at \$5 per hundred cubic measure, to be of the best white oak timber.

268. Did you pay him a higher price than you paid others for the same kind of timber in equal situations?

—I did not—I considered it one of the best bargains I made for timber. Mr. Keefer was a stranger, and I did not know he was in the direction.

269. Was Mr. Keefer at all interested in the estimate of the locks or timber further than to receive the price which he contracted for, or did he receive any advantages above that of any other person wholly disconnected with the Canal?—He did not from me, nor to my knowledge from any other source.

269. (a) Was there ever a word passed between you and him either directly or indirectly that he should receive a benefit by your success in the locks, or that you should receive any benefit from his being a Director?—There never was.

270. Did you sustain much loss by horses and oxen, that died or got killed, and in the sale of the remainder, below the cost?—did you lose much in wagons, oarts and ploughs?—did the shanty and shanty furniture turn to much account at the close of the work?—I did—I present these invoices to the Committee as an answer to that question. (Witness gave in the following papers:)—

Brought forward, \$	2304 343	ness handed in the following document:

# STATEMENT OF LOSSES, &c.

		 				Total c			No. of arti- cles on hand at the close.	for a	the	Receive	
Office, boarding house, a Mechanics' shops,	and st	 •		\$60 30 55 63 34 10	00 00 00	207	000 500 78 96 72 10 70 10 10 10 10 10 10 16	00	250 150 55 halfylied with the glandwin, mostly worn out, mostly worn out, mustly lost, 8 19	30	00		000
·		 	 1			<b>\$</b> 3087	3	00				<b>8</b> 16918	00

The above statement is far less than the actual loss—in the first place many of the exen got killed by running off the bank—many died otherwise—the horses mostly all of them had the glanders when I took the work; and I do not think that all the sales that could be mustered would amount to \$500—of the waggons many were broken to pieces—and many old wheels remaining, and many of them cost \$5 more than I put down, and I presume thirsy of them were never sold—some that were sold the dekts were lost, and some were stolen—the harness would not have sold for half I have put it down, for I have an old hogshead full yet that is not worth five dollars—the shantics were log shantics, and my son who was clerk at the sale says there was not two hundred dollars—and the loss on the store, office, and boarding house was \$150 more than I have put down. The shingles were almost a total loss—the boards were stripped off and sold for what they would fetch, and the frame sold Mrs. Patterson—and I have give it as my opinion that the loss on the property could not have been less than twenty thousand dollars—the carts at the close were but a silittle over \$0 good ones, and those sold from II to 14 dollars. I have not in this calculation pretended to give the full amount of losses or to be very particular as you have the credit of all of this property that remained when sold, and the notes were turned into the Company: and you will find a credit made to me of she amount, and I have only done this to give some little idea of the loss that must and did accrue in closing up such a great work.

OLIVER PHELPS.

272. As testimony has been introduced to prove that you were worth little or no property when you came to Canada, did you not pay \$400 to Mr. Dettrick on land, and a considerable payment to Mr. Hartwell, and build several houses and get out many thousand feet of timber with your own money before you asked for a dollar from the Company, and whether you can state about the amount of property you brought into Canada? (Witness gave in the following paper):

Statement of property of Oliver Phelps when he first came to Canada as afterwards sold.

	There were other debts and property not enumerated, so that I considered myself worth twelve thousand dollars when I came to Canada; and although I had never until the reading of Mr. Merritt's letter as to the testimony of Mr. Love Newlove, made any particular cast, yet I have often told my friends and every one who conversed with me on the subject shat I was worth, when I came to Canada, about	10500	00,
	thought of another sale of land to Benjamin  Joy, for		
	And also a debt due from my brother Warren Phelps, which I have, since F left residual	350	001
	and brought into this Province of	1100	00
	الله ٠	7105A	~

273. Was there not a full meeting of the Board of Directors at St. Catharines to close your accounts? Was not Mr. Yates present? And what did he state to you on the subject?—There was Mr. Yates was present and stated to me that the Board haddinvestigated the subject and had agreed to beliance my account, but that as some of the locks appeared at that time to be defective he informed me that the directors would arbund that part of the work to a reference, or they would receive a proposition from me to settle and close the business at once.

274. Did you make them arroffer ! And did they accept of that offer and give up your bond and mortgages, and did you give them added of a piece.

of land, and at what value?-I did make them an offer of giving them a piece of land on the canul at Contreville, which I valued at \$1500. They did accept the offer, and gave up my bond and mortgages, and I gave them a deed.

275. As you have closed your evidence respecting your Deep Cut and lock contracts, and as Mr. Mackenzie has asserted that I was interested with you, I wish you to state to the Committee whether you ever heard me intimate to you, or whether you ever intimated to me, either at the commencement or end of any work, or at any time, that I expected to derive any interest whatever from it—was I ever directly or indirectly concerned in any of your contracts?-did you consider I favored any contractor in any way to the disadvantage of the Company?—It never was understood between you and myself that you were to obtain any advantage from my contracts-You never were directly or indirectly concerned in my contracts. I do not know that you ever favored any contractor to the disadvantage of the Company-If you ever did, it was not me.

[Witness withdrew.]

COMMITTEE ROOM, Friday, 4th day of March, 1836.

PRESENT.

JAMES EDWARD SMALL, Esq., Chairman. Messieurs McDonell, Parke. Roblin, and Shaver,-5.

Mr. Phelps again called, and further examined. [BY MR. MACKENZIE.]

276. When was it that Mr. George Keefer, Senior, was a contractor under you for supplying timber for locks for which you were a principal contractor with the Welland Canal Company?-and was not this Mr. Keefer a Director sitting at the Board and passing judgment as such on the very contract on which he was at the same time an under contractor ?— I made the contract with him in the Fall of 1825-whether he was a Director or not at that time I cannot say.

277. Was it not Hovey & Ward who invited you into this Province?-It was Mr. Hovey, one of the firm of Hovey & Ward-he invited me stating that there was a prospect of making money on the canal.

278. Did you, on your arrival in Canada, become a contractor with Hovey & Ward for 34 locks?-I did, soon after my arrival

279. I see a charge made by you in the Deep Cut case, and allowed by the Company in this form as per the minutes now shewn you.—"For loss on sale "of cattle, the same allowance having been made to "other contractors, when Mr. Phelps took the work "—92491." and "for minutes to the work "—92491." "-\$2491;" and "for wintering the same after the work stopped-\$1077;" also another item-"allowance on cattle, teams, &c., \$500." What are the names of the persons who got similar allowances for wintering or for lors on sale of their cattle in 1826, 1827, or 1828, as is stated in your account above quoted?—I so not know that any similar allowances of that now shewn me on the minutes were made to any other persons.

280. After reading to you a letter from Mr. Hovey and another from Mr. Ward already given in evidence, and reminding you of what you have said to the Committee about your resolution to decline to make a proposition for the remainder of their contract. because you were then a contractor and partner with them for constructing the 34 locks, I would beg to ask if this is your letter; and if yea, how can you reconcile its contents with your assertions that you declined to make propositions for fear of injuring Ward & Hovey, and with your after applications to the Board for £1250 and \$7,868 of extra allowances, and to be relieved from the payment of the other £7558 generously lent you to enable you to proceed without the least embarrassment?—(Mr. Mackenzie then read the following letter.)

DEEP Cut, 16th May, 1827. DEAR SIR:

Being sensible of the importance of immediate and effective measures being taken for the completion of the Deep Cut this Fall, I will suggest for your consideration the following observa--If machines are to be built, not a moment should be unne cessarily lost. I will firstly propose that I will immediately stake out the spots for 50 machines—and if you will have earth deposited this month as they draw it out at each spot sufficiently high for each machine, I will erect the whole of them with all the raga for each machine, A was erect the whole of them with all the rope hooks and every part of them in order for use by the 7th day of June next; and will accept 2 cents on each yard the machines shall take out, as a liberal compensation for erecting the same, and as a reward for the benefit the Company may receive, which I am sure will not be less than fifty thousand dollars.

2nd. When this is done I will join each contractor on the most friendly terms, and will purchase of them at a fair price all their horses, oxen, wagons, and carts engaged in hauling out, and will agree to take out all the earth to the bettom of the Deep Cut by the 30th day of November next for 10 cents per cubic yard—if you can agree with them on the ploughing and shoveling.

3rd. If you cannot agree with them I will make a further proposition, that is, I will do the ploughing and shoveling at fifteen cents per cubic yard, and will pay them for all their remaining teams, wagons, carts, ploughs, scrapers, shovels, shantes, furniture, and other tools at a fair valuation—the shantles to be estimated assembles to the market of world sharkers. ture, and other tools at a fair valuation—the shanties to be esti-mated according to the number of yards that has been excavated, and that which is to do, which will make twenty-five come per cubic yard after the machines are built—and I will perform the whole of the operation to the entire satisfaction of the Board and the Engineer, and will complete the whole of the Deep Cut.by. the 30th day of November next, from the upper end of what is called Hartwell's to the lower end of Hovey & Ward's job.

Very respectfully, Dear Sir, Your obedient servant,

OLIVER PHELPS.

WM. HAMILTON MERRITT, ESQ.

W.S. HAMILTON MERRITT, Esq.

N. B.—I can shew to your Engineer by a fair and close calculation that she foregoing proposition is as low as any judicious man ought to go, if it is, and I am sure it cannot be made our more so, it will leave but \$4500 to the contractor, which is none too much; and it may come out nearer even than that. I can also satisfy your Engineer by exhibiting my plan of operation and every thing necessary to carry them into effect that I am abundantly able to complete the job in the time and for the price stipp ulated—at any rate the Company shall not be troubled with any farm and buildings here, which are free and clear except \$600 to Detrick, a hundred and odd area at Laidlew mill with \$ good dwelling houses, 2 barns, and some village lots, with a good store and other buildings, and the best part of the steam boat out Cayenga lake, which is all free and clear and is worth altogether not far from twenty thousand dollars. for from twenty thousand dollars.

Yours,

OLIVER PHEEPS.

The letter is mine—I did decline making any cal-culations as to what the Deep Cut could be excavated for with my machine as stated in my evidence yester-day solely on account of Hovey & Ward having

been connected with me in the locks, then being, as we ever had been, good friends and on good terms, I alleged that as the only reason why I was unwilling to enter into a calculation; I also did, as stated yesterday, decline doing the same until Mr. Merritt came to me the third time and assured me that Hovey & Ward had given up their contract and was only working under the Engineers for the time being, in addition to which I had frequently heard Mr. Ward blame Mr. Hovey very much for the course he had taken in giving up the job. All this was previous to the making of the calculation or writing this letter, and after making this calculation and after having proved the utility of the machine I shewed the calculation and statement to Mr. Barrett the Engineer, and to Mr. Merritt the Agent, who requested me to accompany it with a proposition for performing the work—and after having looked over the calculation, being, as I was, confined to my room with the ague and fever, it appeared to be very favorable, and I verily thought that I could finish the work for the price stipulated, but did not expect, as may be seen from my letter, to make any great sum by the work—the sum which I expected to make in contract was not the object; the principal object was, as I had purchased property on the canal, that I did not wish to see the canal go down—it being said by the enemies of the canal that it had already failed. After commencing the work and ascertaining that a good deal of earth on the sides of the canal, and old roads which had been estimated in the previous work, and not being able to obtain a sufficient allowance for taking out the same, and also the excavation becoming harder and more difficult, together with an extra waste of time in watering cattle, and another fact of the soil being of such a slippery clay nature that instead of losing two days in a month by wet weather according as I had calculated, the roads were so slippery in wet weather that on an average from 4 to 5 days per month were lost, at some times full 3 days in a week. I was necessitated to ask further aid and assistance or stop the work, as it will be seen what little prope ty I had was 300 acres of land lying on the canal, and houses and lands, steam boats, &c., in the States, and having no means of my own of prosecyting the work.

281. Did you consult with your partners in the locks, Messrs. Hovey & Ward, before you sent to Mr. Merritt the proposition to supplant them in the Deep Cut contract which I have just read to you?—Did you shew them, as your friends, what you intended to do, and ask their approbation?—Mr. Merritt, Mr. Barreit, any myself, were all at the Deep Cut. Messrs. Hovey & Ward were absent in the States, and therefore I could not consult them.

282. In a letter addressed by you to the Hon. J. H. Dunn, and now shewn to you, you say that on your application about two years hefore, when you gave up the Deep Cut property, you had every reason to believe, from a letter directed to you by Mr. Merritt, that the Deep Cut business was set at rest, and that you are now informed that it is on account of the locks that the business cannot now be closed. Could you produce Mr. Merritt's letter to the Committee as it does not appear on the Company's letter book!—It is uncertain whiether I can or not. If I can find it I will send it to the Committee.

283. It appears by the books of the Company that you received not only your contract price for so much of the remainder of the Deep Cut as you excavated before the slides took place, but also an advance of about ten thousand pounds beyond the Engineer's estimates; that from this ten thousand pounds an allowance of five thousand dollars and then another allowance of between 7 and 8000 dollars were made you, although the result of your labors was a failure; and that for the remainder of the money amounting to £7558 you are now entered on the books of the Company as a defaulter. I am informed by the officers that they are unable to produce the original contract made with you on this transaction, involving as it does an expenditure of about £50,000—that it is lost, and that they have no copy-Mr. Beaton states to me that he is not sure that he ever saw that contract. You were asked for the duplicate of it some days since—are you now prepared to produce it?— I cannot now—I am not certain that I have it in my possession—I will send it to the Committee if it is to be found.

284. Who were the sub-contractors under you?—Donaldson & Davis—I do not know but Mr. Vanalstine might have drawn his money through me for work done at the Deep Cut—I ever desired to act honestly and fairly to all sub-contractors under me. I do not recollect that there were any others, but I am not certain.

285. Can you produce to the Committee a list of the prices and allowances you severally made your sub-contractors?—I cannot—thework which was done by them was estimated by Mr. Barrett the Engineer to each man who performed the work.

286. In the absence of your contract or any copy of it can you inform us how far it extended 1—Commencing at the North end of the Deep Cut, extending 77 chains.

287. You said yesterday that 15 cents ought to be allowed on the first 10 feet of the Deep Cut from the surface. By the estimate book I perceive that James Anderson appears to have performed 10,000 yards of excavation at 9 cents; Bradley & Co. 11,000 yards at 10 cents; Davis & Donaldson 14824 yards at 11 cents; Keefer & Co. 14,144 yards at 11 cents; Newlove & Porter 14,907 yards at 11½ cents, and 10,000 at 9½; Trotter & Co. 14,000 at 10½ and 11; T. Merritt 9,000 at 12½; Davis & Donaldson 121,062 yards at 12½, and 16,000 at 8½; and a number of other persons at 3 and 9 cents; the only case where 15 cents are allowed is that of 1600 yards to Thomas Merritt Jum, a very small quantity. How do you shew by the usage of the canal that 15 cents was fair for the first ten feet?—These mentioned in the question are on the narrow canal in various sections as it runs through the country. The Deep Cut is different altogether—to which I alluded in my answer yesterday being from 136 to 150 feet in width, and I further see from the estimate of the Engineers that some of the contractors on the Deep Cut were paid 15 cents at the beginning, and afterwards was allowed three cents more making their first 10 feet amount to 18 cents.

288. You have given in a copy of an account between yourself and Sydney R. Squires, a sub-contractor for the locks. It differs from his statement to Mr. Half already in evidence. Have you the

vouchers to support the copy you have handed in ?—
I have not here—I dont know that I can produce it, but the books and accounts were all examined by Mr. Squires and myself, and was satisfactory to him exexcept the allowance for extras as made by Mr. Barrett.

289. You were told by the Board, as appears by their minutes, that your Deep Cut contract would in no degree free you from the responsibility attached to your other great contract for the 34 locks then in progress; but although you had assured the Committee of the House of Assembly in 1825 that \$2,200, (your contract price) was an ample price for each lock; and although it appears by Mr. Squires' statement to Mr. Hall and myself, that as a sub-contractor he received much less price than was allowed you originally, including the charges afterwards made in them, yet Mr. Hall has stated, and it is a matter of general notoriety, that the locks are badly finished and a failure, and it appears from the minutes of the Board that the Company looked to you for the strict fulfil-ment of that contract. Under such circumstances, what claim can you have on the Company, deeply indebted as it is to the Province, to make you a present of £7558 ?-I did give testimony in 1825 before a stick of timber was cut for the locks, that agreeably to a plan and specification of Mr. Lewis' upon which the contract was predicated, I believe \$2,200 an ample price for the locks, and had I been allowed at the same rate per cubic foot for the timber as the locks were finished, and the same price for lock iron agreeably to the price actually worked into the locks, together with 3,000 lbs. of cast iron for the paddle gates, extra plank spike and labor, I should have been paid over a hundred dollars per lock more than I received, which was about \$3,400. All the principal additional extras were added agreeable to the estimate of Mr. Thomas and Mr. Barrett in the summer of 1826 previous to my sub-contracting the work to Squires (see testimony of Mr. Barrett's statement.)

I claim the £755S on account of the locks having been finished and accepted by the Engineer and paid for at a less price than the actual worth according to the specification, and I claim it also on account of having finished the Deep Cut, or that part of it which I finished, in the most economical and prudent manner that it was possible for me to do, and having given up all the property at the close of the work, into the hands of the Company for which they had advanced me money to make the outfit at the commencement, and also other advances during the work which was all faithfully and honestly expended on the work or given up to the Directors at the close-and also on account of having frequently been assured by the Directors that it was not their intention that I should be a sufferer by the completion of that work, as may be seen from the resolution of the Board in the Fall of 1827, and also as was assured me in the summer of 1828 when the Directors met at the Deep Cut to examine my books and accounts of the concern, after the examination of which they manifested an entire satisfaction with the method of keeping the books and accounts, and with the expenditure and progress of the work, especially as was declared to me by Mr. Robinson, and further, on a careful examination of an actual calculation of the worth of the various parts of the work performed by each individual; knowing or allowing the whole cost or worth of the Deep Cut to be 25 cents per cubic yard, I found by examination

that I had been paid less than any other contractor according to the actual worth of the work including all the advances and allowances from the commencement to the close of the work, and also including the balance standing against me on the Company's books previous to my settlement with them, all of which, both as it respects the locks and Deep Cut, has been amicably settled between the Directors of the Welland Canal Company and myself and all sureties given up on the part of the Directors by my giving them as I did a certain piece or parcel of land of 40 or 50 acres joining the canal at Centreville, valued at \$1500.

290. Where is the proof of any settlement between yourself and the Canal Board?—I see they allowed you to dispose of your property, but I find no evidence of a settlement on the minutes?—The proof of the settlement is the transfer of the securities given by me to them, and the conveyance by me of the deed before mentioned, to them.

291. You have said that you made over to the Company about fifty acres of valuable land—To whom did you give the conveyance of this property, for I do not find it in the Canal Office?—To the President and Directors of the Welland Canal Company. (which was produced by the President and shewn the Committee.)

292. You said yesterday that you had paid a great deal for shanties and other buildings—How is that to be reconciled with the entry on the minutes of the Board of 9th June 1827, which shew that the Company paid for all Hovey & Ward's shanties at a valuation at the time you succeeded them in their contract?—The money was advanced me by the Company, and I paid the several contractors for their shanties what I received, as will appear by the accounts put in yesterday, was charged in my account on the Company's books as advances with all the debts which the former contractors owed the Company—I assumed and they were charged me, as will be seen in the above mentioned accounts.

293. In your letter to Mr. Merritt of the 2nd of June, a few days before you took the Deep Cut contract, by which other contractors were discarded, and which letter is now shewn to you, you say,—"the worst of all is they (the contractors) are sour and cross, and you cannot talk without being actured of either unfairness, dishonesty, or of committing a trespass by making out bills." Had they not good reason to be displeased with conduct such as yours has been in these transactions?—(Here Mr. Mackenzie produced the following letter alluded to above.)

DEEP Cur, 2d June, 1827.

DEAR SIR,

I have got business pretty well arranged. Mr. Hathaway has agreed on most of his property—he made out a bill and averaged the price of his oxen, and I went round and appraised each yoke separately, and only differed in the whole 31 dollars—I was the lowest. This morning took the same course with Mr. Rowley and only differed 10 dollars in 25 oxen—I was above him; all his property is satisfactorily arranged, and there is no settling plan only with Donaldson & Co. there will be a dead and total loss of about 400 dollars after allowing him his own price for every thing on hand—cattle, horses, tools, provisions, the worth of the shaneyand timber, and all the iron and rope, at his bills, and willing to lose out and out 150 dollars; and if you do not come and says o I will lose the one-half; but the worst of all is, they are sour and cross, and you cannot talk without being either ac-

cused of unfairness, dishunesty, or of committing a trespuss by making out bills. Nothing has been removed.

Yours in haste, OLIVER PHELPS.

WM. H. MERRITT, Esq.

I think they had no good reason to be displeased with me; I think the true reason of their complaining or being displeased with me is, they had made great calculations of making large sums of money, as they had nearly or quite all of them expressed to me previous to my taking the contract, that they should get 40 cents per yard for finishing the Canal, as they stated it could not be done for less in their opinion, and their being disappointed in making those sums which they had calculated on, I believe to be the true cause.

294. You say that the part of the deep cut finished by you was of a harder description of soil as you increased in depth than where you began; and you say you went to the bottom. I have always understood that the deeper you went the softer the soil was, and that this softness at the bottom was one cause of the slides.—Is this so or not ?—The part of the deep cut which I finished became harder as I went down, with very large stone and round rocks, and many spots of hard pan until I got about to the towing path of the upper end of my job; and as I went down it became softer, so that a man standing on some places, by springing upon it, could shake the earth 20 feet round, and we often thought in those spots that the earth appeared to swell at the bottom, as cutting a small ditch through the same would in a day or two almost become extinct; and I only attribute the banks on the north part of the work standing as well as they do to the extreme hardness and toughness of the soil above.

295. For how many thousand yards of excavation were you allowed on your deep cut contract, exclusive of any extra allowances made you? I am not able to say from my personal knowledge.

296. Was it not a part of your contract to complete the excavation in 1827, instead of which it was far from being finished in November, 1828, although every possible facility had been afforded you? It was the understanding, whether it was written in the contract or not, I was not able to accomplish what I expected, for many reasons, one of which was that I expected to begin where the other contractors left it, instead of having to bring down the sides, which contained many thousand yards, another was the hardness of the excavation, another the additional loss of time in watering cattle, wet weather, and sickness, that prevailed the latter part of the season, and having to close the work on account of the wet weather, at least six weeks sooner than we expected.

297. Answer to the best of your judgment what proportion of the earth, you excavated from the deep cut, went back into it again? No part of my work slipped in for a considerable time after the original level of the deep cut was abandoned, and I do not think to this day that there was more than one or two hundred yards slipped m—I feel quite confident there was not 1000. The Engineers compelled the other contractors to place their dirt in a similar manner to mine, considering it a preservation to the canal by

turning the water at a distance back of the Canal instead of placing the earth so as to lead the water into the canal, as was invariably the case when I began.

298. Were you not as well aware of the true nature of the ground at the bottom of the deep cut when you took the contract, as other contractors who cautiously excepted quick-sand and water in their tenders? How well acquainted with these facts other contractors might have been, I cannot say—I can only say that I knew nothing of it until a small slip took place on Mr. Hartwell's job at south end of Deep Cut, after which Mr. H. told me that he always believed it could not stand, the bottom was so soit; although he died in June, previous to the slips, he stated to me, and I think to others, that he believed it would all cave in the same manner—it would cave into where we were standing, which has proved true in many respects.

299. Who was the contractor next to you on the Deep Cut—what was the depth of his cutting, and the depth where he began?—Mr. Thompson—the average of his cutting was about 45 feet—I cannot say the depth where he began—I think Mr. T. however, did not begin until the spring of 1828. I do not think he bottomed any of his.

300. You have said a good deal about your losses on shanties, cattle, horses, carts, &c.—Did your contract give you to understand that the Canal Company would find you in cattle, tals, &c., or winter your cattle, or find you in shanties, or indemnify you for your loss on teams, besides paying you the contract price stipulated?—I do not think it did.

301. Your contract not being forthcoming, I have referred to the minutes of the Canal Board of 26th of May, 1827,—present, Messrs. Dunn, two Messrs. Boulton, Clark, Keefer, and Robinson, and find that you were allowed to contract for "the whole remainder of the Deep Cut at 25 cents, with an allowance of two cents per cubic yard for machinery;" and that an agreement was entered into with you to complete this contract within six months from that day. On referring to the Estimate book, I find that instead of 27 cents you are allowed a variety of prices, extending up to 35 cents. Was this range of prices in conformity with your written contract, or on what principle was it determined ?—I have frequently asked Mr. Barrett, the Engineer, the manner in which he estimated the difference from top to bottom, but he never gave me any satisfactory account. I suppose, however, he endeavored in his estimates to make the price range in such a manner from where I began to bottom as would make the whole sum amount to 27 cents.

302. Has not the results of your interference in the contracts of your brother contractors who were going on with the excavation of the Deep Cut, been to deprive them of the employment in which they had invested their means, and by which they carned their livelihood, while at the same time, although you was enabled to supplant by under bidding them in the work they were going on with, you have since come forward and claimed the additional prices they would have regularly obtained had you not been successful in monopolizing the whole work—and all this, although you had then plenty of employment as a contractor for 34 locks—a work going on at the

same time?—I have not at any time improperly interfered with my brother contractors for this reason—Mr. Merritt, the Agent, and Mr. Barrett, the Engineer, confidently assured me that there was no contract existing between Messrs. Hovey and Ward and the company—Mesars. Hovey and Ward also stated the same previous to that as well as other contractors that they should not perform the work unless they had a sufficient allowance to cover what they thought would be the actual expense—previous to my making any calculations, Mr. Merritt stated to me that he thought there was a combination of all the original contractors to extort from the company an extravagant price,—he said also to me at the same time that he thought that the Company would be willing to pay 30 cents from top to bottom, and asked me if I would not contract for some part of it —to which I replied, No.—This was previous to my proving the machine.

#### [By Mr. Merritt.]

303. What was the relative value of the excavation in your contract on the Deep Cut, provided the first 10 feet was worth 18 cents per cubic yard?—The relative value of mine would 38 150 cents.

[Witness hunded in the following statement, &c. and withdrew.]

Which amounts to 25 cents and \( \frac{10}{100} \) per cubic yard, on the whole deep cut—this average price will correspond nearly with many other deep cuttings.—The Chesapeake and Delaware was 10 cents per yard for the first ten feet, and increased 1 cent per foot, to seventy-five feet—the average cutting of that part of the deep cut, finished by Oliver Phelps, is forty-nine feet. \( \frac{10}{100} \) calculation of what remained in when taken by Oliver Phelps allowing the average depth to be 50, and that he began 17 feet below the surface—shewing the worth of the work done by him, agreeable to the foregoing calculation.

					634	_ 5 yd'	5	\$2229	30

At this calculation, the part finished by O. Phelps, would amount to  $35^{13}_{140}$  cents per cubic yard.

The average cutting of that part of the deep cut, south of Phelps' part, and finished by others, is  $42\frac{1}{160}$  feet, and they begun at 11 feet  $\frac{1}{160}$  below surface; but, allowing that the average of their cutting was 53 feet, and that they began 12 feet below surface, which is near half a foot in their favor in the whole depth, and near half a foot more where they be-

gan, but, say they began at the 13th foot, cutting which is lower than they did begin.

This is about the average depth of cutting that was done when the slips took place, and would make the amount to  $28^{19}_{100}$  cents per yard cost of cutting or excavating.

I beg leave to state in evidence before this committee that in answering all the questions put to me by Mr. Merritt, Mr. Mackenzie, and this Honorable Committee, that I have endeavored to answer them as honestly and fuithfully as I could have done had I stood before the Judge of the whole Earth; and in justice to myself and to this committee, and for the satisfaction of the community, who are anxiously waiting the event of the investigation now before this enlightened, and I may say truly patient and indulgent committee, I beg leave further to state that as some intimation has been given that I might during the work of the Deep Cut and Locks have sent large sums of money to the States from which I came, in drafts or otherwise; to which I can answer that when I came to Canada I was not owing a hundred dollars in the world, except a transaction relative to the Eric Canal transporting Company which I will explain in short. I had paid into that Company eleven thousand dollars-I found it a losing concern I sold out to Keeler and Mather of Albany, for about three thousand dollars, on time; but they failed, and I never got a cent; the other owners ran the line until all the capital was spent, and got into law,

and I was prosecuted amongst the rest, and rather than defend the suit I, with the others, made a compromise; and about three years since I paid what I agreed to-to wit \$600, but I never sent a hundred dollars to the States during the whole work, that I received of the Company, except for cattle, carts, feed for cattle, and other necessaries to carry on the work-and I can truly say that in all things relative to the important trust reposed in me by the Board of Canal Directors; and in all this vast work I have acted faithfully and honestly, as I expect to answer it to my God; and I can truly say that money would not hire me to go through another such a work; and having had an extensive acquaintance in the United States, and some little acquaintance in this Province, I think it cruel after having acted in the most faithful manner as a public servant, and done that which no other man would have done, it is unreasonable and cruel that my name should be cast out as evil, as it has been in the paper called "The Welland Canal." I beg of this committee to look for a moment and see under what circumstances I engaged in that vastly laborious and hazardous work of the Deep Cut; which was well nigh dead, dead; and its grave already dug, and its enemies passing the funeral ceremonies. Did I go then to supplant (as Mr. Mackenzie says) the worthy Messrs. Hovey and Ward and others, or did I go there to erect a machine, to try if possible to help the Company out of a dilemma which they had fallen into by being badly advised by some, and the combination of others, who thought it no harm to obtain a pretty round price of His Majesty's subjects. Did I eagerly seek to place myself in a situation where every man of sense must know I must incur the displeasure of my countrymen and my hitherto warm friends; one of which had invited me into the Province, assuring me that there was much money to be made; -I can answer no; I was drawn into it by one who has ever felt so deep an interest in the Welland Canal, that he would sacrifice his own interest, and that of his best friends, to promote the interests of the Canal; and was I in a situation to enterinto a full and just calculation of the worth of that work: having never spent but a few days at that place !- No; had I been in full health I might have formed a different estimate; but lying on a sick bed, and every other day the ague and fever; and my well, or days between the ague, I made the calculation and proposition; and all Directors and former Contractors thought I had taken it far too low; but I fully believe had it not been for three circumstances which I could not foresee, I should have done it at the price contracted for, let alone the extra hardness of soil, these will I mention; I fully believe that I took out fifty thousand yards from the sides of the canal and roads that was not estimated to me; twenty thousand of which was only allowed, being the \$5,000 charged in my account. I lost at least \$100 per day for a hundred days in the first season, and 60 days in the last, over and above my calculation in the delay occasioned in watering teams, and six hundred men lying idle at the same time,—and lastly, in my calculation I allowed two days each month for wet weather, and the fact proved that we often lost 3 days in a week, and an average of 4 to 5 a month, the banks being a slippery clay, and expenses was not less than \$800 per duy.

But after all on examining the statements and calculations herewith presented, and what you will find,

from the Engineer's calculation and statements, allowing the whole Deep Cut to have been worth, or cost, 25 cents per cubic yard, you will find that the contractors previous to 1827 have all received more than the work was worth; and that the other contractors or operators that worked fifty-five chains in 1827 and 1828, their work should have cost on an average 28 100 cents, and they have been paid, as appears from examining the Engineer's statement, herewith presented, 28 300, a little over the cost, and the seventy-seven chains finished by myself was worth, or amounted according to the same calculation of others 35 100 per cubic yard; and I have received in all the advances of thousands and tens of thousands, together with the charge for old shanties, ticks, and blankets, horses and oxen, long since dead and gone, together with \$30,000 defalcation, as you will see from the book, and Mr. Barrett's and Keefer's statements not to exceed 34 cents per cubic yard; so that I am the only man but what has been over paid.

OLIVER PHELPS.

SATURDAY, 5th March, 1836.

Committee met.

PRESENT,

JAMES EDWARD SMALL, Esq., Chairman.

Messieurs Chisholm, Gibson,

McDonell, Parke, Shaver,—6.

Mr. Amos Norton, called in and examined.

[By Mr. Mackenzie.]

304. You are an iron founder and builder of steam engines in this city?—I am, but do not style myself an engineer.

305. Did you build the engine of the Sir Walter Scott Steamer, and if yea, do you consider that the Sir Walter or her engine was suitable for a Dredging machine to the Welland Canal Company?—I furnished the engine for the Sir Walter Scott, and erected it on board the boat.—As respects Dredging Machines, I do not consider myself a judge.

306. Was you staying sometime at Dunnville lately?—I was there at the time I was putting up the engine last spring.

307. Had you any conversation with Mr. Cyrus Rose, the canal superintendant and contractor, relative to the canal: and if yea, state what it was?—I had conversation with Mr. Rose, he was building the Berm Embankment, and I understood he was the superintendant.—The most of his conversation was respecting the Berm Embankment, he said, that in order to make the hest job he could of it, he was in a habit of putting in both logs and sumps—he rolled in nearly all he could conveniently cover up with earth, that is all lying handy by the work—thus took place in the summer of 1834—I was there again in December following, he then remarked to me, he had made money by the job he had finished, he cleared something like one dollar a day clear profit on every man he had employed on the job, he also informed me that he had taken another large job in

company with Mr. Thomas Merritt, I enquired if Mr. Merritt was coming there to assist him, he replied that Mr. Merritt was at Gravelly Bay-he said he did not expect much personal assistance from his partner, that that was not his object in going into company with him, it was that he thought he would obtain better measurement, and that he could do better by dividing the profits than to take the job on his own account, as he considered Mr. Merritt more of a favorite than himself, and remarked that the principal profit on those jobs was by extra measurement -I further enquired of him (Rose) whether he was going to take any job in widening the canal, he said no, as it would be nothing gained by measurementthat was the principal of the conversation on that subject.

308. Did Mr. Rose distinctly give you to understand what he meant by extra measurement in this contract in which he was concerned with Thomas Merritt, Junr. ?—I suppose he meant that they would not be nice or particular—I understood that by his taking Merritt as a partner, he would be allowed really more than it actually was.

309. Did they place any log heaps in the embankment or Berm bank made by Thomas Merritt, Jun., near Dunnville?—There was a great many logs and stumps put in, to my certain knowledge.

## |BY MR. MERRITT.]

- 310. What value did you place on the engine of the Sir Walter Scott?—I sold it to the company for a steamboat, and was to put it up on board the same for £500 cash, and £100 stock in the boat.
- 311. What was the cost of that boat?—I believe the contractor told me he was to have £300.
- 312. Do you consider the engine of sufficient power to propel a Dredging Machine, and in case the boats were made stiff and substantial, and in case the scrapers and apparatus was furnished, do you think it could be applied to that purpose?—I am not sufficiently acquainted with Dredging Machines to give a positive answer. So far as I do know, the engine might be applied as well as all other engines for a Dredging Machine. The engine I considered strong and good for one of its power. I think it would well work 20 horse power. Some engineers would call it more. Although the man had a certain sum for building the boat, it turned out not to answer a very good purpose. The engineer, John Dew, that I took up with me to put up the engine, advised me not to attempt to put the engine on board that boat, as he thought the boat was poorly built and drew too much water. It might be made to answer as a Dredge, but I cannot say.
- 313. You say Rose was a superintendant to the Canal Company; how did you acquire or from whom did you acquire that information?—I consider he was working on his own job.
- 314. Where was the job situated to which you allude that Rose had contracted for in the summer of 1834?—I believe it was both above and below the Guard Lock, near Dunnville.
- 315. Where was the job situated that Rose had taken with Thomas Merritt!—I saw him at work between Dunnville and Broad Creek, and I suppo-

sed there was his job. He mentioned it was to be taken down 3 or 4 miles or more.

- 316. Was it above or below Cranberry Creek?—I do not know where Cranberry Creek is, but I know the country was flooded some distance above Broad Creek.
- 317. Are you certain that the conversation you alluded to with Rose, applied to the job of Thomas Merritt, that he (Rose) was then prosecuting with him, on which he expected this additional measurement?—I do not know of his having any other job at that time, and therefore considered that that was the job.
- 318. If he expected to get an additional measurement, from whom was this additional measurement obtained?—I do not recollect he gave any explanation about it. I supposed it to be from the person who either measured the work or paid him.
- 319. Was any other persons present at the time this conversation took place?—I think there was. At one time Mr. John Leys was present; he was frequently present at Mrs. M'Keever's, where we all boarded.

What time in December was the conversation?—
I think in the fore part of that month.

[Witness withdrew.]

# Mr Mackenzie again called and further examined. [By Committee.]

321. In your 7th charge you say that the charges for casual expenses are in many cases improper; and that some of them are such as no board should have audited, nor any gentleman preferred. What items in the Contingent Accounts do you object to?—If I were to state all the items to which I object, my reply would form of itself a voluminous document. I will therefore give but a few specimens. The oldest of them is from a contingent account of Mr. Merritt's, which the officers will now produce to you as it passed the Board.

[The officers of the Company here handed in the following memorandum:]

Received from James Gorden, Esq., Treasurer of the Welland Canal Company, the sum of One Hun-dred Pounds Currency, on account of Expenditures made on behalf of the said Company. WM. HAMILTON MERRITT,

Agent W. C. C.

St. Catharines, 4th May, 1825.

Mr. Merritt's account of Expenses, & 98 14 By Cash, - - -100 0

Balance due the Company, - - £ 1 15 10 Approved,

H. J. BOULTON, V. President W. C. C. Mr. Boulton's contingent account of £300 Sterling, is another similar specimen.—The bill from Wares' last year, of bottled Port and Madeira for the Board is another.—The greater part of the expenditure of £203 of contingent charges when Vollars' vessel was dragged through the canal, between Nov. 1828 and 4th of December, is another—There is wine and whiskey, and spirits, and beef tongues, and dinners and poultry, and a sum paid for damage done to twenty flags borrowed from Sir John Colborne for an occasion in which the people were to be deceived by show.

A charge for the use of Love Newlove's Horse and the loss of his saddle by Sir John Colborne, when Chief Justice Robinson and Mr. Merritt brought him over to view the work is equally reprehensible. The following extract from the Chief's letter to Mr. Merritt shews that Sir John was considered a puppet which they could move as they pleased—£25 are charged as paid from the Company's funds to Newlove for the loss of the saddle by Sir John and the use of the horse—and at this time the Company were bankrupt and Sir John in the receipt of £5000 a year of public money to keep him in horses and saddles.

The following is the extract from Chief Justice Robinson's letter, about bringing over Sir John Colborne, whenever Mr. Merritt would be ready for him:

May 31st, 1829.

WM. H. MERRITT, ESQUIRE, MY DEAR SIR:

I know you have been most anxiously waiting for my Report and the letter of Mr. Ellice. The latter might have been sont back to you at once but as you allude in it to the intended report, I kept the one till I could fulfil my promise in the other. I have been unusually harrassed and interrupted since I saw you, besides the necessity of preparing matters for a change in my duties which cannot be distant, and I could not persuade myself that I could take up the Report in the way I wished until Friday morning, when I put together that which I now send.—You may perhaps think I have gone unnecessarily into particulars, but the work is now at a pinch. Explanations are called for, and doing this now will save trouble hereafter. I have had several conversations with Sir John Colborne who expresses every readiness to concur with us. He came back yesterday from Penetanguishino. Let me know when you would rather see him at the Canal.—I hope Mr. Boulton will not have left you, so that you can show him the Report.

1 am, dear Sir,
Very respectfully Yours,
JOHN B. ROBINSON.

Four and one-sixth per cent said to have been paid at Toronto for a bill on New York to pay £1500 interest at Buffalo, is another curious contingency.—£500 to J. B. Yates as a douceur for getting a £50,000 bill discounted by the United States Bank with the debentures of Upper Canada as security, is another.—The £613, besides his salary, to Mr. Merritt for the deceptions practiced in his journey to England is another. The £500 douceur to him over and above his agency, in 1825 is another. And the contingencies of the Steamer Peacock, where the officers contrive to charge the Company with £90 or so for wood as contingencies and then collected the same sum again the second time from the Company as a part of £447, 10, of an alleged deficiency in the returns of the boat is another.—The £180,6 9 to Mr. J. B. Yates in 1831, from the loan by the public, for his packet

boats, Chief Justice and Albion, which produced loss, expense and trouble, and soon after were sold to two of the Directors at auction for £5 15, and £6 5, as the price of both, is another. I might swell this answer, but there are other heads appropriate.

322. Have you any thing to offer to this Committee in support of the allegations contained in your 30th charge?—Yes—First, Copy of my notice that I would caution the public. Second, Copy of my letter to Mr. Merritt last October, on the state of the monied concerns. Third, A certified copy of the resolution of the Board locking up the Canal Books and accounts. Fourth, My letter to the Board of Directors complaining of their proceedings of the 19th and 20th of November last—and, lastly, The resolutions of the Board adopting Mr. Burns' and Mr. Bowrey's report, and ordering all their proceedings with respect to my charges to be expunged and blotted out from their journal as being unworthy of a place in such records as are kept by the Welland Canal.

# [From the Correspondent & Advocate of the 10th Dec., 1835.] WELLAND CANAL.

The undersigned has just been informed that the Welland Company are about to contract for repairs and improvements to the amount of 25,000 or 30,000 dollars to be executed this winter, and paid for by Copper Plate printed notes of from 5 to 50 dollars each, payable 12 months hence, with interest. This the majority of the Board of Directors intend doing because their funds are gone, and I am of opinion from what I have seen of their proceedings, that if their funds had been twice as much as they were, the persons who had them in charge would have contrived to get rid of them with the same facility. In 1833 they got in debt with every body and their due bills bearing interest were handed about the Niagura District and sold for goods at 20, 25 and 30 per cent discount. The President well knows the reason why additional funds are not now to be obtained, and that it is a very sufficiant one. Yet the humbug of contracting at two prices, with chance pay ami then making a merit of it, as in 1833, is to be repeated. Be it so. Had they been willing to wait the opening of the Legislature (which for aught I know to the contrary may assemble under a different administrator of the Government) I also would have done so. This is the first time I have written a line for the public concerning the Welland Canal since the Legislature appointed me one of its managers, and I was in hopes that the first report to which I would be a party concerning the affairs of that work would be left for the consideration of the House of Assembly, but in order that the people of Upper-Canada may see how matters stand (and they have a direct interest to the amount of a million of dollars) and in order that the other Stockholders and creditors of the institution throughout Europe and America may be prepared to advise the members of the Legislature and the government here for their interest, F will instantly put to the press and publish such a statement. Is must excite the indignation of every good man—leaving it to the peoples' representatives to ju

I wish this notice to be published once in the Correspondent, to be struck off this Evening.

(Signed) W. L. MACKENZIE.
York Street, Toronto, }
December 9th 1835.

#### A REQUISITION FOR A SPECIAL BOARD.

[Copy.] Wells St. Catharines,

Welland Canal Office, St. Catharines, October 21st, 1835.

As a member of this Corporation, named by the Government Directors to examine its financial affairs, I inform you with deep regret, that false entries to the disadvantage of the shareholders and the public, to the amount of at least, the filosomic dollars;

are clearly to be seen on the books of account,—that fraudulent erasures have been made to the injury of the Corporation,—that a defalcation of many thousand dollars, on the part of the officers, is plain and evident,—that the entries in the books, in many cases, exhibit to me a systematic series of efforts to cover dishousasty and embezzlement—and that the confidential person who keeps the books, under the Secretary's suppermendance, is absent, and it is believed drunk, a state not unusual to him.

Under these circumstances I respectfully request, that an immediate and extraordinary Board be called, so that the Directors in their collective capacity, may enquire into the charges herein preferred, and take such steps as shall appear to them expedient.

I have consulted with Mr. Therburn, who suggests this course as a discreet one, and Mr. Clark the Secretary, is also desirous that it should be adopted.

It was my intention in the first instance to have taken steps for the apprehension of Mr. Beaton, the Clerk who made the entries in many of the cases I have alluded to, but it being Mr. Clark's opinion that the less course would be to leave all to an extraordinary Board, I will refrain from instituting any proceedings against him.

I further beg leave to suggest, that, besides the special messengers to convene the Board, a person may be sent to bring down Mr. George Keefer, junior, and Mr. Black; the latter of whom is implicated deeply, but may, I think, be able to shew, that the guilt laid to him ought to be charged on another.

I remain, very respectfully, your most Obedient humble servant,

(Signed) W. L. MACKENZIE.

W. H. MERRITT, Esq. President. Welland Canal, St. Catharines.

This is a correct copy of a letter delivered to W. H. Merritt, Esq. of this date.

(Signed)

F. HALL.

Resolution agreed to at an Extraordinary Board of the Directors of the Wellund Canal Company in Oct. 24th, 1835, present, the President and Messrs. Creighton, Thorburn, Butler, and Mackenzic.

Resolved. That whereas upon an examination of the books of account and odicial papers relative to the monied affairs of this Corporation by Mr. Mackenzie, a Member of this Board,—appointed by the Directors on the part of the Province to make such enquiry, with the concurrence of the Board of Directors, it appears to him that the financial affairs of this Corporation are in a state of great decangement, and that the books have been improperly tampered with.

And wherens, this Special Meeting was called by the President on the request of the Secretary and two Directors, for the express purpose of considering these charges; and, wherens, Mr. Mackenzie has, at great length stated the grounds on which he formed his judgment, and expressed his imbility for the present to continue his investigation; and whereas there appears to this Board good and sufficient grounds for subjecting these matters to a full and specily investigation, and of making such regulations as shall ensure a full report by competent and disinterested persons, and in the mean time secure the business of the Canal from interruption: It is ordered, that until the close of the navigation all monies due from the Company, shall be payable, only on Mr. Hall the Engineer's estimates approved by the Board, and that all monies due to the Company and outstanding, or which may become due shall be paid from henceforth only to Mr. Creighton the Treasurer of the Company, to be by him distursed agreeably to the orders that may be made by the Board, on such estimates; that all the books of the Company, and also all the official papers of the Company, be called up immediately by the Board and placed in charge of a Committee, consisting of Orden Creighton, Esq. the Treasurer, and Messers. Thorburn and Butler, until the company shall, at the next meeting of the Board, appoint a proper person, or proper persons, to enquire into the condition of their financial affairs, and report what grounds there are for the charges Mr. Mackenxie has preferred.

And that it shall be the duty of the Treasurer and Secretary to give notices to the parties who may be affected by this Resolution, what this Board hath herein ordered; and to send a copy

of this Resolution to each Member of the Board, requesting his attendance here at ten o'clock, on Thursday, the 19th November, the day on which this Board is to moet, agreeably to its Resolution at its last sitting.

[A true Copy.] Extracted from the Minutes of the Board, 24th October, 1835.

J. CLARK,

Sec'y, W. C. Co.

To the Board of Directors of the Welland Canal Company, assembled at St. Catharines, on Wednesday the 6th of January, 1836.

GENTLEMEN.

I have received since your last meeting a certified copy of its proceedings, a letter requiring a copy of certain statements made to the Board at its extra meeting in October, and a notice of your intended session to be held on the 6th of this month at St. Catharines.

If the experience of the past had given reason for a well founded expectation that any argument I could use if I were present, would be more likely to influence your proceedings advantageously in the question of affording the most full information to the Legislature on those important matters connected with the Canal which I have brought before the country in a way the most likely to excitentention, I would have attended, at whatever inconvenience to myself or others here, for I had promised to be present at the Toronto township meeting on Monday next, and the Nowmarket general meeting on Wednesday next. But I am well aware that on that question what I have to urge, beyond what has been already said, will not be likely to avail, for I have not much that is new to offer.

As Dr. Duncombe's important mission has prevented him from attending your sittings, the daty of acting on behalf of the government, (which, representing the Province has a far greater interest in the canal, both direct and indirect, than the individual stockholders) devolves this year on Mr. Thornburn and myself. We have conjunctly and severally, done what we could to advance its interests, in connexion with those of the Province, and if the course which your late proceedings has compelled me to adopt be unpleasant to you or either of you, the blame be on him or them who shall in the end be found to have given the first offence.

My conduct has been that of a sincere friend to internal improvements, wisely planned and discreetly carried into execution. I was the early and steadfast friend of the Welland Canal, and when it stood most in want of support from abroad, my feeble voice was heard in its behalf, so much so that your president, Mr. Merritt, who had on the 11th of June, 1824, sent me back the first four numbers of the Advocate, with a very unfriendly mote, congratulated inc afterwards by letter, and admitted that I had proved myself well informed on the Canal question, and friendly to its interest. He says,

"New-York, 19th October, 1824.

"SIR:

"Since my arrival in this place, I have met with your "Treatise on the subject of Canals and the Welland in particular, which in the main gives a liberal and correct view of the subject. Much of my time and attention for some years past has been devoted to the real improvement of our Country, and altitude though there has been conflicting interests and much opposition, it gives me much satisfaction to find the public sentiment is uniting in the most feasible, and only plan, under present circumstances, of uniting those great waters."

Mr. Merritt concludes thus:

"I have requested the Editor of the Albion to send you a plan, "with remarks on the Canal, which I wish you to publish. In "the meantime you may state that I have succeeded in obtaining the amount of stock we require, \$50,000, in this city. It was "subscribed immediately. In haste (&c. &c. &c.)

WILLIAM HAMILTON MERRITT."

At that time I was an entire stranger to the directors, had no lands in the Ningara District, was connected with no local interest in it. I saw a grand project for the increase of the prosperity of the colony, and hesitated not to arge the Legislature to encourage it by a £25,000 grant. Capt. Gordon, Mr. Merritt's near relative and the early friend of the Canal, with others, showed me that I was wrong as to the men who had the management, I consulted with Mr. Dunn, then the President, published Capt.

Gordon's opinions, and ceased to support canal appropriations.— Disagreeing with Mr. Randall on the course to be pursued in 1830, I used no influence to bias his opinion against the management, but, as Secretary to the Commission, did what I could to give effect to his wishes, a fact well known to your president.

My duty to my constituents, added to their strict and pointed instructions, guided my conduct in the House of Assembly, and while I censured the management, I sought the fullest informa-

Often defeated on that object, and particularly so by the decisive vote of the House, on the 2d day of last session, I coased to press cuquiry, and it was through Mossrs. Thorburn, Perry, and McMicking, of the canal committee, that the proposition that I should investigate its affairs was first made to me by Mr. Thorburn a few days before the House broke up. I liked the motion much, and so I would a similar one next year to obtain insight into the doings of the Upper Canada Bank. These are the circumstances under which I became an occasional inhabitant of St. Catharines last summer. The more I enquired into the management, the worse I liked it. At length matters came to a crisis, ment, the worse I liked it. At length matters came to a crisis, and you recorded on your minutes that there were good and sufficient grounds for taking strong measures, and a very strong measure you took too, in withdrawing the contents of the canal office from the President's care, circumscribing his authority, and scaling up the brooks and papers, so that those accused of mal-practices should not have access to them; this was your unanimous decision after a tiresome examination and two days' What have been your subsequent proceedings?

- 1. You have (19th Nov'r) ordered contracts of magnitude to be entered into which you had no means to fulfil, although the experience of the past has proved the rainous consequences of such a course. No one can now take such contracts, and afterwards tell the Legislature they did so in the dark.
- 2. You have (20th Nov'r) authorised the issuing of \$25,000 of inland bills of exchange under seal, although you well knew that in the present state of your affairs, these bills would instantly depreciate in value, and afford the means of speculation to petty attornics and storekeepers at the cost of the working classes, whose interests you, who hold the rank of gentlemen and magis-trates, are especially bound in honor to protect under this consti-tution. If the people take such bills after my warning, they do so with their eyes open.
- 3. You have (20th Nov'r) paid over \$500 to Thomas Merritt, jun., notwithstanding the iniquitous condition of his Berm Bank contract, unfulfilled, and the suspicious state of his other accounts, in which new errors are being continually brought to light; and this while others more deserving remain unpaid.
- 4. You have (19th Nov'r) authorised your President to grant himself and yourselves leases of the most valuable mill-sites on the canal, under the extraordinary circumstances detailed in my second number, and without waiting for that legislative action on the important question of the Hydraulica which the committee of last assaion, of which three of you wore members, recommended and contemplated, and which was avowedly delayed owing to the puncity of that information by which the House of Assembly could be guided—this you did, in direct opposition to the Government Directors, although the indelicacy of the proceeding was explained to you, and the disposition of the Assembly to do what was right, fully admitted. Those connected with you or others in such lesses now know that the Government Directors were opposed to these proceedings.
- 5. After granting the Gravelly Bay town plot to one of your-selves, and referring further steps in the matter to the Govern-ment Directors, you have, without waiting for their report, deci-ded (19th Nov'r) to compensate Davidson for the loss of his property out of the Canal funds.
- 6. You have voted (19th Nov'r) approvingly of the conduct of your President in doing that which he admitted the stockholders wished him not to do—namely, to monopolize Mill-sites and lands on the Canal, while acting as its agent.
- You have (20th Nov'r) allowed a large sum of money to be paid to George Koefer, june., as Engineer, although the state of his estimates and other official papers, showed the exceeding incorrectness and carelessness of his proceedings and justified a further enquiry into his accounts. What the other \$2,800 are which you ordered to be paid, the minutes say not.
- 3. Although Mr. Clark, your Secretary, is deeply in arrears, and you had had no other opportunity of inspecting the books, than what was afforded on the days I last sat with you, you ordered (Nov'r 19) a private debt of Mr. Clark's to Mr. Taylor (the same who figures at the meeting at Dyer's) to the amount of £162 10s, and interest, to be paid out of the tolks, Mr. Merritt

- having been Mr. Clark's security for this debt, which, when horrowed, was not required by the Board for Canal purposes, and ought to have awaited the result of a Parliamentary investigation into Mr. Merritt, Mr. Beaton and Mr. Clark's manner of accounting and managing the Canal funds.
- Instead of ordering the Caroline steam-boat speculation money to be instantly refunded, you voted (19th Nov'r) that the Welland canal Company are shareholders in the steamer Caroline, and that they own five shares. This I steadily opposed.
- 10. After packing up your books and papers into trunks and packages, carting them at noon-day through St. Catharines to the rackages, carring them up package by package, so that the President, Secretary, and Mr. Beaton, their clerk, might not be able to lay hands on them, you restored them after a lapse of three weeks, to the custody of the persons who had been accused by your own vote without any previous proof obtained from them that they were innocent of the charges which had induced you to take the remarkable proceeding of ordering a virtual suspension of their functions and chief trusts until a full enquiry had been made by disinterested and competent persons.
- 11. Although the Hon. Mr. Dunn had offered by letter which 11. Attnough the rion, Mr. Dunn had othered by letter which I enclosed to one of you, to take charge of all your books and papers until a full and fair investigation could be obtained, you neglected his proposition, admitted Messrs. Beaton, Clark and Merritt, to write in and make entries on the books as if nothing had happened, and disregarding the warning given by those era-sures, false entries and omissions, the exhibition of some of which, had induced you to take a more manly and creditable course at-
- 12. We sat as a Board on the 23d and 24th of October-heard all that Mr. Black could offer in his defence—all that President Merritt could urge or explain away—all that Mr. Clark could Merritt could urge or explain away—all that Mr. Clark could offer in vindication or extenuation; and then, after this, next day, we scaled up the books and papers—after these persons had been severally heard at great length. You all well know Mr. Beaton, the confidential person employed by Mr. Merritt and Mr. Clark to put the books into the state they then were, was so much intoxicated then, and had been so for some time, what he was not in a state to be brought forward, although we were all ready to hear whatever he could have said; that Ms. were all ready to hear whatever he could have said; that Mr. Clark said he could not explain fully till Beaton was able to attend; and that it was on the solemn pledge of Mesers. Clark and Merritt that they would be answerable for his appearance, that, after Mr. Merritt had opened his (Beaton's) deak and exhibited its contents, as also the Secretary's box, I consented to delay an application to a magistrate. Account then to the public, for it remains with you to do so, why you have given access to the books and papers to men your resolutions and proceedings declared unworthy of trust until fully tried, and who had done nothing to disprove the charges made against them. to disprove the charges made against them-
- 13. And lastly. One of yourselves (Mr. Butler) a gentleman elected under Mr. Yates's proxies, seconded by Capt. Cruighton, another gentleman appointed under the same influence, and who was one of the officers of the Company, liable to be affected as a Director and as the Treasurer, by the result of a fair enquiry, moved, that J. T. Bowry should "examine and compare the said charges with said books." charges with said books.
- If, after the statements I made, you were still ignorant of the extent of the charges against the officers of the corporation, by what means has this Mr. Bowry been able to arrive at the conclusions contained in the resolutions adopted in Luther Dyer's customs contained in the resolutions adopted in Lutter Dyer's tavern, that these officers are all honorable men I and I a caluminator? Or, if you perfectly recollected the extent of the charges I made in October, why ask me, in November, for a copy to refresh your memories? Although I desired to return by the 19th of November, and Desirable mediant and the control of November and Desirable and the control of November and Desirable and the control of November and Desirable and the control of November and Desirable and the control of November and Desirable and the control of November and Desirable and the control of November and Desirable and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November and the control of November a of November, your President said he knew I could not do it.

of November, your Frestacht rank and Mr. St. Catharines; he is it seems chosen by Mr. Clark and Mr. Morritt, who must have gained his good graces by loaning him \$700 or \$800 of the Company's money, unknown to the Board, and then collecting the interest with Beaton's help, who, as I shewed you, in Clark's petty legal, p. 118,—the cash journal, pages 312 and 315,—the memorandum book, p. 30,—and Clark and Beaton's cash book, p. 42, received the interest, placed it in the petty books, through which the managers account with one another; and conveniently which the managers account with one another; and conveniently p. 42, received the interest, placed it in the petty books, through which the managers account with one another, and conveniently left it out in the cash journal, although in the leans to two of your selves, Mesers. Creighton and McDonell, (the particulars and correspondence relative to which, I shall try to find a place for in No. 4,) he curiously entered the interest in the cash journal the very last item before I left St. Catharines, when I had stated my intention to make a strict investigation. All these loans were illegal transactions, not having been recognised by the Board; is I shall take occasion to show.

This Mr. Burns is a person connected in a variety of ways with Mr. Merritt, Mr. Clark and Mr. McDonell, and the very antipodes of an independent examiner. Is he not also a Director of the Grand River Company, with Mr. Merritt?—Had he not a share of the \$10,000 of the Yates Loan, in some shape or other? Who ever heard before that when a merchant found that his books had been unfaithfully kept, he employed the professional nominee of his clerks whose improprieties and carelessness contributed to the confusion, to examine and report whether there were frauds and embezzlements?—It is indeed a new thing.

Then as to Mr. Bowry—he is, if I remember him, a partner in trade or the late partner of Mr. Butler, who named him; now or late the lessee under the Company of Bowry & Butler's Mills; and a former employer of Beaton whose style of bookkeeping was so very convenient and suitable to the parties concerned in these transactions.

Whether the public will be of opinion that, in restoring the books to Messes. Clark and Beaton, and in employing so very disinterested auditors as Messes. Burns and Bowry, you have shown a reasonable auxiety to discover error, rather than to give apportunities to cloak knavery, we will be better enabled to judge next month on the assembling of the Legislature.

As to the course I have taken, I warned you that I would do so if ye persisted. If we are to be inundated with a fraudulent circulation and depreciated paper in Upper Canada, as a remedy for wretchedness and ruin brought on by the misconduct of a few individuals, I shall not be a party to the heax. If the Canal is to be a Bank, let us have paper that would be redeemable at its counter. I had no time to wait for Governor Colborne's movements. Your course required a speedy warning to the public.—
If I saw this city about to be set on fire by the torch of the incendiary, it is not very probable that I should delay informing the inhabitants of their danger, until an opportunity were afforded me to report officially to the Mayor and Corporation on the extent of an injury I might have prevented by crying "Fire!"

I would send you over a formidable list of notes with regard to your books of account, but really when I consider the position in which the parties implicated have been placed by your means, my impression is that I would be helping them to a loop-hole, by which to creep out of some of those profitable creors they may have forgotten in the midstof the multitude I met with. Had the canal papers been in less suspicious custody, I would have willingly given you either copy or originals of all the facts I possess, cheerfully, and without a moment's hesitation. But if you compare your Minutes with the Journal, and both with the Ledger and Receipts, I think you will see enough to disgust any man who has a claim to character. On the ill doer be the blame.

As one who has no personal interest in the Welland Canal except in common with all others of the King's subjects; as one who was and now is anxious that it should be honerably completed; as one who defended its management as long as he conscientiously could; and had no motive save an anxious wish to discover and state the truth in his late enquiries, the writer of this letter again calls upon the Board to take the only safe course that remains to its members, by instantly removing the office and all the papers to Toronto, here to remain during the winter. Here the investigation will take place; here the papers and the books, and the memoranda will be wanted; here the majority of the members of the Board will be resident; here it will be determined what is to be done with the canal. Any attempt to bring over this paper and withhold that, to have the great Ledger at Toronto and the petty Ledger at St. Catharines, will only be a continuation of the deception practised on the Committee and the House in 1830, when just as many papers were produced as suited the Agent, while the rest were—at St. Catharines.

Mr. Butler spoke with great good sense on this subject on the morning of the day when the books were scaled up; and it is very evident that either this course will have to be pursued, or the Board will be considered as shrinking from the investigation. Speeches will not do—we want the facts; and as Mr. Darling said, disprove the charges if you can, or allow the guilty to be punished. Houcesty is fearless.

Another reason for this step is, that we may expect that the Lower Canada Stockholders will send up one of their best business men, to inspect the documents and books referred to in my numbers, and consult the Legislature for their interest. I have suggested this course to some of them and it were to be desired that the New Yorkers would do so likewise.

Twenty eight to thirty quires have been printed and circulated weekly at my cost—to every stockeolder of "the canal," to newspapers and banks and post offices and merchants, to M. P. P's. and Legislative Councillors—in short, to those classes of persons most likely to be affected or interested by the details. If you

prove me wrong, you shall have the use of my direction book, so that the bune may be followed by the antidote.

In the "Welland Canal" of Wednesday, the greater part of my report on Mr. Robinson's transactions is correctly published. He was not entitled to the courtesy he met with at my hand, after withholding the accounts for years, and then sending over a schedule he could not well understand himself.

I intend to continue the "canal" weekly; the next number will issue on the 13th instant. The public attention is already directed very effectually to your proceedings, and the result cannot fail to be beneficial. Your Dyer meeting and resolves will give a whet public curiosity, and in the end promote the object of the periodical, which is the diffusion of useful truths.

I am desirous to direct your attention to an abusive letter by your President, published in *The Patriat*, which we subscribe to as a Company. The Canal Office was certainly no place for depositing secret correspondence, nor did I meet with any in it.— Mr. Merritt cannot have forgotten that I insisted that the only desk in the office which was locked should be instantly opened, as a condition of my delaying my proceedings against Beaton till the Board met—that he consented—that it was opened, and also the Secretary's box—and that all such papers as Mr. Merritt chose to call private I declined to examine, while the rest were looked into and some notes taken of their contents. I think Mr. Hall was present. What is a private letter? I give you an extract from one of the numerous official documents in your counting house, which I caused the clerks to copy. Is that a private letter? It is signed by Mr. Robinson, one of the Commissioners.

"Mr. Fitzhugh writes me that he hears Bidwell, 'the King of "the Radicals' is already boasting that the Welland Canal and "St. Lawrence shall receive no further aid. I think nothing will "put down that party but their unvaried opposition to all public "improvements—this, if the people will permit any thing to unglue their eyes, should be sufficient to convince them of their total disregard of the best interests of the country while under "the present Government. We shall have a stormy, useless "Session, I fear, but must do our best to get the necessary public business attended to. What is your opinion as to the Speakership? I hope we can get McLean again or Morris, but fear "that Bidwell will be the man after all."

The above is addressed to Mr. President Merritt, dated Newmarket, the 2nd December, 1834, and with the others, proves to my satisfaction that politics are mixed up with the affairs of the Corporation, and thepublic property made subvervient to designs on the constitutional rights of the community. How far my report to the country will be likely to interfere with the worthy Commissioner's purpose of getting "any good thing" this year, under the "improvement" system I am not prepared to express an opinion. As to Mr. Dalton's letter, it speaks for itself, but if any thing had been wanting to explain its meaning, the author's journal would have afforded it. I think you will find that the Yates \$10,000 loan fund, out of which Mr. Vice President McDonell's necessities were so bountifully relieved, was drawn on to help Mr. Dalton. There are many more evidences of your political proceedings; all of them from the canal office. Mr. Merritt's assertion that Mr. Dalton's letter was locked up in some secret place is utterly void of truth—it lay on the top of the desk where I had other papers arranged and under examination. It is a pity that Messra. Dalton and Merritt, in their remarks, could not restrain themselves within the bounds of decent language.

Commissioned by you to Lower-Canada to support your petition by telling the whole truth to your brother shareholders there, it would have been perfectly correct for me to have allowed all the evidences of your proceedings to appear on the journals of the sister Province, nor would the select committee have desired to suppress any thing. There is no court of chancery here to enforce equitable proceedings for the shareholders—the Assembly is delayed to suit our rulers—and let us suppose a person to come over next winter to complain to the Legislature that being in ignorance of the state of your affairs, he and his neighbours had given good value for many thousands of dellars of your copper plate "promises to pay." which, like Hovey's judgment, were worth nothing after he got them—what excuse could be made by those who had winked at and even approved of your proceed ings without warning that community of which they had been elected sentinels?

The sensible remarks and manly determination of Mr. Allan, one of your former vice presidents, on a similar occasion, when your circumstances were far less desperate, might now be referred to with advantages.

Is it not a very indelicate proceeding on your part to allow the individuals you yourselves have accused, to remain a single hour in possession of those archives of the Corporation you wrested

from their grasp? A proper respect for their own characters, if they felt themselves innocent, would surely have induced them to decline this very equivocal trust until after a disinterested tribunal had pronounced upon the important matters embraced in your October resolution, and the facts laid before you on which it was predicated—instead of which, I find that Messrs. Bowry and Burns are using Mr. Thorburn's name at their tavern night meetings, and declaring that he decided in my absence respecting the books, and was satisfied that I had been onistaken. I felt assured this was untrue, even before I had Mr. Thurburn's letter of the 29th ult. distinctly denying it.

I do not remember that it has happened to me to differ in opinion from Mr. Thorburn on any one question since we sat at the Board, except in the trivial matter of the remuneration of a balance of loss on a packet-boat speculation.

Consider this letter, and my numbers one, two and three, of "the Welland Canal," an answer in part to your request in the resolve conveyed to me by your Sceretary. Mr. Burns, the Attorney has certified copies of the printed papers, and there is an erratum, "second" should have had the place of "last" in the foot-line of page one, column one, number 3, first edition.

No part of these remarks are addressed to Mr. Thorburnnoither he nor I can possibly influence your decision one way or the other—witness our ineffectual disposition to your scheme for disposing of the canal to the States, capitalists, and your hydraulic leases. But it is our duty to expostulate, nevertheless, just as Mr. McGillivray, who foresaw this day, ineffectually expostulated many years ago.

There is by far too much mystery in the proceedings of our corporate bodies. We have pretended balance sheets—secret proceedings—most romantic reports—directors with characters like the driven snow—stockholders like (Mr. Gordon) kept in the dark—and officers and their favorites highly respected and very respectable, who have made or mended their fortunes out of the management of bankrupt companies during a long career of meritorious aprightness—while to she stockholders is awarded a continual dividend of delusion. Thus matters continue until the thin veil of folly is penetrated by the uninitiated, when the unfortunate partners whom some wily Buchanan had decoyed into the snare, learn the unpleasant reality from the perusal of 1, 2, 3, "Welland Camil" newspaper, charitably distributed to them, gratis.

I remain, Sirs, Your obedient servant, W. L. MACKENZIE.

Toronto, 1st January, 1836.

Extract from the minutes of the Welland Canal Company of the 6th January, 1836.

PRESENT.

Messieurs Merritt, Prsident, Thorburn, and Bulter.

Whereas, in consequence of the charges made by Mr. Mackenzie, the following resolution was passed the 19th November, 1835.

"It was proposed by Thomas Butler, Esq., and seconded by Ogden Creighton, Esq., Resolved, That J. T. Bowery, Esq., be authorised to examine and compare the said charges with said books on behalf of this company, together with all receipts and expenditures of all monies which have come into the possession of this corporation from time to time up to the 31st October inclusive, and that the Secretary, Mr. Clark, be requested to appoint another person to act in conjunction with Mr. Bowery, and that those two gentlemen do report the result of their examination to this Board, and that they shall have full power to examine all persons, books and papers in any way connected with the affairs of this corporation, which was accordingly ordered."

In compliance with which resolution the gentlemen named proceeded to examine the books and accounts, and have presented a report. It is therefore ordered that this Board having read the said report, do acquit and discharge the officers of this company from the accusations set forth in Mr. M'Kenzie's letter addressed to the President of this Board, and that this Board can see no reason for withholding the confidence heretofore placed in those officers, and that all transactions relating to those charges be expunged from the minutes of this Board.

The annual report for the present year was submitted, amended, and approved of.

Ordered, That the following protest from Mr. Thorburn be entered on the minutes:—

I dissent from passing the resolution now offered to the Board by Captain Creighton, and passed. Likewise, from such parts of the annual report for the public as may have similar references, because there may be by the Legislature a further examination, and while there is such a probability it would be premature on this Board to pass such a resolution, and as Mr. Mackenzie making the accusations hath not been heard in defence of his views, it would therefore be in my opinion unjust till he is heard, and opportunity ought therefore to be given by furnishing him with a copy of the Report of Messrs. Bowery and Burns.

(Signed,) DAVID THORBURN.

Done at the Board, this 7th January, 1836.

Mr. Thorburn moves that a copy of the Report of Messrs. Bowery and Burns, on the examination of the books and documents of this corporation, be sent to each member of the Board.

The following estimates and accounts were submitted and approved:—

323. What have you to state in relation to charge No. 24?—I will now shew that Mr. Yates virtually elects the Directors and Officers of the Canal, this I will do by reference to the election lists.

For instance—

At what is termed "a general meeting of the Stockholders" to elect directors, held on the 6th of April, 1829, at St. Catharines, it appears that three persons assembled themselves together, who were Mr. Keefer, the ex-president, Mr. Merritt, the agent, and Mr. J. B. Yates. These three possessed 8 votes in their own right, and Mr. Yates had other 96 proxy votes. The voting went on thus: Messrs. Receiver General Dunn, President; W. Allan, Chief Justice Robinson, Chief Justice Boulton, and G. Keefer were elected, by Yates's 96 proxy votes, his own three, and the five from Messrs. Merritt and Keefer. the latter voting for himself.

Again, last June, the election of Directors was thus conducted:

Seven voters were present; and of these J. B. Yates gave 61 votes, Ogden Creighton 17. W. H. Merritt 2, Thomas Butler 2, and Alex. Yates Mac-

Donell 2. Total 84. Mr. Yates selected a majority of the Board, as usual at his discretion; although he and his constituents in New York do not own a 10th of the value expended on the canal. Messieurs Geo. Davies and Geo. Keefer did not votc.

Mr. Dunn, the Receiver General, became the nominal President of the Company in 1825. I say nominal, for his duties as the Treasurer of Upper Canada and Legislative Councillor must have made it impossible for him to attend to the really important trust he had accepted on the canal. It appears to have been the policy of Mr. Yates or Mr. Merritt, or both, to connect the officers of the government with the canal by placing them in the nominal direction. And they chose those of them whose official duties left but little spare time on their hands. On the 23d of Sept. 1830, Mr. President Dunn thus addressed Mr. Merritt, the Agent, by a letter in which he evidently desires that economy should be strictly practised:—

"Is the Canal full? The Governor frequently "asks me the question. A vessel has arrived in "York from Buffalo, and (the master) gives a most "deplorable account of the Canal, says he was 17 "days getting through. Is this possible!! Pray "let me have a line from you, and afford some information on the subject of the Canal. I certainly have reason to complain that I am never made acquainted, from the time we meet at St. Catharines, "till we assemble there again, of what may be going on, &c. As to Mr. Black, his situation must be a perfect sinecure. I am resolved to urge the Board to curtail without delay all expenses which are not "absolutely indispensible."

The details of one or two elections were reported to the House by the Directors, on the part of the Province sometime since.

# THE FIRST ELECTION OF DIRECTORS.

The first election under the Welland Canal Act was held in Niagara, May 15, 1834. A very few persons were present, not one of whom had a direct interest in the result, by a payment, and some of whom have never since paid a farthing towards the They elected Messrs. Hamilton Merritt, Dunn, Samuel Clowes, Keefer and Decow; and at the next meeting of the directors, they resolved to send Mr. Merritt to York to solicit Mr. Dunn to become their President, and to assure him "that it "would not be necessary for him to attend to the "concerns of the Company-only to sanction their "plan of operations from time to time." Mr. Dunn having declined to come into this arrangement, Mr. Geo. Keefer was named their President, and Messrs. Chauncey Beedle and Thomas Butler were named Directors in Messrs. Dunn and Clowes's place, the latter having declined to act. Next day Mr. Hamilton Merritt was appointed their "Agent and Managing Director;" and instead of the 10 per cent. required by the act to be paid as a first instalment on each share, they called in 21 per cent per share from other people, but paid nothing themselves.

In my examination of the Company's Books, I sought to ascertain what interest the first Board had

in the prosperity of the canal, in consequence of stock subscriptions paid in by them.

The monied subscription clause to qualify the first Board of Directors was, in its practical operation, a farce, and proved that when a nominal cash qualification for managers is inserted in any act incorporating a joint stock company, unaccompanied by a provision for the immediate payment of the whole capital, it affords no safeguard to the public against speculators. The charter provided that ten shares qualified a candidate for the direction (since increased to twenty shares) and required ten per cent to be paid in; this, as I have already stated, the Board reduced to 25 per cent, and the 1st instalment was called in on the 9th of June, 1824. None of the Directors, however, paid any money in until the 22d of November, when Mr President Keefer paid \$25 in part of his \$1000 subscribed; Mr. Merritt paid other \$25; Mr. Butler paid \$12½, Mr. Decow \$12½, and Mr. Chauncey Beedle or Beetle nothing at all.—So that up to the 26th of March, 1825, the whole of the pecuniary interest held by the Canal Board in the Canal was £18 15s.; but on that day they paid other £31 5s. in the whole, as their 2d instalment, previous to which the New York Stockholders had been called on and had paid in their 1st, 2d, 3d and 4th instalments, of about \$12,000. Then, but not till then, the wary Directors vested their additional £31 5s. in the work!

Mordaunt Chrysler.	_

At a meeting held at Niagara, the 15th May, at the house of Mrs. Rogers, pursuant to notice, the undermentioned persons were duly elected Directors of the Welland Canal Company—viz:

The Hon. J. H. Dunn, William H. Merritt, Esq., Geo. Keefer, Esq., Mr. John Decow, Mr. Samuel Clowes.

GEORGE KEEFER, Chairman.

At the same meeting, on the same day, Hon. J. H. Dunn was unanimously appointed President of said Company.

GEORGE KEEFER, Chairman.

#### CANAL MANAGEMENT.

In the early stages of the work, the Directors, who were chiefly officers of state, would go over to St. Catharines or Niagara for two or three hours, or a day, in the course of the year; sometimes they had the canal office at York, -sometimes at St. Catharines -sometimes they met at the Deep Cut, or in the Legislative Council Chamber, or at Mr. Keefers, or at the Falls of Niagara, or in the Bank of Upper Canada, &c. To their servants and agents the most important duties were evidently chiefly left to be performed, and as to the contractors they appear to have done as they pleased in not a few cases. Great irregularity prevailed in recording proceedings, and as to a check or false entries there was no efficient one; the minutes of May 26. 1827, are signed by no body, certified by nobody; for 8 or 10 months after the Board had sat, they were omitted to be copied into the regular Books, and at length were inserted between the minutes of February and April, of the year following.

The Directors shewed in other respects a great disregard for the law under which they acted. In their Journal, p. 55, (11th April, 1827,) all the Board being present, "on the motion of Colonel Wells, "seconded by Mr. D'Arcy Boulton, the Hon. John "H. Dunn was unanimously elected President, and "Henry J. Boulton, Esq., Vice-President." The Statute declares on the most explicit terms that these officers shall be elected by ballot, and to that law they had to come back at the election held in June last.

# Mr. Leys again called in and further examined. [By Mr. Mackenzie.]

324. Was you residing for sometime at Dunnville in the spring or summer of 1834?—I was, in the spring of 1835.

(Mr. Nortm's evidence of yesterday was read to witness.)

325. Mr. Norton thinks you were present at some of the conversations held at Mrs. M'Keever's in Dunnville, with Rose and others, contractors on the Welland Canal, relative to their management of contracts on that work, and heuce refers to you in case you recollect the particulars of any of these conversations. State what you know of the subject ?-I was hoarding in the same house with Messrs. Norton and Rose; there were other people occasionally boarded in the House also. With respect to this Berm Bank, Rose stated that they were not particular, meaning the contractors, or the workmen doing the work, about putting in logs and stumps—then he said he did not think it made much differencestated if he got his job done that seasen, he would have done very well by his contract—also stated that Mr. Thomas Merritt was in partnership with him in that contract, and that he did not think Mr. Merritt would be there much to assist him in the work, he would rather have him than be without him although he did not come at all. I have heard the same reason assigned in Dunnville, that Mr. Norton gave in his evidence why he should wish to be in partnership with Thomas Merritt, but I am not sure whether I heard it from Mr. Rose or not-viz: that he would get better measurement, and get easier through the contract.

326. Have you seen logs put into the Berm Embankment taken by Rose and Merritt?—I have not seen them put in, but I have seen them in log piles where this embankment was making. I was twice up and down between this place and Dunnville that Spring. The logs were rolled into the embankments, where the mud was put over them.

#### [By Mr. MERRITT.]

327. From whom did you hear that report at Dunnville—can you name any person?—I cannot name any one, it was in a boarding house where I heard it.

328. You are asked if you know anything about the conversation which took place between Mr. Norton and Rose; do you know that Mr. Thomas Merritt was a partner with Rose at that time, or did Rose say he was at the time Mr. Norton referred to 1— I think Mr. Rose said that Mr. Merritt was in partnership with him at that time.

329. Mr. Norton refers distinctly to the summer and fall of 1834, is that the time to which you allude?—I think Mr. Norton is mistaken as to my being with him at the time he alludes. It was Mr. Dew that was with him in 1834. I went up with him in the spring of 1835.

330. Have you seen the work to whichhe alludes? I cannot say anything about the work done in 1834.

331. Where did you see the logs and stumps to which you allude as in the embankment?—Betwixt Marshville and Dunnville

332. Was it at the time you went up in the boat, or at different times?—I am confident I saw loss at different times.

[Witness withdrew.]

THURSDAY, 10th March, 1836.

Committee met,

PRESENT.

JAMES E. SMALL, Esq., Chairmrn. Messieurs Chisholm, Gibson, McDonell, Parke, Roblin, Shaver, and Thorburn.—8.

Mr. Mackenzie again called and further examined.

[Br Committee.]

334. Your first, third, fourth, fifth and sixth charges against the managers of the Welland Canal Company's concerns are to the effect that the books of account are improperly kept, and with a view to defraud; that they contain many false and erroneous entries; that false accounts have been sworn to and presented to the House of Assembly; that important monied transactions of large amount have been withheld for years from the books of the Corporation; and that there is a great defalcation on the part of the officers in charge of the Company's funds. These five charges have relation to the financial management, and The Committee are desirous to admit of one unswer. learn the particular facts on which you ground these charges of mismanagement ?- The question of the intention of the officers or managers in charge of the affairs of the Welland Canal Company is to be judged and determined by a careful investigation of their acts, and it is probable the Committee will hold me justified in the opinion I have expressed if they find the several allegations contained in this answer fully proved. As to false entries I do not think it would be difficult to prove that a majority of all the entries on the books of the Company are of this description. It does not appear that the Company have kept a regular cash book or cash account, shewing the whole of the receipts from time to time, and the payments as they were made to each person. The absence of this indispensable requisite to a regular system of accounts has been seriously felt throughout this investigation. As to the Italian method of book keeping, so admirable in its results, it has not been followed so as to enable any accountant to balance the books. The estimates of work done, materials furnished, and labor performed, have been entered on the leger by a single entry direct from an estimate, the copy of an estimate, or an estimate book, and not by a double entry of debtor and creditor made on the journal from the original transaction. Day Book there is none, and as to concentrating the accounts in the leger under general heads of receipt and expenditure, it has not been adherred to. A casual inspection of the petty books will shew that they differed materially in their results from the regular books of account. The vouchers are so often missing, or of a doubtful character, that it is of little service to have reference to them.

## THE GRAND RIVER DEFALCATION OF £579 12s. 3d.

About 10,000 acres of the lands of the Indians and others on the Grand River were overflowed by the dam raised across it to feed the Canal; the people

who had thus lost their farms or other improvements, complained to the Parliament and to the Canal Company; and in 1831 Mr. Receiver General Dunn effected a loan from the Bank of Upper Canada of £1000 to £1500 for the express purpose of compensating these sufferers. In the hand-writing of Mr. Black, the Secretary, I found, on the Journal of 1831. December 18th, a payment of £572 10s. made to George Keefer the Engineer, from this fund, to enable him to make compensation in part.

It appears that of the loan, £1370 2s. 3d. were actually borrowed, the last draft on the bank being dated on the 9th of June, 1832, for the sum of £347 12s. 3d., "on account of claims," &c.- t is made payable to George Keefer or bearer, and sign. ed by the Vice President and Mr. Black. days after dated I found the following entry on the Cash Journal, in Mr. Black's hand-writing:

" June 11, 1832.

" George Keefer, Junr. Dr. to Bank of Upper Canada.

" persons on account of claims for damages, &c. viz: £347 12s. 3d. " For the undermentioned payments made to the respective

"Shotwell, - - - £ 1 5 0 "Philip Carls - - 5 0 0 "Robt. Brown paid G. Keefer for 1 15 "do paid Sheriff, - - 44 12 "Joseph Burges in full of £286 "11 3 and interest thereon on tradicial 200 bas been paid 45 00 to the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the " which 200 has been paid 45 0 "A Marr on account of his farm

"Cash Book 11th June 1332 and Journal " entry folio 200

"Error -0 0 "£579 12 3"

Finding Mr. Keefer credited in leger for £579 12s. 3d., and no other person or account charged, I examined the references, and immediately discovered:

1st. That the entry on the Journal of the 11th of June, 1832, by Black, was false; and that of course the return to the House of Assembly, Journals 1832-3, appendix folio 49, of the expenditure in payment of Grand River Claims was equally unworthy of credit, It is "Folio 336, George Keefer, G. R. C. £1370 2s. 3d.," and sworn to by John Clark, Esquire, the Secretary, before Chief Justice Robinson. His oath was, that "the accounts were just and true," which they were not.

2nd. That George Keefer never received £1370 2s. 3d. He got only £783 5s. 4d., and of that sum nearly the whole is said to have been paid to the claimants. The balance of the loan was entered to his debit with a view to conceal the defalcation.

3d. The £250 to Alem Marr was never paid—the entry of the £347 12s. 3d. is a delusion.

4th. Black's entry of the 18th December, 1831, is fulse—he says he then paid Keefer £572 10s.—it is afterwards admitted in the Journal that he only paid him £340 10s. 5d.

5th. It is asserted in the entry of June 17th, 1833, that Black paid two items of Bank interest with the £231 19s. 7d. he had retained; this also is a false statement, for he elsewhere admits that he received the money to pay these items of interest from the United States Bank Loan, and so has he entered it. On a reference to Black's private or petty cash book, I find an entry admitting that the above entries by him on the Journal and leger are untrue.

Messrs. Clark and Black were perfectly cognizant of the defalcation, yet when I asked Mr. Clark to explain he could not do it. An express was sent explain he could not do it. to Mr. Black, who came from Port Colborne, where he now acts as principal collector of tolls, and Canal superintendent. He attended the extraordinary meeting of the directors held last October at St. Catharines, and when examined, he admitted that the entries on the Books were not genuine, but gave in an account which it appears he had handed to Mr. Clark when he (Black) left the Secretary ship in 1832, this he did in explanation. The account contained several items of monies which he had paid various persons, and other items of money still duebut it made matters worse, and led the way to the discovery of other improper practices. One of his items was £18 2s. 9d, to John Boyle. It turned out that Black had got the cash from the Bank to pay this sum to Boyle in September 1831—had kept it—and that in 1834, Boyle was paid out of the Canal funds with interest, while Black was allowed by his successors to retain the like amount.

[See also the title, of "John Davidson."]

I ought to state here, that in the paper Mr. Black left at the Canal office with Mr. Clark as his (Mr. Black's) explanation of his cash entries, copy of which I hereto append he states that of the money in default he had, besides the £121 12s. 8d. to Mr. Secretary Merritt, paid £55 11s. 3d. & other sums to Mr. Secretary Clark, & £74 2s. 6d. to Mr. M'Donell, one of the Directors; but in that paper he shews that he was Dr. to many other sums besides the Indian money. Allthis, however the Secretary swore to as having been expended on the Grand River Claims previous to December 1832, through Keefer, viz. £1370 2s. 3d.

The Act authorising the loan to the Welland Canal Company passed in March 1831 provides that a full, true, and particular account in detail shall be given to the Legislature, of the expenditure, and verified on oath before a Judge of the King's Bench Court. An account was so given and sworn to—but it was neither just nor true, and many of the particulars were such, as no man who had investigated what was attested could have safely vouched for on oath or otherwise. The Act requires that the President and Secretary shall swear that the said account is a just and true account of the expenditures of the said

money; but although the then President, Mr. Dunn, assisted in framing the law, he never took an oath that the above £1370 were expended by George Keefer in 1831 and 1832 in payment of Grand River claims.

(OFFICE COPY.)

York, 13th December, 1831.

SIR:

The Directors of the Welland Canal Company have requested me to apply to the Bank of Upper Canada for a loan of about £1000 to £1500 for the space of about twelve months for the purpose of enabling the Company to make averagements in settling damages done to various individuals on the Grand River. The claims made before the arbitrators appointed by the Legislature amount to a considerable sum, on which the arbitrators have not as yet made any decision. In the mean time the Directors have appointed an agent to make a compromise with as many of the claimants as are willing to accept of certain terms in consequence of which, cirims to the amount of £1500 have been agreed upon for about £300, under the promise that the money shall be paid forthwith. The Welland Canal hold a very considerable sum granted by the Legislature at its last Session. The Directors feel unwilling to appropriate any part of this to the purpose above mentioned.

The Directors will feel obliged by granting them this request, which will enable them to effect so desirable an object.

> I have the honor to be, Sir, Your most obedient servant,

> > JOHN H. DUNN, President W. C. Co.

The Hon. WM. ALLAN.

President Bank of U. C.

(OFFICE COPY.)

Indian Office.

York, 5th December, 1832.

STD .

With reference to several petitions from the Indians of the Six Nations respecting the destruction of their property on the Grand River; in consequence of the construction of a Dam by the Welland Canal Company, I am directed by His Excellency the Lieutenant Governor to ascertain from you whether any arrangement has been made for indemnifying the Cayugas and other tribes who may have lost their crops, and have been driven from their pasture land by the overflowing of the Grand River, and if those claims are to be settled, at what period they may expect to receive the amount due to them.

I have the honor to be,

Sir.

Your most ob't. humble serv't,

J. GIVINS, Chief Superintendant Lidian Affaire.

To the President of the Directors of the Welland Canal. Port Colborne, Thursday Noon.

W. L. MACKENZIE, Esq.

My Dear Sir:

I beg to acknowledge your favor of the 21st inst. just received—at the same time I received one from Mr. Clark requiring me to attend the Board at St. Carharines at 12 to-morrow.

The roads are very bad—but by going part way to-day. I will endeavor to be with you at the time appointed.

I am,

Sir,

Your most obed't,

JAS. BLACK.

True copy of a paper left in the Canal Office by Mr. Black, 23rd October, 1835.

J. CLARK.

W. H. MERRITT,

President W. C. C.

October 22nd, 1835.

Mr. W. H. MERRITT'S ACCOUNTS.

Of the Grand River and other moneys which are improperly charged as having been paid to George Keefer junior and others, it appears that Mr. Merritt had £121 12s. 8d. 1-2 in 1832, he being them, or soon after, the Secretary of the Company. On this the following order was given:—

Extract from the Minutes of the Board of Directors of the 2nd August, 1832.

Resolved, That Mr. Clark be authorized to appropriate the following sums out of the tolls collected this year, viz:—

"Ordered, That the advance made by the late Secretary to Mr. Merritt, of £121 12s. 8d. 1-2, and this sum £2s, "being £149 12s. 8d. 1-2, be debited Mr. Merritt on account "of his salary."

But it was not so debited to Mr. Merritt, nor is it debited to him up to this day. He had the money but was never charged with it

Nor did the officers enter on the regular books of the Company until last December the toll accounts out of which this £149 12s. 3d. 1-2 was paid Mr. Merritt in 1832!

Again:

On comparing Mr. Merritt's credits for salary on the great leger under the head "salaries," I find that the sums of \$150—£40 11s. 6d.—and £11 5s. 7d.—in all £89 7s. 1d., are entered on the books as paid him for salary over and above any claim he had, and after the full amount of his salary had been paid or credited to him, from the year 1825 and upwards. Credit is taken by the officers for those payments as having been made out of the Company's funds. Although then Mr. Merritt was paid £238 19s. 9d. 1.2 in 1832, for which he has given no value, and for which he is a defaulter, he charges interest in 1333 on arrears of the salary he had already been paid, and has been allowed it.

On consulting the minutes after Mr. Dunn ceased to be President, I find that the officers have violated the law with regard to salaries and paid themselves what they thought fit under that head, until a late Board: Mr. Merritt had £400 as agent until the beginning of June 1833, when he was named the President and his salary ceased. The affairs of the Canal were that year in the hands of Messrs. Robinson, Macaulay, and Shade, for when the former was the agent at \$35 per week, with superintendents under himmt \$21 per week, and as the Company were laid on the shelf there was no other agent. Mr. Merritt was not to be appointed the agent again, but at a meeting of the Board held on the 5th of February 1234 at Toronto, an offer was made of the vacant office, at £400 per annum to Mr. Robinson, which he declined. After which Mr. Merritt, the President, was appointed agent also at £400. They forgot it seems to enter their appointment on the minutes, but rectified the omission in June 1834, Mr. Merritt was at Toronto during that winter, officiating as a legislator to prevent the County of York from having a voice in the bill granting himself & brother Directors an other £50,000 of the public money, and although the order for his appointment and salary was only given in February 1834, the officers have entered on the books 36 days from the 1st of January up to the time when Mr. Robinson was offered the vacant office on the 5th of February, which is an overchange \$157—and never came before any Beard, nor could it have been sanctioned by the Board.

The following are the entries in the minutes:-

#### MINUTES 5TH JUNE 1834.

14.—" It appears that the minutes of a meeting held at Toronto stating that W. B. Robinson Esq. declined acting as agent for the Company, and granting the President £400 per annum was not regularly entered at the time.

"Ordered, That a record of the transaction be now made-

15.—Ordered, That the salary of the late agent be continued from the 6th June to the 13th July of the past year, his time being occupied in settling claims, attending arbitration, and the affairs of the Company generally for a much longer period."

There is also an entry of \$30 as paid to Mr. Clark for salary, which is a part of the defalentions. It is entered November 1832, page 206 cash Journal. He is allowed his full salary from November 1831 when he entered the service as "book keeper" (although he never kept the book) until the present day. In 1833 he had \$100 out of the Canal funds for keeping Mr. Robinson's accounts, over and above his regular salary for all that year. He was the agent, proteem when Mr. Merritt was in England, and was allowed nine hundred dollars for the months in which Mr. Merritt was absent besides Mr. Merritt being allowed at the rate of \$1600 for the same year, and other £600 to £700 for the trip.

#### ANOTHER £75 TO THOMAS MERRITT, JUNIOR.

When I was in St. Catharines towards the latter end of October last, I insisted with Mr. Clark who had just returned from Quebec or Montreal, that all the money paid to Thomas Merritt junior, on his pier contract as it is called. in 1832, out of the tolls, had not been charged to him, even if they were to charge the £50 of the crasure, and I asked Mr. Clark (before the Board) to give in a statement which he would be ready to stand to as correct of the payments he had made from that year's tolls, but he said he could not without the aid of Mr. Beaton, who was not to be obtained at that time. Beaton had previously given me the copy of a paper containing the particulars, and I annex it. I showed it to Mr. Clark, but he would not say whether it was right or wrong, and the Company's books were silent. After I returned from Quebec I searched among Mr. Randal's receipts and papers, which are with me as his executor, and found the annexed order of Mr. W. H. Morritto Mr. Randal to pay \$300 to Thomas Merritt junior, and, also the copy of Mr. Randal's order. It was so paid, but never charged to Thomas Merrit junior—Last December only did they charge it to him on the Company's books, and he had been allowed interest on the presended balance of his account for 1832—3 as a debt, until it was paid in 1834. This adds another \$300 to the \$200 and the \$900, which would have been godsends to Thomas Merritt junior but for this searching enquiry. It may be said that the officers would have had to make up those accounts, but such is not the case, for they never kept their books by deable entry—never balanced them except as a deception—and even now, after all the exposures of the press, they withhold a large amount of the transactions of the Company from the regular books; as the report of the accountants will hereafter shew.

York, 27th Dec. 1832.

(My Dear Sir)

I will thank you to give Thomas Merritt an order for \$300 on your clerk on account of tolls—in payment of work on the harbor.

Truly yours.

WM. HAMILTON MERRITT.

York, 27th Dec. 1832.

COPY.

YORK, Dec. 27th 1832.

DEAR THADDEUS.

The agent of the Welland Canal Company has drawn on me in favor of Mr. Thomas Merritt for the sum of three hundred dollars,—if you have as much after deducting your own pay please pay Mr. Thomas Merritt the sum of three hundred dollars, and charge the same to my account—you will please to take Mr. Thomas Merritt's receipt for what you pay to him.

And oblige,

Dear Thaddeus, Yours,

ROBERT RANDAL.

Mr. THADDEUS SMITH,
Deputy Collector,
Welland Canal,

Chippawa Village.

#### THE TOLLS.

I have elsewhere stated that although the Board of Directors pretended to exibit to the public the actual balances between their receipts and expenditures from yearto year, these balances were in a great degree fictitious, because they exhibited no real re-turn of what had been received and laid out, but only such and so many items actual or imaginary as was suitable for the purpose of the parties making the exibition. It appears from investigation that the Directors never audited the toll accounts at allnever required a faithful account of the disposal of them, and of the cash received for forwarding goods' in 1830 and 1831 to appear on the Company's books—but permitted Messrs. Merritt and Clark to manage matters just as they pleased. Mr. Clark again, being obliged to do so, I presume, allowed Mr. Beaton to make up the books (when my publication of the Welland Canal rendered it absolutely necessary by drawing public attention to the matter) in such a way as that if balanced and that balance not investigated and examined there would still appear something like accountability to the company. The Tolls of 1830 and 1831, and the forwarding of three years, produced, it is admitted, £3607. 14s. 8 1-4, after deducting several hundred pounds (£389 2s. 10d.) from the return made to Parliament, the officers stating that they had returned nearly £400 too much by mistake. Until after I left St. Catharines last fall, very few of these accounts were entered on the books, and when they were entered (in December 1835!!) they were inperfectly, and improperly entered-but the accountants employed by the committee have reversed and corrected the entries, after a careful and patient investigation, in which we several nights remained in the committee room till midnight inquiring into the details. The question was this :- \$3607 had been received. What had become of it? Mr. Clark had sought a credit; as paid out of the moneys, or as tolls or forwarding debts entered on the books and originally accounted for part of the gross receipts, but upwards of £1000 of the receipts had not been entered, even in December last, so that it became the duty of the accountants to charge the difference to cash, allowing Mr. Clark to place to the credit of cash all the items that he could shew that he had not taken credit for on the books already. The effect was, that after every thing he could ask was credited in this way, whether supported by vouchers or not, a defalcation appeared of upwards of a thousand dollars, for which, of course the officers are accountable and the Directors ought to be, seeing they allowed the accounts of their servants to go without investigation for a series of years while begging for money by £50,000 at a time from the province to the hindrance of other usetul improvements. Never was public money placed in worse hands.

But this is not all. The accountants assumed at their first balancing of the books all to be correct in the books as the entries were made, which was not the case. In the toll account in Journal page 326 and their appendix, they have found it necessary to make a change in the cashcredit of £282 1s. 4d. after making Mr. Merritt Dr. to cash for the £149 12s. 8d. which the Board ordered him to be charged with in 1832 out of the tolls; which he received, but was not charged with until the accountants made him Dr. to cash for that amount a few days ago in their appendix to the Journal and great legers.

Mr. Clark (in the disbursements never placed on the regular books) charges about £700 as payments made to the schooners Canadian and Prosperity, one or both of which are understood to have belonged to Mr. Merritt the company's agent at that time. Mr. Clark, when requested to produce particular vouchers for the paying away of this large sum of money, admitted that he had none to produce. I perceive that the balance paid or said to be paid to the Prosperity is carried to Mr. Merritt's credit. We allowed these sums.

In Mr. Clark's account from page 36 book B, he !

appears to have improperly charged the company with £12 5s. in certain disbursements paid the late Robert Randall.

He also charges £12 9s. 3d. as paid to Kenneth Reach, in page 97 of book C. but gives no reason why, or for what that sum was so paid.

He also charges £57 16s. 3d. as allowances made by him for damage done to ashes carried on the Canal in 1831, and £21 7s. 10d., and £6 13s. 3d. for damage on Tobacco and paid to McMillan & Co., but neither shews an order of the next Canal Board after the alleged damage was done, nor of any Canal Board, since allowing these sums to be paid the parties, nor any vouchers to prove the transactions as they took place.

In a sum of £119 17s. 3d. charged as paid to Smith (book C. folio 95) £19 6s. 2d. are entered as paid the Secretary. This is not a voucher for a disbursement by the officer so as to entitle Mr. Clark to a credit.

In the toll account of 1830 Mr. Clark charges an item of \$14 as paid for wood for the Peacock (c. 31). This is improperly charged by the Secretary in his final entry to close the Peacock's accounts. So the company are twice charged for what their officers but once paid.

In the new entries made by Mr. Beaton by the direction and with the approbation of the Board, last December, folio 328 of the cash Journal £38 15s. and £50 5s. 7d. 1-2, are debited to toll as return from toll on boats and store, but these sums do not appear to have been credited to toll, or to have made part of the gross receipts of the year from which it is attempted to deduct these amounts.

£11 0 6d. appears to debit of contingencies as having been paid from Canal funds for freight to the *Prosperity*, while Mr. Clark charges the company elsewhere with £333 11s. 6d. as freight paid her owners for the same year out of Canal funds.

# HYDRAULIC BALANCE.

There is an indenture of mortgage among the Canal Company's papers—Alexander McDonell to the Welland Canal Company—dated on the 4th day of April, 1833—it is signed by Mr. McDonell and witnessed by two persons, and one of its provisoes is that whenever (the Hydraulic Company) the said McDonell fail in paying the interest when due, the Canal Company may reenter and re-possess the property sold to the said McDonell (as agent to the Hydraulic Company.) The mortgage is an informal document—the dates on which the principal and interest were payable being in blank? The original deed of the Welland Canal Company to the said McDonell bears date the 4th of August. 1831, and remains with the Hydraulic Company or Mr. McDonell its agent. The interest was to be payable to the Canal Company half yearly on the blank day of blank, so saith the mortgage! I find the first year's transactions of the Hydraulic Company on the Welland Canal Company's regular books, but in the 2ud year, that is, after the 1st of January, 1833, and until January, 1834, they do not so appear. The £1.500 of interest for that year, and the deduction of £500 therefrom by the menin the 2nd year, that is, after the 1st of manaly, 1834, they do not so appear. The £1.500 of interest for that year, and the deduction of £500 therefrom by the members of the Hydraulic company controlling the proceedings of the Welland Canal Co'y. do not appear in the Great Leger, nor in the yearly sham balance, but are placed in a subsidiary book with the balance accruing at the time. Then there is an attempt in the subsidiary book to cancel the money due by the Hydraulic company by setting off against it the interest on certain imaginary bonds granted by the Welland Canal Company, but never sunctioned by the Legislature. This attempt to nett from £20,000 to £30,000 by the Hydraulic job is one of the most scandalous and intolerable features in the history of the Welland Canal. The balance on the first year's transactions, including Mr. McDonell's private account, was £21 7s. when taken out of the Company's books. Then there was £116 of interest, £1,500 for one year's use of principal, less deduction for water in 1833—£500. sidiary book to cancel the money due by the Hydraulic company

# MINUTES OF BOARD 26th November, 1833.

Ordered-That for the more scente keeping of the books during the absence of the President and Secretary attending their duties in Parliament, they be sent to the house of Wm. Hamilton Merritz, Esq., after the accounts are closed and balanced. The following sketch shows the ability of the Company to meet the payment of the debts due by them-

Hydraulic Company's bond,£	25,000 0 0 1,500 0 0
Amount of debts due by the Company to the	26,500 0 0
1st November, (exclusive of claims not yet decided onby the Arbitrators)	20,844 10 712
£	5,655 9 4 1-2

There was the undivided two-thirds of 36 3-4 acres of Oliver Phelps' lands near St. Catharines, conveyed by him to the Hydraulic Company—and recorded. The Hydraulic Company conveyed it to the Welland Canal Company as some small compensation for the desperate bargain the latter were making, but the matter stands over for adjustment.

Where is the Bond?

#### DEFALCATION THROUGH ORDERLY.

William Orderly was a Contractor on the Canal, and took a contract in 1831 which was concluded the year after. The estimates for his work, allowed by the Board, are entered in the Great Leger £551 15s. 3d, but the real amount was £4 11s. Great Leger £551 15s. 3d, but the real amount was £4 11s.
2d. 1-2 more. The cash pretended to have been paid him in part
of this credit of £556 6s. 5d. 1-2, is £689 5s. 3d, for he is
settled with as a creditor of the Company in 1833, by a now or
notes bearing interest £80 16s. 9d. The curious proceeding by
which this pretended credit is accomplished is by making a balance of £137 10s. on the creditor side of his account, and omitance of £137 10s. on the creditor side of his account, and omitting to carry it down to the debtor side—thereby making it count for an additional estimate to that amount! The petty cash book, and Orderly's accounts when settled with, shew plainly enough that this was no blind mistake. The officers must account for the £132 13s. 9d 1-2, and as to Orderly, I dare say he will shew, if sent for by the committee, that he does not owe one farthing, although he is set down as a debtor to the Company for £137 10s.

When vouchers were called for, the following, with a mark and with no witness, was produced, by which poor Orderly was made to declare by the virtue of his mark that he had received £135 Ss. 7d. in full of an estimate of £125 Os. 7d.! Many other canal vouchers are equally creditable to the prudence and foresight of the Board of Directors and their officers!

(COPY.)

WELLAND CANAL OFFICE, St. Catharines, July 8, 1831.

[1352.] £135 8s. 7d.

Received from the Secretary of the Welland Canal Company, the sum of one hundred and thirty-five pounds, eight shillings and seven pence currency, being in full of estimate (of) £125 0s. 7d.

(No Witness.)

his WILLIAM × ORDERLY. mark.

To be satisfied of the deception attending the pretended balance sheets sworn to and sent to the House of Assembly, from year to year, it is only necessary to compare them with such accounts as this of Orderly's for several years. Sometimes the expenditure will be omitted, sometimes stated far too much, sometimes far too little. In short their balance sheets were got up, and successfully too, to blind and deceive the public they were plundering. It would be a curious and instructive task to analyze the balance sheets on the Assembly's Journals and compare them with the Company's books as revised. The more preceded payments they made the more these balance sheets swelled up, and they could as conveniently shew their receipts and expenditures without entering the whole of the tells and proceeds of forwarding on their books as if they had been entered!

Yet the Directors vouched for all these proceedings, and up to January last declared that all was correct—and produced Messrs. Bowery and Burns to prove it—who said they had done so!

# MR. JOHN DONALDSON-CONTRACTOR.

The credit for work done to November, 1832, in the estimate book, is £6,116 8s. 2d. In the perty Leger it is £6,127 17s. In the regular books of the Company (the old Leger) it is £6,175 7s. 10d.

Without considering the vouchers, it appears that the officers have charged the Company in this instance with £58 18s. 10d. more than Donaldson had a credit for, and interest is even charged on it afterwards.

But there is another and more material defection in this account—it is this:—

The real estimate, with its details, are missing-Beaton, in whose hand writing is the document which is in lieu of that estimate, says that he could not swear he ever saw the original. In searching among the canal documents I found a few leaves of the end of this great estimate, and on comparing the addition found \$264 of errors in Mr. Keefer's addition of these pages, which were certified as genuine by him and by the Vice President on the part of the Bourd. I begun to compare the copy with this original, und also the calculations, and found that they had added several thousands of dollars to the credits of contractors which was not thousands of dollars to the credits of contractors which was not in the estimate at all, nor in the copy of it which they had adopted. While I was at St. Catharines last year Mr. Keefer took a half sheet of paper and three wafers and without any other ceremony added £730 18s. to the substitute for the estimate of November, 1832—"£297 7s. 8d. on account of work done on sections 12 and 13, Gravelly Bay route (by Donaldson) after the death of Galbraith," the original contractor; and "Garrison and Little, additional allowance of two cents on excavation, Section Little, additional allowance of two cents on excavation, Section Little, additional allowance of two cents on excavation, Section 15 and 16 Gravelly Bayroute, \$1726 07, equal to £431 10 4." This curious addition is dated "Welland Canal Office, November 1832," and signed by "Geo. Keefer, Esquire." On inquiring I found that 26,748 yards of excavation, and the other allowances had been paid Golbraith and charged to him in full of that contact in the same estimate, besides a treasure of \$200 to Unpur tract in the same estimate, besides a present of \$200 to Upper over and above the contract for finishing the job, in all \$4,300. Mr. Newlove informs me that Donaldson did some part of the job at the conclusion, but as the full amount is credited in the copy of the estimate to Galleraith and Upper, Donaldson could only have been entitled to claim as a sub-contractor, and the £200 and upwards credited to him by Keefer is clearly an overcharge, for the job did not come to \$5,100, nor was it so stated in the estimate until I began to analyze it.

John Boyle's £18 2 9, entered first as paid in September, 1831, and again as paid by note in 1834, is entered in the petty leger, as if paid or settled the third time through Donaldson!

# THE PEACOCK STEAMER'S £447.

On the 29th of March, 1831, Mr. Wm. H. Merritt, personally, and not in a public capacity as agent of the Canal Company, appears to have entered into an agreement with C. H. Reade of Eric, to hire the Steamer Peacock till November in that year, Merritt paying \$2,500 to Reade for the use of the steamer, besides paying \$130 per month in wages, and finding fuel, provisions, and defraying all the items of expense. In June afterwards, I find a minute of the Board, stating that it is important to establish a regular communication between the two lakes, and recommending the chartering of the Peacock for the remainder of the season at \$2,000, or as much lower as possible; the Company to supply her with fuel, &c. &c. &c. The expense of the Peacock to the Company is charged as follows:

Only \$1,666 66 was paid for the charter.

On examing the account of the Peacock's receipts and the payments, it appears that £447 10 was debited to profit and loss on the loss on the vessel; but the sums of £36 1 3 and £43 15 8, which form part of that, are before charged on the great lager as having been paid from the Bank, out of the funds of the canal to Silas St. John, Coulter & Watson. There is also a difference of 31s 2d in the calculation of the loss, leaving the total defalcation by the officers of the Canal Company in this item, £81 8 1. For the £36 1 3 to St. John there was no voucher.

### JOHNSON ORR'S DEFALCATION.

This is an account for work with a dredging machine. The officers have entered it on the regular books as if they had paid Orr £16 more than the true amount of the estimate credited to him by the Board. But such is not the case—the petry leger shows that Orr got no more than was coming to him by the estimates—and the regular books only exhibit an attempt to mystify a plain account so as to obtain a credit for the payment of £16 of the funds of the Company, which were never so paid. It is a defalcation.

#### JOHN SINCLAIR'S FEEDER JOB.

\$25 76 are charged to this contractor on a small job beyond what he was entitled to, and after he had sent for and received the balance that was coming to him. I think this really was an error—although it proceeded from the great carelesaness usually displayed, as will be evident from the perusal of the previous receipt. The balance is entered as paid to Mr. Wenham by Mr. Black, and I presume that if Sinchair did not get it, as he knew it was not due to him, some of his friends must have got it.

# GEORGE SMITH, TOLL COLLECTOR.

In journal page 244, £15 5 is entered to his credit and charged to contingencies, as paid him for salary in a particular month. But in another part of the books it is shewn that the whole of his salary for that season, as well as for that month, was paid him out of the tolls. The £15 5 is an overcharge by the officers.

There is an overcharge of 46s 7 1-2d for Orson Phelps, in same way and at same time.

Smith a'so appears charged in 1832-3, with an old debt of £67 13 21-2, for which the minutes say he was to give security. It is not carried into the new leger, and, perhaps, it would be well to examine him, to see whether it is real, or whether there is not something about it which the books do not explain.

# BRUNDAGE'S £1,340 TIMBER CONTRACT.

One of the first entries on the old leger is a debt of eleven years standing by Theophilus Brundage, of £1,340 7 1. But I am inclined to think that Mr. Brundage owes the Company nothing—there was a number of proposals to furnish timber of a large size for a tunuel for the Deep Cut. Mr. Keefer and others sent their tenders—but it appears that Mr. Brundage offered the lowest of any, from whom ample security could be obtained; and the books shew that £1,340 7 1 were paid him for large sized squared timber in 1825. As it was not required for the tunnel, I asked the officers what had become of the proceeds, and Mr. Merritt said he did not know that there were any. The books not appearing to shew any returns, and it being impossible to suppose that between 5 and 6,000 dollars value in that commodity, squared and delivered, was lost, besides a large additional sum allowed for attending to it. I consulted Mr. McMicking, the member for the fourth riding of Lincoln, who stated that he did not know the amount of the gross receipts for the timber, but, that he bought and paid for some of it himself. Mr. Newlove has since informed me that Oliver Phelps used an immense quantity of this timber in his 34 lock contract—many thousand feet—and if so, he or the Company's officers should be made to account for it. It was rumored that some of it was used in shanties, but this Mr. Newlove positively denies.

The contract with Brundage, long lost, was discovered the other day by Mr. Beaton, with an award of £1,340 to Brundage approved of by Mr. President Dunn. Brundage was paid, in April, 1827, £58 for securing this timber in June, 1825, and the quantity, by James Clowes' measurement that month, was 202, 382 cubic or square feet.

## Mr. OLIVER PHELPS' ACCOUNTS—A DE-FECTION.

In page 157 of the great leger a whole line is crased, and then the amount is balanced off as if both sides of it were equal. But it takes £95 11 4 on the credit side to make it add equal. This difference is composed of several items on the debtor side which appear to have been re-paid by Mr. Phelps, as is shewn by a memorandum in the estimate books. Although not placed in the books, but balanced by an erasure, the above £95 £1. 4 is to be met with in the balance sheet, laid by Mr. Black; before the Assembly in 1830. It is a defalcation as cash due by the officers, and was a credit to Mr. Phelps, £7,558.

#### SILAS ST. JOHN.

£100 is credited to him for a scow, and £36 1 3 for cord wood, for which there are no vouchers. The cord wood is again charged the Company as a part of the less on the Peacock steamer.

### MR. DAVID THOMPSON'S ACCOUNTS.

The mixing up of accounts and of public and private transactions has occasioned much confusion on Mr. Thompson's accounts, as settled by the adopted copy of the estimate of November 1832, the officers entered in 1835 on the leger that £193 had been overcredited. This, Mr. Thompson denies, and makes further claims. His other estimates, up to November, 1832, are corrected and charged in the copy of the estimate of that month, and he not only disputes that £193, but makes further claims. I tried to understand his account, as it stands on the books, but found great difficulty, such is the confusion of the books; and the gentlemen named by the committee have had no time to go over it.

(OFFICE COPY.)

Dear Clark:

I received, yesterday, a few copies of the Report, I hope Leavenworth has struck off a number on better parenthey are badly executed—send them to all quarters—to all merchants and captains of vessels—and to the Western country, in particular—Mr. Yatus—England, &c., as usual. The accounts are not here yet, what delays them?—let me know when they are sent to Lower Canada to the Speaker, who should also have Reports for half the members. Send, by first good opportunity, my map of the United States, well done up in paper, it is at my house, and any publication which may arrive relating to canals, &c.

I wish you to charge me £500, and credit Thompson, the money was only handed Jackson when in St. Catharines. Make out and send a statement of Dunn's account for me to hand him—the Debentures are issued, but not yet received.

Mackenzie has not the least influence—we have had a stormy commencement, but think we will have a good House—send me a statement of the Hydraulic Renus, as made out by Mr. Beaton—account of lease—interest on sales, and sales also, of the hydraulic lands and property.

Truly yours',

(Signed) W. H. MERRITT.

January 18th, 1835. John Clark, Esq.

(Copy.)

WAINFLEET, August 26th, 1835.

Dear Sir:

In reply to your letter of the 15th, inclosed is a bond executed for the arbitration, differing a trifle from the copy received in your letter, but being verbatim, as per former agreement, and which, I trust, will be acceded to—you will please enclose a similar bond, duly executed by the President. I also enclose an account, received from the Company, dated 17th April, 1833, which shows the \$792 38 = £193 1 11 omitted to have been brought to my credit in the accounts recently rendered by the Welland Canal Company, this account I beg that you will also return by next Tuesday's mail.

Dear Sir,

Your obedient servant,

(Signed)

D. THOMPSON.

To the SECRETARY, W. C. C.

#### THE £31 5.

I stated to you, some weeks ago, that the officers of the Company had charged £31 5, of interest on a certain bill of £250, and then charged it as as if paid a second time, although it was only paid once. A great dead of correspondence with the Bank has been occasioned by this charge, the result of which, is, that I have satisfied the accountants, chosen by the Committee, that the money was wrongfully charged by the officers.

## INTEREST ON MR. DUNN'S LOAN.

One of the very rare instances in which the officers have neglected to charge the Company with money paid on its account, I found out, when searching for the facts in the above interest case. £2,500 and £250 were borrowed, through Mr. Dunn, in 1832, for the Welland Canal Company, and £150 of interest paid thereon. But there were £24 9 and £64 11 3 further interest, afterwards due, which, upon examination, I perceived they had forgotten to take credit for, when paid—I mentioned the circumstance to the accountants, who have made an entry correcting this error.

I add the correspondence on these matters.

B. R., 8,861. £250 0 0.

> WELLAND CANAL OFFICE, St. Catharines, Jan. 23, 1832.

Pay claims G. R. or bearer, the sum of Two Hundred and Fifty Pounds Currency, and place the same to account of Welland Canal Company.

(Signed)

JOHN H. DUNN,

President W. C. C.

To the Cashier of the Bank of Upper Canada.

> JAMES BLACK, Secretary W. C. C.

Due,	

BANK OF UPPER CANADA, Toronto, March 26, 1834.

JOHN CLARK, Esq.,

Secretary W. C. C.

SIR :

I have duly received your letter of the 19th instant, also Mr. Merritt's of the 20th, and have, in compliance therewith, transferred the £281 5 therein mentioned, to his credit, with the office at Niagara, waiting the settlement of the bill in question, when the remainder of the advances on account of the Grand River claims, are settled by the Company.

I am,

Sir,

Your obedient servant,
THO'S. G. RIDOUT,
Cashier.

BANK OF UPPER CANADA,

Toronto, March 17. 1834.

W. H. MERRITT, Esq., St. Catharines.

SIR:

I have this day transferred to the office at Niagara, for your use, the sum of £2,525 17 5, being the balance remaining out of Mr. Dunn's acceptance of your draft for £3000, which I beg to account for, as follows:

	£	s. d.
Discount on £3000, for days,	14	16 0
Interest on £3000, advanced to W. B. Robinson, Commissioner, To re-pay amount advanced to you on	178	17
9th February, 1832,	250	00
Interest on ditto	31	50
Cash for balance transferred to Nia- gara,	2,525	17 5
æ	3000	00

I remain, Sir,

Your obedient servant,
THO'S. G. RIDOUT,
Cashier.

WELLAND CANAL OFFICE, December 26, 1835.

Thomas G. Ridout, Esq.,

Sir:

Your's of the 24th instant, is at hand, but it does not state in what manner you received the payment of this £281 5, which you're-paid to Mr. Clark on the 26th March, 1834, by placing it to my credit in the office at Niagara, in that letter you state that until the remainder of the advances on account of the Grand River claims are settled, this bill may lay over.

In your account of 28th June, 1834, you charge B. R. 8,861, J. H. Dunn's draft, 23rd January, 1832—pray is this not the same—the difference in the interest is but trifling in the two sums.

Very truly your's,

WM. HAMILTON MERRITT.

St. Catharines, December 23. 1835.

THOMAS G. RIDOUT, Esq.,

Sir :

If you have taken the trouble to read Mr. Mackenzie's charges, you may have noticed the sum of £31 5, interest on a note of £250—from the tenor of Mr. Clark's letter to you, 20th March, 1834, or from some other cause, he supposes the note of £250, on the 9th February, 1832, was on my own private account, and had laid over until that period—

will you inform me on whose account this note of 9th February was discounted and how paid, by return of post?

I am,

Sir,

Very truly your's,
Wm. HAMILTON MERRITT.

WELLAND CANAL OPPICE, St. Catharines, Decr. 23, 1825.

SIR:

I will be thankful for a statement of the Bank account with the Welland Canal Company, for the years 1832 and 1833—also from the 15th April, 1835.

I am, Sir,

Your obedient servant,

JOHN CLARK,

Secretary W. C. C.

To THOMAS G. RIDOUT, Esq., Cashier, Bank Upper Canada.

> BANK OF UPPER CANADA, Toronto, Dec'r. 30, 1835.

Wm. H. Merritt,

St. Catharines,

Sir:

With reference to your letter of the 26th instant, I beg to inform you that I have made further search in the Bank books, respecting the payment of B. R. 8,861, for £260—and find that on the 15th March, 1834, your private account was charged with that bill, and £31 5, for interest—afterwards, on the 24th March, your account was again charged with £281 5, which sum was transferred to your private credit at the office at Niagara—agreeably to Mr. Clark's letter of the 20th March—and it having been ascertained on the 13th June following, that your account was overdrawn, and that you objected to the charge of the above bill therein—it was debited to the funds of the Welland Canal Company, with the accruing interest, £3 15 5, making £284 0 5—and your account was credited with the original charge against you, £281 5—this was done on the 18th June, 1834.

The first payment of the bill was at your own request, out of the £3000 you received from Mr. Dunn at that time—the Welland Canal Company having no funds then at their credit here.

There are but few entries in the Company's accounts for 1832 and 1833—and in order that the account may be continued regularly, I will thank you to send me the Bank book.

By the foregoing, you will understand, that no part of the £3000 received by you, from Mr. Dunn, in March, 1834, was eventually appropriated to the payment of B. R. 8,861, for £250 and its interest.

I am, Sir,

Your obedient servant, THO'S. G. RIDOUT, Cashier.

# MISTAKE IN CHARGING TOO LITTLE.

Had I found more of these and fewer of a contrary nature I should have had a better opinion of the managers of the Welland Canal, although I might not have been able to screen them from Canni, atmongs a might not have been able to screen them from the charge of keeping their accounts most discreditably. But the only errors I found in this way were an under credit on Mr. Love Newlove's estimate of £35 5s 7d—\$10 paid and not charged Scott and McEvoy, and the difference of £58 or so on the interest paid the Bank where there are errors on both sides, at I have just street in departs us I have just stated in detail.

# THEOPHILUS McCHESNEY £45 15s 6d.

The cash journal charges Theophilus McChesney of Gravelly Bay with £45 15s 6d paid him under an order of the Board in that year. But the officer on consulting the minutes found that there never was any such order of the Bourd. McChesney got the money out of the tolls, but although an account was opened with him in the new leger eighteen months or two years ago, and there mm in the new leger eighteen months or two years ugo, and there has been many payments since made him, the above sum still remains at his debit in the old leger without any explanation. Benton said he believed McChesney did not owe it—that he had been charged with all advances. The £45 15s 6d is a default for which the Company's officers must account. (See old Leger, folio 237.)

# CASH IN THE HANDS OF THE OFFICERS AND OTHERS.

In the new leger the officers admit they had on hand at the time the books were posted between £200 and £300. The hatime the books were poster between the selections are the committee shows hance sheet of the accountants employed by the committee shows the officers to have expended £337 more than they had—less the the officers to have been hundred pounds on hand. The investigation of the committee the committee the committee that the committee the committee that the committee the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee shows that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the committee that the above sum of two to three hundred pounds on hund. above sum of two to three numered points on mand. The investigation since will prove the officers defaulters, and add to the demands of the Company on W. H. Merritt, Thos. Merritt, junior, and others, in all a sum of from \$8000 to \$12,000. What the nett sum is, will, I presume, he shewn by the accountants, I have therefore been the less particular in summing it up.

# ROBERT CAMPBELL'S PETITION.

This contractor fulfilled a contract at the mouth of the Chippawa, and it was estimated to him by the Engineer, as per his agreement, at £2272 18s 6d, on which he petitioned to be allowed £274 1s 6d more, or in all £2547 in full of payment; and by an order of the Board page 122 his request was complied with, and that allowance ordered to be made him. On referring to folio 126 of the minutes I find he is allowed the difference as per order of the Board of 11th January 1230, but instead of extending £274 1s 6d agreeable to that order £350 10s is extended, which exceeds the authority referred to £75 3s 6d, and appears to be an error. It is the same in the Leger.

# FORAGE, HORSES, &c.

One of Mr. Clark's accounts, paid from the canal funds is for horses, forage, &c.—£85; but there is no voucher to shew who was the seller or who was paid the £85; nor any personal bill or account whatever; it is simply stated that in 1831 so much was paid in this way—but to whom Mr. Clark could not tell us.

# PACKET-BOAT CHIEF JUSTICE.

Instead of laying the gross receipts of passage and forwarding Instead of laying the gross receipts of passage and forwarding before the Company, the agent pays a very large sum—I think about £100—to one Martell, a person employed to manage the pecunisy affairs of this packet for the Company. Martell pays him £4 6s 01.2d less back as the proceeds of passage. &c. and the only notice taken in the account charged against the canal tolls, is the odd £4 of a deficiency. Martell and the forwarding agent appear to have performed all the functions of the Board of Directors as auditors, paymasters, &c. and it is too late to revise these matters in 1836.

## ENGINEER'S SALARIES.

Twenty-five pounds are entered on the cash journal as if paid and charged to salaries and then transferred. But there is no voucher to show that any such sum was paid; nor is there any voucher to show to whom it was paid, and the salaries of the engineers and their contingent account are settled for by other payments. The officers ought to account for this sum.

### LOUIS A. CONSTANTINE.

The estimate of his work to November, 1832 is stated in the leger £3 19s 4d less than it ought to be.

# GEORGE KEEFER'S EXPENSES.

£3 13s 3d is twice charged to the contingent account for the same bill, as his expenses.

### JOHN CALLAGHAN.

Folio 234 leger £9 15s is short credited him for astimated work done. And in cash journal, folio 326, \$30 are charged to toll which should be charged to him. In his account in the petty leger £10 is entered as paid to him which is not carried into the heals. the books.

# SCHOONER CARTWRIGHT.

In leger 302, the schooner is debited with £10, and the Secretary improperly credited that amount. The Secretary should be debtor to the schooner.

# SCHOONER CARTWRIGHT.

In 246 of cash journal, contingencies are charged with £17 In 240 of casa journal, contingencies are charged with £17 ls 2d for detention of this schooner, while it appears by page 33 of the toll book that £17 l8s 10d was paid in cash as an advance to the Cartwright. The £17 ls 2d should be at the debit of the vessel instead of being at the debit of contingencies.

#### SHERIFF HAMILTON.

23s 11d is twice debited to contingencies and once charged to Mr. Humilton. The officers are therefore due 23s 11d for this defalcation or error. But Mr. Bowery says there is no difference !

# Mr. T. BUTLER'S EXPENSES.

£3 15; are twice charged to contingencies for the same service, although the money was but once paid.

# COLONEL ELLIOTT'S EXPENSES.

It appears that £6 7s 6d is debited to contingencies, cash journal 255, for the expenses of the Colonel as a director, one journal 255, for the expenses of the Colonel as a director, one time attending the Board—but that sum is included in mother larger sum of £13 2s 6d charged to contingencies in page 259. The vouchers correspond with this latter entry. The officers of the Company will have to refund the £6 7s 6d.

# DALY & Co. CONTRACTORS.

In folio 228, great leger, this firm (which is probably the same as are mentioned in my 13th charge as having taken at 9 1.2 cents a contract for which T. Merritt had 12 1.2 from the Company) have received a credit of £11 19s 6d more than the estimate of Novomber 1832, which is the authority for the payment. The officers are responsible for that sum—it would be of no use to enter into an enquiry whether they have over paid Daly & Co.
That is not very likely—and if they had, it was at their own risque.

# JOHN DECOW'S FARM.

He was awarded £625 damages for injury done to his property by the canal. The award is on the minutes, but he has no credit on the leger for the amount.

# ARTHUR SHORE—ERRONEOUS CREDIT.

While the claim of Decow, who is a creditor is kept out of the Company's books, Arthur Shore is entered in folio 183 of the 11th leger as a creditor for land awards, £25 since 1833. He was paid long since, without the \$6 being deducted, so that if the books were correctly kept Shore would appear on the balance sheet as a debtor for \$6 instead of a creditor of \$94.

# THE REV. MICHAEL HARRIS' DEBT.

In folio 185 of the leger this gentleman appears as a creditor for an unsettled claim for land at Chippawa, and so it appears on Messre. Hinck's and Young's balance sheet. But Mr. Harris was paid long ago, and their erroncous credit is owing to their disgraceful book-keeping.

# JOHN LYMBURNER'S £62 10.

In folio 187 an account is opened in the leger, and J. L. Lymburner appears as a creditor of the Company for £62 10s; and is also entered as a creditor on Messas. Hincks and Young's balance sheet. But Lymburner was paid long ago, and has not a demand of a shilling.

### BARTON FARR'S \$150.

An account is opened on the great leger in which Barton Farr appears as a creditor of the Company for £37 10s; and so he was in Decomber, 1833, but was paid in full many months ago, and the officers have taken credit for the payment elsewhere.—He appears a creditor on Messrs. Hincks and Young's balance sheet, but it is all fiction—he has no claim.

## JESSE WILSON'S AWARD.

In Messrs. Young and Hincks' balance sheet, and folio 296 of great leger, Mr. Jesse Wilson is made a creditor of the Company for £37 1s 1d. But it appears from the title awards that Mr. Wilson was paid this money years ago, and that the leger credit is fictitious.

# MR. JAMES SLOAN—HARBOR AND SECTION 15.

In folio 97 (Sloan's account) a whole line is crased from the Great Leger so as to make it impossible for one to tell what it once was. From this folio £50 are brought to another contract folio of Sloan's, page 167, and placed to his credit, without deducting any thing from the sum in the former folio. Sloan is due £75, which the officers tell me Martindale is to pay out of his award, and this £50 of a false balance makes his debt £125 — Inquiry should be made into the means of collecting some of the many debts due the Company, or so said to be on the books.

### BEATTIE & Co.

This firm are entered as debtors to the Canal Company for £30 5s 5d, in folio 189 of the great leger—and there is no corresponding credit. So the account has stood for the last five years, and so it is entered in Mesers. Hincks and Young's balance sheet. The officers appear to think there is no real debt, for they have ruled off the account without a credit. The petty leger shews that payments were made to the parties, but the account appears different there also. Perhaps Mr. Black can clear up the difficulty. I feel satisfied, in the absence of proof, that the debt is fictitious, although it may have (I don't say it has) served to square off some difficulty on the credit side of the cash account.

## THE St. CATHARINES' FEEDER.

£246 0s 8d expended, or said to be, on this work, was irregularly entered, November, 1832. (See cash journal p. 206.)

## CREDIT TO SECRETARY.

£186 7s. are entered in eash journal folio 208 as being at the credit of the Secretary. But only £100 is taken into the leger. A memorandum mentions that the £86 7s. is Grand River claims.

## DAVID PRICE.

Is overcharged £9 4s. 6d in cash journal page 209, but deducted at foot. Price did not get credit for the money thus due him. Price and Fagan are charged £120, but are not due any part of it, as an examination of Levi Garrison and Little's account will show.

## WILLIAM H. MERRITT.

Gains 19s 11d by 467. 0s 7d for costs he became security to the Messrs. Baldwins for being turned into 467. 0s 7d.

## ALEXANDER McDONELL'S £50.

50%. were credited to this gentleman in journal, folio 215, but not posted in the leger.

### HIRAM SLATE.

Got an order from M. Lewis several years ago for 41. 6s 10d. It is charged to Lewis but not credited to Slate.

## BRUNDAGE'S RENT.

124. 10s is placed at the landlord's credit for rent of old office, but not posted. There are several other curious entries about this rent.

## JACK TOYNE & Co.

They were paid in full of all demands on the Canal Company in 1833 by notes payable, and an extra note of 241. Is was given them in 1833, bearing interest, which has been paid to some one. They have since done much work on the canal, but no attempts have been made to recover the value of the note thus improperly given.—See Journal 239.

### ALEXANDER McDONELL.

In folio 251 of the great leger the 74l. 2s 6d got by Alexander McDonell from Mr. Black, out of the Grand River claims money &c. is not credited to any account whatever, although charged to McDonell.

### JOHN BOYLE

Was a creditor for 181. 2s 9d in 1831; was ordered to be paid from U. S. Bank and so entered on the books—was not paid. — In 1833 got a due bill bearing interest which was paid in 1834. (See also folio 354.)

## DAVID THOMPSON

Gets a credit of 166?. 11s in folio 355, but cash which ought to be debited is not.

## JOHN VANDERBURGH'S ACCOUNTS.

He is credited 81. less than he should have been in the leger on his estimate for Nov. 1832. The same sum appears to have been overpaid him on that credit in the petty leger. He is still due \$6 on this settlement. In the entries from estimates there is a charge for lock tending for which there is no bill or explanation, May, 1833. His other accounts will more properly come under consideration when Mr. Robinson's are reported on by the accountants.

When the July 1st estimate of 1835 came before the Board, it was signed in part by Mr. Keefer as engineer, and the whole by Mr. Merritt and Clark as President and Socretary. Some of the bills and vouchers were absent; some were more or less incorrect; some were for charges forgotten in former estimates; some were short returned by the Engineer and Superintendent; bills of the labor were produced without any accompanying time lists to shew, the days and persons employed; the Engineer having forgotten the contracts of 160 perches to John Kerr; 181 perches to Vanderburgh; 240 to Christie, and 165 to Gillelands, now added the difference of 7 1-2 cents per perch, above the price he had estimated the previous month, having been instructed by the parties rather than by the more troublesome operation of a reference to their agreement. This confused and imperfect supply bill we passed, having deducted \$1023 until explanations and corrections were given. No dependence can be placed on such documents, nor on the accuracy of those officers who produce them as regular returns.

## A SPECIMEN OF THE WELLAND CANAL ENTRIES.

The exhorbitant commission of 500L was allowed J. B. Yates of New York for obtaining the discount of a 50,000L bill from the U. S. Bank for the Welland Cahal on the security of this Province: of this commission 300L were paid at one time and 200L at another to Mr. McDonell, Mr. Yates nephew. The entries in the Cash Journal of the payment of the 300L are as follow:

1832, June 16, J. B. Yates, Dr.-U. S. Bank, Cr. £300. Folio 200. Entered in Leger.

1832. Novem'r, Toll, Dr.—J. B. Yates, Cr. £300.—En Folio 206.

1833, May 1st, Checked and numbered as if it were entered in Leger, but it was not entered.

J. B. Yates. Dr. — United States Bank, Geo. Keefer and Secretary, Cr. £300, Checked and numbered in Journal as if it had been entered in Leger, but not so entered.

December 1835, Toll, Dr.—Toll, Cr. for J. B. Yates, £300.
Folio 324. Legerized in an entry under the title of "Sundries Dr. to Sundries."

It is to be hoped that this transaction at least is sufficiently recorded in the Company's books. In order that the committee may themselves fully comprehend the degree of responsibility of the officers I will here quote the standing orders. They provide—That the Secretary shall be exclusively under the control of the President, that all money transactions must be approved by the Directors, and that no money be paid out by the Trensurer until their sanction is obtained; that no moneys shall be advanced to any contractor until good and sufficient securities shall have been entered into for the due performance of his contract; and that the Engineer shall make out an estimate of the amount due upon each contract on the 1st day of every month; the same to be certified by the Agent and transmitted to the Board at their monthly meeting.

Under these regulations, the following proceedings were had:

"At a meeting at St. Catharines, October 7, 1831.

#### PRESENT

Hon. J. H. Dunn. President,
Henry J. Boulton,
John Warren,
Robert Randul, and
Thomas Butler,

Esquires.

"Resolved-That William Hamilton Merritt, Esq., the present Agent of the Company, be appointed to the office of Secretary in the place of Mr. Black, resigned, at an annual salary of of 400l. per annum, to take place on Mr. Black's quitting,"

"4th November, 1831.

#### PRESENT.

Messieurs Dunn, McDonell, Allan, and Randal.

"At the request of Mr. Yates, John Clark, Esq. was nominated for the office of Book-keeper to the Company on Mr. Black's retiring from his present situation of Secretary—wherefore it was

" Resolved—That John Clark be appointed Book-keeper with a salary of 1501. per annum, upon his giving security in the sum of 10001."

Mr. Clark gave security in Mny, 1832, and there his salary commences on the Company's books as Book-keeper.

## MINUTES OF 31st MAY, 1832.

(EXTRACT.)

"Mr. Clark having been required by minutes of the 4th of November, 1831, to give security to the amount of £1000 upon taking upon himself the office of Book-keeper to the Company, submitted the following:—

"Job Northrup and Charles Ingersoll, Esquires, as his secu-

" Resolved—That the same be accepted of and that he enter upon his office accordingly."

Upon a reference to the books it will be seen that Mr. Clark mever wrote a line either in the Journal or Legers, but copied the minutes for Mr. Merritt the Secretary, into the minute book at 150L a year.

" 19th November, 1832.

PRESENT.

Messieurs Dunn, Keefer, Randal, and Butler.

"Resolved.—That Mr. Merritt will resume his situation as Agent, and Mr. Clark be appointed Secretary."

On the 5th of June, 1833, Ogden Creighton, Esq. became the Treasurer of the Company, and as such responsible for its money; he gave 2,500L security, and was allowed no salary, the funds then being very low indeed.

I perceive by the minutes of the 6th August, 1834, that the Board had become fully sensible of the discreditable state of their financial affairs. Mr. Raincock was about to be employed to arrange the accounts when the officers evidently not wishing that an intelligent stranger should interfere, made a representation to the Directors as followeth:—

"Mr. Clark having reported to the Board that during the present month he thinks he can with the aid of his present assistant put up the books, produce a regular balance sheet of receipts and expenditures, have the Hydraulic books open for sale of lands, hydraulic situations, &c. &c., the estimate in due time for the examination of the President and the business of the office regularly brought up, Resolved—That the decision of the Board respecting Mr. Raincock be suspended."

Instead of doing as he had promised, the books were left in the same state of confusion as before, and in August last I obtained an order of the Board that the whole amount of revenue of which no account appeared on the Company's books, and which had been collected in 1830, 1831, and 1832, should be insumtly entered; part was entered last December, and the rest is yet to enter and audit by the Board. The accountants employed by the committee have already audited the whole.

It was formerly the practice that when one contractor took two or more contracts a separate folio was entered in the leger for each contract, and much confusion was prevented thereby.—Since Mr. Dunn ceased to act as President and to attend the Boards, this excellent practice, as well as that of having an estimate book with the expenditure on each job or section separated and classified, all is placed together in as confused, unintelligible and reprehensible a manner as it was possible for human ingenuity almost to have contrived. Many of the late contracts with the Company's officers are illegal—wanting alike the seal of the Company as the signature of the President or Vice President for the time being.

The following letter will show that Mr. Creighton is also responsible for any defalcation.

WELLAND CANAL OFFICE, St. Catharines, June 6, 1836.

Sm

I am instructed to inform you that Ogden Creighton, Esq., one of the Directors, is appointed Treasurer to the Company, and that all tolls collected after the let inst., will be paid over to him by the several collectors at such time as he may require the same to be paid. It is also ordered that in future no deductions for salaries to collectors or for other charges will be admitted to be deducted from your toll return, unless first submitted and authorised by the Board of Directors.

You will please observe that in receiving payment of tolls by due bills of the Company, you will only take them from the original holder for the tolls on any property he or she may have passing the canal—or those having demands on the Company on their own personal accounts, viz:

David Thompson, Esquire, A. Thompson & Co. A. S. St. John and Phelps, H. N. Camp, S. R. Squires,

George Keefer, Esquire, Oliver Phelps, Alexander M'Donell, Esqr. and W. H. Merritt, Esquire.

I beg leave to annex the copy of a resolution which passed the Board on the 5th inst., a copy of which please affix in your office and make public otherwise for the information of those con-

cerned.

I have the honor to be, Sir, Your Obedient Servant,

nt Servant,
JOHN CLARK,

Secretary W. C. C.

St. Catharines, July 3, 1833.

DEAR SIR,

 would have you in future to insist upon all dues being paid you, us I shall certainly require them at your hands.

I have the honor to be,

Dear Sir, Your Obedient Servant.

OGDEN CREIGHTON.

Treasurer W. C. C.

Robert Randal, Esq., Collector, Port Colborne.

WELLAND CANAL OFFICE. St. Catharines, April 3, 1834.

SIR,
The inconvenience and loss with which the Company was burdened last year in consequence of the collectors permitting the tolls to be paid in money of the United States renders it necessary that you should in future receive no other notes in payment of tolls than those of the Banks of Upper or Lower Canada or the State of New York.

1 am, Sir,

Your Obedient Servant.

OGDEN CREIGHTON, Treasurer, W. C. C.

The Collector W. C. C. Port Colborne

> WELLAND CANAL OFFICE, August 7th. 1833.

SIR,
In consequence of several had notes of the United States currency having been paid into this office in lieu of tolls—you are requested to inform the masters of vessels that after this trip no other notes can be received as tolls except notes of the Banks of Upper Canada or Lower Canada. You will be held personally responsible for receiving any other after the 20th of this month.

I am. Sir. Your Obedient Servant,

OGDEN CREIGHTON,

Treasurer W. C. C.

ROBERT RANDAL, Esq. Collector, Port Colborne.

CALBREATH AND LAX.

In the 338th folio of the great Leger £567 3s. 3d. of a balance In the 338th folio of the great Leger £567 3s. 3d. of a balance stated to be due by this firm over and above their estimates for work done, is ordered to be charged to "Bad Debts," afterwards altered to "Profit and Loss." There is an entry in the same folio of the leger of "June 8th, 1832—to cash £567 8s. 3d." and upon consulting the 199th folio of the Journal, it is entered cash paid "Wm. Calbreath £501, and for loss on contract other £317 8s. 3d." The minutes of the 31st of May shew that Calbreath's loss on enlarging the canal from Port Robinson was or dered to be naid. I do not clearly understand the Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness of the 199th Profiness dered to be paid. I do not clearly understand the Engineer's estimate placed to his credit; it goes into no particulars. The lot mentioned in Mr. Merritt's letter, hereto annexed, has been sold lately to one of the Directors for 100% or thereabouts.

Copy of Letter, Wm. Hamilton Merritt, Esq. to the Hon. Wm. Allan-dated 19th Dec'r., 1831.

ST. CATHARINES, 19th December, 1831.

MY DEAR SIR

Mr. Calbreath, a very respectable Englishman and good contractor, has taken the job to deepen the canal from Deep Cut to the junction to Gravelly Bay. He requires an advance of 2501. for which a deed of property to a large amount is made over to Mr. McDonell—besides the work must be done as soon as first of April, and the money will be in our hands to meet the payment, which F will see done from the canal company—there can be no risk in advancing the money under such circumstances. I should apprehend. At you. Ridout on the subject.

Truly yours, pprehend. If you think so, will thank you to speak to Mr.

WM. HAMILTON MERRITT.

Hon. WM. ALLAN.

Copy of Letter, Wm. H. Merritt, Esq. to Thos. G. Ridout, Esq.—dated 20th Dec'r., 1830.

St. Catharines, 20th December, 1830.

SIR,
The enclosed draft from Mr. Calbreath, on Mr. McDonell, and endorsed by Mr. Lex of Niagara—is secured through the Welland Canal Company, and will be paid out of the April estimate.—If discounted please enclose me the money for Mr. Culbrenth.

And oblige Your obedient servant,

WM. H. MERRITT.

THOS. G. RIDOUT, Esq.

335. Your second head of charge is "that very " many erasures have been made in the Journal and "Legers, some of which are to the evident disad-"vantage of the Company, and the benefit of persons "connected with the management of the Canal, while "there are others concerning which nothing can be "traced by which to discover the original entries." If this is the case you will please refer us to the pages where these erasures occur?-I refer you to between one and two hundred crasures in the old Leger, and to at least as many more in the Cash Journal and Estimates, from the two latter of which, as being original entries, the Leger is filled up. The petty legers also contain almost innumerable errors, and from these books also are entries made for the perplexing character of which I refer you to such evidence as may be given by the book-keepers of your appointment.

Mr. Bennett, of New York, in his system of American book-keeping, a work deservedly recommended by Mr. Archibald M Intyre, of New York Mr. Delbitt, Surveyor General, the Cashier of the City Bank, the Mayor of Albany, Mr. Van Rensselaer, and other eminent accountants, lays down the following rule for the correction of errors in the Legers: "If a sum be entered to the credit of an account that "should have been on the debtor, it ought not to be "scratched out, but entered on the other side by "debiting the account To Error, and the correct post "be then made." Again in his introduction he remarks that "even among those who prosecute "business; have, when requested to exhibit the state of their affairs, exhibited books with crasures; with "blots, with omissions, and circumstances to the opprobrium of the merchant, and which none could "decipher, and which the book-keeper himself could "not explain. From these causes shameful and interminable disputes have arisen; suspicion, "charges of injustice, loss of reputation, and loss of property, have ensued." Pages 27, 33, 42, 45, 54, 61, 65, 66, 69, 70, 71, 73, 74, 75, 85, 97, 113, 120, 138, 146, 151, 152, 155, 156, 157, 180, 185, 194, 216, 228, 236, 240, 250, 251, 253, 259, 273, 278, 283, 323, 333, 339, 369, 389, 395, 399, 402, & 404 of the League will affect ensurement of the League will affect ensurement. 404 of the Leger will afford specimens of the era sures, and there are many others. The cases of

Oliver Phelps, in Page 157, where a whole line is erased, and also where a false balance of £95 11s. 4d. is obtained by another crasure equally incomprehensible; of Ward & Hovey, where it differs from the printed balance of 1830, page 402; of Thomas Merritt, page 402; 151 all the line out; and of Sloan, folio 97, where the whole line is erased, a false balance produced, and one cannot tell what was formerly entered, or from what book taken—will serve as illustrations of the effects of erasing from the Leger; but it is infinitely worse where there are erasures from the Journal, it being a book of original entry. Almost all their books of original entry, however, are crowded with erasures; as to omissions, they are, like the false and erroneous entries, almost innumerable.

In the course of a hundred pages of the Cash Journal, which as they keep no Waste Bookis a book of original entries, there are at least sixty or seventy erasures. I will now proceed to shew the effect. Finding that the Cash Journal contained regular and proper entries in several cases which had been marked as entered in the Great Leger, and that although these entries had the appearance of having been duly checked and examined, they had been sometimes carried forward to the Leger only in appearance, I went over Thomas Merritt's entries in the Cash Journal after the report of his affairs had been laid before the Board, and in page 257 met an entry as follows:—

"Thomas Merritt Dr. to Toll Nov. £50 0 0. Dec. 5s. 73d.—added up £50 5s. 73d." This sum was marked as having been carried into the Leger, p. 402, and found the 5s. 72d. remaining, but where the £50 should have been there was one of those erasures which so disgrace their book-keeping, and two dots neatly made over it to withdraw attention from it. I next turned to the Toll Leger and found that Mr. Merritt had actually received the £50. I then opened up the toll receipts and found the receipt he had signed for it. I next turned to the Toll Leger page 88, and found that the Secretary had taken credit for this £50, as paid to Merritt from the Tolls. I strongly suspected the officers because they must have seen it when they checked the books, if it was not done after May last. Callaghan who made the original entry, has had no access to the books for many months, and Beaton had drawn out Merritt's account as if there were no such £50 against him. Since I left the Canal Office, I have learnt that Callaghan who they employ as lock-keeper and to collect tools at Robinson has been sent for, and that he thinks he made the erasure, but cannot explain what induced him so to do, unless that his mind had got confused about the obliteration in the Journal in the month of November, the true time when the money was paid! But if he did, and if the officers, with the entry of £50 5s. 71d. in the Journal, and only 5s. 71d. of it carried into the Leger, with an erasure in place of the \$200 before their eyes, could wink at such a system of knavery, and allow it to remain to the injury of the Company.

Of the original Journal entries in the Company's Cash Journal there are erasures in the following pages, besides others, sometimes 4, 5, or even 6 erasures in a page, and no explanation can be given in a variety of cases. For instance, you will meet with

erasures in the Cash Journal pages 56, 57, 58, 59, 60, 61, 91, 93, 95, 104, 107, 110, 112, 122, 128, 132, 133, 135, 136, 139, 144, 148, 151, 152, 163, 164, 177, 179, 180, 184, 190, 202, 204, 206, 210, 213, 214, 216, 217, 220, 221, 224, 229, 231, 234, 238, 240, 245, 246, 249, 251, 253, 259, 261, 262, 265, 266, 269, 275, 285, 286, 288, 291, 292, 297, 309, and in I do not know how many more. The truth is, if you examine an account to day, it is really difficult to tell whether an erasure will not defeat all your vigilance tomorrow. A variety of statements having relation to this charge will more appropriately appear under Nos, 1 & 2.

From motives of curiosity I compared the return in the contingent account given in by the Company in 1830, and printed with our report that Session, with the items in the Leger. The sum of £189 13s. 6d. at the credit of this account does not correspond in amount with the balance sheet given in in 1830, which says £213 8s. 6d. and there appears an erasure in the Journal entry. In the minutes folio 177, and Cash Journal folio 194, £42 8s. 7½d. are charged contingencies of the Canal for transporting emigrants.

326. What have you to offer in support of the 8th, 9th and 11th charges?—The principal evidence on Nos. 8 and 9 will be found in the statement on charges Nos. 1, 3, 4, 5 and 6, all of which have reference to the Company's books and accounts and money transactions. A reference to the books of account will shew that since Mr. Dunn ceased to be President until lately, the officers paid themselves their salaries without any order of the Board of Directors. The last order I find (until lately) is that of the 31st of May, 1832. No officer of an incorporated Company can possibly have the right to appropriate to himself any salary or emolument in opposition to the standing orders of the Board to which he is subject as such officer.

I submit a copy of the report of Messrs. Bowery & Burns of St. Catharines, and their appendices, in order that the public may see how easily a great corporation like the Welland Canal Company may have a report declaring that black is white and white black, and that error is truth and truth error, if they will but pay well for it. The Board of Directors,—Mr. Thorburn dissenting, and Dr. Duncombe and myself absent—approved of the report on the 6th of January last after a full investigation!! Had it not been that the authority of the Assembly was sufficient to enforce a thorough investigation, many persons would have believed Messrs. Burns & Bowery, that I was a slanderer, and the officers of the Company and the Board of Directors all honorable, pure, and spotless men.

# REPORT OF MESSRS. BOWERY AND BURNS.

To the President and Directors of the Welland Canal Company:

GENTLEMEN-

In consequence of our having been appointed to examine and compare certain charges made by Mr. Mackenzie, for which appointment we refer to the Resolution, and letter of Mr. Clark, hereto and

nexed, we proceeded to make a minute, dilligent and impartial investigation of the Books of the Company.

The result of this examination, shows clearly,

First, That all the money received by the Secretary and Treasurer has been duly accounted for by order of the Board, as appears from the minute book, to which we, on all occasions referred, where money was paid;

Secondly, That the books have not been tampered with to suit the purposes of any one;

Thirdly, That the erasures in them only extend to such instances as these, namely; the name of debtor or creditor wrong, and crused; the column of figures added up wrong, and crused to correct it; or the extension to the wrong column and erased. In no instance has an erasure of that kind happened, to the prejudice of the Company, except in a charge of £50 made against Thomas Merritt. This was done by Mr. John Callaghan, under a misapprehension that this £50 was included in another payment, and for an explanation we refer to Mr. Callaghan's affidavit, hereto appended.

We have noted sundry errors in 1831, 1832 and 1833, before Mr. P. G. Beaton had charge of the Books, only one of which proves prejudicial to the Company—the payment of £24 1s to John Toyne & Co., in consequence of a neglect to post that amount to their debit. Since Mr Beaton took charge of the Books, we have discovered no errors.

The errors in the Books, and in the Estimates, amount altogether, to the sum of £106 6s 2d against the Company, and £43 11s 2d in their favour; but we do not believe a defalcation of one pound will be found.

There are two or three Estimates which yet require to be examined, not having had time to do it. These, with some other charges, which are trifling, will form the subject of a supplementary Report.

Whether the errors be considered great or small, in the expenditure of nearly £500,000, is a mere mutter of opinion, on which every individual is as capable of judging as ourselves.

The subjoined Report is as full and circumstantial as our time would permit.

We have the honour to be, Gentlemen,

Your obedient servants,
J. T. BOWREY.
ROBERT E. BURNS.

WELLAND CANAL OFFICE, St. Catharines, 4th Jan. 1836.

"Whereas, it has been stated by Mr. Mackenzie, a member of this Board, that the financial affairs of this Corporation are in a state of great derangement and that the Books have been improperly tampered with; and whereas, the Board are desirous to have the charges made by Mr. Mackenzie thoroughly and impartially investigated by some competent and disinterested person or persons—

Resolved, That J. T. Bowrey, Esquire, be authorised to examine and compare the said charges with the said books, on behalf of this Company, together with all receipts, and expenditures of all moneys which have come into the possession of this Corporation, from time to time, up to the 31st October,

inclusive; and that the Secretary, Mr. Clark, be requested to appoint another person to act in conjunction with Mr. Bowrey, and that these two gentlemen do report the result of their examinations to this Board, and they shall have full power to examine all persons, books and papers, in any way connected with the affairs of this Corporation.

Resolved, That the following Directors of the Board do attend at this office, by turns, weekly, to superintend the examination of the Books, and closing of the accounts of this Corporation, in the following rotation:

Thomas Butler, Esquire, to attend to 30th November.

Alexander Macdonell, Esquire, the following week.

David Thorburn, Esquire, the next week.

Ogden Creighton, Esquire, the next week.

And so continue in rotation.

Truly extracted from the minutes of the Board,

19th, Nov. 1835.

(Signed) JOHN CLARK, Secretary, W. C. C.

> Welland Canal Office, St. Catharines, 25th Nov. 1835.

Sir,

I beg leave to enclose you a copy of the Resolutions of the Board of Directors, and to request (on my part,), that you will act in conjunction with Mr. Bowery, in the examinations required by the Board.

(Signed) JOHN CLARK, Secretary, W. C. C.

R. E. Burns, Esq., &c. &c. &c.

# REPORT ON MR. MACKENZIE'S CHARGES.

We commenced our examinations with the year 1831, at the place Mr. Mackenzie commenced his remarks in pencil; and throughout the Books we find he has made a great variety of these remarks; and also checked the sums in pencil: but in order that our examination should in no way be blended or confused with his, we have checked the Books with red ink. We have constantly referred, on all occasions where money has been paid, to see whether it had the sanction of the Board, and in no case have we found that it had not.

The first charge we were made acquainted with, as preferred by Mr. Mackenzie, was, that it appeared about £50 received by Mr. Black, the former Secretary, from the Bank of the United States, had not been accounted for. Our examinations result in this:

Folios 186, 187, Journal, we find Mr. Black received, and the entry is as follows:

Sundries Dr. to the United States Bank, 42,677

This sum was more than was required by 2s. 6d., in consequence of the estimate sheet being added wrong, and was not found out till adding the different amounts on the Journal. This 2s. 6d. is brought down, as cash on hand, to the next estimate, and accounted for, folio 188.

Folio 188, we find Mr. Black received, and the

Sundries Dr. to the United States Bank, £2,572 13s. 7d.

This amount was more than was required, by £49 19s. 10d., in consequence of the estimate sheet being wrong added up; and this amount is brought down in the next estimate as so much cash, and brought into account in folio 191. What may have given rise to Mr. Mackenzie's suspicion, is, that in the minute book, folio 169, the next estimate is passed the Board, as £1,891 4s. 3d.; but when we referred to the original estimate, to compare it, we found it £1,941 4s. 1d.—just the difference, £49 19s. 10d. The amount is correctly stated in the Journal; but the Secretary having £49 19s. 10d., remaining on hand, thought it perhaps only necessary to enter in the minute book, the balance. The amount is all paid out, as appears in detail, folios 190, 191.

Folio 206, Journal, £246 0 8d. is charged to the debit of Toll, and credited on account. This sum was paid for constructing the St. Catharines feeder, and paid out of the Toll of 1832, by order of the Board. It is correct, that it should only be a single entry to the debit of Toll, because the persons to whom it was paid are credited with the respective amounts, direct from the estimate sheets. The not posting the credit side from the Journal, makes no difference in the balance sheet, because that is made from the Leger solely, and the credits are then carried in, but from a different source than the Journal. The estimates on this work form no part of the balance of the expenditure of 1832, and of the money granted by the Legislature.

Folio 207, Mr. Mackenzie finds fault that John Donaldson was not credited in the Leger with £250; Love Newlove, £225, and J. B. Yates, £300. The reason was this: £2,300 was previously obtained from the United States Bank, to be paid to certain persons, of whom the three above named were charged with those amounts. It appeared afterwards that this sum was not all paid to the different persons to whom it was charged, and there was an order of the Board to re-credit the whole amount, which was done in folio 207; but as the three above named had been paid those amounts, they were immediately re-charged on the same folio, with the same amounts, and the book-keeper thought it unnecessary to post the two sums, as the one balanced the other, and so left the original charge standing. We think it would have been better that both had been posted, because then there would be no room for remark.

Folio 208, there is a sum of £186 7s. stands to credit of the Secretary. It is posted to the Leger only £100. This sum has actually been paid, as the accounts on folio 208 prove; but where the cash came from, we are at a loss to account. The only two sources it could come from, is either the toll of 1832, or from the pockets of the officers themselves. It is wrong that even the £100 should be posted to the credit of the Secretary, unless he did actually pay it.

We, therefore, recommend the reversal of that entry to his credit, and open a new account, called a suspense account, for the whole £186 7s. until it can be ascertained where it is from.

Folio 209, there is a sum of £9 4s. 6d. twice charged to David Price. He should have credit for it, and we recommend its being done. It makes no difference, however, in the cash, because, in folio 212, the amount is deducted from the estimate, showing correctly the amount of cash paid. The account with Price was subsequently settled, by his receiving a note for balance, deducting both charges, which note has been paid; consequently, the amount, £9 4s. 6d. is still in the hands of the Company, and not the Secretary, or book-keeper.

Folio 214, Mr. Mackenzie notices that £46 0 7d. is not posted to W. H. Merritt's credit. He is credited with the amount in folio 225, the entry being twice made. In the first, Garrison & Little are debited with it, and posted; but credit is not posted to Mr. Merritt. In the second entry, Garrison & Little are debited, but it is not posted, and is posted to Mr. Merritt's credit, which makes it correct.

Folio 215, Mr. Mackenzie notices that £50 is not posted to the credit of Alexander M Donell. The amount is posted to his credit in petty Leger, folio 55; and the balance of account against him, £74 2s. 6d., after deducting the £50, is transferred to the great Leger, folio 251.

Folio 216, the widow Cohies' account is not posted to the Leger by 1s. enough. That should be now to her credit. It is a more clerical error.

Folio 222, Mr. Mankenzie notices that £5 6s. 6d. is not posted to the debit of Calbreath. The reason is, because he was already debited in petty Leger, folio 40, and deducted from his account. For explanation of entries in petty Leger, see remarks below.

Folio 224, Mr. Mackenzie notices that £3 16s. 6d. is not posted to the debit of John Donaldson. It is debited to him. On folio 209, £1 6s. 6d. is charged as paid Donovan, and in the petty Leger, folio 170, £2 10s. is charged; and the balance, £41 6s. 2d., including the £2 10s., is brought to the debit of Donaldson, Journal, folio 214.

Folio 224, Mr. Mackenzie thinks that the sum of £4 6s. 10d. and £4 1s. 10d. to credit of Slate, is the same. It is not the same charge, for the one is on account of Fisk, and the other is on account of Lewis, and is charged to Garrison & Little, in account. The sum of £4 6s. 10d. has never been posted to Mr. Slate's credit, and the Company owe him that amount now. The error is Mr. Beaton's.

Folio 225, 226, charges of £3 10s. to M'Chesney, £15 5s. not credited Toll, and £1 5s. Johnson Orr. For explanation, as all these are blended with the Toll account, vide the account hereto appended.

Folio 228, Mr. Mackenzie notices that £3 13s. 3d. is not posted to Mr. Keefer's credit. The money was paid him, and therefore it only stands to the debit of contingencies. £3 15s. to Mr. Butler, the same, and is part of the Toll account.

Folio 228, Mr. Mackenzic thinks £12 10s. for rent, is twice charged. He is right; it is twice charged contingencies, but is only credited once to any body, and that Mr. Merritt.

£86 7 6

Folio 229, Mr. Mackenzie notices that £49 12s. 9d. is not posted to credit of A. Macdonell. It is posted to his credit previous, in folio 222. The sum, however, stands twice debited to contingencies, but only once to credit of any body.

Folio 238. On this folio is the charge which Mr. Mackenzie seems to think cannot be cleared up, in any way. Previous to the examination of this charge, Mr. Thorburn requested Mr. Burns to notify him at what time we should be ready to investigate it, that he might be present, as he said he could more distinctly make us understand what Mr. Mackenzie's views were. Mr. Burns did notify Mr. Thorburn, ulso Mr. Black, who both attended the whole investigation, and the result of this examination is as follows:—

The Bank of Upper Canada agreed to loan the Canal Company £1,500, to pay the Grand River claims; the balance, deducting discounts, £1,370 2 3, was obtained. The first amount, £572 10, a draft given to George Keefer, was paid; the Bank, deducting £180 for interest on a £3,000 loan before that time; and £51 10 7, the balance of account against the Company—so that only £340 10 5 was the amount received by Mr. Keefer. Mr. Mackenzie says the entry in the Journal is false to Mr. Keefer's credit, £231 19 7, because those two sums were paid by the United States Bank, as appears from the entry, folio 184, of Journal, in which the Bank of Upper Canada is made debtor to the United States Bank for this £231 19 7, for those two items. The entry is so, unquestionably; but as the Bank of Upper Canada paid themselves out of the draft to Keefer, Mr. Black had on hand £231 19 7. The question is, does Mr. Black debit himself with it? He does, and for the purpose of making the transaction quite clear, we copy the entries from the cash book kept by Mr. Black. It is necessary that we should remark, that at this time no cash account was kept in the Journal and Leger. The persons who received any amount, were at once made debtor to one of the Banks. Had a cash account been kept, those entries could never have happened. Therefore, when-ever money is drawn, which is not appropriated according to the entry on the Journal, reference must be had to this cash book. We are informed Mr. Mackenzie would not look at this book; but Mr. Thorburn at once requested an examination of it.-For copy, see appendix No. 1. The persons who are charged with the amounts in the cash book, are all debited in the petty Leger, as appears upon reference to the folios opposite the sums respectively.

The next amount which Mr. Mackenzie says is not accounted for, is £347 12s 3d, charged George Keefer; and he says the entry of that much to his credit in this folio, is merely to cloak a defalcation, because the amount was never paid to the persons mentioned. This is true, it never was paid those persons, and the money was on hand. The question is, does any one debit himself with it? Mr. Black does—and in order to shew that he does, we have copied the different entries from the cash book. See appendix No. 2. The whole of the sum is accounted for which is charged George Keefer, and therefore it is right that Mr. Keefer should have credit for it.

Mr. Mackenzie also says, that Johnston Orr is charged with £25 he never had. This is incorrect: he had two sums of £25 each, one paid by Mr. Black, and the other through Mr. Merritt, from the money charged George Keefer, and therefore correctly charged. On the Journal, where the entry was made reversing the £2,300 before spoken of, Mr. Keefer had credit for the whole £600 in one sum, but in the petty Leger and cash book, it is divided thus:

1st credit,	£513 12 6 86 7 6
	£600 0 0

The £86 7 6 is thus paid. Mr. Merritt paid it, though charged to Keefer:

Nehemiah Robb, petty leger, folio 48 Daily,69	£16 20	7	6
Johnston Orr.	25	n	n
Mr. Merritt, on account of Ratcliffe, 33	25	0	0

Johnston Orr, had this amount, and other £25 before charged.

Folio 238, Fitz Gerald's account is £3 75, and posted £3 9 2.

Folio 238, James Cain's account, £3 0 9, posted £3 0 11.

Folio 238, Michael Cain's account, £6 2 3, posted £6 2 5.

Folio 239, £7 8 6 credited Rose is right, because it was deducted from his estimate. The estimate was £89 15 7, and posted £82 6 1; folio 275, Leger.

Folio 239, £5 to Nehemiah Robb, the same as the last.

Folio 239, £25 to J. Clark, requires but a single entry, because it was before credited him, folio 226, as cash, being handed to him by Mr. Black, Sanderson was charged with it.

Folio 239, £24 1s has been paid twice to John Toyne & Co. in consequence of Mr. Slate not posting the amount.

Folio 242, F. Ramsey's account, £5 1s. posted £5 1s 6d.

Folio 250, A. Macdonell is debited £1,500, and credited £968 B3s 4d. The latter sum is not posted at all. By order of the Board, this amount was remitted out of the Toll; therefore should be charged to interest account; otherwise it shows too much balance, though it makes no difference in the balance sheet.

Folio 257, 258, there is a variety of entries made by John Callaghan, connected with the Toll of 1833, received after November in that year, and which did not form any part of return to the Legislature of that year. Respecting these entries, it will be necessary to examine them more particularly, and to make a supplementary Report. Folio 289, £31 5s interest, which Mr. Mackenzie thinks is a part of some private transaction of Mr. Merritt's is not. The sum is, however, not correctly charged to interest, because it was charged before, in folio 288, £34 0 5d. The error is owing to the account from the Bank specifying the wrong bill: the dates being wrong in Mr. Ridout's letter, caused the book-keeper to suppose it was a different bill, and therefore gave rise to the two entries.

Folio 257, £50 charged to Mr. Thomas Merritt, is not posted. This is an error of Mr. Callaghan. The money was paid him, and the erasure made of it is wrong. It could be no benefit to any one, of course, except Mr. Thomas Merritt. For a proper explanation of it, we have sent for Mr. Callaghan, and have attached an Affidavit of his, to this Report.

Folio 384 of the Leger, Wm. Braly stands charged with £2 5s. He should be credited with the same amount from the estimate, which has never been done.

This examination of the books brings us to the close of 1834, where we end it. There appears NO DEFALCATION WHATEVER. The errors mentioned, we should recommend to be corrected, and the proper amounts charged.

We next compared the estimates and the extension of the accounts; and in order that they be clearly understood we have made a debit and credit of the whole, as appears from No. 3. Appendix.

We would also remark upon the manner of the keeping of the books and accounts, respecting the petty Leger. The Journal and great Leger appear to have been kept by crediting the full amount of the different estimates to the different persons, and then making these different persons debtor for the full amount, to some of the Banks. The money, in very few instances, has been paid to the full amount of the estimate, in one sum, but in small amounts; and there-

fore, the former Secretary, Mr. Black, introduced the system of keeping these accounts in a petty leger showing all the different payments—this system is certainly a very good one, in order to save writing in the Journal and great Leger; and when the accounts are correctly kept, both the great and petty Legers will show the same balances—though in one, the amount is in aggregate, and in the other, in detail. Upon comparing them we have found no essential variation. Mr. Black, also, kept a cash book, which, in consequence of the paying the different estimates in small sums, was absolutely necessary; and it became doubly necessary for him to do so, in consequence of no cash account having been kept in the Journal. We observe, that since Jan'y 1834, a cash account is kept in the Journal, which is certainly far the preferable method, and such errors as we observed in 1832, 1833, cannot now happen.

It should be borne in mind, that very few corporations are subject to keep such a variety of accounts. For the want of sufficient means, they have been obliged, at different times, to issue notes—then re-paying them at a future period; and of transferring and making a great variety of entries to the debit of the contractors, and credit of workmen, in order to satisfy the workmen, and discharge the contractors from so many of their debts, that it rendered their accounts varied and complicated; nevertheless, the result is, to leave the officers of the Company free from all imputation.

We have also compared the returns made to the Legislature for 1831, 1832, 1833, 1834, and find them to agree with the books, with the exception of 1834, in which there is a trifling error to correct.

J. T. BOWERY, ROBERT E. BURNS.

St. Catharines, January 4th, 1836.

## MR. CALLAGHAN'S AFFIDAVIT.

Having been called on by Messrs-Bowery & Burns, the persons employed to examine the Books and Accounts of the Welland Canal Company, and to point out how an error, by erasing from the Dr. side of Thomas Merritt, contractor's account with the said Company, for the sum of £50, bearing date Dec. 1833, and duly posted to the Cash Journal from the Toll Leger, had been effected, the entries at that time being made by me—I now affirm, having no hesitation whatever, that the erasure in question was effected by me, from the following circumstances, viz.:—

Some time after posting the above entry—it may be the spring following—I cannot say at what particular day or date, after I observed two entries, as appears on Toll Leger, page 69, bearing the same date to the debit of Thomas Merritt, contractor, which appeared not correct; I consequently inquired of the Secretary, Mr. Clark, if he had any recollection of paying T. Merritt, on or about 16th Nov. two sums of £50 each: to the best of my knowledge, Mr. Clark informed me he had not; on referring to the Leger account, I there found £131 4s. 10d. charged as payments made from Tolls to T. Merritt, in which amount I considered the £50 in question had been included, and consequently considered the entry of £50, after closing the account, and now erased, to be an overcharge, and under such impression, I made the erasure in question—erroneously, without the interference of any person whatever.

(Signed) JOHN CALLAGHAN.

Sworn before me at St. Catharines this 6th day of Jan. 1836.

GEO. RYKERT.

A Commissioner for taking Affidavits in the K.B.N.D. Compared by F. Hall, 12th January, 1836.

337. Charge No. 30 relates to important original documents, such as accounts, estimates, and receipts, said to be missing—What have you to state concerning them?—I am very sorry to have to state that the detailed estimates, and other important accounts are in many cases not carefully kept for reference. The original estimate, (a document, answering to the parliamentary supply bill.) for December 1831, is missing, the amount being £2542 13s. 7d. I wrote Mr. Turquand that the minutes mentioned its having been sent to Mr. President Dunn, to which he replied as follows:

Toronto, 1st September, 1835.

Drip Sip.

Mr. Dunn desires me to say, that all papers submitted to him as late President of the Welland Canal, were transmitted to the Company's office at St. Catharines, where he has no doubt the Estimate in question will be found.

I remain &c.
B. TURQUAND.

W. L. MACKENZIE, Esq. &c. &c. Toronto.

The grand estimate of Nov. 1832, amounting to £28,000 and upwards had been missing for years,

when I began to analyze it I found many errors, additions, and crossings out; in fact their clerk, Beaton, admitted to me, after I had shewn it to him, that after my first examination he had added an item to it, but from what source, in the absence of the true document, showing the official signatures of the officers, he did not tell me. In the few leaves that remained of the original, I found errors of \$100, in a page, through Mr. Keefer the engineer's So utterly neglectcarelessness and neglect. ful was the Board of their most ordinary rules, that on a reference to the minutes, of Feb. 1833, the time at which the estimate of Nov. 1832, for £28,-000 was adopted, I found that they had not even entered the amount of the money grant or credit vote, although it was perhaps, the largest estimate ever voted, and there had been no monthly estimates for several months previous. So carcless are the officers that the following is a

all but a few leaves at the end containing the expen-

diture in detail of about £3000 of it. A pretend-

ed copy has been entered in an estimate book, but

So careless are the officers that the following is a literal copy of an entry in the minutes, afterwards approved by the Board:—

From the Minutes of 1332, page 169.

"Resolved 2nd. The best proposals for tending the locks for the ensuing year were from

[Here was left, and there still remains, a large blank space.]

"Resolved that agreement be entered into with them accordingly."

Next meeting, 1st March, 1832, I ascertained that "the minutes were read and confirmed."

I asked the clerk, what an entry like this (which was if I remember right, in Mr. Clark's handwring,) meant, and what was to be learnt by the record of their confirming a series of appointments in blank, but he could not inform me.

When I was desirous to refer to deeds, leases, and other important papers of the Company, I found them often missing—others lay loose in an open press in the most exposed condition possible. To introduce a more regular system I moved the Board last August for a standing order.

"Ordered That the Secretary be required to enter all deeds leases, and conveyances of real estate, and of water privileges, in a book to be kept for that purpose, immediately after they shall have been executed, as also those already executed, and all mortgages to or from the Company, or any other incumbrances affecting such water privileges or real estate, and that all such documents be placed in charge of the Secretary."—

The order was made but never acted upon, although a book was immediately purchased for the purpose.

On an examination of the deeds I find that the officers can trace no conveyance as having been made by Mr. Merritt for the mill and property for which he received many years ago £630 and £678 from the funds of the Company. The Secretary Mr. Clark says he has never seen any such deed. Mr. Merritt was not entitled to any remuneration until he had given a deed to the Company, and it ought to be in the Secretary's possession; for that is the standing order.

There is a payment marked in the Company's books of £75 to T. Brackbill for 100 acres for the canal use but I can find no deed nor other papers.

**E2** 

The Secretary thinks he left the vouchers at St. Catharines of some of the payments on land, and states that the remainder of them are in the possession of the arbitrators. I wished to compare these documents last summer with the large sums charged as expenditures on awards but never could get possession of a single voucher, Brackbill's payment was made to the 10th of February 1827, and is entered in page 103 of the Leger.

From 150 to 200 acres of valuable lands in Thorold (at Robinson I believe,) was purchased from John Carl. The Company says he has no deed for any such property, and whether there is any such deed, or whether it is or is not recorded, I have not been informed. I see that £625 and another large payment of money has been made to Carl. This should be enquired into. The additional sum paid Carl is £123, but I find no deed for it.

The Secretary has in his possession the deeds of Jesse Wilson, Rev. Mr. Harris, Parmelia kykert, Frederick Bouke, John & George Shiner, and Conrad Wells, Jacob Dittrick, David Price, Smith Shotwell, Adam Gould, John Clendenon, Sam'l Swayze, George Marlatt, Jacob Jorathan and Michael Silverthorn, Robert Brown, John Brown, Francis Goring Parnell, Elijah Shotwell, Jacob Bowman Jacob Tenbrook, Bartholemew Tench, Oliver Phelps (Moulton.) Alem Marr, John & Philip Shaver, Garret Vanderburgh, Major Gen. Darling, and William Crooks, not one of which appear to be recorded in the Register Office of the District, although it is important that they should be so, as many of the transactions are of old date, and the parties dead in some cases and absent in others.

There are a few deeds recorded, and only a few.

£615 have been paid to George Adams Esq. so far back as 1827 for 30 acres part of lot between the 4th and 5th Concessions of Grantham. Surely Mr. Adams was not entitled to this money until he gave a deed to the Company. But it was paid him on the 9th of May 1827. As soon as the papers can be had I shall examine them.

And there is a payment of £50 to Luke Carl for 10½ acres in Thorold. Mr. Keefer the Engineer supposed that there is a deed, but the Secretary knows of none although if there is one it ought to be with him and forthcoming.

There has been a purchase made of a small lot of a fourth or a sixth of an acre in St. Catharines, for a canal office. £150 have been paid, but no deed is obtained, nor does there appear to be any good title. Several hundreds of pounds have been expended on a building in which is Mr. M'Donell the lawyer's office, Mr. Merritt's PostOffice, and the Canal Office. I think the purchase money went to one of the Directors, but if it was necessary to build a splendid office for a bankrupt Corporation in 1835, the title of the ground ought first to have been obtained.

Fifty-seven pounds were paid long since to Andrew Wilson for about 23½ acres in Thorold, used for the Canal and its towing paths &c. But no deed appears to have been taken when the money was paid. There are also other £27 at Wilson's credit on an award. Since then Wilson has conveyed his property to George Keefer Senior, whose son states that there is his claim also to be settled.

A deed was produced by the Company's Officers to the Committee last week during Phelps' examination, which I never saw at St. Catharines, and of the existence of which no trace or record is to be found on the Books of the Company, conveying 50 acres of O. Phelps' land, part of lot 12 minth concession of Grantham, to the Canal Company for the nominal consideration money of £500, not paid nor noted on Journal. It is dated June 8th 1832.

Some proceedings should be had immediately to place the titles of the Company's Lands on a surer footing.

The documents I have asked for which were important and could not be produced by the officers, are very many indeed—accounts, estimates, vouch ers, and acknowledgments for money to a vast amount are a missing and no explanation is given. Mr. Phelps' contract for the £5000 Deep Cut job is gone, and the want of it and of some others have caused great inconvenience. \$100 is charged for the model of the locks built by Phelps, but although not made of perishable materials Mr. Merritt says it is not forthcoming; another hundred dollars were paid Lewis for the model of his turnbridge—it also is missing. The lock model would have been useful to the Engineers in the present investigation.

The imperfect records at the office rendered it impossible for me to ascertain the cost of keeping Phelps' locks in repair and re-building them. The charges are under a variety of heads, such as general repairs, pumping water, rebuilding locks, excavation of lock pits, embankments, &c. &c.—I made a calculation that \$60,000 had been expended in this way, but it is not to be depended on. I included Mr. Robinson's rock outlay in the above sum.

The official estimate of advances on the canal August 1832 is dated "Welland Canal Office 7th August," and amounts to £2239 13 11; it is certified to be correct by Mr. Keefer, Mr. Merritt, Mr. Clark, and approved by the Board and certified—A. McDonell.

It was certified to and approved five days before it was made, for I find that the Board met on the 2nd August *Thursday*, and approved of it!

When you have got a canal document it is often difficult to say whether it is that which it purports to be. The rule respecting efficient security for the fulfilment of contracts having been habitually violated by the agent, with the connivance or consent I presume of the Board, there has been an endless round of taking, resigning, modifying, amending, altering and making of contracts. Nothing is fixed. Experience with the Board, has made no change. Whether the Directors had or had not the command of ample funds this loose and improper course of procedure has obtained. The extract from a letter, and a minute of the Board, annexed hereto, will show that some Directors felt the inconveniences arising from good rules being neglected.

Extract, letter, Joseph Wenham, Esq. to W. H. Merritt, Esq. York, 19th June, 1826:

"Your letter of the 12th inst. has not been received—that of the 15th came sofe to hand on Saturday.

"I submitted its contents to the President, who declines the payment in advance of any money, unless by the sanction and apthority of the Board, and as a meeting of the Directors will be held so soon, I hope no material inconvenience will be sustained.

"I would remark on this occasion that it is necessary for the sake of regularity, that all Estimates for money on account of work performed should be made out by one and the same individual—and I therefore return Mr. Rykert's Estimate wishing to preserve this order—You will at once be convinced of the propriety of this. It would also be well if the Estimates were made out sufficiently early to admit of a careful examination before submitting them to the Board."

## CANAL MINUTE, 10th MAY, 1828.

PRESENT:

Dunn, Wells, Robinson, H. J. Boulton, and Keefer.

"Resolved,—That the Board will not consider itself bound by any contract which the Agent or Secretary may make until it has received the sanction of the Board."

The following entry on the minutes was agreed to at a meeting of the Board of Directors held at York, on the 26th of Nov. 1833, Messrs. Merritt, Chisholm, and Elliott being present.

"Whereas the Books show a balance at the Cr. of Hoag and Co. in 1827 of £25 15s.7d. and at the Cr. of O. Straight in 1828 of 16s., and as it is well known to the President that the sums were paid to the parties—it is

"Ordered,—That the same amounting to £26 11s. 7d. be transferred to the Credit of the Contingent account.

In this instance, the President's recollection and not the cash book is the discharge for £26 of supposed debts. Whence came the money to pay Hoag & Co. if the Books do not shew that they were paid?

338. What proofs have you to offer having reference to the twenty-second item of your letter !- The situation in which the Directors found themselves in the Fall of 1829, and again in the fall of 1832 and the whole of 1833, and in which they now are, can be seen from the canal correspondence and books, and the state of the accounts. When they had money they shamefully jobbed and mismanaged it; when they had not, there was the perpetual plea of "you have gone so far that you surely will not now stop. Give us more of the public money." Although they had but little of their own money in 1833, they never as much as thought of putting their accounts in order, calling on the Secretary and late forwarding agent to square up his accounts and enter all upon the books, but allowed matters to get more and more into confusion Improvident contracts were carelessly made; work was done without much system or regularity; heavy debts were contracted, and the people of Upper Canada paid all. Again there is difficulty, and the cause is apparent—it is want of prudence, economy, and management, for the good of the work. Workmen are again in arrears; Mr. Phelps' wooden locks, are once more in danger of going to pieces; and but for my four numbers of "the Welland Canal" this bankrupt concern would have deluged the colony with bills payable, with interest out of the funds of-"the Welland Canal Company" whose president has petitioned for £2000 to save the Canal from total ruin, and whose officers have given evidence before you that they have neither funds, good debts, money, nor the prospect of it, except from the tolls of next year, a problematical source of revenue, insufficient to pay their next debts and keep the works from breaking down in weak places.

The Bank Directors must have been convinced that the canal management was had, or they would not have so steadily refused to assist a body by whose operations they must have greatly profitted, having been constituted the Treasurer of the Corporation in 1825.

The situation of the Directors of the Welland Canal, in the early part of 1833, was pitiable in the extreme—the Legislature would not trust them one shilling—the Bank of Upper Canada turned its back upon their entroaties for the smallest pittance—the Governor lent a deaf ear to their prayers—no one would credit them.

(OFFICE COPY.)

At a meeting of the Directors held at St. Catharines, 28th February 1833.

#### PRESENT :

Alex. McDonell, Esq. Vice President,
George Keefer,
Thomas Butler,
Wm. Chisholm,
Wm. Elliott, and
Captain Creighton,

Resolved—That the correspondence with the Bank of Upper Canada be recorded on the minutes to shew that every exertion has been made by the Directors to obtain money to meet their engagements and prevent the expenses of litigation which must inevitably follow if money is not provided.

The Board cannot help expressing their surprise that the Directors of the Bank should refuse accommodating the Company with so trifling an amount, after having made so large a sum out of the operations of the Company.

Then they resolved to try to borrow 5001., having failed in getting 25001.

Copy of Letter—Wm. H. Merritt, Esq'r, to Hon. Wm. Allan, dated 28th February, 1833.

WELLAND CANAL OFFICE, St. Catharines, 28th Feb'y, 1833.

DEAR SIR:

The Directors have been over the line of the canal as well as the Commissioners and I believe they all find it so much better than they anticipated, from the many misrepresentations, that matters begin to assume their usual aspect along the work. They have signed a note for 500l. payable in one year, to keep our creditors—that is, those possessing no means in provisions, until they can have time to apply elsewhere. They would have signed one for 1000l., which would have afforded greater relief, but feared it would be rejected. I should be glad you would mention the circumstance, and if you think we could get it we would send another note for that amount, with which we would be enabled to get on until we procure the loan on the property—a resolution is passed to pay this money out of the first toll collected.

I have the honor to be

Your obedient servant.

WM. H. MERRITT.

Hon. William Allan.

## Copy of the Minute of the Board.

"Resolved—That the first toll collected on the canal shall be placed in the Bank to redeem a note of hand given by Messrs. McDouell, Chisholm, Elliott, Keefer, Creighton, and Merritt, for the sum of 500L payable in one year."

The Bank of U. Canada was evicently not inclined to trust the Directors.

This was the form of the note:

ST. CATHARINES, 28th February, 1833:

£500: C'y.

One year after date we or either of us promise to pay to the President and Directors of the Bank of Upper Canada.

the sum of Five Hundred Pounds Currency, value received, with

(Signed) W. H. MERRITT, A. McDONELL, O. CREIGHTON, W. CHISHOLM, W. ELLIOTT, and GEORGE KEEFER.

Mr. Ridout's answer, dated the 7th of March, and addressed to Mr. Merritt, stated that the Bank of Upper Canada were at that time under the accessity of restricting their discounts, and could not therefore discount a £500 note drawn at so long a date, and he therefore returned it to Mr. Merritt.

On the same year the Canal Board endeavored to get the British Government to relinquish the debt due to it by the Welland Canal Company, but met with very indifferent success.

The following is a copy of Secretary Lord Stanley's reply to their application:

No. 42.

DOWNING STREET, 27th November, 1833.

I have the honor to acknowledge the receipt of your despatch No. 64, of the 22nd Sept. last enclosing a memorial from the Stockholders of the Welland Canal, praying that His Majesty will conduce to the improvement of the navigation of the canal, by reliquishing the debt due to Government by the Company of the granting a ten against a distribution of the company of the granting a ten against a distribution of the company of the granting a ten against a distribution of the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to the canal to t my, or by granting a sum equal to one-ninth of the actual expen-diture incurred in forming the canal, in conformity with the proposal of His Majesty's Government in the year 1826.

In reply I have to request that you will acquaint the memorialists that I do not feel myself at liberty to recommend a compliance with their application.

I have the honor to be. &c.

E. G. STANLEY.

Major General SIR JOHN COLBORNE, K.C.B. &c. Sic. Sic.

Copy of Letter-Thomas G. Ridout, Esq. to W. H. Merritt, Esquire, of 12th December, 1834.

> BANK OF UPPER CANADA, Toronto, 12th Dec'r, 1834.

WM. HAMILTON MERRITT, Esq. St. Catharines,

SIR:

Finding that your last check for 1000l. of the Welland Canal money was negotiated through the Agricultural Bank, which enables them to substitute their own notes, and to call upon us for specie—I am desired to request you will inform me or Mr. M'Cormick at Niagara when you intend to draw out the remainder of the Welland Canal funds lodged in this Bank—and if it is your intention to negotiate it when so drawn in the same way; as it is necessary for this Bank to be prepared to meet such un-expected demands. Perhaps, however, when you gave the above check you were not aware that it would be immediately converted into specie-although it had no doubt the effect of preventing the circulation of our notes.

I remain, Sir,

Your obedient servant, THO'S G. RIDOUT, Cashier.

Copy of Letter-John Clark, Esquire, to Wm. H. Merritt, Esquire, dated 20th December, 1834.

> WELLAND CANAL OFFICE. St. Catharines, 20th Dec. 1834.

Sir:

In reference to Mr. Ridout's letter to you on the subject of the last cheque drawn on the Bank of Upper Canada for 10001. I beg leave to explain that (without the slightest understanding that this cheque was to be negotiated through the Agricultural Bank) I took the opportunity of handing the cheque to Mr. Taylor, whose son was going to Niagara—requesting him to draw

the money for me from Mr. M'Cormick and bring it up. first instance the cheque was not paid on account of my having omitted to countersign the same, which caused delay, and to meet the immediate demands I begrowed 100% from Mr. Taylor, and in my absence from the office Mr. Taylor, without my sanction or consent, paid over to the young man in charge, 400L, making in all 500L of Agricultural Bank money, which Mr. Taylor retained out of the cheque, and paid me 500L in Bank of Upper Canada money for the balance. I have ever been particular not to exchange the Bank of Upper Canada money for that of any other monied institution.

When the Company may require the money now due them by the Bank of Upper Canada Bank I cannot exactly say—but sup-pose 10001, per month may be required after the 1st of January next, to carry on the work contracted for.

I have the honor to be, Sir,

Your obedient servant,

JOHN CLARK.

Secretary W. C. Co.

To WM. H. MERRITT, Esquire, President Welland Canal Company.

The case of Lewis Garrison & Co. is an apt illustration of the impropriety of the course taken by the Canal Board. They were paid 5051. 11s 5d in full of all demands when one of the partners, or two of them, were in jail. The bills of costs against them by lawyers almost exceed belief, and after they had signed the receipt I annex to these remarks the Board had to reconsider their case and award them 300% and another large sum, the amount of which I do not now remember. Their letters com-plain much of the engineers, but whether they had cause I know

"Received from the Welland Canal Company the sum of Five Hundred and Ninety-five Pounds Eleven Shillings and Five Pence Currency, being in full of all demands of whaterver nature or description we have against the suid Company.

MARSHALL LEWIS, J. W. GARRISON, JAMES LITTLE.

Witness,

ALEXANDER STEWART. St. Catharines, 11th May, 1833.

I think that with prudent management of money and work the Welland Canal would have been good and profitable stock. it was managed there was a necessity to resort to many shifts.— Hence it is I account for the allowance of 1 1-2 per cent to Mr. Walker of Quebec for collecting the stock instalments, and 1 per cent to Yates & Co. for the same service; hence also for the 1 per cent by Mr. Yates (for which 500l. by the way there is no voucher) for getting a bill discounted endorsed by Upper Canada; and for Mr. Walker's 1-2 per cent for remitting the Lower Canada Government Stock of 25,000l., a service which cost him no trouble wherever. trouble whatever.

339. What have you to offer to this committee in support of of charge No. 26?—It is, "that in the case of the Steam Dredge, "and others very similar to it, extravagant charges have been "made against the Company and paid from its funds under suspi"cious circumstances;" and some of the evidences in support of
it will appear more appropriately under other heads, as involving
false entries, extravagance, &c.

Reminding the committee of the fact admitted by Mr. Yates in his letter to the Speaker, that he has long enjoyed the nomina-tion of a majority of the Canal Board, and consequently influenced its deliberations, and the appointments and proceedings of its officers. I would beg to state that in page 271 of the Cash Journal I found that money had been drawn from the Bank of Upper Canada (a fictitious entry, as are most of them) to pay "Elam Lynds & Co's bill of costs" of a steam dredging machine 7182. 10s.

On referring to the vouchers, copy of which I amex, I ascertained that 7187. 10s. had been paid to Mr. Yates at St. Catharines on the 9th of June 1834; that an error of \$10 in the addition had been discovered, and admitted in the account as over-paid "Fith June 1834;" that the \$10 had not been afterwards charged to Mr. Yates; that on comparing the charge with the next page of the minutes about \$80 dollars of the same account was charged as if it had been paid to Mr. Yates over again, which it was not; that Mr. Yates was in St. Catharines when he got the money; that there was nothing to show that he had advanced the money in the United States; and that although the specie could have been obtained within twenty-four hours at that season by sending a check to Toronto, and immediately changed at Buffalo for "States notes" at an expense to the Company of about ten dollars, Mr. Yates charged and received \$110, or 4 per cent as discount on Upper Canada Bank Notes.

Mr. Yates wrote and published a large edition of a pamphlet in 1834 at Chittenengo, New York, relative to the grievances of the Welland Canal, and putting that work—these he brought to St. Catharines for distribution, and was paid about 20*l.* for them out of the Company's funds, which sum is charged as "by order of the Board."

Next page the same 201 is charged once more as if it had been paid him over again!

A few pages on in the Cash Journal it is charged as if it had been paid a third time!

Mr. Yntes was only once paid, and was then overpaid. I find they have corrected the third 20% as an error. I usked Mr. Clark, who had received the second 20%, seeing it was charged as having been drawn out of the Bank?—He replied that that was a mistake!

This 201. (I omit fractions) is also charged twice in the bulance sheet of 1834, laid before the Legislature, and also other \$10 on the dredge itself, which the Board had taken off, as may be seen by their minutes.

The most important part of the history of Mr. Yates' Steam Dredge is to come. He professed to have purchased it from some persons in the States near his own place; who were to warrant its officiency, and so forth. The Dredge was soon set up; but although the duties were forgiven by the Governor, it had cost when ready to go into operation, 834!. 2s 6d, as per annexed account. When set in motion it was found to be entirely powerless and useless; Mr. Yates had his money; and the Company, in order to get theirs back again advertised the Dredge and apparatus for sale by auction, when I was at St. Catharines. No bidder appeared, but afterwards a person spoke of giving 75!. if he got a long credit. In short the whole affair is a dead loss, and a fair specimen of Mr. Yates' management by his nominees. Mr. Levs has already informed you that the machine is of no use for a Dredge because it has scarcely any power; and the Sir Walter Scott, which Mr. Hamiton Merritt, for himself and the other proprietors, wished to turn into two thousand dollars of the funds of the canal, last full, was also unfit for the purpose. The Sir Walter was an entire failure as a boat, and the apparatus of the other Dredge and the engine of the Sir Walter were unsuitable. As to the puffing pamphlets, I find 29!. 6s. charged by Leavenworth for a second edition of them, so that they must have cost in all nearly \$200 to the Company, and Mr. Thomas Dalton had a charge for pamphlets, which were possibly the third edition.—The latter gentleman writes very feelingly on his claims, as may be seen by the following letter, but the exact nature of his demand on Mr. Yates is not so well defined as it might be. I add to it his (Mr. Dalton's) explanations, and that of Mr. Merritt, taken from the Patriot, published by the former.

The cases of the Schooner Peacock, the Steamer Caroline, the boat Chief Justice, Merritt's vouchers for mill expenditure, Keefer's timber, Merritt's Berm Bank, with Rose, the 34 locks, and many more that might be quoted, are of the same class, and the public are the losers: I even question whether it is legal for a Canadian Company to hold shares in an American Steamer.

I submit Messrs. Bush & Shepard's account:

"Mr. Clark will pay Mr. Bush, ...... \$1500 Less 150 to pay Capt. of Caroline, ... 155

> \$1345 ——£336 5 0

Taking his receipt for the \$1500 in full for one-half of the Steamer Caroline as per agreement.

W. H. MERRITT.

St. Catharines, 21st June, 1834.

"Received of the Secretary Welland Canal Company the sum of 375L or Fifteen Hundred Dollars on account of William Ha-

milton Merritt, Esquire, being in full for one-half of the Steam-boat Caroline as per agreement.

ROBERT W. BUSH, For BUSH & SHEPARD."

St. Catharines, 23rd June, 1834.

(Copy of account in Mr. Yates' hand writing.)

## NOTICE.

# STEAM ENGINE, DREDGING MACHINE, AND SCOW,

FOR SALE at Public Aucrion on Monday the 31st August, instant, at St. Catharines, at the Welland Canal Office. The Engine is now at Indiana, Grand River, and will be here on or before the day of sale—all well. Now at St. Catharines.

Those desiring to possess property of this description will have an opportunity to inspect the same.—Reference given to Mr. JOHN JACKSON, Engineer, Grand River, and Mr. MURRAY, Indians, who is in charge of the same. It is a rotary motion engine, sold to the Company for a Twelve Horse Power Engine; has cost near seven hundred and fifty pounds, and those competent to judge say it can be most advantageously employed on any light kind of machinery.

By order of the Board.

JOHN CLARK,

Secretary.

Welland Canal Office, St. Catherines, 7th August, 1835. F F2 Sale postponed until Saturday, 5th day of Sept. THE DREDGING MACHINE ACCOUNT.

340. What have you to adduce in support of charge No. 23 ?-Toronto, April 20, 1835. DEAR SIR.

"What thou doest do quickly," is an old, and when observed, an invaluable saying. It often happening that the value of a favor is to be estimated more by the promptitude with which it is bestowed than by its intrinsic amount, as it has been well remarked that "a stitch in time saves nine," and "hope deferred maketh the heart sick." These wise saws will remind you that I am living in expectation of getting some payment from the Canal Company agreeably to your kind promise, and to the wishes of your estimable friend Mr. Yates. Well you know the struggles the constitutional press of Toronto has to encounter, and there is one constitutional press of a foroito has to encounter, and there is no present prospect of any mitigation of them. While the Radicals domineer in the House of Assembly, the Tory Press will have but a very sory time of it, since the Government here is too supine and nerveless to do any thing in its aid. You will have seen in our last number [34] a broad hint on this subject. My circumstances being greatly straitened, and demands upon measurement and importants let me entrent of you to take measurements. urgent and imperious, let me entreat of you to take my case into immediate consideration and hand me over the proceeds of your generous determination that I may feed the wolves that beset my habitation.

Norton has been here since the prorogation, and subscribed for the Patriot, and what think you of that? And moreover, he confesses that the vote to Mackenzie and O'Grady was a VILE AND SCANDALOUS JOB.

Have you neither advertising nor printing on foot in which the Patriot might be a partaker? Let me hear from you soon.

Believe me. Dear Sir, Yours truly, THOMAS DALTON.

WM. H. MERRITT, Esquire, St. Catharines

P. S.-I am told there is not a single tavern at St. Catharines or on the whole line of the canal that takes a Toronto paper. Is

it not possible for you to influence me some good subscribers? E am sure the *Patriot* is well canculated to open the eyes of the blind. It is working with power where it is read. We will soon have the majority stinking in the land.

### [From the Patriot Newspaper, by Mr. Thomas Dalton.]

Now let us see how Mackenzie got hold of our letter. As in rivate we say what we may not wish to have published, we felt indignant that our letter had appeared in print, not against Mackenzie, knowing that to him such matters are common and familur; (he once gave to the Colonial Office a latter, of ours 8 years old) but against Mr. Merritt. We in no pleasant mood wrote him. letter, and the following is his reply.

St. Catharines, 19th December, 1836.

DEAR SIR.

In reply to yours of the 17th instant, I have only to say that I deserve every censure for not guarding more strictly against a man of the known character of Mackenzie—the truth is, I have a private box in my desk, in the canal office, where all letters which in any way relate to the canal are filed.—As it contained no papers relating to the company, I never suspected he had pilfered my private papers, the key was always left in one of the draws; and he has availed himself of the opportunity to commit this moral robbery. The only thing I regret in this expose' is the private correspondence, for which I feel that I am wholly to blame for, not being more guarded and keeping the key in my nocket. In reply to yours of the 17th instant, I have only to say thatpocket.

I am,
Dear Sir,
Very truly yours,
WM. H. MERRITT.

Mr. THOMAS DALTON.

## FROM THE SAME.]

We now explain the cause of our letter to Mr. Merritt. Session before last we had the pleasure to be introduced to Mr. Yates, the large proprietor of stock in the Welland Canal. Although he had never seen us before he had been a reader of the Patriot, and was pleased to compliment us upon the course we had undeviatingly pursued with respect to the Welland Canal.—
On a subsequent day, Mr. Yates, in the presence of Mr. Merritt, entered into the subject of the parronage afforded to newspapers both in this country and the States, and appealed to us for information on the subject as regarded this Province; when learning from us the wretched disabilities to which Editors here were subjected, he expressed his astonishment that the respective political practice did not better provide for their organs and champions as was the case in the United States and every other country where the powers of the Press were known and estimated, and turning to Mr. Merritt he said to the effect that our services had been overlooked and ought to be in some measure compensated, with which Mr. M. concurred, and there was an end of the matter which Mr. M. Concurred, and there was an end of the matter for a year; when after being so scurvily treated by the House of Assembly, who after all the floggings and squeezing we have given them, remain, and are no doubt determined to remain, in our debt above a hundred pounds for monies laid out and expended, we began to think Mr. Merritt rather tardy, and therefore did we write our "PETITION!" as Mackenzie cells it, and got in consequence a very small "DOUCEUR," small indeed if from many realists. but I ABCY concept if force parameters, which we have pockets, but LARGE enough if from one pocket, which we be-lieve it was; from the pocket of Mr. Yates. It was under £20, and for services performed, not to be performed, and valued by others, not by ourself.

## THE COMMERCIAL BANK.

There is a charge of £30 11 6 for interest on a note of 2000%. paid the Commercial Bank, and half per cent. on 10th for usury on the same May 7th, 1834, but there is no entry on the books to shew that the 2,000th was ever received by the Company, or that a shilling of it was applied for its use. Mr. Merritt negotiated the loan, but no part of the transaction appears on the Company's books save the interest and the illegal 10t. additional. From the stress hid by Mr Ross, the cashier of the bank here, upon the words "legal interest," the inference seems plain that he contemplates something beyond six per cent. I intend to ask for a summons requesting his attendance before the committee to ex plain..

COMMERCIAL BANK, M. D. OFFICE, Toronto, 21st May. 1834.

Your favor of the 19th instant, duly came to hand—in reply, it would be quite irregular for this institution to loan monies at legal interest—without some document to shew—either by account or note at _____ days date—and which would be submitted to the Board for their decision.

> I remain, Your obedient servant, JOHN ROSS, Cashier.

WM. H. MERRITT, Esq. St. Catharines.

Mr. Boulton's mission to New York, so far as I have been able to understand it, was a journey as far as the canal was concerned which related to that which could have been just as well transactwhich related to that which could have been just as well statistical by letter—he charged 100l. for it. The payment to Mr. Yates of 500l. sterling or 555l. currency for a trip from New York to London was another useless item of charge, but not so bad as Mr. Yates charge of 500l. for his trip to Philadelphia to get the note discounted. I was always of opinion that only 100th had been paid to Mr. Berczy for his two trips to Quebec, as the first time he went he had business of his own to Lower Canada, but I find he had \$90 for that journey and \$400 for the next from the canal funds, although he did no service whatever to the Com-

It appears from the following letters that 3 and 4 per cent. premium were charged at Foronto in March, April, and May 1834, for drafts on New York, and Captain Creighton charges the company 61°. 5s. for a draft on New York to pay 1500% in Buffalo. It appears that the Captain had paid 60%, or 4 per cent. premium; but there was surely no need of that, as he could have obtained half dellars and delivered them at Buffalo at an expense of less than 10 or 15 dellars. Why he charges 25s. more than he paid [ have not ascertained as his travelling exmore than he paid I have not ascertained, as his travelling expenses are paid from time to time, but it is probable he can

> BANK OF UPPER CANADA. Toronto, 7th March, 1836.

In reply to your letter of this morning I beg to inform you that on the 24th March, 1834, Captain Creighton purchased from this Bank in his own name Draft No. 1327 at 3 days on Messrs. Prime, Ward, and King, New York, for 1500L currency, at 4 per cent. premium, making the price of the bill 1560L.

I am, Sir,
Your obedient servant,
THOS. G. RIDOUT,
Cash Cashier.

FRANCIS HINCKS, Esq. House of Assembly.

Agricultural Bank, Toronto, 7th March, 1936.

In reply to your letter of this date we have the honor to sequaint you that our Bank was not opened at the period respecting which you require information.

Our first bill on New York was dated the 11th July, 1834, and was negotiated at 3 per cent. premium, but a reduction took place almost immediately afterwards.

We have the honor to be, Sir, Your Obedient Servants, TRUSCOTT, GREEN & Co.

W. L. MACKENZIE, Esq. M. P. P. House of Assembly.

341. The twelfth observation you have made in your letter to this committee is "that William Hamilton Merritt, Esquire, "who succeeded Mr. Black as Secretary to the Company, and "Mr. Clark who succeeded him, appear to have made no entries

" on the Legers or Journal, although that was an important part of their prescribed duties, and that they have declared to me " that they have not even examined the entries made by louis-"keepers, occusional servants, and others, some of them mani-feetly incompetent; and Mr. Beaton, the principal occasional "featly incompotent; and Mr. Beaton, the principal occasional person employed, habitually intemperate, and as I think, evidency dishonest, judging by the entries he has made." Have you any thing to state in proof of this charge?—The Secretary is the regular book-keeper or accountant of the Company, and the keeper of its records, books, and papers, and he is under the exclusive control of the President for the time being. In the most active times of the canal excavation Mr. Wenham first, and after him Mr. Black, as Secretaries, kept the books of account and did the writing work, and after all, the President Mr. count and did the writing work, and after all, the President, Mr. Dunn, complained in 1831 that Mr. Black's office was a sinecure,

Mr. Black left in June 1832, and Mr. Merritt succeeded him and was the Secretary and in possession of the books and ac-counts as the responsible officer until the month of November of that year, a few days before an account was to be given in to the Legislature upon oath by the Secretary respecting the expendi-ture of £50,000 of the public money; when he made way for Mr. Clark who went forward and took the oath, testifying to the Mr. Clark who went forward and took the oath, testifying to the truth of accounts which were not true. I think the extent of Mr. Clark's offence in this respect was the swearing that that was true which he had not examined and could not investigate. I feel disposed to admit that it is probable Mr. Clark deserves censure more for withholding his accounts, employing an intemperate person, and discharging Ms. Raincock who was a sober man.—But it appears to me that he was under Mr. Merritt's influence, and abit and a superstant Mr. Hall's address and obliged to do as he said, for it appears by Mr. Hall's evidence that Mr. Morritt interfered when Mr. Clark would have stopt that Mr. Merritt interfered when Mr. Clark would have stopt.
Mr. Beaton from doing business in the office, and that Mr. Clark
had to submit to a different course. Mr. Clark is also blameable
for accepting an office the duties of which he could not fulfill, as
not being an accountant. The engaging of Hiram Slate and
John Callaghan to blunder in the Company's principal books,
while he himself was incapable of remedying their errors or
omissions was very wrong; but I am unwilling to believe that he
intended what has taken place. Mr. Merritt is a very shrewd man, and during his Secretaryship there does not appear to have been many (if any) entries made in the principal books, which Putrick Grant Beaton afterwards brought forward after a fashion so incorrect, deceptive, and calculated to mislead the public and the company, that I would be concealing the truth if I did not state my full belief that he knowingly and wilfully was a party to a system which has resulted in a defalcation of large amount, but the full extent of which is not yet accertained. Were Beaton but the full extent of which is not yet ascertained. Were Beaton ignorant of book keeping like Mr. Clark, I should be willing to agnorant of nook keeping like Mr. Clark, I should be whining to ascribe what I have seen of his conduct to his not knowing better; but I have seldom met with a person better acquainted with book keeping, or who could, had he been so inclined or so ordered by Mr. Merritt, have corrected the errors he perpetuated. In 1834, when it was apparent a change would take place in the Legisland and the control of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legisland of the legi ture, and real inquiry in all probability follow through the House of Assembly, the books of the canal begin to assume a rather more regular appearance, and the only excuse offered for their previous errors, obscurity, or incomprehensibility, is that the Company were scarce of money. That did not hinder them to keep a clear account had they been so inclined. It was only towards the lutter weeks of my stay at St. Catharines that I gave much attention to the accounts, and the more I saw of Mr. Beaton's ability as an accountant, and of his desire to blind me Beaton's ability as an accountant, and of his desire to blind me to the true state of the monied affairs of the canal, the more did I doubt him. In St. Catharines he was by no means ill liked.—His habits are, to be steady for a few weeks, then to break out in fit of intemperance for a week or so; get steady again, go to in nt of intemperance for a week or so; get steady again, go to work, work hard, and then go back to the other extreme again. That Mr. Merritt should have preferred him to the many steady and regular applicants for office is to be accounted for only in one way, namely, by reading Nos. 1, 2, 3, 4, 5, and 6, of my answers. But if an accountant had been employed as the Secretary, no such afficer as Mr. Beaton would have been required. An inspection of the cash journal and legers will satisfy you that neither Mr. Merritt nor Mr. Clark ever wrote a word in them. When at St. Catharines, Mr. Beaton assured me he had examined the books with great care, balanced them; and supplied the defective entries, and that they proved correct from the very beginning. When he said this I am satisfied he must have known ginning. When he said this I am satisfied he must have known it was not so, and when he made the entry of the Grand River £579, it is evident from his other entries that he know what he was doing. Almost all the errors of the different accountains are on one side and against the Company's interest. Not so accidental blunders.

342. Your sixteenth charge is "That valuable mill'sites have "been given away without recompense, after stockholders had been induced to subscribe by means of reports by the Boards "that great wealth would be derived from the leasing of these "mill sites." In what cases has this been done?—I allude first to the fact that Mr. George Keefer, the first President of the canal, has enjoyed for a number of years the use of a valuable mill site, sailable for four run of stones, rent free, while other persons have been made to pay the full value for very inferior situations.

The documents and extracts I now produce, namely, a resolution of the Board, 20th September, 1825, to appropriate land for mill sites, extracts from Mr. Merritt's letter to Mr. Wilkins of Boston, a selection from Mr. Keefer's address to the public in 1823, Mr. Clowes' opinion, and an extract from the Directors report of August, 1825, show that every possible means was taken by Mr. Keefer, Mr. Merritt, and other interested persons, to induce people at a distance to embark their capital in the canal, in order that they might make profit by the hydraulies; respecting which very extravagant expectations appear to have been formed; and the appended resolution of the Board of the 3rd October, 1825, present, only Messrs. KEEFER, MERRITT, and ALLAN, shews that one of the first acts of these interested parties was to present to one of themselves a gift of a mill race with water to grind with four run of stones as soon as the mill race could be dug thirty miles in length at the expense of the deceived stockholders and the Canadian public. On this subject I met with Mr. Yates' opinion in writing, which is as follows:

"Mr. Yates is of opinion that in the lease to Mr. Keefer it should embrace this reservation, that the Company may at any time re-take it by paying the amount of his outlay; and thinks it would give umbrage in any other way to the stockholders."

So it might, and with great reason too. No wonder the canal is out of funds.

I ailade secondly, to the improper transaction of the Allanburgh mills, respecting which I have elsewhere spoken.

(Office Copy.)

To the President and Directors
of the Welland Canal Company.

GENTLEMEN,

In case you will give me a mill sent on the Welland Canal at St. Cathurines I will put up a Grist-mill at once, and have it ready for operations as soon as the water is put in the canal.—
The mill shall be capable of grinding all the wheat that may be brought to it, and contain at least four runs of stones and all the machinery for a perfect and complete flouring mill.

Gentlemen,

Your obedient servant,

E. S. BEACH.

DEEP CUT,

Welland Canal, Oct. 3, 1825.

(Office Cort.)

At a meeting held at St. Catharines, 26th October, 1825.

PRESENT.

Hon. Wm. Allan. Vice President.

George Keefer, Esquires.

10th. A proposition having been made to the Directors by E. S. Beach, E.q. of Rochester, and George Keefer, Esq. of Thorold, that they would construct or cause to be constructed a large and extensive flouring mill with at least four runs of stone on the line of the Welland canal capable of making the best superline flour, adjoining St. Catharines, and at the first lock on the mountain, and have the said mills in readiness by the time the water is let into the canal—Be it Resolved, that the said General S. Beach and George Keefer, Esquires, be allowed the privilege of a mill seat for the above purpose, providing they perform the said condition—the above proposition having likewise received the sanction of Simon McGillivray and Henry J. Boulton, Esquires, at a meeting of the Directors on the 20th September last.

Resolution passed at a meeting of the Canal Board held at St. Catharines, 20th Septr. 1825.

#### PRESENT.

H. J. Boulton, Esq., Vice President.
Simon M'Gillivray,
George Keefer,
Wm. H. Merritt,

Esquires.

3. In consideration of the importance of avoiding all occasion of dispute about the property of the land bordering on the line which may be determined on for the course of the canal betwixt the Deep Cut on the bank of the Welland River, and the harbor at the 12 mile creek, on which line will be situated the valuable mill seats which are to be formed by the water admitted through the canal, and in order to prevent any question with the present proprietors of such lands about the right of erecting mills or other buildings on sites which are to derive their value from the operations of the company.—Considering that it is only just that the company should enjoy the benefitarising from their own improvements, and that the powers granted to them by their charter were intended by the Legislature to secure the same. It is therefore Resolved, that 10 chains by 8 in front of the canal mouth, and 4 chains wide by 10 ir length be appropriated at its junction with the Welland River in Thorold, and that 2 chains wide on each side of the canal reservoirs and the harbor, exclusive of towing path, be appropriated from the Holland road to the mouth of the 12 mile creek, together with the beach in front of the embankment at the harbor, which beach having been lately purchased by Mr. Merritt from Mr. Pawling, the proprietor of the adjoining lot on the West side of the 12 mile creek at its entrance into Lake Ontario, has been liberally relinquished to the company by Mr. Merritt at the same price which he had paid for the same.

"Another most important branch (of the profits) is the Hydraulic situations, there is not a mill sent from the Falls of "Ningara round Lake Ontario to Dundas creek on Lake Eris," the only one on this whole Peninsula is the Falls of Ningara, in opening this cut we make innumerable situations for all manufacturing establishments, which will be the more valuable from the impossibility of competition."—Letter, Mr. Merritt to Mr. Wilkins, for the information of the people of Boston, June 10th, 1834.

## [From the same Letter.]

"The first situation on the Mountain must be far more valuable than Rochester, from the extent of internal navigation it must command, besides the Lake; we would be furnished with an ample supply of lumber for which we would find a ready and constant demand at the entrance of the American canal at Tonawanty, as they are destitute of Pine timber, either on the line of the canal, Lake Eric, Ontario, or the Niagara River. Mills can likewise be erected on the bank of Lake Ontario, can receive wheat in vessels from any part of the banks thereof, which is an advantage no other situation does or can possess either on this or the American side of the lake."

In 1823, Mr. Keefer put forth a printed address to the public, telling of the great water privileges the new canal would confer on the intended company; I submit an extract:

"Another source of profit to immediate Stockholders will arise from the judicious use of the superfluous water for the purposes of driving machinery, &c. and which, by proper management, might be made to reimburse them in a very few years for the entire outlay of their capital. This, taken in connexion with the public convenience, in a part of the country where mill streams are both scarce and scant, is far from being one of minor importance. From Long Point, on the shores of Lake Eric, round to Dundas, at the upper end of Lake Ontario, the only mill possessing a sufficient supply of water to carry on business to an extent that may be considered mercantile, is that of Messrs. Clark and Street at the Falls.

"The production of wheat, in a soil and climate so well adapted to its culture, must of course be considered one of our principal staples; but to render this valuable to the farmer it is necessary he should possess the means of converting it into a fit state for use, so that he may not only reap part of the hencit arising from

the manufacture, but reduce the bulk and weight of his exportable commodity, so as to be able to enter the market less unfavorably, with respect to transport charges, than at present.

"As this company will be justly entitled to all the advantages that will result from the command of the water throughout the route of the canal, the mills now erected on that part of the 12 mile creek, (which will be benefited by an additional supply of water) must be purchased at a fair valuation from the present proprietors, and be at the disposal of the company, after the completion of the cut.—Two flouring mills of the best description, and other machinery, should be erected by the company—a flouring mill as near Chippawa as possible, to receive wheat and produce coming downwards from Luke Eric, and another as near Lake Ontario, to receive produce from the banks thereof, and dispose of all the intermediate situations.

"Subjoined is a calculation upon good data, of the probable expense of the undertaking, contrasted with a sketch of the profits which it is presumed would accrue to the company.

"To estimate of first cut from Chippawa to lake Ontario,	10,000	0,	0
ent mills, &c. on the 12 mile creek, which it will be necessary to purchase "Erection of Grist-mills, Saw-mills, &c. with	4000	0	0
other machinery	5625	0	0
"Cut to Grand River	5625 2500	ň	ñ
Halifaz Currency, £	22,125	0	0
4 By rental of machinery to be erected by the company 4 By interest on sale of the intermediate sites	£ 2000	• 0	0
for hydrauhe purposes	300		0
" By rental of mills now crected	500	-	ŏ
DA LGUITTI OF HITTIS HOW CICCICATES SEES SEES SEES	, 000		

"The proceeds from the sale of the intermediate sites for hydraulic purposes; the increased value of the mills now erected, and the rental of the company's two grand establishments on each end of the canal, will of itself bring in a handsome dividend to the stockholders on the amount necessary to complete the whole—leaving out the reasonable expectation of a large sum that must be derived from the transportation of various articles. A boat carrying forty tons, will be taken up at the same expense that two tons can be conveyed with a waggon at the present period."

In answer to a question put to Mr. James Clowes, Engineer, by the canal committee in 1824, he replied that "the most "prominent situation for machinery on the Niagara route is at "George Keefer Esquire's, where they can be erected to any extent, but taking the whole into consideration a decided preference must be given to the 12 mile creek route for hydraulic "purposes."

In the report of the President and Directors of the Welland Canal Company, dated in August 1825, they say—" We connect "an equal extent of country at a comparatively trilling expense, " combine the most valuable and extensive hydraulic privileges." &c.

The report by Dr. Strachan, as it is understood, attempts to blind strangers by the following magnificent prospects:

- "The situation for machinery on the line of this canal both for local and natural advantages, are not equalled in America.
- "There is not a mill seat on the whole Peninsulabetween those lakes, where a flouring mill can be established which may be considered even mercantile, except at the Falls of Niugara.
- "The River Welland being on a level with the Niagara we take the latter for our feeder, which affords a constant, ample, and steady supply of water—we have reservoirs on our summit to any extent required—and the first situation on brow of mountain commands a greater extent of country (by means of our communication with the Grand River) connected by internal navigation on navigable rivers, than Rochester—possesing as fertile a soil and as well adapted for the growing of wheat as any part of the Genesee country.
- "However for the sake of argument suppose we have over-rated our transit and Hydraulic situations eightfold and we only realise the first year £2000 in all—(it will be as well to mention

here we have been offered £1500 per annum for the dydraulic situations alone by a most respectable Company) or one per cent on the whole Capital (we are all confident it will increase in geometrical proposition to the growth of the country, and in the same ratio as the American Canal) at this rate what would the stock be worth in the London or New York Markets.

"The advantages we possess in our Hydraulic situations will be better understood after reading the remarks thereon in our preceding sheets—we will enter into the following detail at present:—

"One	lumbering	mill	require
------	-----------	------	---------

1 Superintendent at \$33 per month	33 162 10 26 26 487
325,000 feet lumber per month averaging 75,000 per week at 25s. per thousand	\$ 644½ 1625
•	980 <u>1</u> 12
	\$11,766
"Say two mills only—although there will be a de- mand for 100,000 feet per day at one half the above estimate	3000 1000 1000
"Add this to account of transit£	5,000 12,256
Gives the sum of£	17.256

Which will give 8½ per cent admitting the whole capital is expended.

"Further we have every reason to believe Government will give us a grant of 13,400 acres in Wainfleet which will be worth at least £25,000 as soon as the marsh is drained."

343. Have you any statement to make relative to charge No. 17?

The mode of Leasing the Water Privileges on the Canal is a very bad one. Some of the most important Mill Scites have been given away to favorites, and they produce nothing at all. Others are taken by Canal Directors at a yearly rent, and then these Directors sit at the Board and vote deductions from their own nominal payments, or, in other words, vote money into their own pockets. Messsrs. Merritt, M'Donell, Butler, and Creighton, the four Directors nominated by Mr. Yates, are interested as mill owners. The following resolution was literally a vote of the Canal funds into the pockets of the mill owners who composed a majority of the Board, and shews the imperfection of the system, Directors thus interested ought not to have the power of lowering the tariff of Canal tolls on the lumber that goes from, or the saw-logs brought to their respective saw-mills the four gentlemen I have named may desire to keep their mills and machinery in constant operation day and night when the interests of the Stockholders and the shipping would be much better served by stopping the mills and raising the water levels. A lockeeper or superintendent who would strictly adhere to the line of his duty in stopping the mills at Allanburgh, St. Catharines, or Merrit's mills, might incur the displeasure of those Directors whose private interests he would be thwarting.-Great damage and injury have been sustained on the canal, and frequent stoppages caused by the neglect and carelessness of persons in charge of mills and machinery, and although there are very good regulations they appear to be a dead letter. Boylan, a lockkeep er at Thorold, complained one day to the Engineer that Keefer's saw-mill had filled up the canal with saw-dust so as to impede the passage of vessels. I asked him if he had read the printed regulations, and his reply was, that no copy had ever been given him.—On the 16th of October last Me. Hall went up the canal and the masters of schooners told him that in the top level there was but 7 feet water in place of 8, and that in order to keep the Allanburgh, Marshville and Dunville Mills going night and day, the largest class of vessels with full cargoes would be stopt and the character of the work further injured. Orders were immediately given to stop these mills, but there is no regularity, no order on the line, and it is ten to one if the Engineer's command would be strictly attended to in such a case. The saw-mills are the great consumers of water—it is well understood that one saw-mill with one saw will consume in one day as much water as it would require to keep a grist-mill with four run of stones in operation for six days; the saw-mill obtains water from the bottom of the canal, and hence it is impelled with the force of the weight of water in the level above; the grist-mill obtains water only from the top of the upper level.

At a meeting held at St. Catharines, 7th Jan. 1835,

W. H. Merritt, Esq. President and Lessee, A. Macdonell, Esq. Vice President and Lessee, W. Chishelm, Thomas Butler, Esq. Lessee, Ogden Creighton, Esq. Lessee.

It was—"Ordered,—That a deduction of one-third of the Rent due for the past year will be remitted to the mill owners on the lower part of the Canal, provided the Sawmill owners bear a proportion of the expense for dredging the Canal below their mills—and the Hydraulic Company to receive a like deduction for interest due for the year 1833."

My evidence under the heads numbered 16, 18, and 21, is important with reference to the injurious influence of the system to which I have now directed the attention of the Committee.

Mr. Butler, one of the Directors had leased the Merritt mills from J.B. Yates Esq. @ £125 when it was under the Hydraulic Company. In 1834 he came forward and offered £100, although eight years of his lease at £125 were unexpired, and his reason referred to the rule made by the Board for the convenience of a majority of its members. The sooner an end is put to such a system the better. Last Nov. he got the lease.

OFFICE COPY,

ST. CATHARINES, 6th August, 1834.

To the President and Directors of the Welland Canal Company,

GENTLEMEN,

Having heretofore rented from John B. Yates Esq. the mills at the rent of £125, and as eight years are yet unexpired of the lease, and as the

said mills are now the property of the said Company I will rent the mills at £100 until a new saw-mill is crected for the term of years that the Company rent to other persons, and when a new saw is erected at the rent of £125.

I am, Gentlemen

Your obedient servant,

T. BUTLER.

# LEASING WATER POWERS IN NEW

The following selections from the laws of the State of New York, lately passed for the regulation of canals, show their management of water power, and that experience has proved the necessity of prehibiting every person from being concerned in canal management, or holding offices of trust on the canals, who, in his private capacity, has an interest different from that of the public at large:

From the Revised Statute relating to the Navigation of the New Yerk State Canals.

"No person owning any hydraulic works dependent upon the canals for their supply of water, or who shall be employed in or "connected with any such works, or who shall be engaged in "transporting property upon the canals, or who shall own or be "interested in any boat navigating the same, shall be employed "as a superintendent, lockkeeper, collector of tolls, weigh-mas"ter, or other agent upon the canals.

"No canal commissioner, or any member of the canal board, "shall own or be interested in any hydraulic works dependant on "the canals for their supply of water, or own or be interested in "any line of boats, regularly navigating the canal; and if any commissioner or member of the canal board, shall at any time after the expiration of six months after this chapter becomes a "law, be, or become so interested, he shall forfeit his office."

The opinions and usage in Ohio are stated in the following extract:

From the Annual Report of the Ohio Canal Commissioners, 22nd January, 1833.

"The numerous water privileges created by the construction of the canals, form an important interest which should be discreetly managed. These privileges may be made important sources of revenue, and at the same time be made to contribute largely to the prosperity of the surrounding country.

In leasing or selling those privileges, it is however important to secure the primary interests of navigation, which are liable to be injuriously affected by an improper use of the water for hydraulic purposes.

The agent to whom the disposition of the water is committed, should be able to anticipate the effect likely to be produced by any proposed sale—should know where privileges may or may not be disposed of without injury to the navigation—and what precautions, are necessary to guard against the occurrence of such an event."

I met in the canal office with an indenture having the Company's seal affixed to it, but no other seals nor signatures. It is dated the 22d of September, 1834, and I find that of the persons to whom a lease of the St. Catharines' water power is given by virtue of that document, there are of the Company's officers and persons employed by it, Messrs. John Clark, Thomas Merritt, R. E. Burns, and Robert Sanderson. The lease conveys to them, for £125 a year, subject to be annulled by the Legislature, the land and premises, with the water power attached thereto, at St. Catharines, commencing at the level below Mr. Phelps' saw mill race, down to any part of the level below the hill at St. Catharines where the bridge passes the Hamilton road, with all the waste water. The Canal Company are to do a variety of works for the lessees. The rent is only £125, the lease for 10 years, and the Canal Company are to pay the value of the erections in case it declines to renew the lease. Under this indenture Mr. Wm. Hamilton Merritt is a lessee of water power here also.

(COPY.)

St. Catharines, February 23, 1835.

John Clark, Holq.

I beg to apply to you for the use of the surplus water at Gravelley Bay, in behalf of the Port Colborne Mill Company.

Your obedient servant,

### HIRAM SLATE.

Mr. Merritt stated to me, that the partners were— W. H. Merritt, Thomas Merritt, Ogden Creighton, Alexander McDonell, H. B. Ostrum, Thomas Scott and Hiram Slate—for a Grist Mill at Port Colborne.

At the Board, on the 31st of August, 1835, this letter was brought forward, after Messrs. Merrit & Co. had built a Mill without authority, and as Mr. Thorburn and I dissented, and Messrs. Creighton, Merritt, and McDonell (the only other Directors then present) were interested, nothing was then done.

St. Catharines, July 10th, 1833.

ROBERT RANDAL, Esq.

Dear Sir:

There is an order of the Board, authorising you to keep an account with various individuals, of whom I am one.

You will charge me with all tolls passing in my vessels, on my account—it is not on my individual property, or the individual property of any other person whose name is mentioned—the consideration was, the Company's being indebted to those individuals.

Yours',

W. H. MERRITT.

### CENTRE-HYDRAULIC DITCH FROM VILLE TO ST. CATHARINES.

Amongst the papers submitted, I find an original calculation and estimate of this work by Mr. Oliver Phelps, in which the following quantities and prices are set forth, viz:

NAME OF TAXABLE PARTY OF THE OWNER, WHEN PARTY OF THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, WHEN THE OWNER, W	THE RESERVE AND PARTY AND PERSONS ASSESSMENT AND PARTY.	-
14,000 yds, of excavation at 10 cts. 1,000 do of embankment, do	\$1,400	
Cutting and embanking Stone for large aqueduct laid, Building said aqueduct ready for use Small aqueduct,	\$ 50 1,000 275	\$1,500
Grubbing one acre,	\$ 60	1,385
		\$2,885

In the same document, Mr. Phelps says "I will " complete down as far as the side line, near brewery, for the above sum, or will build the aqueducts " for the above prices, and the excavation and em-" bankments at the above prices, per yard, to be es-" timated by Geo. Keefer, Jr., or will do the whole " by the lump, for the above price, and warrant it to " answer the purposes, without any further expense " of estimating, but will not take any part unless I " take the whole."

Upon the 24th November, 1830, an agreement was made between Mr. O. Phelps and W. H. Merritt, Esquire, by which Mr. O. Phelps was " held to build an aqueduct over the valley, beyond Dalsen's, and one over a ravine this side of Phelps', to make substantial stone abutments, and make the said aqueduct of the best materials and in the best manmer, and finish the same by the 1st May, 1831, for \$1500;" this agreement exceeds Mr. Phelps' tender to do the aqueducts, by \$115.

An agreement was also entered into, between the Canal Compay and Messrs. John Johnston & Hugh McGuire, to excavate a race-way from the aqueduct to the West side of Widow Rykert's farm, to muck and puddle, embank and finish the same in the best manner, by the 1st May next, for seven cents per yard, excavation; seven cents for embankment, and the same for mucking or puddle.

The above work to be executed under the directions of the Company's Engineer, or Mr. Phelps, who has the control of the same for the time being.

Also, a contract of the same date, prices and restrictions, between the Canal Company and Thomas Sixsmith, Simeon Sixsmith, Edward Bradley and Matthew Sixsmith.

These three parties before mentioned, were the only contractors.

Length of ditch taken from a book of memorandums; 1588 yards lineal ("Entreview,") to Distillery, to aqueduct,

2212 North of aqueduct, 726

4526 = 2 miles and 1000 yards.

By an estimate of the work in June, 1831, there appears to have been done

Excavation,.....13,970 cubic yd's.

Embankment, .... Mucking, ....

14,722 at 7 c.= \$1,030 54

Grubbing returned,....

\$1,107 54

This estimate has no signature or date, but June, 1831, is endorsed thereon; another estimate for the same work with additional grubbing contains the following:

Cutting and embanking upon ditch, Grubbing to Anderson,	\$1,111 50 40 00
•	\$1,151 50

This estimate has no signature.

....||\$1,500 00 Add aqueduct, . . . . Extras, per bills, and extension to 25 lock, S07 41

The amount, by this estimate, will be,... | \$3,458 91

Mr. Barrett's estimate of the same work, a document known to be his hand writing, but without date or signature, states the following-

	الكنيات
"From the culvert near Philip Shaver's to St. Catharines— 1st From Culvert to Soper's Ravine S7 chains and cutting 150 width at both sides 7s. 6d	\$ 3285 99 200 00 1000 00
If this amount does not include the aque-	\$ 4485 99
duct, which is not shewn, we must add its contract price	1500 00
Also extra work by bills  1st \$200—2nd \$55 76—3rd \$65 25  Also extension of race as at present done,	
and of which there is no account, say 440 yards ×4×2=3520 cubic yards at 7 cents	246 40
Four sluices each \$60	240 00
	\$ 6793 40
I can find nothing to shew distinctly	i

whether the total actual expense of this work has been.....

\$ 3458 91

Or according to Mr. Barrett's estimate

6793 40

But it is probable Mr. Keefer the Engineer may be able to explain wherein this great discrepancy originates. FRANCIS HALL, Engineer.

OLIVER PHELIS,
JAMES LITTLE,
J. H. CLENDENNING,
WM. H. SANDERSON,
JOHNSTON BUTLER,
WM. C. CHASE.

I will agree for the race to come through my lot in case the upper race comes as far as my red house.

E. S. ADAMS.

## COSTLY FAVOURITISM-MERRITT'S MILLS.

A month or two after certain extraordinary transactions had taken place between Mr. Boulton, Mr. Merritt and Mr. Keefer, which will be stated in a subsequent part Captain Gordon presented a petition to the Committee of the House of Assembly, of which Mr. Attorney General Robinson was chairman, dated Niagara, 22d Nov. 1825, in which the following passage occurs:

"Your Petitioner therefore humbly prays your Honorable "House may be pleased to suffer the route of the Canal to remain; but should your Honorable House be disposed to alter the same, "your Petitioner humbly prays, that as a direct line is always the "shortest, your Honorable House may be pleased to cause a faith-"ful survey and estimate for carrying the line of Canal from the base of the mountain, in as direct a line as may be, down one of the ravines terminating at the mouth of the 12 mile pond, instead of turning round through St. Catharines; there being no perceptible difficulty, save the cutting off that village, the aggrandizement of which can be of no importance to the Company's general interest."

Had the suggestion of this excellent man been followed, and the direct route from Centreville to Port Dalhousie surveyed and estimated, the Welland Canal would have been shortened nearly four miles in a distance of nearly six or seven on the side of Lake Ontario; a route infinitely preferable would have been obtained, and many thousands of dollars in damages and sudden injury to the works by the fresh-But so powets on the 12 mile creek been avoided. crful was Mr. Merritt's influence with the Attorney General that the most difficult, circuitous and impro-per route was at once adopted, without even an examination of the direct line, and the public suffered a permanent loss of many thousand dollars in order that Mr. Merritt's Mills might find a purchaser and his landed property be enhanced in value. At one end of the canal it is extended 42 miles to benefit Mr. Henry J. Boulton at the cost of the country-at the other it is extended nearly four miles more to serve the private interests of Mr. Hamilton Merritt. If we acquit Mr. Robinson and his colleagues of improper motives in these transactions, it must be at the expense of their judgment and discretion. Mr. Hall's report explains the great advantages to be de-

rived from adopting the direct route even now; and I fully concur with him in opinion.

On the 31st of August, 1826, A. Nelles, Thomas Butler, Samuel Street, Samuel P. Jarvis, John Black, Edward McBride, J. B. Macauley, Marshall Lewis, H. Mittleberger, and others, Arbitrators, awarded to Mr. W. H. Merritt and his father £600 for their Mill Seat, Mill, Lands, (estimated at 7 or 8 acros;) and the huildings appertaining thereto, which with £30 interest was paid them next year.

MINUTE OF 6th JULY, 1827.

#### PRESENT.

Dunn,
H. J. Boulton,
Robinson,
Colonel Wells,
D'Arcy Boulton,
Keefer.

Resolved, That Mr. Merritt be paid for his Land, &c. as per award, viz: £600, and £30 for interest, by a draftupon Messrs. Yates and McIntyre for £630, at 60 days.

Next month the Board resolved.

VIDE MINUTE OF 9th AUGUST, 1827.

#### PRESENT.

Dunn,
Wells,
D'Arcy Boulton, and
Kocfer.

"The Board not feeling inclined to go to the expense of removing the Grist Mill formerly belonging to W. H. Merritt, Esq. at this time, and considering its being put into immediate operation would be beneficial:

Resolved, That Mr. Merritt retain it in his possession on the same terms as the Saw Mill, vix: by advancing the capital to put it in operation, he is to have the use of it until the Company may consider it an object to take it themselves, in which case they agree to pay him the amount of his outlay or expenditure in the repair.

Acting under this authority, for his own benefit; Mr. Merritt set to work and made repairs on the mill property to the value of £678 12s. 7d. for which expenditure he produced from fifty to a hundred accounts, some of them signed, others discharged, but a number of them were vouched for in no way whatever by the parties. Mr. Dunn the President, makes "an endorsment that the vouchers have been compa-" red with the within accounts—the same are not got "up with that regularity which should be in such a "transaction"—and although their correctness was not disputed further explanation was called for by the Board.—McAllister's bill of \$296 is paid, with a suitable allowance of 18 gallons of whiskey, and \$20 of a gratuity; and the gratuity, and the said whiskey, and much more whiskey than that, are charged to the Welland Canal Company and certified by Marshall Lewis. A variety of the charges for labour and materials are by Thomas Merritt, Junior.

In 1829 the board paid Mr. Merritt £538 for his repairs, and took the mill off his hands. The balance was afterwards settled.

So that Mr. Merriti's mili, with the ground had cost the Canal Company, at the time it was placed in the hands of the Hydraulic Company \$4,672, and they are said to have made further alterations. Indeed to this cost may be added the loss of nearly 4 miles in 7 in the route, and the cost and delay caused by hundreds of casualties in the valley of the twelve mile creek.

I now present copy of several letters and orders of the Board which partly shew the improper course

H2

Mr. Me-ritt has pursued, even according to his own rule.

Remarks by Mr. Merritt, Welland Canal Office, 1828:

"As jealousy will arise in my posessing any machinery on the Line of Canal, would prefer the Company taking my Mills and advertising them to be let at once for ten years on an annual rent, the Company to take crections at that period at a valuation of what they are then worth. It is my wish not to be in any way interested in any work, so long as I have any management in the Company's affairs—and this I believe to be the wish of the Stockholders.

"It would be well to come to some decision respecting the Grist-millat St. Catherines; it is injudicious to let out Saw-mills on a large scale until the water is through."

Pursuing a different course afterwards, Mr. Merritt addressed the following letter to the Canal Board, asking its permission for him to be a partner in the Hydraulic Company; and the Board made a minute in reply, in these words—" The Board leave the matter entirely to Mr. Merritt, who is at liberty to act as he thinks proper." The members present were Messrs McDonell, Warren, Boulton, Allan and Randal.

WELLAND CANAL OFFICE, St. Catharines, Nov. 10, 1831.

To the Board of Directors
of the Welland Canal Company.

GENTLEMEN.

I have refrained from purchasing any situation on the line of the Canal from its commencement, to avoid all ground for suspicion of having speculated for my private advantage, instead of selecting them for the benefit of the Welland Canal Company.

I was offered by Mr. Yates, when last here, a part of his purchase on certain conditions, which would enable me to retain near one sixth, it was my intention to state the circumstance to the Board at their first meeting, but as an opportunity is not likely soon to offer. I consider it my duty to lay it before you immediately, and if it should not meet your approbation. I am determined not to retain the least interest in the Hydraulic Company, although I consider it a profitable speculation, and that it would in no way interfere with the interests of the Welland Caral Company, except in promoting them; and I still think, as I ever have, it is the best sale that could have been made by the Welland Canal Company. I believe the exertion of the Hydraulic Company will bring more business to the Canal than all the land and water-power is worth in the hands of this Company.

If you consider there would be no objection on the part of the Board or the Welland Canal Company for me to make a purchase in that, the same as any other individual, I shall feel thankful, if not you will please notify me by Mr. Black.

1 am.

Gentlemen,

Your obedient servant, WM. HAMILTON MERRITT.

Mr. Merritt has since become a lessee of the water power at St. Catherines, &c. and is building Mills.

For the Colonial Advocate.

To Wm. Merritt, Esq., Agent and Director Welland Canal Company.

NLAGARA, April 28, 1326.

SIR,

There is oft times much truth in the remark "out of evil comes good." (not that any may be expected from you) but that the vile trick you played off at the election for Canal Directors on the 3d instant, mas at length entirely removed that mark of friendship which you had wore so long, and clearly domonstrated it to be good to have done with you; you perhaps

hoped that I would six down and quietly chew the cud of disappointment; not so, Sir, you are mistaken, (you know the cause of my being silent so long, but,) "though vanquished, I will argue still!" and perhaps may give you some trouble yet before I leave you, for I think your treachery on that and some other oc-casions has given me a right to address you without much courtesy, and while I confess myself truly inadequate to contend with so subtle and so putient an opponent, must trust to the justice of the cause to shield me, while honesty, trusty old truth, shall be my weapon, over which I cannot restrain the bitter tear at the recolweapon, over which I cannot restrain the inter tear at the received lection of the last thread of triendship being thus severed for ever that held one who I loved so well; but that is past—to the point. If you can possess candor, (which I doubt) pray why did you come here disturbing my peace, entreating me to be one of the Directors for the present year? My reply shewed you I was not ambitious of the honor (if there be any in it.) When you wrote to me on the subject, shortly before the election, and found I did to me on the subject, shortly before the election, and round I did not answer you, why did you not let me alone?—and when in our last interview, only a few days before the election, you then guined my assent, why did you basely deceive me in causing Mr. John Clark to be elected instead of me, and expressly to keep me out? In that conversation you lamented that the province did not contain seven elegible Stockholders to elect for Directors; when enumerating us you made no mention of the Attorney General or John Clark, (because they were not then Stockholders,) nor did any person ever hear or suspect, or will believe that the latter was so till the moment of election; I am glad, however, to hear that he is enabled to put a \$1000 in the Canal, for he was (I thought) my friend in my closest confidence on the subject, and know best how he kept or deserved it. (No doubt he will make a very good and more plant Director than myself, though he did once try to get the Canal near home) if it was done to expose or mortify and disappoint me; so far you have failed, as nothing that you may do can surprise me, and though foiled in the opportunity of searching for truth in the Canal, (which was very doubtful of being found there, even had I been elected) the reflection that I am saved some pence and much trouble, must console me. Perhaps it was that duplicity forming so prominent a feature in your nature, you could omit no opportunity of exercising it, and that your treachery was a matter of course-a natural result. Whatever the course, the result was base in the extreme-I will not call it a Yankee trick, for the Yankees present did absolutely hoot at it. I shall consider it an Agent's trick, for I believe it was all your own, nor was it any way marvellous that my honest was all your awn, nor was it any way married the invisioned in nonest friend Keefer should join the plot; but why our Hon. I resident should full in with it, perhaps himself knows—I do not; possibly he thought it a good joke; I wonder if he thought it an honest one; it was certainly a black one. You know that my intentions one; it was certainly a black one. You know that my intentions were pure and disinterested—that I had both leisure and inclination to serve the Company, and a desire to do justice to every man, without injury to any one. Under this feeling, and no other, did I consent to be one of the Directors; but it was by no means evident to me that I should, or was bound to agree to all your measures, nor could you reasonably expect that I should vo-luntarily expose myself (singly) to be borne down by the opinions of such a knot as your plausability had formed to your views. The four principal Directors being absentees, and much engaged in their own affairs, having no time to think of the Canal, confided all to you, who, with your trusty colleague, Keefer, have been (nearly) the sole performers in all the parts, and are both of you deeply interested and benefitted by it. Will any person be found stupid enough to deny that appearances alone demand a counter interest? I tell you, Sir, that the Seld is considered too extensive for less selfish men than either of you, to be entrusted with entire control thereof. I do think it to be the Company's advantage of the control thereof. tage to have a different interest with yourselves in the direction, were it only to give popularity to, and confidence in the work, (which is greatly wanted.) Under this impression I proposed James Crooks, Esquire, to be one of the Directors, and this I learn is in your eyes a most beinous crime; and why not Mr. Crooks, Sir? Is he not a proper person, merely because his views may chance to run counter to your interest? You know him for a man of application—one not likely to be gulled by any frothy varnish you might rise to reflect the Company's interest in certain points, while self-advantage lay snugly hid at the bottom; he is a sturdy fellow that would brush it aside, and if iniquity lurked there, would "drag the monster into day"—just the man we want: and it required no witchcraft to forsee that he would be less manageable than some others; but allow me to assure be less manageable than some others; but allow me to assure you, Sir, that the lase step you took to prevent the election of persons, perhaps not fully satisfied of the propriety of your con-duct, has rather tended to confirm than remove any unfavorable impressions that may have existed in clearly evincing the little mipressions that may have existed in electry evineing the fitted faith you had in your ability to make converts of them to your measures. If those measures have been pure and disinterested, and the Company's best interests always adhered to, what can you be afraid of—why recoil at such men?—sure "conscience that makes cowards of as all" did not whisper you the danger of trusting even one person who might feel disposed to look deeper into the Ganal than others. I have not the vanity to think myself so formidable; and the apology that I wished to mar or perplex any part of the proceedings is too ridiculous to repeat, since it is not to be conceived that one or two men could make any undue impression on the minds of six persons acquainted with the subject, aided by such plausible subtlety as yours, and the work so far advanced.

When there was a vacancy for a Director from June till October last, you know I was the only person belonging to the Company during that time eligible to fill it; but you (and colleagues) rather choose to violate the charter than admit me among you. Whether I was too great a fool or knave I never could learn, but aware that you had both resolved to do without me, and not then over ambitious to herd with such, I said but little about it, but it was to divine the true cause of such pointed loatility, for though you might hate, you believe me honest. It was, however, grateful to ultimately observe so judicious a choice as the Hon. Vice President; but I thought at this time, (as you were so pressing) that your plans were to secure, that I might, for want of better materials, be admitted among the crowd; I do assure you that I had no wish or intention to tarry with you. I did but just mean to take a peep or two to satisfy myself that all was right, and away; (it is only your duplicity that I complain of) it is well known that I am about to leave the country, but if any person can suppose I would remain here for the honor of being Director of the Welland Canal, they are at full liberty to enjoy their opinion.

The four principal Directors being absentees, confide all to your disinterested management, now aided by Messrs. Clark and Keefer, (whom I call mobody.) you three I suppose form (the tria juncta or) standing corps of operations. I'ray, may we not as well toss our money to you at once, and say, here good crafty Agent, make the most of it: for I much question the soundness of that policy that gives such latitude to any man so deeply interested as yourself.

"You know that I have no hostility to the Canal, (quite the reverse) and that I am interested in its prosperity, but I can aever suffer that little interest to run away with my integrity, (let sordid souls laugh) I feel a nobler interest for its welfare, and think much of its prosperity depends upon the open, candid, judicious manner in which it is conducted; it is that cursed mysterious secreey, which you are so fond of, that I am an enemy to. You say there is none; now I insist there has been, and still exists too much of both, and that it is injurious to the work; where there is no knavery there is no need of it. Honesty needs no such wretched auxiliary; it is true, I have asked but few questions as a proprietor, but the equivocal, unsatisfactory answers I have received, have disgusted and deterred me from further enquiry."

You have reported that fancying myself ill treated by the Directors has dissatisfied and roused me. Has yourself not acknowledged their injustice to me?—and do you suppose I am ignorant who to thank for it? But to state such as the cause of my discontent is a base fulse calamny; "false as hell?—false as him that said it: only worthy the little soul incapable of any generous feeling itself, cannot reconcile the 'den of its existence in it to breast of another; it is too true I have been capled, caped, deceived, led to expect what was never intended to be realised; but my credulity and prejudice in your favor rendered me obstinately blind to every imposition, in spite of the most faithful testimony, and evidence of my own senses, and perhaps should never have opened my eyes to the truth had myself only been contented; it was that cursed twisting and turning the canal and contracts, without leave or law, which first gave me to reflect. We read that "the serpent was more subtle than all the beasts of the field." Such are you among men—shining in subtlety, and your wiles attended with every success. The black snake I believe does not bite—like him you steadily pursue your wily course, and if like him you may not bite, you have made a devil of a hissing through the country.

"I held with you and supported your measures so long as I thought them honest, and disapproved them as soon as I discovered an inclination to serve yourself, rather than the Company. I may have erred in opinica; no man, I freely confess, is more liable to error, nor any more willing to acknowledge and atone for it. I am aware that I have been a foolish volunteer in the cause of strangers' interest, but heaven can bear witness to the purity of my intentions. If I was wreng, why did you not set me right? You attempted it once, but left me werse than you found me.

"Let me ask you where might the Canal now have been, (perhaps forgotten) had not my slender purse fostered it in its

infancy when destitute of funds, and none would risk a shilling on it, not even their own instalments?

"What supported the tottering fabric when the Lower Canada-Stockholders suspended payment, and almost abundoned it? (I do the fullest justice to your own personal exertions, they were vastly great, and must have immortalized you had they been disinterested.) Who advanced the first payment to the contractors, before any money was obtained (or certain of being obtained) from the New York Stockholders? Who would have reimbursed me had the Canal miscarried, as was then expected? Would you have done it? My services were then appreciated because I was serving individuals; is it not true? Have you, and your trusty colleague, Keefer, forgotten it? Or will you deny it? Where would he have been at the cleetion of last year, had I possessed or used half the subtlety of either of you? That Nicodemus who presided at the Canal Boards by day, and attended the counter-meetings by night—who but you (to you eternal disgrace, have twice procured the re-election of him, who, when President) promised a certain contract to a certain person, on condition that himself was to be a partaker therein. Why so lenient and kind? Because he was useful to you. Is it not true? Why should I conceal it? I do not like your 'wolf in sheep's clothing,' and much doubt the goodness of that policy that entrusts you, or any one that supports such a man, with either our cash or concerns. I have been a friend to the Canal (and consequently feel an interest in its welfure;) I have a right to speak; I am a proprietor, and will speak freely. I have a right to speak; I am a proprietor, and will speak freely. I have a right to speak; I am a proprietor, and will speak freely. I have a right too to know, (although our Agents dispute it) how my money has been expended, but nothing of this can I learn, more than what cannot be concealed, that so much is paid, and solittle is done.

"I honour your talents, and deplore their being constantly, (however secretly) directed to self. I have long known that you do not believe disinterestedness to be of this world, or to exist in it, and that 'make money,' &c. is your creed. But have a care, 'ill-gotten wealth never prospers,' and if some of your trusty friends do not shave you close before they they have done with you,

'You'll have to rise earlier than you do, For if you are York, they are York too.'

"Though a homely English phrase, the hint may be of service to you. I leave you for the present to chew it, and am

"Your humble servant,

"JAMES GORDON."

344. Have you any specific charges on No. 25?-The Welland Canal feeder terminates in the Ouse or Grand River, the country in the neighbourhood of which is blessed with a mild and pleasant climate, a fertile soil, water power in abundance, excellent timber for building, lime-stone, plenty of plaster of paris, fuel, canals and inland navigation, extending nearly to Brantford; building stone in all directions, and iron ore at no great distance. The Banks of this noble stream possess many advantages for manufactures, agriculture and commerce—the Ohio is near, the two great lakes are close at hand; Lower Canada, New York and Pennsylvania are not far distant, and to the west is the best half of Upper Canada. An intelligent population, well governed, and their energies properly directed, would speedily enable this favored district to rival, if it did not exceed, Lancashire in England, which, as compared to it, is defective in several important products essential to a manufacturing country. Dunnville, five miles from the river's mouth, is unhealthy, the Dam across the river at this place has laid under water about ten thousand acres of fertile lands, chiefly flat alluvial meadow. Sixteen miles above Dunnville the banks form into bluffs and gently rising grounds, and this is the aspect of the country for many miles up. At Dunnville a lock down into the river is much wanted. It is rather unfortunate that the Welland Canal has thus far impeded the free navigation of two Canadian Rivers,—first, the Grand River, by a dam without a lock; and, second, the Chippawa or Welland River which is navigable for steamers or schooners a distance of thirty miles, but their passage is interrupted by the Canal aqueduct which crosses the stream so close to its surface that no steamer or barge can pass under.

The officers of the Government disregarded the excellent advice tendered them by Mr. Gordon and others, slighted the petitions of the people and increased the length of the navigation nearly four miles in the distance from the base of the Queenston Ridge to Port Dalhousic, for no other reason that I have ever heard except that it enabled Mr. Merritt the better to dispose of his mills and landed property. I now proceed to state some facts connected with the mischievous operation of the influence of the executive authorities by which the western termination of the canal was extended four miles more than was needful, and a loss sustained, for so I must call it, not less than one hundred thousand dollars.

After the Banks of the Deep Cut had caved in, it was resolved to make the Grand River the feeder, and to dam it up near its mouth so that a head of water of about five feet would be raised. It appears that this plan would not have served the interests of Mr. Attorney General Boulton nearly so well as to adopt a longer and more uncertain and expensive route to a place five miles farther up the river, and objections were raised by Commodore Barrie on account of some imaginary injury which the dam might do the naval service on Lake Erie;-this was overruled by Sir John Colborne, who consented that the dam should be built farther down on condition that the Directors gave their obligation to pull it down again, if called upon by the executive government, which they did! and after all the dam was taken up to Dunnville, and the canal carried through the Boulton (Selkirk) tract, at an additional expense of many thousand dollars in the outset, and a permanent charge for Berm embankments which appear chiefly to serve Mr. H. J. Boulton, and Mr. Thomas Merritt, Junior.

The extra report of the Directors, signed by Mr. Dunn, and published by order of the Board, June 6th, 1829, gives some account of the difficulties they had as to the place where a dam might be built. They say "it was intended that the dam should be "constructed across the Grand River about 572 "yards from the mouth, at the upper end of the haval establishment." Commodore Barric objected, and they then selected another site five miles up the river. They add—"The objections advanced "by Commodore Barrie, extend to this site also, and "indeed to any that might be proposed within the " nchole navigable line of the river, extending to the first fall, about 18 or 20 miles from the mouth."— With the sanction of Sir J. Colborne it appears they constructed the dam where it now is notwithstanding the Commodore's protest; why could they not have done it in the most advantageous place as well, secing the Lieutenant Governor was willing, and the objection the same to one place as to another ?-Where the dam now is, gravel is very dearto be brought up in scows from the river's moutha distance of five miles.

In their report for 1832, page 12, the Directors gave the following version of this Boulton's job, and declared that only £10,000 of additional expense were incurred, besides the permanent injury of the navigation being extended five miles up the Grand River. They forget the cost of Merritt's Berm Bank, and the keeping in repair these five miles—but complaint is unavailing, Upper Canada must pay for all.

## Extract from the Directors' Report, March, 1833.

"The best situation for building a dam across the Grand River, "was about half a mile from the mouth; where the ground was "marked out, the work placed under contract, and about £400 "expended; when, by the representations of Commodore Barrier," a stop was put to the work, and the Company were compelled to select another situation five miles up the River, and cut an "entire new feeder that distance, at an additional expense to the "Company of at least £10,000."

On this subject I select a letter of Mr. Barrett, the Engineer, who had he been left to exercise his own discretion, would have acted with good judgment, but he was perpetually interfered with by Mr. Merritt and others interested, and had either to yield to their views or leave the work.

(OFFICE COPY.)

To the President and Directors of the Welland Canal Company.

GENTLEMEN.

I send you herewith a detailed statement of removing the Dam five miles in the interior as well as the cost for enlarging the Canal to its proper dimensions—

My reasons for selecting the lower situation in the first instance was

1st. It gave a large and commodious harbor of 36 chains from the end of the piers to the dam, averaging at least 5 chains in width, capable of containing any number of vessels that may navigate those waters for ages to come, even had there been no lock in the dam to pass through at pleasure—which it is our intention to construct.

2d. It was the first and best position below Broad creek; above which I never contemplated building a Dam, from the difficulty which presents itself in crossing this stream, and the distance it would prolong the end of the Canal before entering the Grand River.

3d. Since our being compelled to relinquish this situation and to select another above Broad creek, the first and best is 5 miles from the mouth, where the dam is now constructing.

The difficulties of this situation however are not inconsiderable, in the first place it prolongs the canal near five miles, which will compel the Company to raise the dam near six inches higher than below to maintain the head heretofore calculated upon.

It removes the most desirable commercial and manufacturing situations five miles from the direct line of the canal, consequently must take every vessel which goes to that place for loading ten miles out of the way, and in no way increases or improves the navigation in the interior for that distance.

I therefore conceive the additional expense incurred by the Company a total loss to them without any corresponding benefit wintever besides retarding the completion of the Canal at least two months, and the expense of keeping up two to three miles of additional embankment besides waste weirs, waste gates, guard gates, &c

Gentlemen.

Your Obedient Servant,

A. BARRETT.

Pr. Engineer, W. C. C.

WELLAND CANAL OFFICE, St. Catharines, June 30, 1829.

This Boulton job is as bad as that of the four mile circuit to oblige Mr. Merritt, down at St. Catharines. Even Captain Creighton, in one of his official letters expressed his unqualified contempt for Boulton and his abettors in this robbery of the public:

Extract of a letter, Ogden Creighton, Esq. Director of the Welland Canal Company to W. H. Merritt, Esq. dated York, January 13, 1832.

"I told the Attorney General his berm bank was to be made; when he said "it was very hard I should call it his, as he had only the health of the people in the neighborhood at heart in urging its completion, as Mr. Randal had told him expressly the inhabitants were, or would, suffer greatly from sickness if it was not made." I do not think it necessary to assure you how very kind hearted and considerate this said Attorney General is in his many hearted and considerate this said Attorney General is in his mature; yet as it may be news to you, I must inform you, he apes at being disinterested in the bargain! poor fellow! what a pity he chose so vile a profession as the Law—his virtues might have done him great honor in the Church!"

(OFFICE COPY.)

York, May 20, 1829.

Sin: Mr. Phelps has made the Company acquainted with your present ideas respecting the most proper situation for the dam across the Grand River, which you think ought to be somewhat lower down than that selected when the Directors were over. It was intended by the Directors to leave with you the discretion of making any alteration that you might think expedient, with the understanding that the dam should not be placed within two the understanding that the dam should not be placed within two miles of the mouthof the river, and that you should not deviate greatly from the site approved of by the Directors without first acquainting them. The change you suggest is such as you may adopt if you are decidedly of opinion that it will make the dam more secure, which is the first object.

I am Sir

Your obedient servant, JOHN H. DUNN, President W. C. C.

MR. ALFRED BARRETT, Engineer.

I am Sir.

The Chief Justice (Robinson) then Attorney General, wrote Mr. Merritt from York, April 30th, 1829:

"Sir J. C. will authorize a dam any where above two miles from the mouth (meaning the mouth of the Ouse or Grand River) and perhaps if he were convinced the necessity was absolute he might do more."

Notwithstanding this offer, Messrs. Dunn, H. J. Boulton, C. J. Robinson, Keefer and Lefferty, determined, May —— to fix the dam between Moulton and the Indian lands, and they agreed to take it down whenever the Government should desire them to

At the other end of the canal there is a creek called the twelve, upon which Mr. Hamilton Merritt had a mill which seldom had water to impel it, and was worth little. This mill and some improvement on it, and a few acres of land, were sold to the Company for £600—£30 of interest, and £673 of allowance for repairs to the mill. Had the canal gone in the straight table land course which the Engineer Mr. Hall has pointed out, it would have been nearly four miles shorter between Thorold and Port Dalhousie, which is a great advantage on a ship canal, but Mr. nave been nearly tour miles shorter between Thoroid and Fort Dalhousie, which is a great advantage on a ship canal, but Mr. Merritt had influence to get it carried into the Twelve Mile Creek round about by St. Catharines, and close by his lands and pro-perty there, and by his mill. Besides the increase of distance, a perpetual bill of expense is incurred by having the locks in the bottom of the creek and subject to injury by freshets which it is often very difficult to reveal. often very difficult to repair.

York, 15th January, 1825.

WM. HAMILTON MERRITT, Esq. St. Catharines.

Dear Sir:

Lam happy to hear such good accounts of your

able to get the aid of Parliament. What the feeling of the House able to got the aid of Parliament. What the feeling of the House can be I cannot pretend to say, being a stranger to the most of the members. If anything however is intended it should be brought forward by petition from the Directors stating how they could pay the interest, and secure the ultimate payment of the principal.—
If it is go to Niagara I doubt whether Government would encourage it. If it were sure to come to the 12, I would be inclined to think otherwise. I had an idea of offering to take stock in the canal to the amount of \$10,000 if they would take 10,000 acres from lead in a block where they please, and may me \$10,000 in can to the amount of \$10,000 in they would dake \$10,000 in of my land in a block where they please, and pay me \$10,000 in cash by instalments. This would be only \$2 per acre, which by taking the canal through it, would raise it to \$6 or \$8, and would give the canal the benefit of its own improvements—besides this land would be taken in payment by the workmen most readily.

If a petition is brought forward you should come with it, as an experienced person would accelerate the business much.

Yours truly,

H. J. BOULTON.

York, 20th February, 1824.

Wm. H. MERRITT, Esq. &c. &c. York.

It occurred to me after I had the pleasure to see you on the subject of the proposed canal, that instead of my name being as you mentioned at the top of the list, that you should solicit the countenance of His Excellency the Lieutenant Governor, whose name would stamp the character, and secure the support of Upper Canada. His Excellency's sentiments at the conclusion of the last session are very flattering indeed, and the view he was pleased to take of the matter, that you will not apply without success, in addition to which it will add to the Governor's property, if not, it will be a very desirable object from his residence. The little support I can give in my small subscription is all I am able to do, which is only to assure you how much I should be gratified to see so laudable a project carried into effect. At the same time I will use all the means I can make use of in promoting the under-aking

I have the honor to remain, Sir,

Your obedient servant, JOHN H. DUNN. (Signed)

FRIDAY, 11th March, 1836.

Committee met.

PRESENT.

JAMES EDWARD SMALL, Esq., Chairman,

Messieurs Chisholm. Gibson. M'Donell.

Parke. Roblin. Shaver, and

Thorburn.-

Mr. Newlove again called, and further examined. [By Mr. MACKENZIE.]

345. It is assumed that €1,340 and upwards were said from the Canal funds in 1825, to Theophilus Brundage, for timber of a large size for a tunnel, and never used for that purpose, and that no part of the proceeds of 200,000 square feet appears on the books, and that it has not been accounted for in any other way. As you were continually on the Canal, perhaps you can tell what became of the timber — A good deal of it I can—Fknow Mr. M Macking bought some of it. Mr. Phelps employed me to draw perhaps 40 or 50,000 feet to the first lock below the mountain. Mr. Phelps drew a good deal of it min-self, perhaps as much as I did—I suppose that Phelps und myself and those I employed drew all that was fit for locks. I was to draw none but what was a foot square and upwards. I drew some for Mr. Phelps to build a Presbyterian Meeting House with, and some to build his own Store and machines with—I heard it said that some of it floated down the Falls of Niagara.

346. Do you know whether any shanties were built with Brundage contract timber?—No. I helieve not a stick was taken of that pine timber. We all built our shanties with wood, which was easy to be had. One Rolly got some sticks of white oak, but I do not know that it was the timber of Brundage's contract.

347. Are you aware that Hovey, Ward & Phelps, were obliged to supply themselves with timber for the lock contract, and not to receive timber from the Company?—They told me that they were. Hovey recommended me to Phelps to draw the timber—I asked Hovey what Phelps would give me per foot for drawing it—he told me that Phelps could not afford to give me a great price, as he had the timber to pay for to the Company.

348. How much of Galbreath's Gravelly Bay contract was left unfinished when you finished your contract for section 10 & 11 in the fall of 1832—and was there any greater difficulty in finishing No. 13 than you had to contend with in completing sections 10 & 11 below it?—To the first part of the question I answer I do not know, and to the latter part I answer—No. No. 13 was, I think, a foot higher than No. 10 & 11 which I done

349. Are you aware of the amount or value of Mr. Galbreath's contract for Sec. 13, Gravelly Bay route—could it have amounted at 13 cents to upwards of \$5,000, including an extra allowance of \$200?—No, I don't think it could—he had not half so much to do so I had—Galbreath gave his job up, and so did every one else but myself.

350. Do you believe there was 26,748 yards of excavation in Section 13, this being the quantity allowed Galbreath over and above an allowance which appears to have been made to Donaldson?—I think there was something like that in each of my sections, and I should think there was something like that in 13.

351. How wide was the bottom cutting by you in Nos. 10 & 11, and by Galbreath in No. 13?—Part of nine was 30 feet bottom. I do not know, but I think Galbreath's was 20 feet. I believe they calculated all to be 30 feet in the first instance, but there was difficulties occurring which were supposed to be the want of money, which caused alterations to be made

352. Oliver Phelps claimed and was allowed a large sum for taking out roads at the Deep Cut. Did you make your roads at your own expense when a Contractor there, or was Mr. David Thompson, Messrs. Ward & Hovey, and yourself, paid like Mr. Phelps for these roads?—I do not know what Mr. Phelps was paid, but I never was paid, nor Ward & Hovey any such charge, although Hovey, Ward and myself often applied to Mr. Merritt for such allowance, and his answer was always the same, viz: "How did youexpect to take the dirt out of the Canal without roads?"—Hovey, Ward, and myself ought to have been paid a great deal more than Phelps was. He cut his roads principally in the same way

that we did--ours cost three times as much as his did, for want of the use of machinery—we cut ours at right angles with the Canal, but he cut his slanting. We were prevented in the first instance by Mr. Clowes from making our roads as Mr. Phelps made his.

Mu. Phenes' evidence was read to witness.

353. Referring you to Mr. Phelps' answer to question No. 238 regarding deep catting on Canals, I would like to obtain your opinion as to the relative value of the first 10 feet cutting to each foot below I—I would rather take out the bottom than the top at the relative price as stated in Mr. Phelps' evidence, or at ½ a cent addition—I think the increase mentioned by Mr. Phelps is too much.

354. Did Phelps allow his sub-contractors on the Deep Cut over and above his agreement with them in proportion to the extra allowances made him?—I never heard that he did. I do not know that he was allowed any thing extra; he broke them all down but David Thompson.

355. Mr. Phelps says he bought all the shanties and paid for them. Did he pay for your's, or Rowley's, or Hartwell's?—He never paid for mine; he said he would buy my shanty and stable, but did not do so. He took possession of my poultry yard, my stables, and my granary, but never paid for them; he paid me 3½d less for my grain than I had offered for it.

356. Mr. Phelps says he lost oxen, horses, and other property, and it appears on reference to the accounts that he was very handsomely paid for these losses. Was he the only contractor on the Deep Cut who lost horses and cattle, or were others remunerated for losses?—I lost four of the best horses that were ever on the Deep Cut, but I was never paid for them. I never asked for pay; I have been a farmer almost all my life time and have lost many horses, &c., but I never asked pay for them from my landlord.

357. Was the part of the Deep Cut finished by Mr. Phelps of a harder description of soil as the depth increased?—Is Mr. Phelp's answer correct?—I think it was as hard within 12 feet of top as it was at any other place, and as many stone.

358. Did Thomas Merritt work as a contractor on the Canal when you was there?—Yes, he did.

359. Did you ever know him to begin and finish any of his contracts?—He finished his Gravelly Bay job at a great loss, but did not begin it. He began a large job at Cranberry Marsh, and I helped him to finish it.

## [By COMMITTEE.]

360. Are you aware of Thomas Merritt having been a favorite; and if so, will you state in what instances the directors shewed a partiality towards him?—I never knew that they did.

## [By Mr. Mackenzie.]

361. I see in the Company's books a bill paid you out of the Company's funds of £25 for the loan of a horse, saddle, and bridle, for the use of His Excellency Major General Sir John Colborne, Governor of Upper Canada. Surely all this money could not be for Sir John's horse; explain if you can how it

come to be paid out of the funds of the Welland Canal Company ?- I received a letter from Mr. Black, the Secretary, saying, "I am desired by the Board of Directors to state that they and Sir John Collierne are coming to see the Grand River on a We are supplied with horses of Mr. cermin day. Burgar's; if you have a horse fit for Sir John Colhorne to ride on, I hope you have it in readiness on said morning, if not, get him one, we will pay the expense." On the said morning they did not come as early as he said they would, and I sent my horse to work. Afterwards, on the same day, I sent my horse to Mr. Burgar's, with a good saddle and bridle. Five or six days after I received a letter to meet the horse five or six miles from my place, but was without saddle or bridle-and I charged \$1 a day for the horse, \$181 for the saddle, and \$21 for the bridle, to the best of my recollection. Mr. Dunn advised me to ask Sir John for the hire of the horse, which I refused to do, and then sued the Company.

## [Br Mr. Merritt.]

362. You say you was employed by Mr. Phelps to draw 40 or 50,000 feet of timber, not under 12 × 12; from where did you draw the timber, and which of the two locks under the mountain did you deliver it at—above or below Vanderburg's?—I drew it from Brown's at the Chippawa, where the timber was lying in a field, and I drew some out of the Chippawa River to the locks below Vanderburg's—Mr. Phelps paid me, I do not recollect how much.

## [By Committee.]

363. You state you have been caught too often on that canal, will you inform the committee if you have been caught in any other instances than you already have stated, by the Directors of the Welland Canal Company or its officers ?—I have—When Mr. Merritt persuaded me to give in writing to the Directors what I thought it was worth to take the whole width of the Deep Cut down at once, and what it is worth to take the ditch down, I refused to do it for nearly two days, telling him (Mr. Merritt) I already had a contract or a promise from the Directors that I was to go to bottom of said job either the whole width or the ditch as they thought proper-no price was to be set by either them or me; my work was to be measured and valued by the Company's Engineer, Mr. Barrett. I told Mr. Merritt that was my agreement with the Directors, if I now set a price on it it will be doing away with the bargain I have already made, that I should be using Mr. Barrett very badly, by first agreeing with the Directors that he should measure and value my work, and before one month setting my own price on it, it would be entirely doing away with what I had already promised. I think Mr. Barrett is a gentleman and will allow me a fair price for my work, and I ask no more—thorefore I won't say what it is worth. Mr. Merritt told me that that should have no weight with Mr. Barrettthat it was for another purpose altogether. I said "do you think that this will have no weight with Mr. Barrett !- when I've agreed with the Directors without either me or them having any thing to say about the price for the work, and now you want me to come forward to say what it is worth. I will never fly into the face either of Mr. Barrett or the Directors: I can finish my contract by Mr. Barrett's value;

he knows the worth of the work." Mr. Merritt again said, "I tell you it shall have no weight with Mr. Barrett whatever;" I told him it could not be otherwise, but have weight, and therefore said I would not give it. He still insisted that I should give it in or it would be worse for me; he saidyou have no occasion to dispute with the Directors above all folks." I then told him I would give it in writing how much it was worth more per yard to take down the ditch than it was to take down the whole width-but I would not say what I will take it for-if I did I was sure it would do away with the bargain I had already made. He told me "upon the points of honor it shall have nothing to do with the bargain you have made with the Directors, nor any weight with the Engineer. The Directors mean you to finish the job according to your burgain, this what I am aking you now is for another purpose entirely-Mr. McTaggart is writing against the Directors of this Company saying how much cheaper he could swim it out than they are getting it out by yours and other contracts." I asked Mr. Merritt if that was all he wanted; he said the Directors would not take upon themselves to say whether they would take it out as we were doing it, or whether they would follow McTaggart's plan. I then told him-"If that is the case I see into it; they cannot wash one part of the ditch out and let me cart the other part out—I will then say what it is worth more to take out the ditch as we are now than it would be to take the whole width down at once; but I will not say what I will take it for." He told me that would not do, "you must comply with what I've said, viz :- the Directors have always been in favor of you I tell you again-the Directors have nothing in view but your finishing the job at the bargain you made." I then believed him, and wrote or signed my name to what he told me to, with another promise that that should have no weight with the Engineer, and notwithstanding all that had just occurred between us, in two hours he (Mr. M.) came out and told me amongst other contractors the following, viz: "Gentlemen, you may all retire, Mr. Phelps has taken the whole of the Deep Cut."—I said to Mr. Merritt "are you such a man as that after making me the promises you have"—he turned away as though he did not hear me, with an air of disdain. I turned to Hathaway and said "Mr. Merritt has coaxed me out of \$2,000." I would not have given up my contract for that sum: that was the first time I had been deceived by him under the Welland Canal. I then was entirely thrown out of the work, and after some time I hired my four sons, six yoke of oxen, two span of horses, and myself, to Mr. Phelps for any thing he would give me. As soon as Mr. Phelps could conveniently turn round he discharged me, and then I had my living to seek other ways.— For that month's work in which Mr. Merritt induced me to sign the paper I had cleared, free of all expense, \$600.

After the death of Hartwell, I was persuaded by the Agent and Directors of the Company to take my teams and sons from Monson at \$5.50 per day to assist in finishing Hartwell's job. I worked about two months and a half, and I paid out \$624 96; also boarded a great many men, and my own services for the benefit of the canal, and never received a dollar for it. This is the second decision of the Com-

pany. At the end of that job my wife took sick and died, and I was obliged to borrow \$20 to bear the necessary expenses of her burial. I was left without one single shilling—and I have not received one farthing for all the outlay on that job of Hartwell's from that time to the present.

In the Spring of 1831 I took another contract on the Gravelly Bay line of Sections 10 and 11, as many others did-We all failed, and all the rest of the contractors gave up their jobs, and many of them retook them again at an advanced price: I offered to give up mine at the same time and pay the forfeit which my contract demanded ;-Mr. Merritt, Major Randal, and Col. Warren, were the only Directors present, at the same time they persuaded me to go on with my contract and I should be as well used as they that gave it up and re-took it. I told them if that was the case I would finish my job if I lost \$1,000 on it—as I had finished every other contract I would also finish that—and for which according to said promise I have never had any remuneration yet, and indeed had to sue the Company for the amount due me according to the original contract. The reason of my wanting to give up the said job was on account of having so much more water than was expected, as may be seen on referring to the annual Report of the Board of Directors of 1832, page 13, viz:

"From various delays in exploring the different routes the work was not put under contract until late in the season; and very little progress was made in it, from the heavy rains which prevailed during that year, and the peculiar situation of the route, which could not be drained until back ditches were formed mearly the whole extent of the cut; in consequence of which, together with the low price at which the work was taken, every contractor on the line, with one exception, failed to finish this work, which had to be re-let to other contractors."

SATURDAY, 12th March, 1836.

Committee met.

### PRESENT.

James Edward Small, Esq., Chairman.
Messieurs Chisholm.
Gibson,
McDonell,
Parke,
Roblin, and
Shaver,—7.

FRANCIS HINCKS, Esq. called in and examined.

## [By Mr. MACKENZIE.]

364. You have been employed with James Young, Esq., to balance the Welland Canal Company's books, and to examine into certain charges I had made respecting the financial management of the Company's affairs?—I have.

365. Has there been a regular cash account kept by the Company of the cash transactions, and do you consider such an account or book as an indispensable requisite to a regular system of accounts?—There has not been such an account kept, and I think such an account indispensable to such a concern as the Welland Canal Company.

366. Do you consider that the books of the Welland Canal have been kept on the Italian method by Double Entry?—Only in part.

867. Do you find that the petry books kept for the convenience of making settlements with contractors, agree with the regular books of account in their results?—They very often differ materially.

368. In what respects do they disagree?—In examining the accounts of individuals in the Leger, which ought to show the true state of the account, I found different sums charged on the great leger from what was charged to the same party in the petty leger, both on the debter and creditor side.

369. Do you find the vouchers of such a doubtful character that it is often of little service to have reference to them?—Many of the receipts and vouchers are in the hand-writing of the Secretary of the Company, and executed by the persons professing to have given the same with a mark only, and without any witness to verify the same; and there are some large sums for which there are no vouchers, particularly those paid out of the toil and forwarding.

370. Is the expenditure of £579 12s. 3d. of a balance of Grand River money, first charged in the great leger to George Keefer, but which it appears by that leger and the cash journal, he never got, satisfactorily accounted for by the Company or its officers in any way? Or does the statement of Mosers. Bowery & Burns, since approved of by the Board of Directors, shew that this money has been satisfactorily accounted for?—I consider the entry to have been improperly made, and that the manner for expending it, as stated in Mesers. Bowery & Burns' Report, is unsatisfactory. It is impossible to say whether that particular sum, as stated in the former part of the question, remains unaccounted for—it will depend upon the balance of the cash account when all the alterations are made.

371. The balance sheet presented to the House of Assembly for 1832, and now shown you, states the whole £1370 2s. 03d. borrowed from the Bank of Upper Canada to pay the claimants on the Grand River, to have been appropriated for that purpose—was that a true statement?—It was not. £1370 2s. 3d. appears in the balance-sheet as paid to Mr. Keefer—it is not correct; as it appears by an entry on the books on the 17th June in the following year, that Mr. Keefer never got the whole of the money in question, that he only got £790 10s.

372. In the case of the Grand River moneys, and many others of a similar nature, are not the Company's books of account full of false and erroneous entries?—There are a great many of what I conceive to be false and erroneous entries. The sum last mentioned is the only one I have noticed as being connected with the Grand River moneys.

373. The sum of £149 12s. 8½d. was paid Mr. Merritt in 1832 out of the tolls, on his salary; and the sums of £37 10d., £40 11s. 6d., and £11 5s. 7d. were also paid him on account of his salary in the same year. He was further allowed interest on arrears of salary for that year. These sums amount to £238 19s. 9½d., paid Mr. Merritt three or four years ago. Has he been charged with any part of this money in any way or shape on the books of account up to this day ?—The sum of £149 12s. 8 1-2d. was paid to Mr. Merritt, and there was an order of the Board that he should be charged with it; he is not so charged, but that sum is charged to toll at the end of the year 1835. 2d. The sum of £89 7s. 1d. is charged to salaries, Nov. 1832, as paid to Mr. Merritt, but this sum is not deducted from his next quarter's salary. Mr. Merritt was paid interest on the balance of his account after the time the above-mentioned sums were paid.

374. Was not Mr. Merritt himself the Secretary of the Company from June till the latter part of Nov. 1832?—It appears by the minutes of the Board that Mr. Merritt was appointed Secretary, but I see no proof in the books that he acted as such. It appears by a contract placed in my.hand, dated Sept. 1832, that Mr. Merritt signed the same as Secretary to the Company.

375. I would now ask you, as an accountant, whether out of an income of £400 a year, which was Mr. Merritt's salary in 1832, you consider it probable that a man could have been paid on his salary in one year about a thousand dollars without knowing it either then or since?—I consider he could not.

376. Mr. Merritt is entered by the clerks as having received salary at the rate of £400 a year sa agent, from the first of Jan. 1834, although the office was vacan,, and as such offered to W. B. Robinson, Esq., on the 5th of Feb. thereafter, and there is no order of the Board to authorise such payment. Is not this an overcharge?—I could see no order for his being paid previous to his appointment. It appears to be an overcharge.

377. There is an entry of \$30 stated as having been paid to Mr. Clark under the title of "Salaries," in Nov. 1832. Does not the fall salary appear to have been paid Mr. Clark over and above this sum 7—Yes.

378. Was not £75 paid out of the tolls of 1832 to Thomas Merritt, Jr., and not only charged to him, but he even allowed interest on his account in 1833-4, as if he had received no such payment? And is not this sum only charged to him last Dec., and also the £50 not charged to him through the crusure, chargeable to him with interest?--Yes.

379. Were the accounts of the tolls and forwarding honestly and fairly entered on the Company's books for the years 1830, 1831, and 1832, so as to enable the officers to shew correct and accurate balances of their accounts? Or were these accounts for the greater part withheld from the books of account until Dec. last, and then entered defectively and improperly, and so as not to shew the actual sums due by their efficors?—The accounts of the toll and forwarding for the years 1830, 1831, and 1832, have not been fully entered on the books in Dec 1835, and then upwards of £1000 received for forwarding in the years 1830 and 1831, have been short-entered, for which, however, the forwarding agent (Mr. Clark) hands in an account of expenditure for forwarding, within £254 of the amount, about which sum he states having been received by the then Secretary (Mr. Black.)

380. I have stated the difference or balance of cash in hand in the Company's coffers from tolls and forwarding as being more than they had entered it on their books by the sum of £782 1s. 4d., after making Mr. Merritt debtor to cash for the £149 12s. 8d. he had in 1832. Is the defection as I have stated it, and if so, he pleased to state the reasons ?—The balance on the toll accounts for 1832, stated by you, is £782 4s. 4d. is I conceive, correct, and arises from Mr. Young and myself in our first balance of the books having given toll account credit for the amount charged in the cash journal, as paid from toll, while it appears that the sums paid to Yates of £300, £447 17s. 10d. for Steamboat Peagock, and some smaller ones, were already charged to toll account on the books of the Company. It appears these sums are first charged in cash journal in Nov. 1832, and are again charged in Dec. 1835 in same book.

381. Mr. Clark has received a credit of nearly £700 as payments made out of the proceeds of toll and forwarding for 1830 and 1831 to the Schooners Canadian and Presperity. Was he able to produce any vouchers or receipts to shew that he was entitled to a credit for any part of that sum, or did he shew that his accounts were ever credited by the Board of Directors for these transactions which occurred about four years ago?—Mr. Clark takes credit for £716 4s., disbursed out of the toll and forwarding of 1830 and 1831, as paid for freight to the Schooners Canadian and Prosperity, for which he has no vouchers or receipts, but there is a statement in detail of the amounts credited to those vessels for each trip, in a toll book for that year—there is not any particular order of the Board for the payment of those sums, but the Company were acting as forwarding agents at the time.

382. Did you remember who is stated on the books to have been the owner of the Prosperity at that time?—I do not know that there is any statement on the books of who was the part owner, but the balance due to the Prosperity appears to have been carried to the credit of Mr. Merritt; and Mr. Clark stated that Mr. Merritt was the part owner.

383. Can you state the nature of the agreement made with the Peacock steamer, the sum paid for a deficiency of returns, and whether this deficiency is not part of it thrice charged on the Company's books, and the other part of it twice?—It appears on the 29th of March, 1830, an agreement was entered into between Mr. Reed of Eric and Mr Merritt, that he (Mr. Merritt) was to pay \$2500 for the use of the Steamboat for the season. On the second of June following there is an order of the Board to charter her, if got for \$2000 or less, for the use of the Company. She does not appear to have been employed until July, and the amount paid her was \$1666 66 cents; there is only the balance of her account carried into the books, which was, as I have before stated, charged twice to toll, the sum of £79 16s. 11d. paid for wood is included in the amount charged as lost by her; this sum was already charged to the persons who furnished the wood—Silas St. John, Coulter, and Watson, so that this amount appears to have been charged three times to the Company.

sames to the Company.

384. In folio 328 of the cash journal (Dec. 1835) £50 5s.
78d. (a sum within one farthing of the journal entry respecting which the T. Merritt erasure took place) is debited to toll, as toll on canal boats employed in transit in 1830 and 1831, which sum does not appear to have been credited to toll, or to have made part of the gross receipts of those years. Was any reasongiven by Mr. Clark for deducting these sums from the tolls of these years, or any vouchers shewn? and under the circumstances is it a charge which ought to be allowed to an officer?—The sum of £50 5s. 78d is charged as tell paid on canal boats employed in transit, for which Mr. Clark could shew no voucher, but said he paid it—that amount does not appear to have been credited to toll. I am not prepared to say that Mr. Clark should be refused

credit for that particular amount, under the circumstance that the books have been always irregularly kept, and the Directors it is to be presumed not having been very particular in insisting on proper vouchers.

385. The sum of £38 15s. is debited to toll in the same page of the Co.'s cash journal (328) as "amount paid toll on stone for dam and tow path." Is it not entered under the same circumstances as the £50 5s. 7\frac{3}{2}d. in the last question? Or has Mr. Clark shown that that sum was paid or allowed to any person or persons whatever?—It is entered under precisely the same circumstances as the sum mentioned in the last question.

[BY COMMITTEE.]

386. Can you find where the entries £50 5s. 74d. and £28 15s. were taken from?-No.

[By Mr. Mackenzie.]

387. Are you prepared to offer an opinion as to the manner in which Mr. Clark's toll and forwarding accounts are kept and made out?—I think they have been very irregularly kept and made out.

388. Are not the entries for the toll and forwarding accounts of the Company in general, very confusedly and improperly made on the books of account?—The entries, with the exception of those for the years 1834, and 1835 have been very confusedly and improperly kept.

389. Has any reason been assigned to you why the receipts and payments from toll and forwarding in 1830 and 31, and of tolls in 1832 and 1833, were delayed to be entered in the books of the Company in a great measure until the month of December 1835?—No there has not; I am not aware that I ever asked the question.

390. The Directors have, at a late Board, approved of Messrs-Bowery and Burns' Report on the Company's financial manage, ment. I would ask whether, after balancing the books as they were handed to you by the Company's officers, and since hearing my objections to their accuracy, are you enabled to express an opinion of their character—are they not disreputable to the Board of Directors of a great corporation like the Welland Canal Company?—From what I have heard of the manner in which Messrs. Bowery and Burns examined the books I do not think it possible that they could have formed a correct opinion as to the manner in which the money was accounted for, which appeared not to have been charged to cash. The books, particularly at the end of the year 1833, were in such confusion that I do not think any accountant could satisfy himself as to the effect of the entries objected to. I do not think that the books have been kept in such a manner as is creditable to the Company.

391. Would you have the goodness to state the way in which the proceeds of the £1340 7s. paid to Theophilus Brundage for square timber in 1825, are accounted for on the books or whether they are at all accounted for?—I see no statement on the books accounting for the £1340 7s. which at present stands at the debit of Theophilus Brundage. It appears by the minutes and other documents that this money was paid him for timber for the tunnel, but he has as yet got no credit for any estimate or timber delivered, nor could I find from the books of account that there was any credit for that timber.

MONDAY, 14th March, 1836.

Committee met.

JAMES E. SMALL, Esq. Chairman.
Messieurs Chisholm,
McDonell,

Parke, Roblin, Shaver.

Mr. Hincks, again called

[BY MR. MACKENZIE.]

392. Has not Mr. Clark a credit on the Company's books in 1831 for £85 as paid for horses forage &c.

—Is there any detailed statement to shew who got the amount, or that any one got it, or any voucher?—

There is such a credit and Mr. Clark could not give any detailed statement shewing who got the amount, nor is there any voucher.

393. Mr. Merritt appears to have received, several years ago £600 of principal, £30 of interest for awards, and £678 for repairs &c. to his mill—Did it appear by the examination of the deeds in the possession of the Secretary that Mr. Merritt had conveyed that property to the Company?—There was no deed from Mr. Merritt among the deeds which I was shown as those belonging to the Company. The Secretary stated that he did not know of any deed.

394. Has it appeared to you that the sum of £2000 borrowed on the 14th of February, 1834 of the Commercial Bank, and for which £30 11s. 6d. of interest and £10 of agency are charged to the Canal Company was applied to the purposes of the Company either in whole or in part, or is the loan entered in the Company's regular books?—The sum of £40-11s. 6d. is charged as interest and agency as paid to the Commercial Bank, and 1 see no entry on the books of money being borrowed from that Bank.

395. Does it appear to you that a regular and correct balance has ever been made of the Company's books since the commencement of their operations until now?—or that even a trial balance has been taken to test the accuracy of their debts and credits?—No.

396. Are the \$30,000 of provincial stock of 1833 given to Messrs. Macauley, Robinson, and Shade, to expend on the Canal in that year entered up to this date on the Canal Company's Books?—or the details of the expenditure of the money?—No.

397. Is the charge by Mr. Walker of Quebec of one half per cent for receiving and paying the £25,000 Lower Canada stock, and the charges of per centage by the New York and Canada agents fair and reasonable?—I consider Mr. Walker's charge of ½ per cent for collecting £25,000 from the Government of Lower Canada to be too much; his charge of ½ per cent for collecting the stock of individuals in Lower Canada is also I think too high, but of this it is difficult to form an opinion without knowing more of the circumstances, the same remark applies to the charge of 1 per cent by Messrs. Yates & McIntyre.

398. Would you have the goodness to state to this committee the effects of the disappearance of the great general estimate of £28,000 and upwards for November 1832, and which is entered in the minutes of 1833 without mentioning its amount or giving any details?—A person examining the estimates is obliged to assume that the copy is correct.

399. After carefully balancing the Welland Canal Company's Books of account with Mr. Young, and examining the several improper entries to which I have since directed your and his attention, and after hearing such explanations as the officers of the Company have thought fit to offer on the several items, I wish you would have the goodness to state the amount of loss the Company would have sustained, or were liable to sustain in consequence of these improper entries, had they not been pointed out-I wish this question to be considered as having no reference to the state of Mr. Robinson's accounts, as you have not yet fully examined them !- I think about £1700, which includes amounts over credited to individuals for which no satisfactory explanation has been as yet given, and sums charged twice over; after deducting sundry errors which had been made against the Company.

400. Express your opinion on the supposed debt of £30 5s. 5d. by Beattie & Co. for which the officers have obtained a credit in folio 189 of the leger without shewing any corresponding estimate of the Board?—There appears by the books to have been paid to Beattie & Co. in the year 1829 a sum of £30-5s. 5d. for which they have no credit it stands at present to their debit on the books, though there have been several transactions with them since which have been closed.

401. Have you seen any entry on the Books of account to show that George Keefer Esq. has ever paid any rent for the privilege he has enjoyed of water to turn four run of stones, out of the canal since it was first opened !—No.

402. What amount of rent appears by the books to have been received by the Welland Canal Company from the Hydraulic privileges from the opening of the Canal to the present time —£454 7s. 9½d. since the Company repurchased the works from the Hydraulic Company and £100 some years ago, being the rent of a mill.

403. Mr. Clark was appointed by the Welland Canal Company first bookkeeper and then Secretary;—Is there any part of the books of the Company—I mean the Cash and stock journals and great legers in his hand writing—so far as these books have come under your observation?—No.

404. A large sum (I think £100 and upwards) is charged the Company as payments made in 1834 for the detention of vessels, which has not been deducted—Have the Company's officers been able to produce any vouchera to shew that this money was so paid?—There were no vouchers for the sums paid for the detention of vessels.

405. In your balance sheet and great leger 1 find the Rev. Michael Harris entered as creditor of the Company for £25, Barton Farr for £37 10s., and Jesse Wilson for £37 1s. 1d.—were not these sums paid the parties long ago? and is it not elsewhere so stated?—The several amounts stated in this question have been paid and charged to awards and consequently should not now be at the credit of the parties.

406. How much money had all the directors paid in on their subscribed canal stock from the commencement in May 1824 to the 26th day of March 1825?—£15 12s. 6d.

407. State the way in which the account of the sale and repurchase of the Hydraulic privileges and canal lands appear on the Company's Books?—The original sale of the lands and privileges for £25,000 is not entered in the Bocks of the Company, the first years interest is charged to Mr. McDonell but the second is only entered in a petty book, none of the interest appears to have been paid in cash by the Hydraulic Company £968 was allowed by order of the Board out of the first year's interest and £500 out of the second, the balance of the second year's interest £1333 5s. is settled by a credit being given Mr. McDonnell for £1575 interest on £17,500 Bonds given to the Hydraulic Company for the repurchase.

408. Can you describe the way in which the £25,-700 mortgage from Mr. Alexander McDonell, agent to the Hydraulic Company, to the Canal Company, is executed?—The mortgage which I saw appears to be executed in blank, both as to the day and

month when the principal and interest should be payable—the instrument is dated the 4th day of April 1833—And the principal payable on the day of in the year 1843.

409. £137 10s. of a balance is entered against William Orderly and then this balance is omitted to be carried down, and the following year Orderly is paid by a note £70 or £80 of a supposed difference then appearing at his credit, seeing that the petty leger differs from the regular books in this case, does it appear to you probable that Orderly was paid £132 by mistake or that the vouchers shewn to sup port this improper account are of a creditable character !- The sum of £137 10s. appears at the debit of William Orderly on the books since the year 1832there have been several transactions with him since that time-the old balance has not been brought forward, and I think from examining the petty leger that there is that amount charged to him which he never got, supposing the estimate to be correctly credited to him. There are vouchers for the sums of £100 and £37 10s. but not for the whole of the payments which he is charged with; the vouchers have no signature but a cross and no witness.

- 410. Have you examined John Donaldson,s accounts and do you observe a credit of £58 18s. 10d. he was not entitled to in 1832, besides the sum of £200 and upwards for which there was no estimate, except a paper put in, in 1835?—Donaldson is credited £58 18s. 10d. more than his estimate comes to, the original estimate for November 1832 is missing and part of Donaldson's credit in that estimate is on a slip of paper attached to the estimate book, amounting to £299 7s. 8d. I cannot tell when that paper, was attached to it—The over credit above stated is supposing that the amount on the slip of paper is correct.
- 411. Are not Johnson Orr's estimates over stated in the Company's journal and great leger and does not the petty books plainly shew that there are £16 which he is charged with, which he was not entitled to and never received!—The estimates are overcredited and the petty book shews I think that £16 is charged to Orr which he did not receive.
- 412. Are there not £25 entered as paid to Engineers salaries on the great leger for which there is no voucher to show that it was ever paid, or to whom, while the whole of the salaries are settled for by other payments?—Is it not an erroneous entry?—There is £25 charged to salaries for which I have seen no voucher, but I cannot positively state that the whole of the Engineers salaries are settled for by other payments, it was at first improperly charged to salaries instead of Engineers expenses, and it does not state to whom or for what it was paid.
- 413. You have entered on the general balance sheet of the Company's affairs, made out by yourself and Mr. Young, that John Lymburner is a creditor of the Company for £62 10, and so he appears to be, on the authority of the great leger, foho 187; but is not this credit altogether erroneous, and was not Lymburner paid in full long ago?—Yes. Lymburner has been paid before, and the amount charged to awards, there should, therefore, be no sum at his credit, but the balance is not carried to the new leger, and is therefore, to be presumed that the

Company would not have paid him again, though the amount remains at his credit.

- 414. Arthur Stone is entered on the Company's leger, folio 188, and in your balance sheet, as a creditor of the Company for a balance of £23 10—was not more than his claim paid him long ago, so as to leave him, in reality, a debtor at this time for \$6?—It is a similar case to the last, and Shore is a debtor for £1 10.
- 415. Can you describe the effect of the erasure of a line on Oliver Pholps' accounts, by which a balance of £95 11 4 appears to have been extinguished in folio 157 of the great leger?—In Mr. Phelp's account in the leger a sum of £95 10 5 appears to have been erased from the credit side of the account, the amounts on the debit side are composed of several items, of which, the above forms a part, and which from a memorandum in the estimate book, appears to have been loans made to Phelps and re-paid by him—if such loans were not repaid, Mr. Phelps still owes the above balance.
- 416. John Boyle was a creditor of the Company in September, 1831, for an estimate of work done, the amount of which was £28 2 9—the Company placed funds in Mr. Black's hands to pay him in full, and Mr. Black immediately entered on the leger, fo lio 174, that he had done so—and in petty leger, that he had only paid £10, in part. Is not this sum of £18 2 9 again charged to the Company in the regular books, a note given for it in 1833, and paid out of the funds of the Company in 1834, and a new account opened with Boyle in the great leger therefor, as if it was a new transaction?—Yes. It is charged twice.
- 417. Is the statement given in by me, entitled "a Specimen of the Welland Canal Entries" a correct account in the case to which it refers, so far as the several entries are taken from the books?—Yes. It is correct.
- 418. Is the charge of £500 by J.B. Yates, for obtaining of the United States Bank the loan of £50,000 to the Welland Canal Company, on the credit of the Province, a fair business transaction, or is it exhorbitant and unreasonable?—I know nothing of the peculiar circumstances of the transaction referred to, but I think that for negotiating money of so large an amount when no personal responsibility was incurred, that the commission should not have exceeded \$\frac{1}{2}\$ per cent., which is the commission usually charged by bankers and money brokers.
- 419. You perceive that the firm of Jack Toyne & Co. were paid in full of all demands against the Company in 1833, by notes, payable with interest, and which have been since paid them. Have they not, also, or some person for them, got a note for £24 1, and been paid that sum (with interest) for which they had no claim, and is it not entered in the cash journal as if it had been legerized, and yet, not legerized, nor any attempt made to detain it from Toyne and Co. in their late transactions with the Company?—The sum of £24 1 is due by Toyne & Co. from an error in not posting that amount to their debit, in consequence of which, they were paid a second time.
- his credit, but the balance is not carried to the new leger, and, is, therefore, to be presumed that the Clark against the Company for Kenneth Reads.

(page 97, book C.,) a just and proper one ?-I think not.

- 421. Has not an improper charge of £12 5, been made against the Company by Mr. Clark in his claim for disbursements paid the late Mr. Randal, as per account, page 36, book B.?—There appears to be that amount; part of a sum of £32 14, charged as paid to Mr. Randal out of the tolls of 1830 and 1831, for which Mr. Clark could give no satisfactory account or explanation.
- 422. In page 257 of the cash journal, there is an entry duly checked as if entered in page 402 of the great leger, of eash £50 and cash 5s 7½d, paid Thomas Merritt, Junior, from the tolls of 1833, and which £50 were duly paid him; this appears to have been duly entered in the leger, but is neatly crased, and the 5s 7½d only left—was not this £50 improperly obliterated from the leger?—The sum of £50 appears to have been crased in the leger in Thomas Merritt's account, which appears to have been regularly posted from the cash journal.
- 423. Has not £15 5, regularly paid to George Smith, toll collector, been improperly charged a second time to the Company?—Mr. Smith appears to have been paid salary as a toll collector, during the year 1833, which is properly charged to the toll of that year, on the 7th of August of the same year, contingencies is charged with the half of two months' salary up to 1st of August, £15 5. I cannot state that that salary is the same that is charged elsewhere.
- 424. There is a sum of £45 15 6 charged in the old leger as a balance for cash advanced to Thomas McChesney at Port Colborne, in 1832; and it is stated in the cash journal, that this sum was paid McChesney by order of the Board. Were the officer able to shew that there was any such order of the Board, or is not the debit of this money to McChesney improper—is it not cash for which the officers of the Company are themselves answerable?—Yes. It should be to the debit of cash instead of McChesney, and it is a sum for which the officers of the Company should be themselves liable.
- 425. Are there many erasures in the Company's books—and, if yea—What is the effect produced by them, or what difficulties do they present to you, especially, where a whole line is erased from the leger, or an erasure made on the cash journal, a book of original entries?—There are a good many erasures in the books, but I do not think that all erasures are improper. I think they would be found in almost all books of account, more or less. I am not aware that we had many difficulties in consequence of erasures, beyond what have been already mentioned.
- 426. The sum of £189 13 6 appears at the credit of the contingent account on the leger. Is not this at variance with the balance sheet given in, in 1830, by the difference between that sum and £213 8 6? and can you account for the erasure on the books in this case?—It is the case, but I cannot account for the erasure.
- 427. Express the opinion you have of the entry of £50, as a supposed credit to James Sloan, on his harbor account, from folio 97 to folio 167, and on the erasures in these folios, and state the effect upon the balance due by Sloan by this £50 entry?—There

- appears to be £50 improperly credited to Sloan, and consequently, he appears to owe £50 more than is brought down on the books.
- 428. Is not the £31 5 of interest on the £250 bill, of the 9th February, 1832, an over charge or charge made against the Company twice over for the same service?—It is charged twice over.
- 429. Are there not errors of £24 9 and £64 11. 3 of interest paid and not charged, in 1834?—Those sums appear to have been taken out of the Bank to pay interest on two notes, and it does not appear that they were ever charged to interest account.
- 430. Is it not evident that an improper or erroneous charge is made against the Company, in the matter of Robert Campbell, as per folios 122 and 126 of the minutes?—It appears that Mr. Campbell is credited £76 8 6 more than allowed by order of the Board.
- 431. In folio 228, great leger, £11 19 6, appears to me to be placed at the credit of Daly & Co. more than the estimate of November, 1832 sanctioned.—Is this a fact!—It is a fact, that the sum is over credited
- 432. Have not large sums been allowed for alledged damages on goods forwarded by the Company without any order of the of Board and without any vouchers of the transactions?—About £80 is charged in the toll expenditure for 1830 and 1831, as paid for damage on ashes and tobacco, forwarded by the Company, for which the forwarding agent (Mr. Clark) could shew no order of the Board.
- 433. Does not the practice of the officers, of entering sums voted by the Board of Directors, as if they had been immediately paid to contractors (as in the case of Boyle,) while, in fact, they had not been so paid to them, give room for great errors in the financial management?—I think it does.
- 434. Have you not found many accounts of individuals which were marked in the journal as posted, and yet were not properly posted?—There are but few, if any.
- 435. Did not David Thompson get a credit for £166 11 without the proper cash corresponding entry?—Yes.
- 436. In page 246, of the cash journal, contingencies are charged with £17 1 2 for the detention of the schooner Cartwright, while it appears by page 33 of the toll book that £17 18 10 were paid in cash as an advance to the Cartwright, ought not the £17 1 2 to be at the debit of the vessel and not of contingencies?—It appears to me that, that sum is improperly charged to contingencies. It should be at the debit of the vessel.
- 437. Are there not about £20 charged thrice in the cash journal, as paid from the Company's funds for Yates' pamphlets in 1834, and only one £20 corrected, so that there remains a double charge of £20 against the Company in this matter?—Yes.

[Witness withdrew.]

Mr. John Dew, Engineer, called in and examined.
[By Mr. Mackenzie.]

438. You have been referred to by Mr. John Leys in evidence given by him relative to the Berm Bank contract by Rose and

Thomas Merritt, Junior. What do you know of Rose's proceedings in connexion with Merriit, relative to that contract?—I know little of the embankment referred to, but frequently saw the one that crosses close to Dunnville. I heard Mr. Rose say that he made a very good job it, and that he had got his money and cleared within about 3 months I think he said either £150 or £200. I saw him the day on which he got his last payment as I understood—he seemed highly pleased at the result of his undertaking. I remarked, I understand you have the other job, he said he had but not all in his own hands, he had a partner in the concern.—I said I thought he had better have taken it all to himself, than have a partner—he said he was more certain of getting the contract in conjunction with his partner who I understood to be Mr. Thomas Merritt. The impression on my mind was at the time that he (Rose) expected by receiving T. Merritt as his partner, that he (Merritt) would have more partiality shewn him than he would. He alluded to the contract across Mr. Boulton's land.

#### By Mr. MERRITT.]

- 439. What time did this conversation with Rose occur?-I think about the middle of September, 1834, but I am not sure.
- 440. Did he (Rose) say Thomas Merritt was concerned with him in that contract?—No. I understood he was not concerned with him in that contract.
- 441. Did you understand he was there at work on that contract?—I believe they had not commenced.
- 442. Did you understand from Rose there were any logs in the embankment alluded to ?—Never.

[Witness withdrew.]

FRIDAY, 15th March, 1836.

Committee met.

PRESENT:

James Edward Small, Esquire, Chairman.

Messieurs Chisholm,

Gibson,
McDonell,
Roblin,
Shaver, and
Thorburn—7.

JAMES Young, Esquire, called in and examined.

The Clerk, by order of the committee, read to witness the evidence given by Mr. Hincks.

The examination of the witness was then proceeded in.

#### [BY MR. MACKENZIE.]

443. You have heard the evidence of Mr. Hincks and have been associated with him as an accountant in the examination of my charges against the Company's books, and in the balancing of those books by order of the committee. Do you concur with Mr. Hincks as to the facts he has stated and the opinions he has expressed. Or if not, wherein do you dissent from his views?—I do concur in the answers by Mr. Hincks; (Mr. H.) and myself have examined the books together by order of the committee and my opinion is substantially the same in all material respects. We were generally satisfied as to a fact before we made a note of it.

#### [BY COMMITTEE.]

444. Do you know any question that might be put to you that would tend to give further information to the committee as the result of your examination of the books and accounts of the Welland Canal Company?—Mr. Hincks and I have been called principally to the examination of those items pointed out by Mr. Mackenzie—in investigating these, we have

also noticed any irregularities that appeared either in favor or against the Company.

[Witness withdrew.]

JAMES BLACK, Esquire, called in and examined.

## [By Mr. MACKENZIE.]

- 445. How long were you Secretary to the Welland Canal Company !—Five years and one month.
- 446. What were your prescribed duties as Secretary?—To keep the books, receive and pay out the monies.
- 447. Why did you never keep a regular cash book shewing the actual receipts and payments made?

  —When I came to the office I began by opening a cash account in the leger and after making two or three entries was informed no cash account was to be kept, except at the Banks—there had been none previously kept, I think Mr. Wenham who acted as Scoretary before me, gave me this information.
- 448. Was it not a law of the Corporation passed in 1824, that no money should be paid out by the Treasurer until the payment had been sanctioned by the Board of Directors?—I cannot recollect. It was a general understanding that that was the case.
- 449. When did you leave the Company's service as Secretary—and who succeeded you in that office?—I think it was in June, 1832. Mr. Merritt was appointed Secretary, and Mr. Clark was appointed Book-keeper.
- 450. Why have you never kept a bill book seeing you dealt so extensively in bills?—There never was one kept. I know of no reason why, except that the business of the Company was done through the Banks and they did not recognize business of that nature.
- 451. Have you never kept any regular book where your daily receipts and actual disbursements were invariably noted with the dates, and this book balanced every evening, week, or month?—I know of no other than my own private cash book.
- 452. Did not your system of keeping accounts occasion a great many false or fictitious entries?—
  There might be some fictitious entries in consequence of the pecuniary difficulties of the Company—monies that were advanced for a particular purpose if not so appropriated were used for the other purposes of the Company—I never used the power of appropriating the monies of the Company without authority.
- 453. And when you charged the uses of money in this way did you invariably correct the books so that the Directors on inspecting the books might see how matters really stood —No. I did not. It would always appear by our own cash account.
- 454. Then I am to infer that while the books would shew to a Director fictitious entries, the only way in which he could find out the reality would be to inspect your private cash account?—Yes, this private cash account was always exposed to the inspection of the Directors. This cash book and petty leger were kept that I might be able to explain any account to the satisfaction of the Directors.

- 455. Was Mr. Phelps' contract for the Deep Cut missing when you was Secretary to the Canal Company?—I do not know.
- 456. Do you know the reason why Mr. Chief Justice Robinson's £100 donation and Mr. H. J. Boulton's £100 donation to the Welland Canal does not appear on the books along with that of the Catholic Bishop of Quebec?—It is before my time, I know noting of it.
- 457. Was Smith, Ward & Co's. bond in favor of the Welland Canal Company for £3000 dated 15th May, 1826, duly paid with interest !—I do remember there being such a thing, but I cannot answer that question.
- 458. Do you know what the entry means by which in the Journal the Secretary is credited with 1864.
  7s. while in the Leger p. 113 the credit is reduced to 1002.?—It is after my time. The face of it appears irregular.
- 459. Where is the original estimate or bill of supply for Dec. 1931, and amounting to several thousands of pounds?—There was an estimate missing, but I know nothing of it.
- 460. Mr. Barrett's estimate of 1st of May, 1832, states the last estimate of Calbraith and Lax thus—"Calbraith and Lax, balance due on old canal enlargement \$2104 29cts." Why are no particulars given in this as in other cases?—It did not rest with me to give particulars of the estimate, I merely examined the accounts and checked the calculations.
- 461. Do you consider that the books of the Welland Canal have been kept in the Italian method by double entry?—I cannot answer that—I kept them in the same way that my predecessor did.
- 462. I wish you to shew the entries you have referred to as containing the tolls and forwarding of 1830 and 1831 ?—I do not know that I can.
- 463. Are the many thousand pounds of estimates entered upon the same principle as Mr. Wenham, namely by an entry of a debtor and a creditor ?—I believe they are.
- 464. Were the accounts of tolls and forwarding honestly and fairly entered on the Company's books for the year 1830, 1831, 'and 1832, so as to enable the officers to shew correct and accurate balances of their accounts, or were these accounts for the greater part withheld from the books of account until December last and then entered defectively and improperly, and so as not to shew the actual sums due by these officers?—I know nothing respecting the toll accounts; I believe they were entered regularly and correctly during my time as far as they came into my hands. I received 281l. 12s 11d. and paid 139l. 14s 11½d.
- 465. Are not the entries for the toll and forwarding accounts of the Company in general very confusedly and improperly made on the books of account?—I continued some months at the request of Mr. Dunn in the office after I tendered my resignation, but I refused to take any cognizance of the toll and forwarding accounts.
- 466. Would you have the goodness to state the way in which the proceeds of the 1340l. 17s. paid to Theophilus Brundage for square timber in 1825

- are accounted for on the books, or whether they are at all accounted for !—I know nothing about it—the transaction was before my time.
- 467. Can you describe the effects of the erasure of a line on Oliver Phelps' accounts by which a balance of 95l. 11s 4d appears to have been extinguished in folio 157 of the great leger?—I have been trying to, but I cannot account for the erasure. I do not recollect having made it myself, and I lament it is so crased, because it thereby appears difficult to account for the said amount.
- 468. John Boyle was a creditor of the Company in September 1831 for an estimate of work done, the amount of which was 28%. 2s 9d. The Company placed funds in your hands to pay him in full, and you immediately entered on the leger, folio 174 that he had done so; and in the petty leger that you had only paid 10% in part. Is not this sum of 18%. 2s 9d again charged to the Company in the regular books; a note given for it in 1833 and paid out of the funds of the Company in 1834, and a new account opened with Boyle in the great leger therefor as if it was a new transaction?—I have given credit to the Company for that amount in my balance. I accounted for the balance to Mr. Clark who gave credit in a new account to Mr. Boyle for the amount.
- 469. Is it not evident that an improper or erroneous charge is made against the Compuny in the matter of Robert Campbell as per folio 122 and 126 of the minutes?—The order of the Board of the 30th July 1830 was to be 3501. 10s. instead of 2741. 1s 6d. as ordered on the 11th January, which amount of 3501. 10s. was paid Mr. Campbell accordingly.
- 470. Why does that order refer to the order of the 11th of January previous as the authority, and can you produce the voucher for the payment?—I conceive it ought to have said see order of such a day. I am not in possession of the voucher.
- 471. The sum of 1891. 13s 6d appears at the credit of the contingent account on the leger, is not this at variance with the balance sheet given in in 1830 by the difference between that sum and 2131. Ss 6d, and can you account for the erasure in the books in this case?—The above 2131. Ss 6d was the amount of sale of sundries in the hands of Hovey & Ward and charged to the respective purchasers. The transaction took place previously to my appointment and on settling account with T. Merritt & Kennedy for a wagon and ox (amounting to the difference between the two sums) they denied having had them; therefore it was deducted from the Cr. of contingent account and the debit of Kennedy & T. Merritt. With regard to the crasures page 61 journal, it is evident there is no deception, as will appear by the items page 77 and S above referred to.
- 472. Has not Mr. Clark a credit on the Company's books in 1831 for 851. as paid for horses, forage, &c. Is there any detailed statement to shew who got the amount, or that any one got it, or any voucher?—The above was included in the estimate to Nov'r 1, 1831; it was submitted to the Board, approved, and ordered to be paid; the vouchers were no doubt examined at the time, but I have no knowledge of them now.
- 473. Should not your letter book as acting for a corporate body, contain copies of every letter written on business?—Undoubtedly it should.

474. What means the entry in folio 151, cash journal "Bank of U. C. Dr. to interest for 6 months interest on a portion of 25,000% which was not applied; viz: 7,500%, but remained in the Bank as a security for 5 years as a guarantee of 30,000%."—This was for six months interest upon three bills of exchange drawn upon Yates & Co. and negotiated by the Bank of Upper Canada, ordered to be retired as per minute of the Board, Nov. 3rd, 1830; the other part alludes to a matter which was never carried into effect.

475. Express your opinion on the supposed debt of 30l. 5s 5d by Beattie & Co. for which the officers have obtained a credit in folio 189 of the leger without shewing any corresponding estimate of the Board:

June	29,	1829	, Be	atti	was	paid	on	ac-	£17	10	
July	3,	48	Do	).	Ďо.	per	w.	H.		15	Ť
٠.									<b>£</b> 30	5	ð
Nov. July	1, : 24, 1	1829, 1830,	By By	esti	mate, lo	£20 9	12 13	0 5	£30		5

Why it was not entered in the leger to the credit of Beattie & Co. I cannot at this distance of time recollect.

476. Express the opinion you have of the entry of 50% as a supposed credit to James Sloan on his harbor account from folio 97 to folio 167, and on the erasures in these folios; and state the effect upon the balance due by Sloan by this 50% entry?—Mr. Sloan's account was a very intricate one, his work having been performed on several different sections, and by different contractors which occasioned frequent transfers from one to another; a great deal of time was occupied in a final adjustment with him previously to my quitting office, of the result of which he had a copy, by which it appears there was a balance due the Company of 35%. 15s 10d as per estimate book folio 94; had I been applied to at an earlier period I probably might have recollected how this was arranged, but I think it was considered as settled.

Respecting the Peacock steamboat, Smith & Macy's account 447l. 17s 10d wss submitted to the Board, February 2, 1832, examined and allowed. The cord-wood paid by Company was independent of that account and was paid as under:

July 8, 1831, S. St. John, €36 Jennings,... 50 0.0 Coulter,... 37 10 0 Watson, ... 37 10 161 1 3 Sept. 15, Jennings,.. Coulter,.. 18 12 Watson, . 12 12 81 J. Clark, . . Nov. 14, 0 Dec. 23, Coulter,.. 7 13 21 Paid by Mr. Clark Johnson,.. 2 10 0 3 10 Thompson, 0 Reade .... 3 15 9.15 0 281 14 04 477. You entered in the great leger in Nov. and Dec. 1831, 180l. and 51l. 19s 7d as having been paid by you out of certain funds in the United States Bank to the Bank of Upper Canada; also 572l. 10s as having been paid to George Keefer, jun. to pay Grand River claims, and in June 1832, you entered 347l. 12s 3d as having been paid to sundry persons out of the Grand River moneys, it appears that these sums were not so paid, what was your motive for making, and for leaving them in an incorrect state when you ceased to be an officer of the Company.—On Dec'r 18th 1831, I received of the Bank of Upper Canada, 572l. 10s 0d, which was for the time being charged to G. Keefer to pay Grand River claims—but the whole not being required for that purpose it was otherwise disposed of, viz:

To G. Keefer, *Interest paid Bank of U.C. *Sec'y for sundry disburse-	<b>£</b> 340 180	10 0	5			
ments,		19	7	570	10	Λ

"These should have been carried to Cr. G. Keefer.

The sum of 3477. 12s 3d was received by me for sundry claims, viz:

Shotwell, pe	etty lege	er, 3	£ 1	5	0		
P. Carl,	do.	10	5		0		
R. Brown,	do.	39	1	15	0		
do.	do.	"	44	12	3		
J. Burgar,	do.	75	45	0	0		
A. Marr	Secretar	y's acc't,	250		oll		
	•	·  _			<b>—</b> II3	47	12

"This amount was drawn to pay for a lot of land; but which he afterwards declined selling—the amount therefore remained in my hands and is accounted for on my leaving the office. With regard to false entries I know of none.

[The witness withdrew.]

JOHN CLARK, Esq. Secretary to the Welland Canal Company, called in and examined.

#### [By Mr. Mackenzie,]

478. Can you state the nature of the agreement made with the Peacock Steamer, and why £447 10s. the alleged deficiency and her returns are twice charged and £79 16s. 11d. paid for wood is thrice charged to the Company by its officers on the Books although it was only paid once ?- The steamer Peacock was employed by the Company for the purpose of running between Buffalo and Port Robinson, and for towing vessels navigating the canal up the Niagara River, the present route by Port Colborne not being then open-her accounts at the close of the season were settled by the late Secretary Mr. Black, I am not aware of a loss being made up to her, being twice charged against the funds of the Company and deny that such is the case and the charge of wood made against her can no doubt be accounted for by Mr. Black who settled the account.

479. Why did not the Company keep a regular cash account?—There was not a regular cash account kept when I came in the office. I believe the Bank of Upper Canada was considered the Treasurer of the Company under an act of the Legislature. A cash account is now open.

- 480. Are not the books full of false entries where the name of the Bank of Upper Canada is used in transactions they had nothing to do with?—There are no false entries—there are errors, which I always admitted.
- 481. Do you not consider a cash account an indispensible requisite in the correct management of the financial affairs of a canal corporation which has had the expenditure of upwards of £400,000?—I do.
- 482. What do you mean by the following expression in a letter addressed to the late Major Randall dated the 15th October, 1832.—"Yours of the 14th "inst. is before me. It is just as well that you have "not made your cash return to this office, for I am "convinced it would have long ago run out, and not "for extreme cases either."?—At this time the funds of the Company were low, and there were incessant demands made by persons to whom the Company were indebted, I may have supposed that some were paid that could have better waited for their money than others.
- 483. Although by the rule of the 7th August 1833, the tolls are not to merge in with the old accounts or debts, it is provided that the Secretary shall make out and shew a statement of the tolls collected for each month, and shew in detail the expenditure of the same—why was this not done—and why are the tolls of 1833 and 1834 entered in the leger of the tolls of 1930, 1831, and 1832 chiefly omitted, or only the credit part entered !-- in 1831 the Canal first opened for business and to induce carriers to come that route with their boats, vessels &c. the Company undertook the receiving and forwarding, and appointed me their superintendent in that Department, making me alone responsible for the duties—the tolls and transit were connected together in the accounts—the want of experience in the toll collectors then appointed, it being a new thing, and myself being inexperienced, caused much difficulty in the accounts, which circumstance caused delay, and they have not been properly closed to this time. I was repeatedly urged by the Board of Directors to close the accounts, but have not yet entirely done so. The tolls of 1832 have in part merged in the general accounts and debts due by individuals for tolls remain unpaid.
- 484. Notwithstanding the by-law of the Board of Directors there never was once exhibited at the monthly meetings an official and regular statement of money's paid & received by the Company in the month then next preceding, I often complained of this irregular course of procedure, why was it not remedied?

  —I may not have held in mind the nature of the by-law had a statement been called for it would have been readily produced.
- 485. Has not Mr. Yat always had the nomination of a majority of the Canal Board, except at the first election of Directors!—Mr. Yates is an extensive stockholder and holds proxies to a considerable extent—it was in his power to have the greatest number of votes at every election of Directors.
- 486. Was not the Secretary placed exclusively under the control of the President!—Limit not aware of such a by-law.
- 487. When the Company issued notes of hand for the payment of compactors, bearing interest, in 1833, did not they speedily fall to 20, 25, and even 30 per

- ent discount?—I have understood they were selling at a discount, but I do not know at what rate—none were offered to me, nor was I a purchaser.
- 488. Are you aware that the Board has entered into contracts it could not pay, and issued bills payable with interest it was without the means to redeem?—They have entered into contracts without the means in hand to my knowledge of paying—in respect to the latter contracts, the contractors must have been aware that the Company had not then the means on hand—but the prospect of the tolls coming in for another year would no doubt ensure their payment if the Canal is kept open.
- 489. Why is the great estimate of November 1832, amounting to £28,000 or there abouts missing; and from what charge was it taken?—I was Secretary at the time, all papers of the Company are considered to be in my charge—that estimate is missing in the office. I did not take it out, nor have I any knowledge who did. About that time a committee was appointed by the Board to examine Garrison & Little's accounts—this estimate may have been given to them with other papers and not returned, but I have no knowledge that such is the case; there was frequent resort to that estimate by engineers, contractors, and others, and I believe a true copy of it is to be found upon the estimate book of the Company.
- 490. Why were not the contents, particulars, details, or amount of the estimate of November 1832 entered on the minutes when passed in February 1833 as was usual 1—It has been an omission of the Secretary—that is the only way in which I can account for it.
- 491. What means have you of knowing that the paper said to be a true copy of the great estimate of 1832 was so. The paper now shewn to you as such—has it the appearance of being a correct, true, and entire copy of any document whatever?—The book, not the paper now shewn me, is the authorised estimate book of the Company, and I believe the copy of the estimate thereon made of November 1832 to be a true copy from the original—The copy is in the handwriting of Mr. Beaton the book-keeper who could not have had any inducement for making an incorrect copy. The Engineer can best explain how the amounts in the paper attached to that copy of the estimate although forming a part of it, was not entered.
- 492. I perceive you were appointed book-keeper in 1831, and that you have for years had charge of the accounts—why do I never see your handwriting as the book-keeper in the regular books of the Company?—On the appointment of a book-keeper being ordered by the Board J. B. Ystes Esq., one of the principal stockholders, urged me to take that situation, saying if I would consent to do so he would recommend me to the Board of Directors then assembled. I told Mr. Yates that I preferred declining so responsible a situation, and that I did not feel myself competent to its duties—Mr. Yates advised me to the contrary. Upon that the Board passed the following order.
- "Presserv—The Hon. John H. Dunn, President, Alexander McDonell Esq. Vice President, the Hon. William Allan, and Robert Randall Esq.—At the request of Mr. Ystes John Clark Esq. was nominated

for the office of book-keeper to the Company on Mr. Black's retiring from the situation, whereupon it was resolved that John Clark, Esq. be appointed book-keeper with a salary of £150 per annum, upon his giving security in the sum of £1000."

I accepted the situation, thinking that it would aid in the support of my family; in June 1832 Mr. Black left the office and I assumed the duties of Book-keeper—At no time have I made entries on the official books of the Company, because I had not confidence in myself for keeping those accounts, but have from time to time employed others.

## [BY COMMITTER,]

493. Do the Engineers make up their eatimates from documents retained afterwards in their possession and made by them on examination and measurement of the work, and is the same a subject for reference by them when explanation of any estimate is required?—The Engineers make up their estimates from the measurement of the work, notes of which I have understood they keep for after reference; they also make up their estimates from the accounts of individuals, which accounts are held as vouchers in the office in proof of the estimate.

### [By Mr. MACKENZIE.]

494. Until 1834 I understand that Mr. Beaton was employed but for short periods, when there was no person to keep the accounts—had they to lie over until copied from your memorandum?—Mr. Beaton was employed in the office the first time in October 1832. I had kept the accounts in the petty books and Mr. Beaton posted the accounts in the official books of the Company, and made out the balance sheet for that year.

495. Then in the months of June, July, August, and September, and until October 1832 there were no entries whatever made in the official books of the Company?—Between the period of Mr. Black leaving the office and Mr. Beaton being employed first in October 1832 there was but little required to be entered on the official books of the Company.

496. Why were the accounts of your expenditure of the toils of 1830, 1831, 1832, and part of 1833, always withheld from the House of Assembly when it demanded your accounts in full for the year from the time of your previous returns—and why were only partial statements given in of the receipts!—The Board of Directors would desire to see the whole receipt and expenditure placed upon the books—There was no particular reason for keeping the expenditure back—I have said before, the toils of 1832 in some insuances merged into the general accounts and that there were debts still due for toils that year. The receipts of toil were regularly submitted to the Legislature in all cases where the returns were made up in time for the meeting of the Legislature—I think the small amount collected after the meeting of the Legislature for the years 1832 and 1833 was not included in any return submitted—but with no desire to concess the amount collected.

497. You have saked for a credit of nearly 2/00 as payments made by you out of the proceeds of toll and forwarding for 1830 and 1831 to the Schoolers Canadamand Prosperity. Are you able to produce any you here or receipts to show that you applemented

to a credit for any part of that sum? or have the accounts for these vessels ever been audited by the Directors?—Those vessels were employed in the forwarding department by the Welland Canal Company for that year. I kept a credit and debit account with each of them, and paid them the amount charged as the books of account will shew, and charged the amount disbursed by them against the tolls and forwarding of 1830 and 1831, authorised by my appointment as forwarding agent under a general order of the Board.

498. The by-law of the 14th April 1825 provides that no director, officer, or servant of the Company shall directly or indirectly be concerned with any contract connected with the said undertaking—Why was George Keefer allowed to be so concerned when a director in the lock contract?—I have no knowledge that he was so concerned—I was not then an officer of the Company.

499. Why was Thomas Merritt Junior concerned as a contractor when a lock-keeper, and employed at day work in 1832 and 1833?—Mr. Thomas Merritt had charge of the lock at Port Colborne in 1833, which I think was authorised by the Board of Directors; he was a contractor at the same time—He was previously a contractor, and his being put in charge of the lock at Port Colborne must have been from his being the most competent person there.

500. Are you aware whether Mr. Phelps' mills at Dunnville, now owned by Mr. Hezekiah Davis, are not built upon a lock made by the Company descending from the dam to the river?—The mill is built upon a lock which I believe is useless, and by whose expense it was built I do not know.

501 Why has it been omitted of late years to sign and attest the minutes—In many instances they are neither attested by the President nor Secretary—why is this?—It has not been done since I have been in the office, nor am I aware it was previously done except in those cases shewn by the minutes

502. What is the reason why so very small suproportion of the business letters of the Company are recorded in the letter book of late years?—I believe all business letters of the Company to be recorded in the letter book, and it is so intended by the Board of Directors—there may have been some omissions on my part.

503. Are the Company stockholders in the steamer Caroline, and if so, under what circumstances and to what amount 1—I believe they are owners to the amount of £125, which is held till it can be disposed of. I am notaware under what circumstances unless the desire to draw the travel and freight from Buffalo to the canal instead of remaining at Chappawa and going over the portage.

504. Can you describe the effect of the evaluate of a line on Oliver Phelps' accounts by which belience of £95 Pls. 4d. appears to have been extinguished in loko 167 of the great leger know nothing about it the former Scoretary Mr. Black can be explain this transaction.

605: Why was it that you were penaltic on the 230 and 96th of Cooper to explain the mount of foliar received in 1832; and the expenditure of the same; Ewarpooprepared to do a a good least of different having acreary the officeral; that can be not like in just returned from Lower Canada where saladables M2

(on leave of absence) and you know I had no time to make up any statements or give the necessary explanation.

506. Have you as Secretary the deed for Mr. Merritt's mills and land, or have you ever seen a deed from him?—I have no knowledge of having ever seen such deed. Mr. Merritt was awarded payment for his mills by the arbitrators appointed under an act of the legislature.

207. Why is interest £178 1s. 7d. charged the Company as paid the Bank of Upper Canada for £3000 advanced the Canal Commissioners in 1833---Was not the money obtained at once from the Provincial chest?---Interest account is charged with £178 1s. 3d. for interest paid the Bank of Upper Canada 1833 on a loan to the Canal Commissioners; I don't know how or where the money was obtained by the Commissioners.

508. Are not Johnson Orr's estimates overstated in the Company's journal and great leger, and do not the petty books clearly shew that there are 161, which he is charged with which he is not entitled to, and never received?—Johnson Orr has acknowledged to me the receipt of all the monies debited him in account with the Company.

509. You perceive that the firm of Jack Toyne & Co. were paid in full of all demands against the Company in 1833 by notes payable with interest, and which have been since paid them. Have they not also, or some person for them, got a note for £24 1s. and been paid that sum (with interest) for which they had no claim, and is it not entered in the cash journal as if it had been legerized and not yet legerized, nor any attempt made to detain it from Toyne & Co. in their late transactions with the Company ?---This is one of those errors admitted by me the moment it was discovered.

510. In page 257 of the cash journal there is an entry duly checked as if entered in page 402 of the great leger—of cash 50l. and cash 5s. 7d½, paid Thomas Merritt, jr. from the tolls of 1833, and which 50l. was duly paid him—this appears to have been duly entered in the leger but is neatly erased and the 5s. 7d½, only left—Was not this 50l. improperly obliterated from the daily leger?—I refer to the affidavit of John Callaghan given in evidence. It was an error admitted by me on discovery.

511. Mr. John Donaldson's estimates of November, 1832, are over credited 58l. 18s. 10d½., and there is 200l. and upwards for which the copy of the estimate of that month gives no authority, and which appears irregular and improper—can you explain these matters?—There is anover credit to John Donaldson of 58l. 18s. 10d½. In answer to the latter part of this question I refer to the Engineer Mr. Geo. Keefer.

512: In folio 328 cash journal, December 1835, a sum of 501. 5s. 7d2, and another sum of 381. 15s. are debited to toll, as deductions, which sums do not appear to have been credited to toll or to have made part of the gross receipts of the years 1830 or 1831—Can you give any reason or shew any voucher for these deductions?—Those items were for toll on packet and freight boats, also on stone, gravel, to for Grand River dam and other repairs. The amount is included in return of tolls for 1831, and of

course not having come into my pocket was recharged against toll, having been expended for canal purposes.

513. Are there not about 20l, charged thrice in the cash journal as paid from the Company's funds for Yates' pamphlets in 1834, and only one 20l, corrected, so that there remains a double charge of 20l, against the Company in this matter?—The item of 19l. 1s. 3d. charge for printing pamphlets is charged to contingencies and again settled in account with Mr. Yates for a Steam Dredge; the Company are therefore improperly charged with 19l. 1s. 3d.—which I at once admitted to you was an error when pointed out to me at St. Catharines.

514. Are there not errors of £24 9s. and £64 11s. 3d. of interest paid and not charged in 1834 4— The interest account is short charged with £24 9s. and £64 11s. 3d. paid the Bank of Upper Canada in 1834—this omission is against the Secretary.

515. In folio 228 great leger £11 19s. 6d. appears to me to be placed at the credit of Daly & Co. more than the estimate of November, 1832, sanctioned—Is this a fact?—This is correct.

516. Has not £15 5s. regularly paid to George Smith, toll collector, been improperly charged a second time to the Company?—It is, and was so admitted by me at the time you were examining the books at St. Catharines.

517. There is a sum of £45 15s. 6d. charged in the old leger as a balance for cash advanced to Thos. McChesney, of Port Colborne in 1832—and it is stated in the cash journal that this sum was paid M'Chesney by order of the Board—Were the officers able to shew that there was any such order of the Board—or is not the debit of this money to M'Chesney improper—is it not cash for which the officers of the Company are themselves answerable?—This amount is admitted to be improper; it arose from crediting it to toll, from which fund it was first advanced—and omitting crediting it after the estimate was made against which it was also charged.

518. How do you explain the entry in the cash journal page 238 where George Keefer receives credit for £579 12s. 3d. of the Company's funds which had been placed to his debit without any other account being charged with the amount or any explanation as to the expenditure—Is Messrs. Bowery and Burns' explanation of that transaction, approved by the Board, yours also?—The former Secretary, James Black, Esquire, can best explain this transaction.

519. £137 10s. of a balance is entered against William Orderly, and then this balance is omitted to be carried down, and the following year Orderly is paid by a note, £70 or £80 of a supposed difference then appearing at his credit—Seeing that the petty leger differs from the regular books in this case, does it appear to you probable that Orderly was paid £32% by mistake, or that the vouchers shewn to support this improper account are of a creditable character.

The money is charged in account to Orderly and appears to me that the vouchers are of a creditable character.

520. Have not large sums been allowed for alleged damages on goods for warded by the Company w... out any order of the Board and without any vouch.

ers of the transactions?—There were only the following sums admitted for damages:

" Mcl'herson & Crane, ..... 6 13 3

£85 17 4

which I settled under authority of the Board appointing me forwarding agent, and to which I refer the committee on all transactions of this nature.

521. Do you not find many accounts of individuals which were marked in the Journal as posted and yet were not properly posted ?-There may be in one or

522. Do you think an officer of the Company in the receipt of a salary of £400 a year could in a year of scarcity like 1832, receive \$900 or \$1000 on account of that salary without knowing it, or finding it out since ?—I think he could not if paid regularly each year, but as this question I suppose alludes to Mr. Merritt the Agent of the Company, I think it due to him to state the manner in which any intricacy in Mr. Merritt's account arose-Mr. Black, the former Secretary, on retiring from the office left a balance against Mr. Merritt of £121 12.81, and I soon after paid him a further sum of £28, making in all £149 12 81, which the Board authorise by their order in August 1832-desiring for my own satisfaction to make a distinction between the monies paid by Mr. Black and those paid by me to Mr. Merritt-I drew a line in his account in the petty leger and all above that line is not included in the addition of the account, which I am confident Mr. Merritt was not aware of. In balancing Mr. Merritt's account he is tound a creditor of the Company for several hundred pounds on account of his salary and advances made to contractors and others. This sum of £121 12 8 was omitted to be included in any account rendered by me to Mr. Merritt.

523. Are there not £25 entered as Engineer's salaries on the great leger for which there is no voucher to show that it ever was paid or to whom, while the whole of the salaries are settled for by other payments—Is it not an erroneous entry !—This £25 appears to have been included in the estimate 2d Aug. 1832, and is charged in the leger to account of Engineers—I believe it to have been paid, but the voucher being missing cannot say to whom.

524. The sum of £149 12 85 was paid Mr. Mer rittin 1832 out of the tolls on his salary, and the sums of £37 10s., £40 11s. 6d. and £11 5s. 7d. were also paid him on account of his salary in the same year. He was further allowed interest on arrears of salary for that year. These sums amount to £238 19 9½, paid Mr. Merrittihree or four years ago. Has he been charged with any part of this money in any way or shape on the books of account up to this day?—The charge of £149 12s. 8d. is answered by me to question No. 522, the other items amounting to £89 7s. 1d. are not charged to Mr. Merritt and arises from that sum being charged to salaries instead of his private account.

525. Are you aware that you have charged the Company twice for £300 allowed Mr. Yates on account of his agency, although there is no youcher to shew that it was ever paid once ?—This sum is not

twice charged against the funds of the Company-I have no doubt of that sum being paid Mr. Yates-I am not certain of any other voucher than an order of the Board.

526. Can you describe the effect of the erasure of a line on Oliver Phelps, accounts by which a balance of £95 11s. 4d. appears to have been extinguished in folio 157 of the great leger?—This can be better explained by Mr. Black, the former Secretary.

527 Were not £75 paid out of the tolls of 1832 to Thos. Merritt, Junr., and not only not charged to him but he even allowed interest on his account in 1833 and 1834 as if he had received no such payment, and is not this sum only charged to him last December, and also the £50 not charged to him through the erasure chargeable to him with interest?-The sum of £75 was paid to Thos. Merritt out of tolls, in 1832, and was then omitted to be charged him-it is now charged in journal 326. The sum of £50 is also charged his account in petty leger. The interest paid Thomas Merritt was a balance due him on the old account—the sums above stated were advances on new contract.

[Witness withdrew.] and have a first such a high shall made with high states of the large side. The large side is the same of the large side is the large side in the large side is the large side in the large side is the large side in the large side in the large side is the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side in the large side

Tuesday, March 22nd, 1836.

Committee met.

PRESENT.

JAMES E. SMALL, Esq., Chairman.

Messieurs Gibson,
McDonell,
Roblin, and
Thorburn—5.

Mr. WILLIAM ORDERLY, called in and examined. [By Mr. Mackenzie.]

528. Was you a contractor on the Welland Canal in 1832?—I was.

529. When you left the Canal, were you paid in

full?—No.
530. Were you paid in 1833, by notes of hand for the balance due you?—Yes.

531. Were you paid for any more than the work estimated to you by the Engineer !—No.

532. You are entered on the books as a debtor to the Canal, for £137 10, for monies said to have been over paid you in 1832. Was there any mention made of this £137 10 when you got the notes of hand in 1833, or at any time since then !—No. I disputed the settlement with Mr. Black, Mr. Clark and George Keefer, and spent two days overhauling my accounts on account of this dispute.

6533. Can you write or sign your name 1—No. I can neither read or write.

534. Did you get £100 in 1832; namely, \$250 from George Keefer, and \$150 from W. H. Merritt, and did you sign or make your mark in acknowledge ment of these payments — No. I got £12 10 from Wm. Hamilton Merritt, Esq., in May, 1832, and £24 odd, in my own house, from Mr. George Keefer Junior, who stated that Mr. Merritt had stated to him. that he had given me \$50, some time before, and he wanted a receipt for both sums; I gave a receipt for the money Mr. Merritt gave me, and also, that which was given by Mr. Keefer at this time—but whether that is the receipt or not, I cannot say. I am sure I gave no other receipt but for these sums.

535. The Company produce a paper (now shewn to you) which they call a voucher for £100, it is in Mr. Clark's hand writing, has no witness, no date or year, but a cross, purporting to be made by you. Is it yours'? or have you any recollection of the transaction?—I have not. I never received that amount, and therefore never gave a receipt for it.

536. Was you in the employ of the Company in the summer of 1834?—No; not that I recollect, except that I think I scowed some gravel on the dam in 1834, and boarded some hands.

537. There is a paper in the Canal Office, purporting to be a voucher for £135 8 7, to which your × is attached, but no witness. Do you remember receiving this \$541½ on the 8th of July, 1831, from the Company?—I do. I received the amount, less \$30, which was deducted by Mr. Black for the tow-path not being levelled.

538. Is it probable that the Company would have given you £80 in notes, in 1833, and other monies in 1834, if they had considered you their debtor for cash overpaid you in 1832?—I should not think they would. I found a good deal of difficulty in my settlement with them as it was.

## BY COMMITTEE.

539. Was you in the habit of receiving monies at any time from any of the officers of the Company without giving a receipt for it?—Never but once; when I got the £12 10 then I gave no receipt.

540. Were you in the habit, when you sign receipts for money from the Company, of having them read over to you?—When I go to the office for money, Mr. Black would read over the estimate to me and tell me there was so much of a balance coming to me, and I would sign the receipt in a book for it.

541. When you gave the receipt to Mr. Keefer was there any other person present, that you remember?—No one, that I recollect, but my wife.

542. Do you remember that he read the receipt over to you at the time?—I do—stating, as I have before said, that he had included the \$50 that Mr. Merritt gave me, as well as the £24 odd, which he gave me.

543. Where was it that Mr. Keefer paid you this money?—At my own house, on the line of the Canal.

#### [By Mr. Merritt.]

544. Did you object to the payment of this £100 at the office —I do not recollect that this was represented in particular.

545. You have said you received from Mr. Merritt, £12 10, and from Mr. G. Keefer, Jun the sum of £24, for which you gave a receipt, for what work, and at what time were these payments made?—You gave the £12 10 in the month of May, 1832, and that by Mr. Keefer, was in June in the same year, so, far as I recollect.

#### [BY COMMITTEE.]

546. Did you know the amount of the estimate to be done when you first took the work?—No.

## [By Mr. Mackenzie.]

547. You say you never got the £100 composed of two payments of £62 10, and £37 10. I see you are also charged with other £62 10, paid you in 1833, in May. (Cash journal, page 207.) Did you get two sums of £62 10, in part of your contracts, ending in November, 1832?—I never got any money from August, 1832 till June, 1834. I never got the sum of £62 10 in 1833.

(Witness withdrew.)

GILBERT McMICKING, Esquire, M. P., called in and examined.

### [By Mr. Mackenzie.]

548. Do you know any thing of a contract made between Theophilus Brundage and the Welland Canal Company to supply them with 200,000 feet of large sized square timber in 1825?—No.

549. It is assumed that £1,340 and upwards, were paid from the Canal funds in 1825, to Theophilus Brundage, for timber of a large size for a tunnel, and never used for that purpose, and that no part of the proceeds of 200,000 square feet appears on the books, and that it has not been accounted for in any other way. As you were continually on the Canal, perhaps you can tell what became of the timber?-I bought a lot of timber of a man by the name of Howardas to my own knowledge of its being Canal timber, I cannot say, but it was in the Chippewa River, and said to be such by Mr. Howard. The price was 10s. per 100 feet, but whether it was York or Halifax currency, I cannot now say. The timber I purchased, was of different sizes, but was hewed straight for 11 or 12 feet in length, but these lengths were sometimes 70 feet in length. I purchased enough to build a mill, a house, and several other buildings. I think I paid rising of £100 for what I bought.

550. Are you aware that Mr. Keefer, when one of the Directors, got a present of a mill-race and water to impel 4 run of stone, and that he continued to possess that great advantage, rent free? And if yea, will you please to inform the committee what effect such a present has upon the profits that steam millers in that district might reasonably expect to derive from their exertions?—It is an effect almost ruinous to those possessing steam mills, because, steam cannot be worked so cheap as water.

551. What is the effect of the aqueduct upon the navigation of the Chippewa or Welland?—It is very much complained of, and I think a very great injury to the navigation of the Chippawa.

552. Was it for the advantage of the public, that the Canal was carried round by St Catharines, at the one end, and up to Dunnville on the other :—I have always thought it a very injudicious route, for the reason that there is no harbor at Port Dalhousie, and that the Canal might have been taken a much shorter route, accomplished the same object, and cost a great

deal less money, and in the whole management of the Canal, I think that private interest was always studied, more than public good.

553. Ought Canal Agents and Directors to be mill lessees on the Canal in which they are Directors?—My decided opinion, is, they should not.

### [By Mr. Merritt.]

554. In what year, or at what time did your purchase from Howard take place?—I think in 1824 or 1825.

555. You say you bought from Howard some timber said to be Canal or Tunnel timber, but you do not know it to have been the timber alluded to or not as belonging to the Welland Canal Company—did you ever inform the Welland Canal Company or any of their officers that you purchased their timber from that individual?—No; not to my recollection.

556. Would you have built Mr. Keefer's mill or laid out the capital he did at the time, under similar conditions, which were in 1824 or 5, that he was to have a flouring mill of best description, in readiness by the time the water was let in the Canal, and did you at the time think the Canal would ever be finished?—If I had had faith in the undertaking, I certainly should have been glad to have built the mill and laid out the capital Mr. Keefer did. But I cannot say that I thought at that time the Canal would ever be finished.

557. You say that you think individuals who are in the management of the Canal should not be interested in any erection; do you know that I have had any erections of the kind, and do you not conceive the erection of flouring mills, in particular, an advantage to the Canal by yielding a revenue?—From common report, I understand you are concerned in mill erections. Judging from what I have heard on the Erie Canal, the revenue from mills is considered a great detriment to the navigation.

#### [BY COMMITTEE.]

558. What benefit would a mill be to the Welland Canal Company, if built where there was no water?

—I cannot say, but I should suppose none at all.

559. Is it your opinion, that the Welland Canal Company could have lost so much valuable timber without knowing it?—I should think it would be impossible.

(Witness withdrew.)

#### MR. CLARK again called.

560. How do you explain the single entry or page 238 of the Journal discharging George Keefer from £579—and charging no other accounts?—The reasons for making the entry in question are given in the page of the Journal referred to, which amount is merged in the general expenditure.

561. Can you show the vonchers for the sums charged by you as payments to the Schooners Prosperity and Canadian amounting to 6 or £200; or for any part thereof.— Thave no vonchers to show more than the books of account relating to those vessels, and have should unswered this in my answer to question No. 497.

562. Can you show the Committee any vouchers for £62 10s. alleged to have been paid Orderly in May 1833, and for £6 5s. and for £2 charged by the officers of the Company as payments made to Orderly at that time?—There are no vouchers yet found for those items.

[Witness Withdrew.]

# Mr. McMicking, again called. [By Committee.]

563. Can you state any thing further to the Committee relative to the timber respecting which you have already been examined?—I can—Oliver Phelps sold a quantity of it to a man by the name of Daniel B. Hembley, who told me he paid him (Gliver Phelps) \$60 for enough to build a house and barn—The timber was marked W. C. C.—The two wings of the Pavilion were built of the Welland Canal timber, but I do not know what was paid for it—also the greater part of the present Ontario House was built with it—and also Joel Phelps on Lyon's Creek got enough of Oliver Phelps to build a barn, who only charged him \$5 for the whole quantity he got.

[Witness Withdrew.]

WEDNESDAY, March 23rd, 1836.

Committee met.

#### PRESENT.

JAMES EDWARD SMALL, Esq., Chairman.
Messieurs Chisholm.
Gibson,

McDonell, Parke, Roblin, and Thorburn,—7.

DAVID THORBURN, Esquire, M. P., a Member of the Committee examined.

#### [By Mr. MACKENZIE.]

564. Would you have the goodness to state to the Committee the general facts as known to you relative to the Hydraulic Company, and the nature of the bargains made with the Canal Company, also the opinion you entertain of the course pursued in leasing water-power last summer?—The Government Directors considered they had to be guided by the Report of the Committee on the Welland Canal of last year, which stated that the intricacies of the Hydraulic bargain, were such as induced them to recommend that during a recess, a commission of inquiry should be instituted, therefore, the Government Directors, of which I was one considering the bargain as not instituted that they would not be fulfilling the spurious of their state of that reportunity they first inquired into the whole nature of the sale and repurchase. In Mackensie one of the Government Directors, was appointed, with the approbation of the whole Board as will appear by the immittee book of the Company; and agreeably to which re-

solution Mr. Mackenzie did go into the examination of the whole affairs of the Company, including the Hydraulics -- considering the repurchase of the Hydraulics was not consummated until the Legislature approved of it, the Government Directors would not interfere or approve of granting leases to applicants for water privileges, because they conceived by sanctioning leases while the bargain had not been approved of by the Legislature, they would be out of their duty, and any act of theirs consequently would have been a nullity. For several monthly meetings of the Board, applications were brought forward by the President, and on his introducing them to the consideration of the Board, he remarked that it did not matter whether the bargain was fully recognised by the Government or not, because the avails would still be subject for the general interest of the Company. Mr. Mackenzie and myself would reply that the Directors for the private stock being a majority of the Board might grunt the leases if they pleased, we would not give it our protest further than not agree to the leasing. The President would then reply that he would not wish anything of the kind to go without the general approbation of the Board. There was an application made after this by one Hiram Slate, for mill privileges at Port Colborne, and upon inquiring into the nature of Mr. Slate's application, it was said to be for a Company, of which he was one; and also upon inquiring who the Company was composed of, it was said by the President that the Company was composed of Captain Creighton, Mr. M. Donell, the Vice President, Mr. Merritt, the President, Mr. Slate, Mr. Scott, Mr. Thos. Merritt, and I think, Mr. Ostrum, and I think there may have been others. The President further stated that erections were in progress, of a large extent, for milling operations. Mr. Mackenzie then remonstrated and inquired why these erections had been prosecuted, and such liberties taken, without first having a lease from the Board of Directors; and further, it was contrary, as he believed, to a standing order of the Board, that the officers of the Company should be connected, either directly or in-directly, with any works upon the line of Canal. The President replied that no application had been made for that mill site, and that he considered that it was to the benefit of the Company to make as many crections of such a description as they could upon the line of Canal, thereby creating business for the Canal; thathe, individually, had not embarked in the project with a view to any private gain, but solely to promote the prosperity of the Company, and that he had given his name purely for that purpose; after which he (Mr. Merritt) wrote a letter addressed to Mr. Mackenzie and myself, which stated that he would sell out all his interest as regards special privileges, and that he tendered this note to remove any impression there might be upon our minds, that he was guided by any other motives than the prosperity of the Company. ought not to have deviated from the rules of the Company, particularly the rule that leave must be had to obtain a lease or privilege, and that a lease ought to be had before a privilege should be taken by any Company, and that if the Company sustained any injury from the want of a lease, the fault was theirs and not ours. Mr. Mackenzie remarked that they ought to have given public notice that such privileges as those at Port Colborne would be leased

by the Company, so that by competition, a fair value might be obtained by the Company for these privileges. The President replied that it was a standing rule of the Company that the first applicant for any privilege obtained it, and that there was a standing scale of prices for all such privileges. Mr. Mackenzic also stated that he believed in this instance that there was an encroachment on the Company's wharves at the entrance of the Canal, and that the job was discreditable to the Directors that were concerned in it. No leases were granted till the Nov. Board, when a resolution, embodying all the applicants through the summer, including Hiram Slate, the whole of which were granted.-Messrs. Duncombe & Mackenzie, Government Directors, were absent, and I did not assent to it. I consider it essential to the Welland Canal that the Hydraulic interest should not be separate from the interest of the Company, as the Hydraulic is a secondary consideration, being only of benefit when the water can be spared from the Canal. That the Directors of the Welland Canal Company should have the power to regulate surplus water, and that the Directors ought to have power to cause saw-mill owners to keep the Canal clear of saw dust, which lodges in it and prevents the navigation of vessels drawing a certain depth of water fitting for the general depth of the Canal, likewise to prevent slabs from swimming towards the locks. I would further remark there are rules of the Company to compel saw-mill owners to

565. Are you aware that the Hydraulic Company kept possession of the water-power and lands for several years -- received the rents and also the proceeds of lands sold within that time, which they never paid over to the Company --- and now retain, under a bargain with themselves as Canal Directors and the Government Directors, but subject to the approbation of the House of Assembly, the most valuable water power on the summit-level at Allanburgh, and the town ground at Gravelly Bay, besides receiving £17,500 in Canal bonds, payable with interest, for giving up an agreement upon which they neither had paid principal nor interest ?-- I am aware that the water-privileges and certain lands of the Canal were alienated; I believe they remained in the hands of a Company who used the water-privileges and the moneys arising from such, for the particular use and benefit of such Company-I know that the Directors of the Welland Canal Company considered the water in the Canal should not be subject to the control of any others; therefore a repurchase of the privileges and water-powers so alienated, was effected subject to the approval of the Legislature, less certain lands and water-privileges at Allanburgh, and I believe lands at other places about Marshville and Port Colborne, but do not recollect what the quantity of lands is so remined; I believe the Canal Company did give Canal Bonds bearing interest to the amount of £17,000, I am not aware of the Canal Company receiving any part of the principal of the amount which the water-privileges, lands, &c. were sold for; the interest on the principal was placed to the credit of the gentleman in whose name the deed of convey ance from the Welland Canal Company was made. I understood that certain improvements were made upon the lands about Marshville, likewise the erection of a grist and saw-mill at the same place by the Hydraulic Company, which improvements and miles

were held by the Fiydraulic Company as of much value; the mills I do not consider to be valuable for the Welland Canal Company—the improvements on the lands about Marshville are by no means an equivalent for the valuable consideration of £17,000 or the property retained at Allanburgh and elsewhere by the Hydraulic Company.

566. Is it for the interest of the Canal Company and of the country as connected therewith, that the President or Agents, and the Directors and Officers should be lessees of water-privileges on the line of Canal, while acting as such Directors and Agents?—I think not, because their not being so interested would remove suspicion and prevent temptation. It might be questionable how far a latitude should be given at the commencement of works of that description. As a reason for the first part of my answer, they (the Directors) being the guardians of the work, and the primary object being for navigation, they ought to have allowed so much water as not to injure the navigation.

567. Under what circumstances did Mr. Keefer obtain, and on what footing does he hold the water power which impels his grist-mill at Thorold !—I have heard the President admit it was given to him to encourage works of that description. I refer to the 10th resolution of the Board, 26th October, 1825.

—[see resolution.]

568. Were not very great expectations held out to the country with respect to the profits and returns to be derived from the vast Hydraulic privileges on the Welland Canal; and have these sdvantages been in any respect realised?—From what I have learned from the Board and this Committee, there were certainly flattering prospects held out, and still are—I think their pecuniary realization is very trifling.

569. Was it proper to hold out expectations to Stockholders and the Province, that great pecuniary advantages would be derived by the Company from the Hydraulic powers, and then make presents of the mill races and water-power to the Directors, without reference to the Stockholders to encourage the building of grist-mills ?-I think, in the first place, it is an electioneering scheme to knock up a job and make the best they can of it—that after a Company is formed the Directors are elected by the Stockholders to manage their works, should the Directors forfeit the confidence of the Stockholders by any act, they would be entitled to a severe reprehension; but if we find that the same Directors are continually re-elected, it is taken as a common evidence of their having performed their duties acceptably to the Stockholders, but I think in this case where there are two interests, provincial interest and a private interest, and that private interest having a major voice at the Board, any act of appropriating any part of the property or privileges for their own particular interest, contrary to common established principles of right and wrong, would not be creditable. L'do not approve, as I formerly stated, that the officers should be connected with any private jobbing, but should be paid a reasonable compensation for the discharge of their dubut one common interest.

670. In the case of the gift of the grist mill water power to Keefer, was it reported to the Stockholders in the simual reports, or had they any means of

knowing the fact? Did not Captain Gordon, the Secretary, publicly complain of secrecy in such transactions, and declare it was most injurious to the canal and caused suspicion by the stockholders?—I have heard of it years ago, but I do not distinctly remember.

571. Do you consider that the canal has been taken to particular places, out of the direct line below the mountain, and up to Dunnville, to serve the purposes of interested individuals, to the injury of the work and to the great accumulation of expense from the funds of the corporation?—I consider as a public work that the first consideration should have been to connect the navigable waters at the cheapest and most lasting points—and that I consider the cheapest and lasting course to be from Lake Ontario by Queenston, and to Lake Erie by the mouth of the Chippawa or by Broad Creek on the Grand River. It appears to be most reasonable to take it the shortest route when it can be done.

572. What was the probable value of Merritt's (since called Butler and Bowrey's) mills before the Welland Canal went down the twelve mile creek?—and what the general supply of water?—I do not remember.

573. Are you aware that the Board has ever entered into contracts it was without the means of paying, and agreed to issue paper money it could not redeem?-They have entered into contracts this last full for repairing the work through the course of the winter; the agreement on the part of the Company with the contractors was, that in the event of funds not coming in to the Company they would issue bills bearing interest payable at the Company's office one year after date. The Company had some reasonable prospect that they would not have to adopt this latter alternative, as Mr. Yutes had requested permission of the Company to raise a loan of \$500,000 for the purpose of paying off its debts, and to complete the works the directors for the private stockholders at the Board agreed to furnish Mr. Yates with authority to raise the loan, and that authority had been transmitted to Mr. Yates previous to the contracts being let out; the Company had likewise sent a petition by Mr. Mackenzie to the Lower Canada Legislature, (Quebec,) to request a loan or to take stock to the amount of £25,000, to enable the Company to put the works in a state of repair, the Company were not in possession of the replies from either of those applications when it was necessary to let the repairs. I found the work could not go on, and therefore gave the measure of letting out those contracts my support-upon finding by the engineer that the sum necessary to ensure the works to be in preparation for the opening of the navigation was £6,500, I considered the increasing trade through the canal by the simping of goods that had passed this season from New York to the Western States the American merchants had found it was the quickest and cheapest route for the transit of them, and as the toll of this year amounted to nearly £6,000, which was evident that the transit business on the Canal was increasing, there was a reasonable prospect to suppose a further increase of tolls would take pect to suppose a further increase of tolls would take place through the increase of trade and trainsit of American goods and produce, also the Grand fliver Nevigeton Company, sworks were understood would be in readiness for business for this ensuing season.

much of the trade of which would pass through the Welland Canal, therefore I considered that it was better to agree to the issue of such paper money payable with interest at one year after date, as the increase in trade might be considered nearly if not equal to meet them when due.

574. Can you state the value of the Steam Dredge sent in by Mr. Yates which cost the Company £780 and upwards, and the grounds on which you joined Mr. Butler and myself in resisting the purchase of the Sir Walter for \$2000?—It is found to be a complete failure for the purposes intended. A committee was appointed to sell it, of which I was one, I think there was only one offer of £50 made for it—we have it yet. The Sir Walter the President recommended to the special attention of the Board to purchase it; he thought it might be had for about £500, and that it would be found to be a great barain to the Company for the purpose of a Steam Dredge, which was much wanted, particularly to clear the mouth of the harbor at Port Dalhousie of sand and accumulations of muck. The purchase was not agreed to by the Board, because there was a reason to believe that the Steam Dredge which had been authorised by the Government would be in readiness for the early part of next spring, the company might expect occasional turns of it, to clear the mouth of canal at Port Dalhousie.

575. Are you aware that Mr. Merritt has secured for himself while the Agent of the Company a large share of the land, at or near the western terminations of the Canal at Port Colborne and Dunnville ?-I believe he has lands near to the mouth of the Canal at Port Colborne, and bought it of a man by the name of Paterson, an Englishman, about vo years since. At Dunnville Mr. Merritt and A. Street have bought a tract from the widow Muirzead, of about eight or ten hundred acres opposite the toll bridge. Mr. Merritt along with Mr. Street is owner of the lands in which Dunnville is situated. The Directors conceive they ought to have more room at Dunnville. Mr. Merritt wanted the company to have it without charge, but Mr. Street thought they ought to pay the full value of it as town lots. At the end of the bridge over the Grand River dam, where there is an immense quantity of water power, Mr. Merritt wanted the arbitrators on damages to consider the damages by the company on those lands favorably towards them (the company.) Mr. Street and Mr. Merritt's view of this was that they would get a profit from it, as a village would rise there, being at the end of a toll bridge and possessed of great water privileges.

576. Do you remember that the Receiver General Mr. Dunn offered by letter which I enclosed to you before I went to Quebec, to take charge of the books and papers of the Canal until an accountant or accountants here could examine them and investigate any charges that might be made against the Company's officers? and can you now produce that letter?—I do remember, and now produce the letter as follows:—

Tozonto, 27th October, 1835.

In reply to your letter of this day's date I beg to acquaint you that I shall be happy to take charge of any papers the Directors of the Welland Canal Company may be pleased to piace with me, and in any explanation or assistance I can afford, it will give me pleasure. I am not aware of any person who I could recommend at this moment as competent to the investigation of

the Welland Canal accounts, but should I be fortunate on inquiry to find such a person I will not fail to inform you.

I have the honor to be,

Sir,

Your most ob't. servant
JOHN H. DUNN,

WM. L. MACKENZIE, Esq. &c. &c. &c.

577. Did I make any charge to the Company for my Quebec journey, or on the contrary did I not state that I was going on my own or other business and would not make any charge or be fettered with any instructions?—You made no charge for that journey and none for your other services while at the Canal—the other directors wished you to take a reasonable allowance, which you refused; Mr. Butler and myself charged \$4 a day—you made no charge further than what you considered was your actual outlay for personal support. You stated you were going to Quebec on your own or other business and would not be fettered by any instructions.

578. Do you consider that Mr. Beaton although a good accountant, was that sober steady man who ought to have been employed as the book-keeper of a great corporation like the Welland Canal, and trusted to for recording with accuracy and clearness its monied transactions?—I would prefer a person who is not known to possess any particular disposition towards intemperance.

#### [By Mr. Merritt.]

579. Although you received the letter from Mr. Dunn did you not agree to the appointment of the book-keepers on 19th November in pursuance of the resolution presented by Mr. Mackenzie and adopted by the Board on 24th October?—Yes, because those that were introduced to the notice of the Board were said to be competent for the duty. Mr. Bowery, one of the gentlemen, was before the Board at the time, and in reply to certain interrogatories I put to him said he knew the nature of the books and considered himself perfectly competent to undertake the examination required by the Board I informed him of the necessity of performing the duty with great care, minutely and diligently, and that there was scarcely a doubt but that the Legislature, (if the report that they Messrs. Burns and Bowery would make disagreed from Mr. Mackenzie's statements and views) would again cause the whole books and accounts to be re-examined.

580. At the time that resolution was passed in October 1825, promising to grant Mr. Keefer a mill privilege in Thorold in case he erected a flouring mill of the best description—was there not a general belief the Canal would never be finished or the water brought through the deep cut—did you ever hear the opinions and calculations of the late Hon. Colonel Clarke and the Hon. William Dickson on the cost of that work? And would you have accepted the offer as Mr. Keefer did at the time or declined it as General Beach did, as you see by the resolution?—I do not recollect the calculations—if I had been aware that the canal would be finished—Mr. Keefer was a director at the time, and was one of these directors forming the board which gave the mill site away, as appears by the minutes of the Company—he as a di-

rector would know the probability of the completion of the canal much better than any other person not a director, I would have taken it had I known that the canal would have been finished.

581. Although you heard Mr. Mackenzie say he was going on his own business and would take no pay for his journey to Quebec, did he not at the Board, in reply to an objection made by Captain Creighton to him (Mr. Mackenzie) being the bearer of the petition say decidedly that he would not present the petition unless he was certain-he would obtain the money, and did he not promise up to the moment of his departure to use his best exertion to obtain this money?—He (Mr. Mackenzie) repeatedly declared that he would be under no instructions, and that he would take no pay for expense money in carrying the petition to Quebec-Questions were put at the Board to Mr. Mackenzie if he would use his best interest to secure the prayer of the petition, to which he gave some equivocal raply such as I think conveyed that the taking of the petition was for that object, and I think he stated to questions put that he would not offer the petition unless he considered the Legislature would consider it favorably.

[Witness Withdrew.]

## Mr. Black, again called and further examined. [BY MR. MACKENZIE.]

582. There is, as it appears to the accountants employed by the committee, and to myself, a charge of £447 10s. for loss on steamer Peacock made twice as if it had been twice paid from the Company's When I was at St. Catharines the clerks shewed me a detailed statement by the particulars of which it would appear that part of this £447 10s. had been charged the third time to the Company, and they shewed the same document to the accountants since this investigation began. I have asked Mr. Clark to explain the transaction and he now says that the paper shewn is not the voucher, and that they can find no voucher to shew that the money ever was paid; he further refers to you as the first entry took place in your time of being in office. Was there a regular and correct account submitted to the Board of Directors of that money, and did you leave it as a record on your quitting the office in June 1832?— The account alluded to was submitted to the Board February 2nd 1832—was examined and allowed. The cord-wood paid for was independent of that amount.

583. In the statement now declared not to be a voucher, £36 1s. 3d. is entered as paid S. St. John for cord-wood, and there is another large sum stated to have been paid for fire-wood to another person, and these sums are charged by you separately as paid from the Company's funds. We have never been able to obtain any voucher for this £36 1s. 3d. Do you know that there was such a voucher, and was cord-wood wanted by the Company that year for other purposes?—I believe the vouchers for all these money's are in the office. I know of no purpose that the Company may have wanted wood for at that time. There is no separate receipt for the £36 1s. 3d. the total amount of estimates including the above, amounted to £286 7s. 7d. which was paid to seve-

ral orders of St. John! and for which receipts are in the office, viz :-

To John Darling.  "William Youell.  "A. Campbell.  "R. Canby.  "K. Reach.  "M. Blodgett.  "Bowery & Co.  "Feter Keefer for G. K. No. 1421  "Sundry transfers.	æ	12 30 25	12 10 15 0 10 1 0 9	600088876
	£	286	7	7

MR. CLARK, again called and further examined.

584. Where is the expenditure shewn in the Journals of £1261 10s. 32d. out of the tolls collected 1832 in payment of sundry contractors, and for work on the Canal according to lists referred to in said minutes for which the minutes say "see Journal folio" and the folio left blank !—I find no such expenditure entered on the Journals, it was intended to be so, but omitted. The expenditure of tolls for 1832 are entered on the Journals pages 324, 325, and 326.

585. Where is the order of the Board for the expenditure of £1406 11s. 3d. in August 5, 1832 ("August" erased, and "September" substituted in Journal p. 204)?—There is an order of the 5th September 1832, covering this expenditure.

586. By a regulation of the 20th September 1835 the Secretary is required to enter all deeds, leases, and conveyances of real estate and of water privileges in a book to be kept for that purpose, immediately after they shall have been executed, and also those already executed, and all mortgages to or from the Company, or any other incumbrances affecting such water privileges or real estate, and that all such documents be placed in charge of the Secretary—Has any such book been compiled —A book was procured for this purpose, but in consequence of your investigations at St. Catharines, and the proceedings which followed thereon the book has not yet been compiled.

[Witness Withdrew.]

THURSDAY, March 24, 1936.

Committee met.

PRESENT.

JAMES EDWARD SMALL, Esq. Chairman Messieurs Gibson, McDonell, Parke, Roblin, Shaver, and Thorburn-7.

Mr. Black, again called and further examined. [By Mr. Merritt.]

587. Will you inform the committee if the words "co-be-copied in book" on the screw! herewith shewn you, is in your own hand writing—and under what circumstances it was made, and with ther it was copied in the books and considered an official document or not?—The memorandum alluded to is in my hand writing—it was made for the purpose of saling yould it was to be copied in the letter book, as I conceived it to be of approved and confidential nature. On innuiring of you, you confirmed my opin confidential nature. On inquiring of you, you confirmed my opin

ion, and desired I would lay it aside until Mr. Yates returned.— To the best of my knowledge and belief it was never copied in the Company's books or laid before the Board.

588. Do you recollect paying one Sylvester Hathaway, a sub-contractor on the Deep Cut, by mistake, one thousand dollars over what was due him at the time he relinquished his work, and when let to Mr. Phelps? Did the Company prosecute him—and what was their principal reason for so doing—and what was the result?—I recollect paying Hathaway the amount of his estimate to let June amounting to several hundred pounds—he accompanied me to York and applied to the President to receive it there instead of at St. Catharines, and by his order I paid him at the Bank, and was not aware of his having received £250 on account, not having the books to refer to. It was the first estimate I paid after taking office. The Company prosecuted him for the amount, which he refused to refund, stating the Company was indebted to him for a larger amount—several trials took place on the business, in all of which judgment was recorded against him.

589. Did all monies pass through your hands while you acted as Secretary, at I had any other person charge of the books?—I had the sole charge of the books and monies with the exception of the tolls and forwarding accounts beyond those items mentioned in a former answer.

## [By Mr. MACKENZIE.]

590. How do you reconcile this answer with your former statement that you refused to have any thing to do with the tolls and forwarding monies, which up to the time you left appears to have amounted to receipts £5,000 and upwards and very iarge disbursements?—Mr. Clark having been appointed to manage the toll and forwarding account I had nothing to do with them after my resignation. And in my answer to the former question I wish to be understood I had nothing to do with those accounts or books.

[Witness w'.ndrew.]

## MR. McMicking, again called and further examined.

### [By COMMITTEE.]

591. Were you Agent for the Peacock Steamer in the year 1831 when she was chartered by the Welland Canal Company?—I was.

592. In the absence of any voucher on the part of the Company and its officers to shew in what manner the loss sustained, as they say, on the Peacock Steamer, was occasioned, perhaps you could state whether there really was any loss sustained or give some satisfactory explanation to the committee on the subject?—At the close of the season I went to Buffalo, and the firm of Smith & Macey were the agents for the boat at that place, and in conversation with Mr. Macey le told me that the Peacock had that day or the day before earned money enough to pay the amount of the charter—he also stated she was then to run for the benefit of the Company for several days, but I do not recollect how many. The cause that brought me to see Mr. Macey was that we had an intention of building one at Chippawa for the same purpose, and I was wishing to get stock taken up there, he made the remark that the Peacock had done very well.

#### [By MR. MERRITT.]

593. You say that Mr. Macey, who was the Agent of the Steam-boat Peacock at Buffalo in partnership with Smith, told you the boat would that day or shortly after pay her way. The Secretary of the Company states that the boat sustained a loss of about £400 which was paid to Smith & Macey, are the committee to understand from you that Mr. Macey told you that the boat had sustained no loss, and from the tenor of that conversation do you believe the charge made by the Company for the payment of that boat to be false?—My impression was decidedly that if the charter was only £400 that she carned it, and that what is the charter was only £400 that she carned it, and that what he stated to me was correct. Mr. Macey said the Company would sustain no loss, the boat was still running; he said that on that day or the day before he had received the amount of their charter as the Agent of the boat, and that from that time forward she ran for the benefit of the Company.

594. At what period of the year was this conversation with Macey?—The latter end of October or the beginning of November.

595. Do you not think it possible that Mr. Macey may have been mistaken in his anticipations—and do you think them men

of that character that they would make out any false statements to show greater disbursements than had actually incurred?--We are all liable to mistakes, but I have no apprehension he was mistaken hecause he was considered one of the most business men in Buffalo. I think they (Messys. Smith & Macoy) would not have made charges beyond the actual disbursements.

#### [By Mr. MACKENZIE.]

596. I see in a paper which was laid before me in St. Catharines showing that the Steamer Peacock had carned \$2185 88c. from 4th July to 3d October, 1831; and \$341 30 from 4th October to 21st November, besides \$15 for towing sundry vessels, and that \$3860 86 was the expenditure. In Mr. Merritt's hand writing there is a balance shown of \$818 63 of loss, besides other \$966 66 due on charter—the amount he makes \$1785 34 of deficiency, and there are many vouchers and documents. Is it probable that you, as the Agent of the Steamer, could, on looking into these receipts, throw any more light on the question involved in this charge of loss?—I think not.

[Witness withdrew.]

JOHN Ross, Esq. cashier of the Branch of the Commercial Bunk of the Midland District, established in this city, called in and examined.

#### [By Mr. Mackenzie.]

597. Under what circumstances were you applied to in May 1834, to loan £2000 to the Welland Canal Company?—I have no recollection of the circumstance, the letter which you read to me wasan answer to one from Mr. Merritt.

598. No part of this transaction of a loan appears on the Company's books; but there is a charge for interest of £30 11s. 6d. on the minutes, and of an additional half per cent, or £10 under the head of "Agency." From the stress you lay on the words "legal interest," in your letter now shewn to you, it would appear that the Commercial Bank contemplated an extra charge. Would you have the goodness to explain to the Committee why more than 6 per cent has been charged?—By the by-rules of the Bank all inland and foreign drafts and acceptances are subject to an Agency us in the case of the present transaction with Mr. Merritt, say:—

Draft for £2000.--90 days, interest £30 11 6 £1969 8 6 9 per cent Agency, 10 0 0

The Agents of this Bank are entitled to receive from the Institution their agency in room of salary.

599. You are now shewn a number of papers which the Welland Canal Company and the Welland Canal Commissioners exhibit to the Committee as vouchers for the expenditure of money. Do you, as a man of business, consider these papers to be such as ought to be received as vouchers by the Officers or Directors of a Bank, Canal, or other great corporation?—All I can say is, we (at the Commercial Bank) would not take them, they being as vouchers executed with crosses without witnesses.

#### [By Mr. Merritt.]

600. Although you say that you would not take those receipts in your Bank as vouchers, do you not conceive there is a material difference in payment to contractors, who may be illiterate men and and labourers on the line of a Canal; and would you think a Board of Directors would have good reason to refuse those vouchers when they agree with the estimates of the Engineer who states the work to have been performed?—In my own private business (independent of the Bank) I really could not receive vouchers with crosses without witnesses.

501. Would you think the officer who paid the money a sufficient witness?—Yes, I think so. He should have been a witness at the time.

#### [By Mr. Mackenzie.]

602. If in your Bank a dispute was to arise between an accountant and a person entitled to receive money, the latter denying that the accountant had paid him the money, and the former exhibiting a X without a witness to shew that he had paid it, how would the Bank act, would they consider the X unwitnessed as a sufficient proof of the payment?—They could not; but the clerk would be called to prove the payment.

#### [Witness wihdrew.]

# Mr. JAMES TROTTER called in and examined.

603. Can you state, from personal knowledge, Mr. Oliver Phelps' conduct with respect to the 34 locks' contract which held, and the manner in which that contract was fulfilled? ... Yes. He sub-let the locks to a number of persons at about \$600 or \$700 less than his own contract. I think that some of the locks were very well done, and there were others done by these subcontractors very slightly. I spoke to a number of them, who said that the price was so low that they could not do their work as it ought to be, and that if the work was to be done well a better with a party of the work was to be done well a better price ought to have been allowed.

604. Mr. Oliver Phelps states to the Committee that when he held the deep-cut contract he excavated 77 chains of the North nets the deep-cut contract he excusated 77 chains of the North end-that the average cutting was 49 feet 85-100—that he began 17 29-100 feet below the surface—and bottomed his part of the deep-cut. Is this true? Did he bottom these 77 chains or any part of it?—I do not think he did. I do not know that he bottomed any of the deep-cut, but Mr. Donaldson did I believe, who had a sonner to contract as I considered from the Company. had a separate contract, as I considered, from the Company, and who stated so to me. Mr. Phelps stated that the bottom of the deep-cut was to be 15 feet wide, and wished me to take a pole and measure the width of the bottom where he (Donaldson) had bottomed it. I did so with a ten foot pole. Mr. Donaldson asked me why I was doing so, and said he supposed Mr. Phelps sont me there. When I measured it it was only from 10 to 11 feet wide; when I told Mr. Phelps this he said that he would see Mr. Merritt or the Engineer to ascertain whether Mr. Donaldson would be allowed to go on with it, or else he would have the contract out of his (Donaldson's) hands.

605. In his evidence as to his own proceedings as a contractor for the deep-cut, Mr. Phelps says he used his sub-contractors with great kindness; do you know the facts? Mr. Phelps got large allowances beyond his contract—did he make similar allowances to his sub-contractors?-He employed me the last summer that he worked on the deep-cut to let the shovelling out by mer that he worked on the deep-cut to let the shovelling out by the yard, and he would pay soven cents per yard for shovelling it into the carts; the deep-cut was arranged with a certain number of runs where the machines were fixed for carting up the muck—he was to have the earth ploughed for them. On these conditions I let the work out as I thought the men could make good wages at seven cents per yard for filling in. The men worked very hard for one month and got their estimates, and had only from three to six dollars a month after naving their board: the from three to six dollars a month, after paying their board; the men turned out and would not work any more; he wished me to men turned out and would not work any most income get them to take it for another month on the same conditions, as he said he thought there was something astray in the estimates, and I persuaded them to try it another month, at the expiration of which they had only from eight to twelve dollars a month, at ter paying their board, and I considered from the way the men worked for the two months, that they ought to have had from fifteen to twenty dellars each month after paying their board. He then hired the men at twelve to thirteen dellars per month, and paid their board. I always considered that the men never got a fair statement of the quantum of the work from Mr. Phelps, as they did it by the yard.

[Witness withdrew.]

The Honorable John Henry Dunn, Receiver General, called in and examined.

#### By Mr. MACKENZIE.

606. The following are extracts of a letter from you to W. H. Merritt, Esq., dated York, 24th July, 1834.

"Your Agent has been able to get donations of £100 each from the Solicitor and Attorney Generals."

"You should send a circular to His Excellency, and as he is not willing to be a member of the Company he may give a do-

As these gentlemen paid donations to the work why are they not accounted for in the books like that from the Bishop of Quebec!—I think there were some donations givenin land, but so inconsiderable that they never were called upon. The only sum of money that I remember having received was from Quebec, but I cannot remember from whom

607. The sum of £447 10s. appears to be twice charged as cash paid by Company, viz: in: 1831 and 1835, for loss on steamer Peacock, chartered by the Company. There is no voucher or detailed account to show that there ever was any loss on this boat,

and Mr. M'Micking has this day stated in evidence, that the Agent of the boat, Mr. Macey, told him there was no loss. Do you remember any thing of those transactions?—I do recollect that the steamboat Peacock was engaged, but I do not remumber whether in the first instance by Mr. Merritt or the Company. It was considered very necessary for her to be engaged by the Company in that way, to induce travelling, &c. It was by way of experiment. I know nothing of the charge of £447 10s. mentioned in the cuestion. in the question.

608. Why were the accounts of the toll and forwarding of the Company neither audited nor placed on the Company's books of account in 1830, 1831, 1832, and the early part of 1833?—It is a subject I have frequently brought before the consideration of the Board. I have frequently asked for a statement of these accounts, but never could get it. Mr. Black was the person to whom I most particularly used to speak, but the excuse was the returns or moneys were not received from time to time. Mr. Randal was the only one who used to make his returns regularly and pay his collection, it was always told me; when I applied to Mr. Black and others, for the moneys collected by other collectors, they answered that they were appropriated to the uses of the Canal, and to assist to pay the estimates. 608. Why were the accounts of the toll and forwarding of the

609. Mr. Black states to the Committee that although a cash account of the actual monied transactions of the Company was necessary to be kept, he was prevented from doing so by some of the Directors, If so, what were the circumstances which induced the Board to dispense with a book or account held to be indispensable to the regular keeping of accounts?—I always objected to this system of keeping accounts, and considered Mr. Black incapable of so doing, and objected to his appointment from the first, and thought he would eventually bring the books into a state I do not know whether there was any order for of confusion. I do not keeping a cash account.

610. Among the awards I find the following:---

"In the matter between Thomas Merritt and William H. Mer. ritt and the said Welland Canal Company, we, the undersigned, do find, award, determine, and declare, that the advantages of the said Thomas Merritt and William H. Merritt (excepting the mill seat and appurtenances hereafter mentioned) are equivalent to the value of the lands proposed to be taken by the said Company, being estimated at nine acres and three quarters, and of all injuries or damage occa ioned thereto by reason of the said canal.

It being intended that the said Company should purchase the mill-seat, mills and appurtenances of the said Thomas Merritt and William H. Merritt, we, the undersigned, to award, determine, and declare that the said Company shall pay to the said Thomas Merritt and Wm. H. Merritt the sum of six hundred pounds of lawful money of Upper Canada; in full compensation for the said mill-seat, mills, lands (estimated at seven or eight acres) and buildings appartenant thereto, dated this 31st day of August, 1826.

(Signed)

T. Butler, Samuel Street, Thomas Clark Alexander Wood. John Hill. William M'Clellan, Richard Woodruff. George Ball, Marshall Lewis, James Durham, George Shaw, Samuel Thiel, George Lacey, H. Mittleberger Samuel P. Jarvis, James Black, Crowell Wilson, William Smith, Jacob Keefer, Robert Nelles, Grant Powell, Thaddeus Davis, Edward M'Bride d. B. Macaulay."

I was unable to refer to it before closing the statements or charges, it being at St. Catharines. It appears that the arbitrators were informed that the Company intended boying Merritramills, and the Cash Journal shows that he was paid for these mills. The Secretary reports that he has no deedlot those mills. mills. In a Secretary reports that he has no occupations mills among his papers as required by the by-laws—was a deed given; or if not, why was Mr. Merritt paid until he gave a deed?—It do not recollect all the circumstances connected with this question. 611. Mr. Keefer has possession of a very valuable mill seat, for which he is paying no rent; he appears to have no lease, only an order of the Board when three Directors were present, he being one, in 1825, after the expectations held out to the public of great returns from the water power, was it correct to give this mill seat to Mr. Keefer for nothing, without consulting the Stockholders?—I think at the time that mill seat was given to Mr. Keefer it was hardly supposed that we should ever get the water through, and to induce confidence and promote the advantages of the Company, it was deemed an advantage to grant this mill to Mr. Keefer with a view of inducing others to enter into the same sort of enterprise and enable the Welland Canal Company to dispose of their hydraulic sites, and we thought it was but a fair compensation to give that gentleman that site for the example he had shown. If the gift was to be made at this moment, I should say most unquestionably the Stockholders should be consulted because it is of great value, but at the time it was given for my part I thought it was a very hazardous thing to build untill there at all—and therefore considered it of little or no value.

612. Was not Keefer's mill at that time expected to be the summit level of the canal, and consequently the most valuable of the whole, had not the deep cut slips taken place?—I do not consider that at that time that situation was more valuable than any other on the canal in that neighbourhood.

613. Did not the making Mr. Keefer a present of the mill seat for four run of stones the water to which was to be brought to his mill at the expense of the province, and private individuals emble him to compete in too advantageous terms with Messrs. Woodruff, McMicking, and others who had built mills with steam engines and could not grind so cheap as a director who had the impelling water power given him for nothing?—I consider the more mills there are in the country the better, as it induces farmers to take their choice in the market and consequently get a better price. I believe Mr. Keefer has got his wheat principally from the United States, and an advantage would result to the canal by way of toll.

614. It does not appear to the accountants employed by the Committee that more than £400 or £500 have ever been received for the leasing or sale of water power from the opening of the Canal up to last December—what was the system of management of the Hydraulic Privileges during your presidency?—I know the causes which led to the sale of those Hydraulic sites, but to the detail part of the payments what has been received and other particulars I forget. The Company were exceedingly emburussed for want of means to carry on the canal; it was suggested by Mr. Yates that the sale of these hydraulic sites was a legitimate means of raising funds, and I think he placed the value of £25,000 upon them together with all the lands—I think he made an offer to this effect to become a purchaser—The Board considering however that the offer was a very liberal one, and the necessity great, they determined to dispose of them, and in order that there might be fair competition and more money got if possible for them the sale was made known through the various papers of the province and the United States, and the bargain was ultimately made with Mr. Yates for the sum of £25,000 on a credit bearing interest, which I think was to be paid annually, and upon which it was intended to raise a sum of money in the United States sufficient to carry on the works of the Canal the result of which I know nothing, but do know the object the Company had in view, which was the raising of money, was not realized. We were very much condemned for this transaction by the stockholders in England.

615. Supposing that Mr. McDonell and Mr. Yates had paid nothing at all on their purchase, sold part of the lands and kept the money, received the rents of water power on the line for years, kept possession of the millisites and water power at Allanburg, get a deed of the town plots at Gravelly Bay, and received £17,500 in bonds of the Welland Canal Company bearing interest in order to induce them to give back the remainder of the lands and water power, would you consider it a transaction that ought to be sanctioned by the country?—I certainly am of opinion that as a bargain made between Mr. Yates and the Campany whatever profit they might make of the Canal they were entitled to, as they would have to lay out a considerable sum of money to make the property valuable, and if they have not fulfilled their engagement they should be compelled to yield to the Company all the profits they may have mude by the same,

616. The greatest confusion appears to me to have existed in the monied concerns of the Company in the latter half of the year 1832, after Mr. Black left. Mr. Merritt states that he did not as Secretary although appointed to that office, and Mr. Clark is stated to have been the person in charge of the accounts—As this happened in the last year of your being President you can probably explain why monied matters were so conducted?—I think that the keeping the accounts of so large a concern as the Welland Canal, persons should have been chosen who were better acquainted with the nature of book-keeping—many errors would appear

from that circumstance, and improper apprehensions might beconceived when there was no real cause of it—This applied as well to Mr. Clark the present Secretary us to Mr. Black as mentioned in my former answer.

617. Under what circumstances was the loan of £50,000 obtained from the United States Bank in 1831?—On the credit of provincial debentures issued by me and delivered to the Company and negotiated by Mr. Yates with the United States Bank at 5 per cent per annum for a certain number of years, at the expiration of which it occurs to me that the United States Bank charged 6 per cent—this was an arrangement entirely between the United States Bank and Mr. Yates.

618. Do you consider a charge of one per cent, on \$2,000, on the Company's books as a payment to J. B. Yates for obtaining of the United States Bank this loan of £50,000 to the Wolland Canel Company a fair and reasonable business transaction?—I am not acquainted with such transactions in the United States, but I have sold some private bills on London, negotiated by Prime Ward, King, & Co., and their charge is one half per cent commission.

619. Can you inform the Committee why £178 are charged by the Canal Company as interest on the £3,000 given to the Commissioners?—The loan was raised by me through the Bank of Upper Canada which was to bear the legal interest and the debentures were to bear only 5 per cent by the act. They could not be negotiated at that rate and consequently could not be issued under that law.

620. Would you have considered it correct for the officers to have paid themselves their sularies without an order of the Board, and contrary to the by-laws during the time you were President?—If they did so it was very wrong, it being contrary to a by-law of the Company.

621. I would ask you whether in the case of an officer of the Company with a salary of £400 a year, which was the sum paid Mr. Merritt, is it probable that such officer could have received about \$1000 in one year without knowing it or finding it out either then or since?—It depends entirely upon the officer keeping a regular account whether he could or could not.

622. Have not the people of Lower Canada as well as the Legislature, contributed with great liberality to the canal already in their subscriptions for nearly \$150,000 of stock for the Province and for individuals?——I can only give the affirmative in answer, but I think the merchants and other individuals in Montreal should have been more liberal than they have.

623. Was it not a standing order when you were at the head of the Canal Board that no money should be paid out by the Treasurer or officers until it had been sanctioned by the Board of Directors?—I think so.

624. Can the President or officers of a Bank or Canal Incorporation, lawfully or with propriety lend the funds of the Institution to individuals without the approbation of the Board first obtained?—I think they should not be allowed to do so.

## [BY COMMITTEE.]

625. As you were President of the Welland Canal Company for some time should it appear that there have been errors, erasures, and false entries in the books, from your knowledge of the officers of that Company would you attribute this misconduct to an attempt to defraud either the public or the Company?—I attribute the erasures, &c. from the circumstance I have already stated of the insufficiency of Mr. Black to fulfil the duties of the office of Secretary who I verily believe to be a strictly honest man—no fraud could have been committed without his sanction—and further, from my knowledge of the other gentlemen who were and are connected with the control of its affairs, they are esteemed by me in the same light.

[Witness withdrew.]

FRIDAY, 25th March, 1836.

Committee met.

PRESENT:

James Edward Small, Esquire, Chairman.

Messieurs Chisholm.

Gibson,
Parke,
Roblin,
Shaver,
Thorburn,
M'Donell.—8.

Hon, John Hener Dunn again called and further examined.

## [By Mr. Mackenzie.]

626. It appears that upwards of 200,000 square feet of timber was got out in 1825, under a contract with Theophilus Brundage amounting to £1,300 or £1,400, for which he was paid, besides being paid This timber was intended for for taking care of it. a tunnel but not used by the Company in any way. I do not find that one shilling of returns from sales of that timber is to be met with on the Company's books, and evidence has been given shewing that persons in the employ of the Company realized money from the sale of that timber or of part of it. As President of the Company it is probable you can give the Committee some information on this subject.—I remember that there was a great quantity of timber got out for that purpose and brought into the Chippewa River and a person was employed to take charge of it by the name of Brown, some of it had been stolen and some had drifted away, and I think the remainder was sold to different individuals and a specific bargain made, but I cannot recall to my mind whether there was any money received, or how it was ultimately settled.

627. In what way do you account for the remarkable unwillingness shewn by capitalists and land-owners in all parts of this province to have any thing to do with the Welland Canal as stockholders!—We were very anxious to obtain persons in the neighborhood of Saint Catharines of respectability to become directors who were exceedingly interested in the completion of the work, but had not the means to make investment—and in order that the Company might avail themselves of the services of Mr. Clark, I was induced to qualify him.

628. Was you satisfied with the manner in which Mr. Oliver Phelps carried on his contract for the 34 locks?—There were 2 or 3 locks that I always complained of near his own place. I considered them badly built, and one or two of them I think bulged in a very short time after they were put up.

629. Seeing he did the work by sub-contractors and allowed them very moderate prices, I would like to ascertain the reason why he was allowed many thousand dollars more than the contract price?—I cannot call to my mind the circumstances—I think there were statements made from time to time of losses made by him; we were very much guided in the consideration of claims of this nature by the representation of the Engineer and Agent. I cannot tell if Mr. Phelps was allowed any additional remuneration or not, but I suppose the minutes of the Board will shew the transaction. The Board I will say always considered Mr. Phelps a very excellent man, and were ready to take into consideration any statements made by him.

630. Was not the work as well done by Hovey & Ward, Love Newlove, Rowley & Hartwell, on the Deep Cut before they were removed and the whole given to Oliver Phelps, the contractor for the locks?—The work appeared to be as well done, but Hovey and Ward were endeavoring to drive us into terms that we did not think ourselves warranted to accept, and unless we agreed to them they said they would not proceed. I think at that time there was an advertisement put in the papers offering a premi-

um to construct machinery which would facilitate the excavation of the Deep Cut; Mr. Phelps appeared to offer the best method of doing so—this, together with the confidence the Company reposed in him, came to terms to relieve Ward & Hovey of their contract, who were anxious to give it up—and accordingly we engaged with Mr. Phelps: Messrs. Ward & Hovey were repeatedly urging the Company to increased demands per cubic yard; it was our intention to take into consideration their case on the completion of the job, but they still objected.

631. Will you have the goodness to mention upon what evidence you have stated that Messrs Word & Hovey were desirous to give their contract up?—I believe they were anxious to give their contracts up rather than to proceed according to them—Mr Hovey stated that they could not compel him, and that he would not proceed with the work.

632. Mr. Oliver Phelps had the 34 locks contract with Ward & Hovey—he had been behind his time in finishing it—he had received far larger prices than he agreed for, and you have stated that you are dissatisfied with part of his work, and that you had great confidence in Mr. Ward. Under these circumstances, I would wish to know upon what principle you employed Phelps on the Deep Cut and gave him a large additional allowance after refusing any increase to the first contractors!—We considered Mr. Phelps as the ostensible person in the contract of the locks, which contract he completed to the satisfaction of the engineer; he continued on the Deep Cut to the time it was abandoned. Ward & Hovey had comparatively done but little.

633. Did Oliver Phelps bottom his part of the Deep Cut?—Some part of it he did, I believe. I cannot state from my personal knowledge any thing more about it.

634. As the locks contract was not finished when you gave Mr. Phelps the Deep Cut, you could not, I think, have been influenced by the Engineer's opinion, which you have referred to, in giving two such very large jobs to one person?—I think I have answered the question in a former answer.

635. Mr. Phelps having given the replies now read to you, I wish you to say whether Mr. Merritt urged on you or on the Board to continue Hovey & Ward in the Deep Cut contract at the time Phelps proposed to take it?—Not at that particular time, but he did up to that period.

636. Can you refer to any settlement with Mr. Phelps on the minutes of the Board wherein you agreed to forgive him £7,558 of advances, besides the £1,250 extra allowance, and the sum of \$7,000 and upwards allowed him for teams, &c., on the Deep Cut contract?—All those circumstances are I suppose, recorded in the Journal of the Company's proceedings. I do not recollect of any such circumstance as that mentioned in the question; this I do remember that Mr. Phelps had a claim, but what it was for, or the amount, I cannot say. I do not remember a claim of so large an amount as that stried; but about the time I left I remember there was a desire evinced on the part of the Board to give up his mortgage, which was, I thought, about 2 or £3,000.

637. Were you aware at the time you left the

~

Board that Mr. Phelps was entered on the Company's books as a debtor for £10,000 or thereabouts for cash advances made him on the Deep Cut contract several years after the Deep Cut slips took place, and the engineers had reported on his work?—So sar as I recollect the advance was about the amount of his mortgage.

638. Was there any allowance made Mr. Phelps while you were President or agreed to be made him other than as appears by the minutes of the Board?—It could not be, all the allowances that were made must have been made according to the minutes of the Board, and they should always shew it.

639. For what reason was Mr. Phelps allowed \$2000 in 1832 for superintending the locks when it was his own contract?—I cannot call to my mind any circumstance relating to that subject.

#### [By COMMITTEE.]

640. Admitting that it be proved that the work has not been prosecuted with that regard to economy and good management which might have been desirable, do you think that Mr. Yates and the other large stockholders are the less entitled to favorable terms in their proposals for the purchase or sale of the canal?—The stockholders have nothing to do with the loss occasioned by mismanagement, if there was such,—as a proof that they were satisfied the canal was carried on with prudence and discretion—they elected the same Directors every year, and never seemed to desire a change.

641. Although Mr. Yates' commission for negotiating the loan may appear high in a plain business transaction, from your own personal knowledge of that gentleman's exertion, and the large amount of capital advanced by him at an early period, do you think him entitled to the favorable consideration of that Company?—I think Mr. Yates was always entitled to the most favorable consideration of the Company.

### [By Mr. Mackenzie.]

642. Was not the election of the Directors or a majority of them always in the hands of Mr. Yates and the New York stockholders?—Yes, as Mr. Yates was the Attorney for all the New York Stockholders.

643. Mr. Buchanan in a letter to Mr. Wenham and now shewn you states that he entered into a private agreement with Mr. Merritt in 1824 of a nature different from his public agreement to become a stockholder. Do you know any thing of this transaction?—I think there was a letter written to the Board by Mr. Buchanan wishing to withdraw as a Stockholder altogether, which the Board did not accede to—a part of his stock subscribed at New York he stated he did not intend to pay. I know of no secret agreement other than by this letter.

#### BY COMMITTEE:

644. Did you go to New York in the winter or spring of 1825 and dispose of stock, and to what amount—did you hear from any stockholder then at that time that they had subscribed in consequence or were influenced by seeing Mr. Buchanan's name on the list?—I went in the spring of 1825, about the last of April, and disposed of stock to the amount of £75,000, and could have disposed of more had I

been authorised—I do not recollect that any person in New York stated to me that they were influenced to subscribe by Mr. Buchanan's name being on the subscription list.

645. Have you received any, and if so, what remuneration for any services performed by you tor the Company as President or otherwise?—None whatever, either directly or indirectly.

[Witness withdrew.]

## MR. TROTTER again called.

#### [By Mr. MACKENZIE.]

646. Do you know any thing relative to the contract taken by Mr. Phelps for excavating five miles of the canal on this side of Dunnville in 1829 and 1830—the price he took it at, and what he received —the manner in which he carried it on—the nature of the embankment—and how the work was finally disposed of?—I proposed to do the whole of the route except three or four sections at from 13 to 15 cents per cubic yard. Mr. Phelps got the whole contract—I do not know at what rate. He sub-let the work to others contractor—they did not finish their contracts. Mr. Merritt wished me afterwards to go up to the feeder with men and teams to assist in finishing the work; he also employed other contractors for the same purpose. I do not think Mr. Phelps finished any part of the work.

647. I perceive that in his statements made to the Board of Directors, Oliver Phelps values a meeting house built by him, do you know how he came by the timber that built it, and what he did with the house?—There was a large house of worship there, he partly built it with tunnel timber. This timber was used for the siding of the house.

648. Did you ever cut any roads for Mr. Newlove when Mr. Merritt took his job at the Deep Cut away from him and gave it to Phelps? Did Newlove pay you—and did he use these roads?—Yes—I got I think two roads cut, and Mr. Newlove paid me \$72 for the work. I do not think he did use these roads.

649. When you prosecuted the Company for the claim you had and recovered, was it because they denied the debt or because you were unwilling to wait—and what was the conduct of their accountants in that case?—At the time I got that claim I got a due bill from Mr. Black—I spoke to Mr. Dunn to know whether the Company had any money—he told me they had at that time, and that if I would go over he thought I would get my pay. I went over and saw Mr. Black, who told me he was not authorised to pay any claims, and told me to call on Mr. McDonell, and he told me to go to Mr. Merritt; but I could get no money and then returned home: In about three months after I visited St. Catharines again, when Mr. McDonell told me that they could not not would not pay me until such time as the Welland Canal office had funds to pay the claims. I then returned and gave my claim to a lawyer, who sued for it and recovered it.

650. How did Mr. Phelps use the men who had to work by the yard on the Deep Cut?—I do think Mr. Phelps used the men very unjustly by not allowing them what they really did.

651. Do you think that the placing the earth on the bank of the Deep Cut was the cause of the slips that took place?—I think that if the earth had been moved back according to the original practice the slides would not have taken place so soon, but I do not know what might have taken place afterwards.

652. Did any of the earth that was placed on the bank of the Deep Cut on Mr. Phelps' job slip in again '—It certainly did to a great extent—the earth on the banks pressed down and bulged in the sides.

653. Where did Phelps get the timber for his large store—and what was done with it after the Deep Cut failed?—The principal part of the timber for the frame and cellar was this tunnel timber, the building was afterwards sold when the work was done to the account of Mr. Phelps I believe.

654. Did Phelps take any of the tunnel timber down to his own place at Centreville?—There were teams employed in hauling that timber down to the foot of the mountain—I do not know whether he put it in the locks or for his own private use, but I rather think it was for the locks.

655. What did Phelps do with the tunnel timber of the church when the work was done?—It was hauled to the foot of the mountain to his own place.

656. Was the Deep Cut the full width when Phelps got the work, or did he widen it?—I do not think he widened it, as Hovey and Ward made a contract with me to widen a part of it ten feet wider, which I did before he got the work.

657. Was Love Newlove treated with injustice in having his contract taken from him without failure on his part in order that it might be given to Phelps?—I know that Mr. Newlove was making money by the job at the time it was taken from him—he said that he could finish his part of the work he thought for 30 cents.

658. Speaking from personal experience and observation, what was the conduct of the Company towards contractors...to yourself for instance?....I have a claim against the Company. In the fall of 1828 I finished section No. 24 in the spring of 1829. Mr. Barrett the Engineer employed me to raise the embankments where they had sunk, and told me that I would be paid by estimate or days work...he told me afterwards that he would give me a statement & I would be paid by the day. I got the statement from Mr. Gooden, an Engineer. Mr. Barrett told me to bring it before the Directors and that he would attend to it. Mr. Merritt asked to see the statement; he (Mr. Merritt) took it into the Secretary's office...I never saw any more of it, or got any thing for my work; the amount of work was 486 days. Mr. Barrett always told me that I would be paid for it...that I need not be uneasy. Mr. Newlove is acquainted with these facts.

659. In the case of Oliver Phelps I perceive that several years after he was paid in full, as per estimates of Engineer, for the lock contract, he makes a charge of \$2000 which were paid him for superintending his own contract. Was it customary to make such

allowances on the Welland Canal?--No. I never knew that contractors were in the habit of getting any such charge.

## [By Mr. Merritt.]

660. Was not the contract you refer to on new feeder let out late in the spring-was not a condition in that contract as well as all others to finish within a given time or the Company had power to put on other contractors-was not every person sick without exception on that line-did the Company not put on you and all other contractors and concentrated thire entire force on that part of the line-and was any preserence given Phelps or any other contractor on that occasion, and did not Phelps object to complain of their proceeding,-and further did you ever know more work done with the same number of men in the same time than on that occasion?—As regards the first contract to Mr. Phelps I think there was .-Mr. Phelps stated to me that he knew that I would get two or three sections of it, but that if I would withdraw he could get the whole and let me in as a partner—and I considered that when Mr. Phelps took the contract that my name was in the contract with his, and he afterwards told me it was not, but that the whole of it was his own private contract. There was a time limited to do the work-Mr. Phelps failed in doing the work according to his contract-myself and other contractors were brought on and finished it. Every man did all he could to push the work forward so as to get the water in.

661. Did you ever mention the circumstance of Phelps agreeing to join you to the Engineer or myself until after Phelps had the contract and you had been up the line and returned ?—No I did not.

662. What price did you understand Mr. Hovey asked the Welland Canal Company for excavating the Deep Cut?—Mr. Hovey told me he should not like to undertake to excavate to the bottom for less than 50 cents per yard.

663. Did you know of a well having been dug at the North end of the Deep Cut near the bridge, some feet below the level?—Yes.

664. And did you ever hear any person apprehend any danger from slips until after they had actually occurred?—No.

665. Except the claim you refer to do you know of any instance of partiality or injustice to you or any other contractor—was not the work generally carried on with as much rigor and attention as under the circumstances was practicable? Was not the claim you refer to the settling of embankment on lots?—Yes, by order of Mr. Barrett. I consider that other contractors were losers by their jobs and were not remunerated as was Mr. Phelps.

[Witness withdrew.]

# Mr. CLARK again called. [By Mr. Mackenzie.]

spring or summer to T. Merritt, Junr. for day work and materials, with no other certificate than that of John Fisk the contractor, Merritt's own clerk, and an occasional workman. Is not Mr. Black the super-

intendent, and is it not a part of his duty to report on or sign accounts, certifying from his own knowledge?—I should suppose that if Mr. Black certifies he ought to do so with his own knowledge—I do not say that Mr. Black has not done so. In respect to Thomas Merritt's account 1st May, 1835, I do not observe Mr. Black's signature thereto; what reason he may have had for withholding it I do not know; I consider it was his duty to have placed his signature to it. This account passed the Board at the time yourself and Mr. Thorburn were present.

667. Why have you given up the system of keeping accounts current with the contractors which so much simplified the proceedings of the Company when in use by Mr. Wenham?—I am not now aware that that system was kept up by Mr. Black, and from that circumstance I suppose I neglected to keep such an account.

[Witness withdrew.]

SATURDAY, 26th March, 1836.

Committee met.

PRESENT.

James Edward Small, Esq., Chairman, Messieurs Chisholm.

M'Donell.
Parke.
Roblin.
Shaver, and
Thorburn.—7.

# Mr. Hincks again called and further examined. [By Mr. Mackenzie.]

668. The last item in the Commissioners' general account is, for Mr. Robinson, "paid my own salary for 254 days, at \$5 per day, in part, £239 8s. 5d., this would leave a balance due Mr. R. of £78 1s. 7d., but in his detailed account he deducts 32 days absent, or £40, and £12 10s. received from Mr. Merritt, which is for an account charged by him, but paid and charged by the Company, leaving, as he states, a balance due him of £25 11s. 7d. In case the Legislature hould consider Mr. Robinson entitled to \$35 per week, for the term in which he was on the Canal, and admit his statement of time, is this balance correct?—I think that it is.

669. I have stated to the Committee that Mr. Robinson charges the following items to the Canal Company twice over, viz: Widow M'Keefer \$50, 12th March: John Toyne, \$25, March 9th; William Murray, \$10, March 11th; H. M'Keefer, 10s., March 28th; Silverthorn, \$8; Carson and Sloan, £5, April 5th; Johnson Orr, \$14; H. M'Keefer, \$10; John Vanderburgh, \$300; Thomas Martindale, \$40, and Andrew Ratelific & Co., \$50. Are you satisfied, after having examined the accounts, that he has done so?—I am.

670. There is an order for £8 10s. S. H. Farnsworth, on John Clark, (the latter acting for Mr. Robinson) in favor of John Shore, dated 5th April, 1233, as follows:—

STONE LOCK, April 5, 1833.

J. Clark, Esq., please pay John Shore an account of Welland Canal Commissioners, eight pounds ten shillings, it being for emptying two cribs at Vanderburgh's lock.

S. H. Farnsworth

This is entered in Clark's Commissioners' leger, page 43, as £3 10s., but in Mr. Robinson's general account of his disbursements, he charges it as £13 10s., April 3d. The receipt, in the hand-writing of Mr. Clark, on the 5th of April for £3 10s., and signed by a cross, without a witness, has been since changed in another hand to £28 10s., and the date from the 5th to the 3d. Are these statements correct; and if so, have you been able to obtain any satisfactory explanations?—The receipt above alluded to has been evidently altered from £8 10s. to £18 10s.

- 671. I have stated to the Committee, that although Mr. Robinson claims £2201 11s. 4 1-2d. as money expended by Mr. Farnsworth, and refers to Farnsworth's account and the vouchers, yet the account thus referred to amounts only to £21245s. 5 1-2d. and of this sum, which is £77 5s. 11d. short, there are a great many receipts or vouchers made with a cross without any witness, some are without vouchers at all, and in a number of cases the service performed is not mentioned. Are these statements in accordance with the facts as inquired into by you?—They are perfectly correct.
- 672. Cyrus Rose, of Dunnville, received of the Welland. Canal Commissioners, to expend on the Canal in 1833, £766 16-6d., also £131 0s. 0 1-2d. from the Canal Company. I wish that you would describe to the Committee how these sums are accounted for; and that you would state the sum overcharged by Mr. Robinson, after allowing all sorts of vouchers whether with or without dates or crosses or witnesses, or of whatsoever description they may have been.—On comparing the sums charged as paid to Mr. Rose by Mr. Robinson and his agents, with Rose's receipts, the sum of £98 8s. 1d. appears unnacounted for by Rose, allowing all the vouchers which are amongst Rose's papers, some of which are of a very unsatisfactory nature.
- 673. I have also stated that of the £200 charged by Mr. Robinson, as paid T. Merritt, in October, 1833, £50 were paid by Farnsworth without taking a receipt, and charged by Farnsworth, thus making an overcharge of £50; and that \$100 is admitted by T. Merritt to have been received by him from Mr. Robinson on the 3rd of May, 1833, and \$50 through Tench in June, which Mr. Robinson has not charged at all—thus reducing the overcharge to £12 10s. Is this correct?—Yes.
- 674. I have stated to the Committee, that with respect to Thomas Merritt, Jun.'s accounts, £200 were paid him by Mr. Robinson for the Commissioners, in 1833, on his Gravelly Bay Pier contract, at the request of the Board of Directors of the Canal Company, at a meeting held by them in July of that year; and that this sum is not yet charged to Thomas Merritt on the books of account of the Canal Company. Is this in accordance with the facts as inquired into by you?—Yes.
- 675. I have stated that Cyrus Rose charges the Company through Mr. Robinson, \$23 13 cents, for gravel, paid Andrew Thomson on the 14th of June, 1833, and Mr. Robinson charges it over again, although it is evident from the account it was not twice paid. Is this so?—Yes.
- 676. I have stated that \$30 paid Vanderburgh, 12th March, 1833, on account of Fisk, is charged twice to the Company by Mr. Robinson. Is it so?—Yes.
- 677. Did you observe sundry errors in the computation of John Vanderburgh's account for the hauling of stone, dated 11th of April, 1833, amounting to £12 7s. 3d., for which sum Mr. Robinson appears to have over-paid him?—Yes.
- 678. Should not £25 of the £103 9s. 2d., charged by Farnsworth, as paid T. Merritt, Jnn., for Mr. Robinson, be deducted from that part of the accounts presented as payments by Mr. Robinson?—Yes.
- 679 With regard to Donaldson's accounts, as superintendent under Mr. Robinson, I have informed the Committee that some of his vouchers are crosses not witnessed; that others refer to no service done or materials furnished, and that for a part of the money entrusted to him there are no vouchers at all; and this about 300 gallons of whiskey purchased by Mrs. Paterion from Mr. Kirkpatrick, in the course of ten days are charged; through Donaldson, to the Canal. Have you found these statements correct?—Perfectly correct.
- 680. Mr. Robinson paid Helmer, on the 16th of October, 1833, his account in full, and being unaware that an order had been given Relmer for six cwts. of flour on George Keefer on the 8th. Keefer got the payment for this flour from Farmworth, in Nove, and it is charged to the Company. Is it not a debt due by Helmer to the Company of \$18.2—It is.
- 681. There are £10 charged by S. H. Farnsworth as paid to St. John, in his detailed account, for which there is neither account of expenditure nor voucher. £10 also charged by him as paid to W. H. Merritt, and £2 to L. Dyer, both of which are in the same situation. Have any explanations been afforded you of a satisfactory nature relative to those sums?—Not at present.
- 682. A contract was entered into between the Welland Canal Company and John Vanderburgh in August, 1833, Which commenced Sept. 15, and ended 15th Nov., as which time repairs, die. are egain charged to the Company as per estimate books and

accounts. The contract amounts to £115 10s. per month, as follows:--

15th Sept. to 15th October, 1 month,		
	231 0 (	• •

The payments are all by Mr. Clark, as follows :---

A payment on 1st month, per receipt, No. 1, book,	and es £65		
A payment on second month, per estimate hook, page 21, A payment in August, 1834, per Mr. Clark, said in	65	10	0
receipt to be on second month,	20	0	0
Already charged in Canal Company's books, Mr. Clark also paid, on behalf of Mr. Robinson and the Commissioners, Nov. 2nd. £50 0 0	£151	0	0
Do do Nov. 19th, 30 0 0	80	0	0
	£231	0	<del>-</del> 0

I do not find that Mr. Robinson has charged this £30 in his general account, it must therefore go to his credit. But Mr. Clark also exhibits another receipt for £24, duted 14th Nov. 1833, with an order from Vanderburgh, dated the 3th of Nov. and an acceptance by Mr. Clark, dated the 12th. This is stated to be a payment on account of the Commissioners, and no service mentioned, it is not charged by Mr. Robinson. Does it appear to you that I have stated the facts as they stand on the books and papers shown to you?—Yes.

693. Farnsworth charges \$20 as paid for tools for John Fisk as per bill. There is no bill nor voucher, nor any explanation. Should such a charge as this be allowed as good against the Company?—I should think not without some explanation.

684. Do you consider the vouchers offered by Mr. Robinson for the expenditure of so much of this money as there are any detailed statements, in all cases satisfactory, and such as would be allowed in the public offices as a good discharge to an accountant entristed with the expenditure of public money?—I consider the vouchers offered by Mr. Robinson to be very unsatisfactory and extremely discreditable to a person entristed with public money. I do not know the the custom of public offices in this respect, but presume that such vouchers as I have seen (signed with a cross without a witness) would not be taken by any public accountant.

635. Is there any bill or voucher in detail, or any statement to shew the expenditure of \$200 charged the Company as a payment to Vanderburgh for lock-tending up to May 1323, page 14 estimate book?—There appears to be no voucher.

636. Are the committee to understand that the conclusion you have come to on your examination of the accounts I have pointed out is that there is a defalcation or deficiency on the part of the persons entrusted with the money of the Company to the amount of about £2000? Is there not about that sum for which as yet no satisfactory account is given by them over and above sums for which they have no vonchers or no regular vouchers?...To the best of my knowledge the amount which has been twice charged on the books of the Company, or for which credit has been improperly taken by the officers as far as I could judge is about £1000 --about £7000 more appear to have been improperly credited to persons or paid them without authority. This latter sum includes £132 of Orderly's, the £149 paid Mr. Merritt and not charged him, the £75 not charged to T. Merritt till December 1835, and the £50 erasure in his account and other sums which though they would have caused a loss to the Company of that amount—say £734—yet I have not included them under the head of charges made twice or toll unaccounted for which constitute the £1000. I have not included the deficiency in Mr. Robinson's account under the first heads, It appears at present not having any explanation from him, that the sum of £302 fs. 3d. is the balance between those sums for which he has twice taken credit and the £80 which he did not charge.

687. Is it possible that the account sworn to in 1932 of the application of money's received by the Welland Canal Company and its officers from the United States Bank can be just and true, and if not why not?—My opinion is that it cannot be correct because the sums paid from the Bank as appears by the books for loss on Peacock and to Mr. Yates are not included in the balance handed to the Legislature, but it is possible that £50,000 may have been paid in the way stated, though it could not all have come through the United States Bank if the books are correct.

688. Have you not made every possible inquiry at the officers of the Company relative to the several accounts which I pointed out to you as being improper, before coming to a conclusion on the several matters to which your attention has been directed?—I have always asked Mr. Beaton to explain any matter on which there was a doubt and he has frequently assisted us, but latterly he declined giving any explanation.

[Witness Withdrew]

Mu. Ye again called and further examined.

### [By Mr. MACKENZIE.]

639. As an accountant employed by the Committee of the Legislature you have been present examining the several accounts concerning which Mr Hineks has this day given evidence. Have you read the questions put to him and his answers, and do you concur with him in these, or in what respects or in which of his answers do you differ from him 1—Having examined the accounts referred to conjunctly with Mr. Hineks. I concur with him in the answers he has given as to the facts:—with regard to giving a final opinion as to the amount of any defalcation. I should rather not do so at present, as the accounts have been kept in so irregular a manner that it may turn out that the officers can account for several of the sums which appears to be deficient although they are not entered on the great Books of the Company.

[Witness Withdrew.]

# Honorable John Macaulay called in and examined. [By Committee.]

690. State what information you can give the Committee upon the subject of the £7,500 entrusted to you as a Commissioner (with Messrs. Robinson and Shade) to expend on the Welland Canal, in 1832 or 33?—I know nothing of the accounts or the expenditure of the money—the whole was placed in Mr. Robinson's hands, who consented to attend to the matters entrusted to the Commissioners—I supposed the accounts would have been regularly laid before the Legislature the same Session we made our report.

[Witness withdrew.]

# Mr. CLARK again called. [By Mr. MACKENZIE.]

691. Mr. Robinson states that \$233 of his expenditure in 1833, was for work which ought to have been performed by the lessees of mills, and to have been collected from them, and his letter now shown to you, dated 25th October, 1833, and addressed to you, requires that they should be so collected; \$58.08 is for Marshville mill floom; \$150 for stopping water at Bowery and Butler's mills, and \$25 for floom-breaking at Allanburgh mills. Why have you not charged these sums to the parties?—The payments made out of tolls in 1834, for detention of vessels, was authorised by the following order of the Board, passed 15th October, 1833:—

"The subject of an application from sundry captains and ship "owners for relief on account of detention in the Canal from the "break at the Culvert and mill lock being reconsidered

"Resolved. That all those concerned be informed that they "will be allowed one cargo free from charge of tell next year to "the amount paid in by them at the time of the detention."

The several collectors received credit on their returns, 1834, for the amount so allowed.

692. I think that upwards of £100 are charged for detention of vessels in 1834, for which the accountant said he would look for the vouchers. Have you found them?—It appears by the minutes that those claims were submitted to the Board, 21st Oct., 1833, and were then deferred. They were again laid before the Board on the 15th Nov. following, and were laid over for information from Mr. Farnsworth the Commissioners' superinten dant, after which no further proceeding appears to be had upon them.

Monday, March 28th, 1836.

Committee met.

PRESENT:

James Edward Small, Esquire, Chairman.

Messieurs Chisholm,
McDonell,
Parke,
Roblin,
Shaver, and
Thorburn—7.

George Keefer, Junion, Esquire, Civil Engineer, called in and examined.

[By Mr. MERRITT.]

694. He also states I acted in conjunction with the Commissioners in their proceedings, and as proof, produces my signature on Hands & Co.'s account examined and found correct, £137 7 9. Will you state the reason of my signature appearing on this and other accounts in the Spring of that year?—Many contracts were entered into by the Company the Fall previous to Mr. Robinson taking charge of the work. The item of £137 7 9 relates to a contract with Hands & Co., which Mr. Robinson refused to pay without being certified by you.

695. What is your opinion respecting the slides in the Deep Cut, do you think they were occasioned by the earth having been placed too near the bank?— From the nature of the bottom soil of the Deep Cut, I am convinced that no effectual remedy could be adopted to avoid slips. In all cases where they have as yet occurred, it has not been from the pressure of earth on the bank, but owing to the nature of the quick-sand in the bottom, being too soft to sustain the natural bank, the perpendicular pressure of which forces up the bottom of the Canal. I would further observe, that where the bottom is good stiff clay, there have been no slips, although in the deepest cutting, where there is, consequently, the greatest pressure of earth.

and not made out—will you state the cause they are not all made out—will you state the cause they are not all made out, and the system intended to be adopted by the Board, relating to all land matters?—There was an order of the Board, that I should be employed to make out a survey and description of all lands belonging to the Company, on the line of the Canal, and enter them in a book, the survey was commenced accordingly, but from my being frequently called off to attend to other business of the Company, it has not yet been completed, for which reason many Deeds have not yet been given. You will see by

the book of plans, the system I have adopted, wherein all the surveys which have yet been made, are entered, and where the whole are intended to be.

697. What do you know with respect to the estimate of November, 1832, being missing; has any injury arisen from it to the Company?—The estimate comprising all the work done on the Gravelly Bay route, was closed in November, 1832, stating all the particulars in detail, which estimate, was duly signed by myself, as Engineer, examined by the Secretary and approved of by the Board, but I can in no way account for its absence from the office. I do not recollect to have seen itsince the settlement with Garrison & Little; the copy which appears in the book of estimates, I believe to be correct, as far as it goes, but it does not contain work done by Donaldson, and extras allowed Garrison & Little, although shewn in the abstract; the reason, I think, was this: After making up the estimate, it was kept open for some time to give Donaldson (who was employed with a company of men to remove all the bars, to finish the work which contractors neglected to do, and to prepare the Canal for the Spring navigation,) an opportunity to bring in his bills, and, I think, this work, together with the extras allowed Garrison & Little, was approved of by the Board, separately, this, also, in my opinion, accounts for the sum not having been mentioned in the minutes of the Board. I remember, perfectly well, that I made up these accounts, after making up the estimate, and that they were approved of by the Board, and, knowing this to be the case, I attached these additional items to the copy of the general estimate alluded to.

698. Mr. Mackenzie asserts that the method of entering the estimates, was discontinued after Mr. Wenham left; will you shew the Committee the manner in which they were kept?—The system first adopted, has been kept up, as I will shew by the books.

699. We have been accused of want of system, regularity, sufficient checks, &c. &c. &c.; will you relate to the Committee, minutely, the system on which returns were made, and the work paid for?—The system adopted by David Thomas and Mr. Barrett was the same as on the Eric Canal, as I understood:

1st.—After the line was run and the levels taken and proved and a computation made of the contents from tables prepared with great labor for that purpose, the ground was laid out into sections.

2nd.—After being so laid out, the number of yards computed, and the estimate of its value, in the Engineer's opinion, it was submitted to the Board of Directors and public notice given for tenders on each section on a given day.

3rd.—Those proposals were opened by the Engineer, in presence of the Board, and after computing the value of every description of work for which tenders were made, the name of the lowest bidder was given in, and the Directors on consultation, with the Engineer, gave out the contract to the lowest, and best, according to their judgment.

4th. A contract was then made out for the execution of the work according to the number of yards then exhibited by the Engineer, for the correctness of which the contractor was to be satisfied. 5th. Every month or two during the operation of the work or whenever an estimate was made a level was again run and an estimate made of the number of yards remaining in, retaining the balance so as to be certain on the last estimate that too great a number of yards had not been returned which was the only danger to be apprehended from the constant importunity of the contractors, to return them as much as possible. It, however, occurred on many occasions, from unforseen circumstances, to return extra work, which was allowed by the Board, if it appeared necessary and just.

6th.—After the estimate was made out by the Engineer, the Agent examined it with a view of ascertaining that the work had actually been done at the different places, there returned, and signed the estimate, then the Secretary examined the calculations and also signed it, when it was presented to the Board and approved. Notwithstanding all this precaution, errors have and will, in my opinion, always occur on this or any other work of equal magnitude.

7th.- On those estimates, the different contractors were paid.

700. Mr. Hall's answer to question 225, admits, the contractors who had been employed on Deep Cut were the best judges of the probable value of the work, but, in his answer to question 227, thinks contracts should not be varied, unless in extreme cases. Has a contract on the Canal ever been varied, except in extreme cases, to your knowledge?—I do not know of an instance where a contract has been varied, except when it was absolutely necessary.

701. What was the price paid Messrs. Hovey & Ward, on an average, for the depth they excavated the Deep Cut?—21.55 cents per cubic yard.

702. What was the actual price paid Mr. Phelps, per yard, including all advances for the bottom cutting in Deep Cut?—34 cents.

703. What is the average addition as you descend in deep cutting?—1 cent per yard to each foot, descending below 10 feet, is considered as a fair allowance in deep cutting.

704. What would the average price per yard be, on the Deep Cut from 17 feet downwards, allowing 15 cents for the 1st 10 feet, and one additional cent for each foot descending, and in the same ratio, what would it be at 18 cents?—The price at 15 cents per yard, would average 35-76 per yard, and if 18 cents were allowed, the proportion would be 38-76 cents.

705. In answer to question 352, Mr. Newlove states, he never was paid for roads on Deep Cut; by reference to settlement of Committee in 1832, does that appear to be the case?—By referring to the set tlement on claims, in 1832, it will be seen that his was submitted and settled by a Committee, consisting of Messrs. Randal, Lefferty and McDonell, and that he was allowed for cutting roads.

706: Question 350 and 351, appear to have been put with a view of shewing, that more was allowed on section 13 than on 10 and 11, and that the bottom width of that section was 30 feet. Will you explain to the Committee, what was the actual width of the bottom of Canal, and why a greater price was allowed on section 131—The whole of the new line was

laid out 26 feet bottom, but part of the sections were afterwards reduced to 20 feet, except 8, 9, 10 and 11—the cutting on section 13, was 9 feet  $\frac{30}{100}$  and that of 10 and 11 about  $8\frac{1}{2}$  feet, no springs, principally muck and favorable cutting.

707. Mr. Newlove, in answer to question 348, states, there was no more difficulty in finishing section No. 13, than 10 and 11 of the Gravelly Bay route; will you state to the Committee your opinion on this subject?—Section 13 was the most difficult job on the whole of this route, to finish, on account of the number of springs to conteud with, and the great difficulty of drainage. Besides, the excavation was of the hardest description. Donaldson finished this job after Galbraith and Upper left.

708. Mr. Hall states, in answer to question 86, that in short levels, it is almost impossible to keep levels up, where a saw mill is situated. Are there any saw mills situated on these short levels?—It is admitted that saw mills on short levels will draw down the water, and to avoid this inconvenience the Company have not allowed any to be so built except two at Thorold and these are so constructed by a flume and race way as not to allow the water to be drawn below its natural head.

709. Mr. Hall in answer to question No. 90, states that he observed detention on Partridges level, is that not one of the largest on the lower part of the line excepting Port Dalhousic?—Partridge's and all the other saw-mills are on the long level.

710. Mr. Hall states in answer to question 132 he thinks Mr. Barrett's estimate of locks correct—Did Mr. Barrett accept of those Locks, and how many ever broke under the mitre sill on the line of Canal before Mr. Hall's arrival—he states in answer to question 133. One since his arrival?—Mr. Barrett did accept of those Locks, and the only ones that have broken under the mitre sill, are Locks No. 19 and 20—one before Mr. Hall's arrival and one since.

711. Do vou know of any injury arising to the Canal in any way in consequence of Directors being concerned in mills. Or have I as yet made use of any water of the Canal for that purpose — I do not, On the contrary I am certain the Canal will be benefited thereby as well as the Stockholders, the country generally, it is quite obvious that the more mills and machinery you have, the more business will be done by bringing vessels into the Canal to convey the produce to market—as it regards yourself, I know that you are building a flouring mill at St. Catharines and have an interest in another at Port Colborne, neither of which has as yet used any water from the Canal.

of which has as yet used any water from the Canal. 712. Will you give the Committee your opinion respecting the relative advantages of the two routes from Mountain to Port Dalhousie, by valley of Dick's Creek and the one named by Mr. Hall?—I was not employed as an Engineer at the time the route through the valley of Dick's Creek was decided on but I believe all the Engineers who examined this route were decidedly in favor of its being the best and cheapest—The following extract from Mr. Barrett's report, will shew his opinion on this subject.

"Whereas in embracing the valley of Dicks Greek and the 12 you have a fine specious canal, which will in a great measure prevent that obstruction to the navigation which would necessarily occur in a canal

of more limited dimensions where so great a quantity of water must be drawn through to supply the different lifts and the extensive Hydraulic privileges which are evidently far superior to those on any canal of the above dimensions"—

Objections have been made by some Engineers against the propriety of carrying canals through valleys instead of keeping on table land—on account of their liability to injury from freshets, thereby endangering the Locks and embankments, but experience has proved that less expense in repairs from this cause has been incurred in that part of the canal from St. Catharines to Port Dalhousie than from St. Catharines upwards to the mountain—and this is to be attributed to the wide and extensive basins and waste wiers which gives the water an opportunity of discharging itself without doing injury.

As regards the route named by Mr. Hall, I am well acquainted with the face of the country through which it would pass but am not prepared with any estimate to shew the difference of expense between this and the former Route, there is a wide difference in the expense between making a canal in a valley where little else is required than placing in the Lock and waste wier & making a tow-path; and that of taking it overtable land through entire cutting, besides the shortness of the levels, would prevent the erection of machinery which gives a decided advantage in favor of the present route—All these things were doubtless duly weighed in the minds of the Board of Directors at the time, founded on the opinion and reports of the engineers who were as a matter of course led to adopt the cheapest and best route.

713. What did the Steamer Sir Walter Scott cost including the engine—do you think with the apparatus for dredging we had on hand it would have been the interest of the Welland Canal Company to purchase her—and could she have been made to answer the purpose at a moderate expense?—Her expense including repairs &c. was upwards of £1500 and I think, with a moderate expenditure, she might have been converted into a good steam dredge—the machinery is good, and by giving more strength to the Boat, would answer that purpose, in my opinion, better than any one they could have got for that price.

714. Which Locks have been most expensive in repairing—from Phelps' up to bottom of Mountain or below—or has there been any comparison in the relative expense?—There has been less expense incurred in those Locks from Centreville to Port Dal housie, than from that place upwards to the mountain.

715. A charge of general mismanagement having been made by Mr. Mackenzie, and particularly alluding to my conduct, will you state to the Committee generally how long you have been on the canal—your opportunity of witnessing my conduct and judging of motives towards the Company, Contractors, Engineers, and others—and state any and every occurrence wherein I have not acted as you may have conceived for the best interest of the Company in making advances, or any other matter?—I was first employed as Secretary as early as 1824 to be under the sole control of the agent in copying letters and documents on the first formation of the Canal, and the order I conceive alluded to by Mr. Mackenzie related wholly to me at that time. From 1828 to 1832 I was employed as assistant Engineer under

Mr. Barrett, from that time as principal when required, there not being at all times employment for an engineer since the canal was finished. With respect to the other general questions, I have been frequently with you and Mr. Barrett on all parts of the Canal in shanties at night with contractors and others; on all such occasions the conversation had been directed by you to the best manner to execute different parts of the work and facilitate operations by consulting with engineers, mechanics, contractors, and others; I never knew an instance of your attempting to influence the engineer-on the contrary, in advising on any subject you have held out that they only were responsible, and you would be guided by their We have always considered you rigid towards contractors so far as regards their prosecuting the work, but never interfering in any way respecting the estimates or amounts paid after contracts were made. When short of money and advances became necessary to different contractors they were invariably made after a consultation, with a view to forward the work remaining to be done-the contracts were generally taken at too low a price, but every thing was settled up amicably and with good feeling-all claims were left to a Committee in May 1832 for an equitable settlement, and Mr. Thomson and Newlove, are I think the only ones not adjusted. As it regards the charge of partiality in all matters which have come under my observation, I can say that I never knew you influenced by motives of the kind, and I believe you have always been influenced by a wish to deal fairly and honorably to all classes engaged on the canal, and as for general execution and management, the work itself is the best witness.

716. Mr. Mackenzie asserts that an attempt was made to get an order of the Board that Thomas Merritt be paid the balance of his account?—Was that the case?—I was present at the Board when the discussion took place, and recollect perfectly that it was merely to get the estimate made by Mr. Hall and myself passed.

717. Was the work taken away from Lewis, Garrison & Little at Gravelly Bay without their consent, or did they relinquish it from their inability to finish it?—They relinquished it willingly from their inability to finish it.

718. Under what circumstances was the Harbor let to Thomas Merritt and others at Gravelly Bay?—I remember that a committee of the Board was held at Gravelly Bay in September 1832, (at which I was present) to take into consideration the backward state of the work—it will be seen by the minutes of the Board that Thomas Merritt and Lewis gave in the lowest proposals, and the work was relet to them—the name of Sloan and Clinton was left blank for this reason they had been employed at a similar work at Black Rock, and were well furnished with scows &c. to carry it on—Mr. Merritt was anxious to encourage them, and left the day after for Buffalo for that purpose We had great difficulty at the time to procure contractors.

719. Was it usual as Mr. Mackenzie states to place the Company's seal to contracts or not —It was not —I recollect no instance except in the large contracts made the first year, when land was involved.

720. Mr. Mackenzie asserts I signed Thomas Merritt's contract as Secretary to the Welland Canal Company in opposition to an order of the Board—is that true?—The minutes of the Board will shew that you were particularly authorised to sign that contract, as it was at a special meeting of the Board held at Gravelly Bay as alluded to before for the express purpose of forwarding that work. The order of the Board alluded to the time Mr. Merritt was absent in England, and does apply.

751. Did you over inform Mr. Mackenzie as he asserts that Thomas Merritt & Co. failed in their contract like their predecessors—that they were dispossessed, and the whole again re-let to Thomas Merrit? He also states that before the completion of the contract the lock was ordered to be lengthened by the same contract at day labor, and before the work was taken off his hands—is this true?—He may have drawn that inference, but I certainly never told him that Thomas Merritt failed in his contract, for the contrary was the fact. The lock was finished in the spring of 1833, and accepted, and was not lengthened till the spring of 1835.

722. Mr. Mackenzie states, Ostrum and others signed a certificate of 1200 feet pier timber being lost, which you afterwards discover to be only 400 feet—how did it occur?—Ostrum measured all the timber which was displaced at the time, a portion of which was recovered, brought back, and replaced; I only measured the new timber which was procured to fill the space, consequently no deception was attempted, and no claim made for the additional quantity.

723. Is there any similarity between the risque of ordinary canal work and making piers in an open lake as at Gravelly Bay?—Not the least, the one being secured by land, the other exposed to the open lake.

724. It is stated as a charge of favoritism that in 1833 Thomas Merritt was one time contractor, lock keeper at \$20 per month, concerned in building light house, and employing hands by day labor—was not the lock placed under charge of Thos. Merritt more as an object of security than profit?—Yes—he was requested to take charge of the lock at that time as no responsible person could be got, and in a work of that nature he could always turn his men to day labor advantageously when the weather would not permit him to work on the piers—he must have paid the same price he got, as no person could be hired for less than \$20 per month.

725. What part had Thomas Merritt in building the light-house, and why was he so employed?—Furnishing stone and filling in the cribs, and furnishing a part of the timber, and because having scows, &c. he could furnish materials cheaper than any other person, and having suitable timber was enabled to furnish it at a cheaper rate than McChesney could do.

726. Was the same price paid for filling the piers? Did you ever hear of a less price for similar work? What was the lowest price per cord at Port Dalhousie?—The price for filling the piers was \$2.—I never heard of a lower price for similar work—the price paid at Port Dalhousie was \$4 per cord.

727. What price was paid per cord for filing in piers at Grand River by Mr. Hall?—I think 17s. 6d,

728. Do you think the deductions recommended by the committee on Thomas Merritt's account to be just ?--I do not.

"The final estimate" to Thos. Merritt, is only 30,880 yards instead of 40,472, as stated in the Report of the Committee.—See Estimate Book, p. 4., as follows:

1	Yds.	Yds.
Original vards on Sec. No. 9	21.988	
Deduct done by Monson	165	21.823
Original yards on Sec. No. 8	12,484	
Deduct done by Monson.	2.372	16.112
Original yards on Sec. No. 9 Deduct done by Monson, Original yards on Sec. No. 8 Deduct done by Monson, Cut extra width for embankment	1	945
		2000
Total as above,	1	38,880

There is a difference of 6,103 yards between the two estimates made on sections 0 and 9—the former was taken before the proof level was run (which could not be correctly done until the marsh was frosen up) the cutting proved to be deeper than was first calculated.

Although Monson was estimated and paid for 4780 yards on sections 8 and 9. Thomas Merritt only received the benefit of 2537 yards; this was occasioned by the manner in which the work was done, being cut full of holes here and there, filled up with muck, and a great portion cut out of line altogether—Mr. Barrett and myself made the estimate previous to its being taken by Thomas Merritt and the actual quantity was no more than here stated—it would therefore be unjust to deduct this amount when he actually did the work—

I am certain Mr. Barrett will corroborate this statement.

The reserve was allowed by the Board upon the same principle that Mr-Thompson and Donaldson were allowed, and if Thomas Merritt had an increased price, it was not the less just, as there is always a disadvantage in taking a second Contract on the same job, owing to the manner in which the work is cut up, and the top part only removed—no person will take a job which has been abandoned at the same price it was first let for, and any person acquainted with the situation of these sections at the time they were re-let to Thomas Merritt must know they were entirely overflown with water and the prosecution of the work attended with additional expense owing to the great difficulty of drainage.

As it regards the 266 yards "additional dredging" done in July 1833, I always conceived that he had a right to be paid for this over and above the original estimate of Dredging, as it was widening the cut beyond the piers to afford a more sale and easy entrance for vessels.

729. Mr. Mackenzie asserts that his suspicion first arose from your returning 15 cents instead of 14 on Berm contract; will you state to the committee how that occurred, and whether he or myself first discovered it?—It was yourself first called my attention to the mistake in the estimate of Thomas Merritt's Berm bank which I had returned at 15 cents instead of 14. You also sent me for the contract to make the comparison; the mistake occurred in the following manner,—Thomas Merritt had two different pieces of work in the same contract; one for excavating a basin at Gravelly Bay, which was at 15 cts.—seeing the former price I thought it applied to both—but any person conversant with the routine of the mistake would have been corrected in settling the account, even had it escaped the notice of the Board, as this return was merely an advance—this matter was satisfactorily explained to the Board the time.

730. What was the lowest proposal received for the Berm bank in 1834—who from—and the next

ж

lowest and who from—and whatsaving has occurred to the Company by accepting the last?

14 cents from Thomas Merritt.16 " " John Aikins.

There was 33,892—16 cts.—Aikins, - - | \$5422 62 33,892—14 "—T. Merritt, | 4744 88

Leaves a saving to the Company of - - -

\$ 677 74

731. Did I not give you particular orders to examine this work and all the other embankments (as well as the superintendents) with great care, and for what reason?—You did, and I conveyed the same instructions to Rose, to Thomas Merrit, and Mr. St. John—I also requested Mr. Thompson to keep an eye to the work, and if any logs were found in the bank to acquaint me of it. The reason of this caution was the extreme difficulty in getting clear of the logs and stumps which had been thrown directly in the line by former contractors, and a great part of the work being covered with water, which required unusual caution.

732. It appears from Mr. Hall, in answer to question 54, that he only saw 3 or 4 logs after the water was off. Mr. Norton, in answer to question 309 states he saw a number of logs and stumps in the embankment made by Thomas Merritt near Dunnville in 1834—also in answer to question 315 he states he saw Rose at work on Thomas Merritt's job, which confirms him in that opinion, and that the cause was to get extra measurement. Mr. Lee, in answer to question No. 326 says he saw those logs in 1835 before and after the water was in—on the contrary Mr. Dew says the cause of getting Thomas Merrit was he would have a preference in obtaining the worknever saw logs. As Mr. Mackenzie appears to attach much importance to this contract, and involve in it great mystery, will you explain to the committee whether Mr. Norton may not be mistaken with regard to Thomas Merritt's Berm contract, both as regards logs and measurement?—I think he was, for the following reason—Thomas Merritt had no work or contract there in 1834—he commenced his contract in the spring of 1835.

Rose finished a contract of embankment below Dunnville in 1834, and if Mr. Norton saw logs or stumps, it must have been in that. It was finished, well done, and accepted by me-it has with-stood a head of nearly eight feet water for two years, and this is the first time I ever heard of logs or stumps having been put into this bank, although I inspected it frequently during its progress; it was made across a deep ravine, and great difficulty occurred in removing logs, &c., but if any remain in they were not to be seen, and no injury whatever has arose from them. The earth to make this embankment had to be carried in scows—the water being from 8 to 11 feet deep, and with regard to measurement, if Rose told Mr. Norton so silly a tale he must have known that no contractor can by possibility deceive an Engineer in measurement, the levels being taken and contents computed before contracts are made, and the Engineer being wholly responsible for his levels and measurements can scarcely be supposed to make a false return to benefit a contractor at the expense of

the Company who employed him; if so, he must be doubly dishonest.

733. Have you any doubt that the contract will be completed, and do you think that the Company will be injured in any way or shape—or do you think the contractor will be benefitted?—I have none; I do not think the Company will sustain the least injury—on the contrary they are gainers. I think the contractor will be a loser—it was a most difficult job, having all the timber placed on it from the canal in addition to the natural growth was very wet, a great part covered with deep water.

734. Will you give your opinion respecting the removal of the dam from where it was first located and commenced, at the mouth of the Grand River, and the cause of its being so removed?—After contracts were entered into for building the dam at the mouth of the Grand River, and about \$1500 expended, Commodore Barry gave orders that the proceedings should be stopped, and that the dam should not be built within five miles of the river mouth. I never heard that Mr. Boulton had any thing to do with this transaction; nor that he in any way attempted to influence the Board.

735. Is there a situation in which a dam can be built between the mouth of the Grand River and where the dam is now built at any reasonable expense?—There is not.

[Witness withdrew.]

# Mr. Clark again called. [By Mr. Merritt.]

736. Mr. Mackenzie alludes to the injury inflicted on Mr. Woodruff and Mr. McMicking by granting a mill privilege to Mr. Keefer in 1825—what was the state of the Niagara district with regard to those establishments prior to that period?—The price of wheat was governed by the price given by the frontier mill owners—Messrs. Clark and Street, Woodruff, and McMicking. In the dry seasons of the year many of the inhabitants at a distance had to resort to those mills for their grinding.

737. As a general question will you describe the duties of the Board as well as my individual duties on the canal when Agent of the Company and since my being President?—The duty of the Board of Directors is at their monthly meetings to examine and determine on all matters brought before them—to examine estimates of work and all other accounts—and make such orders thereupon as they think necessary. As the Agent of the Company you superintend all matters relating to the work and management of the canal, and to submit all matters for the information of the Board relating to the same; as President of the Company you of course preside at all meetings of the Board.

In no instance to my knowledge have you interfered in the duties of the office as relates to the books and accounts—on Mr. Black leaving the office in June 1832, agreeably to an order of the Board—you did the duty of Secretary in so far as countersigning drafts—at a meeting of the Board in Toronto in November the accounts were submitted in proper form

to be presented to the Legislature then in session;—under an Act of the Parliament it was required the Secretary should certify upon oath to the correctness of the accounts—you then declined doing so—stating that you had not the making up of the accounts.

738. Mr. Hall states in answer to question 142 that Mr. Merritt ordered Mr. Beaton to continue to write in the office independent of you as Secretary-will you relate to the committee what was the conversation in occurrence to which he alludes? -I never stated that you directed Mr. Beaton to write in the office independent of me as Secretary I am not aware such was the case. In June 1834 the Board authorised an assisiant in the office-I offered the situation to Mr. Beaton, which he then declined—I then employed Mr. Raincock, who continued in the office until September following. frequently signified to me your impression that Mr. Raincock was not competent to the duties required. I felt averse to your opinion, and desired to keep Mr. Raincock, but he declined remaining, when I immediately requested Mr. Beaton to take the situauon, which he did, and-I believe the Board of Directors were unanimous in opinion that he should be employed—and if I have ever stated to Mr. Hall or any other person that I had an objection to Mr. Beaton being employed, it only arose from my desire to retain Mr. Raincock.

739. Mr. Newlove, in answer to question No. 7, says Mr. Black had charged against him in the books of account 4 or \$500 more than he received—that you told him of it and sent for Mr. Black, who came down and rectified the mistake the same day?—Have you any recollection of the circumstance, or have you made any charge against Mr. Black to that amount, and must you not have done so had the circumstance taken place as related by Mr. Newlove?—I have no recollection of this circumstance, had it taken place I must have made a charge against Mr. Black for the amount which I do not find in the accounts.

740. Mr. Mackenzie states that in addition to \$10-000 paid to Mr. Yates, Captain Creighton had £180 -£164 14s. and £97 4s. 9d. and in consequence of such loan the debtors of the Company were injured; also that I was a forwarder of goods; --will you explain this transaction?—In 1833 an order of the Board authorises the collectors of tolls to credit persons (to whom the Company were indebted,) with the tolls on what property they may pass through the canal—the amount to be returned to the office by the Collectors and debited the individuals. You were at this time a creditor of the Company, and was a shareholder in some two or three schooners then navigating the Canal, and was in some instances debited with the tolls on the cargoes of those vessels in like manner with other individuals to whom the Company were indebted. The sum of £97 4s. 9d. was paid to Captain Creighton by the toll Collector, he being authorised to receive the same as treasurer. I loaned Captain Creighton £100 on your becoming responsible to me for its re-payment. The sum of £164 14s. I loaned to Captain Creighton on my own responsibility—a loan to Mr. Butler of £50 and R. E. Burns of £175 was on your accountability to me. The whole of those sums have been re-paid with interest and without loss to the Company.

741. What was the cause of Thomas Merritt not

being charged £200 paid by Mr. Robinson?—In consequence of not having received Mr. Robinson's accounts—this £200 can yet be charged with the interest to Thomas Merritt, without loss to the Company.

742. Who were the sureties for his contract on Berm Bank?—Hiram Slate of Gravelly Bay, morchant, and John L. Burns of St. Catharines, merchant, both considered responsible men.

743. Who gave in the lowest proposal for that work?—Proposals for the Berm Bank were received and submitted to the Board from John Aikins and Thos. Merritt, Jr. John Aikins proposed at 16 cents per yard for excavation, and Thomas Merritt at 14 cents per yard. The President was authorised to accept the lowest offer—and the contract was in consequence entered into with Thomas Merritt.

744. What was the reason assigned for making deductions for rent of water to the Hydraulic Company and other mill owners?—The cause for making deductions for rent of water power arises in all instances from drawing off the water to repair the canal.

[Witness Withdrew.]

WEDNESDAY, 30th March, 1836.

Committee met.

JAMES E. SMALL, Esq. Chairman.

Messieurs Chisholm,
Gibson,
McDonell,
Parke,
Roblin,
Shaver,
Thorburn.—8.

CALEB HOPKINS, Esquire, M. P., called in and examined.

#### [By Mr. Merritt.]

745. Were you one of the committee of the House of Assembly in 1830 to examine the books, accounts, and affairs of the Welland Canal Company—were the books then brought over by Mr. Black the Secretary—were the accounts and vouchers then exhibited as mentioned in your report and statement as they now stand on the Journals?—I was a member of a committee appointed for that purpose in 1830, but I have no recollection of the particular circumstances relative to that investigation—I refer the committee to our report as appears in the Journals of the House for that year which gives every explanation.

[By Mr. Mackenzie.]

746. When the Committee of 1830, of which Dr. Blacklock was Chairman, examined the books shewn to them, had they an opportunity, or did they take the time and passe to examine papers and documents thoroughly, which an individual having lessure

in the recess and access to every book and paper of the Corporation, would have done?—I do not think they had the opportunity of so thoroughly investigating the affairs of that Company as a person might have who is capable of so doing, and having such privileges, and devoting his entire attention thereto.

## [By Mr. Merritt.]

747. Although the Committee had not the leisure to examine the books and accounts of the Company as carefully as if an individual was for months examining them; were not the books of the Company with all the vouchers and accounts, presented to the Committee at the time by the Secretary, Mr. Black, who was then present to give any explanation, and after the investigation of the accounts, did you not come to the following conclusion:—

"Charges of mismanagement having been publicly made against "individuals connected with the Company, among others by Mr. "Gordon, once the Treasurer, and relative of Mr. Merritt; and "by Mr. Clowes, formerly an Engineer on the canal; your committee were more strict and careful in their examination of the books and accounts of the Company than they otherwise might have been; but although they met with occasional charges against the Company, perhaps not so moderate as would have been willingly paid by a private individual; and although the transaction in the books embrace an expenditure of a million of "dollars and upwards—they saw very little indeed to censure"!—

The particulars of the investigation referred to in the question, at this distant period, I cannot call to my recollection—but the principles contained in the report there can be no doubt I thought true at the time, otherwise I should not have sunctioned them by placing my signature to the same.

748. Do you believe that a committee, at the period when you were one in 1830, (who were composed of members, one of whom was from the Niagara District,—and when the witnesses had every thing fresh in thir memory,) were as likely to arrive at the truth, as at this time, six years after, when many circumstances must naturally have gone into oblivion—If the enquiry had at that time been as particular and as much indetail as at the present—I certainly think they would have been more likely to have arrived at the truth then than at this remote period.

(Witness withdrew.)

WEDNESDAY, 30th March, 1836.

Committee met.

PRESENT.

JAMES E. SMALL, Esq. Chairman.
Messieurs, Chisholm,
McDonell,
Parke,

Roblin, Shaver, and Thorburn.—7.

Mr. Merritt in behalf of the Directors and officers of the Welland Canal Company, submitted the following observations to the Committee as evidence upon the respective charges, brought against the said Officers and Directors, by Mr. Mackenzie, which were read by the Clerk and are as follows:

#### WITH RESPECT TO CHARGE No. 21.

Mr. Mackenzie asserts that Mr. Samuel Keefer made an error, this he adduces to draw unfavorable inferences, to destroy confidence in the estimate of the engineers—unsupported by a shadow of proof, he infers it without knowing the state of the ground when first measured—or whether the contractors did

not excuvate short of original boundaries—whether it was not varied, or misrepresented.

I recollect the circumstance well, and from knowing they had not taken out the original quantity, induced Mr. Robinson to send up Mr. Barrett to measure the actual quantity excavated, Mr. Samuel Keefer would have been sent, but was absent on the St. Lawrence Canal at the time—it was a simple measurement which any contractor could have calculated.

His allusion to my signature relates wholly to the work done under my direction prior to Mr. Robinson having taken charge of the repairs.

With respect to Mr. Robinson's accounts generally, I have only to remark that Mr. Robinson came over to St. Catharines to offer any explanation required—that Mr. Keefer assured him he would thoroughly examine those accounts—make out a report—send it to the Secretary who should furnish him [Mr. R.] with a copy of it, and give him time to correct any part of it—in consequence of which a resolution was moved by Mr. Thorburn, 8th October (see minutes to that effect.) Mr. Mackenzie left the accounts unfinished neglected to send the report, and is alone censurable for not having then settled, as shewn by minutes of 6th January as follow:

Extract from the Minutes of the Board of Directors of the Welland Canal Company, January 6, 1836.

PRESENT.

WILLIAM HAMILTON MERRITT, Esq. President.

Ogden Creighton,
Thomas Butler,
David Thorburn.

Esqrs. Directors.

Whereas William L, Mackenzie, Esq. one of the Directors of this Board, did under an order of this Board undertake to send a copy of a report on the accounts of William B. Robinson, Esq. made out by him to the Secretary of this Board in order to transmit the same to Mr. Robinson with a view of having the same entered on our books, prior to the accounts of the present year being laid before the Legislature.

And whereas the said William L. Mackenzie has neglected or refused to transmit the same.

Ordered

That the true cause of those accounts not having been submitted to Mr. Robinson to give him an opportunity to investigate the same—be entered on the minutes.

Extract from Minutes of Board 8th October, 1835.

PRESENT.

W. H. MERRITT, Esq. President. . A. McDonell, Esq. Vice President.

Thomas Butler,
W. L. Mackenzie,
Ogden Creighton, &
David Thorburn.

Esqrs. Directors.

Folio 353 Mr. Thorburn moved—That a copy of Mr. Mackenzie's report made at the request of the Government Directors relative to Mr. Robinson's ac-

counts, be sent to Mr. Robinson by the Secretary for his observations thereon.

MEMORANDUM.-The Secretary never received this Report.

### CHARGE 19.

Mr. Mackenzie's proof that George Keefer Esq. was interested in a contract is taken from an ailusion to Mr. Gordon's letter dated 28th April, 1826 .although the sub-contract with Phelps was in 1826 and 1827 after the date of Mr. Gordon's letter.

On enquiry it will be found Mr. Keefer had no interest whatever in Phelps contract-he only furnished him with timber the same as furnishing him with any other material, and Phelps contract was for a given price per Lock. Phelps' evidence corroborated this statement the timber being returned in any one month for a greater or less price could not affect the contract, of Oliver Phelps who was paid for the at a given price for each; [in Mr. Keefers' answer to question 786.]

#### CHARGE 13.

Is designed to show that I have acted partially in the distribution of contracts and that some of those contracts have been iniquitously performed.

Mr. Mackenzie's proof for this assertion is, that I was appointed Secretary in June 1832, after the retirement of Mr. Black and contracted officially as such with Thomas Merritt Junior, for the Harbor at Gravelly Bay in September of that year.

This assertion was made hitherto with a view of inducing the public to believe, and now the Committee, that my office as Secretary at that time after Mr. Black placed the books, accounts and money under my control-The same Board which appointed me Secretary (see resolution of Board of October 7th 1831) for the sole purpose of countersigning papers, as appears by the resolution above quoted.

Mr. Clark was appointed to the situation of bookkeeper 4th November 1831, see resolution in minutes of that date, which shews that neither of those appointments were to take place, until after Mr. Black resigned when Mr. Clark was to assume the situation of accountant.

On November 19th 1832, the following order passed the Board (see, minutes of that date) which I allude to, to shew it became necessary for the accountant to be made Secretary to comply with the provision of of the act, to testify to the accounts-in consequence of which the name was transferred from Mr. Merritt to Mr. Clark, who in reality did all the duty except signing bills of exchange &c. &c. as proved by answer to question 737—the minutes of the Board also confirm the above as it shews the security tually entered into, and exists to this day. Mr. Hincks evidence also confirms the above, see his answer to question 374—consequently there is not the slightest grounds for the support of this assertion.

With respect to the report, on the 31st day of August an estimate was submitted shewing a detailed statement of all the work on piers, harbor &c., which was certified to after a minute examination by Messrs. Keefer and Hall, but as Mr. Mackenzie objected to the confirmation of this estimate as was usual in eve-

ry other case for the last 12 years, it was laid over and the following minutes passed theron ..

Extract from the minutes of the Board 31st August 1835. " PRESENT.

> W. H. MERRITT, Esq. President. A. McDonnell, Esq. Vice President.

> > W. L. Mackenzie, David Thorburn, Directors. Thomas Butler, and Ogden Creighton.

Resolved, That the Engineer having reported that the Contract between T. Merritt, Sloan and Lowis, and the Canal Company is fulfilled, it be accepted by this Board as finished.

September, 2nd 1835.

The Engineers estimate was submitted and the examination of the same deferred until Saturday next, to be referred to a com-mittee composed of Mosses. Mackenzie, Thorburn and Butler."

I wish the committee to understand that no attempt was made to get the balance of Thomas Morritt's account passed at the time, and that the passage of this estimate at that time which has since been confirmed, could have made no alteration or difference in the amount, or balance to be paid him, as proved by Mr. Keefer in answer to question No. 716.

In pursuance of the last resolution in No. 8, Mr. Mackenzie examined all accounts relating to Thomas Merritt from the commencement of his work on the Canal, and made out his report which was signed by Mesers. Butler and Thorburn and presented to the Board 8th October 1835.

" 8th October, 1835.

The select Committee on the accounts of Thomas Merritt Junior, presented their report which was road.

Resolved, That the report be received and laid over for future consideration, and that Mr. Hall and Mr. Thorburn be requested forthwith to proceed to Gravelly Bay, and inquire fully into the system, under which the check rolls, time lists and bills of labor and materials, have been compiled, and warranted for the last 12 months; that Mr. Thomas Merritt Junior, be requested to transmit to this office for examination the Books in which his accounts with this Commany for and because heavy and counts with this Company for such time and labor were kept and for the work done for Mr. Robinson in 1833.

Truly extracted from the minutes,

J. CLARK, Secretary, W. C. C."

The report was received but not entered on the minutes, in consequence of the President stating it contained partial and unfounded statements, tending to censure the conduct of former Directors, and cast an odium on the general management of the Company, as the other two Directors, Mr. Thorburn and Butler, disavowed any such intention.

The President was requested to give in at the next meeting a reply to each objectionable statement, after which they could decide in what manner it should be disposed of-as they will state when called upon.

In the mean time Mr. Mackenzie went to Quebec, retained a copy of the report and published it contrary to the wishes and intention of every member of the Board.

However, as the document has been already published, and now forms a part of this charge, I beg to call the attention of the Committee to the following

items:

1st. The report states that in September 1832 Lewis Garrison and Little were discharged from their contract—this is untrue as proved by Mr. Keefer's answer to question No. 717.

**S2** 

2nd. The inference drawn from the report that this contract was given to Thomas Merritt, Lewis, Sloan, and Clinton—as a favor, is also without the slightest foundation-as per the following extract from the minutes of the Board.

Extract, Sec .- 5th September, 1832.

" PRESENT. McDonell, Keefer, Butler, and

Creighton. Resolved, That as there is no prospect of Messrs. Garrison and Little finishing the Lock and Harbor in time, and as the engineer reports that there is not a sufficient force on to complete it.

Ordered, That the same be re-let on the 14th instant and that Captain Creighton. Messrs. Keefer, Randal and Butler meet at the Canal Office to receive proposals for the same-notices to be put up immediately.

Welland Canal Office, St Cutharines, 4th Sep. 1832.

TO THE BOARD OF DIRECTORS,

Gentle men. The experience of the past and present year shows the necessity for adopting every precautionary measure for insuring a plentiful supply of water, as well as putting the Canal in a perfect state of repair the ensuing winter. This measure being strongly recommended by the Committee will doubtless receive your attention.

The next subject which should engage your serious attention is providing means for the completion of the new cut—the work at least the clay can be done in a month, the lock and rock in about two months, providing the lock is put into other hands and about the sum of from 10 to \$15,000 provided in payment of

At a meeting of the Board held at the Cunal Office 1st September, 1932.

PRESENT. Alexander McDonell, Vice Psesident,

Robert Randal, and Esqrs.Directors" Thomas Butler,

It appears by the minutes in August that from the devastation committed by the Cholera the Board were then of opinion the work would not be finished the present season, but from what has been since done, and from the report of the agent and engineer of the quantity of rock remaining, the Board think it judicious to renew their exertions and make arrangements to finish the Canal to admit the passage of one vessel at least if possible the present season.

"18th September, 1832.

At a meeting of a Committee of the Board of Directors at Gravelly Bay on the 18th September 1832 consisting of Captain Creighton. George Keefer, and Robert Randal Esquires—which was deemed necessary in consequence of a letter from the engineer of the 30th Augustlast, proposals were received from Messrs. H. B. Ostrum. Marshall Lewis, Thomas Merritt and James Sloan, for the same which did not vary materially after taking the subject into consideration—It was determined to let the whole to Messrs. T. Merritt, Sloan and Lewis on the following terms Messrs. T. Merritt, Sloan and Lewis on the following terms which were the best proposed viz:-

Estimate for Lock and Hurbor at Gravelly Bay.

		\$ 12
The Mitre	!!	36
Braces inside of Lock		
Gates and paddle Gates	- 11	400
Coping Lock	- 11	110
Hollow Quoins	}	40
Planking Lock	[]	80
5.040 feet 3 inch Plank \$20 per M	. <b>-</b> 11	110
2,040 feet o their x time one lee and	11	62
420 lin. Spikes	1 11	150
2,500 lbs, Iron		1120
1120 Perches Stone work \$1 00		
600 yards Puddling 10 cents	• •	60
Putting in the Puddling 600 yards 20 cents -	• • !!	120
For Pumping	· -	100
300 vd's tilling in with earth round the Lock, at	t 8 cts.	240
on come per yard for excavating below the Loc	k and	
Piers that can be taken out without dredging every pile required \$2.50 cts.	g, For	240

Ordered, That a contract be made out and the work proceeded in immediately."

These extrects show the great anxiety the Directors then felt to get the Hurbor, Lock and Route finished, the work had laid idle during and since the visitation of the Cholera and the want of money to accomplish it, the only difficulty was to get any competent person to undertake it under those circumstances and a special committee was appointed for this expiess purpose, who assembled at Gravelly Bay on the spot, undufter much persuation induced Thomas Merritt to accept the contract, with others who were selected wholly from a conviction of their competency to execute it-us proved by the unswer to question No. 718.

A contract is produced, executed in my name as Secretary—the intimation that the contract was signed by the Secretary-contrary to the orders of the Board is also proved erroneous from the fact as stated in the above extract from the minutes, which shews the Board appointed a committee for the express purpose, and actually sanctioned the contract.

The assertion that it was usual to place the seal of the Company to all contracts is also unfounded, as may he seen by reference to the contracts for the last 12 years—As well as the answers to questions No. 719, and 720—with respect to the accusation of the failure of Thomas Merritt-lengthening of Lock before being finished &c. &c. &c.-Mr. Keefer's answer to question No. 72I-shows that no grounds could have existed for the charge.

With respect to the false certificate of Ostrum respecting the pier timber—the answer to question No-722, shews that it is also founded on erroneous premises-also answer to question No. 723-respecting risque.

It is the misfortune of theoretical men not to be enabled to comprehend the practical effect of employing men who already possess the material to do a certain work with one half the expense, the same person could accomplish it, without the same mate-

With respect to the deduction the Committee thought proper to make in the account of that contractor for contracts closed in 1832-I refer to the engineer's opinion given in answer to question No. 728.

The Board of Directors have made the following proceedings on those deductions-Mr. Hall examined the vouchers, work, &c. and made his report, 6th January as appended to charge No. 13.

On the 20th November last, the following order was made on the deductions recommended by the committee, and thus the matter stands-by withholding from that individual £178 Ss. 5d.

" Extract from the Minutes of the Board, 20th Nozember. 1885.

"PRESENT:

- " WILLIAM H. MERRITT, Esq., President.
- " ALEXANDER M'DONELL, Vice President-
  - "Orden Creighton, Esquire,
  - "Thomas Butler, Esquire, and
  - "David Thorburn, Esquire.

" Ordered.

"That the following items be reserved from Thomas Merritt's "account as recommended by the committee.

"The sum of £8 0 0 } for interest on advance of £200 by Mr. Robinson.

" 11 4 6 over estimated November, 1832.

" 66 10 0 over estimated for excavation-

£178 8 5

" Truly extracted,

"JOHN CLARK,
"Secretary, W. C. C."

# WITH RESPECT TO THE BERM BANK CONTRACT.

Mr. Mackenzie states his reason for suspecting pecumary mismanagement from a return made by Mr. Geo. Keefer mentioning 15 cents in place of 14 on this contract—Whether he had good reason for this suspicion will be inferred from the answer given by Mr. Keefer to question No. 729.

The circumstances relating to this contract, are as follows—the arbitrators were very urgent that a Berm bank should be made from Broad Creek to Sunfish Creek in Moulton, 3 miles in length. The Board gave due notice and received proposals—the result of which is proved by answer to question No.730—which shews a saving to the Company of \$677 74—by this act of favoritism a contract was entered into by order of the Board as appears by the following extract from minutes in the usual manner.

"At a Meeting of the Board, 6th November, 1834.

"WE. H. MERRITT, Esq., President.

"Doctor Duncombe,
"Wm. Chisholm, and
"Thos. Butler, Esq'rs.

"Sundry proposals for excavating feeder, and work at Broad "Creek, also for excavating Lock pits-were submitted.

"Ordered-That the President accept the lowest tender."

It was a very heavy job—the winter unusually severe—and the great force necessary to apply on the culvert to get the water in, prevented the contractor, to his great loss, from finishing the Berm bank in time—he was merely estimated for the quantity of work done, and a Bond taken from him to ensure the completion of the work this year at my suggestion, it was quite immaterial who was the sureties, as I was c ite satisfied he would finish the work—the sureties are however responsible men, as shewn by Mr. Clark's answer to question No. 742.

The work is now covered with water and will be fully tested before it is accepted—if logs are found they will be removed at the expense of the contractor—the Engineer will bear testimony of my instructions and vigilence on that subject, which produced the letters from Mr. St. John, and Mr. Keefer.

Questions No. 731 and 2 in the evidence are general and answered by Mr. Keefer the Engineer,

which if any doubt remained after the proof adduced even by the accuser—must impress the committee with the belief that the Company deserve credit in place of censure for this charge.

It will be seen that every little petty attempt has been made to bear on this contractor. The sub-letting the work—which is and ever has been the established practice. Mr. Hall's evidence in answer to question No. 69 proves the calculations on this work to have been correct, also by reference to the following extract from his report to the Directors of August 5th. 1835.

"In reference to the former estimate I have calculated upon "the strictest geometrical principles, all the quantities therein exhibited from minute memorandums and diagrams furnished by Mr. Keefer, and beg leave to remark in submitting to the Board the results papers Nos. 1 and 2, that amongst the numerous, complex and varied calculations entered upon, no error of importance, or keyond fractional has been detected."

#### CHARGE No. 10.

Mr. Mackenzie under this charge states as follows:—"That loans have been made to Directors, "Officers and others, from the funds of the Company, "and without the consent of the Board, and the inter-"est sometimes placed to the Company's credit, and "sometimes kept back by the clerks and officers."

"That independent of the \$10,000 borrowed from tolls, Captain Ogden Creighton borrowed

in consequence of such loans the debtors of the Company were injured to accommodate the Directors."

The reply of the Secretary to this accusation is my proof to rebut the assertion;

Mr. Clark's reply to question No. 740, explains this transaction, the loan was made and repaid without loss.

I also had an interest intwo or three vessels—taken for the express purpose of diverting business through the canal—and have ever made exertion to procure the building of vessels and other erections to forward that object, which the want of capital alone if no other reason would justify—but have never had any concern in any regular forwarding establishment.

#### WITH RESPECT TO CHARGES No. 28 & 29.

In this charge the Board are accused of favoritism and a desire to lavish the funds of the Company on particular individuals influencing the management of the Board.

To support this assertion he quotes a minute of the Board, 26th October, 1825—shewing the locks were let at this period to B. H. W. and P. The period when those locks were let is sufficient evidence that the Board are not actuated by those motives—they had not at the time any public grant, and a small proportion of stock paid in By the testimony of Mr. Phelps in answer to question No. 264 it will be seen that this same person gave in a tender to build the 4 locks at Deep Cur—where tamber was far

more easy of access from Chippawa, for \$4,500—Although Phelps was only paid \$3,400—and this after the experience gained by building the 34 Locks on Mountain, this shews the reliance to be placed on casual conversation or mere rumour—Also an examination of Mr. Phelps before a Committee of the House of Assembly December 5th, on same year (this is brought forward to prove the actual cost of those Locks, finished in 1829—although given in 1825, before they were commenced). Also a letter from Mr. Hall stating an excess of \$16,547 having been paid 23rd September 1835—Also Mr. Halls conversation with Mr. Squires.

If the real object had been to ascertain the fact regarding this expenditure—a simple application to me at the Canal Office, either by Mr. Mackenzie or Hall would have satisfied them or any other person-Mr. Hall's estimate is founded on false premises as shewn by his own and Mr. Phelps' testimony-being on Mr. Lewis' specifiation which refers to Lock 100 feet in chamber which was afterwards altered to 110 feet do. Mr. Phelps has not been paid one furthing more on those Locks than Mr. Burrett the principal Engineer's estimate-And not a shadow of censure can rest on the Directors-Mr. Barrett their Engineer made the return, the correctness of which they have no reason to doubt-neither has Mr. Mackenzie attempted to prove or even doubt it himself, but on the contrary has given a favorable opinion of him by his allusion to the alteration of the Canal at Grand River.

The next charge is respecting the deep cut-his reason for asserting the Directors knew of the existence of quicksands at the bottom of the deep cut at at the commencement is inferred from the proposals excepting quicksands and hard pan, had he possessed any practical experience, he would have known it is usual for contractors on the Eric and most other canals to make those exceptions in all deep cutting, a well was dug at the north end of this work some feet below the level to ascertain the nature of the bottom which is proved by Mr. Trotter in answer to question No. 663-who states a well was dug below bottom level and that no apprehension existed of any slips at the time, nor in fact until after they had taken placewhen men possessing the same foresight as Mr. Mackenzie knew all about it-In 1828 Mr. Barrett directed in clearing bottom of Canal, yet singular enough no wells were sunk-this happens to be the very year the slips took place.

However without further allusion to his inferences on this subject, it is only necessary to put the Committee in possession of all the facts connected with this particular work not only to remove every suspicion of censure, but on the contrary to shew that they were actuated by the most honorable and correct motives towards every contractor connected with it, as well as a due regard to the interests of the Company—It appears by reference to the minutes July 1825—proposals were received for excavating the deep cut on which the following resolutions were passed:

## Extract &c .- July 2nd 1825.

"Resolved, That this Board considers the most advantageous proposal made them to be from Erastus Chapman, William Stranbogh, John W. Haye, J. Billy, W. P. Adams, Theophilus Brandage, Benja-

min Gower and R. P. Baker, and if the above commissioners will produce a Bond from General B. Porter of Black Rock or any other opproved secutity, for £1200 currency as security for completing the said undertaking within six days from this date, that we accept of said proposal, and if the said Bond should not be executed we consider the next most advantageous proposal from Messrs. Hovey, Beach and Ward, and that we accept the same.

## Extract &c .- 7th July, 1825.

"Resolved, That as Mr. Erastus Chapman & Co. have failed in giving the security required on the 2d instant—That Messrs. Hovey, Beach and Ward be notified that their proposals be accepted."

### Extract &c .- 4th July.

"That if Messrs. Chapman & Co. do not provide satisfactory security by Monday nevt, as they have agreed, that our Agent, Notify Mr. Hovey to make his arrangements for the immediate prosecution of the work, as his proposal has been accepted."

In consquence of which a contract was entered into with Messrs. Beach, Hovey and Ward on the ——at this period accusations were made against the agent for inducing the Board to accept this contract at 25 cents when 16 to 17½ cents were offered as appears by an investigation before a Committee of the House of Assembly in 1825 and 1826—See Mr. Yates evidence and Mr.Barrett's and Mr. Clews letter &c. &c., at this time Mr. Barrett asserts the contractors inform him they cannot finish the work for the prices contracted for, 25 cents—On the 13th February 1827, Messrs. Hovey and Ward applied for a relinquishment of their contract, as appears by the following extracts from the minutes of the Board.

"13th February, 1827.

"PRESENT.

"Messieurs Dunn,
Robinson,
H. J. Boulton, and
Merritt.

"It having been represented to the Board by Messrs." Beach, Ward & Co. that they are desirous of relinquishing their contract for the completion of the deep cut."

"It is resolved that the Board will accept their re"linquishment of their contract so far as the same
"may be under subcontracts, and that the Board
"will thereupon enter into fresh contracts for the com"pletion of those portions at the same price as Beach
"& Co., took them at—It is also Resolved—That if
"Messrs. Beach & Co. proceed to the completion
"of that part which they have kept in their own
"hands with vigor and despatch, the Board will take
"into consideration any equitable claim they may
"have for out fits or extra exertion on the completion
"of their contracts.

" March 31, 1827.

"Present-Messrs. Dunn, Allan, Robinson, H.J. Boulton and Merritt.

"The attention of the President and Directors having been called by the Agent to the subject of the Deep Cut, and to the necessity of coming to a decision upon such measures as may ensure its proceeding without obstruction.

"The Board referred to their resolution of the 13th Feb., to which they determined to adhere, and desired that the Agent should request the Engineer, as soon as it may be expedient to resume operations, to report what number of men should be placed without delay upon that part of the Canal, in order that it may proceed with proper expedition, and then to call on Messrs. Hovey and Co. to carry on their operations accordingly in pursuance of their contract."

The attention of the Board was particularly called to the subject on 13th April, as per the following minutes:—

" DEEP CUT, April 13, 1827.

"Present-Dunn, H. J. Boultou, Robinson, Wells, "D'Arcy Boulton and Keefer.

" Messrs. Ward and Hovey presented themselves " to the Board for the purpose of making some ar-" rangements respecting their contract for the Deep " Cut, and after discussing and considering the sub-"ject, they said that they would relinquish their con-"tract with the Company for that portion of the Ca-" nal, & also all their contracts with the sub-contract-The Board agreed they should be paid the "full value of the work which they have performed " on section No. 6., according to the estimate and survey to be made by Mr. Thomas, forthwith, and " if, when the whole of the Deep Cut is completed "and finished, it shall appear that the work has cost "more or less than Mr. Thomas' estimate, it is "agreed between the Company and Messrs. Ward " & Co. that the difference shall be received or paid " respectively by the parties, and at the request of " Messrs. Ward & Co. the Directors consented to "take the stock which Messrs. Ward & Co. have "subscribed at the full amount to which they had " paid upon it in the settlement of their account with " the Company.

"Messrs. Ward & Co. having agreed to the foregoing terms rather than attempt to proceed under
their present contract which they altogether declined, agreements were drawn up and executed
accordingly; and at the same time it was stated by
the Company that they did not consider this arrangement as interfering at all with that part of
the resolution of the 13th Feb. which expresses the
readiness of the Board to consider any just claim
which may be urged by them as soon as the work
shall be completed, but that at present no such
consideration can be entertained.

"Mr. Hartwell, one of the sub-contractors, was called in and informed that the Board intended to take off the hands of Messrs. Hovey & Ward, their several contracts with the sub-contractors, and he was asked whether he had any remark to make as to the effect of such an arrangement on his arrangements.

"He said he had been paid 18 cents per yard on "the whole job, which was all Ward & Co. had re"ceived of the Company—that he wished to have 
them to give up his notes to the Company, which

"had been passed for the 10 per cent stipulated to be retained, and that he had nothing further to de"sire.

"Mr. Rowley was also called in and informed in like manner. He said that Ward & Co. had retained in their hands a sum of about £375 on account of the 10 per cent stipulated to be retained; they had given no notes to Ward & Co., and required nothing more than to be paid in the same proportion as Ward & Co. receive from the Company.

"Mr. Hathaway was called in and informed in "like manner. He said he should have no claim "upon the Company for the past—he had given his notes for the 10 per cent, which he wished should be held by the Company, and not remain with "Ward & Co.

"Mr. Newlove was told the same—he had no re"mark to make, and no claim upon the Company
"for the past, and will have nothing to look to the
"Company for. He has received from Ward & Co.
"all he has any claim to, and has given them no
"notes.

"Messrs. Ward & Co. being asked if they were "ready to give up the notes of the sub-contractors "which they held as a reservation for the fulfilment of their sub-contracts, stated that they had not got them with them at the present moment, but would give them to the board, a order that they might be surrendered to the parties on the completion of their engagements; and at the same time requested that on their so doing, the Board would give up their notes which they hold in like manner; which was agreed to.

"The Board having taken into consideration as usagestion from Mr. M Taggart, civil engineer, from the Rideau Canal, communicated to the Agent "as to the practicability of washing out a fair portion of the earth from the Deep Cut by means of " pumping, and the difficulties experienced in exca-"vating the earth from the increased depth being " magnified by the contractors. It is resolved, in "concurrence with the opinion of the engineer in " charge of the work, that he shall immediately lay " out a ditch throughout the Deep Cut, of suitable "dimensions, to admit sufficient water, to try the "experiment of thus washing out a portion of the " earth by means of a current of water, which they " are satisfied will, at all events, afford a sufficient "charmel for scows or boats for the purpose of re-"moving the carth at a much cheaper rate than in the manner now pursued in carriages; and the Agent is desired to direct the different contract-"ors to apply the whole force of the Deep Cut "on the said ditch, or let it out to other contrac-"tors at the estimate of the Engineer, with a view " to its accomplishment in as short a time as possible.

"Messrs. Ward & Hovey were then called in, "and the Board proposed to them that if they were desirous to continue their engagement on the Camal, they might proceed on their section. No. 6, under the direction of the Engageer; that they would probably be required to proceed in a manner different from the original design, and that the Board would pay them upon a most thy estimate of the work done, to be made by the Engagement, without reference to previous contracts, and

 $\mathbf{T}^2$ 

"would make them an advance of £1250 on their note—to all which Messrs. Ward & Hovey per"feetly agreed.

"Mr. Hartwell was called in and informed that the Company being now in possession of his contract made with Messrs. Ward & Co. with him, to understand that they are about to alter their place of operation on the Deep Cut, which they are desirous should be prosecuted with all possible expedition, which will cause a material deviation from the original design, and beg to know whether or he is willing to proceed in the manner stated, under the direction of the Engineer, to be paid monthly according to his estimate, to which he perfectly agreed; and the Board in order to enable him to commence his operations with spirit and activity, will agree to make him an advance of £125.

"Mr. Rowley was called in, to whom the same statement was made, to which he agreed, and the Board consented to make him an advance of £250."

"Mr. Hathaway was called in and informed to the same effect, in which he concurred; and the Board directed him an advance of £500, one-half by a draft on New York at 60 days, and the President was requested to endorse his note to enable him to obtain a discount at the Bank for the other. "Mr. Newlove was called in, and the same communication was made to him, to which he agreed, and the Board directed an advance of £100 to be made him."

They again present themselves and give up their contracts, and the Board at that time not only agree to pay them according to that contract, but the full value of the work performed, according to the estimate of Messrs. Thomas & Barrett, which for the depth from surface down as far as they had gone, amounts to 21½ cents per yard, (see Mr. Keefer's answer to question No. 701.) and further agree to pay them any further sum which the work may hereafter cost; and took back their stock. The sub-contractors were all called in and perfectly satisfied; they were then placed on the ditch at the estimate of the Engineer, but it was soon discovered the work was not prosecuted with energy, nor would the plan recommended by Mr. Maggart answer.

The board having previously offered the sum of \$500 as a premium for the best mechanic for taking out the Deep Cut, Mr. Phelps makes an offer on 21st May—(see the proceedings of the Board thereon as follows.)

" May 21, 1827.

"Present—Messrs. Dunn, H. J. Boulton, Wells, "Robinson and D'Arcy Boulton.

"Read a letter from Mr. Phelps proposing to "excavate the remaining portion of the the Deep Cut by machinery of his own invention at 27 cents per cubic yard.

"When the Board determined that in order to
form a correct opinion with regard to the practicability of the plan proposed, it will be necessary for
them to inspect its operation, and for this purpose
it was agreed that they would hold a meeting at
the Deep Cut on Friday next the 25th inst, where
they could also receive from the Agent and Enginear their full report upon the subject."

In the meantime notice was given in for proposals on 26th May, when the Directors met, and the following proceedings were made thereon, which shews as equitable an arrangement as could be adopted.

" DEEP CUT, May 26, 1827.

"Present-Messrs. Dunn, H. J. Boulton, Robinson, D'Arcy Boulton, Wells, Keefer and Clark.

"In pursuance of the resolution of the 21st inst, the Directors assembled at the Deep Cut, and inspected the whole line thereof, and also the various machines of the contractors, and of Mr. Phelps for the more expeditiously completing the excavation; and having required each contractor to deliver in proposals of the terms upon which he or they would complete such section or portion of section on which they were severally engaged, they delivered their proposals accordingly, viz:

"Sylvester R. Hathaway, the remainder of his "job the full width—40 cents—and ditch only, 60 "cents per square yard.

"Martindale and Donaldson—the ditch to the tow path 1s. 10½d. C'y. or the whole width 1s. 6d. C'y per square yard to the bottom level—water indem"nified.

"A. Rowlay—the ditch for 50 cents, also to finish the 52 rods on which he is engaged for 36 cents per cubic yard.

"Hartwell and Son—the ditch at 45 cents, and "the whole of the Section No. 2 at 35 cents per "yard.

"Love Newlove—the remainder of his job—the whole at 40 cents—the ditch at 60 cents per yard.

"Lory Davis—the ditch at 75 cents to the bottom or the whole width at 50 cents, with the exception of quicksands, water, &c.

"Oliver Phelps—the whole remainder of the "Deep Cut at 25 cents, with an allowance of 2 cents "per cubic yard for machinery.

"When it was Resolved—To accept of Mr. Phelps' proposal, but the Board being desirous of doing justice to the contractors, and protect their interest and property in the concern, it was proposed to offer them the same terms for that portion of the work on which they were engaged under the direction of Mr. Phelps, upon which Mr. P. offered to unite with any of the contractors and give them a proportion of the profits equal to the strength they might employ, or to purchase their teams, shanties, provisions, machinery, &c., or furthermore to allow each contractor at the rate of \$1000 per annum for his own services as superintendent-18s. York C'y. per day for each horse team, waggon and driver found -15s. for each yoke of oxen, cart and driver-E2. per week for common board-and \$2 for overseers, and a reasonable compensation for other services performed by oxen, at plough or otherwise and moreover if any one chooses to use any other machinery except such as Mr. Phelps shall erect, whereby a saving may be made, that person shall be entitled to and receive all the advantages that may resule there-

The several contractors were then called in, and being referred to Mr. Phelps they entered into en-

gagements with him solely except that they expected the Company would guarantee them for any amount due to them from Mr. Phelps, who agreed that such sum should be retained as might meet their several claims.

An agreement was then executed by Mr. Phelps to complete the above work according to the said terms in six months from this day.

On 9th June, 1827, the following proceedings were had at the Board and Messrs. Hovey and Ward settled with.

"York, 9th June, 1827.

#### " PRESENT:

"Messieurs Dunn,
H. J. Boulton,
D'Arcy Boulton,
Robinson, and
Keefer.

"Messrs. Hovey and Ward attended the Board "respecting their contract on the Deep Cut, Section "No. 6, upon which the minutes of 13th April were "referred to and read—wherein it was agreed the "work they performed upon the said Section should be paid for according to the estimate of Mr. Thomas, the principal Engineer, which estimate was now presented to the Board, viz: on Section No. 6, 27 cents per cubic yard for work done during "last season.

"Sec. 35—11.704 yds. embankment by Osborne, 10½ cents.
"12.324 " ditto 15 do.
"12.338 " Hovey and Ward, 12½ do.
"6,769 " (near floating bridge) Osborne, 16 do.
"5,323 " (sand bank) Hovey & Co. 16 do.

"Resolved---That the Secretary do make out a statement of the work performed by Hovey and Ward upon Section No. 6 during last year, and transmit it together with their several contracts and accounts with the Company, to the President.

"Resolved—That the drafts drawn by O. Phelps on the Company in favor of Hovey and Ward, S. R. Hathaway & Co. for cattle and other property purchased of them, be endorsed by the President, viz:

"Resolved.—That security be given by Mr. Phelps for the above, and also for \$7,000 agreed to be advanced to him.

"Resolved.—That Hovey and Ward be paid for "the Shanties, Smith's Shop and other buildings ac"cording to a valuation to be appraised by two "persons."

On the 22d November, 1828, the following proceedings were had respecting the slips or slides:

"ADJOURNED MEETING OF BOARD, 22d Nov. 1828.

"The Directors proceeded to the Deep Cut, ac"companied by Mr. Barrett and Mr. Phelps--and
"having examined the recent slides which have taken
"place, of which the Engineer has given a particu"lar description.

"It was proposed as the best mode to overcome the difficulty occasioned by the unsoundness of the bottom of the Deep Cut, to bring down a feeder from the Grand River, from the still water above the Bear foot rapids, in such a direction as will intersect by the shortest practicable route, the proposed line of the Welland Canal from Grand River to the Welland (it is calculated that by these means a head of water 14 feet above the Western section of the canal will be obtained) to be descended by two locks."

Sce_also the proceedings of the Board, 1st of January, 1829.

EXTRACT, &c.

" January 1st, 1829.

#### " PRESENT:

"Honorable J. H. Dunn, President.

"H. J. Boulton,
"Hon. Wm. Allan,
"J. B. Robinson, and
"Wm. H. Merritt.

"Mr. Merritt having attended at the request of the other Directors, submitted a report from Mr. Geddes of a survey made by him and Mr. Barrett for the purpose formerly considered by the Directors the result of which survey appears to make it inexpedient to proceed in the plan of taking the water down from the Grand River, above Bearfoot rapids by a feeder, a difficulty occurring from a height of land in a place where it was not anticipated.

"Mr. Geddes fully confirms by his opinion the judgment of Mr. Barrett formerly expressed in favor of daming the Grand River near the mouth and thus obtaining a few feet rise of water upon the level through the Marsh.

"After discussing several propositions submitted to the Board, it is Resolved by the Directors that the most expedient is to Dam the Grand River near the mouth—to proceed in cutting through the Marsh for a feeder to be conducted to the Bank of Welland, at or near Hellem's Creek to construct an aqueduct over the Welland at that point and dig a feeder from thence on the north side of the Welland to deep cut—construct 2 Locks, by which vessels may ascend from the Welland to the deep cut upon the proposed level to be procured by means of a feeder along the Welland."

All of which proves the difficulties they had to encounter, Mr. Geddes' report is also adduced with regard to the main question whether they paid Mr. Phelps more than the work executed was worth—sufficient proof is adduced from the evidence of Mr. Hall and Keefer shewing the actual or customary value of such work in proportion to depth—the statement of Mr. Phelps shewing the relative proportion, the pro-

posals given in at the time averaging 37 cents per yard—I refer to Mr. Hull's statement in answer to question No. 209.

The evidence in minutes, together with the concurrent testimony of Mr. Hall in answer to question No. 200 corroborating the average price shews the directors could not have been actuated by any improper motive in this transaction, nor could they have been inattentive to the best interests of the Company.

Mr. Trotter's evidence of the offer of Mr. Hovey 50 cents per yard.

Newlove 40 cents per yard—the average of offers at time 37 cents per yard. The lowest offer except Phelps, to indemnify water, 30 cents.

The actual value in case the first 10 feet is valued at 15 cents is  $35_{70}^{3}$  cents. I refer to answer to question No. 704.—If valued at the prices the Company have actually paid—38  $_{70}^{3}$  cents.

The actual price paid Phelps after all advances are included is 34 cents per yard—I refer to answer to question 702, making no allowance for water, meeting house, cattle, or any other contingencies which clearly and fully proves that the work was executed at a less price than it was actually worth, including all allowances by concurrent testimony of engineers and offers at the time.

With respect to the construction of locks, reference is made to the report of Commissioner in 1831 when Mr. Mackenzie was employed as Secretary and was actually present at the inspection—I refer to that report in 1830.

# Extract from the Minutes of the Board, 10th of May, 1835.

- "That Mr. Clark having been required by minutes of the Board 4th November 1831, to give security to the amount of £1000 on taking upon himself the office of bookkeeper to the Company, submitted the following.
  - " Job Northrup and Charles Ingersol Esquires, as securities.
- "Resolved, that the same be accepted of, and that he enter upon his office accordingly.

# Extract from Minutes, 7th January, 1835, page 303.

"Ordered, that a reduction of one-third of the rent due for the past year will be remitted to the mill owners on the lower part of the Canal, provided the saw-mill owners bear a proportion of the expense for dredging the Canal below their mills, and the deduction for interest due for the year 1833."

## Extract from Minutes, 9th June, 1827.

- "Resolved, that the Secretary make out a staement of the work performed by Hovey and Ward upon sections 6 during the last year, and transmitit together with their several contracts and accounts with the Company to the President.
- "Resolved, that Hovey and Ward be paid for the shanties, smith shop, and other buildings, according to a valuation to be appraised by two persons."
- " Resolved, That Hovey and Ward be paid \$50 for a machine which they erected at the tunnel in 1825."

At a meeting of the Board held at York on Monday, 21st May, 1827.

#### PRESENT.

The Hon. John H. Dunn, President. H. J. Boulton, Hon. Colonel Wells, J. B. Robinson, &

- D'Arcy Boulton, Esquires.

  "Read a letter from Mr. Phelps proposing to excavate the remaining proportion of the Deep Cut, by Machinery of his own invention at 27 cents per cabic yard.
- "When the Board determined that in order to form a correct opinion with regard to the practicability of the plan proposed, it will be necessary for them to inspect its operations, and for this purpose it was agreed that they would hold a meeting at the Deep Cut on Friday next, the 25th instant, where they could also receive from the Agent and Engineer the full report upon the subject."

#### Extract 24th November, 1827.

Hovey and Ward's business which was discussed and recommended to the meeting of the Board on the 4th ult., was now approved.

York, 24th November, 1827.

PRESENT:

Messicurs Dunn,
H. J. Boulton,
Wells,
Robinson, and
D'Arcy Boulton-

Mr. Merritt and Mr. Phelps were in attendance as required last Board.

Read a letter from Mr. Phelps dated 24th November, 1827, on which the Directors having deliberated and having examined the Agent and Mr. Phelps, and compared his general statement with the accounts—of work done and the expenditure incurred—the Board

Resolved.—That on looking back on the proceedings of Mr. Phelps since the beginning of June when he undertook the completion of the Deep Cut, they find that he has established a strong claim to the confidence of the Company from the result of his exertions. It appears that when he entered upon his contract there remained to be excavated on the Deep Cut 677,328 yards—of this he has excavated and removed 344,260 yards, leaving 333,068 yards or about one quarter of the whole Deep Cut to be yet completed.

There has been paid to Mr. Phelps, £20,349, and about £9,500 has been advanced to him in addition to enable him to bear the immediate charges of the great outfit necessary for so extensive an operation—and now at the conclusion of the season Mr. Phelps represents that £2000 more is required by him to enable him to discharge unsatisfied claims of laborers and others.

Upon this view of the present state of that most arduous portion of the Canal, the Directors see reason for a well-grounded confidence in its completion, during the next season, under Mr. Phelps management, and they see no reason to mistrust his ability, prudence, or good faith. The Directors resolve to support him as long as they continue of this opinion with the necessary advances for proceeding in the work, and they therefore agree to make the advance desired by him of £2000, upon his executing

a bond and warrant of attorney to the Company for

It is, however, the express direction of the Board that no part of the £2000 shall be advanced until Mr. Phelps has perfected his security upon all his real and personal property, to the satisfaction of the Solicitor of the Company, and the Agent is to see that the direction is strictly complied with, and an inventory of the property as descriptive as circumstances will permit, and pointing out where it is at present deposited, is to be forthwith furnished by Mr. Phelps to the Secretary of the Company.

## CHARGE 18.

With respect to charge No. 18: In reply to the assertions made on this subject, I have merely to remark, that the entire proceedings which were before the Committee of last year, are again fully detailed in our last report, and that Mr. Yates is still ready to enter into any arrangement that may be deemed equitable and just, and as it is a subject still left open, it is difficult to conceive what could have prompted or induced any person to attempt to impute censure on the Directors with regard to it. The documents submitted to a Committee of this House last year, and Director's Report of this year gives a full detail of the proceedings of the Board relating to this transaction. The accusation respecting the Directors engaging in mills and erections on the line of Canal, is, in part, true, but he has not attempted to shew any evil which has arisen from it; in fact, the mills I am engaged in are not yet in operation. An order of the Board exists, as appears by the following resolution, of date, 4th July, 1834:

"Resolved—That every application for water power or land, be made in writing, and to have priority according to dates, and that the plans and surveys of the property be made, and the husiness to commence forthwith; the present occupants, of course, to continue in their property."

This resolution authorises the lease of water to the first applicant, on the terms therein stated-\$100 for run of stone or single saw, and in that proportion for other machinery; it is found, that, at Gravelly Bay, only 62 feet head can be obtained, and that water can only be used, at best, a portion of the time; the Board are desirous to procure erections on all parts of the line, knowing that the capital invested in mills at Oswego, forms a great portion of our revenue from toll; that the mills at Rochester, Black Rock, Lockport, and different parts of the ErieCanal, are in active competition, aided by any command of capital they may require. Any aid of that description, on the line, should be considered a favor conferred on the Company, by the individual making them, in place of a reproach; and it will be so considered by any individual, who can comprehend the subject. With regard to its influencing the reduction of toll, it has not been shewn; but must produce the contrary However, if the Company, Stockholders, or any individual, think otherwise, every Director will be happy to relinquish their interest.

# CHARGE 15.

With respect to charge 15: This relates to an old transaction, which took place in 1825, was before the

Committee of the House that year, and again in 1830, and now brought forward for the third time—which, with the voluminous correspondence appended to it, is intended for information.

The whole transaction is explained over and over again, in each of the letters, the circumstances are, as near as I can recollect, as follows:

In September, 1825, Mr. McGillivray drew out a resolution, in his own hand-writing, appointing Mr. Boulton to go to London to obtain the stock which we expected Mr. McGillivray or Galt would have obtained—it is as follows:

# Minutes of the Board-20th September, 1825.

The Report of the Surveyor in regard to the route of the canal from Holland Road to St. Catharines were read and re-considered, together with the maps and profiles prepared in order to be trunsmitted to England, and finally a draft of a detailed report proposed to be sent to England, was read, and taken into consideration, but the paper being very long, and the subject of the uternost importance, it was only arranged in regard thereto, that Mr. Boulton should take the papers with him to New York for further consideration, and from thence to transmit them to Mr. McGillivray by whom and by Mr. Ervine they are to be recommended to their friends in England.

On further consideration of the importance of this intended appeal to capitalists in England to furnish the Directors with that portion of the Company's capital which remains to be subscribed, and which has been expressly reserved for the stuckholders whom they hope to find in England in preference to those who might have been found elsewhere; feeling the propriety of offering the most ample and satisfactory explanation on every point, and considering the difficulty of so doing, and especially the difficulty of sidering questions, or doubts arising from the want of local knowneeting questions, or doubts arising from the want of local knowneeting questions, or doubts arising from the want of local knowneeting questions, or doubts arising from the want of local knowneeting questions, or doubts arising from the want of local knowneeting questions, or doubts arising from the want of local knowneeting questions, or doubts arising from the man by the presence of personal communication of some agent or representative duly authorised and qualified to afford such informations as may be required, it was agreed that such mission to England, if undertaken by a competent person, would offer the most probable means of ensured, it was agreed that such mission to England, if undertaken by a competent person, would offer the most probable means of ensured for the intended appeal to that country for the remaining capital, and Mr. Boulton having kindly offered his services for this purpose for three or four months on condition, merely, of his reasonable expenses, not exceeding the sum of £300 st°s, being paid, the proposal was received with due acknowledgement, and it was

Resolved. That Henry J. Boulton, Esquire, be authorised and requested to proceed to England as the agent and representative of the Welland Canal Company to obtain such capital as may be required by the Company and in negotiating for the same and in all matters connected with this mission to act according to such instructions as he may hereafter receive from the Board.

That the Welland Canal Company do pay Mr. Boulton's reasonable expenses on his mission, not exceeding the sum of £300 sterling.

On the above, Mr. Boulton went to Toronto, after taking the draft for £300, Mr. Dum not being there, repaired to Quebec, thence to New York and England. Much dissatisfaction prevailed at the time, in consequence of Mr. McGillivray's letters censuring Mr. Boulton, and my placing the seal on the Power of Attorney, for fear of imaginary consequences.
What was the result? Mr. Boulton re-paid the money, which exonerated Mr. Keefer and myself; he did not effect his object, consequently, no injury arose from it, and after his return, the Directors paid him for the trip: I have no objection to have all this old useless trash printed, with this farther addition that with my present experience, from having had similar Powers of Attorney before and since, unlimited in their nature, and having given them to others; if the same thing was to be done over again, I should pursue precisely the same course.

#### CHARGE 7.

This subject was investigated as early as the year 1825, as appears by your Journals, the whole transaction is embraced in the following brief statement: Mr. McGillivray proposed and drew up the minutes relating to Mr. Boulton's mission to England I atiached the Company's seal to the Power of Attorney, expecting Mr. Boulton to get the approval of Mr. Dunn, who, it appears, was not seen by Mr. Boulton before his de-parture; the order to pay him the £300 was complied with before he went. Mr. Boulton returned the money, and there it ended; he was afterwards paid when I was not a Director. The whole matter was again canvassed in 1830, by a Committee, and now again brought forward, as new matter, to swell up the accusations.

Another question and answer is made out by Mr. Mackenzie and handed in, from which sundry small items are extracted—this account was also examined by the Committee of 1830, and approved of by this same person, as here shewn by the balance sheet of that year, but it answers his purpose to complain, sometimes of items, at others, for the want of them; he is more happy in displaying his talent and ability in those selections, than in any other measure relating to his duty as a Canal Director; they are fit emblems of the capacity of his mind. It will be seen, that the office copy is a receipt for £100, for expenditures, the items of which, were kept for my own private information, to shew the accuracy of my expenditure, and embraced the following periods and services:

From 3rd February, 1835 to 6th May, 1835, attending the Legislature, including two trips to Niagara and St. Catharines	I	15	9
One trip to Montreal and Quebec	29	ü	4
And one to New York between 6th May and 1st August, 1835,	1		13
	£98	14	51

It should have been entered at the £100, and the balance, £1 5 8, re-paid, but, we were not then in anticipation of having an inquisition instituted in 1835 or 6, for the second or third time. The account is reasonable, for the service performed, and is only produced to gratify a little personal malice.

The charge of €25, paid Newlove, for hire of horse, saddle and bridle, is a mistake.

The charge of horse hire and saddle is	ł	5	0	
Newlove for which the committee made this allowance,		15	0	
	£25	0	0	

Although, he asserts in his evidence, he never received any payment for roads on Deep Cut.

The transaction relating to Mr. Yates having received £500 for getting a bill discounted, is another specimen of misrepresentation—the circumstances attending it were as follows:

The House passed a bill granting £50,000 to the Company, at 5 per cent. interest; it could not be negotiated in this Province, and Mr. Yates, after much time, and expense, and responsibility, succeeded in negotiating it, at par, in Philadelphia, for which, the Board unanimously voted him this sum, and I can scarcely believe any Stockholder or individual in this Province, could be found to make a rebuke on it,

well knowing the sacrifices that individual has made, besides losing the interest for near ten years on so large an investment in this work.

#### CHARGE 30.

I consider this merely an attempt to get his Welland Canal paper printed under the sanction of the Committee, to go to the public with a semblance of truth and importance.

1st. Is his notice in Advocate 10th Dec. preparing the public mind for such an exposure as would excite the indignation of every good man, prepare the minds of stockholders and creditors to advise the members of the Legislature—and then leave it to them to say who should pay the printer. A most worthy motive.

2d. His letter to the Board, 21st Oct. 1835, wherein he states that "fulse entries to the disadvantage of the stockholders and the public, to the amount of at least ten thousand dollars, are CLEARLY to be seen on the books of account.

"That framinient erasures have been made, to the injury of the Corporation.

"That a defalcation of many thousand dollars, on the part of the officers, is plain and evident.

"And that the entries in the books, in many cases, exhibit to me a systematic series of efforts to cover dishonesty and embeszlement."

3d. Resolution of Board—on which after the above extraordin ary charge by this person, the Board scaled up the books and papers until their next meeting, which is appointed by his request un 19th Nov., when they are to appoint proper persons to enquire into their financial offuirs, and report what grounds there are for the charges Mr. Mackenzie has preferred.

4th. A letter he addressed to the Board, 6th Jan. 1836, which they considered unworthy of notice.

5th. A resolution passed 6th Jan., 1836, in substance, as follows:—that in consequence of the charges made by Mr. Mackenzie, Burns and Bowery, were appointed on the 19th Nov. last to make an examination of these charges and accounts, and having presented their report exonerating those officers from the imputations with which they were charged by that individual—which the Directors fully believed.

The Board did not concur with Mr. Thorburn, because, as, in their opinion, Mr. Mackenzie had gratuitously made a malicious and false accusation against the officers of the Company, unsupported by a particle of evidence, and had also published those opinions to the world, to the manifest injury of the Company, they did not consider him entitled to a consideration. Whereas, the officers of the Company, who were always considered men of integrity and character, were continuing under the most unjust imputation, without, in their opinion, a shadow of reason, except a few unimportant errors.

#### CHARGE 24.

Which states "that, after the first election, the no-"minees, of certain persons in New York, always had the nomination of a majority of the Board, al-"though holding a very small share of the stock.

" and that the elections have not been, on all occaisions, conducted according to law."

The grounds for this charge, appear to be, the election of Directors by Mr. Yates, who retains the confidence of the majority of the Stockholders. This is rather too frivolous to notice, were they not generally formed on similar grounds. Sometimes he

complains of the influence of the Executive Government, &c. &c. &c., and he produces one instance in 1829, where one of the Directors moved that the Hon. John H. Dunn should be re-appointed President, instead of putting a piece of paper in a tumbler and call it voting by ballot, when the sentiments of every member were well known to be unanimous on the subject.

#### CANAL MANAGEMENT.

For the Committee fully to understand this arduons, profitless, unpleasant, and thankless duty, it is only necessary to refer them to the minutes of the proceedings from year to year.

#### CHARGES 1, 2, 3, 4, 5, & 6.

These were given in six distinct charges, the first embracing-

- "That the books are improperly kept, and, as I think, purposely to defraud the public and the Canal proprietors."
- 2. That very many erasures have been made in the Journal and Legers, some of which are to the scient disadvantage of the Company and the benefit of persons connected with the management of the Canal, while there are others concerning which nothing could be traced by which to discover the original entries.
- "3. That false and erroneous entries have been made on the books of account to a large amount."
- "4. That there is a great defalcation on the part of officers of the Company."
- "5. That false accounts have been sworn to and laid before the Legislature."
- "6. That important transactions of large amount have been improperly withheld from the Company's books of account for several years."

Mr. Mackenzie has, for the sake of perspicuity, or some other purpose, blended those charges all in one, and left the Committee to select. For instance, he calls such items as the following a defalcation:—charging for the printing of Mr. Yates' pamphlets, £21; payment to John Boyle, £18; payment to Jack Toyne & Co., £24 1; and many others of a similar description, which were errors admitted before any investigation was heard of.

For a correct understanding of Mr. Mackenzie's proceedings, in this matter, it will be necessary for the Committee to refer to my reply to charge No. 30, where his proceedings and accusations are briefly detailed. Before this, Mr. Beaton was employed in examining the books with Mr. Mackenzie, and when an error was discovered, it was promptly admitted.

The books and accounts having been briefly examined by Mr. Mackenzie and a Committee of the House of Assembly up to 1830, his inquiries at St. Catharines, did not extend prior to that period. After Mr. Mackenzie made those extraordinary charges the books were closed up until an investigation was made, as he recommended, in concurrence with Mr. Thorburn. The gentlemen appointed, reported no DEFALCATION, and the Board fully concurred with them in that opinion.

As soon as this Committee was appointed, which was on 22nd January last, prompt measures were adopted to bring over the books and papers and offi-

cers of the Company-no delay has arisen on their part, but, on the contrary, every facility has been afforded to forward the investigation.

On the 27th of Jan., I, as the President presented the following letter to the Chairman of the Committee, with a view of obtaining a detailed statement of the items which composed Mr. Mackenzie's charge of defalcation.

House of Assembly, Jan. 27, 1836.

To the Chairman of the Committee on Welland Canal Accounts.

I have most respectfully to solicit that you will request William Lyon Mackensie, Esq. to present a statement in writing, specifying the items which compose the defalcation with which he has charged the officers of the Welland Canal Com-

Also the items which compose the charge of fraudulent entries and crasures.

Also the charges he has made against myself, he having stated that I have served in the capacity of Secretary and Treasurer since Mr. Black resigned, and that the funds of the Company since that period have passed through my hands, in order that I may have time to answer to the allegations thus made.

The statement thus preferred not we to make any other charges hereafter.

I am, Sir,

Your obedient servant,

W. H. MERRITT. The statement thus preferred not to preclude Mr. Mackenzie

The motive in doing this, was, the President having called the meeting of the Directors in October, from the promise of Mr. Mackenzie to produce those items—that after producing them in the hand-writing of Mr. Hall, he obtained possession of them under a false pretence, and refused to give them up, and also refused to surrender them under an order of the Board, passed unanimously on the 19th November.

After Mr. Clark, the Secretary, arrived, he presented the following letter, in which, he admitted the existence of errors.

TORONTO. Feb. 8. 1836.

SIR, I have the bonor to acknowledge the receipt of a paper from W. L. Mackenzie, Esq. placed in my hands by the President of the Wellani Canal Company, purporting to be in com pliance with the following order:-

"Resolved, That William Lyon Mackensie Esq. Canal Di"rector, be required to furnish to the Committee a detailed state"ment of the charges he may have to prefer against the Welland
"Canal Company or any of its officers, specifying under distinct
"heads the several items of charge."

The first is a general assertion of the truth, of which you will judge hereafter

- 2. In compliance with the above order I request Mr. Mackennie to name the items embodied in the above charge—I acknowledge are £50 to Thomas Merritt junior made in error by Callaghan my assistant.
  - 3. I require the items which compose this charge.
  - 4. I require the items which compose this charge.
- 5. This charge I pronounce untrue as far as the inference would lead, that any accounts have been knowingly and falsely sworn to by me. Errors I admit, and always have.
- This is incorrect as to importance and time, but true inas-much as relates to tolls of 1830, 1831, and 1832.
  - . Those charges will speak for themselves.
- 8. I have no knowledge of any improper payments made, as here alluded to.
- 9. I am unaware of any payments made unless sanctioned by the Board.

10. It has never been done in any case to the injury of the Company.

11. The assertion is correct as to two sets of books which are unnecessary, as will be clearly shewn in the ordinary transactions of the Company, but the inference drawn from it is not correct.

12. Mr. Morritt never had charge of the books after Mr. Black left them. I succeeded Mr. Black in that department, as will be seen by the minutes of the Board.

The charges from 13 to 30 does not relate to monied transactions but management—must refer to the President Mr. Merritt for any further information on those points, my object is only to solicit to be furnished with the items which compose Nos 2, 3, and 4, which will materially facilitate the investigation of the committee.

1 um Sir,

Your obedient servant, JOHN CLARK, Secretary W. C. C

I again urged the committee to obtain a copy of the original charges which Mr. Mackenzie produced at the meeting of the Board in October, but it was only presented 26th inst.

The Committee cannot but perceive that if Mr. Mackenzie's motive had been to elicit the truth, this investigation could have been brought to a termination in a very short period as relates to the defalcation, inasmuch as the Secretary would at once have admitted all errors, and the committee could have judged as correctly then whether those errors were made with a fraudulent intent, as at this moment. But his motives can be clearly seen by the effect the publication of this evidence will produce if ever read. For instance it will appear that he has by his questions drawn out from the evidence proof of those different items, as no person will imagine for a moment that they were promptly admitted if only errors, and the list he produced first to the Board of Directors at St. Catharines, and now to the committee in the handwriting of Mr. Hall, calls them no more, whence the necessity of taking up so much time to investigate them by such a torturous proceeding.

Mr. Clark's evidence will shew the committee that the officers of the Company were fully aware of the existence of irregularities in the books, and explain the reason why the corrections were not made. It is unnecessary therefore to remark that the credit Mr. Mackenzie takes to himself as being the original discoverer of those irregularities, falls to the ground.

There is frequent allusion made to the absence of a cash account from the books, and this is done in such a way as to lead to the impression that up to this time there is no such account. A reference to Cash Journal folio 287 will shew that such an account has been kept for the last eighteen months.

It will be seen by a reference to the evidence of Mr. Keefer that the allegation made respecting the keeping of an estimate book is incorrect. The estimate book now in use will shew that an abstract is made up at the end of each estimate to shew the different divisions or the different works on which the amounts are expended, and a reference to former estimate books will shew that such a plan has always been kept up.

Messrs. Bowery and Burns were called on to examine the charges—more particularly that of defai-

cation—brought by Mr. Mackenzie against the Company and its officers, as the report of those gentlemen will shew, and not to the affairs of the Corporation generally. They gave it as their opinion that there existed no defalcation on the part of the officer of the Company, although the errors contained in Mr. Mackenzie's original list are notified by them, and in this opinion they will be borne out by any investigation.

In transactions so multifarious as those of the Welland Canal Company, where accounts were kept with about 2000 individuals, and extending over a period of twelve years, it would be rather extraory stry if no errors should have occurred. It will be a that such as have been pointed out do not operate prejudicially to the interests of the Company, and that as Bowery and Burns have given their opinion there has not been one shilling of defalcation shewn against any of the officers of the Company.

The following order of your committee of 27th February last

"Mr. Thorburn, seconded by Mr. Chisholm, moves that it be resolved That Mesers. Hincks and Young be required to examine such particular accounts on the books as Mr. Mackenzie may point out to them, with such assistance as they may require from Mr. Mackenzie, and that such books, papers and vouchers as they may require to enable him to do so, be furnished him by the Compan "."

Shows that every opportunity has been extended and every assist nee afforded him for the fullest examination, which has been continued without interruption up to Saturday, 26th inst., while the time occupied in answering those voluminous charges was only three days.

Your committee are also respectfully requested to bear in mind that Mr. Mackenzie has had eight months to prepare his charges. While in St. Catharines he had the assistance of the officers of the Company; and since the books and papers came here he has had the assistance not only of the officers of the Company, but also of the gentlemen appointed for that purpose by your committee on 27th February last. A comparison of the schedule of errors he made up in St. Catharines (copied by Mr. Hall) with the charges he had submitted to this committee, will shew that many of those charges have been advanced by him since he has had access to the books and documents by order of the committee, and hence his refusal to present his schedule of errors until he had closed his case.

# WITH RESPECT TO CHARGES 8, 9, & 11.

The first is that the officers paid their salaries without an order of the Board—this is incorrect; there was always a standing order to pay salaries, and by an examination of the books it will be seen that the Company were in most cases in arrears for salaries.

## WITH RESPECT TO THE REPORT OF MESSRS. BOWERY AND BURNS.

By reference to charge No. 30, we have stated in what manner they were appointed—their report states they do not believe a defalcation of one pound will be found—time will determine whether the in-

sinuation respecting the Company and those gentlemen are correct, or whether their accuser merits the name of slanderer.

# WITH RESPECT TO CHARGE No. 20.

"That important original estimates, contracts, re"ceipts, and other papers, are missing at the canal
"office, and that the officers in no way account for
"their being missing."

That many important documents are missing (two are named.)

1st. The original estimate for Dec. 1831.

2d. The original estimate for Nov. 1832. It is true, the original documents alluded to, were missing, of which Mr. M'Kenzie was duly informed previous to his commencing his investigation. It caused great research and anxiety, and can only be accounted for frov 1 the circumstance, that at the periods alluded to, a committee was appointed to settle claims equitably and otherwise, composed of Massrs. M'Donell, Lefferty and Kandal; also another committee to settle the accounts of Messrs. Little, Garrison, and Lewis, those estimates were taken out of the office for reference at the time, to satisfy the contractors and committee, and must have been lost or mishaid. The testimony of Mr. Keefer shews, that no injury has arisen from it.

The 3d is neglect of the Secretary to fill in the names of lock tenders, who had given in proposals. The reason no contract was ever entered into with those lock tenders, it being deemed advisable to hire them by the month—a matter of no moment whatever.

WITH RESPECT TO THE DEEDS, PLANS, &c.

Mr. Keefer's explanation will shew the method and manner of making them out and the cause of their not being registered.

# WITH RESPECT TO THE OFFICE,

The accuser was in favor of the erection.

#### CHARGE 22.

A number of letters are copied as usual, and assertions made that the money has been shamefully jobbed and mismanaged—improvident contracts carelessly made—heavy debts incurred, &c. &c. &c.—all of which is unsupported by a shadow of proof.

If the committee would carefully investigate the minutes of the Board they will find not a solitary instance during the last twelve years when loss has arisen from carelessnes in drawing up or executing contracts.

That only two or three law suits have been incurred during that period—that altho' their necessities compelled their entering into contracts at some times to finish certain portions of the work, to open the navigation, no injury has arisen from the measure, but on the contrary, it only proves the judgment with which they have carried on this operation under the most appalling circumstances.

#### CHARGE 26.

It is alleged that £718 10s. is procured to pay Elam Lynds & Co. from Bank, and paid Mr. Yates

in place of Lynds—the only explanation required is what the accuser was informed, that Lynds & Co. were the makers and that Mr. Yates engaged the machine from them and paid them—that we had all the documents prepared to prosecute them for the deception practised on us—which was deferred—the subject was fully explained to the committee of last year, and is no new matter.

# WITH RESPECT TO THE STEAMER SIR WALTER SCOTT.

This Boat was built by a number—Mr. Merritt held four sharesit is true \$400—the engine cost £600 and the boat altogether £1500; the Company had the scrapers, frame, and all the apparatus for dredging on hand,—the boat was brought down on dry dock with a view of strengthening her—the ship carpenter thought she could be converted into a drudge at a very small expense,—the President agreed that it should not cost over £500 and was extremely anxious that the Directors should purchase it, and regrets to this moment they had not, for the interests of the Company; and the only reason assigned at the time against it was the certainty of having one at the expense of the Government, which would render this unnecessary—I refer to Messrs. Keefer and Thorburn's testimony on this subject.

The letter from Mr. Dalton and others of a simplify nature, which were purloined from the office, is a sadduced to produce an effect. I cannot consider the Board or any of its officers responsible for the sentiments of others.

## CHARGE 23

Relates to politics. As he has nothing to support this charge but a letter written from Mr. Dalton-for which neither the Board, the indivivual to whom it was addressed, or any other person except the writer, can be answerable. It appears he has withdrawn any accusation himself, therefore it is useless to consume the time of your committee on the subject

#### CHARGE 12.

Our accuser asserts that I succeeded Mr. Black, as Secretary, in June, 1832; that the books and accounts were in my possession, and that I was the responsible officer, until November of that year. In making this assertion, I laid the minutes before him, consequently, the Committee cannot but be sensible of the motive which has governed me in making this statement.

By reference to the minutes of the Board, of October 7th, 1831, it will be seen, that the office of Agent, which I then held, was to be aboushed, and the duties of Agent to be discharged by the Secretary, to which office I was to be appointed on the resignation of Mr. Black, which, I believe, was then given in. I refer to the following extract as follows:—

# Extract from Minutes of the Board, Nov. 4, 1831.

- " The Hon. John H. Dunn, President,
- "Alex. McDonell, Esq. Vice President,
- "The Hon. W. Allan, and R. Randall, Esq.
- "At the request of Mr. Yates, John Clark. Esq. was nomina-"ted for the office of book-keeper to the Company on Mr. Black's "retiring from the present situation of Secretary—whereupon it "was resolved.
- "That John Clark be appointed book-keeper with a salary of "£150 per annum upon his giving security in the sum of £1000."

  Truly extracted,

J. CLARK, Secretary.

It will be seen, that, at the request of Mr. Yates, John Clark, Esquire, was appointed book-keeper, upon his giving security to the amount of £1000, as soon as Mr. Black should retire, by the following extract from the minutes of the Board.

# Extract from Minutes of the Board of 19th Nov. 1832.

#### " PRESENT:

- "The Hon. John H. Dunn, President,
- "George Keefer, Robert Randall, and
- "Thomas Butler, Esquires.

"Resolved, That Mr. Merritt resume his situation as agent, "and Mr. Clark be appointed secretary."

Truly extracted,

JOHN CLARK, Secretary.

On reference to the minutes of the Board, 19th of November, 1832, it will be seen that Mr. Clark was appointed Secretary, and I resumed the situation as Agent.

This could be corroborated by the testimony of every Director. I refer to the evidence of Mr. Clark, the Secretary, and Mr. Keefer, the Engineer, then on the line, also, to Mr. Hincks' evidence, proving this.

You will see in the minutes of the 10th May, 1832, that the security by Mr. Clark, was regularly given in, and further, that, after the decease of those gentlemen, the subject was again brought under the consideration of the Board, as per the following extracts, viz:

# Extract from Minutes of the Board, July 4, 1834.

#### " PRESENT :

- " W. H. Merritt, Esquire, President,
- "Thomas Butler, and
- " Ogden Creighton, Esquires, Directors.

"Ordered, That the Secretary, who is receiving and paying out moneys be requested to furnish security to the amount of £500 by two securities, and double the amount in his own mane; and that all those who have similar responsibilities be required to present them in this office within the present month, or consider their situations vacant."

## Extract from Minutes, 13th September, 1834.

- "The Bonds from the several persons required to produce the same were submitted.
- "John Clark, Esquire, himself in £1000, his sureties George "Adams and H. Mittleberger £500 each; which were severally "approved of."

Truly extracted,

JOHN CLARK, Secretary.

And that the Secretary is at this moment responsible, with two gold surctices to amount of £500 each, and himself in £1000.

## WITH RESPECT TO MR. BEATON.

His general character, for integrity, has hitherto placed him above suspicion.

If any further proof was wanting to establish the facts, in contradiction to this charge, public notoriety would be sufficient. From the commencement of this work, my whole mind and personal attention has been directed to the general management of this Corporation, in obtaining means and attending to the work; seldom in the office, or even at home; and it never was intended or expected that I should have any charge whatever of the books. (See Mr. Dunn's evidence, Keefer's, Clark's, and every other person called before the Committee.) His statement, that I was in possession of books, from June to November, 1832, or that the Secretary is under the control of the President, is quite as true as \frac{1}{12}\text{ths} of all his assertions.

His main object, from the commencement, was to implicate me in the monied concerns of this Corporation, but I am satisfied there is not a member of the Committee who can entertain a doubt on this subject—he has failed to produce a shadow of proof, either personal or documentary.

## CHARGE 16.

It is true, on the 26th October, 1825, the resolution referred to, was adopted, (in consequence of receiving General Beach's letter,) to which I refer as follows:

Resolution adopted at a Meeting of the Board of Directors, 26th October, 1825.

"A proposition having been made to the Directors by G. S. Beach, Esq. of Rochester and Geo. Keefer, Esq. of Thorold, that they would construct or cause to be constructed a large and extensive flouring mill with at least four run of stones ca the line of the Welland Camal, capable of making the best superfine flour, adjoining to St. Catharines, and at the first locks on the mountain, and have the said mills in readiness by the time the water is let into the said canal—Be it resolved, that the said General S. Beach and Geo. Keefer, Esquires, be allowed the privilege of a mill seat for the above purpose, providing they perform the said conditions; the above purpose, providing they perform the said conditions; the above proposition having likewise received the sanction of Simon McGillivray and H. J. Boulton, Esquires, at the meeting of the Directors on 20th September last."

The motive assigned for puffing up a particular privilege on the mountain which is equalled to Rochester, was for the purpose of benfitting George Keefer, Esquire, one of the Directors. Passing over all this extraneous matter, the facts are, at the time this order was passed, not one man in 100 believed the Canal would ever be finished. (See Mr. Mc-Micking's evidence.) But, as the Board were inclined to give the situation, at St. Catherines, on condition that the mill should be ready by the time the water was let in, they gladly embraced the offer of Mr. Keefer to erect one at the top of the mountain on the same conditions. To shew the value of the

grant at the time, it is only necessary to remark, that General Beach never accepted the offer, and Mr. Keefer was considered visionary for laying out his capital on his mill at the time. It is a very easy task for a person at this day to censure the conduct and attribute motives to the Directors 10 or 12 years back, for a particular act, but to ascertain the truth, the Committee should place themselves in their situation at the time.

# WITH RESPECT TO THE St. CATHA-RINES FEEDER;

I had no interest in renting it from the Company. I have since rented from the lessees the lower level out of three, number one being still in possession of the Company, and besides the 500 bringing \$200, and has situations for many more; and with all the assertions, I have no interest in any saw-mill or any machinery on the line, except shares in 2 grist-mills—one at Gravelly Bay and one at St. Catharines, neither of which have used a drop of water from the Canal, and are not finished. With respect to this subject, the Committee must see the obvious advantages those erections are to the Canal, and the income which must be derived from them. I should be happy to transfer any individual interest I possess in them, to the Company or any person whatever.

# WITH RESPECT TO FORWARDING;

The same motive which induced me to join in the erection of mills, extended to vessels—having little or no capital on the line, I joined others in building and purchasing vessels; taking a small interest in each, to draw produce through the Canal; and as we had no funds in the year 1833, I advanced the amount of tolls to Mr. Randal that year on those vessels, but never was interested in forwarding, in any way, except in the proportion of those freights, which was a trifling business and attended with loss.

# WITH RESPECT TO THE ALTERATION OF ROUTES;

As allusion is made to Mr. Gordon's letter, I refer to Journals, 1825 and 1826, page 10, for that gentleman's opinions, as well as the reports of the Engineers thereon; he has not, however, produced a shadow of proof in support of the charge, that I had any influence whatever in determing this route.

## CHARGE 17.

This charge is made out by asserting, in the first place, that the mode of leasing water privileges is a bad one—that mode is as follows:

Extract from Minutes of the Board, June 7, 1834.

"Resolved, That all leases for hydraulic property be for two years only."

14th July, 1834.

"Resolved, That every applicant for water power or land be made in writing and to priority according to dates, and that the plans and surveys of the property be made, and the business to commence forthwith, the present occupants of course to be continued in their property."

By which means, the first applicant, in writing, is certain of obtaining a situation, it is the interest and desire of the Directors to obtain erections and court applications—the system is found to work well, and our accuser is the first person ever objected to it.

2nd—That important mill sites have been given away. This assertion is untrue; the only solitary instance is the one seat to George Keefer, Esquire—the other person who obtained a similar offer at the same time, 1824 or 5, did not choose to avail himself of it.

3rd—That Messrs. Merritt, McDonell, Boulton and Creighton, are interested as mill owners, and literally voted money into their own pockets, which he proves by quoting the resolution of 7th January, 1935 and 1933, where a reduction of  $\frac{1}{3}$  of the rent is made.

The facts relating to this subject, are as follows:

1st—I was not a mill owner at that period, and, up to this day, have not made use of any water.

2d.—The deductions were made in consequence of the water being taken out of the canal altogether near one half the year-to finish that part above Port Robinson-and it was deemed unreasonable to charge for water when the mill owners were deprived of the use of it. Again they may reduce the toll-the lock keepers might neglect their duty; but no instance is shewn that it has been done—on the contrary, even Mr. Hall's testimony proves the reverse: the want of capital on the line was the only reason which induced the Directors, particularly Mr. Yates, to engage in any erections whatever; that in so doing he and they have rendered great service to the Company and surrounding country is clearly manifestat the same time as they are all ready at any time to surrender their interest it is rather singular it should be made a subject of censure.

Again we find—Costly Favoritism—Merritt's Mill. After an insinuation that I have been guilty of some extraordinary or base act, in connexion with Mr. Boulton—he quotes a petition of Mr. Gordon's Nov. 1825, praying for an alteration of the line of canal, but with his usual want of candor conceals the following admission of Mr. Gordon at the time, viz:

Extract from Mn. Gondon's evidence taken before a Select Committee of the House of Assembly in Nov. 1825.

Committee of the Home of Assembly in Nov. 1825.

"Ques. Have you any facts to state, or remarks to offer, in "aurpport of the petition presented by you, and now read?—Ass." As to the report of Mr. Roberts, which I only haw on Saturday "last, the explanations Mr. Merritt has given to the Committee "this morning, have overcome my objections as to the point, the "alteration of the route; and I now only wish the provision last "prayed for by me, to be afforded, viz: that stockholders not approving may withdraw their subscriptions, and their stock paid "in be refunded, as I believe there has been no meeting of the "Stockholders on that point."

He asserts the alteration was made to serve the private interests of myself—which he infers from my having been in possession of a mill on the 12 mile creek, for which the arbitrators in 1826, who were composed of a number of individuals awarded me £600—the only question for consideration is this—

Was the object of selling that mill a sufficient inducement for me to induce the Engineers to alter a route of such importance—Secondly—If so, have I exercised that influence?

To determine this point the committee should go back to 1825, ascertain the actual worth of a grist or flouring mill with three run of stone—a saw mill with 2 saws, the mill yard, 2 dwelling houses, a barn, and several acres of land included in the mill pond—for the remainder of the canal which went through a valuable meadow for which I paid \$50 per acre in 1816 the arbitrators did not allow a farthing.

Then it would be necessary for them to form a correct judgment to ascertain whether the difference between that property and the £600 was a sufficient inducement; whether the Engineers employed (Messrs. Clowes, Roberts, and Hall, who were then on the several routes) were men of such dubious character as to be influenced by any individual to make a false return, or whether Mr. Gordon would have made the admission and withdrew his objection without good reason that the present route answer the most valuable purpose and is decidedly the best, practical experience has proved. (I refer to Mr. Keefer's evidence.)

To follow up this subject it may be necessary to explain further that in making the lock and dam the saw mill was removed, and it was necessary for a considerable expenditure to be made or let the grist mill go into disuse;—I advanced the capital and put a new saw mill and the grist mill in operation on condition that I was to have the use of it until the Company thought proper to resume it, on which I expended, as stated, £678 12s. 7d. He (Mr. Mackenzie) then produced several letters with a view of shewing the improper course pursued by me, to which I refer for the most positive proof of the correctness of my motives. In 1828 I wrote the Board stating I preferred the Company taking those mills as I did not wish to be concerned in them.

In 1831, having been requested by Mr. Yates to become interested in and take the management of the Hydraulic purchase, I addressed a letter to the Board—they answered me leaving it wholly with myself. On reflection I still continued of my former opinion and declined becoming interested.

Mr. Mackenzie asserts I have since become a lessee of the water power at St. Catharines.

I wish the committee to be in possession of every circumstance relating to my conduct and management, either with the Company or canal, since its commencement. I never, altho in possession of all the facts relating to routes, made one original purchase before the canal was made; I have made a purchase of land in Dunnville with Mr. Street in 1832 from Mr. Phelps—another in 1834 at Port Colborne from Mr. Draper. I have also taken an interest of one-sixth in a mill at Port Colborne, to be propelled with steam and water alternately—and the principal share of a flouring mill at St. Catharines, wholly with a view of establishing those erections to improve other property. The latter privilege I leased from the individuals who leased from the Welland Canal Company without any interest in the former, and had there been any chance or prospect of other individuals making those erections I would

not, and the moment an objection was made by any Director I manifested my willingness to relinquish as stated in my letter to Directors 1825—although not with a view of wishing to retain my situation in the Welland Canal Company, with which I have had good reason not to be well satisfied.

#### CHARGE 25.

An attempt is made to cast the odium in removing this route to the influence of Mr. Boulton.

Without referring to the private and other letters, he (Mr. Mackenzie) has thought proper to take from the office to make out a case on this subject. I have a perfect and distinct recollection of every circumstance relating to it.

Early in the year, 1st January, 1829, the Board determined on the Report of Mr. Geddes to assume a higher level and bring the waters of Grand River through the Deep Cut. Notice was given and proposals received the 31st of the same month; preparations were made, the route explored, and the dam placed under contract to the Messrs. Wilkinson, Simpson, Monson, & Pratt: the work was actually commenced in March, prosecuted with the greatest possible rigor until the order was received from Sir John Colborne to discontinue the work until the arrival of Commodore Barrie and Captain Phillpot, R. E. at the Naval depôt at the mouth of the river, the former of whom had formally protested against the dam being erected near that station. On their arrival I was sent for from St. Catharines—went up in the night—expostulated, and urged every thing in my power to induce him to alter this opinion, but to no effect.

I then went over to Toronto in Company with Mr. Yates, and obtained an order from His Excellency to resume the work on condition of the Company giving a bond to return it if hereafter required. I went up commenced again, and was againstopped by an order from His Excellency not to extend the dam within 5 miles of the mouth; this was afterwards reduced two miles, but on examination it was found impracticable to build a dam at any other or nearer situation to the mouth than the present site.

On the 5th May the Directors attended, and approved of the site, as will be seen by reference to the minutes as follows, viz:

May Sth, 1829.

"The President and Directors, on the 6th and 7th instant, inspected the Grand River, in order to determine upon a proper site for the proposed dam, having found it necessary, from the objections advanced by the naval department, to abandon the further prosecution of the dam near the mouth of the river. After an examination of the banks, it appeared to the Directors that it is expedient to construct a dam nearly opposite the limit, between Moulton and the Indian lands, and about four and a half miles from the mouth of the river.

"Resolved that the Engineer be directed to proceed immediateately to lay out the dain, embankment, and feeder, from the Grand River, locating the dain at, or near the situation to be pointed out by the agent, (being that which appeared to the Directors to be preferable) unless the Engineer finds some good reason for suggesting an alteration, which he must, in that case, report immediately to the Board, with an estimate of the probable difference in expense to be occasioned by such alteration. The site for the dain to be approved by Mr. Wilkinson the contractor."

My advice was at the time at all hazards to erect the dum below and every member of the Board was decidedly against the removal, as they have from time to time expressed. Mr. Barrett's letter of June 1829 was written at my express request on which to form our report.

The cause of the removal was always a subject of notoriety, and the only individual who ever charged Mr. Boulton as being the cause of it is our present accuser—which, like most of his other charges is formed from his own imagination without a shadow of proof or a vestige of truth.

WILLIAM H. MERRITT.

THURSDAY, March 31st, 1836.

Committee met.

PRESENT:

JAMES E. SMALL, Esq. Chairman.

Messieurs Chisholm, Gibson.

Gibson, McDonell, Parke,

Roblin, Shaver,

Thorburn.—S.

J. T. Bowery, Esq., called in and examined.

[By Mr. Merritt.]

749. Mr. Mackenzie asserts that Mr. Burns and yourself were induced to make a report from some improper influence exercised by the Welland Canal Company, or some of its officers—is that the case. Further will you state when the examination of the books commenced, and whether you believe any defalcation of money exists?—The only intercourse Mr. Burns and myse f had with the officers of the Company during the examination of the books was to get such explanations that we deemed requisite in order to compare with the statements Mr. Mackenzie published in "The Welland Canal Company, or did they make any attempt to influence us. One of the Directors was generally in attendance.

The order for the examination of the books by the Board of Directors, I now hand in as follows:—

WELLAND CANAL OFFICE,

St. Catharines, 19th Nov'r, 1835.

Whereas it has been stated by Mr. Mackenzie, a member of this Board, that the financial affairs of this Corporation are in a state of great derangement, and that the books have been improperly tampered with—And Whereas the Board are desirous to have the charges made by Mr. Mackenzie thoroughly and impartially investigated by some competent and disinterested person or persons.

Resolved—That J. T. Bowry, Esq. be authorised to examine and compare the said charges with said books on behalf of this Company, together with all receipts and expenditures of all monies which have come into the possession of this Corporation from time to time up to the 31st October inclusive—and that the Secretary Mr. Clark be requested to appoint another person to act in conjunction with Mr. Bowry—and that those gentlemen do report the result of their investigations to this Board—and that they shall have full power to examine all persons, books and papers, in any way connected with the affairs of this Corporation.

Resolved—That the following Directors of the Board do attend at this office by turns weekly to superintend the examination of the books and closing of the accounts of this Corporation, in the following rotation.

Thomas Butler, Esq. to attend to the 30th November.

Alex. McDonell, Esq. the following week.

David Thorburn, Esq. the next week.

Ogden Creighton, Esq. the week after—And to be continued in rotation.

Truly extracted from the minutes,

JOHN CLARK,

were the secretary and the secretary as

This order is dated the 19th of November, but the examination was not commenced for some days afterwards, in consequence of Mr. Burns not being able to attend. Mr. Burns and myself, have already given it as our opinion, that no defalcations of the funds of the Company by any of its officers existed; and I have had no reason since to induce me to alter that opinion.

[By Mr. Mackenzie.]

750. What is your occupation, and where do you reside?—I reside in St. Catharines—I am not at present in any particular employment.

751. You are I understand the late partner of Mr. Butler, one of the Welland Canal Directors appointed by the Company, and was with him the lessee of Merritt's mill, now called Bowry and Butler's mills?—I was a partner with Mr. Butler, but not when appointed by the Board to discharge the duty above stated.

752. Your reasons I presume for the conclusions you have come to with regard to the books of the Company are to be found in your and Mr. Burns' report which I have given in to the committee?—Yes.

753. Mr. Burns the accountant employed with you in the examination of the books is I understand a practising Attorney at St. Catharines. Mr. Merritt's brother Director in the Grand River canal, and the person who had the loan of \$700 from the officers without an order of the Board, is he not?—Supposing those statements in the questions to be true, he is the same.

754. Mr. Merritt has asked Mr. Clark whether he was not aware that errors existed in the books and whether it was not his (Mr. Clark's) intention to examine and correct such errors to which Mr. Clark replied that it was, but that I had occupied Mr. Beaton's time so as to prevent this correction. Lunderstand that you was chosen by the Directors and Mr. Burns by the Officers, to examinine the books and accounts in November, after I left. Did Messrs. Beaton and Clark state to you that they had shewn you all such errors and improper entries as they knew of?—Mr. Beaton shewed me such entries as were irregular, but Mr. Clark did not interfere in any way or shape, and further I made no application to him.

755. Did Mr. Clark employ or nominate Mr. Burns your assistant employed to examine and correct the books?—I believe he proposed Mr. Burns as a competent person for the duty—(I refer to the minutes of the Board.)

MR. CLARK, again called, and further examined.

[By Mr. Merritt.]

756. Mr. Mackenzie assumes that if he had not been appointed a Director of the Welland Canal Company the errors which appear would never have been discovered by the officers, was it not known to you that errors existed, and was it not always your intention to examine the Books and correct such er iors?—It was shortly after Mr. Beaton entered the office in September 1834 he mentioned to me that he had discovered the irregularity of some entries in the Books, and that he meant to examine and correct them, and also to make a general examination of the books since Mr. Black left up to the time he took There being some mutters in archarge of them. rear then, and papers to regulate in the office, he was occupied during the winter in bringing forward those matters-and on Mr. Mackenzie becoming a Director and commencing his examination at St. Catharines Mr. Beaton's time was wholly engrossed by Mr. Mackenzie, and he was thus prevented from proceeding with the examination.

757. In question 413 an explanation is required why Lymburner and others remain creditors on the books?—When the awards were made the Company were not in possession of funds to pay them, and the amounts were carried to the credits of the individuals—when those individuals were paid the amounts were debited to the account of awards instead of the individuals.

758. Do you know the circumstances under which Mr. Yates negotiated a loan for £50,000?—The Debentures were issued by the Receiver General at 5 per cent—Mr. Yates negotiated the loan at the U.S. Bank, Philadelphia, at a very considerable expense to himself and a saving of one per cent interest to the Company from the month of June 1831 to the 16th September 1833, which at the legal rate of interest would have amounted to upwards of £800.

759 Under what circumstances was the loan of \$10,000 made to Mr. Yates to which Mr. Mackenzie refers?—The loan to John B. Yates Esq. was authorised under the following order of the Board entered

on the minutes 4th July 1834.

#### PRESENT.

"William H. Merritt Esq. President.

"Thomas Butler. and

" Ogden Creighton Esqrs. Directors.

"A letter from John B. Yates Esq. of the 10th of June having been submitted requesting a loan of £2,500 to repay certain sums advanced in this country for which he will pay interest and return the principal when required."

"Ordceed, That the same he advanced, and the Directors feel pleasure in having it in their power to return him a favor so frequently received in the various stages of the canal, and that the same be advanced from the tolls collected."

Truly extracted from the minutes,

JOHN CLARK,

Secretary.

At the time this loan was authorised to be made to Mr. Yates there was sufficient funds in the hands of the Company to meet the demands then against them.

The whole of this loan has been fully paid by Mr. Yates to the Company with the interest accruing thereon.

This loan was expended in the country.

760. Will you produce the vouchers to shew that Brundage should be credited the timber he delivered which Mr. Black omitted carrying to his credit on the Books?—I hand in the vouchers, which clearly shew it was a more omission not to enterthem, which are as follows—viz:

THOROLD, March 2, 1825.

DEAR SIR,

Mr. Merritt has written several times to us from York giving his opinion that you should stop getting any more timber, in his last he urged us again and the other Directors are also of opinion you should not get any more. You will therefore stop all further operations in the timber contracts until further advice from the Directors.

GEO. KEEFER, P. W. C. C.

No. 27.

WELLAND CANAL OFFICE, St. Catharines, 22d April, 1827.

Received from the Welland Canal Company, by Wm. Hamilton Merritt, Esq. the sum of fifty-eight pounds, sixteen shillings and five pence, currency, on account of my contract in procuring timber.

£58 16 5.

T. BRUNDAGE.

Welland River.

MR. T. BRUNDAGE,

To HINKLE & ALLAN, Dr.

1825—June 27th—To securing 112.819 feet of timber as per agreement at 1s. 3d per £ s. d.

June 27th—Dr. To order on Brown 1184 0 0

June 27th—Dr. To order on Brown, Do.  $\begin{array}{c|cccc}

Three-fourths of this amount, being £24 7s. 6d. currency to be paid to Mr. Brundage for cattle, horses, and tools by him provipaid to Mr. Brundage for catrie, horses, and tools by him provided in aid of accomplishing the contract, amounting to £164 2s. 6d.—ten per cent of this sum being £16 3s. 3d. C'y altoresaid for the loss he may sustain—to realize the same the 3 first mentioned shanty houses hereafter to belong to, and be considered the property of the Company, and the one last mentioned to continue to be the property of Mr. Brundage.

Given under our hands and seals at Thorold, this 20th day of July, 1825.

JOHN DECOW, [L. s.7 SAML. STREET, [L. s.]

ST. CATHARINES, June 7th, 1825.

To the President and Directors of the Welland Canal Company:

GENTLEMEN.

Agreeably to the instructions given me by your Agent W. H. Merritt, Esq. I have mentioned and marked all timber get out by Mr. Brundage or his sub-contractors under the contract held by him for timber to be delivered to the Welland Canal Companyhave also entered the notes, names and sub-contractors, when got out, length and breadth of each stick, and where deliveredone of the books of the canal company, and said book delivered to W. H. Merritt, Esq.

I remain,

Geutlemen,

Your most Obd't Humble Serv't. JAMES CLOWES.

P. S .- The timber got out is as under:

194684 5 + 7698 4 = 202,382 9 amount total.

## Specification for the proposed Tunnel upon the Welland River

This part of the work to consist of a subteraneous passage or mine, 16 feet 8 inches in width by 16 feet in height, to be excevated from the Southern termination of No. 1 Section, extending in a direction 12 ° W. of North, for a distance of two miles, terminating 44 yards North of the Welland River.

The internal surface of this tunnel to be properly secured with well seasoned and connected timber, free of shakes, of the following dimensions:

The pavement or bottom frame work to be of plank 16 feet 8 inches in length into 12 by 6 inches in thickness,—the inferior surface had flush six feet under the surface water of the Chippawa river and properly bedded in the levelled bettom, of the tunnel.

The side posts or uprights to be firmly indented into the bottom timbers or sleepers twelve inches upon the face, by 10 inches in thickness, and 12 feet in height, placed so as to support augular rathers each 9 feet in length, pitch 4-1-2 feet—the particular mode of uniting the timber work may be seen by an examination of the accompanying elevation.

Know ALL MEN BY THESE PRESENTS, that we, the President and Directors of the Welland Canal Company. (for, and in behalf of the Stockholders of the said Company) in the District of Niagara and Province of Upper Canada of the one part, and Theophillas Brundage, of the Township of Grantham, District and Province aforesaid of the other part, have entered into an agreement this

day of December, one thousand eight hundred and twenty

The said Theophilus Brundage doth hereby covenint, promise, and agree to and with the said President and Directors as aforesaid, that he will deliver, at the Shafts and Tunnel Mouths of Section Number two on the Welland Canal, all the timber which may be wanted for the Tunnel, in such proportions as may be required, the same to be procured from good sound pine, or white or swamp only, to be fresh and firm, free from shakes, large knots, and every other defect, to be all ready framed to any pattern furnished by our Engineers. Posts and rafters to be ten inches by twelve inches wide and thick—the sills to be six by twelve inches, and will be received if taken from any firm wood—back side of posts may be one-inch leaning or bend-edged. The afters to be taken from the body of the tree, and in no instance from the top, to be the best of timber, the length to be for posts 12 feet, sills sixteen feet eight inches, rafters nine feet, as per Mr. Hall's specified tion, the same to be altered at any time by paying in proportion for other dimensions. The timber to be all inspected by any person the Company, their agent, superintendent, or engineer may appoint. The timber to be all cut or felled in the months of January, February and March, when the sam is out of the tree, and to be delivered as soon as may be required. And further, in case the Company should alter the size of tunnel, or meet with any obstruction, we are only to pay for the quantity of timber, then delivered, and a reasonable price for what may be on hand, and the expenses incurred.

In consideration of which, the said President and Directors of the Welland Canal Company, doth hereby covenant, promise, and agree to and with the said Theophilus Brundage, to pay him for all timber so delivered at the following rate, viz: eighteen shillings, Halifux currency per hundred feat for all the timber so delivered on the south half of said tunnel nearest Chippawa, and nineteen shillings and eleven pence furthing for all required on the north half of said tunnel, to be fromed and delivered as above inputioned.

The payments to be made for all delivered monthly, reserving for the first six months one quarter in each monthly payment, and one eighth per month thereafter, until the whole shall be delivered, when the arreavages, or reservation, shall be all paid up.

For the due performance of which, we bind ourselves each to the other, in the penal sum of One Thousand Pounds, lawful money of said Province. As witness our Hands and Scals the day and year above mentioned.

In presence of

THEOPHILUS BRUNDAGE, [L. S.] GEORGE KEEFER [L. S.]

President W. C. C.

THOMAS MERRITT, GEORGE KEEFER, Jun.

761. Did not Mr. Mackenzie on the 21st of October last, at the time I assented to call the Board, promise to furnish me with a copy of the items which composed the defalcation to which he alluded in his letter to me—that I might examine the same on the day after, prior to the meeting of the Board which was called on the 23rd of same month?—He did.

762. Was not the presentation of those items delayed until the day the Board met?—I understood the arrangement between Mr. Mackenzie and yourself to have been that he (Mr. Mackenzie) should have handed you the list of items on the morning of the 22nd of October, at which time you called, but did not obtain them.

763. Were they not presented to the Board on the 23rd in the handwriting of Mr. Hall, and did you not believe they were the same he had previously agreed to present me on the 21st October — Mr. Mackenzie brought them before the Board on the morning of the 23rd, and I believe them to be the same that he agreed to deliver to you on the 22nd for your examination previous to the Board meeting on the 23rd.

764. Did not the Board pass a resolution requesting Mr. Mackenzie to return the paper he had handed in previous to the investigation of the books by Burns and Bowery, and did he comply with their request?—There was such an order passed, and I wrote to Mr. Mackenzie in duplicate informing him thereof, but he did not comply with their request.

## [BY MR. MACKENZIE.]

765. Mr. Merrit has just asked you whether you did not know that errors existed in the books, and whether it was not your intention to examine and correct such errors: to which you reply, that it was, but that I occup ed your clerk, Beaton's time. Why did not you correct the errors (as you cell them) of 1832, '33 & '34, before I came upon the canal in May 1835?—I always admitted that there were errors in the hooks that required correction, but had not sufficient assistance in the office to do so until Mr. Beaton was appointed, and he was so continally employed we had not time to go into them.

766. Why then did you state to the Directors in 1834, when they were prepared to employ Mr. Raincock, that you could put all to rights without them?—Because I supposed at that time it could be done, but from the pressure of business in the office it could not, and was allowed to lay over.

767. Had not two of you in the winters of 1832, 1833, 1834, and 1835, when the canal was closed, and business standing still, time enough to correct these errors and enter accounts?—There was not two persons constantly employed during the time mentioned, and there was not time enough to attend to it. I never had sufficient assistance allowed mein that office until the appointment of Mr. Beaton in October 1834.

768. When I was appointed to examine the books, and correct what was wrong, why did neither you nor Mr. Beaton shew these errors to me, and did I not ask you often enough?—Mr. Beaton was constantly employed with you in the office, Sundays and week days. Upon your notion at the Board Lobtained leave of absence to visit Lower Canada—P left some time in the month of September. My time of departure was delayed in consequence of your examination of the books. Up to the period of my leaving I am not aware that you pointed out one single error in the books—The books and papers were constantly in your hands; on my return from Que-

bec on the 20th of October I found much confusion in the office, and as far as you pointed out any errors to me I readily admitted them. On the 23rd and 24th of that month the Board met, scaled up the books and accounts, and you left St. Catharines.

769. I ask you as Secretary of the Company whether for several months after I came on the Canal I entered into any examination of the books of account whatever, except such as more immediately came before the Board for adjustment?—I do not know that The books and accounts were in your possession, and you with Mr. Beaton were going on with some examination, what you were attending to I do not know. By an order of the Board you had all the documents of that office thrown open to y uthat is, only the official books and papers of that Company, and not Mr. Merritt's private papers.

770. When I had shewn the Directors, yourself, and the President, a number of improper entries and charges, and pencil marked them on the books, why did you, Messrs. Burns, Bowery, and the Directors, Mr. Thorburn excepted, declare that there were no material errors, and on the Report of Messrs. Burns and Bowery, adopted by the Board, expunge the resolutions I had moved, and declare all right?—There is an order of the Board to that effect, but I was no party to the same. I am not aware that I pointed out any errors to the examiners appointed by the Board. I did not interfere with them. They had your remarks on the books to lead them. Mr Beaton the book-keeper being in the examination with you, had it more in his power to point out errors to them than I had.

771. Acting as Secretary and Treasurer did you find these errors affect the cash in your hands? had you too much or too little at any time?—I never had too much, and very often too little.

772. When I was over at St. Catharines in Oct. last, I observed that £246 0s. 8d. expended on the St. Cutharines feeder, was twice charged to the Company, which double charge has been since rectified by a corresponding entry by Messrs. Young and Hinks the accountants. But of that money I perceive £10 were paid (as it is said) to W. Anderson, in June, 1832, covered by an estimate of the 1st of There was no estimate in Au-August that year. gust, and I should like to see one; John Johnson receives an advance in August of \$50 and upwards, but I can find no estimate, R. Maguire gets \$50 1st of August, but there is no estimate, although your books refer to one. Again, Oliver Phelps gets an advance of £75. May 1st, on aqueduct. Was this advance of £75, May 1st, on aqueduct. one of the series of errors you knew of and did not feel called on to point out!-I answer this question by saying, that I have been always prepared to admit any errors in the accounts coming to my knowledge, and I have also said there was errors which were to be rectified.

773. I have understood that you sent to Messrs. Smith & Macey of Buffalo some weeks ago to obtain some vouchers, in proof of the loss of £447 17 10 by the Peacock, for which alledged loss you exhibit no voucher or detailed account—are you yet prepared

to shew that items of the charge on that Company!—No satisfactory answer has as yet been received owing to Mr. Macey having gone to visit Albany. I know the charge is a correct one.

774. When you lent a sum of the Company's money, I think it was about £180 to Mr. Burns, one of your accountants; without any order of the Board, you exacted about £18 or \$20 of interest thereon, but did not enter the same on the Company's books for months after nor until after I had complained of the transaction—why was this ?—It was an unin entional omission—It was an express understanding that Mr. Burns should pay the interest of that sum—the principal and interest have since been accounted for to the Company by Mr. B. and no loss sustained.

775. You have been asked to produce the vouchers for the payments to Brundage for his timber, £1,340 17s., can you inform the Committee why no part of the proceeds of that timber is accounted for on the Company's books?—This was not a transaction during my time, I therefore know nothing of it.

776. In whose possession is your bond to make good defalcations? and what is the amount? and who are the securities?—The bond is in the possession of the President of the Company—the amount £2,000, myself in £1,000, and two sureties of £500 each—the sureties are George Adams and Henry Mittleberger, Esqrs., of St. Cutharines.

777. I see that you have no receipts to slew that the Captains of vessels knew, profited by, or received the sums for which you have taken credit as for detention of vessels in 1834. Why were receipts neglected that year more than other years I—I have answered that question in a former answer. The Collectors received credit on their toll returns under the authority of an order of the Board.

[Witness withdrew.]

JOHN McALPINE CAMERON, Esq., Book-keeper to the Canada Company, called in and examined.

778. You were requested by the Chairman of this Committee to examine the books of the Welland Canal Company to ascertain whether the sum of £474 17s. 10d. paid by the said Company for a loss on the steamboat Peacock, and the £200 paid to J. B. Yates, Esq., were twice charged against the funds of the Company, will you have the goodness to state to the Committee the result of your examination, and the mode you pursued to arrive at your conclusion !- As my attention was only called to particular items, that were said to have been twice charged in the Journal, and in order to ascertain the effect these charges would have upon the funds of the Company, it was necessary to investigate the whole transactions for the years 1831 and 1832,—the items that were said to have been twice charged were taken credit for in the expenditure of £50,000 drawn from the United States Bank at Buffalo. I then was referred to the entries said to have been charged a second time, and to the best of my opinion I considered them only a restatement of those cutres as I think will appear by the following:-

### [By Mr. Mackenzie.]

779. Have you met with the other accountants and shewn them the conclusions you arrived at, and the reasons you had for the conclusions you formed ?—No. [Witness withdre v.]

C. S. Murray, Esq., Book-keeper to the Bank of Upper Canada, called in and examined:

The Clerk, by order of the Committee, read to witness the evidence given by Mr. Cameron.

#### BY COMMITTEE.

780. You have heard read the question put to Mr. Cameron and his answer thereto, do you concur with him in his opinion?—I agree with Mr. Cameron in every particular—having personally joined in the investigation, alluded to by Mr. C.

[Witness withdrew.]

Col. Elliott, of Sandwich, called in and examined.

[By Mr. Merritt.]

781. Was you not a member of the House of Assembly in 1833, and appointed a Director of the Welland Canal Company on the part of the Province, together with William Chisholm and Charles Duncombe, Esquires, and did you not enter into an arrangement with Mr. Yates for the re-purchase of the Hydraulies, and what was your motive for doing so — I was with Messrs. Duncombe and Chisholm by a resolution of the House of Assembly appointed a Director of the Welland Canal Company during the session of 1833, and 1834. The strong feeling which appeared to prevail in the minds of a majority of the members of the House of Assembly at that time appeared to me to make it desirable that the

Company should re-possess the Hydraulic power and property, which had been sold by the Company to Mr. J. B. Yates. Having been notified that a meeting would be held on the first Monday in June 1834, for taking the subject into consideration, I attended with the other Government Directors, when by an order of the Board Messrs. Chisholm, Duncombe, and myself were appointed a committee to examine and report upon the propriety of re-purchasing from the Hydraulic Company the surplus water and privileges together with the land heretofore sold by the Welland Canal Company. I refer to the original report, which I understand has been already given in, as my reasons for advising the re-purchase.

[By Mr. Mackenzie.]

782. Are you aware that although Dr. Duncombe and the other Government Directors agreed to the re-sale of the Hydraulics, it was only provisionally, in case the Assembly was content—that the Assembly never sanctioned the proceeding—and that Dr. Duncombe was chairman of the Welland Canal, committee of last session, associated with Mr. Merritt and others, who recommended further inquiry before further steps were taken?—I was one of the committee appointed by the Board of Directors to report on re-purchasing the Hydraulic privileges.—At that time the Board, after receiving the report, agreed to repurchase the Hydraulic privileges, no mention was made of any reference to the Legislature—I think afterwards the President suggested it and Mr. Yates agreed, and that if not approved of by the Legislature he would return the Debentures upon the property being restored to him upon the same conditions that the Company received it from

him. With respect to the latter part of the question,

I have no knowledge but from hear say.

783. Supposing that Mr. McDonell and Mr. Yates had paid nothing at all on their purchase, sold part of the lands, and kept the money, received the rents of water power on the line for years, kept possession of the great mill sites, and water power at Allanburgh, got a deed of the town plots at Gravelly Bay, and received £17,500 in bonds of the Welland Canal Company bearing interest, in order to induce them to give back the remainder of the lands and water power, would you consider it a transaction that ought to be sanctioned by the country !- The balance of the property might have been worth the purchase money, even then.
784. Wherein did the bargain of the Canal Com-

pany for the re-purchase from the Hydraulic Company of the water power and part of the lands differ from the facts assumed in the last question you have answered?—They do not differ—I will state that the re-purchase was to the advantage of the country and the company for the reasons given in our report

of 7th June, 1834.

Mr. Keefer again called and further exam ned. By Mr. Merritt,

785. It appears there is a receipt produced in the hand writing of Mr. Clark, with no date attached thereto, signed as follows with a cross.

WILLIAM X ORDERLY,

which receipt is endorsed by you as followsand appears charged by the Secretary on 19th June, 1832-did you pay the above, and under what circumstances !- There was a certain sum of money ordered by the Board in 1832 as an advance to contractors on the new line, which sum, together with blank receipts, were sent up, of which this receipt of £100 for Orderly's signature was included-you paid a part a day or two previous leaving a statement with me-\$150 to Orderly was one of the items;when I presented the blank receipt which was in the hand writing of Mr. Clark I entered on the back the \$150; also \$250 balance he acknowledged having received to the \$150 paid by you-I paid him the \$250 balance, and took his receipt for the whole amount—It was signed with a cross in my presence, and the presence of his wife,—his name was written by myself, but the date omitted.

786. Mr. Mackenzie states Mr. Keefer, Senr. is \$50 richer by his letter to Mr. Barrett in returning estimate for timber-explain this transaction to committee, and shew the effect on general estimate?-Mr. Keefer had a contract with Mr. Phelps, to furnish a certain quantity of timber for the locks at three

different prices in 1825, viz :-

For Back Timber, \$31; Face do, \$4; Gate do, \$5. It matters not at what price, the Engineer returned the timber, as it was merely an advance on the contract, and no advantage in this case could be taken of the Company-nor in any way affect the general estimate, and Mr. Keefer could not have been a gainer by having more returned one month than another. [By Mr. Mackenzie.]

787. In one of your letters to Mr. Merritt you say that the same iniquitous practice of filling in logs in the Berm Bank is continued—and in your answer to question 733 that the Company will be no losers, is there not a loss where work is improperly done?-

The letter I wrote is true—and I think if work is improperly done there is a loss to the Company Those logs which I saw have been removed at the

expense of the contractors.
788. Do you mean to say that nobody could be got in 1833 to take the responsibility of opening and shutting a lock at Gravelly Bay except the Piercon-tractor?—There was great difficulty in getting per-sons to attend on the canal at that time—it was immediately after the Cholera. Thomas Merritt was desired to take charge of the lock, he being the only responsible person at that place.

789. Do you know the reason why it has been found necessary to pass a law in the State of New York to prevent managers and agents on canals from being concerned in mills and machinery on the line.

790. You express an opinion that the Welland Canal is benefitted by the Directors being concerned in mills and machinery. What is the chief purpose for which the canal was made?—To open a water communication between the two lakes. The cree tion of mills assists in drawing produce through the canal, and consequently increases the tolls thereon.

791. Let us see the calculation on which you have framed a reply to question 702, and tell us what particular sums you mean by advances?—I took it from the estimate book,—I took the number of yards excurated by Mr. Phelps, and the sums opposite, adding the \$30,000 given up by the Company, dividing that sum by the number of yards, which produced the result I have stated.

792. Let us see the calculation and the sums, and state the order for giving up \$30,000 to Mr. Phelps ? -I submit a statement to the committee of the calculation required.

Statement showing the several estimates of work done by OLIVER PHELPS, on the Deep Cut, and the average price paid him per ward on the whole,

GEORGE KEEFER, Jun.

Toronto, March 10, 1836-

794. Who judged of the absolute necessity which you say in answer to question 700 always existed when you varied contracts?—The Engineer should have been the best judge of course.

795. What is it you call "Public Notice" of contracts in your answer to question 699? How many newspapers did you advertise in? How many hand bills did you print?—It was not always the practice to advertise in the public papers. It was conceived to be the best way to give information by sending written notices generally, throughout the line, and in all public places. All important lettings I think were advertised in the papers, and small contracts were generally given out by written or printed notices.

796. What is your authority for the statement you have made in your answer to question 693?—I have it from information. I know that errors may be supposed to exist in such cases, when in reality they do not, I have already stated to the committee in what manner errors do occur.

797. You say that the lowest proposal for the Berm Bank was, 14 cents from Thomas Merritt, and 16 from John Aikins. Did you advertise the contract in the public papers? or did you consider that

an important contract ?—I cannot say positively from want of recollection whether that contract was advertised in the papers or not.

798. What is the date of the order of the Board to which your answer to question No. 647 has reference?—I do not know the date, but I have it in a letter of instructions founded upon that resolution, transmitted to me by the Secretary.

799. Was the estimate of November 1832, kept open after it was approved by the Board?—I refer to my answer to question No. 697.

800. Do you mean to say that the Board passed estimates in blank of the amount of £28,000 and upwards, and then left the engineers or clerks to determine the sums without any further action of the Directors?—The estimate was not finally passed, but merely kept open until all matters relating to the new line were finally settled.

801. How do you reconcile this answer with the minutes of the Board which state that the November estimate was passed by the Board? and with the signature of the officers affixed thereto—the amount in your hand-writing being £28,483 11s. 11d.?—That is correct as far as it goes—but before there could be a final settlement of all the work on the

new line, it was necessary to keep the estimate open for some work then doing by Donaldson & Co. and the settlement with Garrison & Little. The abstract shews the total amount of the November estimate, and the additional items allowed by the Board to Donaldson and Garrison and Little.

802. Then will you refer to the order of the Board on £700 of additional charges not entered by you in the estimate book until 1835, when I was over ?-1 know of no such order, the original estimate contained those items.

803. As the full value of the section or contract done by Galbreath is entered on the November estimate of 1832 in detail, why have you entered several hundred pounds more to Donaldson since on that contract, although an extra £50 is allowed to Upper and the sub-contractors since paid by notes of hand out of the balance due and unpaid at that time? The abstract shews the entire expense on the new line. I have already stated why these sums were added to the estimate.

804. When you added the November estimate and made an abstract, why did you not detect your own errors of addition. I see \$100 fulse addition by you in one page, and other false additions, why were you not more careful before you certified, and before you allowed the Vice-President to certify?-If there are errors, they existed without my knowledge-the Secretary also examined the estimate, the abstract corrects any error that may have been made so that the Company have not sustained any loss thereby.

805. Referring you to the answer you have given to question No. 721, where you deny one of my statements in Charge 13, I now beg to remind you that on the 4th of June last you were examined by Mr. Thorburn and myself, as follows:

"What articles of the Company's did Thomas Merritt & Co. "take at Port Colborne at a fair valuation in pursuance of their "contract of September, 1832?" Mr. Keefer read a list of articles from a memorandum book, and was then asked—"Did "Thomas Merritt & Co. complete the contract at the time specified?" Ans: "They did not—they were dispossessed—they gave up—and Thos. Merritt took it alone, and the time was "extended under the same contract."

Have you since found reason to change these answers ?-If I gave such evidence, it was not correct -I said Garrison and Little did not fail, at the examination you refer to—The Pier contract was not finished at that time.

806. Shew by the books that the system first adopted by keeping contractors' accounts in detail has been kept up?—I refer to the Secretary for that

807. When was the special meeting held at Gravelly Bay at which Mr. Merritt was authorised as Secretary to sign the contract of Thomas Merritt and others, without using the seal of the Company or the signature of the President?-The 20th September, 1832.

808. Your father's timber appears to have been given in by Phelps monthly to the Company, and Mr. Barrett the engineer enters the timber at a higher price than your father estimated, he being then a member of the Board. I perceive that in consequence of these monthly statements, Phelps got beween \$3,000 and \$4,000 for locks contracted for at

\$2,200—Can you explain this?—My father was accountable to Mr. Phelps only, for the timber, and was governed by the contract with him.

[Witness withdrew.]

THURSDAY, 5th April, 1836.

Committee met.

JAMES EDWARD SMALL, Esquire, Chairman. Messieurs Chisholm,

Gibson, McDonell, Parke, Roblin. Shaver, and Thorburn-8.

Mr. Mackenzie proceeded in summoning up the evidence adduced in support of his charges against the officers of the Welland Canal Company and con-

Doors closed.

Doors opened.

Adjourned till 5 P. M. this day.

At 5 o'clock, P. M. the Committee met pursuant to adjournment.

PRESENT.

JAMES EDWARD SMALL, Esq. Chairman.

Messieurs Chisholm, Gibson. McDonell, Parke, Shaver, Sol. General, and

Thorburn-9.

The chairman reported having received a communication from Messrs. Cumeron and Murray, which was read by the clerk and is as follows:

TORONTO, April 2nd, 1836.

To the Chairman of the Committee on the Welland Canal Affairs.

In compliance with the following letter which you were pleased to have addressed to us, viz:

"Committee Room, House of Assembly,"
"March 19th, 1936."

"I am directed, by the Committee appointed to investigate the affairs of the Welland Canal Company, and request you will have the goodness to give them your attendance this afternoon, at 4 o'clock, for a few moments, as a dispute has arisen be-tween the book-keepers upon the subject of an item of £700, upon which they desire to have your opinion.

"I have the honor to be

Your oberdient servant,

JAMES E SMALL, 生长产品的

"Chairman."

And on the question being submitted to us, whether the sum of £447 17.10, paid for a loss on the charter of the Steam Boat Peacock, and a sum of £300, paid J. B. Yates, Esq., as stated in the journal of the Welland Canal Company, had the effect of being taken credit for twice in the expenditure of the funds of the

Welland Canal Company, or not, we, in order to ascertain the fact, took into consideration the whole amount of funds which the Welland Canal Company had during the period of 1831 and 2, comprised in the sum of £50,000 drawn from the United States Branch Bank at Buffillo, and the sum of £2,432 7 8, received for tolls during said period, and upon a minute investigation of the expenditure of said sums, we had the opportunity of seeing clearly the enries in the Journal were not intended to have the effect of a double charge upon the funds of the Company, but only a statement to show the appropriation of the tolls only, and the error committed was in giving said statement the form of a Jour-onl entry, because were it otherwise, if the sums in said state-ment were contended for by the officers of the Welland Canal Co, as items of expenditure for which they were outilled to credit Co. as froms of expendinge for which they were cuttien to creat the amount of such entries, would be not only £747-778; [0d., 1 if £1,123] 1s. 2d., which sum we found necessary to deduct from the amount so stated as having been expended from the tolls as the items comprising said amount of £1,123–1s. 2d. had been paid from the £50,000 received from the United States Branch Bank at Buffulo, which upon reference to the cash account drawn has been as a sufficient of the paried of [831]. up by us of the receipts and expenditure during the period of 1831 and 1832, and submitted to the Committee, will show, and we must decidedly give it as our opinion, that no defalcation on the part of the officers of the Welland Canal Company exists for the expenditures of inputes in their hands during said period of 1931 and 1832, but on the contrary there appears to be a balance due the Secretary of £41, 44; and should Messis. Hinks and Young still persist in their being a defalention upon the whole transactions of the Company, we are of opinion that they should submit a statement of the items in which they are led to sur pose the defalcation exists, and we shall be most happy, so far as may be in our power, to give it due consideration for the sake of all concerned, for it would be grievous indeed to have any person suddled with the operation which mistaken entries would effect, and this, our opinion, we most respectfully submit.

We have the honor to be,

Your most obdt. servants, JOHN M. A. CAMERON. C. S. MURRAY.

The Chairman reported having also received a communication from Mr. Clark, Secretary, W. C. C. which was read by the Clerk, and is as follows:-

COMMITTEE ROOM, HOUSE OF ASSEMBLY,

April 4th, 1836.

To the Honorable the Committee on the affairs of the Welland Canal Company.

GENTLEMEN:

You are informed by my cyldence, taken before your honorable committee, that I have given two responsible sureties, who are liable for any defairation of the funds of the Welland Canal Company passing through my hands, as Secretary of the Company.

Your honorable committee appointed two gentlemen, Messrs. Hincks and Young to examine the books of the Company upon Mr. Mackenzie's charges against the officers:—these gentlemenstate to question, put by Mr. Mackenzie, No. 300, that the sum of £300, paid to Mr. Yates, and the sum of £447 17 10, for a loss on the Steamer Peacock, are twice charged against the funds of the Company.

of the Company.

In my answer to questions Nos. 478 and 525 put by Mr. Mackerzie, I deny that the sum of £447 17s. 10d. to the Peacock, and £300 paid to J. B. Yates, Esq. are twice charged against the funds of the Company—My crosons for forming this opinion were from my own personal knowledge, that those sums were in the first instance paid out of £50.000 received from the U.S. Bank Buffalo—being a loan from the government—and which the Company were probabilised by an act of the legislature from spending Bullino—being a total trom the government—and which the Company were prohibited by an act of the legislature from spending otherwise than for the purpose of the canal—In consequence the amount so taken for the Pencock and Mr. Yates was made good. amount so research the  $\pm 50.000$  from the foll fund of  $\pm 1832$ —and those items  $\pm 447$  17s. 10d. and  $\pm 300$  was charged against

the tolls of that year.
Thuse items of £447 17s. 10d. and £300, having been made a question between your accountants Messrs. Hincks and Young and those charged with the defalention—Your Honorable Committee promptly referred the question thus at issue to the examination of Messrs. Cameron and Murray, accountants employed

in the Canada Company's Office and Bank of Upper Canada in the Canada Company's Onice and Bains of Upper Canada-alter a careful examination of this matter those gentlemen presented a report to your committee which corroborates my tes-timony on your records and herein referred to, that those sums of

thiony on your records and herein referred to, that those sums of £447–17s. 10d. and £300, are not twice charged against the finds of the Company—as would appear by Mr. Hinck's evidence to be included in the sum of £1000 for sums twice charged to the Company, or for which credit had been improperly taken by the officers—see question No. 686.

My object in presenting this statement to your honorable Committee is to request that if you are not perfectly satisfied that the sums alluded to have been only once charged against the furtheous the your honorable committee will suspend any opinion on the subject until an opportunity is afforded me of a turther investigation, as I feel confident that notwithstanding the irregularities of entries and errors always admitted by me, there exists in defaltion, as I feel confident that notwithstanding the irregularities of entries and errors always admitted by me, there exists no defalcation of the funds or the Company in so the is I may have been entrusted with their expenditure. I have further to state that one of your accountains, Mr. Young, repeatedly informed me that on an examination, if the sums of £447.17s. 10d. and £300 were not fond twice charged against the finds of the Company, it would reduce the balance said to be unaccounted for as those counts avere included in that balance of £1000 for sums twice. sums were included in that bulance of £1000 for sums twice charged against the Company, or for which credit had been improperly taken by the officers.

> Lam very respectfully, Gentlemen, Your obedient and humble servent, JOHN CLARK, Sec'y W. C. C.

Mr. HINCKS again called and further examined. [BY COMMITTEE.]

809. Have you any thing to offer to this committee in comexion with the evidence and statement given in by Messrs. Murray and Cameron? - Messis. Murray and Cameron state that the \$300 paid J. B. Yates, and £447 17 10 loss on Peacock, are not twice charged on the Company's books, and to prove this they submit a statement accounting for the £50,000 received from the United States Eank and the toll of that year, amounting to £2432 7 84. Their statement professes to be a correct statement of the way the monies in question should be entered, but it is certainly not the way they are entered on the Company's book-I submit the following statement [No. 1.] of the way the entries are mude on the Company's books, by which it will appear that the entries above mentioned were made twice, although the toll accounts, as it spipears, were also credited twice over with the debts, and the £1170 17 41 paid in 1832. This of course would, us the books stood, have prevented the donble charge being any gain to the officers, as they overcharged themselves on the other side, and that take of the entry—I have put in the above statement and made the above remarks to show that I am correct in saying the sums are twice charged and legerised, although as those gentlemen state it cannot be a defalcation. I now proceed to shew the effect the entries mentioned had upon the Looks. Mr. Young and myself took the same view that Messrs. Murray and Cameron have done of the toll entry, and conceived it was necessary to make a cash account to shew the proper result. We told this to Mr. Beaton, and he was present and assisted us in making them. We accordingly debited cash with the whole amount stated to have been collected deducting the £1170 17 41 and the £500 14 54

before at the credit of toll charging cash with £760 15 10. We then proceeded to credit cash with the payments, and here we looked to the gross amount stated in the entries at the end of 1835, Journal 234, and credited cash with the sum of £1569 11 113, which, as appears by Messrs. Murray and Cameron's own statement is £76713 13 more than was paid, or indeed than they had funds to pay-for I admit that the statement put in is correct, and that all their monev in that year appears to have been expended; I shall now state to the committee the effect of this. over credit :- In our appendix the cash account is debited with sundry sums which the officers had to account for-say the Grand River money and other smaller sums, as will appear by a reference to the account; now by our crediting cash with the above sum it turned the balance in favor of the officers in our original statement. In our investigation into the account afterwards we found that by the above sums being charged improperly on the Company's books a second time in December 1835, we had given the officers twice credit for them, and that consequently we must deduct the difference between what we had over credited them in consequence of their improper entry and the amount really expended, in which we agree with Messrs Murray and Cameron. The following statement [No. 2.] shews the correct cash account of the toll of 1832, and it will be found to agree with Messrs. Murray and Cameron's statement, after deducting both from the receipt and expenditure £500 145\frac{2}{3}\$ which is the amount of debts for toll, and which these gentlemen erroneously included in the expenditure. The committee will thus perceive clearly that the balance against the officers, and unaccounted for, remains precisely as we before stated.

810. After the examination you have made of the books of the Wellaud Canal Company, can you state with any degree of certainty whether there is a defalcation on the part of the officers, and if so to what amount, or might not any apparent defalcation at present be satisfactorily accounted for upon a general investigation of the several accounts of the Company, and if so, how long would it take you with another accountent to go through the entries of the Company from the commencement of their operations?—I have no doubt, from my examination of the books of the Welland Canal Company, that there are defalcations the particulars of which are fully

stated in a paper which I here put in [marked A.] It is possible that these defalcations might be accounted for, but it would only be by finding new mistakes, or sums paid which have not been charged. To examine the books in such a way as to arrive at any thing like truth would in my opinion take many months, and from the incorrect way in which they have been kept I do not think it would be possible everto come to a satisfactory conclusion on them. The items of which the defalcations are composed are all either sums charged twice, or improper credits allowed, or sums paid to persons and not charged to them.

# A. STATEMENT OF THE ITEMS OF DEFALCATION.

The amount unaccounted for on the General Cash Account—(Sec statement hereto appended No. 1,)—is  do. do. on the toll and forwarding of 1830 and '31, ( Do. No. 2,)  do. do. on do. do. 1832 ( Do. No. 3,)  do. do. on do. do. 1833 ( Do. No. 4,)	£ 378 0 5½ 273 0 11 124 5 10½ 25 10 6½
Over charges and over credits—(See Statement No. 5.).  From which is deducted £76 8s. 6d. of Campbell, which has been paid under an order of the Board, although there is no satisfactory reason why it should be. Also £23 15s, which Mr. Black has been able to explain. Besides these sums there are others at the debit of individuals amounting to—(See Statement No. 6,) which sums were not charged to them before December, 1835.  In all, the loss which the Company appears to have suffered is.	360 17 93 560 16 1 362 17 2 1724 11 03
Since my last evidence was given the Officers of the Company have found out in a Petty Leger, sundry sums which appear to have been paid and not charged:  For sundry claims£97 10 3  For which are no Vouchers,  Short credited to cash	
This sum should be deducted from the balance on the general cash account of	266 6 0 378 0 5½ 111 14 5½

- 811. Have you examined all accounts on the books of the Company to ascertain their correctness, or have you only particularly examined those accounts pointed out to you by Mr. Mackenzie, and have you so come to your conclusions without going into a general examination of the accounts? I of course presumed all the entries on the books to be correct, and was only appointed to attend Mr. Mackenzie, I therefore only examined as to the correctness of such accounts as he pointed out. One of the officers of the Company was generally present at our investigations—many errors were found which were in favor of the officers of the Company, for all of which we gave them credit.
- 812. Is it your opinion that the books of the company have been kept in a manner that would lead you to suppose any fraud was intended by the officers in charge?—I certainly do not suppose that the books were kept with intent to fraud, I think the errors were caused from the book-keepers not being thoroughly versed in accounts, particularly during the year 1833.
- \$13. Can you state that any defalcation exists in the time of Mr. Black or Mr. Clark?—I think it almost impossible to separate the transactions of the different Secretaries—the toll account of 1830 and 1831 is the only account which I could say decidedly Mr. Clark was responsible to account for.
- 814. Have the officers of the Company ever attempted to influence your decisions on the accounts?

  No.
- \$15. Is there any other item except £95 10 4 on the account of Mr. Phelps which has not been properly accounted for by Mr. Black prior to 1830 1—1 think not.
- 816. In your answer to question No. 357 a case is stated—(assuming salaries are regularly paid) as you have seen the manner in which the account was kept and entries made—do you think that answer properly applies to the case of Mr. Merritt?—I do not think from the way Mr. Merritt's account appears to have been kept in the petty Leger, that my answer to the question alluded to, at all applies to him.

[Witness withdrew.]

WILLIAM HAMILTON MERRITT, ESQUIRE, M. P. President of the Welland Canal Company, called in and examined.

[BY COMMITTEE.]

817. Did you ever pay Orderly more than £12 10s, and if so did you take receipts for the monies so paid him?—I paid him besides the £12 10s \$100, left a statement of it with Mr. Keefer, the Engineer, and requested him to pay the remainder, to the amount of £100, and to take his receipt, which he did (as he received from Mr. Clark in the Canal office in blank,) and regularly obtained his (Orderly's) acknowledgment for the whole amount, as per his receipt, which has been produced to the committee by the Secretary of the Company.

[Witness withdrew.]

Mr. Hincks again called and further examined.

[By Committee.]

S18. Did you as the Book-keeper appointed by this committee examined all accounts required of you as well on the part of any of the officers of the Company as on the part of Mr.Mackenzie?—I proffered a willingness to examine any accounts in which the officers had found an error, with a view to ascertain its correctness, but I did not attempt to go into a general investigation.

[Witness withdrew |

Mr. Merritt again called and further examined.

[By Committee.]

819. Do you think if more time were allowed the officers of the Company they could produce other evidence than that given in the account for the apparent deficiency of £1458?—I understand from the Secretary and Book-keeper of the Company that a part of the sum which composes this deiciency is now properly charged to individuals, and against only £534 is now apparently made to stand against the officers of the Company—I feel perfectly satisfied and quite sure that on a further and more general investigation, the whole can be properly accounted for by them.

[Witness withdrew.]

Mr. Hincks again called, and further examined.

[By Commettee.]

S20. Can you, from the manner in which the Books of the Company have been kept, impute fraud to any one connected therewith?—I have already stated that I really do not think that any fraudulent intent can attach itself to any individual connected with the Books of the Company.

[Witness withdrew.]

Mr. Young again called, and further examined.

[By Committee.]

S21. You have heard the last question put to Mr. Hincks, do you concur in his answer?—I do most unhesitatingly.

[Witness withdrew]

The Chairman reported having received a communication from William B. Robinson, Esquire, M. P., which was read by the Clerk, and is as follows:—

House of Assembly,

Toronto, 29th March, 1836.

JAMES E. SMALL, Esq.,

Chairman Welland Canal Committee,

Sir,

In reply to the various charges made to your Committee by W. L. Mackenzie, Esq. in relation to my accounts and vouchers for the expenditure of the sum of £7,500, intrusted by the Legislature to Messrs McAulay, Shade, and myself, I beg to make the following statement:

In the first place, I wish it to be clearly understood that the whole management of the Welland Canal for the year 1833, so far as putting it in repair, was by the Company thrown on the three Commissioners above named; and subsequently by them upon myself, it appearing absolutely necessary, that one of their number should immediately after appointment repair to the Canal, and personally superintend the work in progress, in order that the first wish of the Legislature should be complied with, which was to have the Canal in order for navigation and use by the earliest possible period. I agreed to take upon myself the arducus daty, and superintend the repairs and expenditure of the money for such remuneration as might be thought adequate and reasonable; having done this, my fellowCommissioners of course were relieved from all, except occasional attendance, as to the repairs, and I consider totally as regards the expenditure of the money. I will here beg leave to draw the attention of the Committee to the situation in which I found myself placed:—Upon visiting the Canal in February with Mr. Shade we commenced at Port Dallousie, and from that place carefully examined every part of the Canal to Gravelly Bay and Dunaville, taking a memorandum of the necessary work to be done on both routes. On our return to St. Catharines we entered into contracts where accessary, for various repairs—some of the most extensive had already been commenced by the Company before the commission to us issued—continuing them in the hands of the same contractors gave me much trouble in keeping the accounts, and caused some of the errors in them.

The Committee will, I am sure, readily acknowledge that the duty thus devolving on me was one of great importance and anxiety—I was there a stranger to the business I had undertaken, with all the responsibility of having the Ganal in repair early, resting upon myself-all persons applying to the Company for in-fortation on this head, were referred to me, and I soon became aw e, from the number and enriestness of these applications of the necessity of using every possible exertion on my part not to disappoint public expectation—how far I succeeded the Report of the Commissioners made at the close of the season, which I herewith transmit, will show. I have the satisfaction of knowing that I succeeded for beyond the expectations of many who visited the Cunil, and were capable of judging; and I would here remark that I received at all times every assistance from the President of the Company, Mr. Merritt, whose long experience enabled him to give advice which I found truly serviceable. I have already verbully stated to the Committee that I found it absolutely necessary, in order to expedite the work, to carry money constantly with me, which I paid out at all times, and in all places where I met those to whom it was due; had I not done this, they must have left their work and gone to the office at St. Catharines, a distance of from 3 to 30 or 40 miles, thereby causing much delay. I was obliged to make advances and pay the men more frequently from the fact that they had received no payment from the Company for many months before, under these circumstances it is evident I could not keep my accounts or take vouchers in so clear and satisfactory a manner as I could wish. During the whole period of my attendance at the Canal I was actively emplayed superintending in person the various works and repairs in progress, seldom having even in hour to spare for the office, in-deed such was my anxiety to advance the work that I kept par-ties of men employed on the most important points, on Sundays and also during the night. The Canal was open and in use carty in May—but much remained to be done during the summer and autonn, repairing accidents and completing various extensive improvements at the Grand River Dam, and Gravelly Bay, so that during all this time I had little leisure to be in the office. At the close of the navigation in the full, and after the money entrusted to me had been expended, I was forced by my own business to return home, instead of remaining at St. Cathurines to make up my accounts. On endeavoring to do so at home, I found many things requiring explanation that could only be set right by reference to persons on various parts of the Canal, this I found inconvenient to do, and put it off from time to time, much longer I am aware than I should have done. This is all I can say in reply to the charge of niy not having furnished my accounts at an earlier period. I do not for a moment desire to take any advantage of the Act of Parliament under which I discharged my duty as a commissioner, from the fact that it does not require us to account at all to any one—this your committee will ascertain to be the case on reference to the act itself. My having hid before Mr. Mackenzie all my original vouchers and documents fully proves that I desired to concent nothing

When Mr. Mackenzie was at St. Catharines last October I received a letter from him stating that my accounts required explanation, and that he wished me to come over and give it. I repaired accordingly to the office there, and went over the accounts with Mr. Mackenzie; he pointed out to me several errors, which I explained as well as I could at the time; he stated to me that he would soon report to his colleagues (the other Gov.

ernment Directors) upon them, and that I should have a copy of his report;—I was also promised this by Mr. Morritt, and fully expected to receive it in time to anable one to visit the Canal before the navigation closed, in order to see the different persons necessary to explain the apparent errors in charges, relating to them. Mr. Morritt's reply to Mr. Mackenzie's charge (No. 21) will corroborate what I have here stated. It is well known to your committee that I did not receive a copy of the Report until very lately, and how far it was proper for Mr. Mackenzie to publish to the world his charges against me, in the manner he did, under such vircumstances, is for the committee to determine.

As I cannot, for the reasons just stated, give a full and satisfactory answer to Mr. Mackenzie's questions, and as an opportunity will be afforded me for doing so, I will not now attempt it further than to notice some of the leading ones.

It is for the Committee to judge whether the salary paid me while at the Canal was unreasonable—it must be remembered that I had to keep a horse all the time I was there.

In regard to my having taken vouchers signed with a cross and not witnessed, I do not deny having done so in numerous cases often when I could not obtain a witness, and not unfrequently when I might have done so ;—the same course had been pursued at the Canal office before.

With respect to the receipt, which appears to have been altered from £8 10s to £18 10s, I cannot recollect how it came to be so but will use every means to discover how it happened.

There seems to be £300 not properly accounted for—this sum is principally made up from a deficiency in Rose's and Vanderburgh's vonchers; I am very certain that both these persons did more work than their accounts exhibit, and by seeing them I hope to make it appear so.

I will merely add that I shall take an early opportunity of visiting the Canal, and inquiring into the defects in Mr. Farnsworth's and other accounts—holding myself liable, of course, for any deficiency that may appear after the most minute and careful inquiry.

All which is respectfully submitted.

W. B. ROBINSON.

*(For Report of Commissioners, see Appendix to Mr. Merritt's remarks on Canal management during the year 1833, marked No. 2.)

The Chairman reported a communication from Mr. Merritt, addressed to the Committee, embodying sundry documentary evidences, which was read by the Clerk, and is as follows:—

TORONTO, March 29, 1836.

To the Committee appointed by the House of Assembly to investigate the affairs of the Welland Canal Company.

GENTLEMEN,

Charges of the most serious and important nature having been made against the Directors of this Company, their officers and servants, not only implicating their character, but imputing designs and motives, which, if true, would render them unfit or incapable of being trusted with any future confidence. Those charges are so framed as to embrace every possible crime. The prominent features are fraud, deception, mismanagement, secrecy, favouritism, &c., &c., supported by inferences and misrepresentation throughout, without one single act of commendation.

Without entering into an investigation of the motives which may have induced the individual to bring forward those charges, I feel it incumbent on me, in behalf of the Directors, Stockholders, and all concerned in that Company, to lay before this Committee, a detailed statement of the transactions of each year, as they actually occurred, which must at least remove any suspicion of their being actuated by any motive requiring secrecy.

### Remarks on the management of the Welland Canal, 1823 and 1824.

With this view I purpose submitting the following documentary evidence of the proceedings of this Company, as our accuser asserts this project was entertained as early as 1818, and the following proceedings, &c., were made thereon.—(See proceedings, &c. murked No. 1)

This brings up to the close of 1824, in which year, on the 30th of Nov. St. Andrew's Day, the ground was first broken, and the work actually commenced. And as a proof how little this subject had attracted public enterprise at the time, not half a dozen gentlemen of capital or influence in the District attended this ceremony, by which it will be seen we are not chargeable for want of energy, exertion or attention, and it may not be amiss to add, that Mr. Tibbett, the Engineer, was brought over from surveying the route from Manchester to Lewiston, which shews we are not altogether behind our neighbours in this particular enterprise. The minutes of the proceedings of this year are hereto appended, (marked no 2.) as well as the report of the Directors for 1834, (marked No. 3.

The charges preferred, up to this period are, not having obtained over £18 15s.—but in truth, there was not as much received as paid the Engineer or Surveyors, (See original subscription list hereto appended, marked No. 4,) also fraud and deception on the part of the Directors, in admitting their agent to allow Mr. Buchanan, of New York, to subscribe 40 shares, which he did not pay, thereby entrapping Stockholders, although an Act was passed April 13, 1825, a few months after, allowing all persons to withdraw, when the same individuals, and others, increased their stock to \$300,000, (see letter from New York, No. 6,) in the same place, under the direction of the Hon, J. H. Dunn, then President of the Company, (see act of 13th April, 1825, marked No. 5.)

The Directors for this year were:—
The Hon. John H. Dunn, William H. Merritt,
George Keefer, Thomas Butler,
John Decou, Samuel Clowes, and
Chauncey Beedle, Esquires.

#### No. 1.

In 1818, Messrs. Keefer, Davis, Upper and Merrit, with a number of inhabitants of Thorold, levelled the summit between Chippawa creek, and the source of the 12 mile creek, with a view of connecting them for hydraulic purposes, and connecting Lakes Eric and Ontario by a bout navigation. A meeting was held at Boaver Dams—Mr. Morritt went over to York during the sitting of the Legislature with a profile of the route, and a petition, praying the Legislature would appropriate a sum of money for the purpose of exploring it. They would not attend to it at that time ——and no more was done until April Sessions, 1923, when a subscription was got up, headed by the Hon. Thomas Clark, for the purpose of amplaying an Engineer. This is the first publication that appeared in print on the subject, dated April 12th, 1823.

### " [Communicated.]"

"A subscription has been raised at the last Session in this District, for the purpose of raising money for surveying, and taking the level of the land, lying between the Chippawa river and the source of the nearest stream leading into Lake Ontario, with a view of connecting those waters, that they may become navigable for boats. We are happy to see the names of our most respectable and influential inhabitants at the head of the list, and trust it will be liberally supported. The subscription paper will be left with Mr. John Crooks, of this town."

"We are credibly informed the distance between the Chippawa and gource of the 12 mile creek, is no more than one and three-quarters of a mile, by catting this length and letting a sufficient supply of water from the Chippawa into the latter stream, it is obvious a boat navigation would be immediately effected between lakes Eric and Ontario except the pitch of the Mountain, which can be easily ascended by means of railways at a small expense. In a month or two we hope to publish the report of the Engineer on this interesting subject."

Mr. Merritt went over the River immediately and employed Mr. Fliram Tibhett Engineer who examined and levelled the route and made the following report on the subject.

Having been called upon to level the Ground between the River Welland or Chippawa and Lake Ontario.

### REPORT AS FOLLOWS:

Commenced at Chippawa, on the fift Instant, 10 miles from its mouth, as stated to me on Mr. John Browns farm, Township of Thoroid; explored from thence two routes, to the head waters of the 12 mile creek; find the ridge of land between the two requires a cut of 26 feet on an average, for two miles; from thence to the road in New Holland, 60 clinins; from thence to Captain John Decoe's—there is a full of 17 feet in a distance of 25 clinins; from thence to the brow of the Mountain, 71 chains; from thence to the foot of the Mountain, and on the surface of the west branch of 12 mile creek 50 chains—full 242 feet; thence to Thomas' Mill 107 chains 50 links—full 3 feet—full at the mill 13 feet 3 inches; thence to Campreell's mill pond, 118 chains—full 3 feet 4 inches; thence to mill 14 chains—full at the mill 7 feet 10 inches; thence to Merritt's mill pond 139 chains 50 links—full 9 feet 3 inches; thence to Adams' mill, 75 chains 50 links—full at the dam 4 feet; from this, dal not mensure or level to the lake. I am informed, the distance is about four miles—do not suppose the full to be more than 2 feet. The whole distance from Lake Ontario, to the mouth of Chippawa is 27 miles and 50 links.

It will be necessary for the purpose of navigation to make the above cut four feet lower than the surface of the Chippawa, 7 feet wide at the bottom and 19 feet at the top or surface of the water, which will draw off as much as may be required, 4 feet above this a tow path must be formed 8 feet on one side and a berm of 3 feet wide on the other, which will stop all the earth that may crumble off the sides from falling into the water; from those projections the bank may go up at a moderate elevation, leaving the top of the cut 44 feet wide; the whole makes 310,733 cubic vards. From the great depth of the Chippawa at this place, the inhabitants having dug wells to a greater depth on each end of the cut and from the quality of the soil, which is clay, I do not apprehend the least danger of meeting with rock. From the peculiar advantages derived from this situation, the excavation can be effected at a comparatively trifling expense. A deep navigable river being situated at the commencement of the cut;—Bonts can follow every four of the way, and be so constructed that one man can unload their without loss of time. To give a clear and simple idea of this method, construct on each end of the scow, a box similar to a cart body, which will be filled and discharge any quantity of earth in the stream. Suppose the farthest end of the

Canal 2 miles 2 men will man two boats, or one man and a horse while the one boat is loading will take the other to Chippawa, in 30 minutes and return in 20 minutes, (say one hour at farthest) and carry 20, 30 or 40 tons of earth and so on alternately, and will keep 12 men at least digging to supply the scows; whereas on the American Canal it requires 2 men to remove the whereas on the American Canal it requires 2 men to remove the earth as fast as one man digs'it, and the expense of burrows and plank, will be equal to the scow; the average price of digging from 3 to 10 feet is 8 cents per yard. I am therefore confident, this cut can be effected at 10 cents, or \$30,000, and contractors will offer to take it for less money (tunnelling has been mentioned to me to be the cheapest method, but having nover witnessed the practical part of its-cannot give an original part of its-cannot give an original part of the charges and the charges are an original. of this cut, the water will flow with an easy and gentle descent to of this cut, the water will flow with an easy and gentle descent to Captain John Deco's. It will be necessary to widen the stream and cut off the points in many places; but as Mr. Hall Davis will curry it through his furm and Mr. Hiram Swayze, the greater part of his, the expense will be too trifling to form an item. From Mr. Decoe's mill dam, it will be necessary to carry the water through the farms of Messrs. Burneston and Cooper, where nature has formed a ravine, or cut to the top of the mountain. The expense of this cut at 10 cents the yard, will not exceed seven hundred dollars. From this to the waters of the west brunch of 12 mile creek, on Mr. Adam Brown's farm, nature has continued her favors; the ravine extends with a gentle descent or regular inclined plane the whole way, and one rail-way may be or regular inclined plane the whole way, and one rail-way may be formed to take up bouts at once, or two can be constructed, if necessary, or more convenient. I am not sufficiently informed on this subject, to give a correct estimate, but will forward one as soon as I can obtain the necessary information .-- I am satisfied, however from the favorable situation of this ravine, it can be however from the favorable situation of this ravine, it can be locked with 24 good wooden locks, for 20 thousand dollars. It will be necessary to construct at Thomas' mill a wooden lock which, from its height will cost \$1000; at Campbell's mill the lock will cost \$500; at Merritt's mill the lock will cost \$500; and at Adam's mill, \$350; from whence there is plenty of water to the Lake. I have likewise examined the Harbor but am not sufficiently informed to give an opinion as to the effect the water may produce on it for the purpose of deepening the channel to admit vessels. It will cost for a tow path through the woods, one hundred dollars per mile but a small portion of this distance passes through them—will therefore compute six at \$50 per mile nesses through them—will therefore compute six at \$50 per mile nesses. ses through them-will therefore compute it at \$50 per mile at the extent making \$1500. The whole expense of the route exclusive of rail-ways, is thirty-four thousand five hundred and fifty dollars, I would suggest an improvement that will of course follow in a few years, viz: a lock at the head of Mr., Merritt's mill dam, taken from a race-way that can de dug at a trifling expense, dam, taken from a race-way that can de dug at a trilling expense, from the foot of Mr. Campbell's mill dam. A lock on Colonel Johnson's farm, at the head of Mr. Campbell's mill dam, to another race-way at the foot of Mr. Thomas' mill dam, and one between Captain Decoe's and the Chippawn.—Those three will not average more than \$1000 each, and make the stream a regular canal, the whole distance with the exception of the mountain.

Routs from 20 to 40 tons will invigate this stream with ease, and two men and a horse will take one from Lake Ontario to Chippawa, in a day or a day and a half at furthest. They navigate from 25 to 30 miles per day on the Eric Canal, on an average, and the mountain here will only cause a detention of proba-

HIRAM TIBBETT, Engineer.

St. Catharine's, 10th May, 1823.

The annexed notice was generally circulated through the District; the meeting however, was thinly attended; the Honorable Thomas Clark and the Honorable William Dickson were present. NOTICE.

A public meeting of the inhabitants of the district of Ningara-will take place at Mr. M'Lelands Inn Beuver Dam on Saturday the 23th instant at 12 o'clock, to take into consideration and adopt measures to facilitate the opening of the proposed Canal from lakes Eric to Ontario every person interested in the prosperity of the country, it is hoped, will give their attendance. Ningara, 23rd June, 1928.

The following resolutions, were then passed:

Purmant to public notice, a meeting of the most respectable inhabituats of the Niagara District, was this day convened at the Beaver Dam, to take into consideration and adopt measures for opening a Canal between Lake Erie and Ontario.

GEO. KEEFER, Esq. of Thorold, called to the chair.

GEO. KEEFER, Junior, was appointed Secretary.

1st. On motion of John Clark, Esq., seconded by Mr. J.
NORTHROP, the Report of Mr. Tibbert, the Engineer appointed  $B_2$ 

to level the route to the head of the 12 mile creek was read and unanimously approved of .- Ordered to be printed and circulated as general as possible.

2nd. On motion of Mr. J. Northrop, seconded by SAMUEL Wood, Esq., an address to the inhabitants of Upper and Lower Canada was read, approved of, signed by the chairman, and ordered to be printed.

3rd. On motion of G. Adams, Esq., seconded by Mr. Wood-nurr, ordered that public notice be immediately given, that we intend petitioning the Legislature the next session for an act to incorporate a company for the purpose of connecting Lake Erie & Ontario, with a communication by water by the 12 Mile Creek, and from the Grand River to Chippawa, and for the erection of machinery on the route.

4th. On motion of S. Woon, Esq., seconded by Mr. Woonnurr, moved, that some suitable person be appointed to act as general agent, to be invested with as full power as the nature of the case will admit to receive and make all communications, until the act is passed to incorporate the said companymust call a general meeting of the stockholders in the most convenient situation, for them to adopt such measures as they may think advisable.

5th. On motion of Mr. R. WOODRUFF, ordered that WM. HA-MILTON MERRITT, Esq. be appointed to act as our agent on this

6th. On motion of J. CLARK, Esq., the thanks of the meeting be given to the chairman for his able management in the chair.

(Signed) GEORGE KEEFER

Beaver Dam, June 28th, 1823.

Chairman.

In furtherance of the above, the following documents were made out and circulated:

To the Editor of the _

I have taken the liberty of sending you the enclosed docoments, which I trust you will insert in your paper gratis,, and uny favourable remark you may please to make on the neces-sity, importance, and public benefit of the undertaking, will be conferring a favor on the community at large.

Your obedient servant,

W. H. MERRITT, Agent Pro Tem.

## Address to the Inhabitants of Upper and Lower Canada.

GENTLEMEN,

The extraordinary exertions which our neighbors, the Americans, have made, and which they continue with unabated perseverance for the improvement of their internal navigation, point out to those who wish well to this country, not only the importance of the subject, but the necessity which exists for similar exertions amongst, ourselves, for unless some efforts be speedily resorted to, and continued with equal spirit; and determination, the direct tendency of their skill and industry, operating with our own supineness, must be the actual loss of a great part of our trade.

On an examination of the state of the two countries it must be evident that the natural facilities possessed by this Province for such improvement, are beyond comparison superior to those of our neighbors. The two great Lakes, which furnish so extensive a portion of our internal navigation, are in one part so nearly connected, as to require an artificial cut of only two miles by which the water communication between them would be uninterrupted.

The case with which so desirable an object might be effected has been long known to many individuals present, and it must af-ford them pleasure to be enabled to communicate to the public this interesting information, corroborated by the report of an able and scientific Engineer.

The object of the present meeting is to submit the outline of a plan, by which so very desirable a matter might be carried into effect, in order to its being maturely weighed and well understood. Notice has been given of an intention to petition the Legislature at its next Session for an act to incorporate a Company, with permission to raise a capital of 125,000 for the purpose of opening

a canal, by the most eligible and convenient route from Lake Ontario to the River Welland, (Chippawa) and from thence to the mouth of the Grand River. The dimensions to be similar to the Eric Canal, in the State of New York, or enpuble of currying beats from 20 to 40 tons. And, as the supply of water is abundant, it is in contemplation to divert part of it in favorable situations, for the use of machinery. In this scheme it is proposed to raise the above capital of £25,000. The shares to be £6.5s, each. Ten per cent of which will be required at the time of subscribing, and the remainder when called for, at a month's public notice. The principal reason for making the shares small, are, that almost every individual may have an opportunity of taking more, and that it may be as general as possible.

Officers and managers as usual on such occasions, will be chosen by the Stockholders, when a sufficient amount shall have been subscribed. When £10,000 of the stock shall have been taken, it is proposed to commence cutting at Chippawa; and from thence in the direction of the 12 mile creek, to Luke Ontario; and no doubt is entertained but this part of it may be completed in one year from the time of commencement. The continuation between the Chippawa and Grand River, will be undertaken as soon afterwards as the state of the subscription will allow, that is, when the whole, or anajor part of the stock shall have been taken up.

Agents will be appointed at Montreal, Quebec, Amherstburgh, and the most convenient intermediate situations, for the purpose of ascertaining, at an early period, the amount of stock which the inhabitants of each place will be inclined to take, should our application to the Legislature for an act of incorporation be successful. It is desirable that the returns from those places should be farmished by the 1st October next, in order (if favorable) that arrangements may be made to facilitate the work one year, by commencing the 1st day of May ensuing.

It is not yet possible to speak with the same certainty as to the expense which must be incurred in making the second cut, but one route which has been explored between the Chippawa and Grand River, is only five miles, the other supposed three; and as the ground throughout both routes is favorable for cutting, it is presumed the expense cannot exceed £2,500.

A material advantage will result to the Western Districts of this Province, and those parts of the United States which bor-der on Lake Erie, if this last part of the design be effected in consequence of the easy access to the mouth of the Grand River, it being always open for navigation at a much earlier period in spring, thun the ports of Buffulo and Fort Erie. It is the primary object of the merchant to save time and distance in the conveyance of his produce to market, and the route by the Grand River will unite these advantages; such inhabitants as are settled on the Upper part of the Grand River and in the townships adjoining, will in common with settlers on the Western shores of the Lake, partake of the advantages of this early navigation, as the spring floods, by enabling them to float down their produce, will. when this part is completed, gain immediate access to the lower Lake, and enable them to reach Montreal, while Buffalo and Fort Eric, remain enveloped inice. An important benefit must likewise be derived by the owners & occupiers of land, within reach of the Lake, and the banks of this River, from the certainty, that much of their valuable timber, will find easy and ready access to market, after being converted into staves, and other descriptions of lumber, which are in constant demand at Quebec for the supply of our West India Colonies. It is a melancholy subject to reflect upon the immense tracts of fine timbered land, which, for want of such facilities, are at present, not only unproductive to the owner, but acting as a constant drain upon the purse, whilst the time of remuneration seems, from day to day, to clude his pursuit, and after years of protracted hope, closes in final diappoint-

Need it be mentioned, that farmers and others, the actual occupants of the soil, are not (though, undoubtedly, great sufferers,) the only-losers in this state of things. No; the Lower Canadian merchant shares equally, though not so immediately, in the loss. He suffers from the deterioration in value of the property of his debtor, in the UpperProvince, from the difficulty that debtor meets with in converting the produce of his farm and industry into a tangible shape for the creditor's satisfaction: and ugain, from the reduced value of such land as he holds in security, or has accepted in liquidation of debts; contracted to him, under a more favourable state of trade, the taxes, in interim, substructing from the profits of his mercantile pursuits; in fact, it is for the general interests of the farmer, the mechanic and the merchant, that something effectual should be undertaken, to promote their joint welfare.

Another source of profit to the immediate Stockholders, will arise from the judicious use of the superfluous water, for the pur-

poses of driving machinery, &c., and which, by proper management, might be made to reimburse them in a few, years for the entire outhy of their capital. This taken in connection with the public convenience in a part of the country where mill streams are both scarce and scant, is far from being one of minor importance. From Long Point, on the shores of lake Eric, round to Dundus, at the upper end of lake Ontario, the only mill, possessing a sufficient supply of water to carry on business, to an extent that may be considered mercantile, is that of Messrs. Clark & Street, at the Falls.

The production of wheat, in a soil and climate so well adapted to its culture, must, of course, be considered one of our principal staples; but, to render this valuable to the farmer, it is necessary he should possess the means of converting it into a fit state for use, so that he may not only reap part of the benefit arising from the manufacture, but radice the bulk and weight of his exportable commodity, so as to be embled to enter the market less unfavorably, with respect to transport charges, than at present.

As this Company will be justly ontitled to all the advantages that will result from the command of the water, throughout the route of the Canal, the mills now erected on that part of the 12 Mile Creek, (which will be kenefitted by an additional supply of water,) must be purchased at a fair valuation, from the present proprietors, and be at the disposal of the Company, after the completion of the cutt two flouring mills of the best description, and other machinery should be arceted by the Company; a flouring mill, as near Chippawa as possible, to receive wheat and produce, coming downwards from lake Eric; and another, as near lake Ontario, to receive produce from the banks thereof, and dispose of all the intermediate situations.

Subjoined, is a calculation upon good data, of the probable expence of the undertaking, contrasted with a sketch of the profits which it is presumed would accrue to the Company.

The proceeds from the sale of the intermediate sites for hydraulic purposes; the increased value of the mills now erected, the rental of the Company's two grand establishments on each end of the Canal, will, of itself, bring in a handsome dividend to the stockholders, on the amount necessary to complete the whole—leaving out the reasonable expectation, of a large sum that must be derived from the transportation of various articles. A boat, carrying 40 tons, will be taken up at the same expense, that two tons can be conveyed with a waggon at the present period.

If a sufficient degree of public spirit should not be found in the two Provinces, to complete so great and noble an object, we trust, private interests will induce individuals to embark a portion of their capital, in a fund where a profit will be immediately realized, continue and increase with the growing prosperity of the country.

GEORGE KEEFER,

Chairman.

Beaver Dam, June 27th, 1823.

The annexed is the notice alluded to in the 3rd resolution:

## PUBLIC NOTICE.

We, the undermentioned fresholders of the District of Niagara, intend petitioning the Legislature, the next Session of Parliament, to incorporate a Company for the purpose of connecting lakes Eric and Ontario, with a Canal capable of carrying boast of from 20 to 40 tons—by the following route: commencing at Chippawa Creek, 10 miles above its mouth, on the farm of John Brown, from thence to head of middle branch of the 12 Mile Creek, at Garrat Vanderbarrack's; from thence to John Decoe's; pass over to the West branch of

the 12 Mile Creek, on the farm of Adam Brown; and continue the said stream, to lake Ontario. From the Chipnawa to Grand River—either from the forks of Chippawa through the marsh, or from Oswego, which ever may prove most advantageous; - and for the erection of machinery for hydraulic purposes on the entire

St. Catharines, July 4th 1823.

[This was sent to every Post Muster in the Upper Province, and almost every person of influence CIRCULAR.

Sin, St. Catharines.

The accompanying report and address to the public together with the proceedings of the meeting will point out to you the object of this circular; and I trust You will conceive it of sufficient importance to the Provinces in general, to merit your exertions in promoting so necessary an undertaking. We have drawn up two lists, as some decline being stockholders, but say they will contribute their aid in case it should be effected.

You will submit both to every individual you think has the means in your vicinity, and return them as soon as you can possibly get the minds of the people on the subject-and at all events, by the first day of

As this is an object of such general utility, I have taken the liberty of appointing you agent for the Township of and vicinity—without your previous concurrence.—If you decline acting, have the goodness to hand it to some respectable person of your acquaintance, who will exert himself; and send me his name at your earliest convenience. Prompt attention will be paid to any communication you may make for further information.

I have the honor to be,

Your obt. Servant,

W. H. MERRITT.

Agent, Pro. Tem.

St. Catharines, July, 4th 1823.

This Circular was sent to the different Post Offices in Lower Canada.

St. Catharines.

The accompanying report &c. (see last circular.)

P. S.—As the distance between us will not admit of any early reply Mr, George Davis of Montreal, has been appointed Agent for Lower Canadato whom we refer you for the information you may require. W. H. M.

This was sent to the different Merchants and other Capitalists in Lower Canada.

You will perceive, by the Public Papers, it is in contemplation to unite Lakes Erie and Ontario, by a Canal, of the same dimensions as the Erie Canal in the state of New York.

As the capital in this as well as in all other countries, centre in its cities it is impossible for any public improvement to be effected in the interior, unless a portion of that capital returns to assist in carrying it into operation.

In this instance we appeal with confidence for a liberal support from Lower Canada; setting aside the dividend you may reasonably expect from a stock of so profitable and durable a nature, your interests will be materially affected by drawing to your market the products of an immense country, which will otherwise most assuredly go to New York. It would far exceed the bounds of a letter to state all the advantages, which your intelligence will immediately comprehend.

The object of this circular is to solicit your prompt assistance to the undertaking together with those of your friends who are immediately interested in the prosperity of the two Provinces. prosperity of the two Provinces.

Referring you to our agent, Mr. George Davis Montreal, for further information.

I have the honor to be, the later Sir, all bright he little confidentials

Your obt. Servant, GEORGE KEEFER,

St. Catharines, July 4th 1823.

Those lists accompanied the aforementioned Circulars.

We the Subscribers do hereby promise to take stock to the amount opposite our respective names, immediately after an Act is passed by the Legislature of Upper Canada incorporating a Company to open a Canal from Lake Erie to Ontario providing it is on the terms held out in an address signed by George Keefer as Chairman of a meeting held at Beaver Dam, Upper Canada.

June 28th, 1823.

Besides the above there were 1,000 letters wrote to different individuals, during this interval visited the American canal from Syracuse up to obtain assistance, immediately after the sitting of the Legislature, the following petition was laid before the three branches by Mr. Merritt, and an Act incorporating the Welland Canal Company was passed that Session on the 24th January.

#### COPY OF PETITION.

To the Honorable the Members of the Legislature in Upper Canada in Parliament assembled.

The petition of the undersigned freeholders and inhabitants of the Niagara District.

MOST HUMBLY SHEWETH-

That your petitioners not only viewing the great advantages this Province must derive, but the absolute necessity of improving our internal communication by canals to keep within the Province, a part of its trade and transportation.

Humbly pray that your honorable body may be pleased to incorporate a Company with such a capital as you in your wisdom may deem meet, in the name of George Keefer, John Decow, J. Northrup, Geo. Adams, Thomas Merritt, William Chisholm, Paul Shipman, Joseph Smith, William Hamilton Merritt and their associates, enabling them to open a canal from the Grand River to the Chippawa Creek, and from thence to Lake Ontario of sufficient dimensions to convey boats from twenty to forty tons burthen, and for the erection of machinery thereon. The route to be from the Grand River, either through the marsh to the forks of the Chippawa or by Oswego creek and from Chippawa by the 12 mile creek, on the route laid down by Mr. Hyram Tibbett, engineer, or any other they find more advantageous between the two lakes.

And as your petitioners have understood, your honorable body have made a rule of the House that six months notice shall be given, before any law will be passed, in order that due time may be given to any persons to remonstrate against the passing of such act, beg your honorable body may be pleased in this instance, to dispense with the said rule inasmuch as they would have been in due time, had the House met at the period it has usually been called.

They beg leave further to state that this project has been in contemplation since March last, that the survey took place prior to the 10th May, that public meetings have been called on the route to discuss the subject and every means have been resorted to,

to make it as public as possible in order that every person might have it in their power to oppose it if so inclined.

And as in duty bound, &c.

St. Catharines, 2d Feb'y, 1824.

SIR,

At a meeting of the petitioners for the Welland Canal Company held at Niagara the 31st ultimo, you were appointed to open books of subscription in your district to receive stock.

The act requires 10 per cent on the amount subscribed, to be paid on the formation of the Company (which will be on the 1st May next), and 10 per cent per month after the first payment if called for.

The money can be paid in to yourself by the subscribers when duly notified, subject to the direction of the President and Directors of the Company.

The books with whatever signatures you may obtain must be sent me by the 1st April next, in order to proceed to the formation of the Company, the subscribers must appoint an agent or agents in this district to vote for the proper officers to manage the affairs of the Company unless they or some one of them attend in person.

From the great public benefit the Provinces in general and particularly your district, must derive from the measure when carried into effect—The Board of Managers have every reason to believe you will make use of every exertion, to obtain a fair proportion of the stock.

I have the honor to be,

Sir,

Your obedient servant, Wm. H. MERRITT,

Agent for Petitioners.

#### NOTICE.

A meeting of the pentioners of the Welland Canal Company, will take place at Mrs. Rogers' Hotel in the Town of Niagara, on Saturday, the 31st instant for the purpose of appointing some person to each county town in the several districts in this Province, to open books of subscription as provided by the act, and to devise measures for the speedy formation of the Company.

WM. H. MERRITT,
One of the Petitioners.

St. Catharines, Jan'y 22d, 1824.

The above notice was then inserted and the followed resolutions produced from the meeting—and the following letter from the chairman.

At a numerous meeting of the inhabitants of the District of Niagara, assembled at the house of Mrs. Rogers' in the town of Niagara, on Saturday, Jan'y 31st, convened under the authority of an Act of the Provincial Parliament of this Province passed last session, entitled, "An Act to incorporate sundry persons therein mentioned, and their associates under

the style and title of the Welland Canal Company," whereof certain of the original petitioners being then and there present, a Chairman and Secretary to such meeting were duly appointed, the act of incorporation being read by the chairman and the object of the meeting explained—it was then

Resolved—That in conformity to the provisions of the act, books be provided by the Agents hereafter named, and transmitted to certain persons in the different Assize towns, in this Province, for the purpose of receiving subscriptions for stock in said Incorporated Company.

2d. Resolved-That George Keefer,

Wm. H. Merritt,
George Adams,
John Johnson Lefferty,
George Conclly,
Richard Woodruff,
R. M. Crysler, Esquires—

Be a Board of Managers, in behalf of the petitioners, to make all necessary arrangements until the Company is duly organized.

- 3. Resolved, That William Hamilton Merritt, of Grantham, Esq., be appointed a general agent, to obtain subscriptions for stock in the said company, and that it be recommended to him to proceed to the Lower Province with as little delay as possible, and solicit subscriptions for stock therein from those who may be inclined to further an object so momentous and beneficial to the future prosperity of both Provinces.
- 4. Resolved, That the chairman in behalf of the petitioners, address letters to such gentlemen in either Province as he may consider would take an active interest in promoting any laudable and enterprising undertaking of the kind; particularly, The Hon. J. H. Dunn, His Majesty's Receiver General at York, the Hon. George Markland, of Kingston, the Hon. John Richardson, of Montreal, and the Hon. James Irvine, of Quebec, soliciting their support and assistance in aiding Mr. Merritt, by recommending subscriptions in the said corporation.

WM. DICKSON, Chairman. THOMAS BUTLER, Secretary.

[CIRCULAR IN ACCORDANCE WITH FOREGOING.]

Niagara, January 31, 1824.

SIR

An Act of the Provincial Legislature of Upper Canada, passed last session, has sanctioned the incorporation of a company for making a canal letween the Grand River on Lake Erie and the River Welland or Chippawa, and from thence to Lake Ontario. - Certain preliminary measures are to be taken before the formation of the Company, and in pursuance thereof a meeting took place in the town of Niagara, when certain resolutions were passed, a copy of which you will find enclosed .- Having had the honor of presiding at the meeting, it becomes my duty to address you on the subject, and to state that William Hamilton Merritt, Esq., of this place, is the General Agent, and will wait on you personally to solicit your countenance and assistance in promoting the object of his mission to Lower Canada, which is to obtain stock to as large an amount in the books of the company, as a sound discretion with a

favorable view and consideration of all circumstances may warrant you in recommending.

It would have been proper to have sent a copy of the act, but unfortunately it is not yet in print—Mr. Merritt, however, carries with him a manuscript.

I have the honor to be,

Sir

r, Your most obedient serv't, WILLIAM DICKSON

Immediately after this meeting Mr. Merritt went to Montreal and Quebec, called meetings &c. &c. &c. &c., and obtained subscriptions to the amount of £32,000; returned by the State of New York and was made known to many contractors on Eric Canal.—The following notice was inserted to countermand one of the 1st of May, sent from Montreal.

#### NOTICE.

A Meeting of the Stockholders of the Welland Canal having been called on the 1st day of May next, for the purpose of appointing Directors to and for the said Company—which notice not having reached the Niagara Gleaner in time to give full 30 days notice, as required by the act—the said Meeting is unavoidably postponed until the 15th day of May—on which day the Stockholders will assemble at the Hotel of Mrs. Rogers, in the town of Niagara, at 12 o'clock, for the purpose of appointing the said Directors, as required by law.

WILLIAM HAMILTON MERRITT.

One of the Subscribers.

Niagara, April 8th, 1824.

On the 15th of said month an election was held pursuant to notice, and the Hon. John Henry Dunn, George Keefer, Esq., John Decou, Samuel Clowes, and William Hamilton Merritt, were appointed Directors.—The Hon. J. H. Dunn was then elected President, but declined serving from the distance which he resided from the Canal—Mr. Clowes likewise resigned, and Chauncey Beedle and Thomas Butler were appointed in their places.

Prior to this Mr. M. engaged Mr. Clowes to examine the route of the Canal—with a view to have every thing in readiness against the appointment of Directors—called a meeting of the Board of Managers at Shipmans, on the 10th April, to adopt some measure to forward the business, but so many different opinions, interests and views were taken that we broke up without determining on a single measure. Mr. Clowes gave in his estimate for a boat navigation, £26,000, and the following report:

To the Directors of the Welland Canal Company. Gentlemen,

In submitting this report to your consideration, it may be advisable to accompany it with a few observations and remarks to guide you in the prosecution of the work, and to state some reasons for estimating and proportioning our Canal for eight feet Locks:

The greatest obstacle to overcome, and the only one worthy of consideration on this route is the dividing ridge between the Chippawa & the head waters

C2

of the 12 Mile Creek—this we propose tunneling, which will save far more than one half the money necessary to expend in cutting it open—and every foot in width would add proportionally to the expense by giving it an extra foot more than the locks—boats will never meet with any obstruction in their loading, and room will be left for the surplus quantity of water for your hydraulic concerns, and for all purposes of boat navigation—a canal of this size is considered the most profitable, and will pass all the produce that may be necessary for a century to come.—The grand trunk canal in Great Britain is only of those dimensions.

In recommending wooden locks we are guided by the following considerations:—A stone lock would cost you at least £1000—from the low price of wooden materials in this country a wooden lock will be built for £220; the foundation of those locks, and that part under water, will last a century—the upper timber at least ten years, when the whole expense of building these entire will not exceed £100, this can be done in the winter season, and not interrupt the navigation one single hour—now the difference in the original cost is £780, the interest on which is £46 16s C'y per year, consequently an entire new lock may be built, including the foundation, every five years, for the difference in interest of the money.

In regard to the harbor I beg to observe that there is a natural bason capable of holding 500 sail of Vessels, drawing 7 feet of water and that they can proceed 3 miles in the interior without incurring one shilling additional expense to the four foot canal.

Respecting the prosecution of this work to advantage and with expedition, you must open the two tunnel mouths, as soon as possible which will draw off the water from each end of the tunnel then a heading may be drove through in six months, which will not cause an expenditure of more than £162 per month; after which it will take 15 months to complete the tunnel at an outlay of £500 per month; it is not necessary to lay out money the present year on any part of the route as ample time will be left you to finish the ensuing and year after at your leisure, the tunnel cannot be drove faster than mentioned which shews the necessity of its speedy completion.

We must further observe that this estimate is formed on mature deliberation, and from the experience of the practical part of canal operations for a series of years that we will undertake to complete the whole of it according to the above estimate and require from you no advance—when we finish each mile we will expect payment and not until then.

We have the honor to be,
Gentlemen,
Your Obedient Servants,
SAMUEL CLOWES,
JAMES CLOWES,
Civil Engineers.

In the meantime certain gentlemen from Niagara wrote below stating the object to be altogether visionary and would result in a total loss to the subscribers. The stockholders in Quebec became alarmed and wrote up positive instructions not to commence the

work until at least the amount of the estimate had been subscribed—this caused an unavoidable delay, and to satisfy the public we employed two other Engineers whose reports are as under. We likewise had the country explored in every direction as will be seen from the following answer to a letter from the hon. James Irvine, of Quebec.

St. Catharines, 20th May, 1834.

The Hon. JAMES IRVINE, Quebec:

I had the honor of receiving your communication of the 5th instant in behalf of the committee, yesterday, and assure you it is with no less regret than surprise I hear of the communication directed to the committee.

We are fully sensible that many gentlemen living on the Niagara frontier, were making use of every exertion to prevent the canal's being carried into effect, as we conceive from interested motives, but as it is a measure of too much consequence to the Provinces and so easily accomplished, they will not be able to accomplish their designs. I hope you will feel no delicacy in giving us the author of your communication, for if it is founded on truth it can never affect him, at the same time beg you will give us an opportunity of rebutting any statement that may reach you which is founded on report or rumour.

We do not pretend to deny that many individuals may conceive it a visionary and fallacions undertak-Many of that description are to be found who would condemn any project however simple or easy to be accomplished, but we contend the Legislature of the Province would not pass a law—His Excellency the Governor mention it in his speech at the close of the Session-so many public meetings be convened, and send an agent to the extremity of the two Provinces to obtain stock to an undertaking that had not been maturely considered and generally known to be easily accomplished. However as those are merely opinions, be good enough to assure the committee and subscribers, that I will follow their directions most implicitly, and not proceed without their concurrence in any measure relative to the undertaking, for I would much sooner abandon the design altogether, however important, than to incur the least censure by deviating in the smallest respect from the confidence reposed in me.

We have a sufficient amount subscribed to complete the first deep cutting, but the Directors that I have seen, think it prudent not to commence until we have a sufficient sum taken up to complete the whole. On this subject you will be addressed officially next week by the Directors. Mr. Samuel Clowes and Son, the Engineers heretofore and still in the employment of our commissioners have been through the line from the River Welland to Lake Ontario, and made out an accurate estimate of the expense to complete the whole, which is £26,000 Currency. They offer to contract on their own estimates and finish each mile before they receive any payment, a plan and estimate in detail will be sent you as soon as finished.

On the 15th instant, the Company were formed, they are composed of the Hon. J. H. Dunn, President, George Keefer, John Decou, Samuel Clowes, and W. H. Merritt, as I had so decided a majority of votes from Lower Canada I relinquished them all,

and left the appointment of Directors to the shares taken in Upper Canada, so as not to have any influence in their selection. Mr. Clowes was solicited in consequence of his taking an interest in the concern, and being a professional gentleman, will doubtless adopt and recommend the best method to carry it into effect.

We propose getting the opinion of the most celebrated Engineers, on the American side, and one more here, before we proceed further—likewise to get the route surveyed from the Grand River to the Welland, and obtain an accurate estimate of the whole.

It may be necessary to call in 2½ per cent to cover the expenses attending those surveys, which will be the only instalment required until the whole amount is taken up.

I have the honor to be, Dear Sir,

Your most obedient servant,

(Signed)

WM. H. MERRITT.

(CIRCULAR.)

St. Catharines, 1st September, 1824.

Mr. Editor,

For the information of stockholders in the Welland Canal & the public in general, the Directors of the Company publish the accompanying reports.

On the formation of the Company, Messrs. Samuel and James Clowes were employed to lay out a canal from the River Welland to Lake Ontario;—two routes were explored, one terminating at the mouth of the 12 mile creek, the other at Niagara,—the summit level at lock No. 1, about 3½ miles from the Welland, being common to both, and a dividing ridge of one mile and a half within this distance being the only obstacles of any magnitude in either route.

On receipt of Messrs. Clowes' report, it was intended to put this part of the canal under contract, by cutting open, or tunneling, to be determined by offers most advantageous to the Company, the gentlemen having offered to complete the canal on their own estimate to be paid mile by mile, as each was finished, agreeable to their report published about three months since.

Unfortunately for the prosecution of that work, a contrary opinion was at this period advanced and industriously circulated by some gentlemen in this district, who were totally unacquainted with the natural facilities of the routes, and without giving themselves the trouble to enquire into the merits of the undertaking:—they even undertook to represent the project to the stockholders in Lower Canada as altogether fallacious and visionary, advising them to withhold their subscriptions.

To silence those frequent statements, and to restore public confidence without a doubt, the Directors determined on suspending all operations until they obtained the opinion of two other Engineers,—and explored the whole route through to Lake Erie and the Grand River. In consquence of the illhealth of Mr. Clowes, and the difficulty of obtaining Mr. Roberts, it has caused more delay than was anticipated.

The following is an abstract of the different esti-

Messrs. Clowes and Hall, from the Grand River to River Welland, & 7,456 18 0

Messrs. Samuel and James Clowes, from Welland—Lock No. 1—31

From Lock No. 1, to Lake Ontario by the 12 mile creek,....... 14,346: 13' 41

£33,454 18 0

Mr. Hall's estimate for an open cut from Welland to Lock No. 1, (3½ miles) £14,680 0 9½, exceeding tunnelling £3025 14 2.

Mr. Roberts' estimate for same distance by open cut £22,037 4s. exceeding tunnelling £10,482 17 42—by which it appears the lowest estimate is by Mr. Clowes to tunnel the one and one-half miles, and corroborated by Mr. Roberts.

Mr. S. Clowes is an Engineer of great experience in constructing canals in Europe,—both have had some in America, and have been employed by Government in this country, and the elder is still engaged in a canal route from Kingston to Ottawa, (near Montreal.)

Mr. Hall is a scientific educated Engineer (under the celebrated Tilford) of much practical knowledge, now employed in constructing the Monument at Queenston and the Canal at Burlington Beach.

Mr. Roberts has been several years employed in the Eric Canal—estimated the western section; and has the entire management, direction, and completion of the same.

The Directors are sanguine to believe that the corroborating reports of such men, as to the facility, utility, profits, and expense of the project, must remove every shadow of doubt from minds of the most sceptical, and they feel sensible a discerning public will see the propriety and even necessity of the undertaking; and be no longer amused by the fabulous reports of interested people, inimical to a work fraught with such infinite advantages to the public and Province in general.

(Signed) GEORGE KEEFER, President W. C. C.

### MR. HALL'S REPORT

# TO THE PRESIDENT AND DIRECTORS OF THE WELLAND CANAL COMPANY.

Agreeable to your instructions I have examined that part of the country situated between Lake Erie and the Welland or Chippawa River: also from the Niagara River Westward to the Valley of the 12 mile creek.

After various trials, find that the table laid North from the Chippawa to the Mountain face has a regular acclivity to the North East, thereby determining a direction from same point considerably above the confluence of the Chippawa with the Niagara River.

Upon the surface of this table land, various streams take their rise; all descending in a North West direc-

tion, viz:—the eight, the ten, and the twelve mile creeks—the head water of the lutter stream has been found progressively lower than those to the Eastward.

A line has been levelled by Mr. Clowes, and verified by me in nearly a direct course from Big Creek, upon Brown's farm, township of Thorold, to the middle branch of the 12 Mile Creek; this level has been carried six feet under the average waters of the Chippawa, passing the dividing ridge, composed of strong adhesive clay, by deep cutting, rising abruptly from 10 to 15 and 19 feet—length of deep cutting 1 mile and 1,188 yards; again descending to water level near lock No. 1. or termination of summit level; distance from Chippawa is 3 miles and 1,120 yards. The variations of height and other particulars are carefully marked out in the accompanying sections.

From the nature of the ground, and shape of the adjacent country, this extent of canal must of necessity be common for any line of water communication between the Chippawa and Lake Ontario.

The elevations, detailed drawings, and specifications, will exhibit the particular mode of executing this part of the work by retaining walls, timber framing and top excavation, so as to obviate tunneling, as in the event of any extension of the canal dimensions, the mode submitted will have a decided advantage by saving two-thirds of the expense.

The expense of executing this part of the work according to the subjoined particular estimate, is, ......£13,345 9 10½

Ten per cent for contingencies, 1334 10 11

Total, ......£14,680 0 91

It will be observed by the estimates, that the extent of excavation required here amounts to 328,293 cubic yards of earth, exclusive of 255,200 lineal feet of timber work. The time required to execute this in a proper manner will exceed by one senson, that of all the other parts—therefore no time should be lost in closing contracts for the execution of this particular section, so as uniformly to open the navigation by the spring of 1826.

According to the subject descriptions of the routes from the summit levels to Lake Octario by the Niagara River, and by the valley of the 12 Mile Creek, it would appear that nothing of an unfavourable nature occurs by adhering to either direction, the descent of the mountain, by both lines, is uncommonly favourable, and the soil generally well adapted to canal operations.

The mountain descent, by either line, will afford peculiar advantage for hydraulic operations, not only in the immediate vicinity of the canal line but by feeders carried to a great distance; the main feeder from Chippawa being inexhaustable, machinery to any extent, and capital to any amount may be constantly employed.

Messrs. Samuel & James Clowes having estimated the remainder of the proposed canal, publicly pledging themselves to become contractors at their own statements, and to finish each mile previous to receiving payment makes it unnecessary for me to proceed with further investigation as to estimate.

Have made particular sections of both routes, shewing the comparative length the lockage cutting and embarkments, on all particulars marked, these documents will be valuable during the execution of the work, whatever line your Directors may adopt.

The general dimensions are also marked upon the sections, viz:—in common cutting 28 feet, at water level 3I feet; at top bank, depth of the water, under the summit level 4 feet, and 5 feet from bottom of water to top bank, inside slope 1½ horizontal, to one perpendicular, tracking path 6 feet, benching on off side 3 feet.

Embanking same dimensions as to canal size, top of trucking path 10 feet, off side 5 feet; outside slope, 2 horizontal to one perpendicular, with the exception of these parts in deep entting, where the canal size will diminish in proportion to the height or depth of excavation—locks within the chamber 72 feet, 12 feet in width, and 106 feet from extremities of wing walls.

These dimensions are calculated for a boat navigation of 40 tons burden; a limitation of funds is the more to be regretted, as nothing appears to be more likely to improve the general interests of the country than a free schooner navigation between the Lakes, however the general dimensions of the canal may be enlarged in sections from an increased facili-of boating stuff, stone, timber, and at less expense than by proceeding in the first place to execute a commensurate schooner navigation.

That an extension within a limited period may be effected; wooden locks have been adopted, as they may be enlarged by masonary without much increased expense.

Have likewise investigated a canal route from the Crippawa to the Grand River, commencing at Misener's Creek, on the first fork of the Chippawa, miles above Big Creek. This line continues for two miles by Misener's Creek then, by a very different line to Broad Creek, about 2 miles above the junction to the Grand River with Lake Eric.—Expense as under:—

Cutting,	.£5,905	18	0
Lockage,	. 400	0	.0
Waste Wears,	. 60	0	0.
Feeders,			
Troughs, &c	. 35	0	0
	£7,456	18	0

By adhering to this line the actual distance from Lake Erie to Ontario will not exceed 40 miles:—Cranberry Marsh will be effectually drained, thereby improving 30,000 acres of valuable land, independent of an immense field of Iron Ore which may be available in many shapes in promoting the interests of the country.

(Signed) FRANCIS HALL, Engineer.

Queenston, August 7, 1824.

True Copy,

George Keeper, Secretary W. C. C. To the President and Directors of the Welland Canal Company.

#### GENTLEMEN:

In compliance with your directions I proceeded to level the country situated between Lake Eric and the River Welland, in order to ascertain the best route for acanal to connect these waters.

I have accordingly explored three different routes, estimates and specifications of which I submit for your consideration.

# ROUTE No. 1

Commences on the River Welland, at the forks, nine miles West of the entrance of the Canal to connect this River with Lake Ontario, thence following the Southern branch of said River two miles, forming a natural Canal, thence leaving the River a distance of 26 chains through favorable ground; soil, light loom, and not more than two feet higher than the River passing Misener's house to the foot of Lock and Waste Wear No. 1. Eight feet lift from the head of this Lock make use of Misener's creek to the head of Cranberry Marsh, a distance of 134 chains; the stream requires straightening in places and clearing out ;-expense of which is computed in estimate; thence crossing Cranberry Marsh, intersecting Broad Creek and following the same, till it discharges into the Grand River two miles West of outlet in Lake Erie. The distance of this station is ten miles averaging four feet cutting: it is now from one to two feet covered with water. This cut must be supplied by a feeder from the Grand River at an elevation of eight feet, a distance of twelve miles, the expense of completing this route will be-

and the second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second s

£7,456 0 0

In addition to the many advantages this route possesses, may be added the draining of about 30,000 acres of marshy land, which, at the present time is the greatest nuisance in this part of the country, and will be the most valuable when reclaimed, besides affording the country an abundant supply of bog ore with which this vicinity abounds.

## ROUTE No. 2

Commences at the forks of the River Welland and pursuing the same route as No. 1 to Mr. McDonald's on Lot No. 17, 4th Concession of Wainfleet, thence crossing the Cranberry Marsh, South Easterly to Lot No. 8, in the 1st Concession, and intersects Lake Eric at the East end of a Bay formed by Point Industry and Mr. Graybiel's; there is a most favorable situation for constructing a harbour at this point of Lake Eric; but from the deep cutting the whole distance (5 miles) averaging ten feet, it would cost the sum of £9,924 13s. 4d. exclusive of harbour, as per reference to estimate and specifications herewith.

# ROUTE No. 3

Commences on Lot No. 5, 2nd Concession in Canboro', on Oswego creek, running a South-eastern direction, until it intersects the Grand River, a dis-

tance of 5 miles and 19 chains. It would be necessary to bring a feeder from the Grand River to supply this route at an elevation of 12 feet, and will cost the sum of £8,034 12s. 5d. as per estimate, &c.—This route is favorable and could be completed at a less expense than here estimated, on a superior level, but the increased distance on Chippawa, and other considerations, gives it a decided advantage to No. 1.

(Signed) JAMES CLOWES, Engineer.

August 10th, 1824.

by Messis. Clowes.

A true Copy, George Keefer, Junn. Secretary W. C. C.

To the President and Directors of the Welland Canal Company.

Having, at your request, examined the two routes of the Welland Canal from the River Welland to Lake Ontario,—the one terminating at the mouth of the 12 Mile Creek, and the other at Niagara; both being heretofore levelled, (which I take for granted to be correct) and estimated by

I beg leave to remark that I have made a personal minute observation of both lines, and carefully examined the estimates of Messrs. Clowes.—I think them judicious, and am of opinion, that either route can be effected at their estimates, by proper and economical management.

From a close examination of the creek I am fully of opinion, that by means of a lock, dam, waste wear, and other improvements, according to the plans of said Engineers, that an excellent harbor may be made for a great number of lake vessels, drawing from 7 to 8 feet water, which can be towed 3 or 4 miles up, to the first lock, where hydraulic establishments may be elected.—From this the line of canal will follow the channel of said creek to lock No. 1, within 3½ miles of the River Welland, the greater part of which has more the appearance of an artificial canal than the natural bed of a stream, the construction of locks, waste wears, and a suitable towing path forms the principal part of the expense on this route.

# From Lock No. 1. to Niagara.

This line presents unusual facilities for constructing a canal, but from its requiring to be wholly excavated, with a very small share of embankment, it will necessarily cost a considerable sum more for its completion, than the other route; but when completed will be a far more elegant canal, and less liable to be impaired by spring floods and freshets, to which the bed of every stream is liable.

I have likewise examined the estimate of Mr. Hall, Engineer, of the deep cut, from lock No. 1 to the River Welland, which is common to both routes, and the only obstacle of magnitude that presents itself in either. I approve of his plan of timbering as a matter of economy, with a little variation, as per accompanying estimate, making a total of £22,072.

From the experience I have had in this kind of work on the western section of the Eric Canal, there

being much deeper cutting; and from the unforeseen difficulties attending the same, I have been induced to give such an estimate, that you may not be deceived in its accomplishment, for it is almost impossible for any engineer to estimate this description of cutting without having witnessed the operation.

Having been presented by Mr. Clowes with the calculations for a tunnel of suitable dimensions, supported by well connected timber, to be driven through the said deep cut, which would cost but little more than one half of the above.—I deem it worthy of favourable notice.

From the natural facilities on either of the above routes, the Canal can be completed at a trifling expense, compared to the importance of the object.

The geographical situation of this country presenting an extent of thousands of miles of inland navigation, will by means of this canal, be connected, and it is reasonable to believe that the tolls arising from it will exceed the calculations of the most sanguine, besides the benefits to be derived from hydraulic situations.—Taking all advantages into consideration, I have no hesitation in stating, that it must be the most profitable description of stock, and when once completed a never failing source of revenue to the proprietors.

The wealth and capital it will draw to your country; the facilities it will afford to commerce, with the other advantages that you will realize from its completion, make it an object worthy of your most laudable exertions, and of the patronage of every friend to internal improvement in your country.

Respectfully submitted by your obedient servant, (Signed) NATHAN S. ROBERTS,

Engineer.

St. Catharines, 28th August, 1824.

We likewise had the country explored in every direction where the least natural advantages presented themselves, as the accompanying reports of Mr. Cusack will shew.

# REPORT OF SURVEY AND LEVEL

Of the contemplated canal to unite the waters of the River Welland (or Chippawa) and Lake Ontario, by way of the village of St Johns, known by the name of Short Hills, (viz) commencing at a stake planted by Mr. Samuel Clowes, Civil Engineer, marked 8 feet 3, 5 decimals above the surface level of the Chippawa water, then bearing in a north westerly direction along Big Creek, on Mr. Carroll's farm, frequently crossing said creek in the distance of 20 chains, fall 2 feet 3 inches—then in the distance of 21 chains, rise 1 foot 7 inches—then in the distance of 42 chains and 68 links, rise 6 feet 7 inches, making the whole ascent in the distance of 83 chains and 68 links, 13 feet 24 inches above the aforesaid level; then in the distance of 41 chains frequently crossing the different meanders of said creek, rise 12 feet 71 inches-then abandoning said creek, and across John Smith's Farm, in the distance of 12 chains, rise 10 feet 4 inches-then in the distance of 20 chains, fall 4 feet 31 inches - then at the distance of 254 chains from the place of commencement across a high noll

of ground, rise in the whole 38 feet 5 inches-then to the brow of the mountain, in the distance of 6 chains and 9 links, fall 1 foot 51 inches, making the whole ascent to where the mountain descends on Mr. Damewood's farm 36 feet 113 inches above the surface level of the Chippawa water-then in the distance of 2 chains and 11 links, fall to the level, having overcome that great barrier that nature has seemingly formed to oppose inland navigation between the two lakes, and that by a favorable route did not survey or level any farther. The mountain at this place answers a good purpose, being an inland place, and will admit of regular ponds (or levels) between each lock. Not being furnished with the proper implements to ascertain the quality of the earth, prevents me of describing it at present, the inhabitants having dug wells to a very great depth, give a favorable account of the different stratas. The face of the country is apparently composed of strong clay, and that of the best kind for a canal.

A plan and estimate will be transmitted if required.

RHEDDY CUSACK,

Civil Engineer.

Stamford, 10th May, 1824.

Note.—The whole distance from Mr. S. Clowes' stake to the brow of the mountain and level 262 chains 80 links.

# REPORT OF A SURVEY AND LEVEL

Of the contemplated Canal to unite the waters of the River Welland (or Chippawa) with Lake Ontario, by way of the 15 Mile Creek, (viz.) commencing on the 7th instant on Sucker Creek, 5 chains west of the township line, between Gainsborough and Pelham, then bearing north 41°, 15 west, in the distance of 45 chains and 30 links, frequently crossing said Creek, rise 9 feet 4 inches above the surface level of the Chippawa water-then north easterly, abandoning said creek in the distance of 25 chains, rise 18 feet 3 inches-then continuing the same course in the distance of 7 chains, fall 31 inchesthen bearing north in the distance of 7 chains, rise 2 feet 4 inches—then in the distanse of 16 chains, fall 1 foot 103 inches, leaving the ascent at the distance of 103 chains and 30 links, 31 feet 51 inches above the aforesaid surface—then continuing the same course in the distance of 10 chains, rise 2 feet 2 inches—then in the distance of 5 chains, fall I foot 62 inches-then in the distance of 9 chains, rise 3 feet 54 inches-then in the distance of 5 chains fall 44 inches—then in the distance of 22 chains, rise 6 feet 54 inches—then in the distance of 43 chains terminates on the Canborough road, in 57 feet 11 inches above the surface level, as aforesaid, making the whole distance 197 chains and 30 links; in this distance, and as far as the course of the creek continued the bottom appeared to be a strong clay, and of the same strata as apparently compose the face of the country, and best kind for a canal-considering the excavation in this route too heavy for inland navigation, and a prospect of a more favorable route being intimated to me (viz.) by Scott's Creek, was the cause of my not exploring this route farther.

If an estimate is required it will be transmitted without delay.

RHEDDY CUSACK,

Civil Engineer.

Stamford, 10th May, 1824.

# REPORT OF A SURVEY AND LEVEL

Of the contemplated canal, intended to unite the waters of the River Welland or Chippawa and the River Niagara by way of the Village of St. Davids, and then Easterly to Queenston—Commenced on the North branch of the Chippawa about 40 chains from its mouth, then North 45° West, frequently crossing the different meanders of Mr. Bell's creek in the distance of 58 chains and 67 links, rise 13 feet 51 inches above the surface level of the Chippawa-then bearing North in the distance of 66 chains and 39 links, rise 19 feet 2½ inches, then in the distance of 18 chains and 58 links, rise 4 feet 11 inches, making the whole ascent to the summit of the portage road at the fulls 37 feet 7 inches—then under the high bank in the distance of 3 chains 54 links fall to the levelthen North-east under the said bank retaining the level for the distance of 56 chains and 63 links-then ascending to the summit in the distance of 15 chains, rise 46 feet 63 inches-then North 25 degrees East in the distance of 21 chains and 90 links, rise 4 feet 2 inches—then continuing in the same course in the distance of 7 chains and 54 links, fall 10 feet 9 inches, then North in the distance of 24 chains and 31 links, fall 7 feet 7 inches—then North 45°, East, frequently crossing the windings of the Muddy run, in the distance of 36 chains and 97 links, fall 7 feet 7 inches then in the distance of 43 chains and 34 links, fall 4 feet 9 inches-then in the distance of 13 chains and 57 links, fall 5 feet 1 inch—then in the distance of 57 chains and 55 links, rise 5 feet 6 inches—then in the distance of 3 chains, fall to the level, leaving the bottom of Fralick's creek 1 foot 2½ inches below level-then in the distance of 50 chains, rise 11 feetthen in the distance of 10 chains 87 links, fall to the level, leaving the bottom of Adam Bowman's creek 8 feet 5 inches below level—then in the distance of 17 chains and 8 links, rise 10 feet  $5\frac{3}{4}$  inches—then in the distance of 73 chains and 22 links, rise 23 feet 61 inches, making the whole ascent from the level to the summit of the mountain 34 feet-then bearing North 25° West, in the distance of 25 chains and S3 links, fall to the level—then in the distance of 77 chains and 57 links, fall 156 feet 6 inches-then North 25° East, in the distance of 32 chains and 83 links, full 48 feet 4 inches-then East in the distance of 53 chains and 66 links, fall 3 feet-then continuing the same course in the distance of 56 chains and 26 links, rise 1 foot 9 inches—then in the distance of 48 chains and 43 links, fall 30 feet 7 inches-then in the distance of 24 chains and 25 links, full 66 feet 10 inches, making the distance from the level 352 feet, and the whole distance from Chippawa to Queenston, 11 miles, 1 furlong and 28 perches.

R. CUSACK,

Civil Engineer.

Stamford, May 30, 1824.

On application having been made to His Excellency for the waste lands, the success of which in Wainfleet was rather dubious, and every person so lukewarm and indifferent to the undertaking, we endeavored to rouse them by the following Circular, knowing that if any quantity of land was obtained it would be an additional inducement for capitalists to invest money on this increased security.

(CIRCULAR.)

St. Catharines, June 28, 1824.

Every exertion has been made by a few individuals in this District to connect Lakes Erie and Ontario, with a navigable canal. They have obtained an Act of Incorporation and stock to the amount of fifty thousand dollars, principally from Lower Canada, the Company are now regularly organized according to law. They have had the routes explored by skilful and experienced Engineers, and find, by the report of Messrs. Clowes, it will require the sum of £26,000 to complete the Canal from the River Welland to Lake Ontario; and the Directors think it advisable, not to commence operations until stock

is subscribed to this amount.

Although this sum is trifling to a degree compared with the object of the undertaking, still the greatest difficulty is experienced in getting it subscribed.— There is a great want of enterprise through the country, and a very great scarcity of money; besides which an unfavorable opinion of the ultimate profit of this undertaking to the stockholders emanated from gentlemen possessing the greatest capital, and most influence in the district, and has been circulated both in this and the Lower Province, greatly to the prejudice of the present stockholders, and has deterred others from coming forward that were otherwise favorably disposed....

The President and Directors have determined on appealing to the public spirit of the land-holders throughout the Province;—A similar measure was adopted in the State of New York prior to the commencement of the grand Eric Canal, and donations, in land, received to the amount of one MILLION of DOLLARS. The Holland Land Company gave 100,-000 acres, Gideon Grainger, &c. &c. of Canandagua 10,000 acres-The inhabitants evinced the warmest attachment to their country by the zealous manner in which they defended it last war, and we have no doubt they feel an equal interest for its improve-

Besides if the opinion advanced by some should prove correct, and the stock turn out unproductive, it would be ungenerous for one part of the community to have their property enhanced at the expense of the other, forit is a well established fact that canals add 30 per cent to the value of all property connected by them. Suppose two countries similarly situated, in soil, climate, and every other local advantage, the one possessing good roads, the other water communication, commodities of all descriptions will be furnished by the latter, 30 per cent cheaper than the former, or in other words, the latter would be onethird richer than the former.

Canals diminish the distance between places and encourage the settlement of the most remote parts of the country. They create new sources of internal trade, and encourage manufactures of all descriptions. Surely no country can feel the want of this branch more than ourselves.

They unite cheapness, celerity, certainty, and safety in the transportation of commodities: a loaded boat can be taken from the mouth of the Grand River to Lake Ontario, in two days, carrying 30 tons, with one man and boy and two horses: allow each man and horse \$1 per day, and the tolls to be double the expense of transportation, it will not exceed 5s. per ton: add to this, 50 per cent. it will only bring flour to 9 pence per barrel.—However the fairest way to make calculations on an undertaking of this nature, is to establish precedents:—The Americans take one barrel of salt weighing 300 lbs. from Salina to Rochester, one hundred and two miles, from 18 to 20 yents per barrel. If we charge the same rate for 60 odd miles, it will bring flour from 13½ to 16 cents—Staves from \$2 to \$4 per thousand; and all other articles proportionably less.

We would likewise call your attention to the present danger of navigating Lake Erie from the mouth of Grand River to Fort Erie, and the immense advantage of navigating that Lake one month earlier every season.*

Land owners on Lake Ontario, although they may not feel their immediate interests connected in this undertaking, will derive great advantage from its accomplishment, by the increased employment of vessels, hands, &c. &c. on this lake, and trade of every description. In case it is not effected, the produce of all the upper country, the most fertile part of Canada, must find its way to the United States.

We have endeavored to state these facts in a clear and fair point of view—Our object by this Circular is to notify you that we intend calling on you with a subscription the purport of which will be, that in case the Welland Canal Company completes a Canal between the mouth of the Grand River and Lake Ontario, within five years from January next (1825), that you will give them so many acres of land situated so and so. On this additional security, we will endeavor either to borrow money or induce subscribers to come forward and take up the remainder of the stock, that we may proceed immediately and complete the undertaking.

Trusting it will meet with your favorable consideration,

I have the honor to be,

Sir,

Your obt. Servant,

(Signed) GEORGE KEEFER,

President IV. C. C.

But it produced no effect, all the principal gentlemen in the District refusing to give an acre.

In September Mr. Merritt was sent to New York, and there obtained stock to the amount of £14,000. Notice was inserted in the different papers in the States by the Agent, and the annexed in the Gleaner by the President.

#### NOTICE.

The remainder of STOCK required for completing the Welland Canal, from the River Welland to

Lake Ontario, having been subscribed at New York, the Directors will put that part of it from the Welland to Lock No. 1, (two iniles) under contract.—Proposals will be received at their Office, St. Catharines, until the 15th day of November next, for the whole or any one Section of it, (which are laid out in 20 chains each.) One mile and 54 chains of the above is from 25 to 49 feet, deep cut, for which part they will receive proposals, for both tunnelling and cutting open, and be guided by the offers received, which method they will adopt.

Any information on the subject may be obtained from Mr. Hall, Engineer at Queenston, or at the Canal Office.

(Signed)

GEORGE KEEFER.

President W. C. C.

St. Catharines, 20th Oct. 1824.

Twenty-two proposals were given in, and the summit contracted for by Mr. Hovey, Messrs. Kennedy & Co., and Mr. Simpson.

# No. II.

MINUTES OF THE BOARD OF DIRECTORS FOR 1824.

At a meeting held at Niagara, the 15th day of May, 1824, at the House of Mr. Alexander Rogers, pursuant to notice, the undermentioned persons were duly elected Directors of the Welland Canal Company, viz:—

The Hon. John Henry Dunn, William H. Merritt, Esquire, George Keefer, Esquire, Mr. John Decow, and Mr. Samuel Clowes, George Keefen, Chairman.

At the same meeting, on the same day, the Hon-John Henry Dunn, was unanimously appointed President of the said Company.

(Signed)

GEORGE KEEFER,

Chairman.

At a meeting of the Directors of the Welland Canal Company held at St. Catharines, the 24th May, 1824.

It was Resolved, That William H. Merritt, Esq., one of the Directors, proceed to York, as soon as possible, and wait on the Honorable J. H. Dunn, to solicit him to accept of the situation of President; conferred on him by the Directors on the 15th inst., at Niagara, more especially as a violent opposition has arisen to the measure; Mr. Merritt is likewise requested to state to Mr. Dunn, that it will not be necessary for him to attend to the concerns of the Company only to sanction their plan of operations from time to time.

GEORGE KEEFER,
JOHN DECOW,
WILLIAM H. MERRITT,

^{*} The Ice remains every Spring sometime on the North end of Lake Eric longer than to the South-west—So that the navigation is open from the Straits of Detroit to the Mouth of the Grand River some weeks before it is open to Fort Eric and Buffulo.

At a meeting of the Directors of the Welland Canal Company, held at St. Catharines, 8th June, 1824.

It was Resolved, That Chauncey Beedle, of St. Catharines, and Thomas Butler, of Niagara, Esgrs., be appointed Directors in the Place of John Henry Dunn, and Samuel Clews, resigned.

GEORGE KEEFER,

JOHN DECOW.

WILLIAM H. MERRITT,

M(G)

At a meeting of the Directors of the Welland Canal Company, held at the house of Paul Shipman, on 9th June, 1824,

GEORGE KEEFER, Esquire, of Thorold, was unanimously elected President, by ballot, in the place of the Hon. John Henry Dunn, resigned

It was Resolved, That William Hamilton Merritt, of St. Catharines, Esquire, be appointed Agent and Managing Director, to and for this Company, and to lawfully act in all manner of things relating thereto, according to the best of his knowledge, and ability.

Resolved, That James Gordon, of St. Catharines, Esquire, be appointed Treasurer of said Company, on his giving satisfactory security to the amount of eight thousand pounds lawful money of this Province, and that he be allowed two per cent on all monies received and paid out.

Resolved, That George Keefer, Junior, be appointed Secretary to the said Company, and that he be allowed 5s per day for the time he may be employed.—That the Secretary be requested to collect and insert in a book provided for that purpose, every document relating to, & preceding the formation of this Company and contemplated Canal, with a copy of plans, &c.

That the Honorable J. Irvine, or his firm, be appointed Agent for said Company, at Quebec, George Davis, Commission Merchant, Montreal, and any other in the different Districts in this Province, and elsewhere, that our agent may recommend—that he order our Secretary to notify those persons or agents of their appointment, likewise of the appointment of Mr. Merritt, with whom they are to correspond, and publish the same in the different newspapers.

That  $2\frac{1}{2}$  per cent be called in on each instalment by the 10th July next.

That all the proceedings of the Directors heretofore be fully approved of.

That our Engineers and Agents be paid for their services and expenses out of the 1st money received by the Treasurer.

That copies of all letters and documents be kept for the information of the Directors.

That the cut from the River Welland to the first lock on mountain be commenced as soon as we obtain the consent of the Committee, at Quebec.

GEORGE KEEFER, President.

JOHN DECOW,
CHAUNCEY BEEDLE,
Wm. H. MERRITT,

Directors.

approved of unanimously by the undersigned Directors, at their meeting the 9th day of June, 1824, for the good government of said Company, according to the 33rd clause of the act.

1st. That the President shall signall papers and give his sanction to all measures and proceedings adopted by a majority of the Directors, although the same may be contrary to his private opinion.

2nd. That we agree all and every of us to forward and promote the prosecution of this work to the utmost of our ability, and promise to give our attendance to all meetings that may be appointed to forward the same.

3rd. That our Agent presents all measures of Amended and Sept. 1860. I moment that may be contemplated for our concurrence and approval at each meeting previous to acting upon the same, that he be allowed the assistance of the Secretary, who shall be exclusively under his control.

4th That all money transactions must be approved of by the Directors, who will meet the 1st Monday in each month for that purpose, and that no money must be paid out by the Treasurer until their sanction is obtained.

Expunded 2nd of the That we promise to co-operate cordially with each other, and if a difference of opinion should arise, that we keep the same secret, and not allow it to be promulgated to the public—that all estimates of Engineers, and other matters that are necessary, we promise in like manner to keep to ourselves.

6th, that to prevent confusion, the President alAmended 2nd } ways to preside at each meeting, to have
full power to establish order and regularity—each
person to deliver his sentiments without interruption,
and each to speak in his proper turn.

7th. That those resolutions be referred to at any Expunsed and all times for our guidance and direction in case a difference of opinion should arise; and we promise likewise to adopt and insert any other resolution that may be approved of for the good government of the Company.

GEORGE KEEFER, President.

JOHN DECOW,
CHAUNCEY BEEDLE,
WM. H. MERRITT,
T. BUTLER,

At a Meeting of the Directors of the Welland Canal Company, held at the Canal Office on the 9th August.

Resolved, That a communication be made immediately to the committee at Quebec and Montreal, enclosing Messrs. Hall and Clowes report of the whole line, with the plans accompanying the same.

That we petition His Excellency for the waster lands in the township of Wainfleet immediately.

That we send for an American Engineer for the purpose of examining the different routes of the Canal.

**E**3

That all accounts against the Welland Canal Company be presented to the Treasurer for payment, if approved of, by the 1st Monday in September.

That the Secretary draw off plans of the Canal for York, Montreal, Quebec, New York, and the different Districts particularly interested, and to write to the stockholders in this District for the immediate payment of 2½ per cent. which, if not paid in a fortnight, to be prosecuted immediately.

That the Treasurer draw for  $2\frac{1}{2}$  per cent for Montreal and Quebec.

JOHN DECOW, CHAUNCEY BEEDLE, W. H. MERRITT,

By order,

GEORGE KEEFER, Jun. Secretary W. C. C.

At a meeting of the President and Directors of the Welland Canal Company, held at St Catharines, the 6th day of Sept. 1824,

It was Resolved, That we send our Agent immediately to New York, to get the remainder of the Stock subscribed, with discretionary power to go to any other place where he may think proper, and act in all things thereto according to the best of his judgment and ability.

That the Treasurer advance \$150 to pay the expenses of our Agent in his mission to New York for the purpose of obtaining the said Stock.

That we pay Mr. Merritt £66 4s. 3d., the amount of his expenses in going to Montreal and other places, last winter, which he expended for the benefit of the Company.

Resolved, That we approve of the documents sent to the different Agents in Montreal and Quebec.

Ordered, That the next meeting take place the 1st Monday in November, if not called sooner by the President.

GEORGE KEEFER, President,
J. BUTLER,
JOHN DECOW,
WILLIAM H. MERRITT,

Directors.

At a meeting of the President and Directors of the Welland Canal Company, held at P. Shipman's Inn, the 27th October, 1824,

The following resolutions were made :-

Resolved, That Mr. Francis Hall be employed as Engineer to level, estimate, and lay out the different Sections of the Canal, from the Chippawa to the Welland road, for the sum of £10.

That Mr. Merritt's expenses, over and above what has been granted him, be paid by the Company.

That the Secretary write circulars to the different Agents in the Province, to solicit them to take up the remainder of the Stock.

That Mr. Decow appoint some person to be employed in pointing out to the Contractors, the route which shall be marked out by the Engineer.

That a notice (copied from the Gleaner) be sent to the Lockport Observer for contracts.

That a notice be sent to the Gleaner for those who wish to take stock, to apply to the Agent at St. Catharines, on or before the 1st day of January next, after which time the book will be closed.

That the Directors meet again on Monday, 15th November next, at ten o'clock.

GEORGE KEEFER, President.

J. BUTLER,
WILLIAM H. MERRITT.
JOHN DECOW,
C. BEEDLE,

At a meeting of the President and Directors of the Welland Canal Company, held at Mr. Badgeley's Tavern, on the 11th December, 1824.

#### PRESENT.

GEORGE KEEFER, Esq., President.

JOHN DECOW, Esq.,
C. BEEDLE, Esq., and
WM. H. MERRITT, Esq.,

Twenty-one proposals for the delivery of timber required for the tunnel, were received.

The lowest was from Mr. Walter Clendenning, of St. Catharines, for the sum of 17s. 3d. currency per hundred, for getting out, delivering and framing.

The next was from Theophilus Brundage, of Grantham, the north half of tunnel, for nineteen and elevenpence.

All other proposals were at and over £1 5s., for delivering on the bank of Chippawa, at tunnel mouth.

It was, therefore, Resolved, That if Mr. Walter Clendenning gives our Agent satisfactory security for the performance of his proposal, that he accepts it, and in case he does not, that we accept of the offer of Mr. Theophilus Brundage.

Resolved, That our Agent writes Mr. Samuel Clowes and Francis Hall, Engineers, proposing the following queries:—

- 1. Will it be necessary to employ an Engineer constantly during the operation of the tunnel and opening the two mouths?
- 2. If so, will you engage to superintend it and be answerable for its correct execution?
- 3. Do you perfectly understand the practical part of tunnelling?

In case you do not conceive it necessary for an Engineer to be constantly employed, what will you charge us to superintend the construction of the tunnel, or what per day for occasional attendance.

The Directors wish to adopt the best and most economical system for the prosecution of the work already commenced, and wish you to give them your ideas fully on the subject as they must decide on a permanent plan in a very short time.

GEORGE KEEFER;

President W. C. C.

At a meeting of the Board, 18th Dec., 1824.

PRESENT:

GEORGE KEEFER, Esq., President.

JOHN DECOW, Esq.,
C. BEEDLE, Esq.,
WM. H. MERRITT, Esq.,

WILLIAM HAMILTON MERRITT, Esquire. having been appointed as an Agent for the Company since Directors were chosen, but as no such record appears in the books, it is now Resolved, That he be appointed from the 15th of November last past, to superintend the concerns of the Company, until the appointment of new Directors, and that it be his duty to attend wholly to it, submitting from time to time, for our consideration, any alterations that may be required in the plans adopted.

That Walter Clendenning cannot furnish the necessary security referred to, it is *Resolved*, That we accept Mr. Theophilus Brundage's proposal and enter into contract with him immediately.

GEORGE KEEFER,

President W. C. C.

#### No. 3.

# REPORT OF THE DIRECTORS OF THE WELLAND CANAL COMPANY,

For the Year 1824.

As it has ever been the intention of the Directors of this Company to prosecute the work committed to their management with vigor, they conceive it their duty to lay before the public a statement of their proceedings to this period.

A sufficient amount of stock having been subscribed on the 1st November last, to warrant the commencement of the undertaking, due notice was given and contracts made on the 15th, and the work commenced on the 30th of the same month, for the completion of the summit ridge extending from the River Welland to New Holland, a distance of three miles, two of which is to be tunneled.

Those contracts have been entered into with able, energetic, and experienced men, every way qualified for the undertaking, who have commenced their different sections and prosecuted their work with a zeal that does them credit, no preparatory arrangements could have been made, nevertheless the necessary buildings and machinery have been erected, tools and implements procured, and as many men employed as can work to advantage.

From the uncommon favorable state of the weather since our commencement, the work has progressed with unusual rapidity, both tunnel mouths have been taken out to bottom level and will be finished the whole canal size by the 1st May next at the extent.

A shaft has likewise been sunk to bottom level in the centre of the tunnel which has enabled the contractors to test the quality of the earth to a certainty, it proves a strong adhesive clay laying in regular strata from end to end and peculiarly adapted for a safe and rapid prosecution of the tunnel, no water is met with at either end or centre until below water

level. We can therefore assert with confidence, no serious obstruction will intervene.

The original plan of this canal was for a 9 feet wide tunnel, 8 feet locks and 16 feet bottom, the propriety of enlarging it to 15 feet wide, the same dimensions as the Eric Canal, was suggested, and has been adopted with the general concurrence of the stockholders—the advantages of this arrangement are apparent, more especially from our proximity to the American Canal, boats from which, will pass through this without shifting cargoes, our present dimensions are 15 feet wide, by 14 feet high, including 6 feet water.

When the tunnel was first contemplated it was supposed to occupy two years in its execution, we are now satisfied from experiment it can be completed within the present season, and Mr. Hovey the contractor, is making extensive preparations to that effect, from his plan submitted to us for the prosecution of this work, we are convinced it may become navigable by the 1st of November next.

Arrangements have been made with the stockholders in Lower Canada and New York for the prompt and regular payment of their instalments monthly, and they appear desirous from their communications to us, that we should prosecute the work in the most expeditious manner.—We are therefore enabled to assure the stockholders that this canal is progressing under the most favorable circumstances—it was generally supposed to be an undertaking of magnitude, the greatest difficulty to encounter has been to effect its commencement, this is removed, its prosecution is simple and easy—and if a moderate share of public patronage is afforded us, we anticipate the entire completion of the whole line from Grand River to Lake Ontario during the present season.

GEORGE KEEFER,

President W. C. C.

Welland Canal Office, St. Catharines, Fcb'y 1, 1825.

## No. 4.

We the subscribers do hereby promise to pay to Messrs. Wm. Hamilton Merritt and Job Northrop, or either of them, the sum annexed to our respective names, for the procuring the level of the ground between the Chippawa creek and Lake Ontario, for the purpose of ascertaining the expense of a Canal by the nearest and most practical route.

#### No. 5.

An Act to incorporate certain persons therein mentioned, under the style and title of the "Welland Canal Company."

WHEREAS, George Keefer, Thomas Merritt, George Adams, William Chisholm, Joseph Smith, Paul Shipman, John Decow, William Hamilton Merritt, and others, have petitioned to be incorporated for the purposes of this Act, be it therefore enacted by the King's most Excellent Majesty, by and with the advice and consent of the Legislative Council and Assembly of the Province of Upper Canada, constituted and assembled by virtue of and under the authority of an Act passed in the Parliament of Great Britain, entitled, "An Act to repeal certain parts of an Act passed in the fourteenth year of His Majesty's reign, entitled, 'An Act for making more effectual provision for the Government of the Province of Quebec, in North America, and to make further provision for the Government of the said Province,' and by the authority of the same, That the said George Keefer, Thomas Merritt, George Adams, William Chisholm, Jos'h Smith, Paul Shipman, John Decow, and William Hamilton Merritt, or either of them, together with all such persons as shall become stockholders of the Company, hereafter mentioned shall be. and are hereby ordained, constituted, and declared to be a body corporate and politic, in fact, and by

the name of "The Welland Canal Company"; and by that name they and their successors shall and may have continued succession, and by such name shall be capable of contracting and being contracted with, of sueing and being sued, pleading and being impleaded, answering and being answered unto in all manner of actions, suits, complaints, matters, and causes whatsoever; and that they and their successors may and shall have a common seal, and may change and alter the same at their will and pleasure; and also that they and their successors, by the same name of "The Welland Canal Company," shall be in law capable of purchasing, having, and holding, to them and their successors, any estate, real, personal, or mixed, to and for the use of the said Company, and of letting, conveying, or otherwise departing therewith, for the benefit and on account of the said Company, from time to time, as they may deem necessary or expedient.

2. And be it further enacted by the authority aforesaid, That the Directors of the Welland Canal Company shall have full power and authority to explore the country, lying between the River Welland, in the District of Niagara, and Luke Ontario, and between the said River Welland and the Grand River, or Ouse, in the said District, and to designate and establish, and for the said Company to take, appropriate, have, and hold, to and for the use of them and their successors, the line and boundaries of two intended canals, with their necessary locks, towing paths, basons, and railways, the one to connect the River Welland with Lake Ontario, and the other to connect the River Welland with the said Grand River, as near the mouth as praticable, and also to select such convenient sites for such and so many mills, manufactories, warehouses, and other erections as may be required by the said Company for the purposes thereof, and to purchase the same to and for the use of the said Company; Provided always, that nothing hereinbefore contained shall extend, or be construed to extend, to compel the owner or owners of any mill seat to sell, convey, or otherwise depart with the same to the said Company; Provided also that the owner or owners of any mill seat or mill seats using any additional supply of water brought thereto by the said canal shall pay a reasonable compensation therefor to the said Company, to be determined as hereinafter provided for determining any damage done to property by the said Company

3. And be it further enacted by the authority aforesaid, That it shall and may be lawful for the said Company, and they are hereby authorised and empowered, from and after the passing of this Act, to supply the said Canal, whilst making and when made, with water from all such brooks, springs streams, water courses, hollows, or other repositories of water, as shall be found in making the said Canals, or within the distance of one thousand yards, except as hereinbefore or hereinafter mentioned, from any part of the said Canal, or from any reservoir or reservoirs to be made for supplying the said Canal with water; and the said Company are hereby also authorised and empowered, by themselves and their deputies, agents, servants, and workmen, to make 1 or more reservoir or reservoirs, and such or so many feeders, tunnels, and aqueducts for supplying the said reservoirs and canal with water, and conveying water from any such reservoir or reservoirs to the said canal

as to them shall seem necessary and proper, (excepting as hereinafter or above mentioned;) and for the purposes aforesaid the said Company and their agents, servants, and workmen, are hereby authorised and empowered to enter into and upon the lands and grounds of or belonging to the King's Majesty, his heirs or successors, or to any other person or persons, bodies politic or corporate, (excepting as hereinbefore provided,) and to survey and take levels of the same or any part thereof, and to set out and ascertain such parts thereof as they shall think necessary and proper for making the said Canal and any such reservoir or reservoirs, feeders, tunnels, and aqueducts, and all such other matters and conveniencies as they shall think proper and necessary for making effecting, preserving, improving, completing, and using, in the said intended navigation; and also to bore, dig, cut, trench, remove, take, carry away, and lay earth, soil, clay, stone, rubbish, trees, roots of trees, beds of gravel or sand, or any other matter or things which may be dug and got in making of the said canal, or in making of any reservoir or reservoirs, feeders, or aqueducts, or out of any lands or grounds of any person or persons adjoining or laying contiguous thereto, and which may be proper, requisite, or convenient for currying on, continuing, or repairing the said canal, or other the said works, or which may hinder, prevent, or obstruct the making, using, completing, or maintaining the same; and also to make, build, erect, and set up in and upon the said canal, or upon the lands adjoining or near to the same, such and so many bridges, tunnels, aqueducts, sluices, locks, wears, pens for water, tanks, reservoirs, drains, wharves, quays, landing places, and other works, ways, roads, and conveniences, as the said Company shall think requisite and convenient for the purposes of the said navigation; and also from time to time to alter, repair, amend, widen, or enlarge the same, or any other of the conveniences above mentioned, as well for carrying or conveying goods, commodities, timber, and other things to and from the said canal as for the carrying or conveying of all manner of materials necessary for making, erecting, furnishing, altering, repairing, amending, widening, or enlarging the works of and belonging to the said navigation; and also place, lay, work, and manufacture the said materials, on the grounds near to the place or places where the said works or any of them are or shall be intended to be made, erected, repaired, or done, and to build and construct the several locks, bridges, works, and erections belonging thereto; and also to make, maintain, repair, and alter any fences or passages, over, under, or through the said canal, or the reservoirs and tunnels, aqueducts, passages, gutters, water courses, and sluices, respectively, which shall communicate therewith; and also to make, set up, and appoint drawing boats, burges, vessels, or rults, passing in, through, along, or upon the said canals, as they the said Company shall think convenient; and to construct, erect, and keep in repair any piers, arches, or other works, in, upon, and across any rivers or brooks, for making, using, maintaining, and repairing the said canal, and the towing paths on the sides thereof; and also to construct, make, and do all other matters and things which they shall think necessary and convenient for the making, effecting, preserving, improving, com-pleting, and using the canal in pursuance and within the true meaning of this act; they the said commis-

sioners doing as little damage as may be in the execution of the several powers to them hereby granted, and making satisfaction in manner hereinafter mentioned for all damages to be sustained by the owner or occupiers of such lands, tenements, or hereditaments: Provided that nothing in this act contained shall extend, or be construed to extend, to authorise the said Company to divert or take away for the use of the said canal the water of any stream or river so as to injure any mills within the limits of the said intended canal, without the consent of the owner or owners thereof.

- 4. And be it further enacted by the authority aforesaid. That should the owner or owners, occupier or occupiers, of any mill seats on the line of the said canal, or within five hundred yards thereof, consider the same in any manner injured, or the value thereof in any way depreciated, from the erection of rival establishments, or from any other cause growing out of the cutting and making the said canal, and for the compensation of which no provision is made in this act, it shall and may be lawful for the said Company, and they are hereby required to purchase the same at a fair valuation, founded on an average of former years, to be ascertained by arbitrators, as hereinafter provided, to ascertain the value of lands and tenements to be purchased, or the amount of damages in any case sustained; Provided always that nothing herein contained shall extend or be construed to extend to compel the said owner or owners, occupier or occupiers of any such mill seats, to sell, convey, or otherwise dispose of the same to the said Company.
- 5. And be it further enacted by the authority aforesaid, That it shall and may be lawful for the said Company, in constructing and making the said Ca-nal from Lake Ontario to the River Welland, and from the said Grand River to the River Welland, to. take and appropriate, for the use of the said Canal, as much water as they may find necessary from out of the River Ningara, the said Grand River, and River Welland; and it shall be lawful for the said Company to erect, at the mouth of the River Welland, a pier, and at the points of departure of the said Canal, from the said Grand River, and from the River Welland, and at the place of its termination at Lake Ontario, such and so many wharves, quays, piers, fore-bays, locks, and other erections as may be necessary for the use of the said Company and the purposes of transport on the said Canal: provided always that no such erection, work, or device of the said Company shall obstruct the navigation of the said River Welland or the said Grand River, or in any manner prejudice any establishment, work, or depot, of or for the use of the royal navy, or other department of the public service now formed and situate at or near the mouth of the Grand River or River Welland, or upon the banks thereof, or to be placed on any ground more than one hundred yards distant from such points of departure and termination, as aforesaid, and that the powers of obtaining any land for that purpose shall be governed by the provisions therein contained.
- 6. And be it further enacted by the authority aforssaid, That after any lands or grounds shall be see out and ascertained to be necessary for making and completing the said Canal and other purposes and conveniences hereinbefore mentioned, it shall and F3

may be lawful for all bodies politic, communities, corporations, aggregate or sole guardians, and all other trustees whomsoever, not only for and on behalf of themselves, their heirs and successors, but also for and in behalf of those whom they represent, whether infants, lunatics, idiots, femmes couverts, or other person or persons who are or shall be possessed of or interested in any lands or grounds which shall be set out and ascertained as aforesaid, to contract for, sell and convey unto the said company all or any part of such lands or grounds which shall from time to time be set out and ascertained as aforesaid; and that all such contracts, agreements, and sales shall be valid and effectual in law to all intents and purposes whatsoever, any law, statute, or usage to the contrary thereof in anywise notwithstanding; and the amount thereof shall be established in the manner hereinafter mentioned, for the determination of the value of lands or other tenements to be purchased by the said company, and of the amount of damage committed

7. And be it further enacted by the authority aforesaid, That the Directors of the said Company shall be, and the same are hereby empowered to contract, compound, compromise, and agree with the owners and occupiers of any land through or upon which they may determine to cut and construct the said intended Canal, with all necessary and convenient locks, towing paths, railways, and other erections and constructions contemplated by this act to be cut, erected, constructed, and built, either for the absolute purchase of so much of the said land as they shall require for the purposes of the said Company, or for the damages which he, she, or they shall and may be entitled to recover from the said Company in consequence of the said intended canal, locks, towing paths, railways, and other constructions and erections being cut and constructed in and upon his, her or their respective lands; and in case of any disagreement between the said Directors and the owner or owners, occupier or occupiers aforesaid, it shall and may be lawful from time to time as often as the said Directors shall think fit, for each owner or occupier so disagreeing with the said Directors, either upon the value of the lands and tenements proposed to be purchased, or upon the amount of damages to be paid to them as aforesaid, to nominate and appoint one indifferent person, and for the said Directors to nominate and appoint an equal number of indifferent persons, who, together with one other person, to be elected by ballot by the said persons so named, shall be arbitrators to award, determine, adjudge, and order the respective sums of money which the said Company shall pay to the respective persons entitled to receive the same, the award of a majority of whom shall be final; and the said arbitrators shall, and they are hereby required to attend at some convenient place in the vicinity of the route of the said intended Canal, to be appointed by the said Directors within eight days after notice be given them by the said Directors for that purpose, then and there to arbitrate, award, adjudge, and determine such matters and things as shall be submitted to their consideration by the parties interested; and that each arbitrator shall be sworn before some one of His Majesty's Justices of the Peace in and for the said District, any of whom may be required to attend the said meeting for that purpose well and truly to assess the damages between the parties according to the best of his

judgment: Provided always that no arbitrator shall be compellable to attend any such meeting of the arbitrators aforesaid, who shall usually reside more than fifty miles from the place of meeting.

- S. And be it further enacted by the authority aforesaid, That any award made under this act shall be subject to be set aside on application to the Court of King's Bench in the same manner and on the same grounds as in ordinary cases of submission by the parties, in which case a reference may be again made to arbitrators, as hereinbefore provided.
- 9. Provided always, and be it further enacted by the authority aforesaid. That if any part of the canalshall pass through any tract of land in the possession of any tribe or tribes of Indians in this Province, or if any act occasioning damage to their property or their possessions shall be done under the authority of this act, compensation shall be made to them therefor in the same manner as is provided with and respect to the property, possession, or rights of other individuals; and that in any arbitration required for settling the amount of such compensation, the chief officer of the Indian Department within this Province is hereby authorised and required to name an arbitrator on the behalf of the said Indians, and the amount which shall be awarded in any such case shall be paid to the said chief officer of the Indian Department to the use of the said Indians.
- 10. And he it further enacted by the authority afore-said, That when and so often as it shall be necessary to cut into any highway in order to conduct the said canal through the same, the said Company of proprietors shall within one month cause to be constructed a secure, sufficient, and commodious bridge for the passing of curriages in order to re-establish the communication between the several parts of such highways, under the penalty of five pounds currency for each and every day after the expiration of the said time, which the said Company shall neglect to construct such secure, sufficient, and commodious bridge as aforesaid.

# 11. [Repealed by 7th Geo. 4, C. 19, S. 7.]

12. And be it further enacted by the authority aforesaid, That if any person or persons shall wilfully, maliciously, or to the prejudice of the said Company, break, throw down, damage, or destroy any bank, lock, gate, sluice, or any works, machine, or device to be erected or made by virtue of this act, or do any other wilful act, hurt, or mischief, to disturb, hinder, or prevent the carrying into execution, or completing, supporting, or maintaining the said canal, every such person or persons so offending shall for-feit and pay to the said Company the value of the damage, proved by the oath of two or more credible witnesses to have been done; such damages, together with costs of suit in that behalf incurred, to be recovered by action in any court of law in this Province having jurisdiction competent to the same; or in case of default of payment, such offender or offenders may be committed to the common gool for any time not exceeding three months, at the discretion of the court before which such offender shall be convicted.

13. And be it further enacted by the authority aforesaid, That if any person shall float any timber upon the said canal, or shall suffer the overloading of any boat

or vessel or raft navigating in or upon the said canal, so as by such over-loading to obstruct the passage of any other boat, wessel, or raft, and shall not immediately upon due notice given to the owner or person having the care of such boat, vessel, or raft, so obstructing the passage aforesaid, remove the same so as to make a free passage for the other bouts, vessels, or rafts, every, such owner or person floating such timber, or having the care of such boat, vessel, or raft so obstructing the passage as aforesaid, shall forfeit and pay for every such offence the sum of five pounds currency; and if any person shall throw any ballast, gravel, stones, or rubbish, into any part of the said canal, every such person shall for every such offence forfeit a sum not exceeding five pounds currency; which said respective forfeitures shall be paid to the Company, to be by them applied for the purposes of the said navigation.

14. And be it further enacted by the authority aforesaid, That if any boat, vessel, or raft shall be placed in any part of the said canal so as to obstruct the navigation thereof, and the person having the care of such boat, vessel, or raft, shall not immediately upon the request of any of the servants of the said Company made for that purpose, remove the same, he shall for every such offence forfeit a penalty of ten shillings of lawful money of Upper Canada, for every hour such obstruction shall continue; and it shall be lawful for the agents or servants of the said Company to cause any such boat, vessel, or raft, to be unlouded if necessary, and to be removed in such manner as shall be proper for preventing such obstruction in the navigation, and to seize and detain such boat, vessel, or raft, and the loading thereof, or any part of such loading, until the charges occasioned by such unloading and removal are paid; and if any boat or vessel shall be sunk in the said canal, and the owner or owners, or the person or persons having the care of such boat or vessel, shall not, without loss of time weigh or draw up the same, it shall be lawful for the agents or servants of the said Company to cause such boat or vessel to be weighed or drawn up, and to obtain and keep the same until payment be made of all expenses necessarily occasioned thereby.

15. Provided always, and he it further enacted by the authority aforesaid. That it shall and may be lawful to and for the owners and occupiers of any lands adjoining to the said canal, to use any pleasure boats or any boats upon the said canal for the purpose of husbandry, or for conveying cattle from one farm, or part of a farm or lands, to any other farm or lands of the same owner or occupier (not passing through any lock without the consent of the said Company, their successors, or their principal agent for the time being), without interruption from the said Company or their successors, and without paying any rate or duty for the same, so as the same be not made use of for the carriage of any goods, wares, or merchandize to market, or for sule, or for any person or persons for hire, and shall not obstruct or prejudice the navigation of the said intended canal, or the towing-paths thereof.

16. And Whereas it may hereafter happen from floods, or from some unexpected accident, that wears, flood-gates, dams, banks, reservoirs, trenches, or other works of the said navigation, may be damaged or destroyed, and the adjacent lands or the property thereon thereby damaged, and that it may be neces-

sary that the same should be immediately repaired or re-built to prevent further damages, be it therefore enacted by the authority aforesaid. That when and so often as any such case may happen, it shall be lawful for the said Company from time to time, or for their or any of their servants, agents, or workmen, without any delay or interruption from any person or persons whomsoever, to enter into any lands, grounds, or hereditaments adjoining or near to the said intended canal, or branches, reservoirs, or trenches, or any of them (not being an orchard, garden, or yard), and to dig for, work, get, and carry away and use all such stones, gravel, and other materials as may be necessary or proper for the purposes aforesaid, without any previous treaty whatsoever with the owner or owners, occupier or occupiers of, or other person or persons interested in such lands, grounds, or heredituments, or any of them, doing as little damage thereby as the nature of the case will admit of, and making recompense for such damages to the owners and occupiers of, or other persons interested in such lands, grounds, property, or hereditainents, within the space of six calendar months next after the same shall have been demanded for all damages which shall or may be done by means of such accident, and means of the digging for, getting, working, taking, carrying away, and using such stones, gravel, and materials, or any of them; which damages, and the satisfaction and recompense in respect thereof, shall be settled, adjusted, ascertained, and determined, by the ways and means hereinbefore described with respect to other damages done by the making and completing the said navigation.

17. And be it further enacted by the authority aforesaid. That the said Company shall and may in such parts of the said canal as shall not be of sufficient breadth for admitting a boat, vessel, or raft to turn about or lie, or for two boats or other vessels or raft to pass each other, to open or cut proper spaces or places in the lands adjoining to the said canal, at convenient distances from each other for the turning, laying, and passing of any such boat, vessel, or raft, and that the said boats, vessels, and rafts, being hauled or navigated upon the said canal, shall, upon meeting any other boat or vessel, stop at, or go back to and lie in the said places or spaces in such manner as the Directors, or the major part of them, under their hands shall direct and appoint

18. And be it further enacted by the authority aforesaid, That it shall and may be lawful for the President and Directors of the said Company to regulate from time to time and establish the rates of toll payable by persons navigating upon the said canal; and the said Company shall annually, if required, exhibit an account to either branch of the Legislature of the tolls collected upon the said canal, and of the sums expended in keeping the same in repair, and also of the goods, wares, and merchandize transported in and along the same : Provided always, that if at any time after the expiration of five years from the commencement of the navigation upon any part of the said canal the Legislature should deem the tolls levied thereon excessive, it shall be lawful for them to reduce the same to such a standard as they may think just, so that the same shall not be reduced to a rate which will produce to the said Company less than twenty per cent on the capital actually expended in making the said canal.

19. And be it further enacted by the authority aforesaid. That the said Company, to entitle themselves to the benefit and advantages to them granted by this act, shall, and they are hereby required to make and complete the said canal, rail-way, towing-paths, and other crections required for the invigation thereof, (as laid down in the Report of Mr. Hiram Tibbet, Engineer,) from Lake Ontario to the River Welland within five years from the date hereof, and from the River Welland to the said Grand River within seven years from the date hereof, so as to be navigable for boats, barges, and rafts; otherwise this act, and every matter and thing herein contained, shall cease and be utterly null and void: Provided nevertheless that the said Company shall be entitled to all the advantages of this act inasmuch as relates to the cut to the River Welland in case they complete and finish that part of it within the time limited

20. And be it further enacted by the authority aforesaid. That the Company shall at their first general meeting held after any part of the canal shall be finished, ascertain and fix the rates and dues to be taken by virtue of this act; and that it shall and may be lawful for the Directors of the said Company to after the said rates at any subsequent meeting, after giving three months' public notice of the same, and that a schedule of rates shall be affixed on the different public places on the route of the said canal.

21. And for preventing disputes touching the tonnage of any boat, barge, or other vessel navigating upon the said canal, be it further enacted by the authority aforesaid, That the owner or master of every such boat, barge, or vessel shall permit and suffer every such boat, barge, or vessel to be gauged or measured, and refusing so to permit and suffer shall forfeit and pay the sum of forty shillings currency; and it shall be lawful for the said Company, or their toll gatherer, or such person or persons as shall be appointed by them for that purpose, and such owner or master, each to choose one person to measure and ascertain such tonnage, and to mark the same on such boat, barge, or other vessel, which mark shall always be evidence of the tonnage in all questions respecting the payment of the aforesaid rates or dues; and if such owner or master shall refuse or decline to choose a person in his behalf as aforesaid, then the person appointed by the said Company or their toll gatherer shall have alone the power of ascertaining such tonnage.

22. And be it further enacted by the authority aforesaid, That all persons whatsoever shall have free liberty to use with horses, cattle, and carriages, the private roads and ways to be made as aforesaid (except the towing paths) for the purpose of conveying any goods, wares, merchandize, timber, and commodities whatsoever, to and from the said canal, and also tonavigate on the said canal with any boats, barg is, vessels, or rafts, and to use the said wharves and quays for loading and unloading any goods, wares, merchandize, lumber, and commodities, and also to use the said towing paths with horses for drawing and hauling such boats and vessels upon payment of such rates or dues as shall be established by the said Company.

23. And be it further enacted by the authority aforesaid, That the said several dues shall be paid to such person or persons, at such place or places near to the said canal, in such manner and under such regulations as the said Directors shall direct or appoint; & in case of denial or neglect of payment of any such rates or dues or any part thereof, on demand to the person or persons appointed to receive the same as aforesaid, the said Company may sue for and recover the same in any court having jurisdiction thereof, or the person or persons to whom the said rates or dues ought to be paid may, and he is, and they are, hereby empowered to seize and detain such boat, vessel, barge, or raft, for or in respect whereof such rates or dues ought to be paid, and detain the same until payment thereof.

24. [Repealed by 6th Geo. 4, Chap. 2.]

25. And he it further enacted by the authority aforesaid, That each share in the said Company shall be twelve pounds ten shillings provincial currency, and the number of shares shall not exceed three thousand; and that books of subscription shall be opened in the several assize towns in this Province within two months after the passing of this act, by such person or persons, and under such regulations, as the majority of the said petitioners, assembled at a meeting to be called by any one of them in the town of Niagara for that purpose, shall direct.

26. And be it further enacted by the authority aforesaid, That it shall and may be lawful for any person or persons, His Majesty's subjects or others, to subscribe for any number of shares (not exceeding in the first instance eighty,) the amount whereof shall be due and payable to the Company in the manner hereinafter mentioned, that is to say,—ten per cent on each share so subscribed shall be payable to the said Company immediately after the stockholders shall have elected the number of Directors hereinafter mentioned, and the remainder by instalments of not more than ten per cent at such periods as the President and Directors shall from time to time direct and appoint for the payment thereof: Provided that no instalment shall be called for in less than thirty days after public notice shall have been given in all the newspapers in every district of this Province where ary stock shall have been subscribed: Provided always that if any stockholder or stockholders as aforesaid shall neglect or refuse to pay to the said Company the instalment due upon any share or shares held by him, her, or them, at the time required by law, such stockholder or stockholders shall forfeit such share as aforesaid, with the amount previously paid thereon; and the share or shares shall be sold by the Directors at public auction after having given thirty days' notice, and the proceeds thereof, together with the amount previously paid thereon, shall be accounted for and applied in like manner as any other funds of the said Company: Provided always that such a such as the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of the said Company of that such purchaser or purchasers shall pay to the said Company the amount of the instalment required, over and above the purchase money of the share or shares to be purchased by him, her, or them as aforesaid, immediately after the sale, and before they shall he entitled to a certificate of the transfer of such share or shares so to be purchased as aforesaid.

27. And be it further enacted by the authority aftersaid, That if the whole number of shares shall not be subscribed within two months after the books of subscription shall have been opened as aforesaid, then and in such case it shall and may be lawful for any former subscriber to increase his, her, or their subscription; and that after the first instalment shall have been paid to the said Company, the said shares shall become transferable on the books of the Company: Provided always that until the said canal shall be completed from the River Welland to Lake Ontario, no part of the funds paid in shall be applied to any other purpose whatsoever, and after the same is completed not more than five thousand pounds shall be expended in the erection of machinery until the cut to the said Grand River is completed; and the said Company shall proceed to the completion of the whole with as little delay as possible.

28. And be it further enacted by the authority afore-id. That so soon as five thousand pounds shall have been subscribed, it shall and may be lawful for such subscribers or any of them, to call a meeting at some place to be named (in the town of Niagara,) for the purpose of proceeding to the election of the number of Directors hereinafter mentioned; and such election shall then and there be made by a majority of shares voted for in manner hereinafter prescribed in respect of the annual election of Directors, and the persons then and there chosen shall be the first Directors and be capable of serving until the first Monday in April succeeding their election; and the Directors so chosen shall, as soon as a deposite amounting to five hundred pounds upon the shares subscribed as aforesaid shall be paid to the said Directors, commence the business and operations of the Company: Provided always that no such meeting of the said subscribers shall take place until a notice is published in all the newspapers in this Province at the distance of not less than thirty days from the time of such notification.

29. And be it further enacted by the authority aforesaid, That the stock, property, affairs, and concorns of the suid Corporation shall be managed and conducted by five Directors, one of whom shall be chosen President, who shall hold their offices for one year, which Directors shall be stockholders, and shall be inhabitants of this Province, and be elected on the first Monday in April in every year, at such time of the day and at such place near the line of the said intended canal, as a majority of the Directors for the time being shall appoint; and public notice shall be given by the said Directors in the different newspapers printed within this Province, of such time and place not more than sixty nor less than thirty days previous to the time of holding the said election; and the said election shall be held and made by such of the stockholders of the said Company as shall attend for that purpose in their own proper persons or by proxy; and all elections for Directors shall be by ballot, and the five persons who shall have the greatost number of votes at any election shall be Directors, except as is hereinafter directed; and if it should happen at any election that two or more persons have an equal number of votes in such manner that a greater number of persons than five shall by plurality of votes appear to be chosen as Directors, then the said stockholders hereinbefore authorised to hold such election shall proceed by ballot a second time, and by plurality of votes determine which of the said persons so having an equal number of votes shall be Director or Directors so as to complete the whole number of five; and the said Directors so soon as

may be after the said election, shall proceed in like manner to elect by ballot one of their number to be President, and two of the Directors which shall be chosen at the preceding year, excepting the President, shall be ineligible to the office of Director for one year after the expiration of the time for which they shall be chosen Directors; and in case a greater number than three of the Directors, exclusive of the President who served for the last year shall appear to be elected, then the election of such person or persons above the said number who shall have the fewest votes shall be considered void, and such other of the stockholders as shall be eligible, and shall have the greatest number of votes, shall be considered as clected in the room of such last described person or persons, who are hereby declared ineligible as aforesaid; and the President for the time being shall always be eligible to the office of Director, but stockholders not residing within the Province shall be ineligible; and if any Director shall absent himself from this Province and cease to be an inhabitant thereof for the space of six months, his office shall be considered as vacant, and if any vacancy or vacancies should at any time happen among the Directors, or if the office of President, by death, resignation, or removal from the said Province, such vacancy or vacancies shall be filled for the remainder of the year in which they may happen, by a person or persons to be nominated by a majority of the Directors:— Provided always that no person shall be eligible to be a Director who shall not be a stockholder to the amount of at least ten shares.

30. And be it further enacted by the authority aforesaid, That each stockholder shall be entitled to a number of votes proportioned to the number of shares which he or she shall have held in his or her own name at least three months prior to the time of voting, (except at the first election) according to the following rates—that is to say, at the rate of one vote for each share not exceeding four; five votes for six shares; six votes for eight shares; seven votes for ten shares; and one vote for every five shares above ten.

31. And be it further enacted by the authority aforesaid, That in case it should at any time happen that an election of directors should not be made on any day when pursuant to this Act it ought to have been made, the said corporation shall not for that cause be deemed to be dissolved, but that it shall and may be lawful on any other day to hold and make an election of directors in such manner as shall have been regulated by the laws and ordinances of the said corporation.

32. And be it further enacted by the authority aforesaid. That it shall be the duty of the directors to make half yearly dividends of so much of the profits of the said Company as to them, or to the majority of them shall appear advisable; and that once in every three years, and oftener if thereunto required by a majority of the votes of the stockholders, to be given agreeably to the ratios hereinbefore established at a general meeting to be called for that purpose, an exact and particular statement shall be rendered of the debts which shall have remained unpaid after the expiration of the original credit for a period of treble the term of that credit, and of the surplus profits, if any, after deducting losses, dividends, and expenditures.

G3

33. And be it further enacted by the authority aforesaid, That the directors for the time being, or a major part of them, shall have power to make and subscribe such rules and regulations as to them shall appear needful and proper, touching the management and disposition of the stock, property, estate, and effects of the said corporation, and touching the duty and conduct of the olficers, clerks, and servants employed by the said Company, and all such other matters as appertain to the business of the said Company, and shall also have power to appoint as many officers, clerks, and servants, for carrying on the said business, and with such salaries and allowances as to them shall seem meet, Provided that such rules and regulations be not repugnant to the laws of this Province.

34. And be it further enacted by the authority aforesaid, That every treasurer, before he enters into the duties of his office, shall give bond, with two or more sureties, in such sum as may be satisfactory to the directors with condition for the fuithful discharge of his duty.

35. And be it further enacted by the authority aforesaid, That all penalties and forfeitures for offences against this Act, or against any rule, order, or by-law of the said Company to be made in pursuance thereof, for the levying and recovering whereof no particular mode is hereinbefore directed, shall, upon proof of the offences respectively before any two justices of the peace for the district of Niagara, either by confession of the party or parties, or by the oath of one credible witness (which oath such justices are hereby empowered and required to administer without fee or reward) be levied by distress and sale of the goods and chattels of the parties offending, by warrant under the hand and seal of such justices, (which warrant such justices are hereby empowered to grant,) and the overplus, after such penalties and forfeitures, and the charges of such distress and sale are deducted, shall be returned, upon demand, to the owner or owners of such goods and chattels; and in case such sufficient distress cannot be found, or such penalties and forfeitures shall not be forthwith paid, it shall be lawful for such justices by warrant under their hand and seal, to cause such offender or offenders to be committed to the common gaol of the District of Niagara, there to remain without bail or mainprize, for such time as such justices may direct, not exceeding twenty days, unless such penalties and forfeitures and all reasonable charges attending the same shall be sooner paid and satisfied, all which said penalties and forfeitures when levied and satisfied in manner aforesaid, shall be paid to the said Company, to be by them applied for the purposes of the said navigation.

36. And be it further enacted by the authority aforesaid. That the land and ground to be taken and used for the caid Canal, the towing paths and the ditches, drains, and fences, to separate any such towing paths from the adjoining lands, shall not exceed forty yards in breadth, except in such places where the said Canal shall be raised higher or cut above five feet deeper, than the present surface of the land; and in such places where it shall be judged necessary for boats and other vessels, and rafts to

turn, lie, or pass each other, not more than sixty-five yards in breadth in any of those places, without the consent of the owner or owners of such land or ground respectively, under his, her, or their hand or scal, in writing, first had and obtained; nor shall any land or ground be let out, ascertained, contracted for, or sold, for the purpose of making any navigable cut, trench, or sluice, to convey goods or other things to or from the said Canal without such consent as aforesaid, anything in this act contained to the contrary notwithstanding.

37. And be it further enacted by the authority aforesaid, That after a period of thirty years after the making and completing of the said Canal it shall and may be lawful for His Majesty, his heirs and successors, to assume the possession and property of the same, and of all and every the works and dependencies thereunto belonging, or in anywise appertaining, upon paying to the said Company, their heirs, executors, administrators, and assigns, the full amount of their respective shares, or of the sums furnished and advanced by each subscriber towards the making and completing of the said Canal, together with such further sum as will amount to twenty-five per centum upon the monies so advanced and paid, as a full indemnification to such Company; and the said Canal shall, from the time of such assumption in manner aforesaid, appertain and belong to His Majesty, his heirs and successors, who shall from thenceforth be substituted in the place or stead of the said Company, their heirs and assigns, for all and every the purposes of this Act, in so far as regards the said Canal.

38. And be it further enacted by the authority aforesaid, That if any plaint shall be brought or commenced against any person or persons for any thing done or to be done in pursuance of this Act, or in execution of the powers and authorities or the orders and directions hereinbefore given or granted, every such suit shall be brought or commenced within six calendar months next after the fact committed; or in case there shall be a continuation of damages, then within six calendar months next after the doing or committing of such damages shall cease, and not afterwards; and the defendant or defendants in such action or suit shall and may plead the general issue and give this Act and the special matter in evidence at any trial to be had thereon, and that the same was done in pursuance and by the authority of this act; and if it shall appear to be so done, or if any action or suit shall be brought after the time hereinbefore limited for bringing the same, then a verdict shall be given for the defendant.

39. And be it further enacted by the authority aforesaid. That nothing herein contained shall effect in any manner or way whatsoever the right of His Majesty. His heirs and successors, or of any person or persons, or of any bodies politic or corporate, except as is herein expressly provided.

40. And be it further enacted by the authority aforesaid, That this Act shall be deemed and taken to be a public Act, and as such shall be judicially noticed by all Judges, Justices of the Peace, and other persons, without being specially pleaded.

No. 6.

NEW York, December 22nd, 1824.

GEORGE KEEFER, Esq.,

President of the Welland Canal Comp'y., St. Catharine's, U.C.,

Sin,-Your letter dated 16th ult., addressed to the Stockholders of "the Welland Canal Company" in New York has been laid before us; and having met for the purpose of taking the same into consideration we beg to state the result of our sentiments, in all of which we have been unanimous.

We have requested Mr. Thomas Proctor to act as Agent and beg to recommend him as a fit and proper person to attend to the concerns of the Company in this city.

We highly approve of your so soon getting your contract made and commencing operations. be greatly to the advantage of the Stockholders to get

the whole finished as soon as practicable.

We approve of encreasing the Tunnel to 15 feet wide, (15 feet is the clear of the Eric Canal in this State) as we ought to keep in view, Sloop, as well as Boat navigation in order to render the Stock valua-We beg leave to recommend to the consideration of the Directors, how far it is practicable (now) to make the Canal large enough for Sloop navigation over the ridge from the Chippewa river to the descent towards Luke Ontario, which we understand is not more than three miles. Should this not be deemed prudent at present, but keeping it in view, we think it would be advisable to have an open cut instead of a Tunnel-we submit, that if this part of the Canal should be cut for Sloop navigation—the other parts hereafter could be done without any material inconvenience, and would greatly increase the supply for Hydraulic purposes.

In case of the enlargement of the dimensions of the Canal it might become necessary to apply to the Legislature, for un extension of privileges and un in-

crease of capital.

In the above remarks you will please to observe we merely offer our sentiments, as to what we deem desirable to be accomplished, for unless the work contemplated is rendered truly efficient for the purposes of an extensive trade, the Stockholders cannot look with confidence to realize those advantages which may be fairly anticipated, if carried through upon a liberal plan and free from all local interests.

We have agreed to make the payment of the first instalment five per cent. and shall pay it to the Agent on the 1st day of January next.

We have the honor to be,

Sir. Your most obedient Servants,

WILLIAM McLEOD DAVID R. LAMBERT, JAMES BUCHANAN, J. B. YATES CHARLES MOWATT, JOHN S. BARTLETT JAMES BRYAR W. S. CALDWELL.

No. 7.

General description of the Welland Canal, from Lock No. 1., to Lake Ontario, by the Valley of the 12 Mile Creek.

From Lock No. 1, near the Holland road, proceeding by the sight of Mr. Davis' house, following the valley of the middle branch of the 12, by Wilson's farm, continuing by favorable ground to the crossing of the short Hills and Beaver dam road near Mr. Sweazy's house, joining Creek between Sweazy's clearing and wood, continuing by the course of the stream, the banks being sufficiently high, cutting of angles and removing detached stones, pass the junction of the East Branch of the twelve, from thence adhering where practicable, by the course of the stream to De Cou's mill pond which must be raised to the level of descending Lock No. 5, departing from the stream and following its left bank, passing two ravines by embankments. One of these embankments is conveniently situated for a waste wier, from thence descending gradually to the middle of Cooper's Plantation where an Embankment 60 feet wide at top, 12 at bottom, and 30 feet in depth, must be constructed, thereby forming No. 16 Lock pond, and avoiding rock excavation in subjacent Lockage, from the point descending the mountain by a succession of Locks, through a defile of sufficient width for Canal size and Lock ponds, joining the Western Branch of the 12 Creek at Brown's bridge, situated upon the Beaver dam and Short Hills road, proceeding partly by stream, to a convenient spot at bottom of Thomas's mill pond for placing Lock No. 25, following the united waters of the creek, cutting several bends, to near Mrs. Campbell's house, where a deviation commences, thereby avoiding many circuitous windings of the stream and securing favorable lengths for middle ponds passing through easy ground, to Blue Hills where the level runs into a plantation. The soil at this place consists of a moist clay loom; no difficulty will be experienced, only care requisite in execution to raise the embankments with sufficient slopes, A short embankment will be required opposite Dettrick's Bridge, proceeding onward through tavorable level cutting, passing St. Catharine's road, 100 yards to the left of Bridge, descending by Locks No. 28 and 29, to creek, from thence adhering generally to the course of the stream passing Mr. Merritt and Adam's mill pond, inserting Locks and shortening the Line by several cuts, raising the banks in some places, facing and sloping in others, to the junction with Richardson's creek, where the waters of the 12 are at present 6 feet indepth and expand over a considerable surface for a distance of 2 miles to the Beach, between the 12 mile basin and Lake Ontario.

For passing this length a timber Tracking puth must be formed-general fall from the Chippewa to Lake Ontario is 330 feet.

By raising an embankment across the Beach 550 yards in length and 34 feet in height, an additional depth of water will be obtained in the Basin and in the direction of the tracking path, so that Vessels drawing eight feet water may at navigable seasons, proceed to the entrance of the artificial cut, a distance of nearly 3 miles from Ontario.

The cut across the Beach, Guard Lock, and protecting Piers must be executed at the Northern Angle of the Beach, this situation being composed of a strong clay soil and subsoil, is well adapted for timber work and excavation.

FRANCIS HALL,

Engineer.

QUEENSTON, 10th December, 1824.

No. 8.

ABSTRACTESTIMATE of tunnel line by open cutting for a Schooner Navigation, 6 feet depth of water and 25 feet width of surface.

	\$ 208,348

FRANCIS HALL, Engineer.

Queenston, 20th January, 1825.

# No. 9. CHIPPAWA CANAL. Specification for No. 1 Section. DESCRIPTION OF THIS CUT.

To commence at the Chippawa River near Brown's farm, passing through favorable ground for a distance of 1733 yards, to commencement of deep cutting. The extent of this excavation, also the various heights are carefully marked upon the section. Extreme length of summit level from the Chippawa to No. 1 Lock head is 3 miles and 1120 yards. The soil and subsoil throughout this section as ascertained by boring is a strong adhesive clay.

# DIMENSIONS OF THE CANAL IN GENERAL.

The Canal except in such situations as are after noticed to be 22 feet wide at the bottom or 4 feet under water level. 37 feet wide at the water surface, and 40 feet at the top of the banks. The inside slopes to be 1½ horizontal to 1 foot perpendicular, to be excavated at least 6 inches under bottom, the top of the bank on tracking side before the path is made to be 9 inches and banks on off side, and benchings to be 12 inches above water level. The breadth of the banks, where raised above the natural surface, to be 10 feet at top, on the track path side, and eight feet on the off side, the outside slopes of the embankment to be at least two feet horizontal to one perpendicular.

# DIMENSIONS OF THE CANAL THROUGH NO. 1 SECTION.

The Canal from the Chippawa River, to commencement of timber work as after described, and from termination of timber work to No. 1 Lock to be 7 feet in width at bottom or 6 feet under water level, 25 feet wide at the surface of water and 28 feet at top banks, the inside slope to be 1½ horizontal to one foot perpendicular. The tracking path to be formed 9 feet in width, allowing for the base of retaining walls and a benching of 2½ feet upon the off side, making a total width within retaining walls of 36 feet 4 inches.

When the depth of cutting exceeds 10 feet, retaining walls must be constructed varying in height and solidity, according to the increased depth of cutting. These dimensions and mode of construction, also the inclinations for the benchings, tracking path and slopes, will be seen by an examination of the general drawings and elevations. The deepest part of the cutting upon this section extends 2900 yards and must be constructed as under a cut of 12 feet in width to be formed so as to admit Timber frames 36 feet in depth, viz: 3 feet sunk under the bottom of Canal, 6 feet depth of water, and 27 feet above surface.-These frames to be composed either of square or round timber, with ties and braces, the uprights placed two feet distant from each other. The cross beams at the top to be morticed, those at 12 feet above surface of water to be dovetailed and treenailed, all as particularly shewn upon the elevations and sections. Where the cutting exceeds 24 fect above water level, the slopes must be carried back at the usual permanent rates. At a distance of 1450 yards from either end of timber framing, a commodious passing place must be provided 100 feet in length by 47 feet in width, the form and extent of the curves and face, will be seen upon the drawings.

# TRACK PATH AND BENCHINGS IN DEEP CUTTING.

In deep cutting and where the level of the track path falls below the natural surface of the ground, the track path will vary from 4 ft. 10 inches to 6 feet wide at the range of the slope, having under 10 feet cutting, a dwarf wall of dry stone work, 15 inches high, coped with turf; the off side benching to vary according to the nature of the soil from 2½ to 4 feet in width.

# SIDE PUDDLES.

In cutting where the banks have to be raised above the surface of the ground a proper puddle must be formed, by cutting a puddle gutter of 1 yard wide, having its edge next the Canal two feet back from the line of the top water. This gutter to be cut down through the loose vegetable soil, and into stuff that will retain water. The gutter to be filled with proper worked puddle of strong soil in clay, and to be raised all the thickness of three feet along with the banks, to 0 inches above the water level, it will be observed by the section, that an extent of 750 yards, must be excavated as above.

#### LINING IN LOOSE OR OPEN GROUND.

Where the ground consists of gravel, sand, porous rock or other substances that will not retain water, both the bottom and sides must be excavated to admit of a proper lining which is to be executed under authority of the Engineer appointed by the Directors, as it cannot be ascertained before hand where lining of this nature will be required, the offers may state a price per superficial or lineal yard, for such bottom and side linings 3 feet thick and by the cubic yard.

#### DIMENSIONS MAY BE VARIED.

Although the dimensions of the Canal and other works are particularly specified, yet it is to be understood, that the Directors by their Engineer, may later & vary the dimensions of the canal, the slopes, an allowance being made on either side fo thre same. This may be done in the offer specifying a price per cubic yard to be added in case of additional cutting, or to be deducted in case of a diminution of dimensions—any other difference made on the work or additional work thereon to be settled by reference to two persons of skill, mutually chosen, in case the Contractor and Engineer, cannot agree between themselves.

### WORK DONE TO SATISFACTION.

The whole work to be done to the satisfaction of the Engineer appointed by the Directors or the Overseer, either of whom may at any time stop the works should they find any part done in an improper manner, or contrary to this specification, unless the Contractor has express orders in writing from the Directors for such deviations.

# CONDITION UNDER WHICH PROPOSALS FOR THIS LOT. ARE TO BE GIVEN IN.

1st. The cutting and embanking to be estimated by the sections, the accuracy of which, intending Contractors must satisfy themselves.

2nd. The proposals to be made out corresponding with the annexed form which is to be filled up and signed by those making offers.

3rd. The Contractors are to provide all tools, materials and implements of every kind, boats, scows. &c.

4th. Those who give in proposals are required to produce satisfactory certificates of their character and of their ability to do such works; also to find security for the proper and due performance of the works they undertake or agree to leave a sufficient sum or proportion of the price in the hands of the Directors till the works are finished.

5th. To engage to begin the work in one month after the Directors shall accept their offer, and to finish by

6th. The contract price to be paid by monthly instalments in such proportions as shall be certified to the Directors by their Engineer, upon the day of each month.

# CHIPPAWA CANAL.—PROPOSAL FOR A JOB OF WORK.

For the Lot of work No. 1, as explained in the description and drawings of that Lot, including all work and materials, timber, framing, cutting, embanking, retaining walls and making the canal complete, water tight and navigable—the sum of Pounds.

For lining and side puddling such parts of the Canal as may prove open ground (not including the lining of embankments or side puddles in good ground) per lineal yard of canal or in proportion for any part thereof, where lining may be required

N. B. Slips to be paid for at the rate affixed for additional cutting; and be it understood that any triffing deviation proposed or made by the Contractor, for the saving of cutting, if approved of by the Engineer is not to subject him to any deduction.

#### FORM.

I, do hereby make, offer and agree to do the lot of work No. 1, on the summit level of the Chippewa Canal for the sums and at the prices and rates stated in this proposal, and to conform to the conditions and specifications; which have been perused by me, and as security for my due performance of the work I undertake, propose as my security, &c.

FRANCIS HALL, Engineer.

FRANCIS HALL, Engineer.

Queenston, 10th December, 1824.

General description of the Welland Canal from the Chippawa River to Lake Ontario by Niagara.

From the Chippawa River, Brown's farm, to No. 1 Lock, a distance of 3 miles and 1120 yards is common to both lines-leaving the middle branch of the 12 creek continuing to the north east upon the summit level, crossing a ravine, from thence passing Captain Napier's creek, in nearly a straight course to Wilson's clearing—crossing west branch of the Beaver Dam cend the mountain by favorable ground through a

Creek by a culvert of eight feet diameter in the foregoing length; two culverts, each 4 feet diameter, must be constructed, pursuing a favourable course to the main branch of the Beaver Dam Creek, where a culvert of 10 feet will be requisite, proceeding by easy ground to Carroll's house, thence to westward, or Van Every's barn, crossing falls and Beaver Dam road into Shriner's farm, pass the dividing ridge between the Beaver Dam Creek and mountain face by deep cutting 25 feet at summit to No. 1 Lock-des-

defile to the cast of Mr. Keefer's house, crossing St. David's road; continuing by the course of a narrow ravine to near Mr. Ball's, where loose rock excavation will be experienced.—Fromthence, crossing the line between Thorold and Grantham, leave 10 Mile Creek to the left and Grasse's house to the right. passing Young's farm, crossing road and ravine through Stull's orchard, passing a road and ravine between Bradd's and Vanderlip's No. 19 Lock onward through the black swamp woodlands, to intersection of Niagara road, proceeding parallel with this road, crossing 4 and 3 Mile Creeks by culverts, proceeding to near Mr. Ball's, leaving Swamp Road to the right, crossing 2 Mile Run by a culvert of 8 feet; again crossing Ningara road opposite Mr. Butler's house, continuing in a north east direction, crossing three roads and two small ravines, leaving Niagara upon the left, proceeding upon the plains to the head of a small hollow, north east of church, -from thence descending to Lake Ontario, where sufficient depth of water and secure anchorage may at all seasons be obtained.

> FRANCIS HALL, Engineer.

Queenston, 10th December, 1824.

### IN THE YEAR 1825.

From the extensive correspondence and various publications during the two preceding years, public attention was at length drawn to the undertaking. The New York Stockholders recommended an open cut, with a view of hereafter extending the dimensions of the canal, and although two shafts had been sunk—the two ends of the deep cut opened to bottom level-the timber for tunnel got out, and every proposition entered into, they discontinued the work, incurring a loss thereby of nearly £5,000 .- This year was memorable in Europe for an unusual degree of enterprize and speculation in stocks and funds of every description. Messrs. McGillivray & Galt, Commissioners of the Canada Company arrived in this Province and took an active part in promoting this object—from their representations of the facility of obtaining capital in Europe, the Directors petitioned and obtained the act which passed on 13th April, 1825, as referred to above, increasing the Capital Stock to £200,000, defining the route; allowing stockholders to withdraw, and appointing the Bank of Upper Canada Treasurer. (See act appended hereto, marked No. 1.) On which the President repaired to New York, obtained stock to the amount of £75,000—then to Montreal and Quebec-a re-survey took place, Engineers finding they could not descend the mountain at Mr. Decou,s without a combination of locks discontinued further operations-explored a new route, which produced the reports of Messrs. Clowe's & Roberts respecting the same. (See Reports of Messrs. Clowes and Roberts, annexed to a report of the House of Assembly, which is hereto appended, and marked 4.) Also of Messrs. Goddes & Hall, respecting the Harbor at Port Dalhousie. (See Reports of Messrs. Geddes and Hall, marked No. 2 and No 3, and hereto appended.)—This year likewise brought into action all those feelings of cupidity, envy, jealousy, and distrust, which unhappily characterize our nature. Those who had heretofore looked on with appathy and indifference conceiving the project to be altogether visionary,

began to exert themselves to endeavour to direct the route to the frontier. It is unnecessary to recapitulate the means resorted to, but the reports and proceedings of the different meetings, (see proceedings of a Meeting at St. Catharines hereto appended, marked No. 7,) and the list of Stockholders, muny of whom withdrew, (See list of stockholders and withdrawals hereto appended, marked No. 8,) will more clearly show the struggle which ensued on both sides.—The increased dimensions of the canal and consequent increase of capital, for the procuring of which we relied wholly on Messrs. McCrillivray and Galt, was the commencement of that arduous struggle, with which the Stockholders and Directors of this Company had to contend; my own judgment was at the time against the enlarged dimension, as I did not view the prospect of obtaining so large a capital so favorable as those who I admitted to be far more competent judges-and the result, whatever may have been the difficulties experienced, has confirmed my error, as the Canal on the smaller scale would never have answered the desired object. (See suggestions on Steam Boat Navigation. No. 9.) Mr. McCillivray visited the line of canal, was highly pleased with the route, recommended Mr. Boulton's mission to England immediately, as he could not leave himself, as was originally intended, to take up the remaining proportion of stock which had been obtained expressly for that purpose-contracts were let out on the entire line of canal, and the most active operations commenced. This year also furnished the Director of 1835 with the following subjects, which he claims as a new discovery:

1st. The alteration of the route.—2nd. Mr. Boulton's mission to England.—3rd. Mr. McGillivray's letter respecting the Books.—4th. The resolution promising to grant Mr. Keefer water for a flouring mill.

By reference to the proceedings of a committee appointed by the House of Assembly this year, (See Report, Sc. appended hereto, marked No. 4.) we find the objection made by Mr. Gordon to the the alteration of the route withdrawn. The Hon. William Allan's evidence on the subject of Mr. Boulton's mission, the evidence of the Directors and the different individuals who were then interested, for and against it, and who we may fairly suppose understood the nature of the transaction quite as well as the individual who comes forward 10 years after the occurrence took place; we also find by the minutes of the Board the bonus granted Mr. Keefer for water privilege, rejected by General Beach.—The letter written by Mr. McGillivray referred to books then in existence, before the work was fairly in progress, instead of the books of account generally, as the public are led to believe—that Mr. Wenham was appointed after this period—enters upon an entire set of new books-that Mr. Boulton actually repays the money advanced, which is again repaid him at a subsequent meeting of the Directors, and that all the matter he has referred to has been canvassed from year to year, and by this time should fairly have passed into oblivion.

The Directors of this year were the Hononorable John Henry Dunn, and Henry John Boulton, James Irvine, Simon McGillivray, James Clarke Buchanan, George Keefer, and William Hamilton Merritt, Esquires. DOCUMENTS referred to in the foregoing remarks, viz:

# No. 1.

An Act to repeal part of and extend the provisions of an act passed in the fourth year of His present Majesty's reign, entitled, "An Act to incorporate certain persons therein mentioned under the style and title of the Welland Canal Company."

Whereas it is expedient to repeal part of and amend an act passed during the last Session of the Parliament of this Province, entitled "An Act to incorporate certain persons therein mentioned, under the style and title of the Welland Canal Company"; and to enable the Directors thereof to enlarge the dimensions of the said Canal if they shall think proper; Be it therefore enacted by the King's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Assembly of the Province of Upper Canada, constituted and assembled by virtue of and under the authority of an act passed in the Parliament of Great Britain, entitled, An Act for making more effectual provision for the Government of the Province of Quebec, in North America, and to make further provision for the Government of the said Province," and by the authority of the same, That the 24th clause, the thirty-seventh clause, and so much of the twenty-fifth clause of the said first mentioned act as declares the number of shares shall not exceed three thousand, shall be, and the same are hereby repealed; and that from and after the passing of this act the number of shares to be held by the said Company shall not exceed sixteen thousand, at twelve pounds ten shillings each.

2. And be it further enacted by the authority aforesaid, That from and after the passing of this act the land and ground to be taken and used for the said canal, the towing paths, ditches, drains, and fences, to separate any such towing paths from the adjoining lands shall not exceed sixty yards in breadth, except in such places where the said canal shall be raised higher or cut above five feet deeper than the present surface of the land; and in such places where it may be judged necessary for boats and other vessels and raits to turn, lie, or pass each other, not more than one hundred yards in breadth, without the consent of the owner or owners of such lands or grounds respectively, under his, her, or their hand and seal first had and obtained, anything in the said first mentioned act to the contrary notwithstanding.

3. And be it further enacted by the authority aforesaid, That it shall and may be lawful for the President and Directors of the said Company to extend the dimensions of the said Canal for the purposes of Sloop navigation if they shall see fit to do so, any thing in the said first recited act to the contrary not withstanding.

withstanding 4. And be it further enacted by the authority aforesaid, That it shall and may be lawful for the said Company to construct a track or towing path, from the point where the Canal from Lake Ontario intersects the River Welland to the point where the Canal leaves the River Welland for the Grand River, and from the point where it intersects the Grand River, on the bank thereof, to Lake Erie; also from the point where the Canal from Ontario intersects the River Welland, to the mouth of said river on either bank thereof, which ever the Company may find most convenient, and from thence to Fort Erie at the head of Niagara River: Provided always, nevertheless, that nothing in this Act contained shall be construed to prevent any person or persons whatever from having and enjoying the use of the said rivers or either of them, and of the banks thereof, (subject to such regulations as may be made by the said Company for the preservation of the towing paths or tracks aforesaid) for all purposes as fully, freely, and effectually, as if this Act had never been made.

5. And be it further enacted by the authority aforesaid. That the authority given to the said Company in the third clause of the said recited Act to construct reservoirs shall be construed to authorise them to execute the said reservoirs (in the manner pointed out) on the line of the Canal if to the said Company it shall seem expedient.

6. And be it further enacted by the authority. aforesaid. That so much of the twenty-ninth clause of the said recited Act as requires the election of five Directors, be and the same is hereby repealed; and that the said Company shall elect in manner and at the times pointed out by the said Act, seven Directors, annually, (one of whom shall be President) to manage the affairs of the said Company.

7. And whereas doubts may be hereafter entertained with respect to the direction by which it was intended the said Canal should be conducted in order to entitle the said Company to the privileges extended by the above recited Act, the same not having been otherwise declared in the said Act than by reference to the Report of Mr. Hiram Tibbet, Engineer; be it therefore further enacted by the authority aforesaid and declared. That the route along which the said Canal shall be conducted shall be as follows, that is to say—that part thereof which is to connect the River Welland with Lake Ontario shall commence at John Brown's farm on the River Welland in the township of Thorold, passing down the vulley of the Twelve Mile Creek and terminating in Lake Ontario at the mouth of the said Creek, such being the route surveyed and reported by Hiram Tibbet, Engineer, before the passing of the said Act, and referred to in the nineteenth section thereof: and that part thereof which is to connect the River Ouse or Grand River with the River Welland, shall commence at or near Broad Creek on the Grand River, and terminate at or near Misiner's Mills on the forks of the River Welland; Provided always, nevertheless, that if within three months after the

passing of this Act any Stockholder in the said Company shall by instrument in writing executed in the presence of one or more witnesses under their hands and seals, declare to the President and Directors of the said Company that they would not, under the provisions of this Act. have taken shares in the said Canal, such Stockholder shall be considered no longer liable to pay his subscription or any part thereof; and upon repayment to him of such instalments as he may have paid, his shares shall be thenceforth forfeited.

8. And be it further enacted by the authority aforesaid, That nothing herein contained shall be construed to authorise the said Company to construct such track or towing path as herein mentioned in any manner to interfere with or prejudice the property of any person or persons having mills, storehouses, wharves, or other buildings, on the banks of

either of the said rivers.

or their behalf.

9. And be it further enacted by the authority aforesaid, That it shall and may be lawful for the Directors now chosen to procure without delay a survey to be made of the harbor at the mouth of the Grand River on Lake Erie, and of the entrance into the Twelve Mile Creek from Lake Ontario, by an able and experienced engineer in order to ascertain whether secure and capacious harbors can be constructed for Sloops and Schooners intended to pass through the said Canal, at an expense which will not occasion the whole estimate to exceed the amount of stock which the said Company are by this Act authorised to hold.

10. And be it further enacted by the authority aforesaid, That the whole amount of stock now paid in, and remaining on hand, and such as shall hereafter be paid in upon the subscription of the said Company shall from time to time be deposited in the Bank of Upper Canada, and there placed to the credit of the Welland Canal Company to be withdrawn only by order of a Board of Directors, signed by the President or Vice-President, and countersigned by the Secretary of the Board for the time being.

11. And be it further enacted by the authority aforesaid, That no part of the funds of the said Company shall at any time be appropriated to any purpose unconnected with the making the said Canal and the navigation thereof, unless upon specific estimates submitted to a general meeting of the Stockholders to be legally called and approved of by a majority of the stockholders attending such meeting, or by his or their agent or agents duly authorised to act in his

And be it further enacted by the authority aforesaid, That at and after the next general election of Directors no person shall be eligible to be a Director of the said Company who shall not be a Stockholder in the said Company to the amount of

twenty shares, any thing in the twenty-ninth clause of the said Act passed in the fourth year of His Majesty's reign to the contrary notwithstanding.

And be it further cnacted by the authority aforesaid, That the Honorable James Irvine and Simon McGillivray, Esquire, in addition to the five Directors already elected, shall constitute the Directors of the said Company till the next general election, anything in the twenty-ninth clause of the said recited Act to the contrary notwithstanding.

14. And be it further enacted by the authority

aforesaid, That the holder of five shares shall be entitled to one vote; the holder of twenty shares to two votes; the holder of fifty shares, three votes, and the holders of one hundred shares and upwards. four votes, at all general meetings of the Stockholders.

15. } 16. } [Repealed by 1st WILLIAM IV, c. 18.]

No. 2.

To the Hon. the President of the Welland Canal Company.

GENTLEMÊN,

In compliance with your request I have examined the mouth of the Twelve Mile Creek, proposed for the entrance of your Canal into Lake Ontario, a description of which you have in the following Report:

The margin of Lake Ontario at the mouth of Twelve Mile Creek is an extensive smooth plane elevated at the shore about 30 feet above the level of the lake's Surface, consisting mainly of a mass of brown clay of great depth, passing, probably far into the Lake, and forming the bottom for a great distance from the shore. The conjecture is quite probable that a shore so soluble in water has been far encroached upon by the lake, consequently the bottom now left is composed of clay over the surface of which lies a bed several inches in depth of rolled stones and pebbles of various sizes, amongst which is a very fine sand, being the insoluble remains of the immense deep clay stratum in which the above hard substances were imbedded. There are likewise formed in this clay stratum large boulders of granite, a few of which are visible on the bottom of the lake—one lies a short distance from the mouth of the creek, at the edge of the water on the west side, from which a cube of nearly 4 feet might be cut. In deepening the lake some such might be met with, but from so few being in sight it is not very probable. Near the surface of the earth, the proportion of sand and gravel is small, but at the water's edge much more abundant. A portion brought up from beneath 9 feet water by boring, was very similar. Piles would be easier drivon if the proportion of sand was less.—The action of the waves against the current of the creek has worn on this clayey shore until the two headlands are 616 yards apart, and from the insoluble remains a sandy heach is formed from one cape to the other, so high that the waters break over it. The creek runs through an opening in the beach continually varying in width, and at times entirely shut, overflowing the meadows up stream, until the water rises high enough to run over and cut away the bar of sand. At westermost cape (as shown on the map) is the most favorable situation for a Lock, measuring from the shore at this point N. 60° W. the depths were taken at every 22 yards, and were in feet as follows: 4, 4, 4, 4½, 5¾, 6½ 6¾ and 7½½ from measurement, it results that a depth of eight feet can be had for those 198 yards by the removal under water of 2040 cubic yards, calculating a bottom 10 yards wide, and slope of the sides 18 inches base to 12 perpendicular. In the same direction was measured from the shore 671 yards to 12 feet water, and depths found as follows: at 198 yards, 8 feet; 236 yards, 11 feet; 440 yards, 9 feet 4 inches; 473 yards, 10 feet; 671 yards, 12 feet; calculating said measurements for a depth of 12 feet water, (bottom and slope the same). The quantity to be excavated under water will be about \$,800 cubic yards. The bottom rises and sinks with great regularity to 12 feet water, beyond which it sinks in a short distance to the depth of 21 feet. By running a mole in the direction measured upon, and putting the dam or waste wier at a narrow place 17 or 18 chains up the Creek, near all the movable sand will be shut away from the entrance into the Lock, and as the sand is evidently produced by a solution of the shores and bottom very little would be formed after the erection of the mound. The substance of the bottom of the lake is undoubtedly very closely compacted, as is evident by the rocky appearance under the water, a little west of the proposed entrance, which, notwithstanding the continual action of the waves over it, remains, and gives the appearance of a smooth rocky bottom, but when taken up, proves to be nothing but clay, sand, and small pebbles .- As no person taking a contract for constructing a mole or excavating under the water of this place would engage in it without first making thorough trials of the nature of the substance to be entered into or removed, it is useless by guessing to endeavour to make an estimate of a mole or the excavation required to be performed; but it may be said that appearances are not formidable, and (considering how great an undertaking it is to form an artificial harbor in alake) that a canal can be made to enter here without encountering great difficulties. The wearing back of the lake shore had been estimated at a yard per year, and a small hovel at the 12 Mile Creek was set 80 yards from the edge of the bank, and at the end of thirty years it was measured, and 40 yards were found to have worn away. into consideration this historical fact which is well authenticated, the lock ought not to be set so near the water as the place marked on the map.

Very respectfully submitted,

By your obedient servant,

JAMES GEDDES,

Engineer.

May 27th, 1825.

No. 3.

To the Welland Canal Corresponding Committee at Niagara.

GENTLEMEN,

According to instructions from your committee, I have proceeded to examine the actual state of Lake Ontario, opposite the proposed Canal, by the outlet of the 12 mile basin.—From the nature of the soil and subsoil in the 12 pond, a general depth of 12 feet water may be obtained by partial excavation, and having recourse to an embankment of 3 or 3½ feet across the beach.—This embankment will extend 264 lineal yards. Upon Lake Ontario side, find the depth and soundings to correspond with the table as under.

J3

	The state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the s				
Distance in Surels from the Beach of Lake Onta- rio.	Depth of wa- ter at differ- ent points.	DESCRIPTION OF BOTTOM ASCER- TAINED BY BORINGS.			
Yards.	Feet.				
120	11	Bottom, 2 inches of blue clay, with a hard rocky substrata.			
320	9	Bottom, no clay, with an irregular rocky surface.			
420	8	Bottom, of a similar description.			
570	8	Bottom, consisting of large detached stones, with a consolodated rocky bottom.			
670	8	Bottom, of a similar description, with clay between the intersti-			
770	11	Bottom, rock highly indurated, flat and few stones.			
820	12	Bottom, compacted rock.			
1020	18	Bottom detached stones, clay, and rocky subsoil.			
1220	18	Bottom, rocky, with clay fissures.			
1460	19½	Bottom, 3 inches clay, rocky subsoil, interstices, filled with clay			

The above Soundings, Borings, and Trials, have been executed with great care, and determine, beyoud conjecture, that, the approach from any point of Ontario to the mouth of the Twelve Mile Creek, is barred up by a ridge or curved line, composed of Stone, Clay, and Rock; all of a very indurated nature, -in consequence it requires no demonstration to shew that a Schooner drawing 12 feet water during a moderate gale, cannot approach nearer the Beach than from 12 to 1400 yards. Supposing this object, from necessity, to be carried into execution the consequence must be, the construction of solid masonry for a Breakwater, Defences, and side Piers, for a lineal distance of 1460 yards, —recourse must also be had to under excavation of Rock previous to acquiring 12 feet of water at the Beach.-It seems unnecessary to point out more particularly the disadvantages of this situation for a Harbour, even of the most limited description, as it must be apparent to your Committee that the expense of under water excavation alone, must render impracticable any attempt to improve this outlet.

I have the honor to be,
Gentlemen,
Your very obedient,
FRANCIS HALL,
Engineer.

Queenston, 24th March; 1825.

REPORT relative to the termination of the Welland Canal at the Niagara River, near Queenston.

Having examined a line of canal from Mr. Bassey's house, near the bottom of the mountain to the Niagara River at Queenston, find upon actual measurement that a diminution of three and one half miles can be effected in favor of this route over the Niagara line, and five miles, over that by the valley of the Twelve Mile Creek. From investigations already made, no ground can be found better adapted for canal operations, there being comparatively a short extent of grubbing, no culverts or embankments for an extent of six miles, and in so far as regards distance

and expense this route appears to be worthy of the particular attention of the Welland Canal Directors.

FRANCIS HALL, Engineer.

Queenston, 1st Feb'y., 1825.

No. 4.

The Select Committee appointed to Report upon the several petitions of the President and Directors of the Welland Canal Company; of JAMES GOLDON, Esq., a Stockholder in the said Company; of JACOB UPPER and others, Inhamitants of the District of Niagara; of SAMUEL WOOD and others, and of the Inhabitants of the Town of Niagara and its vicinity; have, pursuant to the order of the House, considered the matters to them referred, and have agreed to the following as their First Report.

Your Committee desirous of affording to the House the most satisfactory means of judging of the actual progress of the very interesting and important undertaking in which the Welland Canal Company is now engaged, and also of the prospect of its successful termination, have proceeded to examine such witnesses, and to receive such other testimony as appeared to them most likely to furnish information that might be safely relied on.

Your Committee had also in view the necessity of enabling the House to determine upon the most satisfactory grounds the expediency of authorising the Government of this Province to assist the Company either by a loan or by subscribing Stock, according to the spirit of a resolution passed in the last session; and they have also examined into the various complaints which have been urged by individuals, either against the Charter itself, or the manner in which it has been acted upon. They have further endeavored to inform themselves with respect to the expediency of authorising a deviation from a part of the course of the projected Canal, for the reasons stated in the petition of the President and Directors; and of the propriety of sanctioning the prayer of the petitioners of the Town of Niagara and its vicinity, for permission to cut a Canal, navigable for Boats, leading from the Welland Canal, after it descends the mountain, to the Town of Niagara.

Upon these and other points which incidentally present themselves, your Committee have received the evidence which is subjoined to this report; and they now beg to lay before the House the following remarks as the result of their deliberations upon it.

It appears to your Committee that the calling upon the present Stockholders to pay up a very great
proportion of their subscription, while the one half of
the Stock considered necessary for the undertaking
and authorised on that understanding by the Legislature, has not only not been subscribed, but in
truth has not yet been actually solicited, is a measure
which if it be even admitted to be strictly legal, is at
least not one which the actual Stockholders could
have been prepared for; and therefore your Committee feel it desirable to relieve them from this unexpected pressure. The evidence will shew for
what reason the one half of the Stock was intended
to be withheld for a time from the market, and from

what circumstances it has been withheld so long. It is the opinion of your Committee that when the necessary documents arrive in England, and a Committee of Agency is properly organized there is little question but the amount of Stock required will be taken up in London, and in the mean time, such is the confidence of the Committee in the ultimate success of the undertaking, that they have no hesitation in recommending to the House the confirmation of their vote at the conclusion of last session, by authorising the Government to borrow on debenture the sum of twenty-five thousand pounds to be loaned to the Welland Canal Company for a period of three years, at the rate of interest paid by the Government, and upon the security of the Company's bond.

This manifestation of confidence the Committee thinks is due to the prompt and strenuous exertions of the Company, by which, as it will be seen, the whole line of the Canal, from the Welland to the Twelve Mile Creek, including also the Harbor on Lake Ontario, has been actually put under contract, under circumstances which leave no reasonable ground for doubt that, with the exception of the deep cut, of which the increased cost is noticed in the evidence, the whole will be completed early in the summer of 1827, for a sum within the amount heresummer of 1827, for a sum within the amount heresumded in the undertaking the Committee are persuaded that the subscription of the remaining Stock will be placed beyond question; so that the Company may proceed, as they have begun, without apprehension.

Upon the second point mentioned in the perion of the President and Directors, namely the sanctioning a deviation in part of the route from the Welland to Lake Ontario for the purpose of shortening the distance, diminishing the expense, and avoiding inconveniences in the descent of the mountain which render a Canal upon the present enlarged scale impracticable upon the former route, except at a very great cost, your Committee have maturely deliberated, and they have no doubt whatever remaining in their minds that the proposed alteration is decidedly expedient; but upon that point the Reports of Messrs. Clowes and Roberts are so entirely satisfactory that, in the absence of any evidence to the contrary, your Committee have concurred in recommending it.

With regard to the remission of duties on such articles as the Company or Contractors are compelled to import from the United States of America for carrying on the work, your Committee found at first some reason to hesitate, from their desire on the one hand to protect the public revenue, and their inclination on the other to see every obstacle removed that might occasion loss or difficulty to the persons engaged in a work of such great consequence to the country. From information which the Committee has received from W. H. Merritt, Esq., since his last examination, there is reason to suppose that the whole amount of duties which it will be necessary to pay upon the importations alluded to, through the progress of the work, will not be less than five or six hundred pounds.

It will be seen by the evidence on that point, that to compel the Contractors to obtain these articles in this Province (or such of them rather as could be

procured here) would subject them, and of course ultimately the Company, to unreasonable disadvantages, and this being satisfactorily ascertained, the Committee have agreed to recommend a remission of the duties, persuaded that it will not be thought desirable to increase the revenue by enhancing in any degree the cost of a public work undertaken with so much spirit. It is believed that many precedents of such an indulgence are afforded with respect to similar works in England, and your Committee therefore are only at a loss as to the proper mode of extending it in this case. The duties in question are imposed by a recent British Act of Parliament, and therefore your Committee conceives that their payment in the first instance must be complied with, and the relief must be afforded by authorising by law the repayment from the Provincial Treasury of a sum of equal amount.

A careful examination into the various complaints which have been preferred by individuals against the Company, charging them with an unnecessary and improper interference with private rights, has afforded your committee no grounds to believe either that the Charter conveys greater powers than are required for carrying on a work of such a description, or that those powers have been in any manner abused.

Indeed hitherto very little has been done that can have interfered with the improved possessions of any person, and whenever in the course of the work damages are occasioned by the act of the Company, the Law appears to provide a convenient and just method of obtaining compensation.

If unauthorized acts shall be committed occasioning injury to individuals, the Company are liable as a corporate body to an action for such injury. Indeed upon this branch of their inquiries your committee are inclined to suggest that the Company is rather the party that appears to require additional protection, and that it might be neither unjust nor inexpedient to provide that in estimating the damage done to individuals, consideration should be given to the benefit which the individual derives from the Canal, as well as to the injury it occasions, upon the principle explained in the evidence of Oliver Phelps. This is the rule with respect to the Eric Canal in the State of New York, and it appears to your Committee not unreasonable, for they have indeed grounds to believe that the actual value of all the possessions through which the Canal is to pass is already much enhanced in consequence of the projected work, and that not a few of the individuals who have urged complaints against its being taken through their property would be exceedingly disappointed if their applications were literally taken, it being their object rather to strengthen by such remonstrances their claim for damages than to prevent the completion of the Canal.

With respect to the enjoyment, for ordinary purposes, of the privilege of water brought down by the Canal, your Committee conceives that it is proper to provide that if in any case the Canal should interfere with convenient enjoyment of any advantage of water previously existing, free access to the bank of the Canal should be secured to the party.

One of the most material points to be considered by your Committee is the propriety of either directing the Company or authorizing individuals to build

Bridges over the Canul in order to connect the possessions of persons through whose land the Canal will pass. It is evident to your Committee that to multiply Bridges upon a Canal intended for a navigation by Sloops and Schooners would be to increase exceedingly the delay and inconvenience of the passage, and their impression is that Bridges should only be required to be built by the Company where some principal Highway is intersected by the Canal, and that individuals should only be allowed to erect them for the purpose of connecting Buildings or improvements of considerable value, and that restrictions as to the form of such Bridges should be imposed, and also as to the periods during which they should be left closed. Your Committee are happy to believe that the Canal passing through the route now intended will occasion as little inconvenience, of every kind to the inhabitants of the adjacent lands as could be expected to occur in the prosecution of so great a work, and when they reflect upon the incomparably greater advantages which it will bring to those individuals they have less difficulty in recommending that the Navigation should not be embarrassed by the impracticable effort to obviate every inconvenience which it must unavoidably occasion.

JOHN B. ROBINSON, Chairman.

Hause of Assembly Committee Room, Decr. 7th, 1825.

The Committee met.

THE ATTTORNEY GENERAL in the Chair.

WILLIAM HAMILTON MERRITT; Esq., called in and Examined.

Are you Secretary to the Welland Canal Compa-

ny? I am acting Secretary to the Company.

Have you in your possession the Reports of the Civil Engineers which are referred to in the Petition of the President and Directors of the Company? I have. These are the Reports referred to—the one is a Survey and Report by Mr. Clowes, the other by Mr. Roberts.

[Here the Witness delivered in the Reports which were read and are as follows.]

"FIRST GENERAL REPORT

"To the President and Directors of the Welland Canal Company."

"For the proposed Line of Route to connect Lakes

"Eric and Ontario,-Commencing at the outlet of "Grand River to make a safe and permanent Harbor "would require a Pier from West side of said River, "running South Easterly into Lake Erie 440 yards, "answering as a Breakwater against the South West "Winds, and giving the current of River a turn the "same course as current in Lake, also a Pier 200 "yards long on the East side, to prevent the water "from spreading itself, by which means a sufficient "quantity of water would be collected in a body, the "current of which would prevent the Bar forming at "the junction of the two waters. Thence following "the Grand River two miles to Broad Creek River, "averaging about 700 feet wide and 16 feet deep wa-"ter, no other expense necessary than forming tow "path where it is proposed to leave the River. In "the first two miles after leaving the River the Land "rises 8 feet above the surface of Lake Erie, and to "water level in said marsh, then crossing said marsh "S miles to Lot No. 17, 4th Con. Wainfleet, the sur-"face in this distance varies but little in any part, its "general appearance being one vast Swamp inter-"spersed with small Ponds of water, varying from 3 " to 6 feet deep of soft black mud on a bed of strong "blue clay; many places for several hundred agres together are entirely free from Timber, where it is "wooded it is principally Tamarack; it is evident from "the nature of the Swamp unless the water in the "Canal was 4 feet below the surface of the marsh, it "would not drain it so effectually. The next 23 "miles crosses Lot No. 17 and part of 16. 4th Con"cossion Wainfleet to head of Misener's Creek, fol-"lowing course of same, cutting off the nurves and "straightening the Creek to first forks below Misen-"ors Mill, water level in the River Welland, the \( \frac{2}{4} \) "mile descent 6 feet to Mr. McDonald's, crossing "rich black alluvial flats heavy timbered, the next 13 "falls 9 feet; by adhering to the bed of Misener's "Creek the expense would be much diminished, ad-"mitting 10 feet cutting through the marsh, there would be one Lock of 4 feet descent into the Grand "River, and two of 6 feet each into the Welland; " on this principle there is a summit between the two "Rivers, and would require a Feeder brought from "the Grand River about 16 miles in length; from "the first forks of Misener's Creek to the Welland is "two miles,-to render the same navigable for "Schooners it will be necessary to form a tow path "and deepen the Creek on an average 18 inches; thence down the Welland to Mr. J. Brown's farm, " to mouth of Canal now in operation, is 9 miles Riv-" cr, averaging about 250 feet wide and 12 feet deep, "no other expense necessary than forming tow path "and alteration of Bridges, (making a distance be-"tween Lake Erie and John Brown's farm of 254

"Aggregate of Estimate for a Cut
"on the Summit, .....£28157 6 6

do do 11 feet deep
"to drain the marsh more effectually, 45831 13 14

"To render a Feeder useless and bring the waters "of Lake Erio through the marsh, descending into the Welland by a Lock of 8 feet fall, aggregate of estimated cost, £69540 13 11

"To connect these Rivers from a small Creek about six miles above the outlet of the Grand River

"by means of the Oswego or Lot No. 5, 2nd Con-cession Canboro' near M. William Robinson's Mill is a distance of 5½ miles, the Land in this route is composed of strong brown clay excellent for a Ca-"nal, frequently crossing ravines and swails which "would considerably lessen the expense, the Canal would then descend into the Grand River with 2 "Locks of 6 feet fall each and into the Welland with "3 of 7 feet fall each, a Feeder to supply this summit "is described above. From Mr. William Robinson's to "the intersection of the Oswego with the Welland is "a distance of five miles, the banks of the Oswego are "sufficiently high to admit a Lock being placed at its "outlet, thereby raising the water at Mr. Robinson's "to the depth of 7 feet, making a Canal that distance "at the trifling expense of clearing Creek and forming tow path; thence down the Welland 25 miles to J. Brown's farm or Canal, the whole distance be-"ing navigable for Vessels drawing 12 feet water, "the only expense necessary is forming tow path and "alteration in Bridges making a distance from Lake "Erie to Brown's farm of 414 miles, and aggregate "of Estimato, ..... £26930 2 10.

"Section No. 1 intersects the Welland on Brown's farm at the outlet of a small Creek frequently crossing the same in the distance of  $\frac{3}{4}$  miles to section No. 2; the outlet of this Creek presents a favorable situation for forming an extensive Basin, at a comparative small expense, and the banks are well situated for the erection of Warehouses, &c.; the Welland is very wide at this place—would admit a number of Vessels, Rafts, &c. to lie without obstructing the Navigation of the River.

"At Section No. 2, a Lock must be placed to guard "against the fluctuation of the Welland as well as to "regulate the quantities of water necessary for Na-"vigation and Hydraulic purposes. At No. 2 com-"mences the dividing ridge between the waters of "the Welland and the head waters of the twelve mile "Creek, this ridge commences with 16 feet and runs "2 miles, then descends to 10 feet and varies in height " from 16 to 54 feet deep cutting. In this ridge the "only formidable obstacle presents itself in connect-"ing the two Lakes on the most extensive scale, and "can be done at less than half the expense of any "other situation between Niagara River and Burling-"ton Bay; the nature of the strata this ridge is composed of having been ascertained, its completion as "to time and cost can be accurately computed, say "within two years from the time Contracts have been "entered into; thence to proposed dam at Wilson's is 11 miles—at the end of first half mile falls below "level near Mr. Adley's, running down on ravine "which adds a little to the length, but lessens the "amount of its cost; the next A mile adhering to the bed of the middle branch of twelve mile Creek to "Mr. Wilson's clear land, where it is proposed to "place a Dam between two projecting points and "raise the water to the same level as the River Wel-"land, forming a Reservoir of 70 or 80 acres, and a "Canal at the expense of clearing Creek and making "tow path; thence 1½ mile to Van Every's near the "Queenston road. In this distance the line crosses "two small ravines and two branches of the Beaver "dam Creek, a short length of deep cutting between "them, lying very convenient for the embankment, "it is proposed to place only one bank and form a "Reservoir at each of the above branches, the South

one containing about 40 or 50 acres, the North one "would buck 7 feet water a distance of 47 chains forming for that length an excellent Canal and Res-"ervoir of at least 40 acres; from Van Every's to "head of Lock No. 1 in Shriner's ravine, a distance "of one mile crossing a dividing ridge between the . Beaver dum Creek and Shriner's ravine, the sum-"mit of which is 32 feet 10 inches above level, the "strata is blue clay mixed with small stones, not diffi-"cult to excavate : from foot of dividing ridge to " head of Lock No. 1, Shriner's ravine fulls to four "feet helow level, making a distance between the Welland and Lock No. 1, of 64 miles, in the last 3 "miles would be 3 large Reservoirs, the advantages " arising from which are very great, being situated at " convenient distances, so as to afford excellent har-"bors for vessels and lumber to any extent, as well " as to admit any quantity of water to be drawn off for the supply of locks and machinery without cre "ating any sensible current in the deep cut."

"In the next? mile ending at the township line between Thorold and Grantham about half the above
distance, the line continues in Shriner's ravine, the
banks of which are sufficiently high, care being taken in choosing the most favourable situation for
Locks and Waste weirs; the Canal would average
160 feet wide and from 7 to 11 feet water, leaving
the ravine opposite Mr. Keefer's Distillery, and
running parallel with the mountain below Mr. Keefer's, requiring only a lower bank to form a Canal
on an average 100 feet wide, making this Pond
equal in supply to more than one mile of Canal obtained at a very trifling amount, which forms the
principal part of Reservoir for Locks descending
mountain.

"By adhering to the rake of the mountain we descend by a succession of Locks with a sufficient
pond between each to the head of Shaver's ravine
I would therefore by all means recommend the adoption of this route, as it will make a perfect and
complete Canal throughout, without being subject
to the necessary delay in combined Locks.

"Thence 1 mile down Shaver's ravine to intersec-"tion of Dick's Creek and 17 miles down Dick's "Creek to bridge at Saint Catharines descending in "the above 21 miles 104 feet with 12 Locks, the "banks of this ravine and Creek allow of every ad-"vantage being taken by placing the Locks, Waste "weirs, &c. between projecting points and save near-"ly all the excavation in the bottom of the same, the "whole distance forming a natural Canal 150 feet "wide and 9 feet deep; although Dick's Creek is "the main water course for a number of small ravines "its great width, and care being taken in placing "Locks &c. would render all artificial works erected "thereon perfectly secure; at the termination of "Dick's Creek at St. Catharines there are excellent conveniences for Flydraulic establishments, situa-"ted at the side of the York and Niagara road, com-"manding a great extent of a well cultivated coun-"try. From the bridge at St. Catharines to the outlet of the twelve mile Creek into Lake Ontario is 5 "miles (making a distance between the River Wel-"lund and Lake Ontario of 153 miles,) in this dis-" tance the line adheres to the bed of the twelve mile " Creek, with but little variation in the first two " miles, then is 13 feet full, descended by two Locks, "one at Mr. Merritt's and one at Mr. Adam's mill,

"(making 311 feet fall)) descended by 34 Locks be"tween the Welland and Lake Ontario; the guard
"or entrance Lock at harbour (making 318 feet bot"tom level) all the alterations necessary in the twelve," mile Creek are in the first two miles between St.
"Catharines and Mr. Tenbroeck's, the remaining "three miles being rendered navigable by the forma "tion of Harbour.

"To form a good and permanent Harbour at the "twelve mile Pond, it will be necessary to place a "Lock at the foot of West bank, thence carry an embankment across to the East bank 430 yards long, "then placing a waste weir 132 feet wide: a pro-"tecting pier to be carried from the East wing wall "of Lock into Lake Ontario, in a N. W." direction "200, the waste weir standing 3 feet above the pres-"ent surface of water in the Pond would give a depth of 8 feet water, a distance of 3 miles, and form a "Harbour sufficiently deep for any vessel navigating "Lake Ontario, and in extent upwards of 350 acres, "varying from 4 to 20 feet deep water; to render "the Harbour useful for Vessels navigating the Lakes but too large for the Canal it is proposed to construct the Lock at the entrance into Lake Ontario "of suitable dimensions for that purpose, a small "quantity of excavation will be required in the "Lake, and at the eutrance into the Pond, and a tow "path making up said Pond 3 miles when completed "on the plan proposed will form an extensive Har-"bour by far the most safe and secure of any on Lake Ontario. Estimated cost from the Welland to Lake "Ontario, including Harbour &c. complete £110,015 "19 8."

I am, Gentlemen,

Your obedient servant,
(Signed) SAMUEL CLOWES,

Engineer.

A true copy.

GEORGE SMITH, Clerk W. C. Co.

To the President and Directors of the Welland Canal Company.

GENTLEMEN,

I have examined two routes for that part of the Welland Canal, which, is situated between Andrew. Wilson's and St. Catharines, and having reviewed the ground attentively, and examined and compared the Estimates on both those Routes, accompanied by two Members of your Board, and assisted by your Engineers, take the liberty to Report as follows:

K3

1st. On the Route by Shaver's ravine and Dick's cre Estimates of Expense are as follows:—			
Grubbing and Clearing 201 acres,		£268 10 84 0 34 9	0
34,727 " • 4,136 " •	868 3 6 68 18 8	10,232 15 2,142 0	
Embankment, 20,484 " 35,078 " 7,418 "			
Waste Weirs and Trunks in the Embankment—4, at £ Lockage—298 feet, at £57 13s. per foot, lift,		2,049 15 40 0 17,180 0 540 0 136 17	) 0 ) 0 ) 0
Which is an average of £4,845 13s. 8d. per mile.		£32,708 7	
On the Route from Wilsons meadow, by Beaver I passing Thomas' mills, to St. Catharines, the estimates	are as romo		
Grubbing and Clearing 17 acres,  Forming Towing Path through Reservoir,  Excavating Earth,  do.  Rock,  do Loose Stone,	£998 1 3	£284 1: 26 11,604 5,751 1 271 1	8 0 4 10 <u>1</u> 7 0 4 0
Embankments, Puddling, &c  Culvert—1, Lockage—298 feet, at £57 13s per foot, lift, Bridges over Canal—10, at £60 each, Fencing Canal		10 17,180	0 0 0 0 0 0 5 0
On a careful examination and comparison of the calculations made by Mr. Clowes, Engineer, on the different items of expense to be incurred in condifferent items of expense to be incurred. Routes	each of the 17 Locks (on the mountain,) of stone, is estimated at £1,532 each,	26,055	0 0
structing the Canal on the above mentioned Routes, I am of opinion the same are reasonable, and are such prices as are usually paid for similar kinds of work, on other Canals where I am acquainted.	The distance on this route is 8m. 16chs. and will cost,	£63,042	14 7½
On the within Route, the mountain is so steep that the following Combinations of Locks will be unavoidable, and is the best arrangement which can be made, viz:	From the above Estimates it ap aside the allowance for Stone Loo there is a difference in favor of th viz:	ks, £26,05	5,) still
17 Combined 12 feet lift, nearly. 2 Combinations of 4 Locks each, and	West Route by Beaver dam, as above, length 8m. 16chs. will cost,	36,987	14 7 <del>]</del>
These Combined Locks, with short pounds between the setts, reach to the foot of the mountain.	East Route by Dick's creek, 6m. 60chs. will cost,  Difference in favour of the Eas-	32,708	7 7½
It is believed by Mr. Clowes, your Engineer, and with some propriety, that Wooden Locks will not be sufficient for such heavy lifts, and for which reason he has added to the above, 17 Locks, which	terly Route—1m. 36chs.—and will cost less	4,279	7 0
reason he has attitled to the bove, 1 250ks, which are to be made partly of stone.  Amount brought from within, £36,987 14 7½ The amount proposed to be added to make a part of the lift of	ges of the two Routes above est	mated, it is oute has ma il; but it n	but just ny great nust also

Vessels, it is not so favourable as the Easterly Route: the principal difference consists in the steep declivity where the 17 Locks are to be placed.—These Locks being of great lift, and combined as above stated, will always be a source of unavoidable delay to vessels, or boats, meeting at those Locks, and these inconveniences will be increased in proportion to the trade which passes through them. Double or Combined Locks of wood are more perishable than single Locks, as the intervening Locks are liable to be emptied quite to the bottom, whereas Single Locks have always water in them equal to the depth of the Canal.

From Andrew Wilson's the Easterly route passes a low ridge, and enters the valley of a branch of the Beaver Dam Creek, which will form a Reservoir of 40 or 50 acres, there is also a cut of about 30 feet deep for a short distance, which is ascertained to be soft clay of easy excavation. Passing this Cut the Canal enters Shriner's ravine which will afford a very copious basin, near which the line of Canal crosses the line between the Townships of Thorold and Grantham; and here the descent of the mountain commences, which is very easy and gradual; every Lock it is believed, can be built single: as the line is at present, there would be one combination of about 3 Locks. Another great advantage is, that the Locks need not exceed 8 feet lift, which are much more convenient and durable than those of greater altitude.-Having descended the mountain the line is very straight, with a gentle declivity, to the head of a ravine, which has very much the appearance of a wide Canal; along this ravine the Canal is conducted with but little expense, except the necessary Locks and waste wiers, and clearing away the timber and constructing a towing path. This valley will afford spacious and beautiful Basins at the head of each Lock, quite to St. Catharines, affording at each Lock, also, Hydraulic power equal to the lift of such Lock; and considering the great number of Basins between the Welland River and the Lake Ontario, the supply of water will at all times be both equal and ample. Being fully satisfied that the Canal from Wilson's Basin by Beaver Dam and Dick's Creek, or the Easterly route to St. Catharines, is not only shorter and cheaper than the more Westerly route, though great pains and much time have been taken by Mr. Clowes Engineer, in order to ascertain the facts, and to locate those Locks to the best possible advantage, down the mountain as above stated, on the Westerly route. The Easterly route has decidedly the advantage in running more contiguous to public roads, in the capacity of its Basins, and the gentle declivity by which it descends the mountain to the beautiful valley of Dick's Creek, which is at present unimproved and presents no claims for damages of consequence. I would for the above reasons recommend and decide that the Easterly route is the most suitable and proper line for a Canal, both for intrinsic value and for public accommodations of trade, manufactures, &c.

The distance from the Welland River to Lake Oniario, on this route, is fifteen and three fourths miles, and is composed of Canal and Reservoirs, and Basins, in the following proportions:

un s. Canai.
ch's Canal. do. Reservoirs.

Reservoir from end of cutting	C	nnal		Reservoire
to Wilson's	0	0	0	60 chains.
Cutting from Wilson's to Beaver Dam		73	0	· · · <b>0</b>
Crock	·U	. 0	0	47
Cutting to Shriner's Ravine.	1	0	0	0
Reservoir to Township line at head of Locks	0	_	0	60
Cutting descending mountain to Shaver's Ravine	1	20	0	0
Reservoir and Natural Canal thence to Lake Ontario	0	C	7	20
1	n6	33	n	19 27

In the above distance we have to excavate an entire Canal but six miles and thirty-three chains: the remainder of the route is Reservoirs or large Artificial Ponds, formed in Vallies and Ravines, and by being deeper than the Canal will afford much the pleasantest part of the navigation, as boats and veesels can be towed through them with more ease and expedition than along the narrow Canal.

All which is respectfully submitted.
(Signed) NATHAN S. ROBERTS,
Engineer.

St. Catharines, 16th August, 1825.

The Hon. John Henry Dunn, called in and examined.

Will you be so good as to state to the Committee what situation you hold in the Welland Canal Company?

I am President of the Company.

Will you have the goodness to state to the Committee such matters as you think may enable them to judge more clearly of the several points embraced in the petition of the President and Directors of the Company presented to the House of Assembly, and to make any representations respecting the progress of the Canal which the Company may desire to offer?

Immediately after the passing of the last Act, a meeting of the Company was held, and the Stock being limited to £200,000 it was thought desirable to reserve £100,000 for the London market—I went to New York, instructed by the Board to get Stock subscribed to the amount of £50,000, but finding a great readiness to subscribe I accepted subscriptions to the amount of £75,000, and might, I think, have got the whole amount if it had been wished for.

The remaining £25,000 was taken up in Lower and Upper Canada. After the above had been subscribed, Mr. McGillivray, a Director appointed by the Act, at whose instance, in a great measure, half the Stock had been reserved for the London market, wished to withhold his reference to England until he could himself personally inspect the route.—He came up in September last for that purpose, and having satisfied himself upon the subject, a meeting of the Board was held at St. Catharine's, and it was resolved to send a gentleman to England with the necessary information to procure subscription of stock.—The Solicitor General accordingly has proceeded to England for that purpose, and in the mean time it is resolved to apply for no more Stock in this

country. The whole line from the River Welland to Lake Ontario is actually put under contract. It is divided into 15 or 20 contracts—the Harbour is also contracted for—the contracts are for a Canal of seven feet six inches in depth of water, thirty-four feet at bottom, fifty-two feet six inches at top, except the deep cut, which is about two miles in length, and is fifteen feet at the bottom and thirty-two feet six inches at top; the Locks are to be made of wood, twenty-two feet in wedth, and one hundred feet in length. According to these contracts that part of the Canal will be completed for the following expense, viz:—

£113,000

The part of the Canal above the Welland and not under contract, as estimated by Mr. Clowes, will cost, including the Harbor at the Grand River, about £60,000, and this estimate is upon a plan for bringing down the water of Lake Erie, instead of being supplied by a Feeder from the summit level. The latter place would have cost, by estimate, somewhere about £23,000. To bring the water of Lake Erie all the way occasions an additional excavation of almost twelve feet.—The contracts actually taken have been all under Mr. Clowes' estimate, except the Deep Cut, which will cost one-fifth more than he had estimated

The contracts are for completing the whole work contracted for in April 1827.—The contractors are, generally speaking, persons of property, and large Stockholders in the Company.

The Deep Cut is all contracted for by Beech, Hovey, and Ward, who are Stockholders to the amount of \$25,000; the harbor and several parts of the line are in progress, but the principal part of the expenditure has been on the Deep Cut, on which from two to four or five hundred hands have been employed since September, and no unexpected obstaclo has hitherto been met with. Regular written contracts have been entered into, which were drawn up by the Solicitor to the Company, and which, if requested, I am ready to produce.

It is the intention of the Company to put the remainder of the Canal under contract this winter or early next season.

Fifteen per cent upon the Stock subscribed has been paid in by the subscribers in New York, and they are now called upon to pay five per cent more. Twenty per cent has been paid in upon the Stock held in Canada. According to the contracts the work is to be paid for monthly; always withholding a portion (about 1) as a security for the performance of the contract.

The subscribers in New York have remonstrated on account of the delay in filling up the Stock, as it occasions instalments to be too rapidly called in, and there is reason to apprehend that some of them may decline further payments; which makes it highly necessary that the Company should be enabled to proceed in the work, if possible, without urging any considerable advance from the present subscribers until the issue of the application in England can be ascertained.—I think, if the application in England

fuils, it is very unlikely that the stock would be taken up in New York. I am not sure that Mr. McGillivray has yet recommended the measure in England.

The Company have prepared a general report of the origin and progress of the work, accompanied with copies of the Acts. Engineer's Estimates, and Plans, to be transmitted immediately to Mr. McGillivray for the purpose of being sent to England.

The Solicitor General has a power from the Company under the seal of the Company and signed by the Secretary, but not by the President or Vice-President, the President being absent at New York, the power was sent over to Mr. Boulton, scaled at Mr. Boulton's request, and a resolution has been since passed appointing a Committee in England to superintend the taking of stock—which resolution will be sent by the next post to Mr. McGillivray—I do not expect that any stook will be taken in England until the documents spoken of arrive there.

The General Report with respect to the proceedings of the Company is now in the Press.

Before the last Spring the surveys of the Engineer had been confined to the valley of the Twelve Mile Creek, never conceiving that any other route would answer. In Augest last, in the hope of avoiding, by a gradual descent of the mountain, the inconvenience of a combination of locks, which would be necessary on the prescribed route, an attempt was made to find a route by which that inconvenience would be avoided; and that course was discovered and reported upon, which is referred to in the petition, and which is stated to be on every account preferable.

Tuesday, 29th November.

. The Committee met-The Attorney General in the chair.

WILLIAM HAMILTON MERRITT, Esq., called in and examined.

Can you state what will be the probable expenditure per month under existing contracts between this and the first of April next?

I have here a statement of the probable expenditure.

[The witness delivered in the same and it was read as follows:]

"SIR,

"At the request of the Committee I, subjoin "a statement of the probable amount required per "month for the prosecution of the Welland Canal between this and the first April next.

£2200 to £2850

"The Contractors all state the whole line can be "finished by the 1st January, 1827,—but allowing "them the time of their actual contract, we will re"quire after April the sum of from £6,500 to £7,"500 per month.

"It is likewise the intention of the Board to put that "part of the line under contract between the Welland" and Grand River, as soon as the Stock is subscrib-

"ed in London, which will require £5000 per month.

"lam,

"Your obedient servant,
"Wm. HAMILTON MERRITT,
"Agent W. C. C.

"To the Chairman of Canal Committee, "Parliament House."

When was it first conceived that the route now prayed for from the Mountain to the Twelve Mile Creek would be the preserable one, and upon whose suggestion?

In July last the Company found a difficulty in descending the Mountain by the old route, near Decou's, on account of want of space to descend without a combination of locks with very high lifts. The proposed extension of the locks, by the last Act created these difficulties, which before did not exist.—The old route had been surveyed and approved of by Messrs. Clowes, Roberts, and Hull, Engineers, and would have been persevered in if the Canal had been confined to Boat navigation.

In July last Mr. Clowes, accompanied by myself and another of the Directors, Mr. Keefer, surveyed the route called No. 2, which was easterly of the old one, but not so far removed from it as the one now prayed for.—Afterwards it was found that still further to the eastward we could descend the mountain at less expense, and with less rock excavation, and that route so reported upon by Mr. Clowes, is the one now desired to be adopted.

Does Mr. Clowes' report contain, in your opinion, a correct statement of the comparative advantages of the old and new routes?

It does; and it is entirely for the reasons there stated that the Company wish the route changed.

Has any other surveyor been employed to survey the country in order to find the best route?

Immediately after Mr. Clowes had made his survey and report, which is now before the Committee, the Board determined to send for Mr. Roberts, who was then employed on the Erie Canal.

Mr. Roberts is an American Civil Engineer, who has been much employed on the Eric Canal, and in charge of the Western Section of it, and he has also been in the State of Ohio to determine the route of the proposed Canal there—before, Mr. Roberts had been highly recommended to the Company by Mr. Wright the principal Civil Engineer, as Lunderstand in America, whose letter respecting Mr. Roberts, I beg to produce to the Committee.

[Here the witness delivered in the letter, which was read as follows:]

"NEW YORK, October 1st, 1824.

"To W. H. MERRITT, Esq.,

"In answer to your request that I would give my opinion of the opinion and ability of Nathan "S: Roberts, Esquire, as a Civil Engineer.

"I say with pleasure that he is a prudent, careful "man, and free from any visionary plans of internal improvement.

"Mr. Roberts commenced with me as assistant on the Eric Canal in 1816, and has continued in the employ of the State of New York ever since.—
"While I conducted that work, and had Mr. Roberts for an assistant, I could place every reliance upon his accuracy and care, and I should have the most perfect confidence in any estimate he should subscribe to, as being fair and honorable in every part." I can freely recommend him as worthy of every confidence in his profession.

"As regards your plan of improvement and its advantages, as far as my acquaintance with the localities and great advantages of your contemplated improvements by Canal and hydraulic uses, there can be little doubt in my opinion, of its being a profitable work soon after completed, and passing through and connecting such an immense extent of fertile country it must be daily growing more valuable.

"Respectfully, I am;

"Sir,
"Your obedient;
"(Signed) BENJAMIN WRIGHT,
"Civil Engineer."

[Mr. Gordon, a member of the Committee, here states that as one of the Commissioners for improvement of internal navigation, he had occasion to confer with Mr. Wright in the United States on the proposed improvements in this country, and found him, in his opinion, exceedingly intelligent,—he was then employed as a principal Engineer on the Eric Canal and recommended to Mr. Gordon as the person best qualified to inform him—Mr. Wright upomthat occasion enforced upon Mr. Gordon that it would be decidedly right not to stop short of a Sloop navigation in internal improvements in this province.]

When Mr. Roberts came in did he survey the country generally for the purpose of finding the best route, or was his attention exclusively directed to the route last suggested by Mr. Clowes?

His intention was directed to the old route, and the one reported on by Mr. Clowes, and he was requested to give his opinion which of the two was the best.—He was employed five or six days, and finding Mr. Clowes' levels correct on the third route he took them to be correct throughout on both routes, and made his calculation accordingly.

I was present at both surveys of Mr. Roberts; and Mr. Keeler also accompanied him in the survey of the new route, Mr. Clowes did not accompany him—his son did.

Did Mr. Roberts, soon after the survey, make the report which is now before the Committee?

He did-immediately after.

Have these reports and the proposed change in the route undergone much consideration of the Board I

They have both been submitted and considered, and the new route is unanimously approved of by all the Directors.

Has there been any expression of opinion on this subject by the Stockholders to the Board

None, except from Mr. Gordon, who I understand has petitioned against it.—Mr. Yates of New York, in whose name Stock is taken to the amount of \$203,-

000, has been since upon the line of the Canal and fully approved of the proposed change

Has any particular reference been made to the Stockholders upon the subject?

None, but it has been generally talked of and known throughout the country—no express communication has been made to the Stockholders on the subject.

Has any work been done upon the Western route which it is now proposed to abandon?

None.

Has any land been purchased on that route from individuals?

None.

In how great a length of country will the new route deviate from the old line?

About six miles sixty chains.

Does the new line pass through an improved country so as to disturb improved possessions, houses, orchards, &c., in a greater or less degree than the old line?

Less in my opinion.

Are you aware that the new route, if adopted, will occasion any extraordinary instance of hardship to any individual by depriving him of the use of mills, or overflowing land, &c., which would not have occurred to an equal extent with respect to other individuals on the old line?

I do not think it will.

The Petition of Jacob Uppers and others, with the Report annexed, was then read as follows:—

"TO THE HONORABLE THE MEMBERS OF THE COMMONS "HOUSE OF ASSEMBLY, AT YORK, IN PARLIAMENT CONVENED.

"The Petition of sundry Inhabitants of the District of Niagara,

"RESPECTFULLY SHEWETH,

"That the Agent and Directors of the Wel"land Canal Company intend altering from the route
"already Chartered to them, and further intend to
"apply to your Honorable House for a new Charter
"so as to enable them to dam up the two East bran"ches of the twelve mile Creek, which if they are al"lowed to do will overflow some hundreds of acres
"of the best meadow lands in the township of Thor"old with a mass of stagnated water, much to the in"jury of your Petitioners and his Majesty's subjects
"in general, both in health and property, throwing
"back water over roads and bridges, and on Mr. John
"Crooks Kitchen floor—besides depriving the Mills
"below of the privileges of their water courses.

"Your Petitioners beg leave to state further that "the said Agent and Directors report the mountain "on the Chartered route not practicable, which route both them and their Engineers have frequently reported effeasible and advantageous for Inland Navigation.—Buttheir motive at present is to alter from that route with a view to accommodate two of the Directors, viz. Hamilton Merritt and George Keefer Esquires, and deprive your Petitioners, and the "Stockholders in general, of the great advantages" they expected to derive from Machinery of every

"description which could be erected on the Charter"ed route, which route is far preferable to the inten"ded new route, as will appear by the annexed Re"port of an experienced and scientific Engineer, and
"will make a saving of some thousands of dollars to
"the Company. Moreover the people, with the ex"ception of one or two individuals, are willing to
"give their lands free gratis on the Chartered route.

"Notso on the new intended route—the majority of the people are opposed to its running diagonally across their Farms, and humbly pray that your honorable body will order them payment for their houses, timber, and lands, before one sod of the ground is broken. Your Petitioners therefore humbly pray that you, as honorable Representatives of the people, will take their present unequalled grievances into your serious consideration, and compel the said Agent and Directors to keep within the limits of their former Charter—Grant them no other and pass no Act to aid or assist the Company by taxation of the Province.

"And we your Memorialists, as in duty bound,

" will ever pray.

Thorold 1st November, 1825.

"Being called upon by a number of the inhab"itants of the District of Niagara to ascertain the dis"tance of the Chartered and contemplated routes of
"the Welland Canal from the point of departure on
"Mr. Wilson's farm, in the township of Thorold, to the
"point of intersection at Saint Catharines, and also to
"ascertain the practicability of the mountain on the
"Chartered route—

#### "RFPORTS AS FOLLOWS:

"Commenced at the Section post at the point of departure on Mr. Wilson's Farm, then bearing Northerly following the route of the new intended line of Canal, I find in some places on the first three miles from 14 to 32½ feet excavation marked on the line stakes. In this route there is considerable rock excavation.

"Having carefully measured the distance from the said point of departure to the point of intersection at "Saint Catharines I find it to be seven miles, three furlongs and six perches.

"Secondly, commenced on the Chartered route at the point of intersection at Saint Catharines, following the original surveyed course to the point of demparture on Mr. Wilson's Farm in the township of Thorold. In this route I find very little excavation more than what is necessary for the formation of banks &c.

"There is rome rock excavation in this route, but "nothing in comparison to the other. Distance of "Chartered route, eight miles, one furlong and thir"teen perches, making a difference of six furlongs "and seven perches in favour of the new route.

"I have also levelled and ascertained the descent from the brow of the mountain on Mr. Cooper's farm to Brown's bridge on the valley of the twelve mile Creek, a distance of sixty seven chains and six links, fall 179 feet, which can be formed into a regular inclined plane, and will require eight single Locks, each ten feet lift, admitting level of two chains twenty links and a half between each Lock after deducting one hundred feet for each Chamber. Having taken a retrospective view of the incal-

"culable advantages the Stockholders and the Prov-"ince in general could derive from the Chartered "route in preference to the contemplated one, indu-"ced me to give my decided opinion in its favour.
"Which is respectfully submitted—
"By Gentlemen,
"Your obedient servant,

"R. CUSACK

"Late Assistant Engineer to the Right Honourable "and Honourable &c. &c. &c. The Directors "General of Inland Navigation in Ireland."

You have now heard read the Petition of Jacob Upper and other inhabitants of the District of Niagahave you any remarks to offer as to the statements therein contained?

It is not intended to dam up that branch (the main one) of the twelve mile Creek, which reaches to Mr. Crooks. The other branch is to be dammed up; (the Eastern branch,) it will cover 40 acres of meadow land, partly improved, belonging to a Mr. Marlott, Norman Vanevery, Carrol, and I think also a Mr. Miller. It will be in the immediate vicinity of three dwelling houses, but not interfere with the access to any of them. The water so dammed up will be 10 or 12 feet deep on the line of the Canal, and from five to eight feet over the surface generally. The water is to escape over a waste weir, and I think cannot be prejudicial to health, as stagmant water: this opinion I have heard also expressed by one or two Physicians there. I am certain that it cannot overflow roads or bridges in any part of the line, except one or two hundred yards in one instance, where an equally good road can be made on the side. The new line would certainly benefit Mr. Keefer, one of the Directors, by passing through his land, but that was by no means the motive to the change, nor had it any effect either in suggesting it or deciding upon it. myself I consider the change as indifferent; indeed my private interest merely would lead me to prefer the old route. As to advantages for the purposes of machinery, so far as the Stockholders are concerned I think the new line decidedly preferable as reported by Mr. Roberts.

With respect to the statement in the Petition that the old route is the preferable one for purposes of navigation, the Report of the Engineers must decide. With respect to Mr. Cusack, whose Survey accompanies that Petition, I would remark one inaccuracy, which is the leaving two chains only between each Lock, which is manifestly insufficient for the passage of Vessels; and with reference to the signers of that petition, I think there are but two-Wormer and Vanevery, who possess property on the proposed route; and most of them reside several miles off the line of the Canal.

MR. GORDON, the signer of the Petition marked No. 9, and referred to the Committee, was next examined in support of his Petition, which was read as follows:

TO THE HONORABLE THE COMMONS OF UPPER CANADA IN PARLIAMENT ASSEMBLED.

"The Petition of James Gordon, Stockholder, in the Welland Canal Company,

"HUMBLY SHEWETH,

"That your Petitioner is a Stockholder to the amount of forty shares in the Welland Canal Company, and is not aware that any of the business or

transactions of the Company's affairs have been published or communicated to the Stockholders since the last Act of Parliament relative thereto.

"That your Petitioner having heard that several Contracts were made on the 26th ult. for carrying the line of Canal out of the lawful route, as laid down by Hiram Tibbitt, and that an application has been made to your honourable House without the general sanction of the Stockholders, for altering the route expressed in the Act of Incorporation, and confirmed by an additional Act the present year.

"Your Petitioner humbly sheweth that Hiram Tibbitt's route is the same now as it was at that time, and that there was abundance of time and opportunity previous thereto of ascertaining any more practicable route, especially as the contemplated deviation therefrom is embraced in the Niagara Survey of James Clowes and Francis Hall the last year, long before the confirmation of the present route by your honourable House.

"Your petitioner therefore humbly prays your honourable House may be pleased to suffer the route of the Canal to remain, but should your honourable House be disposed to alter the same, your petitioner humbly prays that as a direct line is always the shortest, your honourable House may be pleased to cause a faithful survey and estimate for carrying the line of Canal from the base of the mountain in as direct a line as may be, down one of the ravines terminating at the mouth of the twelve mile pond, instead of turning round through St. Catharines; there being no perceptible difficulty save the cutting off that village, the aggrandizement of which can be of no importance to the Company's general interest.

"Your petitioner also humbly prays that should it be the will and pleasure of your honorable House to alter the line of Canal, that your honorable House may be pleased to make the like provision as in the late Act, of permitting all dissenting Stockholders to withdraw within a given time, and the sums paid by them to be immediately refunded on giving such notice.

"Your petitioner further prays your honorable House will be pleased to provide that the land as well as the water belonging to individuals which the Company or their servants may take possession of or encroach upon, shall be paid for within a given time from such encroachment

"Your petitioner as in duty bound shall ever pray. "JAS. GORDON,

"Stockholder Welland Canal Company."

" Niagara 22nd November 1825.

Have you any facts to state or remarks to offer in support of the Petition presented by you and now read?

As to the Rel t of Mr. Roberts, which I only saw on Saturday last, the explanations Mr. Merritt has given to the Committee this morning have overcome my objections as to the point of the alteration of the route; and I only now wish the provision last prayed for by me to be afforded, namely that Stockholders not approving may withdraw their subscriptions, and their stock paid in be refunded, as I believe there has been no Meeting of the Stockholders on that point.

As to the proposed alteration near the village of St. Catharines, I am not prepared to say it is the best—it is merely my own idea; and I know not that any Engineer has proposed or Surveyed it, or that it has been proposed by any one to the Directors; but I was desirous that it should have been done, to convince the Stockholders that the more circuitous route was really preferable, and not chosen from any private motives affecting the interests of Mr. Merritt.

Have you any further remarks to offer to the Committeee? None.

DR. LEFFERTY, a Member of the House, attended, and was examined.

Were you instructed by the signers of the petition of the inhabitants of the District of Niagara, referred to the Committee to present their petition and support the statements contained in it; and is it your desire to offer any observations respecting their statements to the Committee?

At the day the petition was signed I attended by request of some of my constituents a meeting at Thorold on the proposed line of the Canal. Many of the petitioners were there, much wassaid about the Canal.

There is a general suspicion in the District of Niagara that the Directors have not acted prudently or correctly, and particularly in this respect. That if the Directors had adopted this route in the first instance, which had before been explored, I think by Mr. Roberts, the expediency and ease of taking it to Queenston would have been more apparent, and that that course would have been more likely to have been adopted by the Legislature.

It is another complaint against them that they did not settle their route decidedly and bargain for the land, and ascertain the expense, before they got their Charter.

Have you any personal knowledge of the facts stated in the petition presented by you?

I have not.

Do you know whether the petitioners have any person attending whom they desire should be heard in support of it?

None that I know of.

Are any of the petitioners attending?

Not that I know of.

Do you know any person that could give information as to the proposed route that would be valuable to the committee?

I do not—my own opinion is that it is the best—I believe there is no doubt of that.

WEDNESDAY, November 30., 1825.

Committee met at ten o'clock.

Present, all the members except Mr. Beardsley.

MR. MERRITT again called in and examined.

What information can you give the Committee with reference to that part of the petition of the President and Directors of the Welland Canal Company which prays the remission of duties on tools and machinery employed in making the Canal?

The Company has already paid somewhere about \$200 for duties, principally on waggons and horses brought in to work on the Canal, and on scrapers, ploughs, shovels, and spades, or rather the contractors have paid it, but with the understanding that the Company will repay it if not remitted.—Perhaps duties to the amount of £50 more are secured to be paid by the Company.

Cannot all these articles be provided as advantageously in the country?

The proper spades and shovels are not imported here, but are made in the United States. The inducement to bring horses and oxen is that the contractors coming from the United States owned many horses, cattle, and waggons, which they desired to bring in rather than purchase; but these horses bringing a higher price in the United States than in this country, they will be taken back after the work is completed. Waggons could not be procured in this country at a reasonable price or in sufficient number.

Can you form any opinion as to the probable amount of duties the Company or Directors would be required to pay hereafter?

I think £400 would cover all the demand.

Mr. Clarke, a Member of the House, attended and was examined by the Committee.

The petition of Samuel Wood and others, referred to the committee, was read, and is as follows:

- "To the Honorable the Commons' House of Assembly in Provincial Parliament of Upper Canada assembled.
- "The undersigned petitioners being well disposed to the completion of the Welland Canal, convinced of the general benefit it will be to the public; at the same time we view with regret that the individuals living on the line of said Canal are not provided for by the present act, and that depredations now have and may still continue to be committed.
- "We conceive it a grievance and great injury that the power is given by the Welland Canal Act for the Directors, Agents, or as an Incorporated Body or Company, to enter upon our lands without any previous arrangement, laying our farms to commons and waste without compensation, to the great injury of individuals, although considered a benefit to the province.
- "We also consider it a grievous injury that at the completion of the Welland Canal, lands will be divided, and the owners deprived of having free access to the same, unless bridges are built by the Company, which the circumstances of no individual is able to effect, and the inhabitants will be deprived of the water privileges, except where it backs on lands, for watering cattle; and in case of seasons like the present, man and beast must suffer for want of one of the greatest blessings the Almighty has bestowed upon us.
- "We view with regret that the Welland Canal Company will monopolize too great a proportion of our lands, so that we are deprived of those privileges from which heretofore we derived a benefit; and understand the Company intend making further application for lands, we hope the lands may be limited to the Company as not to deprive owners of such privileges as they may be justly entitled to.

"We humbly solicit the interference of your Honorable House to make such amendments to the Welland Canal Act as will protect such portion of His Majesty's subjects owning real estate on the line of the intended Canal, in their just rights and privileges. And your petitioners, as in duty bound, will ever pray.

"(Signed) SAMUEL WOOD,

And others."

" Grantham, 14th November, 1825.

Have you any statements to offer in support of the petition of Samuel Wood and others beyond what appears on the face of the petition?

None that I know of.

I know of no apparently wanton and unnecessary abuse by the Company of the powers given them by the Act. I have heard Mr. Adams, one of the subscribers, object to their breaking ground on his farm till they had first satisfied him for the damages they were to occasion.

I am not aware that the proposed route will interfere with any water privilege except of Mr. Adams, who has a mill on the 12 Mile Creek, and who fears that the Canal will interfere with it. I am of opinion that the law already affords sufficient protection in such cases, and conceive that the only ground of discontent on their part is that they are not to be paid before ground is broken, and they think they will have to wait the Company's pleasure.

The general complaintis, that the Company pulls down a man's fences and lays open his farm to common.

# MR. MERRITT called back and asked,

Have you any observations to offer on behalf of the Company with respect to the statements contained in the petition of Samuel Wood and others?

As to taking the land without payment of damages beforehand, I would observe, that the Company have power by law to do so, and that in point of fact they cannot estimate the damages their work will occasion in any case until that work is done.

The Company would not object. I think, to bind themselves to pay by the 1st of August or September next, all damages that would be estimated by arbitrators as the Act appointed directs; provided such arbitrators were allowed, as is the case with respect to the Eric Canal, to take into consideration the advantage which the Canal produces to the proprietor of each farm, as well as the disadvantages, and decide, upon a full and fair view of all circumstances.

As to the bridges, the chief objection is not so much to the expense as to the great obstruction which a Sloop navigation would experience if the respective proprietors could compel the Company to have a bridge erected upon every distinct property.

The Committee then proceeded to consider the petition of James Muirhead and other inhabitants of the town of Niagara, and Robert Dickson, Esquire, being called in, the petition was read as follows:—

" TO THE HONORABLE THE COMMONS HOUSE OF ASSEM-

"BLY IN PROVINCIAL FARLIAMENT CONVENED.
"The Petition of the Inhabitants of the Town of

**L**3

"Niagara and its vicinity,

"HUMBLY SHEWETH,

"That your petitioners deeply impressed with the importance and necessity of improving the internal navigation, and opening water communications throughout the province, are desirous to promote this object by opening a lateral cut from the Welland Canal below the mountain ridge to the Town of Niagara, sufficient in its dimensions for a boat navigation; the Company to be incorporated under the name and style of the Niagara Canal Company, and to be vested with a capital of £20,000.

"Your petitioners therefore pray that it may be enacted that five Directors, and no more, shall be appointed for the direction and management of the proposed Company, one of whom shall be elected President, and that the directors shall be chosen by the majority of the stockholders votes; that the President shall have power and authority to appoint a Treasurer and Secretary; and that the Treasurer give sufficient security for the due and faithful discharge of his trust.

"That each share subscribed for shall be the sum of twelve pounds ten shillings, and no more:

"That no individual shall be deemed cligible to the office of a Director unless he is a subscriber for five shares.

"That after all the stock to be subscribed is disposed of, that the Directors shall have power to call in ten per cent, and after that is paid not more than ten per cent monthly, by giving thirty days notice.

"And your petitioners further represent, and beg leave to acquaint your. Honorable House that in soliciting the passage of the required act and incorporation of the proposed Company, they by no means wish to injure any individual private right with which this contemplated lateral cut may interfere, without first obtaining the consent of the legal owners of the soil, and subsequently affording them ample remuneration for any injury that they may sustain from the Company's acts in the progress of the Canal.

"And your petitioners would moreover submit that the route laid down and, prescribed by the act of incorporation for the Welland Canal has been deviated from, they cannot but entertain hopes that their representatives will assist, by their interference, a section of the country which has so materially suffered by its determined and successful defence during the late war, and which from its resources and natural advantages is so capable of improvement; especially when it is taken into consideration that your petitioners only solicit a participation in privileges which justice proclaims open to all, when all collectively contribute to an expenditure for its advancement.

"Your petitioners deem it unnecessary to cite precedents of other countries when they are convinced that every enterprise embarked in for the improvement of the country, without the aid of the Provincial Treasury, or interference with private rights, will receive that consideration which its importance deserves."

Are you agent for the persons signing the pe tition just read !—I am.

Have you any more distinct proposals to offer for the consideration of the Committee than are contained in that petition, or any plans or drawings of the proposed cut?—I have not.

Have you any report of a Surveyor or Engineer who has explored a route for such a Canal as is prayed for, or any estimate to submit of its expense?—I have not.

What reason have you to suppose that it can be accomplished for £20,000?—

It is about nine miles passing through a level country, and may be conducted generally in a straight line. It would intersect the ten, four, and two mile creeks, and a small creek called the One Mile Creek; the supply of water would be required to be drawn from the main canal. The precise point of termination is not settled, but it is proposed to bring it to the Four Mile Creek, and leave it from that point to the discretion of the stockholders. I believe it is contemplated that it should terminate somewhere near Navy Hall. The route has been explored by Messrs. Clowes, Roberts, and Hall, and surveyed by Mr. Clowes, and they have all reported upon it, but such survey and report were not made for the specific purpose of this application, but in order to enforce the expediency of conducting the Welland Canal by that channel. I am not in possession of these reports.

What are the nature and extent of the advantages expected from the proposed Canal?—

The petitioners consider the advantage of water for machinery the most important.—In addition it would drain a great extent of low and marshy country. It would facilitate the transportation of cord wood, staves, and lumber of all kinds, passing through a country abounding in good timber. Stone for building would also be brought down by it. It is also conceived that it would tend much to the improvement and advantage of the Town of Niagara. It is contemplated also that articles transported from the western country and destined for Niagara could be much more advantageously brought down by this route than from the mouth of the Twelve Mile Crock.

Have the petitioners had any communication with the Welland Canal Company on the subject of their proposal?—

None-time has not admitted of it.

Are many of the subscribers to that petition stock-holders in the principal Company?

I think not one.—The petitioners are willing to make compensation to the Welland Canal Company for the use of the water. They have obtained from every proprietor of land on the proposed route a release under seal of such portion of their lands as may be required. In explanation of this application generally I would remark that it was the reported recent change of the route intended to be applied for by the Welland Canal Company, from the Mountain to the Twelve Mile Creek, which suggested this application, and it has therefore been so recently thought of, that the Petitioners are not prepared, as they otherwise would have been, to support it.

Euwano McBride, Esq., a member of the Committee and Representative from the Town of Niaga-

ra, being asked whether he desired to offer to the Committee any information or remarks respecting the petition, confirms in all respects the statements made by Mr. Dickson, and adds that through the extent of country spoken of, there is frequently so great a want of water that great inconvenience is felt by the inhabitants, an evil which the proposed Canal would of course remedy; further, that it has been contemplated as a part of the scheme to form a dry dock for repairing vessels, and perhaps a wet dock in which they might winter, without being exposed, as in the River, to dangers from ice in the winter and spring.

### W. H. MERRITT, Esq., again called in.

Do you conceive that any objections could be stated on the part of the Company to complying with the prayer of this petition?

When the present Stockholders in the Welland Canal Company subscribed, the had in view every advantage likely to arise from Machinery, Docks, &c., in consequence of the proposed junction of the two lakes; and I think they contemplated the exclusive enjoyment of all such advantages as could not have accrued without the bringing down of the water from Lake Erie. I think the Directors could not take upon themselves to waive any part of this advantage without reference to the Stockholders; but am of opinion that the Stockholders would not object, on the Company's being paid a reasonable compensation for the proportion of water taken down; as for instance if they should require one fourth of the water, that they should pay one fourth of the expense of the work for bringing down that water to the point at which the took it. I think if an Act were passed obliging the Company to assent to the proposed plan, it would depreciate the Stock of the Welland Canal, especially abroad.

Do you think the Welland Canal Company would themselves undertake this proposed lateral cut, on having their capital enlarged for that purpose?

I think they would not; they would now get all the transport between the two lakes, and unless it could be shewn to them that there would be so much additional transport in consequence of the cut as would pay the interest on the additional Stock, they would not find it for their advantage to undertake it. I think this could not be shewn them, and therefore I think they would decline it. This is only my opinion; the proposal might be made to the Stockholders.

Have you any reason to suppose that the sparing the necessary water from the Welland Canal would produce injury to the navigation, or to any machinery, except by affording the means of rival establishments?

I think not; but that the supply of water would be abundant if no more was taken than would be required for a boat navigation.

December 1st. 1825.

Committee met—Attorney General in the chair.

Mr. Menritt again called in and examined.

Has it appeared to the Welland Canal Company

since the granting of the last Act, that any material alteration is desirable in the dimensions of the Canal for the purpose of adapting it to Steam Boat navigation, or any particular change in the terms of their Charter for any purpose?

It has been spoken of as very desirable to make the Canal fit for Steam Boat navigation. In order to do so I conceive the depth of the Canal should be in no place less than nine feet six inches. The present width would enswer for Steam Boat navigation in all parts except in the Deep Cut, and the Locks, there being ample width in the general course of the Canal for Steam Boats to move, and many places throughout the line in which, from the width of the natural channel two Steam Boats could pass—the principal alteration therefore that would be necessary, would be widening the Deep Cut and making the Locks larger; the former change could be made perhaps with greater facility after the Canal was completed than at present. The Locks, of their present dimensions, would be insufficient for Steam Bouts, and therefore so far as regards them, if it were likely that a Steam Boat navigation would ever be made there, it is most desirable that the Locks should be now constructed with a view to it. It is estimated that the Locks should be thirty-two feet wide, and they would be better to be five feet longer. The increased expense of the additional width of the Locks would not exceed £5000 (the additional expense of the increased length has not been intimated,) and the Contractors have enguged to undertake it for that sum. I think if the Company can receive present assistance from the Province, to the amount of £25.000, as prayed for, that the Company would adopt the improve-ment spoken of. These remarks are confined to that part of the Canal from the Welland to Lake Ontario. In the Western section of the Canal nodifficulty presents itself; the width and depth must be greater, but the probable increase of the expense has not been estimated.

I would add that the Company is generally averse to the clause which provides for the Government assuming the Canal at the end of fifty years, if thought expedient.

DR. LEFFERTY presented to the Committee a letter from George Adams, Esq., of Nov. 28th, 1825, which was read to the Committee and Dr. Lefferty examined upon it, who says he knows nothing of the injury that will be occasioned to the family of Gould in particular; and that as to Mr. Adams, he thinks the damage he apprehends is from drowning his lands, and the loss in value of his machinery from competition on the part of the Company, through the means of the advantages of water afforded by the Canal.

W. H. Mennerr, Esq., called in and examined in reference to this complaint.

The injury to Mr. Gould's property is trifling in the extreme; two or three acres of his land will be taken, and four or five acres of Mr. Adams'; his mill seat cannot be injured by it with respect to the supply of water; if his mills and machinery are injured

by competition of the Company it is provided by the Charter that the Company must purchase his property by appraisement. I have heard no other complaint from these parties than that they want payment immediately, which the Act does not require:

At the request of the Committee Mr. Merrit, produced the original contracts entered into for the making of the Canal from the Welland to Lake Ontario, and also the harbor on Lake Ontario.

ZACCHEUS BURNIAM and DONALD McDonald, Esquires, members of the House, who have, since the meeting of the Legislature, gone to the line of the Canal for the purpose of examining it for their private satisfaction, were called in by the Committee and Mr. Burnham was asked—

From your own observations is there any information which you can give to the Committee relative to the progress of the work that can guide their judgement as to the probability of its being completed within the time and at the price specified? Or do you think the same improbable for any and what reason?

I went to the Deep Cut: it was on a Sunday when none of the men were at work. In the deepest place about twenty feet had been excavated. If was told that about seventeen feet in depth below that had been excavated and was now filled with water, which could be readily drained off by a cut. I saw none of the Contractors—no information was given to me, nor have I any reason, from my own observation, for believing that the work will not be found practicable at the sum estimated for. I was told that the soil had turned out even more favorable than was expected, and I heard of no apprehension of any difficulty.

DONALD McDONALD, Esq., M. P., gives the same relation to the Committee:

December 2nd, 1825.

Committee met—Attorney General in the chair.

The Hon. WILLIAM ALLEN examined.

Are you a Director of the Welland Canal Company?

Tam; and also Vice-President.

You hear now read the petition of certain Inhabitants of the Town of Niagara and its vicinity—Do you conceive that any objection could be stated, on the part of the Company, to complying with the prayer of this petition?

I think that the Stockholders, and particularly those resident abroad, would consider it as prejudicing their Stock, from not having the necessary means of juding what the effect might be. As far as respects myself as a Director, I could not assent to such a measure without first referring to a general meeting of the Stockholders, and I can form no opinion as to what would be the issue of such an application.

Do you think the Welland Canal Company would themselves undertake this proposed lateral cut on having their capital enlarged for that purpose?

Speaking merely from my individual opinion; I should think it would be much better to have the work in question undertaken by the Welland Canal

Company than by other hands; the additional expense would be no great object to the Company.

Have you any reason to suppose that the sparing the necessary water from the Welland Canal would produce injury to the navigation, or to any machinery except by affording the means of rival establishments?

It might very possibly; but until the Canal is completed I could not venture to say.

The Petition of the President and Directors of the Welland Canal Company was read as follows:—

"TO THE HONORABLE THE COMMONS HOUSE OF ASSEM-"BLT OF THE PROVINCE OF UPPER CANADA IN PRO-

"VINCIAL PARLIAMENT ASSEMBLED.

"The Petition of the President and Directors of the Welland Canal Company,

"HUMBLY SHEWETH,

"That since the passing of the Act to alter the dimensions of the Welland Canal, your petitioners have obtained in the Canadas and the State of New York, Stock to the amount of £100,000—that they have enlarged the dimensions of the said Canal to 7 feet 6 inches depth of water, Locks at least 100 feet in length by 22 feet in width, and have placed the whole line from the Welland to Lake Ontario under contract, and are sanguine that its entire completion may be expected by the Spring of 1827.

"Your petitioners reserved for the London market one half of the amount of Stock which is not yet available, and in order to lessen the dividends necessary to be called in from the Stockholders in America, as well as to facilitate the work already commenced and now in successful operation, they pray Your Honorable Body will be pleased to carry into effect that part of your resolution of the 13th April last. Wherein you resolved to loan to the Welland Canal Company the sum of £25,000 currency, and that you may be pleased to grant the said loan for such a period and on as favorable terms as you may conceive the public advantages likely to arise from the undertaking may warrant.

"And your petitioners further pray, that Your Honorable Body may be pleased to sanction a deviation in the line of the Canal, which, from the accompanying Reports of two experienced Engineers, they trust you will deem expedient, as it not only shortens the route and lessens the expense, but will make a far more perfect and complete Canal.

"Your petitioners further pray Your Honorable Body may be pleased to cause the duties already paid on their tools, machinery, &c., to be repealed, and that they may in future be brought from the United States free from charges of every description.

"And as in duty bound your petitioners will ever pray.

"For the Directors,
"JOHN H. DUNN,
"President Welland Canal Company.

"Welland Canal Office, St. Catharine's, 12th Nov. 1825."

You hear the petition of the President and Directors read—have you axy remarks to offer as to the statement contained in it?

I attended as Vice-President a meeting of the

Board, at which it was proposed to enter into contracts for that part of the line from the River Welland to the Twelve Mile Creek which had not before been taken up.—I first inquired of Mr. Merritt, the Secretary, what means there were of making the contract. He shewed me, among other things, the Resolution of the House of Assembly of last session, with respect to a loan of £25,000. This, together with the Stock taken up, and the prospect of Stock being taken up in England, prevented me from hesi tating to sign the contracts. Had it not been for these circumstances I should have entered into no contract. I have no doubt but that the Stock will be subscribed in England.

Mr. McGillivray, I believe, intended to have gone sooner to England, but circumstances have arisen to detain him here; the delay, I think, in referring to England, has arisen from that cause.

Do you think the proposed deviation from the original route desirable?

I do certainly, so far as I can judge, both in point of distance and expense.

Do you think the Company would prefer that the Government should lend them £25,000 or take Stock to that amount?

I think it would be preferable that the Government should take Stock, as it would give greater confidence respecting the work, and particularly to people abroad.

If it were proposed to loanthe Company £25,000, within what period would it be convenient that the Company should repay it?

I think a period of ten years, or more, would be preferred.

Have you a copy of the Power of Attorney given to Mr. Boulton?

I have not. I have seen it. It wont I think to authorise him generally to dispose of Stock for the Company—to receive instalments, and appoint other persons under him. Mr. Boulton did not shew his power to me before his departure, nor did I know of it. I was here when Mr. Boulton went away—I think I should not have authorised a power in such general terms—I think they were too undefined—I think the power should have been signed by the President or Vice-President to be regular; and so far as I am a judge I think the instrument, wanting this signature, is irregular. Whenever there is a common seal, I think the signature of Secretary or other officer, affixed by an order of the Board, would be good. I believe the President has so far revoked the power that he has written to Mr. Boulton that he is not to use, or act under it.

Have you any reason to doubt the practicability of the work being performed within the sum and time specified?

None—on the contrary, I think there is every reason to be assured of it from my own observation of what has been done.

MR. W. H. MERRITT, again called in and examined.

In whose custody is the Company's Seal generally kept?

It has been kept in mine at the Canal Office at St. Catharine's, but is now with the President, or rather Mr. Wenham, under the President's direction, who is to take charge of the office here. The reason of this I think is my having been supposed to affix the Seal without proper authority, which I had no idea was the case. Mr. Boulton, I believe, expected, as I did, that the instrument sent him would be perfected at a meeting below. Mr. Allan was not then Vice-President—Mr. Boulton was—and as such wrote for the instrument. It having been resolved at a previous meeting that Mr. Boulton should, receive his instructions from the Board, and being required officially by him as Vice-President to send over the power in question, I did so, sealed with the Seal and countersigned by me. There was no other Vice-President but Mr. Boulton—the President was at New York.

Mr. Boulton went to Montreal to see Mr. M'Gillivray, and to Quebec to see Mr. Irvine, and I fully believed that every thing would be arranged below. My only motive was to avoid delay, as the matter had been deferred so long. This is the only paper I ever put the seal to with my signature alone; it has only been put to two papers, and they bear the signatures of the Vice-President.

The President, Mr. Dunn, again called in, asked as to lateral cut, the same questions as Mr. MERRITT and Mr. ALLAN.

I think the Company would not be willing to undertake it if their stock was enlarged. If the interests of the Company are protected I think the Company would have no objection to its being undertaken by others. I think if the new Company would pay their proportion of the charge of the original Canal in proportion to the water they took, the Welland Canal Company would not object to it. I think the affording means of competition, in regard to machinery, would not be complained of by the Company, and that they could not reasonably complain of it. I think, however, no person is now authorised to consent to it, and that the Stockholders generally must be consulted.

Mr. Dunn being asked, with respect to the resolution which had been taken at a former meeting, for draining Cranberry Marshin Wainfleet, and rescinded afterwards at his instance, says:—

I objected, because I thought until the route of that part of the Canal had been actually decided on, it was premature to make a drain that might not suit the actual line of the Canal. Mr. Clowes, the Engineer concurred, and the order was rescinded at a subsequent meeting. Moreover I think that it was proper to complete altogether, in the first place, the Canal from the Welland to Lake Ontario, without incurring any expenditure on the other section.

Mr. Merrit, in relation to this matter, says that it will be absolutely necessary to make this drain before this section can be made, as the people cannot work in the water, and that it never was contemplated to make any such drain, except on the line of the Canal.

Monday, December 5th, 1825.

Committee met.—Attorney General in the chair.

OLIVER PHEUPS called in and examined.

Are you a contractor for any part of the Welland-Canal?

I am a contractor for all the locks from the Welland to Lake Ontario, exclusive of the Lock at the harbor at the mouth of the 12 Mile Creek. There are 34 locks, and I have taken them at \$2200 per lock, which will complete them in the very best manner, entirely of wood.

Why have you not undertaken the lock at the

It was commenced and put under contract before I came in.

What are to be the dimensions of the Locks—22 feet in width and 100 feet in length (the chamber of the Lock.)

Have you been asked to estimate what would be the increased expense of making all the locks thirty six feet wide in the clear?

I have. I think it could be done for \$20,000, including the excavation—thirty-two feet in breadth—for about \$16,000. I am sure it would not very greatly differ from that.

Would any addition to the length be necessary for Steamboat navigation?

I think not, for a steamboat of 150 to 200 tons, well proportioned. From the greater space required for opening the gates of the locks when widened, an additional length of about six feet would be advantageous. The charge for the additional length would be in proportion to that for the whole length of the side, and might occasion an additional charge of about \$3000 for the whole.

Are you well acquainted with canal navigation, and do you think that to allow bridges to be erected wherever the canal intersects the property of individuals, would be a great obstacle to the navigation?

I think it would, and that it ought only to be the case where some important road would be obstructed, or buildings and improvements of great value divided.

Are you acquainted with the principle upon which individuals possessing property on the line of the Eric Canal have been compensated for any damage done to their property?

Commissioners were appointed to estimate it, and such commissioners have, by law, authority to estimate what advantage the individual derives from the canal, as well as the damage; not, however, to that extent as to make individuals pay anything; and generally the Commissioners have been liberal, and allowed something, even when the canal may in fact have caused more lienefit than injury to the individual. I am confident that along the Welland Canal the proprietors could sell their lands through which it is desired that it should pass for one third more than they could before have done, and that they would in general be much disappointed if the route were not altered so as to come, through their lands; some who have signed petitions against it have told me so.

M3

George Keefer, Esq., a Director of the Company, called in and examined.

The several points which have been discussed before the Committee being stated to him, he is asked whether he has any information or opinion to offer to the Committee respecting them.

Ans.-I have no doubt as to the superior advantages of the new route proposed. With respect to the projected lateral cut to Niagara, I am myself of opinion that it would be well for the Company to undertake it themselves on their stock being increased. I think it would pay them. As a stockholder I should consent, but as a Director I cannot offer an opinion that shall affect the interests of others upon a point of this kind. I think they must all be referred to upon With respect to the complaints of individuals on account of damage done to their property, I know of no particular reason for such complaint. The Company will pay any ascertained damage so soon as they have completed their work through any person's premises.

The Canal I think will deprive no one of water which he enjoyed before; it will bring water to many who were before without, and in most places, from the width of the natural ravines through which the Canal will pass, the proprietors of the lands adjoining will have abundance of water without going through the enclosures upon the bank of the Canal.

I would add further, that with respect to the lateral cut to Ningara, the saving that will be made by adopting the proposed new route from the Mountain to the 12 Mile Creek, would be sufficient, in my opinion, to defray the expense of such Canal to Nia-

The Select Committee appointed to report upon the several petitions of the President and Directors of the Welland Canal Company-of James Gordon, Esq., a Stockholder in the said Company-of Jacob Upper, and others, inhabitants of the District of Niagara-of Samuel Wood, and others-and of the inhabitants of the town of Niagara and its vicinity, pursuant to the order of the House, have further considered the matters to them referred, and agreed to the following as their second Report :-

Your Committee having deferred reporting upon the petition of the inhabitants of the town of Niagara and its vicinity, for authority to make a lateral cut from the Welland Canal to the town of Niagara, un til Mr. Dickson, the Agent for the petitioners, could again communicate with them upon several points on which he desired to consult them, and having again examined Mr. Dickson and received from him the statement subjoined to this report, they now beg to report to the House their opinion that until reference has been had to the Stockholders of the Welland Canal Company, to be convened at a General Meeting for that purpose, and their consent or objections made known, the Legislature ought not to sanction upon any terms the diverting, by an independent Company, any part of the water brought down by the Welland Canal Company, for the purpose of forming a Canal by another route, and of affording facilities for the erection of rival establishments of mills or other machinery.

The Committee, however, are highly favorable to the undertaking of such a work as the inhabitants of the town of Niagara and its vicinity have prayed for, and they carnestly hope that the Welland Canal Company will either find it consistent with their interests to engage in it upon their stock being enlarged for that purpose, or in the event of their declining that course that they would accede to some reasonable arrangement which may enable a distinct Company to effect an object so desirable, and capable of being so easily accomplished.

The Committee cannot conclude this report without calling the attention of the House to the very gratifying circumstance, that the Company looks forward to the completion of a Canal which will be adapted to Steamboat navigation, and that they entertain this idea with so much confidence that they are strongly inclined to construct the locks at once upon a proportionate scale.

JOHN B. ROBINSON,

Chairman.

House of Assembly, Committee Room, December 15th, 1825.

THURSDAY, December 15th, 1825.

The Committee met.

The Attorney General in the chair.

Robert Dickson, Esq., called in and examined.

Have you, since you were last examined by the committee, received any particular instructions as agent for the petitioners of the town of Niagara and its vicinity; and have you anything now to communicate or propose to the committee in reference to their application for permission to cut a Branch Canal from the Welland Canal to Niagara?

I have no further information. I have been at Ningara recently and called a meeting of the peti-tioners, and upon discussion of the subject of their petition, they adopted the Resolution which I now deliver to the committee.

(Here Mr. Dickson delivered in said Resolution, which was read, and is as follows:)

At a meeting of the inhabitants of Niagara, held at Mr. Cannon's Hotel, December 5th, 1825—Thomas Butler, Esq., in the chair,

It was Resolved, That Robert Dickson, Esq., be instructed to propose to the committee of the House of Assembly that the Niagara petitioners be allowed, with the consent of the majority of the stockholders of the Welland Canal, to make a lateral cut to Niagara, and that the expense of such cut be allowed by them to merge into the general stock.

That they will commence the cut as soon as the Welland Canal Company have advanced as far as the intersecting point, and not before.

That should the above proposition be rejected, then it will be at the discretion of Mr. D. to make the best terms he can for bringing the waters into the lateral cut, but especial care be taken that no arbitrary or oppressive toll be allowed at any time to be levied on the lateral cut-should it be granted.

As the opinion of the stockholders is prelimenary to any measure, it is deemed desirable that no time he lost in obtaining recommendatory letters from the Chairman and Directors in favor of our request, and that Mr. D. forward a letter in the name of the merchants of Niagara, and others, together with necessary documents to Agents in New York, Montreal, and Quebec, requesting them to call, instanter, a meeting of the stockholders in each place, to obtain their sanction, before the close of the session.

WILLIAM YATES, New York, HORATIO GATES, Montreal, M. SUTHERLAND, Quebec,

JAMES RADCLIFF, Secretary.

Extracts from the Journals of the House of Assembly on the subject of the foregoing Reports.

FRIDAY, December 16th, 1829.

The House in Committee on the Reports of the Select Committee to which was referred the subject of the Welland Canal.

Mr. Beasley in the chair.

The House resumed.

Mr. Beasley reported a resolution, which was adopted, as follows:

Resolved, That it is the opinion of this House that it would undoubtedly be expedient to authorise by law the deviation from the route of the proposed Canal from the Mountain to the 12 Mile Creek, as prayed for in the petition of the President and Directors of the Company, and surveyed and reported upon by Mr. Clowes and Mr. Roberts, Engineers.

## SATURDAY, December 17th, 1825.

The House again in Committee on the Reports of the Select Committee on the subject of the Welland Canal.

Mr. Beasley in the chair.

The House resumed.

Mr. Beasley reported three resolutions, which were severally put and carried as follows:

Resolved—That it is the opinion of this House that until reference has been had to the Stockholders of the Welland Canal Company, to be convened at a General Meeting for that purpose, and their consent or objections made known, the Legislature ought not to sanction, upon any terms, the diverting, by an independent Company, any part of the water brought down by the Welland Canal Company for the purpose of forming a canal by another route, and of affording facilities for the erection of rival establishments of mills or other machinery.

Resolved—That this House is highly favorable to the undertaking of such a work as the inhabitants of the town of Niagara and its vicinity have prayed for, and they carnestly hope that the Welland Canal Company will either find it consistent with their interests to engage in it upon their stock being enlarged for that purpose, or in the event of their declining that course, that they would accede to some reasonable arrangement which may enable a distinct Company to effect an object so desirable and capable of being so easily accomplished.

Resolved—That it is the opinion of this House that it would be a proper indulgence to be granted on the part of this province to the Welland Canal Company to accede to their prayer with respect to the remission of duties, if the same can be legally done, and if not, that the Government be authorised, by a particular appropriation, to return to the Company an equal amount to that which they shall have paid and shall hereafter pay for duties.

### No. 5.

Minutes of the Board of Directors of the Welland Canal Company, for the year 1825.

At a Meeting of the Board, 4th January, 1825.

GEORGE KEEFER, ESQUIRE, President.

John Decou,
Chauncey Beedle,
Wm. Hamilton Merritt,

Esquires, Directors.

The following resolutions were made.

"That we send a notice to the Gleaner for the subscribers to pay in their instalments of 5 per cent on all that has not been paid, making the instalments all equal."

"The Treasurer to submit a regular statement of all shares subscribed, the first Monday in next month as well as a statement of all accounts due by said Company."

"To prosecute for all dividends after the 12th day of February next."

"That we petition the Legislature of Upper and Lower Canada for a grant of £12,000 each."

GEORGE KEEFER, Secretary W. C. C.

At a Meeting of the Board, 2nd April, 1825.

PRESENT.

GEORGE KEEPER, ESQUIRE, President.

Wm. Hamilton Merritt,
John Decou, and
Chauncey Beedle,

Esquires, Directors.

RULES FOR GOVERNING THE NEXT ELECTION.

1st. That all tickets shall be handed to the Secretary and by him counted and placed in the Ballot box.

2nd. That the President and Directors shall scrutinize all votes and ascertain that the Election is fairly and honorably conducted.

3rd. That no man who has neglected or refused to pay in to the Treasurer of the Welland Canal Company ten per cent on the Stock subscribed shall be entitled to vote for the Election of Directors for the ensuing year.

On the 4th day of April, 1825, being the 1st Monday in that month; a Meeting of the Stockholders of the Welland Canal Company took place at the Court

the end to prove the

House in Niagara, pursuant to public notice as provided by law-When and where the undermentioned Gentlemen were appointed Directors for the ensuing year, viz :

THE HON. JOHN HERNY DUNN, Receiver General, HENRY JOHN BOULTON, ESQUIRE, Solicitor General, GEORGE KEEFER, ESQUIRE,
JAMES CLARKE BUCHANAN, ESQUIRE, and

WILLIAM HAMILTON MERRITT, ESQUIRE.

James C. Buchanan, Esquire, appointed conditionally; to resign in favor of any person the Government, Mr. Gult, (for Commissioners of Canada Land Company) or the Stockholders may appoint.

The Honorable John Henry Dunn, was then unanimously elected, President of said Company, by ballot.

On the 13th day of April the Charter of said Company was extended to £200,000, and the Honorable James Irvine of Quebec and Simon McGillivray, Esquire, of London, were appointed Directors for the present or ensuing year; consequently the Directors for 1825 and until the 1st Monday in April next, stand thus :-

The Honorable John Henry Dunn, President.

The Honorable James Irvine, Henry John Boulton, Esquire, Simon McGillivray, Esquire, J. C. Buchanan, Esq. (conditionally) George Keefer, Esquire, and William Hamilton Merritt, Esquire,

Directors.

At a Meeting of the Board, April 14th, 1825. PRESENT.

The Honorable John Henry Dunn, President. Henry John Boulton, Esquire, Simon McGillivray, Esquire, and William Hamilton Merritt, Esquire,

That our Agent give notice that the Summit Ridge will be let out on contract the first of July next, and whatever other part of the line may be in readiness.

That our Agent proceed as soon as practicable to Lower Canada, there to obtain as much Stock as possible, then to proceed to New York or elsewhere, to obtain to the amount of £75,000, in case the President should not obtain the sum of £50,000 in that place.

That as soon as the sum of £50,000 be obtained the whole line of the Canal be advertised for contract and that in the mean time the whole line be laid out in sections by our Engineers.

That we employ Mr. Clowes the present Engineer to superintend the work, at the rate of £400 per annum, to include Board, &c., and that he be allowed an Assistant at £100 per year.

That we continue the present Treasurer until July when a regular transfer of books and accounts shall be made.

That Henry J. Boulton, Esquire, be appointed Vice-President.

That William Hamilton Merritt, Esquire, be and is hereby appointed superintendant of the works, and of all matters connected therewith, also to act as Secretary and attend to all the concerns of said undertaking and that he be requested to accept of for his services since the commencement of

the undertaking.

That the Tressurer do pay the present Contractors of the Welland Canal Company & of the amount of work performed by them under and in pursuance of contracts now entered into, such work to be approved and certified by the Engineer.

> JOHN H. DUNN, President, W. C. C.

A true copy, W. H. M.--, Agent.

Copy of Bye Laws adopted by the President and Directors of the Welland Canal Company.

York, 14th April, 1825.

PRESENT.

The Honorable John Henry Dunn, President. The Honorable James Irvine, Henry John Boulton, Esquire, Simon McGillivray, Esquire, James Clarke Buchanan, Esquire, Directors. George Keefer, Esquire, and William Hamilton Merritt, Esqr. J Also Agent & Sup.

First.—The Directors shall meet the first Wednesday in every month, and oftener if necessary .-[Expunged 2nd September, 1835.]

Second.—That no Director, Officer, or Servant of the Company shall directly or indirectly be concerned in any contract connected with the said undertaking.

Third.—That no contracts shall be entered into until public notice shall have been published six weeks in such newspapers as the Directors shall think fit-for tenders to be delivered to the Board of Directors on a day to be fixed in the said notice, and that all tenders shall be opened in the presence of the parties making the same, if they think proper to attend .- [Expunged 2nd September, 1835.]

Fourth.—That no monies be advanced to any contractor until good and sufficient sceurities shall have been entered into for the due performance of his

Fifth.—That Henry J. Boulton, Esq. His Majesty's Socicitor General, is hereby appointed Solicitor for the said Company .- [Expunged 2nd September, 1835]

Sixth.—That the deposits from the Stockholders in Great Britain shall be paid into te Banking House of Wm. Williams, Burgess & Williams, London, and that all Bills to be drawn on said Bankers shall be signed by the President and Vice President, by order of the Board .- [Expunged 2nd September, 1835.]

Seventh.-That two of the said Directors, with the President or Vice President shall form a quorum.-[Amended 2nd September, 1835.]

Eighth.—That the travelling expenses of any of the Directors who shall reside at a distance from the place of meeting shall be paid out of the funds of the Company, such charges to be exhibited in the

annual accounts to be submitted to the stockholders, previous to the election of Directors in each year.

Nenth.—That William Hamilton Merritt, Esq., be paid an annual salary of £300 besides his necessary expenses, to commence this day.—[Expunged 2nd September, 1832.]

### JOHN HENRY DUNN,

President.

A true copy, WM. H. MERRITT, Agent.

At a Meeting of the Board, 22nd July, 1825.
PRESENT.

The Hon. John Henry Dunn, President. HENRY J. BOULTON, Esquire, Vice President.

George Keefer, Esquire, and William Hamilton Merritt, Esquire,

Resolved.—That each Contractor shall be entitled to two thirds of the money which may be due him at the end of each month, and the remaining one third may be loaned him without interest until he shall either have forfeited or completed his contracts by his giving responsible security.

July 4th, 1825.

"The Board opened according to adjournment when the following resolutions were passed."

- "That the Agents transmit a list of the present Stockholders to this office together with an account of the sums paid in by each Stockholder respectively."
- "That a Stock and Account Books be opened at this office."
- "That on the first Wednesday in each month the Agent shall lay before the Board a regular statement of what has been done together with all charges, &c., which may be against the Company for work done, or any other act certified by the Engineer for the preceding month and what may be necessary to adopt the ensuing."
- "That all letters be received at the Canal Office, the receipt acknowledged and answers prepared for the inspection and sanction of the Board at each succeeding meeting."
- "That our agent procure from each owner of land, a bond for the relinquishment of what land may be necessary for the construction of the Canal."
- "That our Agent procure plans and estimates and furnish the necessary information for the President to transmit Simon McCillivray, Esquire."
- "That a premium of \$100 be awarded for the best model of a wooden Lock, or wood and stone combined, to be submitted with specifications on the 1st Wednesday in October."
- "That a transfer office be established in New York as soon as the agent may think proper after the payment of 10 per cent on account of all stock subscribed in that place."
  - "That the scrip for the new stock, or certificates of

stock subscribed, may be signed by the different agents in Upper and Lower Canada, and in New York, on payment of 10 per cent."

"That 5 per cent be called it immediately on all new subscriptions."

Ordered, that all persons who have expressed a wish to withdraw their subscriptions under the 7th clause of the Welland Canal Act, shall have whatever money they have paid in refunded, and that the agent pay the same.

At a Meeting of the Board, 21st July, 1825, ...

#### PRESENT :

H. J. Boulton, Esquire, Vice President,
George Keefer, Esquire, and
William H. Merritt, Esquire,

Directors.

Ordered, That whatever damage may have been done by the Welland Canal Company to the property of Mr. John Brown, on the River Welland, be left to the decision of Samuel Street, Esquire, to which Mr. Brown agrees and has affixed his signature.

That 5 per cent be paid in the ensuing month, and Mr. Davis to pay amount in Bank at Montreal to the credit of the Upper Canada Bank as a deposit by the Welland Canal Company.

That all Agents close their books and send us copies only, they keep the original signatures.

That as doubts have arisen respecting the most eligible route for the Canal from the Welland to the mouth of 12 Mile Creek, that we employ Mr. Roberts, Engineer, to explore and report on the same as well as the Canal generally.

That the Vice-President employ Mr. Roberts and some other Engineer who will explore and report on the route from Grand River to Welland—the report of Mr. James Clowes not proving satisfactory.

That a report be drawn up and sent the President by our agent for any correction he may think proper to make, when signed to be immediately published.

That the papers, plans, &c., be sent Mr. Dunn as soon as the Engineers report be obtained of the whole route.

The Directors were employed the 21st, 22nd, and 23rd, during which they examined the different routes from Harbor to the Deep Cut.

Resolved, That the Vice President draw on Thomas Proctor for \$3,000; and that our agent advise him of the same.

At a Meeting of the Board, 10th August, 1825.

#### PRESENT:

The Honorable John Henry Dunn, President, George Keefer, Esquire, and Wim. Hamilton Merritt, Esquire, Directors.

The minutes of the former meeting were read and approved.

Ordered, That the President having laid before

N

the Board Mr. Proctors 'Letters of the 13th, 16th, and 22nd, the Agent be desired to request Mr. Proctor to address all communications to the Board, at their office at St. Catharines, where they will reply monthly, and furnish any information required, and that an answer be prepared to the above communications.

That the Accounts of the late Treasurer having been examined by the President and Board, are found to correspond with the vouchers.

That as the President will be in New York on or about the 1st September, the Agent be advised to pay over to him whatever monies he may have called in on the instalments in that city.

At a Meeting of the Board, 6th September, 1825.

PRESENT:

Henry J. Boulton, Esquire, Vice President. George Keefer, Esquire, and Wm. Hamilton Merritt, Esquire,

Ordered, That our Agent write the respective Agents to transmit us an account current up to this date, with the amounts paid in by each stockholder.

That all stockholders be required to pay up to 15 per cent on the amount of their subscriptions.

That Edward McMahon, J. G. Chewett, and R. W. Prentice, not having paid in their instalments shall forfeit the same as the law directs.

That our agent advertise the timber for sale at private contract in one of the Busialo and Lockport papers, that Mr. Roberts, the American Engineer, having examined the two proposed routes of the Welland Canal, the one descending the mountain by Mr. Decow's, the other by George Keefer, Esquire's—and coinciding with the Company's Engineer, Mr. Samuel Clowes, that the latter route is decidedly the cheapest, and will make the most perfect navigation.—The Board then unanimously adopted the same.

That our Agent give notice that proposals will be received on the day of November for completing the whole line of the Welland Canal from Lake Eric to Lake Ontario.

At a Meeting of the Board, 10th September, 1825.

Henry J. Boulton, Esquire, President. George Keefer, Esquire, and Wm. Hamilton Merritt, Esquire, \} Directors.

Ordered, That the Agent have £25, to be accounted for in paying contingencies next meeting.

Ata Meeting of the Board, 20th September, 1825.
PRESENT:

Henry J. Boulton, Esquire, President.
Simon McGillivray, Esquire,
George Keefer, Esquire, and
Wm. Hamilton Merritt, Esquire,

Mr. McGillivray tendered the name of the Hon. William Allan as a subscriber for 20 shares, and tendered his own name as a subscriber for 22 shares, in addition to his present interest in the stock of the Company, both which tenders were accepted, and the three first instalments thrreon paid, being 15 per cent, amount £78 15s.

It was unanimously resolved, That the Hon. William Allan be elected a Director of the Welland Canal Company during the interval between this date and the regular election of Directors in the year 1826.

Considering the important services rendered to this undertaking by William Hamilton Merritt, Esquire, before the passing of the late Act of the Provincial Legislature, and his appointment as Agent for managing the works of the Canal, services and exertions which occupied his time for a period of nearly two years, and to which the directors cannot but in a great measure attribute the success of the project, from which so much public benefit is likely to arise, referring also to the vote adopted on the 14th April last, whereby Mr. Merritt was requested to accept a sum of money in remuneration of those services, but which sum was left blank—the Directors though admitting that in the case of any honorary or other acknowledgement to a member of their own body-it would be more desirable to have the amount fixed by the proprietors at large than by themselves-yet under the circumstances of this case and considering the proposed acknowledgment to Mr. Merritt is in fact a debt which in equity they are bound to pay: It is Resolved, That the blank left in the said resolution of the 14th April last, be filled up with the words "five hundred pounds."

In consideration of the importance of avoiding all occasion of dispute about the property of the land bordering on the line which may be determined on, for the course of the Canal, betwixt the Deep Cut on the Bank of the Welland River and the Harbor at the Twelve Mile Creek, on which line will be situated the valuable mill seats which are to be formed by the water admitting through the Canal, and in order to prevent any question with the present proprietors of such lands, about the right of erecting mills or other buildings on scites which are to derive their value from the operations of the Company, considering that it is only just that the Company should enjoy the benefit arising from their own improvements and that the powers granted to them by their Charter, wore intended by the Legislature to secure the same. -It is therefore Resolved, That 10 chains by 8 in front of the Canal mouth, and 4 chains wide by 10 in length, be appropriated at its junction with the Welland River in Thorold, and that 2 chains wide on each side of the Canal reservoirs and the Harbor exclusive of towing path, be appropriated from the Holland road to the mouth of the Twelve Mile Creek, together with the beach in front of the embankment at the Harbor which beach having been lately purchased by Mr. Merritt from Mr. Pawling the proprietor of the adjoining lot on the west side of the Twelve Mile Creek at its entrance into Lake Ontario, has been liberally relinquished to the Company by Mr. Merritt at the same price which he paid for the same.

That in order to carry the above resolution into effect the agent do immediately negotiate with the

owners or occupiers of the above land, and lay a statement of the amount claimed upon the Board, as soon as the said land may be laid out, that be employed to run the said line.

That in order to enable the Company to increase the body of water in the Canal, and to raise the level of the same at the Deep Cut and elsewhere, as may be found expedient, a guard lock be erected across the Welland River below the entrance of the Canal whereby the level of that River may be raised as far as may be required; and inasmuch as this process will prevent any water from flowing out of the Niagara River and through the Welland River into the Canal, and it is not deemed expedient to trust to the Welland River alone for the supply which will be required, but to render Lake Eric or the Grand River at its mouth at once the summit level and the Feeder of the Canal—Be it Resolved, That from the Grand River to the entrance of Misner's Creek near the River Welland, the Canal be cut of the depth of S feet below the low water mark of Lake Erie, 30 feet wide at the bottom and the same slope at the sides as in the deep cutting at the east side of the River Welland.

The reports of our surveyors in regard to the route of the Canal from Holland road to St. Catharine's, were read and reconsidered together with the maps and profile prepared in order to be transmitted to England was read and taken into consideration, but the paper being very long and the subject of the utmost importance it was only arranged in regard thereto that Mr. Boulton should take the papers with him to York for further consideration and from thence to transmit them to Mr. McGillivray, by whom and by Mr. Irvine, they are to be recommended to their friends in England.

On further consideration of the importance of this intended appeal to Capitalists in England to furnish the Directors with that portion of the Company's Capital which remains to be subscribed and which has been expressly reserved for the Stockholders whom they hope to find in England in preference to those who might have been found elsewhere. Feeling the propriety of offering the most ample and satisfactory explanation on every point and considering the difficulty of so doing and especially the difficulty of meeting questions or doubts arising from the want of local knowledge of this country in any other manner than by the presence and personal communication of some Agent or representation duly authorised and qualified to afford such information as may be required, it was agreed that such mission to England, if undertaken by a competent person, would offer the most probable means of ensuring the success of the intended appeal to that country for the remaining Capital.-And Mr. Boulton having kindly volunteered his services for this purpose for three or four months on condition merely of his reasonable expenses not exceeding the sum of £300 sterling being paid. The proposal was received with due acknow ledgment, and it was Resolved That HENRY J. BOULTON. Esquire, be authorised and required to proceed to England as the Agent and Representative of the Welland Canal Company, to obtain such capital as may be required by the Company and in negotinting for the same and in all matters connected with this mission to act according to such instructions as he may hereafter receive from the Board.

That the Welland Canal Company do pay Mr. Boulton's reasonable Expenses in this Mission not exceeding the sum of £300, sterling.

At a Meeting of the Board, 6th October, 1825.

The Honorable William Allan, George Keefer Esquire, and William Hamilton Merritt Esquire,

Directors.

It was resolved that the Board of Directors at their last meeting notified their Agent to signify to the Board that when they again assembled, that it was their desire the Hon. Wm. Allan should be appointed Vice President during the present year in consequence of the absence of Mr. Boulton, the present Vice President who is absent to procure the subscription of Stock designed for the London Market. The Honorable Wm. Allan was accordingly appointed Vice President of the Welland Canal Company.

Ordered that 5 per cent be called in for the present month, making 20 per cent on the amount of Stock subscribed by each Stockholder, and that our Agent notify the different Agents of the same.

Ordered that the Vice President draw in favor of the Cashier of the Bank of Upper Canada on Thomas Proctor of New York at 30 days sight for £1500, on the Bank of Montreal for £750, and that our Agent advise them of the same.

Ordered that our Agent notify each Stockholder that they pay their respective instalments into the Bank of Upper Canada at York or the Branch Bank at Niagara, and give public notice of the same.

At a Meeting of the Board, 26th October 1825.

PRESENT.:

The Honorable William Allan, Vice President.

George Keefer Esquire, and
William Hamilton Merritt Esquire,

Directors.

The Board of Directors being aware that the whole line of the Canal from the Welland to Lake Ontario would be placed under contract the ensuing Meeting and being fully aware of the importance of selecting the best Contractors on the most advantageous terms for the interest of the Company, solicited the attendance of James B. McAulay Esq. that they might avail themselves of his assistance as a legal adviser in the absence of the Company's Solicitor.

Muny proposals were delivered in for the construction of the Locks and some on lower terms or for a less sum than the offer accepted but from the character and responsibility of the Company offering as well as the importance of having this work properly and faithfully executed, the Board decided on letting the whole to Messrs. Beach, Ward, Hovey & Phelps—at the sum of £550 Cy. per each Lock.

Whereas doubts have arisen whether the Company have power to take and appropriate 2 chains on each side of the Canal, Resolved. That we submit the question to the Attorney General for his opinion thereon.

Ordered. That 5 per cent on all the Stock subscribed be called in making 25 per cent in all.

Ordered, That the President draw on our Agent in New York for the sum of £1500 Cy. and on our Agents in Montreal and Quebec for the sum of £500.

Ordered, That our Agent sign Scrips or Certificates for each instalment called in from the Stockholders in the Upper Province and leave them monthly at the Bank of Upper Canada in York and the Branch Bank of U. C. in Niagara and that this arrangement take place from the 7th instant.

A proposition having been made to the Directors by E. S. Beach Esquire, of Rochester and George Keefer, Esquire, of Thorold that they would construct or cause to be constructed a large and extensive Flouring Mill with at least 4 runs of Stones on the line of the Welland Canal, capable of making the best superfine Flour, adjoining St. Catharines and at the first Locks on the mountain, and have the said Mills in readiness by the time the water is let into the said Canal. Be it Resolved, that the said E. S. Beach, Esquand George Keefer Esquire be allowed the privilege of a Mill seat for the above purpose, providing they perform the said condition, the above proposition having likewise received the sanction of Simon McGillivray and Henry J. Boulton Esquires, at the meeting of the Directors on the 20th September last.

At a Meeting of the Board, 22nd November 1825.

### PRESENT:

The Honorable John Henry Dunn, President.
The Honorable William Allan, Vice President.
William Hamilton Merritt Esquire, Director.

The Board considering it will be necessary for the Welland Canal Company to have a resident Agent in England providing the Stock is taken up which was reserved for that Market in the 1st instance.

1st Resolved, That Henry J. Boulton, Esq. his Majesty's Solicitor General now in London and one of the Directors of this Company, he requested to offer the situation of Agent, under the direction of the Committee who may be appointed, to Mr. Galt, who is now Secretary to the Canadian Land Company.

In order that the affairs of the Company may be conducted in such a manner as may be likely to meet with equal approbation, to all concerned, as the Canada Land Directors will no doubt feel the vast importance of this Canal to the Canadas, it would in the opinion of the Board be highly important that some of those gentlemen should be solicited to undertake the management of the Welland Canal Stockholders in Great Britain.

Resolved therefore that a Committee be formed in London, consisting of not less than 5 gentlemen, and that from Mr. Galt's personal knowledge of the province, that he be recommended to this Committee as a proper person to fill the situation of Agent to conduct the affairs of the Welland Canal Company in London, and that Mr. Galt's reasonable remuneration be fixed by the said Committee.

Resolved, That stock to the amount of £100,000 be disposed of in London agreeably to a resolution of the Board of Directors of the 14th April last,

(immediately after the passing of the Act of Incorporation) in which this sum was reserved for the London Market.

Resolved, That the instalments necessary for prosecuting the work be called in monthly, as has been the case in America, and that the said instalments shall not exceed 10 per cent.

Resolved, That on subscribing for the said stock, 10 per cent should be deposited in the hands of Messrs. William Williams, Burgess and Williams of London, the house heretofore named by the Company, or any other Bankers in London who may be named by the Committee.

That the subjoined rule, passed by the Board 14th April last, regarding the method of drawing drafts for the instalments paid in London, be transmitted for the information of the Committee.

- "Resolved, That all Bills to be drawn on our Bankers in London, shall be signed by the President and Vice-President, by order of the Board.
- "Resolved, That the drafts on London shall be disposed of at the highest rate of Exchange in the Canadas, and the proceeds to be accounted for accordingly, for the benefit of the stockholders resident there.
- "Resolved, That the Engineers reports, plans, profiles, and such other documents as may be necessary, be immediately sent Cimon McGillivray, Esquire, at Montreal, to be transmitted to England.
- "Resolved, That acopy of the above resolution be transmitted Simon McGillivray, Esquire, Montreal, and the Hon. James Irvine, of Quebec, two of the Directors of this Company, for their information."

By order of the Board,

JOHN H. DUNN,

President, W. C. C.

Resolved, That the whole line of the Welland Canal is now under contract from the Welland River to Lake Ontario, that a necessity for the office of the Company being at St. Catharine's for the convenience of persons offering as Contractors for the work and other local business does not now exist, and as the President and Vice-President of the Company from necessity residing at York the seat of the Government of Upper Canada, will not be able to attend the meetings of the Directors at St. Catharines, that the said office be immediately removed to York and the Agent to deposit all books, papers, &c., relating to the affairs of the said Company without deay.

Resolved, That the President and Vice-President jointly, hire an eligible house for an office and a suitable person as Book-keeper, and to transact whatever other business may be required on account of the Company.

At a Meeting of the Board, at York, 7th December, 1825.

PRESENT:

The Honorable John Henry Dunn, President,
The Honorable William Alllan, Vice-President,
George Keefer, Esquire, and
William Hamilton Merritt, Esquire,
Directors:

The President stated that agreeable to a resolution of the last Board, authorising himself and the Vice-President to engage an office for the Company, and a person to keep the books, accounts, &c., they had made choice of Mr. Wenham to perform the duty.

Resolved. That the Engineer shall make out an estimate of the amount due upon each contract on the first of every month, the same to be certified by the Agent and transmitted to the Board at their monthly meeting.—[Expunged 2nd September, 1835.]

The office of the Company being removed from St. Catharine's in consequence of which all official communications are in future to be made to and by the President at York, and all the books and records are to be kept here, It is resolved, that the Agent Mr. Merritt, residing at St. Catharine's, shall have the general superintendance of the Engineers, Surveyors, Contractors, and all other persons in any way employed by the Company, and that he shall keep a private account with all the Contractors of the monthly performance of their work according to the Engineer's estimate, which he shall certify and transmit to the President in order that the same may be laid before the Board; upon which he shall receive a draft for the amount to be paid to the parties on taking their receipt for the same, -[Expunged 2nd September, 1835.]

Resolved, That an application be made to Major Hillier, Secretary to his Excellency the Lieut. Governor requesting permission to cut timber for Piers &c., for the use of the Canal, from off the Government land adjoining the twelve and sixteen mile Creeks.

Ordered, That the timber belonging to the Company now lying on the River Welland which was furnished by Contract by Mr. Brundage, be advertised for sale by Public Auction on the 1st Monday in February next, the same not to be sold for less than 7s. 6d. per 100 feet.

Mr. Merritt laid before the Board a letter from Mr. James Gordon, Treasurer, under the 1st Act of Incorporation for a further consideration of his services, which being read it was Resolved, That during the time Mr. Gordon acted as Treasurer under the 1st Act he received his per centage according to agreement, and that £50 having been awarded him by a resolution of the 20th Sept. last for all duties performed during the extra time he continued in the service of the Company, the Board are unwilling to make any alteration in that decision.

It was Ordered. That the different Agents be immediately written to, requesting their accounts current to the 30th ulto, with a full list of Subscribers and Instalments paid to that date, desiring them to furnish supplementary Accounts to the 31st inst., in order that the Accounts may be balanced at the close of the year.

Resolved, That Mr. Roberts be engaged as Engineer from the 1st of April next at a Salary of £500 per. annum, besides his expenses of Board, Lodging &c., and that Mr. Merritt be requested to inform him to this effect.

JOHN H. DUNN, President. At a Meeting of the Board at York, 8th Dec. 1828.

The Honorable John Henry Dunn, President.
The Honorable William Allan, Vice President.
George Keefer Esquire, and
William Hamilton Merritt Esquire,

Directors.

Resolved, That the President draw on Thos. Proctor the Company's Agent at New York, at 30 days sight for £2000, and that the same be paid into the Bank on account of the Welland Canal Company to meet the above disbursements.

Resolved, That the sum of £25 be paid to Mr. Smith as a remuneration for his services to the Company while the Office was at St. Catharines.

As the Board will not meet again till Feby. next, unless Special business should require—

It is Resolved, That a further instalment of 5 percent. is directed to be called in, payable on the 5th January 1826.

JOHN H. DUNN, President.

No. 6.

## WELLAND CANAL COMPANY.

DIRECTORS REPORT.

To His Exceelency Sir P. Maitland K. C. B. Lieutenant Governor, &c. &c.

To the Honorable the Legislative Council and to the House of Assembly of the Province of Upper Canada.—To the Proprietors of the Welland Canal, and to the Public:—

The Directors respectfully submit the following Report, viz:

An Act passed the Legislature of the Province of Upper Canada in February 1824, incorporating a Company with a Capital of £40,000 to cut a Canal for Boat Navigation around the Cataract of Niagara, and thus to open a Navigation from Lake Ontario to Lake Erie by means in part of the River Welland; which flows into the Niagara above the Falls, and from which the company take its name, being Incorporated under the style and title of the Welland Canal Company.—About £10,000, or one fourth of the whole Capital was immediately subscribed, the Company was regularly organized and the work commenced, but the Directors upon a minute inspection of the uncommon natural facilities which present themselves on the line of the Canal, were induced to postpone their operations from the conviction that such a vast object as that of connecting the upper with the lower Basin of the St. Lawrence, demanded a water communication of far greater dimensions than the one contemplated, and capable of admitting all such vessels as usually navigate the Lakes. On referring the plans and estimates to the Stockholders, the conduct of the Directors was highly approved and it was determined to petition the Legislature for an Act authorising them to increase their Capital Stock to £200,000, a sum trifling as it appears to be compared with the magnificence of the object to be attained, yet quite sufficient to complete a Canal capable of allowing Vessels of considerable burthen to pass from one Lake into the other, thus opening a

continued internal navigation without breaking bulk, of more than a thousand miles.

The Legislature had only to revert to the peculiar position of the country to be convinced of the immense advantage that must accrue to the Canadas and to the British Empire, from the completion of this magnificent undertaking, and therefore readily granted the prayer of the Petition by passing an Act on the 13th April, 1825, enabling the Company to increase their Stock for the purposes herein mentioned to £200,000.

On the day subsequent to the passing of this Act, the Directors assembled, and being anxious to preserve the management of the Company under British influence they determined to preserve a considerable part of this increased stock, in order to be offered in the first instance to subscribers in England. Of the original Stock of £40,000 more than one half has been subscribed in New York, and there was little doubt but that the whole capital required might at once have been obtained in that oppulent and enterprising city: whereas in Canada the want of capital in the country precluded any prospect of obtaining subscriptions to so large an amount. Feeling the expediency of immediately obtaining means to proceed with the works which had already commenced, and at the same time being desirous that at least a majority of the Stockholders should be British subjects, the Directors resolved to limit the subscription in New York to £75,000, which sum was immediately taken up by the old Stockholders to whom the option was first given, so that at a Public Meeting which had been advertised for opening books and receiving subscriptions, no subscription could be accepted, and such was the general opinion of the benefit promised by the undertaking, that more than the whole capital would, at that meeting, have readily been subscribed, but the President of the Company who was present in person, refused to receive more than the £275,000. Of the remaining Stock £25,000 has been subscribed in the Canadas and thus £100,000, or one moiety of the whole, remains to be subscribed in London. was deemed requisite that one of the Directors should proceed to London to afford such explanations and local information as might be requisite to make the necessary arrangements for obtaining the required subscriptions, this mission was entrusted to Mr. Sol. General Boulton, late Vice-President of the Company, who resigned that office on his recent departure for England, and with whom Mr. McGillivray, another of the Directors, being about to return to England is now associated. The delay which has taken place in submitting the object of their mission to the public in the British metropolis, has arisen from the necessity of procuring correct maps of the country through which the Canal is to pass, and proper sections, reports and estimates of the work itself, for the information of those who might desire to become subscribers. In the mean time the Canal is rapidly advancing, for the Directors under the impression that more Stock than they require would readily be taken in London, and assured at all events it would be taken in New York, if an appeal to foreigners should become requisite, did not think it necessary to delay entering into contracts till the subscription was full.

In offering half the Stock of the Welland Canal to the Merchants and Capitalists of the first commer-

cial city in the world, the Directors act with confidence upon two facts; first, that the other money has been already taken up by the Merchants and Capitalists in New York and the Canadas, who are well acquainted with the country which this Canal is intended to unite and who although in the habit of obtaining six per cent, for their money, the legal interest in these countries, consider this as a far more profitable method of employing their capital.—The second fact presents itself on reviewing the map of the country by which it will be seen that the Canal must be the avenue of greater wealth and commerce than any other now on the face of the earth.

But in order to render this mighty undertaking familiar to the British public, the Directors beg to be indulged in giving a short review of the causes which led to its commencement and to the astonishing results which must follow its completion. In March, 1807, the Senate of the United States of America passed a resolution requiring the Secretary of the Treasury Mr. Gallatin to report to them, at their next session, on the subject of roads and canals. In obedience to this order, the Secretary delivered, on the 4th April, 1808, a most able States paper, in which a general view is taken of the greater number of practicable canals which could be made with advantage in any part of the Union. Some offering benefits which might well be deemed national, others common to several Provinces, and a few only of ad vantage to individual States, but all tending directly to the augmentation of the power and wealth of the Republic. Among other Canals, one for Sloop navigation around the Falls of Ningara was suggested in order to unite Lake Ontario with Lakes Eric, Michigan, Huron, and Superior. And to preserve the advantage of heing the carriers and exporters of their own produce, another Canal as a continuation of the line from Lake Ontario to the Hudson, is also proposed in the same elaborate document.

It is quite evident that this able communication of Mr. Gallatin's. if it has not suggested, has encouraged the different States to undertake and complete many Carals now in operation; and among others, that stupenduous work of 353 miles long which connects Lake Erie with the tide waters of the Hudson river; for it follows the line, or nearly so, which Mr. Gallatin points out, till it reaches the place where it becomes necessary to diverge either to Lake Ontario or Lake Erie.

The Secretaries Report was for several years considered speculative, and visionary; and when the practicability of this magnificent Canal was first announced by some eminent and intelligent men of the State of New York, the most distinguished of whom was Governor Clinton, who still lives to enjoy the fruits of his patriotic and persevering exertions, it was treated with contempt and derision. It appeared to be a century before the age; and men incapable of enlarged views while they were forced to admit that it was splendid on paper, declared it impracticable; that the resources of the whole Union were unequal to the expense, that, if made it would be useless and consequently that the Capital would be sunk, or ru-inously improductive. Even political animosity was mingled in the contest; for the advocates of the project being friendly to moderation, they were stigmatised as men hunting for popularity, by visionary

schemes, which must terminate in the ruin and degradation of the State.

When, however, the reiterated explanations of the general utility of Canals and the vast advantage which must accrue to New York by directing to its Market all the productions of the Western States, had made an impression on the public mind and began to dissipate the prejudices of its opposers, the Legislature was induced to pass an Act in 1811, to provide for the improvement of the internal navigation of the State, the Commissioners appointed under this Law procured plans and surveys of the proposed Canal, by which it appeared that the expense would be much less than had been anticipated even by the most frugal calculators. This perhaps arose from the fact, that sources of expense which in other countries are extremely heavy, here cost nothing, viz :-Land for the bed of the Canal, and the water necessary for its supply, the land was readily and joyfully given by the proprietors, and abundance of water was found whenever it was wanted .- These estitimates and the facilities which the face of the country exhibited, opened the eyes of the public, and at length good sense triumphed over every opposition.

A water communication to join the Hudson with the Western Lakes was now so far from being considered impracticable, or attended with ruinous expense, that it was deemed of easy accomplishment and of too much utility to be longer delayed. It nevertheless still appeared an undertaking far too great for a Company, or even a single State, and an application was therefore made to the general Government as well as to those States which were more immediately interested in its accomplishment, for pecuniary assistance.

No aid was given: Congress pronounced it a Provincial, not a National object, and the other States immediately interested, had either no available funds or were not sufficiently convinced of the benefit to themselves to justify any sacrifice.

The State of New York was therefore left entirely to its own resources. But disappointment did not chill the ardour of the friends of the measure, on the contrary, it increased their diligence and zeal. Some delay however was produced by a difference of opinton among intelligent men, whether it would be more advantageous to carry the Canal at once from the Hudson to Lake Erie, or first to Lake Ontario, and then to pass around the Falls, as had been suggested by Mr. Gallatin.

Those who were for making use of Lake Ontario as part of the line, agreed that it was absurd to abandon the navigation of the most noble, the most beautiful, and most commodious means of internal communication ever presented in any part of the world.—
That to reject such a gift, provided by the bounteous and ever prodigal hand of nature, without any expense, and on a scale, which human science and human labour, or the treasures of a world are competent to rival, and to institute in its stead an narrow, winding obstructed Canal, would be an insult to common sense, and to degrade the character of their rising nation. That a Canal round the Falls of Niagara should be for a ship navigation, since it was trally a national object, and ought to be executed on a scale of univalled magnitude.—That it was a task, which if properly completed, would be of equal du-

ration with the world, and ought therefore to be accomplished at any cost and at any trouble; not grudging the most liberal supplies, or neglecting to apply them with unremitting attention and perseverence till the object is ascertained.—Such a Canal, said they, has been estimated at £250,000, but it is more than probable it will cost more than live times that sain, and yet it will be cheap, for of its vast productiveness there can be no doubt. Already the trade with the Western States is great, notwithstanding the difficulties which it has to encounter, but the rapidity of its increase from the growth of population when these difficulties are removed it is not easy to conjecture.—Through this Canal must the whole commerce of the western countries forever pass, whether destined to the St. Lawrence, or to the Hudson, to New York, or Montreal.

Once affort on Lake Ontario, a Canal around the rapids of Oswego, will present a fair competition between both markets, and the commodity will reach the one where its price is higher. This alone is the interest of the producer, and indirectly of the consumer, and by such a communication only can jus-tice be done to the inhabitants of the United States, living on the banks of the Canadian lakes. To this it was answered, that to cut a Canal round the Falls of Ningara in order to admit the productions of the Western States into Lake Onturio, would be to commit suicide, as it were on the commerce of New York. For once affect in the bosom of Ontario every thing would proceed to Montreal, where the best market will generally be found .- But were the markets equal, or even a little better at New York than at Montreal, the commodities passing through the Canal would proceed to the latter, as they would reach Prescott or Ogdensburgh, only 120 miles from the Canadian market, in the same vessel as they could the mouth of the Oswego, where the proposed Canul from Ontario to the Hudson is to commence a point nearly 400 miles, or more than three times that distance from New York. Moreover produce can be conveyed from Prescott to Montreal in thirty hours, and from Oswego to New York it must take at least eight days. These arguments were decisive with the Merchants of New York, who were the principal supporters of the Canal, and who, as might have been expected, were little disposed to hazard the loss of a trade so lucrative and immense by allowing it even a chance of passing through another channel. It was therefore determined to extend the Canal at once to Lake Erie, so that after the productions of the vast countries west of the Falls of Niagura would be once unloaded from the vessels on the lake into bouts on the canal, there might be no danger of their being diverted from the New York market, by the temptation arising from the greater facility of conveyance to Montreal.

There were doubtless other considerations which had great, weight with the Legislature of the State of New York in persuading them to adopt the present line of Canal in preference to the route by Luke Ontario. The public mind was indeed too enlightened on the subject of Canals to relinquish the one proposed between Lake Erin and the tide waters of the Hudson: but assistance from other states and the government had been asked and refused, and therefore the expense of the more magnificent work appeared far beyond their abilities.—Some were even

afraid that a Boat Canal through so vast an extent of country would exhaust the revenues of the State; and it was not without much apprehension that the attempt was made on a very reduced scale of forty-five feet wide at the top, with four feet water; to extend from the Hudson at Albany, to Buffalo and Black Rock, on Lake Eric, a distance of 353 miles.

The commencement of this stupendous work excited the most earnest attention of the inhabitants of Upper Canada. It was likely to deprive them of the advantage of becoming the carriers of all the produce of all the extensive countries belonging to the United States, west of the Falls of Niagara, and to divert much of their own produce to New York; and althothey beheld in the Canal a pledge of peaceable intention on the part of the American people, and a relinquishment by, at least the State of New York, of any hope of ever conquering the Canadas, and were moreover filled with admiration at the magnitude of the work, it was nevertheless attended with feelings of regret that the resources of the Province were too feeble to enable them to improve their own greatly superior natural advantages.

But in the state and with the prospects of the Colony at that time; recovering slowly and with difficulty from the cruel effects of an unnatural and desolating war in which the inhabitants had suffered most severely, the produce of the soil remaining on the hands of the cultivator, without a market, and the extension of commerce restricted by the shackles of a Colonial system, the child of a darker age; it seemed hopeless to attempt any competition with their powerful and enterprising neighbors.

So soon however, as the more liberal policy of the enlightened Statesmen, who now direct his Majesty's councils began to be developed, and a prospect was opened to the Colonies of a free commerce with all nations, and of receiving greater privileges and advantages in the ports of the Parent State, as well as in those of each other, a new spirit was infused into the Province and enquiries were made to ascertain what natural facilities offered themselves for the improvement of internal navigation. Accordingly, in 1821 an Act was passed by the Legislature, appointing a Board of Commissioners to report upon this interesting subject.

It is due to the memory of the late Mr. Nichol, formerly an active and very intelligent member of the Legislature, to remark that his zeal in the cause of public improvement occasioned this measure to be brought forward at an earlier period than it otherwise would have been; and that so long as he lived he persevered very faithfully in carrying it into effect.

The example of the State of New York, vigorously engaged in completing an inland navigation, from the Canadian Lakes to the Occan, a work which might have well been thought to exceed its power, directed the attention of the Commissioners to the joining of Lakes Erie and Ontario by a Sloop navigation. This was not only the most obvious, but the most important work which could engage their attention; and accordingly a Survey was made by an able Engineer, and Estimates of the probable expense carefully calculated.

Subsequent experience and examination have shown that the route chosen by the Commissioners,

though possessing some peculiar advantages, was too circuitous: by which the expense was very much enhanced. The conception was indeed magnificent,—the Canal was to have 7 feet water and to admit all such Vessels as usually navigated the Lakes; but the execution was far beyond the resources of the Province, and the Legislature was compelled, though not without reluctance, to defer the undertoking till more propitious times, and the growing wealth of the Colony might justify its commencement.

This delay, instead of checking increased the ardor for internal improvement; even persons of moderate temperament were encouraged by the success which attended the opening of every mile of the New York Canal. No sconer was one section finished and the water introduced than the tolls did more than repay the interest of the Capital expended: and in prosecuting the work, it was found that, contrary to usual experience, the estimates of the Engineer almost always exceeded the actual expense.

These matters of fact induced some active spirits who had a more immediate interest in connecting the waters of Lake Ontario and Lake Eric, to examine whether a more favourable line could not be discovered than that which had been adopted by Colonel Nichol and the other Commissioners. It had indeed been conjectured that there were more convenient routes for a Canal, and accordingly Surveys were made at different points; but owing to the ignorance of the persons employed or the greatness of the expense attending a minute examination, they all came to nothing.

At length several enterprising gentlemen, living on the banks of a small creek, which runs into Lake Ontario, called the Twelve Mile Creek, the source of which is very near the deep river Welland which communicates through the Ningara river, above the Falls, with Lake Erie, were induced to believe, from carefully observing the valley of the Creek and its gentle declination towards Lake Ontario, that it afforded singular facilities for Canal navigation. One of these gentlemen, W. H. Merritt, Esq., possessed of great zeal and energy, and to whose exertions in forwarding the Canal, the Province will ever he indebted; entertaining this idea, examined the course of the creek and was so much encouraged with the facilities it presented, that procuring the assistance of an experienced Engineer, a line was surveyed, by which it was discovered that very little cutting would be necessary, and that the Locks could be placed in a ravine of such gradual declivity, that they could be built at sufficient distances from one another.

Pursuing with ardour his object, Mr. Merritt procured plans and sections, as well as estimates of the expense of completing a canal for boats which hardly amount to £40,000. Having proceeded so far he very naturally supposed that this sum was not too much to be assumed by a private company, and many persons thinking well of the project, joined him in petitioning the Legislature that they might be incorporated with a Capital of £40,000, for the purpose of opening a canal for boat navigation between Lakes Eric and Ontario. On passing this law, in the Spring of 1824, a large portion of the capital was immediately subscribed, and the work was actually begun; but as we have already noticed, it appearing upon a

more minute examination of the route, to be uncommonly favorable and capable at a little additional expense, in comparison to the object of admitting an excellent Sloop navigation; the Directors thought it prudent to pause in their proceedings and to petition the Provincial Legislature to allow them to enlarge their capital to £200,000, in order to make the canal capable of receiving such vessels as usually navigated the Lakes.

The Legislature was more disposed to grant this increase of capital from the many advantages the State of New York was already reaping from such parts of their canal as were finished, though made on a scale so inferior. The amount of Stock as by the Act passed, was taken up rapidly by those who were best acquainted with the country, thus affording to strangers the strongest guarantee possible, not merely of the safety, but of the uncommon advantages which must ultimately accrue to the Stockholders. The avidity with which the Stock was sought in the city of New York has been already mentioned, and the facility with which the whole capital required might there have been obtained, but Upper Canada is a British Colony, the Directors are loyal British subjects, and anxious that their fellow-subjects should be their constituents and in the hope that the Pro-British Capitalists taking an interest in its improvements, and finding that interest advantageous to themselves, they reserved £100,000 for their capital, to be offered to subscribers in England, and confident in the vast benefit of the undertaking, and anxious to accelerate its completion, they are in the mean time proceeding with the work, as if the subscription had already been filled.

The proposed Canul as appears from the report and drawings of the Engineer, commences at the mouth of the Twelve Mile Creek, on Lake Ontario, and terminates at the mouth of the Grand River or River Ouse on Lake Eric, a distance of 41 miles. It may be described generally as consisting of three great sections; the first of the length of sixteen miles, ascending from Lake Ontario, passing through a ravine in the mountain ridge, and entering the River Welland, through a deep clay bank which divides it from the mountain ridge, and in which for a distance of 12 miles the canal is to be cut from 30 to 54 feet 6 inches, which is the greatest depth at any one point. This deep cut is already under contract and it is ascertained that the bank consists wholly of clay.—It is also a peculiar advantage possessed by this line, that in passing through the mountain ridge and in a considerable part of the descent from thence into Lake Ontario, the Canal follows the direction of the natural ravines, where no excavation will be required, and where it will only be requisite to form embankments in which to construct the Locks, whilst the width of the ravine is such as to form ample reservoirs; and the slope is so casy and regular, that one of these reservoirs will in almost every instance be interposed between each two Locks throughout the descent and the sloping banks of these ravines, and the abundant and inexhaustible supply of water, afford an almost unlimited power of Hydraulic machinery, which it is intended to connect with the Falls at the different Locks, and which it is hoped will soon afford a considerable revenue to the proprietors of the Canal. -The difference of level from Lake Outario to the

River Welland, is about three hundred and thirteen feet, requiring about 35 Locks: and this is the first section to be completed.

The second great section of the Canal consists of the River Welland itself, which for a distance of nearly thirty miles resembles a canal more than a running stream, having scarcely a perceptible current, and being from 12 to 30 feet deep, so that it will only be requisite to construct a towing path, along its bank.—The Canal opens into the Welland about 8 miles above its entrance into the Niagara River, at the Village of Chippawa; and by that route on constructing a towing path from the opening of the canal to the mouth of the Welland, an inlandenavigation around the cataract of Niagara, is in fact accomplished; because from the mouth of the Welland, vessels can sail up the Niagara River into Lake Erie, but below Fort Erie there is a strong current in the river, and besides avoiding this impediment to the navigation, in the case of vessels ascending there are other important advantages which will be attained by the intended opening of the Canal into Lake Erie through the Grand River.—Therefore, in addition to the towing path from the Canal to the mouth of the Welland there is another towing path to be constructed, ascending the course of the River for a distance of 11 miles, which may be described as constituting the second great section of the Canal

The 3rd great section is a cut of about 12 miles from the Welland to the Grand River, through a flat swampy tract of country, called the Canboro' or Wainfleet marsh, the surface of which is about 8 feet higher than the level of Lake Eric.—It was at first proposed to cut the cast on a level with the surface of this tract of country, and to supply it with water from a feeder from the Grand River above the rapids; but the present and the more improved plan is to cut an excavation through the Camboro' marsh to the depth of 16 feet, which will render Lake Erie at once the summit level, and the feeder of the Welland Canal throughout its whole extent.

Atthe mouth of the Grand River there is a harbor to be constructed; and it will thus be seen that the canal has two outlets for vessels ascending from Lake Ontario; one through the Niagara River into the eastern extremity of Lake Erie, and opposite to the entrace of the American grand Eric Canal, and another through the Grand River into Lake Eric, at a distance of 40 miles nearer to the central and western shores of the lake, besides, with which reduction of distance in lake sailing the route by the Grand River offers other important advantages to vessels from the upper parts of Lake Eric.—From the Grand River to Fort Erie, the navigation on Lake Eric is dangerous, and at Fort Erie there is no good harbor, nor is it ascertained if the new American harbors at Buffalo and Black Rock will resist the severe gales of wind which are frequent in the fall of the year, and the heavy surf which rolls on the beach at that end of the Lake where the coast is much more exposed to its violence than at the mouth of the Grand River. The prevailing winds on the Lakes are from the westward; and by a glance at the map, it will at once be seen that a gale of wind from that quarter sets on that Beach at Buffalo with an uninterrupted sweep of above 200 miles, whereas the mouth of the Grand River partially protected by head lands on each side of its own bay, and further

**L**3

sheltered from the gales of wind, by Long Point, which projects nearly 30 miles into the lake.

Another circumstance is to be noticed peculiarly advantageous to the canal entering at the mouth of the Grand River, and which arises from the form of Lake Erie, the prevalence of westerly winds, and the gradual though scarcely perceptible flow of the current towards the outlet of the lake into the Niagara River, where the current being at length contracted as into a funnel, an accumulation of ice from the lake regularly takes place every spring, and elfectually blocks up the channel; thus forming a barrier which prevents the opening of the navigation at Buffalo and Fort Eric. for a certain time after the ice has disappeared in the rest of the lake, and after the opening of the Grand River-which, as it flows into the lake without obstruction, carries away the ice before it with the first freshet in the spring.-This difference of time betwixt the opening of the navigation of the Grand River and the River Ningura, has seldom been less than three weeks, and in some seasons has been five weeks; but estimating it at a shorter period, it gives to the Welland Canal the advantage of being open before the American Canal for three weeks of the most important part of each

These general inductions are deemed sufficient for this place, the details and estimates are in the hands of the Directors, who will most cheerfully submit them to the inspection of any person who may be disposed to examine them—they have been drawn up and calculated by an Engineer of great intelligence and professional knowledge, on whose accuracy the Directors, from long experience, have the most perfect reliance.—From the whole it is seen at how little expense the canal may be constructed, and how much the bounty of nature assists in its formation.

It was happy for Upper Canada that the canal undertaken in the state of New York, and now almost completed, is on a scale so very small, and is nevertheless attended with immense profit; for this example encouraged the colonists to attempt what perhaps they never would have dared even to imagine, a canal of similar dimensions. This attempt led to a minute examination of the route, the facilities of which appeared so great that their views gradually expanded, and they began to consider a canal on a far greater scale as possible, and not greatly beyond their resources; the more they examined the country through which it must pass the more easy of accomplishment did it appear-and from considering it possible, they began to think it advisable, and even despise the more humble attempt they had formerly conceived .- It was therefore equally fortunate that a canal of similar dimensions with that of our neighbors was at first proposed, and that it has been enlarged from a conviction arising from the existence of local advantages which will render it infinitely more profitable, convenient, and important; such are the causes that led to the project now going forward of uniting the great Lakes of Canada by a sloop navigation.

In touching upon the mighty results which must attend or soon follow the completion of the Welland Canal, the truth will assume the appearance of the most extravagant exaggeration to those who do not

make themselves acquainted with the singular Geography of North America. We therefore desire all those who are astonished at our remarks and feel inclined to pronounce them erroneous, to take this preliminary step, by placing a Map before them and estimating the wonderful water capabilities which present themselves, and the immense countries which can approach the Sea only by the St. Lawrence.—Moreover, to judge correctly, those conversant with the largest and most productive of European Canals must divest themselves of prejudices in their favor, and only take into account the facilities of communication which they offer when compared to those which will be opened by the Welland Canal.

Darby, one of the most faithful of Geographers. who never published a Map till he had traversed on foot the country which it represents, estimates the Valley of the St. Lawrence, above the Falls of Niagara, exclusive of the Lakes, at 186,700 square miles, to which we may add the Valley of the Ohio, containing 226,000 square miles, when the Canal now cutting between that River and Lake Erie shall be finished. Thus the commercial intercourse between the Sea and upwards of 400,000 square miles of fertile land, must pass through the Welland Canal or the smaller one belonging to the State of New When this fact is considered the first idea that strikes us is the impossibility that the produce of countries so vastly extensive can pass through these two Canals, and the necessity that soon must arise for opening other communications to meet the increase of commerce: but us no other can be made with any prospect of success, except by the straits of Ningara, the Welland Canal need fear no competition.

The reader will have a more distinct conception of the magnitude of the intercourse that must soon be carried on through these two Canals, by supposing Great Britain, Spain, France and Germany to be so situated that all their intercourse with other Nations must come through one narrow Valley, admitting only two or three convenient Roads or Canals-such a supposition gives a vivid image of what must be the case at the Straits which divide Lake Erie from Lake Ontario, and will enable us to form some estimate of the Ships and Boats that must pass through these Canals, bearing the riches of the Western World to the Atlantic Ocean. Nor are these countries in a state of nature and without inhabitants, they are indeed thinly peopled in proportion to their extent; but nearly three millions are scattered over them; and from the known rapidity of the increase of population in new countries : > period is at hand when the quantities of produted ill be so great as to compel an enlargement of the present dimensions of the Canal, great and magnificent as they are.

It has been found from experience, that when Agricultural produce had to be carted 130 miles it ceased to be worth raising, as the expense of bringing it (a Barrel of Flour for example,) so far, added to that of raising it, exceeds or equals what can be obtained for it in the Market; hence at this distance, a clicck is put upon agriculture, and the improvement of any country. It has also been found that water communication, such as that which the Welland Canal opens is to Land Carriage us 1 to 25; consequently commodities can be conveyed by Canal and Lake Navigation 3,250 miles, as cheaply as one hundred and

thirty by Cartage. But as 130 miles of Land Carriage ceases to be profitable let us take the limit of 100 miles, at which a positive advantage accrues; and then a Ton will be carried by water 2500 miles at the same rate as you can Wagon it 100 miles. In applying these facts, deduced from experience, to North America, we see the certainty of improving countries, which but for this, must forever have remained in a state of nature, totally inaccessible to civilized man, and discover grounds for believing that all the productions of the upper Valley of the Missisppi, the settlement of which is now commencing, will be conveyed to the Ocean by the Welland Canal, thus opening a farther extent of country of 225,000 square miles. Indeed the communication between the Canadian Seas and the River Missisippi is now practicable at high water; in the Spring loaded Boats of a considerable size pass from Lake Michigan into the Illinois River which falls into the Missisippi, and from Lake Michigan by the Miami River into the Wabash, a tributary stream of the Missisippi; but it would engage us too much in detail to point out the extraordinary facilities which a bountiful Creator has afforded, for opening water communications between the different parts of this vast Continent; it is presumed that enough has been stated to show the great quantities of produce which, of necessity must pass through the Welland Canal and it is easy to infer the consequent profits that must accrue to the proprietors.

As the Welland Canal and that which passes through the State of New York, from Lake Erio to the tide waters of the Hudson, are in some degree rivals, it may not be out of place to state the superior advantages of the former; but in doing this, the Directors disclaim all wish or intention of disparaging the mighty work of their neighbors; for to its astonishing success they are indebted for the commencement of their own. They confine themselves to matter of fact and to the fair exposition of such matters as are necessary to enable those whose assistance they are soliciting, to form a correct judgment on the subject.

1st. The Welland Canal passing on the diameter of an ellipsis forty-one miles long, unites both Lakes at little more than half the length of the present communication by Buffalo and the Falls of Niagara.

2nd. Ships passing the Grand River where the Welland Canal begins, have to sail down Lake Erie about 40 miles to the mouth of the New York canal, and here they are nearly as far from Lake Ontario as if they were at the entrance of the Welland Canal.

3rd. The Welland Canal as has been already noticed, has two outlets; vessels may pass from Lake Ontario by the Grand River into the broadest parts of Lake Erie; or they may proceed down the Welland into Niagara River and thence to Buffalo and Lake Erie.

4th. Vessels have access three or four weeks sooner every year to the mouth of the Welland Canal on Lake Erie than to that of the New-York Canal at Black Rock; add to this that vessels are often detained many days in the narrows, between Black Rock and Point Abino, a distance of 9 miles, but vessels passing through the Welland Canal get at nce into the broad lake and therefore make good their passage.

5th. The New-York Canal commences about 500 miles from the sea, of which 353 miles is a Boat navigation, at the end of which you are farther from the market of New-York, than you are from Mon treal, at the extremity of the Ship navigation opened by the Welland Canal.

6th. The Welland Canal will bring all the commodities of the Western countries without breaking bulk, within 120 miles of Montreal, and the distance may be passed in less than two days by large boats, on account of the rapidty of the stream; and it will probably in a few years be rendered capable of steam navigation.

7th. The Welland Canal opens an uninterrupted navigation from Prescott and Ogdensburg on the River St. Lawrence, for all craft used in navigating the Canadian seas to the Western shores of Lakes Huron and Michigan, and by removing a trifling obstruction to the head of Lake Superior, a distance of more than twelve hundred miles, or upwards of 3000 miles of coast.

The late Mr. Fulton, justly celebrated for applying steam with effect to the purposes of navigation, calculated that one million of tons would pass the canal, from Buffalo to the tide waters of the Hudson, in a very few years after its completion, (and ten times that quantity in a short period) which at one hundredth part of a dollar permile, taking the length of the canal at 350 miles to avoid broken numbers, will yield a revenue to the State of three and a half million of dollars per annum. This he reckoned as trifling to the revenue arising from the Canal when the vast regions west of the cataract of Niagara, become full of inhabitants. Supposing an aqual quantity or one million of tons to pass through the Welland Canal at the same time, it would give four hundred and ten thousand dollars per annum, or more than fifty per cent on the original expense, suppose only one half this quantity to pass or that the one million of tons is equally divided between the two cannls, we have still 205,000 dollars per annum, or rather more than 25 per cent on the the capital expended.

If it be said that the state of New-York may remit or greatly lessen the Toll; we answer that the cost of keeping so long a line of canal in good repair, is very great, and will never admit of a total relinquishment of duty; but if it were entirely done away it can be easily be demonstrated, that commodities entering the Welland Canal, can be conveyed at less expense to Montreal and Quebec than the same can be carried for to New York were the whole Toll remitted.

Hence it may be reasonably expected, that this magnificent work will, as a lucrative speculation for the Company, (that is when accomplished,) be far superior in its advantages to any similar undertaking yet attempted in any part of the world: and it is therefore confidently offered and recommended to the attention of the public, both in Great Britain and in the Canadas as a project combining the prospect of great success to the Stockholders, with that of the most important benefits to the public; it will tend to draw forth the latent resources of this rising colony; bring to our Ports a portion of the riches of the more tertile half of the United States; and while it must produce immense profit to the Company, it is an object honorable to those by whom it is to be accom-

plished, and a noble example of enterprise to our more wealthy and more populous sister colonics.

But in addition to pecuniary advantages to the Company, commercial advantages to the Province and honorable distinction to those under whose auspices, and by whose means this important undertaking is to be accomplished, it is a public measure connected with even higher considerations. Improvements suggest and assist each other, and tend to the nourishment and developement of that vivifying principle, which exalts one nation above another and which connects the distant branches of one parent stem to each other, by the ties of common origin, of mutual attachment and of reciprocal advantage; that principle which has enabled Great Britain to maintain the character of being at the same time the first nation in war, the first in manufactures, the first in public improvement; that principle which enabled the small and scattered population of this young Province successfully to resist the repeated inroads of their powerful invaders in war, and which it is hoped may in peace enable them to follow the great example of the mother country in the career of improvement, and like her derive wealth and power from the honorable exertion of individual enterprise.

In the progress of improvements, and amongst those public works which bestow wealth and power on nations and which confer permanent distinction on individuals, there are none of equal importance or celebrity with the construction of canals. quests of Louis XIV are forgotten or remembered only to be held up to execration, but the Canal of Languedoc remains a blessing to France and to his name a monument of imperishable renown. The Duke of Bridgewater's rank and wealth would not have preserved his name from oblivion; but he will always be remembered, as the man who embarked his fortune in constructing the first canal in Great Britain, regardless alike of popular prejudices, of friendly remonstrances and of prophetic threats of ruin.—And in our times and in our immediate neighborhood, it is probable that the name of Dewitt Clinton will always remain associated with the Grand Eric Canal of the State of New York, when the names and the measures of other contemporary chief magistrates of States and of Nations, will be consigned to the same forgetfulness which has already swallowed up so many of their predecessors.

The Directors of the Welland Canal Company profess not to be insensible to the honor conferred upon them, in being chosen to begin so noble a work as a Canal for Ship Navigation, round the Cataract of Niagara, and as their services are gratuitous, the honor of conducting the undertaking is their only reward. It is one of those rare measures which, though of immense magnitude, is of comparatively easy and absolutely cortain accomplishment. The natural advantages of the ground, combined with the inexhaustible supply of water are such as no other Canal ever had, and such as can be found for no other Canal; and when finished on the intended scale it will be one of the grandest works ever effected by any country or by any nation. No work in Europe, or in Asia, ancient or modern, will bear a comparison with it in usefulness, to an equal extent of Territory: and it will yield only to the Canal which may hereafter unite the Pacific with the Atlantic Ocean through the Isthmus of Darien.

But each undertaking has its own peculiar advantages, and the Welland Canal will possess some advantages even over the projected Canal of Darien.—
The Pacific is already accessible by navigating round the Cape of Good Hope or Cape Horn; but the interior Seas of North America, which contain more than half of the fresh water in this Planet, and the fertile and extensive shores of which are destined to be peopled by an active, an intelligent and an enterprising race—boasting their descent from England; and preserving and perpetuating her language and her institutions; these interior Seas can be approached in Ships only through the Welland Canal.

Such is the importance and such will be the splendid and immense results of the work now offered to the notice of those enterprising and calightened capitalists who may be disposed to contribute to its completion; at the same time that they secure for themselves a participation in its advantages and a share of the liberal profits which it may reasonably and speedily be expected to produce.

N. B. In consequence of the delay which has arisen in making the proposed application for obtaining in England a certain part of the increased Capital of the Welland Canal Company, in consideration of a Petition presented by the Directors, at the opening of the present Session of the Provincial Parliament, and in order to prevent any delay in the progress of the Works now under Contract, a Bill has been introduced for granting to the Company a Loan of £25,000 or \$100,000. This Bill has already been passed by the House of Assembly and it is not doubted that the measure will obtain the sanction of the other branches of the Provincial Legislature.

31st December 1825.

### No 7.

At a numerous and respectable Meeting of the inhabitants of the townhips of Grantham, Louth and Thorold, held at the house of Mr. Paul Shipman in St. Catharines, on Saturday the 8th inst., pursuant to public notice. Samuel Wood Esquire, in the Chair and Mr. George Rykert, Secretary.

The following Resolutions were adopted.

1st. Resolved—That the information obtained by the Niagara Committee, their Estimates and Resolutions, were so palpably erroneous and idle, that they would not have attracted the notice of this Meeting, were it not that silence, might by some of the Stockholders at a distance, be construed to be an acquiesence in misrepresentations.

2nd. Resolved,—That we approve of the Queries submitted to, and answered by Mr. Samuel Clowes, the Engineer who first levelled, laid out and estimated the Welland Canal.

3rd. Resolved,—That SAMUEL WOOD Esquire, Mr. NATHAN PAWLING and Mr. JOHN CLOWES, the gentlemen who composed those queries, be appointed a Committee to correspond with the different Stockholders and publish their communication in the different Papers, for the information of the public.

4th. Resolved, That the President and Directors of the Welland Canal Company are entitled to the thanks of this meeting for the obliging manner in

which they furnished us with the different plans and reports relating to the two routes.

5th. Resolved, That we conceive it due the publie to lay the two statements of Mr. Hall before them, in his report furnished the Directors in July last, he states, by raising an embankment of 3 feet across the beach, an additional depth of water will be obtained in the basin, and in the direction of the towing paths, so that vessels drawing 8 feet water may at all naviga-ble seasons proceed to the entrance of the artificial canal, and to a distance of 3 miles from Ontario.

In reply to Query 2d, to the Niagara Committee, he states a sufficient depth of water will be obtained in the 12 Mile Pond to admit vessels drawing from 6 to 7 feet water; in this specification and estimate handed the Directors at the same time he states :-

Guard Locks, at 3 feet rise and 5 feet deep, 50 yards cutting, as £1.142 per separate calculation, including solid masonry & timber work, Embankments across the entrance of the 12 Mile Creek, 5,368 solid 293 yards, at 1 shilling per yard, Protecting Pier, as per particular design and estimate, to 8 feet wa-2,147 ter, 84 yards in length,

Although the sum of £2,147 4s 6d is particularly set down for a protecting pier, a plan of which, drawn by himself, we have now before us, he states in reply to query 3rd:—"No protection from the Lake winds whatever was contemplated" in his estimate, and adds, from its similarity to Burlington outlet that a sum not exceeding £7,000 would be adequate to afford protection for vessels navigating Lake Ontario; we would add, the length of pier at Burlington is about 1,160 yards-here but 168 yards,-his estimate for that harbor was £8,000 for this £10,-583, including his £7,000 for protecting pier.

6th. Resolved, We forbear noticing the mean and unmanly insinuations held out by the Niegara Committee in the close of their communication, being conscious it will meet with the contempt it merits.

7th. Resolved, That the thanks of this meeting are due to Samuel Wood, Esq. for his able conduct in the Chair.

> (Signed) SAMUEL WOOD, Chairman.

GEORGE RYKERT. Secretary.

The following queries were proposed by the gentlemen forming this Committee, to Mr. Samuel Clowes, the Engineer, who first levelled and estimated the Welland Canal by the valley of the 12 Mile Creek, and answered by him:

The same queries proposed by the Niagara Committee to Mr. HALL, Engineer.

First, Will you give a comparative and general view of the two proposed routes of the Welland Canal;—the one terminating in the harbor at Niaga-ra, and the other at the mouth of the 12 Mile Creek; with a probable estimate of each?

Answer 1st. The estimate by the 12 Mile Creek route was made by me, from a minute survey of every part of the line, which occupied us nearly six months. The amount, including harbor, was £26;-000 for a canal 16 feet, bottom, and 8 by 72 feet Locks. The estimate from the Welland to Niagara was made by my son James Clowes—I must therefore refer you to him.

Query 2nd. What description of Harbor at the mouth of the 12 Mile Creek was contemplated in your estimate, furnished by request of the Board of Directors and what kind of vessels could be admitted into it?

Answer 2nd .- In our estimate furnished the Di rectors, a perfect and complete Harbor was contemplated for vessels of the draft of water therein mentioned, which were to be taken three miles into the

Query 3rd. What additional expense would be necessary in erecting a Pier and Break Water at the mouth of the twelve mile Creek, sufficient to protect such Vessels as may navigate Lake Ontario?

Answer 3rd. No additional expense will be necessary, as a Pier of sufficient dimensions and extent for protection from the Luke, in ontering the Harbor, was included in that Estimate, but in order to enlarge the same for Vessels drawing 12 feet water, the sum of £800 at the extent will be adequate.

Query 4th. How far was it intended in your Report to the Directors, to adhere to the channel of the Creek, and if it is advantageous to make use of a natural stream in preference to a Cut?

Answer 4th. The channel of the Beaver Dam Creek (a small stream,) is adhered to about 4 miles and the main branch of the twelve mile Creek, 7 miles. On general principles, an artifical cut is preferable to the bed of a stream, and for this reason a strong prejudice exists against making use of them for Canal operations.

This Creek is an exception to the general rule; in all my experience I never met with the bed of a stream so favourably situated for constructing a perfect and complete Canal-not a branch of it extends more than 16 or 20 miles in the country. The banks have their summit near the Creek, all the water from the adjoining lands is let off into streams on the right and left—but one small brook empties into it from the Mountain to the Pond. There is not one embankment, aqueduct, culvert or extra artificial erection necessary on the route: there is not a sufficient supply of water during the navigable part of the season to drive a pair of Mill Stones in ordinary situations, one fourth of the time. In the breaking up of Winter the water rises over the present Waste weir from two to three feet—when they are constructed ofan equal and sufficient width, the Creek cleared out and the different projections of the Bank cut off, according to our Estimates, the water can never rise 18 inches, and the navigation never be obstructed.

Query 5th. Can Mill Scats be obtained at the termination of the Canal in the Harbor of Niagnra by making a suitable Reservoir?

Answer 5th. A good situation may be obtained at this point for Machinery during the Summer months. by widening the dividing Ridge at Mr. Keefer's, and all the embankments, together with enlarging the di-

**O**3

mensions of the last Pond to make a suitable Reservoir.

It is apparent to every person acquainted with the effect frost produces on Embankments, Rapids, Locks &c., on artificial Canals, that it becomes necessary to draw off the water early in the season, (as on the Eric Canal,) otherwise the water would congeal to the depth of 1 or 2 feet. The current caused by affording an adequate supply for Machinery would undermine the banks, which, with the frest, would evidently cause the upper part to fall into the Canal, to such a degree as would render it expedient to keep the Machinery inactive for some months.

Query 6th. What would be the propable effect of the Ice with the artificial works which must be necessarily erected for the bed of the twelve mile Creek and its mouth, provided this route should be adopted?

Answer 6th. There is no artificial erection necessary in the course of this stream, excepting simply Waste weirs and Locks. The latter are placed separately, and all the water is turned over the Waste weirs, leaving the Locks perfectly dry above 4 feet water, exempt from any injury and free from ice, some days earlier than on the other route.

# Queries submitted by this Committee to Mr. Clowes, with the answers thereto.

Query 1st. Mr. Hall states in his reply to the Niagara committee, that the nature of the adjoining banks renders it inexpedient to proceed upon any level superior to the bed of this stream.

Are the banks of this stream favorably situated for constructing a canal if necessary?

Answer 1st. The whole line from the Tunnel mouth to the Harbor is most favorably situated for constructing an artificial canal. From the Tunnel mouth to Mr. Decou's, about 3 miles, the canal can be constructed on the bank with the most favorable excavation, from thence a level may be carried down the mountain cast of the Beaver Dam Falls two miles, when there is a table land continuing on a gentle descent in a direct line to the Harbor without any extra excavation, and but one embankment, distance 6 miles.

- Q. 2nd. What would be the distance saved, and additional expense incurred by adhering to this line?
- A. 2nd Six and a half miles and the additional expense would be about £4,000.
- Q. 3rd. What dimensions would be most profitable for the Company to adopt in constructing this canal?
- A. 3rd. As you have enlarged the Tunnel to fifteen feet the Locks must be 15 by 90, and the bottom at least 20 feet to udmit Boats of the like dimensions.
- Q, 4th. What would be the increased expense in making a canal of those dimensions on the two routes?
- A. 4th. As there is but trifling excavation on the route by the Twelve Mile Creek, the additional expense will be in the enlargement of the Locks and pits, say, £2000.

By Ningara considerable more, as the whole line must be excavated, but as I am not in possession of the field notes on that route I cannot speak with accuracy, Q. 5th. What additional expense will be incurred on the Niagara route by an error of three feet eight inches on the summit level?

A. 5th. About £2,500.

Q. 6th. State your candid opinion an an Engineer on the comparative advantages and disadvantages of the two routes?

A. 6th. By omitting Lock No. 1, and making an embankment across a narrow strait at No. 2, a pond or reservoir is formed containing from 30 to 40 acres checking the waters to Chippawa, preventing any perceptible current through the Tunnel, and forming a most valuable situation for machinery within 3 miles of that river.

The next situation is Mr. Decou's, on the brow of the mountain, where machinery to any extent may be creeted and all the surplus water pass down the natural stream without interfering with the Locks on the mountain descent.

From the lock under the mountain to the lake there is a continuation of valuable privileges at each Lock, the main channel is about one chain wide and the surplus water passes over the waste weirs alternately and is received into the lower level, the Locks being situated at the end of those waste weirs, as before mentioned, you have the perfect control of the water and can keep them free—the canal can receive no damage by retaining a competent supply for machinery during the winter season.

The Harbor will be extensive and commodious; having already offered to complete it at my own estimate, renders it unnecessary for me to say more on the subject, than that I am still ready to fulfil my proposal for it or any other part of the line.

The most prominent situation for machinery on the Niagara route, is at George Keefer's, Esq., 7½ miles from Chippawa, where it may be erected to any extent, but taking the whole into consideration a decided preference must be given to the Twelve Mile Creek route for Hydraulic purposes;—whether more transit will be acquired from Lake Ontario by Niagara, to cover the difference on the interest of the money expended, is a question any Stockholder may be as capable of determining as myself.

(Signed) SAMUEL CLOWES,

Civil Engineer.

The following is a copy of a Circular sent to the different Stockholders.

ST. CATHARINES, January 1825.

SIR,

A committee having been appointed by the inhabitants of Niagara for the purpose of corresponding with the Stockholders residing at a distance, with a view to prepossess them with a favorable opinion of their route.

They state as a clear and established fact by Mr. Hall's report, that the Canal will cost less by \$17,000 to carry it to Niagara than to take it by the Twelve Mile Creek, and \$28,000 more for a necessary Pier, making the sum \$45,000. If this statement be correct we at once admit the expediency of

its terminating there; but we will shew you clearly, from the Report of Messrs. Samual and James Clowes, and Mr. N. S. Roberts, (an American En-

gineer) that their statement will not bear the shadow of investigation:

Leaving a balance of £19,426 0, 7₹

in favor of the Twelve Mile Creek route, including extension of the Harbor, and in case an artificial canal should be approved of the whole way £15,414 18s 4\frac{1}{2}d, besides shortening the distance six miles.

We would remark this estimate is taken from the original report of Messrs. Clowes, and coroborated by Mr. Nathan S. Roberts, the Engineer in charge of the Eric Canal. All the alterations we have ventured to propose, is correcting an error in the summit level, made by Mr. James Clowes, and widening the Canal—which, for the Twelve Mile Creek route is estimated at £2,300. It will be observed there is but 4 miles excavation on this route, and 18 on the Niagara, which will consequently encrease the expenses in a greater proportion than we have stated.

In their circular they state a balance of \$45,000 in favor of Niagara.

Making a difference of ......... \$122,704 or £30,676 0s. 74d—it is therefore evident that either the Niagara committee or we must be in an error, or have a design to mislead the Stockholders.

We are aware that short and conclusive arguments on those subjects have the best tendency to satisfy the public:

And as Messrs. Clowes offer to take the Canal at their own estimate, and having received assurances from men every way qualified to effect it, that they will execute the work for the sum specified,—and in order to set the matter at rest we will guarantee the completion of the Canal, on this route for the sum of £17,500 Hlf. C'y., from the Tunnel end to Lake Ontario, including the Harbor, (from thence to the Welland being already under Contract). We will enter into Contract with the Directors, furnish them with competent security and complete the Harbor, (which has been represented as so difficult an undertaking,) without any advance.

This Committee are assured that the people of Niagara would gladly defeat the object altogether rath-

er than have it terminate elsewhere, which would remove the little trade they possess and reduce the value of their property. Measures have been attempted by them to produce that effect. We disclaim any such motive, for we are sensible that the country will derive great advantages and the Stock be productive, even should they expend £20,000 more by taking it to Niagura—although it will be far more advantageous to the Stockholders and beneficial to the country on this route, for which we assign the following reasons:

It will require £19,426 less Capital by their own Estimate, and save an annual interest of £1,165, 11s.

By reference to the reasons adduced by Mr. Clowes you will perceive the great difference in the value of Hydraulic privileges which being situated 12 miles in the interior will draw so much more business to those establishments from the country on each side, and tend to the convenience of the Agricultural interest,—whereas Niagara being situated on a point cannot have recourse to an equal extent of country.

The water on this line from its being on the lowest level cannot pass to the advantage of any individual and may be used in all seasons, whereas, the Niagara route crosses several streams, and all the water that escapes goes to benefit individuals at the Company's expense.

The Harbor will be more convenient and commodious than Niagara—it will retain with greater safety any quantity of Lumber, Staves, or Timber of any description which can be shipped at once of The current and exposed situation of the Niagara River will prevent any quantity of Lumber rumaining in Rafts with equal security.

Five or six hundred Vessels can winter here without the least danger, and the Harbor be cleared from ice before any other on the Lake,—at Niagara they are exposed to the drifting of immense bodies of ice from Lake Erie, to the great danger of Vessels wintering in that port.

# Communications of W. H. Merritt, Esq.

The Canal being situated in the interior, will not be obstructed in time of War—whereas Niagara being under the command of the American guns, the profits must cease during hostilities.

There will be no difference in the amount or quantity of commodities from Lake Ontario by either route;—but from the local advantages this possesses in Hydraulic situations, and commanding a more extensive scope of country on each side, will create a great internal transit.

The following are among the numerous reasons that can be assigned for a preference to this route for the benefit of the public and the country in general:

It has been admitted that the erection of a Harbor in any country enhances the value of all the property situated near it; and in this instance it must be of the greatest importance to the District and country and in time of War invaluable.

The argument that has always been held out by our Legislators, Commissioners &c., was, to remove the Canal as far as possible in the interior. Former experience has shewn us the value of this situation, when driven from Fort George all our supplies were brought up this Creek in Boats and kept in perfect security.

A safe and easy retreat will be afforded our Vessels three miles from the Lake,—the banks of which are well situated for defence. Towns will be built and a population increased to enable them to protect their property. The public will derive every advantage from the uninterrupted communication of the Canal, and not be subject to pay the loss of all the Buildings that may be erected as has been the case

in Niagara. We must bear in mind that the greatest proportion of losses sustained in this District during the late War, was in the destruction of that Town.

Although we hope never to witness a recurrence of those scenes, it is nevertheless prudent to guard against them. We considered ourselves as safe in 1810 as we do at this day.

Besides the advantages above enumerated we must not lose sight of one of the greatest moment, viz:—
Sloop Navigation. By adhering to this route we have a summit of only 3 miles from thence; by making use of the bed of this stream, very little excavation will be necessary to make the Canal contain 7 feet water. The Tunnel can hereafter be cut open at a less expense than in the first instance by carting out the earth, and a perfect navigation may be formed for Vessels between the two Lakes.

On the Niagara route the summit extends seven and a half miles over embankments, and through deep cutting—from thence, there is excavation the whole way to Niagara. Consequently the expense necessary to effect this improvement will bear no comparison between the two routes.

We submit the above reasons to your consideration, trusting you will act under the influence of plain reason and solid argument.

(Signed)

SAMUEL WOOD. NATHAN PAWLING. JOHN CLOWES.

Niagara, 1825.

No. 8.

# LIST OF STOCKHOLDERS.

We the Subscribers hereby bind ourselves to take the number of Shares opposite to our respective names, agreeable to an Act of the Legislature of this Province, passed in the 4th Session of the Eighth Provincial Parliament, entitled "An Act to incorporate certain persons under the style and title of the Welland Canal Company."

## WITHDRAWALS.

To the President and Directors of the Welland Canal Company.

I sincerely regret being under the necessity of acquainting you that in consequence of the provisions of the Welland Canal amendment Act, I can no longer consider myself a Stockholder therein, and do therefore take this method of requesting that you will be pleased to erase my name from amongst those who are inclined to favor the route adopted by the present Parliament. I am, Gentlemen,

Your obedient humble Servt. ADAM BROWN, (L. S.)

Witness, JAMES McMILLAN, JOHN MARTINDALE.

To the President and Directors of the Welland Canal Company.

GENTLEMEN,

Agreeable to provisions of the late Welland Canal Act, we the undersigned beg leave to inform you that we intend withdrawing the Stock subscribed by us under the Act of 1824.

RICHARD FITZGERALD, (L. S.) (L. S.) WILLIAM JACKES, HENRY CLELAND, (L. S.)

In presence of JAMES LITTE, George P. McBride.

To the President and Directors of the Welland Canal Company.

Agreeably to the provisions of the late Welland Canal Act, I hereby notify ou that I intend withdrawing the Stock subscribed by me, under the Act of 1824.

EDWARD McBRIDE, (L. S.)

Niagara, May 11th 1825.

Witness, JOSEPH ALLEN. GEORGE P. McBRIDE.

NIAGARA, 26th May 1825.
To the President, Directors & Co. of the Welland Canal.

GENTLEMEN, We the undersigned beg leave to notify you that we wish our names as Stockholders to the Welland Canal, erased from the list, as we decline taking any further intorest in that undertaking. Witness our hands and seals at Niagara the day and year above mentioned.

T. BUTLER, (L. S.) JOHN CROOKS, (L. S.)

Witness. RALFE CLENCH Jr. WILLIAM DOCKSTADER. Te the President, Directors & Co. of the Welland Canal.

GENTLEMEN,

Agreeable to the provision of the late Welland Canal Act, I beg leave to acquaint you that I intend withdrawing the Stock subscribed by me under the Canal Act of 1824, and that I would not have taken Stock under the provisions of the present Act.

I am Gentlemen, your obt. Servt. R. M. CRYSLER.

JOHN WILLSON, (L. S.)

Witness,

JARED STOCKING,

NIAGARA, 17th June 1825.

Best Grobert Server and research as the property of the

In consequence of a provision made in the Welland Canal Bill, passed the Legislature at its last meeting, I beg leave to notify you that I have withdrawn, and do hereby withdraw the Stock subscribed for by me in that undertaking.

I remain, your obt. hble. Servt. JAMES CROOKS, (L.S.).

To the President & Directors of the W. C. Co. Signed, sealed and delivered in presence of us, JOHN J. LACEY, ) T. BUTLER.

THOROLD, 17th June 1825.

To the President and Directors of the Welland Canal Company.

GENTLEMEN,

Having taken into serious consideration the conduct of the Welland Canal Company it is my intention to withdraw my Shares from being a Stockholder in the said Canal—Gentlemen, and likewise it is my intention to have pay for the excavation of the said Canal that goes through my ground -for the former Contract is null and void by the widening of the Canal for the mouth of the Basin, for it has cut up my ground too much-Gentlemen, with much respect, Lam your most obt. Servt.

JEREMIAH ORDLEY.

To the President, Directors & Co. of the Welland Canal.

GENTLEMEN,

I hereby inform you that I wish to withdraw my Stock subscribed to the Welland Canal. Given under my hand and seal this 20th day of June 1825.

A. CRYSLER, (L. S.)
Witness, F JAMES CRYSLER, Atty.
R. M. CRYSLER,
Jos. B. CLEMENT.

To the President and Directors of the Welland Canal Company.

GENTLEMEN,

I beg leave to inform you that it is my intention to relinquish my Shares in the Stock of the Welland Canal, and will thank you if you will be kind enough to grant a Certificate that will enable me to obtain the money I advanced.

I am Gentlemen, your obt, Servt. GEO, RYKERT. St. Catharines, 1st July 1825.

ST. CATHARINES, 1st July 1825.

GENTLEMEN,

I beg leave to observe that it is my intention of withdrawing my Stock in the Welland Canal, being one Share, the amount of Instalments paid thereon is \$73, which you will have the goodness to pay to the order of Mr. H. Mittleberger.

I have the honor to be.

Gentlemen.

Your obt. Servant. K. REACH.

To the President & Directors of the W. C. Co.

St. Catharines, July 2nd 1825.

GENTLEMEN.

I beg leave to suggest that it is my wish and intention to withdraw the number of Shares which I have taken in the Welland Canal, and likewise to receive from you the amount of Instalment paid thereon to the Company.

I am.

Gentlemen, Yours, &c., E. S. ADAMS.

To the President & Directors of the W. C. Company.

To the President and Directors of the Welland Canal Company.

GENTLEMEN,

In consequence of an Act of Parliament passed last Session establishing the line for the Welland Canal depriving the Stockholders of privileges granted them by a former Act, I withdraw my subscription for Two Shares of Stock in said Company.

I am,

Gentlemen.

Yours, &c.,

J. O. BALL

NIAGARA, July 6th, 1825.

To the President and Directors of the Welland
Canal Company.

GENTLEMEN,

In consequence of an Act of Parliament passed last Session, establishing the line for the Welland Canal, to deprive the Stockholders of privileges granted to them by a former Act, I withdraw my subscription for one Share of Stock in said Company.

I remain,

Gentlemen,

yours &c.

JOHN COUGHELL.

To the President and Directors of the Welland Canal Company.

GENTLEMEN,

I do declare that I would not have taken Shares in the Welland Canal under the provisions of an Act passed the 13th day of last April which repeals part of, and amends an Act entitled "An Act to incorporate certain persons therein mentioned under the style and title of the Welland Canal Company."

Witness my hand and Seal at Niagara, this 7th day of July 1825.

J. BREAKENRIDGE, [L. S.]

Signed and Sealed in the presence of ROBERT E. BURNS.

To the President and Directors of the Welland Canal Company.

I am compelled from misfortune to relinquish my Shares in the Welland Canal Company, and take advantage of the Act to withdraw my subscription.

Yours. &c.

ELIZABETH SHIPMAN.

## No. 9. SUGGESTIONS

ON THE ENLARGEMENT OF THE WELLAND CANAL

### STEAM-BOAT NAVIGATION.

It is rather surprising that such an uncommon degree of apathy should prevail among the inhabitants of this Province, respecting its internal improvement, when nature has favored us in so extraordinary a manner, and seems determined by the facilities she offers us to force us into the measure.

Was a spirit of inquiry instituted, and the Members of our Legislature take time to make themselves acquainted with embarrassments under which we labor for want of a direct water communication, a very short period would relieve us and place this Province in a most enviable situation.

The Welland Canal, which is intended to unite Lakes Erie and Ontario, has commenced under the most favorable auspices, and is now in such a state of forwardness that we may look for its completion the ensuing year. I learn the Directors of that Company

have determined the dimensions of their Locks to be 100 feet in; length by 22 feet in width—depth of water 7 feet 6 inches—width 34 feet bottom and 56 feet 6 inches surface, except in the Deep Cut, where one vessel must pass at a time.

Those dimensions at first view appear ample for the commerce of the country for years to come, but when we take into consideration the importance of the undertaking, and the rivalship we are creating with an active, economical, and enterprising nation, it behoves us to secure every natural advantage we can by possibility acquire—and I will endeavor to shew by the following calculation it is now within our power, by extending those locks to 32 feet in width to admit Steam Boat navigation between those lakes to effectually secure all the transit and travel between Lake Eric and the ocean, and vice versa; by way of New York, where by means of the Eric Canal the only possibility of rivalship can exist.

For instance we will draw a comparison of the distance, expense of transit, and time; between Syracuse on the Eric Canal and Cleveland to Lake Eric. We mention this place from its being the termination of the Ohio Canal, and which must have a direct con-

nexion with the Welland.

The distance from Syracuse to Buffalo by the Erie Canal is 200 miles, the price of transit on which is Nine Dollars per ton, requires four days to accomplish the route by their fastest day and night freight boats.

From Buffalo to Cleveland 150 miles, one to one and a half days—\$1 25cts. per ton.

The distance from Syracuse to Oswego is 32 miles, which at the same rate of toll as on the Erie Canal-42cts. pr. ton per or 0 7 2. mile, is - - -- 1 44 From Oswego to Welland Canal Harbor 120 miles (steam - -1 00 or navigation.) - - -0 5 From W. C. Harbor to Grand River on Lake Eric, 43 miles @  $4\frac{1}{2}$ cts. per ton per mile - 1  $93\frac{1}{2}$  or 0 9 From Grand River to Cleveland 110 miles - - - - 1 00 or

The distance between those places, via Buffalo, is 350 miles—by Grand River, 303 miles—total expense on the former per ton £2 11s. 3d., on the latter £1 6s. 10d.,—time required by former at least five days, by the latter, two to two and a half days, allowing the Steam Boat only six miles the hour; at the same time we are aware all the new Steam Boats on the coasts of Great Britain and on the Hudson River in New York, are of sufficient power to perform 10 miles the hour.

Steam is generally admitted to be the cheapest application of power for propelling boats when expedition is combined. However we will quote one fact in corroboration of our statement—a ton of merchandise is now transported from Quebec to Montreal, 180 miles, for 6s. 3d., and down for 5s.—average 5s. 7½d. per ton—admitting we could carry on equal terms, it would reduce our calculation to £1 4s., per ton.

Those advantages in distance, time, and expense, are in addition to many other the Welland Canal possesses, by means of the Harbor at Grand River, which having been so frequently stated are well understood. However there is another prominent feature in this canal not generally known. There is but six miles and thirty three chains entire excavation from the River Welland to Lake Ontario by placing a guard lock on the Welland and raising an embankment at the end of the summit level and on each succeeding lock—two feet additional water can be added to the Canal throughout, making a depth of nine feet six inches at an additional expense not exceeding £10,000.

For the correctness of these statements, any gentleman may satisfy himself by examining the profiles and plans now before the Legislature, and if they prove correct we are satisfied every statesman or friend to his country, instead of cramping and endeavoring to crush the undertaking in its infancy, will render the Company every countenance and support to induce them to make an alteration fraught with such incalculable advantages to the Canadas.

Few members of the Legislature have had an opportunity by a personal observation of knowing what

progress has already been made in the work, and whether it has been conducted with that energy and good management such operations require.—An appeal may be made, however, to those who have witnessed it. The law was passed the 13th April—operations matured and the Stock procured from New York and Lower Canada by the 13th March—six weeks due notice given, and the most formidable part of the work which required the longest time to execute, being deep cut and harbor, was placed under contract on the 1st July—every preparatory arrangement made by the contractors, and the work commenced with a favorable force the first of September—and from what has been done there is no question the whole may be finished the ensuing year.

The remainder of the Canal between those intermediate situations is likewise placed under contract, providing the Legislature thinks proper to sanction a deviation in the route. This measure was indispensable with the Directors in order to finish the canal the ensuing year, as all the timber for the locks require to be felled and brought to the spot the present winter, or a delay must arise of another year. It must be apparent to every observer if the above alteration is now made in those locks—as it can never be done hereafter at any moderate expense—a canal on a commensurate scale will undoubtedly be made between Prescott and Montreal, and enable those on and above Lake Erie to avail themselves of that profitable branch of trade—ship building, which now proves so successful in Quebec.

A FRIEND TO INTERNAL IMPROVEMENT. YORK, November 23rd, 1825.

No. 10.

New York, May 17th, 1825.

The Hon. J. N. Dunn,

President of the W. C. Company.

Sir.

You were informed when here, that Mr. Geddes, a highly respectable and experienced Engineer, had been written to with a request that he would undertake to make a survey across the isthmus of Niagara to ascertain the shortest and most eligible route for a canal to connect the Lakes Erie and Ontario. He has accepted the proposition, and was to leave his place of residence on the 15th instant.

Mr. Yates, who is acquainted with Mr. Geddes, at the request of the Stockholders wrote him a letter stating the object of his mission, which he of course would submit to you. It is expected that on his arrival there would be no delay in commencing his surveys.

As you suggested that any observations that the Stockholders here might make on the subject of the Canal would be favorably received, they respectfully submit the following to the consideration of the President and Directors thereof.

As fhere has been such diversity of opinion regarding the route of the Canal, particularly in that part of it from the east side of the ridge to Lake Ontario—that they suggest the propriety of directing the Engineer to find the shortest and most cligible

route from or near that point where the Niagara and Twelve Mile Creek branches separate, according to the surveys exhibited, to the basin of the Twelve Mile Creek, or where a safe port for vessels which navigate the lake can be constructed, as it is understood that none now exists. That a straight course as near as may be, taking into estimation the comparative expense of each, ought to be taken in preserence to any circuitous one, and that no water privileges ought to induce the adoption of a longer route:-they believe that the water could be applied with equal advantage for mills on the short route as on the circuitous one, and the saving of five miles in distance in forty miles is of great importance, admitting that both routes cost the same sum to complete them, being one-eighth saved in the transportation.

In making these remarks on the route they however by no means think lightly of the water privileges, on the contrary they think them very important, and are desirous that the cut across the ridge should be made deep and wide enough now to supply a sufficiency of water for the purpose both of navigation and mill seats for many years to come. The Engineer will first make his calculation how much water will be required for navigation—second, how much of the same water can be made use of for mills-and thirdly what will be the additional quantity required.

It is not understood that any difference of opinion exists as regards the route from the Grand to the Chippawa rivers-it has been suggested that there is a sand bar at the mouth of the Grand River which presents some difficulties—this the Engineer will of course examine. They wish him also particularly to examine the Chippawa river from Wainfleet marsh to the mouth of the ridge canal, to ascertain whether it will be better to make use of the river or to have a canal cut alongside.

That the locks ought to be of wood, and that a good strong wooden lock will remain in good order with as little or less expensive repairs than a stone lock, will last from ten to twenty years and be built at one-tenth the expense, that is for the corresponding parts built of stone or wood. The simple interest therefore of the cost of the stone lock would annually, if requisite, renew every perishable part of a wood lock. To construct stone locks therefore on this canal would be uselessly wasting the money of the Stockholders. There is another important rea-son for making locks of wood—that is, the depth and size which ultimately may be required for the locks to make them therefore at this time of the most expensive materials would be improvident.

On this subject no decision need be had instantly. The route must depend upon the survey and estimates made by the Engineer, and until his report be made nothing can be done, and the advantage of wood locks is so certain, that they think when the question is presented to the Board there will be but one opinion about it. Mr. Merritt returns this way from Canada, when the Stockholders will confer with him on every thing relative to the canal.

I am, with much respect,

Your most obed't servant, THOMAS PROCTOR, Agent. New York, May 17th, 1825.

George Keefer, Esq.

Sir,

As Mr. Dunn, President of the Wel. land Canal Company, may be absent in York, I beg leave to enclose a letter for him which it have left unsealed, as it is addressed to him as President of the Company, and is intended to convey to him and the Board of Directors the views of the Stockholders in this city relative to the Canel—Mr. Geddes the Engineer, I expect, will have arrived and commenced his operations—we are desirous that no time should be lost in getting the work executed,

> I am, very respectfully, Your most obed't servant, THOMAS PROCTOR, Agent.

### IN THE YEAR 1826.

On 30th January an Act was passed authorising the Company to alter the route—(see Act hereto appended marked No 1.) An Act was also passed loaning the Company £25,000 until the Stock was taken up in England, of which they had every expectation. On this occasion they expressed great confidence that no further sum could be required, which was caused from the confidence in the estimates of Engineersand the ability of those who expected to obtain Stock to perform it—in which however they were sadly disappointed. The work was continued with energy through the Season, and at the close of it, the Contractors, Messrs: Hovey and Ward discovered that they could not complete their Contracts for deep Cut at the Contract price, 25 cents-and give it up. For particulars and details reference is made to the minutes of this year, (hereto appended marked No. 2.) For general reference respecting the work of Directors; see Report of 1826 (hereto appended, marked No. 3,) and also to Mr. Thomas' Report for May, June and August—annexed hereto, and respectively marked No. 4, No. 5, and No. 6). This year the Arbitration took place—the submission, proceedings and awards are likewise hereto appended, (see pro-ceedings of Arbitrators marked No. 7, and awards of Arbitrators, marked No. 8)-by which it appears that a number of Evidences were produced from the immediate neighbourhood of the Canal—which affords reasonable inference that they would have brought forward whatever may have been seen amiss. Individuals were not backward in making allega. tions-Mr. Clowes' letter, Mr. Gordon's and others, appeared in print during this year making accusations which the annexed letters from Saml Clowes and James Clowes will place in a proper view, (see letter of Saml. Clowes marked No. 9; and of James Clowes marked No. 10; hereto appended; and would never have appeared except for the renewal of similar proceedings by the Director of 1835. After this period the most violent local opposition ceased, and the Work went on with comparative tranquility. The Directors of this year were

The Honorable John H. Dunn, the Hon. William Allan, John B. Robinson, H. J. Boulton, John Clark, George Keefer and Wm. H. Merritt, Esquires.

### No. 1.

An Act to repeal part of and to explain and amend the several acts of this province relating to the Welland Canal Company.

[Passed January 30th, 1826.]

WHEREAS it is expedient to explain, alter and amend an Act passed in the fourth year of His Majesty's reign, entitled, "An Act to incorporate certain persons therein mentioned under the style and title of the Welland Canal Company," and also a certain other act passed in the sixth year of His Majesty's reign, entitled, "An Act to repeal part of and extend the provisions of an act passed in the fourth year of His present Majesty's reign, entitled, 'An Act to in-corporate certain persons therein mentioned under the style and title of the Welland Canal Company;" and whereas it has been found that to descend the mountain by the route prescribed by the seventh section of the above recited statute passed in the fifth year of His Majesty's reign, would be attended with great difficulty and expense, and that a new route has been surveyed and reported upon which will diminish the distance and expense and afford a more easy and practicable descent; and whereas the President and Directors of the Welland Canal Company have by petition prayed that the legislature would sanction a deviation as hereinafter mentioned from the route prescribed by the act last mentioned, and it is expedient to authorise the same.—Be it therefore enacted by the King's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Assembly of the Province of Upper Canada, constituted and assembled by virtue of and under the authority of an act passed in the parliament of Great Britain, entitled, "An Act to repeal certain parts of an act passed in the fourteenth year of His Majesty's reign, entitled, 'An Act for making more effectual provision for the Government of the Province of Quebec in North America,' and to make further provision for the government of the said province," and by the authority of the same, That so much of the seventh clause of the last above mentioned act as relates to the route along which that part of the said canal which is to connect the River Welland with Lake Ontario shall be conducted, shall be and the same is hereby repealed; and that the route along which that part of the said canal shall be conducted shall be as follows—that is to say: by Sharer's ravine and Dick's creek to the valley of the Twelve Mile Creek, as the said route has been

surveyed and reported upon by Mr. Clowes and Mr. Roberts, Engineers, or as nearly thereto as circumstances will permit, and that from the said Twelve Mile Creek to Lake Ontario the same route shall be pursued as has been prescribed by the act last mentioned, or as near thereto as circumstances will permit.

- 2. And whereus, by the second clause of the said act passed in the fourth year of His Majesty's reign it is provided that nothing therein contained shall extend to compel the owner or owners of any mill seat to sell, convey, or otherwise depart with the same to the said Company, and it being intended that the said provise should only apply to such good mill seats as actually existed before the making of the said canal.—Be tt therefore enacted by the authority aforesaid, That the said recited provise shall not extend or be construed to extend to any mill seat or mill seats not existing before the making of the said canal.
- 3. And be it further enacted by the authority afore-said, That the value of any mill seat or tract of land which the said Company will be authorised to purchase for the purposes of machinery shall be ascertained, in case of disagreement, by arbitrators, in the same manner as the value of the land is to be assessed through which the said canal shall pass; and that the said arbitrators shall be also empowered to decide whether the mill seat or site or other machinery desired by the Company is such as the person owning the same can be compelled to part with to the said Company.
- 4. And whereas it is desirable that the arbitrators to be appointed under the seventh clause of the said act passed in the fourth year of His Majesty's reign, should be empowered to consider the advantages as well as disadvantages of the said canal as respects the lands of any person or persons through which the same may pass; Be it therefore enacted by the authority aftresaid, That the said arbitrators so to be appointed as aforesaid shall and may, and they are hereby authorised and required in assessing the value of any lands or tenements of any person or persons proposed to be purchased by the said Company, or the amount of damages to be paid by the said Company to any person or persons under the provisions of the said seventh clause, to take into their consideration the advantages likely to accrue as well as the injury or damage occasioned to lands or tenements by reason of the said canal: Provided always nevertheless, that it shall not be in the power of such arbitrators to award that any such sum shall be paid by any person or persons to the said Company on account of any such advantages as aforesaid.
- 5. And be it further enacted by the authority aforesaid, That all matters of disagreement or dispute to be settled or determined by arbitration under the provisions of the said seventh clause of the said act passed in the fourth year of His Majesty, reign shall be referred to arbitrators, as therein provided, so that the award or awards of such arbitrators may be made, published, and declared on or before the first day of September next, and that all and every sum of money by such award or awards directed to be paid by the said Company shall be paid to the party or parties entitled to receive the same on or before the first day of October next.

6. And be it further enacted by the authority afore-said, That whenever the Canal to be made by the said Company, in any part of its course from the Grand River to Lake Ontario shall have the effect of depriving any person possessing lands adjacent there to, of any privilege or convenience of water for ordinary purposes, which he had before enjoyed, it shall be incumbent upon the said Company to allow to the person or persons then and at all times thereafter possessing the said lands, free and convenient access for persons and cattle, to the waters of the said canal.

7. And whereas, in consequence of the enlargement of the said canal in order to adapt it to schooner navigation, it is expedient to repeal the eleventh clause of the said act passed in the furth year of His Majestys reign, and to make further provision in respect thereof—Be it therefore enacted by the authority aforesaid. That the said clause shall be and the same is hereby repealed; and it shall be lawful for any person possessing lands through which the said canal shall pass, and upon which there shall now be buildings, improvements or which there shall now be buildings, improvements or which the said canal shall divide, to erect a pridge at his own expense to connect the same: Provided always, That such bridge shall not present greater obstacles to the navigation of the said canal canal can the bridges erected thereon by the said Commany.

### No. 2.

At a Meeting of the Directors held at York on Wednesday, February 1st, 1826.

PRESENT :

The Hon. John H. Dunn, President,
William Allan, Vice-President,
George Keefer,
William H. Merritt.

The minutes of the former meeting were read and confirmed.

Mr. Clowes, the Company's Engineer; then presented himself to the Board for the purpose of making certain representations respecting the prices at which the contracts were given to Messrs. Smith, Ward & Co., and stating other matters relating to the general business of the Canal, tending to implicate the Company's agent, which were as follows, viz:

1st. That offers were made to perform the work at a lower rate than that given to Smith, Ward & Co.

When, upon referring to the various unaccepted proposals, it was satisfactorily proved to the Board that no other persons capable of undertaking and performing the work had made any offer on lower terms—that one other was made by Chapman & Co., but sufficient security could not be obtained for its fulfilment and they subsequently relinquished it.

2nd. That the work was conducted in an improper and unfinished manner.

Whereupon the president stated that he would go to the canal for the purpose of ascertaining how far the work was in an improper state or not, but it was the

opinion of the board that at this time of the year it was hardly possible to form any very correct judgment.

3rd. That the contracts are re-let to other contractors, who are not sufficiently paid.

In reference to this the Board were unanimously of opinion that they did not wish to interfere in any arrangements that Messrs. Smith, Ward & Co, might make with other persons, all they desired and would require of the present Contractors was the punctual fulfilment of their Contract.

4th. He had reason to think that Mr. Merritt was a party interested with them in their Contracts.

This Mr. Merritt plainly and positively denied, at the same time desiring any investigation the Board might think proper, and stating that Messrs. Ward and Hovey would appear before the Board tomorrow on business, when they might be questioned on the subject:

The Board then adjourned until tomorrow morning at 10 o'clock.

JOHN H. DUNN,

President.

THURSDAY, Feb. 2nd 1826.
The Board being met pursuant to adjournment,
PRESENT:

The Hon. John H. Dunn, Prossdent.
William Allan, Vice President.

George Keefer, and William H. Merritt, Esquires.

Upon the representation of the Board it was Ordered, That the dimensions of the Deep Cut be 15 feet at bottom.

Resolved. That not any more money be paid to Fenlon & Smith until a full estimate is given in of the whole of the work performed by them, nor any further sum expended on the Harbor until a specific Contract is made for its completion on the scale of its increased dimensions.

The Letter of Mr. Roberts declining an engagement with the Company on account of his present and numerous other undertakings was read. Whereupon it was Resolved. That Mr. Merritt write to Mr. Proctor desiring him to engage a suitable person at New York on the best terms he can, at the same time consulting the opinion of the Stockholders there; especially Mr. Yates.

It was agreed that Mr. Marshall Lewis shall erect a turn Bridge by way of experiment, and that the same be paid for at the Engineer's valuation if approved of.

Ordered, That public notice be given of the ensuing election for Directors, agreeable to the Act of Incorporation.

Resolved, That not any part of the Loan for £25, 000 advanced by the Government be applied until 25 per cent is paid by all the present Stockholders, and that the balance now remaining in the Agent's hands be drawn for.

It was determined that it is not necessary to enforce any right at present which the Company may have by Law, to appropriate 2 chains of Land on the line of the Canal, and that should it be hereafter necessary for the interests of the Company it will be best to consider it then.

Messrs. Ward and Hovey being present, the President informed them that it had been stated to the Board that Mr. Merritt was thought to be interested in their Contracts with the Company, and that it was the particular desire of the Directors to know if that was the case.

To which they replied by denying that Mr. Merritt had any direct or indirect participation in their engagement in any way whatever, and the Board were decidedly convinced that Mr. Clowes' surmises in this respect are utterly without foundation.

JOHN H. DUNN,

President.

FRIDAY, February 3rd, 1826.

The Board being met again pursuant to adjournment.

PRESENT:

The Hon. John H. Dunn, President,
William Allan, Vice-President,
George Keefer, Esquire, and
William, H. Merritt, Esquire.

Ordered—That Mr. Rykert be desired by our agent to commence as soon as possible a survey of the land to be appropriated for the use of the canal, and to make out a description for each lot or parcel of land on the following principles.

To commence at Lake Ontario at each side of the harbor and reserve one acre for machinery at each end of the embankment, which must include one chain above it and run out a suitable distance for erections, likewise take in the beach between those reservations for the purposes of storehouses, &c. &c. Then take half a chain, on each side of the canal above high water mark throughout, reserving one acre as above at each end of the waste weirs at each lock, and from Jacob Ball's land on the mountain ascent near Mr. Hoard's, appropriate three chains at least on the upper side of the Canal and one below. (All this to be clearly understood to be over and above the land required for the canal on the width of the surface of the water, and at the River Welland, from two to four chains in width and about ten chains in length on the canal for store houses and other necessary erections.)

And as the Board of Directors are desirous to afford every accommodation to all and every inhabitant on the line of the Canal consistent with the interests of the Company. The Engineer or surveyor will take in whatever small parcels of land may be separated from any individual's property by means of the Canal if particularly requested so to do by the owner thereof:

And in case any alteration on further examination from the peculiar formation of the land at any point should appear necessary or expedient to the Agent.

Engineer, or Surveyor, the same will be noted and reported to the board.

In consequence of a representation of our Agent that the work at the harbour is not proceeding properly, or to the advantage of the Company, owing to the disagreement of the present Contractors, Messrs. Fenlon & Smith, It was Ordered That they be paid up on the Engineer's estimate, and the harbor be let to Messrs. Smith, Ward & Hovey, at their proposals.

Ordered, That two locks on the lower five mile level be of equal width with the harbor.

Ordered, That Smith, Ward & Co.be paid eighteen cents per yard for the first lift on the deep cut and throughout in proportion, that price being considered by the Board a fair proportion for their contract, and that the Engineer be notified by our Agent to that effect.

Ordered, That Messrs. Smith, Ward & Co., be paid the sum of £2,183 2s. 3d., being 18 cents per yard on the Engineer's Estimate; and that a draft for £2,700 be given them on our Agent in N. York, that being the supposed balance on 25 per cent; called in at that place; and that Messrs. Smith, Ward & Co., pay into the Bank of Upper Canada the sum of £489 17s. 9d., to the credit of this Company, being the difference between the above sums, allowing them two months interest in said draft, viz: £27, the draft being at 90 days' sight, instead of 30, as formerly.

JOHN H. DUNN,

President.

### ANNUAL ELECTION.

April 3, 1826.

At a meeting held this day at St. Catharines, of the Stockholders of the Welland Canal Company, for the election of Directors—

The Hon. John H. Dunn, being called to the chair.

On motion of Mr. Merritt, seconded by Mr. Keefer, it was Resolved, That Messrs. James Gordon & Josph Wenham be appointed scrutineers for receiving the votes, and that the election be kept open from 11 until 2 o'clock.

At two o'clock the election being closed, the scrutineers proceeded to an examination of the votes, and reported the following persons duly elected,

The Hon. John Henry Dunn, The Hon. William Allan, John B. Robinson, Esquire, Henry J. Boulton, Esquire, John Clark, Esquire, George Keefer, Esquire, William H. Merritt, Esquire,

At a subsequent meeting of the Directors,

PRESENT :

The Hon. John H. Dunn, George Keefer, Esq. John Clark, Esq. and W. H. Merritt, Esq. Upon the motion of Mr. Keefer, seconded by Mr. Merritt, the Hon. John H. Dunn was re-elected President, and the Hon. Wm. Allan, Vice-President for the ensuing year.

The minutes of the last meeting were then read and confirmed.

The President then informed the Board that since their last meeting the Company's Agent had been to New York, by his desire, for the purpose of ascertaining the feelings and intention of the Stockholders there on the subject of the payment of their future instalments; because he deemed it highly necessary before any part of the Government Loan was used to receive an assurance from them of their readiness under all and every circumstance, promptly to meet them in such a manner as might be required in payment of the contracts already entered into; and that Mr. Merritt being returned would now give the result of his mission.

Mr. Merritt then stated, that according to the President's instructions he had seen and consulted the Stockholders at New York on the subject mentioned, and had received from them every possible assurance of the prompt payment of all their instalments as they became due; that they would be prepared to meet them at the rate of 8 per cent per month—and do this although the stock reserved for the London market should not be taken up; requesting that drafts drawn on account of those instalments might be at 90 days sight, at the same time expressing their wish that the work might be prosecuted with all the vigour which means would allow, and especially recommending for the consideration of the Directors the propriety of employing an Engineer of sufficient talent and responsibility to superintend the work.

The Board concurring in the above recommendation as well as being themselves convinced of the necessity of placing the duties of Engineer in the hands of those who may be relied upon for their performance.

It was Resolved. That Mr. Thomas, a gentleman concerning whose talents and respectability the Agent had made suitable inquiry, and that enquiry being of a very satisfactory nature, be engaged at a Salary of £375 per annum to superintend the whole work of the Canal, and that Mr. Barrett, concerning whom the same testimonials had been received, be employed as Resident Engineer, at a Salary of £450 per annum, including his expenses, with an allowance of £125 per annum for an Assistant; thus placing the whole of the duties of this Department upon the best possible footing in order to promote and secure the success of the undertaking.

It was then Resolved. That the Agent inform Mr. Clowes of the preceding arrangements, and that in consequence of them his engagement, terminating on the 20th instant, will not be renewed, at the same time requesting that he would deliver into the hands of Mr. Merritt, all plans and papers relating to the Canal, and furnish all that may have been necessary for the completion of the work, particularly a statement of the dimensions of the Deep Cut, plan and specification for each Waste weir, the number of cubic feet of water passing over each, the rate of current permile which will be created in the Deep Cut, and throughout the whole Canal, the height that the

Locks were intended to be raised above the water level, with a view to 9 feet 6 inches water, with any other information which he may be in possession of, necessary for the work of the Canal.

Mr. Merritt stated that Mr. Rykert had requested him to make an offer of his services to the Company as Engineer, at a Calary of £250 per annum, which the Board declined.

Resolved. That immediate application be made for the Loan of £25,000 advanced by the Government, and that the President apply the same from time to time as may be necessary.

A Letter from Mr. Proctor, the Agent at New York being read, requesting the Company to advance him the snm of £1250 upon the security of 500 Shares of Canal Stock.

It was Ordered, That Mr. Proctor he informed that the Board are unable to comply with his request, as they consider it would be perfectly inconsistent with the objects and intention for which the Company was incorpore ad.

Resolved—That Mr. Wenham be employed as Secretary at a salary of £100 per annum.

JOHN H. DUNN,

President.

At a Meeting of the Directors held at St. Catharines, on Thursday May 4th, 1826.

PRESENT :

The Hon. John H. Dunn, President,
William Allan, Vice-President,
John B. Robinson,
John Clark,
William H. Merritt, and
George Keefer, Esquires.

The minutes of the former meeting were read and confirmed.

Mr. Merritt informed the Board that he had been requested by Mr. Rykert to make an application that he might be employed by the Company.

Upon which it was resolved—That Mr. Rykert be offered an engagement at the rate of £15 per month until Mr. Barrett the resident Engineer comes in, when it shall be left to Mr. Barrett's choice either to continue Mr. Rykert or employ any other person he may select at the same rate, and as it appears from the Agent's account that Mr. Thomas the superintending Engineer may require some immediate assistance,—it is agreed that should Mr. Rykert decline the above offer Mr. Thomas shall be authorised to procure whatever help he may find necessary until next meeting of the Board.

A letter from Major Hillier, Secretary to His Excellency the Lieutenant Governor, being read, requesting to know from the Board whether Mr. Clowes, lately employed as Engineer on the line of the Canal was in their opinion competent to undertake the Survey of the River St. Lawrence with a view to its improvement by canal or otherwise.

It was Resolved. That the Company employed Mr. Clowes on laying out the Line of the Canal and making an Estimate of the expense—that not feeling

83

it proper to rest solely upon his judgement and accuracy they employed other Engineers reported to them to be men of considerable eminence in Works of that description, and they found the correctness of Mr Clowes' proceeding in general verified by such subsequent Surveys—that the Directors were induced to discontinue their employment of Mr. Clowes from an opinion that he was not suffisiently active to superintend the execution in detail.

That the Survey alluded to in Major Hillier's Letter appearing to be one of a very important nature, and probably requiring different qualifications, the Directors will not venture to assert that Mr. Clowes is perfectly competent to discharge the duty in such a manner and in all respects as the Government may require.

Ordered, That the foregoing Resolutions be communicated to Major Hillier in reply.

Resolved, That all Drafts which may in future be drawn on the Agents for moneys, received on account of the Company, shall be at 30 days sight, and the Commission allowed on the moneys collected at Quebec and Montreal be 1½ per cent.

JOHN H. DUNN,

President.

At a meeting of the Directors held at York on Thursday, June 8th, 1826.

#### PRESENT:

The Hon. John H. Dunn, President, The Hon. Wm. Allan, Vice-President, John B. Robinson, and Wm. H. Merritt, Esquires.

The minutes of the former meeting were read and confirmed.

A letter from Messrs. Yates & M'Intyre, dated 19th May, being read, expressing their dissatisfaction with many of the proceedings of the Company, it was Resolved,

1st. That the Board have on all important occations consulted the wishes of the Stockholders at New York, more especially in regard to the plans and operations of the present year, and have hitherto received from them every assurance of approbation.

- 2d. That as that part of their letter which refers to the inconvenience sustained in consequence of having to furnish so large a sum of money to make good Mr. Proctor's defalcation, appears to be written under a wrong impression of the terms on which the advance was made; they be informed that the Company always considered themselves responsible for the amount thus pid, and that it would be acknowledged as payments on account of future instalments.
- 3d. That the thanks of the Directors are due to them for the handsome manner in which they came forward for the honor and credit of the Company.

4th. That as there is not any certain prospect of Mr. Proctor's making good his payments, the Board feel it necessary on hehalf of the Company to compel the payments, whatever may be the consequences, unless the Stockholders at whose instance he was appointed, are willing to assume the

whole responsibility on his behalf, and that as Messrs. Yates & M'Intyre are acquainted with all the circumstances, they be requested to have immediate communication with Mr. Proctor, and adopt legal measures for the recovery of the amount now due.

5th. That it is necessary for the satisfaction of the Board as well as the general success of the undertaking, that the sentiments expressed in this letter should not be allowed to remain, and that a letter be therefore written, giving a full statement of the above particulars, the Directors feeling assured that such explanation will effectually remove them.

The Board then taking into their consideration the situation of Mr. Proctor's affairs, and the future inconvenience likely to arise from such a line of conduct, feel it necessary to discontinue his agency.

It is, therefore, Resolved, That Mr. Proctor be thus informed and directed neither to receive any monies or give any receipts for the future in the name of the Welland Canal Company, and that Messrs. Yates & M'Intyre be requested to become the Agents at New York, and state, for the information of the Directors on what terms they will transact the general business of the Company.

Mr. Merritt stated that Messrs. Thomas & Barrett recommended an alteration in the present line of the Canal at Hall Davis', the expense of which they estimated at £375.

When it was Ordered, That Mr. Thomas give in a report of the proposed alteration in writing, stating his reasons for it, and if the expense will not exceed that sum it may be done on his recommendation and responsibility.

They also suggested that it would be an improvement if the canal were carried forward at Shaver's in

a direct line instead of making a curve.

Upon which it was agreed that the adventages and expediency of this alteration shall be left for them to decide upon and adopt if they see proper.

Mr. Merritt then said that he was requested by the contractors to state that it would afford them great accommodation if the amount of duties payable on grain and implements brought from the United States could be allowed to stand over, which might perhaps be obtained if the Company would assume a responsibility on their behalf for the future payment.

responsibility on their behalf for the future payment.
When it was Resolved, That the Directors are willing to afford them this accommodation, and upon the agent drawing up a statement of what they desire, an application be made to His Excellency praying the proposed indulgence.

Read a letter from Mr. Wood complaining of the injury he will sustain in consequence of the canal passing through his land.

Upon which it was Resolved, That Mr. Wood be informed that when he names the price he is willing to take as a compensation the Board will consider and reply to it.

Read a letter from Mr. Adams desiring compensation for loss sustained by the construction of the canal, and offering his mill, machinery; &c. for £1,250

When it was Resolved, That Mr. Adams be the formed that the Directors have received his letter, but do not feel they can accede to the sum he has named before submitting it to arbitration.

The Board taking into their consideration that many applications of this sort are likely to be made, Resolve, that the agent be directed to obtain from all persons possessing property along the line of the canal a statement in writing of the compensation either for property or damages which they would be willing to accept, and that having made enquiry and informed himself as satisfactorily as possible on the subject he shall submit the same without delay to the Board, with his remarks upon the several claims, when they will take the necessary measures thereon.

Resolved, That an instalment of 8 per cent be called for, payable on the 20th July, and that the several agents of the Company, be written to directing them to adopt the usual means for its collection.

JOHN H. DUNN.

President.

FRIDAY, Inne 9.

The Board having met pursuant to adjournment. PRESSNT:

The Hon. John H. Dunn, President.

"William Allan, Vice President, & William H. Merritt, Esquire.

The draft of a letter to Messrs. Yates and McIntyre, agreeably to the resolutions of yesterday, was read and approved.

The Engineer having in his estimate recommended the advance of £50 to Messrs. Pearse & Co., Resolved, That the sum be granted accordingly.

Resolved, That the President do apply for the remainder of the Government loan in payment of certain disbursements.

Resolved, That the sum of £100 be advanced to the agent for three months on account of incidental expenses to which he is liable.

Resolved, That Mr. Rykert be employed until the next Meeting at a Salary of £15 per month.

> JOHN H. DUNN. President.

Significant Company of the File At a Meeting of the Directors held at York on THURSDAY, June 22 1826.

PRESENT.

The Hon. John H. Dunn, Fresident.

William Allan, Vice President.

John B. Robinson,

John Clark, George Keefer, and William H. Merritt, Esquires.

The Board having met and Mr. Yates of New York being present, stated that as he was deeply interested in the success of the Canal he requested permission to prepare some measures for the consideration of the Directors which he thought would at once raise the character of the Stock now unsold. and provide means for carrying on the Work until it was disposed of.

Which were the following, viz:

1st. That some steps should be taken either for the immediate disposal of the Stock reserved for the London Market or the recall of the powers vested in Mr. McGillivray for that purpose in order that it might be offered here.

2d. That in the mean time the Board should authorize him to raise a Loan of Twenty five or Thirty Thousand Pounds, so that the pressure of Stock might be withdrawn from the Market, and the Canal still proceed with activity towards com-

3rd. That it would much increase the value of the Canal in the public estimation if it were possible to obtain a Grant of the Lands in Wainfleet which has been already promised conditionally: this would also much facilitate the means of raising any sum of money that might be wanted, as well as create much confidence in the undertaking.

Whereupon the Board came to the following Resolutions, viz.

1st. That a Letter should be written to Mr. McGillivray desiring him, should the Stock which has been reserved for the London Market and entrusted to his maragement for that purpose, still remain unsubscribed, he shall continue the offer of it for 14 days longer only after the eccipt of the Letter, and if not subscribed in that time it shall be returned to the Company that it may be disposed of without fail as they shall direct.

2nd. That in order to prosecute the Work with advantage it is highly important that Funds be secured so as to meet the payments to the Contractors as they become due, with certainty. Mr. Yates is therefore authorised to procure a Loan of thirty or forty thousand pounds, on the security of the Canal, upon the best terms in his power.

3rd. That it will conduce very much to the general welfare of the Canal as well as afford better security to any persons who may he willing to advance the said Loan, if a Grant of the Lands in Wainfleet were procured to the Company: the President is therefore requested to make application to the Government for a Deed of them.

Mr. Yates said that the question had been started how far American Vessels could be legally allowed to pass through the Canal, and being one of importance he wished to submit it to their consideration.

Upon which the Board Resolve, That they will give immediate attention to the subject and adopt some measures for obtaining an Act from the Imperial Parliament if it shall appear necessary, to allow the passage of American Vessels transporting Merchandize on the same terms as British, and that the matter be fully discussed at the next Meeting.

Read a Letter from Mr. William Micklejohn Jun. with Proposals for cutting the Canal through the Cranberry Marsh, accompanied by Profiles and Estimates.

When it was *Resolved*, That Mr. Micklejohn be informed, that the Board are much pleased with his Statement and Plans; but that it is not probable the Work will be commenced sooner than will afford him time to make himself thoroughly acquainted with the nature of it. Public notice will be given when the

Directors are ready to accept Proposals for it, and they will be very happy to receive his.

It appearing upon the statement of Mr. Merritt that the sum of £535 17s. 2d. was omitted in the last Estimate, for Messrs. Smith, Ward & Co. It was agreed that the amount shall be paid to them now and included in the Estimate of the ensuing month.

JOHN H. DUNN,

President.

At a Meeting of the Directors, held at the Deep Cut,

WEDNESDAY, July 4, 1826.

PRESENT :

The Hon. John H. Dunn, President.

- William Allan, Vice President.
- " John B. Robinson,

John Clark,

Keorge Keefer, and

William H. Merritt, Esquires.

The Minutes of the former Meeting were read and confirmed.

Read a Letter from Messrs. Irvine, McNaught & Co. of Quebec, dated June 24th, resigning their Agency. When the Vice President stating that he would write to Mr. Willi Walker of Quebec, and request him to undertake the business of the Company, It was Ordered, that in the event of Mr. Walker accepting the appointment he be authorised to receive the Accounts, Papers &c., from Messrs. Irvine & Co.

Read a Letter from Henr. J. Boulton, Esq. dated London, May 3rd.

Mr. Thomas' Report on the Canal, &c. was read and approved.

Resolved, That a further Instalment of 8 per cent be called in, payable on the 22nd of August.

JOHN H. DUNN,

President.

# THURSDAY MORNING.

The Board having met,

The Engineer's Estimate for the past month amounting to £4958 3s. 8d. was submitted, approved and ordered to be paid.

Read a Letter from Messrs. Pearse & Co. expressing their inability to perform their Contract, on Sections No. 31 and 32.

Whereupon it was Resolved, That those Sections shall be re-let on the 17th Inst., to the persons offering to take them at the best rate, and that Messrs. Clark, Keefer and Merritt, with the resident Engineer, be requested to meet at St. Catharines on that day to receive the Proposals and enter into Contract for the same.

JOHN H. DUNN, President. At a Meeting of the Directors held at York, Thursday, August 1826.

#### PRESENT:

The Hon, John H. Dunn, President.
"William Allan Vice President.

John Clark, and

William H. Merritt, Esquires.

It appearing by the 7th clause of the last amended Act that the compensation to be allowed for loss or injury said to be sustained by various persons in the construction of the Canal, must be determined by Arbitration, on or before the 1st Scptember next. It was Resolved 1st, That the following gentlemen be selected as Arbitrators on behalf of the Company, and that as many as are necessary be requested to attend at St. Catharines on Tuesday the 22nd Inst., viz:—

John Wilson,
James B. Macaulay,
Samuel Street,
Smith Griffin,
John Warren,
Crowell Wilson,
Hugh Wilson,
James Black,
Robert Nelles,
Henry Nelles,
James Macklem,
Thomas McCormick,

Samuel P. Jarvis,
Edward McBride,
Samuel Beckett,
Grant Powell,
Thaddeus Davis,
James Fitzgibbon,
Alex. Hamilton,
Matthew Crooks,
William Thompson,
Samuel Leonard,
William Chisholm,
Alexander Wood.

Resolved—That the following method be adopted in settling the said claims.

- 1st. The agent shall obtain from all those persons who agree to submit the discussion of their claims to the arbitrators appointed to meet on the 22nd instant, their consent in writing to abide by such decision.
- 21 d. He shall make application to those who intend to refer their claims to arbitrators as provided in the Act, and procure from them the person whom they shall select by name and designate in writing when he shall in like manner appoint one on behalf of the Company.
- 3rd. Should any persons wish to defer making their demand until the Canal is completed, he shall obtain from them their written consent to await and abide by such decision.

Read a letter from Messrs. Pearse & Co., stating their inability to proceed with their work on sections No. 26, 27, 28, 29, and 30, at their contract prices and offering to do it at other rates or desiring to give up the job.

When it was Resolved—That those sections shall be re-let, and the Agent give notice that the Directors will be ready to receive proposals at their next meeting at Sc. Catharines on Wednesday the of September.

Resolved—That Mr. Macaulay be engaged as Solicitor for the benefit of the Company in the ensuing arbitrators.

The Engineer's Estimate for the past month amounting to £6201 19s. 10d. was submitted, approved, and ordered to be paid.

JOHN H. DUNN.

President.

At a Meeting of the Directors held at Niagara, Saturday, September 2nd, 1826.

PRESENT:

The Hon. John H. Dunn; President,
"William Allan, Vice-President,
John B. Robinson,
William H. Merritt,
John Clark, and

George Keeler, Esquires.

The minutes of the former meetings were read and confirmed.

Read Mr. Gult's letter to Dr. Strachen, and Dr. Strachen's to the President, dated London, 16th June, and

Resolved 1st.—That an Instrument her prepared under seal of the Company appointing the five gentlemen, named by Mr. Galt, a committee to solicit subscriptions and demand payment of instalments upon £100,000, the Stock remaining to be subscribed, and that the committee be authorised to pay the monies received by them into the hands of Messrs. Bosunquet, Pitt & Co., and to appoint Mr. Galt if he will accept of it, and if he will not, any other gentleman whom the Committee may deem eligible, agent to the Company, to act under the direction of the Committee in London, and to whom such remuneration will be made for agency as is given to the agents of the Company in New York, unless upon future application to the Company it shall appear reasonable to make an additional allowance.

2nd.—That this Instrument be immediately despatched to London under cover to Mr. Bosauquet, and accompanied by the s veral reports of the Engineer on the progress of the work and general information as to the state of the undertaking.

3rd,-That the Stockholders in New York be immediately informed of the above measures taken by the Company, and that Mr. Yutes be authorised by a letter from the President to negotiate a loan for \$50,000 or \$100,000 if necessary, upon the Company's bond and upon further security on the grant of land in Wainfleet on the suppositions that the Company will have it in their power to offer that security by the time it can be ascertained by Mr. Yutes whether he can succeed in effecting the loan. That Mr. Yates be also informed that on the suppositionthat the New York Stockholders may find it more convenient, and deem it more advisable to dispose immediately of £25,000 of Stock, the Company have in their communication with the Committee in London apprised them of their having authorised the New York Stockholders to do so, and that the Stock must consequently be subscribed in London subject to a proportionate abatement if such an amount of Stock shall be disposed of in New York. But it is to be understood that as it, would be the object of this arrangement to produce the immediate advance of £25,000, if that amount of Stock shall be no weatheried in the United States it must be on the condition that the whole amount of the shares is to be paid up within four mouths from the time of subscription.

It appearing that several Stockholders have neglected to pay up, their instalments as they become due, and that the arrears in some instances have accumulated so that the two last remain unpaid.

Resolved-That the several agents of the Company be directed to apprise all Stockholders who

have made default in paying up their instalments, that unless the arrearages are paid in by the 10th of October next, the provision of the law for iorfeiting their shares will upon that day be certainly put in force, and directing them on such day to give 30 days notice according to the act and expose them to sale, but should any defaulter tender his payment before the day of sale they may receive it.

Read a Resolution from the majority of the arbitrators engaged in the late arbitration, recommending a personal allowance of £1 per day for their services, when it was Resolved, That that sum be paid to those gentlemen who were engaged on behalf of the Company.

Resolved, That a further instalment of 8 per cent be called in payable on the 20th of October.

JOHN H. DUNN,

President.

At a meeting of the Directors held at York on Thursday, September 7th, 1826.

PRESENT: ALTERIAL TO THE SECTION OF

The Hon. John H. Dunn, Pressdent,
The Hon. Wm. Allan, Vice-President, and
W. H. Merritt, Esquire.

The Engineer's estimate for the past month amounting to £4945, 4s. Sd., and the following accounts, were approved and ordered to be paid, viz:

£64 2 11 m

On account of the very important services rendered by Mr. Macaulay, as the Company's Solicitor in the late arbitration, and his being obliged in performing those duties to neglect other professional engagements.

Ii was Resolved, That he be allowed three guineas per day for the same.

The accounts for the expenses of the arbitrators.

The accounts for the expenses of the arbitrators being submitted to the Board, and it appearing that many of the charges are very excessive.

It was Resolved, That Mr. Merritt and Mr. Samuel P. Jarvis be requested to examine them.

The proposals for sections Nos. 26, 27, 28, 29, & 30, were deferred until the next meeting in order to receive Mr. Burrett's report on them.

The agent having stated that the following sums had been paid by the contractors for duties on articles necessarily imported from the United States:

It was Resolved, That the Board will consent to advance them the several amounts until the application to the Government is made agreeably to the resolution of the Sth June last, upon receiving their note of hand for the same payable in six moths after date, and the following sums were ordered to be according paid in, viz:

The Secretary's letter to Mr. Bosanquet was read and approved.

JOHN H. DUNN,

President.

At a meeting of the Directors held at York, Friday, October 6th, 1826.

#### PRESENT :

The Hon. John H. Dunn. President,

"William Allan, Vice President,
John B. Robinson,
George Keefer,
Henry J. Boulton,
William H. Merritt, Esquires.

The minutes of the former meeting were then read and confirmed.

Read a letter written by the President to Mr. Bosanquet in pursuance of a resolution of the 2nd September, which being approved of and sanctioned by the Board, was ordered to be entered accordingly.

Also a letter from Mr. Adams requesting that his claim for injury sustained by the construction of the canal might be considered and settled by the Board — When it was Resolved—That as he declined submitting the same to arbitration in the regular way and has not made any specific proposal, the consideration of it must be deferred until the Directors meet at St. Catharines, when he will have an opportunity of attending personally and the Board he better able from personal inspection to judge of the value of his property and the loss he has sustained.

Some persons having refused to accept the sum awarded to them—It was Resolved—That the agent be furnished with £75 in specie and make them a legal tender of the amount.

The Engineer's estimate for the past month, amounting to £5624 2s. 3d., was submitted and ordered to be paid, also six months interest on the 1st instalment of the loan from Government—£5000—amounting to £150.

Mr. Boulton having adverted to a passage in a letter from Simon McGillivray, Esq., to the President, now before the Board, in which he describes the draft of a report taken down by Mr. Boulton to Montreal as his own version of a report that had been previously submitted to the Board, appearing to represent it as one unauthorised, and having called upon the Board as an act of justice to himself to state.

1st. In what manner he (Mr. Boulton) was authorised to prepare or revise the report so that it should conform in principle to the draft read at the meeting at St. Catharines.

2nd. By what particular act of the Board Mr. McGillivray was authorised to frame the report subsequently published under his direction and to state in it that he (Mr. McGillivray) had been associated with Mr. Boulton in the agency in England.

It was stated by the President-That having been called to Montreal in the latter end of the month of December, 1825, he took this opportunity of seeing Mr. McGillivray on the subject of a report of the Welland Canal, which he left with him in September, for the purpose of receiving the sanction of the Board of Directors at St. Catharines, he (the President) being called to New York. Mr. McGillivray stated that as the Report was intended for the information of the persons in London, it was necessary that the Report should be amended agreeable to his ideas, and inserted his own name, which Mr. McGillivray thought important, and to which he (the President) agreed, and Mr. McGillivray submitted certain alterations in which he acquiesced upon the ground that as Mr. McGillivray was best able to judge of such matters rather than himself and that every confidence had always been repored in himand that it was most expedient for many reasons that some Report should be made by the Directors more particularly at that moment, as there was an application pending in the Legislature for a loan of money.

And it was also stated by Mr. Merritt and Mr. Keefer, that there were not any minutes entered in the proceedings of the Board respecting the said report, but it was understood in conversation at the Board that Mr. Boulton should consult with the Hon. Doctor Strachan and the Attorney General, and revise the Report, when it was to be taken to Montreal and receive the sanction of Mr. McGillivray and Mr. Irvine, and then be printed.

Mr. Boulton also adverted to a passage in Mr. McGillivray's letter of the 14th October, to the President and Vice President, and in a letter of Mr. McCillivray to Mr. Irvine, in which he conceives it to be insinuated that the meeting at which it was Resolved that he (Mr. Boulton) should proceed to England as the Company's Agent, was a casual and not a regular meeting-that matters resolved upon then required confirmation at a subsequent and regular meeting, and that accordingly although many important matters were decided upon at the same meeting, besides the particular measure which regarded Mr. Boulton, there were in fact matters which had been previously discussed and virtually decided upon, which rendered subsequent confirmation unnecessary, and Mr. Boulton referring to the two Directors present who formed part of the Board at St. Catharines on the 20th September, desired to know how far these representations are confirmed by their knowledge of the facts.

They, viz: Mr. Keefer and Mr. Merritt, stated that the matters discussed at the meeting of the Board in September were generally new; it had never been the practice of the Board to lay over or wait for carrying into effect any measure for the sanction of a subsequent Board: the measure or minute respecting the mission of Mr. Boulton was proposed on Friday, the day after the other business was transacted; but they considered it a regular meeting, it was sanctioned as such on the same day. The minute referred to expressed a confirmation at another meeting respecting Mr. Boulton's Instructions.

At the same time they had (as it was understood by our general conversation at the time) no doubt but the business would be arranged in Montreal by Mr. McGillivray, Mr. Irvine, and himself, although Mr. McGillivray mentioned that Mr. Boulton should not come down as early as he proposed.

At a Meeting of the Directors held at the Deep Cut, FRIDAY, Oct. 27., 1826.

PRESENT

The Hon. William Allan, Vice President, John B. Robinson, John Clark, Henry J. Boulton, George Keefer, & William H. Merritt, Esquires.

The minutes of the last meeting were read and confirmed.

Mr. Yates of New York being present:

A letter from Mr. Davis, Agent at Montreal (dated 12th inst.) to the Sccretary, and his answer, being read, it was Resolved. That the Directors having ascertained that it is by no means the opinion of those stockholders who have made much greater advances with punctuality, that any forbearance should be shewn from apprehension of injury to their interests by advertising the stock of defaulters for sale, and the directors seeing no other reason for hesitation: The resolution of the 2nd September, which has been communicated to the several agents, shall be carried into effect, and the shares of all persons who shall be defaulters on the 10th day of November next shall on that day be advertised for sale at auction in the town of York on Wednesday the 20th day of December next.

Mr. Yates having stated to the Board that if the resolution of the 2nd September authorising him to dispose of £25,000 stock on condition of the subscribers paying up the whole amount in four payments of 25 per cent each, was so far altered as to admit new subscribers on the same footing as the present stobkholders, it would in all probability enable him to succeed in the object contemplated, which as yet he has not been able to attain in consequence of

that restriction-it was therefore

Resolved, That the Agents of the Company in New York be authorised to receive subscriptions to the capital stock to the amount of £25,000 upon condition of the subscribers paying £25 per cent at the time of subscribing, and £15 per cent per month if required by the Directors until their subscriptions shall be upon a par with those of former subscribers.

Ordered, That a copy of the above Resolution be furnished to Mr. Yates, under the seal of the

Company.

As the operations of the present season are now drawing to a close it is considered expedient both for the information of the stockholders and to increase the general interest in the work, to give some detailed account of the progress already made, and of the future prospects of the undertaking, wherefore it is Resolved, That as soon as the Agent can furnish the necessary information a meeting shall be held in York for the purpose of appointing a Committee to prepare a General Report on the state of the Canal.

Mr. Yates, the principal Stockholder from New York, having attended at the meeting of the Board,

and having recently inspected the whole line of the Canal, and thus enabled himself to judge most satisfactorily of the opinion of the Board—the Directors have the more pleasure in expressing on this occasion their full and decided approbation of the conduct of the Agent, Mr. Merritt, upon whose intelligence and exertions the success of the work has so much depended, and whose attentions have been most unremitting—they feel also much pleasure in declaring their entire satisfaction with the proceedings of the contractors and the engineers employed in the work, and that up to this period they have every reason to repose confidence in their performing their several engagements to the satisfaction of the Company.

Saturday Morning.

The directors having met

Mr. Adams attended for the purpose of stating his reasons why he had objected to refer his claim for loss and injury sustained by the construction of the Canal to arbitration, and of submitting to the Board a statement of the compensation which he considered himself entitled to receive. When the Directors having taken the same into their consideration—

Resolved, That Mr. Adams be offered £600 in compensation for all land necessarily occupied, and all damages done to him by the Company, including mills, privileges, and improvements of every description—Mr. Adams to be at liberty to remove from his mill and erections of every kind such machinery and other fixtures as he may desire.

The above offer being made personally to Mr. Adams, he agreed to accept it—and the said sum of £600 was ordered to be paid on his compliance with the necessary forms and conditions.

JOHN H. DUNN,

President.

At a Meeting of the Directors, held at York

November 14, 1826.

PRESENT:

The Hon. John H. Dunn, President.
"William Allan, Vice President.
John B. Robinson, and

Henry J. Boulton, Esquires.

The Agent having furnished the necessary information Mr. Robinson and Mr. Boulton were requested, and agreed to prepare a Report on the operation and state of the Canal, for the information of the Stockholders and the public.

It appearing that the following persons, viz.

Andrew Mercer, Saml. Ridout, Henry Drean, Henry Read, Simon McGillivray, Maitland, Garden & Co. Robert Walson, Beckett & Co. James Crooks, and Thomas Elliott.

have been defaulters in the payment of their instal, ments for a considerable time, and have not expressed any intention of paying up their arrears—It was Resolved, That their Shares be forfeited agreeable to the 24th clause of the Act of Incorporation, which provides for the same, and that the Stock be advertised for sale at Public Auction on the 20th December.

Resolved, That a further Instalment be called in payable on the 20th December.

JOHN H. DUNN,

President.

At a Meeting of the Directors, held at Mr. Robinson's Office, on

Tuesday, November 28, 1826.

#### PRESENT:

The Hon. John H. Dunn, President.
William Allan, Vice President.

John B. Robinson, and Henry J. Boulton, Esquires.

Rend a Letter from Mr. Yates, dated 14th Novr., when it was

Resolved. That as the Directors have relied upon the Funds to be received from New York they advise drawing in some shape, but in order to afford them all the relief possible the Agent to be instructed to make arrangements with Messrs. Ward & Co. for the payment of the amount which may be due to them, by a Draft on Messrs. Yates & McIntyre at 90 days sight, and that Messrs. Yates, & Co. be informed to this effect, and also that if at the expiration of that time they should not be able to meet the amount, the Directors will place them in Funds by requiring from Messrs. Ward & Co. the repayment of a Loan of £3000, which is now due, but would otherwise be continued on account of the different nature of their engagement.

JOHN H. DUNN,

President.

At a Meeting of the Directors, held on Saturday, December 16, 1826.

#### PRESENT:

The Hon. John H. Dunn, President. Wm. Allan, Vice President.

John B. Robinson. John Clark, and

Henry J. Boulton, Esquires.

Ordered, That a General Meeting of the Board be held on Wednesday the 27th instant, and that Mr. Merritt he requested to bring with him every information respecting the future expenditure of the Company for the winter, viz. until the 1st of April, and how much it will require to carry on the Work from the 1st April to the 1st August, estimating the lowest rate at which it can be done, so that the Work may proceed.

Ordered, That Mr. Thomas be requested to attend the Meeting of the Board if possible, if not, to come as soon as he can.

> JOHN H. DUNN, President.

At a Meeting of the Directors, held in the Directors' licom of the Bank, Tuesday Decr. 12, 1826.

The Minutes of the last Meeting were read, and confirmed.

The Report drawn up by Mr. Robinson and Mr. Boulton, pursuant to the Resolution of the 14th November, was finally read and approved, and 500 copies ordered to be printed.

Read a Letter from Mr. Adams and Resolved, That the sum of £600 be sent to Mr. Merritt requesting him to settle with him agreeable to the Resolution of the 27th October last, and Mr. Adams to be informed that if he is desirous of obtaining any Mill Seat or other privilege from the Company, that the Board are ready to receive his proposals.

JOHN H. DUNN,

President.

At a Meeting of the Directors, held on Monday Decr. 18, 1826.

#### PRESENT:

The Hon. John H. Dunn, President.
"William Allan, Vive President.
John B. Robinson, and
Henry J. Boulton, Esquires.

The Estimate for the last month, amounting to £4830 7s. 9d. was approved and ordered to be paid.

Resolved, That a further Instalment of 8 per cent be called in, payable on the 29th January.

The Stock of the following persons, Defaulters in the payment of their Instalments, was ordered to be sold by Auction on Wednesday next, the 20th inst., due notice having been given, agreeable to the Act, viz:—

Andrew Mercer,	4 Shares.	
Samuel Ridout,		
Henry Drean,	5	60
Thomas Elliott,	6	14
Henry Read	5	14
Simon McGillivray,	122	16
Maitland, & Co	50	
Robert Watson,	- 5	1000
Beckett, & Co	5	11
James Crocks,	20	44
	996	•
	-226.	e de la figur

JOHN H. DUNN, President.

At a Meeting of the Directors, held on Thursday Decr. 21, 1026.

#### PRESENT:

The Hon. John H. Dunn, President.
"William Allun, Vice President.
John B. Robinson,
John Clark,

Henry J. Boulton, and J. B. Yates, Esquires.

Read Major Hillier's Letter, inclosing Despatch from Lord Bathurst.

Resolved, That Mr. Robinson and Mr. Boulton be requested to prepare an Answer to the Government in reply to the Communication.

Resolved, That (permission being first obtained) Lord Bathurst's Letter be added to the present Report.

Resolved, That application be made to to the several branches of the Legislature for an Act agreeable to the conditions contained in the said Desputch.

JOHN H. DUNN,

President.

At a Meeting of the Directors held at the Committee Room belonging to the Legislative Council, Decr. 28, 1826.

#### PRESENT:

The Hon. John H. Dunn, President.
William Allan, Vice President.
John Clark,

Henry J. Boulton, W. H. Merritt, George Keefer, Esquires, and Mr. Yates.

Mr. Boulton having drawn up a Petition for several amendments to the present Act of Incorporation, It was read and approved, and ordered to be presented to the different branches of the Legislature.

JOHN H. DUNN,

President.

# No. 3.

# REPORT

Of the President and Directors of the Welland Canal Company to the Stockholders, published by order of the Board, York, U. C.

[Printed by R. Stanton, 1826.]

The President and Directors of the Welland Canal Company in submitting to the stockholders a report of the progress of the work under their superintendence, do not deem it necessary to enter into an exposition of the causes which led to the undertaking or the advantages expected from its completion, these have been already in various shapes before the public, & their desire is now to afford spch general information in regard to the actual state of the canal and the affairs of the Company as the stockholders will naturally require, and the public by whose countenance it has been materially aided have a right to expect.

To enable themselves to judge more satisfactorily the Directors have frequently inspected the whole line of the canal and in addition to such remarks as it oscurs to them to offer they have subjoined the last report of Mr. Thomas, the principal Engineer who has had so much experience in similar operations; and this report as it proceeds from a gentleman of established character for integrity, judgment and science, can scarcely fail to be received as a document entitled to the fullest credit.

The present Directors were chosen in April last. when great preparations had already been made for conducting the work during the scason which had then commenced; it was consequently left to them cither to prosecute the undertaking with the utmost vigor, which the means within their reach would admit of, or by contracting the intended scale of operations to disappoint public expectation, and increase the apprehensions of all who had appeared to doubt of the completion of the Canal -Such a course would also have brought upon the contractors the perplexity and confusion which must have followed such a step after they had prepared to proceed with disputch; and upon the Company the disadvantages not easily estimated of pursuing the least economical method for carrying so great an undertaking to its completion.

Whether the event shall prove that they have done right or wrong, they did not hesitate in their decision; and although the measures they have adopted in consequence have been attended with no little responsibility, and presented serious difficulties they have persevered to this point and they are happy to think successfully, without restraining the exertions of the contractors, from giving way to doubts either as to results, or as to the possibility of finding means to meet so rapid and considerable an expenditure. The Directors are confident, that if resources are at hand to resume the work, during the next season in the same spirit it will at the conclusion, be apparent to the Company that economy has been best consulted by the extraordinary exertion which has completed so large a portion within the present

After the public discussions which have taken place relative to the affairs and proceedings of the Company, it is to be presumed that it must be generally known to the stockholders and to others, that of the £200,000, the amount of stock authorised to be held by the Welland Canal Company, only one half, or £10,000, was actually subscribed when the Legislature in their last session authorised the advance by way of loan of £25,000 in aid of the undertaking. The case is the same at present.—When it was determined upon the suggestion of the principal stockholders that a canal upon an enlarged scale so as to admit of navigation by schooners, would be much to be preferred both on the ground of utility to the public, and profit to the Company, the Legislature was necessarily applied to for authority to increase the amount of stock in order to meet the great additional cost.

The design appeared to have been approved of in every quarter, and as soon as the requisite authority was obtained those who had then the direction of the Company's affairs were easier to pursue with the least possible delay an undertaking which had now acquired so great additional interest and importance. It having been thought expedient to increase the number of Directors, Mr. Sinnon McGillivray, and Mr. Irvine were added by act of the Legislature to those who had been chosen for the year then current.—Mr. McGillivray was at that time in this Province and had the opportunity of consulting with the other members of the Board; the stockholders resident in New York had communicated their opinious very freely in regard to the interests of the Company, and with a liberality of conduct which

 ${f U}3$ 

has marked their proceedings in every step, had expressed their entire confidence in the propriety of whatever measures should be resolved upon. There cannot therefore be the slightest reason to question that the resolution which was then taken immediately after the act had passed, enlarging the stock and materially changing the character of the undertaking was one which appeared to the Directors to promise the most substantial benefits in every point of view.

It was thought that the practicability of connecting our great inland waters by a most convenient navigation, and at a cost, moderate indeed, when compared to the object, could be demonstated to the entire satisfaction of our fellow subjects in England: and it was considered little doubtful that when the project could be made plainly to appear a safe, and rational one, the same abundance of capital and spirit of enterprise which were at that time leading to the formation of companies for objects comparatively visionary, and of which many regarded improve-ments in foreign countries, could be easily enlisted to the small extent required in aid of one of the greatest and most useful undertakings of modern times .-Indulging this hope, it was resolved to throw open no more than one hundred thousand pounds for subscription in these Provinces and the United States, and to reserve the remaining £100,000 to be subscribed in London.-It was believed through the intervention of gentlemen who had commercial connexions and acquaintances in London, the project of the Welland Canal could be so favorably introduced as to meet that confidence which it was known to be entitled to here; that the small sum required would be immediately taken up, if the application were at all successful, was at least as probable, and it cannot be a matter of surprise that the Directors should feel a strong desire to associate British Capitalists in this Provincial undertaking and thus make it the means of attracting the attention of persons who would have it so much in their power to promote the commercial interests of Upper Canada

Under these impressions it must be presumed, the Directors acted in April, 1825, when they made this reservation of stock, and in pursuance of their plans the President was instructed when he repaired to New York, in order to confer with the Stockholders resident there, and to procure additional subscriptions not to accept of a greater amount of stock than £50,000, which it was presumed would, in addition to that which had been and might be subscribed in the British Provinces, make up £100,000. So far from meeting with difficulty in procuring the limited amount, the President was induced by the readiness exhibited, to extend the subscription to £75,000 which was instantly taken up, and he returned with the impression that if the whole had been thrown open it would have been subscribed with equal facility. The reference to England, however, had been finally resolved upon, and it was necessary to await

The Directors of the Company for that year now commenced their work with spirit, they found a large amount of stock already subscribed, and they saw a confidence in the undertaking exhibited, which left no room to doubt that the remainder would have been taken in America, if it had not been designedly reserved. They may be supposed also to have ex-

pected confidently, that before the progress of the work required it they would hear of £100,000 being subscribed in England, and having this double assurance of being in a condition to meet their engagements, they entered into contracts for the completion of the Canal from the River Welland to Lake Ontario, for a sum exceeding by almost one third the amount of stock which was actually taken up.

This portion of the Canal, it must be observed, embraces the only serious difficulties which have been apprehended as likely to present themselves—namely, the harbor on Lake Ontario, the descent of the mountain which includes some rock excavation, and the deep cutting which through a distance of nearly a mile and three quarters, averages a depth of excavation of 44 feet.

When completed it will afford a perfect communication with Lake Eric, by the descent of the Welland to the Niagara River, and for this reason as well as from the desire to shew the practicability of the whole design as speedily as possible, by encountering at once the only difficulties to be dreaded—it was thought clearly expedient to devote the whole of the present means of the Company to the completion of that section, leaving the other to be undertaken so soon as the remaining funds should become available.

As the present Directors have adopted and persevered in the course which their predecessors had begun, it may be permitted them to say something, if it be necessary, in vindication of the resolution to proceed with the work, while so great a proportion of the stock remained unsubscribed. Besides the expectation (amounting under existing circumstances to almost a moral certainty of the remaining stock being speedily filled up; it is, in the first place to be borne in mind, that had the stock at once been all taken, it would have been competent to the Directors, and they would doubtless have deemed it judicious, to have put both sections or the whole line under contract at the same time. In that case the calls upon the present Stockholders would have been nearly the same, both in regard to periods and amount, as they have been in order to carry on the section now in progress.

In the next place, it is but justice to mention, that the Directors of the present year, however much they might have been fairly influenced by these considerations, and notwithstanding their ardour to prosecute the work without delay, did not in fact proceed except under the fullest sanction of those stockhers at least, whose share in the undertaking was so great as to make it proper to consult them before embarking in contracts, which would call for greater and more rapid advances than might appear reasonable.

The contracts were entered into in the month of July, 1825, and considerable progress made in the execution of some of them during the summer. The contractors, after the experience that has now been had of them, are stated with great confidence by the Directors, to be persons as eligible in all respects as they think the Board could have met with; and indeed, with a few exceptions, and those not in cases of any moment, they have exhibited a knowledge of their several descriptions of work, and have practis-

ed to this time a regularity, economy, and a persevering industry in the conduct of it, which it is believed have not often been excelled.

It was perceived very early in the operations of 1825, that to continue them with the despatch which the contractors pressed upon the Company, and which it was evidently the interest of the latter to facilitate, would demand an expenditure which could not be provided for from the funds expected to be raised in England, unless the reference for that purpose were promptly attended with success. For giving effect to that reference it seems that much reliance was naturally placed on the zeal and intelligence of one of the Directors appointed by the Legislature, who desired, before he could pledge himself satisfactorily for the success of the undertaking to acquire from personal observation a more intimate knowledge of it. Circumstances put it out of his power it appears to make the desired inspection before the month of September, 1825; and other occurrences to which it is painful to allude, shortly after combined to render his services of little avail.

At this time, however, viz. in September, 1825, it was determined that Mr. Boulton, another of the Directors should proceed to England for the purpose of endeavoring to raise subscriptions of Stock, and he was to be furnished with the necessary powers and instructions. In the month of November such instructions as the Board considered necessary were transmitted to Mr. McGillivray in Montreal to be forwarded to Mr. Boulton, then in London; but from the unfortunate occurrences already alluded to, they were omitted to be sent, and in the absence of such authority, no direct attempt was made nor could be made by Mr. Boulton to procure subscriptions.

It is not however very probable that this delay was of material consequence, for in the first place means were taken by Mr. Boulton to attract favorable attention in England to the measure, and moreover, that unhappy reverse had occurred in the commercial world, which not only had disabled many from lending their aid, who might a few months before have cheerfully granted it, but which had the much more general and decided effect of producing an universal suspicion of all such undertakings, and a disinclination to invest capital in them.

Before however it could be known that the application for subscriptions in England was not likely to meet with immediate encouragement, it was thought unsafe to rest in entire dependence upon it. The delay in making it, for which the reasons have been assigned left it no longer prudent to await its result without attempting to provide other means for prosecuting the work with despatch according to the contracts into which the Directors had entered; and under this impression, relief was sought by applying to the Legislature for an advance of £25,000 by way of loan, in anticipation of the Company's funds:

The ready acquiescence of the Legislature has been of infinite use—it has not only enabled the Directors to proceed through the season in the manner thought most desirable, and to which indeed they were pledged; but it served at a critical moment to give a character to the undertaking and a confidence in its success, for which the Company is most grate-

ful and for which they trust the Province will at no distant day receive an ample recompense.

With the aid of this advance the Directors have had it in their power to make such arrangements for calling in the Stock as the Stockholders have been embled to meet, although so great has been the pressure during the last few months upon persons engaged in commerce, that if it could have been foreseen the Directors would probably have felt it incumbent upon them to have restricted their operations, in order to avoid those frequent calls for large instalments, which they are sensible have borne most heavily upon those gentlemen at New York who hold the greatest proportion of Stock, but who have nevertheless answered those calls with a promptness and punctuality in the highest degree honorable.

In the midst of the operations of last summer which it required an average monthly expenditure of nearly £7,000 to maintain, the Directors found a good deal of uneasiness was naturally excited by the long delay in filling up the Stock. The reference to England had been hitherto ineffectual, and it was strongly pressed by those Stockholders who were sustaining the great weight of expenditure, that a period should be put to this indefinite expectation, and measures speedily taken for completing the subscription in America.—The Directors in deference to representations, certainly not unreasonable, determined though reluctantly, to send instructions to England, that if, within 14 days after the receipt of their letter, the required amount of Stock was not subscribed, the Books should be closed and an immediate communication made to this country in order that instant measures might be taken for soliciting subscriptions here, and in the United States.

Although sufficient time has clapsed no answer has been returned, and a hope arises which has been suggested by another circumstance, that he original expectations of the Directors may yet be fulfilled.

Not long after the Directors had written to England in the terms already mentioned, a letter was received from Mr. Galt, Secretary to the Canada Company apprising them, that the following very respectable gentlemen, Directors of that Association, viz:

CHARLES BOSANQUET,

JOHN HULLET,

JOHN ESTHORPE, M. P.,

MARTIN TUCKER SMITH, and

HART LOGAN,

had consented to act as a Committee in behalf of the Welland Canal Company. Upon this intimation so gratifying to the Directors, no time was lost in transmitting to Mr. Bosanquet, the Chairman, the necessary powers and instructions to enable the Committee to act, and these documents were accompanied by an account of the present state of the Company's affairs, and of the nature and progress of the Canal. The communication of the Directors was sent from New York on the 24th September, and it is to be supposed that a long time will not clapse before some intelligence is received from the Committee in London.

To enable the Stockholders in America to bear with the less inconvenience the additional delay of awaiting this intelligence, the Directors have author-

ther to negotiate in the meantime for a loan on the credit of the Company, or to procure subscriptions to the amount of £25,000, and they have apprised the committee in London of this step, and of the necessity, in case the £100,000 should be subscribed there, of its being accepted, subject to the contingency of a proportional abatement in the subscription of each stockholder in case the £25,000 should be subscribed in America.

To facilitate the negotiation for a loan if that were thought advisable, the Directors preferred an application to His Excellency the Liutenant Governor in Council, praying that the company might receive an immediate grant of the tract of land in Wainfleet, comprising 13,000 acres, of which, upon His Excellency's intercession, His Majesty's Government in England had authorised a grant to be made to the Company, but which it had been understood would not issue until there appeared a reasonable assurance that the objects of the Company would be fulfilled.

His Excellency has been pleased to consider the great exertions which have been made, and the actual state of the work, a sufficient assurance of its completion, and the grant has accordingly been directed to be perfected, which additional mark of public countenance and support the Directors cannot but regard as highly favorable to the Company.

Having thus explained the situation of the Company's affairs, and by what means they have been enabled to complete their engagements, the Directors proceed to give some account of the present state of the Canal, and the hopes which, so far as they can judge, may be reasonably indulged, in regard to its completion.

It was a recommendation strongly urged upon the Directors, by the principal Stockholders, that no necessary expense should be spared in procuring Engineers of competent ability and of known character, and accordingly early in this season, Mr. Alfred Barrett, long employed on the Erie Canal, was engaged as the principal resident Engineer, under whose immediate and constant superintendance the whole of the work has proceeded.

Mr. David Thomas the principal Engineer, whose reputation and experience were satisfactorily vouched for, has also been engaged at an annual salary to visit the work at stated intervals, report its state and progress, and offer suggestions of any improvements on the original design which might appear desirable. The Directors have had no reason to regret their selection in either case.

Without descending to unnecessary details the Directors now report to the Stockholders that up to the 10th November last there has been expended the sum of £69,404.1s. 10d., and that they have with that expenditure fully complied with their engagements of every description.

The Report of Mr. Thomas states concisely what proportion of the work is done, and what remains to be executed, with the expense which will be necessary to complete it.

The plan which the Directors have appended to this Report exhibits the route and profile of the Canal and it is thought it may not be uninteresting to inform

the Stockholders also of the names of the Contractors who have undertaken the several Sections, 35 in number. This information is given in Appendix [No. 2.]

Of the first Section, which commences at the River Welland, and is 66 chains in length, one half is completed, the Canal is filled and the Towing Path finished, so that it exhibits a fair specimen of this great navigable channel as it will appear when perfected.

The 2nd, 3rd, 4th, 5th and 6th sections comprehend the Deep Cut, and on this part of the Canal the greatest portion of labor has been employed and the most persevering exertions of the Contractors have been applied to it throughout the season, which has been very favorable to their operations.

The present appearance of the work sufficiently proves how great these exertions have been, at the same time that it affords the means of judging, with tolerable accuracy of the labor necessary to complete this most arduous part of the undertaking.

It has been already stated in this Report that the extent of what has commonly been called the Deep Cut, is nearly one mile and three-fourths, the greatest depth of excavation necessary is 56 feet, and the average depth about 44 feet.

In one part of it they have obtained the bottom level—in every section great progress has been made—and taking the whole cut through, the average depth of excavation completed on the 1st Nov. last, is estimated at about 18 feet.

It must be expected, of course, that the labor of excavating and raising each cubic yard will be greater as they descend; but on the other hand it is to be considered that as the Canal contracts greatly towards the bottom, the completion of the first eighteen feet has required the removal of a vast deal more of earth than will be necessary for descending an equal distance Leyond the present excavation.

The Directors felt it indispensible, in order to adapt the Canal to navigation by schooners, to enlarge very materially the dimensions of this Deep Cut beyond the original design. They have been so extended as to afford fifteen feet in depth at the bottom level, and the Banks rise from thence to the towing path twelve feet, with a slope of nearly two feet to one. The towing path is to be ten feet in width, and on the opposite side there will be a herm of seven feet. From thence the Canal rises with an angle of 45° to the surface. These dimensions give a surface of forty-three feet of water on this portion of the Canal, viz: for a mile and three-fourths, which is calculated will admit the passing of 10,000 cubic feet of water at the rate of half a mile per hour, and thus afford an abundant supply of water for all hydraulic purposes. In the judgment of the engineer the slope at the bottom is ample, and as there appears to be no reason to apprehend the slipping of the banks, he is of opinion the steeper the cut can be made above the towing path the better, as the less will be the surface exposed to the action of rains and

It is impossible that earth more favorable for such an operation could have been met with. There is no rock to impede the excavation, and although, the soil a stiff clay, is more expensive to remove than

dighter earth, that difficulty is amply atoned for by the solidity and tenacity of the banks, and the assurance there seems to be that they will sustain, without material alteration, the influence of the weather. Experience has given no reason for apprehension on this head. When the excavation of the Canal is finished, so that the margin can be dressed and the water led off from it by some small drains, it is not probable that any considerable quantity of earth will be crumbled by frost and thaw, or washed down by torrents; and it is conceived that whatever portion shall be from time to time detached from the sides, will be conveniently intercepted by the towing path on the one side, and the berm on the other, and be removed from thence in scows with little difficulty.

The alteration in the dimensions of the Deep Cut has rendered an additional excavation necessary of 115,090 cubic yards, but it is conceived that the obvious advantages of it will fully justify the measure. It will be seen in the Engineer's Report, before referred to, in what state of advancement the Locks now are. The Contractor has had difficulties and disappointments to contend with, but has, nevertheless, proceeded with much activity, and from present appearances there is every reason to trust that this important part of the work will be executed to the satisfaction of the Company.

Three Locks of 32 fer in width, and 125 feet in length, with 5-7 and 9 feet lifts between the village of St. Catharines and Lake Ontario, on a level of 5 miles, will, it is expected, be completed this autumn and will be navigable by means of a feeder from the west branch of the 12 Mile Creek. On the section including the ascent of the mountain, four locks will be finished also this season, with the exception of the gates.

It has been a matter of much consideration with the Directors, whether it would not be advisable to construct the Locks throughout of the width of 32 feet, in order to admit of a continual navigation by steamboats from one Lake to the other, but they found that the increase of expense would be more than they dare venture to incur; besides that from the greater length required there would not be room to descend the mountain without a combination of locks, which it is very desirable to avoid. The object, however, is so important, of admitting navigation without transhipment by steamboats, which it is to be supposed, will in time be almost exclusively employed in transporting the productions of the Upper countries, that the Directors deem it right, notwithstanding this apparent inconvenience, to call the attention of the Stockholders to the subject, while the progress made in the Locks is not yet such as to increase greatly the difficulty of the alteration. make the suggestion the more intelligible, it is to be observed, that steamboats entering the Cana from the Welland, would, from the large scale on which it is made, have no difficulty to encounter in passing through the Deep Cut and along the Canal to the first lock, from whence, in the course of four miles and 32 chains, including the descent of the mountain—there will occur 32 locks of 100 feet in length, and 22 in width, dimensions too small to admit of steamboats; and this distance of 4 miles and 32 chains so long as these 32 locks remain of these small dimensions will constitute the only interruption

to the passage of a steamboat from the one Lake to the other, and indeed from Lake Huron to Prescott on the St. Lawrence.

From the foot of this chain of Locks to Lake Ontario, there are indeed three other Locks, but the Directors have thought it advisable to construct these of such a width as to admit steamboats, which will, therefore, have no difficulty in ascending the Canalto the village of St. Catharines, a distance of 5 miles. Throughout the greater part of this distance, such is the peculiar make of the banks along the 12 Mile Creek, that the navigation will rather resemble in some places a basin, and in others a large river, than a Canal. The additional cost of constructing these Locks on the enlarged scale is about £125 each Lock, an expense which it is believed will be amply compensated by the increase of tonnage on the steamboats, and by the convenience they will afford to navigation.

The dimensions of the Canal, with the exception of the Deep Cut, are as follows: 26 feet on the bottom, with slopes of two to one up to the towing path; and a breadth of 56 feet on the water line. These dimensions are sufficient for vessels of 22 feet beam to pass each other, and none of larger size can enter the Locks. The ordinary depth of the water will be 8 feet.

For the progress of the intervening sections of the Canal which present no particular feature the Directors refer to Mr. Thomas's report. It will be seen by it that the distance of 4 miles and 61 chains from the harbor at the 12 Mile Creek upward, will most probably be completed even before the operations of this season are absolutely closed—And when this is considered in conjuction with the labor done at the Deep Cut, and the proportion of the work performed along the whole line it cannot but be admitted that immense progress has been made during the last year in this most desirable undertaking.

In regard to the harbor itself, so far as the opinion of several Engineers can be depended upon, and which opinions; it is said, are confirmed by the concurring testimony of Col. Sir James Carmichael Smith, of the Royal Engineers, who visited the work last year, during his tour through this Province—so far also as the judgment of the Directors, unskilled as they certainly are in matters of this kind, can be thought of any value, they are happy to express their belief that there is no good reason to doubt its successful completion.—Great progress is made in it—all that has been done appears to be sufficiently aubstantial, and they expect early in the next year it will be finished, and present a capacious and secure port, the access to which will have a depth of water of 12 feet.

Reviewing at once the whole of the line now in progress, from the Welland Canal to Lake Ontario, it is estimated that 1,330,704 cubic yards of earth have been excavated, and 202,707 yards of embankment made, besides finishing a culvert of solid masonry, and it is expected that at the end of the present month 10 miles of the Canal will be finished. It appears also by Mr. Thomas's estimate, that on the 1st Nov. last there remained still to be excavated 1.122,534 cubic yards, and 155,445 yards to be embanked. The greater part of the materials for

V3

the locks is in readiness, and also the timber for piers at the harbor.

The erection of buildings, stables, and outhouses necessary in the conduct of so great a work, forms no inconsiderable part of the operation. This labor is surmounted—every section of the Canal is in a state of forwardness, and the clearing and grubbing is now completed.

Many of the contractors commenced late in the season, and yet they had on the 1st of November last excavated 204,176 yards, and embanked 47,262 yards more than remained then to be done; so that unless some unforeseen obstruction occurs there seems every reason to anticipate that the work will be completed, or certainly very nearly so, during the next year.

The full amount of stock being not yet subscribed, the Directors have not proceeded to contract for the western section of the Canal, leading from the Welland to the Grand River, but so soon as the necessary funds are available they will enter upon this part of the work; as it is sufficiently evident that neither the Company nor the public will reap the full benefit of what is now doing until this part of the Canal is also finished.

According to the provisions of the statute passed last year, an arbitration was held at St. Catharines in August last, to determine the amount of damages to be paid by the Company to proprietors of land along the course of the Canal from the Welland to Lake Ontario.—With the exception of a very few individuals (one of whom, and the only one whose claim can be considerable, has since been settled with for the sum of £600.) all persons who can have demands upon the Company, in respect to that portion of the Canal, submitted them to the arbitrators, and a final award has been made, which directs the Company to pay claims amounting in the whole to £1,794.

The Directors cannot close his Report without desiring to pay a just tribute to Mr. Merritt the Agent of the Company, to whose indefatigable exertions, intelligence and uncommon perseverance, displayed from the original conception of the work to the present moment, it would be most unjust not to ascribe, in a great measure, it present encouraging state.

They can best appreciate the difficulties he has had to encounter, and have had the best opportunity of judging of his conduct and motives. Of thelatter they would not take the liberty of speaking, if they were not sensible that injustice has been sometimes done to them, which makes it a duty to declare their entire approbation of Mr. Merritt's proceedings in all that has fallen under their observation.

The Directors have acquired information of several facts tending to demonstrate that an immense intercourse through the Welland Canal must necessarily and speedily follow its completion, and to hold forth every motive both of public feeling and of private interest to the people of this Province, to desire the success of this work, with an ardor which they cannot but remark how small a degree has on this occasion been hitherto exhibited by the inhabitants of the country generally, and even by many who reside in the vicinity of the Canal.

But they do not consider this the proper occasion for entering into detailed calculations necessary to illustrate the value of the object which the Company is endeavouring to obtain.

John H. Dunn, President.
W. Allan,
John B. Robinson,
H. J. Boulton,
John Clark,

York, 18th December 1826.

Since the Report was put to press, a most gratifying letter of which the following is a copy, has been received by the President, from Major Hillier, Secretary to His Excellency the Lieutenant Governor, enclosing a copy of a Despatch from the right honorable Earl Bathurst, his Majesty's Provincial Secretary of State, which being communicated at a special meeting of the Board, it was directed that they should be added to the Report, nothing could be more agreeable and more highly satisfactory to the Directors than to have it in their power thus to conclude their Report. By recording another act of the munificence of the British Government extended to this highly favored colony. An act the more gratifying, as it has been entirely unsolicited on the part of the Company, and adds, at a moment when it was unlooked for, the encouraging patronage and support of the Imperial Government, to an undertaking which had before experienced the assistance of the Government and Legislature of this Province.

The Directors have resolved immediately to prefer a petition to the Legislature for the enactments necessary to carry into effect His Mujesty's most gracious intentions.

> GOVERNMENT HOUSE, 21st December 1826.

Sir,

I am commanded to convey to you, for information of the Directors and Stockholders of the Welland Canal Company, the enclosed copy of a Despatch from His Majesty's Government, from which I am to assure you His Excellency the Lieutenant Governor has derived the highest gratification: and has charged me to lose no time in communicating it to you.

I have honor to be
Sir,
Your most obedient
humble Servant,
G. HILLIER.

The Hon. J. H. Dunn.

Downing Street, September 30th, 1826.

Sir,

His Majesty's Government having granted the sum of twelve thousand pounds, in aid of the expense of constructing the Lachine Canal in Lower Canada, upon condition that all Boats and Vessels

with Public Stores should be permitted to pass without the payment of any toll or duty; and considering that the Welland Canal, now in progress on the Niagara Frontier, will afford great facility in forwarding Stores to Lake Erie and the upper parts of the Province of Upper Canada, and that by constructing the Locks of the width of 22 ft. it would become a work of much greater public utility. I am to desire that you will acquaint the Directors that His Majesty's Government would be willing to afford the same degree of assistance towards the expense of the Welland Canal which was given to that of Lachine which was about a ninth of the estimated sum required in its completion; and as the estimated expense of the Welland Canal is £147,240, the sum to be contributed by the public for the privilege of forwarding Government Stores &c., would be sixteen thousand three hundred and sixty pounds.

In the event of the Directors agreeing to this proposal, it is necessary that a Provincial Act should be passed, in which the Company shall engage to construct the Locks of the Canal of the width of at least 22 ft., and securing the use of the Canal to all Vessels and Boats, the property of His Majesty; and also to all other Boats and Vessels, when engaged in carrying Government Stores, without the payment of any duty or toll in consideration of the sum of £16,360; to be paid in four equal annual instalments, or sooner, if the Canal should be completed at an earlier period.

I have the honor to be,

Sir,

Your most obedient

Humble Servant.

(Signed)

BATHURST.

(A true Copy.)

MAJOR GENTRAL
SIR PEREGRINE MAITLAND,
K. C. B. &c. &c.

# APPENDIX.

No. 1

To the President and Directors of the Welland Canal Company.

The subscriber respectfully reports:-

That on Sections No. 1, 2, 3, 4, 5, 6, which include the Deep Cut, there has been excavated 692,699 cubic yards and there remains to be done 796,021 cubic yards; which at the contract price, will amount to £60,878 15s.

One half of the Section No. 1, (66. 71 chains in length) is finished and the other half is cut within 5 feet of hottom. The remainder of these Sections (1 mile 55 chains) is excavated to the average depth of 18 feet, and another year will be required for its

completion. Nothing unfavorable has occurred during the progress of the work.

On Sections No. 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, extending down to the first Lock, 233,812 cubic yards have been excavated, 67,365 cubic yards have been embanked and a culvert of 307 perches of Masonry, constructed. The contract prices for 174, 679 cubic yards of excavation and 26,500 cubic yards of embankment yet remaining to be done, will be £5,532.

Of this part 2 miles 75 chains are hottomed. On the remainder (1 mile 18 chains) the grubbing is chiefly done, and but a small part of the ground is unbroken.

The distance from the first Lock down to St. Catharines includes 14 Sections. On these 252,329 cubic yards have been excavated, and 28:327 cubic yards embanked. To finish them, 135,710 cubic yards of excavation, and 104,745 cubic yards of embankment will be required with the sum of £7,286 17s.

Only 58 chains of this part are finished.—Of the remainder, 1 mile and 49 chains are unbroken; and about one-third of the work on 2 miles and five chains is done, with all the grubbing, except half a mile.

On this part, 32 locks are located. Of 4, locks, two-thirds of the work is done; and of the remaining 28 Locks, two-thirds of the timber is delivered.

To render the Locks more permanent it has been deemed proper to have hollow quoin posts, braces, lining in the chambers, an increase of iron about the paddle gates and culverts, an extension of the mitre sills, a greater depth for the upper gates, and an additional foot to the height of the lock walls. These Extras on all the Locks, with the encreased dimensions of those below St. Catharines, added to the contract prices will amount to £5,991 2s. 11d.

Between St. Catharines and Lake Ontario, there has been done 151,864 cubic yards of excavation and 107,015 cubic yards of embankment. There remains 20,124 cubic yards to be excavated, and 24,200 cubic yards to be embanked which will require £5,300 including the expense of the harbor, the extension of the Piers, and the excavation between them into 12 feet water.

On this part three Locks were located, which will probably be completed in a month. The distance of 4 miles and 61 chains are nearly finished and 25 chains are yet to be embanked, but it is intended to finish the whole this season with the exception of the harbor.

No. 4.

# REPORTS OF DAVID THOMAS.

May 12th, 1826.

To the President and Directors of the Welland Canal Company.

The Subscriber respecting the works on the line of said Canal,

### RESPECTFULLY REPORTS,

That from the state in which the work was found, it will require one month at least to have it staked and laid out in proper order by the resident Engineer who will want two assistants besides rod men, probably during the season and it is most certainly for the interest of the Company to employ them.

The alterations recommended at this time, are

1st. To remove the Lock at the Harbor's few feet to the east to avoid excavating a high bank.

2nd. To give the Canal below the tow path a slope of 2 to 1, to save the excavation of a solid angle (or prism) which experience has shewn to be speedily filled again by the scouring of the under tow, or recoiling of the water.

3rd. To shorten the land-ties of the Locks under water to save excavation in the Lock-pit.

4th. To place the upper gates below the top water line of the lower level so that Lock culverts may be dispensed with by discharging the water for filling the Lock through the gates and to prevent the drifting of sand or gravel over the miter-sill.

From the late arrival of the resident Engineer I regret that it is not in my power to make a full report of all the operations at this time.

DAVID THOMAS.

St. Catharines, 5th mo., 12th, 1826.

No. 5.

June 13th, 1826.

To the President and Directors of the Welland Canal Company.

THE SUBSCRIBER RESPECTFULLY REPORTS:

That since the middle of last month, Alfred Barrett, the resident Engineer, has made a careful estimate of the work performed, throughout the line of said canal; and by great and mutual exertion is reducing the work to order, and the business of his department to a regular sysem. He is fully competent to the charge, and his services have been very satisfactory.

The slopes of the Deep Cut above the tow path are at an angle of 45°. These are steeper than it has been usual to cut canals, but the clay is so firm, that the frosts and rains of two seasons have occasioned no slips worthy of notice. The tow path on one side, and the berm or recess on the other, will receive the earth that crumbles or washes down, which may be cheaply removed in boats when the canal shall be completed.

With a velocity of half a mile an hour, nearly 10,000 cubic feet of water per minute will pass through this section of the canal, and furnish an ample supply for hydraulic purposes.

The dimensions now proposed are 26 feet on the bottom, with slopes of 2 to 1 up to the tow path; and a breadth of 56 feet on the top water line—this is sufficient for vessels of 22 feet beam to pass each other, and no larger can enter the locks.

The prices agreed to be paid to each contractor on the line of the Canal, have been examined by the subscriber, and he has no hesitation in saying that should the work be finished, for the prices, it will be cheaper than any similar work on the Eric Canal.

It affords him much satisfaction that the Deep Cut, the most important part of the work, is in the hands of contractors of acknowledged abilities and experience; and whose plan of operations, combining expedition with economy, is, perhaps unequalled. The

construction of the locks requires great care, attention, and ingenuity; and their management could not be placed in better hands. In short, from his personal knowlege of most of the contractors on the line, he is confident that no better selection could be made.

Particular attention has been paid to procuring at the proper season, the timber for constructing the locks; the labor of the contractors have been directed to such points as first require excavation and embankment; and the estimate for last month shews that the works are advancing with rapidity.

The line of the canal is very favorably and singularly situated for combining an extensive navigation with hydraulic advantages. Another prominent feature of this work is the descent of the mountain ridge by a succession of single locks placed at sufficient distances from each other to admit the passing of vessels without detention, or the hazard attending a combination of locks. The harbor is in a state of forwardness, and will be commodious, extensive, and

DAVID THOMAS,

Principal Engineer.

St. Catharines, 6 mo. 13th, 1826.

August, 11th 1826.

To the President and Directors of the Welland Canal Company.

THE SUBSCRIBER RESPECTFULLY REPORTS:

That the work on the line of the said Canal is continued with vigor.—From the estimates of the resident Engineers, it appears that more than six hundred thousand cubic yards have been excavated at the Deer Cur, which is but little less than one half of the whole quantity required; and affords a well grounded hope, that this most important part, requiring the most labor on the least space, may be easily finished next season.

From the Deep Cut to St. Catharines, a distance of S1 miles, nearly two hundred and forty-one thousand cubic yards of excavation and embankment have been completed.—Three lock and waste weirs, on this part of the line will soon be finished.

From St. Catharines to the harbor (nearly 5 miles) more than one hundred and forty thousand cubic yards have been excavated and embanked. This part of the line will probably be finished in two or three months. The west branch of the Twelve Mile Crock will serve as a feeder, and enable vessels, or raits of timber for the contractors, to ascend from Lake Ontario, through three locks to this village.

No difficulty or obstruction has occurred. The value of the work done, well justifies the expenditure, and from the experience had during its prosecution, there is reason to believe that the contracts may be completed with few exceptions at the stipulated prices.

DAVID THOMAS.

Principal Engineer.

St. Catharines, August 11., 1826.

No. 7.

Proceedings of the Board of Arbitrators appointed under the Provincial Statute 4th Geo. 4th cap. 17th, to adjust certain differences between the Welland Canal Company and the proprietors of certain lands on the Line of the Canal.

ST. CATHABINES,

August 22d, 1826.

The Arbitrators having assembled, pursuant to notice, and the Directors and Agent of the Company on the one hand and the respective parties on the being present, the following Indenture of submission was prepared for execution:—

This Andentuve, made the twenty-third day of August, in the year of Our Lord one thousand eight hundred and twenty-six, between Nathan Pawling, of the first part, James Gordon, of the second part, William May, of the third part, Robert Brown, of the fourth part, Peter May, of the fifth part, William Ball, of the sixth part, Jacob Ten Broeck, of the seventh part, John Ten Broeck, of the eighth part, Job Northrup, of the ninth part, Adam Gould, of the tenth part, Thomas Merritt and William Hamton Merritt, of the eleventh part, John Hainer, of the twelfth part, John Clendenning, of the thirtcenth part, William Chisholm, of the fourteenth part, William C. Chuse, of the fifteenth part, the widow Elizabeth Shipman, of the sixteenth part, Elias S. Adams, of the seventeenth part, William Sanderson, of the eighteenth part, the widow Isabella Stewart, of the nineteenth part, Jonathan Clendenning, of the twentieth part, Hannah Secord, of the twenty-first? part, Francis Parnell, of the twenty-second part, Zachariah Rycart, by his Agent, George Havens, of the twenty-third part, John Soper, of the twenty-fith fourth part, Alexander Nickson, of the twenty-fith part, Robert Detrick, of the twenty-sixth part, Oliver Phelps, of the twenty-seventh part, Jacob Ball, of the twenty-eighth part, Thomas Kerr, of the twenty ninth part, the widow Elizabeth Ball, of the thirtieth part, William Yule, of the thirty-first part, Peter Van Every, of the thirty-second part, Luke Carroll, of the thirty-third part; Jacob Bowman, of the thirty fourth part, George Marlatt, of the thirty fifth part, Andrew Wilson, of the thirty-sixth part, Hall Davis, of the thirty-seventh part, Jeremiah Atley, of the thirty-eighth part, Samuel Swayze, of the thirty-ninth part, Garrett Vandeburgh, of the fortieth part, John Carl, of the forty-first part, John Brown, of the forty second part, John Ten Broeck, of the forty-third part, & "The Welland Canal Company," of the forty-fourth-part. Whereas, by an Act of the Parliament of the Province of Upper Canada, passed the nineteenth day of January, in the year of Our Lord one thousand eight hundred and twenty-four for the incorporation of certain persons under the name of the said Welland Canal Company, it was amongst other things enacted, that the Directors of the said Company should have full power and authority to explore the country lying between the River Welland in the District of Niagara and Luke Ontario, and to designate and establish, and for the said Company to take, appropriate, have and hold, to and for the use of them and their successors, the line and boundaries of an intended Canal, with its necessary locks, tow-W3

ing paths, basons, and Railways, to connect the River Welland with Lake Ontario, and also to select such convenient sites for such and so many mills. manufactories, warehouses, and other erections as might be required by the said Company for the purposes thereof, and to purchase the same to and for the said Company, Provided that nothing therein contained should compel the owner of any mill-seat to sell, convey, or otherwise depart with the same to the said Company; and also that in case the owner or owners, occupier or occupiers of any mill seats on the line of the said Canal or within five hundred yards thereof, consider the same in any manner injured, or the value thereof in any way depreciated from the erection of rival establishments, or from any other cause growing out of the cutting and making the said Canal, and for the compensation of which no provision should be made by that Act, it should and might be lawful for the said Company, and they are thereby required to purchase the same at a fair valuation founded on an average of former years, to be ascertained by Arbitrators as thereinafter provided to ascertain the value of Lands and tenements to be purchased, or the amount of damages in any case sustained. And also that the Directors of the said Company should be, and they are thereby empowered to contract, compound, compromise and agree with the owners and occupiers of any land through or upon which they might determine to cut and construct the said intended Canal and appurtenances-cither forthe absolute purchase of so much of the said land as they should require for the purposes of the said Company or for the damages which he, she, or they should and might be entitled to recover from the said Company in consequence of the said intended Canal, &c. being cut and constructed in and upon his, her, or their respective lands .-And that in case of any disagreement between the said Directors and the owner or owners: occupier or occupiers aforesaid it should and might be lawful from time to time as often as the said Directors should think fit, for each owner or occupier so disagreeing with the said Directors either upon the value of the lands and tenements proposed to be purchased, or upon the amount of damages to be paid to them as aforesaid, to nominate and appoint one indifferent person, and for the said Directors to nominate and appoint an equal number of indifferent persons, who together with one other person to be elected by ballot by the said persons so named, shall be Arbitrators to award, determine, adjudge, and order the respective sums of money which the said Company shall pay to the respective persons entitled to receive the samethe award of a majority of whom shall be final. And whereas, also by a certain other Act passed in the thirtieth day of January last past, entitled "an Act to repeal parts of, and to explain and amend the several Acts of this Province relating to the Welland Canal Company"-it is amongst other things enacted that the value of any Mill Seat or tract of Land which the said Company should be authorised to purchase for the purposes of Muchinery should be ascertained in case of disagreement by Arbitrators in the same manner as the value of Land is to be assessed through which the said Canal should pass-and that the said Arbitrators should be also empowered to decide whether the Mill Seat or site, or other machinery desired by the said Company is such as the person owning the same could be compelled to

part with to the said Company, and that the said Arbitrators so to be appointed as aforesaid, should and might and they are thereby authorised and required in assessing the value of any lands or tenements, of any person or persons proposed to be purchased by the said Company, or the amount of damages to be paid by the said Company to any person or persons under the provision of the seventh clause of the said, first in part recited Act to take into their consideration the advantages, likely to accrue as well as the injury or damage occasioned to lands or tenements by reason of the said Canal. And also that all matters of disagreement or dispute to be settled or determined by Arbitration, under the provisions of the said seventh clause of the aforesaid Act should be referred to Arbitrators as therein provided, so that the award or awards of such Arhitrators might be made, published and declared, on or before the first day of September now next ensuing. And whereas some disagreement hath taken place between the Directors of the said Company and the respective parties to these presents (the said parties to these presents respectively being the respective owners and occupiers of certain lands and tenements required by the said Company for the line and boundaries of the said Canal, and for sites for Mills, Manufactories, Warehouses and other crections, for the purposes therof,) both as respects the value of such lands and premises as the said Company is desirous of actually purchasing, as well as the damages which the said parties respectively may be entitled respectively to recover from the said Company in consequence of the said Canal and appurtenances, according to the provisions of the said in part recited Acts. And whereas for settling and determining the value of such lands, tenements, and premises, as well as such dumages uforesaid, and all other matters between the said respective parties to these presents and the said Company to be settled, adjusted, and determined by Arbitration, according to the provisions of the said in part recited Acts, and the true intent and meaning thereof, the said parties to these presents have severally and respectively agreed to refer the same premises to Arbitration, and to nominate and appoint Arbitrators in that behalf, according to the purport, true intent and meaning of the said Acts. NOW this Indenture witnesseth, that in pursuance of the premises aforesaid, and for the purposes aforesaid the said parties to, and executing these presents have, and each of them respectively hath nominated, constituted and appointed their several and respective Arbitrators in the premises aforesaid as follows:—That is to say the said Nathan Pawling doth hereby nominate, constitute and appoint Henry Mettleberger as his Arbitrator, and the said Welland Canal Company do hereby nominate and appoint Grant Powell Esquire the Arbitrator of the said Company in the premises. The said James Gordon hereby nominates, constitues, and appoints James Clowes as his Arbitrator, and the said Company hereby appoint Alexander Wood, Esquire, as their Arbitrator in the premises aforesaid. The said William May her by nominates and appoints Chauncey Beadle as his Arbitrator, and the said Company hereby appoint Samuel Peters Jarvis Esquire, as their Arbitrator in the premises aforesaid. The said Robert Brown hereby nominates and appoints Abraham Nelles Esquire, as his Arbitrator, and the said Company hereby appoint James Black, Esquire, as their Arbitrator in the premises

aforesaid. The said Peter May hereby nominates and appoints Richard Woodruff as his arbitrator, and the said Company appoint James Black as their arbitrator in the premises aforesaid. The said William Ball doth hereby nominate and appoint Abraham Nelles as his arbitrator, and the said Company hereby appoint Grant Powell as their arbitrator in the premises aforesaid. The said Jacob Tenbroeck hereby nominates and appoints Thomas Butler, Esquire, as his arbitrator, and the said Company hereby appoint Crowell Willson Esquire, as their arbitrator in the premises aforesaid. The said Job Northrup hereby nominates and appoints Samuel Street Esquire, as his arbitrator, and the said Company hereby nominate and appoint Hon. J. B. Macaulay as their arbitrator in the premises aforesaid. the said Adam Gould hereby nominates and appoints George Ball as his arbitrator, and the said Company hereby nominate and appoint Samuel Street as their arbitrator in the premises aforesaid. The said Thomas Merritt and William H. Merritt hereby nominate and appoint Marshal Lewis as their arbitrator, and the said Company hereby nominates and appoints William Smith as their arbitrator in the premises aforesaid. The said John Hainer hereby nominates and appoints Samuel Street as his arbitrator, and the said Company hereby appoints Alexander Wood as their arbitrator in the premises aforesaid. The said John Clenter denning hereby nominates and appoints Thomas Butler as his arbitrator, and the said Company hereby appoint Samuel P. Jarvis as their arbitrator in the premises aforesaid. The said William Chisholm hereby nominates and appoints Samuel Street as his arbitrator, and the said Company hereby nominate and appoint Alexander Wood as their arbitrator in the premises aforesaid. The said William C. Chase hereby nominates and appoints Henry Mettleberger as his arbitrator, and the said Company hereby nominate and appoint Grant Powell as their arbitrator in the premises aforesaid. The said Widow Elizabeth Shipman hereby nominates and appoints Samnel Street as her arbitrator, and the said Company hereby appoints Alexander Wood as their arbitrator in the premises aforesaid. The said Elias S. Adams hereby appoints Richard Woodruff as his arbitrator and the said Company hereby appoint John Willson Esquire, as their arbitrator in the premises aforesaid. The said Widow Isabella Stewart hereby appoints Richard Woodruff as her arbitrator, and the said Company hereby appoint Thaddeus Davis as their arbitrator in the premises aforesaid. The said Jonathan Clendenning hereby nominates and appoints Samuel Street as his arbitrator, and the said Company hereby appoint Alexander Wood as their arbitrator in the premises aforesaid. The said Hannah Second hereby appoints Samuel Street as her arbitrator, and the said Company hereby appoints Alex under Wood as their arbitrator in the premises aforesaid. The said Francis Parnell hereby appoints Richard Woodruff as his arbitrator, and the said Company hereby appoint Thaddeus Davis as their arbitrator in the premises aforesaid. The said Zachariah Rykert hereby appoints George Havens as his arbitrator, and the said Company hereby appoint Hugh Willson as their arbitrator in the premises aforesaid .-The said John Soper hereby appoints George Havens as his arbitrator and the said Company hereby appoint Hugh Willson as their arbitrator in the premises aforesaid—the said Alexander

Nickison hereby appoints Richard Woodruff as his arbitrator and the said Company hereby appoints S. P. Jarvis as their arbitrator in the premises aforesaid—the said Robert Dettrick hereby appoints Thomas Butler, and the said Company hereby appoints Samuel P. Jarvis as their arbitrator in the premises aforesaid—the said Oliver Phelps hereby appoints Thomas Butler as his arbitrator and the said Company hereby appoint Samuel P. Jarvis as their arbitrator in the premises aforesaid—the said Jacob J. Ball hereby appoints James Durham as his arbitrator and the said Company hereby appoint Jacob Keefer, Esq., as their arbitrator in the premises aforesaid—the said Thomas Kerr hereby appoints Richard Woodruff as his arbitrator and the said Company hereby appoints Grant Powell, as their arbitrator in the premises aforesaid—the said widow Elizabeth Ball hereby appoints Richard Woodruff as her arbitrator and the said Company hereby appoint John Willson as their arbitrator in the premises aforesaid—the said William Yule hereby appoints Richard Woodruff as his arbitrator and the said Company hereby appoint John Willson as their arbitrator in the premises aforesaid—the, said Peter Van Every hereby appoints Richard Woodruff as his arbitrator and the said Company hereby appoint John Willson as their arbitrator in the premises aforesaid—the said Luke Carroll hereby appoints George-Shaw as his arbitrator and the said Company hereby appoint James B. Macaulay as their arbitrator in the premises aforesaid-the said Jacob Bowman hereby appoints Samuel Theal as his arbitrator and the said Company hereby appoint John Warren, Esquire, as their arbitrator in the premises aforesaid, the said George Marlatt hereby appoints George Lacey as his arbitrator and the said Company hereby appoint Robert Nelles as their arbitrator in the premises aforesaid—the said Hall Davis hereby appoints Samuel Street as his arbitrator and the said Company hereby appoint Alexander Wood as their arbitrator in the premises aforesaid—the said Jeremiah Atley hereby appoints William McClellan as his army bitrator and the said Company hereby appoint Thaddeus Davis as their arbitrator in the premises aforesaid—the said Samuel Swayze hereby appoints Samuel Street as his arbitrator and the said Company hereby appoint Alexander Wood as their arbitrator in the premises aforesaid—Garrett Vandeburg hereby appoints John Hill as his arbitrator and the said Company hereby appoint Edward McBride Esquire, as their arbitrator in the premises aforesaid—the said John Carl hereby appoints John Hill as his arbitrator and the said Company hereby appoint Thaddeus Davis as their arbitraton in the premises aforesaid the said John Brown hereby appoints Samuel Street as his arbitrator and the said Company hereby appoint Alexander Wood, Esquire, as their arbitrator in the premises aforesaid—the said William Sanderson hereby appoints Richard Woodruff as his arbitra tor and the said Company appoint Samuel P. Jarvis as their arbitrator in the premises aforesaid,-And the respective parties to these presents respectively do hereby covenant, promise, and agree, well and truly to stand to, obey, abide by, observe, perform, fulfil, and keep, the award, order, arbitrament, and final determination of the said above named arbitrators and the persons to be appointed by them pursuant to the said Act first above recited or the majority of them according to the terms and provisions of the

said Act touching and concerning all and every such matters and things respectively herein before mentioned as shall be submitted to the said art trators under the provisions of said in part recited Acts, and be in difference between the said parties to these presents respectively and the said Welland Canal Company—it hereby being fully declared, understood and agreed by and between the parties to these presents respectively that (without any separate or specific explanation thereof by and in this submission) that all matters of disagreement or dispute by and between the said respective persons, parties, to and executing these presents and the said Company to be settled is determined by arbitration according to the provisions of the hereinbefore in part recited acts of what nature or kind soever shall be and are hereby agreed to be referred to the arbitrators hereinbefore appointed and the person to be appointed by them according to and in compliance with the provisions of the said in part recited Acts and the true intent and meaning thereof.—And it is also agreed by and between the said parties to these presents that these presents and the submission hereby made of the premises aforesaid shall be made a rule of His Majesty's Court of King's Bench for the Province of Upper Canada, pursuant to the statute in that behalf,

312

In witness whereof the parties to these presents have hereunto respectively set their hands and seals, and the said Company the seal of the said Company, the day and year first above written—and the undersigned Directors have hereunto also put their respective hands on the part and behalf of the said

Thaddeus Davis,
Edward McBride,
Alexander Wood,

(John Hill, affirmed.)

Arbitrators appointed under the authority of an Act of the Parliament of this Province, passed the nineteenth day of January, in the year of our Lord 1824, for the incorporation of certain persons under the name of "The Welland Canal Company," and each of them for himself, before me, took the following Oath in pursuance of the said Act.

I do swear that I will according to the best of my judgment well and truly assess the damages between the parties on behalf of whom I am an Arbitrator, under the provisions of the Statute of the Province of Upper Canada, passed the nineteenth day of January, in the year of our Lord one thousand eight hundred and twenty four, entitled "An Act to incorporate certain persons therein mentioned under the style and title of the Welland Canal Company."

(Signed,)

So help me God.

Geo. Adams, J. P. Grantham.

The undernamed Arbitrators having been duly appointed under the Welland Canal Act, and having met at St. Catharines, the 23rd August 1826, took the Oath required by the Statute, before George Adams Esquire, when they proceeded to ballot for a colleague, according to the terms of the Act, and thereupon appointed the Honorable Thomas Clark, to whom a communication was forthwith despatched.

Grant Powell, Esq. being appointed to preside pro. tem., it was Resolved, that the Umpire should preside on his arrival, and

Resolved, That Mr. Macaulay do act as Secretary, and that the Arbitrators do now adjourn till ten o'clock tomorrow morning, at which time Mr. Clark is expected to attend.

# ARBITRATORS PRESENT.

- 1. Abra'm. Nelles, Esq.
- 2. Thomas Butler,
- 3. Samuel Street,
- 4. George Ball,
- 5. Marshall Lewis,
- 6. Richard Woodruff,
- 7. James Durham,
- 8. George Shaw,
- 9. Samuel Theal,
- 10. George Lacey,
- 11. Henry Mittleberger,
- 12. John Hill, 13. Wm. McLellan,

- 1. Saml. P. Jarvis,
- 2. James Black,
- 3. Crowell Willson,
- 4. James B. Macaulay,
- 5. William Smith,
- 6. Jacob Keffer,
- John Warren,
- 8. Robert Nelles,
- 9. Grant Powell,
- 10. Thaddeus Davis,
- 11. Edward McBride,
- 12. Alexander Wood,

Hon. Thomas Clark.

. THURSDAY, 24th August 1826.

The Arbitrators met-all present.

Mr. Street reported that Mr. Clark had not returned to this District, and that he could not therefore be served with notice of his appointment.

Mr. Warren moved that the Arbitrators present should proceed to business, there being a majority of the whole-seconded by Mr. Crowell Willson.

Carried nem. con.

Mr. Jarvis proposed that a set of general interrogations should be drawn up for each owner and witness, to be propounded through the Chairman-and that all questions should be put through the Chairseconded by Mr. Macaulay.

Carried.

The following interrogatories were then adopted-

- 1. What is the number of your Lot and of the Concession?
- 2. What quantity thereof is required for the Canal?
- 3. What is the nature of the Land-wild or cleared?
  - 4. What is the nature of the soil?
- 5. In what proportions or how is the Lot or parcel of Land owned by you, separated or divided by the Canal 1
- 6. How long have you been occupier of, and what price did you give for the premises?
- 7. At what do you value your Lotper acre at
  - 8. At what sum did you value it 5 or 6 years ago?

- 9. At what sum did you value it when the Canal was at first projected in 1824?
- 10. Has the Canal added to the value of your Lands—that is, could you in consequence of the Canal obtain a higher price for it than you could have done had the Canal not been undertaken?
- 11. Has the Canal been of any advantage to your Land, if so in what respect and to what extent?
- 12. Has the Canal been of any disadvantage to your lands-if so, in what respect, and to what extent ?
- Do you apprehend any disadvantage from the Canal not yet experienced—and if so, explain in what respect and to what extent?
- 14. Are the disadvantages so great to you that you would prefer the route of the Canal being changed rather than its following the present line assuming that you were to obtain no other remuneration for your property than the advantages which might accrue from the Canal?
- 15. Do you as a general question consider property situated on the banks of a Canal or other mavigable water of more or less value than lands of similar quality in situations more remote-say retired from 10 to 12 miles?
- 16. If your land is divided by the Canal what do you suppose it would cost you to erect and keep in order a bridge over it or otherwise by means of a boat or scow to connect the farm?
- 17. Does the Canal by raising the waters upon low or marshy lands in the vicinity of your premises improve the health of the situation and thereby prove beneficial to you?
- 18. Did you before the projection of this Canal consider lands of similar quality on the Niagara River or near the town of Niagara, of greater value than lands on the 12 mile creek, and if so, why?
- Will the Canal enable you to irrigate any of your lands—and will you enjoy advantages thereby?
- Do you consider the advantages of the waters of a navigable Canal passing through your farm equivalent to the loss of soil occasioned there
- 21. Is your farm well supplied with water independent of the Canal?
- 22. What distance have you hitherto in the dry seasons of the year had to drive your cattle for water?
- Can you obtain a supply of water more conveniently since the Canal has passed through your furm?
- 24. Have you any springs on your form contiguous to the Canal, and will they be injured or entirely destroyed by the rise of water I
- 25. Did you petition for or remonstrate against the Canal originally, -and if so would you have done so had it been at first designed for sloop navigation?
- 26. Are you disposed to sell to the Company that part of your farm cut off by the Canal I and at what rate?
- Mr. Macaulay moved, seconded by Mr. Crowell Willson, that the arbitrators should view the several

X3

parcels of land, &c., to be arbitrated upon, and examine the owners, or occupiers as well as the agent of the Company and any witnesses produced upon the premises respectively.

# Carried.

Mr. Jarvis moves, seconded by Mr. Butler, that the Arbitrators should proceed to the Dalhousie Harbor to enter upon their duties.

# Carried.

The Arbitrators then proceeded to explore the line of the Canal from Dalhousie Harbor to St. Catharines and examined Mr. Pawling and Mr. Brown.

# NATHAN PAWLING sworn by A. Nelles, Esq.

The Interrogatories being put, deponent answered as follows:-

- 1. Lot No. 1, part of broken front or 1st Concession Grantham.
  - 2. Supposes 40 acres.
- 3. Covered with water principally—all but that required for the Lockage.
- 4. Soil of the dry part principally sand excepting a part of the Hill removed to make embankments.
- 5. About 8 acres of sandy beach divided from the arable land not fit for cultivation.
- 6. Has resided on the premises about 9 years—received of his father.
- 7. Has sold some of the upland adjoining the lock from 140 to 800 dollars per acre.
- 8. Valued at about 10 or 15 dollars an acrewould have asked more for a small piece than a quantity.
  - 9. At 10 or 15 dollars taking the farm generally.
- 10. Certainly could obtain a higher price for it although he has never offered to sell the whole in a body.
- 11. Has been of great advantage—has raised the price of the land a good deal, cannot say to what extent.
- 12. Has taken off a small portion of the land, but otherwise of great advantage.
  - 13. He does not.
  - 14. Certainly not.
- 15. If not much injured by the Canal must be of advantage.
  - 16. Does not apply to his premises.
  - 17. He thinks so.
- 18. He believes generally considered so because nearer a market.
  - 19. No.
  - 20. He does.
  - 21. It is.
  - 22. The same as at present—to the lake.
  - 23. Not applicable.

- 21. One or more—one frequently used.
- 25. Did not originally petition, but was always a warm supporter of it. Does not know that his interest would be affected by one kind of navigation more than another. Probably a boat navigation would be of most advantage to his property.
- 26. If used for buildings, &c. for the Company, has no objection to sell at a fair valuation all required. As to the eight acres not disposed to sell, except such as may be actually required for the Company—supposed to be about half an acre—that is, less than an acre.

#### ROBERT BROWN sworn.

- 1. Cannot tell—is composed of broken fronts and bound by the channel of the creek.
- 2. Supposed to be upwards of 50 acres—none is required for the construction of the Canal, but over-flowed by back water.
  - 3. Marsh and meadow-more than half marsh.
  - 4. Rich meadow to a certain extent.
- 5. The back water will cut off 26 acres of wild land susceptible of cultivation; also another piece of 36 acres—the first piece, called the island, is sometimes surrounded when the marsh is high.
- 6. Six years. Exchanged for a farm on the 10 Mile Creek, receiving \$65 to boot—valued it at about \$3000.
- 7. Has never fixed any value—would not take \$150 an acre for his meadow land.
- 8. Offered to sell it for £1000 currency at that time.
- 9. Has lately offered it for \$400, sensible the Canal will be of disadvantage.
- 10. Thinks he cannot get as much—Canal has not added to the value of the land.
  - 11. No.
- 12. Had to open a lane for a road to the harbour. Had to throw down fences, and thereby a part of his upland is yet common. The exposure of the fields has caused loss of apples, &c. Now has orchard secured. Fences moved by neighbors at a bee. Cannot say what his damage is—lost 200 bushels apples Does not think he would have cultivated the land now common. Paid \$10 for making rails.
- 13. No-except the overflowing already spoken
- 14. Would rather the Canal should go in another direction.
- 15. Personally he would rather live from off the line of the Canal.
- 16. Can form an idea—supposes £25 would make a good permanent bridge to the island. Could not for £100 make the other.
- 17. Thinks he will be injured—that lands now dry will be made marshy, and oblige him to erect his new house in a different place from that he originally intended.

- 18. He would rather have a farm of equal value on the 12 Mile Creek.
  - 19. No.
  - 20. No.
  - 21. Yes-has very good springs.
  - 22. None.
  - 23. No.
  - 24. Has springs, but they will not be affected.
  - 25. Was neither for nor against it.
- 26. Yes—whatever it was worth—say £5 an acre. To a question of Mr. Merritt's, says, if the water is embanked out of the meadow, he; of course, claims no damage for the land so secured.

The arbitrators having explored the line of Canal from the Harbour to St. Catharines—

Adjourned till eight o'clock, A. M., of the morrow.

FRIDAY, August 25, 1826.

The Board of arbitrators met.

#### ABSENT:

William M'Clellan and Jacob Keefer, but who afterwards joined the Board.

The Arbitrators proceeded to examine claimants.

# ADAM GOULD sworn.

- 1. Does not know.
- 2. Six acres of meadow, and another small tract.
- 3. Meadow land.
- 4. Ditto.
- 5. The lot is not divided, but a part of the front is taken
  - 6. Inherits the lot-owned it about a year.
- 7. Never fixed a price—values meadow at \$125 per acre.
  - 8. Cannot say what his father then valued it at.
  - 9. Did not then own it.
- 10. It has not—does not think it would sell for so much now as if the Canal had not passed by it.
  - 11. No
- 12. It has deprived him of the meadow above mentioned. Does not know whether the water will be equally accessible.
- 13. Loses the pasture, and apprehends about two acres of meadow more will be overflowed. Has this year been deprived of a field on the side hill—about ten acres—the want of it considerable damage—intended for pasture—expects another field (meadow) to be opened for drawing timber—has another pasture—has 30 head of cattle he thinks—estimates his damages by loss of side hill field at \$40—cattle run in the woods and are not in as good condition as they would have been had he not been deprived of his pasture.

- 14. Would prefer its going in another direction—does not see that the Canal is of any benefit to him.
- 15. Does not think a navigable water would enhance the value.
  - 16. Not applicable.
  - 17. No.
  - 18. Cannot say.
  - 19. Not applicable.
  - 20. No-could take flour in boats before.
  - 21. Yes.
  - 22. Not applicable.
  - 23. No.
  - 24. No.
- 25. Did not petition—believes his father did not—he disapproved of it.
  - 26. Not applicable.

General—The meadow used to yield two tons an acre—never took to market—average price of hay \$10—could not fence in the field—hill was 100 steep.

#### JACOB TEN BROECK sworn.

- 1. Part of 22 and 23-3rd Concession Grantham.
- 2. About 40 acres, including lands likely to be damaged.
  - 3. Meadow.
  - 4. Ditto.
- 5. There are two farms, and the communication will be cut off—he owns one farm and his son the other—live together—he lives on his son's farm.
- 6. Possessed by the family since 1783—Inherited by witness both farms.
  - 7. Values his farm (265 acres) at \$6000.
  - 8. At the same sum.
  - 9. Ditto do.
- 10. Would sell it for less now than before—loses so much meadow.
  - 11 None
- 12. Deprives him of meadow—lost the use of it this summer, owing to the making of the tow-path—three acres damaged—each acre usually yielding from two to three tons—the field generally, yielded less than usual by six or eight tons—could get £15 per ton for hay at present—old price \$10 per ton, average, by taking it to Fort George.
  - 13. Answered in above.
  - 14. Would rather have the line changed.
  - 15. Does not know it would make any difference.
- 16. Could not build a bridge for less than \$2,000 he thinks—which sum he could not afford.
  - 17. Thinks it would rather be more unhealthy.
  - 18. Did not.
  - 19. No.

- 20. No.
- 21. Yes.
- 22. None.
- 23. No.
- 24. Some may—has very few springs—thinks they will be destroyed—freshets did not injure them—springs on his son's farm.
  - 25. Did neither one nor the other.
- 26. Not applicable—told Mr. Merritt that he would sell a piece cut off by the Canal for \$100, about 12 acres of pasture land, not meadow.

# JOHN TEN BROECK, sworn.

- 1. Part of 22 and 23—3d and 4th concession Grantham—155 acres.
- 2. Cannot say-Mr. Merritt says three acres arable land.
  - 3. Meadow cleared.
  - 4. Ditto.
  - 5. Not divided-a piece cut off in front.
- 6. Gave \$4,500 for the farm, bought from Mr. Butler.
  - 7. Is willing to take what he gave for it.
  - 8. Has only owned it three or four years.
  - 9. The same as at present.
- 10. Has not been offered any higher price—does not think he could sell it for more than he gave for it.
  - 11. No advantage that he knows of.
- 12. No other disadvantage as yet, except that in last March he had some wheat destroyed—not quite four acres—estimated at 30 bushels an acre.
  - 13. Answered in last.
- 14. Would rather the Canal were changed than lose his land.
  - 15. Cannot answer.
  - 16. Not applicable.
  - 17. Cannot answer.
  - 18. Ditto ditto.
  - 19. Inapplicable.
  - 20. No.
- 21. Inapplicable.
  - 22. Ditto.
  - 23. Ditto.
- 24. Cannot say—has springs, but does not know whether they would be injured.
  - 25. Had nothing to do with it.
- 26. Considers that the Canal takes all the first cut off—the meadow land yields about 2½ tons hay per acre—would rather keep the land taken by the Canal than accept \$100 an acre for it.

The arbitrators then explored the line of the Canal from St. Catharines to the Chippewa, and

Adjourned till the morrow.

SATURDAY, August 26, 1826.

#### ABSENT:

Thomas Butler and John Warren.

JOHN CARROLL, sworn.

- 1. No. 186—100 acres—and No. 203—also 100 acres—in Thorold—also a broken front.
- 2. Cannot say, but crosses the lot length-ways—(60 acres.)
  - 3. Principally wild.
- 4. Similar to the general soil of the country—hard timber land—it lies where the deep cutting is.
- 5. The line takes a part of each lot, and leaves a stripe on each side of the Canal.
- 6. Drew the land from the Crown-occupied many years.
  - 7. Never fixed any value upon it.
  - S. Never valued.
  - 9. Ditto.
- 10. Does not know wherein—has taken land and timber from him.
  - 11. No.
- 12. Has caused a great deal of trouble to him from the thoroughfare, &c.
  - 13. Nothing more than the future loss of timber.
- 14. Yes, would have been well pleased if 50 miles off.
- 15. It seems reasonable that a convenient water carriage should enhance the value of lands—but he already enjoyed that advantage by the Chippewa,
- 16. It would cost a great sum—but if the public road is kept up he would not require any.
- 17. Waters not raised—no lands drained—at present some land is covered by an embankment stopping the water—hereafter to be removed.
- 18. Should think land on the Niagara of less value than on the line of the Canal, because he could have himself obtained land there—thinks the land better.
  - 19. Not applicable.
  - 20. No.
  - 21. Not applicable.
  - 22. Ditto.
  - 23. Ditto.
  - 24. Ditto.
  - 25. No.
- 26. Not disposed to sell any—wishes to keep all not required for the Canal.

#### JEREMIAH ATLEY, sworn.

- 1. No. 96 in Thorold, 100 acres.
- 2. Mr. Merritt says 3 1-5 acres, including the corner.
  - 3. Cleared land.
  - 4. Good soil-interval land-meadow.

- 5. A corner, cut off about 31 acres—divided off.
- 6. \$1,000 about five years ago—has since built cider house upon it and repaired barn.
  - 7. Cannot say.
- 8. \$10 an acre—would take £5 per acre for the whole—but not even \$100 for a single acre of the land required by the Canal.
  - 9. Does not know-never estimated it.
  - 10. Not a cent-of no benefit to him.
  - 11. No.
- 12. Yes—a great deal—fruit and fence (300 rails) all destroyed—a thoroughfare about the place, &c.—would not have suffered all for \$100—ten acres lay out in common last year—meadow ground, owing to the Canal—is now fenced:
  - 13. Not that he knows of.
- 14. Yes—would rather have it away from his premises.
- 15. Does not know—is not going to trouble his head about it.
- 16. The public bridge will dispense with the ne cessity of a private one.
- 17. The banks of the Canal cause the accumula tion of pends of water in rainy weather.
  - 18. Knows nothing about the value of lands, &c.
  - 19. Not applicable.
  - 20. No.
  - 21. Yes-had two creeks.
  - 22. Had plenty of water on the farm.
  - 23. Always had plenty of water on the lot.
  - 24. No.
- 25. Petitioned against the new route—one route did not affect witness' property more than another.
  - 26. Not if he could help it.
- Mr. Simpson offered \$150 for it—does not think he would have done so had it not been for the Ca-

To a question of Mr. Merritt's, witness says he was not against the Canal at first—had agreed to give up his property—but the enlargement of the Canal is injurious.

- MATTHIAS MISNER, sworn, as a witness for Mr. Brown, who was prevented by illness from attending.
- 1. Does not know-joins Mr. Carroll-is on the Chippewa 280 acres.
  - 2. Mr. Meiritt says about 12 acres.
  - 3. Bottom land excellent—some marsh.
  - 4. Ditto ditto ditto.
- 5. Is cut angling across a corner—cutting off about 30 acres—a creek originally run in the direction of the Canal—straitens the creek—i. e. crosses its windings frequently.
  - 6. Occupied three years-price unknown.

- 7. A farm of 100 acres adjacent lately bought for between 1\$6,00 and \$7,00—supposed to be too low a price—worth about \$1,800 in its present state.
- 8. Worth £900 N. Y. currency—\$2,250 and upwards.
  - 9. Worth about \$2,250.
  - 10. No.
  - 11. Does not consider it so.
- 12. In its present situation not of so great an injury—but in respect to the original route a deep cut was made near the barn for tunnelling—also the principal part of the good timber on the land was cut down—a quarter of an acre dug up and soil thrown on adjacent land—80 or 90 acres improved leaving 190 or 200 acres of timbered land. The strip of the old route contained the principal part of the good timber—pine, oak, &c.,—length or breadth not known.
  - 13. None.
- Cannot say—Has heard him wish it had not come near him.
  - 15. Of more value.
- 16. The public road will keep up the ssamunication.
  - 17. Inapplicable.
- 18. Cannot say—should prefer the one nearest the market.
  - 19. Inapplicable.
- 20. Does not know but that it would—does not think the present farm so far improved considering its situation.
  - 21. Not applicable.
  - 22. do.
  - 23. do.
  - 24. do.
  - 25. Does not know.
  - 26 Does not know-never heard it valued.

#### SAMUEL SWAYZE, sworn.

- 1. Thinks No. 97 in Thorold between Vandeburgh's and Atley's—100 acres.
  - 2. Cannot tell-Mr. Merritt says about 12 acres.
  - 3. About 70 acres cleared—80 acres woodland.
- 4. Ordinary soil of the country—some meadow where canal passes—some of it.
- 5. Runs lengthways of the lot—comes in at the South end and runs towards the North end.
  - 6. Paid \$1250 four years ago.
- 7. Would not take less than it cost—would take that if paid for its use.
- 8. At \$1250—the place has been sold for \$1500—has good buildings on it.
  - 9. Would not take short of \$1500.
  - 10. Does not know but he could.
  - 11. None at all. Y3

- 12. Thrown him out of the use of it since the Canal commenced—fences kept open—timber nearly all destroyed—18 acres of wheat sown, destroyed—Canal goes through timbered land—did not cut wheat enough to pay for harvesting and seed.
- 13. Will be kept out of the use of his land still—some places will be overflowed—some at present overflowed might be drained at some expense—Canal stops the channel of some creeks running towards the Canal—10 or 12 acres drowned.
  - 14. Would rather it had not touched his place.
- 15. Would consider land nearest a market most valuable.
  - 16. A public road keeps up communication.
  - 17. No.
  - 18. Does not know that he did.
  - 19. Not that he knows of.
  - 20. No.
  - 21. Yes.
  - 22. Never off the farm.
  - 23. No.
- 24. Had two springs close to the house, which will be destroyed at bottom of the Canal.
  - 25. No neither.
  - 26. Would rather sell the whole.

# Anthony Upper called by the Agent of the Company—sworn, says—

He owned a lot adjoining Mr. Brown's; 100 acres; sold it to Mr. Lampman who sold to Mr. Dunn; witness deeded it to Mr. Dunn; sold to Lampman 3 or 4 years ago or more at \$300. The Canal had been in contemplation but witness supposed abandoned again or he would not have sold it so low; took produce as 3s. 9d. a bushel—wheat. Thinks Lampman sold it for \$600. It was said Mr. Lampman was going to be troublesome about the timber, and therefore purchased it; Lampman had exchanged the lot with one McPherson, but writings not being drawn Lampman (the canal being established) refused to adhere to his bargain. Witness considers the canal passing through land of advantage; considered it so much so that he would have given the land required and some hundreds of dollars to have it pass through his lands; passes within a short distance of his land now; 150 or 200 yards from his line; a lot near the Deep Cut, 40 acres cleared, rented for 50 and 40 dollars a year. Thinks Vandeburgh's farm ruined as a farm; had some improvement; a snug house; lies on a road; would not before the projection of the canal have given more than \$800 for it; is 100 acres. There is a lot between the lot sold Lampman and the Welland. Land tolerably good; thinks the soil on the Welland better timbered; thinks Brown's land better timbered than Lampman's. Would value his own property at from 15 to 20 dollars an acre.

# HALL DAVIS, 8100771.

- 1. No. 90 he thinks-joins Atley's.
- 2. Mr. Merritt says 20 acres.
- 3. Half improved, half cleared.
- 4. Cleared land, chiefly meadow.
- 5. Commences near South East angle—angles towards centre—then Northing, making an elbow with middle of lot,
- 6. Owned 24 or 25 years—purchased wild at \$3\frac{9}{4} an acre.
- 7. Valued it at £5 an acre—has been offered more for it.
  - 8. About £5 an acre.
- 9. In 1824 lands were lower than some years before.
- 10. Thinks the canal a benefit as respects price—would think a farm situated on the banks of a canal would bring a better price.
- 11. No other advanage than the general value of property being enhanced.
- 12. Has deprived him of the use of some part—has had additional fencing to do—has had rails burnt—expended two thousand rails last year—the canal workmen burnt them.
- 13. None excepting the future division of a part of the timbered land which will not be so accessible.
- 14. The canal cuts up the farm and injures it of course as a farm—but it enhances the value of the land left as also other property owned by witness. Would give up the land required rather than the canal should fail as a matter of public spirit, but cannot say whether the land left will be raised in value equal to that part lost.
  - 15. He does.
- 16. Is near a highway and expects a communicacation without the expense of a private one.
  - 17. Not applicable.
  - 18. Cannot say.
- 19. Does not anticipate any advantage that way—will lose springs and perhaps get some water by canal.
- 20. Does not know—it may be so—should not think so had he no other than the one lot.
  - 21. Pretty well-had two good springs.
  - 22. Inapplicable.
  - 23. Does not know that he can.
- 24. The springs will be lost, but replaced by canal water.
  - 25. Was anxious, and petitioned for it.
  - 26. Would as soon keep it.

# ANDREW WILLSON Sworn.

- 1. No. 74 Thorold—100 acres.
- 2. Mr. Merritt says about 17 acres.
- 3. All cleared except a small corner.

- 4. Ordinary soil of the country—upland and meadow.
  - 5. Nearly through the middle lengthways.
  - 6. Nearly 17 years-willed to him.
- 7. Once agreed to sell it for £250 currency, shortly before or during the war.
  - 8. Did not value it.
  - 9. About the same as before.
- 10. Does not think it has—has had no higher offers.
  - 11. None.
- 12. Has caused a field to be thrown open this season—others will be opened in the progress of the work—about 25 acres should have been moved this year.
- 13. Not further than the opening of his farm and division of his lot.
- 14. The disadvantages have not been so great as yet—would as lief have it six miles off—would rather have no canal than give the land required for it.
- 15. Thinks the Canal would enhance the value of land.
- 16. There is an allowance for road between his lot and another—and if a bridge erected over it would be accessible—but at much inconvenience—will have to cross McLellan's land.
  - 17. Not applicable.
  - 18. Does not know.
  - 19. Does not know.
  - 20. Already answered.
  - 21. Yes.
  - 22. Not applicable.
  - 23. No.
  - 24. No.
  - 25. No.
  - 26. Yes-would take \$12½ per acre.

The buildings on the lot are indifferent—about a dozen fruit trees.

# GARETT VANDERBURGH sworn.

- 1. No. 142, Thorold-100 acres.
- 2. About 40 acres.
- 3. 20 acres cleared land—some wild—all the timber taken.
  - 4. Common soil of the township.
  - 5. Lengthways-all west side cut off.
  - 6. 17 or 18 years-inherited.
- 7. Offered the land wanted to Mr. Merritt at £5 an acre—does not want to sell the residue.
  - 8. Not valued.
  - 9. Not valued.
- 10. Is a damage to him—rents a quarter of an acre at £5 a year on the Deep Cut.

- 11. No-has been a positive damage.
- 12. Yes—destroyed his farm—lost 21 apple trees—had to yield 15 or 18 tons of hay—rents a piece at £12 10s. a year to one Hunt.
- 13. No—There is a pond of water in front of his place at present.
  - 14. The canal is no accommodation to him.
  - 15. Does not answer.
  - 16. Not applicable.
  - 17. do.
  - 18. Not asked.
  - 19. Not Applicable.
  - 20. Already answered.
  - 21. No-merely a well.
- 22. Always had plenty of water (well water) on the farm.
  - 23. No.
  - 24. No.
  - 25. No-but was always for it.
  - 26. No.

Lost a quantity of rails—had 4 acres of wheat destrowed last year—had also potatoes destroyed by the workmen.

#### GEORGE MARLATT.

- 1. No. 50 & 32, Thorold-200 acres.
- 2. Mr. Merritt says about 20 acres.
- 3. All cleared.
- 4: Upland and meadow land—usual soil—14 or 15 acres good meadow land, an acre yielding on an average a ton.
- 5. About 24 years—purchased at different times—where the basin is, and similar land, paid nearly £55 currency an acre—was wild, i. e. a little improved, and but a little.
- 6. Runs irregularly through No. 50 and curves upon No. 32—taking but a little of No. 32;—32 may however be overflowed—cannot yet tell:
- 7. Would not sell the land taken by the Canal at £12 10s. an acre.
  - S. Not valued.
  - 9. Not valued.
- 10. Does not know—not offered a higher price—has not offered to sell.
  - 11. No.
- 12. Has had to make fences to the amount of £26 N. Y. currency, as per bill given in—the banks of canal will cause in many places stagnant water, unless drained—may produce sickness.
- 13: Would rather have had the Canal off his premises.
  - 14. Would rather have no Canal.
- 15. Of little consequence as applied to this part of the country.

- 16. The public Bridge will keep up the communication, but witness will have to travel a quarter of a mile or so to cross it.
- 17. Some Land will be overflowed and thereby the premises may be rendered more unhealthy.
  - 18. More valuable near Niagara he should think.
  - 19. No.
  - 20. No.
  - 21. Yes.
  - 22. Water on Farm abundant.
  - 23. No.
- 24. Not if a Culvert projected is erected, otherwise a Spring will be lost.
- 25. Did not interfere, would have petitioned against Canal for Sloop Navigation passing through his Lot.
  - 26. Not at present.

# [QUESTIONED BY MR. MERRITT.]

Nine years ago purchased 6 acres at \$110, at the corner of the Beaver Dam roads × roods. Purchased lot No. 32 three years ago—paid £2 an acre for the whole lot—never offered any specific price for piece cut off—would not have sold a corner acre for \$ before the Canal.

# LUKE CARROLL, sworn.

- 1. ½ of No. 29 or 30-50 acres Thorold, he believes.
  - 2. Mr. Merritt says 164 acres,
  - 3. Meadow Land.
  - 4. Do Do.-black soil.
- 5. Passes through East and West, leaving more on the North than the South side.
- 6. Ten years—paid £6 5s. an acre for the 50 acres, including buildings—a snug house and log barn.
- 7. Values land taken from him at £12 10s. an acre, so appraised by nieghbours—Apple trees \$7 each and Pears.
  - 8. The price given above mentioned.
- 9. Has offered to sell the place lately for \$1500, before Canal was talked of—asks no more now.
- 10. Cannot sell it at all now—a person refused to purchase it because the Canal passed through it.
  - 11. Cannot say.
- 12. Has caused the loss of all his Crops this year—the Cattle of the working parties are let in &c. &c. Has lost his Corn, Potatoes, Oats—4 acres of Corn, for Potatoes, 4 of Oats.
- 13. Not at present—the lot is divided—apprehends the water will run or leak into his cellar.
  - 14. Yes.
- 15. Thinks the Canal will benefit many lots very much—but not his.
- 16. Is to lose 20 apple trees, cut away or destroyed on the line of the Canal—an equal number of pear, peach, and cherry trees, I walnut tree. It is

- said a proper Bridge would cost £100—will have no public Bridge—about 20 acres divided off by Canal including land covered by water of Canal—making 6 or 7 acres cut off.
  - 17. Not applicable.
  - 18. Cannot say.
  - 19. Does not think it will.
- 20. No-would not give a dollar for the Canal, but 200 to get rid of it.
  - 21 It was.
  - 22. No.
- 23. There will be more water -but of no use to witness.
- 24. A Well will be filled up by Tow Path—no other Spring—the Spring or Well is walled up 12 feet.
  - 25. No-was favorable towards it.
  - 26. No.

Adds.—He will lose a pear tree that he would not take \$40 for. Wants to keep the piece cut off for woodland and sugar bush. Rents his place at £15 a year—never let before Canal talked of.

# WILLIAM YOUALL, sworn.

- 1. No. 16, Thorold-90 acres.
- 2. 3 or 4 acres.
- 3. Wild land.
- 4. Ordinary soil of Township.
- 5. Cuts 4 or 5 acres off the South corner.
- 6. A year—paid \$6½ per acre for it.
- 7. With improvements values it at \$15 an acre.
- 8. Nothing.
- 9. No.
- Has added to the value of the land—could obtain a higher price.
- 11. No advantage except in enhancing the value in his mind.
- 12. Has suffered from depredations of workmen—timber taken by men—inconvenience only temporary.
  - 13. No further than as above stated.
- 14. No-would rather the Canal go as it does at present.
  - 15. He does.
  - 16. Not applicable.
  - 17. Do.
  - 18. Do.
  - 19. Very little.
  - 20. Yes-as applied to his estate.
  - 21. None without digging for it.
- 22. Had to drive to Mr. Keefer's 1 of a mile—but has a Well now.
  - 23. Yes.

- 24. No superficial ones.
- 25. Petitioned for it.
- 26. Not disposed to sell the part cut off—four or five acres—Thinks the Canal will be the means of enhancing its value—is near the commencement of the locks.

The Board of Arbitrators adjourned.

Monday, 28th August 1826.

The Board of Arbitrators met.

#### ABSENT.

George Shaw, Crowell Willson, and John Warren.

PETER M. BALL appeared before the Board on behalf of the Estate of the late Jacob Ball, to which he is Administrator, and said that the widow Ball and himself were willing to go to an Arbitration, but declined signing any papers.

Moved, That the witnesses be excluded except those under examination.

#### Carried.

- 1. Thinks in 8 & 9 Concession Grantham. No. of lot not known.
  - 2. Mr. Merritt says 4 acres.
  - 3. Is cleared—part he thinks not hitherto ploughed.
  - 4. Good soil-clay.
- 5. Understands the wood is cut off from the cleared land—an angle cut off.
  - 6. In possession of last owner 25 years.
- 7. Estimates it at present at \$6000-150 acres improved.
- 8. Supposes it worth as much then as at present, a' good house and buildings on it.
  - 9. Did not estimate it then-says £1500 Cy.
  - 10. Cannot say-in his opinion it will require it.
  - 11. No.
- 12. It has—the fences have been taken down.— The excavated ground will injure the land on which it is placed.
- 13. Not unless more land than at present supposed is taken by the Company.
- 14. At present thinks the Canal injurious. If allowed the water for hydraulic purposes the value of the estate would be enhanced—not otherwise.
  - 15. It would depend upon the line of the canal.
- 16. It would depend upon the nature of the bridge required.
  - 17. No-cannot say.
- 18. Considers them more valuable on Niagara River—situation more pleasant, &c.
  - 19. Cannot say.
  - 20. No.
  - 21. Yes.
  - 22. Not to any inconvenient distance.

- 23. It will depend upon the Company.
  - 24. Cannot say.
  - 25. Did not interfere.
- 26. It belongs to a minor, and could not take upon himself to do so.

# WILLIAM HULL-a witness.

Knows the premises—has no land on canal—knows the line of the canal through the premises—cuts off an angle, including clearing and woods—the woodland at the corner. Cuts off a piece of woodland not accessible without a bridge. A lime kiln was established on the lot—does not speak to its value—would estimate the whole farm at £1000 currency—200 acres, £5 an acre—is a fine situation—has a good house on it. There is a spring near the lime kiln—it is supposed the canal will cut it off—does not know it was ever used for cattle or family use.

# THOMAS KERR, a claimant, sworn.

- 1. No. 10, 10th concession, Grantham-100 acres.
- 2. 8 or 9 acres.
- 3. All woodland except 12 acres.
- 4. Rocky, except the 1½ acres which had been sown with wheat.
- 5. Goes nearly through the centre—leaving one half cleared and the other half woodland.
- 6. Was given to his wife—occupied 16 or 17 years.
- 7. Offered that part used by canal at \$12½ an acre to Mr. Merritt—but now understanding that some land adjacent, more valuable than that part wanted by canal, which is principally rocky, will be taken—i. e. an acre to each lock, being three locks, would not sell the whole farm at less than 25 or 30 dollars per acre. The puddling in the locks will require clay perhaps to be taken from witness' field—if so would injure 15 or 16 acres.
  - 8. Did not value it.
  - 9. Did not value it.
  - 10. Does not think the canal beneficial to the farm.
  - 11. None
- 12. Has lost 1½ acres of wheat—moved fence to open line for canal—fence moved in February last.

  (See Bill.)
- 13. Apprehends 15 or 16 acres will be destroyed by clay taken for puddling—it is adjacent to the locks—if not taken of no consequence. Had a grove of maple along the line of the canal, which was cut down.
- 14. Would rather have no canal, or that it should go in any other direction, though it could not cross his farm in any other direction so little to his injury.
- 15. Should think land on the navigation would be the more valuable.
- 16. There is no public road within the width of a lot of him—cannot say what a bridge, &c. would cost.
  - 17. Not applicable.

 $oldsymbol{Z}3$ 

- 18. Lands towards Niagara have always sold highest, according to common report.
- 19. If allowed to take the water would allow him to irrigate some of his meadows.
  - 20. No.
- 21. No living streams on lot—no water without digging.
- 22. Except last season not more than a quarter of a mile of Mr. Ball's springs—last year had to go further.
- 23. If allowed access to the water it will be more convenient—not otherwise.
  - 24. No springs.
- 25. Signed a petition at first not saying by what route—hardly thinks he would have signed it if the line through his farm had been known.
- 26. No-cannot part with woodland.

# In answer to Mr. Merritt.

The nature of the soil cut off is clay—i. e. the woodland.—If allowed to irrigate it could raise grass from off it—could not however raise as much again from an acre. Denies no present advantage, such as selling or leasing building lots—a corner acre close to orchard he would not sell for \$90.

# Mr. Crowell Willson, an arbitrator, took his place. JACOB J. BALL sworn.

- 1. No. 12 & 13, 10th concession, Grantham, 200 acres, a public road between them.
  - 2. It is said 9 or 10 acres.
  - 3. Wild and cleared-more cleared than wild.
- 4. Soil clay-loom, &c. Under the mountain may be used as meadow or plough land.
  - 5. See diagram.
  - 6. Since 1806-devised to him.
- 7. Since the canal projected offered it for \$5000—would not have sold it at all, or so low, were it not for the canal passing throught it.
- 8. Did not value it—that it was worth more than at present—had no idea of selling it.
  - 9. Higher than at present.
  - 10. Thinks not.
  - 11. None.
- 12. Cuts his fields up awkwardly—takes in a part of the mountain with a valuable Stone Quarry in it.
- 13. Earth for puddling the Locks may be taken out of his fields—cannot yet say.
  - 14. Would prefer its going in another direction.
  - 15. Cannot say.
- 16. The public Bridge will enable him to cross except that the distance will be increased.
  - 17. Not applicable.
- 18. It depends upon the quality and situation—cannot say.

- 19. It could be done—cannot say whether the privilege can be claimed.
  - 20. No.
- 21. Well supplied with Springs which the Canal will destroy—were amply sufficient for the farm—for cattle, and other purposes, irrigation if required.
  - 22. Not of the farm.
  - 23. No.
- 24. Yes—will lose two good ones—one he is sure will be lost, and thinks the other also.
- 25. Did both—first for it—secondly against the alteration—not on account of the enlargement of tt, but its passing through his lot.
- 26. No—would not sell one part without the whole. Has springs remaining not so valuable as respects the vicinity of those lost. People purchase stone from the quarry.

Examined.—There are other places where there is stone, but the quantity and quality are not uniform.

Does not know precisely how much the Canal will deprive him of.

# ALEXANDER NICKISON, sworn.

- 1. The lot belongs to one widow Wright—lives on it—14, 7th concession Grantham, 100 acres.
  - 2. About 12 acres Mr. Merritt says.
  - 3. Wild land.
  - 4. Principally clay land.
  - 5. About 25 acres cut off on the South West corner.
- 6. Four years—took it to maintain the old Woman—was owned by her husband, now dead. Unknown if the heir is alive.
  - 7. Would if he owned it value it at \$15 per acre.
  - 8. At same price.
  - 9. About the same.
  - 10. Thinks it likely he could.
  - 11. Cannot say that it has been any.
- 12. Not more than in cutting off a part. Timber dertroyed—a sugar bush principally destroyed by the line of the Canal.
  - 13. Does not in particular—cuts off rail timber &c.
- 14. Would rather give up the land required for the Canal than not have it there.
  - 15. He does.
- 16. Does not know—there is a concession road not open.
  - 17. Not applicable.
  - 18. Does not know but he should.
- 19. Expects it will overflow some meadow constantly by the stoppage of a Creek.
  - 20. Yes.
  - 21. It is with brooks.
  - 22. Never off the farm.

23. Does not know that he will. 9. Do. Do. 24. None: The section of the hard He harder 10. Does not know, would, he thinks, hold it high-25. 7. Has refused \$2000 for it last year. Had the

offer before and since Canal projected.

- 23. No-not so convenient.
- 24. No-there is one-but it will not be lost.
- 25. No.
- 26. Cannot say.

## WILLIAM CHISHOLM.

- 1. Adjacent to the village of St. Catharines—owns four acres.
  - 2. It is said two acres.
  - 3. Cultivated land.
  - 4. Clay-bottom land.
  - 5. Cuts off one side.
- 6. Fourteen years—paid \$100 an acre for part of it, and \$— for a small strip—part of both taken for canal.
  - 7. At not less than prime cost.
  - 8. At same price.
  - 9. Was not in the market.
  - 10. Thinks it has.
  - 11. The lots in this vicinity are enhanced in value.
  - 12. Cut off a partand deprivedhim of pasture, &c.
  - 13. None.
  - 14. Would not wish to have the canal altered.
  - 15. Double or treble.
  - 16. Not applicable.
  - 17. Do.
- 18. Some lands on the Twelve Mile Creek equally valuable—generally the Niagara lands most so.
  - 19. Not applicable.
  - 20. He does.
  - 21. Yes.
  - 22. Not applicable.
  - 23. No.
  - 24. No.
- 25. Petitioned for it—would have done so for the enlargement.
  - 26. Not applicable.

Thinks the canal has enhanced the value of property in St. Catharines.

The canal has in general enhanced the value of property on the line from the Welland to the harbor, although some farms have suffered materially.—Cannot speak as to individual injury.

Examined—Would not have taken less for the four acres than he gave unless he could have sold the whole.

When the canal was projected lands were at a low price in this vicinity—not more so than some years before—but increased in value since. Lands in the village doubled or trebled in value.

## JONATHAN CLENDENNING

- 1. Part of 16 and 17 in vicinity of St. Catharines -55 acres more or less.
  - 2. About five acres or more.
- 3. Wood land—one and a half acre cleared and fenced.
  - 4. Very good loom and clay-bottom land.
  - 5. Crosses the lot, cutting off about three acres.
- 6. Paid thirty-two dollars and a half per acre for all except two acre lots—has had a title since 1820—for the two acres paid at the rate of £200, N. Y. C'y, per lot, including interest. The first cut was £100, N. Y. C'y ½ an acre taken for canal. The lot cost witness £150 principal. Had buildings on it not included in price—purchased it before canal projected—considered it worth it—was shortly after the War, when lands were high.
- 7. Exclusive of the three acres he lives upon he values it at £100 c'y. per acre—can sell it in town lots—means that part contiguous to the road—has sold some town lots.
  - S. Valued 20 acres of it at \$100 per acre.
- 9. Held it at \$200 (£50) per acre, but it was difficult to effect sales.
  - 10. Yes.
- 11. Has enhanced the price—doubled the value—town lots are more than doubled.
  - 12. Merely the loss of land.
  - 13. None.
  - 14. No-would prefer the canal.
  - 15. He does.
  - 16. A matter of no moment to witness.
  - 17. Not applicable.
- 18. From its situation should consider lands on the Niagara most valuable.
  - 19. No.
  - 20. He does.
  - 21. Has good springs.
  - 22. No.
  - 23. No.
  - 24. No.
  - 25. Does not recollect—petitioned for a bridge.
  - 26. No.

WILLIAM PARNELL, for his brother Francis Goring Parnell.

- West ½ of 15, 6th Concession Grantham—fifty acres.
  - 2. Mr. Merritt says about 5 acres.
  - 3. Part cleared-.part wild.
  - 4. Loom and clay.
  - 5. Irregularly—cuts off better than one third.

- 6. Possessed since 1824—cost eight or nine hundred dollars before canal projected. Bought it for the privilege of a mill (saw mill) seat.
  - 7. Would sell it for first cost.
  - 8. Not applicable.
  - 9. About \$900.
  - 10. No-thinks value not so much.
  - 11. No.
- 12. Has thrown open a field of 8 acres, besides cutting off a part—destroys the mill seat unless allowed the privilege of water—claims no damage for field of 8 acres.
  - 13. Not except the difficulty of crossing the canal.
- 14. Thinks so—would rather have the canal elsewhere.
  - 15. Would rather have lands retired from a canal-
  - 16. Cannot tell-will flow very wide.
  - 17. Not applicable.
  - 18. Do.
  - 19. No.
  - 20. Not in the present case.
  - 21. Yes.
  - 22. No.
  - 23. No.
  - 24. No.
  - 25. Neither.
  - 26. Not without selling the whole.

The Lot has 25 acres cultivated.

Shews a bond granting the privilege of overflowing the East half of the lot (Rycart's) at \$25 per acreas far as a dam for machinery might extend—no dam erected hitherto. Could raise a head of eight feet water by overflowing Rycart's half of the lot—cannot say how long such a head could be kept. There is no living course—depends upon floods in Spring and Fall. Paid for the greatest part of the lot in cash—was a cash agreement.

The Board of Arbitrators adjourned until So'clock A. M. of the morrow.

Tuesday, 29th August 1826.

The Board of Arbitrators met.

# ABSENT.

Thomas Butler, George Ball, Marshall Lewis, George Shaw, George Lacy, William McClellan, and John Warren.

# JOHN CLENDENNING, sworn.

- 1. No. 17, 7th Concession Grantham-90 acres.
- 2. About 3 acres.
- 3. Cleared.
- 4. Bottom land.

- 5. Passes through a corner, cutting off 1 or 1 an
  - 6. Since 1812-inherited.
- Values the farm at £12 10s. per acre—has extensive clearings and improvements.
  - 8. Cannot say-did not value it.
  - 9. Did not value it.
  - 10. Does not know that he could.
  - 11. None.
- 12. Thinks it is—takes his land—had a clear stream of the Twelve Mile Creek before which will now be dammed or stopped up and rendered stagnant.
- 13. Apprehends a bottom of 5 acres will be overflowed by the back water of the canal.—Is all the meadow attached to the farm, or the greater part of it.
  - 14. Had rather the canal had gone elsewhere.
  - 15. Not in a situation such as his.
- 16. Will have no way of getting to the highway unless by crossing the canal without the sufferance of his neighbors.
  - 17. Not applicable.
- 18. Considered his farm as that of any one else.—
  If he owned a farm at each place would ask more for
  the Niagara one.
  - 19. No.
  - 20. No.
  - 21. Yes.
  - 22. Not of the farm.
  - 23. No--not such good water.
  - 24. No.
  - 25. Petitioned for the bridge-not for the canal.
  - 26. Supposes the Company will take it.

Left a small piece of land along the creek for a road—sold between 5 and 6 acres—John Clendenning at \$100—a tract joining his farm.

Mr. GEORGE BALL came in. SAMUEL THEAL, an arbitrator on the part of

## JACOB BOWMAN, sworn.

- 1. See plan 31 Thorold 100 acres.
- 2. About 16 acres will be overflowed.
- 3. Almost all cleared—a little wood—very valuable.
  - 4. Mendow land or plough land—excellent.
- 5. Overflows the end of the South West angle, and cuts off 15 or 16 acres of wood land.
- 6. Was deeded to him by his Grandfather—In possession a few years only.
- 7. If the Canal did not go through it \$100-no buildings on it.

A4

- 8. Thinks £200 currency.
- 9. Do.
- 10. At present the Canal is a disadvantage...if the Canal were finished perhaps not--though it would drown a tract still.
  - 11. No.
- 12. Yes---overflowing all the meadow land---timber cut off.
  - 13. No.
- 14. Cannot say. If his land, should consider the damages a great deal more than the value of the Canal to the place.
  - 15. If the Canal were finished should say-Yes.
- 16. Cannot say—there is a public road if not over-flowed.
  - 17. Not applicable.
  - 18. Ycs.
  - 19. No.
  - 20. No.
- 21. Yes-creek always had water and a good spring.
  - 22. Not off the same.
  - 23. No-thinks not.
- 24. It may injure one—the only one—not sure—thinks it will.
  - 25. Cannot say-thinks not.
- 26. The owner says not—would sell the whole—was offered \$600 in cash and a lot of land in one of the new townships, valued at \$400—cannot say what he would now ask.

Estimates the timber cut off at \$50. The timber has only been taken from the land that will be over-flowed.

Never knew the meadow to be mowed—has known it yield good Wheat harvest a year or two ago.

Of the 16 acres that will be overflowed 10 or 12 cleared, but the woodland is equally valuable.

The premises not cultivated till lately—always an open common.

George Lacey, an Arbitrator, took his seat.

# JOB NORTHRUP sworn.

- 1. No. 21, 4th concession Grantham, 200 acres.
- 2. About 8 acres—cuts off about 2 acres. Excavated earth thrown against side hill.
  - 3. All cleared.
  - 4. Bottom land.
  - 5. About 2 acres of meadow land cut off.
- 6. Five years. Paid \$6000. Is Sheriff Merritt's Farm.

- Mr. Lewis and Mr. McClellan came in.
- 7. At \$8000, would not take less.
- 8. At \$6000.
- 9. Did not value it.
- 10. Does not know that he could.—Thinks it enhances the value of land generally.
  - 11. No.
- 12. Is a friend to the Canal and thinks little of it—but 30 acres of land have been laid open. He does not set up a claim for damage.
  - 13. No.
  - 14. Would prefer the Canal.
- 15. Thinks land 5 or 6 miles off equally improved. and that all is enhanced in value.
  - 16. Cannot say.
  - 17. Thinks it will.
- 18. Cannot say he did-preferred the 12 mile creek himself.
  - 19. No.
- 20. To some it would—to him in other business than farming thinks it would, but to a more farmer should not think it of any advantage.
  - 21. Yes.
  - 22. Not off Farm.
  - 23. No-much the same.
  - 24. No.
  - 25. Petitioned for it.
- 26. Yes—would have sold the meadow land at \$100 per acre before Canal—would give that for Gould's meadow now. At the time the Canal was projected did not want meadow land.

# JOHN BROWN, sworn.

- 1. 102 in Chippawa, 100 acres—also 101—100 acres and B. F.—the whole 220 acres.
  - 2. 400 yards about 2 chains wide, say 12 acres.
  - 3. All cleared.
- 4. Lies along a creek—some marsh—some meadow—an acre of marsh—some ridge land—1 plough and 1 meadow land. The creek valuable for the sake of the water.
  - 5. Cuts off about 30 acres on the West side.
- 6. Three years—exchanged it for another property £1000 N. Y. currency.
  - 7. About £1000 N. Y. currency.
  - 8. Not applicable.
  - 9. Did not then own it.
- 10. Does not know that he could—has offered to sell it.

- 11. No.
- 12. Yes—in its present route had to make more fences—loses the convenience of water. The approach to the Chippawa is soft and bad for cattle. The fencing, &c., equal to \$40. On the old route there is a hole cut close to the barn—intercepts the old approach to the farm—an acre dug—would cost two or three hundred dellars to fill it up. There is a chain between the barn and excavation. Two bearing apple trees covered up with excavation.
  - 13. No more fencing will be required.
- 14. Would rather have had the Canal elsewhere—cut timber on the old route about 30 chains long and upwards of 2 chains wide—upwards of 6 acres—some other timber cut also—would not have had it done for \$200—lost the best timber.
  - 15. He does not.
  - 16. There is a public road.
  - 17. Not applicable.
  - 18. Niagara lands sold highest.
  - 19. No.
  - 20. Not in his case.
  - 21. Yes-better before than at present.
  - 22. Not off the farm.
  - 23. No.
  - 24. Had two, which the canal has destroyed.]
  - 25. No.
- 26. Yes—It is meadow land—valuable to the farm—cannot say price—would rather sell the whole farm. Tendered a bill of damages. Thinks he offered to take \$700 in full of all damage on old route. The Company offered a mere trifle.
  - Mr. Butler came in.

Witness declined a thousand dollars for an acre of the meadow land at the mouth of the canal—i. c. the

Estimates buildings at \$1000 when he purchased the place.

#### Mr. MISNER recalled.

Is asked as to the value of the timber taken on the old route—the six acres—its damage to the farm—\$200 would have cleared the six acres for the plough for the timber. Clearing and fencing land worth \$12½—different prices.

Is asked the damage to Carroll's farm—by loss of timber cut over the line of the canal—thinks \$20.

# MARSHALL LEWIS on behalf of the Company, sworn.

Says he examined the timber on Brown's farm; particularly last year to seek timber for a bridge across the Deep Cut; saw the line of the old route, and he could tell what timber had been cut; Oak not then removed; some Pine cut and all carried away; some Beech trees cut, and others; not cleared all through, but the best timber is cut out; on-

some acres not more than 3 or 4 trees cut. The timber picked here and there throughout; should not think there were more than 3000 feet of timber Pine and Oak cut on the 6 acres; not worth more than a dollar per hundred feet standing; was cut for the Canal; many of the trees good timber trees. The Oak trees would average 35 feet. Of the 3000 feet of timber more than half Oak. The Beech trees had been hewed; the six acres not cut all off. The choice timber merely picked here and there for the Canal works, but not all removed.

# George Keefer, Esq., sworn on behalf of the Company.

- 1. Lots 6 and 17 in Thorold, 200 acres.
- 2. Twenty or thirty acres.
- 3. Almost all cleared.
- 4. Good soil.
- 5. Cuts off an adjoining lot-passes lengthways through No. 6.
- 6. 32 years—paid them £106, N. Y. currency for 200 acres.
- 7. At about £10 an acre, including building—would not sell it for that or less than that.
  - 8. About £5.
  - 9. About £5.
- Yes—knows he can—has sold small lots since Canal.
  - 11. Has enhanced its value.
- 12. No other than depriving them of soil and opening his fences—moved his fences.
  - 13. None-anticipates advantage.
  - 14. Would prefer Canal.
  - 15. Yes.
- 16. A public bridge will save the necessity of a private one.
  - 17. No.
  - 18. Always did-bore a higher price.
  - 19. Thinks so.
  - 20. Yes-a great deal more.
- 21. It was with springs better than the generality of farms.
  - 22. Never before last season—then had.
  - 23. Anticipates it.
- 24. One will—a very good one belonging to Still House—there will be three left.
  - 25. Petitioned for Canal-always for it.
  - 26. No.

Adds, if he had no other than agricultural pursuits would then think the benefit of the Canal equivalent to the loss of soil—more so on his premises—thinks some of his neighbors' property will be benefitted as much as his—purchased a lot (17) this year at double what he would have given before on account of the Canal—is well acquainted with the land from the

Welland to St. Catharines.—from hence (St. Catharines) to his own place is a ravine—bottom land—thinks Dick's Creek would have remained a wilderness a long time had it not been for the Canal. Mr. Phelps bought two lots on it at \$12½ an acre, and one at ten. Would hardly think the valley of Dick's Creek worth clearing, considering the steepness of the banks—should not think the ravine of any benefit to a farm—lands on the creek have sold from 10 to 12 dollars since Canal. Conceives them enhanced in value. Thinks the farms will be benefitted—thinks any farm on the Canal from St. Catharines to the Welland will sell for more than before.

Does not think the water running in Dick's creek sufficient in duration to pay the expense of a Saw Mill.—Has seen it tried on better streams and fail.

No living stream.—Fed by rains, snows, &c.—Mr. Deddrick has a Saw Mill further up the creek does business—a Mill built near St. Catharies in the valley never did any business.

Mr. Dunn bought a let in rear of Brown's of the Chippawa at \$6 an acre since Canal projected. Has sold pine timber to the Canal Contractors at a dollar a hundred. Has a grove of pines very thick. One object of Mr. Phelps in buying Deddrick's let was to get timber for the Locks.—Thinks it was well timbered—contained pine and oak—considers the average price of land throughout the townships of Grantham and Thorold from \$ to 10 dollars.—Has bought and sold a good deal.—Meadow more valuable than ordinary land—would cost 10 or 12 dollars to clear land—an acre of meadow worth two of upland—meadow worth £5.

Expects the Canal, now under contract, will go into operation next fall—is satisfied it will go into operation.—Has not the least idea funds will be wanted.—He took 20 shares at first—not sold any nor increased the number.

# Mr. Lewis, recalled.

Thinks a Draw Bridge would cost 200 or 300 dollars—a floating bridge \$100. If recesses made by Company a Scow could be had for \$40.

GEORGE ADAMS, Esq. sworn, upon Mr. Merritt's Claim.

Says the Mill Seat was considered a good one.—The dam kept breaking occasionally.—Mr. Merritt paid him £100 Cy. for one third of the Mill Seat and adjoining land—a Saw Mill had been built but did not go into operation.—The dam broke.—Would have been willing to give £500 for the establishment two years ago—that is when Mr. Merritt purchased it. The Canal will require a good deal more land than the Mill Seat itself. Mr. Merrit repaired the Mills.—The Mill was rented in 1822 at £100 per annum currency, but he was to allow for certain repairs out of it—i. e. a breach in the dam. It had been at first a 9 foot dam, but had sunk to 7 feet.—Mr. Merritt raised it—witness does not know how much.

Values the average meadow land from St. Catharines to the Lake at £100 an acre with the privilege of water—if no water not higher than uplands.—Lands on Dick's creek not of such good quality nor

so valuable—would rather have the valley land than upland.—Considers one acre of valley worth 4 acres of upland. The banks of the 12 mile creek bear excellent wheat.—Average of 100 acre farms in Grantham from 10 to 20 dellars per acre; depends upon situation. Thinks he would give more than £5 an acre for some farms on the line of the Canal. Names Mr. Ball's—Mr. Shaver's—before Canal in contemplation lands in this vicinity sold for £5 an acre.—Thinks his farm and many others seriously injured—may benefit some and injure others.

Thinks the farm from St. Catharines to the Lake will be injured—but may enhance the value if owners disposed to sell.

Thinks many farms between St. Catharines and the Welland river would not bring so much as before the Canal was projected.

Alfred Barrett, on behalf of the Company, sworn.

Was employed on the Eric Canal.—There was much opposition to it by the land owners—saw more of it there, such as opposing Surveys &.—People supposed it would sink the value of property.—Lands were appraised by Commissioners appointed by the Legislature.—The Canal Commissioners were also afterwards—were required to consider advantages as well as disadvantages.—The former generally considered to prevail except almost the whole of a Town Lot were taken, or a Mill Seat or other valuable property—since the Canal has gone into operation many of the strongest opponents have changed their sentiments and think well of it. Is acquainted well with the line of the Welland Canal—thinks the value of property will be enhanced generally on the line of the Canal.

Considers the Harbor site unhealthy from the falling of the marshes &c.—being sickly this year from that cause.

Eric Canal 40 feet wide on the surface of the water.

This Canal a little wider at top, but not much.

On the Eric Canal there are accommodation Bridges built at the public expense--one to two farms.

Property enhanced by the establishment of new ports of entry--more ready sale of produce. The property has also risen on the Eric Canal. Infers from that a similar result here.

Expects the Canal will be completed in a year from October next. The whole line is estimated at two hundred thousand pounds by other Engineers—not estimated by him. The part completed has been done within the estimate—cannot without reference tell how much has been expended. At the expiration of this month (August) half the expense will be incurred, perhaps a little more. Has been an Engineer eight years—knows of no obstacle in the way of the completion of the work—never heard or read of a Canal, the ulterior objects of which are so great as this made at the expense and within the time estimated for this.

The Eric Canal has caused increase of settlement and cultivation.

When the Eric Canal was projected on the north side of Mud Creek the people made high claims, but afterwards when the line on the south side the creek was adopted they offered to give up their property for nothing with a view to it.—Vast quantities of timber pass the Eric Canal—staves drawn 10 miles.—Does not consider the Eric Canal unhealthy.—Thinks this Canal will render the country more healthy.

# WALTER DETTRICK, on behalf of the Company, sworn.

Was present when Mr. Merritt purchased a lot from his father—14, 5th concession, Grantham—had valuable timber on it—was a heavy timbered lot, as much so as any—was sold at \$10 an acre—£100 in hand, the remainder in three years, without interest—his father had offered it for \$500 about nine months before canal projected—thinks the canal enhanced its price—thinks the canal has raised the value of property on the line.

#### OLIVER PHELPS sworn.

- 1. 12, 13, & 14, 8th concession, Grantham—300
  - 2. About 13 acres.
  - 3. Wild land.
  - 4. Usual soil of the country-a ravine.
- 5. Enters south east corner of middle lot, and out at the north west corner of same lot—cuts a little on the corner of the others—cuts the centre lot nearly in the middle, but angling.
- 6. Last fall paid \$2,500 for 200 acres and \$1000 for 100 acres.
- 7. Has been cleared and timber cut since—considered it a good purchase—would not like to sell it for what it cost.
  - 8. Not applicable.
  - 9. Do.
- 10. Thinks so—would not have purchased it had it notbeen for the canal—wanted the timber and thought the canal would enhance the value.
  - 11. Cannot say it has in particular.
  - 12. No.
  - 13. No.
  - 14. Yes.
- 15. Should think lands on or adjacent to canal most valuable.
- 16. There are locks on the line of his lots.—Swing bridges might be erected.
  - 17.
  - 18.
  - 19. Yes-if the Company will allow it.
  - 20. Yes.
  - 21. Not very well.
  - 22.

- 23. Thinks so.
- 24. No.
- 25. No.
- 26. Has no wish to sell.

#### JOHN HAINER SWOTE.

- 1. 20, 6th concession, Grantham—298 acres (in lot 100).
- 2. About 13 or 14 acres, including a small piece sold to Mr. Adams.
  - 3. Cleared.
  - 4. Clay-interval and bottom.
  - 5. Cuts off the front.
  - 6. Possessed 3 years—inherited.
- 7. Sold 5 acres for \$270 since canal projected last fall.
  - 8. Cannot say.
- 9. Should say about 10 dollars an acre—could sell it for that.
  - 10. Does not know but it has a little.
- 11. It has to that not destroyed by increasing its value.
  - 12. No.
  - 13. No.
  - 14. Would rather have no canal.
  - 15. Cannot say.
  - 16.
  - 17.
  - 18.
  - 19. No.
  - 20. No.
  - 21. Yes.
  - 22
  - 23. No.
  - 24. No.
- 25. Petitioned for it—would rather have had a boat navigation.
  - 26. Not applicable.

Does not place any particular value upon the land taken for a tow path—or indeed the canal—apprehends his bottom land will be overflowed by the back water of the canal.

- 1. Mr. William Sanderson,
- 2. Mrs. Isabella Stewart,
- 3. Mrs. Shipman, 4. Mr. William C. Chase,
- Do not wish to be examined, but wish arbitrators to adjudge with the

All in the village of St. Catharines J rest.

Mr. Adams thinks the loss nothing—that the canal enhances value equal to the loss.

Mr. Sanderson has from 1 to 1 of an acre cut off from his lot about 2 or 3 acres.

**B4** 

Mrs. Shipman & of an acre cut off.

Mrs. Stewart 10 " cut off.

Mrs. Chase, ‡ " cut off.

#### WILLIAM FLAMILTON MERRITT sworn.

- 1. 18 & 19,6th concession, Grantham-250 acres.
- 2. 10 or 12 acres—exclusive of the mill sent and land flowed thereby—6 acres.
  - 3. Cleared.
  - 4. Meadow--side land---mill seat.
  - 5. Cuts off the front .-- divides about an acre off.
- 6. Since 1816--paid £2 10s, per acre for 24 acres in 1820--purchased 17 acres at \$17½ per acre--purchased mill seat and 150 acres adjoining, for about \$4000--some wild land.
- Altogether at £25 per acre---100 acres valued much less.
- 8. 5 or six years ago land was high--afterwards fell in value.
- 9. When Canal projected land at lowest price-say £6 5s. per acre, would sell the meadow land (if no Canal) at \$30 an acre if a farmer.
  - 10. Yes, double-treble.
  - 11. Increased the value and purchasers.
- 12. Fences removed—kettles at salt works must be taken up—damage or expense £25—has lost the use of the mill since May or June last—claims the interest on the appraisal of its value claims damages like others—values mill and seat at \$3000—mill seat about seven acres.
  - 13. Overflowing valuable bottom land.
- 14. would rather lose half his property than the Canal. If half taken, residue will be more valuable than whole otherwise.
  - 15. Yes.
- 16. Not applicable—says his opinion is the Company will afford access so as not to incommode the owners of lands.
  - 17. Yes.
  - 18. Yes --- situation more favorable.
  - 19. No.
  - 20. Yes.
  - 21. Yes.
  - 22. Not off farm.
  - 23. Not generally--in some fields well.
- 24. No-will cover salt spring, but thinks it may be diked.
  - 25. Yes.
  - 26. No.
- Mr. Merritt states, that except in the spring and fall the mouth of the 12 Mile Creek not open—not more than one-third or one-fourth of the year. Tried to bring goods up, but did not find the navigation so practicable as to render it expedient for commercial purposes.
- Mr. Merritt delivered in some written observations as Agent of the Company.

#### DARIUS DAVENPORT sworn for Mr. MERRITT.

Rented Mr. Merritt's mills in 1825. Rent calculated at \$450 per year—up to February last rent to be \$100 in lumber, at market price, 100 bushels of rye and corn, 400 bushels of wheat—lumber worth in cash 5s., and in proportion—Rye 2s. 6d. currency per bushel—Corn 2s. 6d.—wheat 3s. 9d. currency per bushel. Was to keep mill in as good repair, and leave it as good as found, except natural wear and tear. Were in as good order when he left them as before—us good as common run of mills.

The Board of Arbitrators adjourned till 10 o'clock

a. m., of the morrow.

As a preliminary motion it was Revolved, That the Board deliberate in private: The room was accordingly cleared.

WEDNESDAY, 30th August, 1826. The Board of Arbitrators met.

#### ABSENT :

#### John Warren.

Mr. Clark having gone to view the line of the Canal, It was moved by Mr. Macaulay, and carried, That Dr. Powell should resume the Chair proteon.

PHILIP CARROL, on behalf of his father says:—
He counted the stumps upon his father's lot where
the Canal passes, i. c. supposed to be beyond the
line—the line is not staked. Postponed.

# VALENTINE WARD, a millwright, sworn on behalf of Francis G. Parnell.

Knows Dick's Creek—Rycart's property—Rycart asked him to level a mill seat—did not—said there was a seat—that it would not do much business—would go \(\frac{1}{2}\) of the year—cannot say the head of water, not having levelled it—from the eye should think 8 feet head—means a saw mill—could raise a head of 8 feet without overflowing next lot. Timber for sawing abundant in the neighborhood. There is no living stream—but in Spring and Fall there is water sufficient.

# ALFRED BARRETT, (Engineer) on behalf of the Company, says,

He examined the premises this morning—the fall from the road to Parnell's line is six feet and an inch or so—the distance is 20 or 25 chains as the Ravine runs—if sufficient quantity of water would give head enough for a saw mill—from appearances should not think it worth while for any one to build a mill upon it—no stream—fed by rains—freshets, &c.—was here in May last—a large quantity of water accumulated at a rainy period in July last, but soon subsided—the Ravine about 4 chains wide.

Mr. Lewis says—he resided in the vicinity of the premises since last March—knows it well—should not advise any one to erect a mill there—saw the remains of an old mill further down—supposed the person threw away his money. Mr. Lewis is a mill-wright. From the head that could be raised does not

think the casual supplies of water would be of sufficient advantage to support a saw mill.

JAMES DETTRICK, sworm for FRANCIS G. PARNELL,

He once owned the mill called Dettrick's mill on the same Ravine as Parnell's seat—a stream comes in below Dettrick's mill, indeed several branches. As to his mill, its going depends much upon the seasons and supplies of water—goes three months or more. Has a head of 9 feet. Has a small pond not so large as Parnell could raise-would build a mill on it if his. Does not know the extent of dam that would be required. His own mill and dam cost about \$1000—his dam is about 100 feet—one saw built for two—has sawed nearly 100,000 feet this season-was a better season than usual-did not do so much last year. Thinks it would average 100,000 feet a year.

Mr. Clark having joined the Board,

#### PHILIP CARROL, resumed.

He counted the Pine and Oak stumps-counted 60 Pine and 30 Oak without the limits of the Canal route,-i. e. beyond the bank of the Canal-the outline not seen that he knows of-never forbid that he knows of-cut beyond where earth is thrown out.

Mr. Mcrritt says no one has cut any by the authority of the Company.

Mr. Merritt states that the Company has never authorised any person to cut timber beyond the line.

Witness says, there are 15 shanties on the line of the Canal. Firewood off his father's lot.

The following were moved and adopted as principles by which the arbitrators should be governed in their decisions.

1. It is resolved to proceed in the arbitration upon the assumption that the section of the Canal from the Welland River to Dalhousie Harbor will be completed and go into operation as required by the Act, and as anticipated by the Company and the public— and that in a general point of view it will hereafter prove as advantageous to the public as well as to the adjacent estates and country in its vicinity as canals in other parts of the world have hitherto done under circumstances equally favorable.

2. But should any unforeseen obstacles prevent the completion of the Canal according to the reasonable expectations at present entertained, or produce any other unfavorable change of circumstances not contemplated the basis of the awards now to be made shall be considered so far destroyed as fairly to entitle the individual proprietors in question to seek a further remuneration for the loss of their property or

other damage.

With regard to the advantages or disadvantages of the Canal as respects the adjacent estates it is not proposed to consider the general rise of property on the line of the Canal, and the additional price at which sales thereof might be effected, as uni-formily to be opposed to the value of property taken for or damaged in consequence of the Canal, or that the amount of enhanced value should always be

balanced against the actual or necessary loss. The application of such advantages depending, in our construction of the Statute, very much upon local circumstances.

4. It is however conceived to be the meaning of the Act that any peculiar local advantages (such as facility of sales of town lots, or other prominent advantages to an estate which may be a matter of commercial speculation rather than of agricultural use) should be considered—as also such as may accrue to any contiguous estates entirely devoted to agriculture-that is to say, improving the health of the situation, increasing the supply of water, reclaiming wet and marshy lands, affording facilities to irrigation, establishing mills and other machinery in the vicinity, affording a more easy transport, ensuring more ready sales and more convenient markets to the farmer, and many other benefits necessarily resulting in the completion of the canal.

5. It is likewise conceived that the great public object in view in the construction of the canal, and the general rule in all countries, that private interests should yield to those of the public; should here so iar operate as to supersede any claim for compensation on the ground of the owner's personal attachment to the particular part of his estate required and taken; it being deemed just, and in accordance with the -rue spirit of all boards appointed for such ob jects as the present, not to award to any individuals more than the intrinsic value of the property taken or damaged—considering nevertheless (if important) the peculiar value of any particular lands to the estate generally on the one hand and the benefits accruing to the residue on the other hand.
6. Lands to be appraised by the acre when prac-

ticable-quantity to be taken as stated by the Company, with a proviso as to any excess or deficiency.

- 7. The nature of the soil to be specified.
- 8. Each case to be considered in rotation.
- 9. Secretary to record decisions and names of Yeas and Nays in each case.
- 10. At the end of the day all the Arbitrators to sign the minutes.
- 11. When the award is prepared, the year to sign each case in favor of which they vote.

The Arbitrators then proceeded to award upon the several cases a- follows-

#### 1st. Case—NATHAN PAWLING.

Upon the question being put that the advantages of the Canal to the Estate of the said Nathan Pawling are fully equivalent to the loss of property occasioned thereby, and that lie has no claim to any it nureration from the Welland Canal Company—the Year and Nays were as follows :--

Yeas.—Messrs. Jarvis, Black, Davis, Theal, Wilson, Nelles, Keefer, Ball, Lewis, Powell, Minterger, Woodruff, Shaw, Durham, Street, Butler, Wood, A. Nelles, Macaulay, Clark.

Nays .- Messrs. McBride, Smith, McClellan, Lacy, and Hill. is the grain field, the winter in the H

Carried.

#### 2nd. Case-Robert Brown.

16—40 acres.—Principally meadow, of which 4—40 is out of fence, leaving 12 acres of meadow and 4—40 out of fence.

Carried unanimously that claimant is entitled to remuneration.

It being proposed that each Arbitrator should name what he considered a fair compensation for the 12 acres of meadow,

Bridge not decided.

Voted to be adjusted at the end.

The sum of £12 10s, per acre being proposed for the 12 acres of meadow land—

Yeas.—Messrs. Jarvis, Black, Davis, McBride, Wilson, R. Nelles, Smith, Keefer, Powell, McClellan, Lewis, Lacey, Wood, Macaulay—14.

Nays.—Messrs. Butler, Street, Woodruff, Ball, Mittleberger, A Nelles, Shaw, Durham, Theal, Hill, Clark, 11.

Carried.—12 acres of meadow at £12 10 per acre.

The sum of £5 per acre was proposed for the 4½ acres.

Yeas.—Messrs. Clark, Butler, Street, Jarvis, R. Nelles, Ball, Mittleberger, A. Nelles, McClellan, Lacy, Durham, Theal, Hill, 13.

Nays.—Messrs. Black, Davis, McBride, Willson, Keefer, Smith, Lewis, Powell, Macaulay, 9.

Messrs. Woodruff and Shaw do not vote.

Awarded £12 10 per acre for 12 acres meadow. £ 5 per acre for 4½ acres.

And at that rate for more or less of land outside the fence.

3rd.—JACOB TEN BROECK.

9\$ Acres.

£13 per acre was proposed for 3 acres taken for a Tow Path.

Yeas.—Messrs. Clark, Butler, Street, Woodruff, R. Nelles, Ball, Mittleberger, A. Nelles, Shaw, Lacey, Durham, Theal, Hill.—13.

Nays.—Mersrs. Jarvis, Black, Davis, McBride, Wilson, Smith, Keefer, Powell, McClellan, Lewis, Wood, Macaulay.—12.

Carried.

The sum of £7 10 per acre was proposed for the residue—about 6  $6\frac{3}{4}$  acres.

Yeas.—Messrs. Street, Jarvis, Black, Davis, McBride, Willson, Smith, Keefer, Mittleberger, McClellan, Powell, Lewis, Wood, Theal, Macaulay.—15.

Nays.—Messrs. Butler, R. Nelles, Ball, A. Nelles, Shaw, Lacey, Durham, Hill, Clark.—9.

Carried.

For any excess of meadow land as good as the Tow Path, at the rate of £13 per acre.

For land similar to the residue of the  $9\frac{9}{4}$  acres in Engineer's schedule at the rate of £7 10 per acre.

Moved,—That the advantages of the Canal are equal to the loss of the 12 acres meadow and marsh that will be overflowed joining Mr. Ball's—the point

Yeas.—Messrs. Street, Woodruff, Jarvis, Black, Davis, McBride, R. Nelles, Willson. Smith, Keefer, A. Nelles, Shaw, McClellan, Powell, Lewis, Theal, Wood, Clark, Mecaulay.—19.

Nays.—Messrs. Mittleberger, Lacy, Durham, Hill, Butler, Ball.—6.

Carried.

#### 4th-John Ten Broeck.

Moved,—That the advantages of the Canal are equivalent to the loss of soil occasioned by the Canal, being the quantity actually required for the Canal below the bridge, but if any meadow lands be overflowed by the Canal the same to be paid for at the rate of £13 per acre. If any land cut off but not overflowed, to belong to claimant.

Yeas.—Messrs. Street, Woodruff, Jarvis, Black, McBride, Davis, R. Nelles, Willson, Keefer, Ball, Shaw, Powell, McClellan, Lewis, Lacy, Durham, Theal, Hill, Wood, Clark, Macaulay.—21.

Nays.—Messrs. Butler, Smith, Mittleberger, 3. Carried.

#### 5th.—Job Northrup.

Moved,—That the advantages of the Canal are equivalent to the disadvantages, so far as respects the soil actually required for the Canal—but if any extra land shall be taken for hydraulic or other purposes, except the actual construction of the Canal, the same to be paid for at the rate of £25 per acre.

Yeas .- Messrs. Clark, Butler, Street, Woodruff, Black, Ball, Mittleberger, Smith, A. Nelles, Shaw, McClellan, Lacey, Durham, Hill, Macaulay.—15.

Nays.—Messrs. Jarvis, McBride, Davis, Willson,

R. Nelles, Keefer, Powell, Lewis, Theal, Wood, 10.

Carried.

#### 6th .- ADAM GOULD.

Eight acres of meadow valued at £12 10 per acre,

and so for more or less.

Yeas.—Messrs. Jarvis, Black, McBride, Davis, Willson, R. Nelles, Mittleberger, Smith, Keefer, McClellan, Powell, Lewis, Theal, Wood, Macaulay,

Nays .- Messrs. Clark, Butler, Street, Woodruff, Ball, A. Nelles, Shaw, Denham, Hill, Lacey .- 10. Carried.

7th.—John Hainer Backes. Advantages considered equivalent to disadvanta-Unanimous.

Sth.—Thomas Merritt and William H. Merritt Nine and a half acres, exclusive of mill seat-advantages equal to loss.

Unanimous.

For mills, adjacent lands, and appurtenances, £600. Unanimous.

9th.—John Clendinning.

310 acres overflowed.

1 ditto for a lock crection.

Advantages equivalent to the 310 acres specified

in the Engineer's schedule.

The half acre for lock erections, and any meadow not overflowed not included in the Engineer's schedule, at £25 per acre.

Unanimous.

10th.—WILLIAM CHISHOLM. Considered unanimously that advantages are equal to disadvantages.
William Chase,

William Sanderson, Isabella Stewart, Elizabeth Shipman.

Elias J. Adams, name inserted at the instance of

Mr. Woodruff, his Arbitrator.

In the above five cases the advantages are unanimously considered equivalent to the disadvantages.

JONATHAN CLENDENNING. Considered uranimously that advantages are equivalent to disadvantages.

#### 11th.—Francis Goring Parnell

5 acres. A mill seat. Awarded unanimously £30.

12th.—ZACHARIAH RYCART.

5 acres. Allowed unanimously £15.

#### 10th.—John Soper.

Considered unanimously that advantages are equivalent to disadvantages.

### 13th.—Robert Dettrick, 33.

Allowed unanimously £2 10 per acre for the land taken for or overflowed by the Canal.

#### 14th.-Mrs. WRIGHT.

13 acres required for Canal, and one acre adjacent to each Lock.

The benefits of the Canal equivalent to the land actually taken for the Canal.

The sum of £3 10 for the acre of land adjacent to each Lock, to be taken for hydraulic purposes-that is £3 10 for each acre so taken.

Yeas.—Messrs. Jarvis, Black, McBride, Davis, Willson, R. Nelles, Mittleberger, Smith, Keefer, A. Nelles, Powell, Wood, Mucaulay.-13.

Nays.—Messrs. Street, Butler, Woodruff, Ball, Shaw, McClellan, Lewis, Lacy, Durham, Theal, Hill, Clark,-12.

Carried.

#### 10th.—Oliver Phelps.

Considered unanimously that the advantages of Canal are equivalent to the loss of soil.

#### 15th .- JACOB J. BALL,

5½ acres.

That advantages are equivalent to disadvantages, except the land taken for the locks.

Yeas.—Messrs. Clark, Street, Jarvis, Black, Davis, Willson, R. Nelles, Keefer, Powell, McClellan, Lewis, Woodruff, Macaulay,-13.

Nays .- Messrs. Butler, Wood, McBride, Mittleberger, Ball, Smith, A. Nelles, Shaw, Lacey, Durham, Theal, Hill,-12.

Each acre taken for manufactories adjacent to the Locks (an acre to each Lock,) £5 an acre.

Yeas.—Messrs. Butler, Street, Woodruff, Mc-Bride, Davis, Willson, Nelles, Mittleberger, Ball, Smith, A. Nelles, McClellan, Lewis, Theal, Hill, Clark, Shaw.-17.

Nays .- Messrs. Jarvis, Black, Keefer, Powell, Lacey, Durham, Wood, Macaulay,-8.

Awarded.

#### 16th.—Thomas Kerr.

4 acres.

Advantages of Canal equivalent to loss of soil actually required for the construction of Canal.

Allowed £5 an acre for each acre taken for manufactories &c .- that is, an acre for each lock.

Unanimous.

### 17.-WIDOW OF JACOB BALL.

41 acres.

Advantages of Canal equivalent to loss of soil actually required for construction of Canal.

Allowed £5 an acre for each acre taken for manufactures &c., i. e. an acre to each lock if taken by the Company—that is £5 an acre if taken, and so on in proportion for any less quantity.

Unanimous.

#### 10th.-WILLIAM YOUALL.

Advantages unanimously considered equivalent to disadvantages.

#### 18th,-JACOB BOWMAN.

91 acres.

That land should be valued at £5 an acre.

Yeas .- Messrs. Jarvis, Black, Davis, Willson, R. Nelles, Mittleberger, Ball, Smith, Keefer, Powell, McClellan, Lewis, Durham, Wood, Macaulay,-15.

Nays.—Messrs. Street, Butler, Woodruff, Mc-Bride, Snaw, A. Nelles, Lacey, Hill, Clark, Theal,

20th.—George Marlatt. 91 acres meadow. 91 " upland.

Total, 181 Uplands, equivalent to advantages of Canal. The 91 acres of meadow land to be paid for at the rate of £4 per acre.

Yeas.—Messrs. Jarvis, Black, Davis, R. Nelles, Keefer, Mettleberger, Smith, A. Nelles, Shaw, Powell, Lewis, Wood, Macaulay, 14.

Nays .- Messrs. Street, Woodruff, Butler, Mc-Bride, Ball, Durham, Theal, Hill, Clark, McClellan, 10. Carried.

Allowed for Fencing Bill £165.

#### 21st.—Andrew Willson.

17 Acres.

That he be allowed £3 per acresfor land taken. Yeas.—Messrs. Jarvis, Bluck, Davis, Willson, Keefer, R. Nelles, Smith, B. Nelles, Mettleberger, Shaw, Powell, McClellan, McBride, Clark, Durham, Ball, Theal, Butler, 18.

Nays .- Messrs. Street. Woodruff, Lewis, Lacey, Wood, Hill, Macaulay, 7.

Carried.

For Hay lost, allowed £6.

#### 22nd.—HALL DAVIS.

18½ acres

That claimant be allowed £2 per acre.

Yeas.—Messrs. Butler, Street, Woodruff, Black,
Jarvis, Willson, R. Nelles, Smith, Ball, Shaw, McClellan, Lewis, Lacey, Durham, Theal, Hill, Wood, Macaulay, Clark, McBride, A. Nelles, 21.

Nays. Messrs. Davis, Keefer, Mettleberger, Powell, 4.

Carried.

#### 23rd.—JEREMIAH ATLEY.

31 acres.

That advantages are equivalent to disadvantages. Yeas.-Messrs. Butler. Street, Woodruff, Jarvis, Black, Davis, Willson, Keefer, R. Nelles, A. Nelles, Ball, Shaw, Mittleberger, Powell, Lewis, McBride, Wood, Clark, Macaulay, 19.

Nays .- Messrs. Smith, McClellan, Durham, La-

cey, Theal, Hill, 6.

Carried.

#### 24th.—SAMUEL SWAYZE.

12d acres.

That claimant be allowed £3 per acre for all taken by canal.

Yeas.—Messrs. Woodruff, Jarvis, Black, Willson, R. Nelles, Smith, Shaw, Keefer, Powell, Lewis, Wood, Theal, Clark, Macaulay, 14.

Nays.—Messrs. Butler, Street, Davis, A. Nelles, Ball, McClellan, Mittleberger, McBride, Lacey, Durham, Hill, 11.

Also, £25 for general loss of use of Estate for two years.

Carried.

#### 25th.-GARRETT VANDEBURGH.

That lands be valued at £2 10s. per acre for all taken, including all damages.

Yeas.—Messrs. Butler, Street, Davis, Willson, R. Nelles, Keefer, Smith, A. Nelles, Ball, Shaw, Mc-Clellan, Mittleberger, Lacey, Durham, Theal, Hill, Wood, Clark, 18.

Nays.—Messrs. Woodruff, Jarvis, Black, Mc-Bride, Powell, Lewis, Macaulay, 7.

Carried.

#### 26th.-John Carroll.

614 acres.

That lands be valued at £2 per acre for all taken by the canal, including all damages.

Year.—Messrs. Butler, Street, Woodruff, Jarvis, Davis, Black, Willson, R. Nelles, Keefer, Smith, A. Nelles, Shaw, Powell, Mittleberger, McClellan, Lewis, McBride, Wood, Clark, Macaulay, 20.

Nays.—Messrs. Ball, Lacey, Durham, Theal, Hill, 5.

Carried.

#### 27th.—John Brown.

71 acres.

The advantages of the Canal equivalent to the loss of soil on present route.

Unanimous.

Timber &S 15s.

Unanimous.

That £25 be allowed for chasm for tunnel.

Yeas.—Messrs. Butler, Street, Woodruff, Willson, R. Nelles, A. Nelles, Ball, Shaw, Mittleberger, Powell, McClellan, Lacey, McBride, Durham, Theal, Clark, Macaulay, 17.

Nays.—Messrs. Jarvis, Davis, Black, Keefer, Smith, Lewis, Wood, Hill, 8.

Carried.

The whole signed by all the Arbitrators as follows :-

The Board of Arbitrators adjourned to to-morrow till the award should be prepared.

FRIDAY, 1st September, 1826.

The Board of Arbitrators met.

ABSENT : John Warren.

Darius Laphan, Assistant Engineer, affirms that he surveyed the lands as per schedule given in, and states that to the best of his knowledge of schedule contains a statement of the quantities and quality of lands required for the Canal or likely to be overflowed thereby. An acre reserved to each lock and included in the schedule.

#### No. 8.

# AWARD OF ARBITRATORS.

To all to whom these presents shall come:
We, the Honorable Thomas Clark, Abraham Nelles,
Thomas Butler, Samuel Street, George Ball, Marshal'Lewis, Richard Woodruff, James Durham,
George Shaw, Samuel Theal, George Lacey, Henry
Mittleberger, John Hill, William McLellan, Samuel
Peters Jarvis, James Black, Crowell Wilson, J. B.
McCaulay, William Smith, Jacob Keefer, Robert
Nelles, Grant Powell, Thaddeus Davis, Edward
McBride, and Alexander Wood,
SEND GREETING.

Withereas by a certain deed bearing date the 23rd day of August, in the year of our Lord one thousand eight hundred and twenty-six, and made between the parties whose hands and seals are thereunto set and subscribed, and the Welland Canal Company-after reciting that by an Act of the Parliament of the Province of Upper Canada, passed the 19th day of January in the year of our Lord 1824, for the incorporation of certain persons under the name of the said Welland Canal Company, it was amongst other things enacted that the Directors of the said Company should have full power and authority to explore the country lying between the River Welland and the District of Niagara and Lake Ontario, and to designate and establish, and for the said Company to take, appropriate, have and hold, to and for the use of them and their successors, the line and boundaries of an intended Canal, with its necessary Locks, Towing Paths, Basins and Railways to connect the River Welland with Lake Ontario, and also to select such convenient scites for such and so many Mills, Manufactories, Warehouses and other erections as might be required by the said Company for the purposes thereof, and to purchase the same to and for the use of the said Company. Provided that nothing therein contained should compel the owner of any Mill seat to sell, convey or otherwise depart with the same to the said Company, and also that in case the owner or owners, occupier or occupiers of any Mill sents on the line of the said Canal, or within 500 yards thereof, should consider the same in any manner injured, or the value thereof in any way depreciated from the erection of rival establishments or from any other cause growing out of the cutting and making the said Canal, and for the compensation of which no provision should have been made by that Act, it should and might be lawful for the said Company, and they were thereby required to purchase the same at a fair valuation founded on an average of former years, to be ascertained by Arbitrators, as thereinafter provided, to ascertain the value of lands and tenements to be purchased, or the amount of damages in any case sustained and also that the Directors of the said Company should be, and that they were thereby empowered to centract, compound, compromise and agree with the owners and occupiers on any land through or upon which they might determine to cut and construct the said intended canal and appurtenances, either for the absolute purchase of so much of the said land as they should require for the purposes of the said Company, or for the damages which he, she, or they, should and might be entitled to recover from the said Company in consequence of the said intended Canal, &c., being cut and constructed in and upon his, her, or their respective landsand that in case of any disagreement between the said Directors and the owner or owners, occupier or occupiers aforesaid, it should and might be lawful from time to time as often us the said Directors should think fit, for each owner or occupier so disagreeing with the said Directors, either upon the value of the lunds and tenements proposed to be purchased or upon the amount of damages to be paid to them as aforesaid, to nominate and appoint one indifferent person and for the said Directors to nominate and appoint an equal number of indifferent persons who together with one other person to be elected by ballot by the said persons so named should be Arbitrators to award, determine, adjudge and order the respective sums of money which the said Company should pay to the respective persons entitled to recover the same, the award of a majority of whom shall be final, after reciting also that by a certain other Act passed on the 13th day of January last passed, Entitled "An Act to repeal parts of and to explain "and amend the several Acts of this Province re-"lating to the Welland Canal Company," it is amongst other things enacted that the value of any Mill Scat or Tract of Land which the said Company should be authorised to purchase for the purposes of Machinery should be ascertained in case of disagreement by Arbitrators in the same manner as the value of land was to be assessed through which the said Canal should pass, and that the said Arbitrators should be also empowered to decide whether the mill seat or scite, or other Machinery desired by the said Company, were such as the person owning the same could be compelled to part with, to the said Company, and that the said Arbitrators so to be appointed as aforesaid, should and might and that they were thereby authorised and required in assessing the value of any lands or tenements of any person or persons proposed to be pur-chased by the said Company or the amount of damages to be paid by the said Company to any person or persons under the provision of the seventh clause of the said 1st therein in part recited Act to take into their consideration the advantages likely to accrue as well as the injury or damage occasioned to lands or tenements by reason of the said canal; and also that all matters of disagreement or dispute to be settled or determined by Arbitration under the Provision of the said 7th clause of the aforesaid Act should be referred to Arbitrators as therein provided so that the award or awards of such Arbitrators might be made, published and declared, on or before the first day of September then next ensuing after recitting also that some disagreement had taken place between the Directors of the said Company and the respective parties to the said Deed (the said parties

to the said Deed respectively being the respective owners and occupiers of certain lands and tenements required by the said Company for the line and boundaries of the said Canal, and for scites for mills, manufactories, ware houses, and other erections for the purposes theroof) both as respects the value of such lands and premises as the said Company was desirous of actually purchasing as well as the damages which the said parties respectively might be entitled respectively to recover from the said Company in consequence of the said Canal and appurtenances according to the provisions of the said therein in part recited Acts .- And after reciting also that for settling and determining the value of such lands, tenements and premises, as well as such damages aforesaid, and all other matters between the said respective parties to the said Deed and the said Company to be settled adjusted and determined by Arbitration according to the provisions of the therein in part recited Acts, and the true intent and meaning thereof,—the said parties to the said Deed had severally and respectively agreed to refer the same premises to Arbitration and to nominate and appoint Arbitrators in that behalf according to the purport, true intent, and meaning of the said Acts-the said parties to and executing the said Deed did and each of them respectively did nominate, constitute, and appoint their several and respective Arbitrators in the premises aforesaid, that is to say, the said parties to and executing the said Deed being owners and occupiers of laud on the Route of the said Canal did nominate, constitute and appoint Henry Mittleberger, Abraham Nelles, Richard Woodruff, Thomas Butler, Samuel Street, George Ball, Marshall Lewis, James Durham, George Shaw, Samuel Theal, George Lacey, William Mc-Lellan, and John Hill, as their arbitrators in the premises, and the said Company did nominate, constitute, and appoint Grant Powell, Alexander Wood, Samuel Peters Jurvis, James Black, Crowell Willson, James B. Macaulay, Samuel Street, William Smith, Thaddeus Davis, Jacob Keefer, John Warren, Robert Nelles, and Edward McBride, as their arbitrators in the premises.

And the said parties to the said Deed respectively did thereby covenant, promise and agree, well and truly to stand to, obey, abide by, observe, perform, fulfil and keep the award, order, arbitrament and final determination of the said above named Arbitrators, and the person to be appointed by them pursuant to the said Act, first above therein recited, or the majority of them, according to the terms and provisions of the said Act, touching and concerning all and every such matters and things respectively thereinbefore mentioned as should be submitted to the said Arbitrators, under the provisions of the said, therein in part recited Acts, and be in difference between the said parties to the said Deed respectively and the said Welland Canal Company—it being thereby fully declared, understood and agreed by and between the parties thereto respectively, that (without any separate or specific explanation thereof by and in the said Deed or submission) all matters of disagreement or dispute by and between the said respective persons, parties to, and executing the said Deed and the said Company, to be settled or determined by Arbitration according to the provisions of the thereinbefore in part recited Acts, of what nature or kind soever should be and were thereby agreed to be referred to the Arbitrators therein before appointed and the person to be appointed by them according to and in compliance with the provisions of the said therein in part recited Acts and the true intent and meaning thereof. And it was also agreed by and between the said parties to the said Deed, that the said Deed and the submission thereby made should be made a rule of His Majestys Court of King's Bench for the Province of Upper Canada, pursuant to the Statute in that behalf.

AND WHEREAS, the Arbitrators appointed by the said Deed, appointed by ballot, the Hon. Thomas Clark as an Arbitrator with them in the premises aforesaid, according to the Statute in that behalf, before entering upon the said reference.

Now throw Xe, that we, the said Thomas Clark, Abraham Nelles, Thomas Butler, Saml. Street, George Ball, Marshall Lewis, Richard Woodruff, James Durham, George Shaw, Sanil. Theal, George Lacey, Henry Mittleberger, John Hill, William McClellan, Saml. P. Jarvis, James Black, Crowell Willson, James B. Macaulay, Wm. Smith, Jacob Keefer, Robert Nelles, Grant Powell, Thaddeus Davis, Edward McBride, and Alexander Wood, being a majority of the Arbitrators in the said Deed named:—

Having taken upon ourselves the burthen of the said Arbitration so referred to us as aforesaid and having heard and duly considered the allegations, vouchers, proofs and witnesses of the said parties do make this our award in writing, of and concerning the premises to us referred, as follows, that is to say:—

First, In the matter between Nathan Pawling and the said Welland Canal Company we, the undersigned do find, award, determinine and declare that the advantages of the said Welland Canal, as respects the lands of the said Nathan Pawling are equivalent to the value of the lands proposed to be taken by the said Company, being estimated at 4 and  $\frac{1}{2}$  acres, and of all injury or damage occasioned to the lands of the said Nathan Pawling by reason of the said Canal.

Second, In the matter between Robert Brown and the said Welland Canal Company, we, the undersigned do find, award, determine and declare that the said Company shall pay to the said Robert Brown at the rate of tweive pounds ten shillings, lawful money of Upper Canada per acre, for 12 acres of meadow land of the said Robert Brown, to be overflowed by the said Canal, and in the same proportion for any greater or smaller quantity of the said meadow land that may be so overflowed. And also that the said Company shall pay to the said Robert Brown at the rate of £5 per acre for 44 acres of pasture land lying adjacent to the aforesaid meadow, without the fence of the said Robert Brown, to be overflowed by the said Canal—and in the same pro-

portion for any greater or smaller quantity of the said pusture land that may be so overflowed.

Saml. Theal.

Third, In the matter between Jacob Tenbrocck and the said Welland Canal Company we, the undersigned do find, award, determine and declare, that the said Company shall pay to the said Jacob Tenbrocck at the rate of thirteen pounds per acre for three acres of meadow land of the said Jacob Tenbrocck, taken by the said Company for a Tow Path, and at the same rate for any greater quantity of meadow land of the said Jacob Tenbrocck, of equal quality, taken by the said Company-and also that the said Company shall pay to the said Jacob Tenbroeck at the rate of £7 10s. per acre for 67 acres of other land of the said John Tenbrocck, (being bottom and side hill) as per estimate of Darius Lapham, Assistant Engineer, taken or overflowed by the said Company, and in the same proportion for any greater or less quantity of similar land. And as respects 12 acres of meadow and marsh land of the said Jacob Tenbrocck adjoining the premises of Wm. M. Bull, being a small point out off and to be overflowed by the said Canal, we do find, award, determine and declare that the advantages of the said Canal as respects the lands of the said Jacob Tenbroeck, are equivalent to the value of the last mentioned lands of the said Jacob Tenbroeck and of all injury or damage occasioned thereto by reason of the said Canal.

Grant Powell,
Marshall Lewis,
Alexander Wood,

John B. Macaulay.

Fourth. In the matter between John Tenbroeck and the said Welland Canal Company, we the undersigned do find, award, determine and declare that the advantages of the said Canal as respects the lands of the said John Tenbrocck are equivalent to the land and soil of the said John Tembroock, actually required for the construction of the said Canal and tow path, being that part lying a little below a Bridge, and of all injury or damage occasioned to the lands of the said John Tenbrocck by reason of the said Canal-in case no mendow land shall hereafter be overflowed thereby. But should any mendow land of the said John Tenbrocck be hereafter overflowed by reason of the said Canal then and in such case we the under signed find, award, determine, and declare that the said Company shall pay to the said John Tenbroeck

1)4

at the rate of £13 per acre for every acre of meadow land so overflowed, and in that proportion for any greater or less quantity.—And we do horeby declare that it is not to be understood by this our award that any lands of the said John Tenbroeck cut off or separated from the main farm by the said Canal and not overflowed or actually required for this said Canal or tow paths is to be considered as belonging to the said Company but that the same shall continue to be the property of the said John Tenbroeck.

George Shaw.

Fifth. In the matter between Job Northrup and the said Welland Canal Company, We the undersigned do find, award, determine, and declare that the advantages of the said canal as respects the lands of the said Job Northrup, are equivalent to the value of the said lands and soil of the said Job Northrup actually required for the construction of the said canal tow-paths and appurtenances, estimated at six and six-tenths acres of meadow land and of all injury or damage occasioned to the said lands of the said Job Northrup by reason of the said Canal.

But in case the said Company shall require and take any greater quantity of the lands of the said Job Northrup than shall be required as aforesaid, as a scite or scites for mills, machinery, or Hydraulic purposes independent of the Canal itself, then and in such case, we the undersigned, do find, award, determine, and declare that the said Company shall pay to the said Job Northrup for any extra quantity of his lands so taken and required as last aforesaid at the rate of £25 per acre and so in proportion for any greater or less quantity.

Dated this 31st day of August, 1826.

Eighth, In the matter between Thomas Merritt and Wm. H. Merritt, and the said Welland Canal Company, we the undersigned do find, award, determine and declare that the advantages of the said Canal as respects the lands of the said Thomas Merritt, and Wm. H. Merritt, (excepting the Mill seat and appurtenances hereafter mentioned,) are equivalent to the value of the lands proposed to be taken by the said Company, being estimated at  $\mathfrak{I}_{3}^{\mathbb{N}}$  acres, and all injury or damage occasioned thereto, by reason of the said Canal.

It being intended that the said Company should purchase the Mill seat, Mills and appurtenances of the said Thomas Merritt and Wm. H. Merritt, we the undersigned do award, determine and declare that the said Company shall pay to the said Thomas Merritt and Wm. H. Merritt, the sum of £600 of lawful money of Upper Canada, in full compensation for the said Mill Seat, Mills, lands (estimated at 7 or 8 acres) and buildings appurtenant thereto.

Tenth. In the respective matters between William Chisholm, William C. Chose, William Sanderson, Isabella Stewart, Elizabeth Shipman, Jonathan Clendenning, Elias Adams, Oliver Phelps, John Soper, and William Youall, respectively, and the said

Welland Canal Company.

We the undersigned do find, award, determine, and declare that the advantages of the said canal as respects the lands of the said parties above named respectively, are equivalent to the loss of lands and soil of the said parties respectively, actually required for the construction of the said canal, tow-paths and appurtenances, estimated as follows, that is to say:—

Of the said William Chisholm, 21 acres.

Of the said William C. Chase, about & of an acre.

Of the said William Sunderson, nearly 1 of an acre.

Of the said Isabella Stewart, a small piece off her lot.

Of the said Elizabeth Shipman, & of an acre.

Of the said Jonathan Clendenning, nearly 6% acres.

Of the said Elias Adams, about 3 of an acre.

Of the said Oliver Phelps, about 13 acres.

Of the said John Soper, 1 acre, and

Of the said William Youall, 3 or 4 acres.

No. 27.

In the matter between John Brown and the said Welland Canal Company, WE, the undersigned do find, award, determine and declare, that the advantages of the said Canal, as respects the lands of the said John Brown, are equivalent to the loss of lands and soil estimated at 7½ acres actually required and taken for the construction of the said Canal and tow paths.

But that the said Company shall pay to the said John Brown the sum of £8 15s. for the timber of

the said John Brown; cut by the said Company upon the premises of the said John Brown upon the line originally laid out for the said Canal, the said Company being at liberty to remove such of the said timber as is still lying on the said premises thereby; and that the said Company do also pay to the said John Brown the sum of £25 in satisfaction for the injury and damage done by the said Company to the lands of the said John Brown, by means of the excavation in the vicinity of his barn made at the commencement of a tunnel formerly projected, but afterwards abandoned by the said Company, and of all other damages occasioned to the lands of the said John Brown, by reason of the said Canal.

Dated this 31st day of August, 1826.

T. Butler, Samuel Street, Richard Woodruff, Crowell Willson, Robert Nelles, A. Nelles, George Shaw, Grant Powell,

H. Hittleberger, Wm. McClellan, Edward McBride, Thomas Clark, J. B. Macaulay, George Ball, George Lacey, Samuel Theal,

James Durham.

It appearing that in the following cases the farms of the respective owners will be separated by the line of the canal, and the intercourse between the one part and the other obstructed thereby, namely: in the case of Robert Brown, the Widow Wright, (Zachariah Rykert, and F. G. Parnell,) (Jacob Bowman, and Luke Carroll,) Oliver Phelps, John Clendenning,) (and there may be others whose situations the Board may not be apprized.)

And it being indispensible that a means of passage across the Canal should be afforded to the respective proprietors at the expense of the Company but difficult nevertheless to adjust in the shape of damages sums equivalent to that object in the several cases mentioned (we the undersigned), understanding such to be the present intention of the said Company do hereby award and direct that the said Welland Canal Company do and shall furnish to the proprietors of farms divided, convenient means of passage across the Canal by bridges or scows at the expense of the Company, and that in case they shall neglect or refuse so to do the parties interested in the premises shall not be considered as precluded by this award from any future right to damages or compensation on that account.—Provided always, and it is hereby declared not to be intended to require the said Company to furnish any such accommodations in cases where the quantity of lands divided or cut off from any individual lot of land or farm, shall not exceed ten acres. We do hereby further award and declare that the enumeration of names in the introducductory part of this part of our award of persons entitled to bridges or scows is not to be constructed to exclude a claim to similar accommodation, by all persons not named whose estates may be divided to the extent above specified and who shull not have access to the separated parcels by means of public bridges, or otherwise as commodiously as before the making of the Canal.

T. Butler, Samuel Street, George Shaw, Richard Woodruff,

A: Nelles, H. Mittleberger,

Thaddeus Davis, Crowell Willson, George Ball, James Durham, Marshal Lewis, Thomas Clarke, John Hill, James Black, William McClellan, George Lacey, Samuel Theal, Edward McBride. Jacob Keefer, Wm. Smith, Alexander Wood, Samuel P. Jarvis.

1st September, 1826.

Moved that the Company do pay the costs of the Arbitration.

Yeas.—Messrs. Butler, Street, Woodruff, Davis, Willson, Ball, A. Nelles.

Nays.—Messrs, Black, McBride, Keefer, R. Nelles, Smith, Jarvis, Powell, Shaw, McClellan, Mittleberger, Theal, Lacey, Durham, Lewis, Hill; Clark, Macaulay, Wood.

It being doubtful whether this Board have a legal power to award costs under the present reference the undersigned do hereby intimate, that if they had not until the conclusion of the individual awards, conceived they had the right to do so-they would, with a view to cover the expenses thereof, have enhanced the amounts awarded the respective parties—and trust the Welland Canal Company will pay the amount under such circumstances.

Yeas the same as the last division.

Estimate at £1 per day to each arbitrator.

T. Butler, Samuel Street, Richard Woodruff, Samuel Theal, Thaddeus Davis, George-Ball, Crowell Willson, George Shaw,

Wm. McClellan, A. Mittleberger, George Lacey, Marshal Lewis, James Durham, John Hill, A. Nelles, Thomas Clark.

Witness present at the execution of the foregoing awards.

JOHN. G. SPRAGGE.

No. 9.

Letter, Sam el Clowes, Esquire, Civil Engineer, to Wm. Hamilton Merritt, Esquire.

SIR,

Many insinuations and reports having been in circulation respecting your conduct as Agent of the Welland Canal Company said to have arisen with

I take this opportunity of informing you that I never knew a single instance, while I was Principal Engineer to said Company, in which you have not individually acted correctly, and I believe with a view to the best interest of the Company. Your humble servant,

SAMUEL CLOWES,

Civil Engineer.

Montreal, 20th February, 1827. Wm. Hamilton Merritt, Esq.

No. 10.

#### LETTER.

James Clowes, Esquire, to William Hamilton Merritt, Esquire.

SIR.

Considering it to be honorable and just for sperson who has committed an error to make immediate reperation—

And finding on reflection, and having obtained more correct information, that the publication I caused to be inserted in the Advocate published by William Lyon M'Kenzie, in February, relating to the offers made for the Deep Cut, was founded on information, which was not correct—

And further, I know of no circumstance whatever relating to your conduct as Agent of the Welland Canal Company, which is not perfectly correct.

I am,

Sir,

Yours, &c.
JAMES CLOWES.

No. 11.

#### EXTRACT RESPECTING ROUTES.

To the Public.

I had determined on preserving the strictest silence until the completion of the undertaking in which I have the honor to be engaged, from a conviction that the rapid and successful progress of the work would give perfect and entire satisfaction to every individual not immediately interested against it. To those who are, it will be idle to assign a reason or produce a proof. But from the various rumors and misrepresentations so industriously circulated, I conceive it becomes necessary to make a reply, and produce facts and authority to substantiate them. pass over without notice those malignant insinuations which have been levelled against me personally, and Teave the public to discriminate between those who by a close application are exerting every faculty to assist in promoting an object which will be a credit to the age in which we live and those whose exertions are bent on retarding it.

The importance of this work is now so well understood, that those who considered it as a visionary undertaking, and folded their arms with a silent hope it would never come to maturity, do not venture openly to come out and express their real intentions, and oppose the measure; but endevour to create doubts, start difficulties, raise objections, and in their wisdom find out something which should or ought to have been done.

The whole drift of their argument is now directed from the merits of the undertaking and pointed at a certain individual who from interested motives has duped the Legislature, misled the stockholders, and been guilty of various other crimes and misdemenances.

This individual is well aware it is much easier to declaim against, than to adopt and bring to maturity any undertaking where so many conflicting interesis

are engaged.—He is likewise well aware, if he does his duty to his employers much angry feeling will be excited—and it affords him no ordinary satisfaction, that with all their clamour they have not been able to substantiate one single charge or accusation against him.

But to point, those who wish to retard the undertaking, endeavour to create a false impression on the minds of the public, by continuing to assert, from time to time, in the most period manner, that the canal could have been taken to Niagara, or some other place by a shorter route, and at a saving of thousands of pounds.

Others endeavor to divert the public attention by stating that there should be a canal from the Thames to Burlington Bay—from Lake Simcoe to York, and various other places—any project to throw an obstacle in the way of one already undertaken—losing sight of the grand scheme of uniting Lakes Erie and Ontario by the most feasible and cheapest route; and thereby bringing into action the best and greatest portion of the province now dormant and almost wholly useless, besides participating in the greater part of the transit from the American side.

It requires very little discernment to ascertain the real and true value of those who admit the utility of the measure, providing it had terminated at this or that part, or had taken this or that direction.

We have been exploring from May 1823 until 1826; and it is well known to the Legislature that every objection has been raised, every argument made use of, and every means resorted to, to influence them against the present route, and induce them to adopt some other.

I will not attempt to answer those shameful misrepresentations by similar means.—Mere assertions, unsupported by a shadow of proof or authority, can have but little weight with the public.—But in the first place we will produce the authority which induced the Legislature to adopt this route.

Mr. Samuel Clowes, in his report of 5th August, 1825, states that a Canal on the most extensive scale can be completed on this route for near one half the expense of any other between Niagara and Burlington Bay.

With respect to the ravine, he says, the banks of this ravine and creek allow of every advantage, and will serve nearly all the excavation in the bottom of the same—the whole distance forming a natural canal 150 feet wide and nine feet deep.

Mr. Roberts, in his Report of 16th August 1825, states:—

"Having descended the Mountain the line is very straight, with a gentle declivity, to the head of the ravine, which has very much the appearance of a wide Canal; along which it is conducted with but little expense, except the necessary Locks and Waste weirs, clearing timber, and constructing Tow paths, Reservoirs, and natural Canals, from thence to Lake Ontario, seven miles and twenty chains."

Even Mr. Hall, after valuing the Harbor for eight feet water at £8,257, in his Report of the 8th March 1825, says the 12 mile Creek route will be the cheapest by £11306 4s. 10d.—referring however to the Western route.

It will be understood that the route to Niagara would have to deviate at the head of this ravine, or near it, about 120 feet above the level of Lake Ontario; be subject to the same Lockage, have to pass over the 10, 5, 4, 2, and 1 mile Creeks, with Culverts and heavy embankments, and the distance at least ten miles to the Niagara River.

However, as Engineers are liable to err in their opinions, I have the satisfaction to state what the Canal in this distance, (five miles of which is finished; the remainder under Contract and estimated at the same ratio) has and will actually cost, reserving Locks and pits, which are common to both routes, by the following estimate from Mr. Alfred Barrett, resident Engineer:

"ST. CATHARINES, Dec. 21, 1826.

SIR,

In reply to your Note of the 19th inst., requesting me to make an estimate of the cost for constructing the Welland Canal from the head of Dick's Creek, near O. Phelps', through its valley and the valley of the 12 mile Creek to Lake Ontario, a distance of 7½ miles, exclusive of Locks, Lock Pits, and the necessary embankments around them, which would be the same let the Canal take any direction to the Lake from that point.

Also an estimate of the expense of a Canal for one mile, of similar magnitude to the Welland Canal in entire excavation. In reply, I say that the expense on the 7½ miles is \$29,935.

The expense of constructing, a Canal of equal capability to that above O. Phelps' on the Welland Canal, in entire excavation, could not ordinarily cost less than \$3,500—making in all \$13,495.

This estimate is made on an average cutting of eight feet, (which I am aware is low, where no ravine can be embraced,) and the Canal is confined to 26 feet bottom and 58 feet surface.

Whereas, in embracing the valleys of Dick's Creek and the 12, you have a fine spacious Canal, which will in a great measure prevent that obstruction to the navigation which would necessarily occur in a Canal of more limited dimensions, where so great a quantity must be drawn through to supply the different lifts and the extensive hydraulic privileges which are evidently far superior to those on any Canal of the above dimensions.

I beg leave to mention that the Harbor at the entrance into Lake Ontario remains as it was when reported on by Messrs. Clowes, Geddes, and Roberts, Engineers, without presenting any unexpected difficulties; and will, in my opinion, form a safe and good Harbor, when completed on the present plan.

Respectfully,
ALFRED BARRETT,

Resident Engineer."

I beg to call the attention of the public particularly to this statement, in order that they may judge whether reliance should be placed on the assertion of every day scribblers, or practical and scientific Engineers.

To draw the distinction clearly, you will observe the cost of the excavation and embankment for the Canal, from the head of the ravine to Lake Ontario, is about \$30,000 in a distance of 7½ miles.

On a Canal of our smallest dimensions, on the most favourable situation for entire excavation, it will cost per mile \$9,195. I am certain the nearest line a Canal could be taken from the head of this ravine to Niagara, is at least ten miles—making the sum of \$91,950. It is known to every person who has passed the country that Culverts and heavy embankments would be required over the 10,4,2, and 1 mile Creeks, if not more, which on the most moderate computation will cost \$30000; making in all \$121,950 by this highly favoured route—leaving a saving in the other of \$90,950, from which sum the expense of the Harbor must be deducted. Admitting if you please, the Harbor for 12 feet water should cost \$50,000, what is the result? You enrich the country by creating a new Harbor—instead of a narrow confined cut, as it must necessarily be to Niagara, you make one of the most extensive artificial navigations or Canals in the world; create hydraulic situations in the centre of the country which are unrivalled, and shorten the distance at least 2½ miles.

My object in submitting the foregoing statements to the public is merely to enable them to judge correctly whether the assertions and reports circulated against this route are worthy of consideration.

I am now as I ever have been convinced that nature has favoured us with greater facilities than can be found in any other part of the Peninsula; and am sensible it only requires being seen to admit its superior advantages.

It has been hitherto a common remark, that no public work, no improvement, has ever succeeded in Canada. It can scarcely be a matter of surprise when we find such contemptible shifts resorted to as we know have been by a few in this district, to retard our operations—for I would not insult the good sense of the community by admitting there is not a very large majority in favor of this work. Neither would I be understood to allude to those who opposed it from principle, many of whom, after seeing the favorable situation of the line, and the forward state of the work, have been candid enough to admit they were deceived.

If there ever was an undertaking which had a claim to public favor or public patronage, it is this. It is worthy the attention of every member of the Legislature; and I trust they will give it their personal inspection before the close of the present session, when they will have an opportunity of judging for themselves whether they have acted judiciously, or been duped by false representations.

WILLIAM HAMILTON MERRITT.

ST. CATHARINES,

Dec. 23rd, 1826.

No. 12.

#### CIRCULAR OF A STOCKHOLDER.

Sir,

Desirous that the situation of the Welland Canal, the prospects of the Company, and its intimate connection with the best interests of the Province, may be clearly seen and understood, I

 $\mathbf{F4}$ 

have taken the liberty to present for your examination and reflection the following facts relative to

The original estimate for a thorough cut was £179,556. It is now ascertained from actual experience that £200,000 will be required to complete the work pursuant to the dimensions, and in the manner now determined on by the Board of Directors.

Stock to the amount of £90,000,* is now in the hands of individuals, on which 65 per cent. has been called in, paid and expended by the Company, besides the £25,000 loaned by the Province; consequently: there remains only £31,500 to be realized, in case the whole amount should be paid in by those Stockholders.

The grant from the Military Government, in lieu of Tolls, on Military Stores, is not available to the Company immediately. If added, the whole amount of funds under any circumstances, will be only about £47,500, leaving a deficiency of £69,000 to complete the work, admitting the Stockholders to have the ability to support the Canal, and make their payments as promptly as may be required.

But suppose, which is the more probable conclusion, that under the present circumstances, the holders of stock shall not be able to pay up their instalments; even on the supposition that the grant of the Military Government should be immediately realized which cannot be expected until the Canal is completed, there remains to be provided the sum of £100,500, which may prove disastrous and ruinous to the proprietors and injurious to the country.

If the Provincial Government should take the £50,000 of Stock now solicited, the whole situation of things will be changed—the confidence they exhibit in the prospects of the Canal will give it an entire new character and be highly beneficial to the remainder of the Stock yet to be offered; and in point of expediency it is demonstrable, that as a measure of sound policy, in aid of the resources of the country, nothing can be offered presenting greater advan-

The Stock in place of adding to a weight of debt, will give an additional income, besides paying its own interest, and redeeming the principal, [in corroboration of this statement we refer to the Erie Canal, which pays principal and interest and will ultimately leave a fund at the disposal of the State, equalling all its other resources, 1] which income may be used in aid of other objects of internal improvements, increase the facilities for emigration and settlement, add materially to the population, and with it the respectability, strength and resources of the

No amount of debt incurred for such objects, if yielding a moderate income, can ever be a load, or require any taxation.

To prove that this Canal will yield a large income, we give a statement of facts which are undeniable and the conclusion as inevitable as any mathematical truth, that the income will be equal to the interest upon a capital double the amount of its cost.

The making of the New York canals did not really cost the people of the State the value of I cent, except so far as foreign materials may have been employed in the construction of them, or for that small portion of the profits on labor which the artists and laterials may have been employed in the construction of them, or for that small portion of the profits on labor which the artists and laborers may have carried out of the State. On the contrary, they gave a large and wholesome circulation to money, and enriched many individuals; and the increased value of property and of profit resulting from them, must be supposed by counting up hundreds of millions of dollars, if indeed, the henefits of them be within supposition at all! The rise in the value of lands and lots on their borders—at Albany, Troy. Rochester, Utica, Buffalo and an hundred new and thriving villages which have started into existence as borders—at Albany, Troy. Rochester, Utica, Buffalo and an hundred new and thriving villages which have started into existence as borders—at value, were hitherto—quiescent, or useless, because of the want of such market, with the new products of a teeming, busy, bustling and happy population—make up an aggregate of henefits that the mind cannot grasp with any degree of confidence in itself; and to all these should be added, the wealth and power caused by the increased inhabitants of the State on account of these things; perhaps directly and already, to the number of three or four hundred persons. Such are the general effects of canals, roads things; perhaps directly and already, to the number of three or four hundred persons. Such are the general effects of canals, roads things; perhaps directly and already, to the number of three or four hundred persons. Such are the general effects of canals, roads things; perhaps directly and already, to the number of three or four hundred persons. Such are the general effects of canals, roads things; perhaps directly and already, to the number of three or four hundred persons. guish the debt, and then supply the chief part of the funds required for the support of the Government of New York.

These canals cost \$3,123,030, but the actual debt created was only \$7,771,000, the interest payable on which was \$419,000—but the tells of the present year will amount to a million! And the business of the canals will go en. on, on, and increase every year, for years to come, until the atmost shore of Lake Superior teems with civilised men, and cities are located where the wolf has his home and the bear takes up his winter quarters.

Up to the 13th Aug. last, and for the present season, about 9000 tons of coals, 4000 do, wheat, 2000 do, iron ore, 1500 do, flour, and Op to the 15th Aug. last, and not the present season among 1500 to as a coals, 1500 to a war and 1500 to a soft other articles, arrived at Philadelphia by the improved navigation of the Schuylkill—100 vessels laden with Schuylkill zool will have arrived at New York from Philadelphia, during the present season. What is the new profit or value of the products or employments caused by this comparatively small work, yet in the very infancy of its usefulness? What is the amount of new translation and the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of capital put into useful operation? Let it be calculated!

Some particulars might be given about other canals; but these two cases have been referred to only to show general results, and they speak a harguage that cannot be mistaken—to the glory of those who have supported INTERNAL IMPROVEMENTS; to the same of those who have opposed them, and the [what shall I say 1] the samething of others who were so much interested in the same of those who have opposed them, and the [what shall I say 1] the samething of others who were so much interested in the gaing, while others were employed in digging! But such will always be the difference between talking and doing—the talkers will become power and power and the doers richer and richer. One spade full of earth removed in New York or Pensylvania, has will become power and the doers richer and richer. One spade full of earth removed the New York or Pensylvania, has readered more service, in either State, than a ten-column essay in the Richmond of Enquirer has benefitted Virginia. The policy rendered more service, in either State, than a ten-column essay one—of the other to reduce a server State into a small one. of the first, is to make even a small State a great one of the other, to reduce a great State into a small one.

^{*}Note.—In the Report of the Directors, £100,000 is stated as subscribed, but of this sum about £10,000 of Stock has since its subscription reverted to the Company and the amount of subscription now stands at about the sum named.

[†] REMARKS .- Il untrative of the progress and present condition of manufactures in the United States, and concerning internal improvements, aiding and assisting every brunch of the national industry.

In the first place we show the difference of transit from Lake Erie to Syracuse, between the

- 2. A small proportion of transportation is requisite to afford an ample dividend on the stock. 200 vessels are now supposed to be in use on the two Lakes—add 100 more on completion of the Canals, say one half or 150 vessels pass 14 times in each season, averaging 50 tons, at \$1 per ton, will produce a revenue of \$105,000. On the completion of the Northern Canal there were about 30 to 40 vessels on Lake Champlain—there are now, as appears from the American papers, 218. What may be anticipated on Lake Erie on the completion of the Ohio Canal, 65 miles of which is already finished?
- 3. The relative cost of the Eric and Welland Canals, and the income from them the last year. The EricCanal cost \$\$,000,000 & extends 360 miles. The Welland Canal 41 miles, at the same rate, would require upwards of \$900,000—the latter a ship Canal of eight feet water. The Eric Canal yielded an income of \$760,000 for the last year; averaging the same distance, the Welland Canal would give an income of \$84,444; and it must be admitted that no one portion of the Eric Canal possesses, in an equal distance, the same advantage as the Welland.

These statements show that the difference of transportation in favour of the Welland Canal, is \$3.26 down, \$5.22 up.—It may also be remarked that a very great proportion of the produce sent from the upper Lakes comes from the different States bordering thereon. The municipal Government of the several States being entirely distinct, there can be no feeling likely to produce a regulation which can operate in favour of the Eric Canal in preference to any other cheaper channel of communication, provided it takes them to the same market.

In the Constitution of the United States, there is a permanent inhibition against the imposition of duties on vessels clearing from one port to another in the United States; if therefore American vessels he permitted to pass without duty, through those waters, it must be a mutual benefit to both Canal and country. Exclusive of these considerations, in the spring of the year the Harbors of Buffalo and Black Rock are closed from 3 to 5 weeks after the Welland Canal will be open. All the produce, therefore, destined for the Montreal, Quebec or New York markets, will most assuredly pass through this Canal during this period, which embraces a very considerable portion of the year, in consequence of the anxiety always manifested in obtaining the earliest market; and even should all the toll be rescinded from the Western part of the Eric Canal, this affords still a cheaper conveyance.

From this exhibition it will be seen that in no event, and under no circumstances of commercial difficulty between the two countries which might interrupt their intercourse, could the tolls ever be reduced so low as not to afford a large and abundant income; and in times when commercial reciprocity and liberal feelings appear to be so well understood and anxiously desired by the greater part of the community, the amount of income will reach an extent that those who have not examined the subject in detail, and in all its various relations can scarcely credit. To those who have given it a due share of attention it will appear simple and plain—and (as in the case of the Eric Canal) will exceed the most sanguine expectations of those who had formed the most favorable and enlarged views on the subject.

It will be observed that the Welland Canal will be constructed at a less expense, proportioned to the distance than the Erie Canal, although its dimensions and advantages are so much greater. Allowing it therefore to receive no more annual income in perpetuity from toll than has been realized on the Erie Canal for the last year, which is \$760,000, from the same proportion of distance, it would equal 6 percent, or nearly double the amount of capital required in making it. You have therefore as much certainty as can possibly be desired that it must, when finished, be profitable.

Exclusive of those certain sources of income, we have all the hydraulic advantages on the Canul, the transit of that portion of country not immediately connected with Lake Eric, and the income arising from the sale of 13000 acres of land granted to the Company, lying on the Western section of the Canul, between the Welland and Grand Rivers, which from being alluvial will be rendered, by draining the marsh, valuable.

It is now respectfully submitted with those facts and such prospects, together with the experience already had on this side the Atlantic, whether every correct politician will not consider the accidental circumstances which have left this portion of Stock yet to be taken up; rather fortunate for the Province than otherwise: masmach; as an opportunity is thereby given to interest the Provincial Government in an undertaking from which they will derive an annual income, and render an essential and perpetu; al benefit to the Province at large.

For particular opinions on the subject of this Canal by American Statesmen and their Canal Commissioners, your attention is called to some printed extracts from their Reports enclosed herewith.

(Signed)

A STOCKHOLDER.

### IN THE YEAR 1827.

After a full investigation of all matters relating to the Canal before a Committee of the House of Assembly as recorded in your Journals, (See Report of Select Committee of the House of Assembly on Petition of the President and Directors of the Welland Canal Company, of the year 1827, hereto appended marked No. 1,) at a time when every transaction was fresh in the memory of those persons who were interested either for or against the undertaking:

The Legislature took to the amount of £50,000 of the Stock reserved for the London market, (See Act hereto appended marked No. 2,) every effort having failed to obtain it in London; and so fully were the Directors impressed with the necessity of obtaining the remainder of that Stock, that the Agent was despatched to Quebec to apply for assistance from the Legislature of that Province, who also subscribed Stock to the amount of £25,000.

On 17th of February of this year an Act was passed, (See Act hereto appended marked No. 3.) granting the free use of the Canal for Government Stores, on condition of the grant of one-ninth by the British Government agreeably to the Despatch of Lord Bathurst. (See Despatch hereto annexed marked No. 4.)

The different routes from Chippawa to the Grand River were explored this year with great difficulty, and at considerable expense; reference is made to them in Mr. Barrett's report which is appended to the Report of the Board of Directors for this year.

The work was carried on this year with vigor; for a general view of which, reference is made to the Report of Directors (hereto appended marked No. 5,) and the Minutes of the Board for this year, (hereto appended marked No. 6,) and also—

# REPORT OF THE SELECT COMMITTEE

Appointed for the purpose of examining and reporting upon the Petition of the President and Directors of the Welland Canal Company, praying that public all should be afforded to the Company; and on the Petition of the Inhantants of Niagara, on the subject of a Lateral Cut.

THE SELECT COMMITTEE, appointed for the purposes of examining and reporting whether it is necessary, in order to ensure the speedy completion of the Welland Canal, upon its enlarged scale, that public aid should be afforded to the Company; and if so, to what extent and whether such aid would be most effectually extended by making a further loan or taking stock in the name of the Government, or by any and what other measures; and also to examine and report upon such parts of the prayer of the Petition of the President and Directors of the Welland Canal Company as do not relate to the application for pecuniary aid; and further, to examine and re-port upon the Petition of the Inhabitants of Niagara on the subject of a Lateral Cut, have availed themselves of such opportunities of acquiring information respecting the matters referred to them, as were within their reach, and they offer to the House, as the result of their enquiries, the evidence collected in the appendix to this Report. They have also given their best consideration to such views of the undertaking in question, its progress and probable consequences, as have been from time to time exhibited in documents published by the Company, and in reports which have been heretofore submitted to the House of Assembly. So much indeed has already been said and written on the subject of the Welland Canal the advantages it holds forth are so obvious, and the different questions connected with it, have undergone already such full investigation, that your Committee do not conceive that much new information will be found to have been elicited by their enquiries. They will serve however to shew more clearly upon what foundation many opinions rest, which have been hitherto discussed, and in conjuction with the Report of the President and Directors of the Company, of which the House is in possession, will it is hoped; tend to place satisfactorily under one view, the grounds upon which the Committee have decided, in the matters referred to them. The Committee have earnestly endeavoured to draw from the various sources of information referred to, such a conclusion as they could justify to themselves, and as they could present with satisfaction and confidence to the House.

The very extensive operations which have been carried through by the Company during the last year, have now brought much nearer to view the desirable end, which the projectors of this great public improvement had proposed, and which not long ago, many persons seemed to despair of seeing over accomplished.

The comparison of what has been done with what remains to be performed, and testimony of experienced Engineers, become more satisfactory in proportion as it has been verified by results already attained, seem now to leave no longer any rational ground for apprehension, that the Welland Canal cannot be completed at something near the estimated cost. It is true there is yet much difficulty to be surmounted, but none of which an estimate cunnot now be made with reasonable accuracy by persons required to such calculations. That the event accustomed to such calculations. may not to a certain extent discredit these calculations, your Committee could, under no circumstances, venture to affirm; because they are not ignorant that in great undertakings of this description, as in almost every concern of human life, difficulties and disappointments do frequently present them-selves which impose a necessity for increased exertion, although they are not of sufficient magnitude to prevent the prosecution of the design.

Your Committee conceives that on this as on other occasions, a reasonable confidence must of necessity be reposed in the opinion of those who from their science and experience are best able to judge, and against whose testimony no objection is raised on the score of pecuniary interest, or local prejudices.-The Company seems fortunately to have felt strongly the necessity of employing competent and respectable Engineers to superintend their operations—and it happens, as will be seen on the evidence of Col. Clark, that from a particular circumstance out of the ordinary course, the Company and the public have the advantage of possessing the opinion of the principal resident Engineer, as to the present state and probable completion of the Canal, expressed on outh. the absence of every information to the contrary, which can be thought equally entitled to attention, your Committee have necessarily founded their opinion upon the assumed accuracy of the Engineer's estimates-and upon his judgment thus declared, under a more than ordinary sanction.

The section of the Canal between the Welland and the Grand River, does not appear at present to claim any particular enquiry or consideration, as affecting the decision which it may be proper to come to upon the several matters embraced in the resolutions of the House. That portion of the undertaking will doubtless be accomplished if the other is ensured: its cost it appears can be estimated almost with certainty, the labor required is not of a difficult or extraordinary kind, and your Committee in viewing the Welland Canal as a work of public benefit have all along felt that they may safely regard the construction of this part of the Canal as a consequence that will unquestionably follow the accomplishment of the section now in progress.

Confining their observations entirely to the latter, it appears to the Committee that the report recently published by the President and Directors of the Company, and annexed to the petition to the House of Assembly, renders it unnecessary to enter here into any particular statement of the present situation of the work, or the past proceedings of the Company, as these are detailed at length in the report referred to, which is not at variance with any information which has been acquired by your Committee.

It is now made evident, so far as the best means of information can be depended upon, that a navigation convenient forschooners of the burthen ordinarily in use on the lakes, can be formed between Lakes Erie and Ontario—the present interruption occasioned by the Falls of Niagara thus happily obviated, and a continued water communication from the western extremity of the Province to the ocean effected, at a charge not materially varying from that which the House of Assembly was led to expect when they lent their countenance to the undertaking by their vote of the last session.

Within the last season more than half the labor necessary to the completion of this stupendous work has been actually performed. It has been advanced with a perseverance and activity which have astonished those who have witnessed it, and which has compelled the approbation of some who were unfriendly to the project, as it has given confidence to many who had been avowedly incredulous.

The economy and judgment with which the funds have been expended, have not been in the slightest degree impeached by any thing which has appeared to your Committee; on the contrary it is satisfactory to state that they have been acknowledged in the most express and unqualified manner, in his own name and on bebalf of the Stockholders whom he represents, by the gentleman, who from his great stake in the Company, has borne by far the greatest share in the burthen of expenditure. While from his residence out of the Province he has had no voice in directing its application.

Up to this moment the greatest pressure has borne upon the Stockholders resident in New York. The very timely aid afforded by the public loan of £25,000, and the extraordinary efforts of those gentlemen who embarked so deeply in the undertaking, have placed it in the power of the Directors to proceed without relaxing their exertions; but your Committee is assured that to effect this object, the means of individuals have been strained to the utmost, and even a risk of embarrassment incurred, which ought not to be contemplated without painful emotions by those who regard the importance of the Welland Canal to our public interests.

If it is to proceed to its termination with the same spirit with which it has hitherto advanced, corresponding preparations must be made this winter for resuming the work early in the Spring. Great expenditures are required to be almost immediately incurred, while the roads admit convenient transport. Uncertainty and delay are embarrassing, and may be even ruinous to Contractors whose fortunes are embarked in this great public work and whose exertions, through a season of unremitted activity, have attracted general admiration.

If it be proposed as a question, whether the undertaking shall be now suffered to languish and the

F4

The Committee have earnestly endeavoured to draw from the various sources of information referred to, such a conclusion as they could justify to themselves, and as they could present with satisfaction and confidence to the House.

The very extensive operations which have been carried through by the Company during the last year, have now brought much nearer to view the desirable end, which the projectors of this great public improvement had proposed, and which not long ago, many persons seemed to despair of seeing over accomplished.

The comparison of what has been done with what remains to be performed, and testimony of experienced Engineers, become more satisfactory in proportion as it has been verified by results already attained, seem now to leave no longer any rational ground for apprehension, that the Welland Canal cannot be completed at something near the estimated cost. It is true there is yet much difficulty to be surmounted, but none of which an estimate cunnot now be made with reasonable accuracy by persons That the event accustomed to such calculations. may not to a certain extent discredit these calculations, your Committee could, under no circumstances, venture to affirm; because they are not ignorant that in great undertakings of this description, as in almost every concern of human life, difficulties and disappointments do frequently present them-selves which impose a necessity for increased exertion, although they are not of sufficient magnitude to prevent the prosecution of the design.

Your Committee conceives that on this as on other occasions, a reasonable confidence must of necessity be reposed in the opinion of those who from their science and experience are best able to judge, and against whose testimony no objection is raised on the score of pecuniary interest, or local prejudices .- The Company seems fortunately to have felt strongly the necessity of employing competent and respectable Engineers to superintend their operations-and it happens, as will be seen on the evidence of Col. Clark, that from a particular circumstance out of the ordinary course, the Company and the public have the advantage of possessing the opinion of the principal resident Engineer, as to the present state and probable completion of the Canal, expressed on outh. In the absence of every information to the contrary, which can be thought equally entitled to attention, your Committee have necessarily founded their opinion upon the assumed accuracy of the Engineer's estimates-and upon his judgment thus declared, under a more than ordinary sanction.

The section of the Canal between the Welland and the Grand River, does not appear at present to claim any particular enquiry or consideration, as affecting the decision which it may be proper to come to upon the several matters embraced in the resolutions of the House. That portion of the undertaking will doubtless be accomplished if the other is ensured: its cost it appears can be estimated almost with certainty, the labor required is not of a difficult or extraordinary kind, and your Committee in viewing the Welland Canal as a work of public benefit have all along felt that they may safely regard the construction of this part of the Canal as a consequence that will unquestionably follow the accomplishment of the section now in progress.

Confining their observations entirely to the latter, it appears to the Committee that the report recently published by the President and Directors of the Company, and annexed to the petition to the House of Assembly, renders it unnecessary to enter here into any particular statement of the present situation of the work, or the past proceedings of the Company, as these are detailed at length in the report referred to; which is not at variance with any information which has been acquired by your Committee.

It is now made evident, so far as the best means of information can be depended upon, that a navigation convenient forschooners of the burthen ordinarily in use on the lakes, can be formed between Lakes Erie and Ontario—the present interruption occasioned by the Falls of Niagara thus happily obviated, and a continued water communication from the western extremity of the Province to the ocean effected, at a charge not materially varying from that which the House of Assembly was led to expect when they lent their countenance to the undertaking by their vote of the last session.

Within the last season more than half the labor necessary to the completion of this stupendous work has been actually performed. It has been advanced with a perseverance and activity which have astonished those who have witnessed it, and which has compelled the approbation of some who were unfriendly to the project, as it has given confidence to many who had been avowedly incredulous.

The economy and judgment with which the funds, have been expended, have not been in the slightest degree impeached by any thing which has appeared to your Committee; on the contrary it is satisfactory to state that they have been acknowledged in the most express and unqualified manner, in his own name and on bebalf of the Stockholders whom he represents, by the gentleman, who from his great stake in the Company, has borne by far the greatest share in the burthen of expenditure. While from his residence out of the Province he has had no voice in directing its application.

Up to this moment the greatest pressure has borne upon the Stockholders resident in New York. The very timely aid afforded by the public loan of £25,000, and the extraordinary efforts of those gentlemen who embarked so deeply in the undertaking, have placed it in the power of the Directors to proceed without relaxing their exertions; but your Committee is assured that to effect this object, the means of individuals have been strained to the utmost, and even a risk of embarrassment incurred, which ought not to be contemplated without painful emotions by those who regard the importance of the Welland Canal to our public interests.

If it is to proceed to its termination with the same spirit with which it has hitherto advanced, corresponding preparations must be made this winter for resuming the work early in the Spring. Great expenditures are required to be almost immediately incurred, while the roads admit convenient transport. Uncertainty and delay are embarrassing, and may be even ruinous to Contractors whose fortunes are embarked in this great public work and whose exertions, through a season of unremitted activity, have attracted general admiration.

If it be proposed as a question, whether the undertaking shall be now suffered to languish and the

F4

od of its completion be deferred, at the hazard of injury to portions of the Canal now in progress—and with the risk of so much depressing public confidence in the result, as not only to increase greatly the difficulties which have pressed already too heavily upon a few individuals, but even to render the final issue doubtful, Your Committee regarding the question as one of public concern, cannot hesitate to recommend that public aid should be extended to the utmost convenient limit rather than suffer so fatal a disappointment.

With regard to the prospect of future means, your Committee do not think that any reliance ought to be placed upon the probability of subscriptions of Stock in England. That expectation has already led to most unfortunate and perplexing delays; the relief of the present exigency, no dependance should, in their opinion, be placed upon it. It is equally their impression, from all that has been submitted to them, that the measures of preparation which ought now to be adopted cannot be taken upon the prospect of filling up the remaining subscriptions in America, for of that no assurance whatever, can as they conceive, he prudently indulged. Your Committee therefore, are decidedly of opinion, that setting aside all considerations connected with the actual state of the public revenue (which they understand not to be in any manner referred to their deliberations, but to be reserved to the judgement of the House,) the present state of the Welland Canal requires that the immediate and effectual support of the Legislature should be given to the undertaking.

It is a work manifestly of great public interest.-It has attracted, and deservedly, the particular patronage of His Majer y's Government, and of the Government and Legislature of this Province. It will be seen by the evidence appended to this Report that the inhabitants of some of our largest and most fertile Districts look with intense anxiety to its accomplishment, and whatever may be the measure of accuracy in those calculations upon the productiveness of the Stock, which it is natural the Stockholders should look to, it is indisputable that the benefit it will confer directly upon one third part of Upper Canada, and indirectly upon the whole, will be greater than can now be estimated. Under this congreater than can now be estimated. viction your Committee recommend the acceding to the prayer of the petition, by authorising £50,000 to be held as public Stock, and suffering the £25,000 now advanced as a loan, to be retained as a payment on account of such Stock.

Your Committee on a due consideration of the circumstances, are even inclined to go farther, in the belief that as the object of affording public aid must be to place the completion of the Canal beyond question, it would neither be proper nor prudent in the Legislature, if they embark to so great an extent in the undertaking, to stop short of such measures as are necessary to render their assistance effectual. If public stock to the amount of £50,000 were taken, and the loan of £25,000 suffered to remain as at present, the Company paying the interest as thay have hitherto done, and will no doubt continue to do, the Committee are assured that the work will proceed without danger of interruption, of which there does not otherwise appear to be sufficient certainty.

By receiving assistance to this effect, the Company will have immediately the use of a large sum,

and can make their preparations at once, and with confidence, while the present pressure upon the Provincial Revenue would be scarcely at all increased by it, on account of the interest upon the £25,000 loaned, continuing to be paid by the Company and not by the Government, as it must be, if converted into stock.

Your Committee have deliberated on the comparative expediency of affording assistance by subscribing stock, or making a loan to the Company, and have been led to recommend the former.

1st. Because it will leave so much less stock unsubscribed, that it will undoubtedly hasten and probably ensure immediately the taking up of the whole remaining amount; and from the moment that is done the Committee conceives that the completion of the entire line of the Canal will be placed beyond a question.

2nd. Because the Company being burthened with a debt of £50,000 or £75,000, will have a tendency to deter individuals from subscribing and thus operate against the filling up the list.

3rd. Because when the amount of stock to be subscribed is reduced to £50,000, and the certainty afforded of the work being carried so nearly to its completion, by the subscription made by the Government, the Committee has little doubt that the remaining stock will be quickly taken, and that when that is the case the stock will become at once marketable, and it will be in the power of the Government, if it should be thought desirable, to relieve themselves of part of the advance, by selling a portion of its stock.

4th. Because it is obvious to your Committee that whether the Government be authorised to make a loan to the Company or to take stock to the amount recommended, the Legislature can only reasonably look for security of reimbursement, to the assurance of the Canal being completed, and the stock invested in it being productive.—If these expectations are, (contrary to every present appearance) disappointed, the Committee do not see that the Government would be in any degree better situated as holders of a loan than as stockholders.—But if on the other hand, they are realized, the public revenue will be benefited by any profit arising, and the Government will have the option of retaining a productive stock, or of parting with it, and thus reimbursing themselves sooner than the loan should be repaid.

5th. Because if there is any truth in a rumourwhich has gained circulation, that His Majesty's: Government may, from public inducements, be inclined to possess themselves of the whole stock of the Company, such an arrangement would be facilitated by the Government now becoming stockholders to so considerable an amount.

> ARCHIBALD McLEAN, Chairman.

The Honorable John Henry Dunn.

The Committee met for the purpose of examining and reporting whether it is necessary, in order to ensure the speedy completion of the Welland Canal upon its present enlarged scale, that public aid should be afforded to the Company; and if so, to what extent:—and whether such aid would be most effectually extended by making a further loan or taking Stock in the name of the Government, or by any and what other measures; and also to examine and report by bill or otherwise, upon such parts of the prayer of the Petition of the President and Directors of the Welland Canal Company, as do not relate to the application for pecuniary aid;—and further, to examine and report upon the petition of the Inhabitants of Niagara on the subject of a Lateral Cut.

The following Petition of the President and Directors of the Welland Canal Company, and also the Petition referred from Niagara, were then read.

TO THE HONORABLE THE COMMONS HOUSE OF ASSEMBLY OF THE PROVINCE OF UPPER CANADA, IN PROVINCIAL PARLIAMENT ASSEMBLED.

The Petition of the President and Directors of the Welland Canal Company.

HUMBLY SHEWETH,

That since the last session of the Provincial Parliament, they have, with the assistance so liberally, at that time, afforded them by the Legislature, made very great efforts towards the completion of the work confided to their care, and which have been crowned with success fully equal to their most sanguine expectation; for a more particular account whereof they respectfully beg leave to refer to their Report to the Stockholders, hereto annexed; but they regret to state, that from a variety of unforeseen and untoward circumstances, the amount of Stock actually subscribed remains nearly the same as it did last year, when they sought for, and obtained from your Honorable House, that aid and assistance which has been so beneficial to the Company.

That the Directors still retain the desire that originally influenced the Board, when they determined to offer one half of their Stock for subscription in London; and with that wish they have hitherto forborne throwing it open for subscription in America, where three fourths of the amount already subscribed were taken up: that from the delay necessarily attendant upon negotiations at a distance, a considerable time has already elapsed, and a further period may still transpire before the final result of their application to London for filling up the subscription of the remaining Stock is communicated to them, which embarrasses them extremely in making arrange-

ments for resuming their operations at the opening of the ensuing season with the same vigor which has marked their progress during the last; inasmuch as it is absolutely necessary for so doing, that no uncertainty should exist with regard to the funds for carrying on the work.

That under these circumstances the President and Directors have deemed it expedient, most respectfully to represent to your Honorable House, that a subscription by the Provincial Government of £50,000, of Stock, would relieve the Company from all embarrassment, the one half of which sum has already been loaned to the Company under the authority of the Act of the last session of Parliament, passed for that purpose.

That such a share in the Stock of the Company would give the Government a claim to the appointment of at least two Directors, which could not fail to add to the respectability of the Company, and increase public confidence both at home and abroad.

That from the small number of persons who are cligible to become Directors, some difficulty has been experienced by the Stockholders in selecting proper individuals to fill that situation, the Directors have therefore been requested to state the inconvenience to the Legislature; and pray that so much of the 27th clause of the Act of Incorporation may be rerepealed, as renders it necessary for two at least of the Directors to go out each year.

That the time fixed for the election of Directors by the 27th clause of the said act, namely the first Monday in April, has been found inconvenient for the attendance of Stockholders, and that the second Tuesday in May in each year would be preferable, and also that the number of votes established by the 14th Section of the 6th, Geo. IV, does not, in the opinion of the Directors, bear a due proportion to the number of shares held by Stockholders, which they conceive might be amended according to the following scale—namely, one vote for ten shares, two votes for twenty shares, and one vote for every additional forty shares.

That the provision contained in the 15th clause of the last mentioned act, enabling his Majesty to assume the possession and property of the Canal at any time after fifty years, upon payment of the sums furnished and advanced towards the making or completing the said Canal, together with 25 per cent., upon the monies so advanced and paid, has, and will continue to have, an injurious tendency in depressing the value of the Stock of the Company; and that if it is deemed expedient to enable his Majesty to assume the property of the said Canal at all, it should be upon payment to the Stockholders of the market price of the Stock at the time of purchase; in which case ten per cent., over and above such price would be a sufficient premium to the Company.

That from the scarcity of coarse grain in this part of the province, and the absolute necessity of procuring it, as well as various other articles, from the United States, necessary for the construction of the Canal, your petitioners pray your Honorable Body may be pleased to remit the duties now paid, and what may hereafter be required in the construction of the Canal Your petitioners therefore pray that

your Honorable House will take the premises into consideration and grant such relief to the Company as to Your Honorable House may seem meet.

And as in duty bound will over pray,

For the Directors,

JOHN H. DUNN,

President W. C. C.

TO THE HONORABLE THE COMMONS HOUSE OF ASSEMBLY IN PROVINCE. PARLIAMENT ASSEMBLED.

The Petition of the inhabitants of the Town of Niagara.

HUMBLY SHEWETH:-

That your Petitioners are desirous of making a lateral Cut from the River Niagara to intersect the Welland Canal below the Mountain Ridge, of equal dimensions with the Welland Canal, and for the information of your honorable. House would beg leave to state, that they have obtained the consent of John B. Yates, the largest individual Stockholder in the said Welland Canal, and who is acting in behalf of the Stockholders of the State of New York, to that effect.

Your petitioners therefore humbly pray that your honorable House would pass a Bill to incorporate your said petitioners into a Company, with a Capital of £30,000, to make such lateral Cut, under the control of such a number of Directors as to your honorable House may seem proper; and also that when such cut is completed the Stock may be added to the Stock of the Welland Canal, that they may form one Company and one interest.

And your petitioners as in duty bound, will ever pray.

J. MUIRHEAD, and others.

John B. Yates Esq., was then called in, and the matters referred to the Committee being stated to him, he was asked whether he had any information to offer to the Committee on the subjects referred.

The following communications were in consequence received from him, addressed to the Chairman.

Sir,

In order fully to answer the inquiry of the Committee, I will state and answer their questions in the order submitted.

1st, Whether any and what aid from Government is requisite to enable the Company to complete the Canal pursuant to the present plan?

There is now somewhat less than half of the capital Stock subscribed, owing to the causes named in the Report of the Board of Directors, and all the operations of the Company have been supported by calls on that proportion of Stock and the Government loan of £25,000. In order to complete the Canal to the Welland River, about £80,000 more will be required; and it is estimated that about £37,500 more will be requisite to complete the portion from the Welland to the Grand River.

The amount of present subscribed Stock remaining uncalled is £31,500; in order therefore to complete it to the Welland River £48,500 will be necessary, beyond what may be called from present Stockholders. It is therefore evident that unless much more Stock be subscribed either by Government or individuals, the work cannot be completed, even to the Welland.

2nd. Whether such aid would be most effectually extended by making a further loan, or by taking Stock in the name of the Government, or by any and what other measures?

The shape in which this aid, if afforded, would be most beneficial, both to the Government and the Company, I have no hesitation in saying is that of subscribing Stock; the amount of Stock so subscribed will then be taken entirely out of the market; the influence and attention of the persons interested in the Company will enable them to procure the remainder of the Stock to be taken up, and it would be an object of interest to the Government, much greater than a loan to the Company, and much greater than will pay, in a very short time, the principal and interest of any debt incurred for it. On an examination of the resources of the country, on the Canadian shores of Lake Erie alone, and between that and Lake Huron, the fertility of its soil, and great facility for water communication by the Thames and Grand Rivers, which are navigable, the former of which runs through the centre of the country, parallel with Lake Eric and the outlet of Lake Huron, this result must be evident to every man of common intelligence and observation, unless such a man can believe that like causes will not produce like effects. If the amount of Stock thus taken shall be £50,000 exclusive of the £25,000 already loaned, there will then be about £35,000 more to be offered in market, which I have not the least doubt will be readily disposed of. Should however the Government confine themselves to £50000, including the £25,000 already loaned, being the amount contained in the petition of the Directors, I believe the Company may be enabled to go on with renewed hope of completing the work, in the reasonable expectation that this act of the Government, together with the amount to be received from the Military Government, will give sufficient confidence to dispose of the then remaining £60,000 of Stock. The idea of an additional loan of £25,000, I have named last, because I think it the least advantageous to the Government and Company; although even that may be efficient. It will readily be seen why this aid cannot be as effectual as the other, when it is known that the £110,000 of Stock must still be offered; and in consequence of the debt, together with the misrepresentations and efforts of the opponents to the Canal, there will be a reluctance on the part of new subscribers to take it. If therefore a loan of money to the Company be made, it ought to be sufficient to complete the Canal; and then the Government would have an amount of property as security therefor, vested in the Canal Company, equal to double the amount of money loaned. Such is the confidence of the present Stockholders in the prospects of the Canal, that in this event they would wish no more Stock to be offered by the Directors until the expiration of two or three years after the Canal shall be completed, and then let it be sold at public Auction in lots of twenty shares. each, for the payment of the debt. They are satisfied that it will then sell for a sum far exceeding any amount requisite to pay their debt, and all the advance of interest money that shall then have been paid for such loan.

3rd. What are the reasons in favor of an alteration in that part of the act of incorporation declaring two of the former Directors ineligible to a second election the next succeeding year?

The provision in the charter for an annual change in the Board of Directors, by rendering two of the Directors ineligible a second year, may prove injurious to the interest of the Company, owing to the small number of stockholders from whom they have the power to select, and there is no one light in which I can view this prohibition that it appears likely to be really useful. If good directors are in the board there is no reason why they should not be retained, and if they are not so, men whose interest it is to remove them, will certainly not re-elect them.

4th. What are the reasons in favor of altering the time of election?

With regard to the time of election, I cannot say that it is very important. A more convenient month for travelling would induce a more general attendance of stockholders, and the month of May is on that account better than April, and the beginning of June better than either:

5th. What are the reasons in favor of changing the ratio of voting at all meetings of stockholders?

I feel myself constrained to say, in answer to this question, that I think the ratio of votes to be given proportioned to the stock by the present law is positively unjust.

The 14th section of the law of 1825, extending and amending the charter, contains the following enactments :- "That the holder of five shares shall be "entitled to one vote, the holder of twenty shares " to two votes, the holder of fifty shares three votes, " and the holder of one hundred shares and upwards " four votet at all general meetings of the stockhold-In the management of the affairs of an incorporated Company where the whole subject of government and direction is of a pecuniary nature, the only fair rule in my opinion is, that the power shall be proportioned to the interest. If this rule be varied it ought not to be so much varied that by the combination of a number of flagitious persons who can command a small amount of money, fraud on unsuspicious and home fide stockholders may be com-The present law affords such opportunity, and I think the amendment solicited by the Directors will give power sufficient to those greatly interestee in the stock to preventit. I am however an advocate in all money incorporations for the representation of each unit of stock in the affairs of the Company, so far as it is practicable. I believe greater security against every species of misconduct is afforded by it than any other rate of voting.

6th. What are the reasons in favor of a repeal or alteration of the part authorising the purchase of the Canal by the Government?

The 15th and 16th sections create a limitation, and declare a conditional termination, which must have a serious effect upon the value of the stock already ta-

ken, and may deter others from investing, especially as there is a limitation of dividends contained in the original act of incorporation.

I have been told that this limitation is merely a matter of form, and will never be enforced—of that I am myself well satisfied.—The generosity of His Majesty's Government and the great liberality with which the Company has been patronized, give sufficient assurance that every reasonable support and countenance will be granted to them. As however much individual effort has been requisite to support the Company, and much more will probably be rerequired before the work can be completed, it is important that every proper inducement should be afforded to new adventurers for the balance of stock that may yet remain unsubscribed. These sections which are viewed as of no great consequence to the Government, I consider of great importance to the stockholders, and particularly the estimation in which the stock will be held as an object for permanent investment for any particular purpose.

7. What are the reasons in favor of the remission of duties on particular articles at this time?

The propriety of, and necessity for, such a measure, can be better shewn by the Agent and Engineer of the Company, who are now here, than by me.

8. The last inquiry which I am desired to answer is, the propriety and advantage of making an additional or branch Canal to Niagara.

This is a subject that has created some considerable excitement, but as the termination at the mouth of the 12 Mile Creek is now fixed and the Harbour there will be completed, the only question presented is, whether the Company will be injured and the stock depreciated by a future addition of capital sufficient to construct a Canal from the mountain ridge to the harbor at Niagara? I believe not many years will pass by, before every channel of communication from the Upper Lakes to the markets on the sea. board will be filled, and that there will be abundant work for both the routes, to the mouth of the 12 Mile Creek and Niagara, I believe also the mercantile competition between the inhabitants on both routes, together with the Hydraulic privileges will be very advantageous to the income of the Company, and the business on the Canal, as well as certainly to the country at large. An active and industrious population will be induced by com-An active and petition, and especially local competition, to do business for the smallest possible guins by which they can be supported. Thus their business is increased, and they are enabled to do it for a less proportional compensation than they can a smaller business. It not unfrequently happens where such business is not necessarily circumscibed by small territorial limits or amount, that each place so actively engaged, increases more in population and wealth than either would, if controlling the whole business that might be offered. The inducement to transact business where there is such competition is certainly greater to the people in the country than without it. The stock, however, thrown into market at this time would be injurious, and, therefore, the whole direction of such added stock, and making such branch canal should be left discretionary with the Company, and it ought to be made under the direc-

H4

tion, and form a part of the capital stock, of the present Company.

It would perhaps also be well to name a sum large enough, and give authority to the Company to improve the navigation of the Welland and Grand Rivers as high up as possible. The improvements of these rivers will probably at no very distant time become an object of attention, and when this Canal shall be completed there can be no objection to authorise an increase of stock for such purpose.

With the greatest respect,

I am, Sir,

Your obedient servant,

J. B. YATES.

York, Jan. 12, 1827.

ARCHIBALD M'LEAN, Esquire, Chairman of the Committee, on the Petition of the Welland Canal Company.

STR.

In consequence of the request of the Committee to furnish them with a statement of the facts and calculations on which the opinion is founded that the Welland Canal will yield an income immediately after its completion equal to the interest of its cost.

### I submit the following:

On an examination of the census of 1825, it appears that the portion of country within the Province, the produce of which will pass through the Welland Canal, contains a population of more than 50,000 at this time. The articles to be exported consist of lumber of all sorts, stone, gypsum, pot and pearl ashes, flour, wheat, cornmeal, pork, whiskey, cider, fruit, lard, butter, cheese, tobacco, &c.—In estimating the quantity of each of these articles which will probably pass, a much less amount is named than the same extent of population, under equally advantageous circumstances, have sent from places within my observation, the toll for the whole 41 miles, is put down at 7s. 6d. per ton descending, and 10s. up, except lumber.

Amount of capital £200,000—six per cent interest on it is £12,000; deduct this from the £21,343 15s. will leave £9,343 15s. income after paying the interest. In this estimation it will be observed that I have confined myself to what in my opinion are the reasonable resources of the country on the Canadian side of Lake Eric only, nor have I taken in the estimate any portion of what has been and will be received from Government, that is, the gratuity of 13,000 acres of land-and one ninth of the capital to be expended in making the Canal, as a compensation for passing Government Stores without toll or duty. These items I have left to meet any allegations that may be made, that the actual expenditure will exceed the nominal capital; although there is no reason for this opinion, and I think they may safely be added as sources of income. Without therefore, any reliance on the produce from the American side, which I will show conclusively it is their interest to send by this channel if permitted to do so, and after making an allowance of nearly one half for an over estimate of the exports of the present population, there will still be enough left to pay the interest on the full capital expended. And here I desire to observe, as a proof that the quantity expected to be exported is very low, that a single Township in the Western part of the State of New York, the Township of Scipio, on Cayuga Lake, exported in 1824, 150,000 bushels of Wheat, and upwards of 3,000 burrels of Pork, besides other articles, and a person owning a Store in the small Village of Pittsford, 7 miles East of Rochester informed me that this Fall 20,000 bushels of new wheat had passed through one store in bulk to Albany since last harvest. There is one article I have not named, but which will soon become a very important and profitable material for exportation from this country, that is Indian corn meal in tierces; hitherto it has not been worth attention, because of the difficulty of transportation, but after the Canal shall be completed it will receive immediate attention. There is also a great variety of other articles not named which this country may I am told that there is iron ore in great produce. abundance not far from the mouth of Grand River. It will be profitable for American merchants along Lake Erie to use this Canal, even for a N. York market, and if profitable they will do it. In or-

der to shew this more conclusively, I will take for the Welland Canal the same rate of charge above named, which is greater than that on the Eric Canal, and it will still be found much cheaper to send by this route to New York than the other.—

The Canal from Oswego to Syracuse is now making, and will be finished in the course of this year.

The difference of transit from Lake Erie to Syracuse between the Erie and Welland Canals.

The distance from Buffulo to Syracuse is 200 miles.

Balance in favor of Welland Canal per ton.\$4 45

Thus it will be seen that with the rate of toll I have assumed, it will be the interest of the American Vessels to use the Canal; and vessels once having their Cargo on board will carry it as far as they can. If under such circumstances one fourth only use it, an immense amount of income will be added to the above probable estimate; and it is most difficult to say in the range of reasonable anticipation where to name a limit. It is a well known and acknowledged fact that in the Spring of the year, from 3 to 5 weeks the Harbor of Buffalo is closed, when the Lake beyond point Abino is clear of ice, and as it is always in the power of the Company to break up the ice in the Canal when the weather is mild, a decided advantage in navigation must be enjoyed by the Com pany in consequence of this irremediable difficulty which will induce great efforts to hasten down produce for an early market through the Welland and Oswego Canals to New York. The facility of travelling by way of Oswego and the Welland Canal will also be so much greater, that the number of Steam Boats for the conveyance of passengers will probably be much increased by it. Let the income

arising from these additional sources of revenue be added to the computation above made, and I think there can no longer be any doubt as to the fair prospects of the Canal and the profits which must arise from it. To put this calculation in figures would swell it to an amount beyond any conception; but when it is known, which it is now officially, from the Message of the Governor, that the New York Canals have given an income this last year of \$771,780, it is not unreasonable to expect that the most incredulous must believe, and even the sceptic will lose his doubts. The increased amount of annual transportation on the New York Canals very far exceeds the increased proportion. The facility affords the power and the opportunity to the old inhabitants to increase their exports, and receive from them a much larger product, owing to the diminished expense of transit.

With great respect,

I am Sir,

Your obedient Servant,

J. B. YATES.

There is another apparent difference in favor of the Welland Canal which I have forgotten to mention in the proper place, although it is evidently important. The difference between the daily expense of a vessel of 100 tons and 3 hands navigating the Lakes and the Welland Canal, and a Canal Boat of 30 or 40 tons with the same number of hands and additional expense of horses. And if the Canal Boats go night and day, which they must to make the same average progress with a vessel on the Lakes, they must be double manned and have two sets of horses.

#### J. B. YATES, ESQUIRE.

States,-That if the whole amount of Stock had been subscribed it would have been quite sufficient to complete the Canal. The estimate for the whole is under the amount of Stock authorised by law.— Thinks the whole amount of Stock would have been taken if offered in June or July 1825, at New York; and that sufficient would then have been paid in to ensure the ultimate payment of the whole, but was satisfied at that time with the reasons given for withholding it. Without further aid from the Province, the Company will be greatly embarrassed in the progress of the work, and even in completing their present contracts, arising from the circumstance of so little Stock being taken up, and the price of that Stock being depreciated in the market in consequence of the difficulties and the distant prospect of completing the work-less than half the Stock being taken up. One half was subscribed, but about one tenth has reverted to the Company in consequence of failure on the part of the holders to pay the instal-ments. Some of the holders seem to have relinquished their Stock from apprehension of the failure of the undertaking, and others from the want of funds.

He is one of the original subscribers to the Welland Canal Company, to the amount of 2510 shares for himself individually: and in his own name, and his partners and friends, about 4000 shares are held at this time, of which about 1000 have been acquired by transfer. He has paid in on the whole amount of shares 65 per cent, by himself and partner &c. He is not, and cannot be a Director from his residence cut of the Province.

He has visited the work several times in its progress, and has had satisfactory opportunity afforded by the Directors, of knowing the proceedings of the Company from time to time, and has found every reason to be fully satisfied with the manner in which the work has been conducted and the funds expended.

He thinks that every Stokholder ought to be satisfied, as there has been the greatest economy and attention.

He has no means of knowing from his personal observation whether the Eric or Welland Canal have been conducted with more economy; but from what he has heard from persons capable of judging, he thinks the Welland Canal has been conducted as economically as (if not more so than) the Eric Canal.

He is satisfied from the state of the funds and the state of the work that it would not be advantageous to enlarge the Locks on the mountain ridge to correspond with those from St. Catharines downwards, as five of the Locks are already completed and the expense of these would be lost; besides the advantages which might be expected would not be commensurate with the expense necessary to be incurred.

He can form no opinion of the relative expense of carrying the Caual to Niagara or to the Twelve Mile Creek. If it had been originally carried to Niagara it would have secured the interest of the inhabitants of that place, which has since been against it.

He thought originally under all the circumstances it would have been more prudent to take the Canal to Niagara; but that as the route was settled by Act of Parliament, he assented to it.

He thinks the manner of conducting the Canal has given satisfaction to all who had an interest worth naming. There were representations made by persons opposed to the Canal, dissuading persons at New York from taking stock, in consequence of which a great many shares were thrown into the market, which were purchased by Mr. Yates and partner; one hundred shares were sent out also to the New York market from Montreal, being the shares of Messrs. Goldschmidt, an insolvent estate.

On being asked whether any offer has been made to take the completion of the whole of the Deep Cut at 17½ cents per cubic yard and rejected, the work being given to another person at 25 cents per cubic yard. Mr. Yates says, that such offer was made but not accepted, and the higher price given. The offer was communicated to him before any work was commenced, and the reasons assigned for rejecting it were satisfactory to him at the time.

It was evident to him from the examination of the work and the Report of the Engineers that the work could not have been completed at 17½ cents, and that any Contractor who would have taken it at that price must have been ruined.

He is satisfied that the person who offered it at 17½ cents would have failed in his contract had it been given to him, and that the Company must thereby have sustained great injury, and it was thought more for the interest of the Company to give that work even at a higher price to a person who would complete it than to run any risk in accepting

the cheaper proposal. It was not offered at the higher price to the person who made the lowest proposal.

All the Stock would not probably at this time be taken up at New York if offered, as there are several very influential persons, Stockbrokers there, who apparently from interest are hostile to the undertaking, and who have taken pains to depress the value of the Stock as well in Lower Canada as at New York.

He thinks that the effect of completing this canal would be that it would afford the means to the Company to embark in other undertakings for the improvement of the navigation. If the navigation of the St. Lawrence were improved it would have a good effect upon the stock of the Welland Canal.

It would be an advantage that the Company should have it in their power after the completion of the Canal to go on with the improvement of the navigation of the St. Lawrence, as each of these undertakings, when completed, would give additional value to the other.

#### ALFRED BARRETT.

Is a Civil Engineer, educated under Wright and Roberts—all his experience has been acquired at the Eric Canal—he still holds his station as an Engineer in the State of New York—has frequently had the immediate direction of parts of the Eric Canal under the general superintendance of Mr. Wright and Mr. Roberts—since the 10th May last has been constantly employed in superintending Welland Canal and Harbor.

The Contractors have generally proceeded well, and no difficulties have occurred in the work which were not anticipated—that it does not appear to him that any material error has been committed, either in the planning or progress of the work—the expenditure has been regulated by his certificates of the work done—the contracts had been formed before he came, and he thinks the prices were reasonable.

He assisted in making all the calculations contained in Mr. Thomas' report, dated 11th November 1826, and is of opinion that the sum therein stated will be required to complete the work from the Welland to Lake Ontario, and that an additional sum will be required for the Hurbor-the probable sum may he \$15,000-the original estimate was \$15,000, and he thinks it will cost double that sum, from the extension and the increased dimensions of the Piers and the additional depth of excavation, as well as to make the whole more substantial—thinks the whole can be completed at as cheap a rate in one year as in two, and the Contractors are anxious to proceed so as to finish next summer, and that they would feel it a disadvantage if not allowed to do so-thinks it practicable to complete the whole from the Welland to Lake Ontario next summer, if furnished with means. The operations are almost wholly suspended at this time, but will be renewed in the latter part of March or beginning of April—an average expenditure of from 30 to \$32,000 per month, from March till January next, inclusive, would complete the work. Does not anticipate any difficulty at the Deep

Cut, having already dag down to the bottom level without obstruction—the rock excavation does not exceed a quarter of a mile, and may be done for less than the original estimate. It is very important to the Contractors, in order that they may make their preparations, to know how the operations of the Company are to be conducted next summer.

Thinks that there would be no great surf at the Harbor except from easterly winds, and that if it was blowing an easterly gale a Vessel might conveniently enter the Harbor. There will be 12 feet water in the Harbor when completed, and it may be finished by the first of August-the Canal is now nearly completed to St. Catharines, except the Hurbor-the Harbor will not require any expenditure beyond what is stated in Mr. Thomas' Roport, unless a Breakwater is constructed, in which case it may require about a thousand pounds additional. If the Locks were completed on the mountain ridge on the same scale as from St. Catharines to the Harbor, it would occasion an expense to the Company of about \$42,000, or £10,500, including the alterations to be made in the Locks already completed, and the sum already expended in finishing them, which must be nearly all lost to the Company. The loss in taking up the Locks now completed to enlarge them, would be seven thousand dollars. The expense of enlarging the two Locks between Saint Catharines and the Harbor has been about \$2,000 beyond the original estimate and the cost considered necessary to make them substantial-has formed no estimate of the difference of expense in taking the Canal to Niagara or through St. Catharines.

Thinks there is no doubt the Harbor will be completed on the present contract, and will be permanent—the original estimate was for a Harbour of eight feet water, but it is now thought necessary in order to make it more safe, to have it 12 feet deep, and the expense is necessarily increased. All that part of the Canal between the Welland and Lake Ontario is now contracted for, and will in his opinion be completed at the contract prices, with the exception of Sections 15, 16 and 20, which will require an additional sum of £1000 to finish them.

The Contractors for the Deep Cut have expressed doubts whether they could afford to complete their contracts at the prices contracted for, being 25 cents per cubic yard, and have intimated that they will be unable to proceed at that price, but he thinks the whole may be completed at 25 cents.

About \$27,000 has been paid for work done since the date of Mr. Thomas' Report, and work to a greater amount has been done, but one fourth of its value has in most cases been reserved by the Company to ensure the fulfilment of contracts—as agreed upon by the contractors.

About £77,488 14 11 will be required at the contract prices to complete the Canal, exclusive of the Breakwater. The Contractors for the Deep Cut have received about 19 cents per cubic yard on their whole Contract; but not more than the value of the work done by them—care has been taken to pay only so much for the work done on the surface as may leave enough to complete the bottom, even should the present Contractors fail, at the rate of 25 cents per cubic yard.

Does not think that the present Contractors for the Deep Cut can make much by it, and that if any person had taken it for less he must have lost by it.

He has thought that 25 cents per yard was too small a price.—It has been customary to retain 25 per cent on the work done, to insure the completion of the remainder; but this has not been done with the Contractors for the Deep Cut, who have given their Notes to the Company for the amount usually withheld. This has been in pursuance of the terms of the Contract entered into.

These Contractors are men generally considered wealthy and able to answer the amount of their Notes in case they should fail in performing their Contracts.

There is no indication at present of the banks on the Deep Cut slipping—but the banks may, and probably will, acquire a greater slope eventually.

The earth in that case may be more easily removed by the Canal, and the expense will be much less than to remove it at present. It is not however, probable that any alteration in the slope of the banks will take place for some years, as care has heen taken as much as possible to prevent any water washing over them from the adjoining banks. Thinks that the Welland Canal will be as productive as any portion of equal extent of the Eric Canal-and more so .- The expense of the Eric Canal from Lockport to Buffalo, has been (exclusive of the Locks) about six hundred thousand pounds. Thinks the whole Canal can be completed within the amount of Mr. Thomas' estimate, with the exception of the Breakwater, which he thinks will be necessary to make the Harbor secure. The Contractors on the Deep Cut of the Canal have been paid at the rate of 15 cents per cubic yard for the first 8 or 10 feet, and an additional half cent for every foot lower.

Is of opinion that the system adopted by the Directors in paying the Contractors as they progressed in the Deep Cut, has been judicious, and that the work could not otherwise have been so advantageously conducted.

Feels confident from his experience and observation that the progress of the work will not be interrupted by rock in the Deep Cut.

Has had a conversation with Mr. Clowes, the Engineer, recently, respecting Sections 15 and 16, which have been contracted for at 12 and 13 cents per cubic yard. Mr. Clowes then said that these Sections could not be done for less than 20 cents, and that he had been quite mistaken in his estimate of the Deep Cut, that he had estimated too low.

# WILLIAM H. MERRITT, Esq. Agent for the Welland Canal Company,

Was present when Proposals under seal, were received and opened by the Board of Directors for the Deep Cut.

The lowest offer was from Chapman and others at 16½ cents per cubic yard—the next was from John and James. Clowes at 17½ cents per cubic yard—and the next from Messrs. Hovey, Beach, and Ward, at 25 cents per yard—and there were from 30 to 40 offers from other persons at higher prices. The Board decided on accepting the lowest

T4

proposal, on being furnished with sufficient security for the completion of the contract; and fourteen days time was given to furnish such security, at the end of which time no security being given, it was decided to give the contract to Messrs. Hovey, Beach, and Ward, without having offered it to Messrs. Clowes. The Board did not enquire from Messrs. Clowes whether they could furnish security, being satisfied that they had not the means of going on with the work, and also that no sufficient security could be furnished by them. The board was influenced also in its decision by the consideration that the managing Engineer Mr. Clowes was the father of the proposed contractors. It had been previously ascertained that the work could not be done at the price offered by Messrs. Clowes, and it was the unanimous decision of the board that their offer should be rejected, and that of Messrs. Hovey, Beach, and Ward accepted. Has heard seme of the principal stockholders express their entire satisfaction with the course pursued in relation to this contract, and never heard any of them object to it except Mr. Gordon of Ningara, who is not now a stockholder.

In giving out so large'a contract (equal nearly to one half the work from the Welland to the harbor,) it was important that some persons of sufficient capital and means should be employed, and on that account, as well as for the reasons before given, the Board preferred the proposals of Messrs. Hovey, Beach, and Ward, from whom it was not considered necessary to exact any security; they were then stockholders to the amount of \$10,000, and on taking the contract they took stock to the amount of \$15,000 more.

He has no discretionary power in management of the Co.'s affairs as agent, but is governed wholly by the Directors of the Board. The work has gone on more favorably in every respect than was at all anticipated, and no unforeseen obstacles whatever have presented themselves.

More work has been done for the amount expended than has been done for the same amount on any part of the Eric Canal, similarly situated, or any other undertaking of the kind with which he is acquainted.

He applied at the commencement of the undertaking to Messrs. Prime, Ward, and Sands, who are considered as very extensive and influential brokers at New York, and offered them 21 per cent to induce them to get the Welland canal stock taken up-they refused to do so, and assigned as their reason that the opening of this canal would be injurious to them in as much as it would divert the course of trade from New York to Montreal, and they expressed an opinion that no persons at New York would be found to embark in the undertaking on this account.— Thinks that the stock now remaining would not be taken at New York from the scarcity of money, and for the reasons assigned by Messrs. Prime, Ward, and Sands. It would operate against the stock if no aid were now afforded by the Legislature, as it would be supposed that the withholding such aid proceeded from apprehension after due enquiry as to the practicability or profit of the work. The most effectual mode of affording the desired aid would be by taking stock for Government, as it would at once give confidence in the ultimate success of the undertak-

ing, and could not fuil to have a good effect upon the stock which might remain to be offered in the market.

If Government were to take stock to the amount of £50,000, including the loan already made, he thinks the Company would be enabled to proceed to complete the work, but it would be a more effectual and certain aid if the government were to take, in the whole, to the amount of £75,000, as it would withdraw so much stock from the market.

Thinks the alterations in the charter prayed for by the Directors are important and necessary to them, and that it would be advantageous that power should be given to the present Company to increase their stock for the purpose of improving the navigation of the Saint Lawrence. The Company will have gained experience in their present undertaking, which will enable them more advantageously to execute the work necessary to the improvement of the Saint Lawrence, and no time will be lost in the accomplishment of the latter object, as the Company could enter upon it immediately after the completion of the Canal, or sooner if circumstances admit of it.

With respect to the lateral cut to Niagara, he thinks it would be beneficial to the Company to enable them to make it; but that it would be injurious if it were made imperative upon them, and thinks it will be the interest of the Company to make this cut eventually.

#### MR. WENHAM.

There are only eight stockholders in the province qualified to be directors—there are 7,126 shares taken and now held, on which all the required instal ments have been paid; (65 per cent) the act authorises 16,000 shares—8,874 remain to be taken—£606 15s paid agreeable to the award of arbitrators to persons claiming damages from the Company—the balance awarded remains unpaid till the parties interested sign conveyances to the Company.

About £82,000 expended by the Company; the instalment now called for will amount to about £7000, and will be sufficient to pay off all the demands against the Company.

The 7,126 shares of stock subscribed have been taken as follows:

5480 shares at New York.

505 " at Montreal.

40 " at New Brunswick, 232 " in Upper Canada.

510 " by Smith, Ward, & Co., Contractors.

359 " at Quebec.

#### DOCTOR LEFFERTY.

Thinks the canal cannot be completed for less than £300,000—has been at the canal and thinks the principal contractors are very industrious and fit persons to be employed. Thinks Messrs. Hovey & Co., cannot complete their contract on the deep cut for the amount agreed upon—cannot get through for less than 40 or 50 cents per cubic yard.

Question.—Does it appear to you that the Welland Canal ought to be regarded as an undertaking so im-

portant to the public that it should be assisted by the funds of the province, if such assistance shall appear necessary in order to ensure its completion? and if you do not so regard it, what are your reasons?

Answer.—Does not regard it as an undertaking which will be profitable to the country if money should be invested in it, and thinks that if the Province were to take stock it would not yield the interest of the money invested—does not think it will pay interest for many years—perhaps not for 50 years. This is his only reason for being unwilling to afford public aid.

Thinks that two waggons would have taken all the transport between Chippawa and Queenston, of that part of the country west of Chippawa for some years back.

Question.—Can you state any particular objections to the mode of proceedings adopted by the Company or their agent?

Answer.—Objects to the proceedings of the Company, having in the first place applied for a Canal for boat navigation, the cost of which was estimated at £40,000. Then applying for sloop navigation to cost £80,000, subsequently coming forward with a statement shewing that the canal would cost £147,000, and now the cost is estimated at £200,000.

He further objects to the proceedings of the Company in not having satisfied the persons through whose lands the canal passes.—Thinks the Directors have acted improvidently in laying out monies on that part of the canal from the Deep Cut to the Harbor, in as much as the Deep Cut cannot in his opinion be completed in less than two years and the Company is in the mean time losing the interest of the amount expended from the Deep Cut to the Harbor, which part he thinks might be at any time completed in three months. Has no other objections to urge as to the proceedings of the Company or their agent.

#### SAMUEL WOOD.

Resides within 50 yards of the route of the canal, but has never visited the Deep Cut since the Contractors have commenced upon it, nor has he often visited the Harbor. He has no objection to urge against the Company, except, that he has not been paid for his land. He declined leaving the value of his lands to the arbitrators who decided upon other claims, as he preferred a reference to two persons. But he would now be unwilling to leave it to arbitration. He proposed leaving his claim to the decision of Mr. Street, who had been chosen as an arbitrator by the Company and also by him, but the Company declined leaving it to Mr. Street alone.

#### CHARLES INGERSOL, Esq., M. P.

Is not a Stockholder in the Welland Canal.—Resides in the township of Oxford, London District, and is well acquainted with the London District, and in some measure with the Western. The population of the London District is about 19,000, almost wholly agriculturists.—Taking the whole district, thinks it is

not excelled as a grain country by any district in the Province.

The completion of the Welland Canal would be extremely beneficial to the people of his District, who generally feel a deep interest in the undertaking, and would feel it as a great public misfortune if it were to fail.—Has no doubt that if the Canal were completed a great deal more produce would be raised and sent to market than at present. Has read the communication and estimate of Mr. Yates, as to the probable quantity of produce, &c., which may be expected to be forwarded through the canal, and has no doubt, that within a very short time after the completion of the Canal, Mr. Yates' estimate will be realised.

Thinks 50,000 barrels of flour, and 4000 barrels of potash will almost immediately after its completion be sent through the Canal from the London District, and the country adjacent to the Grand River. The District of Gore, which is not so populous or extensive as the London District, has sent to market during the last year about 22,0000 barrels.

A greater quantity of potashes would be sent if the Conal were completed, and a great deal of wheat which is now used in distilleries, and made into whiskey, would be manufactured into flour and sent to market.

Thinks there is no mode of granting any public assistance to the London and Western Districts, which will be so beneficial to them as the opening of the Welland Caual.

#### JAMES GORDON, ESQ., M. P.

Resides at Amherstburg, and knows that the people of the Western District look with very great interest to the completion of the Welland Canal, and would consider the failure of the undertaking as a great misfortune—there are some fertile tracts of country in the Western District, which have been long settled, and which have remained nearly stationary as to improvements from the want of markets for their produce.

He is satisfied that no public aid which could be afforded to the people of the Western District could be so advantageous to them as the completion of the Welland Canal, as it would enable the people to send many heavy articles to market, which at present they cannot—a great deal of lumber would be sent if the canal were completed—a great deal of potash would be sent from the Western District if facilities of transportation were afforded—at present the charges of transport across the portage and elsewhere are so great and the price at market so low that very little is sent.

Has no doubt that the epening of the canal will promote the settlement of the country to the west of it, as it will afford to settlers a more easy mode of conveyance to and from market with their produce, &c.

Thinks if the Cansl were completed its advantages would induce many to settle in the Western and London Districts who at present will not do so, though the climate and soil are very favorable.

The inhabitants in the western part of the province do not raise more than sufficient for their own support, as the difficulties and expenses of sending to market are so great that they cannot meet the produce from other parts of the province on equal terms in market.

#### The Honorable THOMAS CLARK.

Says, that in his opinion the Welland Canal will be advantageous to part of the London District and the Western District, but that its advantages will not be much felt by the other parts of the province.

He does not think that the business on the Canadian side will be sufficient for many years to pay the interest on the cost of the Canal. Has understood that it is in contemplation to improve the navigation of the Eric Canal from Lockport to Tonnewanta Creek, and to open a Canal from Lockport to the Eighteen Mile Creek, which empties into Lake Ontario. Should this be done and a sloop navigation opened, it will of course affect the Welland Canal.

Has visited the whole of the route of the Welland Canal from the harbour to Chippawa, and has no doubt at present, though he once was inclined to question it, that it will be completed. Thinks the money has been well expended.

The Engineer, Mr. Barrrett, declared upon oath, in August last, that one-half of the work from the Welland to the mouth of the 12 Mile Creek was then done; and Mr. Keefer, one of the Directors, also stated on oath, before the Arbitrators, that he thought the Company would have means through their connexions at New York, to complete the Canal from the Welland to the harbor.

He does not think the harbour at the 12 Mile Creek will ever be as commodious as that at Niagara.

The entrance into the Niagara River from Lake Erie is frequently blocked up with floating ice from three to five weeks at a time in the spring of the year, after the opening of the navigation in other places. The Canal will be open on an average from three to four weeks before the Niagara River can be entered from Lake Erie, but the easterly winds blowing the ice up the Lake may prevent vessels from entering the Grand River. Until the Canal from the Welland to the Grand River is completed, all vessels going into Lake Erie will have to cross to the American side in order to go through a lock to pass the Fort Erie Rapids, unless when there is a very strong wind in their favor.

# FRANCIS BABY, Esquire, M. P. for Essex.

Has not visited the Welland Canal—has resided in the Western District since its first settlement—is acquainted with all parts of it—the settlements have not advanced so rapidly as in other parts of the Province—the land is of as good a quality he thinks as any other part of the Province he has seen, and the climate much preferable—the want of a water communication has kept the country back—the people of

the Western District are very anxious respecting the Welland Canal, and think it the only thing that can make that District prosperous—thinks if it were to fall through for want of means they would consider it the greatest misfortune they could meet with—there is, in his opinion, no manner in which public public money could be expended that would produce so much good to the District.

All the surplus produce that is raised on the Thames and around Sandwich, is taken to Detroit and sold there. The soil is vere favorable for Indian corn, and if there was a good market for pork at Montreal, and the difficulty of transport removed, a great quantity might be sent from thence.

# ALEXANDER WILKINSON, Esquire, M. P. for Essex.

Has not seen the Welland Canal, knows that it is regarded with much interest by the inhabitants of the Western District—agrees perfectly in Mr. Baby's statement. Tobacco is becoming a very important article of cultivation in the Western District. It is almost four years since any considerable quantity began to be raised there—this year about 700 hogsheads he thinks have been raised—it is packed for market in hogsheads which being bulky, and the tobacco requiring to be carefully preserved from wet, any facility in the transport is of much consequence.

## RICHARD BEASLEY, Esquire, M. P.

Resides at Barton-thinks the Welland Canal is a work of much consequence to the western parts of the Province—is well acquainted with the country, thinks the inhabitants of such parts of the District of Gore as border on the Grand River would share in the benefits afforded by it so soon as the cut to the Grand River is completed. The waters of the Grand River usually open about the latter end of April and continue high through May and June-often highest and produce could be sent down the stream from the Falls at Woolwich to the mouth-staves could also pass down. The country on the banks of the river within some miles of it is in general very fertile, and when the country is fully peopled must be very productive, being favorable for grain, both as regards climate and soil-a great deal of pine lumber would be floated down the river. He thinks the inhabitants of the section of the Province bordering on the Grand River look forward anxiously to tho completion of the Canal, and would be much disappointed if the undertaking were to fail.

#### FRANCIS L. WALSH, Esquire, M. P. for Norfolk.

Resides in Charlotteville, has a general acquaintance with the eastern parts of the District—thinks there is not so much interest felt there respecting the Welland Canal as might be supposed, which he attributes in part to the circumstance that the Eric Canal affords an outlet for a good deal of their produce—feels himself indifferent as to its success—thinks there is a duty on Canadian produce in the United States, but it is sometimes evaded.

Being asked if intercourse with the United States should be suspended or high duties imposed, where the market would be for their produce a says it must be taken below.

Has frequently heard merchants say they did not think Canal stock would pay two per cent.

January 15th.

# EDWARD McBRIDE, Esq. M. P.

Asked the general question proposed by the instruction given to the Committee—thinks the work one of great interest to the inhabitants of the Western section of the Province.

Has seen the Canal about the beginning of December, and having been one of the Arbitrators had occasion in August last, to examine the whole linewas very much pleased with its progress, and has strong hopes of its accomplishment.

Nothing has occurred to lead him to doubt it—thinks it a work of that consequence that if it cannot be otherwise effected, public aid should by all means be afforded to it—thinks it very important to the District of Niagara that a cut into the Niagara River should be authorised; and considers it of additional consequence, from an opinion which he entertains that the Harbor at the 12 mile Creek will not be convenient of access in bad weather.

There has been no recent survey made of the proposed lateral Cut, nor any regular estimate of the expense of it, on a scale commensurate with the Welland Canal, thinks it would cost from 35 to 40,000 pounds, and that the Stock so vested could be as productive as the other.—Is of opinion that another strong inducement to connect the Canal with the Niagara River is, that Vessels of large burthens which could not enter the Harbor of St. Catharines could go into the Niagara River securely and deposite their cargoes, and might, if necessary, have the advantage of a Dry Dock for the purpose of repairs, and that the hydraulic powers which would be erected at Niagara would be of great advantage to the Company.

# ALEXANDER STEWART, ESQUIRE,

Is one of the signers of the Petition for a lateral Cut to Niagara. No particular Survey or estimate has been made since the Petition was preferred last year—thinks from conversation with Engineers that a Canal might be made on as large a scale as the Welland for £30,000 or less—concurs in Mr. Mc-Bride's statement as to the inducement to a lateral Cut.—Is informed by Masters of Vessels that when the wind sets strongly for the Eastward, it will be impossible to enter the Harbor, and that it will be difficult for Vessels to put out from the Harbor with strong, winds, although they may be from such a quarter as would take them down the Lake if they could safely leave the Harbor.

The proprietors of land along the route have sgreed to relinquish what the Company may require

without remuneration.—Thinks not less than \$50,000 Stock would be taken in Niagara by persons favorable to the lateral Cut, and that the whole could be procured without difficulty in a short time.

THE HONORABLE JOHN HENRY DUNN, President Welland Canal Company,

Says that from the small quantity of Stock taken up, and the little prospect of a subscription for the remainder, the Company would be greatly embarrassed in the further progress of the work, unless some aid is afforded by the province.

If the Government were to take Stock to any considerable amount it would have the effect of establishing confidence in the undertaking, and there would be no difficulty in getting sufficient of the remaining Stock taken up to complete the work—thinks it would be much more advantageous to the Province and the Company that any aid which may be afforded should be by taking Stock rather than by making a Loan.

If a Loan were made to the Company it might deter persons from taking Stock on account of the debt which the Company will be owing, but if Stock were taken by the Province it would have the double effect of withdrawing so much Stock from the market and giving confidence in the value of the Stock remaining to be taken. Thinks if the Canal were completed it would pay the interest of its cost immediately, but even if it should not pay more than 1 per cent for the first year or two, still the Stock must be valuable, as the intercourse through the Canal must greatly increase as the Western parts of the Province become settled.

The present embarrassments of the Company arise from unfortunate circumstances in having withheld one half of the Stock for British Capitalists at a time when the whole might have been taken up in, the United States, and having subsequently offered that Stock in England, when owing to the great pecunically embarrassments then generally felt, and other causes, few if any persons could be found to embark in so distant an undertaking.

If the Province were to take Stock, he is satisfied that when the Canal is completed it can be sold without difficulty, as many persons are prevented from taking Stock by the apprehension that the Canal will not be completed.

ACT OF PARLIAMENT, STH. GEO. 4TH, CHAP. 2.

An Act to enable the President and Directors of the Welland Canal Company to accept an aid from His Majesty's Government, towards the completion of the said Canal, and to secure His Majesty the free use thereof.

Passed February 17th, 1827.]

WHEREAS, His Majesty has been most graciously pleased to intimate, through the Principal Secretary of State for the Colonies, to His Excellency the Lieutenant Governor of this Province, that His Market State of the Colonies of the Province of the Province of the Province of the Province of the Market State of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Province of the Pro

**J**4

jesty would be willing to afford to the Welland Canal Company his royal aid and assistance, to the extent of £16,360 sterling, being the one ninth part of the sum represented to His Majesdy as the estimated cost of the said Canal, upon condition of the locks thereon being constructed of at least 22 feet in width; and also upon His Majesty being secured in the use of the said Canal, for all vessels and boats, when engaged in conveying Government stores, without payment of any duty or toll;

And whereas, His Majesty's royal intention having been communicated by His Excellency the Lieutenant Governor to the President and Directors of the said Company, they have expressed their desire to accept His Majesty's bounty upon the terms in which His Majesty has been pleased to signify his pleasure thereon; And whereas, for currying His Mujesty's most gracious intentions into effect it is necessary to secure to His Majesty the free use of the said Canal for the public services of His Majesty, by an act of the legislature; Be it therefore enacted by the King's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Assembly of the Province of Upper Canada, constituted and assembled by virtue of and under the authority of an act passed in the Parliament of Great Britain, entitled "An Act to repeal certain parts of an act passed in the fourteenth year of His Majesty's reign, "entitled, 'An Act for making more effectual provision for the Government of the Province of Quebec, in North America,' and to make further provision for the Government of the said Province," and by the authority of the same "That the locks of the said canal shall not be constructed of a less width than 22 feet; and that in all time to come all vessels and boats the property of His Majesty, and all other vessels and boats when engaged in carrying His Majesty's stores, shall be at liberty to pass and repass upon and through the said canal and locks without the payment of any duty or toll; Provided always, that nothing herein contained shall extend, or be construed to extend, to exempt from the ordinary charges of toll or duty such goods or commodities, the property of individuals, as shall be transported in any vessel or boat not being the property of His Majesty, or the tonnage employed in transport thereof.

#### No. 3.

Act of Parliament, Stu Geo. 4th, Chap. 17.

An Act for affording Public Aid towards the Completion of the Welland Canal.

[Passed 17th Feb. 1827.]

WHEREAS it is necessary to afford public aid in furtherance of the great undertaking now in progress for uniting the waters of Lake Eric and Ontario by a Canal, navigable for such vessels as are ordinarily used for transport on the Lakes.

Be it therefore enacted, by the King's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Assembly of the Province of Upper Canada, constituted and assembled by virtue of, and under the authority of an Act passed in the Parliament of Great Britain, intituled, "An Act to repeal certain parts of an Act passed in

the fourteenth year of His Majesty's ! Reign, intituled, An Act for making more effectual provision for the Government of the Province of Quebec, in North America, and to make further provision for the Government of the said Province," & by the authority of the same, That at any time before the first day of April next it shall be in the power of the Governor, Lieutenant-Governor, or Person administering the Government of this Province, to direct His Majesty's Receiver-General to subscribe Stock in the Welland Canal Company to the amount of Fifty Thousand Pounds, which Stock shall from thenceforth be held as, and deemed to be, public Stock, and that the Government of this Province shall, as the holders of such Stock, be subject to the same conditions and have the same powers, advantages, and privileges as other Stockholders in the said Company.

II. And whereas, it will afford great relief to the said Company to be enabled to avail themselves of the whole funds thus subscribed by the Government, without the delay of calling in instalments, and such advance will further enable the said Company to resume and continue their operations without the necessity of exacting from individual Stockholders such rapid advances of capital as they have hitherto, at great inconvenience, been compelled to furnish; And whereus, it is reasonable that, in consideration of such facility to be afforded to the Company, the Government should be relieved from the immediate payment of interest on the sum to be advanced by them, Be it therefore enacted by the authority afore-said, That before such sum of Fifty Thousand Pounds shall be advanced by the Government to the said Company, a written assent, under the Scal of the said Company, shall be deposited with His Majesty's Receiver-General for the time being, sig-nifying that they are willing to accept the said subscription of Stock and the payment of the same in full, upon the condition that the said Company shall pay to the Government, half-yearly, the interest upon the said sum of Fifty Thousand Pounds, from the time of the same being advanced until the expiration of one year from and after the comp etion of the Welland Canal from the Grand River to Lake Ontario: Provided always nevertheless, that so soon as the proceeds of the said Canal shall afford to the Company a clear dividend of Six per Centum upon the Capital advanced, such interest so paid to the Government shall be equitably adjusted as between the Government and the other Stockholders in any dividends to be thereafter made.

III. And be it further enacted by the authority aforesaid. That the Welland Canal Company shall, before receiving the payment of the Stock to be taken under the authority of this Act, deposit with His Majesty's Receiver-General a Bond under their Seal, in the penalty of Twenty Thousand Pounds, binding themselves to pay annually to His Majesty the legal interest upon such payment, until the expiration of one year after the whole Canal shall be finished.

IV. And be it further enacted by the outhority aforesaid. That it shall be in the power of the Governor, Lieutenant-Governor, or Person administering the Government of this Province, at any time in his discretion, to direct the Receiver-General, for the time being, to sell and transfer the Stock so sub-

scribed, or any portion thereof, so soon as its nominal value can be obtained, and that the sum to be received for the same shall be paid to and remain in the hands of His Majesty's Receiver-General, for the time being, subject to the disposition of the Legislature thereof. eki ja in westweither

V. And be it further enacted by the authority aforesaid. That the interest to be paid by the said Company within the period aforesaid, shall be applicable, by His Majesty's Receiver General, to the payment of interest on any Loan that may be constructed by the Government for the purposes of this Act, and that all such payments and dividends as may thereafter be paid to the Government on account of the said Stock shall and may be applicable to the public uses of this Province as the Legislature thereof may direct.

VI. And be it further enacted by the authority aforesaid, That the sum of money herein authorized to be raised by loan and paid on account of Stock to be held in the said Company, shall not be subject to any deduction of poundage for the Receiver-Goneral of this Province.

VII. And whereas, to provide for the payment of the Stock to be subscribed as aforesaid, it is necessary to authorize the raising, upon Debenture, the sum of Fifty Thousand Pounds, in manner hereinafter mentioned: Be it therefore enacted by the authority aforesaid, That from and after the passing of this Act, it shall and may be lawful for the Governor, Lieutenant-Governor, or Person administering the Government of this Province, to authorize and direct His Majesty's Receiver-General of this Province to raise by loan, at a rate of interest not exceeding Six Pounds per Centum, and as much lower as can be obtained from any Person or Persons, bodies Corporate or Politic, who may be willing to advance the same upon the credit of the Government Bills or Debentures, authorized to be issued as hereinafter mentioned, such sum not exceeding in the whole, Fifty Thousand Pounds, as may be required for the purposes of this Act.

VIII. And be it further enacted by the anthority aforesaid, That it shall and may be lawful for the Receiver-General, for the time being, to cause or direct any number of Debentures, to be made out for such sum or sums of money, not exceeding, in the whole, the said sum of Fifty Thousand Pounds, as any Person or Persons, bodies Corporate or Politic, shall agree to advance on the credit of the said Debentures, which Debentures shall be prepared and made out in such method and form as His Majesty's Receiver-General shall think most safe and convenient, and shall be signed by him, and that for each loan or advance three several Debentures shall issue at the same time, bearing date on the day on which the same shall be actually issued, and being each for the payment of one-third of the sum so advanced, at the expiration of periods not shorter than two, four, and six years respectively, with interest according to the rate at which such loan shall be negociated, from the date of such Debenture until the same shall be discharged.

IX. And be it further enacted by the authority aforesaid, That all such Debentures, with the interest thereon, and all charges incident to or attending the same, shall be, and are hereby charged and

chargeable upon, and shall be repaid and borne, out of the monies that shall come into the hands of the Receiver-General, to and for the public uses of this Province, and at the disposal of the Legislature thereof.

X. And be it further enacted by the authority aforesaid, That the loan authorized by this Act shall be contracted for, upon the express condition that at any time, either before or after the said Dehentures, or any of them, which are by this Act directed to be issued, shall become due, according to the terms thereof, it shall and may be lawful for the Governor, Lieutenant-Governor, or Person administering the Government of this Province, if he shall think proper so to do, to direct a Notice to be inserted in the Upper Canada Gazette, requiring all holders of the said Debentures to present the same for payment; and if, after insertion of the said Notice for three months, any Debenture shall remain out more, than six months from the first publication of such Notice, all interest on such Debentures, after the expiration of the said six months, shall cease, and be no further payable, in respect to the time which may clapse between the expiration of the said six months and their presentment for payment.

XI. And be it further enacted by the authority aforesaid, That all and every the provisions contained in a certain Act of the Parliament of this Province, passed in the seventh year of His Majesty's Reign, entitled, "An Act to authorize the Government to borrow a certain sum of money upon Debenture, to be loaned to the Welland Canal Company," respecting the Debentures, authorized by the said Act passing current, with certain Public Accountants, the payment of interest upon the same by such Accountants, and the suspension of interest in certain cases, the submitting to the Legislature accounts of such Debentures, and the interest paid thereon and the expenses attending the same, the payment of interest to holders of such Debentures. the remuneration to the Receiver General for the services required by the said Act, paying off and cancelling the said Debentures; and also, the provision made in the seventh Section of the said Act, for punishing the forging of any Debenture thereby authorized to be issued, or of any matter or thing relating thereto, or the knowingly uttering any such forged Debenture, or other matter as aforesaid, shall apply to, and be in force in respect to the Debentures which shall be issued according to this Act.

#### DESPATCH FROM LORD BATHURST.

COPY,

Downing Street, 30th Soplember, 1826.

Sin, His Majesty's Government having granted the sum of twelve thousand pounds in aid of the expense of constructing the Lachine Canal in Lower Canada; upon condition that all boats and vessels with public stores should be permitted to pass without the payment of any toll or duty, and considering that, the Welland Canal, now in progress on the Niagara frontier, will afford great facility inforwarding stores to Lake Erie and the upper parts of the province of Upper Canada, and that by constructing the locks of the width of twenty two feet, it would become a work of much greater public utility: I am to desire that you will acquaint the Directors that His Majesty's Government would be willing to afford the same degree of assistance towards the expense of the Welland Canal which was given to that of Lachine, which was about a ninth of the estimated sum required in its completion, and as the estimated expense of the Welland Canal is one hundred and forty seven thousand two hundred and forty pounds, the sum to be contributed by the public for the privilege of forwarding government stores, &c., would be sixteen thousand three hundred and sixty pound

In the event of the Directors agreeing to this proposal it is necessary that a provincial act should be passed in which the Company shall engage to construct the locks of the canals of the width of at least twenty-two feet, and securing the use of the canals to all vessels and boats the property of His Majesty, and also to all other boats and vessels when engaged in carrying government stores, without the payment of any duty or toll, in consideration of receiving the sum of sixteen thousand three hundred and sixty pounds, to be paid in four equal annual instalments or sooner if the canal should be completed at an earlier period.

I have the honor to be,

Sir.

Your most obedient humble servant,

(Signed)

BATHURST.

MAJOR GENERAL

SIR P. MAITLAND,

K. C. B. &c. &c. &c.

Certified,

G. HILLIER.

No. 5.

REPORT OF THE BOARD OF DIRECTORS

FOR

1827.

In presenting to the Stockholders the annual report of the proceedings of this Company, the Directors have every reason to congratulate them and the public, on the results of the last year's operations.—And although they have had to contend with many difficulties, inseparable from works of such magnitude yet these have been less than might reasonably have been expected.

Although the sanguine expectations entertained last year by the Directors, that the amount of stock then remaining unsubscribed would speedily be taken up, have not yet been realised as fir as individual subscriptions are concerned, yet the timely and effectual support afforded by the Legislatures of both provinces during the last session of their respective Parliaments, entirely relieved the Directors from that embarrassment which must otherwise for a time have paralysed their exertions. The ample means thus afforded have enabled the Directors to

continue their operations during the past year with increased vigor.

By the opening of the season, the Contractors for the Deep Cut, Messrs. Beach, Hovey and Ward, represented their inability to carry on the work farther at the price contracted for, and the Directors, after a full consideration of their proposal, censented to release them from their engagements, and to make preparations for reletting that portion of the work. Preparatory however to entering into any new contracts for the completion of the Deep Cut, the Directors offered a reward of £125 to the person who would construct a machine that would remove the greatest quantity of earth in a given time, at the least expense, and many intelligent men were competitors for the premium.

The best inventions were those of Mr. Oliver Phelps and of Messrs. Pratt and Simpson, who have used them with great advantage during the past season.

The machine invented by Mr. Phelps, which has been generally used, consists of a wheel revolving round an axle, having one end fixed to the ground, and at such an angle as to bring the rim of the wheel upon the same plane with the slope of the road up the band,—around this wheel a rope is passed, with a hook at each end to attach the empty cart going down and the loaded one coming up, keeping the cattle at a draft up and down—the empty team going down being generally sufficient to bring the returning load up with little labor to the cattle drawing the latter; thereby in effect reducing the ascent to a level.

The rains set in last autumn much earlier than usual; and from the stiff and adhesive nature of the clay the work could not be prosecuted with advantage in wet weather, and the contractor thought it most judicious to suspend operations towards the latter end of October—which in the end proved fortunate, as the rain continued during the whole of the following month.

The Deep Cut contained in September, 1825—1,487,514 cubic yards of earth: there now remains only 371,643 to be removed; consequently there can be no reasonable doubt that the whole will be finished in good time next season; as we have had but little more than two entire seasons to remove the great proportion already excavated.

From this to the brow of the Mountain, including sections 7 to 16, (or lock No. 1,) a distance of 4½ miles, the canal is finished and ready for the reception of water, with the exception of 12,000 cubic yards on section 15, which will stand over till next season. This section and No. 16, for a distance of 20 chains averaged 20 feet of deep cutting: the excavation proved very hard, and the Directors cannot speak in too high terms of the perseverance, industry, and good management of the contractors—Messrs. Bell, Richardson & Co., under whose immediate direction it has been conducted. This part of the Canal, (viz., from section 7 to 16), being a continuance of the symmit level, contained on commencing in the spring of 1826—407,641 cubic yards of excavation, and 124,567 yards of embankment, which has been finished by the same contractors who were mentioned in the appendix to last year's report.

The excavation along the declivity of the mountain, comprehending the sections from 17 to 30 inclusive, and extending to the distance of 4  $\frac{1}{10}$  miles, is all finished, except what is purposely left for backing or filling in the sides of the locks.

The locks down the mountain, thirty-two in number, are in a state of great forwardness, with the exception of two; and the whole may easily be finished early in the ensuing season. This part of the canal, embracing the mountain descent, contained originally 224,556 cubic yards of earth, and 57,000 yards of rock excavation; 303,313 yards of embankment, and 33,000 yards of puddling.

The remaining part of the Canal to Lake Ontario, including a distance of 5 miles is finished and filled with water; it presents a surface of great width throughout, and affords a correct view of the magnitude of the canal. This part required originally 157,566 cubic yards to be excavated, and 158,609 to be embanked. For a more particular detail see Engineer's Report, Appendix (A.)

Of the 2,333,706 cubic yards of earth originally required to be excavated on this Northern section of the Canal, 406,553 yards now only remain to be removed; and of the 586,489 yards of embankment at first required, 87,262 yet remain to be completed.

Fifteen miles of the Canal will be finished by the first of June next—leaving only a distance of one and a half miles to be finished in order to form an uninterrupted communication between Lakes Erie and Ontario by way of the Niagara and Welland Rivers.

This portion of the Canal (from Lake Ontario to the Wolland) being so far advanced, and its speedy completion being no longer problematical, the Directors thought no farther delay should be allowed to intervene before the remaining section (from the Welland to Lake Erie) was commenced, and this appeared the more necessary when it was considered that the Canal can certainly answer its object but very imperfectly while this section remains unfinished, and that several months would be required to drain the great marsh previous to its being underta-The Report of Mr. Barrett, which contains all the information relative to this part of the line, will be found in the Appendix (B.) and the Board for the reasons which have been mentioned, concurred in the recommendation of their Engineer, advertised immediately for proposals, & placed it under contract to Messrs. Monson, Simpson & Co. on the 4th October, who are now employed on this part of the line, which may be worked to advantage in the winter season. On this part of the line the clearing has been nearly finished, much of the grubbing has been done, the ditches carried between three and four miles, and about 72,000 cubic yards of earth have been exca-

During the past year the work has been conducted under the immediate superintendence of Mr. Alfred Barrett, principal Engineer, to whom the Company are much indebted for his industry, zeal and good management, in the laborious and responsible situation he has occupied.

The 13,400 acres of land granted to the Companyby Government, has proved to be most fortunately situated, the line of the Canal running nearly through the centre of it.

Of the capital stock of the Welland Canal Company, consisting of 16,000 shares, and amounting to £200,000:—

16,000 200,000 0

There has been actually paid in and expended on the Canal:—

Eighty-one per cent on 8,893 shares held by the Government of Lower Canada and by

Amount of Loan from Provincial Government 25,000 0 0

£165,041 12 6
The remaining available funds of the Company consist of

Nineteen per cent on 8,893 shares... 21,120,17 6

£38,898 13 6

It will require to finish the Canal

From Lake Ontario to

River Welland ... £40,000 0 0

From Welland to the Grand River..... 50,000 0 0

90,000 0 0

Leaving this sum to be provided for £51,101 6:6 If the whole stock should be taken up 38,837 10:0

There would only remain to be provided......£12,263 16 6

The public advantages to be derived from this undertaking are daily developing themselves, not only by the rapid improvement of the country on its immediate borders, but by the spirit of enterprise and exertion it calls forth in the inhabitants of the country more remote, who appear desirous of availing themselves immediately of all the advantages the Canal is likely to afford, by improving the different streams leading into Lake Erie. The commexion of those Lakes by ship navigation will have a tendency of facilitating the improvement of the Grand-River, the Thames, the Otter, and many other large and valuable streams taking their source in the interior of the country; and consequently will not only increase the present trade, but create new sources to a very great extent.

# APPENDIX.

(A.)

To the President and Directors of the Welland Canal Company.

I BEG LEAVE TO REPORT,

That on Section No. 1, of the Deep Cut, of the 21,116 cubic yards of excavation that remained Nov. 11th, 1826, only 7,479 yards now remain. The whole could easily have been completed this season; but it was thought more advisable that it should be delayed until a ditch was effected through the Deep Cut, when it may be done at far less expense. Near the head of this section has been erected a guard gate, to check the rise of water in the Welland River.

On sections No. 2, 3, 4, 5, & 6, (embracing the whole extent of the Deep Cut,) there were excavated previous to the commencement by Mr. Oliver Phelps—under S. Ward, & Co. 666,694 cubic yards, paid for as per contract, at an average price of 19 cents, \$130,812 22. Under Mr. O. Phelps, 341,490 yards at 25 cents, 6 mills \$88,271.04, Total yards excavated, 1,008,184 at an average price of 21 cents, 7 mills, making the sum of \$219,083 26.

It may be proper to mention here that the greatest proportion of the work has been done this season through the deepest part of the cut. The two northerly sections, embracing a distance of 55 chains, originally averaged 51 feet: they now average only 14 feet; consequently there remains the least number of yards to remove from the deepest cutting; which shews that the work done has not been overrated. It was very late in the season before an efficient force-was applied to this work, which has prolonged it beyond what was anticipated; consequently the greater part of another season will be required for its completion. No obstacles have appeared during this season's operations to impede the progress of excavation. The banks stand remarkably well, although they have been far more exposed than heretofore, both from their increased height, and the irregular manner, in, which the earth has been laid on them. Measures are now taken to lay the spoil banks in such a measure as to turn all the water that falls on them to the rear, from whence it may easily be discharged into the Welland river, from the natural inclination of the land in that direction.

At the foot of this cut a draw-bridge has been erected over the canal at an elevation of 35 feet above the surface of the water. Three stone culverts have been built on sections 120, 10 & 13, containing 649 perches of masonry.

Three waste weirs and flooms are constructing on the summit level between the Deep Cut and section No. 17: one at Mr. Hall Davis', on section No. 9; one at the Beaverdam, on section No. 14; and one at the head of section No. 17, above lock No. 1, for the purpose of discharging the surplus water in the canal, and passing off any additional quantity in the spring and fall floods, by the valley, of the 10 mile creek: It will be necessary to cut a small ditch to lead the main branch of the Beaverdam Creek into its eastern branch, at the time of high water; by which we have the control of all the water on this

summit, and can at pleasure either discharge it from the canal or lead it into it. Those waste weirs, instead of stopping the water from the original branches, as some persons now apprehend, will always afford an additional supply of water to those streams; at the same time they regulate any excess caused by floods or freshets, as formerly, and will not only be useful to the canal navigation, but highly beneficial to those possessing hydraulic advantages on any of these branches. The waste gate on section 9 will be placed 5 feet below bottom level, for the purpose of scouring out the Deep Cut or drawing off the water, if at any time it may be found necessary.

The embankment on Section No. 9 has settled since it was accepted, considerably, occasioned by its being composed of light soil and made in the driest part of the season, principally by Wheel barrows. 3,355 cubic yards of earth have been found necessary to raise it to its original height. 'All the other banks on this summit have been constructed with Teams and Carts: they appear well packed, and remain permanent.

The guard Lock at the Welland on this Section is 40 feet wide. There will be four Bridges on this level, which are now in progress, and have 40 feet span; so that Steam Boats of any dimensions now built on Lake Erie may reach the grand Reservoir at the mountain descent, which is of sufficient dimensions to contain any quantity of Lumber or any number of Vessels for a great length of time.

From Lock No. 1 to St. Catharines thirty two Locks are located in a distance of four miles and 72 chains—3 of which are finished, 12 average three quarters, 7 one half, and 8 one third; the remaining two are not laid, but the Timber is in readiness to place them early in the Spring. We have seven rock foundations in the line; the remainder, without exception, are bedded in a hard, tough, blue clay—Most of the Contractors have met with serious difficulties in sinking those Pits, the excavation of which have invariably proved exceedingly hard. We have met with only 57,000 yards of rock excavation on Sections 19 and 20; which in a distance of the length of this Canal, with so great a descent on the face of a mountain, is a most remarkable circumstance.

From the head of Lock No. 1 we carry a ditch for surplus water into the level between Locks No. 4 and 5; from the head of No. 18 to the level between 17 and 18; from the head of No. 18 to the level between 27 and 28—affording an abundant supply of water for hydraulic erections to any extent without causing any perceptible current in the Canal. In addition to which Waste weirs are constructed at Locks 19 to 31, between which there are large and spacious natural Basins or Reservoirs formed by a Ravine through which the Canal descends.

From St. Catharines to the Harbor we have three Waste weirs and three Locks, which are finished, and the water has been let in for some time. In the upper two Waste Gates have been constructed during the last season of sufficient dimensions to control the surplus water. They have been thoroughly proved this Fall, together with the Locks, and sawer in every respect the purposes for which they were intended. The middle Waste weir was carried off on the first rising of the water last Spring, owing to the embankment being frozen, and not

having time to settle. Two Lock Gates were also carried off, on first Lock, partly by accident and not being made sufficiently substantial.

The Piers at the entrance of the Harbor have not yet been entirely filled with stone: nevertheless they have resisted the force of the waves for two seasons; and no doubt can be entertained of their efficacy or durability. By the removal of 320 yards of earth from between the Piers nine feet of water will be afforded at all times; and if found desirable or necessary, twelve feet may be obtained by the use of a machine for scraping the bottom, which has proved highly beneficial.

The following Abstract will shew the number of yards excavated from the Deep Cut to Lake Ontario, together with the number required to be removed to finish the same:—

Work done on Deep Cut since commencement is as follows:—

Chopping and clearing .... 70 acres.

Grubbing ..... 30 "

Excavation, (including Sec-

tion 1 and Reserve,).....1,115,871 cubic yards.

### From Deep Cut to Lake Ontario.

Chopping and clearing,	91% acres.
Charlebing	50 <del>37</del> "
Excavation,	818,751 cubic yards
Embankment,	499,227 "
Puddling,	33,291 "
T daning,	

Making a total of 1613 acres of chopping and clearing—803 acres of grubbing—1,934,622 yards of excavation—499,227 yards of embankment—and 33,261 yards of puddling.

ALFRED BARRETT,

Principal Engineer.

St. Catharines, January, 1st 1828.

### APPENDIX.

(B.)

To the President and Directors of the Welland Canal Company.

Having finished the Survey of the Southern Section of the Welland Canal, I beg leave to submit the following Report:

No. 1. The table land has been levelled over from the forks of the Grand River to Grabel's Bay, on Luke Erie—distance five miles—average cutting 15 fect. This route presents but few difficulties. A canal and safe harbor may be constructed at an expense not exceeding £35,000.

No. 2. Northern route.—In consequence of the deep cutting on the line explored by Messrs. Clowes & Rykert, it was thought advisable to try for a more favorable one to the north. Messrs. Lapham and Gooding, assistant engineers, received instructions to make an examination from the forks of the River Welland up the valleys of Beser's and Kelley's creeks, crossing the north west arm of the Wainfleet Marsh to Broad Creek, near its entrance into the Grand River. This route, in making Lake Erie the summit, will cost £62,230. The whole distance is 11 miles and 65 chains, of which only 4 miles are in

the marsh—average cutting varies from 8 to 10 and 15 feet.

No. 3. Middle route.—This is the one formerly traced out by Messrs. Clowes and Rykert, which has been carefully re-surveyed. Commencing at the forks of the Welland River, it passes up the valley of Mill's Creek, terminating in Broad Creek, at the same point with the above.—Whole distance 12 miles; 9 of which lies through the lower part of the upper marsh—average depth 8 to 15 feet—cost, as per estimate, £61,934 5s.

Several routes have also been examined with reference to a feeder from the Grand River, which may be brought either into No. 2 or 3, by raising the level 8 feet, placing two additional locks, constructing a dam across the Grand River, 17 miles above the junction of the canal with the same, 8 feet high, and placing a lock thereon. The estimated cost is £35,000—whole length of the feeder 17 miles. The difference of expense will not be material on either of the foregoing routes. But in making the Grand River the summit, the object of the marsh would in a great measure be defeated; the surface of water in the canal would be too near the level of the ground to admit of it.

The three routes, together with the feeder, stand

No. 1.—5 miles in length,—estimated cost £35,000 No. 2.—11 miles 65 chains— " 53,230 No. 3.—12 miles, . . . . . . " 61,934

By bringing a feeder for either of the two last routes, the estimate will be only £35,000. They are nearly equal in length, and the cutting shallow; consequently the estimates do not vary materially.

In route No, 1, you will gain a distance of seven miles cutting, besides shortening the Canal 9½ miles, and partially draining the marsh; but will entirely lose the object of effecting a junction with the Grand River—as from 15 to 20 miles of a difficult Lake coast will intervene, rendering the navigation at all times hazardous. Besides, you approach so near point Abino, that danger may be apprehended from obstructions by ice from the Niagara River—reasons in my opinion fully sufficient to abandon the route.

In route No. 2, a saving of £8,704 5s. in the construction of the Canal will be effected; the marsh will not be drained, and not one mile of it will pass through the Company's land; the difference in the distance being only 15 chains, is of no material consequence. The feeder will likewise produce a saving on either route of £18,230. The objection to it is, in supporting or maintaining 19 miles of a feeder, two additional locks, and not draining the marsh; which in my opinion, besides the difficulty and obstruction of the navigation, is more than equivalent to the additional expense of a thorough cut.

Although route No. 3 is the most expensive, it has a decided preference, and will be the most advantageous one for the Board to adopt. It will be seen by a reference to the map, that the Company's lands lay on either side of it, throughout the township of Wainfleet; it passes through the lowest part of the marsh; will effectively drain the lands on its borders, and greatly enhance their value.

The connexion of the Grand River with the Welland by a thorough cut, will offer an important fea-

ture in the accomplishment of this Canal, by avoiding any ascent from Lake Eric through the peninsula, besides connecting a country bordering on the Grand River, the commodities of which, if transported by the Lake shore, (as they will be) principally in boats and rafts, would be attended with great risque; and it is a question whether in a few years it would not be equal to the additional expense of this route.

This section of the Canal being generally covered with water, and lying on so long a level, will require under the best of management, a long time to drain it so that a suitable number of men may be employed to finish it in a reasonable time. We have not been able to survey it this season before the present month; therefore no time should be lost in placing it under contract, in order to take advantage of the winter's operation; otherwise another entire season will be lost. There will be no difficulty in draining it; but as the work can only proceed from the two ends, it will be a slow operation.

I bog leave to call the attention of the Board to the following plan, on which this section may be completed for a much less sum, at the same time it comprises every advantage of the thorough cut, with the exception of a rise of five feet, and passing two additional locks.

The Grand River is a perfect level for 12 miles into the interior, at which distance the river is governed by the rise or fall of the lake; there are extensive marshes on either side, which are, from the above cause, alternately wet and dry, and can never be reclaimed without incurring an expense far beyond their value.

By damming this river near its mouth to the height of five feet, and placing in a lock, we avoid five feet of excavation from the bottom of the Canal for 10 miles; the saving of which will be as per the accompanying estimate. This plan may, however, be adopted at any time the ensuing year if thought advisable.

The course of the river may be diverted from its present channel, and the danger of filling up the harbour, as suggested by Captain Hall, removed; the marsh become unhealthy, by rendering the water stationary; and would be far more likely to make land from the deposite brought down the stream than in its present situation.

Should the Board think proper to adopt the measure of damming the river, and raising the level, as above proposed, there will be made a saving in excavation through the marsh of.........\$130,320

Which deducted from the foregoing, leaves \$113,090

17.230

This cut may be lowered at any future period, during the winter season, and the dam remain or not, as may be thought most advisable.

The mouth of Grand River and Mohawk Bay have been examined. The estimated expense of

the latter is £5,050; additional length of Canal—two miles—will cost £24,775; total £29,825. This bay, with the exception of the difficulty in approaching it from the Canal, is well calculated for a harbour: it has a sufficient depth of water across the bar, affords good anchorage, and is protected against the prevailing winds by a projection of high land.

I would, however, recommend the mouth of the Grand River, where a saving of expense will be made, in the aggregate, of £24,525. A safe harbour may be formed here, by the construction of two piers, the expense of which, embracing the towing path to Broad Creek, will be £5,600. There is no formidable difficulty in constructing this harbour, which will be as extensive as may be desired, affording moorings for any number of vessels.

Before closing my Report, I will venture to make a remark, which may be considered irrelevant to the subject; nevertheless it is of public importance. The Cranberry Marsh contains about 30,000 acres of land: it is enclosed by a small rim of land, elevated from two to three feet above its surface; has several small outlets, not sufficient, however, to By constructing the Canal through it, as proposed in route No. 3, a very valuable tract of land may be reclaimed, on part of which there is a heavy growth of ash, oak, and maple timber, the remainder is a thicket of small brush and open marsh: the top soil, from four to five and six feet, is a rich vegetable mould, intermixed occasionally with sand, resting on a bed of clay, which causes the water to remain on its surface for so great a length of time. This immense tract can be effectually drained by cutting a ditch through between lots No. 17 and 18, where the marsh is only one mile wide, and can be led into Mill Creek; then, by cutting a drain into Lyon's Creek, in Crowland, a few miles above the Deep Cut, leading into the Welland River, one mile from its mouth; again, at Savage's Mill and at Hooper's Creek, leading into Lake Erie. These outlets would effect the draining of the marsh, which in its present state is a public nuisance; but which, at a very moderate expense, would become as valuable land as any in America.

ALFRED BARRETT,

Principal Engineer.

St. Catharines, Sept. 1, 1827.

No. 6.

### MINUTES OF THE BOARD OF DIRECT AS

FOR 1827.

At a Meeting of the Directors, held at Mr. Robinsons on Wednesday, January 4th 1827.

#### PRESENT:

The Hon. John H. Dunn, President,
"William Allan, Vice President.
Tohn B. Rehinsen.

John B. Robinson, John Clark, Henry J. Boulton, William H. Merritt, and George Keefer, Esquires.

Directors.

The Engineer's Estimate for the past month, amounting to £1696 11 3 was submitted to the Board, and on examination ordered to be paid.

Mr. Merritt having mentioned to the Board that he had consented to allow Mr. Adams the privilege of retaining by diking, any portion of the land surrendered to the Company, a discussion took place on the propriety of such permission, and it was considered by the Board that the award in each case having been formed upon a calculation of the value of the land to be surrendered, it is clearly understood by the Board that the former proprietors are to have no further control over it under any circumstances, and with respect to Mr. Adams' case in particular, it is Resolved, by the Board, that the Engineer under the sanction of the Agent shall make an accurate Survey and description of such portion of his land as will be required for the purposes of the Canal.-That the boundaries shall be marked out with stakes and a stone monument—and a Deed corresponding with such description be tendered to Mr. Adams for his signature, the money being ready to be paid to him on its execution, and that in case of his declining, he must pursue whatever remedy he may select.

Application being made by Messrs. Bell, & Co., for an advance of £500-It was Resolved; that the sum be granted them, on their giving satisfactory security.

JOHN H. DUNN. President.

At a Meeting of the Directors, held in the Legislative Council Room on Thursday, January 18, 1827.

### PRESENT:

The Hon. John H. Dunn, President.
" William Allan, Vice President. Henry J. Boulton, and Directors. Wm. H. Merritt, Esquires. And Mr. Yates.

Whereas a few Landholders on the route of the Canal heretofore refused to leave the amount of compensation to be awarded them to Arbitration, at the time appoined by the Legislature-and whereas the expense of a second Arbitration would be considerable, if an Arbitrator were now to be named on behalf of each person interested as heretofore.-It is therefore Resolved, that the Company will name one Arbitrator if all the persons now unsettled with, will name another, to Arbitrate and award the compensation to be paid to the respective parties—these two in case of disagreement to name a third; but should the Landholders be unable to agree upon any individual, or refuse to do so, they will leave the matter to Arbitration in the manner provided by the Charter upon the Landholders paying the expense thereof.

The following. Accounts were ordered to be paid -v12.

W. I.. Mackenzie, -do...... 9 10.

Resolved, That as the Instalment payable on the 29th inst., may possibly not be required, the advertisement for the same shall be discontinued.

JOHN H. DUNN,

President.

At a Meeting of the Directors, held in the Legislative Council Room on Thursday, February Sth, 1827.

The Hon. John H. Dunn, President.
" Wm. Allan, Vice President. John B. Robinson,

Henry J. Boulton, and John Clark, Esquires.

Directors.

The Board taking into their further consideration a request made by Mr. Wood to the President, for the settlement of his claim, it was

Resolved, That in pursuance of the Resolution of the 18th January, Mr. McCormick be appointed as Arbitrator on behalf of the Company, to meet such other person as may be named by the parties, at such time as muy be convenient to him, but should the whole of those persons decline the Arbitration in either manner named in those Resolutions, then the claims of such as shall agree may be considered and decided—Mr. Wood engaging that three persons will agree to his nomination of an Arbitrator, and Mr. Thomas Clark being agreed upon between the Board and Mr. Wood, as Umpire.

> JOHN H. DUNN. President.

At a Meeting of the Directors, held at Mr. Dunn's on Tuesday, 13th February 1827,

The Hon. John Henry Dunn, President. John B. Robinson, Directors. Henry J. Boulton, and Wm. H. Merritt, Esquires.

Whereas it has been deemed (by the Board) expedient to petition the Legislature of Lower Canada to become Subscribers to the Capital Stock of the Company, and it being necessary that the Company's Agent should attend the presentation of the Petition for the purpose of affording such information as may be required.

It was Resolved, That W. H. Merritt, Esq., the Agent of the Company, do forthwith proceed to Quebec, and cause the Petitions of the President and Directors to the several branches of the Legislature of Lower Canada, of which he is the bearer, to be presented immediately after his arrival, and that he do use his best endeavours to procure the remainder of the stock of the Company; amounting to £60,000, yet unsubscribed, to be taken up either by the Provincial Government of Lower Canada, or private individuals.

Whereas, by the Act passed during the present Sessions of Parliament, authorizing the Provincial Parliament to become stockholders to the extent of £50,000, the amount of the capital stock remaining unsubscribed will be reduced to £60,000, which it is desirable should be immediately offered to the public.

It is Resolved, That our Agent, Wm. Hamilton Merritt, Esq., be authorized, in conjunction with J. B. Yates, Esq., of New York, to open books in that city, or elsewhere, for the subscription of the remaining number of shares.

And it is further Resolved, That, for the convenience of subscribers, no greater instalment than five per cent, shall be called for monthly, exclusive of the deposite of ten per cent, on subscription, to be paid into the hands of J. B. Yates & Co., in New York, who are hereby authorized to issue receipts for the same.

Resolved, That Mr. Merritt be advanced £125 for the expenses of his journey, to be accounted for on his return.

It having been represented to the Board, by Messrs, Beach, Ward & Co., that they are desirous of relinquishing their contract for the completion of the Deep Cut,

It is Resolved, That the Board will accept their relinquishment of their contract, so far as the same may be under sub-contracts, and that the Board will thereupon enter into fresh contracts for the completion of those portions, at the same price as Beach & Co. took them at. It is also Resolved, That if Messrs. Beach & Co. proceed to the completion of that part which they have kept in their own hands with vigour and despatch, the Board will take into consideration any equitable claim they may have for outfits or extra exertion on the completion of their contracts.

On a representation, from the Agent, that Mrs. Rykert is in indigent circumstances, and her husband, T. Rykert, being at present insane, Ordered, That she be paid the sum of £15, as awarded her, on taking her receipt in full for the same, specifying the description of land in the receipt.

At a meeting of the Board, held on Wednesday, March 6, 1827.

PRESENT :

The Hon. John H. Dunn, President.

"William Allan, Vice-President.

John B. Robinson, and

Henry J. Boulton, Esquires,

Directors.

The minutes from the 14th November to 13th

February were read and approved.

Resolved, That the Hon. Peter Robinson be furnished with a copy of the two Welland Canal Acts passed last Session, 25 Reports of the Work, and a Power of Attorney to negociate a loan to the extent of £75,000 with the British Government, or other persons, and authorizing him to confer with Messrs. Bosanquet and others for the purpose of obtaining subscriptions to that amount—and a letter from the President to the Lords of the Treasury accompanying the application for the loan.

Read a letter from Messrs. Gates & Co., dated February 19, requesting that they might be allowed to pay up the arrears on 100 shares standing in the name of B. A. Goldschmidt by two payments, viz.:—one half on the 1st August, and the remainder on

the 1st November;

When it was Resolved, That the Board, taking into their consideration the peculiar circumstances under which that stock was subscribed, and is now placed, will agree to their application, Messrs. Gates & Co. paying also interest from the time the instalments became due.

Rend a note from Mr. Gerard, a Trustee on behalf of Messrs, M'Gillivray & Co., soliciting the sale of their stock forfeited for non-payment of the instalments might be deferred until an answer was received to a letter which had been written Mr. S. M'Gillivray, now in England, on the subject;

Whereupon it was Resolved, That Mr. Gerard be informed, that if the Trustees of Messrs. M'Gillivray will give their notes of hand in the same manner and at the same time as Messrs. Gates & Co., so as to secure the payment, the Board will consent to allow them the same indulgence.

Read Mr. Crook's letter, dated February 20, and Resolved, That there is not any thing contained in it which would authorize the Board in making a distinction between him and the other stockholders, whose stock had been forfeited and sold.

Resolved, That the President, referring to the Act of last Session, do write to Major Hillier, representing that the success of the Company in filling up the remainder of the stock, as well as the immediate operations of the Company, render it highly desirable that the amount of stock which the Government intends to hold should be actually subscribed without delay, and expressing the hope of the Company that the full amount authorized may be subscribed.

JOHN H. DUNN,

President.

At a meeting of the Board, held 24th March, 1827.

### PRESENT:

The Hon. John H. Dunn, President.
" " William Allan, Vice-President.

John B. Robinson, and Henry J. Boulton, Esquires, } Directors.

Read Mr. Davis' letter, containing an application from Mr. Auldjo that he night be permitted to pay up the arrears of the stock, held by and to which it was resolved that he should be permitted to do so, and that Mr. Davis be informed accordingly.

JOHN H. DUNN, President.

At a Meeting of the Board held on Saturday, March 31st, 1827.

#### PRESENT:

The Hon. John H. Dunn, President.
"William Allan, Vice President.

John B. Robinson,
Henry J. Boulton, and
W. H. Merritt, Esquires,

Resolved, That the amount to be received from Lower Canada for the stock subscribed there, be drawn through the Agent at Quebec, in the mean time an application to be made to the Bank to know if they will allow the Company any premium on those drafts.

Read a letter from Messrs. Yates and McIntyre, of 16th inst., requesting that the balance due by them as agents might be drawn in three epual amounts, payable 1st June, July, and August. It was—

Resolved, That the Board will grant the accommodation which Messrs. Yutes, & Co. solicit.

Resolved, That Mr. Lewis shall build the bridges which may be required by the Company, and be paid for them agreeable to the Engineer's estimate of the same.

The attention of the President and Directors having been called by the Agent to the subject of the Deep Cut, and to the necessity of coming to a decision upon such measures as may ensure its proceeding without obstruction.

The Board referred to their Resolution of the 13th February, to which they determined to adhere, and desired that the Agent shall request the Engineer as soon as it may be expedient to resume operations, to report what number of men should be placed without delay upon that part of the Canal, in order that it may proceed with proper expedition, and then to call upon Messrs. Hovey, & Co. to carry on their operations accordingly, in pursuance with their contract.

Mr. Barrett's account for salary for himself and assistant £187 0s. 4d., was ordered to be paid.

Lovi Taylor's estimate, amounting to £55 5 10. was ordered to be paid.

The sum of £75 to be paid to James Butler for Robert Brown on account of his award on his giving a deed for the lands required by the Company.

Mr. Allan represented that from the frequent ill health of some members of his family he feared it might be exceedingly inconvenient to him to attend so often as might be proper at the meetings of the Board at St. Catharines during the ensuing season, and stated that he stated this much to the Board with a view to its being considered by the stockholders at the approaching election for directors, when two of the present Board must of necessity retire. It was Resolved, at Mr. Allan's request that the Agent do make the same known to the stockholders in order that they take it into their consideration on making their election.

JOHN H. DUNN, President.

At a Meeting of the stockholders held at St. Catharines pursuant to advertisement, on Monday 2nd April, 1827, for the election of Directors for the ensuing year, the following gentlemen were duly elected:

The Honorable John Henry Dunn,
The Honorable Colonel Wells,
John B. Rohnson, Esquire,
Henry J. Boulton, Esquire,
D'Arcy Boulton, Jr. Esquire,
John Clark, Esquire, and
George Keefer, Esquire.

At a Meeting of the Board, held at St. Catharines, April 11, 1827.

#### PRESENT:

The Hon. John H. Dunn, The Hon. Colonel Wells,

John B. Robinson, Henry J. Boulton, D'Arcy Boulton, John Clark, and George Keefer, Esquires.

On motion of Col. Wells, seconded by Mr. D. Boulton, the Hon. John H. Dunn was unanimously elected President, and Henry J. Boulton, Esq., Vice-President.

Ordered, That Robert Diderick and Jacob Bow-man, be paid their claims.

Read a letter from Pease & Co., requesting the Board would consider the frequent alterations made in their job while employed on section No. 26, 27, 28, 29, and 30, by which they sustained much loss and injury, and hoping they would make them such allowance on that account as in their judgment should appear just.

When it was

Ordered, That it should be referred to the Agent and Engineer, to report thereon.

Read a letter from Gooding & Co., requesting that the sum of £250 might be paid to them out of the monies reserved on their contracts.

Resolved, That the President be requested to endorse their note for £250, in order to enable them to obtain a discount for it at the Bank.

Read J. R. Tenbroeck's petition and statement requesting to be allowed 505 days labor on his contract section No. 34.

Ordered, That it be referred to the Agent and Engineer for their report thereon, and in the mean time that £50 be paid him.

Read a letter from Messrs. Yates & Co., of 27th March, inclosing one from Mr. Proctor, to them, of 21st March, and his mortgage on certain property in Montreal, as security for £2,500 in part of his debt to the Company.

Resolved, That a letter be written to Mr. Davis at Montreal, requesting his information on the following points, viz:

1st. Whether the property is subject to any other incumbrances by judgment or mortgage besides the mortgage to Mr. Thompson.

2nd. What the value of the property is.

3rd. If the Company should think it advisable whether this instrument is legally binding in Lower Canada, or what form is necessary to make it so.

Mr. Clowes' estimate for a former sum due to James Simpson, on section No. 8, amounting to £62, and Mr. Simpson having stated the sum of £53 4s. 11d., as being the amount due to him:

Ordered. That the latter sum be paid him.

JOHN H. DUNN,

President.

DEEP CUT, Thursday, April 12th, 1827.

The Honorable John Henry Dunn, President, Henry John Boulton, Esquire, Vice President,

The Honorable Col. Wells,
John B. Robinson,
D'Arcy Boulton, and
George Keefer,

Esquires, Directors.

No business being decided upon, the Board adjourned till Friday morning.

JOHN H. DUNN,

President.

DEEP CUT, Friday, April 13th, 1827.

PRESENT:

The Honorable John H. Dunn, President, Henry J. Boulton, Esquire, Vice President.

John B. Robinson, D'Arcy Boulton, Hon. Colonel Wells, and George Keefer,

Esquires, Directors.

Messrs. Ward and Hovey, presented themselves to the Board for the purpose of making some arrangement respecting their contract for the Deep Cut, and after discussing and considering the subject they said that they would relinquish their contract with the Company for that portion of the Canal, and also all The Board their contract with the sub-contractors. agreed they should be paid the full value of the work which they have performed on section No. 6, according to the estimate and survey to be made by Mr. Thomus, forthwith, and if when the whole of the Deep Cut is completed and finished it shall appear that the whole of the Deep Cut has cost more or less than Mr. Thomas' estimate, it is agreed between the Company and Messrs. Ward & Co., that the difference shall be received or paid respectively by the parties, and at the request of Messrs. Ward & Co., the Directors consented to take the stock which Messrs. Ward & Co., had subscribed at the full amount to which they had paid upon it in the settlement of their account with the Company.

Messrs. Ward & Co. having agreed to the foregoing terms rather than attempt to proceed under their present Contract which they altogether declined, agreements were drawn up and executed accordingly, and at the same time it was stated by the Company that they did not consider this arrangement as interfering at all with that part of the Resolution of the 13th February, which expresses the readiness of the Board to consider any just claim which may be urged by them as soon as the work shall be completed, but that at present no such consideration can be entertained.

Mr. Hartwell, one of the sub-Contractors, was called in and informed that the Board intended to take off the hands of Messrs. Ward & Hovey their several Contracts, with the sub-Contractors, and he was asked whether he had any remark to make as to the effect of such an arrangement on his arrangements.

He said he had been paid 18 cents per yard on the whole Job, which was all Ward & Co. had received of the Company—that he wished to have them give up his Notes to the Company which had been passed for the 10 per cent stipulated to be retained, and that he had nothing further to desire.

Mr. Rowley was also called in and informed in like manner; he said that Ward & Co. had retained in their hands a sum of about £375 on account of the 10 per cent stipulated to be retained—they had given no Notes to Ward & Co. and required nothing more than to be paid in the same proportion as Ward & Co. received from the Company.

Mr. Hathaway was called in and informed in like manner.—He said he should have no claim upon the Company for the past—he had given his Notes for the 10 per cent which he wished should be held by the Company and not remain with Ward &c.

Mr. Newlove was told the same—he had no remark to make and no claim upon the Company for the past, and will have nothing to look to the Company for—he has received from Ward & Co. all he has any claim to, and has given them no Notes.

Messrs. Ward & Co: being asked if they were ready to give up the Notes of the sub-Contractors which they held as a reservation for the fulfilment of their sub-Contracts, stated that they had not got them with them at the present moment, but would give them to the Board in order that they might be surrendered to the parties on the completion of their engagements, and at the same time requested that on their so doing, the Board would give up their Notes which they held in like manner, which was agreed to.

The Board having taken into consideration a suggestion from Mr. McTaggart, Civil Engineer, from the Rideau Canal, communicated to the Agent as to the practicability of washing out a fair portion of the earth from the Deep Cut by means of pumping, and the difficulties experienced in excavating the earth, from the increased depth being magnified by the Contractor.—It is Resolved, in concurrence with the opinion of the Engineer in charge of the work, that he shall immediately lay out a ditch throughout the Deep Cut, of suitable dimensions to admit sufficient water to try the experiment of thus washing out a portion of the earth by means of a current of water which they are satisfied will at all events afford a sufficient channel for Scows or Boats, for the purpose of removing the earth at a much cheaper rate than in the manner now pursued in Carriages—and the Agent is desired to direct the different Contractors to apply the whole force of the Deep Cut on the said ditch, or let it out to other Contractors at the estimate of the Engineer with a view to its accomplishment in as short a time as possible.

Messrs. Ward & Hovey were then called in, and the Board proposed to them that if they were desirous to continue their employment on the Canal they might proceed on their Section No 6, under the direction of the Engineer—that they would probably be required to proceed in a manner different from the original design, and that the Board would pay them upon a monthly estimate of the work done, to be made by the Engineer, without reference to previous Contracts, and the Board also acquainted them that to enable them to commence their work more con-

veniently, they would make them an advance of £1250 upon their Note—to all which Messrs. Ward

& Hovey perfectly agreed.

Mr. Hartwell was called in and informed that the Company being now in possession of his Contract made with Messrs. Ward & Co., wish him to understand that they are about to alter their plan of operations on the Deep Cut, which they are desirous should be prosecuted with all possible expedition, which will cause a material deviation from the original design, and beg to know whether he is willing to proceed in the manner stated, under the direction of the Engineer, to be paid monthly, according to his Estimate, to which he perfectly agreed, and the Board in order to enable him to commence his operations with spirit and activity, will agree to make him an advance of £125.

Mr. Rowley was called in, to whom the same statement was made to which he agreed, and the Board consented to make him an advance of £250.

Mr. Hathaway was called in and informed to the same effect, in which he concurred, and the Board directed him an advance of £500—one half by a draft on New York at 60 days sight, and the President was requested to endorse his note to enable him to obtain a discount at the bank for the other.

Mr. Newlove was called in, and the same communication was made to him, to which he agreed, and the Board directed an advance of £100 to be made him.

Expunged 2d Resolved, That the Office of the September, 1835. Company be removed to St. Catharines, and that Mr. James Black be appointed Resident Secretary, at a salary of £200 per annum.

Expunsed 2d September, 1835. Agent, W. H. Merritt, Esq., be increased to £400 per annum, commencing from 1st

January last.

Resolved, That an office be built at St. Catharines for the Agent, Secretary, and Engineers, by contract, Mr. Merritt agreeing to pay the Company for the same at any time they may choose to relinquish it.

JOHN H. DUNN,

President.

At a meeting of the Board, held on Thursday, May 3, 1827.

PRESENT:

The Hon. John H. Dunn, President. Colonel Wells.

George Keefer, and

Directors.

John Clark, Esquires,

The minutes of the last meeting were read and confirmed.

Mr. John Gould presented an application for damage sustained in consequence of timber deposited on his land, destroying his fences, &c., which was referred to the Agent for enquiry and examination, and to report at the next meeting.

DEEP CUT, Friday, May 4, 1827.

Resolved, That as Mr. Street was employed as an Arbitrator on the part of the Company, and omitted, that he now be paid.

Resolved, That a further advance of £117 10s. be made to Messrs. M'Neilledge & Co. for the purchase of pork.

Resolved, That the President be requested to endorse the notes of those contractors who may require advances to enable them to obtain a discount at the Bank.

At a meeting of the Board, held at York on Monday, May 7, 1827.

PRESENT :

The Hon. John H. Dunn, President. Henry J. Boulton, Esquire, Vice-President. J. B. Robinson, and

D'Arcy Boulton, Esquires,

Directors.

Mr. Geo. Adams attended respecting his claimfor compensation, and requested to be permitted toreclaim a certain portion of the land to be occupied by the Company.

Resolved to adhere to the Resolutions of the 4th

January.

Resolved, That the sums of £150 and £240; being the half yearly interest due on loans from Government, be paid. Checks were signed accordingly.

At a meeting of the Board, held at York on Monday, May 21, 1827.

PRESENT:

The Hon. John H. Dunn, President.
Henry J. Boulton, Esquire, Vice-President.
The Hon. Colonel Wells,
J. B. Robinson, and
D'Arcy Boulton, Esquires,

Read a letter from Mr. Phelps, proposing to excavate the remaining portion of the Deep Cut by machinery of his own invention at 27 cents per cubic yard;

When the Board determined that, in order to form a correct opinion with regard to the practicability of the plan proposed, it will be necessary for them to inspect its operation; and for this purpose, it was agreed that they would hold a meeting at the Deep Cut on Friday next, the 25th instant, where they could also receive from the Agent and Engineer their full report upon the subject.

Ordered, That the Seal of the Company be affixed to a Power of Attorney, authorizing Mr. Walker, the Company's Agent at Quebec, to receive the amount payable on the stock outstanding in Lower-Canada.

Ordered, That Mr. Walker be requested to have hand-bills printed and circulated at Quebec, more particularly to the emigrants there, on landing, stating that any number of persons will obtain employment and good wages on the Welland Canal.

May 26, 1827.

At a meeting of the Board, held this day at the Deep Cut.

#### PRESENT :

The Hon. John H. Dunn, President.

Henry J. Boulton, Esquire, Vice-President.

John B. Robinson, and Besquires.

D'Arcy Boulton,

The Hon. Col. Wells.

George Keefer, and
John Clark, Esquires,

Directors.

The minutes were read and confirmed.

In pursuance of the Resolution of the 21st instant, the Directors assembled at the Deep Cut and inspected the whole line thereof and also the various machines of the contractors and of Mr. Phelps, for the more expeditiously completing the excavation, and having required each contractor to deliver in proposals of the terms upon which he or they would complete such section or portion of section on which they were severally engaged, they delivered their proposals accordingly, viz.

Sylvester R. Hathaway—the remainder of his job, the full width 40 cents, and the ditch only 60 cents per square yard.

Martindale and Donaldson—the ditch to the tow path 1s. 101d., or the whole width 1s. 6d., per square yard to the bottom level, water indemnified.

A. Rowley—the ditch for 50 cts.,—also to finish the 52 rods on which he is engaged for 36 cts. per cubic yard.

Hartwell and Son—The Ditch through their section, or more, down to towing path at 37½ cts. per cubic yard including roads, or the whole width 32 cts. per cubic yard including roads.

Oliver Phelps—The whole remainder of the Deep Cut at 25 cts. with an allowance of 2 cts. per cubic yard for machinery.

### When it was

Resolved, To accept of Mr. Phelps proposal, but the Board being desirous of doing justice to the contractors and protect their interests and property in the concern, it was proposed to offer them the same terms for that portion of the work on which they were engaged under the direction of Mr. Phelpsupon which Mr. P., offered to unite with any of the contractors and give them a proportion of the profit equal to the strength they might employ, or to purchase their teams, shanties, provisions, machinery, &c., or furthermore to allow each contractor at the rate of \$1000 per annum for his own services as superintendant-18s., York currency per day for each horse team, waggon, and driver found—15s., for each yoke of oxen, cart and driver—12s., per week for common Board, and \$2 for overseers, and a reasonable compensation for other service performed by oxen at plough or otherwise, and moreover, if any one chooses to use any other machinery except such as Mr. Phelps shall erect whereby a saving may be made, that person shall be entitled to and receive all the advantages that may result therefrom, (vide Mr. Phelps' agreement.)

The several contractors were then called in and being referred to Mr. Phelps, they entered into engagements with him solely, except that they expected the Company would guarantee them for any amount due to them from Mr. Phelps, who agreed

that such sum should be retained as might meet ilieir several claims.

An agreement was then executed by Mr. Phelps to complete the above work according to the said terms in 6 months from this day.

Resolved, That the Hon. J. B. Macaulay be requested to act as arbitrator on behalf of the Company to award damages to Mr. Wood and others—and that he be written to accordingly.

Mr. H. J. Boulton presented an account of his expenses to England amounting to £310 19s. 9d., C'y, when it was referred to the minutes of the 20th September, 1825, wherein a sum not exceeding £300 sterling was granted for the said mission.

Resolved, That the account be paid.

Mr. Hill submitted a claim he had upon Hovey and Ward.

Resolved, That Hovey and Ward be required to pay Hill, in case the amount withheld from him is not retained by the Company from them and that \$682 be withheld until the same is discharged.

Mr. Gibbs submitted a claim to the Board—referred to Engineer.

A claim was submitted by J. B. Clench, Chairman of the Niagara Quarter Sessions, for £5 2s. 6d, on account of Roswell O'Brien.

Which was rejected.

At a Meeting of the Board, held at York, on Saturday, June 9th, 1827.

### PRESENT:

The Honorable John H. Dunn, President, Henry J Boulton, Esquire, Vice President.

John B. Robinson, D'Arcy Boulton, and George Keefer,

Esquires, Directors.

The minutes of the last meeting were read and confirmed.

Read a letter from Mr. Thomas, Principal Engineer, resigning his engagement with the Company.

Resolved, That Mr. Thomas' resignation be accepted.

Messrs. Hovey and Ward attended the Board respecting their contract on the Deep Cut, section No. 6, upon which the minutes of 12th April were referred to and read, wherein it was agreed the work they performed upon the said section should be paid for according to the estimate of Mr. Thomas, the Principal Engineer, which estimate was now presented to the Board, viz: on Section 6, 27 cts. per cubic yard for work done during last season.

Sec. 35—11704 yds, embanked by Osborne 10½ cts.
12824 " " 15"

12338 " Hovey & Ward, 121 "
6769 "n'r float'g bridge, Osborne, 16 "
5323 "sand hank, Hovey & Co. 16 "

Resolved, That the Secretary do make out a statement of the work performed by Hovey & Ward, upon Section No. 6, during last year, and transmirit, together with their several contracts and accounts with the Company, to the President.

Resolved, That the drafts drawn by O. Phelps on the Company in favor of Hovey and Ward, S. R. Hathaway, &c., for cattle and other property purchased of them be endorsed by the President, viz.,—

To Smith, Ward & Co. @ 30 days, (dated 7th \$\infty\$500 June,) " 90 " " 500 To S. R. Hathaway, 30 days, " 500 \$\infty\$500 " 5 months, " 500 \$\infty\$500 " 5 months, " 500

Resolved, That security be given by Mr. Phelps for the above, and also for \$7000 agreed to be advanced to him.

Resolved, That Hovey & Ward be paid for the shanties, smith's shop, and other buildings, according to a valuation to be appraised by two persons.

Resolved, That Hovey & Ward be paid \$50 for a machine which they erected at the tunnel in 1825.

Resolved, That Mr. Hathaway be paid the amount of duties which he has paid on account of the Company upon the collector's receipts being produced.

Resolved, That the President be authorised to settle the advances made by the Bank of Upper Canada from the amount to be received for stock purchased by the Lower Provincial Government, being 73 per cent on the same.

Resolved, That Mr. Merritt's accounts for last winter be passed and carried to his credit, amounting to £133 19s. 5d., and that an advance he made to him of £250 on account of his mill property.

Resolved, That notices be printed and circulated to protect Catholics from ill usage by the laborers on the canal.

A letter was read from Mr. Monson, engaging to erect a mill at St. Catharines, provided the Company will give him the mill seat—which was rejected.

Resolved, That Mr. Thomas be paid his salary and expenses as per account delivered, amounting to £105 4s. 10d.

Read a letter from Mr. Walker, the Company's Agent at Queboc, stating that he had received the subscription from the Government of Lower Canada, amounting to £18,250, being 83 per cent on the stock subscribed by the Legislature of Lower Canada, and that  $\frac{1}{2}$  per cent was charged by the agent for transacting and receiving the money and paying the same to the Montreal Bank to the credit of the Bank of Upper Canada—which was agreed to.

Read a letter from Mr. Davis, the Company's Agent at Montreal, transmitting a legal opinion on the security of property proposed to be given the Company by Mr. Proctor, late agent at New York, for a balance due by him for instalments collected on account of the Company, which was ordered to be transmitted to Messrs. Yates & McIntyre for their information and guidance, and to urge those gentlemen to use every possible means to recover the money, or to take such steps as may appear most judicious for the benefit and security of the Company.

Resolved, That the Bank be paid £100 on account of J. Ten Broeck, that amount having been charged to him in last estimate.

At a Meeting of the Board held at York, on Friday June 15. 1827.

### PRESENT:

The Hon. John H. Dunn, President,
Henry J. Boulton, Esqr., Vice President,
John B. Robinson, and
D'Arcy Boulton, Junr. Esqrs.,

Directors.

Messrs. S. Ward & Hovey having relinquished all their contracts on the Canal, submitted certain papers to the Board containing various items for the final settlement of their account, which not appearing to be sufficient for a full and satisfactory arrangement with those persons, it was—

Resolved, That the Board cannot come to a decision without having before them the books and accounts of the Company and a reference on them to the agent and officers of the Company, and therefore the matter must remain over until the next meeting of the Directors at St. Catharines, on Thusday July 5th.

It appearing that certain apparatus would be necessary for carrying on the work at the harbor, and that it could be obtained from the dock yard at Kingston on a suitable application.

Resolved, That the President be requested to make that application, and that Mr. Oates be sent for the purpose of selecting and bringing such Tackle as may be required.

Resolved, That Colonel Wells and Mr. D. Boutton be requested to go over to St. Catharines previous to the next Meeting, for the purpose of auditing the Accounts, &c.

6th July, 1827.

At a Meeting of the Board, held at St. Catharines

The Hon. John H. Dunn, President.
H. J. Boulton, Esquire, Vice President.
John B. Robinson,
D'Arcy Boulton,
Colonel Wells, and
George Keefer, Esquires.

The minutes were read and confirmed.

Read a Letter from Mr. John Clark, tendering his resignation as a Director.

Resolved, That Mr. Clark be written to, acknowledging the receipt thereof, and agreeing to dispense with his services so long as his present engagement with Mr. Phelps continues.

Read a Letter from the Honorable Captain Byng respecting application made to him for Tackle wanted at the Harbor.

Resolved, That a Letter be written to Captain Byng acknowledging receipt of Tackle &c., and if the Contractors do not think proper to take the Rope, that it will be returned forthwith.

The award signed Thomas Clark and Alexander Stewart, in the case of Samuel Wood, declaring that the Company shall pay to the said Samuel Wood the sum of £254, in full for the meadows and other land taken, and to be overflowed by the said Company, estimated altogether at S acres, being taken into consideration,

Resolved, That inasmuch as the said award does not specify the price per acre, and as no particular quantity has yet been determined upon by the Company as necessary for the purpose of the Canal, and the particular price of the land not specified, the Board consider the said award wholly uncertain and inconclusive, and therefore illegal, and consequently do not feel themselves justified in acquiescing therein, more especially as they cannot in justice to others, be inattentive to the fact that the lands required by the Company of an equally good quality, and of a similar description, adjacent to the lands of the said Samuel Wood, was valued at the former Arbitration held at St. Catharines, in August last, at less than one third the price now fixed upon, and at which Arbitration the said T. Clark was present and concurred-and in some instances very similar the Arbitrators (of whom Mr. Clark was one,) declared the advantages to be derived by the parties, from the Canal passing through their premises, more than oquivalent.

Resolved, That Mr. Wood be furnished with a copy of the above.

Resolved, That the award of P. Shaver and Hannah Second be confirmed.

Resolved, That Jarai Rowley be paid £250, and W. Hill £170, as the amount of their claims upon Hovey & Ward, provided they (Hovey and Ward) agree to the proposal to be submitted to them.

Resolved, That Hovey and Ward be allowed £25 for a Scow, &c. at Harbor.

Resolved, That the interest due from Hovey & Ward be remitted, provided they agree to the final settlement of their concern with the Company.

Messrs. Hovey & Ward attended the Board, at which time J. Rowley submitted a claim upon them of £452 5, and Mr. Hill, another Sub-Contractor, of £170.

The Board having agreed to take back the Stock of the Company held by Messrs. Beach, Hovey, & Ward, the two latter preferred their respective Shares, amounting to £1425, and £712 10, which is endorsed on their Bond of £3000, and placed to their credit, as will also be that of E. Beach, immediately the transer is made.—Messrs. Hovey & Ward then retired, after having had the several accounts exhibited to them, and acknowledged the correctness of the general statement, shewing a balance in their favor, of £399 9 5, and after discussing all their transactions and claims, and the responsibility which the Board had assumed with respect to some of the Sub-Contractors—it was proposed to them that the settlement should be made as follows:—

Balance in their favour, as per general account.	£399	Q	
Interest on their Bond, which, if a	2000		
settlement on this principle is acceded to, will be rolinquished	195	0	0
Balance paid on account of duties paid, after deducting Nelles' note for £27	1500		
12s. 6d	6	7	2
Deduct amount withheld from Row-		٠.	
ley*£250 0 0			

^{*} Rowley's claims £452 5s., as short paid, according to the estimate of 18 cents—but the Board only exact from Hovey & Co. £250.

	0			
 -	<del></del>	576	19	10
156	156 19		576	156 19 0 576 19

Messrs. Hovey and Ward declined accepting the above settlement.

Mr. Phelps applied for a furt. Ivance upon his contract at the Deep Cut; but at being agreed that he should receive the amount of his estimate twice during the month, such further advance was not required, except £500, which was to make up the amount of £5,500, for which he has given security.

The Directors particularly called the attention of Mr. Phelps and the Engineer to the state of the locks, and urged the necessity of a more strict regard heroto, and that they will not consider Mr. Phelps in the slightest degree relieved from his responsibility in that respect from the circumstances of his recent contract.

A petition was presented by Luke Carrell, praying for aid towards digging a well, in consequence of his spring being destroyed by the Canal.

The Board granted £10.

Adam and Benjamin Gould presented an application for payment of damage and expense in removing fences, &c.

The Board granted £5.

John Gould claimed £10 for damage in wheat field.

The Board think no occasion could exist for doing more damage than would be amply compensated by £2 10s.; and that if any wanton or unnecessary damage was done, it should be made good by the person who did it.

The Board granted £2 10s.

Mr. Lapham's Report of the Grand River Route was presented, with account of expenses.

Resolved, That progress on the Wainfleet Marsh be made forthwith.

Mr. Merritt having paid John Donaldson a draft, dated 23d June, at 90 days, for £76 2s. 6d.—that is £75 for a machine erected at the Deep Cut, and £1 2s. 6d. interest—Resolved, That Mr. O. Phelps defray one moiety, and the Company the other.

Mr. Oates attended the Board respecting the inefficiency of the present mode of sinking the piers, &c. He was directed by the Board, in the presence of the Agents and Engineers, to see that no insufficient ties or other timbers are put in, and to give the contractors notice that nothing will be paid for work done contrary to the specification. It was further represented that the last pier sunk had been twice washed down, and was now in an insecure state, the upper timber not being united with the lower, whereupon it was directed that the Engineer and

Capt. Outes do make a particular inspection of that part of the work, and the payment of the estimate be withheld till the sufficiency thereof be ascertained by them.

Resolved, That an advance be made to Bell & Co., on Sections 15, 16, and 20, according to the estimate of Messrs. Thomas & Barrett, the Engineers, to commence from 1st April last past, and that a further allowance on Section No. 11 be made, for bottom cutting, according to the estimate of Mr. Barrett, hereafter.

Resolved, That Mr. Merritt do prosecute S. R. Hathaway on the part of the Company.

Resolved, That a spirit level be purchased for the use of the Engineers, of Mr. Hawks, Troy.

Resolved, That Mr. Merritt be paid for his land, &c., as per award, £600, and £30 for interest, by a draft upon Messrs. Tates & M'Intyre for £630, at 60 days.

Mr. Samuel Swaizy offers to dispose of his farm, consisting of 100 acres of land, house, barn, orchard, &c., for the sum of £375, rather than accept of the amount of the award, £62 10s. As Mr. Hall Davis will take all the land on the west side of the Canal, supposed to be about 30 acres, at £3 2s. 6d. per acre, at das there is likewise a probability of saving a bridge on the same,

Resolved, That the farm be purchased according-

The estimate for June, amounting to £7,460 8s. 7d., was approved, and a draft given also for contingencies £40 11s. 3d., and for interest account with Bank of Upper Canada, £122 18s. 5d.

August 9, 1827.

At a meeting of the Board, held at St. Catharines.

PRESENT :

The Hon. John H. Dunn, President.
The Hon. Colonel Wells.
D'Arcy Boulton, and
George Keefer, Esquires,

Directors.

The minutes were read and confirmed.

The estimates were approved and ordered to be paid, amounting to £10,179 10s. 5d.

Mr. Hill applied to the Board respecting his claim upon Hovey & Ward—Mr. S. Ward attended in reply, when it was mutually agreed between the parties to leave their respective acts and differences to the decision of an Engineer, to be determined by their original contract, which decision shall be final, and the balance (if any, is awarded against Hovey & Ward) to be paid to Hill out of the monies due to Hovey & Ward, now in the hands of the Welland Canal Company, as per Resolution of July 6, 1827.

A resolution having passed the Board authorising the Agent to employ a person to dig a well for Luke Carroll, in conformity to the decision of the arbitrators in August 1826, or to pay him £10 in lieu thereof, but Mr. Merritt not being able to procure a person to undertake it for that sum, and Carroll having refused to accept it,

Resolved, That he be paid £12 10s., which sum he will accept.

Elizabeth Ball presented a claim of £9 for injury sustained by covering 6 acres of land with timber.—Rejected.

The Board not feeling inclined to go to the expense of removing the Grist Mill formerly belonging to W. H. Merritt, Esq., at this time, and considering its being put into immediate operation would be be neficial:

Resolved, That Mr. Merritt retain it in his possession, on the same terms as the saw mill, viz:—By advancing the capital to put it in operation he is to have the use of it till the Company may consider it an object to take it to themselves, in which case they agree to pay the amount of his outlay or expenditure in the repairs.

August 10, 1827.

At a Board of Directors held at the Deep Cut,
PRESENT:

The Hon. John H. Dunn, President,
The Hon. Colonel Wells, and
George Keefer, Esquire,

Directors.

Mr. O. Phelps stated to the Board that from the estimate taken on the commencement of his work he thinks 25,000 yards of earth have not been estimated to him in consequence of the projection of the banks where roads were left, and Mr. Barrett the Engineer being of opinion that nearly 20,000 yards may have remained in, which being retained will be a serious loss to the contractor.

Resolved, That the Board deem it expedient, and for the benefit of the work, to make Mr. Keefer an advance of £1,250, which he thinks an ample allowance, and which he conceives will prevent the necessity of calling again on the Company during the month.

September 7th, 1827.

PRESENT :

H. J. Boulton, Esquire, Vice President,
The Hon. Colonel Wells,
D'Arcy Boulton, and
George Keefer, Esquires,

Directors.

The minutes were read and confirmed.

The estimate for Aug. amounting to £10477 3s. 4d. ordered to be paid, but subject to queries to be answered next Board.

The contingent account, viz.

Ordered to be paid.

A Letter was read frem George Davies, dated Montreal, 9th August 1827, with his Account, stating the Balance in his hands to be £516 15.

Resolved, That the Secretary write to Mr. G. Davies, requiring him to pay the said balance into the

Bank of Montreal, to the Account of the Bank of Upper Canada.

Read a Letter from O. Phelps, respecting a grant of water for a Distillery, &c.

Resolved, That the above be agreed to—viz. that a Deed be granted of as much water as will pass through one of the Cast Iron paddle gates, which is 3 feet by 2 feet 6, for the purpose of working a Distillery, with one run of Stones for chopping grain, on which condition O. Phelps agrees to grant a Deed to the Company of the 10 or 12 acres of land occupied by the Canal across his premises, and also an acre of land at each of the five Locks, if wanted by the Company for hydraulic purposes.

Another Letter was read from Mr. Phelps requesting a delay of one month before he commences paying off his monthly payment of one sixth—which was granted.

Read a Letter from Wm. Hepburn & Henry Hancock, requesting employ as Lock Keepers, &c. at the Harbor.

As no such appointment was required at present, the petition was rejected.

An application having been made for the grant of a mill seat at St. Catharines, the same was taken into consideration, when it was resolved to pospone any decision thereon till a meeting of the Board be held at York on the subject.

Mr. Job Northrup also made an application for a mill seat upon his land at lock No. 2.

Resolved, That a lease be granted to Mr. Northrup for the term of ten years for the said mill seat and the land adjoining thereto not exceeding acres, at the annual rent of £25 upon his executing a deed to the Company of the land necessary for the said mill seat, including those contained in the award of arbitration, and for a mill race and road leading to said mill from the high race and road leading to said mill from the high race on the hill, to be laid out by the Company's Engineer.—The rent to commence 1st January, 1829, and at the expiration of said term of 10 years, his erections on said premises to be taken by the Company at a valuation.

N. Pauling made a similar application to erect a saw mill at harbor, which was granted upon the same terms as above.—The rent to commence 1st July, 1828.

The Engineers having completed the survey of of land between Chippawa and Grand River, and made an estimate thereon—and it appearing desirable to have the same commenced as soon as possible.

Resolved, That notices be immediately printed and circulated to receive scaled proposals on or before Thursday the 4th of October, for excavating any part of the Black Ash Swamp, (or Cranberry Marsh, as usually called) from the River Welland to the Grand River, and that it be advertised in the York, Gore, St. Catharines, Lockport, Buffalo, Rochester, and Albany papers.

Resolved, That the Company's Agent be empowered to negociate for the purchase of Misener's mills and the Reserves annexed, and if he completes the same, to throw open the dam immediately.

4th October, 1827.

At a meeting of the Board held at St. Catharines

PRESENT :

H. J. Boulton, Vice President. J. B. Robinson, and George Keefer, Esquires.

Directors.

The minutes were read and confirmed.

The queries in last estimate were satisfactorily explained.

The estimate for September, amounting to £8583 9 7, and contingent account to £11 0 6, were approved and ordered to be paid.

Read a Letter from Mr. G. Davies, stating that he had paid into the Montreal Bank £150 to the Company's credit in the Bank of Upper Canada, the balance in his hands being required to pay for Iron ordered by Mr. Phelps.

The Oats remaining at York ordered to be sold.

A Letter was read from John Misener requiring \$2500 for the Glebe Land and Mill in his possession, in answer to an application by Mr. Merritt for the purchase thereof, as per minute of last Board—which was rejected, and it was

Resolved, That an application be made to prevent a renewal of his lease, unless he agrees to an equitable compensation, and that Mr. Heward be written to on the subject.

The property is not supposed to be worth more than £150 or £175.

Jaira Rowley attended the Board respecting a claim he has upon Smith Ward & Co. for work performed at the Deep Cut—the Board having understood at the time of their arrangement with Ward & Co. that they had paid the Sub-Contractors the full amount of 18 c. per yard on the sum they themselves had received from the Company, intimated to Mr. Rowley the amount due from Ward & Co. should be paid—Messrs. Ward & Co. now refusing to make up the said amount.

Resolved, That the sum of £250 be guaranteed to J. Rowley as soon as he gets down his Job to admit of Scows, the same being retained from Ward & Co. for that purpose.

Resolved, That £75 7 be paid to D. W. Smith, Agent to James Simpson, on account of Ward & Co.

The Board taking into consideration the very pressing and urgent necessities of S. Ward & Co., as stated by them, and referring to a former resolution holding out to them an expectation of some future gratuity on account of their early exertion at the commencement of the Deep Cut, it was

Resolved, That should the Directors now absent concur in the opinion of the present Board, the sum of £250 be advanced to Messrs. Ward & Co., for their immediate relief, without reference to the accounts yet unsettled, to be deducted from whatever sum it may be beemed proper to allow Ward & Co. on the final arrangement of their concern with the Company.

It being represented to the Board that it was requisite to build a stone wall for the double purpose of protecting the Culvert on Section 13 and carrying all the surplus water from the Canal, or cutting a ditch between Kelley's and Wilkinson's.

Resolved, That Mr. Barrett do make out a written statement of his opinion on the subject as soon as possible for the Board.

Resolved, That a ditch be cut from the head of Lock No. 1, to enable the surplus water on the summit level to be discharged down the ten mile Creek, or to lead it again into the Canal at the foot of Lock No. 4.

Resolved. That the said ditch be continued from the head of Lock No. 5 to below Shaver's barn, between Locks 17 and 18, to carry round the surplus water, save building of Waste weirs, obtain stuff for puddling on Section 20, gain an increase of land, and give the Company as many hydraulic situations as may be necessary.

Resolved, That the same be continued from the head of No. 18 to Soper's valley in rear of Mr. Phelps' house and barn, and that Mr. Phelps do perform the job on the same terms as the adjoining one is done at.

Note.—The four preceding Resolutions were suspended for this season.

Resolved, That the three Waste weirs advertised by the Engineer to be erected at Mr. Keeser's, Marlett's, and H. Davis—the two last with flumes to drain off the Deep Cut & upper level if necessary & be approved.

In consequence of the wet weather in the early part of the season, as well as meeting with a Spring in the bottom of the Lock pit at the commencement of the Deep Cut, it was found impracticable to get down the Lock this season, and Mr. Phelps having suggested the propriety of removing it to the other end of the Deep Cut.

Resolved, That the operation thereon be discontinued and preparation be made for Boating

Mr. Yates having submitted some observations to the Board respecting the Marsh and Mill Seats,

Resolved, That the consideration thereof be postponed till the next meeting of the Board.

Resolved, That the Tow Path on the River Welland be paced on whichever side may be considered most convenient by the Engineer.

Resolved. That if one Engineer can be spared, a level be taken from the commencement of the Grand River to Brantford.

Resolved, That the President be requested to call upon Major Hillier respecting the money to be obtained from the British Government, and to determine upon the most proper steps to be taken to obtain immediate payment thereof, and that the President be authorised to draw any bills which may be thought advisable, or execute a Power for the receipt of the money.

Resolved, That an advance be made upon Sections 26 and 27 to enable the Contractor to pay the arrears due to the laborers so far as such an advance may go.

A Letter was read from Mr. Gooding requesting an advance upon Sections 17, 18, 19, 21, and 22, to enable him to prosecute the work with increased vigor.

Resolved. That the Agent be authorised to advance not exceeding of the amount withheld, as he may find most expedient for the due performance of the Contracts, taking care to make the advance in such a manner as may best insure the due execution of the work.

Read a Letter from Mr. Vanalstine to O. Phelps, requesting an allowance upon his Job at the Deep Cut in consequence of the ditch having been filled up.

Resolved, That the subject be taken into consideration and an equitable allowance be made as soon as the banks are put into the same state as Mr. Phelps.

November 3rd, 1827.

At a meeting of the Board held at St. Catharines,

Henry J. Boulton, Esq. Vice President.
George Keefer, and
John Clark, Esquires.

Directors.

The Minutes were read and approved.

Inquiry was ordered to be made respecting the Scow sunk at the Harbor (bought of Hovey & Ward) and reported accordingly.

The consideration of Mr. Proctor's Letter respecting his concerns, with the Company postponed, but

Ordered that Mr. Proctor be written to for either the originals or copies of all the documents he has relative to his title to lands in Montreal, and copies of all papers he has signed relating to the security offered to the Company, particularly Mr. Thompson's mortgage.

Ordered, That Mr. Davis be written to for a copy of the case submitted to Messrs. Sewell & Co., respecting Proctor's business.

Ordered, That Mr. Beach be written to to execute a Power of Attorney to transfer his Stock or remit the amount of his bond.
