In some cases the King us that a Lieutenant Governor, at a disis required by expressionactment to do tance of more than four thousand miles certain acts with the advice of the from his superiors, is so much more immaculate and infallible than his royal mastenant Governor is expressly required in ter, that he does not require the same councils which the constitution considers, and which an experiment of ages proves to be necessary of the King himself?

Event His Excellency admits that His Majesty should according to the constitution, be surrounded by advisers responsible to the country, and that the King must consult them in ALL the affairs of the kingdom. There is not an argument in supas the latter. Finally, the King is no more bound by that is not equally, if not more applicable

be conducted by the King, with the ad- is to this system that His Excellency has vice of known and responsible Council- avowed such an ardent and unalterable materially changed, it is no longer the ted power, for which he is virtually irres-British Constitution. This principle there-ponsible is not surprising; and more than fore has been established by the necessity of the case; and the same necessity, upon which it rests in the mother country exists principles of the British Constitution, has here.

Your committee will admit that this principle (in practice) has been hitherto disregarded in the government of this Province, and what sort of government have we had? In what condition has it put us? Let the records of Your Honorable House; the statements of Executive Councillors of different political opinions; the King's Instructions to Sir Francis Bond Head; and his own admissions, It has brought us, (according to answer. the instructions) to "an era" of "great difficulty and importance," and we find even Sir Francis Bond Hend addressing the people in the following terms: "The grievances of this Province Must be corrected-impartial justice must be administered—the PEOPLE have asked for ittheir Sovereign has ordained it-I am here to execute his gracious commands—delay will only increase impatience. Those, however, who have long lived upon agintation, already too clearly see their danger; and with surprising alacrity, they are now taking every possible measure to prevent jesty, during the last Session, which adme from rooting up the tree of abuse, because they have built and feathered their nests in its branches."

Without remarking upon his Excellency's style, the committee would observe that in the estimation of the Lieutenant Governor himself, the abuses of the government have become so extensive and deeply rooted, that agitators can actually live upon the exposure of them; although how he would have been prevented from rooting up this tree of abuse, by receiving the advice and assistance of the Council, the committee are at a loss to perceive.

It is to perpetuate and defend the system that has produced such effects that

lors, is not a rule or proposition laid down attachment. That a Licutenant Governin any statute, but is a principle that is an or should secretly countenance & cherish essential part of our constitution, and if a system, which leaves him entirely unthat part is destroyed, the constitution is checked in the exercise of almost unlimione Lieutenant Governor, no doubt, while professing to maintain amongst us the secretly adopted this unconstitutional system, because it extended his power and enubled him to indulge his arbitrary will; but that His Excellency, at the very moment he admits and expatiates upon the abuses and grievances which it has produced, should announce his determination to continue it, and should gravely declare that the people of this Province would be ruined if they attempted to secure to themselves "the very image and transcript of the British Constitution," and that such a Constitution " would be productive of the most victous effects," is indeed astonishing

The views of Your Honorable House on the right and necessity of a responsible Government, and of our Provincial administration being conducted on the principles of the British Constitution, have been more than once clearly and fully expressed, sometimes to His Majesty, and sometimes to the Lieutenant Governor; sometimes directly, and at others, indirectly, as reference to your Journals will amply shew; but in the address to His Madress is hereto appended, (marked H) this principle was again urged—and fur. ther, a distinct, but respectful intimation was also made, that the House would enforce their rights by the Constitutional method of withholding the supplies for the support of the Government.

The following extracts from the evidence of James Stuart, Esquire, late Attorney General of Lower Canada, before a committee of the House of Commons. 21st June, 1834, afford the opinion of an able lawyer, thoroughly conversant with Colonial Government:

1152 question-The Executive Council of late have tem that has produced such effects that practically had very little to do with the government. His Excellency exerts all the energies of of the Colony?—It cought to have a great deal more his mind, and all the power and influence of his high office and exalted station. It mischief in the Colony. permanent administration ?-- I consider it should be placed on the footing of the Privy Council in this country, and consulted by the Governor on all important occasions.

To the following question put by the same Committee in England, to Sir James Kempt, he gave the following

134 question-If there was no Executive Council and the Governor were left to govern without any such Council, would it, in your opinion, remove very much of the state of irritable feeling existing between this part of the Legislature and the King's Government in the Colony?—I have not given my attention sufficiently to this question to be able to answer it; but my impression is, that an Executive Council is necessary for the good government of a colony.

The Right Hon. E. G. Stanley, a member of the Imperial Parliament, and lately His Majesty's Principal Secretary of State for the Colonies, who also spent some time in this Province, thus expresses himself respecting the Executive Council, in a letter, addressed to Dr. W.W. Baldwin. (The autograph letter is among the records of your Hon. House.)

"I do, however, think that something might be done with great advantage, to give a really responsible character to the Executive Council, which at pres-"ent is a perfectly anomalous body, hardly recogniz-" ed by the Constitution, and effective chicaly as a " source of patronage."

Mr. Stanley also says-

"The remedy is not one of enactment but of prac-"zice and the constitutional mode is open to the people " of addressing for the removal of the advisers of the "Governor and refusing supplies, if necessary, to en-"force their wishes."

It will be observed that Mr. Stanley says "the remedy is not one of enactment but of practice," that is, the constitutional act is sufficient in enactments for every thing required; all that is necessary is that the provisions of the constitution should be honestly put in practice.

While His Excellency declares that the Executive Council have no responsibilities and are not recognized by the 31st Geo. 3 chap. 31, Sir John Calborne in a message to your Honorable House, on the 20th ed:-Feb'y, 1835, in terms almost directly contradicting the puerile views of his successor, states, "the responsibilities under which the Executive Council discharge their important and confidential duty, depend upon the principles of our Constitution and upon the law of the land.

1153 question-You consider it of utility to have a ceeding from Lieutenant Governor Sir Peregrine Maitland, recognizing in the fullest manner the possession, by the people in this province, of the British Constitution.

Your committee beg to give the following as a specimen: In his answer to John Hurston and others, in the Newcastle district, published in the official Gazette of March 2nd, 1826:—

" That I may rely on your steady and cordial sup-"port in maintaining that unrivalled constitution of "which the excellence has been proved by the exper-" ience of ages, and which those who can appreciate "it, as you do, will ever be found ready to vindicate "and defend."

Again in another reply of the same date:

"You set, gentlemen, a just value on your possess-" ion of a constitution the most perfect in the world. " and it is no small satisfaction to me to reflect, that, with the vivid recollection which you retain of its "blessings in the happy country you have left, your firm and loyal support will never be wanting." &c.

Your Committee would affirm, that the principles of our Constitution, as well as the law of the land, alike require their advice to be given "upon the affairs of the province."

Your committee have appended to their report, (see appendix marked I.) the address passed in the last session of the late parliament (with the yeas and nays) to His Majesty, against the interminable interference from Downing Street, in the management of our local affairs, which should be conducted by the Lieutenant Governor and the Executive Council in harmony with the Provincial Legislature; although the late parliament differed from the present in its views and policy, yet it was unanimous in the adoption of the These views are above remonstrance. corroborated by J. Stephen, Esquire, late counsel to the Colonial department, and now, it is said, Under Secretary of State for the same. In his examination by the Canada Committee of 1828, he was ask-

" Is it your opinion that upon all those questions, "complicated as they are with regard to the tenure " and transmission of property, the colonial legislature " with the advantage of their local knowledge, are " much more competent to decide than the British " Legislature?"

To which he answered:—

"I cannot suppose any man at all conversant with The public documents and records of " the subject, hesitating respecting the answer to that the Province abound with expressions pro- " question—except there be a well founded distrust of " the disposition of the colonial legislature to do right, "no plausible reason can, I think, be suggested for "taking this work out of their hands. They are incomparably better qualified for it than you can be-"What should we think of the Canadian Assembly passing acts for the improvement of the law of real property and conveyancing in this country! Yet I suppose they understand our system of tenures at " least as well as we do theirs."

Now it must be presumed that Mr. Stephen, whose views against the unconstitutional interference of the British Parliament with the appropriate duties of our local Legislature, are so liberal and en-lightened, would be equally opposed to any usurpation of the duties of the Executive Council, for assuredly resident gentlemen selected by His Excellency at pleasure for their talents, integrity, and public estimation, are "incomparably better qualified for it," than distant strangers with even the best intentions. It is enough for them in Downing street to attend to the matters reserved in the 31st Geo. 3d. respecting navigation and commerce.

These views of the sufficiency of our own institutions, and the expediency of making them subservient, as they were intended, to the purposes of our local concerns, (with the exception of those special matters expressly reserved by the 31st Geo. 3d, for the paramount authority of the parent state,) are confirmed by the evidence of the Right Honorable Edward Ellice, a member of the British House of Commons. In giving evidence before the committee of 1828, he was asked, "you have said that your application was referred to the consideration of the Executive Council; of whom does the Executive Council consist?" To which question he plaint." answered, "the Council consists of the Chief Justice and other persons, whose duty it is, to advise the Governor with respect to the administration of the country." The same distinguished person alluding to some difficulties he had experienced, in obtaining some change of tenure in property he holds in Canada, says, "it arose probably from a very general cause of difficulty in that country; a dread on the part of the local authorities to act upon their own responsibility—complaining of backwards and forwards from the governhope that they might at least agree upon called together, in which the local authorities have

the means of executing the provisions of the law."

This transatlantic system, popularly called Downing Street law, to distinguish it from the free and constitutional operation of our local government, is further condemned by the same statesman in the following illustrations collected from his evidence before the same committee.

Alluding to the imposition in Canada by the British Government of customs duties, he says:

"I am aware that the greatest possible objections exist in principle to their doing so, but I am also aware that in point of fact they have got over those objections, and by the Canada Trade Act, have imposed duties to an extent quite equal to the extent of the civil government of both Provinces, without consulting either of the Provincial Legislatures. The Canada Trade act for this purpose, had been passed three years before the arrangement with the Canada company.

Again.

"Cortainly the Canadians complain, with apparent reason, of some part of the conduct of the government; an English Receiver is appointed, insufficient securities being taken in England, the Assembly suggest the regulation of his office, and subsequently, I understand, bills were sent up in the terms of a bill passed in other Colonies for this purpose; they are told this is an encroachment on the prerogative of the Crown, and their bills are rejected. The Receiver had previously failed in debt to the public about £100,000, and when they say "as you made the appointment yourselves, took your securities in England, and rejected our advice, it is fair you should puy the defalcation," Govconstituents for it. - In the same manner they allege they have sent up bills for the regulation of the office of Sheriff, that these also were rejected, and two following Sheriff's have failed; the one a defaulter of Suitors' money to the extent of £27,000; and another for a loss amount. These are not theoretical, they are practical evils, and form just grounds of com-

Again. "The Governor was instructed to supply the want of an appropriation bill by his own warrants on the Receivers, to whom the Taxes are paid under the provisions of the " Canada Trade Act" but it would be difficult to find out by what law such instructions are sanctioned. This has been the course of proceeding from 1822 to 1828, and it is much to be deplored that government should have persevered so long in measures, which however much they may plead the excuse of pressing emergency in the first instance, were illegal and offensive to the rights and feelings of the people. If no remedy was obtainable in Canada an appeal should have been sooner made to Parliament, and that sore should not have been allowed to fester delective instructions from home; and till the English and French population have been althis oggravated by perpetual reference most brought into collision, and a wider separation between them in opinion on all matters of internal gov. ment to the Colonial Secretary, in the than checked, Assembly after Assembly have been

by a minority at no time exceeding ten, and soldom half that number, in a body of fifry representatives. And the committee must always recollect the continuance of these dissentions has inflamed trivial differonces on immaterial points at first into serious additional causes of difference and misunderstanding, which it is not easy now to foresee the means of allaying or removing.

" I wish to add that in any thing that may have fallen from me in the course of these examinations, I have not had the least intention of imputing blame to any persons connected with the Executive Government in either Province. I believe they have acted under instructions from this country, and that the difficulties they have had to contend with, and the discussions in which they have been involved with the Colonial Legislatures, were the inevitable consequences of a determination to persevere in the system of government I have described to the committee, and which could scarcely have been avoided while that system remain-And to the followed unreformed and unimproved." ing question, "Do you concoive it would be possible to form a representation upon the principle of admitting some of the great towns as independent bodies into a confederation, such as exists in the north of Germany?" To which he answered, "I'am afraid it is too late to attempt the introduction of new principles of that kind in America, You must either improve the system that exists on the model of our institutions at home, or copy from the simpler forms in practice in the United States. No other method will be congenial to the habits of the English or American inha-No other method will be conbitants of Canada?

The political condition of Lower Canadn, as above depicted by the Right Honorable Edward Ellice, is too applicable to

our own country:

"It is with grief," as a resolution of your Honorable House has expressed it, " the country has seen the improvident contract under which the Huron Tract of a million of acres of choice lands has been assumed to be given, at an almost nominal value, to a Company in London, while the annual instalments paid by them are expended by the Provincial Executive, without the consent of Parliament, and the large amount realized by the Company from sales at a very advanced price, are withdrawn from the Colony and transmitted to England. This improvident transaction, unsanctioned by any domestic enactment, ought to be held invalid, particularly as it was a transaction based in no degree upon the good of the Colony whose lands are thus wastefully assigned. The Charter and all the Statutes connected with it are a violation of the 18th Geo. 3rd, and our Constitutional Act."

The law passed by the British Government for the sale of our Clergy Reserves is a further illustration of the system of Government over us by a Lieutenant Governor in unchecked connexion with Downing Street. Under this law, enacted by the British Parliament without our knowledge or consent, more than £60,000 have been raised by the sale of the Clergy Reserves, abstracted from the country, and paid into the military chest, instead the purposes of its institution."

unwisely persevered in attempts to carry their measures of being applied to the purposes of education and internal improvement: In a subsequent part of the Report this subject will be again adverted to, but at present your committee simply mention the fact; and also, that within a short period, 57 Rectories have been erected and endowed. The British Act, it is presumed, inserted the condition "by and with the advice and consent of the Executive Council," as a security to the country against any abuso of the power it gave; but such a precaution is of no practical avail with an insufficient Executive Council, and it is plain, that the above mentioned outrage upon the whole community could not have occurred, had we enjoyed what is sought for and denied, (a well constituted Executive Council possessing the confidence of the country.)

Now it has been simply proposed adopting Mr. Ellice's views, to improve our systems here, on the model of the institutions in England, by proposing that the Executive Council shall advise the Lient. Governor on our affuirs as freely as His Majesty's Council advises the King; but the industrious classes are told by His Excellency that "the wish, if gratified, would be ruinous," and that the 31st Geo. 3rd, "has or-

dained no such ansurprites."

In giving an aggregate account of the opinion entertained upon the Constitutional duties of the Executive Council, by the most thinking men of all political parties; your committee, although desirous of abridging their report as much as possible, will not omit to notice a document from Lower Canada, which is headed a " Declaration of the causes which led to "the formation of the Constitutional Asso-"ciation of Quebec, and of the objects "for which it has been formed."—in which we meet with the following pertinent remarks:

"In every well regulated government it is essential that the Executive authority should be uided by the advice of able and well informed individuals, acting together, and in a body, by which sound discretion, uniformity, consistency and system are imparted to its measures. Among Colonial governments, which are generally administered by persons laboring under the disadvantages of a deficiency of local information, assistance of this nature is indispensable for the attainment of the ends of GOOD GOVERNMENT. This body of advisers ought to be found in the Executive Council of the Province, but its members no 100 few in number, and its composition too defective to answer. served that the Association contemplate by constitutional means "to obtain such a "composition of the Executive Council, "as may impart to it the efficiency and " weight which it ought to possess."

The above Quebec "Association" is not composed of the Reformers in Lower Canada, with whom Mr. Speaker Papineau's name is usually connected; (altho) the Reformers there entertain the same views,) but of gentlemen of wealth and influence, known by the name of constitutionalists or conservators, directly opposed to that party. It is therefore the testimony of persons avowedly determined to sustain the constitution against any of the modifications held by the other party to be necessary and expedient. Your committee would here subjoin the following all important and liberal views of policy, expressed by the Canada Committee of the House of Commons in the year 1828, arising from a thorough understanding of the state and wants of these colonies, set forth in the voluminous and unquestionable testimony of persons best conversant with the subjects of the committee's inquiry:

"Your committee lament that the late period of the session in which they were appointed has rendered a minute investigation into all parts of the subject submitted to their inquiry impossible. They believe too, that if the Legislative Assemblies, and the Executive Government of Canada, be put on a right footing,, that means will be found within the Province of remedying all minor grievances. They are disposed nevertheless to recommend that the prayer of the Lower Canadians for permission to appoint an agent in the same manner as agents are appointed by other Colonies which possess local Legislatures, should be granted, and that a similar privilege should be extended to Upper Canada, if that colony should desire it."

"At an early period of their investigation, your committee perceived that their attention must be directed to two distinct branches of inquiry: 1st. To what degree the embarrassments and discontents which have long prevailed in the Canadas, have arisen from defects in the system of laws and the Constitutions established in these Colonics .- 2dly. How far those evils were to be attributed to the manner in which the

existing system has been administered."

"Your committee have clearly expressed their opinion that serious defects were to be found in that sysdem, and have ventured to suggest several alterations that have appeared to them to be necessary or convenient. They also fully admit that from these, as well as from other circumstances, the task of government in these Colonies, (and especially in the Lower Province) has not been an easy one; but they feel it a duty to express their opinion that it is to the second of

Under the foregoing view it will be ob- contents are in a great measure to be traced. They are most anxious to record their complete conviction that neither the suggestions they have presumed to make, nor any other in the laws and Constitutions of the Canadas will be attended with the desired effect, unless un impartial, conciliatory, and constitutional system of Government be observed in these loyal and important colonics."

The remedy here proposed as an antidote to the evils existing in the government of the Canadas, cmanates from a spirit breathing forth the purest patriotism, the result of a thorough understanding of all the bearings of the subject matter of inquiry, and is, at once, an appeal to the best feelings of our nature. Had there existed any defects in the system of our laws & constitution, the committee would at once have recommended an amendment or revision of them; but aware that nothing was wanting but an open, ingenuous and equitable administration of those statutes, they are brought to the only plain and obvious conclusion that could be attained.

All Colonial ministers since the date of that report have professed an intention to be guided by its recommendations; the famous despatch of Lord Goderich of 8th Nov. 1832, is professedly based upon it, and His present Excellency has it pointed out to him as one of his text books.

It is to your committee passing strange, that notwithstanding the above Report is held forth to us, sanctioned by such authority, a temerity of conduct, bordering on recklessness of consequences, should be allowed by its noble possessor, to give cause for suspicion and distrust towards the intentions of His Majesty's Government. Had his Excellency, instead of the course he has been pleased to pursue, been implicitly guided by the recommendations contained in the above extract, he had then established confidence and an assurance of equitable administration: but when, instead of which, he has taunted the Province upon its infant condition, and appears in the illustrations he has given to have had in his mind's eye, the fable of the young frog and the ox—what assurance have we, that governed in the "manner" we are, we shall ever arise from our present degraded condition.

And your committee are led to the conclusion from a careful observation of the causes alluded to these embarrassments and dis-things, that the policy apparently intended

Government and that of Rehoboam, as recorded in the 12th chapter of the first persons ready to fill their places, and unbook of Kings, to be very similar.

The Executive Council, therefore, are established by law under constitutional responsibilities to advise "upon the affairs of the province." and to be assisting to the Lieutenant Governor "in all affairs relating to the King's service;" and in favor of this proposition we have in whole or in part the concurrent testimony, against His Excellency, of the above overwhelming authorities, viz:

1st. The Constitutional Act.

2nd. Various British and Provincial Statutes, referring to and recognizing the Executive Council of the Province "appointed for the affairs of the Province."

3rd. Governor Simcoe and succeeding Governors.

4th. The Royal Instructions.
5th. The Privy Councillors' Oath.

6th. The general resemblance between his Majesty's Privy Council and the Executive Council of this Province.

7th. The nature and genius of our Government and the general principles of the Constitution.

8th. The House of Assembly.

9th. James Stuart, Esquire. 10th. Sir James Kempt.

11th. The Right Hon. Lord Stanley.

12th. His Excellency Sir P. Muitland. 13th. His Excellency Sir J. Colborne.

14th. The late Executive Councillors.

15th. The Report of the Canada Committee of 1828.

16th. The Right Honorable Edward Ellice. 17th. T. Stephen, Esq: late Counsel to the Colonial Office.

18th. The Quebec Association.

19th. The absence of any express provision of law or authority forbidding it.

20th. The universal admission of all classes, parties, creeds and orders from 1792, until the arrival amongst us of Sir F. B. Head.

Bist. Lieutenant Governor Hunter.

22nd. The debates in the British Parliament on the passage of the 31st of the King.

In reference to the objection of His Excellency that "it must be evident to every well constituted mind, that in an infant state of society, it would be impossible practically to secure a sufficient number of and Agents here and in England to conimpartial persons to effect a change of Ministry as often as it might be necessary for the interests of the people to do so," (by the above it will be observed that His Excellency, as in many other instances, made to a Minister in Downing Street, has abandoned the constitutional object, who is the patron of the Governor accuand is endeavouring to sustain his posi-sed, and besides the Governor has nutions on the principle of expediency.) merous friends on the spot to exercise Your committee would state that on gene- every influence and interest in his behalf.

to be pursued by the present head of our could only require the removal of a Council when there were other and better til such other and better persons could be found, it is evident neither the people nor their interests would require or look for a change.

> The moral and intellectual resources of this country are suited to its wants, and, notwithstanding His Excellency's sneers, would loose nothing by a comparison with any other country, and in the opinion of your committee it would be even easier to form Councils from among the inhabitants of this Province adequate to its exigencies, than in England itself for the affairs of the empire. A really great man in this country would soon find the means to organize our institutions for the practical purpose of good government and peace of society.

> Your committee deny the pretended allsufficiency of the Governor's liability to impeachment for mismanagement of our affairs, for the following reasons:

> 1st. Because although such impeachment might be a punishment for mal-administration after it was done, yet it affords no daily check or ground against it by means of advice or caution, and it seems to your committee that the impeachment should at most be only resorted to after a Governor had acted wrong with every local means afforded him to do what was right.

> 2nd. Because the impeachment or complaint must be made by the injured person at a great distance, requiring a delay, expense and watchfulness; out of the reach of the power or means of the sufferer, who (if belonging to the industrious classes) might make out in writing a very informal or insufficient case, however clear his merits, or be unable to retain Counsel duct his suit. Limitation to such a remedy would practically be a denial of justice.

3rd. Becouse the complaint would be ral principles the interests of the people The weight of this reason is increased by

been done from corrupt motives. Even were impeached, and all their estates if a presumptive case could be made out confiscated, it would not repair the inagainst a Governor, it would be contended juries of the most notorious nature, bethat a clear and positive one must be es- sides thousands of just complaints murtablished before the consequences of im- mered only in secret, and either endured penchment could be visited on the accused with patience, because the remedy propoand how very many Acts of misgovern-sed would be worse than the injury, or ment their are, in their nature vexations because, what is notoriously true, to preand injurious, against which it would be for a complaint, however just, against a difficult to fix the charge of corrupt motive, while it was palliated, evaded or explained away as an error of Judgment, the deceptive assurances of others, a misapprehension of circumstances, a mistaken every favourable opportunity, in various policy or the like. For instance, it would be in vain to proceed against the Executive authorities for the erection (as hereinafter mentioned, of 57 rectories, and certain corrupt exchanges of lands, although opposed to the well known sentiments and interest of a vast majority of the Religious community. It would be equally vain to attempt to institute such proceedings for many appointments to office, as Surveyor General, Colonels of Militin, the Commissioners of the Courts of It. would Requests, and other offices. therefore obviously place the country in a desperate condition if the only means of PREVENTING worong being done was founded on an institution of an impeachment for it after it was done, before a patron of wrong doer, 4000 miles off, defended by a person intrenched in power here and sustained at home by family connections, and the preservation of what is callen the colonial system. The House of Assembly of Lower Canada instituted a complaint of this nature against Lord Aylmer, in a most "every error he commits, and that he is solemn manner and with great unanmity, for most arbitrary and unconstitutional misgovernment, but it only ended in his promotion to a higher post of honor,—altho' therefore an impeachment might be resorted to in extreme cases, yet it by no means supercedes the necessity of all local and constitutional checks, calculated to prevent cause for so difficult, painful and undesirable a course. This precaution against the occurrence of evil instead of merely contriving how it can be punished by impeachment 1000 miles off, is the more | Colonial Ministers. that there might be needed from the fact that this impeachment would yield no redress to the persons | could be conducted to a conclusion—and

the difficulty of proving any act to have injuring them. If all our local Governors Governor insures a black mark against his name, as a troublesome, a factions, or undeserving man, whose future hopes are blasted, and his oppressions multiplied at ways, that clude all proof and conviction. What could be done to redeem the injustice against Gourlay, Willis, the late Rohert Randal, Francis Collins, and others? And if an unsufficient, blustering pretender to learning should be made a Judge, and an innocent person be thereby convicted and executed, he could not by impeachment be restored to life.

Your committee therefore desire again to reiterate their conviction that this alleged liability to impeachment for misgovernment, was never intended, and ought not to supply the place of an efficient state of these institutions, wisely provided by law, not to punish, but to prevent wrong; a course as desirable for the Parent State as for the Colony; and although His Excellency has been pleased to state to those citizens in answer to their address, his unwillingness to be deprived of "the only " consolation which supports any honest " man in an ardnous duty, viz:—the re-"flection that he is ready to alone for "subject to arraignment if he offends;" yet this consideration either as a motive or a remedy, is so false in morals and so puerile in political affairs, as not to need further commentary. No better guard against both corrupt and unintentional misgovernment can be devised with our present Constitution than an efficient Executive Council; composed of persons of established character, to advise the Lieutenant Governor in public affairs.

4th. Because there are such change of half a dozen in succession before a suitinjured, even if it punished the person the justice done by one Minister is often. er Canada, Mr. Gale, who gave such evi- position were not candidly submitted to dence before of 1828, as to oblige the Right Honorable Mr. Spring Rice, to pronounce him keen bargain and for his boasted adroitness unfit for any office of trust, was appointed a Judge by Governor General Aylmer, whose active partizan he had been.

When the news of this appointment reached England in the Autumn of 1834, Mr. Rice had become Colonial Secretary, who addressed a despatch to Lord Aylmer saying he could not confirm Mr. Gale's ap-Mr. Rice was soon succeedpointment. ed by Lord Aberdeen, and therefore Lord Aylmer disregarded the commands of Ex-Minister Rice, and the known sentiments of the people and their representatives, procured from the successor of Mr. Rice, a confirmation of Mr. Gale's appointment, who is still on the Lower Canada Bench, although Mr. Spring Rice on the 9th March, 1834, being again in power, in a speech in the House of Commons reiterated the denunciation of Mr. Gale station.

Your Committee find the same doing by one Minister and undoing by another in the affairs of our own Province, which is unhappily migoverned by the same policy, under the same Constitutional Act-For instance, the late Attorney and Solicitor Generals were dismissed from office according to Lord Goderich's Despatch because they opposed the avowed policy of His Majesty's Government, in making certain concessions to the wants and wishes of on us. the people,, nor did His Lordship seem at all to notice the personal indignity they had fesses to be responsible to Downing Street audaciously offered to himself even as a Minister of the Crown-but no sooner Stanley, than the decision of the former, "have to bear another person's blame" in favor of the rights and liberties of the office, to the great dissatisfaction of the Your committee can understand sion there.

5th. Because, when in the year 1881, His beyond their comprehension. Majesty suggested a further provision for required to be made, for seven years, or for guage used by Simcoe respecting it. In

undone by another. For instance, in Low- the life of the King, the terms of the prothe Canada Committee the House of Assembly, but were suppressed, for the purpose of securing a in managing it, His late Excellency was officially commended. This undue and impolitic concealment so unworthy a great and magnanimous Government, was practised with the aid of the executive influence to carry a measure injurious to the constitutional liberties of the people; but the uselessness of any complaint against a Government for such unworthy policy is apparent, when we see, as in this case, that such liberal instructions are violated, and the mischief accomplished with impunity, although it merits disgrace.

Your committee cannot therefore regard as satisfactory our mere nominal right to appeals to Downing Street, where the justest decisions in favor of our rights by one Minister, are with sceming indifference and impunity reversed by another.

6th. Because the pretended responsibilas an improper person to occupy that ity to Downing Street has been in full operation for nearly half a century, and we have therefore against its sufficiency the uniform testimony afforded by our misgovernment during nearly the whole of that period. By this system we have been stript of the public lands and resources, and reduced to our present condition-and having thus suffered in the past we cannot look for better in the future, if we submit to a continuance of the same system as has brought such a visitation up-

7th. Because altho' his Excellency profor the Executive Council as well as for himself, yet it is, according to His Excelwas Lord Goderich succeeded by Lord lency, "unreasonable that one manshould

The professed responsibility of His Expeople, was by the latter cancelled, and cellency for the acts of the Council, in case the Solicitor General put back again into of default on their part is novel indeed. country, and the Attorney General sent enough how the adviser becomes responas Chief Justice to Newfoundland to sible for the acts of the advised, but how create new scenes of trouble and dissen- the actor can become responsible for the advice on which the Act was founded is

England they have a King.—In Canada vise;—he further states that, " this is not stitute a Legislative Council created by every well constituted mind" (on the printhe King.—In England they have a House ciple of a responsible ministry in England) Canada we have a House of Assembly his office, for nothing is more clear, than elected by the people. In England the that he does not possess the confidence of King has a Privy Council to advise him the people's representatives. upon the affairs of the empire. In Canada the Province.

This is emphatically the "very image and transcript of the British Constitution." But it becomes a mutilated constitution, makes it in his own language "mute," " defenceless," " irresponsible," sworn to be " dumb."—That the King, Lords, and Commons, and the Cabinet Council perdeny-for instance, the Parliament of are used; in sec. 45 the words "through-Great Britain legislate for the empire and out your government" are used; in section for the regulation of trade and commerce, 92, speaking of both provinces, the words &c. with other nations, and the Cabinet "their respective governments," are used; Council advise the King relating to the section 63 is as follows: "and you are upnegociations going on abroad as well as "on all occasions to send to us by one of for the welfare of the local affairs of the " our principal Secretaries of state, a parkingdom, and the appointment of certain "ticular account of all your proceedings high and important offices, while in Cana- " and of the condition of affairs within your da the legislative duties of the parliament "government." are more of a local nature, and so with the matters to be advised, and consulted by tionary power in the administration of the the Executive Council, it must be clear, affairs of the Province, for if nothing was that it no more follows, because the Exe- to be done but what was contained in incutive Council are not to be advised on structions sent out from home, there would precisely the same matters that pass under be no use of transmitting a particular acthe revision of the Cabinet Council, that count of prooceedings, as they would know they are not to advise at all, than it fol for months before they could be performed; lows, that the legislature here are not to but the 59th section is quite conclusive on legislate on any matter because they are the point, and goes clearly to shew that not allowed to legislate on all, or precise- the Lieutenant Governor is something ly the same matters that are considered in more than a more minister, and which the British Parliament.

allows, that "if the Lieutenant Governor he did quote in answer to the Council; by stood in the place of the Sovereign," an it then His Excellency, with the advice of Executive Council or some such body the Executive Council, may take, order, do &

they have his representative.—In England the case," but that "the Lieutenant Go-they have a House of Lords, created by vernor is, therefore, the responsible minthe King .- In Canada we have as a sub- ister of the colony, "it must be evident to of Commons elected by the people, in that he ought, ere, this, to have retired from

The responsible minister in England, he has an Executive Council to advise him would be disgraced by attempting to conand his representative upon the affairs of tinue in office, for one single day, after losing the confidence of the House of Commons, so if he be merely a minister, he does not do as other ministers do; but it is beyond contradiction that he is someand a sorry one indeed, when Sir Francis thing more than a minister. Who ever Head obliterates the Executive Council, or heard of a minister in England doing and performing the acts that the Lieutenant Governor is authorised to do and perform here? Both by the 31st of the King and the Royal Instructions. By reform certain acts in England, that are not forence to the instructions it will be observauthorised to be done by the Lieutenant ed that the government of the province is Governor, Legislative Council and House spoken of as the government under the Lienof Assembly, and the Executive Council tenant Governor no less that five times: in of the Province, your committee do not section 9, the words "in your Government,"

The above most surely supposes discreclause ought in common fairness to have It will be observed that His Excellency been quoted by His Excellency with those would be evidently necessary and should perform all such matters and things as are be appointed," with whom he should add for the peace, welfare and prosperity of

the country; in short, may even DECLARE | The objection, therefore, is not made so present therein."

It will be observed that no Minister is even authorised to do what His Excellency can do. He calls together the Parliament and opens and closes it, with a most odium or difficulty. gracious speech from the throne; -he prorogues or dissolves Parliament; -he gives the royal assent to bills, by which they become laws ;—he appoints to and dismisses from various offices—no petition or remonstrance is received and acted upon by the King, (not even from the House of Assembly) except transmitted through him; he may even declare and commence War.

Your committee will not believe that any one possessing "a well constituted mind" will deny that he stands in need of the best advice possible to be obtained, to enable him "impartially" to perform all those duties, & which the constitution has wisely provided.

It was recommended, as a remedy for prevailing and increasing grievances, that the Executive Council should be allowed to advise the Lieutenant Governor upon public affairs before he acted on them; and this might be hoped to be a remedy, because if good advice were given, it would (it must be presumed) be adopted; and if bad advice were given, it would be rejected or corrected. This doctrine is pronounced by his Excellency to be so unconstitutional, vicious, and theoretical, as to prevent his relaining the late Council in his confidence, unless they retired from such principles. Your committee in giving a frank and free report upon this important question are obliged to express their belief, that his Excellency was not so much shocked at the doctrine as he was averse to its practical bearing against his own arbitrary pleasure, and they have without it or to confer dignity on his pro-

1. Because His Excellency compares his late Council to "a sterling fund upon

and commence wan, it is as follows: "if much against having councillors, as against any thing shall happen which may be of taking their counsel till driven by embaradvantage or security to our Province un rassment to do so; of which embarrassment DER YOUR GOVERNMENT, which is not here he claims to be the sole judge, although contained (or by your commission provided for,) We do hereby allow unto you, ent and unreasonable, that His Excellency with the ADVICE and CONSENT of our should pursue his own unadvised pleasure said Executive Council, to take order for the in every thing in government that is gracious, acceptable and popular, and only bring his Executive Council into the field whenever the pursuit of such unadvised pleasure has produced embarrassment, Charlet Miller

2nd. Because the Lieutenant Governor admits that "to enable him to perform the " arduous duties of his office the constitu-"tion has wisely provided him with an Exccutive Council, competent to supply "lim with that local knowledge in which "he may be deficient, and to whom he "may apply for council or advice." Thus he admits the wisdom of the institution, and the purposes for which it was provided; but he avowedly wishes to make an experiment (at the expense of the country) of the extent to which he can carry on his government, without their aid.

3rd. Because he admits "the advantage of such a Council to a Lieutenant Gov-"ernor is so self-evident, that he must be "weak, and solf-sufficient, indeed, who does not continually have recourse to it."

Thus the advantage is fully admitted, but his obvious repugnance is against availing himself, of that advantage oftener than he may please, and with his late Council for the three weeks they were in office he did not please to do it at all. ... He admits the advantage of such help, but he repels the proposition to receive it before cmbarrassment requires it in when it might be too late to remedy the evil

4th. Because heladmits that the Executive Council strengthens this midgment.— But he betrays repugnance against the proposition to estrengthen his judgment when hichappens to think it strong enough come to that conclusion for the following ceedings when he thinks them dignified reasons:— But he wishes the enough without it But be wishes the strength or dignity to be reserved until "embarrassment requires it in more

which he can constitutionally draw when 5th: Because he states that the Execu-ever embarrassment requires it." twe Council should constitutionally "serve

him (the Lieutenant Governor) not them

(the people.)

being served by them in the public affairs until he thinks 'embarrassment requires it."

6th. Because he had promised his late Council " to treat them with implicit con-"fidence."

But his repugnance is against it being so implicit as to be received upon public affairs, before "embarrassment requires it."

the willing approval by the late Council of the very first suggestion he made to them, namely: "that no important business "should be commenced in Council until "they, as well as the Lieutenant Governor, "had become mutually acquainted with "their respective duties." Thus important business, it is admitted, was to be commenced, but the complaint is that it was commenced too soon, viz: before "embarrassment requires it."

3th. Because in his answer to the citizens he says respecting the Executive Council, "I shall consult them as unreservedly as I had promised to consult those

who have just resigned."

Thus it appears he had promised to consult them unreservedly; but he claims the reservation to consult them only at his pleasure, viz: when "cmbarrassment requires it."

9th. Because His Excellency asks the citizens, "why then should my Council, "whose valuable advice (if it were not "forced upon me) I should be most anxions to receive, be required to demand " of me my responsibility?" Thus it appears that the objection is not against a Council, but against their advice, being "forced upon him" when he thinks he "in the Constitutional Act, they were evidently intended needs it not, az: before "embarrass- "to have been inserted." ment requires it."

From all which your Committee are obliged to report their belief that His Ex- assumed by the late Council in their reprecellency was not so much shocked at the sentation is neither candid nor warranted doctrine of the date Council as the was by facts. averse to its practical bearing against his own whadvised arbitrary pleasure to: draw upon their sterling fund only when "em out reference to the less desirable but barrassment requires it."

"would be evidently unjust towards him "that he should be liable to impeachment But the repugnance betrayed is against " for any acts but his own." But in the representation of the late Council, furnished your Honorable House by His Excellency, there is nothing which places things on such a foundation. They merely proposed to give advice on public affairs preparatory to His Excellency's discretionary action upon those affairs. The acts of His Excellency would not be the less his own, because he received good advice before acting; nor would he under such advice, 7th. Because His Excellency mentions be less liable to impeachment, while he certainly would be less likely to deserve or

Your committee regret to notice in His Excellency's answer to the City Corporation, that he charges them with begging leave to name for him other individuals for the station, (the Executive Council) because when so exalted a public functionary as the Representative of His Most Gracious Majesty is betrayed into mis-quotations or mis-representations, manifestly not justified by the document from which they are professed to be taken with candor and truth, it is calculated to impair the weight and dignity of the high station and induce by its permicious example a laxity, on such subject, in the public morals.

For it is plain the City Council in their address (in the appendix marked D) name no individuals, but leave his Excellency in the free exercise of the Royal Prerogative to select any suitable Councillors from the

Province at large.

In the same public document His Excellency further remarks-

"The members of the late Council rost their claims very "nearly on the following grounds: that the responsibility "they assume being a popular opinion daily increasing, is " consequently the law of the land; and secondly, that "though the powers they require are no where expressed

Your committee are obliged to report that the above extract given as the grounds

The late Council plainly deduce their duties from the 31st Geo. 3d, even withnot less lorcible principles of constitutional His Excellency in his reply objects to the right and civil liberty. How then can views of the late Council, because "it they be truly said to make the law of the

land the consequence of popular opinion parrangement, a declaration of an intention actually inserted:

In the answer to the citizens of Toronto, his Excellency save-"with respect to my late Council, I regret, quite as "much as you can do, their resignation; but, before they "took the oath of secrecy (which appears to my judgment "to be an oath of non-responsibility to the people) I ad-"dressed to them a note which clearly forowarned them, "as follows :- I shall rely on your giving me your unbiased " opinion on all subjects respecting which I may feel it advise. " able to require it."

Your Committee here notice,-1st, an alleged regret-2nd, an alledged arrange. ment.

It seems impossible to reconcile this alleged regret on the part of His Excellency at their resignation, with his own act obliging them to resign.

The late Council were called upon "to retire from his confidence" if they did not " retire from their principles"—but they could not relire from their principles and were therefore obliged to retire from his confidence.

To present to the late Council a dishonorable condition upon which to remain in the King's service, and then allege regret, at their declining that condition by tendering their resignation, obliges your committee to report their belief either that His Excellency really felt no such regret as is alleged, or that he did not feel the repugnance honorably expressed by Mr. Baldwin, to the abandonment of principles for the sake of place.

2nd. There is an alleged arrangement-Now Your Committee cannot but notice a want of candor in this matter. The terms "on all subjects respecting which I may feel it advisable to require it" (advice) are obviously indefinite, and could not, your Committee think have been anticipated by

any to mean "no advice at all."

of His "implicit confidence."

or that their powers were only intended to advise with them freely, "implicit conto be inserted in the statute, when they fidence" cannot be manifested by placing quote the statute in which the powers are none; and when His Excellency's letter to Mr. Baldwin was publicly read by a member in both houses of Parliament, no one construed it to mean an arrangement not to consult the Council at all; instead therefore of admitting that the late Council, as alleged by His Excellency, "altogether in a body disputed the arrangement;" Your Committee consider that they had rather cause to complain that the arrangement was broken by him: for the detention of them three weeks unconsulted in the Council in the most urgent season of business was a palpable violation of the promise to repose "implicit confidence."

In his reply to the same address he adds, "I shall consult them (the new Council) "as UNRESERVEDLY as I had promised "to consult those who have just resigned." This language shews that "he had promised unreservedly to consult his late Council," and such the public universally understood to be the case. But as His Excellency accepted the services of the late Council and "with pleasure" promised to give them his "implicit confidence" and to "consult them unreservedly." committee notice with pain the inconsistency of such declarations with the attempt to criminate the late Council by misrepresenting them as having first voluntarily entered into an opposite arrangement and then altogether in a body disputed it.

Your Committee addressed a letter on the subject to Mr. Robert Baldwin and Dr. Rolph, both of whom they have also examined. (Sec. Appendix marked T.)

From the letter and evidence Your Committee collect, that no "such arrangement," as is alleged by His Excellency to have been "since disputed," ever was made If His Excellency intended the above ("to give advice only when required") as a mental reservation enabling him to that no such "forewatning" was given them convert his Council into cyphers or mutes, or professed to be given, or expressed or he should not have coupled with it expres- implied, but on the contrary, that the Counsions implying the reverse; for in the let-cillors were told that His Excellency sdoors ter from which this alleged arrangement were open for them to give advice on any is deduced. His Excellency assures them subject at any time; that the letter now construed by His Excellency into such a But it appears to Your Committee that limitation, was not the same in words or the circumstance of adding three new substance as the one arranged and pro-Councillors with the assurance to them of mised to be given; that difficult is dated his "implicit confidence," amounted to an the day before the Councillors were sworn in

it was not delivered till afterwards, when the House of Lords in the discussion on the changed features of the letter appear to passage of the Act 31st Geo. 3. as a reply have struck with surprise the persons to to the remarks of His Excellency, and whom it was addressed, and which letter from motives of delicacy explained in the evidence, was not returned as its disingenuous application was not anticipated.

That the proposition out of which the letter grew was not made till the negociation was over, and the three new Councillors attended by previous desire of His Excellency to receive a formal united invitation, and that it then originated not with His Ex-

cellency but with Mr. Baldwin.

The statement therefore of His Excellenoy, appears in the same discreditable light as the discrepancy between His denial to Your Honorable House of any agreement between any members of the present Council respecting the contingent administration of the government in case of the Lieutenant Governor's death or absence from the Province, and the admission of the facts so denied by two of His present Councillors, Robert Baldwin Sullivan, Esq., and the Honorable Captain Baldwin.

Indeed, it is, if possible, worse, because the mistake is intended to criminate the late Council after their dismissal.

Your Committee feel bound to notice one other of His Excellency's reasons by which he attempts to shew that we would be ruined if we had the image and transcript of the British Constitution imparted to us. His Excellency, when replying to the citizens of Toronto, asks with apparent triumph, "supposing it were to be " argued that four-fifths of the members " of Your House of Assembly ought im-"mediately to be dismissed because in "proportion to the population of Great "Britain and Ireland there exists five "times as many members here as in the " English House of Commons, would you "not think it very irrational that this noble "but thinly peopled colony should be made "the exact image and transcript of the "British Constitution, merely because "Colonel Simcoe happened to use these "words, &c.

Without remarking on the strange idea of His Excellency making the people of a colony into a Constitution, Your Committee beg merely to give an extract from zens. he expresses his estimate, of the

the application.

"They did not mean to give Canada exactly the "same Constitution, as, for instance, five hundred "and fifty-eight representatives. That was impossi-"ble in the nature of things; but their great object had been to adhere as nearly as possible to the pu-"rity and principles of the English Constitution in "every part of the bill; \*\*\*\*\* His Lordship (also) "said, it was undoubtedly a mistake to suppose that " any government was free only as it approached to. " democratic principles. Absolute monarchy, absolute " aristocracy, absolute democracy, had, in the histo-"ry of mankind, been tried in the scale of expe-"rience, and had been found wanting. Our own "Constitution, which was compounded of these "three, was the first in the world, and the envy of "every surrounding nation. It was for that reason "that they were now about to communicate the " blessings of the English Constitution to the subjects " of Canada because they were fully convinced that "it was the best in the world. The Legislature of "Canada consisted of three parts, representing that " of this country."

It is said in the reply that " in government, impar-"tiality is better than knowledge, and it must be evi-"dent to every well constituted mind that in an infantstate of society it would be impossible practically "to secure a sufficient number of impartial persons "to effect a change of ministry, as often as it might: "be necessary for the interests of the people to do.

Upon the truth of this maxim "in Government impartiality is better than knowledge." Your committee forbear to offer any extended comment, but they cannot conceal their disgust at the offensive manner in which it is applied against the moral character of the people of this Prov-He appears to your committee to have assumed the government with most unhappy prejudices against the country; for he alleges certainly with very limited means of personal observation, that there is a lack of "impartial persons" to form a new Council on any occasional change; and your committee lament to hear that His Excellency is surrounded by, and gives his credulous ear to irresponsible and unworthy advisers, who poison his mind against the moral and intellectual merits of the people he is appointed to govern.

In his reply to the address of the citithe remarks of Lord Grenville in the knowledge and taste of the public by con-

descending to " plainer and more homely " the incumbent of a parsonage or recto-language," (and both plain and homely " ry in England," and the next clause of highest official authority that this is little clesiastical jurisdiction." better than a country of rogues and fools:impartiality to aid the good management dive townships in which they are now by of our own local and internal affairs.— these instruments constituted. Should the history of this Colony be ever collected from the secret despatches in Downing Street (of which we have had frequent specimens) posterity will form a very erroneous and unjust estimate of the may expect that the present parsonages talent and virtues in the country-low, indeed are we placed in the scale of human the number of these parsonage will be nature.

While engaged in preparing this report the attention of the Committee has been suddenly called to the documents referred to them on the 4th of April respecting the erection and endowment of parsonages throughout the Province and the exchanges of different portions of the Clergy Reserves for other property (which are hereto appended marked P.)

ment of the Church of England" have mour. been constituted in this Province by the the Clergy Reserves, in each case varying in exchange 1892 acres, of which 1396 in general from 400 to 800 acres of high-are situate in the township of London, and ly valuable land chiefly in old townships the remainder in Nissouri. and in some cases within towns.

ernment, and they are, according to the Walpole. thirty-ninth clause of the Constitutional Act The Rev "the performance of the same duties as acres.

enough it is); but besides thus reflecting the act provides for the exercise of "spiupon Canadian understandings, His Excellency further impeaches their good morals by declaring there are not "impartial canons of the Church of England;" unpersons" enough in the country to enable der which clause, of course, ecclesiastical him to seek adequate changes in the Coun- Courts will be established, as no others It thus goes to England with the can fully exercise such "spiritual and ec-

Upou an examination of the instruments In Canada His Excellency with the temerity of a stranger and the assurance of an are constituted, it appears that power is old inhabitant, presumes to testify that reserved to the government of "hereafter there is not a sufficient number with erecting and constituting one or more parheads and hearts yielding knowledge of sonages or rectories" within the respec-

According to the act, the government may endow these parsonages " from time to time." So that, if the bold experiment succeeds, which is now attempted, we will receive further endowments, and that multiplied amongst us, beyond all present calculation.

It further appears that different clergymen of the Church of England have received from the government in exchange for their own private property, large quantities of the Clergy Reserves; for instance the Rev. James Coglan surrenders 26 acres of land in the township of Hope with a messuage or dwelling house, and From these documents it appears that receives in exchange 1020 acres, 400 of within the past year fifty-seven rectories or which are in the township of Hope, 300 parsonages "according to the establish- in Cavan, 100 in Emily, and 220 in Sey-

The Rev. Francis Evans surrenders 50 To these rectories or parsonages min- acres of a Clergy Reserve and 50 acres isters have been or are to be presented, as in Woodhouse, without any house or are their successors in future by the gov- building, and he receives 800 acres in

The Rev. Philip Mayerhoffer surrenders to hold and enjoy the same, and all the rear part of Lot No. 17 in the fifth rights, profits and emoluments thereunto belonging or granted as fully and amply, and in the same manner, and on the ply, and in the same manner, and on the receives Lot No. 19 in same concession of Markham, containing 70 acres, without any house or building, and the receives Lot No. 19 in same concession of Markham, containing 200 "same terms and conditions, and liable to sion of the same township containing 200

Rear Admiral VanSittert has been permitted to share in these good things for the benefit of the church, and has received in lots of land in Blandford and 26 acres, in Oxford East 3690 acres of valuable land!

The land thus conveyed to them in exchange becomes their own property and

will not belong to their successors.

And all these endowments and all these grants in exchange for messuages and lots of land are in addition to the large regular allowance that is annually paid to them by the Government, out of public monies of the Province without the knowledge or consent of the people and their represen-interest were distinguished for wisdom tatives.

Thus in one year, in contempt of all our humble remonstrances and earnest protestations against Church Establishments and Government patronage of Religious bodies fifty-seven government parsons have been established in this Province and endowed out of the Clergy Reserves; established and endowed under the Great Seal to give it pecular solemnity, and, if pos-surprising. sible, to make it irrevocable.

a new source of political influence and power, and not only established a State Church amongst us, with "spiritual and ecclesiastical jurisdiction and authority." but a State Church, of which the Government is the universal and sole patron, haying the exclusive right of making the pre-

of these different parsonages.

practices and proceedings of the Govern-

ment are calculated to excite.

Yearafter year have the people of this Province and their Representatives been straining every nerve to procure the appropriation of the Clergy Reserves to some useful public purposes, in which all His Majesty's subjects might impartially and equally participate; year after year, have they solemnly and indignantly protes- 1832, that he had His Majesty's commands ed against the establishment of any State to make to it the following communica-Church in this Province. The people from tion:—

All comment upon such transactions is and again have petitioned the Provincial superfluous. But most astonishing of all Parliament, the King and the Imperial Parliament, on the subject. Tribilitängada

These petitions proceeded not only from the people indiscriminately and repeatedexchange for a house, two acres and two ly, but also from different public bodies. The explicit and distinct representation on this subject of the Methodist Conference in 1831, in their address to His Majesty cannot be forgotten; inasmucli as it, produced a most offensive reply from Sir John Colborne, which caused much excitement & dissatisfaction at the time, and inasmuch as the observations contained in the address on the subjects of applying public funds to the support of Religious bodies or teachers, and of appropriating the Clergy Reserves to purposes of general and truth.

And so late as 1832 petitions were transmitted to England expressing similar sentiments on these subjects subscribed by more than 18,000 of His Majesty's subjects in this Province. In fact all parties and all denominations on this matter have been agreed, and have so remained with a unanimity and perseverance that is really

Equally decided and uniform have been In this way has the Government opened the exertions of your Honorable House to effect the same object; and this has been the case, not only when one party prevailed, but also when its opponent had the ascendancy.—They have repeatedly addressed His Majesty; -they have also repeatedly exercised the powers given to them by the Constitutional Act to repeal sentations or appointments of the ministers, those parts of it, which relate to the appropriation of the Clergy Reserves; al-It is with difficulty that the committee though these bills like many others ardentsuppress the strong feelings of disgust in- ly desired by the country have been condignation and astonishment which these temptuously, rejected in the Legislative Council, so numerous and urgent have been these representations to: His Majesty's Government that the appearance, at least: of a favorable disposition on this subject, was at length obtained from the Cabinet Minister:

In 1832; the House of Assembly were informed by His Excellency Sir John-Colborne, in a message dated 25th January,

one end of the Province to the other again "The representations which have at

different times been made to His Majesty been made to His Majesty "by so large a and his Royal Predecessors, of the prejudice sustained by His faithful subjects in "Province." this Province from the appropriation of the Clergy Reserves, have engaged His in opposition to these representations was Majesty's most attentive consideration.

"His Majesty has with no less anxiety considered how far such an appropriation of Territory is conducive either to the Excellency, it is distinctly intimated, that temporal welfare of the Ministers of Religion in this Province or to their spiritual influence. Bound no less by his personal feelings than by the sacred obligations of that station to which Providence has called him to watch over the interests of all the Protestant Churches within his dominions; His Majesty could never consent to abandon those interests with a view to any objects of temporary and apparent expedi-

"It has, therefore, been with peculiar satisfaction, that in the result of his inquiries into this subject, His Majesty has found, that the changes sought for by so large a proportion of the inhabitants of this Province may be carried into effect without sacrificing the just claims of the established churches of England and Scotland.—The waste lands which have been set apart as a provision for the Clergy of those venerable bodies have hitherto yielded no disposable revenue.—The period at which they might reasonably be expected to become more productive, is still remote.

"His Majesty has solid grounds for entertaining the hope that before the arrival of that period, it may be found practicable to afford the Clergy of these churches such a reasonable and moderate provision as may be necessary for enabling them properly to discharge their sacred functions.

"His Majesty, therefore, invites the House of Assembly of Upper Canada to consider how the powers given to the Provincial Legislature, by the Constitutional Act, to vary or repeal this part of its provisions, can be called into exercise most advantageously for the spiritual and temporal interests of His Majesty's faithful subjects in this Province."

Surely, this was a pledge of no ordinary solemnly on the part of the Govern-ing from the Canadian to the Imperial Lement, not to proceed in opposition to re- gislature the question respecting the applipresentations which had at different times, cation of these funds to other purposes

"proportion of the inhabitants of this

To establish and endow these Rectories as flagrant a violation of good faith as can well be imagined.

In Lord Glenelg's instructions to His the disposal and appropriation of the Clergy Reserves are to be left, for the present at least, to the Legislature of the Province. Under these circumstances, how can the proceedings of the Government in the formation and endowment of these rectories, and the exchange of lands (evidently a system of jobs) be reconciled with a decent regard to good faith and justice to the interests of the province or to the well-known and often declared wishes of the people? The reflections which such a question suggests are painful and morti-

Measures, most deeply affecting the peace and happiness of the people, their opinions and feelings, are adopted, not only without their consent, but in opposition to their known and unanimous wishes.-To continue our complaints seems equally wearisome and useless.

Lord Glenelg declares in his instructions to His Excellency, that "Parlia-"mentary legislation on any subject of ex-"clusively internal concern, in any British "colony, possessing a representative As-"sembly, is, as a general rule, unconsti-"tutional and that to withdraw from the "Canadian to the Imperial Legislature, "the question respecting the Clergy Re-"serves, would be an infringement on that "cardinal principle of colonial govern-"ment which forbids parliamentary inter-"ference, except in submission to an evi-"dent and well established necessity."

These are the professions of the Government, but what has been its conduct? In 1827, an act was passed by the Imperial Parliament without even a pretended necessity, and without the consent or knowledge of the people of this Province or their representatives, authorising the sale of the clergy reserves in this Province (not exceeding one-fourth) and withdraw-

than their original object, such as the sup- a true commentary on the effect and work-

port of education, &c.

The same act also authorises the Government to accept in exchange for any part of the clergy reserves from any person any lands of equal value.

Under this act more than sixty-one thousand pounds abstracted from the small amount in circulation to repay the hard earnings of the people of this Province have been raised by the sale of land and paid into the military chest over and above all the expenses of selling the lands, &c. as appears from the official statement of the Hon. Peter Robinson, the commissioner appointed by the crown for these sales; an evil so great and palpable, that it was foreseen and pointed out by the Right Hon. Edward Ellice in 1828, who in his examination before the committee of the House of Commons on the affairs of Canada, after describing the general and deep feeling which exists in this Province about the appropriation of these reserves, says-"Surely the framers of that act, must have of the Province, we must expect the same "overlooked the additional objection of evils and the same grivances which have "draining from the small capital of the only increased from year to year, amidst "country any part of it for this invidious the complaints of the people, and the pro-"purpose."

Notwithstanding this caution, and al-tion. though the law was a plain infringement constitutional and responsible government of the principles of our Constitution, recognized and admitted by them, the present Ministry are acting upon it not only in selling these Reserves, and "draining ed understanding or arrangement between "from the small capital of the country for two or more of the members of the pres-"this invidious purpose" annually a large ent Executive Council, as to the adminissum, but also in making these exchanges.

upon the professions of a Colonial Secretary! Did the writer of Lord Glenelg's K.) in which answer His Excellency was Instructions suppose that the people of pleased to intimate rather indignantly, that this Province were destitute of common he knew of no such agreement, and in sense and discornment?

administration would devolve upon him. office, in order to avoid the administration Chamber, signed and delivered to Mr. Allan (the next senior member) in the pre-

of the contradiction between His Excellency's answer and those gentlemen's testimony, and they will only say, that it must of course destroy all confidence in future in His Excellency's assertions, especially as His Excellency retains Mr. Sullivan as his principal and confidential adviser, notwithstanding the evidence so given by

Neither do they think in necessary to dwell upon this arrangement, to bargain away, contrary to the royal instructions, the future government of this Province, for such it evidently was, notwithstanding, Mr. Sullivan's attempt and natural anxiety to explain it away. An arrangement as unconstitutional & delusive as could have been proposed; for in the event of Sir Francis B. Head's death, the government would necessarily devolve on the presiding Councillor, and he could not have resigned to any one but His Majesty. To resign to his inferior would have been "a new theory." Neither could he have released himself from the government by refusing to take the oath of office. The committee observe that such an oath is not required by the 31st of the King, or the King's Instructions, and at all events the power to administer the government in the event of with greater distress and apprehension His Excellency's death, does not depend than even prevailed from the alien queson it; for if it did, we might be for a time tion. without a government; and if one could strange notions entertained by His Excel- gestion of the Honorable Mr. Elmsley. lency and the present Council about our The committee beg leave also to remind Constitution.

In some of the old colonies the people as presiding Councillor, but to resign his chose their own Governors; but never was a successor to a Governor then living, of the government, and that this paper was chosen by the Council; that very Council not only in existence, but was drawn up by His who in His Excellency's estimation is such Excellency HIMSELF, in the Council a mere cipher; such a mute and irresponsible body.

To obtain a fuller elucidation of this sence of His Excellency and the whole humiliating subject, your committee were Council.

Council. The respect which your committee feel of the Honorable Messrs. Allan and Elmsfor His Excellency's high office, forbids ley, and although the Legislative Council their dwelling upon the mortifying subject in compliance with the address of Your Honorable House granted permission to these honorable gentlemen to attend Your Committee, yet they have refused to do so, under excuse of some informality in addressing them; although in an Executive matter, so materially affecting their characters as Councillors, your Committee had hoped all minor considerations would have been discarded. But Mr. Sullivan's statement needs no confirmation, and the participation of the others in this singular and unconstitutional proceeding remains uncontradicted with an opportunity afforded them, if innocent, of exculpation:-This conduct justifies in point of fact the declaration by Your Honorable House of an entire want of confidence in the present Executive Council, communicated by address to His Excellency. It is to Your Committee a matter of profound regret, that when His Excellency was surrounded by the late Council, with every means of conducting his administration in a manner efficient and satisfactory, calculated to allay all existing discontent and preserve the peace, welfare, and good government of the Province, he should so hastily, rashly, and wantonly disappoint public expectation, and fill the Province

Your committee, while on this humiliadecline taking the oath all might, and we ting subject feel bound also to remark on might in such an alternative also be left the positive contradiction between the eviwithout a government. An arrangement dence of the Honorable Mr. Sullivan and so inconsistent with the rights and honor the Honorable captain Baldwin, as referof the Crown, and with the safety and ence thereto will prove, while Mr. Sullivan protection of the people, was probably expressly affirms that the writing was never before thought of in a British colo- drawn up solely at his own request, Capny; and is a striking evidence of the tain Baldwin stated that it was at the sug-

No alternative is left to the House, in the opinion of the com mittee, but to abandon their privileges and honor, and to betray their duties and the rights of the people, or to withhold the supplies: the constitutional right of which is clearly acknowledged in Lord Glenclg's despatch, and also in His Excellency's reply to the late Executive Council, and in the language of Lord Stanley on the very subject of procuring a removal of advisers in this Province, "it is the con stitutional mode of enforcing our wishes." All that we have done will otherwise be deemed an idle bravado, contemptible in itself and disgraceful to the House; and although in consequence of the law granting a perpetual civil list, which was obtained by Sir John Colborne's withholding this painful and humilating subject, simply a despatch that he had been directed to communicate to the Legislature, shewing nature in Jamaica, which is set forth in that the Government only wanted the grant for seven years or during the life of the King, and which act received the appro- its last session:bation of His Majesty's Government, the refusal of the supplies cannot have its just constitutional influence, yet it will testify the feeling and the determination of the Excellency with the accompanying resolutions, which House more forcibly to His Majesty's Go- have been agreed unto by the House: vernment, and will avail more than any thing else. Your committee therefore distinctly recommend to your honorable house to with-

hold the annual supplies.

His Excellency, in answer to the address of your hon house respecting the present Executive Council, observes—" I might say "that I had hoped the house would have " refrained from any such decided expres-" sion of its opinion on the subject, until "it had received the report of the com-"mittee to whom the subject was referred, "and for whom the Government Office is "now occupied in furnishing the docu-" mentary evidence they desire, but I am "unwilling to discuss the question."

Your committee hope there is not now and never will be hereafter, another such a direct and violent breach of the privileges of the Commons house of Assemby; indeed, the assumption of power to chide the whole house for not awaiting a report from a select committee, can meet with a parallel only in the very worst periods of English history; surely such conduct was never intended and will never be countenanced by the British Government-observing the marked forbearance of your bonorable house, your committee dismiss referring to the recent case of a similar the following communication to his Excellency, the Governor of that Island, during

" MAY IT PLEASE YOUR EXCELLENCY:"

"We are ordered by the House to wait on Your

"1st Resolved-That the first message of His

"ontly with its own dignity, or with due regard to its "rights and privileges, which are the firmest bulwarks of the liberties, franchises and immunities of the people; proceed to do any other business until repa-"ration shall be made for this breach of privilege."

This your Committee conceive is a just illustration of the resentment which such conduct deserves, and generally receives.

The attention of Your Committee has been recently drawn to a political address from the Grand Jury at the present assizes in this city, to His Excellency, and His Excellency's answer. (See certified copies in the appendix marked U.) This Grand Jury, selected by Mr. Sheriff Jarvis, holding office during the pleasure of Sir Francis Head, style themselves "Grand Jurors representing the Home District!" There is no known law or constitutional usage under which the above gentlemen can claim the representative character; and it has ever been a subject of grievance and regret that the Executive Government have given a countenance to the political pretensions & sycophantic offerings of Grand Juries in this country. While they mix up with their judicial duties, the party feelings of the day, and present to the Lieutenant Governor with evident acceptability their political oblations, there can be no prospect of that cool, dispassionate and impartial conduct towards all classes of the people, required by their oath and prescribed by the law. The mixture of such matters in the public ordinances of religion or in the public administration of criminal justice must be revolting to every well constituted mind," and is certain to contaminate what the dearest interests of society require to be pure and untainted.

The imposition of political duties upon the Chief Justice as Speaker of the Legislative Council, against the repeated remonstrances of the people and their representatives, is felt to be itself a practical evil; and has no doubt also contributed to destroy that decorum in other branches of the Judiciary which might otherwise keep them aloof from voluntarily blending party politics with the duties of the Grand Jury Room: With the Grand Jury originate indictments for alleged political offences, and the practice of tampering with their own consciences by inflaming themselves with such unseasonable discussions, terest; and the present era arrall-importis calculated to revive the scenes acted in ant crisis in our affairs. The despence,

"2nd Resolved-That this Bouse carnot consists the administration of Sir Peregrine Mait-

It is a striking fact that the foreman of this grand jury selected by Mr. Sheriff Jarvis, is a military gentleman on full pay, on a temporary leave of absence, and who, although a son of the late Dr. Macaulay is personally known only to a few as an occasional visitor from military service. Your committee without meaning any personal reflection upon that gentleman, cannot but remark upon the conduct of Mr. Sheriff Jarvis in making such a selection, which appears to have been done to second the avowed intentions of the Lieutenant Governor to appoint him Surveyor General, with the further plan of introducing him into the Legislative and Executive Councils. The same gentleman it appears lias recently presided at political meetings in this city, and as a military man he seems unconscious of the impropriety of re-acting the same scenes in the sphere of a Grand Juror.

His Excellency's answer welcomes the adulation of the Grand Jury, and outsteping the limits of the address, he descants against "the ignominious tyranny" of the Executive Conneil of the Province which he styles "a secret metropolitan cabinet," thus deriding and vilifying the institutions of the country, while in obvious allusion to those who differ from him upon this "great constitutional question," he boasts of having "repelled enemies." Affairs assume a serious character when the representative of His Majesty arrays against himself as "enemies," whom he has "repelled" the great body of the people, who have long sought for a better constitutedand more efficient Executive Council for the practical ends of Government. These hostile and inimical feelings indulged by His Excellency against so numerous a class of the Community, blast all our hopes of that impartial and conciliatory policy and constitutional system which have been promised by the British Government.

The committee have been obliged unavoidably, though refuctantly, to extend their report to a great, perhaps, an inconvenient length.

They think the subject, one of vital in-

defended by Sir Francis Bond Head, and his avowed determination to adhere to them; the tyrannical and unjust conduct tween our condition on the one hand, and pursued by him towards the late Council; the bitterness of feeling which he is known to entertain towards all who think improvements of all kinds in the adjacent it their duty to oppose him; the intention and favour the party so much complained led natural facilities for internal communiof, yet so much fostered under his predecessor, destroy all hope that his administration of the Government can be just, satisfactory or useful to the country, or con-Crown; and make it, in the opinion of the committee, a necessary, though most painful duty on the part of your Honourable House, respectfully, but most carnestly to pray, that His Majesty's Government the contrary. will seriously consider our situation, and afford us such relief as the exigency of the rendered unavailing the natural advan-case requires. Respect for the Crown re- tages of the country and paralized its quires that this object should be sought in youthful energies, should now of a sudjesty only, but considering the usual man- expected. ner in which our representations have been viewed and treated at the Colonial Office, we recommend that a memorial should be also addressed by Your Honourable House to the House of Commons; a body who understand and feel the value and importance of those principles for which we are contending. The committee have prepared an address to the King and a memorial to the House of Commons, in conformity with these views, which they beg leave respectfully to submit herewith, and recommend, that a copy of this Report, with the Appendix and memorial to the House of Commons, be presented to His Excellency with the Address, and a request, that he will be most graciously pleased to transmit the same to His most Gracious Majesty, the King.

They submit the whole with a deep and solemn sense of the great responsibility which now rests upon the House of Assem-The state of our public affairs, apparently growing worse instead of being and form of government of the United improved, the dissatisfaction and anxiety States introduced and established among of the people, the determination of the us, but it is simply whether we (His Ma-Government to defend and enforce arbi- jesty's subjects in Upper Canada) shall trary principles, and to oppose the appli- enjoy acknowledged principles of the Brication and the operation, in this Province, I tish Constitution?

unconstitutional principles announced and of acknowledged and essential principles of the British Constitution, and the comparisons which are every day made beon the other hand, the prosperity of all classes, the activity of business, and the country, are considerations which cannot which his public acts evince to perpetuate be disregarded.—Blessed with a find and and aggravate the system and to cherish healthy climate, a productive soil, unequalcation and an industrious and enterprising: population, we ought to see the country flourish and improve, at least, as much and the people as happy, prosperous and conducive to the honour and interests of the tented under the British Constitution (if we were permitted to enjoy it, in its full and beneficial operation) as could be realized under a different form of Government.

The committee are not willing to believe

But that a system, which has long the ordinary way by an address to His Ma- den produce contrary effects, is not to be

Great as is the Constitutional questionfor which the country contends, it is simple in its nature. We have under the 31st Geo. 3d. an Executive Council, constituted by the Royal Instructions; this Exccutive Council we desire to see discharging the duties belonging to such a Council;—as it is the duty of Parliament to legislate, so it is the duty of the Executive Council to advise.

It has been simply proposed that our public affairs should pass under their review preparatory to the final and discretionary action of the Governor upon them; and assuredly the people upon whose affairs and highest interests the advice is given, should be allowed to see the Representative of the King surrounded by men alike possessing his confidence and that of the country.

The great question now before your Honorable House and the country, is not whether we are to have the Constitution

and privileges that are enjoyed by our fellow subjects in the United Kingdom, and which has always heretofore been admitted in theory but denied in practice?

Whether the advisers of the Lieutenant Governor, the Executive Council, are to be gentlemen of sound principles, known and possessing the confidence and esteem of the people whom they are sworn to serve as well as His Majesty, or to be persons unknown and irresponsible, and consequently under no restraint or accountability for the advice they give or means (honourable or dishonourable) they use to accomplish their ends?

If we have at the head of our local affairs not a Representative of the King, but a mere Minister, culpable for all misdoings in our government, there is no reason why he should longer be held (as heretofore) above the law of the land. on the one hand, we ask for the beneficial operation of the Executive Council, the answer is, I am only in the place of a Minister, answerable for my own acts and those of my Council into the bargain-and when on the other hand, you desire to proceed against him for any wrong, the character is shifted from a mere Minister into a Representative of the King, who can do no wrong, and is above all law-one day he is a Minister in order to assume power and act wrongfully; another day he is Representative of the King, to oust the Courts of Justice of their jurisdiction. He assumes one character for license, and another for defence.

Your Committee desire to remark that our other institutions have often in times past been subjected like the Executive Council, to similar attempts to cripple or abridge their constitutional rights and char-Your Honourable House was at right was acknowledged. one time denied the privilege which neces- fore, it is considered with what trouble and sarily and constitutionally appertains to vexation, and against what executive inpublic abuses, and they were not establish-, Parliament have been asserted and mained on their present broad, firm, and ac- tained, it is less surprising that the constiknowledged basis without appeals to Eng-tutional duties and functions of the Exe-land and litigation in our courts of law. cutive should factiously be denied. The During the ninth Parliament occurred privileges of Parliament were not more

Whether we shall have the same rights the arbitrary outrage upon the rights and d privileges that are enjoyed by our fel-property of Mr. Forsyth by Governor Maitland with Military force under the legal advice of the Attorney General (since promoted to the Chief Justiceship of this Province) and supposed to have been under the advice of the then Executive Council. This flagrant wrong became the subject of enquiry before a committee of Your Hon. House and Messrs. Givins and Coffin were attempted to be sustained by Governor Maitland in their refusal to obey a summons to give evidence—in fact they read his express orders not to attend. in the illustration of the alleged sufficiency of Downing Street responsibility by Governors, it appears that an outrage is perpetrated first, and then Executive authority, influence and power exerted to prevent investigation. Nor was this all; for Sir P. Maitland further tried to poison what justice might be expected from His Majesty by writing a calumniating despatch, giving a bad character to Mr. Forsyth, and traducing as factious the Assembly that interposed in his behalf. ninth Parliament proceeded to the arrest and imprisonment of the refractory officials; and although Sir George Murray, then Principal Secretary of State for the Colonies, rebuked Sir P. Maitland for his long and artful despatch against our Parhamentiary privileges, yet he was never disgraced or punished, and even in the tenth Parliament the Attorney General, since Chief Justice of Newfoundland, reacted the same dispute of the privileges of the Provincial Parliament, and it was not until the present Speaker of Your Honorable House was prosecuted for his warrant and that an adjudication of the court of King's Bench, after elaborate argument had placed the question out of the reach of further denial that that When, there-Parliament, viz: the right to enquire into fluence and calumny the privileges of

APPENDIX.

(Copy.)

EXECUTIVE COUNCIL CHAMBER, AT TORONTO,) Friday, 4th March, 1836.

To His Excellency, Sir Francis Bond Head, Knight Commander of the Royal Hanoverian Guelphic order, Knight of the Prussian Military Order of Merit, Lieutenant Governor of the Province of Upper Canada, &c. &c. &c.

MAY IT PLEASE YOUR EXCELLENCY,

The Executive Council, impressed with the oath they have taken to discharge the duties necessarily resulting from their appointment "to advise the King and his Representative in the government of this Province," in the terms of the constitutional act upon the affairs of the Province deem it incumbent upon them, most respectfully to submit the following re-

presentation:

The Executive Council recognize the truth of the opinion expressed by Lord Glenelg, that "the present is an era of more difficulty and importance, than any which has hitherto occurred in the history of this part of His Majesty's dominions." This unhappy condition they ascribe in a very great degree, to the impaired had the Constitution been administered either hitherto unconstitutional abridgment of the duties of according to its letter or its spirit the Executive Council. It appears from the proceedings of the House of Assembly, and from the re-iter- the Executive Council is mentioned in general terms. ation of established opinion in the country; that nei- In the 34th clause the terms are "together with such ther will public expectation he satisfied, nor content- Fxecutive Council as shall be appointed by His Mament be restored, until the system of local government jesty for the affairs of such Province," and not, as it is altered, and conducted according to the true spirit would otherwise have been expressed "together with and meaning of the Constitutional Act. The delay of such Executive Council as shall be appointed by His this just and indispensable course, has already excited Majesty for that purpose." In the 38th clause the in the great mass of the people, a lamentable jenousy terms are, " with the advice of such Executive Counand distrust, and has also induced the discussion of cil as shall have been appointed by His Majesty, His Constitutional changes, the desire for which, unless Heirs, or Successors, within such Province for the afspeedily arrested, by affording the unrestricted opera- fairs thereof," and not, as it would otherwise have been tion of the 31st Geo. 3d, chapter 31, will not only be-expressed, "with the advice of such Executive Councome more fixed, but rapidly increase to a greater and; cil as shall be appointed by His Majesty, His Heirs or irretrievable extent.

The policy and measures which have led to the present condition, seldom passed under the review of latter part of the seventh clause.

the Executive Council, or were submitted for their advice. Nevertheless, its members have been undeservedly subjected to the heaviest reproach throughout the country, from a prevalent belief that they have been called upon to fulfil the duty imposed upon them by the constitution, as advisers upon the public affairs. But amidst the obloquy thus threwn upon them, they have studiously avoided any attempt at exculpation, by disavowing in their defence, any participation in the conduct of the affairs which they were erroneously supposed to have approved. The consequence of this silent endurance of political odium, has been the perpetuation of the misbelief, that the Executive Council are conversant with the affairs of the Province, upon which they are appointed to advise: and although an opposite practice has generally prevailed between former Lieutenant Governors and their Council, yet it has ever been notoriously contrary to the state of things presumed by the community to exist.

Public opinion respecting the Executive Council & their duties, has been founded upon the terms of the 31st Geo. 3d, chap. 31, to which statute the people used to express a firm attachment, an attachment which, the Council believe, never would have been

In several clauses of the 31st Geo. 3d, chapter 31, Successors, within the Province for that purpose."

The same may be said of similar terms used in the

With respect to which clauses it may be further remarked, that had it been contemplated that the Executive Council were to act only in the matters therein specified, the words "on the affairs of such Province" properly to fall under any particular department, and might have been omitted, without in the least impairing the legal effect. In the construction, therefore, of lectively, it is recommended that the affairs of the Prospecified, the words " on the affairs of such Province" this statute, the above expression cannot be treated a vince be distributed into departments, to the heads of surplusage, but must\_be taken, to impose the duty which shall be referred, such matters as obviously apwhich it imports.

From the language, of this statute, therefore, it ap-

nears:

Firstly—That there is an Executive Council;—Secondly - That they are appointed by the King; ly-That they are appointed to advise the King and his Representative upon the "affairs of the province" -no particular uffairs are specified; no limitation to any particular time or subject. As the Constitutional Act prescribes to the Council, the latitude of "the affairs of the Province," it requires an equal authority. of law to narrow those limits, or relieve the council

from a co-extensive duty.

Every Representative of the King, upon arriving from England to assume the government of this country, is necessarily a stranger to it; and the law has provided for a local Council as a source of advice, which when given, is followed or not, according to his discretion. In certain cases specified in the 38th clause of the 31st Geo. 3rd, chapter 31, the concurrence of the council is required to give effect to certain Executive Acts. But these exceptions prove the general rule, viz:-That while the advice is to be given upon the affairs of Province generally, it is only in the particular cases that it must harmonize with the pleasure of the Crown, to give that pleasure effect. Indeed, if the law could be construed to limit the advice to the particular cases, it would follow that the Council could not legally advise upon any others; a proposition which, besides its manifest repugnance to the terms of the Act, is contrary to received opinion and usuge.

But while the Constitution has assigned to the Council this duty, it is only to a very subordinate and limited extent that they have heretofore had opportunity afforded them to perform it. It is submitted that the exigency of the statuto can only be answered by allowing the affairs of the Province to pass under their review for such advice as their consciences may suggest, preparatory to the final and discretionary action of the

King's Representative upon those affairs.

The Council meeting once a week upon land matters, while the affairs of the country are withheld from their consideration and advice, is as imperfect a fulfilment of the Constitutional Act, as if the Provincial Parliament were summoned once a year, to meet the letter of the law, and immediately prorogued upon answering the Speech from the Throne. In both cases the true meaning and spirit of the Constitutional Act require that the Parliament should have a general and practical opportunity to legislate, and the Executive Council to advise upon the affairs of the country. In the former case, the Representative of the King can withhold the Royal Assent from Bills, and in the latter, reject the advice offered; but their respective proceedings can not be constitutionally circumscribed or denied, because they need the expression of the Royal pleasure thereon for their consummation.

The extent and importance of the uffairs of the country, have necessarily increased with its population, wealth, and commerce; and the Constitution has an-

ponsibility from the active attention of the Executive Council in their duties. With the exception of those matters of so weighty or general a character, as not pertain to them respectively. Upon this principle,. recognized by the existing constitution of this Province, and of the mother country,] the people have long, and anxiously sought for the administration of their government, under the Representative of the King; and the Council most respectfully, but at the same time carnestly, represent that public opinion upon the subject is so fixed, and becoming so impatient, as to preclude the possibility of denying or delaying the measure, without increasing public dissatisfaction, and leading to the final adoption of other views, as already too universally manifested, uncongenial to the genius of the constitution, and most dangerous to the connexion with the Parent State.

The remedy, it is feared, is now proposed too late for all the advantages desired; but the longer it is withheld, the more clienated and irreconcilable will the public mind become. The present comparative calm and thankfulness arise from a belief that the Council will second this exigency, in establishing a system of government, according to the principles recognized by the charter of the liberties of the country-an expectation which the Council are most anxious to realize.

Should such a course not be deemed wise or admissible by the Lieutenant Governor, the Council most respectfully pray that they may be allowed to disabuse the public from a misapprehension of the nature and extent of the duties confided to them.

 \mathbf{B}

REPLY

Of His Excellency the Lieutenant Governor to the communication of the Executive Council.

F. B. HEAD,

The Lieutenant Governor transmits. to the Executive Council the following observations in reply to the document, which in Council they yester .. day addressed to him:

The constitution of a British colony resembles, but is not identical with the constitution of the mother country; for in England, besides the House of Commons, which represents the people, there exists a hereditary nobility, the honors and wealth of which, as well as the interests of the established church, are represented by a House of Lords, while the Sovereign (who by law can do no wrong;) is surrounded by a Ministry upon whom devolves the entire responsibility of the measures they suggest, and who are consequently removable at pleasure. But in the colonial portion. ticipated the difficulty by a division of labor and res- of the British Empire, which however rising, is gener-

ally speaking thinly inhabited, the people are represented by their House of Assembly, which is gifted not only with the same command over the supplies, as in England, but which possesses within the colony most of the powers of the British House of Commons, The Legislative Council is intended, as far as the circumstances of a young colony can permit, to resemble the British House of Lords; and if the Licutenant Governor of a colony stood in the place of the Sovereign, and if like His Majesty, he could do no wrong, it would evidently be necessary that a Ministry, Executive Council, or some other body of men should be appointed, who might be responsible to the country for their conduct. This, however, is not the case;—His Majesty delegates His Sovereign protection of his colony to no one, but he appoints a Lieutenant Governor who is responsible to him for his behavior, who is subject to impeachment for neglecting the interests of the people, and who is liable, like the English Ministry to immediate removal; and the history of the British colonies clearly shews, that there is no class or individual of His Majesty's subjects, to whose representations, prayer or petition, the King is not most willing to attend.

The Lieutenant Governor is therefore the responsible minister of the colony, and as not only his character, but his continuance in office, depend on his attending to the real interests of the people, it would be evidently as unjust towards him that he should be liable to impeachment for any acts but his own, as it would be unjust towards the people, that a responsibility so highly important to their interests, should be intangible and divided. It is true, his knowledge of the country is not equal to that of many intelligent individuals within it; but in government, impartiality is better than knowledge, and it must be evident to every well constituted mind, that in an infant state of society, it would be impossible practically to secure a sufficient number of impartial persons to effect a change of ministry, as often as it might be necessary for the interests of the people to do so.

This difference between the constitution of the mother country and that of its colony, is highly advantageous to the latter, for as in all small communities, private interests and party feelings must unavoidably be conflicting, it is better as well as safer, that the people should be enabled to appeal in person, or by petition, to the Licutement Governor himself, whose duty it is to redress their complaints, and who is liable to dismissal if he neglects them, than that they should appeal to a series of Provincial Ministers, composed o! various individuals.

To enable the Lieutenant Governor to perform the arduous duties of his office, the constitution has wisely provided him with an Executive Council, competent to supply him with that local knowledge in which he may be deficient, and to whom he may apply for counsel and advice.

Before he entrusts himself to these gentlemen, they are, by the order of His Majesty, required solemnly to swear, not only to give to the Lieutenant Governor their best counsel and advice, but they are also sworn

Their individual opinions can never be divulged, even to the King, and as a proof that His Majesty does not hold them responsible for the acts of the Lieutenant Governor, they can retain, and often do retain, their office of sworn advisors, although, Governor after Governor may have been dismissed.

Governor is so self-evident, that he must be weak and self-sufficient indeed, who does not continually have recourse to it; but although it strengthens his judgment and confers dignity on his proceedings, yet it in no way shields him from disgrace, should his acts he found contrary to the interests of the people. In such a case, it would be vain, as well as unconstitutional, for a Licutenant Governor to attempt to shield himself from responsibility, by throwing it upon his council, for by his oath, he cannot even divulge which of his advisers may have misled him.

Supposing, for instance, that with the concurrent advice of his council, he was illegally to eject by military force an individual from his land, the Lieutenant Governor would be liable to arraignment, and whether he had acted by the opinion of the law officers of the crown, by the advice of his council, by information derived from books, or from his own erring judgment, it has been wisely decreed that the injured subject should look to him and him alone for retribution, and that he and he alone is answerable to His Sovereign for the act of injustice which has been commit-

Being, therefore, subject both to punishment and disgrace, it is absolutely accessary, as well as just, that the Lieutenant Governor of a colony should have full liberty to act. (though at his peril,) in every case, as he may think best for the interests of the people, according to the commands of His Majesty, and of His Majesty's Ministers.

To consult his council on the innumerable subjects upon which he has daily to decide, would be as utterly impossible, as for any one but himself to decide upon what points his mind required or needed not the advice of his council. Upon their sterling fund, he must therefore constitutionally draw, whenever embarrassment requires it, and on their part, if they faithfully honor his bills, however often he may present them, they conscientiously fulfil to their Sovereign, to him, to their country, and to their oath, the important duty which they have sworn in secrecy to perform.

Having concluded the above outline of the relative responsibility of the Lieutenant Governorner and his Executive council, as it regards His Majesty's colonies in general; it may be observed with respect to this Province in particular, that when His Majesty, by conquest, first obtained possession of the Canadas, the government thereof devolved upon its military commander, until, by an Act passed in the 14th year of George 3rd, a council was appointed, " for the affairs of the Province of Quebec, to consist of such persons resident therein (not exceeding 23, nor less than 17,) as His Majesty, his heirs and successors shall be pleased to appoint," "which council so appointed and nominated, or the major part thereof, shall have power and authority to make ordinances for the peace, welfare, and good government of the said Province, with the consent of His Majesty's Governor."

This power of the council was further restricted by certain important limitations, specified in clauses 13, 14, 15, 16, and 17, of the said act; however, in the year, 1791, a new act was passed, commonly called the Constitutional Act," because it settled the constitution of the Canadas, which were then divided into the Upper and Lower Provinces.

By this act the military domination of the General and his council, was changed for a new and settled system, and as evidently both could not exist together, the very first clause of the act declared, that so much The advantage of such a council to a Licutenant of the late "Act 14th George 3d as in any manner re-

lates to the appointment of a council for the affairs of feelings of regret, with which, under a heavy pressure of them, to make ordinances for the peace, welfare, and good government of the said Province, with the consent of His Majesty's Governor, Lieutenant Governor, or Commander in Chief for the time being, shall be, and the same is REPEALED."

The act then proceeds to state, that there shall be within each of the said Provinces respectively, a Legislative Council, and an Assembly, the duties and privileges of which are minutely declared in 33 consecutive clauses, but in no part of the said act was an Executive Council directly or indirectly created. Nevertheless, a vestage of the ancient one, was for the purpose of a Court of Appeal, (vide clause 34) recognized, with an expression which seemed to intimate, that an effecient Executive Council would very shortly be created.

For instance, in section 38, the Governor is, by authority of His Majesty's Government, and with the advice of the Executive Council, "empowered to erect parsonages and rectories," but in section 39 no mention whatever is made of the Executive Council, but on the contrary it is declared, that the Governor or Lieutenant Governor, or person administering the government should present the incumbent "to every

such parsonage or rectory."

In the 50 clauses of the act in question the Executive Council which in section 34 is merely described as " such Executive Council as shall be appointed by His Majesty," is scarcely mentioned, and as regards even its existence the most liberal construction which can possibly be put upon the said act, only amounts to this :- That as an Executive Council was evidently intended to exist, the remnant of the old one ought not to be deemed totally extinct, until its successor was appointed.

However, this latent intention of His Majesty to create a council for each of the Provinces of His Canadian dominions, was soon clearly divulged in a most important document, commonly called " The King's Instructions," in which an Executive Council was regularly constituted, and declared as follows:-"Whoreas we have thought fit that there should be an Executive Council for assisting you or the Lieutenant Governor, or person administering the government of the said Province of Upper Canada, for the time being, we do by these presents appoint the un-dermentioned persons, &c. &c."

In subsequent clauses it was equally precisely defined, upon what affairs of the province the Lieutenant Governor was to act, " with the advice of the Executive Council," but with the view distinctly to prevent the new council being what the old one had been (which indeed under the new constitution was utterly impossible) in short to set that question at rest for ever, it was declared in section 8th, "that to the end that our said Executive Council may be assisting to you in all affairs relating to our service, you are to communicate to them such and so many of our instructions wherein their advice is mentioned to be requisite, and likewise all such others from time to time, as you SHALL FIND CONVENIENT for our service, to be impurted to them."

The Lientenant Governor having now transmitted to the Executive Council his opinion of their duties, in contradiction to that contained in their communica-

the said Province of Quebec, or to the power given by of business, he unexpectedly received a document of the said act to the said council, or to the major part so unusual a nature, from gentlemen upon whom he had only recently placed his implicit and unqualified reliance. But he feels it incumbent upon him frankly and explicitly to state, that to the opinions they have expressed he can never subscribe, on the contrary, that so long as he shall continue to be Lieutenant Governor of this Province, he will never allow his Executive Council officially to assume that heavy responsibility which he owes to his Sovereign, as well as to the people of this Province, to whom he has solemnly pledged himself "to maintain the happy constitution of this country inviolate, but cautiously yet effectually to correct all real grievances."

The Lieutenant Governor maintains that the responsibility to the people of this province (who are already represented by their House of Assembly) which the council assume, is unconstitutional—that it is the duty of the council to serve him, not them; and that if upon so vital a principle, they persist in a contrary opinion, he foresees embarrassments of a most serious nature, for as power and responsibility must in common justice be inseparably connected with each other it is evident to the Lieutenant Governor, that if the council were once to be permitted to assume the latter they would immediately as their right, demand the former, in which case if the interest of the people should be neglected, to whom could they look for redress? for in the confusion between the governor and an oligarchy composed of a few dominant families, shielded by secrecy, would not all tangible responsibility have vanished?

The council cannot have forgotten that previous to their first meeting in the council chamber, which happened only a few weeks ago, the Lieutenant Governor had assured them in a note (which was even publickly read in the House of Assembly) that although he had no preliminary conditions to accede to or require, it was his intention to treat them with implicit confidence; and the council must also remember how willingly they approved of the very first suggestion he made to them, namely, that no important business should be commenced in council until they, as well as the Lieut. Governor himself, had become mutually acquainted with their respective duties.

The Lieutenant Governor assures the council, that his estimation of their talents and integrity, as well as his personal regard for them, remain unshaken, and that he is not insensible of the difficulties to which he will be exposed should they deem it necessary to leave him, at the same time should they be of opinion that the oath they have taken requires them to retire from his confidence, rather than from the principles they have avowed, he begs that on his account, they will not, for a moment, hesitate to do so.

Government House, Toronto, March 5th, 1836.

Front Street, 16th March, 1836.

DEAR SIR:

Myself and my colleagues having felt it our duty to tender our resignations, and the Lieutenant Governor having been pleased to accept them; I waited on his Excellency to request his permission to tion to him of yesterday's date, will not express the make public in the usual parliamentary way, the steps

which led to the formation of His Excellency's late to be responded to in this Province, was as distasteful. Cabinet, and the circumstances which occasioned its dissolution, to which His Excellency in the handsomest manner frankly acceded, most graciously assuring me that his confidence in me personally was such, that he presented me with a charte blanche to state the whole from the commencement of the negotiations to the acceptance of our resignations.

None of the members of the late provincial administration having the honor of a seat in the Commons, I know of no way in which such information can be more respectfully communicated than in a letter addressed to you, for the purpose of being read in your place; or of the House being put in possession of its contents in whatever other way your more intimate acquaintance with parliamentary forms may suggest.

I therefore beg leave to state that His Excellency having done me the honor to send for me explained the position in which he found himself placed on assuming the Government of the Province, and declaring himself most anxious to do the best he could to insure to the Province good & cheap government—expressed himself most desirous that I would afford him my assistance by joining his Executive Council, assuring me that in the event of my acceding to his proposal, I should enjoy his full and entire confidence. I informed His Excellency of my extreme reluctance to again embark in public life, and proceeded to state that notwithstanding such reluctance, and reserving to myself the option of declining to accept the seat which His Excellency had tendered to me on private grounds merely, I yet felt that as His Excellency had done me the honor of sending for me, I would not be performing my duty to my Sovereign or the country, if I did not with His Excellency's permission, explain fully to His Excellency my views of the Constitution of the Province, and the change necessary in the practical administration of it, particularly as I considered the delay in adopting this change as the great and all absorbing grievance, before which all others, in my mind sunk into insignificance; - and the remedy of which would most effectually lead, and that in a constitutional way, to the redress of every other real grievance, and the finally putting an end to all clamor about imaginary ones; and that these desirable objects would thus be accomplished without in the least entrenching upon the just and necessary prerogatives of the crown, which I considered, when administered by the Licutenant Governor through the medium of a Provincial Ministry, responsible to the Provincial Parliament, to be an essential part of the Constitution of the Prov-That these opinions were not hastily formedthat they were on the contrary those which I had imhibed from my father, who tho' now for some years as well as myself unconnected with public life, had formerly held a much more distinguished position in the politics of the country than I could pretend to, and that they were opinions which the experience of every year had more and more strengthened and confirmed; that I felt convinced that the prompt adoption of those views was the only means of consolidating the connection with the Mother Country, to the preservation of Council; suggesting as an inducement for such accepwhich no one was more devotedly attached, or ready to make greater sacrifices than myself; that they the Executive Council would be afforded towards the were nothing more than the principles of the British Constitution applied to that of this Province, and which I conceived necessarily to belong as much to the one as the other; -that the call for an Elective Legislative Council which had been formally made from Lower to any subject which I might at any time think it im-Canada, and had been taken up and appeared likely ortant to lay before him: His Excellency always

to me as it could be to any one, as all that appeared necessary or desirable was the Constitution, as it stood, fully and fairly acted upon; and that I was convinced, that had such a course been adopted some years ago, we should not now have had the public discussing the expediency of an alteration in the constitution by the introduction of a provision for an elective Legislative Council ;-that I feared it might now be too late, but as I was not sufficiently aware of the exact state of the question to speak decidedly, I sincerely hoped that by the prompt adoption of a responsible Provincial Administration, under the King's Representative, the question might even yet be set at rest; and in reply to an objection of His Excellency, that the adoption of such a course would be placing the Lieutenant Governor in a position similar to that of the King, which was inconsistent with the fact of his responsibility, I explained,-that as far as regarded the internal affairs of the Province, the Lieutenant Governor was in a point of fact, as far as this Province and its Parliament were concerned, as completely irresponsible as the King himself; as there certainly neither existed, nor in my opinion ought to exist, any legal or constitutional means of calling him to account in this country, for any act of his government; -that his responsibility was to the King and Parliament of the empire; and was perfectly proper and necessary for the preservation of the paramount authority of the Mother Country, and the protection of her interests in matters properly and constitutionally belonging to the exercise of that authority; but that what the Constitution required was that there should be persons within this country itself, who could be made responsible to the Provincial Parliament here, for the administration of the internal affairs of the Province.

To another objection of His Excellency, that the adoption of my views would deprive the Lieutennot Governor of all power, and convert him into a cypher; I distinctly denied any such as a consequence of my principles, as I fully admitted the Lieutenant Governor to be constitutionally clothed, as the Royal Representative, with the same powers within the Province, with respect to its internal affairs, as those possessed by the King himself with respect to the affairs . of the empire at large; -which appeared to me to be all that he could desire, and at all events all that the Constitution had given him; -that he had always the . same constitutional right to accept or reject the advice of any of his Executive Councillors, and that as in England the only alternative for them was to resign, when they and the Lieutenant Governor differed on any point which they conceived of sufficient importance to call for such a step; in which event the Lieutenant Governor was perfectly free to call to his council whom he pleased. His Excellency very candidly declared his entire dissent from such views and opinions, he nevertheless, with the most gracious expression of satisfaction at the very full and candid manner in which I had opened them to him, renewed his solicitation for my acceptance of a seat in the Executive tance, the increased facilities which by my place in more efficiently representing and urging my views .--His Excellency declaring that his doors should at all times be open to me, and that he should be most happy to listen, and give his most serious consideration,

reserving the right to decide for himself,-His Excel- senting to the removal of those gentlemen who were lency at the same time remarking that he had no ob- difendy in the Council; jection to the Council each continuing to entertain & and urge his individual opinions, as the opinions of one would be neutralised by those of another.

I then informed His Excellency that upon the principles which I had opened to him, there were two grounds upon which I could not consistently comply with His Excellency's wishes; first, that no Provincial Administration would in my opinion be capable of affording His Excellency that assistance and support which his government would require, unless sufficiently possessed of the confidence of the Provincial Parliament to ensure majorities in it; and I did not feel that that confidence could be obtained without further assistance; and secondly, that although in private life I was on perfectly good terms with all the gentlemen who then composed His Excellency's Executive Council, and on most friendly terms with one of them; you that as public men, I had in them no contidence whatever, and had formerly, when in public life; denounced them and those with whom they acted, as politically unworthy of the confidence of the country-and therefore that I felt that I could not take oftice with them.

At length after a consultation, held by His Excellency's permission, with Dr. Rolph and my father, I finally, on the two grounds above mentioned, declined

considered essential to the full exposition of the principles themselves) passed during the subsequent interviews which I had the honor of having with the Lieutenant Governor, in the course of the negotiation.

Having been subsequently again sont for by His Excellency, and requested to state more explicitly what the assistance was to which I had before alluded, I replied that I considered the assistance of Dr. Rolph, Mr. Bidwell, my Father, and Mix Dunn in the Executive Council, most desitable; and that of Dr. Rolph as absolutely necessary to insure that public confidence in His Excellency's Government, without which I was convinced His Excellency with the best intentions in the world; would fail to accomplish those desirable objects which he had in view.

His Excellency after an interview which he informnegotiation by a renewed tender of a seat in the Executive Council, giving me at the same time to understand, that if accepted, he was prepared to afford me the assistance of Dr. Rolph and Mr. Dunn, should these gentlemen have no objections to join me.

Upon this, with His Excellency's permission, I again fail, to accept seats in His Excellency's Executive consulted with Dr. Rolph, Mr. Bidwell and my Father, and I felt it due to the two latter to take this opportunity of stating, that I received the fullest assurance of their niest cordial support to a cabinet composed of Dr. Rolph; Mr. Dunn, and myself-and the expression of their opinions that, in the present conjuncture of public affairs, their being taken into the cabinet ought not to be further urged;—which disinterested course on their part; so consistent with the position which they hold in the public confidence, the country I am por-suaded cannot fail to appreciate. This renewal of the negotiation was, however, ultimately closed by my

Upon this, His Excellency sent for my Father, to whom he made a similar tender of a seat in the Erccarive Council, and his fullest confidence in the event of his accepting it; and I am authorised to say that Dr. Baldwin on that occasion, informed His Excellency that his views and principles were similar to thuse which had been already fully laid before His Excellency by me; and that he folt it impossible to take office in conjunction with the three gentlemen who

then formed His Excellency's Executive Council.
His Excellency then sent for Dr. Rolph to whom he made a similar tender of his confidence, Dr. Rolph having obtained His Excellency's permission to consult Mr. Bidwell, Mr. Dunn, my Father, and myself, it was in the course of that consultation pressed upon me, that as the principle of responsibility although long before the public had never yet been practically acted upon, and that taking it for granted (as it was but justice to His Excellency to do) that His Excellency, although mistaken in his views of the Constitution of the country, might yet he sincerely desirous of governing according to that Constitution, and that in that case all that would be found necessary was to convince. him that the views and principles which I had opened to him were just and constitutional, to insure their adoption, or the procurement of His Excellento accept a scatin the Executive Council.

It is proper that I should here remark, that though that notwithstanding what His Excellency had these principles were fully open to His Excellency at said with respect to the opinions of one memmy first interview, some parts of the conversation ber of the Council being neutralised by those of ano-above adverted to (though I believe none that could be ther, which appeared to arise more from a want of sufficient practical acquaintance with the workings of the political machinery of Government, which time & experience would necessarily correct, than from any other cause; it would perhaps not be performing our duty to His Excellency or the country, were we, after having gone thus far to meet our views, peremptorily to refuse all concession on our part.

To this reasoning having given a most reluctant consent, I empowered Dr. Rolph, in accordance with the course deemed by him most respectful to His Excellency, to state to the Lieuienant Governor that I was willing with His Excellency's permission, to reconsider His Excellency's proposal, and to consider the negotiation re-opened, upon the footing on which it stood previous to its having been last closed with me,—to which His Excellency having at once acceded, and ed me he had had with Mr. Bidwell, again opened the the negotiation having been thus re-opened, after some further consultation upon the subject with Mr. Dunn, His Excellency was finally informed that Mr. Dunn, Dr. Rolph and myself had, though reluctantly, consented in compliance with His Excellency's wishes, & as a mere experiment, and one which we scared would

Council, without the retirement of the three gentlemen who were already members of it.

Afterwards, on our all waiting on His Excellency, previous to our being sworn, I pointed out and insisted upon the necessity, that lest compromise of principle might be imputed to us, in consequence of the course we had taken, which in the public eye must necessarily appear equivocal, some announcement should he made of the unfettered terms upon which His Excellency was pleased to receive us into his confidence; which at His Excellency's suggestion was finally arranged to be in the shape of a note to that effect, to again finally declining to accept office, in consequence be addressed to me (as the person first sent for) by of His Excellency not feeling himself justified in con- His Excellency, and of we I was to be at liberty

o make any use that I might doem necessary or proper; which note was at my request, in accordance with the gracious permission which I had received, read publicly by a member of each House of Parliament in his place,—this being the only manner in which it appeared to me the information which it was necessary that the public should be in possession of could be communicated, consistently with the respect due to a communication, from the Representative of the King.

Copies of this note and of my acknowledgment of the receipt of it I subjoin. These negociations, partly retarded by my absence in the country, were in progress from the 8th until the 20th ultimo, on which day we were sworn into office.

Having thus explained the circumstances which led to our appointment, I have only to add with respect to our retirement from office, that the principles, the facts and the views which were afterwards embodied in the formal representation of the Executive Council were (at least ten days before being thus formally presented by His Excellency for consideration) at very considerable length, amicably discussed between the members of the Executive Council and His Excellency, and afterwards continued the subject of deliberate consideration among the members, themselves for another week, when on the fourth of this month, the formal representation alluded to was unanimously adopted & presented to His Excellency, with respect to which I shall only add, that the course of local Government, and the reasons for it, set forth in the representation' from the Council were thus officially suggested to the more formal consideration of His Excellency, from a solemn conviction that it was the only system which would operate " for the good of the King and of this Province, and for the peace, rest and tranquillity of the same."

To this representation the Executive Council on the following Thursday, being the next regular Conncil day, received His Excellency's reply. In this reply His Excellency having intimated his wish "that should the Executive Council be of opinion that the onth they had taken required them to retire from His Excellency's confidence, rather than from the principles they had avowed, they would not on his account for a moment hesitate to do so." The members of the Council on Saturday last waited on His Excellency, and tendered their resignations-which His Excellency was graciously pleased to accept; with respect to which I would here take the liberty of remarking, that having in the representation alluded to, but reiterating in a more formal manner in conjunction with my colleagues under the sanction of the oath which I had in the meantime taken, the same principles and opinions which His Excellency knew me to entertain previous to his honouring me with a sent in his Council, however desirous I might be of giving my best support to His Excellency's Government, or of not hastily abandoning the important duties of my situation, which had been most unwillingly assumed, I could not for a moment hesitate, when the alternative presented to me was the abandonment either of my principles or my place.

I have the honor to be, Dear Sir,

Your most ob't humble serv'r,

(Signed)

ROBERT BALDWIN.

PETER PERRY, Esq. M. P.

Copy.

Government House, Ecbruary 19th, 1836.

DEAR SIR:

I have great pleasure in learning that you, Dr. Rolph, and Mr. Dunn accept the invitation I, have made to you, by joining the Executive Council.

The confidence I shall repose in you will be implicit, and as I have no preliminary conditions either to accede to or require from you, I shall rely on your giving me your unbiassed opinion on all subjects, respecting which I may feel it advisable to require it.

I remain dear Sir,

(Signed)
R. Baldwin, Esq.

Your's faithfully, F. B. HEAD.

[Copy.]

Mr. Robert Baldwin has the honor to acknowledge the receipt of His Excellency the Lieutenant Governor's note of the 19th instant, and will transmit a copy to Mr. Dunn, and Doctor Rolph, without delay.

Front Street, 20th Feb. 1836.

D

ADDRESS OF THE COMMON COUNCIL OF THE CITY OF TORONTO.

To His Excellency, Sir Francis Bond Head, Knight Commander of the Royal Hanoverian Guelphic order, Knight of the Prussian Military Order of Merit, Lieutenant-Governor of the Province of Upper Canada, Sc. Sc. Sc.

MAY IT PLEASE YOUR EXCELLENCY,

We, His Majosty's dutiful and loyal subjects the Mayor, Alderman and Commonalty of the city of. Toronto, most respectfully beg leave to state, that at. the present most difficult and important era in the history of this Province, when this Council had fondly. hoped that the appointment of Your Excellency to the government of this country, with the accession to the Executive Council, appointed for the affairs thereof, of gentlemen of integrity and talent, known to possess liberal constitutional principles, would have secured to its inhabitants that wise, just and liberal policy so imperiously demanded, to strengthen the bonds of union between the mother country and the colony; this Council have with extreme regret and surprise, witnessed their just anticipation destroyed by the dissolution of the late Executive Council and the appointment of another in their stead composed of gentlemen who, however worthy in their individual private capacity, are incapable from their well known political views of giving satisfaction to the people, & that this Council, as the representatives of the inhabitants of the capital of Upper Canada (from this as . well as other causes not necessary to be here explained on account of their general notoriety,) have no confidence whatever in the present Provincial Administration, not deeming them competent to advise with the Representative of our Most Gracious Sovereign. upon the peace, welfare and prosperity of the Province.

We therefore most humbly pray Your Excellency to been pursued is erroneous, I will not for a momentto be pleased to dismiss Your present advisors, and callto Your council, gentlemen possessing the public confidence, as the only measure, in the opinion of this Council, calculated to insure the tranquility of the Province at the present crisis.

HIS EXCELLENCY'S REPLY.

MR. MAYOR and GENTLEMEN :- The particular interest which I take in the welfare of this Capital, of which I am myself an inhabitant, induces me to reply at some length to the address I have just received from you, in which you state,..

1st.—That you have no confidence in what you term "the present Provincial Administration,"

2ndly.-Ti : you beg leave to name for me other individuals for that station.

With respect to a "Provincial administration," although no such power exists in this or any other colony of the British Empire, I may remark, that very shortly after the late addition to the Executive Council, I observed that great efforts were making to delude and persuade the public mind that the new Council were entitled to claim the responsibility, power, and patronuge of the Lieutenant Governor, and that such an arrangement would be highly advantageous to the people.

Finding that this new theory was rapidly gaining ground, I resolved to offer it no secret opposition, nor in any way to exert my influence to oppose it; but I determined the very first time it should come well within my reach, that I would drag it into day light, in order that it might be openly, fairly and constitutional-

ly discussed.

From several places I subsequently received addresses on the subject, which I did not deem it advisable to notice; but to my astonishment there suddenly appeared from a quarter from which I cortainly least expected it, namely, from the Executive Council itself, a document (a copy of which had been inscribed in the Minutes of the Council, signed by all the six Councillors,) openly declaring that what had secretly been promulgated respecting the powers of the Executive Council, was actually the law of the land!

The question being fairly before me, I deliberately enposed it-accepted the resignation of the Six Councillors, and at the request of the Assembly I laid be-

the Council, with my reply.

The subject was thus formally brought before the public, and having performed this duty, I felt compar-utively indifferent as to the result; for if the power and patronage of this Province which have hitherto been invested in the Lieutenant Governor, really belong to his Council, I consider that without reluctance they ought at once to be delivered up and secured to them.

The House of Assembly, however, cannot alter the Constitutional Act of this Province-neither can I; and as regards popular meetings, I need hardly observe, that if the inhabitants of the whole Province were simultaneously to petition megto alter a single letter of that solemn Act, I have neither power nor in-

clination to do so.

If it should prove that the practice which has hither- term a "Provincial Ministry" at Toronto.

hesitate to acknowledge it; and in that case, I should feel it my duty at once to recall to my council the six members who have resigned; but I cannot be blind to the fact, that the Constitutional Act which is open to every body, does not create any Executive Council at all.

The members of the late Council rest their claims very nearly on the following grounds:

Ist: That the responsibility they assume, being a popular opinion daily increasing, is consequently the law of the land; and

2nd. That though the powers they acquire are no where expressed in the Constitutional Act, they were

evidently intended to have been inserted.

I conceive that these arguments do not even require to be refuted; and with respect to what General Simcoe or any other Governor may have asserted, I must also be permitted to assert, that the rights, liberties and property of the inhabitants of this Province, would be insecure indeed, if they rested on any such declarations.

The Constitution of this Province is the sacred charter of the land; and it is no less my duty, than the interests of its inhabitants than I should firmly main-

tain it, as I ever will, inviolate.

If that charter constitutes a "Provincial Ministry," it need only be shown to me, to be secured; but I deliberately repeat that it contains the creation of no such a power, and in my opinion, were it to be now created, it would be productive of the most vicious effects; for if the power and patronage of the Crown were to be delivered over to a tribunal sworn to secreey, they would very soon fall into the hands of a few metropolitan families wholmight possibly promote their own views, to the rejection of the interests of the distant Counties: whereas while these powers continuo invested in the individual appointed by His Majesty to be the Lieutenant Governor of this Province, he [being a stranger] can bave neither interest nor in-ducement to abuse them.

No one can be more anxious than I am, that this plain constitutional question should be gravely and calmly discussed, for it will be impossible for me to attempt to correct the grievances of the country, until I can prevail upon the Legislature to follow me cheerfully in the noble object we have in view; and I certainly do feel most deeply, that, for the sake of the people, those who are invested with power ought manfully to determine to lay aside all private feelings-to forgive and forget all political animosity, and to allow fore that House the communication I had received from His Majesty's wishes, and my instructions, to be promptly executed.

With respect to the want of confidence you express in the council I have just selected, I will only observe that in my judgement, they appear to be sensible, steady men of business, of high motal worth; and I cannot but recollect, that one of these gentlemen was, only a few weeks ago, actually the Mayor of your own city, selected by yourselves as being peculiarly entitled to the public confidence which you now declare is de-

nied to him.

With this moral before your minds, you surely cannot but admit, what a potitical tempest would continually exist—how the interests of the farmer would bo blighted, were the power and patronage of this thinly. peopled Province to be transferred from His Majesty's Lieutenant Governor into the hands of what you. E

ADDRESS FROM A PUBLIC MEETING HELD IN THE CITY HALL.

To His Excellency Sir Francis Bond Head, K. C. H. Sc. Sc. Sc.

MAY IT PTEASE YOUR EXCELLENCY.

We, His Majesty's dutiful and loyal subjects, the Inhabitants of the city of Toronin, assembled under the authority of the Mayor of the city, beg respectfully to submit to your Excellency, this our address, containing the expression of our sentiments and feelings in reference to the late changes in the Executive Council, and of the opinions which have been expressed by Your Excellency as to the nature of the Constitution of this Province:

That Colonel Simcon, the first as well as the ablest and most; enlightened Lieutenant Governor of this Province, who was a member of the Parliament of Great Britain when the Statute 31st Geo. 3, chap. 31, commonly called the Constitutional Act, was passed, was the benrer of that Act to this Colony, and was authorised undoubtedly by His Majesty's Government to declare to his faithful subjects in this Province, the miture of the Constitution, then about to be put into operation for their benefit, and who assured the people of this Province from the Throne, on, the opening of the first session of the Provincial Parliament that the said Act had "established the British Constitution, and all the forms which secure and maintain it in this distant country," and "that the wisdom & beneficence of our Most Gracious Sovereign, and the British Parliament has been eminently, proved, not only in imparting to usithe same form of government, but also in securing the benefits of: it by many: provisions that guard that memorable Act, so that the blessings of an invaluable Constitution thus protected and amplified; they might hope would be extended to the remotest posterity;" and that the same Governor upon closing. that session specially enjoined upon the members of the. Legislature from the Throne to explain to the people of the country "that this Province was singularly blest, not with a mutilated Constitution, but a Constitution which has stood the test of experience, and was: the very image & transcript of that of Great Britain."

That it is an essential an inalienable feature of the British Constitution thus assured to us, that the King shall be assisted in all the affairs of Government by the advice of known and responsible Councillors and Officers who possess the confidence of the people, and of the majority of their Representatives; and that our fellow subjects in the United Kingdom would indignantly resent any attempt to deprive them of this part of their Constitution, as an infringement upon their most sacred rights and liberties, and a step taken to degrade them to the condition of slaves.

That the recent appointment by Your Excellency of the Honorable John Rolph. Robert Baldwin, and Join Henry Dunn as Executive Councillors gave universal gladness and satisfaction throughout the Province, those gentlemen having been long known, beloved and respected for the talents, acquirements and virtues which adorn their characters; the liberal and patriotic principies that they entertain; and the important services which they have respectively rendered to the people of this Province; and that the selection of them by Your Excellency as your advisors disposed His Majesty's subjects to hope that a new and

happy ora had at longth arrived in the history of this Province.

That we have learned with surprise and sorrow that those gentlemen, together with the former members of Your Excellency's Council, have found themselves under the necessity of resigning their seats, and that Your Excellency appears to us, to have taken offence for no other reason than the respectful expression of an opinion in favor of the Government being conducted on the acknowledged principles of the British Constitution; an opinion supported by unanswerable arguments, and which they were bound by every obligation of honor and duty as faithful Councillors to express to Your Excellency.

That our most sincere respect and gratitude are due to those gentlemen and their late colleagues in Your Excellency's Council, for the noble efforts which they made in the lionorable and upright discharge of their duties, to secure to the people of this Province the practical bonefic and faithful application of constitutional principles of the highest importance to their liberty and prosperity; and that we are solemply called apparate such a crisis to declare our firm and analterable determination to resist every attempt to mutilate and deform our Constitution by the denial of those principles, on the refusal of the full benefit and practicall operation of them, and that the people of this Province will never, in our humble opinion, be content with a system that is only a mockery of as free and responsible:Government:

That we feel it our bounden duty to declare to your Excellency, that the gentlemen whom Your Excellency, has called to your Council, since the resignation of your late council, do not in any degree possess the confidence of the people of Upper Canada:

We further huntity express our disappointment and regretiation remarks which Your Excellency has; by evil and unknown advisers, been induced to animad-vertupon the circumstances under which Your Excellency caused your late Council to resign; and that respect which it is equally our duty and inclination to pay to the Representative of our Most Gracious Sovereign, forbids our declaring on this painful occasion any other feeling than that of an earnest hope that the persons, who ever they may be, who have been guilty of such an abuse of Your Excellency; confidence may be forever discarded by Your Excellency.

In conclusion, we begleave to state to Your Excellancy, that as subjects of the British Empire we claim all the rights and privileges of the British Constitution, and as subjects of a British colony possessing the pow ers of self-government given to it by the Parent State, we claim our right that the Representative of the Crown shall be advised in all our affairs by men known to, and possessing the confidence of the people; and as the true friends of His Majesty's Government, and to the permanency of our connexion with the Parents State we earnestly entreat Your Excellency to regard our opinions and temonstrances (firmly though we hope respectfully expressed) and to adopt measures to calm the present extraordinary state of public excitement, aggravated by the high hopes created in the pub-lic mind by the removal of Sir John Colborne, & the appoint of Your Excellency to the head of the administration.

By order of the Meeting.

(Signed) T: D. MORRISON, Maxor,
JAMES LESSLIE, Sec'y. Chairman.
Toronto, March 25th, 1835.

HIS EXCELLENCY'S REPLY.

GENTLEMEN: - Having reason to believe that the meeting from which you are a deputation, was com-posed principally of the industribus classes, and being persuaded that the liberal principle of the British Government, in whatever climate it may exist, is the welfare and happiness of the people, I shall make it my duty to reply to your address with as much attention as if it had proceeded from either of the branches of the Legislature, although I shall express myself in

plainer and more homely language.

1st. I have no wish to denv " that Colonel Simcoe was the first as well as the ablest and most onlightened Governor of this Province—that he was a member of Parliament when the Statute 31st Geo. 3, chap. 31, commonly called the Constitutional Act was passed; and that he was the bearer of that Act to this colony; but I ask you, can this possibly alter the solemn Act itself? for surely your own plain good sense will tell you, that Colonel Simcoe had no more power, either during his voyage or on his arrival here, to alter the charter committed to his charge, than I had power to alter the Instructions which I lately delivered from His Majesty to both Houses of your Legislature; and so, if Colonel Simcoe, instead of saying that the Constitution of this Province "was the very image and transcript of that of Great Britain," had thought proper to compare it to the arbitrary Governments of Russia or Constantinople, it would in no way have injured your liberties, or have altered one single letter of the written charter of your land.

2nd. I have no wish to deny "that in the British Constitution the King is assisted in all the affairs of Government, by the advice of known and responsible councillors and officers, who possess the confidence of the people," and who form His Majesty's Cabinet; but Colonel Simcoe, who you yourselves state "was authorised undoubtedly by His Majesty's Government to declare to his faithful subjects in this Province the nature of the Constitution," created no such cabinet, nor any cabinet at all, and from his day, down to the present hour, there has never existed any ministry in the colony, except the Governor, who is himself the

responsible minister of the Crown.

Supposing it were to be argued that four-fifths of the members of your House of Assembly ought immediately to be dismissed, because, in proportion to the population of Great Britain and Ireland, there exist five times as many members here as in the English House of Commons, would you not think it very irrational that this noble but thinly peopled colony should be made the exact image and transcript of the British Constitution' merely because Colonel Simcoe hap-pened to use these words?' Would you not immedi-ately appeal to your Constitutional Act on the subject?

Would you deem it just that a young rising Province like this, should be afflicted with the same expensive machinery requisite for the Government of the mo-

ther country, 4000 miles off?"

Would you not very fairly argue, that as the whole population of this immense country exceeds only by one-third that of the single parish of St. Mary-le-tione in London—and as the whole of its revenues does not equal the private fortune of many an English commoney, it would be unreasonable to expect that the people of this Province should be ruined in vainly at-

But the Constitution which His Britannic Majesty George the Third granted to this Province ordained no such absurdities; and you have only to read that Constitution, to see quite clearly the truth of this asser.

The yeamen and industrious classes of Upper Canada should never allow a single letter to be abstracted from, or added to, this great charter of their liberties; for if once they permit it to be mutilated, or what may be termed improved, they and their children become instantly liable to find themselves suddenly deprived of their property, and, what is better shan all property, of their freedom and independence.

By this Act, you are of course aware that a House of Assembly, a Legislative Council, and a Lieutenant Governor are appointed; but it creates no Executive Council: and if people tell you that it does, read the act, and you will see the contrary.

Now, as regards the House of Assembly, you must know, that being your Representatives, they are of course answerable to you for their conduct; and as regards the Lieutenant Governor, I publicly declare to you, that I am liable to dismissal in case I should

neglect your interests.

But, contrary to the practice which has existed in this or any other British colony, -contrary to Colonel Simcoe's practice, or to the practice of any other Lieutenant Governor who has ever been stationed in this Province, -it has suddenly been demanded of me that the Executive Council are to be responsible for my acts; and, because I have refused at a moment's warning, to surrender that responsibility which I owe to the people, -whose real interests I will never abandon,-I find that every possible political effort is now making to blind the public mind, and to irritate as most violent passions.

But I calmly ask, what can be the secret reason of all this? Is it usual for one person to insist on bearing another person's blame? or for a body of men to insist on receiving the punishment incurred by an individual superior to them in station 3-Why, therefore should my Council, whose valuable advice, if it were not to be forced upon me, I should be most anxious to receive, be required to demand from me my responsibility?-What reason can exist for attempting to deprive me of the only consolution which supports any honest man in an arduous duty, namely wither effection that he is ready to atone for every error he commits, and that he is subject to arraignment if he offends? Why should it be doclared that responsibility would be more perfect with the Council than with me? Are they purer from party feelings, or less entangled with their family connections, than I am? How can gentlemen who have sworn to be dumb, be responsible to the yeomanry and people of this rising Province?-How could they possibly undertake to administer this Government, with mouths sealed by amouth which forbids them to disclose, to any one, the valuable advice they may conscientiously impart to me?

The answer to these questions is very short. The political, party, which demand responsibility from my council, know perfectly well-that the power and par-ronage of the crown are attatched to it; and it is too evident, that if they could but obtain this marrows the empty bone of contention-namely a responsibility to the people, -they would soon be too happycto throw. away; and from that fatal moment would all these people of this Province should be ruined in value at a way, tempting to be the exect linege and transcript of who nobly appreciate liberty, who have property to the British Constitution.

that they had listened to sophistry, had been frightened by clamor, and had deserted the Representative of our Gracious Sovereign to seek British justice from his mute but confidential advisers. This supposition, however, I will not permit to be realized; for never will I surrender the serious responsibility I owe to the people of this Province; and I have that reliance in their honesty—I have lived so intimately with the yeomanry and industrious classes of our revered mother country, that I well know, the more I am assailed by faction, the stronger will be their loyal support,—and that if intimidation be continued, it will soon be made to recoil upon those who shall presume to have recourse to it.

The Grievances of this Province must be corrected—impartial justice must be administered: the people have asked for it—their Sovereign has ordained it—I am here to execute his gracious commands—delay will only increase impatience. Those, however, who have long lived upon agitation already, too clearly see their danger; and, with surprising alacrity, they are now taking every possible measure to prevent me from rooting up the tree of abuse, because they have built and feathered their nests in its branches. They asked, however, for the operation, and to amputation they must very shortly submit; for what's worth doing should always be done well."

I have come here for the avowed purpose of reform, but I am not an agitator; and, by command of our Gracious Sovereign, I will maintain the constitutional liberties of his subjects in this Province, and at the same time encourage, to the utmost of my power, internal wealth, agriculture, commerce, peace and tranquillity.

With respect to my late Council, I regret, quite as much as you can do, their resignation; but, before they took the oath of secrecy, (which appears in my judgment to be an oath of non-responsibility to the people,) I addressed to them a note which clearly forewained them, as follows:—"I shall rely on your giving me your unbiassed opinion on all subjects respecting which I may feel it advisable to require it."

Three weeks after they had joined the Council, they altogether, in a hody, disputed this arrangement; and accordingly we parted on a matter of dry law.

No one can deny that my view of the subject agrees with the practice of Colonel Sincoc, and of all the succeeding Governors of this Province down to the day of Sir John Colborne's departure; but that is no proof whatever that the practice has been right,—and if you would prefer to form your own opinion of the law, read the Constitutional Act.

With respect to my new council, whose high moral character I cannot but respect, I shall consult them as unreservedly as I had promised to consult those who have just resigned; and, if any competent tribunal shall pronounce that they are responsible for my conduct, no one will be a greater gainer than myself by the decision.

In the meanwhile I shall deal openly and mildly with all parties; and I trust that I can give you no better proof of my own intention to be governed by reason than the explanation I have just offered to yourselves, the citizens and industrious classes who attended the Toronto meeting.

In the name and on the behalf of His Majesty:

GEORGE P. R.

Instructions to our Right Trusty and Right Entirely Beloved Cousin and Councillor Charles Duke of Richmond, Knight of the Most Noble Order of the Garter, General of our Forces, Our Captain General and Governor-in-Chief in and over our Province of Upper Canada in America, or in his absence to the Lieutenant Governor or Commander-in-Chief of our said Province for the time being. Given at Our Court at Carleton House the ninth day of May, in the fifty-eighth year of our Reign.

CHARLES DUKE OF RICHMOND, K. G.

INSTRUCTIONS.

1st. With these Our Instructions you will receive Our Commission under Our Great Seal of Our United Kingdom of Great Britain and Ireland, constituting You Our Captain General and Governor-in-Chief in and over Our Province of Upper Canada and Lower Canada, bounded as in Our said Commission is particularly expressed in the execution therefore of so much of the Office and Trust We have reposed in You as relates to Upper Canada You are to take upon You the administration of the Government of the said Province and to do and execute all things belonging to Your Command according to the several Powers and Authorities of Our said Commission under Our Great Scal of Our United Kingdom of Great Britain and Ireland and of the Act passed in the thirty-first year of Our Reign therein recited and of these Our Instructions to You and according to such further Powers and Instructions as You shall at any time hereafter receive under our Signet and Sign Manual, or by Our Order in our Privy Council.

2nd. And you are with all due selemnity before the members of our Executive council to cause Our said commission to be read and published, which being done, You shall then take and also administer to each of the Members of Our said Executive council the several oaths, and subscribe to the Declaration therein required.

3rd. You shall also administer, or cause to be administered, the Oaths mentioned in Our said commission to all persons except as hereafter mentioned that shall be appointed to hold or exercise any Office, Place or Trust, or Profit in our said Province previous to their entering on the duties of such office; and you shall also cause them to make and subscribe the aforesaid Declaration, but in cases whore any such office, Place of Trust, or Profit in our said Province of Upper Canada shall be conferred on any of Our subjects who may possess the religion of the Church of Rome, you shall so often as any such Person shall or may be admitted into any such Office, Place of Trust or Profit, administer, or cause to be administered to him the Oath prescribed in and by an Act of Parliament passed in the fourteenth year of Our Reign intituled "An Act for making more effectual Provision for the Government of the Province of Quebec in North America," and also the usual Oath for the exescution of such Office, Place of Trust or Profit in lieu to admit an appeal to Us in our Privy Council though of all other Tests and Oaths whatsoever.

4th. Whereus we have thought fit that there should be an Executive Council for assisting you or our Lioutenant Governor or Person administering the Governcertain cases therein specified, and whereas by an Act he will effectually prosecute the same and answer the passed in the thirty-first year of Our Reign, it is decondemnation if the sentence by which the fine clared that the Governor, Lieutenant Governor, or was imposed in Your Government shall be con-Person administering the Government of the said Profirmed. vince, together with such Executive Council shall be of Quebec. In order therefore to carry the said Act whom you may esteem best qualitied for fulfilling the into execution, Our Will and Pleasure is, that you do Trust of such Executive Councillor. in all civil cases, on application being made to you for to You and the Executive Council of the said Province of Upper Canada in the manner prescribed by the ahove mentioned Act, and You are for that purpose to to their employment. issue alwrit as nearly in the accustomed manner before that security be first duly given by the appellant to ansentence be affirmed and if either party shall not rest satisfied with the judgment of You and such Executive standing Rule. Council as aforesaid, Our Will and pleasure is, that 8th. And to they may then appeal unto us in Our Privy Council, appeal be made within fourteen days after sentence, and good security be given by the appellant that he will effectually prosecute the same and answer the condemnation, as also pay such costs and damages as shall Executive Council be affirmed, Provided nevertheless where the matter in question relates to the taking or debated in the said Executive Council. demanding any duty payable to Us, or to any Fee of

the immediate sum or value appealed for be of a less value. And it is our further Will and Pleasure, that in all cases whereby Your Instructions You are to admit appeals unto Us in Our Privy Council execution ment of our said Province of Upper Canada for the shall be suspended until the final determination of such time being, we do by these presents nominate and ap- appeal, unless good and sufficient security be given by point the undermentioned persons to be of the Executhe appellee to make ample restitution of all that the
tive Council of Our said Province of Upper Canada, appellent shall have lost by means of such decree or

And whereas we are sensible that effectual care the passing of the above mentioned Act in respect of ought to be taken to oblige the Members of Our Execsuch appeals as the case will admit, returnable before tive Council to a due attendance, it is Our Will and yourself and the Executive Council of the said Prov. Pleasure in order to prevent the many inconveniences ince, who are to proceed to hear and determine such that may happen for want of a quorum of the Council Appeal wherein such of the Executive Council as shall to transact business as occasion may require, that it be at that time Judges of the Court from whence such any of the Members of our said Executive Council resappeal shall be made to You and to Our said Executiding in our said Province shall be reafter wilfully abtive Council as aforesaid, shall not be admitted to vote sent themselves from the Province and continue absent upon the said appeal, but they may nevertheless be above the space of six months together, without leave present at the hearing thereof to give the reasons of from You first obtained under Your Hand and Seal, or the judgement given by them in the causes wherein shall remain absent for the space of one year without such appeal shall be made provided nevertheless, that Our leave given them under Our Royal Signature their in all such appeals the sum or value appealed for do places in the said Executive Council shall immediately exceed the sum of three hundred pounds Sterling, and thereupon become void. And We do hereby will and require You that Our Royal Pleasure be signified to swer such charges as shall be awarded in case the first the several Members of our said Executive Council, and that it be entered into the Council Books as a

8th. And to the end that Our said Executive Council may be assisting to you in all affairs relating to Our provided the sum or value so appealed for unto Us do Service you are to communicate to them such and so exceed five hundred pounds Sterling, and that such many of these Our Instructions wherein their advice is mentioned to be requisite, and likewise all such others from time to time as you shall find convenient for Our Service to be imparted to them.

9th. You are to permit the members of Our said Exbe awarded by Us, in case the sentence of You and the ecutive Council to have and enjoy freedom of debate and vote in all affairs of public concern which may be.

10th. And whereas by the aforesaid recited Act Office or Annual Rents or other such like matters or passed in the thirty-first year of Our Reign it is prothings where the rights in future may be bound. In vided that the Seats of the Members of Our Legislaall such cases You and the said Executive Council are tive council shall become vacant in certain cases men-

tioned in the said Act. It is our will and pleasure that for imposing Fines, Forfeitures and Penalties, express if any Member of our said Legislative council shall at any time leave Our said Province and reside out of the for Us, Our Heirs and Successors, for the public uses same, you shall report the same to us by the first opportunity, through one of Our Principal Secretaries of State, and you are also in like manner to report that a clause be inserted declaring that the due appliwhether such Member of the said council is absent by your permission or by the permission of our Lieutentenant Governor or Commander in Chief of the said Province for the time being, and you are also in like manner to report, if it shall come to your knowledge that any such member shall at any time take or have taken the Oath of Allegiance or Obedience to any Foreign Prince or Power, or shall be attainted for treason in any Court of Law within any of Our dominions, that We may take such measures thereupon as We shall think fit, and you are to take special care that the several Provisions of the said Act respecting the several cases in which persons may or may not be entitled to receive write of summons to the said Legislative Council and to hold their places therein shall be duly executed.

11th. And for the execution of so much of the powers vested in you by Our said Commissioners and by virtue of the said Act as relates to the declaring that you assent in Our name to Bills passed by the Legislative Council and House of Assembly, or that you withhold our assent therefrom, or that you reserve such Bills for the signification of Our Royal Pleasure It is Our Will and Pleasure that you do carefully observe the following Rules, Directions, and Instructions, viz:

That the style of enacting all the said Laws, Statutes, and Ordinances be by Us, Our Heirs and Successors, by and with the advice of the Legislative Council and Assembly, of Our Province of Upper Canada, constituted and assembled by virtue and under the authority of an Act passed in the Parliament of Great Britain, entitled, "An Act to repeal certain parts of an Act passed in the fourteenth year of His Majesty's Reign, intitled, 'An Act for making more effectual Provisions for the Government of the Province of Quebec, in North America,' and to make further provisions for the Government of the said Province," and that no bill in any other form shall be assented to by you in Our name. That each different matter be provided for by a different Law, without including in one and the same Act such things as have no proper relation to each other.

That no clause be inserted in any Act or Ordinance which shall be foreign to what the title of it imports and that no perpetual clause be part of any temporary Law.

That no Law or Ordinance whatever he suspended altered, continued reviewed, or repealed in general words, but that the title and date of such Law or Ordinance shall be particularly mentioned in the enacting part.

That in case any Law or Ordinance respecting private property shall be passed without a saving of the right of Us, Our Heirs and Successors, and of all Persons or Bodies politic or corporate except such as are mentioned in the said Law or Ordinance, you shall declare that you withhold Our Assent from the same and if any such Law or Ordinance, shall be passed without such saving you shall in every such case declare that you reserve the same for the signification of Our Royal Pleasure thereon.

mention be made that the same is granted or reserved of the said Province and the support of the Government thereof, as by the said Law shall be directed and cation of such Money pursuant to the directions of such Law shall be accounted for unto Us, through Our Commissioner of Our Treasury for the time time being in such manner and form as we shall direct.

12. And whereas we have by our said Commission given you full Power and Authority subject as therein is specified and to these Our Instructions in that behalf to issue Writs of Summons and Election and to call together the Legislative Council and Assembly of our said Province of Upper Canada and for the purpose of electing the Members of the Assembly of Our said Province of Upper Canada, have also given you full Power and Authority to issue a Proclamation dividing Our said Province of Upper Canada into Districts, or Counties, or Circles and Towns, or Townships. Now Our Will and Pleasure is that you shall issue such Proclamation as soon as may be allowing nevertheless a reasonable time between the issuing thereof and the time of issuing the Writs of Summons and Election above mentioned.

13th. That all Laws assented to by you in Our name or reserved for the signification of Our Royal Pleasure thereon shall when transmitted by you be fairly abstracted in the Margins, and accompanied with very full and particular observations upon each of them that is to say whether the same is introductory to a new Law declaratory of a former Law, or does repeal a Law then before in being. And you are also to transmit in the fullest manner the reasons and occasion for proposing such Laws together with fair copies of the Journals and Minutes of the Proceedings of the said Legislative Council and Assembly, which you are to require from the Clerks or other proper Officers in that behalf, of the said Legislative Council and Assembly.

14th. And whereas, in the said Act it is provided, that in certain cases, Acts passed by the Legislative Council and Assembly of the Province, shall previous to any signification of Our Assent thereto, be laid before both Houses of Our Parliament of this Kingdom; and whereas, it is also provided in the said Act, that in certain cases, Provision may be made by the Acts of the Legislative Council and Assembly of the Province, assented to by Us, Our Heirs and Successors, (thereby reserving the Power of giving such assent to Us, Our Heirs and Successors only) you are to take especial care that in every such case you are to declare that you reserve such Bills for the signification of Our Pleasure thereon, and you will likewise reserve for such signification every other Bill, which you shall consider to be of an extraordinary or unusual nature, or requiring Our especial consideration and Decision thereupon particularly such as may affect the Property Credit, or Dealings of Such of Our Subjects as are not usually resident within Our said Province, or whereby Duties shall be laid upon British or Irish Shipping, of

Ireland. 15th. And whereas Laws have been formerly enacted in several of Our Plantations in America for so short a time that Our Royal Assent or Refusal thereof could not be had before the time for which such That in all Laws or Ordinances for levying Money Laws were enacted did expire. You shall not assent

upon the Produce or Manufactures of Great Britain or

in Our name to any Law that shall be chacted for a less time than two years, except in cases of imminent necessity or immediate temporary expediency. And you shall not declare Our assent to any Law containing Provisions which shall have been disallowed by Us without express leave for that purpose first obtainad from Us, upon a full representation by you to be minde to Us, through one of Our Principal Secreta-Law.

16th. Whereas we have thought fit by our Orders in Our Privy Council to disallow certain Laws passed in some of our Colonies and Plantations in America for conferring the privileges of naturalization on Persons being Aliens, and for divorcing persons who have been legally joined together in Holy Marriage; and whereas Acts have been passed in others of our said Colonies to enable Persons who are Our liege Subjects by Birth or naturalization to hold and inherit Lands, Tenements and Real Estates, although such Lands, Tenements and Real Estates had been originully granted to or purchased by Aliens antecedent to naturalization. It is Our Will and Pleasure that you do not upon any pretence whatsoever give your Assent to any Bill or Bills that may hereafter be passed by the Legislative Council and Assembly of the said Province under Your Government for the naturalization of Aliens nor for the divorce of Persons joined in Holy marriage, nor for establishing a title in any Person to Lands, Tenements, or real Estates, in our said Province, originally granted to or purchased by Aliens antecedent to naturalization.

17th. You are to give Warrants under your hand for the issuing of Public Monies for all public services and we do particularly require you to take care that regular accounts of all receipts and payments of Public Monies be duly kept, that the same from time to time berduly audited by our Executive Council, and that copies thereof, attested by you be transmitted every half year, or oftener if there should be occasion, to Our Commissioner of Our Treasury, or to our High Treasurer for the time being, and Duplicates thereof by the next conveyance, in which accounts shall be any) attending the establishment of the said Courts and specified every particular sum raised or disposed of to the end that we may take such measure as we may deem necessary for the examination of the said Accounts, and that we may be satisfied of the right and due application of the Revenues of our said Province of Upper Canada, and with the probability of the increase or diminution of it under every head and article thereof.

18. Whereas, by an Act of the Parliament of Great Britain, passed in the Fourth year of Our Reign, in-titled, "An Act to prevent paper Bills of Credit here-after to be issued in any of His Majesty's Colonies and Plantations in America from being declared to be a legal tender in payment of money and to prevent the legal tender of such Bills as are now subsisting from being prolonged beyond the periods limited for calling in and sinking the same," it is enacted that no Paper Bill or Bills of Credit should be created or issued by an Act, Resolution or Vote of Assembly in any of our Colonies or Plantations in America to be a legal tender in payment, and that any such Act, Order, Resolution or Vote for creating or issuing such Paper Bills or Bills of Credit, or for prolonging the legal tender of any such then subsisting and current in any of the said Colonies and Plantations should be null and void. And whereas, by another Act of our said Parliament,

"An Act to explain and amend the above recited Act passed in the Fourth year of our Reign as aforesaid, it is enacted that any Certificates, Notes, Bills, or Debentures which shall or may be voluntarily accepted by the creditors of the public within any of the Colonies of America, as security for the payment of what is due and owing to the said public creditors, may be made and enacted by the General Assemblies of the ries of State of the reason and necessity of passing such said Colonies respectively to be a Tender to the Public Treasurers in the said Colonies for the discharge of any duties, charges or debts whatsoever due to and payable at or in the said Public Treasuries of the said Colonies in virtue of Laws passed within the same, and in no other case whatsoever. It is our Will and Pleasure that you do in all things conform yourself to the Provisions of the said recited Acts, both with respect to the not assenting to any Bills which may be presented to you for the purpose of issuing or creating Paper Bills, or Bills of Credit to be a legal tender in payment, and the assenting to any Bills, by which such Certificates, Notes, or Debentures which may be voluntarily accepted in payment by the public creditors shall be made a legal tender to the Treasury for Taxes, Duties, and other payments to the Public

Treasury.
19th. You shall not remit any Fines or Forfeitures
of Ten Pounds, nor dispose of any Forseitures whatsoever until upon signifying unto the Commissioners of our Treasury or our High Treasurer for the time being, the nature of the offence and the occasion of such Fines and Forfeitures, with the particular sums or value thereof which you are to do with all speed, you shall have received our Directions thereon, but you may in the mean time suspend the payment of the said Fines and Forfeitures.

20th. And you are on every occasion to transmit to Us, through one of our Principal Secretaries of State (with all convenient speed) a particular account of all new establishments of Jurisdiction Courts, Offices and Officers, Powers, Authorities, Fees, and Privileges granted and settled within our said Province of Upper Canada, as likewise an account of all expenses (if Offices.

21st. It is Our further Will and Pleasure that all Commissions to be granted by you to any Person or Persons to be Judge, Justice of the Peace, or other necessary Officer, be granted during pleasure

only.

22nd. You are not to suspend any of the members

or to suspend or displace any of the Judges, Justices, Sheriffs, or other Officers or Ministers within our said Province of Upper Canada, without good and sufficient cause; and in case of such suspension or removal you are forthwith to transmit your reasons for the same to one of our Principal Secretaries of State.

23rd. And whereas frequent complaints has been made of great delays and undue proceedings in the Courts of Justice in several of our Plantations whereby many of our Good Subjects have very much suffered, and it being of the greatest importance to Our Service and to the welfare of our Plantations be every where speedily and daly administered, and that all disorders, delays, and other undue practices in the allministration thereof be effectually prevented. We do particularly require you to take especial core that in all Courts where you are authorised to preside, Justice be impartially administered, and that in all other passed in the thirteenth year of our Reign, intilled, Courts established within our said Province all Judges

and other Persons therein concerned do likewise perform their several duties without delay or partiality.

24th. You are to take care that no Court of Judicature be adjourned but upon good grounds, and also that no orders of any Court of Judicature be entered or allowed which shall not be first read and approved of by the Justices in open court, which Rule you are in like manner to see observed with relation to all proceedings of our Executive council of Upper Canada, and that all orders there made be first read and approved in such conneil before they are entered upon the Council Books.

25th. You are to take care that all Writs within the said Province of Upper Canada be issued in Our Name.

26th. You shall take care with and by the advice & assistance of our Executive council that such Prisons as may at any time be necessary be crected, & that the same or any other already erected be kept in such a condition as may effectually secure the Prisoners which now are or may hereafter be confined in

Offices than one by Deputy.

28th. You shall not by colour of any Power or Authority hereby or otherwise granted or mentioned to be granted unto you, give, grant, or dispose of any Place of Office within our said Province, which now is or shall be granted under the Great Scal of this Kingdom, or to which any person is or shall be ap, pointed by Warrant under Our Signet and Sign Manual, any further than that you may upon any vacancy of any such office or place, or upon the suspension of any such Officer by you as aforesaid put in any fit person to officiate in the interval till you shall have presented the matter unto us, through one of principal Secretaries of State, which you are to do by the first opportunity, and till the said office or place is disposed of by Us, Our Heirs or Successors under the Great Seal of this Kingdom, or until some person shall be appointed thereunto under Our Signet and Sign Manual, or until Our further directions be given therein. And it is Our express Will and Pleasure that you do give reasonable support to the Patent Officers in the enjoyment of their legal and established Fees, Rights, Privileges and Emoluments, according to the true intent and meaning of their respective

29th. And whereas several complaints have been made by the Officers of Our Customs in our Plantations in America that they have frequently been obliged to serve on Juries and personally to appear in Arms whenever the Militia is drawn out, and thereby are much hindered in the execution of their employments, Our Will and Pleasure is that you take especial care and give the necessary directions that the several Officers of Our customs be excused and exempted from serving in any Juries, or personally appearing in Arms, in the Militia, unless in cases of absolute necessity, or serving any particular Offices which may hinder them in the Execution of their Duties.

30th. And whereas nothing can more effectually tend to the speedy settling of our said Province of

passing of Grants of such Lands. It is Our Will and Pleasure that all and every person or persons who shall apply for any Grant or Grants of Land shall previous to their obtaining the same, make it appear that they are in a condition to cultivate and improve the same, and in case you shall, upon a consideration of the circumstances of the person or, persons applying for such Grants, think it advisable to pass the same, you are in such case to cause a Warrant to be drawn up directed to the Surveyor General, or other Officer empowering him or them to make a faithful and exact survey of the Lands so, petitioned for, and to return the said Warrent within six months at farthest from the Date thereof, with a Plot or description of the Lands so surveyed thereunto annexed, and when the Warrant shall be returned by the said surveyor or other proper Officer the Grant shall be made out in due form, and the terms and conditions required by these Our Instructions be particularly and expressly mentioned therein, and it is Our Will and Pleasure that the said Grants shall be registered within six months from the date thereof in the Register's Office and a Docket thereof be also entered in Our Auditor's 27. You shall not suffer any Person to execute more office, copies of all which Entries shall be regularly. returned by the proper officer to our commissioner of our Treasury.

31st. And for the further encouragement of our subjects, it is our Will and pleasure that the Lands tobe granted by you as aforesaid shall be laid out in Townships, and that each inland Township shall as, nearly as circumstances will admit consist of Ten Miles square, and such as shall be situated upon a navigable River or Water, shall have a front of Nine Miles, and be Twelve Miles in depth, and subdivided in such manner as shall be found most advisable for. the accommodation of the settlers and for the making the several reservations for the Public uses, and particularly for the support of the Protestant clergy, agreeably to the above recited Act, passed in the thirty first year of Our Reign.

32nd. And because great inconveniences have heretofore arisen in many of Our colonies in America from the granting excessive quantities of Land to particular persons, who have never cultivated or settled the same, and have thereby prevented others more industrious from improving such lands, in order therefore to prevent the like inconveniences in future, It is our Will and pleasure that you observe the following directions and regulations in all Grants to be made by you as aforesaid, that is to say:

That no Town lot shall be granted to any one person being Master or Mistress of a Family in any town ship so to be laid out, which shall contain more than one Acre.-That no Park Lot shall be granted to any. one person being Master or Mistress of a Family in. any Township so to be laid out which shall contain more than Twenty four Acres .- That no Farm Lot shall be granted to any one person being Master or Mistress of a Family in any Township so to be laid out which shall contain more than Two Hundred Acres.

It is our Will and pleasure, and you are hereby al-... lowed and permitted to grant unto every such person, and persons such further quantity of land as they may desire, not exceeding one Thousand Acres, over and Upper Canada the security of the Property of Our above to what may heretofore have been granted to Subjects and the advancement of our Revenue than the them, and in all grants of Land to be made by you. disposal of such Lands as are our Property upon good | as aforesaid you are to take care that due regard bo and reasonable terms, and the establishing of a regular | had to the quality and comparative value of the differand proper method of proceeding with respect to the ent parts of Land comprised within any township, so that each Grantee may have as nearly as may be a proportionate quantity of lands of such different quality and comparative value as likewise that the broadth of such Tract of Land to be hereafter granted be onethird of the length of such Tract, and that the length of such Tract do not extend along the banks of any River, but into the main land, that thereby the said Grantees may have each a convenient share of what accommodation the River may afford for Navigation or

33rd. And as a further accommodation to our subjects who shall become setttlers as aforesaid, it is our will and pleasure that the said townships and the respective allotments within the same, together with the lands to be reserved as aforesaid shall be seen and laid out by our Surveyor General of lands for the said Province, or some skilful person authorised by him for that purpose, which Surveys, together with the Warrants and Grants, and the respective allotments shall be made out for and delivered to the several Grantees free of any expense or fee whatever, other than such as may be payable to the different officers according to the table of fees established upon grants of land made in the said Province.

34th. And in order to prevent any persons disaffected to Us and our Government from becoming settlers in our said Province of Upper Canada, it is our will and pleasure that no Warrant for Surveying lands be granted by you or the Licutenant Governor, or Person administering the Government for the time being, unless the person or persons so applying for the same do at the time of making such application, besides taking the usual oaths directed by law, also make and subscribe the following declaration in your or his presence, or in the presence of such person or persons as shall by you or him be appointed for that purpose, that

I, A. B. do promise and declare that I will maintain and defend to the utmost of my power the authority of the King and his Parliament, as the supreme legislature of this Province.

35th. Whereas the reserving such bodies of land within our Province of Upper Canada, where there are considerable growths of timber fit for the use of our Royal Navy is a matter of the utmost importance to our service, it is our will and pleasure that no grants whatever be made of lands in any District or tract of our said Province of Upper Canada until our Surveyor General or his Deputy lawfully appointed, shall have surveyed the same, and marked out as reservations to Us, our Heirs and Successors such parts thereof as shall be found to contain any considerable growth of masting or other timber fit for the use of our Royal Navy, and more especially upon the rivers. And you are hereby intrusted to direct our Surveyor General of lands in our said Province from time to time, with all due diligence to complete the surveys and mark out the reservations as aforesaid, in the most convenient parts of said Province, and you are from time to time to report the number, extent, and situation of such reservations, and you are farther to direct our Surveyor General not to certify any plots of ground ordered and surveyed for any person or persons in order that grants may be made out for the same until it shall appear to him by a certificate under the hand of our Surveyor General of Woods, or his Deputy, that the land so to be granted is not part of nor included in any District marked out as a reservation for Us, our Heirs and Successors as aforesaid, for the purpose hereinbefore mentioned, and in order to prevent any deceit or religion of the Church of Rome only to which they are

fraud being committed by the persons applying for lands in this respect, it is our will and pleasure that in all grants to be hereafter made for fands within our said Province of Upper Canada, the following proviso. and exceptions be inserted, that is to say: " And pro-" vided also, that no part of the parcel or tract of land " hereby granted to the said

" and his heirs, be within any reservation heretofore "made and marked for Us, our Heirs and Successors "by our Surveyor General of Woods, or his lawful " Deputy, in which case this our grant for such part of "the land hereby given and granted to the said

and his heirs forever, as aforesaid, " and which shall upon a survey thereof being made " be found within any such reservation, shall be null "and void and of none effect, anything herein con-" tained to the contrary notwithstanding."

36th. And whereas it is necessary that all persons who may be desirous of settling in our said Province should be fully informed of the conditions and terms upon which lands will be granted within our said Province of Upper Canada, in the manner prescribed in and by the said Act, passed in the 31st year of our Reign, you are therefore as soon as possible to cause a publication to be made by Proclamation or otherwise, as you shall in your discretion think most advisable of the said terms and conditions respecting the granting of lands, in which Proclamation it may be expedient to add some short description of the natural advantages of the soil and climate and its peculiar convenience for trade and navigation.

37th. And it is our further will and pleasure that all the foregoing instructions to you, as well as any which you may hereafter receive, relative to the passing grants of land in conformity to the said Act, passed in the thirty-first year of our Reign, be entered upon record for the information and satisfaction of all parties whatever that may be concerned therein.

38th. And whereas it hath been represented to Us that many parts of the Province under your Government are particularly adapted to the growth and culture of hemp and flax, it is therefore our will and pleasure that in all surveys for settlements the Surveyor be directed to report whether there are any, or what quantity of lands contained within such surveys for the production of hemp and flax.

.39th. And whereas it has been represented to Us that several parts of our said Province of Upper Canada have been found to abound with Coals. It is our will and pleasure that in all grants of land to be made by you a clause be inserted reserving to Us, our Heirs, and Successors all Coals, and also all mines of Gold, Silver, Copper, Tin, Iron, and Lead, which shall be discovered upon such lands.

40th. You shall cause a survey to be made of all considerable landing places or harbours in our said Province, in case the same shall not already have been done, and report to Us by one of our Principal Secreturies of State how far any Fortifications be necessary for the security and advantage of the said Pro-

41st. Whereas the establishment of proper regulations on matters of Ecclesiastical concern, is an object of very great importance, it will be your indispensable duty to take care that no arrangements in regardthereto be made, but such as may give full satisfaction to our new subjects, in every point in which they have a right to any indulgence on that head, always remembering that it is a toleration of the free exercise of the

entitled, but not to the powers and privileges of it as an Established Church, that being a preference which belongs only to the Protestant Church of England.

42nd. And upon the principles therefore and to the end that our just supremacy in all matters Ecclesiastital as well as Civil may have its due scope and influence.

It is our will and pleasure, First that all appeals to a correspondence with any foreign Ecclesiastical Jurisdiction of what nature or kind soever, be absolutely forbidden under very severe penalties.

Secondly, that no Episcopal or Vicarial power be exercised within our said Province by any person professing the religion of the Church of Rome, but such only as are indispensably and indisputably necessary to the free exercise of the Romish religion, and in those cases not without a license and permission from you under the Seal of our said Province for and during our will and pleasure, and under such limitations and restrictions as may correspond with the spirit and provisions of the Act of the 14th year of our reign "for making more effectual provision for the government of the Province of Quebec," and no person whatever is to have Holy Orders conferred upon him or have the care of souls without a license for that purpose first had and obtained from you.

Thirdly, that no person professing the religion of the Church of Rome be allowed to fill any Ecclesiastical benefice, or to have and enjoy any of the rights or profits belonging thereto who is not a Canadian by birth (such only excepted) as are now in possession of any such benefices, and who is not appointed thereto by us, or under our authority, and that all right or claim of right in any other person whatever to nominate, present, or appoint to any vacant benefice other than such as may lay claim to the patronage of benefices as a civil right be absolutely abolished, no person to hold more than one benefice, or at least not more than can reasonably be served by one and the same incumbent.

Fourthly, that no person whatever professing the religion of the church of Rome be appointed incumbent of any Parish in which the majority of the inhabitants shall solicit the appointment of a Protestant Minister, in such case the incumbent shall be a Protestant with entitled to all tythes payable within such Parish, but nevertheless the Roman Catholics may have the use of the church for the free exercise of their religious worship of the Protestants, and in like manner the Protestant inhabitants in every Parish where the majority of the Parishioners are Roman Catholics, shall, notwithstanding, have the free use of the church for the exercise of their religious worship of the Roman Catholics.

Fifthly, that no incumbent professing the religion of the church of Rome, appointed to any Parish, shall be entitled to receive any tythes for lands, or possessions occupied by a Protestaut, but such tythes shall be received by such persons as you shall appoint, and shall be reserved in the hands of our Receiver General as aforesaid, for the support of a Protestant-Clergy in our said Province, to be actually resident within the same, and not otherwise, according to such directions as you shall receive from us in that behalf, and in like manner all growing rents and profits of a vacant benefice shall during such vacancy, be reserved for and applied to the like oves.

Sixthly, that all persons professing the religion of the church of Rome, who are already possessed of, or may hereafter be appointed to any Exclesiastical benefice, or who may be licensed to exercise any power or authority in respect thereto, do take and subscribe before you in Council, or before such person as you shall appoint to administer the same, the oath required to be taken and subscribed by the aforth Act of Parliament passed in the fourteenth year of the Reign entitled "An Act for making more effectual Provision for the Government of the Province of Quebec in North America."

Seventhly, that all incumbents of Parishes, professing the Romish religion, not being under the Ecclesiastical Jurisdiction of the Bishop of Quebec, shall hold their respective benefices during their good behaviour, subject however in case of any conviction for criminal offence, or upon due proof of seditious attempts to disturb the peace and tranquility of our government, to be deprived or suspended by you.

Eighthly, that such Ecclesiastics as may think fit to enter into the Holy State of Matrimony shall be released from all penalties to which they may have been subjected in such cases by any authority of the See of Rome.

Ninthly, that ficedom of the Burial of the Dead in the Churches and the Church Yards be allowed indiscriminately to every christian persuasion.

Tenthly, that the Royal family be prayed for in all churches and places of Public Worship, in such manner and form as is used in this Kingdom, and that our Arms and Insignia be put up not only in all such churches and places of holy worship, but also in all courts of justice, and that the Arms of France be taken down in any such church or court where they may at present remain.

43rd. You are to permit the liberty of conscience and the free exercise of all such modes of religious worship as are not prohibited by law to all persons who may inhabit and frequent the Province of Upper Canada, provided they be contented with a quiet and peaceable enjoyment of the same without giving offence or scandal to the government.

44th. It is our will and pleasure to reserve to you the granting of Licences for Marriage, Letters of Administration, and Probates of Wills, as heretofore excreised by you and your Predecessors, and also to reserve to you and all others to whom it may lawfully belong, the patronage and right of presentation to benefices, but it is our will and pleasure that the person so presented shall be instituted by the Bishop or his Commissary, duly authorised by him.

45th. You are to take especial care that God Almighty be devoutly and duly served throughout your government—that the Lord's day be duly kept, and the Services and Prayers appointed by and according to the Book of Common Prayer be publicly and solemnly performed throughout the year.

46th. You are to take core that the churches which are or may be hereafter erected in our said Province of Upper Canada be well and orderly kept.

47th. You shall recommend to the Legislative Council and General Assembly of the Province of Upper Canada, to settle the limits of Parishes in such manner as may be deemed most convenient.

the same, and not otherwise, according to such directions as you shall receive from us in that behalf, and in like manner all growing rents and profits of a vacant benefice shall during such vacancy, be reserved for and applied to the like oses.

48th. You are to use your best endeavour that each Minister be constituted one of the Vestry in his respective Parish, and that no Vestry be held without him except in case of sickness, or that after notice and applied to the like oses.

49. It is our Will and Pleasure that you recommend to the Legislative Council and Assembly of our said Province of Upper Canada, to make due provision for the erecting and maintaining of Schools where Youth may be educated in competent learning, and in knowledge of the principles of the Christian Religion.

50th. And it is our further Will and Pleasure that no person shall be allowed to keep a School in the Province of Upper Canada without your license first had and obtained. In granting of which you are to pay the most particular attention to the Morals and qualifications of persons applying for the same, and in all cases where the School has been instituted or appointed for the education of Members of the Church of England, or where it is intended that the School-master should be a Member of the Church of England, you are not to grant such licenses except to persons who shall first have obtained from the Bishop of Quebec or one of his Commissioners a Certificate of their being properly qualified for that purpose.

51st. And it is our further Will and Pleasure, that in order to suppress every species of vice, profuneness and immorality, you do forthwith cause all laws made against Blasphemy, Profaneness, Adultery, Fornication, Polygamy, Incest, Profanation of the Lord's day, Swearing and Drunkenness, to be strictly put in execution in every part of the Province of Upper Canada, and that for this purpose you do direct that the constables and Church Wardens of the several Parishes do make presentment upon Oath of any of the vices before mentioned to the Justices of the Peace in their Session, or to any other of the temporal Courts, and you are carnestly to recommend to the Legislative Council and Assembly to provide effectual laws for the restraint and punishment of all such of the aforementioned vices, against which no laws are as get provided, or in cases where the laws already made are found to be insufficient, and in order to discountenance vice and promote the practice of virtue to the utmost of your power, we do hereby strictly command and enjoin you to appoint no person to be a Justice of the Peace, or to any trust or employment whose notorious ill life or conversation may occasion scandal.

52nd. You are not to present any Protestant Minister to any Ecclesiastical Benefice within our said Province by virtue of the said Act, passed in the thirty-first Year of Our Reign, and of our commission to you without a proper certificate from the Bishop of Quebec or his Commissary of his being conformable to the doctrine and discipline of the Church of England.

53rd. And you are to take especial care that the Table of Marriages established by the Canons of the Church of England be hung up in all places of Public Worship, according to the Rites of the Church of England.

54th. It is our intention that the Peltry Trade, of the interior country should be free and open to our subjects, Inhabitants of any of our Colonies who shall pursuant to what was directed by our Royal Proclamation of 1763, obtain Trading Licenses from the Governor of any of our said Colonies under penalties to observe such regulations as shall be made by our Legislature of our Province of Upper Canada for that purpose.—These regulations therefore when established must be made public throughout all Our American Possessions, and they must have for their object the giving every possible facility to that Trade which the

nature of it will admit, and which may be consistent with just and fair dealings towards the native Indians with whom it is carried on.—The fixing stated times and places for carrying on the Trade, and adjusting modes of settling Tariffs, of the price of Goods and Furs, and above all the restraining the Sale of spirituous liquors to the Indians will be the most profitable and effectual means of answering the ends proposed.

55th. And whereas it is expedient for our Service that we should from time to time be informed of the state of the Trade and Fisheries, as well as of the Population of the said Province of Upper Canada It is our Will and Pleasure, that you do transmit to us through one of our Principal Secretaries of State, and to our committee of our Privy Council for Trade and foreign Plantations, for their information yearly, and every year a full and particular account of the state of the Fur and Peltry Trade, the nature and extent of the several Fisheries carried on by our subjects or others either on the Lakes or Rivers of the said Province-the state of the cultivation particularly specifying the quantity of Grain, Hemp and Flax produced, and of any other important branch of Trade which may in your opinion be undertaken and advantageously carried on by our subjects, -the number of Inhabimnts, distinguishing them under the different heads, of Men. Women, and Children, inserting in such account the number of persons born, christened, and buried, and any extraordinary influx or emigration from our said Province, specifying at the same time the number of Slaves and the number of our subjects, capable of bearing Arms in the Militia. The number and Tonnage of Shipping and Craft employed upon the Lakes and Rivers in or contiguous to the Province of Upper Canada-together with any information on these or any other points of the like nature which may be proper to be communicated to us.

56. And whereas you will receive from our Commissioners for executing the office of High Admiral of our United Kingdom of Great Britain and Ireland and of the Plantations, a Commission constituting you Vice Admiral of our said Province of Upper Caugha, you are required and directed carefully to put in execution the several powers thereby granted to you.

57th. Whereas it is absolutely necessary that we be exactly informed of the state of defence of all our Plantations in America as well in relation to the stores of war, that are in each Plantation as to the Forts and Fortifications there and what more may be necessary to be built for the defence and security of the same, you are from time to time to transmit an account thereof with relation to our said Province of Upper Canada, in the most particular manner and you are therein to express the present state of Arms, Ammunition and other stores of war belonging to the said Province either in any public Magazines, or in the hands of private persons together with a state of all places either already fortified or that you may judge necessary to be fortified for the security, of our said Province, and you are to transmit the said accounts to us, by one of our principal Secretaries of State and also Duplicates to our Master General or principal Officers of our Ordinance, which accounts are to express the particulars of Ordnance, Carriages, balls and powder and all other sorts of arms and Amunition now in our public Stores, and so, from time to time, of what shall be sent to you or bought with the public

money and to specify the time of the disposal and the also be equally observed by and binding upon such occasion thereof and other like accounts, half yearly in the same manner.

58th. And in case of distress in any other of our Plantations you shall upon application of the respective Governors to you assist them with what aid the condition and safety of our said Province under your Government can spare.

59. If any thing shall happen which may be of advantage or security to our Province under your government, which is not herein or by our Commission provided for we do hereby allow unto you with the advice and consent of our said Executive Council to take order for the present therein provided nevertheless that what shall be done be not repugnant to our Commission or Instructions and to the said Acts passed in the fourteenth and thirty first years of our reign, giving unto us by one of our principal Secretaries of State speedy notice thereof, that you may receive our ratilication if we shall approve the same :- Provided always that you do not by colour of any power or authority hereby given you commence or declare war without our knowledge and particular command therein except it be for the purpose of preventing or repelling hostilities or unavoidable emergencies when the consent of our said Executive Council shall be had, and speedy notice given thereof to us by one of our principal Secretaries of State.

60th. And whereas great prejudice may happen to our service and to the security of our said Province by your absence or the, absence of the Lieutenant Governor for the time being, you shall not upon any protence whatsoever come to Europe without having first obtained leave for so doing from us, under our signet and sign Manual or by our order in our Privy Council.

61st. And whereas we have thought fit by our Commission to direct, that in case of your death or absence from our said province, and in case there be at that time no person commissioned or appointed by us to be our Lieutenant Governor or appointed by us to administer the Government within the Province in the event of the death or absence of you and of our Lieutenant Governor of the said Province the Senior menther of the Executive Council who shall be at the time of your death or absence residing within our said Province of Upper Canada (subject to such other nomination and appointment by you under the Great Seal of our said Province as in our said Commission is in that hehalf mentioned) shall take upon him the administration of the Government, and execute our said Commission and Instructions and the several powers and authorities therein contained in the manner hereby di-It is nevertheless our express will and pleasure that in such case the person so administering the Government shall forbear to assent to any Acis, but what are immediately necessary for the welfare of our said Province without our particular orders for that purpose, and that he shall not take upon him to dissoive the Assembly then in being nor to remove or suspend any of the Members of our said Executive shall not gift need good, or promise of good, by any man, or by promise of any Judges. Justices of the Purce or promise of any their person, accept, or take, for any Council, nor any Judges, Justices of the Peace or other Officers. Civil or Military, without the advice and consent of the majority of the said Executive and consent of the majority of the said Executive council, and he is by the first opportunity to transmit to us by one of our principal Secretaries of State the to us by one of our principal Secretaries of State the reasons of such alterations signed by him and the Council and our will and pleasure is that the above Incondition, estate, or degree, that should attempt, or intend

other Executive Councillor as may be nominated and appointed by you under the Great Scal of our said Province by virtue of our said Commission in that behalf.

62nd. And whereas by our different Commissions we have appointed you to be our Governor and Commander in Chief of our Provinces of Upper and Lower Canada, our Province of Nova Scotia our Islands of Prince Edward and Cape Breton as well as our Province of New Brunswick, and it is our intention that the Lieutenant Governors Commanding in our said Province of Upper Canada, New Branswick, and Nova Scotia, and the Islands of Prince Edward, and Cape Breton should have and enjoy the full salaries, Perquisites and Emoluments granted to them and arising from their respective Governments in as full and ample a manner as if the said Governments were under distinct Governors in Chief. It is therefore our will and pleasuae that you shall not at any time or times when you shall be resident and Commanding in Chief in either of our said Provinces of Upper Canada Nova Scotia, or New Brunswick or the Islands of Prince Edward and Cape Breton, have or receive any part of the said Salaries, Perquisites, or Emoluments, but that the same shall continue to be paid and satisfied to the Lieutenant Governors of our said Provinces and Islands respectively, in the like manner as they usually are during your absence therefrom.

63rd. And you are upon all occasions to send to us by one of our principal Secretaries of State a particular account of all your proceedings and of the condition of affairs within your Government.

(A True Copy.)

J. JOSEPH.

Copy of the outh taken by every Member of the Executive Council.

"You do swear, that so far forth, as cunning and discretion sufficeth, you will justly, truly and evenly counsel and advise the King and his Representative in the government of this Province, in all matters to be communed, treated and demanded in the Executive Council, or by you as the King's Councillor, without partiality or exception of persons, not leaving or eschewing so to do, for affection, love, need, doubt or dread of any person or persons.

"You shall keep secret the King's council, and all that shall be communed, by way of counsel, in the same, and shall not discover it by worder writing, or in any otherwise, promotion, favoring, letting, or hindering any matter, or thing to be treated, or done in the said Council.

structions with respect to such senior Councillor shall the contrary, and generally, you shall observe; keep, and do.

all that a good and true Councillor ought to do unto his Sovereign Lord, or his Representative in this Province." JOHN BEIKIE.

Clerk Executive Council.

H

Address to His Majesty on the subject of the Legislative Council.

To the King's Most Excellent Majesty.

Most Gracious Sovereign:

We, Your Majesty's most dutiful and loyal subjects the Commons of Upper Canada, in Provincial Parliament assembled, humbly represent, that we have applied ourselves with the greatest deligence during the present session of the Provincial Parliament to various subjects of great interest to our constituents; and although our proccedings have been unavoidably interrupted, to a degree altogether unprecedented, by the trial of controverted elec-tions, and although many of the members of this Llouse have laboured under the disadvantage of having been without Parliamentary experience; yet the necessary measures on the subjects, to which we have alluded, have been brought to a satisfactory conclusion and completed as far as depended on this House, and have been sent to the Legislative Council. It is with no ordinary mortification and regret however, that we find our exertions during a most laborious session rendered unavailing in respect to most of these measures, by the rejection of them by the Legislative Council, among such as have shared this fate are, Bills, to protect the agricultural interests of this Province from a ruinous foreign competion-to provide for the just and equal distribution of the property of persons dying intestate-to secure an impartial trial by jury-and to take from the Sheriffs who hold their offices during pleasure, the power which they now possess of packing Juries—to relieve an excellent and meritorious class of your subjects from burdens and penalties which are imposed by the Militia laws of this Province, and which are oppressive on them, and which in time of peace are altogether unnecessary—to improve the system of our common and district schools, and to increase the public funds for their support—to amend the charter of King's College, in conformity with Your Majesty's gracious recommendations, and with the wishes which have at different times been strongly expressed to Your Majesty by your faithful subjects in this Province, so as to put that institution into operation on just and liberal principles-to provide for the sale of the Clergy Reserves and the application of the monies arising therefrom to objects of common benefit and great utility to Your Majesty's subjects in this Province, in accordance with Your Majesty's gracious invitations, and with the well known and often expressed wishes of Your Majesty's subjects—to promote the peace, freedom and independence of elections of members of Parliament, by adopting the mode of voting by ballot—to grant one hundred pounds per annum for five years to the Grantham and Bath Academies, institutions of education established by the voluntary contribution of the people, and on liberal principles. All these measures, and others which we will not trouble Your Majesty with enumerating, have been rejected by the Legislative Council without amendment, and the labours of this House, during a session which we think we may justly declare has been distinguished for unprecedented diligence and application to public business, almost entirely baffled and rendered uscless by the course pursued by the Legislative Council. If there were any reason to hope that these difficulties could be obtained or materially diminished in future we should not trouble Your Majesty; but the experionce of years convinces us, that on many subjects of great and general interest, there is such a disagreement of opinion between the Logislative Council, as now constituted, and the representatives of the people, as to bring us to the conclusion, which indeed the Legislative Council itself has expressed in relation to one of the most deeply interesting channels often contradictory and interested, a true and

of these subjects, namely :- That the Legislature of this Province cannot concur in any measure that will be satisfactory to Your Majesty's subjects in this Province. We are aware that Your Majesty has been officially informed by His Excellency Sir Jonn Colborne, that "composed as the Legislative Council is, at present the Province has a right to complain of the great influence of the Executive Government in it,—that it consists of seventeen members exclusive of the Bishop of Quebec; that of these, from accidental causes, not more than fifteen ever attend to their Legislative duties, that thus out of the members generally present, six are of the Executive Council, and four hold offices under the government; and that His Excellency had therefore intimated his intention of recommending to Your Majesty to increase the Legislative Council," and it was no doubt with a desire to remedy this evil, equally felt by the people and His Excellency, that Your Majesty has since added to their number. But it is our duty to assure Your Majesty that this change has not abated the evil of which we have such serious causes to complain, while it has on the contrary produced that further division, of responsibility amongst its members which lessens the consciousness of individual accountability without establishing any community of feeling or sentiment of respect between them and the people. We do not wish to advert to this unpleasant and mortifying condition of our public affairs in language that shall be disrespectful or offinisive to the Legislative Council; nor do we presume to prescribe to Your Majesty what expedient should be adopted to afford relief in the premises to Your Majesty's dutiful and loyal subjects in this Province, who. we are confident, desire that Your Majesty's attention should be called to it, and that we should humbly leave it to Your Majesty's wisdom to apply a suitable remady.

In connexion with this subject we feel bound to represent

to Your Majesty that it is the carnest desire of Your Majes. ty's faithful subjects, that Your Majesty's Government in this Province should be conducted by the advice of those who should be actually and practically responsible for their proceedings, and who would, as a consequence, he likely to recommend and favor such public measures as may be most desired by Your Majesty's subjects, and in their opinion most conducive to their interests. We behold You, Majesy in the administration of the affairs of the great Empire, which Providence has committed to Your Majesty's hunds, graciously consulting the wishes of your fuithful people, as expressed by their representatives, in the choice of responsible advisers to manage, under Your Majesty, the affairs of the government, and we have been accustomed to regard it as an essential and invaluable feature of the glorious constitution of our Mother Country. The same principles we wish to see applied in the practice of our Colonial Government; until that is done we cannot expect that the administration will give satisfaction to Your: Majesty's subjects, or that there will be any real and permanent harmony between the government and the representatives of the people. It is true that we might withhold the annual grant for the support of the government as a mark of our dissatis. faction with this state of things, and as a means of our procuring redress, but being anxious to evince our forbearance, and desire to avoid, as long as possible, contention and difficulty, as well as to show our confidence in Your Majesty's paternal regard for your faithful people in this Province and gracious attention to their constitutional rights; and being reluctant to resort to a measure which we are aware must greatly embarrass the government, until all other constitutional, means of seeking redress have been tried and proved unavailing, we have preferred thus to appeal to Your Majesty for Your Majesty's gracious and effective to Your Majesty for Your Majesty's gracious and effective to Your Majesty for Your Majesty's gracious and effective to Your Majesty for Your Majesty's gracious and effective to Your Majesty for Your Majesty specific to Your Majesty specific tual interference in our behalf; and have, notwithstanding our just disentisfaction with the existing state of things, and notwithstanding, the pecuniary distress which prevails in the Province, granted, for the present year, the necessary supplies for the support of the government, in the confident hope that effectual steps will immediately be taken for the removal of these obstacles to the peace, welfare, and good government of the Brovince. When it is considered that the Ministers, who, sometimes in rapid succession, fill-the Colonial Department under Your Majesty are strangers to our Province, and too distantly situated to acquire, through correct knowledge of the wants, wishes, and genius of Your Majesty's Canadian people, the practical need of local responsibility becomes more apparent and imperious. (Signed)

Commons House of Assembly, 15th April 1835.

Merritt,

" To the King's Most Excellent Majesty."

" Most Gracious Sovereign:

" We, Your Majesty's most dutiful and loyal subjects, the Commons House of Assembly of Upper Canada, in Provincial Parliament assembled, in full assurance of Your Majesty's earnest desire to promote the welfare of your people, beg leave, humbly to address ourselves to Your Majesty, upon a matter of the deepest interest to your faithful subjects in this Province." "We learn with extreme apprehension & regret, that at the instance of the Lords Commissioners of Your Majesty's

treasury Your Majesty has been advised to orientain the intention of disallowing two acts of the Legislature of this Colony, which were passed more than two years ago, the one for increasing the capital Stock of the Bank of Upper Canada, and the other for incorporating a second Banking Association in this Province, under the name of The Commercial Bank of the Midland District.

We humbly represent, that although the disallowance of these acts may appear sent, that although the disallowance of these acts may appear to be authorized by the letter of the Statute of the British Parliament, passed in the 31st year of the reign of Your Majesty's Royal Father, entitled "An act to repeal certain parts of an act passed in the fourteenth year of His Majesty's reign entitled "An Act for making more effectual provision for the government of the Province of Quebec, in North America," & to make further provision for the government of the said province" yet, it is contrary to its spirit and meaning, and of the principles of a free government. We meaning, and of the principles of a free government. We believe that this provision was intended to remedy any evil which might be occasioned by the Royal Assent being given in the Colony, to a Provincial Act that should be found incompatible with the rights and interests of other portions of the Empire, but we cannot think it was intended to give the power of interference with our internal affairs; against such an interference we respectfully, but plainly and solemnly protest, as inconsistent with those sacred constitutional principles which are essential to a free government; since it is manifest, that if Your Majosty's Ministers, at a distance of more than four thousand miles, and not at all controllable by or accountable to Your Majesty's subjects here, and pos-

sessing necessarily a slight and imperfect knowledge of the circumstances of this country, the wants, and habits and feelings of the inhabitants, and the mode of transacting businces among us can dictate a different course in relation to measures affecting ourselves only, from that which the peo-ple, by their representatives, and with the concurrence of the other branches of the Provincial Legislature have chosen. we are reduced to a state of mere dependence upon the will and pleasure of a Ministry that are irresponsible to us, and beyond the reach and operation of the public opinion of the province, and no one can rely upon our Provincial laws, although they may be constitutionally and deliberately formed but the most unhappy uncertainty and want of confidence will prevail and extend their disastrous influence over all our business transactions.1

"We respectfully claim the same right in behalf of Your Majesty's subjects in this Province to be consulted in the making of laws for their peace, welfare, and good government, which our fellow subjects in Great Britain enjoy. in respect to the laws to which their obedience is required; and although from the necessity of the case, power must be granted to the head of the Empire of preventing Colonial laws being adopted and enforced, which are incompatible with treaties between Your Majesty's government and foreign states, or with the just rights of any other of Your Majesty's colonies, yet with these exceptions, we humbly submit, that no laws ought to be, or rightfully can be dietated to or imposed upon the people of this Province, to which they do not freely give their consent, through the constitutional medium of representatives chosen by, and accountable to themselves."

"The force of our humble and dutiful remonstrance against the principle of an interference of Your Majesty's Ministers with our internal affairs, we are not willing to diminish, by insisting upon the inconveniencies and evils likely to follow from the exercise of the power, which the letter of the British Statute before quoted, gives to Your Majesty to disallow the Provincial acts which we have mentioned, but we cannot refrain from declaring our painful and settled conviction, that the disallowance of these acts after they have been for a long time in operation, so that the most frequent and ordinary, as well as the most extensive and important transactions of business in the Province depend upon their continued existence, would be attended with confusion and distress beyond, description, without any benefit to the Province and without any advantage whatever to any portion of Your Ma-jesty's dominions. We therefore respectfully and lumbly pray that Your Majesty, taking these matters into your favorable consideration will be graciously pleased not to disallow these provincial acts, and not to permit Your Majesty's Ministers to interfere with our internal affairs. but to leave the same entirely to the discretion and control of the Legislature of this Province."

"We beg to renew our assurances of entire dovotion to

Your Majesty's person and government.

"ARCHIBALD McLEAN,

Speaker."

To His Excellency, Sir Francis Bond Head, Knight Commander of the Royal Hanove-rian Guelphic order, Knight of the Prus-sian Military Order of Merit, Lieutenant Governor of the Province of Upper Canadu, f.c. f.c. fc.

MAY IT PLEASE YOUR EXCELLENCY.

We, His Majesty's dutiful and loyal subjects, the Commons of Upper Canada in Provincial Padiament assembled, beg leave to request, that Your Excellency will cause to be laid before this House, with as little delay as possible, an entire copy of what is generally termed "the King's Instructions" to the Governors of Upper and Lower Canada; and also copies of any other instructions not heretofore laid before this House, touching the duties or responsibilities of the Executive Council of this Province; as also any instructions from His Majesty's government touching the administering the government of this Province by any Executive Councillor, in the event of the death or removal from the Province of the Governor, Lieutenant Governor or person administering the government, and also copies of any bond or agreement between your Excellency and any of your present Executive Council, or between any two or more of the said Council, by which it is stipulated in what manner the government shall be administered, or who shall administer the government of this Province in case of the above named occurrence.

MARSHALL S. BIDWELL,

Speaker.

Commons House of Assembly, .23d March, 1836.

HIS EXCELLENCY'S REPLY.

GENTLEMEN:-

I herewith transmit as much of the information

desired by the House as I possess.

I have entered into no bond or agreement of any sort with my present Executive Council, and I do not possess, nor does there exist in Conncil any document of such a nature between two or more of the said Council.

L

Committee Room, House of Assembly, Monday, 28th March, 1836.

PRESENT:

PERRY, Chairman. Messas. DUNCOMBE, MORRISON, ROBLIN, NORTON.

ROBERT BALDWIN SULLIVAN, Esq., called in and interrogated.

Q. 1.—Are you senior member and presiding Councillor of the Executive Council?

A. 1.—Yes. Q. 2.—Is there any written agreement existing between yourself and any of the other members of the Executive Council, by which it is stipulated on your part in what way the government should be administered in the event of the death or removal from the Province of the Lieutenant Governor?

A. 2.—There is no agreement in existence by which it is stipulated how the Government of the Province shall be administered in the events mentioned in the question. At the time the Council were about to be sworn in, I expressed a wish that it might be understood that, in either of the events mentioned, it was my intention to resign my place as Executive Councillor; as it was not my desire, in any event; to fill the situation of Administrator of the Government.-At my request this intention was expressed in writing and I signed it.

Q. 3.—Is the instrument you mention, under seal,

or witnessed?

A. 3.—It is neither under seal or witnessed.

Q. 4.—Into whose hands did you deliver the document?

A. 4.—Into the hands of the Honorable William

Q. 5.—Did any other person know of the existence of the document i

A. 5.—Yes. It was not intended that my intention should be secret; His Excellency the Lieut. Governor was present when it was read and delivered to Mr. Allan.

Q. 6.-Did His Excellency the Lieut. Governor write the document, or was it written by His Excellen-

cy's order?

A. 6.-I proposed that my intention should be expressed in writing, and I wished that the writing should be drawn up by some person other than myself; upon which His Excellency being present, was kind enough to draw it up.

Q. 7 .- Was the writing intended to be legally bind-

ing upon you?

A. 7.—Certainly not.
Q. S.—What was the object or intention of the paper in question, if it was not intended to be legally

A. S .- It was intended for my own satisfaction, that it might not be said that I had it in view to fill the situation of administrator of the government.

Q. 9 .- Do you think you could constitutionally resign, in case of either of the above events, and give place to another who could administer the government?

A. 9.—I could transmit my resignation to His Majesty's government and decline taking upon myself the office of administrator of the government. I think it is the constitutional right of any individual to decline taking office upon himself, and as to giving place to another, that is not the act of the person declining office, but of the law.

Q. 10.—Do you not think, that in either of the above events taking place, you would be the adminis-trator of the government, without being appointed in any way?

A. 10 .- The senior Executive Councillor would, upon taking the oaths of office, be invested with the administration of the government, without any further appointment.

Q. 11.—Do you think, that upon your resignation, as above stated, the administration of the govern-

ment could be assumed by any other member of the lency on the affairs of the Province, to be one of the

A. 11 .- I think it could; either upon my resignation, or upon my refusal to take the oath of

> Committee Room, IIth April, 1836.

Henorable AUGUSTUS BALDWIN, called in and examined.

Q. 1.—Are you one of the present Executive Council ?

 Λ . 1 — Yes.

- Q. 2.—Have you any knowledge of a paper signed by Mr. Sullivan, in relation to the administration of the government in the event of the death, or absence from the Province, of the Lieutenant Governor?and were you present when such paper was exe-
- A. 2. -I was present when a paper was signed by Mr. Sullivan, for the purpose of Mr. Allan's becoming senior Councillor in the event alluded to.
- Q. 3.—At whose suggestion was the paper drawn up and signed?

A. 3.—At Mr. Elmsley's.

- Q. 4.—Into whose hands was the paper after execution delivered?
 - A. 4 .- I think it was into Mr. Allan's hands.

Q. 5.-Who drew it up?

A. 5.—Sir Francis Bead drew it up.

Q. 6.-What was the understood purpose of the

A. 6 .- That the administration might not devolve upon Mr. Sullivan, in case of cither of the above events.

Q. 7.-What objection was there to Mr. Sullivan's administering the government thus referred to?

A. 7 .- I know of none other than that Mr. Allan had preferable claims from his age and long standing in society. Mr. Sullivan made no objections when the thing was suggested, but immediately said he would acquiesce.

Q. S .- Are the committee to understand that the agreement or paper alluded to, was drawn up at the Government House?

A. S .- No. It was drawn up in the Executive Council Chamber-We went there to meet the Governor before sworn into office.

EVI

To His Excellency, Sir Francis Bond Head, Knight, Commander of the Royal Han-overeian Guelphic Order, Enight of the Prussian Military Order of Merit, Lieuper Canada, &c. &c. Sc.

MAY IT PLEASE YOUR EXCELLENCY:

Commons of Upper Canada in Provincial Parliament statement, by praying that a Council sworn in secrecy

most happy and wise features in the constitution, and essential to the form of our government, and one of the strongest securities for a just and equitable administration, and eminently calculated to ensure the full enjoyment of our civil and religious rights and privileges; has lately learned with no small degree of surprise and anxiety, that the Executive Council, so recently formed for the purpose above stated (as we presume) consisting of six members, did, on Saturday the 12th instant, unanimously tender to your Excel-lency their resignations; and that your Excellency was pleased to accept the same; and humbly to request your Excellency to inform this House without delay whether such are the facts, and also to communicate to this House full information relative to the cause of disagreement between your Excellency and your said late Executive Council, as far as lies in your Excellency's power to make known, as also to furnish this House with copies of all communications between your Excellency and your said late Council, or any of them, on the subject of such disagreement, and subsequent tender of resignation.

MARSHALL S. BIDWELL,

Speaker.

Commons House of insembly, 14th March, 1856.

HIS EXCELLENCY'S REPLY.

GENTLEMEN: -

Nothing can appear more reasonable to my mind than the surprise and anxiety which the House of Assembly express to me, at the intelligence they have received of the sudden resignation of the six members of the Executive Council, for with both these feelings I was myself deeply impressed, when firmly relying on the advice, assistance, and cordial co-operation of my Council, I unexpectedly received from them the embarrassing document which, with my reply thereto, I now, at the request of the House of Assembly, willingly present to you.

With every desire to consult my Council, I was preparing for their consideration, important remedial measures which I conceived it would be advisable to adopt, and had they but afforded me these few moments for reflection, which from my sudden arrivair among you, I functed I might fairly have claimed as my due, the question which so unnecessarily they have agitated, would have proved practically to be

Had they chosen to have verbally submitted to me in Council, that the responsibility, and consequently the power and patronage of the Lieutenant Governor, ought henceforward to be transferred from him to them; had they even in the usual form of a written petition, recommended to my attention as a new theory, that tenant Governor of the Province of Up- the Council instead of the Governor, was to be responsible to the people, I should have raised no objection whatever to the proceeding, however in opinion 1 might have opposed it, but, when they simultaneously declared, not that such aught to be, but that such ac-We, His Majesty's dutiful and loyal subjects, the tually WAS the law of the land, and concluded their, assembled, humbly beg leave to inform Your Excelto assist me, might be permitted, in case I disapproved lency, that this House, considering the appointment of their opinion, to communicate with the public, I felt it my duty, calmly, and with due courtesy to intogether my confidence, and to this opinion I continue situation. steadfastly to adhere.

I feel confident that the House of Assembly will be sensible, that the power entrusted to me by our Gracious Sovereign, is a subject of painful anxiety, that from the patronage of, this Province I can derive no advantage, and that I can have no object in retaining undivided responsibility, except that which proceeds from a just desire to be constitutionally answerable to His Majesty, in case I should neglect the interests of His subjects in this Province.

With these sontiments I transmit to the House of Assembly the documents they have requested, feeling confident that I can give them no surer proof of my desire to preserve their privileges inviolate, than by proving to them that I am equally determined to mainmin the rights and prerogatives of the crown, one of the most prominent of which is, that which I have just assumed, of naming those Councillors in whom I conscientiously believe I can confide.

For their acts I deliberately declare myself to be responsible but they are not responsible for mine, and cannot be, because being sworn to silence, they are deprived by this fact, as well as by the constitution, of all power to defend themselves.

To His Excellency Sir Francis Bond Head, Knight Commander of the Royal Hanoverian Guelphic Order, Knight of the Prussian Military Order of Merit, Lieutenant Go-vernor of the Province of Upper Canada, Sro.

We, His Majesty's dutiful and loyal subjects, the Commons of Upper Canada, in Provincial Parliament assembled, humbly beg leave to inform Your Excellency, that we have with deep regret learned that your Excellency has been induced to cause the late Executive Council to tender their resignations to seats in the Council, under circumstances which still enabled your Excellency to declare, that your estimation of their talents and integrity, as well as your personal regard for them, remain unchanged; and that under the present excited state of public feeling in this colony, occasioned by the recent proceedings between your Excellency and the late Executive Council, and the appointment of a new council (as appears by the Gazette Extraordinary of Monday the 14th March inst.) composed of Robert B. Sullivan, John Elmsley, Augustus Baldwin, and William Allan, Esquires, this House feel it to be a duty they owe, alike to His Most Gracious Majesty, and the people of this colony, whose representatives they are to avail themselves of the first opportunity to declare at once to Your Excellency the entire want of confidence of this House in the last mentioned appointments, and deep regret, that Your Excellency consented to accept the tender of resignation of the late Council, and humbly request your Excellency to take immediate should respond to the people.

form them, that they could not retain such principles, steps to remove the present Council from such their

MARSHALL S. BIDWELL.

SPEAKER.

Commons House of Assembly, 24th March, 1836,

HIS EXCELLENY'S REPLY.

GENTLEMEN:-

In reply to your address, I assure you. I very sincerely regret that the House of Assemly should entertain a want of confidence in the Council I. appointed on the 14th instant, as I faithfully declare, that under the circumstances in which I was placed, I made every exertion to select gentlemen that I thought would be most acceptable to the House and to tha people.

I can assure the House, that no one lamented more than I did, the resignation of the late Council, three of the members of which, namely, Messrs. Dunn, Buldwin and Rolph, I had myself especially sel-

With respect to the request " that I should take immediate steps to remove the present Conneil from such their situation," I might say, that I had hoped the House would have refrained from any such decided expression of its opinion, on the subject, until it had received the report of the committee to whom the subject was referred, and for whom the Government Oflice is now occupied in furnishing the documentary evidence they desire, but I am unwilling to discuss that question.

With respect to the " present excited state of public feeling in this colony occasioned by the recent proceedings" I feel guiltless of being its cause, inasmuch as to the House of Assembly, as well as to the people of all classes who have addressed me, on the subject, I have done every thing in my power to assure them of my desire that the question should be calmly settled, according to the spirit of the Constitution, and consequently according to the interests of the people.

I can assure the House, that far from entertaining any determination to maintain my opinion, merely because I have uttered it, I should be, at this moment, happy to abandon it, if the duty I owed to my Sovereign, and the people, could permit me, my mind invites rather than repels conviction, and hoping that the House will, on a subject which must surely occupy the attention of the whole country, meet me with a desire to be governed by reason and truth, I will concisely once again, submit to it my view of the

From the time of General Simcoe to the departureof Sir John Colborne, the practice of every Lieutenant Governor of this Province has been, to consider their Executive Councillors as advisors, sworn not to respond, or in other words not to be responsible to the

On my arrival here, finding this had been the practice, I also pursued it, but on preparing to add three popular members to the Council, one of them, Mr. R. Baldwin, with the sincerity which forms his character, tells me he thinks my Council, in spite of their oath, To this project I refuse to accede, a long argument ensues—and at last I write to Mr. R. Baldwin a note of which the following is an exact copy:—

"I shall rely on your giving me your unbiassed opinion on all subjects respecting which I may feel it advisable to require it."

After receiving this distinct statement of my intention not to alter the old practice, Mr. R. Baldwin sends a copy of the same to Dr. Rolph and Mr. Dunn, and they knowing my sentiments all three join my council.

After sitting in the council three weeks Mr. Baldwin's conscientions opinion again appears, convinces the other members, old as well as new, and the subject in a most formal manner is officially brought before me, with a request that if I disapprove of the opinion, the council may be allowed to address the people. On referring to the Constitutional Act, I am unable to comprehend their reasoning, and we consequently part on the same good terms on which we met. I retaining my unaltered opinion, while at least

four of the council have (since my arrival) changed theirs.

The whole correspondence I forward to the House of Assembly, with an carnest desire that, regardless of my opinion, the question may be fairly discussed. In the station I hold, I form one branch out of three, of the Legislature, and I claim for myself, freedom of thought, as firmly, as I wish that the other two branches should retain the same privilege.

If I should see myself in the wrong, I will at once acknowledge my error, but if I should feel it my duty to maintain my opinion, the House must know that there exists a constitutional tribunal competent to award its decision, and to that tribunal I am ever ready most respectfully to bow.

To appeal to the people is unconstitutional as well as unwise, to appeal to their passions is wrong—but on the good sense of the House of Assembly I have ever shown a disposition to rely, and to their good sense I still confidently appeal.

IR

GOVERNMENT House, 4th April, 1836.

Sin:

I have laid your letter of the 2nd instant before the Lieutenant Governor, and have the honor to forward to you by His Excellency's command, the documents therein applied for.

I think it right to add, for the information of the committee, that a Rejoinder to the Lieutenant Governor's answer to the Address of the Citizens of Toronto, was left at Government House in a scaled cover and returned unread to Mr. George Ridout, who had brought up and read to His Excellency the Address. That gontleman however disclaimed all participation in the Rejoinder, & forwarded it to Mr. Jesse Ketchum, one of the subscribers.

I have the honor to be, Your most obedient Humble Servant, J. JOSEPH.

Peter Perry, Esq., M. P. P. Chairman, &c.

B

REJOINDER.

MAY IT PLEASE Your EXCELLENCY:

We thank your Excellency for replying to our address "principally from the industrious classes of the city," with as much attention as if it had prococded from either branches of the Legislature, and we are deeply sensible, in receiving your Excellency's raply, of your Excellency's great condescension, in endeavouring to express yourself in plainer and more hamely language, presumed by your Excellency to be thereby brought down to the lower level of our plainer and more homely understandings. But we beg leave, in justification of those classes, to assure your Excellency that any comparison which may have passed in your Excellency's mind between them, and the more unfortunate and less favored, in the parishes of the Parent State, is by no means founded in truth. The industrious classes of this city have, for many years, been seriously impressed with the duty and importance of acquiring knowledge, for the general diffusion of which, they have by their own efforts, and at their own expense, (with the aid of generous and patriotic friends) so far successfully labored, as to be able to appreciate cheap, honest and responsible governments." good writing and fair reasoning.

We desire respectfully to inform your Excellency, in the plain and horaely language of industrious men, that any supposed necessity for this great condescension of your Excellency, could not have existed in any degree, had not past administrations sadly neglected our claims to the blassings of general education. Lest ing just and sententious language to us ;your Excellency should doubt our sufficient apprehen- "The grievances of this Province mu sion of the matter (though we have practically fult and suffered from the evil,) we, humbly, refer your Excellency to the language of our honest and honored re-

our Parliament:-"We have also been anxious, in past years, to make the means of education general and easily available, but it has only lately become known to the legislature, that a bountiful provision in lands was made by the crown about 40 years ago, though since deteriorated, by a recent secret unfavorable exchange for inferior lands. The University of King's College was grounded on Royal Charter, sought for and granted in 1826, upon principles, so exclusive and secturian, as to render it, descrivedly, unacceptable to the great body of the people, for whose benefit it was, professedly, intended; and although the most reasonable modifications were suggested by a series of resolutions in 1829, yet it is now, for the first time, that your Excellency has been enabled to announce, from his Majesty's government, any specific proposithat large appropriations have been made out of the University Fund, not to the district and township schools, undeservedly neglected, but to sustain Upper Canada College in this city, in which the sons of all the wealthiest families are educated, and which ought, therefore, to be supported, without so questionable an encroachment on public funds."

To this statement we can add, the untiring efforts of our representatives for the sale of the clergy reservos and the appropriation of their proceeds to the purposes of general education, have hitherto proved mayailing, and although a philosophical apparatus purchased out of the taxes gathered from the people, in the year 1800, has, ever since, been unused, mouldering and decaying in a garret of the Hospital, yet when the industrious classes, after cleaning and repairing it, humbly solicited His late Excellency, Sir John Colborne, for the use of it, in their institute, it was peremptorily refused.

We, therefore, humbly pray your Excellency, under these mortifying and humiliating circumstances to accept the above painful facts, and extracts from the records of our Parliament, as an apology for any alleged necessity for your Excellency's gracious condescension, in using plainer & more homely language, for the level of our understandings.

But it is because we have been thus mul-treated, neglected and despised in our education and interests under the system of government which has, heretofore, prevailed, that we are now driven to insist upon a change which cannot be for the worse. In the further language of our Commons' House of Assembly, we can aver that "the uniform experience of nearly half a century has forced the conviction, confirmed by the history af nations, that no richness of soil, or salubrity of climate, no wealth in public lands, or industry and economy among a deserving people, can insure their peace, welfare and prosperity without the possession of those suitable institutions which will yield

Now, your Excellency is pleased to answer us, on this occusion, by doclaring, that the system of government which has prevailed from the time of Sincor, is the best for us, although it has, by its vices, reduced us to so deplorable a condition of gricoances, that even your Excellency recognizes it, this day, in the follow-

"The grievances of this Province must be corrected -impartial justice must be administered—the people have asked for it-their Swereign has ordained it-I am here to execute his gracious commands, delay presentatives, at the opening of the present session of will only increase impatience:"-This is the exigency.

of our affairs frankly admitted by your Excellency, in street, which has failed of any good with the above both the civil and judicial departments; and surely it gentlemen of high pretensions to honor, character and is the province of wisdom, not merely to relieve the present exigency but to remove the causes which have produced it, in the past, and will, if suffered to continue, re-produce it in the future; for the like causes will ever produce the like effects. However much, therefore, we might commend the intention of your Excellency to see that "the grievances of this Province" are redressed, and "impartial justice administered," we are determined, by means of institutions better organized and directed, to prevent the recurrence of such wrongs; because it is wiser to prevent evil, than to hazard the correction of it, after it has arisen, or has perhaps, became inveterate.

Your Excellency is pleased to say,-" I am here to execute" &c. But your Excellency's predecessors throughout the history of this country have made similar professions yielding however, nothing but bitter disappointment. The issue of the administration of a Gore, a Maitland, and a Colborne has been equally disastrous; each, in its commoncement, holding forth expectations as flattering as those from your Excellency; but each, finally, aggravating our need for "griceances to be redressed, and impartial justice to be ad-ministere I." But the very fact, that your Excellency has begun, like your predecessors, is a reason for apprehending the same result; for it would be offensive to your Excellency to assume that they were less wise, impartial and honorable than any who may ever succoud them. The hopes of amelioration from each successive Governor have been uniformly delusive; and candor obliges us to assure your Excellency, that, even in this early period of your government, our condition has become more deplorable than ever, and the very nature and stability of our institutions involved in alarming uncertainty.

While our condition has been thus growing worse, under a succession of new Governors from England, they having been responsible to the Minister in Down-With our plain and homely understandings, we cannot comprehend how a responsibility to Downing-street, having failed of any good, with all your predecessors, should be all availing in your present government; for it is the same responsibility in nature and degree,-it is regulated by the same instructions,-it is reddered to the same distant government, 4,000 miles off, and guarded by such a system of secret despatches, like a system of espainage, as to keep in otter darkness the very guilt, the disclosure of which could, alone, consummate real and practical responsibility.

Daihousie and Aylmer, in Lower Canada, and Gore, Maitland, and Colborne in Upper Canada, have, severally, misgoverned their respective Provinces. The two former have been impeached by the people, severally retired from our country, after misconducting our affairs, under a nominal responsibility to Downing-street, till they had engendered an imperious necessity "for the correction of our grievances and the impartial administration of justice," yet in every case, they have been promoted higher, in direct proportion

station, cannot have any magic operation in your Excellency's administration, which, should it end, as it has, unhappily, begun, might make us drink the cup of national misgovernment to the very dregs without (as experience proves) redress on our part, or retribution on yours. "Facts are stubborn things." It is a mockery to invite us to rest our future hopes on an ineffectual, merely nominal responsibility, that has proved a broken reed, which, it would be folly, ever again to

Your Excellency has been pleased solumnly and publicly to declare, that being determined to hold an irresponsible, or more strictly speaking, an acceptable Executive Council, you hold yourself responsible for their inter, as well as your own; and considering the sort of council you have about you, we cannot foresee the magnitude to which your Excellency's responsibility may extend. On your Excellency's account, therefore, as well as our own, we do humbly and heartily desire to see you surrounded by confidential servants, not likely to involve your Excellency or dissatisfy the country. We do not, however, understand, how the Council can be called "non-responsible," when your Excellency voluntarily places yourself as a substitute, answerable for their misdeeds to the Minister at Downing-street. But who can avail himself of this responsibility, in order to seek any redress? Can it be reasonably required, that one of a community " whose whole revenue does not equal the private fortune of many an English commoner," shall carry his complaint 4,000 miles off, transmit the evidence, rebut any unjust defence, fee lawyers and agents, in a long, tedious, protracted litigation in Downing-street, worse than a suit in Chancery, where, before the matter can be investigated, one Minister succeeds another so rapidly as to defy continuous inquiry.

This responsibility to Downing-street has never yet saved a single martyr to Executive displeasure. Robert Gourlay still lives in the public sympathy, ruined in his fortune, and overwhelmed in his mind, by official injustice and persecution; and the late Captain Matthews, a faithful servant of the public, broken down in spirit, narrowly escaped being another victim. The learned Mr. Justice Willis, struggled, in vain, to vindicate himself and the wounded justice of the country; and the ashes of Francis Collins and Robert Randal lie entombed in a country, in whose service, they suffered heart-rending persecution and accelerated death. And even, your Excellency has disclosed a secret despatch to the Minister, in Downing-street, (the very alleged tribunal for justice,) containing most libellous matter against Wm. Lyon Mackenzie, Esq. M. P. P., a gentleman known, chiefly, for his untiring services to his adopted and grateful country. We will not wait through their representatives, and their very crimes, for the immolation of any others of our public men, instead of meeting punishment, have raised them to sacrificed to a nominal responsibility, which we blush higher honors. And although the three latter have to have so long endured for the rain of so many of his Majesty's datiful and loyal subjects.

It is easy to say when wrong is done by the Executive Council of the Province, to any individual or individuals—the Governor is responsible for them to the Minister at Downing-street; but for all practical ends, it might as well be said-at our antipodes. Your to the complaints of the people, without any redress Excellency asks us, with reference to your late Counfor their wrongs, or, even, censure of their oppressions. cil,—" Is it usual for one person to insist on bearing We do not mean, in our plain and homely statement, " another person's blame!"—It seems, may it please to be discourteous by declaring our unalterable con- your Excellency, to have been usual to do so, for you viction, that a nominal responsibility to Downing- insist upon being answerable for the acts of your Council, against their will. But, inasmuch, as it appears to your Excellency, as well as to our plain and simple. minds, unreasonable for one man to insist on bearing " another person's blame," we the more carnestly insist that the Executive council should hear their own blame, and not saddle it upon your Excellency, however graciously disposed your Excellency may be to assume it.

Your Excellency is pleased to say, that,-" the political party which domands responsibility for my Council, know perfectly well, that the power and patronage of the Crown are attached to it, and it is too evident, that if they could but obtain this marrow, the empty bone of contention, namely, responsibility to the people, they would soon be too happy to throw away.' Rospecting these strictures of Your Excellency on the purity of their motives) which we deem most patriotic and honorable) we forbear to offer any remarks. "Charity thinketh no coil." But confining our views to what can be gathered from the representations of your late Council, we had rather that the power and patronage of the Crown were exercised by your Excellency, after receiving the constitutious advice of your sworn advisers, known and acceptable to the people, than by your Excellency's unadvised and arbitrary pleasure; and we think the case rendered even worse, by the interference of a minister 4000 miles off, too distant from the scene of government, and too unacquainted with our complicated localities, to form a judgment, upon which he ought to decree, or with which the people interested ought to be satisfied. your Excellency is pleased to call the "marrow of the bane," is constitutionally intended to nourish, enrich, and benefit the "industrious classes," and the whole community; and your Excellency's candor, will, no doubt, pardon our reluctance wholly to confide (without the advice of your council) to your Excellency as "a stranger lately arrived among us, ignorant even of the political differences of the parent state and avowedly unacquainted with the wants and condition of this painful mertification and disappointment, to find, that

"bone" to which Your Excellency alludes, has been in the keeping of successive Governors responsible to the minister in Downing street; and at one time it aboun-ded with "marrow," and was, even, the nucleus for much solid and valuable nutriment, all intended to form a source of national wealth to be improved, husbanded and applied for our peace, welfare and good government. It is with profound, and we greatly fear with unavailing regret, we inform your Excellency, that while subject to the above custody and responsibility, the "bone" had been pecked so barc, as to leave little besides the " marrow" behind.

Under these circumstances we hope your Excellency will commend the "industrious classes," and others for so far learning wisdom from woful experience, as no longer to confide their best, present and future interests, their civil and religious liberties, and all that endears a man to his country or to the world, to a succession of Governors, nominally responsible at Downing-street, to a succession of ever-changing Ministers. It is unreasonable to expect it,—we should betray our country to consent to it.

4 honest man, in an arduous duty is the reflection that " he is ready to atone for every error he commits, and "that he is subject to arraignment if he offends."-

pleaded the same; have, even, been ready to make atonement by restitution, and after " arraignment" explated their crimes, according to law. But a Statesman, a Governor, or a King, is presumed to be influ-enced by higher motives and by more exalted princi-ples. The discharge of, even, an arduous duty cannot, and ought not, to be satisfactory to us, if performed in an unconstitutional way. In some countries the end gained, however valuable, might be so tainted by the means, as to make it treason. We desire not only to be governed well, but to be governed constitutionally; at the very least, according to the present charter of our liberties. The fear of personal liability to "atonement" or "arraignment" is a very subordinate protection against the abuse of power, when the complaint is made against a person, entrenched in authority, and armed with patronage; whose very breath confers influence and office, or takes them away, whose liability is to the very Minister, who is his patron, and is naturally disposed to view, even, his aberrations with a favorable and excusing eye. account, among others, we desire, in our government, some higher security than a disposition to atone, or a liability to an arraignment, in its nature and circumstances, almost, impracticable and, almost always, un-

It is on this account, may it please your Excellency we desire to see every Governor surrounded by confidential advisers; who, from their local knowledge, can supply with sworn advice, as the surest me ans of preventing error or the humilating necessity of "atonement" or "arraignment" for it. According to Holy-Writ "in a multitude of councillors there is safety;" it is, therefore, natural for us, rather to wish to see the management of our affairs, by your Excellency, with the aid of an acceptable council, than by your Excellency alone.—Your Excellency must take advice, upon assuming a new government, in a country, in which you are a stranger; and it has been, to us, a source of your Excellency was consulting irresponsible individu-We beglowe to assure your Excellency, that the als, noither possessing nor entitled to political confidence even to the humilating exclusion of your sworn advis-ers, provided by law and selected by yourself. Hence, it is, that there has, scarcely, been a single act of your administration, satisfactory to the community, your Excellency, perhaps, intended to serve.

It is against ourselves and our friends engaged in the common cause of constitutoinal government, that your Excellency seems to direct the charge of preventing your "rooting up the tree of abuse, because they have built and feathered their mests in its branches." In this "tree," many, indeed, have "built and feathered their nests"; but, heretofore, reformers have never been allowed, even, to perchupon its branches, repose in its shade, or partake of its fruit. The ultra-tories, who have, unhappily, held your Excellency's ear and confidence, have enjoyed a complete monopoly; and it is an historical fact, that our Governors, among the rest, have "built and feathered their nests," and, then, carried their accumulated wealth, with themselves, out of the country. We trust your Excellency, will feel on this subject, how unjust it is that a community (as your Excellency observes) whose public revenues do We cannot altogether agree with your Excellency not exceed the income of many a commoner in Eng-that "the only consolation which should support an land, should be called upon to pay for the administration of even, an irresponsible government, a sum almost equal to that received by the President of the United States, with a transcendant wealth and power The highway-man and the pirate might and often have that put our comparative condition to shame.

We are surprised at the information your Excellency gives us, that the Executive Council of the Province is "sworn to be dumb;" for we always thought they were sworn to advise the King and his representative, upon our affairs. Supposing Your Excellency were so fur to unseal their months, as freely to recoive their advice, we see no difficulty in its being given secretly, yet responsible. In England Ministers give their advice, under an eath of secreey, and are There can be therefore, no greater atill responsible. inconsistency in such a relation subsisting between Your Excellency and Your Council. Actions often indicate more strikingly than words; and although your Councillors cannot reveal what they say, the We care not whole country can see what is done. how dumb they are out of the council, if their mouths are not scaled in it, and the Province is allowed to feel and enjoy the manifest fruits of their counsel, without knowing what it was. The souncil should be responsible for giving good advice, while Your Excellency would retain enough of responsibility by deciding up-We should not the better esteem a Judge who refused to listen to an argument before he gave a judgment; or a jury who sealed their ears against the charge of a judge, in order to manifest their self-suf-ficiency in giving a verdict. The Judge condecends to hear the argument of a counsel, the jury listens to the judge's charge, and Your Excellency should, it seems to our "plain and homely" minds, listen on all subjects to the conscientions advice of sworn advisers, selected by yourself, for their "talents and in-

tegrity."
We have carefully read, as your Excellency recommended, the Constitutional Act, and, although your Excellency assures us, that by it "a House of Assembly and Legislative Council and a Lieutenant Governor are appointed, but that it creates no Executive Council," yet we read so clearly, in three several places, almost the very same comprehensive words, viz: "With the consent of such Executive Council as shall be appointed by his Majesty, his heirs and successors, within such Province, for the affairs thereof," that we must believe some evil and irresponsible advisors have put into your Excellency's hands a muti- the Privy Council, under outh, advise his Most Gralated copy of our Constitution. We cannot reconcile clous Majesty. This is what the Constitutional Act your present declaration with your reply to your late implies,-it is what Simcee announced,-it is what Exocutive Council, in which your Excellency distinctly admits, that the most liberal construction which can own consent, can lawfully abridge or take away. possibly be put upon that act amounts to this:—"That an Executive Council was evidently intended to ex- principles, you will exercise arbitrary sway,—you will us an Executive Council was evidently intended to extotally extinct, until its successor was appointed. Justly forfeit our submission to your authority. However this latent intention of his Majesty to create a Council for each of the Provinces of his Canadian dominions, was soon clearly divulged in a most imporunt document, commonly called the ' King's Instructions,' in which the Executive Council was regularly constituted and declared as follows: "Whereas we have thought fit that there should be an Executive Council for assisting you, or the Lieutenant Governor or person administering the government of the suid-Province of Upper Canada? \* " and to the END that our said Executive Council may be assisting you in ALL affairs relating to our service you are to communicate to them, so many of our instructions, wherein their advise is mentioned to be requisite, and likewise all such others, from time to time, as you shall find convenient for our service to be imparted to them."

It is therefore as plain as law can be written, that the Constitutional Act provided for the appointment, by

His Majesty, of an Executive Council, & that the King: has accordingly, created such a Council " to the did that they might be assisting to your Excellency in all affairs relating to His Majesty's service." This council so organized, is now as much a part of our constitution as the great council of Parliament. The law allows as the great council of Parliament. the people to elect the House of Assembly, and gives the King the power of summoning whom he pleases to the Legislative and Executive Councils; all are alike created or provided for by this Act, though it does not specify by name, the particular individuals to constitute either of them.

We welcome the concession of Your Excellency, to the merit of the able and enlightened SIMCOE, to whose memory we would cheerfully erect a monu-We never said that the justly revered representitive of the King either did or could after the law. But we still think, that an able and enlightened man, who assisted in passing the law, amidst all the debates upon it, and who was, first commissioned to put it into operation amongst us, was, of all men, best qualified to explain that law, and its intended scope and appli-Simcon, with all his personal knowledge abont the law and law givers, declared that it was intended to give us, not a mutilated Constitution, but one, " the very image and transcript of that of Great Britain;" Your Excellency, on the contrary, after the lapse of nearly half a century, asserts, that neither the law nor the law givers, (of whom Simcoc was one) ever gave or intended to give what Simcoc, in the name of the King, solemnly announced from the Throne.

In England, our follow subjects have a King, with his Executive Council (commonly called his Privy Council;) a House of Lords and a House of Commons: in this country we have corresponding institutions, viz: a representative of the King, with an Executive Council, a Legislative Council, and a House of Assembly. We only ask that these institutions should be put into operation in a manner corresponding to what is practised in England, and consequently that the Executive Council, under outh should as fully and freely advise Your Excellency on affairs here, as our liberties require, and what nothing, without our

ist, the commant of the old one ought not to be deemed violate our charter, virtually abrognite our law, and

We have the honor to be, Sir,

Your Excellency's Most Obedient, Humble Servants JESSE KETCHUM. JAMES H. PRICE, JAMES LESSLIE, ANDREW McGLASHAN. James Shannon, ROBERT McKAY, M. McLEELAN TIMOTHY PARSONS, WILLIAM LESSLIE,

JOHN MILLS E. T. HENDERSON, JOHN DOEL, JOHN E. TIMS WM. J. O'GRADY...

Front Street, 12th April, 1836.

In answer to your letter of this day, in which, after referring to a paragraph in the Lieuten-unt Governor's reply to the address from the citizens of Toronto, you add, "as you and your late colladgue are charged with having first entered into an arrangement clearly forewarning you of the extent to which you would be conneilled; and then altogother in a body disputing it, I write this communication that you may give any justification of your conduct you may desire." I beg leave to state, that the expressions to which you allude seem to be understood by the committee in a sense much more extensive than could have been intended by the Lieutenant Governor, for though, as stated in my letter to you of the 16th ultimo, his Excellency frankly avowed his dissent from my views of the constitution, so far from his giving me the least reason to suppose that I was never to offer my advice except when called apon for it, or that my view of the practical administration of the government under the constitution was not again to be recurred to, he himself" suggested as an inducement to me to accept of a seat in the council, the increased facilities which by my place in the Executive Council, would be afforded towards the more efficiently representing and urging my views, his Excellency declaring that his doors should, at all times, be open to me, and that he should be happy to listen and give his most serious consideration, to any subject which I might, at any time, think it important to lay before him; and, indeed, the whole tenor of my official intercourse with his Excellency was inconsistent with the presumption that my advice was never to be given except it was asked.

Another circumstance which would seem to shew that a sense has been put upon the Lieutenant Governor's words, which they could scarcely have been intended by him to bear, is, that his Excellency alleges "that we parted on a point of dry law," he could not, therefore, intend to impute to us the breach of any

agreement, cither express or implied.

Agnin, his Excellency more than once declared, that he should not have been at all surprised had the representation proceeded from me; whereus, had it been any breach of a supposed previous understanding I was as much a party to such understanding as either of my colleagues Mr. Dunn, or Dr. Rolph, and of course

equally involved in the consequences.

But not to multiply reasons, I need only add as finally conclusive upon this subject, that his Excellencys words, understood in the sense alluded to, would be wholly inconsistent with the fact.—It nover was understood, previous to our being sworn in, nor did any thing whatever transpire previous to that period, which could have given his Excellency, any ground for supposing it to be understood by us, either that we were not to offer an advice whenever we thought it proper to do so, or that the subject of the adoption of my views of the constitution was to be dropped. In fine, I can safely assert, that had his Excellency given me the slightest hint, that he expected I was never to offer my opinion except when required to do so, I should have unhesitatingly rejected the proposal to join the Executive Counnil on such terms; but the whole the Executive Council on such terms; but the whole expect; or, if this had been refused; have resigned on tenor of the conversations which I had the honor of that ground alone. holding with his Excellency previous to my being sworn in, to say nothing of the express assurances a to you and the note; afterwards sent, to differ ? The hove alluded to, excluded such a supposition from once draft was more explicit as the unfettered terms upon suggesting itself to my mind.

I therefore feel bound to state; that any other construction put upon the terms on which I accepted office, than such as is to be gathered from the statement contained in those paragraphs of my former letter above quoted; is wholly erroneous.

I have the honor to be, Sir, Your obedient humble servant, (Signed)

ROBERT BALDWIN.

P. Perry, Esq. Chairman of committee, &c.

Committee Room, 13th April, 1836.

ROBERT BALDWIN, Esq., called in & examined.

1. On what day were the Hon. John Henry Dunn, Dr. Rolph and yourself sworn into office as Executivo Councillors?—On Saturday the 20th February last.

2. Was the Lieut. Governor's note to you, a copy of which you appended to your letter to Mr. Perry of the 16th of March last, received by you provious to your being sworn in ?—It was not.

S. When was it received?—At ten o'clock in the evening of the day on which we were sworn in-but I was given to understand that an accidental circumstance had occasioned its not having been delivered at

an earlier period on the same day.

4. Is it such a note as you had reason to expect from the conference, mentioned by you in your letter to Mr. Perry, in which it was settled to be written?-I conceive not. I cannot pretend to recollect the exact terms of the draft written by his Excellency on that occasion and then read to us; but I do not hesitate to say that it materially differed from the note I afterwards received. Dr. Rolph happened to be with me at the time I received the note, and I at once expressed my entire dissatisfaction with its contents, and proposed taking it back to the Lieutenant Governor and refusing to receive it. I was however persuaded by Dr. Rolph and Mr. Dunn, whom I called to see upon the subject, on the Monday after, that, as it could not be that His Excellency intended any thing disingennous by us, and as the public would, no doubt, put a liberal construction upon the letter, it was better, more particularly as we had been actually sworn in, to let it pass without further difficulty. I must however add that when the draft was read over to us by His Excellency, as he did not seem quite satisfied with the wording, it was understood that he was at liberty to alter its phraseology; retaining, of course, its spirit and substance; and I certainly attributed the differonce between the draft read to us and the note which I afterwards received, entirely to His Excellency's being unable from his want of practical acquaintance with political life, fully to comprehend the difficulties which I felt in yielding to his request to join his Council, and not to the slightest desire on his part to deviate from the spirit of the understanding. Such was certainly my impression at the time, but had I suppossible diar such application of the mexpected terms in which His Excellency's note was conclied, as is now attributed to His Excellency; could have been intended; I should certainly have returned the note, and insisted on such a one as Lhad reason to

5. In what respect do your conceive the draft read which I took office, and although I could not say it

lency would place in our advice when " required," it was by no means the prominent feature in the draft; and I can safely say could only have been understood both by myself and my colleagues merely as a general expression of confidence, and not as a limitation of the duties expected of us; and I feel convinced that His Excellency could have used it for no other purpose, because he had no reason to suppose that we could have understood it in any other-and to imagine the contrary would be to attribute to His Excellency that he had made use of terms to us to which he applied one sense at a time that he know us to receive them in another, without explaining the sense in which he intended them to be understood.

6. It appears from his Excellency's answer to the address of the House of Assembly of the 26th March, that the note which he wrote to you, of which the following is an extract: "I shall rely on your giving me "your unbiassed opinion on all subjects respecting which I may feel it a bisable to require it," was written during the nego tion between his Excellency and the Council previously to their taking office-and, in fact, was part of the negotiation, and implies that it contained the conditions of their taking office, and that they took office after the communication of that note, is that the case, and is that the true inference according to your understanding?-For the facts I refer to my provious answers, and my letter to Mr. Perry of the 16th ultimo, and as to the inference it is of course a matter of opinion; but I cannot for my own part suggest any construction of the passago referred to, consistent with those facts.

7. Were any steps taken having a tendency to guard against the divulgement of the proceedings in Council upon this matter ?- The oath of office was administered to the under clerks in the Council Office, it having been ascertained on inquiry, that they had not previ-

ously been sworn to secreey.

8. It has been alleged that his Excellency, in his reply to the City Corporation, intended to be understood as referring to the late Council, when he rep.esented that the new theory respecting the powers of the Executive Council "had been secretly promulgated," is such a charge warranted by the fact ?- As far as regards myself, I distinctly assert that it is not the fact, and I have no doubt that it is not the fact as respects any of my former colleagues.

DR. ROLPH called in and examined.

1. On what day were the late Executive Council, of which you were a member, sworn in 3-On the 20th of

February last.

2. Have you any knowledge of a letter addressed by his Excellency to Mr. Robert Baldwin, relative to the terms on which you and your colleagues took oftice, if so, state what you know ?-I was present with Mr. Robert Baldwin, and the Hon. Mr. Dunn, on the 19th day of February last, at the Government House, when Mr. Robert Baldwin informed his Excellency that we were desirous, before joining the Executive Council, to receive a written assurance from his Excellency, of the unfettered terms upon which we entered into office, lest it should be supposed by the public that in doing so we had compromised the principles which we have heretofore avowed and acted on. To this suggestion his Excellency acceded and drafted a sigte to that effect, adding that as the phrascology might | them.

contained no declaration of the confidence His Excel- be improved, he would without delay prepare and transmit it to Mr. Baldwin, who would send copies to me and Mr. Dunn. We were sworn into office in the afternoon of the following day, and I heard nothing more of this letter (except the unensiness of Mr. Baldwin at not having received it) until ten o'clock at night, when I was in company with Mr. Baldwin and the letter was received. Upon reading it Mr. Baldwin immediately noticed, as I did myself, the unexpected change, not only in the language but in the substance of the letter, and Mr. Baldwin would have returned it had I not expressed my reluctance to question the ingenuousness of the Lieutenant Governor, and enter upon a discussion which might seriously interfere with the harmony of the Council-Had I supposed that the word " require" would have been intended to abridge the great and unlimited latitude before given by Ilis Excellency, I should certainly not have consented to he sworn into office had the letter been received on the 19th, and I should have resigned upon receiving a copy of it on the 22d from Mr. Baldwin. The sole object of the letter and it was intended to embrace, was the admission that we joined the Council without changing our principles.

3. It appears from His Excellency's answer to the address of the House of Assembly of March 26th, that the note which he wrote to Mr. Baldwin, of which the following is an extract: "I shall rely on your giving " me your unbiassed opinion on all subjects respecting "which I may feel it advisable to require it," was written during the negotiation between his Excellency and the Council, previously to their taking office-and, in fact, was part of the negotiation, and implies that it contained the conditions of their taking office, and that they took office after the communication of that note, is that the case, and is that the true inference according to your understanding ?- I confess I understand the passage given me to read, to mean that the letter sent to Mr. Baldwin was the conclusion of the negotiation on the part of his Excellency, and intended to convey to Mr. Baldwin for the information of himself and his colleagues, the terms upon which his Excellency would accept our services, and that after the receipt of that letter we went into office on those terms and then disputed them; but such, certainly, was not the case. The letter in question was wholly independent of the negotiation, and not even mentioned 'till it was so far concluded that we waited on his Excellency on the 19th merely to receive a more formal and united invitation into His Council. We did then receive such an invitation, and the object of the letter was then suggested by Mr. Baldwin, and promised by his Excellency, for the simple purpose of enabling Mr. Baldwin and his colleagues to ropel any presumption of abandoning their principles on taking oflice.

4. Were any steps taken having a tendency to guard against the divulgement of the proceedings in Council upon this matter?—The junior Clerks were sworn to secrecy, as it had not before been done.

5. It has been alleged that his Excellency in his reply to the City Corporation, intended to be understood as referring to the late Council, when he represented that the new theory respecting the powers of the Executive Council "had been secretly promulgated," is such a charge warranted by the fact ?-It is wholly unfounded as regards myself; and every thing which passed between me and other members of the Council satisfies me that it is equally unfounded as respects U

COPY.

MAY IT PLEASE YOUR EXCELLENCY:

We, the undersigned Grand Jurors, representing the Home District at the Spring Assizes now holding, respecifully beg to assure your Excellency that the liberal policy designed to be pursued and the paternal solicitude manifested by His Majesty's government towards this Province as communicated to the Logislature soon after your arrival here, have been hailed by us as the harbingers of our prosperity and happiness.

We greatly regret that a system of political excitement hath of late years been organized in this Province, ongendering bitter animosities in the breasts of those whose welfare and happiness imperiously require that they should dwell together in unity; and producing party feuds, too frequently ending in breaches of the

We are well aware, that the prevalence of this sysdevelopment of our internal resources, and to the introduction among us of the redundant wealth and population of Great Britain; but the recent expressions of confidence in your Excellency's administration, cur, lead us to hope that the people will not long remain blinded to their own interest; but will be convinced that the mode of serving themselves, consists in upholding the Constitution, and directing their attention to the improvement of the land we live in :rather than to the consideration of abstract questions of government, and of theoretical changes in our con- tions of mine, but simply from my having repelled our stitution; changes, in which very many well-educated members of the community, discover no elements of good; but discern, on the contrary, the seeds of discord and confusion, producing in due season, the dismemberment of this colony from the parent state, and the establishment therein, of democratic institutions, uncongenial to the hubits and sentiments of its British population.

We would have felt a difficulty, particularly as our especial duty is of a judicial character only, in thus expressing our opinions to your Excellency, were we not confident, that they are participated in by a

numerous body of the frecholders in the district we represent.

HIS EXCELLENY'S REPLY.

GENTLEMEN:-

If the important object I have in view were to obtain applause nothing could be more gratifying to my feelings than the approbation of so well educated a hody of gentlemen as the Grand Jury of the Home tem has already produced results unfavorable to the District; but without offence, I must declare that the strict performance of my duty requires that I would neither be stimulated by popularity, nor deterred by clamour.

An maintaing the liberties of the inhabitants of this which we have heard and in which we cordially con- Province, but little has been left by our Sovereign, either to my judgment or discretion; and if it be true, "that the revent expressions of confidence in my ad-" ministration which you have heard, and in which you cordially concur, lead you to hope that the people will not long remain blinded to their own inter-" est," this happy effect has proceeded from no exerenemies by pointing to the Constitutional act of this Province. If that noble charter had not existed there can be no doubt but that the representative of His Majesty would have been overcome, and that the inhabitants of Upper Canada would now be under the ignominious tyranny of a secret metropolitan "cabinet'; but your constitution has proved to be impregnable, and, at this moment, no people bewail the fact more keenly than those who have lately been nearly crushed in their endeavours to undermine it.

A true copy,

(Signed) J. JOSEPH.

REPORT

OF

SELECT COMMITTEE

ON

RELIGIOUS GRANTS.

TO THE HONORABLE THE COMMONS HOUSE OF ASSEMBLY.

The Committee appointed by your Honorable House to inquire whether any money has been paid by the Government to any religious denominations in this Province, and if so, what the purposes are to which such grants (if any) have been applied; and that the said committee have authority to to summon witnesses and call for the production of papers and records, and to report from time to time by Address or otherwise-

Beg leave to Report as follows:

That in pursuance to the order of your Honorable House your committee proceeded to the consideration of the first subject of inquiry, namely, "whether any money has been paid by the Government to any Religious denominations in this Province.'

Upon referring to official returns laid before your Honorable House, during the last Session of Parliament, it appears that certain sums of money have been paid from the revenue of the Province to the following denominations, viz:-

The Church of England,

The Roman Catholic Church, The Established Church of Scotland,

The United Presbyterian Synod,

The British Wesleyan Conference, or the Wesleyan Methodist Society.

The Canadian Wesleyan Conference.

The fact that Grants have been made and received by the above denominations is sufficiently established by the correspondence between the Secretary of his Excellency the Lieut. Governor, and the parties concerned, tegether with the Receiver General's account of the expenditure of the casual and territorial revenue, all of which documents are amongst the records of your Honorable House.

Had there been nothing further required than a knowledge of the fact, that sums of money had been granted to certain religious bodies, our inquiry might have here rested, but your committee was desirous of ascertaining the full extent of the question, whether the grants so made were to such religious bodies "in this Province."

There was no question in the mind of your committee as to the full application of this understanding to most of the religious denominations mentioned, and indeed it was but to one of them that doubts existed as to such application.

Some few years have now clapsed since these grants were first made, and a feeling commensurate with the anticipated effects has very generally pervaded the Province. That feeling must exist and indeed increase,

as long as the cause which gives rise to it is continued; that such a feeling should not be exercised towards that body of christians to which we have last alluded, were devoutly to be wished. The remembrance of past years, when with a single eye their whole powers of mind and body were used for the welfare of their fellow subjects, in ameliorating their moral and civil condition; standing forth as the champions of civil and religious liberty; braving the persecutions of their enemies; enduring with patience, fatigue and privation; and living in the affections of their numerous friends, is not easily erased.

Your committee, however anxious to wipe away the stain from them, felt bound to pursue their course, straight-forward, and though the result of their inquiry might fix upon that body the broad mark of public disapprobation, they, nevertheless, as public servants, were bound to the performance of their duty.

Your committee submit to your Honorable House the evidence together with such other appended documents as they have been able to obtain, and to which reference will be made in the course of this Report.

The question now under consideration and to which the inquiry of your committee has been principally directed, is, whether the Wesleyan Methodist Conference in Canada has participated in grants of public money.

The first grant from the Government of £900 st'g. was made according to the communication from Lieux Col. Rowan, to the "British Wesleyan Conference" and was paid by the Receiver General to "Thos. G. "Ridout, Esq. Cashier of the Bank of Upper Canada " to be placed to the credit of Messrs. Haslope and " Marsden," who were Treasurers of the Wesleyan Methodist Missionary Committee. This grant was not made therefore to the Methodist Conference at that time in existence in this Province.

That this grant of money was not originally inten-ded for the "Canadian Conference," is evident from the testimony of Mr. Alder, given before the Committee of the House of Commons in 1828, to the question, "Do you conceive that the Colonial Government in Upper Canada has manifested any dein sire for the extension of the British Wesleyan Me-"thodists in that Province?"-he answered "I be-" lieve there are documents in the Colonial Office ad-" dressed to Earl Bathurst and to Mr. Huskisson from " Sir Peregrino Maitland which will shew that His Excellency is very anxious that the number of British " Methodist Ministers should be increased as far as " possible in Upper Canada; and I understand that " he wrote home a short time ago recommending that " pecuniary aid might be allowed us for that purpose."

But in October 1823, subsequent to the making of the grant, a union was ratified between the two Conferences (a copy of the articles of which are appended to this report;) and the money was paid to Mr. Marsden while he was in this Province, he being one of the Treasurers of the Wesleyan Missionary Society in London and President of the Conference then sitting or which had sat in York, U. C.

From the terms of the union, together with the evidence and other documents appended hereto, together with such others as are already in the possession of your Hon. House, the relation between the two Conferences appears to be of such a nature that more than ordinary skill is required to show how imputation in the matter of the grant in question can attach itself to one as principal and not to the other as accessary, in the strictest sense.

In the preface to the articles of union, it is considered that the concurrence of the two bodies to " the doctrines of Methodism " as contained in the notes of "Mr. Wesley on the New Testament, and in his four volumes of sermons," a principal reason for their connexion, (this is important when it is considered that the condition contained in the deed enrolled in Chancery, by which the Conference at home is legally recognized, is, that it shall as such Conference adhere to these doctrines.)

In the second article it is stated that the discipline, economy and form of church government in general, of the Wesleyan Methodists in England, be introduced into the societies in Upper Canada."

In the 3rd article, " the usages of the English Con-" ference, in reference to the probation, examination " and admission of candidates into the Itinerant Min-"istry" were to be adopted.

In the fifth article the English Conference reserves the "authority to send, from year to year, one of its " own body to preside over the Canadian Confer-" ence."

That though in the 6th article the missions of Upper Canada are to be regarded as Missions of the English Wesleyan Missionary Society, yet by the third section or regulation of the same article "the Missi-" onaries are to be stationed at the Canada Confer-" ence, in the same way as the other Preachers," the General Superintendent of Missions being connected with the stationing committee for such purpose.

The distributing of the sum determined by the Parent Society in London to be applied for the support and extension of the Missions is made according to the 1st section of the 6th article and the evidence, to be by the Canada Conference Committee.

It appears by evidence, that the union prevented the formation or continuance of Societies in this Province, by the Wesleyan Methodist Conference in England and attached those already formed to the Canada Conserence.

In an extract from the report of the Wesleyan Methodist Missionary Society (London) it is said that the grant of £900 (Sterling) made by His Excellency the Lieut. Governor of this Province, was in aid of Wesleyan Minister on the subject of the Government the expenditure of said Society for the support and grants, condemning the same; that the same publicaextension of the missions among the Indian tribes, and tion is at present following a course opposite to that in promoting Scriptural education among the settlers it pursued when the above vote was taken, and that of the new Townships of this territory; and the ministers to this work, according to the 6th article of the but its political character is changed, and that it exerts union and evidence are appointed by the Canada a political influence very different since the union to Conference.

By evidence it appears that there is a union between the two hodies in doctrine, conditions of membership, or in the general rules-in church fellowship or communion, and one church receiving and recognizing the members of the other as members recipro-

That the missionaries appointed to the several missions and who are paid from the funds to which public grants have been applied and whose allowances are made under the authority of the Canada Conference, stand in the same relation to the Conference as other ministers in reference to their probation, examination and admission, with privileges and allowances as such members of Conference.

That the superintendent of missions in the Province who is appointed (and consequently removable) by the English Conference, and paid by the Parent Missionary Committee, is a member of the Canadian Conference, and accountable to it for his moral and religious conduct.

In addition to the above it may be remarked, that there is evidently a very different feeling existing between the two bodies now, than formerly existed, that is before the union .- Acording to documents appended to this Report it appears, that during the connexion of the Conference in Canada with the General Conference in the United States, an understanding existed between the English & American Conferences, that the former should wholly confine its labors to Lower Canada, with the exception of retaining its mission already estab-lished in Kingston; and that the principle that "the Wesleyan Methodists are one in every part of the world" maintained by the Board of Missions of the Canada Conference, in a series of resolutions condemnatory of the establishment of missions in this Province by the English Conference as being an infringement of the above understanding-was explained by the Missionary Committee in England in reply, as being "only applicable in the sense of fraternal affection," and which reply consisting of a series of resolutions, contained very severe censures on the manner in which the Christian Guardian was published, as engaging in the local politics of the Province, thereby creating prejudice against the acceptableness of the Canada Preachers with a part of the population of Ca-

This expression of opinion in connexion with evidence has certainly placed this publication in a very singular position; it was denounced as being a political engine, and the cause of prejudice against the acceptableness of the Canadian Preachers ;-that in the event of a union it would be required to be divested of its political character; -in the session of Conference in which the union between the Canada and English Conferences was ratified, and at which Mr. Marsden, representative of the British Conference, presided, a vote was passed, approving of the manner in which the Guardian had been conducted the previous year, altho' its policy had been the same as before the above denunciation, and the editor had been warmly engaged during the time in a controversy with a what it did before.

The extract from the instructions to the delegate who went to England shew the determination of the Conference itself to confine the Guardian wholly to subjects of a religious character, and whatever may be said in extenuation, sufficient proof is elicited to show the effects of its publications.

Your committee conceive that what has been already said upon the relation existing between the two Conference, so far as relates to imputation between principal and accessary in respect to Government grants, the case is sufficiently clear; and they are of opinion with the evidence, that though one may receive directly and the other indirectly, still in their effects there is little or no difference.

The proofs are still stronger, if possible, which relate to some of the particulars of the second grant, in establishing the point, that it was made to be ex-pended "in this Province."—The letter from the Lieutenant Governor's Secretary announcing this grant is addressed to the "Wesleyan Methodist Conference" the letter was enclosed to the Rev. James Richardson who had acted as Secretary at the last sitting of Conference. And it is said in evidence that the latter grant was evidently made for the purpose of being expended in the Province after the Canada Conference was connected with the English Conference.

Your committee are led to the conclusion from the nature of the evidence and other proof, that the Wesleyan Methodist Church or Conference in Upper Canada stands connected with public grants in a similar manner to the other denominations before mentioned.

And in conclusion to this part of their inquiry your committee would refer your Honorable House to the terms used in the letters announcing the grants, " Ap-"plications to His Majesty's Government from seve-" ral religious denominations for assistance in the pre-"sent state of the Province to enable them to build churches and chapels":—To the extract of a despatch from the Secretary of State to the Lieut. Governor,

Dated Downing Street, 27th Jan'y, 1834.

And concerning the heavy charges to which the casual revenue will for some years he subject, I am " compelled to desire, that the grant in aid of the crection of dissenting places of worship shall con-" tinuo to be £2,000, instead of £4,200."

And to the following extract from Sir F. B. Head's instructions:

" It appears that the four religious communities whose funds are aided by grants from the hereditary and territorial revenue are, those of the Churches " of England and Scotland and Rome, and of the " Wesleyan Methodist Society; the last being in two "divisions, which respectively take the distinct appellation of the 'Canadian and the British."

Your committee cannot but understand that the latter term used in the last extract, has reference to the denomination under consideration; and in evidence it is said, that the term is sometimes so used.

Your committee having so far considered the first part of their inquiry proceed to the next, viz: What the purposes are to which such grants are applied.

From the accounts of the casual and territorial revenue for the years 1883, 1884 and 1885 it appears tain Missionaries and widows of Missionaries of the ference allowance to the Missionaries.

Church of England] -to the ministers of various denominations, viz:

The Church of England, The Roman Catholic Church,

The Presbyterian Synod of Upper Canada in connexion with the Established Church of Scotland. And

The United Presbyterian Synod of Upper Canada.

Your committee are under no apprehension that the above grants of money will be diverted from their original application.

But other grants have been made to cortain denominations to be applied "in aid of the erection of dissenting places of worship," or "to enable them to build churches and chapels."

Your committee are not warranted in substituting any other form of application to this species of grant than what the terms express; there is a specific tenure or condition in the giving and receiving the same, and a diversion from such mutual understanding is in the mind of your committee a violation of contract.

An exception may by possibility, and indeed has been taken from the latter part of the communication announcing the grant; the words are, "And I am to " inform you, that on your stating the manner in which the grant is to be applied, His Excellency will order the amount to be placed at your disposal."

To suppose for a moment that this can mean any thing clse than the application of the grant to the specific object mentioned, viz: to "enable them to build churches or chapels," were to charge the Government, yes the Government of Great Britain with duplicity, a double entendre, a charge repugnant to the feelings of every good and loyal subject.

A proper understanding of the application of the grant was had by the Roman Catholics, the Presbyterians, and the Canadian Wesleyan Methodists, as plainly appears by the returns made by those bodies to the Government Office, and sent down to this House.

The resolutions of the Canadian Wesleyan Conference are prospective, stating the manner in which the grant, if made, should be applied. By evidence it appears that the application of the grant was made in pursuance of those resolutions.

As no returns had been made of the application of the grant made to the other community of Methodists termed by Lord Glenelg "British."-Your committee have spared no pains to ascertain from the best sources of information what application was made by them of the sum granted.

The concurrent testimony, derived from the evidence and appended documents, goes to shew that the money has been applied to Missionary purposes, or paid into the fund from which is "defrayed the general expenses of the various missions."

There are several considerations which induce your committee to view such an application in a very reprehensible light.

1st. It is in fact a direct diversion of the grant from its original intent; there is an evident difference between applying the grant for the specific purpose of building churches or chapels," and that of defraying the general expenses of the various mission stations, -and though the last term being so very general, may include an application of a portion of the grant to "chapels and school-houses," another portion that certain sums of money were granted and applied grant to "chapels and school-houses," another portion as salaries and pensions [The pensions are to cermust inevitably be applied to the payment of the Con-

2nd. These Missionaries though being in the same relation to the Canada Conference as other Preachers, must, your committee think, be more or less under the influence of the Conference or Missionary Committee in England, through the superintendant of missions who acts in behalf of that body receiving the

Srd. Admitting such an influence to exist, which is certainly within the range of strong probability, your committee submit whether the incorporation of such persons into a body whose influence is well known in the general affairs, civil as well as religious, of the Province, has not a tendency to infuse those views in relation to the policy of Government which may be entertained by the body exercising that influence.

4th. The general superintendent of missions, who is paid from the funds into which this grant is placed, being a member of the Canada Conference, and a very prominent one, cannot be supposed to be without influence.

It appears by a return given in evidence, that the exact amount of the Government grants is accounted Whether this account is in accordance with the yearly reports of the Treasurer of the Missionary Society, and that published in the Christian Guardian, which are hereto appended, your committee cannot determine-the accounts, for one year (1895) in the report not being in detail, -and as respecting the form or manner of making out this account, they are equally at a loss to understand; -that the charges or entries are or are not correct in themselves, is not the question,-but why this account should be so framed as to show that no preachers but natives have received any portion of the grants from Government, your committee cannot comprehend. This manner of accounting for the expenditure of the grants is far from being satisfactory to the committee.

They would refer your honorable house to the accounts of the Treasurer appended hereto, together with evidence to shew that monies collected in this Province, from whatever source derived, including the amount received from the Parent Society, are put into one common stock or mission fund:-and that the "general expenses of the various mission stations" are paid from the same, and that the same accounts show that others besides native teachers are paid from this general fund, for instance, the Rev. W. Case, Mr. Belton, Mr. McMullin, Mr. Adams, Mr. Messmore, Mr. Turner; Mr. Huriburt and Mr. Johnson, whom your committee apprehend are not native Preachers or Teachers, and those persons or the greater part, your committee believe are members of the conference, and as well might the names of the persons above mentioned "ficient to remove any injurious impressions arising have been returned as receiving a portion of the ofrom the errors in the report; and also thereby this grants, and the native Preachers, Exhorters and others o unpleasant and laborious inquiry might have been left out; for all who are paid from the mission fund a uncalled for." must inevitably receive a portion of the Government grant as well as of other monies constituting that fund.

But the effects these grants have lad upon the publie mi id ere but too well known to need their particu- subject. lar description to your honorable house.

resolution brought below it on the subject of receiving conference, in the application of the money.

It appears a motion in the form of a resolution was made in the Wesleyan Methodist conference in the years 1834 and 1835, for an expression of the opinion of the conference on the subject of government grants; but the motion was lost. Such a proceeding creates astonishment when it is notoriously known that both the conference and its organ the Christian Guardian have heretefore expressed opinions so decidedly upon the subject. There is one consideration in connexion with these grants that should, your committee think, have induced the conference to consider the subject, and of which they were not ignorant, that the revenue from which these grants were made was considered by one branch of the Legislature as belonging to the Province, and indeed an expectation had been held out for some time that they would be fully reded by the British government.

Whatever coloring may be given to the whole transaction, one thing is clear, that the grants of money have been made, whether they were made directly to the Canadian conference or not, and that the conferonce or the connexion have become a participator therein; and further, that the application of the grants have not been in accordance with their tenure or condition. As so much has been said on the manner in which the Seventh Report of the select committee on Grievances has expressed itself in relation to this subject your committee considered it just both to themselves and your honorable house who have adopted that Report, to obtain some expression of opinion thereon .-To this end they put a few questions to one of the witnesses whom it was believed would not deviate from the strictest principles of right: the answers to the questions Nos. 331, 332 and 333 need no particular comment.

In answer to the question "Is it your opinion that " it is so erroneously false or injurious to your church as "to call for the animadversion and allegations which " have appeared in the Christian Guardian against the " committee on Grievances and House of Assembly?" The witness says " I think not, as I consider its state-" ments not so much at variance with the fact, of mo-" nies having been received from Government and "expended on the missions connected with the con-" ference to which I belong, as the means or channel "through which they have been received and applied "to said missions. I have been both grieved and " surprised at the many severe and indiscriminate cen-"sures which have appeared against the Committee " on Grievances because of what they have said in the "Report respecting the Methodists, as I am of opinion "that a few explanations and corrections made in the " spirit of candor and meckness, would have been suf-

The above, together with the previous answer are, your committee think, a complete refutation to all the vimperation and slander that has been penned on the

Your committee regret that it was considered by The Canadian Wesleyan conference negatived a the Methodist body expedient to have in any manner countenanced grants of public money, even for the grants, as they proved the cause of greatly diminishing purpose of extending their missions among the Indiing their congregations, of curtailing very materially ans. There appears to have been a time within the the liberally of their friends, and of exceeding disquie-insterny of the Province when, instead of being aided tude and went of agreement oming the members of the by Government, they were laboring under persecution land the character of their ministers vilified and traduced by those whose connexion with the Executive were well known. But notwithstanding this, their labors were a blessing to the Province generally and to the Indians in particular. The following extract from the report of a select committee of your honorable house on the petition of christians of different denominations, in the year 1828, is an honorable testimony of their labours:—"The great and surprising change "which has occurred within a short period of time in the character and condition of large bodies of the Mississagua Indians, is well-known, from a state of vice and ignorance, wretchedness and degradation—"on—almost brutal, they have been brought to habits of industry, order and temporence, a thirst for instruction & knowledge, a profession of the christian religion, and apparently a cordial and humble bedlief of its truth and enjoyment of its blessings.

"In this change the Methodists have been chiefly instrumental. They have manifested the most be nevolent zeal in accomplishing it; they have sent Missionaries and established Schools among them which are supported by voluntary contributions, and they are still laboring among them with the same disinterested spirit and the same surprising encouringement and success."

In confirmation of the above your Committee would refer to the following evidence, given before the same Committee by a prominent Member of the Conference; in speaking of the labours of the first Missionaries to this Province, he says, " From this time the Church " began to spread in different settlements, which altho' " for the most part small and separated at a consider-"able distance, yet were regularly visited by the "preachers, who in travelling from the one to the " other, were under the necessity of following the " Indian paths, or marked trees through the woods " for many miles without meeting with a white inhab-"itant, and of fording or swimming rivers and creeks, in some instances at the peril of their lives, " being sometimes thrown from their horses and com-" pelled to save themselves by swimming, or if they " could not swim by getting on logs, or catching hold " of branches of trees, and thus drawing themselves " to land; in several instances passing the night in " the Indian Wigwam, or even in the open air, " with no other covering than the canopy of hea-" ven.

"But notwithstanding all these difficulties and dis-couragements, these faithful Ministers of Christ, " and their successors with no other means of subsis-" tance than the voluntary contributions of the people, who being at that time for the most part poor,? and newly settled on their farms, were able to do " but little for the support of their preachers, have " continued to persevere in their labors until the pre-" sent time, at a considerable sacrifice of property, " and in several instances, of life; looking for no oth-" er reward than the testimony of a good conscience, " the gratitude and affection of the people, the ap-" probation of their God and the pleasure of seeing the cause of God prosper and prevail. The result of "their labors and sufferings has been the eternal sal-" vation of many, who have died in the triumphs of " the faith of the Gospel, the establishment of nu-" merous societies in almost every part of the country, \* \* \* and the conversion of several hun-"dreds of Indians from the most wretched state of "intemperance and debauchery to a state of sobriety " of virtue and to God." \mathbf{B}

Your committee cannot but observe the almost universal testimony borne to the useful labors of the ministry and the loyalty of both Preachers and members of the Methodist church, in the evidence to the report referred to. This is mentioned with a view to repel the insinuation contained in the evidence of Mr. Alder before the committee of the House of Commons, whose Report is dated the same year as that of the committee of your honorable house.

The evidence of Mr. Alder, heroto appended (marked K) will show the views taken by the conference in England in reference to the Clergy Reserves in Canada, the necessity of introducing Preachers from the British conference and the relation they hold to the church of England.

From the despatches relative to religious grants sent down by His Excellency and which have been refer"red to your committee," it appears that the Secretary of State, Lord Aberdeen, in his despatch of 22d Feb. 1835, has authorised salaries to six Presbyterian ministers of £57 each, independently of £1,000 already enjoyed by the Synod; and an additional sum of £350 to the annual grant of the Scotch church.

The late period at which these documents have been sent down, proclude the possibility of making that use of them as would be wished, but they cannot close their Report without noticing that their understanding of the intention of his Majesty's government in the application of the grants, is fully confirmed in the following extract from Viscount-Goderich's despatch of date 25th Oct. 1832:

"With this view I am to request that you will trans"mit to me at the beginning of each year a statement
"of the mode in which you would propose that the
"money which it is intended to apply to religious
"purposes should be distributed, and in preparing
"such a scheme you will of course bear in mind the
"principles on which you have already been directed
to act, namely, that you will endeavour to give as"sistance to the religious denominations as much as
"possible, by building for them in situations where
they can command congregations, chapels and par"sonage houses, as I am of opinion that money may
be much more advantageously applied to these objects than in paying salaries."

And that the Grants were made to the Wesleyan Methodists in this Province by the despatch of the 12th Nov. 1852.

"I have the honor to acknowledge the receipt of your despatch of the 5th Sept. last proposing an article rangement for the payment of the Church of Engliand Missionaries in the province of Upper Canada, and for affording aid to the Presbyterians, Westlevan Methodists and Roman Catholics to build churches and chapels."

Your committe in closing their Report cannot too decidedly express their conviction that grants of public money made to religious bodies, however specious and plausible may be their application, are productive of much evil. The history of the church but too plainly testifies that her connexion with the state, however faint or feeble in the commencement, has produced in its growth a corresponding severance from other dependance much more legitimate and infinitely better calculated to maintain the position she was designed to hold in the world.—And this province within some few years past has been made to witness much dissatisfaction, heart-burnings and contention;—Confidence in the Ministers of those Churches

recoiving grants has been weakened; and their per-1

and disinterestedness questioned.

It was not practicable from the Inteness of the regsion and the nature of the business, to which most of the committee had to attend in their places in your Hon. House, to enter more fully into the investigarion of the subjects of their inquiry, but would ree namend that it be renewed at the next session. All which is most respectfully submitted.

THOMAS PARKE, CHAIRMAN. ER. T. D. MORRISON. P. SHAVER. JOHN COOK, J. RYMAL, CALEB HOPKINS W. L. MACKENZIE. D. THOREURN.

Committee Room, 10th April, 1836.

Minutes of Evidence.

MEMBERS -- MESSICURS PARKE THORBURN, RYMAL. MORRISON, ROBLIN,

HOPKINS. SHAVER, COOK MACKENZIE.

Committee Room, Monday, 25th March, 1826.

Committee met.

Mr. Parke was appointed Chairman.

REV. EPHRAIM EVANS, called in and Examined.

1. Are you a member of the Methodist Conference in this Province, formerly known as the conference of the Methodist Episcopal Church in Canada ?-I am.

2. By what title is said conference now distinguished?— The Conference of the Wesleyan Methodist Church in

Canada.

3. How long has the church to which you belong had the title of the Wesleyan Methodist Church in Canada?-It was formerly called the Methodist Episcopal Church in Canada, in October, 1833 it was named the Wesleyan Methodist Church in British North America, and in 1834, it received its present title.

4. Is that since the Union with the British Conference !

Yes.

5. Is there another body of Methodists in the Province called Wesleyan Methodists ?- I believe there is a body called the "Canadian Wesleyan Methodists" they may be called Wesleyan Methodists in some places.

6. Are not the Preachers and members of your church sometimes called British Wesleyans, in distinction from the Canadian Wesleyans?—I cannot tell that they are, it may be the case; but they are not so known officially.

7. Do the church to which you belong, and the Wesleyan Methodists in England form but one body or are they two distinct churches ?- The Methodist body in this country is perfectly distinct in some respects from the Methodist body in England, the two bodies are in friendly connexion with each other.

B. In what respects are they the same, and how are they distinct !-The same in doctrine and discipline-The Wesloyan Methodist conference in England exercise no pastoral or disciplinary control over our societies, nor our con-

ference over theirs.

3. Did the conference in England acknowledge your con-Grence as a branch of the Wesleyan Methodist connexion when you were called the Methodist Ediscopal church, and treat with you accordingly?-I do not understand the purport of the question, and therefore cannot answer it; I do not understand what is meant by the conference in England acknowledging our conference as a branch of the Wesleyan Methodist connexion, or what is meant by their treating with us accordingly,-the Wesleyan Methodist conference in England admitted while treating with us, that we were the same in doctrine and therefore could treat with us accordingly, in that sense they consider us as springing from the same stock.

10. Did they not consult with your conference or your superintendent when you were called the Methodist Episcopal Church about establishing their missions or forming societies of their own in this Province !- Mr. Alder, from the Missionary heard in London had a consultation with the Missionary board in this place, and afterwards with the conference on the subject.—There was some previous communication between the Missionary board in London through the Secretary, Mr. Townley, and the missionary board in this country.

11. What mission stations had they in the Province at the time the Union was formed?-One in Kingston, one

m Toronto, and one at St. Clair.

12. On whose part were proposals for Union first made, and what proceedings were had thereon till it was finally ratified?—The first proposal for Union was from us to the British Conference,—the Canada Conference appointed a delegate to proceed to England to treat with the British Conference, and on the receipt of the terms agreed to by the British Conference and our delegate, they were acceded to by us and the union was ratified.

13. Did Mr. Alder make any stipulations on the part of his conference as conditions of the proposed union?-He had no authority to do so and consequently did not,-in conversation in conference he stated what he thought that the British conference would accede to as the terms of the

14. What were those stipulations? or what did Mr. Alder say the conference would accede to ?-He stated that in his opinion it would be necessary that the Episcopal form of Church Government should be changed for that of an annual Presidency, the President to be appointed by the British Wesleyan Conference as often as they should think preper; that the usages of the British Conference should be adopted in the admission of candidates for the Ministry : that district meetings should be established as in Englandthat the mission work should be put under the direction of the Wesleyan Missionary committee in London; -- that in order to the effectually uniting the two methodist societies in Kingston, the British Conference should for a time have the right of appointing a Prencher to that town; and that as far as practicable the discipline and usages of the British Wesleyan connexion should be introduced into our sociclies in this Province-he stated further, as nearly as I can recollect, that an unfavourable opinion was entertained in England, and in Lower Canada, in consequence of an impression that the Christian Guardian, the official organ of our Conference, was political in its character, that the Wesleyan conference and societies in England had ever considered it their duty to remain unidentified with any political party, and to avoid political discussion except in self-defence, that on this account it would be necessary that the Christian Guardian should become strictly religious in its character, and keep aloof from political interference, except when the privileges or character of the church should be invaded, as unless this were done, it would be impossible to obtain the assent of the Prenchers either in England or Lower Canada to the union, and he therefore recommended "that our delegate should be instructed to assure "the committee that the Christian Guardian should assume " a decidedly religious character for the future."

Tuesday, 29th March, 1836.

Committe met. -

REV. EPHRAIM EVANS, again called in and examined.

15. Were these the confidential communications made by Mr. Alder to your conference, or did he make others that were confidential ?-If these had been confidential I should not have stated them; he made some confidential communications which are not stated—they have however no re-ference to Government grants or financial regulations whatever.

16. Are the confidential communications in their character purely religious or altogether political?—They were not at all political in their character, not in the most remote

17. Did the communications in any way relate to the political character of the Methodist body-or to that of any of the conference, or to any publication under the authority of the Conference ?-No they did not.

18. If they (the communications) were purely religious and not at all political, why are they confidential ?-Mr.

Alder himself could answer that question better than I can; on my part they are confidential, because communicated as guch.

19. Were they (the communications) made to you solely or before you in the Conference by Mr. Alder?—They were the subject of private communication between my, self and Mr. Alder, and I dare say between him and other members of the Conference;—they were also stated in conference.

20. Are you aware that a member of your Conference has made these communications public, anot considering them confidential?-I never heard that a member of conference had communicated them until I heard it yesterday from Dr. Morrison.

21. Was not a momber of your conference either privately or publicly animadverted on for having made them

public?—Never to my knowledge.
22. Have you never heard that these communications were known by other persons not members of your conference !-- I have never until yesterday, as before started.

23. Have you then always supposed. till Dr. Morrison divulged the contrary, that these communications were secret ?-I have always entertained so high an esteem for my Ministerial brothren as to suppose they would not reveal those confidential communications.

24. Is it not possible that some members of your Conforence differ with you as to those communications being con-

fidential?-I should think it very improbable.

25. Was a vote of your Conference passed enjoining secreey on its members as to these communications? we have too much confidence in each others probity to think such a vote necessary.

26. Would it be a breach of probity in your members to divulge any communications that they might think necessary to be publicly known?—I think from the nature of those communications no member of the Conference could think it necessary that they should be publicly known.

27. Do the members of your Conference enjoy freedom of judgement !- If they do, may they not be allowed to differ with you in opinion as to those communications being confidential with impunity?—The members of our Confirence enjoy freedom of judgment, I think however that every honorable and christian principle would forbid their considering these communications as not strictly confidential, when they were made as such, especially as the divulging of them could in no wise promote the public weal, nor the refusing to do so be at all detrimental to it.

28. Does any christian principle forbid any member of your conference from making public that that may have been communicated to him in confidence when he gave no pledge to that effect, or no obligation of secrecy was enjoined on him, if he thought that it was necessary to the welfare of the church and of the world to make it public? Christian principle forbids any man doing evil that good

29. Did you pledge yourself to secreey to Mr. Alder or did any member of your Conference pledge himself to secreey or was secreey enjoined on the members of your Conference by a vote of the Conference when or after Mr. Alder made these communications?-Lam not aware that any person ever gave a direct pledge to secrecy to Mr. All of the conference in this Province?—I understood that part der but as I stated before, as no good could result from their of the finds of the missionary society in England would be publication, I consider the confidential manner in which devoted to the religious and moral instruction of the Indithey were communicated sufficient to render them perfect.

All In work realists question 39 ven say "from the dis-

ly confidential.

30. Who was it made the confidential injunction, and what was its nature to render if an obligation of secre-cy?—Mr. Alder was the persons as stated before, who made the communications confidential. In my opinion the obligation of secreey rests upon the implicit confidence reposed by that gentleman in the honorable and christian character and feelings of those to whom they were commu-

nicated.

31 Do you mean to say that any member of your Conference who may have divulged these communications has sacrificed his christian character?-I am not aware that any member of Conference has communicated them as I of which I have no knowledge.

32. Have you not assumed that if a member of Conference, for instance yourself, had divulged these communications he would have been guilty of a want of probity. not this a case?-I perhaps do not fully understand the question. If it implies that such a case is assumed in my replies to furner questions, those replies are hefore the committee to make what use of them they may think pro-

33. Have you not assumed that the communications made by Mr. Alder above alluded to were confidentially, made to the Conference—therefore to be confidentially kept by them, and linve you not assumed that scorecy in the members rested on their christian character and feeling, consequently if they divulge them (in your opinion) are they not guilty of a sacrifice of christian character and feeling?—I refer the committee to my former replies for an answer to this question, as it seems to be founded solely upon them. Should such a case ever come before the conference, which I think is very improbable, I shall then and there pass my

judgment. 34. Does not your evidence on the principle of made obligation on the part of the members of your conference to observe secrecy in relation to Mr. Alder's communications wholly rest on your own opinion?—and if any of your brethren differ with you in opinion, does it therefore make them guilty of a breach of "honor, christian charter, feeling, and principle"?—My evidence is before the committee and they can judge upon what it rests. As I have said before this question assumes the existence of a difference of opinion of which I have no knowledge, and the existence of which I think exceedingly improbable. I do not therefore feel disposed to pass, my judgment on such supposed cases.

35. Did your Conference send Mr. Egerton Ryerson to England to negotiate with the British Conference relative to the Union?—They did.

36. Who was appointed Editor of the Guardian at the conference of 1832, or when the union was proposed? The Rev. Mr. Richardson.

37. Was Mr. Richardson's appointment in consequence of Mr. Ryerson refusing to serve that year?—I think he was appointed because Mr. Ryerson had to go to England.

33. During the discussion of the union question, were expectations raised on the part of the members of your conference to share in the funds of the British connexion, should the union be effected?—I expected, as has been realized, that a part of the missionary funds of the Wesleyan Methodist connexion in England would be devoted to the benefit of the Indian tribes and destitute settlements; there are other funds belonging to the connexion in England in which we could not expect to share.

39. From what source have you derived your information that the missionary funds alone of the British Conference were expected to be shared by your conference?-From the discussion which took place I was never led to expect that any other-than the missionary funds would

be available by our conference.

40. Do you mean to be understood to say that the funds of the missionary society were to be applicable to the uses of the conference in this Province ?—I understood that part

41. In your reply to question 39 you say "from the dis"cussion that took place I was never led to expect that
"any other than those of the missionary funds would be
"available by our conference"; when and where did such discussion take place !- At the conference at Hallowell in 1832

42. At that conference was there not a discussion about other funds than the missionary funds, and what was the general nature of that discussion 1—A good deal of conversation took place in conference on the general financial sys-tem of the Wesleyan connexion in England, but nothing in that conversation over led me to expect that we should have any claim on any other than the mission funds, nor do I besaid before;—the question assumes a case of the existence lieve, that the conference was in any way influenced by expectations of pecuniary gain in consummating the union.

43. Was the conversation you allude to merely ordinary conversational proceeding, or did it take place in conference when in regular session, or was it any thing like debate ?-It was strictly a conversation and took place in conference in regular session, it was not a debate.

44. Is that the general and regular mode of proceeding in your conference ?- It is, on some points, some subjects

require Resolutions to be proposed and discussed.

45. Do you suppose or do you know that all, many, or very few of the members of your conference entertained the same opinions as yourself on the subject of the funds of the British conference and the conversation that took place on the subject in the conference in question ?- I cannot say what the views of others are. I have given my own in my former replies.

46. Did many, all, or very few of the members of the Conference, on the occasion of the circumstances to which allusion is made, express any or no opinions on the subject? -I cannot say how many spoke on the subject, as I believe t. Fre are no documents in existence to which reference can be had. I beg to decline answering any more questions on the subject of that conversation.

47. Do you think that it is not possible for you, without documents to tell the Committee what appeared to be the general feeling and understanding of the Conference on that subject !- I cannot form an opinion of the feelings of others; but as nothing transpired while I was present in the Conference to raise such an expectation in my mind, I cannot conjecture why it should be supposed that other members of the Conference should come to a different conclusion.

48. Did you believe that the general character of the conversation in Conference in question was such in your opinion as to leave no doubt that they could not form any other opinion than the one you have come to on the subject of these funds ?-I cannot reply directly to this question, as my judgement is not a guide for that of others.

49. Might it not be possible therefore that you may be mistaken as to the expectations of the Conference in regard to these finds ?-I have no opinion respecting the expectations of Conference on the subject : I have only

given my own views.

50. Is it your impression that from the nature of the con versation mentioned that the Conference had no right to expect a participation in these funds !- I refer to my former replies.

51. Were expectations raised in your Conference of a claim on the funds of the British Conference or of a donation from them !-- No such expectations were raised in my

mind.

- 52. Have you not acted in the capacity of assistant Secretary to the Conference; do you not think from filling that office; and your taking a general interest in its affairs, that you would be well acquainted with any understanding of the Conference whether on record or not, on this or any others object, if itwere the matter of conversation before the Conference !- I was not assisting Secretary of the Conference that year.
- 53. Was Mr. Ryerson instructed to make any arrangement relative to appropriations from the British Conference to yours !- Not to my knowledge; unless the appropriation for the mission work be referred to in the question. In corroboration of these views, I bug to refer to the following extract from the instructions drawn up for the guidance of our delegate and which extract contains all that the instructions direct on the subject. "He shall use his best exertions to obtain as large an amount of pecuniary aid as possible to extend the work of God, amongst the white people and the Indian tribes.

54. Have you any knowledge of certain grants from government to aid the Methodist Curch in this Province, if so, please state what you know concerning them !- I decline answering that question in the form in which it is put.

55. Was any intimation given to your Conference of the tender of any grant by government to the Methodists in this Province either before the union or since ?—I cannot answer the question in that form, it does not refer to any particular church.

56. Do you not understand the question as far as it applies to your own Conference ?-- I do not understand the question.

57. Have you any knowledge at all or facts which you can submit to this committee of Government Grants to your Conference, or if they have received any or whether such Grants have been made and to what purpose have they been applied?-No Grants from the Government have

been made to our Conference.

58. Was no report made to your Conference of the reception of such Grants by the superintendent of Missions?—I have no recollection of any eport being made by the superintendent of Missions to conference on the subject, of such Grants, I have understood that such a Grant has been received by the superintendent of Missions on behalf of the Wesleyan Missionary Committee in London.

59. Are you aware of the authority under which such Grants have been made, whether by the authority of His Majesty's Government or the Executive Government of this Province?—I cannot tell by whose authority the Grants were originally authorised, whether by His Majesty's Government or the Executive Government of

this Province.

60. Have you not seen the published account of the receipt and expenditure of what is termed the casual and territorial revenue for the years 1833 and 1834, in which it is stated by the Government that the amounts paid to Messrs, Haslop and Marsden and Mr. Stinson was the amount authorised by His Majesty's Government to be expended in building Wesleyan Methodist Chapels in Upper Canada?—I have seen such a statement in the seventh Report of the Committee on Grievances; I cannot however rely on the correctness of that statement.

61. If you put no confidence in the seventh Report of the select committe on Grievances, would you do so in the published account of the Government in the Journals of the House of Assembly ?-Yes I camp ut confidence in

- the latter document.
 62. Do you admit that the amounts paid by the Government out of what is called the Crown fund, as published in the Journals of the House of Assembly to Messrs. Haslop and Marsden for missionary purposes was the sum authorised by His Majesty's Government to be expended in building Wesleyan Methodist Chapels in this Province?—I have understood from the Rev. Joseph Stinson that on being informed by a communication from Colonel Rowan that the sum of £550 was placed at the disposal of the British Wesleyan Conference and that it would be paid over on His Excellency being informed to what uses it would be appropriated, he (Mr. Stinson) as the representative of the British Wesleyan Conferonce and general Superintendent of Wesleyan Missions in this Province, informed His Excellency by letter that it would be expended in creeting and reparing chapels and schoolhouses in this Province and in defraying the generai expenses of the Mission stations under his charge. These documents can perhaps be procured at the Government Office-I do not know out of what fund it was paid .- It might be the Crown fund.
- 63. Was the Conference of which you are a member, ever known by the name of the British Wesleyan Methodist Conference?—It never bore that name.
- 64. May not your conference have been called the British Wesleyan Conference in contradistinction to the Canadian Wesleyan Methodist Conference?—They have never acknowledged that name, although it has been given to them in the Seventh Report of the select committec on Grievances.

65. Was not the Conference of the Wesleyan Methodist Church in Canada once called the Wesleyan Methodist Conference in British North America ?- Yes it was, it bore that name for about a year.

66. Was the union between the conference of the Mcthodist Episcopal Church of Canada strictly a union between that Church and the Wesleyan Methodist Society of Great Britain !- The union was more strictly between the Wesleyan Methodist Conference in England and the Conference of the until then Methodist Episespal Church] " Lieutenant Governor of the Province, with an anxiety in Canada, and it effected a union between the societies in so far as it prevented the formation or continuance of societies in this Province under the pastoral care of the Wesleyan Methodist Conference in England, and placed those already formed under the pastoral care of the conference of the Wesleyan Methodist Church in Canada.

67. Is not the Wesleyan Methodist Conference in England frequently called the British Wesleyan Conference to distinguish it from your conference in Canada?—I be-

lieve it is, I have often heard it so designated.

68. Was the British Wesleyan Methodist Conference formerly or ever the Episcopal Methodist Caurch !-- It ne-

69. Was the Conference of which are a member formerly the Conference of the Methodist Episcopal Church?-

It was until October, 1833.

70. Has any great of money from the Government ever been made to or received by your Conference ?-No, there has never been any such grant of money either offered to or received by our Conference.

71. Is the union between the Methodist Church in Canada and the Wesleyan Mathodist. Society in Great Britain such, that the members of the one are to be received by the members of the other, when removals take place from the one country to the other !—Yes, certainly.

72. In the seventh Report of the committee on Gricyances, there are two items copied from the public accounts, bearing the signature of the Receiver General; in the first of which £1000 is said to be charged to Thomas Ridout, Esq. Cashier of the Bank of Upper Canada, to be paid to the credit of Messrs. Huslop and Mirsden, for the missionary purposes of the Wesleyan Methodist Society, and in the other £611 2 21 is said to have been paid to the Rev. Joseph Stinson, Representative of the Methodist missionary society in London, and Superintendent of Wesley-an missions in Upper Canada. Were those gentlemen au-thorised by the conference of the Wesleyan Methodist church in Canada or by the Missionary committee of that church to receive the said moneys, or did they receive them on account of the said church or committee in Canada ?-Those gentlemen were never authorised either by the conference or the missionary committee of the Wesleyan Methodist church in Canada to receive those grants; nor were they received on account of that church. Messrs. Haslope and Marsdon were joint treasurers of the Wesleyan Missionary Society in London, at the time when the first grant of £1,000 was made to that society, on whose account it was received and in whose annual report it is duly acknowledged: it was granted previously to the Union between the two conferences being proposed. The other sum was received by the Rev. Joseph Stinson as representative of the Methodist missionary society, London, as stated by the Receiver General in the accounts referred to in the question and it is accounted for in the next annual report of that The conference of the Wesleyan Methodist church in Canada had nothing to do directly or indirectly in procuring those Grants, nor does an individual of that conference derive the least benefit from them. The Indians and destitute settlements are alone benefited by this liberality of His Majesty's Government.

I beg leave here to subjoin the following extract from the Report of the Wesleyan Methodist Missionary So-

ciety (London) for the yearending April, 1834.

"In consequence of the numerous openings for useful exertion in Upper Canada, six English Missionatics are about to proceed thither—They will prosecute " their labors under the patronage of this society and un-"der the general direction of its committee, and of its " representative in Upper Canada; but in fraternal and ecclesiastical union, also, with the Conference of that Province of which they are to be considered as re-"gular members. In addition to such help as it may be "deemed expedient that they should afford to the sup-" port and extension of the Missions among the Indian "tribes, they will be specially employed in ministering exangelical instruction, and in promoting scriptural education among the settlers in the new townships of "that rapidly increasing territory.-IIis Excellency the for the moral and religious improvement of the people placed under his care, highly honorable to a Christian ruler, and with a kindness of spirit and manner which

" claims the most grateful acknowledgements of the com-" mittee, has made the liberal grant of £9,00 to this so-" ciety in aid of its expenditure, during the present year,

" for the purpose and objects above specified."

73. Is the union of the Wesleyan Methodist Church with the Wesleyan Methodist Society of Great Britain, a union in every respect constituting them one church? They are not one Church in every respect—they are the same in the doctrines which they hold and inculcate—in the general rules of the societies under their care-and generally in the great features of their internal economy, and modes of operation; differing in the latter respects. however, according to the different circumstances of the two countries. Each however retains a distinct and proper independency, - neither conference having any right to exercise disciplinary control or ecclesiastical jurisdict ion over the societies of the other, nor having any claim upon the funds or property of the other, excepting a portion of the Missionary funds as provided for in the articles of union.-The union has been effected on such principles as not at all to effect the identity of either body. The Wesleyan Conference in England is still regarded as the body enrolled in chancery by Mr. Wesley in his deed-poll; and the Conference of the Wesleyan Methodist Church in Canada is the same identical body formerly designated at successive periods, the Canada Conference of the Methodist Phiscopal Church in America,—the Conference of the Methodist Episcopal Church in Canada,—and the the Conference of the Wesleyan Methodist Church in British North America.—The changes which have taken taken place from time to time in its name, form of government, and economy, have been effected in a manner autho-

rised by its discipline."
74. To whom is the Rev. Joseph Stinson accountable for the monies which he receives for missionary purposes?-Only to the Missionary Committee in London, whom

he represents in this Province.

75. Are they one church in their mutual privileges and

liabilities?-I'do not understand the question.

76. If the Wesleyan Methodist Society or connexion in Great Britain approves of Government Grants being made to their body either here or elsewhere—and the Wesleyan Methodist Church in Canada does not disapprove of the principle, they being in unison as a church with the Wesleyan Methodist Conference, are they (the former) accountable for it !-Neither society is accountable for the conduct of the other.

77. Have any of the Ministers of the Conference of which you are a member at any time derived any official pension from the public revenue raised within this Province, as stated in the Seventh Report of the Committee on Grievances?—I can say positively with reference to myself, that I have never received any such pension, nor do I believe that any of the ministers of the Conterence to which I am connected have done so ;-all assertions to the contrary, from whatever quarter, are without any foundation in truth.

78. You say that no individual member of your Conference derives the least support fro n the liberality of His Majesty's Gov'ment?-Are Messrs.Belton & Messmore not members of yourconference, wil so have they not received monies out of the funds, you designate the liberality of His Majesty's Government?-I am not aware that either Mr. Bolton or Mr. Messmore ever received any grants from the Government.-Whilst laboring as missionaries they derive their support entirely from the funds of the Wesleyan Missionary Committee in London. I am further of opinion, that when those gentlemen were appointed to the mission work they had no knowledge of any grants having been made to the Missionary Committee in London.
79. Who appointed them to the mission work?—The

Conference of the Wesleyan Methodist Church in Canada.

So. Dies the Conference pay any Pleacher ? -No.

81. Have you or any of the Clergy of the Methodist Church of which you are a member received at any time any gifts salaries, pensions, and retired allowances from the Government !-- I can say positively with reference to myself, that I have never received any gift, salary, pension, or ret'red allowance from the Covermoent, nor do I believe that any of the Ministers with whom I stand connected have done so as Ministers .- The 7th Report of the Select Committee on Grievances contains on this subject a palpable untruth; the tendency of which, if any credit were attached to it by the pious and moral portion of community, would be to injure the reputation of the Mothodist Ministry, and might have a most painful effect upon the temporal comfort of the retired or superanuated preachers who receive no retired allowance from the Government,-but are supported by the voluntary contributions of the people.

82. Does the Conference receive any Preachers from the British Conference in England, if in full connexion, into full connexion in your conference ?-- Any preacher who is in full connexion in the British conference on removing into this country to labor as a minister would be

received into full connexion in our conference.

83. From what source do such of the ministers of your church as are employed on missions receive their salaries?—Entirely from the funds of the Wosleyan Missionary society in London.

84. Do any of them receive an income from their congregation in addition to the salary received from the missionary committee !- None of them receive any such thing .- All contributions raised by the people under their

care are accounted for to the missionary society.

Si. Do any of them receive any additional salary in consequence of the grants made by the Government to the missionary committee in Lendon?—I have before stated that they are not at all benefitted by those grants, it is a fixed principle in the operations of the missionary committee, by whom they are paid, to pay the full disciplinary allowance to all their missionaries, and none of them

can receive any additional salary.

86. Is there not a committee appointed at each Session of the Conference to which you belong for the purpose of apportioning the moneys, granted for Missionary purposes by the Missionary Committee in London?— There is in accordance with the regulation in the articles of Union between the English and Conada conferences as "The parent committee in London shall determine the amount to be applied annually to the support and extension of the Missions, and this sum shall be distributed by a committee, consisting of the President, General Superintendent of the Missions, the Chairman of Districts, and seven other persons appointed by the Canada conference—A standing board or committee consisting of an equal number of Preachers and Laymen shall moreover be appointed as heretofore, at every conference, which, during the year, shall have authority, in concurrence with the General Superintendent of Missions. to apply any moneys granted by the parent committee, and not distributed by the conference in establishing new Missions among the heathen, and otherwise promoting the Missionary work.

87. Has the committee appointed by your conference or has the conference itself any authority to control the missionary committee in London in regard to the means by which they shall raise money for carrying on the missionary work?—They have no such authority; the parent committee adopt such measures as they think propor to raise funds nor is the conference here aware of the sources from which the funds committed to it are raised until the publication of the subsequent report of the pa-

rent society.

88. Are Missionaries not considered either Ministers

or Preachers?-Yes, certainly.

89. Who directs the movements of the Wesleyan missions in Upper Canada !-The missionaries are stationed by the Canada conference in the same way as the other preachers; with this provise however that the general superintendent of missions shall be associated with the President and chainmen of diricts, in their appointment.

-This arrangement is made because it is thought proper that the missionary committee in London who are represented by the superintendent of missions here, should have a voice in the appointment of the missionaries to their work; seeing that they receive from that committee the whole of their salary.

80. Did your conference institute an enquiry respecting government grants as to their design, application, &c. after it was known that they had been received by your President or Superintendent of missions?—There could be no necessity for instituting such an inquiry as the parent society alone is accountable for the receipts & disbursements

of such money.

90. Was no motion made or proceedings had in conforence relative to said grants ?—I believe there was a motion made on the subject.

What were they and their results ?-I do not recollect what the motion was, but it was discussed and lost.

92. Do you recollect the principle upon which the motion was lost !- I recollect that I opposed it upon the principle that the parent society was not accountable to us.

93. Are you not accoutable for the principle of those grants although you are a branch or in union with the parent society ?- I conceive that the parent society is alone accountable for its proceedings.

94. Do you not hold yourselves as a church at all accountable for any of the acts and principles of the parent society?-I know of no acts or principles of the parent

society for which we are accountable.

95. Would you not be accountable or would you not feel yourselves accountable for any errors of doctrine, or any other erroneous principles of the parent society ?-1 do notconsider that we should be accountable for any errors in doctrine or practice on the part of the parent society. as w. have no disciplinary control over its proceedings.

96 If the Parent Society were entirely to depart from the principles and practices of Wesleyan Methodism would you not, while you remain in union with them, be accountable for such departure, unless you, in some way, avowed your dissent to such a preceeding; and would you not be looked upon in common with the Parent Society as no longer Wesleyan Methodiats? Were the Parent Society to departfrom any of the principles and practices of Wesley-an Mehtodism it would no longer exist as a Weslean Mothodist Society, as the very existence of the Wesleyon Methodist connexion depends upon its adherence to the principles of the deep-poll enrolled in Chancery by Mr. Wesley; and as our connexion with the Wesleyon connexion in England depends upon our mutual adherence to the same principles, the connexion could no longer exist in the case supposed and we might still remain Wesleyan Methodists, and not be at all accountable for the errors of the Parent Society.

07. How came these grants to be made to the Missionary Society, when Mr. Secretary Rowan advised the Canadian Wesleyan conference that the sums of £600 sterling in 1833, and the sum of 550L in 1834 was at the service of that conference to be applied in creeting churches and chapels? The 600t, storling referred to in the question was granted to the conference of the Canadian Wesleyan Church, cometimes known as "Ryanites," not to the conference of the Wesleyan Methodist Church in Canada, of which I am a member. The 5502, in 1831 was granted to the British Wesleyan Conference, and it is said, perhaps, to have been granted to the Wesleyan Missionary Society, because the committee of the society has the control and expenditure of all the funds contributed from any quarter for the support of Wesleyan Missions.

93. Do the articles of union between your conference and the Parent Society contain any provision that will render that union null, if any occurrence, such as is before mentioned (in question 96.) should take place? The articles of union contain no such provision. It would, indeed. be altogether useless, because, as I remarked before, by such

an occurrence the Parent Society would cease to exist.

99, If the Missionaries are paid by the Parent Society, what is done with the menies collected by your Auxiliary Societies in the Province for Missionary purposes? In accordance with the menior cordance with one of the articles of union, all the monies raised by the Methodist Missionary Society in Upper Canada are paid into the funds of the Parent Society, or accounted for to that Society.

WEDNESDAY, 30th Mancu, 1836.

Committee met.

The REV. Mr. RICHARDSON called in and examined.

100. Are you a member of the Methodist Conference in this Province, formerly known as the Conference of the Methodist Episcopal Church in Canada ?-I am.

101. By what title is said Conference now distinguished? The Conference of the Wesleyan Methodist Church in

102. How long has the church to which you belong had the title of the Wesleyan Methodist Church in Canada?— Since 1834-It was one year previous, called the Wesleyan Methodist Church in British North America.

103. Is that since the union with the British Conference?

Since the union.

104. Is there another body of Methodists in the Province called Wesleyan Methodists?—There is another body called Canadian Wesleyan Methodists.

105. If the Methodist Conference of Great Britain had Societies in this Province would they not be denominated, Wesleyan Methodist Society?—I suppose they would.

106. Are there any such societies in the Province !- No;

not distinct from ours that I know of.

107. Would it be considered right by your Conference if the Wesleyan Methodist Conference in Great Britain were to establish such societies in this Province?—Cer-

tainly not.

103. Are not the preachers and members of your church sometimes called British Wesleyans in distinction from the Canadian Wesleyans?-I have heard them spoken of as such in private conversation, but they are not officially

known as such.

109. Do the church to which you belong and the Wes-leyan Methodist Conference in England form but one body, or are they two distinct churches?—They may be said to form one body in some respects, but in others they ere distinct.

110. In what does that distinction consist?—It consists first, in respect to the powers of the Conferences, the rules or regulations made by one Conference are not binding on the other-and secondly, some difference in the internal economy of each; also in the title by which they are distinguished.

111. In what does the union between the two hodies consist ?- A union in doctrine-in the conditions of membership, or general rules—in church fellowship or communion one church receiving and recognizing the members of the

other as brothers reciprocally.

112. Is a member of your Conference a member of the British Conference by virtue of his being a Member of the former ?-No; when we speak of Members of Conference

we speak of Preachers.

113. Is a Member of the British Conference in full connexion received by your Conference into full connexion, or is it considered a privilege on the part of your Conference to reject or receive such Members!—All Preachers pre-sented for reception into our conference are admitted by vote, and if received, they are in the same standing as in the conference they came from.

114. Would you consider it a privilege of your conference if a member of the Wesleyan Methodist conference in Great Britain in good standing presented himself for admission into your conference to reject him !—As I have already said, they admit them by vote,—it is, of course,

the privilege of conference to admit them or not.
115. If a member of the Wesleyan Methodist conference in Great Britain, on the superannuated relation of that conference, in good standing, should apply for admission into your conference, is it the privilege of your conference to reject such an one's application for admission into the same !- I think that it is; but they would have some particular reasons for it.

116. Would you be good enough to state those reasons?
I cannot state reasons for others, there are no specific rules laid down-the reasons would arise out of the circum-

stances of the case.

117. Would it be any breach of the articles of union if a majority of your conference should vote against such an application?—I think not, but unless there were special weighty reasons for it such rejection might occasion a breach of good understanding.

118. Then is it understood that the rejection of a member of the Wesleyan conference in Great Britain, in good standing, applying for admission into your conference, depends merely on the vote of your conference !- As I have stated formerly, that his reception depended upon the vote of the conference, and if that vote was not given he would not be admitted—there may be reasons arising from circumstances of the case that would cause his rejection.

119. Will a member of the Wesleyan Methodist conference in Great Britain, in good standing, of consequence, lose his privilege as a member of your conference by its voic, notwithstanding the union between the two conferences ?-1 consider he is not a member of conference until admitted by vote, but his rejection by our conference would not, of itself, affect his standing in his own conference.

120. Did the conference in England acknowledge your conference as a branch of the Wesleyan Methodist connexion when you were called the Methodist Episcopal church, and treat with you accordingly ?- I, am not aware that they did, and certain circumstances would lead me to

think they did not.

121. Will you be good enough to state for the information of this committee those circumstances?—The principal circumstance to which I allude is the establishing missions in Upper Canada, having no communication with us, and no interchange of communication between their conference and ours acknowledging a relation of that kind.
121. What mission stations had they in the province at

the time the union was formed ?—One at Kingston, one at

York, and one at St. Clair.

123. Did the British conference at the same time acknowledge the Methodist Episcopal church in America as part of the Wesleyan body?—They acknowledged them (the Methodist Episcopal church in the United States) as a branch of Methodists organized by Mr. Wesley and fel-

lowshipped them as such.

124. On whose part were proposals for union first made, and what proceedings were had thereon till it was finally ratified ?- I have understood they were first made at meeting of the Missionary Board in York when I was not present—at a subsequent meeting of the Board when I was present, the subject was discussed and recommended to the conference, and Mr. Alder was invited to remain and at tend the conference for that purpose. At conference the question was submitted to a committee of nine, who presented a report founded on certain resolutions, which were adopted by the conference and published. Mr. E. Ryerson was sent to England as delegate of the Canadian conference to negotiate the union—the English conference accepted the proposals with some amendments which were presented to the Canadian conference in 1833, and the union finally ratified.

125. Did Mr. Alder make any stipulations on the part of his Conference as conditions of the proposed union !- He did not make any stipulations strictly speaking, as he said he was not authorised so to do, but he mentioned several particulars that he was of opinion his conference would probably require of ours.

126. What were those stipulations or particulars, or what did Mr. Alder say his Conference would require of yours?—One related to the Christian Guardian—I think he either said it should be divested of its political charac-ter, or its political character be changed—another related to district meetings, that they should be established here. and to camp meetings, and another to regulations relative to local Preachers.

127. Did your conference send Mr. Egerton Ryerson to England to negotiate with the British Conference relative

to the Union?—Yes.

128. Who was appointed editor of the Guardian at the Conference of 1832, or when the Union was proposed?— I was.

129. Was your appointment in consequence of Mr. Ryerson's declining to serve that year ?- Mr. Ryerson intimated previous to the sitting of conference that he should de- | made to aid the Methodist church in this ted previous to the sitting of conference that he should de-made to aid the Methodist church in this province was cline serving as editor, or to that effect; but on the eye of from communications from Mr. Barry, Wesleyan Misthe election of Editor he offered to serve as such for the sonary, in the Courier: I heard no more of any such grant and the cline of the state o

ensuing year, provided they chose to elect him.

130. If Mr. Ryerson had been re-appointed Editor that year, how would his place have been supplied during his absence to England?—I cannot say how his place would have been supplied, but he proved except the same home supplied. have been supplied; but he proposed a substitute, during his absence, in case he was elected.

131. Who was the substitute?—He said there was a young gentleman that Mr. Alder proposed to him as sub-

stitute, but I do not know that he mentioned his name.

132. Did you understand from Mr. Alder that the Christian Guardian was to change its political character In the sense of advocating in future a contrary system of politics to that it had previously advocated, or was it in tended that it should not interfere in politics at all?— I cannot say that there was any thing specific in relation to advocating another system of politics—and it was my impression it was to be divested of its political character.

133. Do you believe the Christian Guardian advocates the same system of politics now it did before the Union !-

I think not.

134. Did Mr. Alder say that it was contrary to the spirit and practice of Wesleyan Methodism to take any part in the party politics of the day?—Such remark might have been made by him, but I am not prepared to say positively, that he did.

135. During the discussion of the union question were expectations raised on the part of the members of your conference to share in the funds of the British connexion should the union be effected!—I think expectations were raised in some to share in certain funds of the British con-

136. Was there a motion made and put from the chair that you should share in the funds of the British conference?—Such a motion could not be made—it was imprac-

ticable.

137. What were the grounds of these expectations?

—The first mention made of the union was in the meeting of the missionary board in which Mr. J. Ryerson stated that he had an interview with Messrs. Alder and Hick in which they gave him to understand that should a union take place similar to that existing between the English and Irish conferences we would probably have a grant of their contingent fund, as they were in the practice of granting out of that fund to the Irish conference to supply the deficiencies of poor circuits, and again frequent mention was made by Mr. Alder during the discussion of the question in conference, of the prospect of such a grant :-- he gave a statement of the different funds, and of the financial system of the British conference, and shewed that as the contingent fund was for supplying the deficiencies of poor circuits, we might expect something from it, or to that effect: several remarks were made by members of conference relative to such a grant.

138. Were those expectations realised?—Not that I

know of.
139. Was Mr. Ryerson instructed to make any arrangement relative to appropriations of money from the British

conference to yours?-He was.

140. What was the purport of his instructions on this point?-I am not prepared to say what the instructions precisely were, but I will state the substance of the proceedings relative to them :—it was proposed that he sho'd be instructed to assure the British conference that whatever monies they might appropriate to the work in Canada should be strictly and faithfully applied to the particular object specified for them.—It was moved in amendment to the effect, that he should be instructed to assure them that whatever monies they might think proper to appropriate to the Canadian conference would be faithfully applied to such objects as the Canadian conference might think proper; which amendment was carried—there were some alteration made afterwards relative to that part but I am not prepared to say what it was.

141. Have you any knowledge of the receipt of certain grants from government to aid the Methodist church in this province—if so please state what you know concerning them?—The first knowledge I obtained of any grant being cannot his place be supplied by the meeting appointing

until after the close of the conson of conference in 1833, I then understood that Mr. Marsden had received £000 sterling as Treasurer of the Wesleyan Missioniary committee, London, and that the same was put into the Missionary final for the purpose of aiding the mission work in this province;—in 1834 a note came into my hands addressed. The Wesleyan Methodist Conference" from the Lieut. Governor's office, enclosed to me, stating that" the Lieut. "Governor has been authorised to place at the disposal. " this year, of the British Wesleyan conference the sum of "£550, to be applied in erecting such churches or chap-els as may be required, and to inform you that on your " stating the manner in which the grant is to be applied,
" His Excellency will order the amount to be placed at
" your disposal"—in the course of the day the Rev. Mr. Stinson called at my house and asked for such a note, and said it was intended to be sent to him;—I gave it to him, and know no more of the circumstances than what is before the public.

142. Was any intimation given to your Conference of the tender of any grant by Government to the Methodists in this Province either before the union or since? There was nothing communicated to our conference before the union, and nothing officially since-that I know

143. Was no report made to your conference of the reception of such grants by the superintendent of the missions? None that I know of.

144. Did your conference institute any inquiry respecting said grants as to their design, application. &c. after it was known they had been received? Not any,

145. Was no motion made, or proceedings had in conference relative to said grants? There was.

146. What were they and their results ? There was a motion made in form of a resolution in conference in 1834, and also in 1835, to have the conference declare its opinion relative to the propriety of supporting religious institutions and ministers of religion by grants from the public funds, and to disavowany participation in any such grants except for the Missionary work, or to that effect, which was lost: There were proceedings also at the conference in 1835, in consequence of addresses from two quarterly meetings—the result of which is published in the minuter of Conference.

147. Who moved the resolution or motion for a declaration of opinion in your Conference on the subject? I

148. Have any of your societies addressed the Conference on the subject of the grants from Government? The only addresses the Conference received were from the two quarterly meetings already mentioned-one of which was from Youge Street circuit and the other from Brockville.

149. Have not the members of your church expressed their opinion directly to the Conference without the intervention of a quarterly or other official meeting? They have not, and I believe it would be against a rule of Con-

ference to do so.

150. Who compose your official meetings? There are several official meetings, as quarterly meetings, local preachers' meetings, and stawards and leaders' meetings the quarterly meetings are composed of the travelling and local preachers, stewards, class-leaders, and exhoriers with the chairman of the district—the local proachers' meeting is a meeting of the local preachers with the superintendent of the circuit-the leaders meeting is a meeting of the leaders and stewards with the superintendent.

151. Who presides at those meetings? The chairman of the district at the quarterly meeting, and the superintendent of the circuit or station at the other meet-

ings.
152. Can no other than a preacher appointed by the

another for that purpose, or has the meeting no means of redress in such case! His place cannot be supplied-as soon as he leaves the chair or is removed from it, the meeting is dissolved.

154. Had you such rules respecting those meetings be-fore the union or have they been introduced since? They

have been introduced since.

155. Mr. Alder stated, in reply to to the question proposed to him by the committee of the House of Commons in 1823 on the civil government of the Canadas whether there were any Methodists in the Legislative or Executive Council—"I do not know, I should wish to state that we consider ourselves as a branch of the church of England both at home and abroad"—from which it is to be inferred he considers the Wesleyan Methodists both here and at home members of the church of England— are therefore the members of your church, considered, since the union, members of the Church of England ?-Whatever Mr. Alder's opinion may be it is not mine that the members of the Methodist church in this Province are members of the church of England.

156. Do you consider the conference to which you belong as an ecclesiastical establishment? In one sense, in common with all other churches, it is, but it cannot be said to be legally so. I consider a legal church establishment to be one organized by the law of the land, and pro-

vision made by the same for its support.

157. Was it not urged on your conference to abolish Episcopacy because that form of church government was not proper for Methodists in a British colony, as it interfered with the establishment of the church of England? There was some remaks made to that effect in the course of the discussion.

158. Who made these remarks and where were they made ! They were made in the conference, when the question for abolishing Episcopacy was under discussion; they were made by Mr. Alder in reply to my remarks on

observations made by Mr. E. Rycrson.

159. Was it not stated in connexion with those remarks, that those were Mr. Wesley's views?-When we were in discussion on the question of abolishing Episcopacy, Mr. Ryerson observed, that Mr. Wesley gave the Episcopal form of church government to the Methodists in the United States, because they were separated from the political institutions of the Mother Country—I remarked in reply that that was not his only reason, but that they were not only separated from the Mother Country politically, but from the hierarchy of the Church of England; and therefore he invaded no man's right in establishing Episcopacy in that country; and that the same reasons applied to this Province in favor of Methodist Episcopacy; unless it were admitted by the church, which I did not suppose it was, that the church of England was established in this Province.—Mr. Alder then remarked, that this being a British colony the British Constitution was established here and that the established church of England was a part of that Constitution; and he added such were Mr. Wesley's

views, or to that effect.

160. Were there no objections made on the part of your preachers, to the position that the church of England was established in the Province ?- I made objections myself

and I think others did.

161. Does your conference share in the mission funds of the English conference?-The missions in this Prosince connected with our conference are supported by the funds of the Wesleyan Methodist Missionary Society in England, whose missions they are.

162. Have you heard any of the members of your conference assert that the Church of England is the establish-

ed Church of this Province !- I have not.

163. Do you think it is the general opinion in your conference that the Church of England is not established in this Province?—I think it is.

164. Has your church any other mission stations in the Province than those among the Indians?-They have a few.

165. Will you please to name what stations or circuits they are?—The past year the Isle of Tonti mission, Sidney mission, Cavan mission, Clarendon mission, Brock mission; the four last were missions in part because of destitute settlements in the vicinity of those places .- The present year, the Isle of Tonti and Guelph.

166. Were not the Sidney and Brock missions formerly included in regular circuits!—There were regular circuits called Sidney and Brock circuits, and there are now, but my former answer explains why they were reported as missions in part—owing to the new and destitute settlements in the vicinity.

167. Did you form missions elsewhere than among the

Indians before the union ?-Yes, occasionally.

163. Are you aware that £300 are charged in the Wesleyan Methodist Society's Report of Great Britain for aid to poor circuits out of the Missionary funds?—I am not aware of it, as I have not looked over the Report to inform myself.

109. Are not some of the regular circuits aided occasionally from the mission funds?—I am not aware that they are, except in the cases before-mentioned of part

missions.

170. By whom are your mission stations formed and missionaries appointed thereto?—They are formed since the union by a committee of the conference, consisting of the President, General Superintendent of the mission, the Chairmen of the districts, and seven other persons appointed by the Canadian conference, together with a standing board or committee consisting of preachers and laymen to act in the interim of conference.

171. Are all these persons necessarily members of your conference, excepting such as compose the laymen of the Missionary Board?—It is understood, the not expressed

in the regulations.
172. By what means are your preachers supported on the circuits !- On all the circuits that are not on the missionary plan, they are supported by the voluntary contributions of the society and friends of the church.

173. Is it in the power of the conference to put any of the circuits or stations on the missionary plan, and provide for the same accordingly?—I think that if the missionary committee at the conference, mentioned before, together with the stationing committee of conference, and the parent committee in England concur, any of the circuits or stations can be put on the missionary plan accordingly.

174. Are the missionaries of the mission stations, and such as are connected with your conference members of the same—do they sit and vote on all questions introduced and decided there?—All members of the conference in attendance have a right to sit and vote, missionaries not excepted.

175. Is the right of petitioning to your conference excluded from the members, except thro' the official bodies mentioned in answer to questions 148 and 149 :—I refer to

my answer to the questions mentioned.

176. What were the stipulations and particulars respecting Camp Meetings and Local Preachess mentioned by Mr. Alder at the conference of 1832, and alluded to in your answer to question 126?—In relation to Camp Meetings, that they should be laid aside; and in respect to Local Preachers, that they should be similar to those ın England.

177. Was the political conduct of your preachers or members talked over in the conversation with Mr. Alder at the conference of 1832, while mentioning the conditions on which the British conference would be likely to accede to the union ?- I do not recollect any thing to

that effect.

178. Was there a committee appointed by the conference in Hallowell to take into consideration the subject of the union !-There was.

179. Were you a member of that committee ?—I was. 180. Was Mr. Evans a member of that committee ?— I think not.

181. Would you not have had an opportunity of knowing more of Mr. Alder's views on the subject of the union than he (M. Evans) would; he not being a member of that committee?—Being on the committee I probably had a better opportunity of knowing Mr. Alder's views than Mr. E. had; but I think I knew no more of them than he did, as I did not ascertain his views until they were disclosed in open conference.

182. Did Mr. Alder at any time come before the committee to give information on the subject !- I do not recel-

lect; he might have done so.

153. Do you believe that the members of your church are satisfied with government grants being made for the support of missions and missionaries, or other religious purposes ?-As far as I am acquainted I think they are not; as there has been a great deal of dissatisfaction expressed in my hearing, and much uneasiness on the subject.

184. Do you think they would be at all dissatisfied if the Commons' House of Assembly were to address his Majosty to withhold such grants ?-I think generally they would be

well pleased with such an address.

185. Is it your opinion that those grants are or have been conducive to the spiritual interests of your church ?-I

think quite the contrary.

186. Was the conference of which you are a member ever known by the name of the British Wesleyan Methodist Conference?—Not within my recollection.

187. Was the British Wesleyan Methodist conference formerly or ever the Episcopal Methodist church?—Not

that I know of.

188. Was the conference of which you are a member formerly designated as the conference of the Methodist Episcopal church ?- Yes.

[Mr. Morrison road in his place as a member of the com-

mittee the letter marked B. appended.]

189. Has any grant of money from the government ever been made to, or received by, your conference !- I know of no other grants but those I have mentioned contained in a former answer.

190. Were any of these grants you mentioned made to your conference?-As I understand, those grants were made to the Wesleyan conference in England for the purpose of aiding the work in this province, and for that purpose were put in the missionary fund and expended in support of the missions connected with our conference.

191. To whom is the Rev Joseph Stinson accountable for the monics which he receives for missionary purposes? He accounts to the treasurer of the parent society in London.

192. Are the missionaries or any of them who are paid from these funds or grants members of your conference, and do they vote on all questions decided there ?-Some of them are and they have the same right to vote on all questions us other members.

193. Are any of your missionaries members of the British conference exclusively, or any of the preachers employed as missionaries solely under the direction of the Wesleyan Methodist Conference or missionary society in England?

None that I know of

194. Can the missionary committee in London, or the Wesleyan Methodist Conference in England, appoint to or remove any missionary from his station, and can any such missionary be a member of your Conference and the British conference at one and the same time?-None except the general superintendent of the missions, can be directly appointed to or removed from his station by the missionary committee in London. The general superintendent of missions is a member of our conference and of the British conference likewise.

195. Can the missionary superintendent of himself appoint a missionary to his station. Is he not merely associated with a committee appointed by the conference and other persons nominated by your discipline to appoint missioneries to those stations!—He has the power of supplying vacancies that have not been supplied by the stationing committee of conference but no power to appoint others.

196. From what source do such of the ministers of your church as are employed on missions receive their salaries? -From the Wesleyan Methodist missionary funds.

197. Do any of them receive an income from their congregations in addition to the salary received from the missionary committue? - All they receive as missionaries is accounted for to the treasurers of the missionary society.-The preacher on the Guelph mission this year, is allowed to receive if he can raise it from the people, something in addition to the allowance from the missionary committee as he is a married man, the appropriation to the mission being only a single man's allowance. Also the preachers la other members of voting.

boring on those missions in part, (before mentioned) receive from the congregations on other parts of their field of inbor. But in no case can any one receive more on the whole than the allowance stated in the discipline of the church.

198. Is the salary of any one of them raised or increased in consequence of the grants made by the Government to the missionary committee in London?—Not in my opinion.

199. Is there not a committee appointed at each session of the conference to which you belong for the purpose of

apportioning the monies granted for missionary purposes by the missionary committee in London?—There is.

200. Has the committee appointed by your conference, or has the conference itself any authority to control the missionary committee in London in regard to the means by which they shall raise manney for the purpose of correcting which they shall raise money for the purpose of carrying on the missionary work?—I know of no means they have to control the missionary conference in London.

201. Is your conference and missionary society compellod to receive funds from the parent society out of any source, that the latter may chose to secure them, to expend on your missionary work?-They the missionary committee of our conference have no resources of their own, they must therefore either receive them from the parent society or have none for the support of the missionary work.

202. Are not the missions in Upper Canada by the articles of Union made the missions of the English Wesleyan Missionary Society?—They are. It is expressly said they shall be regarded as such under certain regulations specifi-

ed in the act of agreement.

203. Do you conceive that you may receive funds from the parent society for the support of your mission work even from exceptionable sources, and not be held accountable for so doing? - From our close connexion with the parent society in England any thing justly exceptionable in their transactions must necessarily reflect upon us.

204. Do you entertain the opinion that government grants for missionary purposes are exceptionable in a religious point of view? In many respects I think them exception-

able.

205. Is the money granted by the Wesleyan Missionary committee in London for the support of the mission work paid through the missionary committee in Canada, or does the latter committee only determine the amount of the annual allowance of the missionaries !- They only determine the amount. The money is paid through the General Superintendent of missions.

206. Whose agent is he the superintendent, and by whom -He is agent to the Wesleyan Missionary Commit-

tee in London, appointed and paid by them.

207. Is the money paid for your mission work solely paid at the instance and under the authority of the super-intendant of Missions!—As I said before the Missionary Committee of our Conference determines the amount to be paid according to the book of discipline, and the general

superintendant pays the same accordingly.

208. Have you seen the Missionary report of the parent
Society in London for the year 1834, an extract from
which Mi. Evans has given in as evidence?—I have not
read it, and I am not accurated with the extract alluded read it, and I am not acquainted with the extract alluded

209. Are you aware it states the late Lieut. Gavernor put into the hands of the missionary society in London, £900 to be devoted to the missionary expenditure of the society in Upper Canada?-I am not aware of it because I have not read any document on the subject.

210. Are the missionary funds to which you allude in your answer to question 196 and from which the missionarice are paid, composed in part from the grants made from the public funds of this Province ?- I understood it so, that

is, from public funds raised in this Province.

211. You say that several of the Preachers who are paid from those funds or grants, are members of your conference and have a like privilege with other members of voting on all questions decided there, does the conference or a majority of its members approve of their being paid in this way or have they exercised the powers they possessed to prevent their being so paid ?- I have said that the missionaries were paid from the missionary fund, that those of them who are members of our conference have a like privilege with

212. Do you think any of those ministers who are sup- it—can you point out any particularly?—I have not said it orted from the mission funds, of which these grants form a was avowedly changed in its principles, but I have said it ported from the mission funds, of which these grants form a part, consider them in the light of a bribe from the Government?-I have no reason to think they do.

213. Are you aware that the treasurer of your missionary society in this Province did receive the £900 paid over to Mr. Marsden by the Government !- I am not aware of it.

214. Do you know that Mr. Marsden transmitted the money he so received to London into the treasury of the missionary society there?—No, he left it in the hands of Mr. Stinson to be expended here, and that saved transmitting it from England.

215. To whose credit was it placed by Mr. Stinson and to whom did he account for it?—I understood that he placed it to the credit of the parent society in London, or ac-

counted to them for it.

216. Will you explain to the committee the difference between receiving Government grants direct or receiving them from that Society or body who received them from the Government?-The difference is obvious,-the one case receiving them directly, the other indirectly.

217. Is there any difference in the effects, consequences or propriety of such proceedings?—There is little or no

difference in my opinion.

218. In such a case if there is any thing so morally wrong or injurious in a part of your Conference being paid in such a manner do you not consider the whole Conference implicated, by not exercising the powers with which they are vested to prevent it?—This question calls for an expression of opinion obvious to all—that if any thing be morally wrong on the part of any of the members of the conference, the whole body must be in some measure implicated, unless they exercise what powers they possess to prevent or correct it.

219. Do you think the mission work in this country has suffered in consequence of the Government Grants which have been made to the Wesleyan Missionary committee in London?-I think that the work in general has suffered

in consequence thereof.

220. Do you think that it is equally improper for the missionaries to receive their support from the mission fund, under the present circumstances as it would be to receive it direct from the Government ?- I think not ; because it is not optional with them, they have not a choice from whom they receive it.

221. Do you think it is morally wrong for any of the members of the conference to receive their support from the missionary fund, supported, as it is at present?see no immorality in it—every man's conscience in that respect must be his own guide.

222. Did you feel bound or in any wise influenced by any conversation, discussion or arrangements which took place at the conference is Hallowell in 1832 to change the political character of the Christian Guardian ?- Not in

any wise.
223. Did the conference at its next or any subsequent session censure or express their disapprobation of the popolitical course pursued by the Guardian so far as it intoriered with politics while under your direction ?-Nothey passed a vote fully approving the manner in which I conducted the paper.

224. While you edited the Guardian were you not engaged in a controversy with Mr. Barry relative to Government Grants for the support of the Church Ministry ?-- 1 was engaged in a controversy with him, which arose out of some remarks I made relative to some grants to certain

denominations.

225. What in your opinion is the nature of the political principles advocated before and since the union by the Guardian, are they opposites or are they in unison?—It exerts a political influence very different since the union

to what it did before.

226. Did you as a Minister of the Methodist Church in this Province, approve of the political course of the Guardian either before or since the union !—I think that it has meddled too much with politics both before the union and

227. What political principles does the Guardian now advocate which are opposite to those formerly advocated by union and note hereto appended.)

exerts an influence different to that before the union, in the politics of the country. It seems now to be in favor of things as they are, rather than for reform, which it formerly

so strongly advocated.

223. Did you during the controversy with Mr. Barry condemn the Wesleyan Missionary Committee for having accepted of the government grant which was offered to them?

-The remarks I made on the government grants were made when I was in ignorance of any such being made to the Wesleyan Missionary Conference, and in the controversy which arose out of them, I was not called upon to express an opinion particularly relative to them, but had I been aware when I made the remarks alluded to that they had received a grant similar to the others, I should have been equally as free in my remarks on it. 229. Did you approve of the Wesleyan Methodist Missi.

onary committee in your controversy with Mr. Barry, for receiving government grants for missionary purposes !-

No. I did not.

230. Had the Missionaries a choice of the manner in which they might be paid their salaries. Would you think it would be as equally improper for them to receive their support from the Mission fund under the present circumstances as it would be to receive it direct from the government?-Very little difference in that case, in my opinion.

231. Do you believe that if a preacher were to declare he could not conscientiously enter the Mission work under the present arrangement your conference would oblige him to do so?—I think there would be a deference paid to his

conscientious scruples.

232. You have said that the Conference passed a vote of thanks in your favor for the way you had conducted the Christian Guardian; are you aware that the conference has approved of the manner the Guardian has been edited since you ceased to be its editor?—I am not aware that they have expressed their approbation directly.

233. Are you aware that they have expressed it indirectly?—At the conference of 1834, which was one year after I had ceased to be editor, they elected me to that

office, but I declining to serve, they elected Mr. Ryerson. 234. What was the cause of your declining to serve as editor ?- There were several causes, but the principal reason was that the feelings of parties relative to the Guardian were so strong, I was apprehensive I was not adequate to.

235. Since monies are paid to our local government to be expended on Alissionary purposes under the direction of a Missionary committee connected with your conference is the political feeling of your conference the same as formerly?—I am not able to say respecting the political feeling of the Conference, but the minds of several of its members I think have greatly changed in respect to political matters, yet I would not attribute that to the effect of money paid

for Missionary surposes.

236. Is it your belief that our Government would have paid any sums of money to the British Wesleyan Conference unless with the express understanding that such sums would be laid out in this Province in some way connected with the Conference of which you are a member ?- I believe that the first grant was made to the Wesleyan Missionary Conference before the union for the purpose of expending it in this Province, under their immediate direction; but the latter grant was evidently made for the purpose of being expended in the Province after we were connected with the conference in England.

237. Are you aware of the Methodist Episcopal conference or any body or individual of that conference potitioning His Majesy's Government for monies to aid in the crection or keeping in repair Churches or Chapels or to give aid towards Missionary purposes under the control of that conference!—I am fully of opinion there was no such application from the Methodist Conference in this country

or from any of its members

238. Is the Canada Conference not bound by the articles of union to receive into their body from the English Conforence every year a certain number of their Preachers !-It is not so understood by our Conference (see 4th article of

230. Are you aware that monies are paid by the Government of Upper Canada from the funds of the Casual and Territorial Revenueof the Province for the aid and support of religious purposes under the management of the Wesleyan Methodist Conference?—I am aware that momes have been paid by the government from the Casual and Territorial Revenue of the Province for those purposes.

240. Do you understand by the Wesleyan Methodists mentioned in the foregoing question the Conference to which you belong !—I understand the British Wesleyan

Methodist Conference.

241. Are they not connected?—They are connected in

the manner formerly explained.
242. Do you consider the Missions in Canada as wholly connected with the Parent Society or are they not as you have already observed the Missions of your Church, whose Missionary Society is auxiliary to the Parent Society?— They are Missions of our Church as well as of the Wesleyan Missionary Society in England.

Tuesday, 31st March, 1836.

Committee met.

The REV. WILLIAM CASE, called in and examined. 243. Are you a member of the Methodist Conference in this Province, formerly known as the Conference of the Methodist Episcopal Church in Canada?—Yes, I am.

244. By what tale is said Conference now distinguished!-The conference of the "Wesleyan Methodist

church in Canada."

245. How long has the church to which you belong had the title of the Wesleyan Methodist church in Canada?— Since October 1833.

246. Is that since the union with the British conference? -ft is.

247. Is there another body of Methodists in the Province called Wesleyan Methodists !--There is another body of Methodists in this country sometimes called Ryanites, otherwise the "Canadian Wesleyan Methodist church."

249. Are not the preachers and members of your church sometimes called "British Wesleyans," in distinction from the Canadian Wesleyans !- British Wesleyans" is not the name by which our church is known.-That name distinguishes the large body of Methodists in England, ours is the "Wesleyan Methodist church in Canada."

249. Do you not think it very likely since the union of your church with the British Wesleyan connexion in England the members of your church might be called British Wesleyan Methodists ?- I know not why they should be

so called.

250. Do the church to which you belong and the Wesleyan Methodists in England form but one body or are they two distinct churches !- They are distinct bodies; the British Conference in Rogland form one distinct and independentent body, the Wesleyan Methodist church in Canada forms another distinct and independent body, these two distinct bodies have formed a union.

251. In what respect are they the same and how are they distinct!-They are the same in doctrine, or the general rules of the society; as also in the great outlines of their economy; such as itinerancy, rlans of benevolence, the support of their regular ministry by voluntary contributions, &c. but they are distinct in uame, and independent of each other. The Wesleyan Methodist Conference in England are recognized in Mr. Wesley's deed of settlement enrolled in Chancery, by which their chapel and church property are held, and by which the acts of the conference become legal. The conference of the Wesleyan Methodist church in Canada" is the same as that formerly known as the "Methodist Episcopal church in Ganada"; the alteration of name and the Episcopal form, having been in accordance with a rule in its constitution, nuthorising such alterations. These two conferences are distinct and independent.—They manage their own internul economy in their own way, free of the interference of each other, neither having any ecclesiastical jurisdiction or control over the members (preachers or people) of the other so distinct are they, that the ministers of the one conferonce have no right or claim to membership in the other con

Neither has the one conference any control over the funds of the other. These two bodies have formed a "union" the articles of which see Discipline, page 151.

252. Did the conference in England acknowledge your conference as a branch of the Wesleyan Methodist connexion when you were called the Methodist Episcopal church, and treat with you accordingly !- In the articles of the union the Canadian conference was so acknowledg-

ed and treated with accordingly.

253. Did they not consult with your conference or your superintendent when you were called the Methodist Episcopal church, about establishing their missions or forming societies of their own in this Province !- Such a correspon. dence did take place between Mr. Townley of the Mission Board in London, and our Missionary Board in York, held at the residence of Dr. Morrison, one of its members .- At a sitting of this Board a union was recommended between the two conferences, with one dissentient only, which recommendation was laid before the conference at Hallowell in 1832.

254. What mission stations had they in the Province at the time the union was formed ?-One at Kingston, one at

York, and a third at St. Clair.

255. On whose part were proposals for the union first made, and what proceedings were had thereon till it was finally ratified?—The first efficial proposals were made on the part of the Canada conterence, at which time they commissioned an agent to proceed to England to treat with the British Conference on the subject.

256. Did Mr. Alder make any stipulation on the part of his conference as conditions of the proposed union?—I think Mr. Alder made statements at the Hallowell conference in 1832 as to his opinions of what the British confer-

ence in 1832 as to his opinions or what the ence would expect if the union were formed.

257. What were those stipulations or statements?—My swer to the 14th question on this subject I believe to be cor-

258. Did your conference send Mr. Egerton Ryerson to England to negociate with the British conference relative to the union?—They did.

259. Who was appointed editor of the Guardian at the conference of 1832 or when the union was proposed ?-Mr. Richardson.

260. Was Mr. Richardson's appointment in consequence of Mr. Ryerson's declining to serve that year ?- I knew out that he declined any proposal of the kind on the part of the conference.

201. If Mr. Ryerson had been appointed editor that year how would his place have been supplied during his absence to England !—I have no answer to that question.

262. During the discussion of the union question were expectations raised on the part of the members of your conference to share in the funds of the British connexion should the union be effected?-It was understood by the Canada conference that the missions were to be taken under the care of the English Wesleyan Missionary Society and that they were to supply the funds necessary for the mission work.

263. Was it not also expected by the members of your conference that they would share in other funds of the British Wesleyan conference besides those that they might impart for the missionary work ?-Others might have ex-

pected-I expected none.

264. Did any discussion take place in your conference on the subject of any other funds of the British Wesleyan conference other than those for missionary purposes, while the union was under consideration !- There was a conversation upon the subject between Mr. Alder and the confer-

265. Might it not have been possible, notwithstanding, that expectations might have been raised in the minds of your members of their participation in those funds, or is it not very likely that the conversation alluded to might have raised those expectations ?-Mr. Alder stated to the conference that he was not authorised by his conference to encourage such expectations,—that the Canada conference would have no claim on the funds of the British conference ference without their consent, and a regular admittance. in consequence of the union, that his own opinion was that

assistance might be given by the British conference to aid !

in carrying on the regular work in the circuits.

266. Did your conference since the union realize those expectations?-In the first article of the union it is provided that the Canadian Prouchers should have no claim on the funds of the British conference; the Canada preuchers have never received any assistance from the British conference, otherwise than from the Missionary Society in support of missions in this country.

267. Was Mr. Ryerson instructed to make any arrangement relative to appropriations of money from the British conference to yours ?- Instructions were given him on various matters connected with the objects of his mission.

268. What were the purport of his instructions on this point!—I am not in possession of proper information to answer that question. For the result of his mission I refer to the articles of the union, see Discipline, page 151.

269. Have you say knowledge of the receipt of certain grants from government to aid the Methodist Church in this Province, if so, please state what you know concerning them ?-I know there has been considerable said on the subject and a great deal of excitement created thereon in some parts of the country, but I can say that the Canada conference have never received any sums of money from the British government for any purpose whatever.

270. Do you mean to be understood to say that your church has received no aid from Government grants?—They have received none to my knowledge.

271. Are you aware that Government Grants have been made to the Missionary Society of the Wesleyan Methodist connexion in London for the purpose of being expended on the missionary work of your church in Canada?—I am aware that the government did previously to the union of the two conferences grant to the Wesleyan Missionary Society in London the sum of £900 sterling to be expended on their missions in this country, and that subsequently the sum of £550 sterling was granted to the said Missionary Society in London to be applied towards the support of their missions in the same way.

272. Are not those excitements of which you have spo-

ken, in your opinion, chiefly attributable to the grants of money made by the government towards the support of missionaries in this Province?—It is my opinion that the excitements are attributed rather to the misrepresentations which have been made relative to the Government Grants.

273. By whom have these misrepresentations been made ?- I refer in the first place to the misrepresentations that have been made—as appeared in an Almanack entitled "the Canadian True Blues, by Patrick Swift, Esq. M. P. P. professor of Astrology, York," page 18, and headed "corruption unmasked."—Under this offensive summary, in the title, is said to be an estimate of money and money's value, raised in taxes, fees, monopolies, land-jobs, and otherwise from the people of Upper Canoda, and of which the Methodist Episcopal Church is said to have recoleved £1,900-this erroneous statement appeared in the 2nd edition of the same Almanack for the same yearwidely spread as these messengers of slander have been, they have probably been read by many who have had no means of obtaining information to the contrary-and could have no suspicion of the design to mislead. By such misrepresentations I believe excitements have been created. Another arroneous statement appears in the 7th Report of the Committee on Grievances, page 4, viz: "The patronage of the Grown as was exercised in this Province, includes the payments of gifts, salaries, pensions, and retired allowances, to the Clergy of the Methodist, Presbyterian, Protestant Episcopal, and Roman Catholic orders? as far as this regards the Wesleyan Methodist Conference in Canada, it is incorrect, as they have received neither gifts, salaries, pensions, or retired allowances from the government.—In the same report, page 15, it is stated, that the British Wesleyan Method:st Conference, formerly the Methodist Episcopal Church received £1000 in 1833, and £611 in 1831,—these two errors I wish to mention here—the first is the title British Wesleyan Methodist conference was farmerly "the Methodist Episcopal Church." The was farmerly "the Methodist Episcopal Church." The second is that the Wesleyan Methodist church in Canada Methodist clergy !—It must relate to either "gifts" "sa-

which I suppose is here meant, ever received either the one or the other of these sums .- That this statement is meant to apply to the Wesleyan "Methodist Conference in Canada," will appear from the comment on the next page (p. 16) of the Report where the Government Grants are represented to have had the effect of a bribe on that body. Now the only evidence I believe referring to these grants in this case is on page 132 of the Appendix. Here the Receiver General states that the sum of £1000 was paid to Messrs. Haslope and Marsden for missionary purposes, rers (Messrs. Haslope and Marsden) and Rev. J. Stinson, Rapres intative of the Wesleyan Missionary Society in London. I have also to refer to another erroneous statement in the Grievance Report, on page 15, it is stated, that "the Ministers of these ecclesiastical establishments derive their official pensions entirely from the public revenue, raised within the Province, and receive besides an income from their congregations."—On the preceding page (p. 14) you will find in the same article headed Ecclesiastical ESTABLISHMENTS, that a prominant reference is made to the "Methodists of two conferences not in connexion with each other," which must of course include the Wesleyan Methodist Conference in Canada. If then the community are made to believe that the "Methodist Episcopal Church receives from money raised in taxes, fees, monopolies, land-jobs, and otherwise, from the people of Upper Canada," £1,900, and that "besides" the Government Grants, the Wesleyan Methodist Conference "receives an income from their congregations," as is stated in the Grievance Report, pages 14 and 15, it is no longer matter of surprise that excitements should be created, and these are my reasons for believing that the excitements were occasioned, rather by misrepresentations relative to those grants, than by the grants themselves. It is much to be regretted that this circumstance, the want of lestimony, in the case, was not noticed by the Committee on Grievances when they drew up that part of the 7th Report.—It would have saved the feelings of no inconsiderable portion of the community, among whom are not a few of the best well-wishers to the cause of Reform. The last erroneous statement which I wish to refer to, is contained in the supplement to the Christian Guardian of February 20th, 1836: In the debates of the House of Assembly a member of that House is reported to have said that, " he believed that any circuit, which was in arrears in paying the preachers salary at conference, was called a mission, and the deficiency was made up out of the missionary fund, so that in fact the preachers were paid out of this money." I know not on what grounds such a belief was founded.—Other publications equally erroneous might be referred to, but these may suffice.

274. Have the Wesleyan Methodist connexion in England missions independently of your church in this province since the union of your church with that body?-In answer to a previous question I have stated that ogreeably to the article of the Union the missions in Canada were taken under their paironage and were to be regarded as the missions of the English Wesleyan Missionary Society for the support of which missions the English Missionary Society were to furnish the funds.

275. Then are you to be understood to mean that no connexion at all exists between the missions under the charge of the superintendent of the Wesleyan Methodist missions in this Province and your church?—No such connexion as that which gives the Wesleyan Methodist church in Canada any controll over the funds of the British Wesleyan

Missionary Society in London.

276. Do you think that the first paragraph quoted by you in the Grievance Report wholly relates to the Methodist clergy ?-I have stated in the answer to a previous question that as far as regards the Wesleyan Methodist conference the statement is erroneous.

nothing to do. It is the misrepresentations that Government grants have been made to the conference of which I

am a momber.

279. Are you not aware that pensions are allowed to the clergy of other denominations as by the Report shewn in pages 147 and 148!-To the Wesleyan Methodist conference in Canada the Government has made no grants for any purpose whatever, and their appears no evidence in the Appendix on which to found the assertion that the government did grant money to that body.

280. Were no gelts given by the government to Mechadist churches in this Province !- None to the church to

which I belong.

281. May not the money granted by the government to different religious bodies for religious purposes be looked upon in the light of a gift ?-- I have no answer to that ques-

282. Was any intimation given to your conference of the tender of any grant by government to the Methodists in this Province either before the union or since !-- I have

no knowledge of any.

283. Was no report made to your Conference of the reception of such grants by the superintendent of the Missions?-The superintendent of the missions may have reported that moneys were received from the grant for the missions under the patronage of the English Wesleyan Conference, but he could never have reported that such grants were made to our conference.

284. Is the committee to understand that your conference in no way hold itself accountable to the public or your church for the transactions of the Wesleyan Missionaries in this Prevince?—I am not aware of saying nual reports of the Wesleyan Missionary Society are every year published, in this country, where all moneys, from whatever source, are credited, and the application of them minutely detailed .- Of this any person may know by reerence to them.

285. Did your conference institute any inquiry respecting government grants to the Wesleyan Missionary Society in this Province, as to their design, application &c. after it was known they had been received !- In a former answer it is expressed, that no grant was ever made to the Weslevan Methodist Conference in this country, but to the Wesleyan Society in London, to the use of their missions

in this Province.

206. Were no proceedings then had in your conference at all on the subject, whether those grants were made either here or in England to the missionary purposes of the Wesleyan Methodists Society in this Province ?- The Canada Conference never instituted any proceedings on the subject. Conversations have sometimes taken place, but the conference I am persuaded never considered that any grants were over made to them-they always understood that the grants were made to the English W sleyan Missionary Society in London, over whose funds the conference had no control. Of course they could institute no proceedings in what way the society in Lundon should provide funds for their missions in this country.

287. Were no motions or resolutions made in conference relative to said grants!-I believe there was a resolution once offered in the conference on the subject, the disposition of which I do not exactly remember, perhaps it was thrown out, I am apprehensive it was under the persuasion that they he dono right to say in what manner, the society in

London should obtain funds for their missions.

288. Who moved the resolution for a declaration of opinion in your conference on this subject ?- It does not occur

prepared to give an opinion on this subject in all its bearings. To raise one denomination above another by distingtivo privileges, either civil or religious, I consider to be wrong and mjust; and that salaries from Government to ministers of any denomination would occasion much dissa-278. Do you not think it also relates to the Clergy of tisfact on -But with respect to the Government grants the other denominations mentioned !-With that I have for the improvement of the Indians in this country, I am of opinion, and have been for many years, that much good may be done in this way to that long neglected people.-I have long thought that there are obligations due to the American Indians which have not been fully discharged by any government on the continent, having been in one way or other for 20 years past connected with societies in the United States and Canada, for the instruction and improvement of the Indian tribes, I have thus formed my opinions; the Governments to which I have referred have done something for the improvement of the ladian tribes, but the grants of those Governments have by no means been equal to the wants and obligations to that unfortunate people .-I consider it one of the noblest acts of the British Government that they have employed their funds for the amelioration of the condition of the poor and the ignorant; and if it is one of the righest boasts of the nation that her government has paid the price of ransom for all her slaves, to me it appears equally glorious, proper and just, to employ funds derived from the lands once held by the Indians in ameliorating their condition .- The American Government has appropriated \$10,000 annually for this purpose; that sum has been paid over to various benevolent societies for the civil and intellectual improvement of the Indians .- In my opinion the British Government have no occasion to hesitate in adopting a similar course—what they have done has already told nobly.-The conversion of more than 1000 Indians who were once so many drunkards, is an honor to the christian church and to the Government, who may have in several ways aided in her successful offorts.

290. Has the annual appropriation of \$10,000 alluded to in your last answer been appropriated by the Legislature of the United States, or has it been given by the Executive Government without the consent of the Legisla-ture?-I believe in the American Government no appropriation is ever made by the executive without the consent of the Legislature, but in the British Government it is understood to be otherwise .- I know not that I fully understand the right or prerogative of the Crown, but if I do, it is this, that the Crown claims the revenue from certain sources, among which is that arising from the sale of wild lands, a revenue which the Kings of England have always enjoyed, and which has never been conceded to the Provineral Legislature.-That question being, as I understand it, a political one, in controversy between the Legislature of this Province and the Grown, and which question remains unsettled, I do not feel it my duty to give an opinion us to the merits of the case.—If then the Crown claims the prerogative of appropriating the monies arising from such lands, and that it never has been determined by any Act of the Government that the King has no such right, and the King having applied those funds according to his discretion I am under the impression that no religious body need feel any scruple in receiving funds thus derived and thus given for the improvement of the Indian tribes, who once occupied those lands.

201. Do you think that that is the best way to make Methodist preachers the means of these neglected people getting their due from Government contrary to the wishes of the people out of whose funds the money is taken ?- I have supposed that the funds alluded to were not raised by taxation on the community but from the revenue of the Crown arising from the sale of wild lands, which revenue had never been conceded by the King-if it were a settled point that the funds were under the control of the people, I have no hesitation in soying that it were wrong were they offered to receive funds from the Executive Government for any purpose whatever without the consent of the Legislature. I beginere to remark further, that the grants the Government have made to the Wesleyan Missionary Socie-289. What are your opinious as to the propriety of pub- ty in London can have no effect to increase in any way the

enlary of the Missionaries; it however enables the society to extent its missionary operations for the bonefit of the poor and destitute.- I wish also to observe that the society never consented that the Government should pay the salaries of their missionaries-I think I am authorised in saying that offers have been made by the Government to pay the salaries of missionaries, if appointed to the convicts in New Holland, or to the slaves in the West Indies, but the society declined the offer, saying, whatever funds are granted for this object, if paid into the funds of the Missionary Society, will be gratefully acknowledged.

292. It appears by your answer to a former question that the power of the Executive Government to appropriate the revenues alluded to is yet a matter of doubt by the Legislative branches of the country—would it not be therefore the duty of a christian ministry to forbear receiving grants from such a source as long as such reception was objectionable to the representative branch of the Government, or displeasing to the people who are contending for the right of having a voice in the disposing of them?own private feelings may concur in the suggestion contained in the question not to do any thing that would continue the ngutation that is felt in the country on the subject-nevertheless I do not conceive that what has been done by the Government in making them, or the Wesleyan Missionary Society in London receiving them, there has been any impropriety in the case. In offering the above sentiments however I do not wish to be understood to give the sentiments of the conference either in England or in Canada.

293. Would you under all circumstances think it proper or improper that for the future these grants should be suspended till this agitated question is finally settled?—I have

no opinion to express.

294. Do you believe that the motive in the Government was such as you express in your examination, purely benevolent, in making these grants ?- I have no reason to believe that there were any exceptionable motives in the case; I can only judge from the facts themselves in this and other acts of the British Government, in favor of the oppressed and destitute, and think them to be noble and worthy of a christian Government. The time was when in-tellectual improvement was hy every means prevented, the people were kept in ignorance, and died in slavery. cords with every feeling of my heart that any Government should take a more enlightened and christian course, and for such I shall ever pray.

205. Do you not know that the grant of £900 made in 1832 was for the purpose of establishing missions for the Wesleyan society among the Indians and several societics, in places where the societies of the former Methodist Episcopal church existed, and did not your conference. your missionary Board and several of the societies underthe late conference remonstrate against the same ?- I am not aware that the "Grants" were made for creating a rivalry in Societies already established-I know the subject was felt and conversed on and fears were entertained that the establishment of missions by the Wesleyan missionary society in London in the midst of Societies already formed by us would prove a rivalry injurious to religion; and against this proceeding of the society in London we remonstrated—these fears, however are done away in the circumstance of the union.

296. Do not the public improvements which have been made out of the funds of this Province and at the disposal of its Legislature and the industry of the people made those public lands valuable, and if so, is it not a tax on the people ?-I do not so understand the subject of "tax-In that sense then the enhanced value of an unimproved lot in this city is a tax on adjoining premises, where valuable improvements have been made. ever others may have understood this question. I know some persons have really supposed the "government grants" were paid out of funds raised by taxes on the

297. Do public grants made to the parent society effect, either directly or indirectly, the conference of which you are a member, or any of its members !- It benefits

the missions but does not increase the salary of any missionary or member of the conference.

208. Did you not as a member of the Methodist Episcopal church in the years 1817, 1818, & 1819 warmly and zealously engage in using your own endeavours. and exciting both the preachers and members of that church in Canada to prevent methodist societies under the Wesleyan methodist conference in Great Britain being established in this Province, and have such broken up, as were formed, and did you succeed therein?—I feel very reluctant to refer to a subject which at that time was so painful, and which was afterwards amicably adjusted by the two connexions.

200. Did not the local government in Upper Canada apply to the government at home implicating the character of the preachers of the Methodist Episcopal church, and did not that government apply on the subject to the Wesleyan Missionary committee in London, and did not the committee apply to the methodist Bishops-and they to you on the subject? - I have so understood it, but it is long ago-the subject I believe is passed away and is for-

gotten and I do not wish to revive it.

300. Do you not think that the close connexion existing between the society in England and your conference is such that if a public grant of money were made for missionary purposes to the former it would benefit your ministers who are employed as such, as much as though it were paid directly to your conference?-I do not know that it would benefit in any other way than by enabling the society to extend the work; It would not increase the salaries of the preachers.—The allowances of the missionaries are fixed by rule of discipline which is always paid, and under no circumstances do they re-ceive more. Were the funds of the society increased a thousand fold it would enable the committee to extend the blessings of the gospel, but the allowances to the missionaries would remain the same.

FRIDAY, 1st April, 1836.

Committee met.

Mr. THOMAS VAUX called in and examined.

801. Are you a member of the Wesleyan Methodist society in this Province 1-I am.

302. Was you a member of the Mothodist Episcopul church in this Province in the spring or summer of 1832? ·I was

303. Did there exist in this city at the above period a Board of Managers of the Missionary society of the conference of the Mothodist Episcopal church?—Yes.

304. Were you Secretary and a member of that board at that period?—Yes.

305. Do you recollect a special meeting of that bound being called which met at Dr. Morrison's about that period, and by whom was it called and for what pur-pose?—There was a special meeting called, I think in June 1832 by the Reverend John Ryerson President of the board of managers of the missionary society, for the purpose of meeting with Mr. Alder, representative of the Wesleyan Missionary society in London.

306. Can you tell who besides yourself, members of that board, and others by invitation attended that meeting?—The Rev. John and the Rev. Egerion Ryerson, Mr. Patrick, Dr. Morrison, Mr. Parke, and I think Mr. Armstrong and Mr. Howard, the Rev. Messrs. Turner. Hick, and Hetherington accompanied Mr. Alder.

307. Have you any recollection of a communication from the Wesleyan Missionary society in London, addressed to the Rev. Wm. Case, and referred to this board. by the conference in either the years 1829-30 or 31 and was it rend or acted upon?—There was a communication, it was read and acted upon.

308. Can you produce that communication and the ultimate proceedings had thereon at that or any other board upon that subject ?- I am in possession of the communication, and likewise the proceedings had thereou.

(Witness handed in the documents marked C.)

309. Who moved those resolutions and the letter accompanying them at the meeting of the board before al-

I think the Rev. Egerton Ryerson.

310. Were the principles of that reply and resolutions to the communication in question opposed by any of the members of the board of the Methodist Episcopal church at the meeting at which they were adopted ?-I do not recollect that they were opposed.

311. Was the reply of the board to the communication of the Wesleyan missionary committee in London answered by the latter body?—Yes.

312. Have you it, the answer in your pessession? I have:

(Witness handed in the document marked D.) 313. Who was the bearer of that latter communication to Capada !-Mr. Alder.

314. At a meeting of the missionary board before men-

tioned in the spring and summer of 1832; was that communication read and by whom animadverted on !- It was read by myself and it became the subject of discussion.

315. Did Mr. Egerton Ryerson defend himself and the Christian Guardian of which he was then and had been for some time Editor against the imputation contained in

the said letter, at some length?-He did.

316. Did he not in his defence impute to the Wesleyan Methodist conference political intermeddling, especially in relation to the slave question then causing much excitement in the colonies, and mother country !- I think he made mention of the circumstance alluded to

317. Did Mr. Alder reply to him, also, at some length, and do you not think he was exceedingly severe, both on the political character of the Guardian and Methodist body in Canada?—He defended the principles of the 7th Resolution of the Missionary committee in London of date February 1832 very warinly

318. Was it at that meeting of the Board of mangers of the Missionary Society of the Methodist Episcopal Church the Union was first proposed and by whom ?was at the meeting that I first heard of the proposal for Union, it was in the course of discussion, it was I think

first proposed by the Rev. John Ryerson.

319. Was racre a subsequent meeting of the said Board, at which certain Resolutions on the subject of the Union, were discussed and adopted, and by whom were they proposed !- There was a subsequent meeting at which certain Resolutions were proposed, I think by the Rev. E. Ryerson.

320. Was any address to the Conference of the Methodist Episcopal chu ch proposed and adopted at that meet ing to accompany the said Resolutions and by whom?-Not to my knowledge I have no recollection of it.

321. How were the Resolutions transmitted to the Conference and their attention called to the same, was any letter adopted by the Board or was the President or yourself as Secretary instructed to transmit them requesting their noticing them?-I do not know how the conference came in possession of the Resolutions there was no such letter to my knowledge.

322. Did you or the President on your own responsibility, transmit them to the conference, or was any resolutions or part of a resolution adopted at that board to give you such authority!-I have no recollection of any such resolution, neither did I officially transmit them to the

323. Were they haid before the conference at its ensuing session and by whom did you or the President send them accompanyed by a letter from yourself or the President, or did either of you conceive that any thing indirectly in the resolutions themselves gave you such pow-I understood they were laid before the conference but I do not know by whom; there was no such letter to my knowledge. I copied the documents for a member of the conference.

324. Are you aware that any letter was written and sent to the conference accompanying thise Resolutions and by whom and who was the member that leid them before conference ?- I have answered this to previous questions

325. Was any request made during the meeting of the board, that Mr. Alder would remain and attend the conference at Hallowell to confer on the proposed Union?-There was, and I think Mr. Alder was made acquainted with it, he was not present at the meeting of the board, at which the above resolutions were passed.

326. Was that request mude in any resolution or in any address to Mr. Alder passed by the board?-The request is contained in the resolutions, I am not aware that

he was addressed officially.

327. Can you furnish the committee with a copy of the resolutions or proceedings adopted by the board, proposing and recommending the Union ?-I have a copy of the resolutions passed at the last meeting.

(Witness handed in a copy of the same marked E.)

328. From the conversation and proceedings at the meeting of the board, do you think it was the intention or wish of the board that the resolutions recommending or proposing the Union should be laid before the ensuing conference? and that Mr. Alder should be requested to remain in the Province and attend the conference?-Such an intention appears to be embodied in the resolutions themselves.

329. Was there any communication made from the board to the Wesleyan missionary committee in London either through Mr. Alder or otherwise, or was a copy of the resolutions of the board sent to Mr. Alder?—There was a communication accompanying the resolutions of the board, transmitted I think through Mr. Alder, signed

by the President and Secretary.
330. Was that the order of the board and previously to their being laid before the Capada conference! Have you a copy of that letter and will you produce it for the information of the committee!—The communication in question was not laid before the board, nor was it, that I am aware, recognised by the board. It was written subsequently to the sitting at which the last resolutions were adopted and previous to the meeting of the conference. I signed the communication from an impression that it contained the sense of the board, though not my own individually and I so stated it to both the President and the Rov. E. Ryerson at the time, for I had from the first opposed the Union of the two conferences.

(The Witness handed in a copy of the letter marked F.)

Rev. JAMES RICHARDSON again called in and examined.

331. Have you read the Seventh Report of the Select Committee on Grievances?-I have read part of it, that which relates to the Methodists principally.

332. Have you found any thing in it relative to the church to which you belong objectionable as being erroneous or false; if so please to state the particulars!—I object first, the calling the Methodist Church an Ecclesiastical Establishment except in a spiritual sense common to all Churches organized under specific rules and forms .- I object to the phrase official pensions as applicable to Methodists of any description; but I do not mean to object to what I understand the meaning of the clause in which it occurs that those official pensions so called are derived from the public revenue raised within the Province. The British Wesleyan Methodist conference is the conference in England, which never was the Methodist Episcopal church, it therefore is incorrect to speak of it as such,

333. Is it your opinion that it is so erroneous, false or injurious to your church as to call for the animadversion and allegations which have appeared in the Christian Guardian against the committee on Grievances and House of Assembly ?-- I think not as I consider its statements not so much at variance with the fact of moneys having been received from government and expended on the missions connected with the conference to which I belong as the means or channel through which they have been received and applied to said missions-I have been both grieved and surprised at the many severe and indiserminate censures which have appeared against the committee on grievances, because of what they have said in the report, respecting the Methodists, as Lam of opinion that a few explanations and corrections made in the spirit of candor and meckness, would have been sufficient to remove any injurious impressions arising from the errore in the report, and also thereby this unpleasant and laborious inquiry might have been uncalled for.

334. Have the Societies of the Church to which you belong been troubled or agitated about the Grants of money made by the Government to the Methodists !- They

have I think to a considerable extent.

335. Did those agitations arise from the grants themselves or from misrepresentations respecting them?-No doubt misrepresentations respecting them have increased the agitation; nevertheless several of the societies within my knowledge have manifested considerable anxiety relative to those money grants, after they were correctly informed of every particular respecting them. When the report of those grants having been given appeared. I had occasion to explain at the quarterly meetings.—Those explanations relieved their minds, under an expectation that as the Canada Conference had not been made acquainted with the receipt of them, they would at their ensuing meeting disavow any participation in them and declare their adherence to their former principles relative to grants from the public funds for the support of the Christian ministry. This not being done in a satisfactory manner, this agitation to a great extent, although not so vio-lent as at first, still continues.

336. Is it or is in not a fact that the £1,000 granted in the year 1832 or 1833 and £0,00 currency 1834, mentioned in the clause of the Grievance Report to which you object, have been received ?- I believe it to be a fact that the sums mentioned in question were received, the former by the Treasurer of the Wesleyan Missionary committee of London; the latter by the general superintendant of missions in this Province, and applied to the support of the missions connected with the conference to

which I belong.

337. Do the Preachers make to your conference annual reports of the Financial as well as Spiritual concerns of their circuit?—Yes they do.

333. Are the names of any missionaries that receive pay from the funds of the Missionary society, of which the Rev. Joseph Stinson is the General Superintendent, on the minutes of your conference ?- Several of them. those who are appointed by the conference are on the minutes; some stations are supplied by persons employed by the Superintendent, as occasion may arise from lack of preachers at the time of conference.

339. Does the General Superintendent report to your conscrence the state of the missions?-The state of the missions is presented at the conference with the state of

other parts of the work.

340. Does he account to your Conference for the expenditure of monies granted by the Parent Society?—He accounts to the Wesleyan Missionary Committee in Lon-

341. To whom does he apply for Preachers to occupy the mission stations ?-The preachers are appointed to their stations by what is called the Stationing Committee, which is composed of the chairmen of districts and the superintendent of missions acting with the President of the Conference; when vacancies to the stations occur at the conference he employs such persons as may appear to him suitable, that area uthorised by the church to preach.

342. Are the Chairmon of Districts allowed to exercise the same power in supplying vacancies in the circuits under their oversight?—Yes.

343. Are the missions on which the monies appropriated by the Wesleyan Missionary Committee in London are expended, regarded, in the articles of union as the Missions of the English Wesleyan Missionary Society? and do the missionaries employed in them derive any personal benefit or additional salary from the grants made by the government to that Society?—They are so regarded,—None that I know of. The Preachers connected with they now are.

our missionary work can receive no more than what is allowed them by the Missionary Committee of our church, according to the scale laid down in the discipline.

344. Do the missionaries derive their pay from the government grants made to the Parent Society, and are they members of your Conference, and can your conference, and do they from time to time through their stationing Committee appoint the preachers to these missions?-The government grants as I understand are put into the funds of the Purent Society in England and Missionaries receive their pay from those funds. The missionaries belong to our Conference. The Conference does appoint the preachers to those missions.

345. Can the superintendent employ any preachers as Missionaries but such as are approved by your Conference ?-It sometimes happens that at the sitting of Conference there is not a sufficient number of preachers to supply the stations; in such cases they are supplied by the general superintendent from among such persons as he may find duly authorised to preach by the church.

346. Is the book of discipline now shewn to you, the authorised discipline and if so is there any other edition?—It is the authorised and last edition of discipline.

347. Have you read a section on page 14, of the 7th

report of the Committee on Grievances headed "Ecclesi-

astical Establishments ?-I have.

348. Does it not appear to you that the following clauses in that section—" This consists of four classes of the Methodists, two conferences not in connexion with each other," and "the Methodist conferences had grants extended to them for the first time in 1832, or 1833," the conference of which you are a member is meant to be included, and has it not in your opinion been generally so understood?—How it has been generally understood, I am not able to say, but it appears to me that the conference to which I belong is meant.

349. Does it not appear to you that on page 15, the clause "formerly the Methodist Episcopal Church" was inserted in order to make an impression that the monies said in the same paragraph to have been paid in 1833 and 1834 were paid to the conference of which you are a member?—and has it not the tendency to make that impression?—It appears to me that it has a tendency to that effect.

350. Have you read a paragraph on page 16 commencing with the words "this appropriation" and ending with the words "in the year 1828"?—and another immediately following it, commencing with the words "upon another occasion," and ending with the words "good understanding"?—I have read it slightly.

351.—Do you consider that by the Methodists alluded to in those paragraphs and said to be an Ecclesiastical Establishment the Methodist conformation with which you

blishment, the Methodist conference with which you are connected is meant?—and has it not been generally so understood?—It could be understood in no other sense.

352. Do you think that the Committee on Grievances could have obtained information as to the expenditure of these monies granted by the Government if they had applied to the general Superintendent of Wesleyan Missions they would have obtained from him correct information had they inquired.

353. Do you mean to say that the inferences drawn in the Report on Grievances on the subject of Government grants, in relation to the Methodists and Methodist conference, are not true inferences from the public documents appended thereto?—I have not examined the report sufficiently to inform me, with respect to the correctness of the inferencess drawn from the documents appended

thereto.

354. Do you think that many people in this Province by reading and hearing the statements made in the Grievance Report have been led to believe that Government grants have had a corrupting influence upon the minds of the members of that conference, and have caused change in their political views!—As far as I am acquainted the statements in the Grievance Report have not in my opinion affected their minds towards the preachers of our conference.—Their views of these money grants I think were generally the same before the report was published as

355. Will you explain to the committee the reason why the Missionary Superintendent of the Wesleyan Methodist Missions in this Province, if he had a particular account to give with respect to the Government monies, did not do so, when called upon for the same by the Governor, or why he has not done so to this day !- I can give no in-

formation relative to the subject contained in the question. 356. Do you think that the statements made in the Grievance Report concerning your conference are not believed by the people generally, or as far as you have an opportunity of knowing their views?—Those parts of the statements that are erroneous that may be understood to imply that Government money was paid directly to our conference-are not, as far as I have knowledge.

> Committee Room. Monday, 4th April, 1836.

Committee met.

The Rev. DAVID CULP, called in and examined.

357. Are you a Minister of the Methodist Episcopal Church in Upper Canada, if so, how long have you been a minister, and have you resided constantly in the Province during the same time, and does your church still continue to be designated by that name?—I am a minister of the Methodist Episcopal Church and have been for 24 years have during that time resided in the Province.-The church to which I belong continues to be designated by that -I have in my possession my credentials as a minister for 20 years, having received them after 4 years officia-

ting and travelling as such.
358. Has your church at any time received any donation or grant of money from the public funds of the Province, or have the ministers or members thereof at any time petitioned or solicited the Government for such grants ?- They have never to my knowledge received any

such grants, neither have they petitioned or asked for any. 359. Would it in your opinion be conducive to either the spiritual or temporal welfare, peace, or prosperity of your church to receive such grants-or would the members of your conference, or the people of your church be opposed to receive such ?—I conceive that it would not be conducive to the peace, welfare, or prosperity of the church to receive such grants—as far as I understand the views of the conference to which I belong they are decidedly opposed to them, and our people are, I think, generally opposed to

such grants.

360. What in your opinion has been the effect of such grants on the different denominations who have received them?—Have they produced good or evil in a religious point of view ?-1 ground my opinion upon the effects such grants have had upon the different denominations receiving them by comparing their state at the present according to my observation with what it used to be previously to the grants.—Before those grants were received there appeared to be peace, good will, and prosperity among the different denominations, notwithstanding the difference of opinion of creeds-since that it is not so ;-there is more disorder and unpleasant feeling in the different churches, I think, since those grants have been received, than ever I knew in Canada before, though I have been resident in it all my days

361. Have such grants produced political excitement, and to what extent? and has such excitement so produced been injurious to religion?—That they have produced a political effect or excitement is very clear in my mind, but to what extent I can hardly say, those excitements produced have been injurious to the cause of religion.

362. Do the community generally, or in any considerable number, approve of such grants, or do they disapprove of them, and would they, in your opinion, desire that they should be discontinued?—As far as my knowledge extends of the community generally, they feel decidedly opposed to to any religious denominations receiving such grants-for many of the members whose ministers have received them have stated to me that they would not feel satisfied to have them continued.

363. Is the conference of which you are now a member

the same to which you belonged 24 years ago ?-1 consider it to be the same.

364. In what way is episcopacy in your church established?—By the provision made in the discipline of the Methodist Episcopal Church, it is provided that in the case of death or vacancy in any way, or of there being no Bishop, three Elders can set apart a person to that office, which

365. Has there ever been any person known by the title of Bishop of the Methodist Episcopal Church in Canada ?-The church has been designated and known as the Methodist Episcopal Church in Canada, but till recently there never having been any person fixed on, upon whom they could agree to fill that office, there had been a Bishop protem pore.

366. Have you a Bishop now who is appointed for life?-We have a Bishop now who is appointed during good behaviour, all the officers of our church are appointed on that

condition.

307. When had you a Bishop pro tempore, and at what time was your first Bishop appointed ?-My memory does not serve me sufficiently at this time to say when a Bishop pro-tempore, was thus appointed-I can only say that after the amicable set off from the connexion with the United States, this person was appointed; our first Bishop was appointed at our last annual conference, held in Trafalgar in June last.

368. Is he the same person who was your Bishop pro-

tempore?-He is not.

360. Are the ministers of your conference known as itinerant preachers, or are they both itinerant and local preachers?-We have both itinerant and local preachersbut I would add that our local preachers have no seat nor vote in our annual conference.

370. Is your Bishop a local or itinerant preacher?—He is now of course considered an itinerant preacher.

371. What constitutes him an itinerant preachers ?-His

belonging to an itinerant connexion at present.

372. What are the duties of your itinerant preachers?— To travel and to preach the gospel as far as health and circumstances will permit.

373. What do you mean by circumstonces in your answer to the last question?—I mean that there are many circumstances or casualties which might occur to prevent his travelling.

374. Are any of your itinerant preachers allowed to follow wordly calling, such as farming, merchandizing, &c. ? Yes, as much as it was allowed to St. Paul to follow tent

making, at certain times.
375. In your answer to question 360, do you mean to be understood to say that no splits or dissensions took place among the Methodists prior to those grants having been made?—By no means, I willingly grant there have been splits, but to a more serious extent since the grants have been received.

367. You say that much agitation exists among different religious denominations since Government grants have been made to religious bodies-is it your opinion that such grants affect the political feeling of the denominations that receive them !- I think they do to a pretty serious extent.

Mr. JAMES. R. ARMSTRONG called in and examined 377. Are you a member of the Methodist Society ?-

378. Were you a member of the Methodist Episcopal Church previously to the union between the conference of that church and the Wesleyan Methodist conference in England ?- I was.

379. Had the conference of the Methodist Episcopal church a missionary society termed the Missionary Society of the Canada conference of that church?-Yes.

380. Were you treasurer of that missionary society !-

381. What is the Methodist church of which you are a member called since the union before mentioned?—The Wesleyan Methodist Church in Canada.

382. Has the conference of that church a missionary society, and what is it called !- The Missionary Society of the Wesleyan Methodist Church in Canada.

383. Has that society a constitution or rules by which it is regulated and managed, and can you furnish the com-

mittee with a copy of the same ?-I have not been furnish-

ed with such rules since the union.

384. Do you know how the missionary society before alluded to is connected with the conference of the Wesleyan Methodist church in Canada, of which church you say you are a member ?- This society is auxiliary to the parent society in London-there is a superintendent from the missionary committee in London who superintends the missions in this country; some of the missionaries I believe are members of the conference.

385. Are you treasurer of that auxiliary missionary so-

cicity!—No, not this year.
386. Have you been treasurer of the missionary society within the two years past?-Yes, I was treasurer until the last conference.

387. Was the missionary society mentioned then auxiljary to the parent Wesleyan Methodist Missionary Society

in London !-- I considered it so.

383. How were the monies then received by you for the uses of that society, and how were they accounted for?—
I beg to hand in to the committee the best answer I can give to the question, the reports of the missionary society for the years 1834 and 1835, in which will be found the receipts and expenditures of all monies connected with the society. (For receipts and expenditures see G. & H.)

380. The committee perceive by the two reports you have handed in, that in that of 1834 the monies paid are accounted for in detail, and in that of 1835 they are not?—Can you explain the reasons of the difference?-The last report was made up when I was not at home,-I expect by Mr. Stinson from my books-I have no doubt but a detailed

account was laid before the conference.

390. The committee perceive an item in the receipts of "Cash from the Parent Society in London drawn at different times during the year 1834" £1893 1 0. Can you explain the nature of that transaction ?-Mr. Stinson was in the habit of drawing on the missionary committee in London for money as it was required and handing the same over to me as treasurer to meet the demands of the missions

391. Do you recollect how much of that sum was drawn for on London by Mr. Stiuson. State if you please the amount as a whole, or in separate sums ?- I consider he drew on the committee in Loudon for the amount of £1893 1 0 mentioned in the report of 1834-I cannot

say in what particular sums.

392. Did he state to you when he paid money over to you, as received through the Parent Society-it was money he had obtained by the sale of bills drawn on the treasurer of the Parent Society?—I do not recollect that he told me that particularly—I have heard him say that he had sold bills to different individuals, I never enquired particularly.

393. Do you believe the whole amount of £1893 1 0 was moneys drawn for on the Parent Society in London by Bill of Exchange ?- I have said before it was drawn at different times; part of it I believe was received thro' Mr. Marsden and paid by him as treasurer of the Missi-

onary Society in London when he was in this country. 394. In the Christian Guardian of 27th May 1835. statement bended-" Cavada Conference Missionary Society in account with James R. Armstrong, treasurer" is published—is that statement correct !- [The witness was shewn the Treasurer's Report in the Guardian No. 289] (for Report see I.)-I have no reason to doubt its correctness as far as relates to moneys that came into my hands.

395. In that statement appears, as having been received by you, £1000 currency from the Rev, George Marsden, Treasurer of the Missionary Society in Londonis that item correct?—This refers to money paid to Mr.

Stinson for which I cannot account.

396. Can you explain to the committee how it is that the two sums total of the published account in the Guardian of moneys received, and that in the missionary report, agree except in one item of money paid to Mr. Stinson?—In my report the amount is included in one sum, but in the paper it is divided into two items to make the matter more explicit.

397. Are you aware of any Government grants being made to the Parent Society of the Missionary Society of your church and under what authority were they made ?

I know nothing except from report.

293. Do you approve of such grants being made and for such purposes !-As I considered this grant was made for the benefit of the Indians, I can find no fault with it, inasmuch as the moneys paid arose from the sales of the lands which once belonged to them, as I consider they did:

309. Do you believe that this is the general opinion of the ministers of your church and of the conference of your church ?-It is impossible for me to say how far

that opinion extends.

400. Would you approve of Government grants being given for missionary purposes to the Catholic church among the Indians?—If they should expend the grant in the education of the Indians in reading, &c., I have no objection.

401. Do you believe it is only right and proper for the Government to grant for missionary purposes to the Wesleyan Methodist Church?-I think my answer to the last

question answers this.

402. Do you think that Government has not a right to bestow its bounty for missionary purposes on any religious sect and society it may choose to select for the purpose?—It is not for me to dictate to Government the manner it shall distribute grants for missionary purposes; and where moneys are judiciously laid out in civilizing the Indians, I do not object to any religious body being the agent for that purpose.

403. Are you of opinion a missionary society of any church can teach christianity, or do you believe christianity consists in any set of religious opinions?—I believe that many christian societies can teach christianity.

404. Was any part of the amount drawn through Mr. Marsden from moneys granted by the Government to the Parent Society !—I think I have said that Mr. Stinson drew on Mr. Marsden as treasurer for the Missionary Society in London for part of the moneys received from the Parent Society.

REV. Mr. EVANS again called in and examined.

405. Do you approve of grants by Government being made to the Parent Society of the Missionary Society of your church for missionary purposes ?-I think it is perfeetly right for the Government to make such disposition for missionary purposes of any moneys which are constitutionally at its disposal as may be in its opinion most conducive to the interests of these who are destitute of religious instruction when by so doing the salary of no preacher would be augmented or his personal interest promoted.

406. Do you think that this is a general opinion among the members, lay and ecclesiastical of your church !—I am not aware that any member of our church would be opposed to the government making such appropriations for missionary purposes as are in accordance with its constitutional powers, and the expenditure of which would promote the spiritual and eternal interests of mankind without augmenting the regular disciplinary allowance of any preacher; but I believe that the whole of them as well as myself would strongly disapprove of any Government grant being received under circumstances that would tend in any degree to the temporal aggrandizement of the preachers, by enabling them to receive any, even the smallest salary over and above the regular allowance made by the discipline, because, if received under such circumstances it might exert a corrupting influence upon the preachers, and induce men to enter the ministry from motives of pecuniary gain and without that due regard to the good of souls by which alone

the christian ministry ought to be actuated.
407. Do you approve of Government grants of money made for missionary purposes being devoted to the payment of salaries to the members of your conference or such preachers not members of your conference employed by your church as mer conaries?—I can see no impropriety in the committee of the Parent Society under whose direction

the Wesleyan Missions in this Province are placed receiving grants from the Government, it made as above stated from funds constitutionally at its disposal, or in their faithfully appropriating them with their other funds according to the best of their judgment to the promotion of the spi-ritual interests of those who are under their pastoral care and direction. I am however of opinion that more than the amount received from the Government has been approprinted to education and other purposes in the mission work without including the payment of preachers salaries.

JAMES RICHARDSON again called in and

408. Having been much in attendance in this committee at its first sittings, have you seen any thing that can jus-tify the animadversion in the Editorial of the Christian Guardian of last week, No. 333 and of this week relative to the proceedings of this committee ?- I was not present on the first day of the sitting of the committee but was part of the second day and several times since, and from what has come within my knowledge, the inquiry of the committee, although multifarious, close and searching, have not been in any way secret, but open and candid; and as far as I am concerned they have been courteous.

409. What is your opinion relative to the tendency of those animadversions?-I think they tend to mislead the public mind relative to the proceeding and character of this committee as far as my knowledge extends.

410. Were you present when the committee concluded examining Mr. Case, did you hear him complain then or since of the treatment by the committee?—I have not heard him complain, but I heard him thank the committee for their courtesy towards him or to that effect,

411. What is your opinion of government grants made for missionary purposes to the parent society of the missionary society of your church?—I have been for some years of the opinion that the only proper mode, (consistent with the purity, peace and unity of religious societies,) of supplying pecuniary aid to religious institutions whether missionary or others, is the voluntary contributions of individuals from their private or personal resources.

412. Do you believe the whole of your conference would approve of the missionary members of your conference, or any preachers employed by your conference, not its members, as missionaries receiving salaries, or any degree of compensation for religious services from such a source?— I do not approve of it, and I believe several members of the conference to which I belong disapprove as well as my-

self.

413. What is the opinion of the lay-members of your church on the same subject so far as your knowledge extends?—To my certain knowledge, both the preachers and the members of the church to which I belong were, a few years since, almost unanimously opposed to receiving aid from the public funds, for any of their religious institutions. I recollect at the conference of 1829 a motion was made to apply to the Legislature of the province for a grant of £500 to aid our missions among the Indians which was decidedly opposed, being only supported, I believe, by the mover and seconder, and the members of our church have not, to my knowledge, given any indication of a change of opinion on the subject, except it be in very few cases.

414. Do you recollect your conference in one of its ses. sions, adopting and forwarding a memorial to the King. deprecating an established church in Upper Canada, and also recommending that all religious teachers, preachers, and ministers be left to the voluntary support of their own

churches !- I do in the session of 1831

415. Was that the memorial that called forth the wellknown reply of Sir John Colborne, lete Lieutenant Governor, to the application of the committee of your conference to his Excellency to lay it at the foot of the throne?-It was.

Thursday, 7th April, 1836.

The committee met. JOHN WILLSON, Esquire, of Sulffleet, called in and Examined.

416. Are you aware of any grants of money being made

by government for religious purposes to different sects of christians in this province ?- I am.

417. Do you know what these purposes are, and under what authority were the grants made?—I know that in 1833 I made application to the Lieutenaut-Governor for a grant of money for the Canadian Wesleyan Methodists; the authority for the grant as far as I know was from the Lieutenant-Governor by order of the Home Government. The application of the money was to be for the benefit of the preachers, but in communications which I afterwards received from the government-office, it was stated it was for the building of churches & chapels. In the year 1834 application was again made by me in favor of the said society. A grant was made the' smaller in amount than the preceding year. In the year 1833 a part of the money granted was paid by me towards the building of certain chapels and the remainder was paid over to a committee of the conference. In the year 1834 the sum was paid over towards the erection of chapels, and a sum of \$300 or thereabouts was reserved towards building a chapel in Toronto which was ifterwards abandoned.

418. Do you think it is the wish of the Canadian Wesleyan Methodists to have the grants continued ?-As it was upon my application to the Government the grant was first made I desire to rehearse to the committee the purport of the statement made by to the conference at the time I informed them of money being at their disposal. I stated to them distinctly that the moneys given to the several religious denominations were taken out of the casual and territorial revenue a fund at the disposal of the crown by prerogative right, and while it so remained that they (the Canadian Vesleyun) might very fairly avail themselves of the royal benevolence in receiving it; but that it was my opinion it would be better this fund were transferred to the control of the Provincial Legislature which could only be done by negotiating for it; as was the case with the proceeds of the 14th Geo. 3rd, and should the question come before the Assembly in a proper shape and be disposed of in an amicacable way during my time of service therein I would give it my most cordial support. The subject of religious grants being made a matter of discussion in the Conadian Wesleyan conference in its Session of 1835, a vote passed in

the negative at my instance. 419. Can you inform the committee on what grounds the Conference of the Canadian Wesleyan Methodists declined applying for any further grants?—One reason was that the Preachers said the people in some places would not come to hear them in consequence of the Conference having received the grant. Another was that the people did not contribute with their usual generosity; and thirdly that there could not be a satisfactory distribution made of it.

420. Do you know of any grants of money being made by the Government for the missionary purposes of any reli-gious body ?—In the communications from the Government office to me it was stated that there was a certain sum to the British Wesleyn Conference, and a certain sum to the Canadian Wesleyan Conference, an exact copy of which I believe is in the Seventh Report on Grievances

421. What effect had the sogrants on the peace & harmony of the Canadian Wesleyan church, and did they answer the purposes you anticipated when you first applied for them, or do you think they generally advanced the religious interests of that society !- I acknowledge they did not produce satisfaction, the reasons for which I have stated in

a former answer.

422. In your answer to question No. 417, you say a part of the money received by you from Government was paid over to a committee appointed by the conference, do you know to what purpose the committee applied the money so paid over by you !- I cannot tell as vouchers for applications are not in my possession.

423. Were any directions given by you to said committee with respect to the application of said money?-No, notby me.

424. Was there any given to it by the conference?—I really do not know what directions the conference might

425. In the seventh report of the committee on grievances there are certain resolutions purporting to be the resolutions of the Canadian Wesleyan Conference, are these

recondutions correct and if so were they complied with hy your conference?—They have been complied with the money has been paid agreeably to the resolution, the sum set apart towards the building a chapel in Toronto was the next year together with the interest thereon, applied towards other chapels.

426. Has your society a chapel in Peterboro' 1-I do not know, I know they have a lot there and aid was sent to build a chapel but I am not aware that one has been built,

or is building.

427. You have said there were £17 expended on a young man who was sent as a preacher to Toronto, was that paid to him as his salary?—By no means, in lieu of or as a part of Mr. Flanagan's salary, as I believe that no methodist conference makes itself liable for the salary of any preacher on any circuit or station, on the general plan not being a mission, I did myself assume the responsibility as he was sent to this place and appeared to have no visible means, nor any place for public worship, and I procured for him through the politeness of the sheriff the use of the court-house which however he did not use, the money was paid by me at differ times, and a small sum to get a contractor to relinquish his contract for building a chapel entered into by Mr. Flanagan, who, in conjunction with Mr. Bumford strove hard afterwards to get from me a further sum of £20 to 25 of said money; but, by that time, I suspected one or both of having fallen under the influence of the Rev. Egerton Ryerson, and which afterwards proved to be the case.

428. Did you inform the conference from what funds those grants were derived and by what authority they were made ?—I stated that they were derived from the casual and territorial revenue and by the authority of His Majes-

ty's Government.

429. Have you considered such grants to have been iven for the special benefit of Indian Missionaries only !-Not such grants as I have been speaking of, such was never contemplated by the grants to the Canadian Wesleyans.

COMMITTEE ROOM.

SATURDAY, 9th APRIL, 1836.

Committee met.

REV. JOSEPH STINSON, called in and examined. 430. Are you superintendent of the missions of the Bri-

tien Wesleyan Conference in this Province !- I am.

431.—Will you be good enough to state to the committee how you are appointed to that station?—I am appointed by the Wesleyan Methodist Conference in England.

432. Is there a Missionary Society in this Province attached to the Wesleyan Methodist Church of the same, and it is auxiliary to the Parent Society in London ?-There is a Missionary Society in connexion with the Methodist Conference in this Province, which Missionary Society is auxiliary to the Wesleyan Missionary Society in England.

433. Will you be good enough to state to the committee how the missionaries employed by that Society are appointed to their work?-They are appointed by the Canada

484. Are they in any manner under your superintendence, and will you be good enough to state the extent and authority of that superintendence !- I beg to refer the committee to the articles of union between the Canada and English conference, as an answer to the question.

435. Will you be good enough to inform the committee what authority the Parent Missionary Society in England exercises over the Canada Conference Missionary Society of the Wesleyan Methodist Church ?- I know of no authority it exercises except that which is stated in the articles of union.

438. Are you aware of any Government grants being made for the support of Wesleyan Methodist Missionaries in Upper Canada?-I know that a grant of that description was made to the Wesleyan Methodist society in London for the support of Wesleyan Methodist Missions in Upper Canada.

437. Were those grants made unsolicited, or were they applied for by the Parent Missionary Society in this Province ?- I believe they were made without any solicitation winteyer.

431. What amount was recived, and how was it expended?-I beg to make the following statement as my answ cr

Account of Receipts and Disbursements of moneys received from Government on account of the Wesleyan Methodist Missionary Society in London. For the Years 1833, 1834 and 1835.

439. Were any of the moneys granted by the Government paid to any of the members of the Canadian Conference, excepting native preachers ?-No part of those grants was paid to any members of the Conference, but native preachers.

440. Were you ever required before this either by the Government of this Province or the Legislature thereof, to account for the expenditure of these moneys ?- I was not required to give such account, the Parent Society makes the account to the Government, and I account to the Parent Society.

REV. J. FLANAGAN, called in and examined.

441. Were you formerly a member of the conference of the Canadian Wesleyon Methodist Church?—I was.

442. Were you Secretary of that conference at any

443. Have you any knowledge of certain grants of money having been made to that conference, and if so will you please to state the amount, and for what purposes they were granted?—There were certain grants made to that conference in the years 1833 and 1834, the sum granted in 1833 wa: £600 sterling, and in the year 1834 £350 sterling, they were granted for the purpose of buildings in the Province.

444. Case you inform the committee in what manner the first great of £600 sterling was expended?—There were \$320 o. £80 paid to the Rev. James Jackson for his claims on the conference, the resolution of the conference

ordering the payment of this sum was as follows:

Resolved—That there be granted to Fider Jackson, of
the funds of the conference, the sum of some account

of all his claims to this date. (June 1833)

The sum of £25 was paid to the Rev. David Breakenridge, and the like sum to Elder Jackson, as part of their salaries in advance, making the whole sum paid to Mr. Jackson that year £80.

The sum of about £300 was paid to Dr. McKenzie, or

the printing committee, for the printing establishment. The rest, as far as my knowledge extends, was given

for the purpose of chapeis.

445. What were the claims of Elder Jackson, which you mentioned in your former answer which were named in the resolution, and from what source were the funds of the conference derived ?-His claims were for salary as minister to the connexion, the money obtained from the Government was the only fund at the command of the conference except about \$54 which I brought to the conference.

The following resolutions passed the conference:-Moved and cerried, that there be paid in advance to each of the missionaries or agents of the printing esta-

blishment the sum of £25.

Moved and carried that all the monies in the hands of brother John Willson, to and for the use of our people and at the disposal of the conference be paid by him to the order of the Printing Office.

446. In the seventh report of the committee on grievances there is a document bearing your signature as Secretary of the Canadian Wesleyan Methodist Conference, purporting to be the resolutions passed by that conference, directing the manner in which any grant that might be made by His Majesty's Government that year should be

expended, is that document correct?—This is correct.
417. Was any money granted that year by the Government to that conference, and if so was it expended in the manner directed in those resolutions !- There was as before stated; and it was applied for the purposes mentioned except the sum of £20, which was paid to Mr. Jackson. The Trustees of the London, St. Thomas and Vienna chapels, signed receipts in full for the whole amount they were to receive, at the same time, giving between them to the Rev. James Jackson, the above sum of £20, the sum of either £15 or £17 was likewise given to me towards the establishing a mission in this city.

448. In your reply to question 445, it appears that part of the grant was paid to Elder Jackson as a missionery, what was the nature of that mission?—The nature of it was to collect debts due to the printing establishment, for the paper called the "Canadian Wesleyan," he acted as

agent for the printing committee.

APPENDIX

REPORT AND EVIDENCE

TAKEN BY THE

Select Committee

GOVERNMENT GRANTS.

A

ARTICLES OF UNION.

The English Wesleyan Conference, concurring in the communication of the Canadian Conference and deprecate the evils which might arise from collision, and believing that the cause of religion generally, and the interests of Methodism in particular, would, under the blessing of God, be greatly promoted by the united exertions of the two connexions; considering also, that the two bodies concur in holding the doctrines of Methodism as contained in the Notes of Mr. Wesley on the New Testament, and in his four volumes of Sermons, do agree in the adoption of the

following Resolutions:1st. That such a union between the English and Canadian connexions, as shall preserve inviolate the rights and privileges of the Canadian Preachers and societies on the one hand, and, on the other, shall secure the funds of the English conference against any claims on the part of the canadian Preachers, is highly important and desi-

2nd. That [as proposed in the second and third resolutions of the Canadian conference] in order to effect this object, the Discipline, Economy, and form of church Goverment in general of the Wesleyan Methodists in England be introduced into the societies in Upper Canada, and that in particular an annual Presidency be adopt-

3rd. That the usages of the English conference, in reference to the probation, examination and admission of candidates into the Intenerant Ministry, be adopted.\*

4th. That Preachers who have travelled the usual term of probation and are accepted, by the Canadian conference shall be ordained by the imposition of the lands of the President, and of three or more of the Senior Preachers, according to the form contained in Mr. Wesley's "Sunday morning service of the Methodists," by which the Wesleyan Missionaries in England are ordained, and which is the same as the form of ordaining Elders in the Discipline of the Canadian conference.

5th. That the English conference shall have authority

to send from year to year, one of its own body to preside over the Canadian conference; but the same person shall not be appointed oftener than once in four years, unless at the request of the Canadian conference.-When the English conference does not send a President from England, the Canadian conference shall, on its assembling

choose one of its own members.

The proposal of the Canadian conference is understood to include, as a matter of course, that the President of the conference shall exercise the same functions generally as the present general Superintendent now actually excreises; he shall not however have authority to appoint any Prencher to any circuit or station, contrary to the counse, and advice of a majority of the chairmen of District or Presiding Elders, associated with him as a stationing committee.

6th. That the Missions among the Indian tribes and

This is understood both by the Canadian Conference and the Representatives from the British Conference to refer to no other modifications in the economy of Methodism in Upper Canada, than those which have taken place at this Conference and that the Canadian Book of Discipline has heretofore provided for

destitute settlers which are now, or may be hereafter, established in Upper Canada, shall be regarded as Missions of the English Wesleyan Missionary Society under the

following regulations:—
First.—The Parent Committee in London shall determine the amount to be applied annually to the support and extension of the Missions; and this sum shall be distributed by a committee consisting of the President, General Superintendent of the missions, the chairman of districts and seven other persons appointed by the Canadian conference. A standing Board or committee consisting of an equal number of Preachers and Lay-men, shall moreover be appointed as heretofore at every conference, which during the year, shall have authority in concurrence with the General Superintendent of missions, to apply any moneys granted by the Parent Committee and not distributed by the conference in establishing new missions among the heathen, and and otherwise promoting the Missionary work.

Second,-The Methodist Missionary Society in Upper Canada shall be auxiliary to the English Wesleyan Missionary Society and the moneys raised by it shall be paid in-

to the funds of the parent society

Turd,-The Missionaries shall be stationed at the Canada conference in the same way as the other preachers; with this provise, however, that the general superintendent of missions shall be associated with the president and chairmen of districts in their appointment.

Fourth,—All the preachers who may be sent from this country into the work in Upper Canada shall be members of the Canadian Conference and shall be placed under the same discipline, and be entitled to the same rights and pri-

vileges as the native preachers.

Fifth,—Instead of having the annual stations of the missionaries sent home to the English Missionary Committee and conference for their "sanction," as is the case with our missions generally, and as the Canadian Conference have proposed, the English Conference shall a vint, and the parent committee shall meet the expense of supporting a general superintendent of missions, as the agent of the committee shall have the same superintendence of the mission stations, as the chairman of districts or presiding Elders exercise over the circuits in their respective districts, and shall pay the missionaries their allowance as determined by the Conference Missionary Committee on the same scale as the Canadian book of Discipline lays down for the preachers on the regular circuits:-but who, being at the same time recognized as a member of the Canadian conference shall be accountable to it in regard of his religious and moral conduct. This General Super-intendent of missions representing the parent committee in the Canadian conference, and in the stationing and missiourry committees, the appointments of the missionaries at the conference shall be final.

7th,-That the Canadian Conference in legislating for its own members, or the connexion at large, shall not at any time make any regulation which shall infringe these articles of agreement between the two conferences.

Signed by order and on behalf of the conference.

RICHARD TREFFRY, President. EDMOND GRINDROD, Secretary.

Manchester, August 7th, 1833.

Resolved .- That the Canadian Conference cordially concurs in the resolutions of the British Conference, dated "Manchester, August 7th, 1833," as the basis of union between the two conferences.

EGERTON RYERSON, Secretary.

York, U. C. October 2nd, 1833.

. The understanding of this article is that the Canadia Conference shall employ such young men in Upper Canada as they may judge are called of God, into the iteneran work; but should not a sufficient number be found in Upper Canada properly qualified, the British Conference will send out as marly young mon from England as may be requested by the Canadian Conference.

GOVERNMENT HOUSE. Toronto, 30th June, 1835.

I am directed by the Lieutenant Governor to acquaint you, with reference to your letter of the 22nd instant. that the sums granted in aid of the different churches it Canada were all sanctioned, in consequence of petitions to His Majesty's Government-and at the time the appropriation alluded to in your communication was made, His Majesty's Government supposed the Wesleyan Methodists in this Province were under the control of the British conference.

For any further information you may require on the subject I am directed to refer you to the correspondence which was laid before the House of Assembly last session. I am, &c.

A true Copy.

ROWAN.

C

Extracts from Minutes of Committee held May 11th 1831.

Mr. Ryerson, from Upper Canada, accompanied by the Rev. Peter Jones, a converted Indian Chief, were introduced to the Committee, having statements to make, and arrangements to propose, respecting the prosecution of the Missions in that Province, and especially among the Indian Tribes. After hearing their statements, and considering what might be the probable effects of their plans on their own Missions and missionary subscriptions it was— Resolved 1st.—That Mr. Turner be immediately written

te, to enquire respecting the facilities which may exist as to the commencement of a Mission to the Indians in Upper Canada among such tribes as have not yet been visited by missionaries, such mission having been lung con-

templated.

2nd. That a grant of the sum of three hundred pounds be made to Messrss. Ryerson and Jones for the use of the Missions already commenced among the Indians by the Canadian Methodist body; as a preof of christian and brotherly affection to our Canadian bretiren. 3rd. That in consequence of this grant, the brethren Ry-

erson and Jones have agreed and will be expected to give their best assistance to our friends at such meetings as they may have opportunity of attending while they re-main in England without making private and personal applications for subscriptions to any of our own friends.

> London, Westeyan Mission House. ? June 13th, 1831.

The Rev. WM. CASE, de. de. de.

DEAR BROTHER:

At the instance of the missionary committee. I now transmit to you a copy of the resolutions entered into by them, on the introduction of Mesers, Ryerson and Jones, and receiving their statements relative to your in saions and the olject of the visit of the deputation to England. They rejoiced to receive them as brethren, and sincerely congratulated them on the success with which your mesicinaries have been favored, by the blessing of God, among the native tribes of Indians. An impression, deep, affectionate and highly favorable to the Indian mission has been made by the addresses of Brother Jones at our own and several other public meetings of a benevolent character, as well as by the amisbleness, intelligence and piety of his general intercourse with ourselves and our friends in different places. We exceedingly regret the severe indisposition by which he has for some weeks been prevented rom more generally visiting our societies in other parts of the kingdom, but from which we are thankful to hear he is now recovering and are therefore noping that he will soon be in a state of convalescence. During his sickness which occurred at Bristo', and which there is reason to believe originated in a violent cold taken by travelling on the outside of the coach from Liverpool to London immediately after his arrival, he has been at the house of a most kind and attentive friend, Mr. James Wood, jun. son of our venerable brother the Rev. James Wood, where he has received every medical and domestic attention. Mr. Ryerson, who resides at the mission house continues in good health.

From the annexed " Resolutions" you will observe that the committee have decided upon commencing their long c attemplated mission to the Indians, convinced that where the field is so wide there need be no fear of any unpleasant or conflicting feelings among the messionaries who may be employed. The idea was suggested to your deputation whether it would be agreeable to you to place the whole of your Indean missions in der our direction, as we might perhaps succeed in raising funds for a greater extent of missiomery operation that could be at present rused by your-selves; but as they seemed to think the proposal would not be accepted, they resolved to show their brotherly kindness and interest in the success of the mission to the aberigines of America, by a donation of £300 to which they were the more readily induced by a wish to accomplish a part of the object of your deputation, which they understood to be that of raising funds by soliciting subscriptions and dona-tions, but which they were aware could not be done in ad-dition to the applications of their own preachers and friends without some danger of painful collision. They were happy to find the proposal met the approbation of both Measrs. Ryerson and Jones, who consequently agreed not to make application to any of our own friends, reserving the fiberty of analysing to these of appropriate the second property of analysing to these of appropriate the second property of analysing to these of a large second property of analysing to these of a large second property of analysing to these of a large second property of analysing to these of a large second property of analysing to the second property of analysing to the second property of the second pr of applying to those of other denominations, who were not contributors to our own funds. They also agreed to assist at any public meetings we might wish them to attend durant and the state of t ing their stay in this country, all travelling expenses being borne by the missionary committee.

You will also perceive by the above "Resolutions," that whilst the committee desire to munifest the most cordial affection to their American Brethren and entertain a sincere wish for the prosperity of their missions, they feel themselves obliged to state their conviction that applications from other quarters to the Societies in England would be both injurious to their own funds and involve the connexion in unpleasant party disputes, and consequently, that in case of any future attempt to raise such contributions from our friends, they would regard it as an imperative duty to

discounter ance them.

Your official letter will, in course, agreeably to your desire be transmitted to the President, to be laid before the ensuing conference, from whom you will most probably receive a reciprocation of friendly and brotherly communi-

In the mean time—I are,
On the behalf of the Wesleyan Missionary Committee, Your affectionate Brother in the Gospel, JAMES TOWNLEY.

Secretary.

By order of the conference the resolutions of the London Methodist Missionary Committee held the 11th May. and the accompanying letter from the Rev. Dr. Townley, dated London, Wesleyan Mission House, June 13th, 1831, addressed to the Rev. Wm. Case, were taken into consideration, after carefully considering the several subjects referred to in these documents, it was resolved-

1. It is a matter of thankfulness to Almighty God and to our Methodist brothren in England, that Messrs. Ryerson and Jones have been kindly received and entertained in their mission to Great Britain; and that the addresses and intercourse of Mr. Iones have produced upon the public

mind in that country "an impression deep, affectionate and highly favorable" to the cause of missions.

2. That it affords us much pleasure to learn that our Methodist brethren in Great Britain feel a deep interest ing the christianization and improvement of the aborigines of

British North America.

3. That our sincere thanks be given to the Methodist missionary committee in London for the grant of three hundred pounds in aid of our Indian Missions.

4. That we learn with deepest regret that in a measure which so seriously concerns the interest of the Methodist connexion in Upper Canada, our mussionary operations in particular, and the honor of Methodism and cause of religion generally, our brethren of the London Methodist Missionary committee have, without consulting their Methodist brothren in Upper Canada, determined to establish a mission among us, separate from our connexion.

5. That the formation of a distinct Methodist society or societies in Upper Canada, by the London Methodist Missociates in opportunities is contrary to the understanding which has heretofore been given by the English conference that their missionaries should not form societies separate from ours in Upper Canada; whilst at the same time our Missionaries were not to interfere with the arrangements or operations of their missions in Lower Canada.

6. That it would be a matter of very deep regret should the Methodist Missionary committee in London determine to establish a mission in Upper Canada among any of the Indian tribes situated north and east of Luke Huron, as all these parts of the Province are embraced within the actual labours of our conference; as our own missionaries have with greater or less success, visited all these tribes, and we have established missions or regular missionary appointments among them all;—as no missionary society beyond the Atlantic can possess the same facilities with ours of doing an equal amount of good with the same means;—
as the formation of a Methodist society in Upper Canada,
distinct from that already established is a disavowal of the
already recognized principle that "the Wesleyan Methodists are one in every part the world"; it will in all probability produce serious misunderstandings and party disputes in our connexion-make unfavorable impressions upon the minds of the Indians, by attempts at forming distinct societio of professedly the same people among them-and do material injury to our missionary funds in this Pro-

vince.
7. That if the Methodist Missionary Committee in London shall determine to establish a mission or missions among any of the numerous Indian tribes west or north of the Lake Huron, or in the vicinity of Hudson's Bay, we will do all in our power to assist them, by furnishing them with Indian translations of the Gospel, Hymns, &c. and native

labourers as far as we can possibly spare them.

TO THE REV. DR. TOWNLEY, &c. &c. &c.

Rev. and dear Brother.

Your letter of the 13th of June last to the Rev. William Case and the annexed Resolutions of your missionary committee of the 11th May, were submitted to the conference at its late Session; and after the general sense of the conference was taken on the subjects embraced in your communication, the whole business was referred to the missionary Board to communicate with you. Agreeably to the direction of the Board we now transmit to you a copy of the Resolutions adopted by them on these subjects.

By the annexed resolutions you will perceive that due feelings of gratitude are entertained by the Board to our Brethren in Great Britain for their kind attentions to Messieurs Ryerson and Jones, and to your committee for their expression of good will towards our interesting and flourishing Indian missions in Upper Canada. The Board chesials the highest rish the highest respect and warmest affection for their Brethren on the other side of the Atlantic, viewing the Methodists in England and in Upper Canada as two Branches of the same family and subjects of the same government.

But considering all the circumstances of Mr. Jones' mission, and the apprehensions entertained that applications to the British public from the Methodist Missionary Society in Upper Canada, would "involve your connexion in unpleasant party disputes," his deputation to England as far as it relates to any applications to your contributors, has been regretted by the Board. You may rest assured that these circumstances were altogether unforeseen by our General Superintendent of Missions when the deputation was determined upon. We should be sorry indeed to be even the nancent instruments of doing any thing that would in the least degree disturb the peace of your connexion, or affect your missionary funds, so deservedly wanted throughout the

vastly extended fields of your numerous and valuable mis-

It may, however, be remarked by way of explanation, that Mr. Jones's mission to England was undertaken at the suggestion and recommendation of a number of intelligent and respectable English brethren, who stated their conviction that more guinens would be given in England in aid of our Indian missions than dollars in the United States, where a deputation from our society was once sent, and was assisted by the Methodist brethren in different cities and towns in that country to make collections to the amount of several hundred pounds. Our conference being an inde-pendent connexion in a British province. Our Indian missions established within the British territories, a preference was, of course, felt to making applications to the British public. And lest any method should be adopted by our deputation which might interfere with your interests and operations, they were instructed to call upon your committee for their advice. It is hoped, however, that, from the arrangements entered into between our deputation and your committee, Mr. Jones's mission may, upon the whole, have a favorable influence upon the funds of your own society.

And no future deputation to England is contemplated by the Board, unless the measures adopted by your committee should so far effect our missionary funds and operations in Canada, as to render further explanations and applications o the British public advisable and necessary.

The fourth, fifth and sixth of the accompanying resolutions were entered into by the Board in order to apprise your committee of the views and circumstances of our connexion relative to a part of the missionary field in Canada.
The success of our Indian missions, considering the means expended, has, perhaps, not a parallel in the history of modern missions. This extraordinary and continued blessing of God upon the labors of our society, is considered a pe-culiar call of Providence to continue them in all our mission stations, and to all those tribes which our missionaries have visited. Indeed, the rapid progress of Methodism in Upper Canada generally appears to indicate most clearly, that our present ecclemastical arrangements, whilst purely Wesleyan, are remarkably well adapted to the work of "spreading scriptural holiness throughout" the land, and that the abandonnent of them would be stepping aside from

the order of divine Providence.

By the seventh resolution annexed, you will perceive the readiness and anxiety of the Board to co-operate with your committee in their contemplated mission to Canada, as far as they can do so without "involving the connexion in unpleasant party disputes" and injuring our own missionary There is little doubt but the funds of our own society can be increased to a sufficient sum to meet the wants of all the Indian Tribes within the present boundaries of

our conference.

You will find an interesting account of the northern and western Indian Tribes referred to by the board, in the "two journals of the Rev. John West, A. M., late chaplain to The Hon. The Hudson's Bay Company." The most of these tribes speak the Chippeva tongue; and it is believed, wave Evangalian Missions is a section of these them. were Evangelical Missionaries sent among them, they would readily embrace christianity. Two of our native Indian Missionarics have visited some of these tribes and were instrumental in the conversion of several of them. Our own society has had it in contemplation to commence missionary operations among them, but the prosecution of this work has been hitherto delayed for want of adequate means and an effectual door opening almost simultaneously to the several Indian Tribes in our own neighborhoods which has thus far employed all the funds we could command for missionary purposes.

It may, at the same time, be remarked, that did our society possess the necessary funds, they could establish mis-sions among even these tribes at a far less expense and to far greater advantage than a society several thousand miles distant. Our society is located upon the ground, is well acquainted with the agricultural and all the local circumstances of the country, the situation, prejudice, and customs of the Indians, the most efficient and economical plans of introducing the gospel among them together with the arts and habits of civilization, and there are laborers in the employ of our society whose past unexampled success

proves them to be well qualified for the work. This however, is only suggested for the consideration of your committee.

It may be proper here to observe, that the progress of Wesleyan Methodism in Upper Canada has been far more rapid than in any other province of British North America, and that without being any burden upon our brethren in Great Britain or elsewhere. A spirit of intellectual improvement and increasing weight of talent, a fervency of spirit and evangelical simplicity are evidently keeping pace in our connexion with our increasing numbers and the improving state of society. Under the blessing of God our Societies are universally living in peace and most of them are in a state of encouraging prosperity, and our missions are every where prosperous,—under these circumstances, when your committee become acquainted with the state of our affairs we are persuaded they will see the unadvisedness of persisting in a measure, which, in its ultimate results, we cannot but view with fearful and melancholy apprehensions.

In pursuance of the instructions of your committee, the Rev. Mr. Turner has recently visited this place and preached for us once. Mr. T's, amiable deportment during his residence at Kingston has gained him a high place in the esteem and affections of our preachers generally and has promoted a desirable feeling of brotherly love towards your connexion. His communications to individual members of the Board on the present occasion, have not however been as definite and satisfactory as could have been wished.

We have understood that a station on the Grand River among the Delaware and Cayuga tribes, has been represented to Mr. Turner as unoccupied and as a suitable place for the establishment of your contemplated mission.—It may probably have been unknown to the individual or individuals who may have given Mr. Turner this information, that these tribes are in the vicinity of one of our oldest mission stations; that our Missionaries have preached to them regularly for a length of time; that within the last four months upwards of forty of them have been converted and have joined our society, including several of the principal Chiefs,

Upon the whole it may be submitted to your committee, whether under existing circumstances, your Missionary funds could not be more advantageously applied to the furtherance of the work of human salvation than in the establishment of a mission in this Province—other circumstances aside—at an expense far greater than would be necessary for the Methodist Missionary society here, to impart the same doctrines, the same feelings, the same blessings and effect the same improvements.

You are perhaps not apprised that there are many persons in this Province who would rejoice to witness party disputes among the Methodists and would recommend any measure and do all in their power to create and foment them—rightly judging that if they can but divide, they may eventually destroy them.—But we feel assured that your committee will not knowingly enter upon or sanction any measure that will "involve the connexion in those party disputes," which are alike destructive to the respectability, purity, and influence of Wesleyan Methodism and the interests of true religion.

We trust your society and ours have a common object in view and that the prayerful and persevering labours of both will be directed in those channels of usefulness and christian philanthropy, which will tend to cement both connexions in strongest bond of christian affection, bring most glory to God, and most happiness to mankind.

We are,

By order and on behalf of the Missionary Board, Yours affectionate in the Gospel of Jesus Christ,

JOHN RYERSON.

President.

THOS. VAUX,

Secretary.

D)

London, 77 Hatton Gorden, March 13th, 1832.

DRAR BRETHREN,

We embrace the opportunity of forwarding to you by the Rev. Robert Alder, the resolutions adopted by our committee after deliberation on your resolutions, transmitted to us under date York, October 4th, 1831.

We are dear Breiliren,
In the bonds of the Gospel,
Yours.

JAMES TOWNLEY,
JOHN JAMES,
JOHN BEECHAM.
Secretaries to the Wesleyan

To the Board of Managers of the Missionary Society.
onary Society of the Methodist Episcopal church in Upper Canada.

St. James' Chapel, Montreal, June 5, 1832.

My DEAR. SIR.

As I shall not be able to visit York until after the close of our District meeting, and shall be able to remain there but a very short time. I think it right to forward to you per post, the inclosed resolutions, in order that you may have time to present them to the Board before I wait previously upon you.

I remain Yours truly,

R. ALDER,

R. ALDER,
Representative of the Wesleyan
Missionary Society, and chairman of the Canadian District meeting.

To Rev. John Ryerson, President of Board of Managers, &c. &c. &c.

Resolutions of a committee, held February 1832.

Certain Resolutions of the Board of Missions connected with the Upper Canada Conference objecting to the committe's employing missionaries in Upper Canada and among the Indians having been read at the last meeting of the committee, and the Treasurers and Scretaries having been requested to confer with Mesers. Ryerson and Jones upon this subject they report as follws:—

1. That with respect to the "understanding" alleged in the said resolutions to exist between the British and Canadian conferences, that the Missionaries of the former were to confine their labors to Lower Canada, and leave the Upper Province to the exclusive occupation of the Canadian conference, they informed Messrs. Ryerson and Jones that no such understanding could exis; inasmuch as the former compact between the United States general conference ceased upon an independent conference being established for Upper Canada, and that when it was proposed by Mr. Capers to the British conference of 1828 to make a similar agreement with the Canada conference, it was declined.

2. That ever since that time the committee have felt themselves fully at liberty to occupy any station in Upper Canada, to which they might have such a call. as would warrant them to embrace it, with just regard to those general principles of respect to the usual application of funds, and the relation of any body of British Emigrants, members of our societies, and attached to our discipline, to embrace it.

3. That the great change of circumstances as to Upper Canada since the agreement with the states general conference, especially in respect of the immense number of settlers which have gone out from Great Britain and Ireland, and are still flowing into that Province in large numbers every year, was a decisive objection to the committee's recommending it to the conference to confine its missions wholly to Lower Canada, or not to reinforce the mission they have had for some years in Kingston, or not to establish under such circumstances new missions in that Province.

4. That with respect to the principle urged upon the committee in the resolutions of the Canada Board of Missions, "that the Methodists are one in every part of the world," could only be applicable in the sense of mainte-

YORK, U. C. Oct. 4th, 1831.

nance of fraternal affection, since a unity arising from the existence of but one form of Methodism in one Province, is now out of the question; several distinct bodies of Mothodists now existing in Upper Canada, who refuse to place themselves under the pastoral charge of the Canada Conference; and affording sufficient proof, that were our missionaries to be withheld entirely from that Province, a considerable number of independent bodies of Methodists

would grow up.

5. That with respect to the Indian missions the original agreement with the United States General Conference did not in any respect relate to them, so as to exclude the committee's endeavours to attempt their evangelization. They were in fact never referred to in that agreement, but it has I mg been the committee's intention to aid in this important work, in pursuance of a principle held sacred by the committee to endeavour to connect with missions near European settlers, attempts to benefit the aboriginal heathens of those countries where they may locate themselves. This the committee attempted in Labrador, in connection with the Newfoundland mission in New Holland; and by the blessing of God very successfully in connection with the South African Colonies. The extent of the committee's exertions, and the demands upon their funds were the only reasons which caused them to dolay their endeavours to evangelize the Indians in America.

6. That notwithstanding these views of the committee Messrs. Ryerson and Jones were informed that the committee intend nothing as to Upper Canada contrary to that brotherly kindness, which ought to exist between two kindred religious bodies; but that they shall not consider that principle at all contravened, should they fix missionaries in places of considerable population, altho' the Canada Conference may have societies in such places the population being such as to afford reasonable ground to conclude that there is a sufficient sphere of labour for each, much less that it would be any infringement of the said principle should a mission be planted among settlers not yet provided

with any religious ordinances.

7. That in the agreement between the United States General Conference and the British Conference, it was explicitly stated, that, should Methodism deteriorate in its form and spirit, or should any just political offence be given by their missionaries to the British Government, the British Conference should be at liberty again to employ its missionaries in Upper Canada. The deputation heard no explicit complaint in this respect against the United States Conference, nor did they charge the Canada Conference with either of such matters. This they were not called to enter into, inasmuch as no agreement to partition the two Canadas existed between the committee and the Canada Conference, and they were not therefore under any necessity of scrutinizing the fact; but that they must say with affection, but regret, that the publication of a paper expressly by the Canadian Conference entering warmly and in the spirit of partizanship into the local politics of the Province, was not in the spirit or according to the practice of British Methodism, and contrary to that abstinence from such disputes which they enjoined upon their missionaries; a circumstance which had created prejudice against the acceptableness of the Canada brethren, with a part of the population of Canada. On these points a conversation of some length was held, at the close of which Messrs. Ryerson and Jones were assured of the kind regards of the committee, but were thus frankly put in pos-session of its views on the subject brought before it in the Resolutions of the Canada Board of mission before mentioned.

\mathbf{E}

Extract of the proceedings of the Board.

Certain resolutions of the committee of the Wesleyan Methodist Missionary Society in London, passed in February, 1832, and transmitted by the Rev. Robert Alder, the committee's representation having been laid before the board on the evening of the 22d inst., and the Rev. Robert Alder, the Rev. John Hicks, the Rev. Thomas Turner and

invitation; the resolutions of the committee in London enclosed by the Ray. Dr. Townley, and his accompanying letter to the Rev. Wm. Case, dated June 13, 1831, the answer of the board to the same and the resolutions of the Wesleyan committee above referred to were read; after which a long, free, and friendly conversation took place between the members of the board and the missionary brethren, particularly Messrs. Alder and Hick on the subjects of the several documents named above; at the conclusion of which the board adjourned. At the ensuing adjourned meeting of the board, held the evening of the 29th inst., the following resolutions were adopted.

1. That with respect to the first resolution of the Wesleyan committee, concerning the "understanding," &c., the resolution of the board was founded on their understanding of the report made by the Rev. Mr. Capers, delegate from the American to the British conference in 1828, which concludes thus: - " I did, however, distinctly understand

the committee as being of opinion that their missionaries ought not to go into Upper Canada, unless either after some definite arrangement should have been concluded to that effect with the church there; or in case of its notorious inability to supply the people, or its departure from the doctrines, discipline, or economy which distinguish metho-

dism."

2. That as a large portion of the Canada conference consists of Europeans, as the members of the Methodist societies from Great Britain who have generally united with us, have uniformly expressed themselves satisfied with the economy of Methodism in Canada, and equally edified by our means of grace as in their native country, the influx of European emigration into this Province does not appear to the board to render the organization of Methodist societies distinct from those already established, expedient or advisable-and more especially as the board considers the economy of Methodism in Canada to be as truly Wesleyan as that in Great Britain.

3rd. That the board conceives the principle, " That the Methodists are one people in every part of the world," was understood by Mr. Wesley in a more extensive sense than merely "fraternal affection," as he cherished and taught "fraternal affection" between the Methodists, pious Baptists, Presbyterians, Moravians, &c. who were never representented by him as one with the Methodists in the sense that he declared "the Methodists are onepeople in all'the world, and it is their full determination so to continue."

4. That with the exception of the societies under the care of the Wesleyan committee, the parties (few and small in number and influence) in this Province who call themselves Methodists, and who are not under the superintendence of the Canada conference, differ as widely in their government, economy, and usages, from the English as from the Canada connexion, nor is there any probability that the pastoral charge of the one would be more acceptable to them than that of the other. There is perhaps a greater variety of Methodists (so called) in Great Britain than in Canada,-Hence the introduction of missionaries distinct from those who are already labouring in connexion with the Canada conference, is not likely to produce any greater uniformity in Methodism than now exists, and may lead to serious misunderstandings and party disputes.

5. That with respect to the seventh resolution of the

committee, the board beg to refer the committee to Mr. Alder, with whom considerable conversation was held on the subject. It is extremely difficult, if not altogether impracticable, for any person or body of men, however wise and experienced, who are not acquainted with all the local circumstances of the country, to decide with certainty what part should in all cases be taken in matters in which the interests of religion are immediately concerned, but which may more remotely involve questions of political consideration by a ministry or body of people who are not exotic, not missionary, or transient in their residence in the country, but who have grown up therein, and who have a common interest with its permanently settled inhabitants. Whatever may have been said or done respecting what the committee term "political disputes" the board is satis-fied that the spirit and practice of Methodism have been preserved and maintained unimpaired, and believes it prethe Rev. John P. Hetherington being present by previous vails with an efficiency and to an extent in the country,

in proportion to the population, not exceeded in the United

States or Great Britain.

6. That the board most cordially reciprocates the expressions of brotherly kindness and good will conveyed in the resolutions of the committee; and they will do what they can to aid Mr. Turner with native laborers in his contemplated missions to the St. Clair Indians, and will readily co-operate with the committee in cultivating the missionary field among the Indian tribes, as far as is consistent with the interests of their own missions.

7. That the establishment of two distinct connexions of Methodists in this Province, would, in the opinion of the board, be productive of unpleasant feelings, litigation, and party disputes, to the discredit of Methodism and the great injury of religion; but that the energies of the English and Canada connexions, if combined, would under the blessing of God, close the door against all collision and party feeling, and contribute greatly to the extension of the work, both amongst the white population and the Indian

tribes.

8. That in order to prevent misunderstandings-to preserve peace and harmony in the societies—to supply every part of the work throughout the Province—and to enlarge the field of missionary operations among the aboriginal inhabitants, the board respectfully suggests to our conference at its approaching session, the propriety and importance of proposing such a coalition with the English conference

as will accomplish these objects. 9. That anticipating the adoption of such a measure by our conference as that recommended in the foregoing reso lution; and appreciating the pure motives, friendly feelings, and sound judgment of the Rev. Robert Alder, representative of the Wesleyan Missionary society and believes ing that an interview between him and the conference will be gratifying and satisfactory on both sides, and highly instrumental by the divine blessing in promoting the cause of God and of Methodism, the board respectfully and earnestly invites Mr. Alder to attend the ensuing session of the conference, which will commence in Hallowell the 8th of August next .- The board, under the influence of the same feelings, makes a similar request to the Rev. John Hick, provided he can comply with it, without too great a sacrifice of pastoral duty.

Truly extracted.

REV. AND DEAR BRETHREN.

We have the honor to transmit to your committee the enclosed resolutions of our board of missions in answer to those of your committee of February 1832, transmitted by the Rev. Mr. Alder, whose interesting talents, christian candour, and amiable manners, have won much upon the kindly feelings and good wishes of all among us who have enjoyed the pleasure of his society.

You will perceive that the board cannot view some points in the same light with your committee, but that nevertheless, they are most anxious to recommend and concur in any measures that may promote the harmony of Metho-dism and the interests of religion; and with this view they have solicited Mr. Alder to remain in the Province until our ensuing annual conference.—On the subject of the seventh resolution the board have, properly speaking, no authority to act or decide; and it was for the purpose of putting your committee into early possession of their views of this subject, which has been long and largely talked of amongst our preachers and people, that they embrace this opportunity of expressing them, hoping at the same time that it might prepare the way for the accomplishment of the highly interesting and important objects proposed.— It is believed there will be very little diversity of opinion in our conference in regard to a measure of this kind.—And if arrangements can be agreed upon by which a connexion be established between the British and Canada conferences analogous to that which exists between the English and Irish conferences, we doubt not but it will be extensively instrumental in advancing the work of God in the Provinces, none of the circumstantial peculiarities of Methodism in Great Britain and Canada (which we think are fewer and smaller than have been supposed, could form any serious

objection on our part, since we maintain that Methodism in all its essential principles and regulations is the same in every part of the world.

We beg to present to you and your committee our own best wishes for your personal welfare, and your success in the responsible and extensive work placed under your control; and we fervently pray God to give your conference and ours a right judgment in all things, and overrule every deliberation and decision for the premotion of His glory and the best interests of mankind.

We are Brethren, Your's

In the bonds of the Gospel, JOHN RYERSON, President, THOMAS VAUX, Secretary.

To Messrs. James Townley, John James, John Beecham, Sec'ys, London, W. M. C.

K

MARTIS, I°. DIE JULII, 1828.

THE REV. ROBERT ALDER, called in and examined.

You have acted as one of the missiona-Rob't Alder ries of the British Wesleyan Conference in Canada ?- I have. 1 July 1828.

Are you acquainted with the circumstances of the Wesleyan Methodist connexion in Upper and Lower Cauada?—I am very well acquainted with their circumstances in Lower Canada, and partially acquainted with their state in Upper Canada.

Can you state what the number of Wesleyan ministers at present in Lower Canada is ?—There are nine.

Are those all of them natural born subjects of the King? -They are all natives of the United Kingdom of Great Britain and Ireland.

By whom are they employed and under whose direc-tion do they act?—They are employed by the British Conference, a body that is recognised in a deed enrolled in the High Court of Chancery in England; and they continue to act under the direction of that conference during the whole period of their missionary labor. From the peculiar nature of our discipline, the conduct of every minister abroad is as well known to the conference at home as is the conduct of any of our ministers in England.

In what way are the Wesleyan missionaries in Lower Canada set apart to the work of the ministry ?- By the imposition of hands and prayer, after they have been examined three several times respecting their general know-

ledge and theological attainments. &c.

Are they entirely devoted to their profession as missionaries, or are they engaged also in any secular employment?—They are wholly devoted to the work of the ministry; they are not allowed even to keep a school for their own private emolument, whatever instruction they give to the rising generation is wholly gratuitous.

From what sources do they derive their income ?-From the voluntary contributions of the people amongst

whom they labor, and the British conference.

What is the average amount of income of each minister, and upon what principle is it regulated ?-A married missionary is allowed a furnished dwelling house, and a sum of about 100 guineas per annum; if he have three children he is allowed £35 additional for his children, and so on in proportion to the number of his family

Then are the committee to understand that the British Conference annually expend a sum to cover the deficiency of the voluntary contributions of the people in Canada?-

They do.

Can you state what sum is generally experded by the British Conference for the support of the Mission in Canada?-From £500 to £700 in support of our mission in

Lower Canada.

Have each of those ministers a chapel at which they perform service?—Yes; and with the exceptions of the ministers stationed at Quebec and Montreal, whose labors are chiefly confined to those two places, our missionaries in the country preach on the average to five congregations weekly, and frequently travel from 50 to 70 miles.

What is the number of chapels or school houses in Lower Canada, which are used for the purposes of public worship in your counction?-I think we have 10 chapels in Lower Canada and probably between 40 and 50 other places in which we usually perform Divine service

Can you state the number of the members in your Societies, and the number of those who generally attend your congregations?-We have about 1,500 members in our societies in Lower Canada, and our congregations probably

amount to between 5,000 and 6,000.

Do you find that considerable numbers, exclusive of those 5,000 or 6,000 attend occasionally, the belonging to other

denominations?—They do occasionally.

In what manner are the chapels and places of public worship erected?—By the voluntary contributions of the people, who sometimes involve themselves in pecuniary difficulties in erecting places of worship—our chapel at Montreal cost between £4,000 and £5,000 and the expense was defrayed entirely by the people there.

Do you conceive there is an abundant supply of religious instruction for the demands of the people?-No, I do not conceive there is a sufficient supply; there is not a sufficient supply of Wesleyan Missionaries in Lower

Canada.

What do you conceive to be the reason of that?—The want of pecuniary means. The monies raised by the methodist connexion in England for missionary purposes are appropriated for the support of missionaries in Ireland, in Western and Southern Africa, and in the East and West Indies, as well as in North America. The reason why we wish to obtain a portion of the Clergy Reserves is not for our private emolument; but that we may be enabled to extend our mis-ionary operations in Lower Canada.

Have not the Wesleyan Ministers been particularly ac-

tive in the eastern townships of Lower Canada?-Yes, and with the exception of the clergymen of the Church of Enghand there are no other ministers connected with any ecclesiastical body in England, that preach in those Town-

Do you conceive that if the Wesleyan Ministers were withdrawn from the Townships, the Church of England would be capable of supplying them with clergy?-No, I think not ;-and this is the opinion of the Governor-General, from whose letter to me, which I received a few days before I left the Province, I beg permission to read an extract:—" We all know, (his Lordship observes) that the Established Church cannot provide clergymen at all places where they are required and desired; in that difficulty the Weslevan Ministers have rendered most valuable services, and I think they are qualified and capable to render much greater services under the protection and encouragement which they desire from his Majesty's Government.

Are there no Presbyterian Ministers of the Kirk of Scotland in the Eastern Townships of Lower Canada?-

Not one.

What other religious communities are there besides the Church of England and the Wesleyan Methodists having ministers in the country parts of Canada who act under the direction of ecclesiastical authorities in Great Britain?-None; there is not a minister in any of those townships, with the exception of the clergy of the Church of England, and our own ministers, who acts under the direction of any ecclesiastical authority in Great Britain.

You have stated the number of methodist ministers in Lower Canada and the number of their congregations; will you give the committee the same information with regard to Upper Canada so far as you are acquainted with it?—In Upper Canada there are 46 methodist ministers; there are 66 chapels, and about 530 other places in which

divine service is regularly performed.

What do you consider to be the number of your members, and the number of your regular hearers, in Upper Canada?—The number of members fithe methodist society in U. Canada is 9,000, the number of regular hearers is 37,000, making one-fifth of the whole population of the Province.

In addition to those you have mentioned is there not also a methodist mision among the Missisanga Indians ?-'l'here is, and according to the testimony of the Venerable Archdeacon of Quebec, the labors of the Wesleyan Ministers. in a social as well as in a religious and moral point of view.

Are the methodist congregations in U. Canada under the direction of the missionaries sent out by the British conference ?-They are not; hitherto they have been under the direction of the method:st conference of the United States; that connexion, however, is now dissolved, and we expect that an arrangement will soon be made, by which the methe methodists of Upper Canada will be brought to act under the direction of the British conference as the methodists of Lower Canada have done for several years.

1s there any point of difference either in doctrine or dis-

cipline between the British and American conference? Not any of importance. We consider ourselves to be one body; but we do not deem it right that the methodists of Upper Canada should be under the jurisdiction of a foreign

ecclesiastical authority.

Then are the committee to understand that there would be no objection on the part of those congregations, provided you had the means of furnishing ministers to receive those ininisters sent by the British conference fully as readily as those sent by the conference of New-York ?-The conference of the United States does not now send any ministers to Upper Canada. The people are very anxious to be supplied with manisters from this country; and we have the most pressing petitions sent to us annually for English min ster .

By whom has the supply of Wesleyan ministers from the United States been prohibited ?—By an agreement between the method sts of Upper Canada and the methodist

conference of the United States.

Then you consider that it is the desire of the methodists in Upper Canada rather to have ministers furnished by the British conference than by the conference of the United States ?- Yes, I have reason to believe that is the case.

And that it is from the wish of the people themselves that the methodist ministers of the United States are now prevented from coming into Upper Canada?—Yes; from the influence of British feeling.

Do you conceive that the Colonial Government in Upper

Canada has manifested any desire for the extension of the British Wesleyan methodists in that Province !- I believe there are documents in the Colonial-Office addressed to Earl Bathurst and to Mr. Huskisson from Sir Peregrine Mentland which will show that his Excellency is very anxious that the number of British methodist ministers should oe increased as far as possible in Upper Canada; and I understand that he wrote home a short time go recommending that pecuniary aid might be allowed us for that purpose.

Do you consider that under the 31st of the late King the Wesleyan Methodists have any claim according to the letter of the statute, to any share of the Clergy reserves, or are they only desirous of obtaining a portion of them, in case the statute should be altered in that point?-There is a difference of opinion among us on this subject, but the goneral opinion of our ministers in Lower Canada I believe is this, that if the revenues be appropriated to the sole use of the Church of England, we shall offer no objection to it, but that it the Presbyterians are to have any part of those reserves then we conceive that we have at least an equally good claim with them; and we should be very much dissatisfied if our claims were disallowed.

Do you mean then to found your claim to a share in the Clergy reserves only upon a principle of equity as being one of the most numerous bodies of Protestants in toat country, and not upon the principle of the precise construction of the law !-As I have already stated there is a difference of opinion upon that subject, some of our friends think we have a legal claim, and others think that no other denomination has any claim in law but the Church of England, however the gen ral opinion amongst us on the subject is what

I before stated to the committee.

Suppose there were an alteration to take place in this respect by which you were enabled to make good your claim to any portion of the reserves, upon what principle would you exclude other denominations of Protestant dissenters! -We do not wish to exclude them, but we conceive that we are placed in totally different circumstances from Dissent-

amongst those Indians have been of great advantage to them ers in Lower Canada, because the British Conference of in a social as well as in a religious and moral point of the Wesleyan connexion is accountable to Government and the public of Great Britain, for the good behavior of all their missionaries, whereas the ministers of the dissenting churches can only give their own personal security for their good behaviour; we conceive that on that ground our claim is much better than theirs. The Wesleyan Conference also as I have stated, expends a considerable sum annually in support of our mission in Canada. We rest our claim also on the good that has been eff cted in the Canadas through the instrumentality of the Methodists, and their present numbers, and respectability.

Has there been any dissatisfaction felt among the Wesleyan Methodisis in Lower Canada at their not being al-I wed to keep a Register of their births, marriages and bu-rials?—Very great dissatisfaction, for although we are of opinion that a refusal so completely opposed to everything like teleration does not at all lessen us in the estimation of the people of Lower Canada, we feel it to be a degradation to the community to which we belong, besides either the children of our members must grow up without receiving from us christian baptism, and the bodies of our deceased friends remain without the right of christian burial, or we must expuse ourselves to a very severe penalty in performing those duties.

Is there any provincial statute which according to your interpretation of it, would give you the right of registry !-

There is.

Has there been a difference of opinion among the Judges as to the explanation of that statute?-There has, Judge Sewell, the Chief Justice of the Province of Lower Cansda, has put such a construction upon the law as has been the means of depriving us of a legal register; he has de-cided that the Me hodis's and dissenters are not Protestants, and that as the act merely provid as for the celebration of those services by Protestant Ministers, we are not entuled to perform them! Judge Reid and his associates of the Court of King's Bench in the district of Montreal, are of a different opin on; as a proof of which, Judge Reid for some years granted our missionary in Montreal a

legal registor.
Was there not a bill pass d in the provincial legislature for the purpose of remedying this inconvenience?-There

Are you aware of the grounds on which the Royal assent was refused to that bill ?- I believe it was not on account of any objection to the principle of the bill, but on account of some informalities connected with it.

Would it be satisfactory to the Wesleyans in general if a short act were passed, being a declaratory act of the intentions of the disputed statute of the 35th of George the

3rd ?-It would.

Upon what footing does this matter stand in England?-We are allowed to administer the sacrament of baptism, and to bury the dead in England; and we keep regular registers of our baptisms and burials.

Have you similar rights in the other North American Colonies!—In all the North American Colonies we are allowed to administer the sacrament of baptism, and bury the dead, and in the province of Nova Scotia we are allowed also to solemnize marriages; we have always enjoyed this privilege in Nova Scotia as all other ministers of the Gospel do there.

Do you know whether the law is different, or whether the construction put upon it is different !- The law is dif-

ferent.

Have there been any disputes with regard to burialgrounds in Canada, between the church of England and the Wesleyan Methodists, as to solemnizing the right of bu-rial, as there have been between the church of England and the Presbyterians?-No, we have not been involved in any such controversy.

You have stated that the Wesleyan Methodists in Canada would be dissatisfied if any portion of the clergy reserves should be applied to the Presbyterians; are you not of opinion that they stand upon a different footing with yourselves seeing that they are one of the churches established and recognized by law!—We know nothing of the Presbyterian church of Scotland as an established church out of Scotland; we view it as a strictly local es-

Appendix to Report on Religious Grants.

tablishment, and we think that its ministers have no right] to enjoy any poculiar privileges in any of his majesty's colonies because they belong to the church of Scotland.

Do you consider it as confined to Scotland !-Yes.

In what light do you view the Presbyterian church that is established in Irgland !- 1 nm aware that there are a tew Presbyterian churches established in the north of ireland, but I am not aware that the Presisterian church is established in treland generally.

Are you aware that at one time they had possession of the titles in the north of Ireland ?-Yes, but they never were in possession of such a privilege in Canada, nor in any of the North American colonies; it would be felt as a grievance if we were to have two ecclesiastical hierarchies endowed in the colonies.

In what way do you suppose that that arthen would press upon you ?-We meanthat if the Presbyterian church, as well as the church of England, were to be established and endowed in the colonies, there would be two ecclesiastical establishments in the country which other denomimations would be very much dissatisfied with.

You are aware that in case these two establishments were erected they would not be paid out of the taxes up-

on the country ?-No, they would not; but the Wesleyan denomination has a much greater number of ministers and of organised churches in Canada than the Presbyterians have, and at least done as much to promote the religious and moral improvement of the people; their loyally is well known, it is acknowledged in this letter, and has been acknowledged upon various occasions by the different Governors in British North America; and we should be dissatisfied if the Presbyterians were to be placed in more favourable circumstances than we are, as we cannot conceive of any good claim that they have to the enjoyment of any privilege in the colonies to which we are not entitled.

Are there any members of your persuasion in either of the Legislative Assemblies !- There are in the Lower House of Upper Canada; and several of them are in the Commission of the Peace, and hold commissions in the Provincial Militia.

Are any of them either in the Legislative or the Executive Councils ?-I believe not.

Are there any Presbyterians in either Council ?- I do not know;—I should wish to state, that we consider our-selves as a branch of the church of England, both at home and abroad.

REPORT

OF

SELECT COMMITTEE

ON

PETITION

ÓΕ

EDWARD KENNEDY.

TO THE HONORABLE THE COMMONS HOUSE OF ASSEMBLY.

The Committee appointed to enquire into the affairs of the Nottawasaga Settlement, in the County of Simcoe, on the Petition of Edward Kennedy, respectfully

submit the following Report:-

Your Committee have enquired into the management of the Nottawasaga Settlement, and regret to have to state, that it appears from the evidence that the intended settlement has in a great measure proved a failure. The cause of this failure appears to have been bad management. From the time the Irish, Dutch, and Scottish Settlers were located there, in the fall of 1834, Mr. Hawke was the Chief Emigrant Agent, and Mr. Hugh C. Young Superintendent of the Settlers located in Nottawasaga, the Emigrants were to be settled in lots of only five acres to each family, and to be credited with provisions, tools and other necessary articles, and to be employed in clearing lands, making roads, and building Shanties; the price of which work and labour to be paid in provisions and other necessaries that they might require. They were to have nothing gratis. All was to be paid for to the government in one way or other.

Mr. Hugh C. Young appears to have set the Emigrants to work at first in repairing roads, and afterwards sent them into the woods to build Shanties for themselves. The Dutch Settlers, being unacquainted with such work, made very slow progress, and consequently the season was far advanced, and snow deep before they could get their families into the Shanties. After this Mr. Young employed them in chopping, in which they made but little progress, having but seven axes among fourteen familes, and several not yet having completed their Shanties. In this condition, Young insisted that they should work on, and compelled them to sign blank vouchers, before he would give them any more provisions, to which they were obliged reluctantly to yield, or if they declined, were told, their provisions would be stopped. The provisions were very sparingly dealt out and consequently the men became feeble and unable to labour, and in many instances they were refused provisions.-The Dutch Settlers had just come from a tedious voyage from Germany, by the way of England, Quebec, Toronto, and thence to Barrie, and then to Nottawassaga. The Superintendant, Mr. Young, who received them there, although paid for regular attendance, was frequently absent for a length of time, their sufferings were great from fatigue—want of provisions—the severe winter, and want of protection from the inclemency of the weather, in consequence of the bad construction of their Shanties, some having a shelter only under Hemlock boughs.

Appended to this Report is the testimony of the Reverend Mr. Mayerhoffer, and the evidence of the witnesses examined, from which it appears that some of the Dutch Settlers have been starved to death, and others of them treated with great cruelty. The spirited and humane conduct of Mr. Wellesly Richie, the Government Agent, deserves unqualified approbation, for had it not been for his exertions, and the efforts of Mr. Kennedy, more of the Settlers would have perished, to the disgrace of the Government, which had neglected their petitions for investigation, and continued to sanction the misconduct of Mr. Hawke and Young, the former of whom is by far the most inexcusable, as he had ample means of information of the abuses which existed, and full power to redress and stop them.

It appears to your Committee, that a large sum of the Government money has been lavished for no beneficial purpose, and given to favorites of the Government, or otherwise wasted without benefitting the Settlers, whom it was intended by the British Government to benefit. It appears that the Settlers were to receive £4 per acre, for clearing and fencing; and £2 for each Shanty they built. It appears from the Accounts and Vouchers, that Pork and Flour are charged to the Dutch Settlers, which they state was never received, and in many instances the flour was of a very bad description, which had been returned by the Scotch Settlers, and afterwards given out to the Dutch. It is proved that the Dutch families were left for several days destitute of provisions in their huts, and some sold their clothes for a little food.

Sir John Colborne sent Mr. Hawke to enquire into the complaints made against Mr. Young; but it appears that he made very little enquiry, and returned to this city with an untrue Report, favorable to the Superintendant, Mr. Young, who, it appears did not understand the business of settling a new country, which Report is appended hereto.

It seems that between 2 and 3000 pounds have been expended chiefly in Nottawasauga, to settle only thirty-three families, or one hundred & forty souls, eleven families of whom (Dutch Settlers) have since gone away, and fifteen women and children to their graves. Only three German families remain in the settlement. Mr. Hawke states that a larger number of families than abovementioned was settled in Nottawasaga; but from the evidence of the Assistant, Michael Barrett, hereto appended, it appears that Mr. Hawke's statement was incorrect.

It appears that about £250 had been laid out in road making, and a smaller sum in constructing store houses. Some of the Vouchers are very incorrect, and little to be depended upon, and altogether very un-business-like documents. One of them passed by Mr. Hawke is in this style:

"UPPER CANADA,

" No. 64, or , No. 36.

£24 12s. Currency.

" 30th May, 1835.

"Received from Anthony B. Hawke, Esquire, (by the hands of Mr. H. C. Young), Government Agent for Emigrants, the sum of one hundred and ninety-nine pounds, sixteen shillings, currency, dollars at 5s. each, in full, for 123 bushels of potatoes, furnished for the use of the indigent Emigrants in the Township of Nottawasaga, at the rate of 4s. currency, per bushel. 123 bushels at 4s. per bushel, £24 12s.

Having signed duplicate,
"ALEXANDER WALKER."

<sup>&</sup>quot;Witness,
"T. Meldrum."

Another Voucher is as follows:-

" UPPER CANADA,

" £14 8s. 0d. Currency.

" 15th September, 1835.

"Received from A. B. Hawke, Esquire, by the hands of H. C. Young, Government Agent for Emigrants, the sum of fourteen pounds eight shillings, Currency, dollars at 5s. each, being in full for bushels of seed potatoes, for the use of the indigent Emigrants in Nottawasaga, at the rate of four shillings, Currency, per bushel.

"Having signed duplicate receipts,

" ABNER WALKER."

" Witness, T. Meldrum."

Any quantity of potatoes was offered to be delivered at 2s. 6d. per bushel, by In another case, Voucher No. 32, for twenty-two bushels of seed William Larkin. potatoes are charged at 3s. Currency per bushel, by J. Thomson, and then charged over again, Voucher No. 34, at the same price. Mr. Hawke approves of all such Vouchers, and takes the responsibility upon himself. It also seems that the Government were desirous of making an experiment at Farming, by employing Emigrants to clear the land and have it sown and cropped at the Government expense. results of the farming operations are as follows:-After the ground was cleared, fenced, and prepared, two hundred and thirty bushels of wheat were raised from fourteen acres, sixty-six of which were sold by Mr. Young, at 2s. 6d. per bushel.-Besides the preparation of the ground, the charges are £46 for putting the seed in the ground, harvesting, and thrashing; £30 for teaming, in all £76, (seed wheat not included); and if the whole crop of wheat had sold at the same price as the sixtysix bushels, the amount would have been £28 15s., making a dead loss of £47 5s., to which, if the cost of the seed wheat be added, fourteen bushels at 7s. 6d per bushel, the whole loss will be £52 10s.

It was very injudicious in the Government to undertake the raising wheat, when the expense of carrying it to mill would be as much as the same quantity of fllour would cost at the mill.

This system of folly and favoritism is still continued at the expense of the Province, and without its approbation.

Your Committee, therefore, recommend to your Honorable House to address His Excellency to dismiss Messrs. Hawke and Young, as unfit and unworthy to be employed in the public service, and your Committee herewith report the draft of an Address for that purpose.

All which is respectfully submitted,

JAMES WILSON,

Chairman.

COMMITTEE ROOM, 18th April, 1836.

APPENDIX TO REPORT.

To the Honorable the Commons House of Assembly, in Provincial Parliament assembled.

The Petition of EDWARD KENNEDY humbly show-

That Your Petitioner was some time employed by a Mr. Hugh C. Young who was engaged by His Excellency Sir John Colborne late Lieut. Governor of Upper Canada, to superintend the settlement and locating of some emigrants in the township of Nottawasaga—that your petitioner can prove to your honumble house that there was a most shameful and scandalous waste of government property made by the said H. C. Young, who neglected to keep accounts and left the business to the management of others, permitting the provision committed to his charge to be plundered by the settlers or any persons so inclined, in consequence of which the settlement was much inconvenienced.

That your petitioner further states that contracts were made for buildings, clearing land, and making roads, the extent of which can easily be ascertained, and that your petitioner fully believes that incorrect returns were made.

That your petitioner understands representation was made by the Rev. Mr. Mayerhopper to his excellency, stating the situation in which he found affairs.— That in consequence, Mr. Hawke, emigrant agent was ordered to inspect the works and report thereon. That Mr. Hawke, after considerable procrastination and evasion, paid a hasty visit to the settlement, not taking time to make the necessary inquiries, and made a partial and unjust report, favorable to the said H. C. Young—in consequence of which report the said H. C. Young received a letter of thanks from his Excellency for his services.

Your petitioner wishes to impress upon your honorable house, that he reported and made a statement of the above to Mr. Hawke stating that if it was not attended to, he would petition the House of Assembly and make the transaction public.

Your Petitioner humbly hopes that your honorable house will institute an enquiry into the conduct of the said Hugh C. Young and A. B. Hawke the emigrant agent, and your petitioner as in duty bound will ever pray.

EDWARD KENNEDY.

Evidence taken by the Committee appointed to take into consideration the preceding Petition.

SATURDAY, 27th Eebruary, 1836.

The Committee to whom was referred the Petition of Edward Kennedy, complaining of the conduct of Anthony B. Hawke and of Hugh C. Yonng, Agent employed under him in the location and settlement of Emigrants in the townships of Nottawasaga, Sunnidale, &c. met this day.

PRESENT.

Messrs. Perry,

Lount,

Robinson and

Wilson.

Mr. Perry was called to the chair.

John Bartels, sen'r called in and examined-states that he arrived in this Province in October, 1834was recommended as a settler-brought a recommendation and character, signed by two Justices of the Peace, the clergyman of the Protestant Church to which he belonged, his landlord and several other gentlemen of the parish. On arriving here (Toronto) applied to Mr. Hawke, the Emigrant Agent, who said that if he would proceed to Sunnidale he should receive five acres of land for himself and the same for each of his boys of the age of 21 years—that he would be employed at wages for twelve months, with provisions, and be allowed forty shillings for putting up a Shanty. Witness followed this advice, and proceeded with his family to Sunnidale-left his goods at Barrie, and went with his boys to Mrs. Bingham's where he found Young, who told his boy, Joseph, to give them some provisions and set them to work-went to work covering a causeway on the Sunnidale road—was promised os a rod—to be covered seven inches deep and ten feet widedid the work in twelve days-for this, was paid in provisions. On 3d November, went to Nottawasa-ga, (as directed by Mr. Young's son,) with his five boys—had his choice of seven lots, built a shanty, and began underbrushing—chopped fourteen acres and a half Government land at 30s per acre—during the progress of the work hought provisions from a person of the name of Galloway. At the time they were sent to crop, was told he should also have the logging of the land chopped; but in June Mr. Young gave it to another person, but at the same time promised them other jobs instead: these, however, they never got-did not wish to be idle, but could not get any work since the chopping.

Uunderstands Mr. Hawke was out to inspect the settlement, but did not see him. When in town, witness applied to Mr. Hawke for provisions, and to clear him from the debt due to Galloway for provisions, & received some encouragement. The logging, if he could have got it, would have paid Galloway for the provisions purchased from him.

Cross-Examined.

Witness has chopped about ten acres on his own land and his son's, and purchased two Cows—never offered to make affidavit that the complaints of his son against Mr. Young were false, neither did he say they were false—witness has seen Mr. Young often and never saw him the worse for liquor—Mr. Young promised to pay Galloway for the provisions and other persons for potatoes, &c., which he never did—did not go for provisions when Kennedy was there—did not go till the weather was fine—Kennedy pointed out where the land was to be chopped.

The German's often came to witness's house complaining, and apparently in great distress for want of provisions—saw several coffins carried out, and understood some had died for want—complaints were frequent—blankets were given to some who did not much want them—Mr. Ewen got two and witness and family only onc—Mr. Young did not generally fulfil his agreements—not always—witness signed receipts at different times without examining the items—had coufidence in the Government and those in its employ—all the receipts had some writing upon them—there was no written agreement between Young and him and no settlement—thinks there must be something due from him to the government.

JOHN BERTELS Junr .- examined.

Says Mr. Kennedy went and shewed them where to chop. They assisted to do some work on the road. Mr. Young told them, the better they did the work the better it would be for themselves, as we were to log it in the summer, continued to chop till May when they quitted to do a little for themselves—put in potatoes &c. (14 acres and upwards chopped.)

Mr. Young found fault with the work, saying also that we had better give up the logging to Mr. Thomson of Sunnidale—that Mr. Hawke had ordered it to be cleared for a summer crop, they refused and Young came again and told them they stood in their own light, and that they should have better work on the road at 3s. 9d. per day, a brother of theirs also who lived with Mr. Young came and told them they had better do so peaceably or they would draw down the wrath of Mr. Young on them and they at length consented. While chopping they bought their provisions from one Galloway, as he sold them cheaper than the Government.

Went with Galloway to Young who agreed to pay them for them—the land chopped was not promised to the witness.

Witness did not see Mr. Hawke at the settlement-Jordan told witness he had been there but he did not see him—worked and got provisions in payment.

Galloway wanted his money and Young promised in presence of witness to pay him as soon as he got it, said he would not give a note but would enclose it.

The family got one whole barrel of pork and some pease, perhaps a barrel—took as little pork as possible in hopes of having money coming to them.

The family got, in all, about one & a half or one & three quarters bbl's pork, not weighed, does not remember how much flour—when first they went to work on the roads they got provisions from Gillespie's—when chopping and building their shanty got their provisions from the same place, received them from different persons, sometimes from Young, sometimes from Joseph Kennedy, and Barret. Mr. Young was often there to inspect the work and show them how to pile the brush, was oftener there in summer than in winter, came to live in the settlement in summer.

Witness states that the German settlers would frequently come to their house and appearing to be in great distress (put their hands to their hearts and exclaim "Nix Provis") some of them, and it was generally supposed from want.

Mr. Hawke came to the settlement about June last, some few saw him, did not stay long, soon returned to Toronto, says he has worked with some of the Germans, they are considered as good hands at logging as any in the country—witness's family never got the work they were promised in lieu of the logging, no other persons were out of work at the time, thinks Mr. Young might have given them work, brought the money from Ireland with which the cows were bought, they carried their goods on their backs from Sunnidale, and were promised the carriage of a load in lieu thereof, a load of seed potatoes was brought up for their use. Walker stopped

the pay for the load which was to have been paid in potatoes; Mr. Young said he knew nothing about it; that witness' father got a larger allowance of potatoes than any other settler; witness never received money but goods—was served with provisions by his brother who was hired with Mr. Young for three months—never saw Mr. Young intoxicated.

MR RITCHIE, called in and examined.

Resides in Sunnidale, 11 miles from Barrie; in 18-34 Mr. Young was appointed to the Nottawasauga settlement; he lived sometimes at Barrie, sometimes at Mr. Bingham's, and other places till April last; in the first place he employed the settlers to cut a road from Sunnidale to Nottawasauga, and employed Kennedy to build a house, store &c. Witness visited the road and finding they were making bad work, cutting the stumps too high &c., advised Mr. Young to alter the plan; he did so, and let out the rest of the road to cut out at £4 10 0. per mile; which the settlers were employed to cover with earth; witness thinks that Kennedy did the work well and that the price was too little; forwarded on the settlers and their baggage; witness thinks Mr. Young was not attentive to his duty; he had a person attending for him (Mr. Kennedy) but thinks he should have been present at all times himself, instructing the people how to do their work; but, in fact he was incompetent to that as he was not acquainted with the nature, of the work himself; thinks he (Young) should have had a stated place of residence in the settlement if only a shanty, as it often happened that settlers came for provisions and were obliged to return without them because they had no order from Mr. Young, and when he did give an order it was often for so small a quantity that the people were kept running backward and forward at a great expense of time, visited their works frequently, thinks at least 20 times, found Mr. Young there; but not so often as he should have been-thinks the provisions were wasted, they were left in no ones charge, often exposed to the weather, some were left in a shanty which could be easily ta-ken through the roof, which was done, and the settlers were told that they might go in that way and take them, visited and noticed the work of several parties and Bartel's, among the rest, thinks it was an injury to the government and the family that the logging was taken from them; their job was as well done as many and better than some, and, as they were a numerous family, thinks had they been let alone, would have completed the job well; witness himself advised them to do well and gave them instructions how to do it; Bartel's family were well recommended, and appeared industrious and willing Saw the German families, two of them came to him and informed him of their situation; sent for a Doctor & accompanied him to see the people, found them in a wretched state, some dead, some dying, and others sick. The Doctor conversed with them and witness asked his opinion of their disorder, he answered that it was not medicine they wanted, but nourishment. The Doctor then gave an order for some articles of nourishment, which were provided; witness returned with those articles but some had died in the mean time. The principal reason given for their destitute situation, was, that they were further off than the other settlers and could not speak English, when it was too late plenty of visions were sent, 40 or 50 bbls. of Pork and 80 bbls

Ħ

Saw the Rev. Mr. Mayerhoffer on his way there and on his return. He said the German sett-lers were in a wretched state, and threw the blame

altogether on Mr. Young.

Witness did not see Mr. Hawke at the settlement about this time-understood he was sent out by Sir J. Colborne—he came only as far as Bartel's clearing and returned again with Young that night to Thompson's in Sunnidale, and made out his report. It is witness's opinion that Mr. Hawke supported Mr. Young in every thing he did, heard Mr. Young say Witness spoke to Mr. Hawke and gave him his candid opinion on the subject—told him it would not answer—that it would be a total failure—and requested him to represent it in that light to Sir John Colborne-Mr. Hawke answered, it was none of of my business, that I had nothing to do with it.

Witness then spoke himself to the Lieutensnt Governor, and informed him distinctly that the settlement would turn out a public loss and a failure-Sir John Colborne's anwer was, that Mr. Young was well recommended to him by Sir James Kempt, and that in consequence he had felt a desire to do something for him, and had sent him out there for

the purpose of giving him a situation.

Mr. Crookshanks of Yonge Street, recommended Mr. Kennedy as being a proper person to erect buildings, and who also understood clearing land—but Mr. Young told Mr. Hawke, that Kennedy was a drunken vagabond and had raised all the difficulty in the settlement.

Witness heard Mr. Hawke say that he had got the Governor's car and could do as he pleased could recommend persons for Magistrates in the county &c., would attest to this if called upon. Thompson, who got the logging from Bertels, was one of witness's indigent settlers, but a favourite of Mr. Hawkes-witness put up some buildings in Oro, Medonte and Sunnidale, and on requesting to be allowed for them was told by Hawke that he, witness, was in debt, & no person in debt should be employed by the government. There were blankets procured by charity at Toronto, and sent out for the settlers, but the Germans got none of them till after the sickness -they lay on Hemlock boughs-witness produced two orders signed by Young, one for a pair for Mc-Callum who had been supplied before by witness on his settling in Sunnidale-and one for two pairs for McEwan and wife, who had a pair before—witness had often heard Mr. Young say he wished the German family were shot, and considers him the most hard hearted man he ever knew, & the most unfit man to be employed in that capacity—as he did not know one tree from another, and was kept in his situation only by the partiality of Mr. Hawke.

> COMMITTEE ROOM, 27th February, 1836

The Committee met.

PRESENT, Messrs. Perry-Chairman. Lount, Robinson. Wilson and Wells.

The Petitioner, EDWARD KENNEDY, called in and examined.

States that he was employed by Mr. Young from October, 1834, to April, 1835, first to cut a road from Sunnidale road to the township of Nottawasauga, about ten miles, by the job, was also employed to build a dwelling-house and store, also to go and show emigrants where to chop for government by the acre—the lots were pointed out to him by Young, on the map. Young never went himself to inspect until the time witness was about giving up the superintendance of the chopping—witness was employed about two months and a half serving out provisions according to a list furnished by Young containing the names and the quantity for each family. There were fourteen families of Germans—to these he was ordered to give, at first, to each family, 18lbs. flour and 7lls. pork per week. No difference was made as to the number of persons in each family—Young said these were Mr. Hawke's orders—witness stated and the second of the s ed to Young that they could not get on with building their shanties on this allowance, when Young ordered a bbl. of flour for two families and a bbl. of pork for four, which lasted about three weeks—Young never went near the place, and witness kept on until this order was countermanded, when these families were again reduced to 16lbs. flour and 7lbs pork each, and witness was told to put them off with less if possible. At this time Young was living 18 or 20 miles off and did not visit them for two months (November & December), witness after spoke to Young on the propriety of going to see how things were going on; he did once promise to go, butdid not, observing that he would not be bothered about it-Young was lying about at taverns where he had no business—and witness thinks he drunk too much as he appeared stupid. Witness made a return of the provisions issued once or twice a week which he enerally took to. Young who resided at Crow's Tavern, a distance of ten miles, and sometimes he had to go eighteen or twenty miles—when about to leave the employ, he went to Young who furnished him with vouchers for the settlers to sign which had the quantity of provisions in figures, except for the German settlers which were blank altogether, ordered witness to tell them that unless they signed these they should have no more provisions—witness got them to sign them. After witness gave up issuing of provisions Young sent a young man of the name of Barrett to take charge, with orders to cut. off the German settler's provisions, and in the course of two weeks came himself. These people often came to witness and cried for provisions—they often went to Young also, who refused to see them

Young told witness it was by Hawke's order that the provisions were stopped—and Barrett showed him a letter with Hawke's name to it; but Barrett said it was written by Young .- matters went on thus till nine of them died in one week, thirteen died in all. Witness at length went to Young and begged him to go over and do something for them, but he (Young) totally refused, saying, "he did not care if they all died."

When the sickness increased, a doctor was sent for to Barrie-ductor Pass, Mr. Ritchie, and Mr. Barrett were there, and also Mr. Young-witness was making a coffin-Young was going off to Toronto-witness remonstrated, and insisted? he should not go-at this time there were one hundred!

and ten barrels of flour, and fifty barrels of pork in store. On the appeal of a widow for provisions, who had a sick child, made signs to cut the child's

Witness, (Kennedy), says the Germans were a civil, harmless people. The provisions were wasted—they were brought from Barrie, (about forty miles), without direction or way-bill, and set down exposed to the weather-neither was witness required to give teamsters a receipt, but took what they gave him, after Young came there he allowed the provisions to remain exposed for a month, though the store-house was ready to receive them-nt last witness got two men to roll them into the store-house -about one hundred barrels of flour and fifty of pork-did this without orders, of his own accord, to save it-not being then in charge. Saw Young sell provisions to the German Settlers, to the amount of 10s.; flour at 2d. per lb., pork at 6d., to pay for which the women sold their cloathing—Young told witness he had sold provisions before to the settlers witness sent a statement, in writing, to Mr. Hawke, of the distress that prevailed, and understood others complained also but no notice was taken of it. About the latter end of March, the Reverend Mr. Mayerhoffer visited the settlement, by the request of the Lieutenant Governor, Sir John Colborne, Mr. Mayerhoffer informed witness he found then in great distress-that five heads of families had loft with Mr. Kontz, a respectable farmer from Markham—found great fault with Young, &c. Witness threatened to report Young to Hawke—Young said he did not care. Witness made nine coffins, and when his account was made up by Barrett, it amounted to one hundred and one pounds, exclusive of the coffins—and he has not been paid yet.— Witness directed the chopping and clearing on lots 24 in the 7th, 24 and 26 in the 9th, 26 in the 8th, 24 and 26 in the 10th concessions; on lot 24 in the 7th, about twenty-eight acres chopped and sixteen cleared off; on lot 24 in the 9th; about thirty acres chopped and mostly cleared of, (some one got this coopped and mostly cleared of, (some one got this lot); on 26th in the 9th about thirty acres, (believes one Thompson afterwards got this lot), and about sixteen acres of 26 in the 8th, about fourteen chopped and partly cleared. Witness is well acquainted with Ritchie—knows he paid more attention to the settlement than Young did—always found him an active, capable person and well liked by the settlers active, capable person, and well liked by the settlers has known him supply them with wine, sugar, tea, &c. from his own stores—they all speak well of him, and many who were about to quit were induced to stay at his instance—heard Young often say he did not care what complaints were made against him, they would not be believed—the settlement, after much expense, distress, and loss of life, has turned out an utter failure.

1st March, 1836.

Committee met.

JOHN GODLEIP LOUKS, called in and examined. Came into the Province with a wife and two children, in October, 1834, and was sent to the Nottawasaga settlement-was directed by Young, at Sunnidale; to go and look for their five acre lots did so, and spent the night in the woods-no person sent with him, to point out the lot, but four settlers

and a guide, who had been sent before, did so-did not take any provisions, being told by Young that there was plenty at the place, but when they came there, there was nonc-remained there eight days, without any thing to eat, except a quarter pound of bread and a deer's head, which they found—returned sixteen miles, where they got twenty pounds of flour and eight pounds of pork, as rations for one family for a fortnight—sometimes had to go three or four times before they got it, (had to go sixteen miles to get it)—one time waited three days at the store before any one came to the store to serve themthis was continued until they had their shanties finished—then four familes received one barrel of pork and two barrels of flour for one month. issue of provisions was then stopped, and they remained one month without the usual rations, and Mr. Young said the Dutch people must go away, and turned them out of the store saying, if they had money they could have provisions-says they went several times for provisions and could get none, and that Young instructed Barrett to load a double barreled gun, and said he would shoot them if they did not keep away. Out of fourteen families, fifteen women and children died of starvation—that that was the cause of their death—the rest went away, except three families, his wife was so weak he had to lead her out of the shanty, when the snow was deep-Young told them if they would go and work three days he would give them provisions, but they were unable to work, and their families sick and dying-they were willing to work as long as they had provisions—the work was six miles off, and they had only four axes among fourteen families before he left the place his wife sold her handker chief to pay for flour, at the rate of 71d. per pound -Mr. Young sold them provisions as long as they could raise money, at 4d per pound for flour, and 71d for pork. Went to Toronto to see the Governor, who received them, Seber was interpreter for them—could not be heard by petition at the Governor's office, nor at Mr. Hawke's office, and no redress could be obtained from Mr. Hawke but two loaves of bread-Mr. Ritchie was in the office and spoke for them, but Mr. Hawke would not attend to it-after returning from Toronto with the petition they were kept four days, then got eight pounds of flour and two pounds of pork for a family for eight days, after that they got, after waiting three days, six pounds of flour, and no more after that—signed vouchers three times for provisions-was told unless they did they would get nothing more—never settled with Young—was told by the Governor they should be sent back from Toronto free of expense, but they had to pay \$4 each for their passage—they are natives of Saxony, and paid \$36 each from Leipsec to London—the Captain told them they could go from London to Quebec for \$16 each-were landed in London after a passage of three weeks—the Captain was there fined \$700 for improper conduct in London; \$1,560 were reised to take them out, believes the Queen took an interest in their behalf they left a letter at Quebec, and brought another thence to Toronto—were sent on six hours after their arrival at Quebec, and Sir John Colborne sent them out to Nottawasaga, where they were told they were to be starved out, and they were so. Mr. Hawke told Mr. Ritchie, the Dutch Emigrants were convicts; and sent out by the Queen.

COMMITTEE ROOM,

March 2nd, 1836.

Committee met.

Francis Hewson, Esquire, examined.

Resides at Barrie—has been seventeen years in the Province, and is a Justice of the Peace-was engaged in the teaming line-had several teams, and had frequent opportunities of observing Young's conduct as Emigrant Agent, conceives him an incompetent person-that he spent most of his time at Barrie, and neglected his business, and spoke to him about it. Witness's teams were employed to transport goods for him-the provisions were received and left at various places, and no account kept nor receipts given-when witness went to settle with Young he had no account, and witness was detained six weeks in Toronto. Some time about January, 1835, witness went with Young to the settlement, and saw great waste of provisions, barrels of pork and flour open in an open house, apparently without any one in charge, and whiskey open in a vessel, to be used at will. Young gave him a draft on Hawke for £75, which Hawke refused to pay until Young came to town—Young told witness that he had lost thirty barrels of flour—heard of much distress among the settlers about April, 1835-the Reverend Mr. Mayerhoffer was sent out to see the settlement, and saw him on his return, and he said the people were in a terrible state; that he believed some had been starved; but that the provisions were wasted; that he saw the cattle eating them in the houses, and that every person complained of Young. Mr. Mayerhoffer afterwards, in Toronto, accompanied him to Sir John Colborne, where he made his report—Sir John was much annoyed, and said Young had been recommended to him by Sir James Kempt, but if what Mayerhoffer stated was the case, he must be dismissed, and requested witness to send Hawke to him, saying, he (Hawke) should go out with witness-spoke to Hawke accordingly -called on Hawke some days after, to see if he was ready to go out-Hawke made light of the mattersaid there was no foundation for Mayerhoffer's report-said the German families were convicts sent from Saxony by the Queen; that they would not work, and ought not to have provisions, and, assuming an air of great importance, said, it was through him that reports ought to be made and not through the Governor, and did not go. After witness returned home, and complaints were constantly made to him, as a Magistrate, of Young's proceedings, he wrote to the Lieutenant Governor, requesting him to investigate the matter—some time after (about two months) Hawke called on witness, in Barrie, and said he was sent by Sir John to enquire into the conduct of Young, and requested witness several times to state what specific charges he had to make against Young-witness offered to go with him to the settlement, but this he absolutely declined, he would not listen to it—witness expressed regret that Mr. Ritchie was not at home—Hawke replied, that any complaints coming from Mr Ritchie would come with a very bad grace—Hawke asked him if he had ever seen Young intoxicated—witness said he had not, but he believed him to be a drunkard-Hawke said that as there was so much complaint he would stop the settlement—witness gave him a note to a person who lived near the settlement, of the name

of Gellespic, who could give him every information -Gillespie told witness afterwards that Hawke called on him, and before handing him the note asked him, in a tone of great authority, what charges he had to make against Young, and at the same time observing, if he did make any he should not believe them-witness called on Hawke on his return to Barrie, and Hawke would hardly speak to him, appeared to avoid having any thing to say to him, and determined to support Young in every thing—witness spoke to Hawke on the subject of his account, but he declined entering into the matter witness complained to him, that although he had reduced the price of teaming from 5s. to 1s. 101d., and had good teams and careful drivers, yet a preference was given to a person of the name of Walker, whose teams were poor, and the drivers worse, being worthless drunken fellows, but Hawke would give witness no satisfaction—has frequently applied to Young and Hawke for a settlement of his account, but hitherto without effect—knows Kennedy, believes him to be an intelligent, efficient man for business; was present once when a dispute arose between Young and Kennedy, when Young went to E. O'Brien, Esquire, and swore a breach of the peace against Kennedy. This settlement, after vast expense and suffering, has turned ont a complete failure, no good has accrued either to the government or the country, and has had the effect of disgusting other settlers. Witness is well acquainted with Ritchie, and considers him a most active, competent and attentive man, and moreover, who possesses the confidence of all who have transacted business with him-has often heard Young say that Ritchie had nothing to do with the settlement at Nottawasaga.

March 2nd 1836.

Committee met.

Mr. Kennedy, again examined.

Knows Mr. Ritchie well; the settlers always spoke well of him; he always instructed and helped them believing had it not been for him most of the German settlers, particularly the women and children would have perished; he even furnished them with wine, sugar and fresh provisions at his own cost; further says that when the Jordans and Campbells complained that they had been kidnapped Mr. Ritchie interfered and succeeded in reconciling them to the settlement.

Young in conversation with Kennedy observed, that he was sure Mr. Hawke would not believe any thing that was said against him (Young). The prices formerly paid for provisions, at the Nottawasauga, were, for pork \$19 and flour \$7 per barrel, per pound, flour 4d. and 7½ for pork. The old farmers cut a road into Mulmur and Mono and found they could furnish the new settlers with flour at \$4 per barrel and pork at \$3½ per cwt.

March 3d. 1836.

Committee met.

PRESENT.

Messrs. Perry, Willson,
Lount, and Robinson.

George Hadley, examined.

Owns land in Nottawasauga and resides in Barrie, was sent out in 1833, knows Young well, has

been employed by him to team and do other work, knows Young; was the person charged by government to issue provisions and superintend the settlement at Nottawasauga; Young seldom came where the men were at work, has teamed also occasionly for Mr Walker transporting provisions and settlers from Barrie to Nottawasauga, never gave receipts for loading, has left provisions at times at the settlement which were not taken that care of that witness thought was required; knows that the Germans came for provisions and were sent back without; was employed by the Doctor and Ritchie to go to Barrie to procure nourishment for the sick, was employed by Young to chop and clear land, chopped 2% acres intending to clear it off, but after Mr. Hawk came out, Thompson took possession of the same, saying he was authorised by Young to do so and allowed witness \$3 less than he ought to have had for chopping, thinks there may be about 17 families left at the settlement; from what he has seen and heard thinks them people of loose principles and not much inclined to work; they would hardly cut their own firewood, some of them had good Canadian axes; was promised 2 bushels of potatoes but did not get them, then took pork in lieu 3 or 4 pieces he thinks and when he settled was charged 40s. for this and the lodging.

LOUGHSLAYER, a German, examined.

Was one of the settlers sent to Nottawasauga, under Mr. Young worked some time for Mr. Young, was then sent to his land, received some pork and flour while working on the roads, when he went to his land was 8 days without any, their families left at Ritchies, received a little sour flour which kept them from starving, the women had a little money left and bought some potatoes or they must have suffered more, after that they sold their clothes and bought pork and flour from Mr. Young, flour at 3d. per pound, pork does not know; cannot say they were actually starved to death but thinks they died for want of proper food, lost his own wife, 10 days before her death had nothing but flour, went to Mr. Young's and got some flour and pork but found his wife dead on his return, would have worked but had not provisions enough, 6 pounds of pork 12 of flour for self wife and 2 children per week, some weeks had nothing. Two of them had 5 acres to chop, when 3 were done Young stopped them said it was not well done, went sometimes twice or thrice for provisions and could not find Mr. Young at home; Kennedy gave him a little, asked 4 or 5 times for an axe, but got none, had 10s. left; bought a carpenters axe with which he had to chop, some got axes, but good for nix, were promised others but did not get them, wanted Young to send a Doctor to his sick child, he refused, child since died in Markham, was himself so weak for want of provisions that he could not work, frequently saw Young drink and drunk, whenever he saw Young he was drunk, Mr. Young never paid him for his work, but drove him off, witness had his things in Young's store, Young compelled him to sign a paper before he gave them up, on one piece of paper was written £8 that was thrown away and he made him sign another for £12; knows figures, and can read writing at little, witness had another wife when he left the settlement, Young knocked her down in the snow and beat her, Young

was then drunk; is not satisfied with his settlement with Mr. Young.

March 7th, 1836.

Committee met.

PRESENT.

Messrs. Perry, Wilson, and Lount.

SYDNEY W. SANDFORD, examined.

Is a merchant at Barrie, in 1834 & 5 contracted with Mr. Young for 50 barrels of pork and 150 barrels of flour, remembers the German settlers being at Barrie, they got provisions from witness by Young's order, thinks Hewson and Walker had an equal amount of the teaming work to do, in his transactions with Young, always found him prompt and as far as he could judge attended strictly to his business, was astonished to hear him accused of being a drunkard.

He was not however at the settlement or at Sunnidale when the provisions were issued, knows Kennedy he was in witnesses employ three months and did his work according to agreement, knows nothing of it himself but has heard from others that he was a troublesome quarrelsome man, and was once bound over to keep the peace.

Witness settled with Young received a draft on Hawke who paid him, when they settled Young had no account to compare with his. The teamsters did not bring back receipts for the loads delivered, Young took his supply of groceries from witness and gave the settlers orders for certain amounts, and they got such articles as they pleased, these were paid for in the same manner as for provisions by draft on Hawk Young suffered hardships also and lived sometimes in a shanty.

ALEXANDER WALKER, called in and examined.

Lives at Barrie, is well acquainted with the settlement; has been employed by Young to carry provisions from Barrie to Sunnidale, Mr. Ritchie told-witness to charge the same as he had charged him 5s. per cwt. but he paid no attention to him; Hewson frequently pressed witness to join him in teaming by which means they might obtain a good price &c. In the fall of 1834 and spring of 1835 the provisions were left at various places along the road where parties were at work, Mr. Young's boy Joseph generally told them where to leave them but gave no receipts, sometimes Young was there, was in Nottawasauga about 2 weeks in the fall of 1834, putting up shanties, saw Young there at least 3 times, never heard any complaint about provisions; was employed in January 1835 to build a bridge across Batteau creek, was there constantly 5 or 6 weeks, saw the settlers go and come with provisions and the Germans appeared to have provisions as well as the others, heard Young say the Germans would not work and he was afraid he would have to pay for the provisions; about the 10th February heard the Germans were sick and was despatched for the Doctor. The Dr. said he thought they had taken cold from want of beds &c. and that they wanted more nourishing food than could be got from Young, he often took up tea, sugar, wine &c. and left with Young. Sloan told witness that Ritchie said if he sent provisions to Young he would never get his pay, Ritchie also said that Young was sued and the Mulmur people were taking away their cows, some of the Germans wanted to work for witness but he could not employ them as their axes were not good for chopping, know that Ritchie attended to the business when Young was away at Toronto.

Witness knows Edward Kennedy, says he is vindictive, he had a quarrel with him about, a waggon & Kennedy threw down his fence and turned cattle into the fields—was security at one time for Kennedy to keep the peace—got most of his pay from

Young and the rest from Mr. Hawke.

THRIFT MELDRUM examined.

Witness lives at Barrie—heard the Dr. say the German people were lazy and lay in damp places, and that occasioned their sickness.

N. B. "It was stated in Mr. Alexander Walker's evidence (but omitted) that he saw a Dutch German woman drunk in a swamp with a bag of pease on her back, and a Dutchman cut a gad and whipped her along to work."

EDWARD WALKER, Esq. called and examined.

Lives in Nottawasauga—knows Ritchie since 1833—has had a good opportunity of knowing him, and believes he discharged his duty faithfully—every thing that could be expected was sent out by the Honorable Peter Robinson—has seen Ritchie giving necessaries to the sick and needy—has always heard the settlers speak well of him, and wish to see him back again—has heard a petition was got up praying he might be sent back—has met Mr. Young in all parts of the road and at Binghams, but never saw him tipsey in the least—speaks a little German, and has heard them complain of Mr. Young starving them—has heard only one of the Irish and Scotch settlers complain—Bartels, who worked for witness, worked well—believes Mr. Ritchie reported, that witness was endeavouring to get his situation.

THRIFT MELDRUM re-called.

Says Mr. Young generally stopped at witnesses at Barrie—believes he had always important business there, (he said so) to attend Court, &c. &c.—was making up his accounts when at his house—never called on him to assist him—has no complaint to make of Mr. Young's conduct in any transaction—was not drunk at his house, only drank some punch.

CHRISTIAN GENDEL (German settler) called.

First saw Mr. Young in Barrie—while there did not get quite provision enough—made no complaint; however—when removed to the woods did not get enough—went twice to Mr. Young's but got none

-his mother was with him-did not see Mr. Young -saw Matthewson once, who refused to give him any-was twice there and found no person-there were great complaints of want of provisionspotatoes and turnips from Mr. Ritchie—had not enough to work on—borrowed from some Trish people—saw Mr. Young but seldom, but never drunk—did not go to work for Mr. Young as some others did as their shanttes were not finished, only three done for fourteen families—the snow was two feet at the time. Saw Rev. Mr. Mayerhoffer there—had plenty of provisions then and fared better afterwards were not short of provisions after Mr. M. was there -thinks the illness was occasioned by the cold and want of provision-was present when Mr. Young ordered the people out of his house at Ritchie's Bridge-snow was two feet deep or upwards-had to travel 16 miles to a place of shelter—arrived there late, all but three who stopped at a shanty—remembers two getting provisions from Kennedy—saw Kennedy often-knows nothing amiss of them.

CHRISTOPHER VATER (Gorman) called

Can corroborate Gendel's statement in part—Mr. Young put them out of the house violently—will not say Mr. Young was drunk—he might not have been quite sober—his mother told him she bought flour at \$4 per barrel from Mr. Young—his mother soon died after this—took cold on the journey from Barrie to Nottawasauga—they got six axes and seven spades among sixteen or seventeen men. When his mother was ill went to Mr. Young's for provisions who gave him none—he cried, and Kennedy gave him some of his, for which Young scolded him—went to Kennedy's to get a coffin for his mother—saw a widow and three children asking Mr. Young for provisions—he would not give them any, but took a knife made signs as if to tell her to cut their throats—left the settlement because he got his feet frozen and could not get provisons.

ADAM. VATER, (German,) father of Christopher.

Served 4 years in a Hanoverian Regiment of Dragoons—were two days in Sunnidale before they saw
Mr. Young—did not get any provisions for four
days—got 6lbs. flour and 2lbs. pork for his family for
eight days—those who had money assisted the others
—his wife bought flour from Mr. Young at \$4 per
barrel—during nine days Mr. Young was not there
(in Sunnidale) got potatoes and turnips from Ritchie
thinks want of provisions caused the sickness—got
half barrel pork and one barrel flour for eleven men
for two weeks—were promised 5s. per day, but got
nothing but provisions—were ordered out of the
house, and remained in the woods all night—Kennedy brought them some provisions—no sleigh came.

They were in a tavern (Gillespies) Mr. Young came there drunk—ordered them out of the house and to go on—said they were not then living on Young's provisions—one small sleigh came—ten died in the bush from cold and hunger, change of climate, &c. The Dr. came, seven of them went blind (young children) the Dr. gave them some drops which they thought caused their eyes "to run out"—

all this took place in about 14 days-after Ritchie came, had plenty of provisions, all through March.

Bourman and family, seven in number lived all January in a shanty in a low wet situation, builtit shemselves.

Received from Mr. Young 27 barrels flour and 15 barrels pork, for which had to sign a receipt for £3 8—had signed one before for £8 6—knew the amount when he signed them—were promised a year's provisions, \$8 for a shanty and \$6 per acre for land chopped.

KLINE examined.

Has employed some of the Germans—finds them good workers, but awkward from their not being accustomed to the work or the tools of this country.

John Duer (German.)

Was lame and could not work—Mr. Young refused him provisions, got some from Kennedy and Barritt—his wife went and got some in Mr. Young's absence—Mrs. Young spat in his wife's face—signed two receipts—sold his coat for Is 6d. to buy provisions—could not stay any longer in the bush—left for the settlement and went to Mr. Young's shanty—requested to stay all night—Mr. Young refused and took his axe from him—struck him and shoved him and his wife out—got blankets from Ritchie towards spring—after the illness and deaths had taken place, slept at a shanty four miles back—in the morning asked Young for bread and were refused—got some from Ritchie who sent them in a sleigh.

A. WALKER recalled.

Questioned by Mr. Young.

Have you ever heard Ritchie complained of by the settlers? By a few.

Has seen Ritchie drink quite as freely as Young—always found Young kept his word with him—he was generally afraid of spending too much money.

GOTLOFF SUMPS (German.)

Went with three others to Mr. Hawke at Toronto to complete of Young's conduct—Schor (residing in Toronto) went with him as interpreter—Mr. Hawke gave him three loaves of bread and five or six pounds of pork—Hawke told them to go back to Young who would give them more provisions.

This testimony corroborated by Sebor who acted as interpreter.

COMMITTEE ROOM, March 9th, 1836.

Committee met.

PRESENT.

Messrs. Perry (Chairman,) Wilson, Lount. TITUS WILSON, examined.

Lives in East Gwillimbury—saw the German settlers on the Sunnidale road in 1834, about 15 o 20

of them-they were moving to wards Nattawasusga -they were in a forlorn and destitute situation no guide-no mode of conveyance-carrying their packs & small children—snow about a foot deep-& thought they were in danger of perishingsigns to them where they would find a sharty about two miles from the road—felt concerned for them being in the woods, and asked by signs if they had any fire works (means of striking fire) answered they had not. Witness went on to Crows' tavern that night, met Mr. Ritchie and Mr. Kennedy there: Mr. Ritchie asked Kennedy to carry them provisions in the morning—Kennedy started with a back load of provisions before day and on his return said the people had devoured the whole in about three min utes. The next evening Messrs. Young and Barrett arrived there.-Young said he was very much troubled with these Germans-that go where he would he was sure to meet them teasing him for provisions; the woman would throw their children at himwished he was a magistrate that he might commit them-wished their shanties were burnt over their heads. Witness thought Young was in earnest-is acquainted with Kennedy—has had opportunities of observing his character—thinks altho he will take his glass occasionally, he is a faithful, industrious and trust-worthy person—Knows he had charge of Mr. Ritchie's men once and thought him a "thorough going man"-saw him fight once in witness shanty when he was something in liquor.

Witeess knows Kennedy to have had charge of men in Ritchie's employ, and thought he managed the business to advantage—has been acquainted with Ritchie since 1824—served under him in the settling of Oro and Medonte,—thinks him a competent person to superintend the settlement of new townships. Witness tooks job of road work from Mr. Ritchie who gave him a draft on Mr. Hawke, principal agent—but when the draft was presented at the office in Toronto, Mr. Hawke said he could not pay the draft till the work was examined, as there were many complaints against Mr. Ritchie—Mr. Hawke seemed doubtful of Mr. Ritchie's honesty.

JOHN FLETCHER, examined.

Corroborates the statement of Willson, about the the German families going, to Sunnidale—knows Kennedy, believes him to be an active, industrious person—has seen often informed by the settlers in Oro and Medonte that Ritchie did his duty to the satisfaction of the settlers as eyent for the settlement of these townships—Witness received a letter of instruction from Mr. Hawke to go with the Surveyor to examine and report on the job done by Willson at Sunnidale. This was done and the report was in favor of the one given by Ritchie to Willson. The Surveyor told him he thought it was done to injure Ritchie, as from the knowledge he had of Ritchie he thought there was no great reason to doubt of the correctness of his report, and that the sending others to examine and report on it was only an unnecessary expense to the government.

GEORGE MCCARTRY, examined.

Corroborates the former evidence as to the distress of the German families.—Witness gave them

2s. 6d.—they bought a bushel of potatoes and divided them—was present when Titus Wilson offered Mr. Young some pork and flour at a much less price than it would cost from Barrie, and which he first agreed to take and afterwards refused—knows Ritchie, thinks him an active efficient man—there can be no better agent—came down with Wilson when he presented the draft on Hawke for the road work done by him and which Hawke refused to pay—Wilson was put to considerable trouble and expense.

Witness thought Hawke partial to Young, and that he wished to get Ritchie out of Office and keep Young in—always considered Ritchie to be very careful of the interests of the Government in all respects.

Committee Room, March 15th, 1836.

Committee met.

PRESENT.

Messrs, Perry, Chairman, Wilson, Lount.

THOMAS JOHN THOMPSON, examined.

Resides in Sunnidale-keeps teams for transporting produce, goods, &c .- carried some loads for Government in January and February, 1835, from Sunnidale to Nottawasauga—received orders to go to Nottawasauga to clear off the lands chopped by Bartels-Mr. Hawke requested to meet him at Nottawasauga-did so, and agreed with him to clear off the land chopped by Bartels at \$10 per acre (a verbal agreement)—was requested to get hands to chop the remaining timber, logs, &c., and charged for the same. Mr. Hawke told witness the Government wished to put in a crop of oats, which witness sowed about the latter end of July-planted at same time 11 bus. of potatoes. Witness saw the Germans two or three times in January and February come to Mr. Young's for provisions—he would sometimes refuse at first, and find fault that they did not work, but thinks he afterwards gave them some -the Germans appeared to him to be able bodied men-two of them worked for him and and worked well-never heard them assign any reason for not working for the Government-witness took two of the families out of the settlement in the month of February or March-Mr. Young employed him and paid him for it.

There were five or six in all; one of them was sick, it was about the time of the sickness—does not recollect what Mr. Young stated as the reason for sending them away—supposes he gave reason but does not recollect.

During last summer witness saw a woman come to Mr. Young's and beg for provision—she had a child with her—Young appeared angry, and refused to give her any—had a knife in his hand and made signs to the woman to cut the child's throat—the woman was frightened and remonstrated—does not think Young really intended to persuade the woman to kill the child—does not think Young was eating at the time—is of opinion that the Germans could

not well have been managed without some severity.

Witnesss is acquainted with Kennedy—recollects that Mr. Young once borrowed a pistol from him to protect himself (as he said) against the violence of Kennedy—never saw any thing amiss in Kennedy himself, but has heard others speak ill of him.

Witness has assisted Young to keep his books—considers he understands book-keeping—has investigated the books-saw nothing to lead him to suppose that any unfair advantage was taken of the settlers, the average charge for flour was 27d and 71 for pork per pound-was present last December when the accounts were finally made up, and the settlers were accounted with, some were in debt and some had money coming to them-all that came forward appeared satisfied and signed the papers except one, Mr. Ewan-he found fault, but finally signed-never saw Young out of the way of liquor-from what he has seen, thinks Young an eligible person to su-perintend the formation of settlements, the clearing of lands, &c.—know that he paid for cows for the settlers out of his own pocket—does not think that he would allow any one to suffer from want of provisions—witness had a lot in Sunnidale for which he was to pay 5s. per acre, three years to pay the 1st instalment, without interest—for a lot, No. 26 in the 8th concession of Nottawasauga, on which 161 acres are cleared—paid no difference—applied to Mr. Hawke to make the exchange and it was done—the clearing cost the Government £4 per acro—has sowed part of it—witness thinks that Young had no more clerks and assistants than he wanted-did not get any receipts for his loads—thinks there was no account kept of the teaming.

Witness was engaged with others in a job on the Sunnidale road, and his brother was detained three months in Toronto, because Mr. Hawke refused to pay Mr. Ritchie's order without an inspection of the work by a Surveyor—thinks Mr. Ritchie a good agent and a perfectly upright man.

DAVID EDGAR, examined.

Knows Kennedy, knows him to be a dishonest man and would not believe him on his oath. The reason for this is, that Kennedy swore out a capias against him for £12 when he owed witness £8—thinks he is not vindictive if left to himself, but might be if advised, has worked for witness and worked well—thinks the Germans a bad set, the worst settlers he ever saw.

Wm. CROOKSHANKS Esq., called in and examined. Has known Mr. Young more than 8 years, has been in witness' employ for upwards of a year as a clerk and can testify to his general good conduct, regrets he ever left him.

Kennedy has worked for him to the amount of £100 or more—had no difficulty with as he worked by the day, was not very well satisfied with him—he was often away drinking, witness warned Young relative to him, knows the Rev. Mr. Meyerhoffer, thinks his name does not stand very high.

March 19th 1836.

Rev. Mr. CAMPBELL, examined.

Was at Barrie in 1834 when Mr. Young took charge of the settlers, had a good opportunity of judging of Mr. Young's conduct for some time, found him always attentive to his duty and heard no complaint to the contrary from the emigrants in his Mr. Campbell's charge, to whom they wo'd naturally have complained had they felt aggrieved: During Mr. Young's absence in Toronto, witness took charge of the Emigrants at Barrie; recollects that the Germans were very sick and emaciated when they first arrived at Barrie—recollect Mr. Young employing Dr. Barton to attend them, Mr. Young exerted himself to get two men punished for assaulting some of the settlers; thinks while the settlers were in Sunnidale and Mr. Young employed at Nottawasauga, he could not very easily attend to them.

Since witness has known Mr. Young never saw him drunk nor heard that he bore the character of a drunkard.

March 21st 1836.

WILLIAM LARKINS, examined.

Says he knows Mr. Young, wanted to dispose of 3, 4, or 500 bushels of potatoes and offered to Mr. Young at 2s. 6d. per bushel, saw Mr. Young again at Sandfurd's store, mentioned it again and requested an answer, but got none, was afterwards informed he afterwards paid 5s. per bushel to Alexander Walker.

Has heard settlers speaking of Mr. Young, say that he was very apt to break his word, not to be up to his contracts.

Has known Mr. Ritchie ever since he had the management of the settlers in the county of Simcoe-never saw anything amiss of him; always heard the settlers speak well of him.

ELI BEMAN, examined.

Witness has been acquainted with Mr. Ritchiesince the commencement of the settlement in the county of Simcoe, never saw any thing amiss of him always heard the settlers speak well of him.

Has known Kennedy these 6 years, had him in his employ 3 or 4 months, always considered him an honest man and active useful man, would take his word without his oath in any dealings.

.PATRICK BERTELS, called and examined.

Examined by Kennedy, was 6 months under Mr. Young as an emigrant and 4 months in his service, was used well by him as a master, left him to report his treatment of my father's family and our fellow emigrants, to Sir John Colborne, knows that on the 10th June 1835, he charged 4 or 5 of the emigrants with 1, 2 and 3 bushels of Potatoes which they never got, witness measured them when received from the teamsters, found 37½ bushels; Mr. Young charged 40 bushels, saw 43 charged afterwards to the Emigrants, 3 bushels charged to Stepney and only 1 got, witness was sent in latter part of

June to get vouchers signed by the emigrants, the Germans all refused to sign them at first, and so did others, but afterwads did sign them on my telling them (by Mr. Young's orders) that unless they did so they would receive no more provisions, 3 of them refused to sign the first and second time I asked them, but did so on my asking them a third time, got one in Blank signed by Widow Curry, will not say it was intentional, thinks it was neglect, she did not refuse to sign, has seen Mr. Young making erasutes in Mr. Barrets accounts, and writing, oftentimes, entries in their places both in the day-book and ledger, 4 pair of blankets charged to McEwin in two places, one entry by Young, one by Barret, saw. one of the entries scratched out, leaving two pair only, charged, some families got 4 pair, others got none, or not in proportion to their numbers, Livingston asingle man got a pair, witness' father with a family of 11 got 1 pair has seen Mr. Young shew his books and they shewed as much provisions charged during the time the Germans were starving as they did when by their own account they had plenty.

Mr. Barrett told Mr. Young on Mr. Young's return from Toronto that he had refused the German's provisions, Mr. Young said he had done right as His Excellency had ordered him not to give them any unless they worked, saw 3 men and 2 women (one of them 80 or 90 years old) come for provisions when Mr. Young put them out of the door, the old woman died 3 days afterwards, has known the Germans come 5 or 10 miles and be sent away—saw Mr. Hawke when he came to Mr. Young's, he staid there ab't 2 hours, believes he did not go through to the lake, witness and his brothers complained of loosing their job of logging, Mr. Young promised to give them a better job in place of it, but did not do so, his brothers had no team to log with, could do it without, during the 4 months witness was with Mr. Young, thinks he was at home about 6 weeks, during his absence, witness issued the provisions for him, kept an an account of them, and gave receipts to the teamsters, was once a month in charge without seeing Mr. Young, at one time for 4 days they had no provisions but some pork, at another time had only 180lbs of flour to give them which he took from Kennedy, the settlers requested him to go and find Mr. Young and make their situation known to him, set off with Mr. Thompson, met Mr. Young at Patterson's clearing, Provisions also were on the way, they arrived next, day; the teamsters used to get drunk and break their waggons and waste the provisions &c., they were Walkers men; good sober men might have been got to do the teaming Mr. Hewson and Mr. Thompson had good teams, during the six months he was there as a settler, only saw Mr. Young at his house in the settlement, used to stay a week or so at a time, never saw Mr. Young drunk.

Witness has been in gaol, accused of theft was convicted of the offence and sentenced to a months. imprisonment, which he has suffered.

Mr. Young supplied himself plentifully from the public store; saw the Germans when sick, as far as he could understand them they were starving for want of provisions; heard Mr. Young tell Walker, not to bring too much provisions at once, as it was the only rein he had on them to keep them quiet, (meaning the settlers.)

Committee Room, } March 28th, 1836. }

Committee met.

PRESENT.

Messrs. Lount, Wells, Robinson, Wilson and Mackintosh.

MICHAEL BARRETT, called in and examined.

Was clerk to Mr. Young 42 months, left him in March last 1835, during that time Mr. Young was in bad health and could not attend to his duty as he ought—his house was not completed, not fit for a person in his state of health to live in, was ordered to issue provisions only according to work done, did so, saw great distress in Anthony Hartels' shanty; his wife and 3 children in the last stage of hunger, said to Kennedy who was with him that this was going too far and must be stopped; met Hertels on his return coming back with his bags empty, said Mr. Young had refused to give him any, took Hertels back with him and explained to Mr. Young the situation of the family, who then gave them some provisions, witness did not himself know the situation they were in till he saw it; when witness saw Mr. Hertels' family, Mrs. Hertel was boiling a few peas.

The Germans did not work to entitle themselves to provisions according to Mr. Young's orders from

the government.

Witness was sent early one morning among the settlers to see their situation—found most of them eating—did not witness any great distress among them—2 or 3 deaths had occurred before this—Mr. Young told witness to tell them to come to him and he would give them provisions—they came accordingly and got some—went with the Doctor to visit the sick-he said it was disease of the lungs-the people themselves did not attribute it to starvationsaid it was for want of small comforts, ceffee, spirits, &c. &c. The Doctor said they must have them, and Mr. Young promised to get them as soon as possible—when Mr. Young left the place he told witness to give orders on Mr. Ross for such things as were wanted. Mr. Ross refused witness' orders. Witness promised the Germans these things and provisions if they would work—they got provisions and promised to work—thought they had been working, went with Mr. Young to see, found about one quarter of an acre chopped, five days they so promised—snow at this time three feet deep—the Scotch and other settlers worked constantly all this While Mr. Young was absent in Toronto, Mr. Ritchie came once or twice to see the settlement -did all that was necessary-this was during the sickness-thinks the Germans were not as disposed to work as the other settlers—they thought they were to do nothing until spring, when the snow was gone-saw the scene of giving the knife to cut the child's throat, describes it as the other witnesses-Mr. Young told witness they were to have provisions (1s. 6d per day).

During all the time witness was with Mr. Young never saw him the worse for liquor—believes him to be a strictly sober man. When Mr. Young left Nottawasaga, he left certain private papers with witness, desiring him to be careful of them and keep them in his chest—fastened it with a cord, as there was no lock—on his return Mr. Young asked witness

for his papers—he gave them, and Mr. Young observed that they had been opened, for that some of the papers were missing—witness does not think they had been opened.

The German settlers were not like other people—when sickness took place in one shanty the others, who had provisions, would not assist them—when one of the women was ill, witness could not get one of the others to go near her.

Cross-examined by KINNEDY.

Says it was during Mr. Young's four weeks residence at Mrs. MacNab's that the Germans suffered most from starvation-saw Mr. Young refuse them provisions-had told witness not to allow them to come in, as he did not wish to see them-the reason he gave was, that they would not work—believes if they had gone to York they would have received provisions—witness was ordered to give 1s. 6d. worth of pork and flour (pork at 6d., and flour at 2d.), to each grown person—this was after the Germans returned from Toronto. Previous to this they suffered the greatest distress, got very little except what witness took upon himself to give without orders—Mr. Young said that either witness or himself must be responsible for that. When Mr. Young heard that four of the Germans had been at York to complain of him, he said he would make them suffer for it—thinks he did not act upon that declaration, but treated them just like the rest-one or two complained of want of axes-Mr. Young said it was no use to give them axes, they would only sell them, they would not use them-witness is of the same opinion-they however afterwards got

Witness, when getting vouchers, signed, (and this frequently)—never told the settlers if they did not sign them they would get no provisions—Mr. Young's man told him to say so—they generally knew the amount for which they signed.

During the time witness had the power to give provisions—never restricted them as to quantity—they got as much as they chose to carry—saw Johannes Sturr and wife sent back to the settlement without provisions before dark when Mr. Young would not let them sleep in his shanty—the reason of this was that they had not brought back the axe belonging to Mr. Young—Mr. Young would have had to pay for it if it had not been returned—he had no more more right to give any thing away than Kennedy.

Witness has heard Mr. Young tell Mr. Mayor-hoffer, that if the Germans were starved it was contrary to his orders and knowledge—thinking that he thereby threw the blame on witness—said it was during his absence—Mr. Young told witness to do just as Ritchie ordered him when he came, but would rather he did not come at all.

Shortly before he left Mr. Young's employ, Mr. Young said there was a conspiracy between Ritchie and Kennedy to injure him, and that they wished to get witness away from him—does not believe there was any thing of the kind—Mr. Ritchie appeared too friendly.

Witness states that Matthewson received 3s. 9d. or 5s. a day, and that he himself has never been paid for his services; appeals to the Committee for remuneration.

Previous to the arrival of the last wimess, the following letter was received from him by the Chairman of the Committee:

PENETANGUISHENE,

21st March, 1836.

PETER PERRY, Esq., M. P.

SIR.

On account of my absence to a distant part of the country, I received your summons only on the 19th ultimo, being the day appointed for my attendance before the House of Assembly, and was of course not able to be there.

I conceive it severe on the part of the Government, to oblige a person to travel the distance of 105 miles without furnishing him the means of doing so, more especially, considering that I have served the Government for several months without receiving any remuneration; and on applying for it to A. B. Hawke, Esq. was told I am to receive nothing.

I am, Sir, Your obedient

Humble servant,

MICHL. BARRETT, Junt.

EVIDENCE CONTINUED.

EDWARD G. O'BRIEN, Esq. J. P., called.

Witness has known Mr. Young five years and upwards—never knew him to be an intemperate man, but quite the contrary. While acting as Emigrant Agent, asked him to come to his house, he being unwell—but he declined, saying, he could not leave his charge, the Emigrants requiring his constant attention—saw the German settlers frequently while they were are at Barrie—thinks them very inferior to any other settlers he ever saw, being dirty and idle—had some of them before him in his capacity of a Justice of the Peace, and from what he saw of them would not believe them on oath.

Witness knows Edward Kennedy—knows him to be a drunken riotor's character, (Mr. Hewson gave witness the same character of him,) is now an escaped prisoner—being charged with a threatened breach of the peace—from his character the constable was afraid to arrest him—his general character is bad as far as witness knows.

COMMITTEE ROOM, 6th April, 1836.

Committee met.

A. B. HAWKE called in and examined.

- 1. Are you at the head of the Emigrant Department in this Province? I am the chief Emigrant Agent in the Province.
- 2. From whom did you receive your appointment and at what date? I was first appointed verbally by Sir John Colborne, in the fall of 1832—I received an official notice of my appointment about a month previous to Sir John's leaving the administration.—A letter was however shown to me, addressed by the Lieutenant Governor to the Commissioner of Crown Lands, about March 1833, in which my appoint-

ment was notified—the appointment was a letter and not an official document under seal.

- 3. What are the duties of your office? To com-pound with the several Emigrant Agents and also with the agent of the Commissioner of Crown Lands, whenever the service requires it: to investigate the claims of any emigrants to relief or assistance and render the same, and forward them to their distant decations or places of employment; and in times of sickness it is my duty to suggest to the Lt. Governor such steps as medical relief requires, and as would conduce to their comforts also to examine and report relative to the situation of emigrams and their settlements, to correspond on the subject of commuted pensioners and the supplies required from the Commissariat Department for their use, to assist the emigrants in obtaining lands or of getting redress whenever imposed upon. I have also been engaged in superintending emigrants and ng roads, all the momes in payment of our services and all expenses connectthose per. ed with emigration, pass through my hands, and are paid in my name either by myself or by the agents for me. It is also my duty to examine all accounts presented for services or expenses as above, and to check any over charges. I pay out all the moneys expended here, and the different agents transmit an account to me of the several sums expended by them; vouchers of which, with those of my own payments I lay before the Lieut. Governor, from thence they are sent to the Inspector General to be laid before the Executive Council to be examined and audited. I have never had any of my accounts for moneys expended as above rejected.
- 4. How many agents have there been generally employed and what were their salaries? There have been several in 1834, Mr. Hayset Lachine, at 10s. per day; Mr. Patton at Prescott 10s. per day; Mr. Manahan at Kingston 10s. per day; myself bere at Toronto at 16s. per day; Mr. Ritchie in Sunnidale at 10s. per day and Mr. Catermole was also casually employed at 10s. per day.

\* What has been the amount of annual emigrant expenditures so far as your knowledge extends?—In 1832 about £2,000, in 1833 about £2,000, in 1834 about £4,200, and in 1835 about £3,500—The Lieut Governor is authorised by the Home Government to expend £5000 sterling annually.

6. When was the project formed of employing emigrants to clear government lands in Nottawasauga ? In 1834.

7. What was the object and what the cause pursued in accomplishing it? There the witness tenders the following—

Continuation of reply to Question No. 5.

- \* 5. What amount has been expended on account of emigration? The total expenditure during the last 7 years may be stated in round numbers at £36,000 Cy. and the total number of Emigrants 212,000. I mention the number of emigrants to shew that the expenditure is less than might be expected, particularly if the extra expenditure occasioned by the cholera in 1832 and 1835, medical attendance, hospital stores, &c. be taken into account.
- 7. What object had the government in view in employing indigent settlers in clearing land in Not-tawasauga?

1st. To ascertain whether indigent Emigrants could be profitably employed in clearing and cropping land, and secondly to form such a nucleus in a new and remote township, as would probably lead to its being settled.

It was merely an experiment made by Sir John Colborne. The object was a benevolent one, and its failures is to be attributed, to the remoteness of the Township, the dearness of provisions as well as the utter ignorance, of the persons forwarded, with the kind of work they had to perform. It forms an exception to the system and cannot be fairly quoted, as an objection to the expenditure generally.

A. B. HAWKE.

Emigrant Office, \\8th April, 1836.

- S. Had the project been tried before? In Sunnidale in 1833 about 40 acres were cleared, which did not succeed, and a better selection of lots was then made by the direction of the Governor.
- 9. Where you consulted by His Excellency upon the undertaking? I was frequently.
- 10. Was there any correspondence between His Excellency and you on the subject? All my instructions from His Excellency were verbal, nothing official.
- 11. Was Mr. Young appointed to superintend the settlement at Nottawasuaga, and at what time? In September, 1834.
- 12. What were his duties? To carry into effect my instructions for the purposes of the above project.
- 13. How were the settlers sent out? At the expense of government.
- 14. When were they generally sent out? I think the most of them from time to time in the latter part of 1834.
- 15. How many in all did you think? Not more than 300 were at any one time living on this 5 acre location.
- 16. Was the agent responsible himself for any advances he made to the emigrants, of provisions, utensils or other necessaries, over and above the amount or value of their work. No: at first it was considered, but subsequently he was instructed to furnish them in all cases with such necessaries as they required, and not to allow them to suffer, for want thereof. He was also instructed to furnish the provisions &c. at cost and charges.
- 17 Were there any other persons employed except the emigrants, in the settlement? A few were allowed to be employed for work of immediate necessity, such as the emigrants were not acquainted with, making roads and bridges, putting up houses and other buildings; the clearing of land was intended for the employment and encouragement of emigrants.

18 Were there any complaints made to you as to Mr. Young's management by the settlers or others? There were complaints made at different times by several persons; I think the first were that the settlers were suffering for the want of food and medical attendance, generally in writing and made to

- myself, there were however some verbal complaints; they were principally confined to the Germans, but there were a few others.
- 19. What steps were taken to investigate these complaints, and remove the cause? The Rev. Mr. Meyorhoffer was sent out by my instructions at the suggestion of the Governor to examine into the complaints with a view to the entire removal from that settlement of the dutch emigrants.
- 20. Were you yourself sent out to visit the settlement and investigate complaints? I was sent out about the 10th June 1835, and the principal object was to ascertain whether an immediate stop could be put to the expenditures in Nottawasauga. I was not instructed to investigate any complaints except Mr. Hewson's.
- 21. How did you find the situation of affairs? I found that most of the settlers on five acre lots had cleared on an average about 3 acres each, and were in want of seed potatoes; I thought it best to continue the expenditure for a time, and recommended their being furnished with potatoes and corn to plant on the land cleared. Another object was to give them employment, and to clear off the land already chopped on the government reserves, in order toget some return for the outlay.
- 22. How long did you remain at the settlement? I do not know exactly the length of time. I went from a tavern in the morning to the settlement a distance of 11 miles and returned to Mr. Thompson's a distance of 17 miles, the same day.
- 23. Did you travel about in the settlement, & visit the shanties and clearings, to witness the progress making? I visited 3 of the choppings, there were none cleared off, and I concluded that it was better to put a stop to the expenditures as soon as practicable.
- 24. Did you give directions when you were at the settlement for clearing off any of the land chopped and to put into crop, at the government expense?— I had given previous instructions to that effect to Mr. Young, but finding they had not been acted up to I directed him to have the land chopped, cleared off immediately and put into crop of oats and potatoes, i.e. that particular piece— about 12 acres.
- 25. What was your object in directing a crop of oats to be put in at that seraon? The object was to get a crop as well as to clear the land.
- 26. Did you think a crop of oats was likely to do well at that season of the year? Mr. Young thought he could prepare the land, and that it might do well.
- 27. Did you give instructions as to who should be employed in logging it off?—as the settlers had no teams, I suggested that Mr. Thompson, who had a team might be employed.
- 28. As the object was to employ indigent settlers, do you not think it would have been better to have allowed the logs to remain and dry until the summer when it could be more easily cleared off and put in a full crop of wheat? I think it would; still thought it an important point if a crop of potatoes could be obtained from the land at that time.
- 29. Do you know of anyone, who had chopped land complaining of not being allowed to clear it up? L

to reject them for any overcharge if there should be vouchers accompanying them? I have in all cases where it struck me that the charge was extravagant. have no distinct recollection of that specific complaint; there were several complaints during the season of various kinds.

- 30. Do you know what were the proceeds of the crops so put into the land? I do not, there were no returns made, I understood the crop failed.
- 31. Have any of those lots been sold to settlers or otherwise disposed of? Not one of them sold, two were disposed of, 1 to Willing in lieu of a lot which he had lost, the other to Thompson in exchange for one he owned on the Sunnidale road.
- 32. What claim had Thompson for an exchange? It was desirable that he should settle in the place.
- 33. How did you ascertain that Mr. Hewson had received a larger sum for teaming than all other persons in government employ or that he had not gone to expense in providing teams? I was so informed by Mr. Walker, Mr. Young, and I think Mr. Sandford verbally.

34. Do you conceive it to be your duty when drawn upon for money by agents for services &c.

35. Has that occurred in any of these accounts of Mr. Young 3 Yes, there is one charge for reaping oats, of about £1 15s, which is objected to, that is all.

Here witnesswithdrew.

Question sent to the Hon. Peter Robinson and answered as follows:

Q. 1 During the settlement of Peterboro' did Mr. Ritchie conduct himself to your satisfaction? Perfectly to my satisfaction.

Q. 2. Did Mr. Ritchie's conduct in the settlement of Ops please you? I had every reason to be pleased with his conduct in the settlement of Ops.

Q. 3 How did Mr. Ritchie conduct himself as one of your deputies in the lumber trade? Quite satisfactorily.

Q. 4. As your agent at lake Simcoe locating and settling emigrants &c. &c., did he give satisfaction ! He gave very general satisfaction to the settlers and to myself.

PETER ROBINSON.

Copy.

"EMIGRANT OFFICE, " 30th July, 1833.

"I am also directed by His Excellency to call your attention to my letter of the 14th of May last, and to the Government Circular of the 23rd of the same month, in which it is distinctly stated, 'that no charge whatever will be allowed that has not been previously authorised by the government."

" EMIGRANT OFFICE,

"York, 20th September, 1833.

"I beg to state, in reply to your letter of the 18th instant, that I cannot pay your draft in favour of Mr. Smith, or the balance due according to the statement you enclosed in the letter, until I have the necessary vouchers. Whenever you draw on me you will please to send me a receipt in triplicate for the amount, agreeable to the form I gave you on the 14th May last, to enable me to account to the government.

To save you the trouble of taking a separate receipt from each person employed, I herewith send you twenty sets of pay lists. These should be filled up and executed by the parties in triplicate, at the end of each month, and forwarded to this office, in order to show how the money advanced to you has been expended."

"EMIGRANT OFFICE.

TORONTO, 30th April, 1834.

"In order to prevent the emigration expenditure of this year from exceeding the sum placed at His Excellency's disposal for that service, you will be required to make up your accounts monthly, and to forward the vouchers to me for examination and payment, accompanied with a report, stating the number of labourers employed at your agency, the quantity of land chopped or cleared by them, and such additional information as circumstances may render necessary, to enable His Excellency to make any alterations, or adopt any improvements in the system he may think proper."

No. 6.

To the Honorable the Members of the House of Assembly, in Provincial Parliament Assembled.

The Petition of the Settlers of the Township of Nottawasauga,

HUMBLY SHEWETH,

That your Petitioners were sent in to the backward Township, the beginning of last winter, under the care of Mr. Young, Agent, with the assurance of employment and protection from the government; that we were located on five acres of land each, which is too small for to support our That owing to the mismanagement of Mr. Young, in giving the principal part of the employ-ment to persons living out of the Township, namely, called task jobbers, is the greatest cause of our present poverty and distress, and instead of expend-

ing the public money that was allowed, on the poor emigrants, it was completely drained out of the settlement; Petitioners also had to pay an exhorbitant price for the provisions which they reclived from him, when they could have got it much cheaper and better from the farmers of the different adjacent townships had it been so managed. Your Honorable House will please to consider that we are all poof emigrants, lately arrived from the Old Country, not knowing where to turn, that we considered ourselves happy when taken under the paternal protection of the government in a strange country, but through the neglect and mismanagent of the Government Agent they are much worse off now then when they came here, and are determined, to a man, to quit the settlement altogether if the government will not allow us some employment, by which we can in some degree support our now half starving families. Petitioners most humbly beg leave to assure your Honorable House, that it would take four sheets of paper, larger than this, to state the whole of their grievances, and do not wish to be too troublesome; but they most earnestly trust your Honorable House will, through your wisdom, devise means by which the distress of this Township may be relieved.

And Petitioners will, as in duty bound, ever

pray.

This work done in October, 1834.

Angus Campbel came before me, one of His Majesty's Justices of the Peace, and maketh Oath, that the sum of two pounds five shillings is justly and lawfully due to him, for work done by him and his two sons for Mr. Young, Government Agent, on the road from Sunnidale to Nottawasauga; and also the sum of one pound thirteen shillings and nine pence, for a deficiency of seven bushels and a half of potatoes, which Mr. Young promised to pay.

Neil McKeone came before me one of his Majesty's Justices of the Peace and maketh oath that the sum of one pound eight shillings and a penny half peuny is justly and lawfully due him and two sons for work done for Mr. Young on the road from Sunnidale to Nottawasauga, and also two pounds for a shantie built by them on a five acre lot.

John Adair came before me one of His Majesty's Justices of the Peace and made outh that the sum of one pound and seven pence half penny is justly and lawfully due to him and his son for work, done for Mr. Young agent on the road from Sunnidale to Nottawasauga.

Archibald Curry came before me one of His Majesty's Justices of the Peace and maketh outh that the sum of fifteen shillings is justly and lawfully due him for work done for Mr. Young agent on the road from Sunnidale to Nottawasauga.

Archibald McGilvray came before me one of his Majesty's Justices of the peace and maketh oath that the sum of one pound ten shillings is justly due to him and his two sons for work done for Mr. Young agent on the roud from Sunnidale to Nottawasauga.

John McFaden came before me one of His Majesty's Justices of the Peace and maketh oath that the sum of one pound ten shillings is justly and lawfully due to him and his two sons for work done by them for Mr. Young agent on the road from Sunnidale to Nottawasauga.

John Curry cane before me one of His Majesty's Justices of the Peace and maketh oath that the sumof one pound and seven pence half penny is just and lawfully due him for work done by him and his father for Mr. Young agent on the road from Sunnidale to Nottawasauga, and also two pounds for a shanty built on a five acre lot.

No. 7.

To WELLESLY RITCHIE, Esq.,

Sir: We the undersigned respectfully beg you will have the goodness to have these affidavits laid

before the proper authorities and you will greatly oblige

Your obedient servants,

Angus Campbell, John Currie, Archibald McGilvray, John McPhadyne, Niel McKeone, Archibald Currie, John Adair.

We the above named persons are ready to testify to the truth of the above mentioned statements, but after waiting on the magistrates both of whom are absent, we can do no more but declare to this vara-

The Complaint of Anthony Martin is that during the six months that he remained in Barrie himself and family lay sick of the fever and ague, and were it not for the humane assistance of Mr. Huston, Squire O'Bryon and Mr. Ritchie, they would have all per-ished for want of the common necessaries of life, owing to the neglect of Mr. Young their agent from whom they received no more than two stones of flour all the time of their illness although he had orders to supply them with provisions all the time; then afterwards when he was able to remove his family to Nottawasauga he was ill treated by Mr. Young in the distribution of his provisions, not getting more than a barrel and a half of flour and a quarter barrel of pork for which he induced him to sign a voucher for five pounds, and some short time after he brought him another for two pounds ten shillings, then the last voucher which he produced was for ten pounds which I refused to sign, although Mr. Thompson his witness told me I might sign, as it would be nothing out of my pocket, however I promptly refused and would not, knowing it to be wrong to the Govern-I have two witnesses to prove the same, he also built a shantic and chopped an acre and a quarter of land for which he never was allowed any thing for, although he applied to the Agent Mr. Hawke in Toronto three different times.

Wellesley Ritchie Esq. Toronto.

No. 9.

March 24th 1836.

The humble petition of John Connell of the township of Sunnidale.

I was employed by Mr. Young to clear 3 acres of land at 10 dollars per acre, for which he refused to pay me, when I had done the work, and I am in great distress with a family of 7 small children, and I have been sick a great part of the winter and not able to apply for payment before,

Your humble petitioner, JOHN CONNELL.

No. 10.

(Copy)

To His Excellency Sir Francis Bond Head Knight Commander of the Royal Hanoverian Guelphic Order and Knight of the Prussian Military Order of Merit, Lieutenant Generoor of the Province of Upper Canada &c. &c.

The petition of the undersigned inhabitants of the townships of Oro, Orillia, Medonte, Flos, Vespra, Sunnidale, &c. &c. &c.

Humbly Sheweth,-

That your petitioners have learned with extreme regret that they are about to loose the valuable services of Mr. Ritchie as Emigrant Agent for the townships north of Lake Simcoc, whose zeulous, kind, and persevering exertions from the commencement of 1831, through the time of sickness and distress in 1832, and since have given universal satisfaction and to whom; in consequence of which and his strictly impartial conduct, a small testimony of their respect and approbation was publicly presented in 1832 by the settlers generally; a compliment which it is believed has not

been paid to any other Agent in the Province. That your petitioners loose no time in submitting these facts to your Excellency in the hope that until your Excellency deem it proper to withdraw the Agent altogether from this section of the country no other person may be appointed in the place of Mr. Ritchie, as such a measure would in their belief be most injurious to the best interests of these settlements, the confidence and good will of which Mr. Ritchie so fully possesses and has proved himself so

well entitled to

And as, in duty bound, Your Petitioners will

ever pray.

Signed by the Clergy, Magistracy, Half-pay Officers &c. &c. amounting in all 900 inhabitants of the above named townships---which petition was referred for the consideration of His Excellency the Lieutenant Governor on the 24th day of March 1836.

No. 11.

To His Excellency Sir John Colhorne K. C. B. Lieut. Governor of the Province of Upper Canada and Major General Commading the forces therein &c. &c. &c.

May it please Your Excellency to grant an answer to the following charges against H. C. Young Esqr. Emigrant Agent at Nottawasauga together with an answer to a prior petition on the same subject containing other charges of date 17 of August last.

I am aware Your Excellency of the suspicion attached to these sort of petitions knowing that they are so frequently dictated by prejudice, interest or revenge, but I appeal to them who reads the heart as proof that mine has been pure philanthrophy towards the injured emigrants and particularly toward a poor father and large family, consisting of cleven, who were located by government last year, and who from the work and supplies being stopt by the said Mr. Young has been in a most pitiable condition during the whole period. I shall briefly state the causes of this cruelty to Your Excellency.

Mr. Hawke who had in the begining of April last paid a formal visit to Nottawasauga found it convenient to lodge on his road at the Messrs. Thompsons and by way of remuneration to the suid Thompson Mr. Young and Mr. Hawke transferred the government work and consequent supplies from my father's family to them, they two being out three years and in comparatively easy circumstances.

The injustice exercised toward the settlers generally, which I stated in the former petition, Your Excellency will allow me to be a good witness, as having lived as clerk with the said Mr. Young sometime and having left him purely from conscientious mo-

tives, and as further proof that I am not biased by any malicious feeling toward Mr. Young, I myself was the principal instrument in putting a stop to a combination which the injured settlers had entered into against Mr. Young, which might have termins. ted fatally for him but for my intervention.

I could enumerate to Your Excellency a variety of other grievances, such as the unequal distribution of blunkets, the reduction in the rate of chopping, &c. which the other emigrants have been kept from complaining of from the threats held out to them by the said Mr. Young of still further privation, &c. &c. I need scarcely warn Your Excellency that from the remoteness of the situation and the general ignorance of the settlers this junto of oppressors \*Meldram, Hawke and Young may carry on their nefatious transactions toward them unheard of at head quarters, and unless Your Excellency attends to this my second application for redress, I must, with due respect to Your Excellency's situation and character inform you that as matters of justice to my fellow emigrants and information to the public, I must make known the circumstances through tre public press.

By an early attention to these grievances your petitioner will ever pray, &c.

PATRICK BERTLES.

Emigrant Office, 7th Nov. 1835.

Bertles first petition dated the 17th August last, was sent to Mr. Young, and I beg to refer to Mr. Young's answer thereto, as well as the affidavits and certificates annexed to it.

A few days after these documents were transmitted for the information of the Lieutenant Governor, the petitioner's father, who he asserts has been so unjustly treated by Mr. Young, called at this office and offered to make outh that the charges made by his son were false.

With only one exception the settlers under Mr. Young's charge have also given them their flat and unqualified contradiction.

A. B. HAWKE.

Toronto, 7th Nov. 1835.

The petitioner was never employed by me as a clerk, his education not fitting him for such a situation. I employed him as a servant and to assist in issuing out provisions to the settlers.

As to the combination which the petitioner asserts might have terminated fatally but for his intervention, 1 can only observe it originated in misrepresentations made by the petitioner's brother. On my explaining the matters to the settlers they immediately resumed their labours, and as to it terminating fatally I never had the least reason to apprehend such a result.

As to the blankets which the petitioner asserts were unequally distributed, I gave one pair to each of the families most in want of them. As to the other charges

Address at Mr. Hinds. Mr. Moldram is a tavern keeper at Market Square. To-ronto 4th November, 1835. Mr. Meldram is a tavern keeper at Barrie and Mr. Youngs particular friend, he was expelled from the Goderich fishery for bad conduct.

PATRICK BERTLES.

they were replied to on the 5th September last, & I have only to add that the petitioner's father offered to certify to the falsehood of the petitioners charges, which I declined to avail myself of. The petitioner has been residing in Toronto since July or August last, and I believe is merely a tool in the hands of some designing person.

H. C. YOUNG.

Memorandum by the Lieut. Governor-"Forward the report of Mr. Young to the petitioner."

Col. Rowan memorandum "answered 10th Nov.

No. 12.

Copy, No. 66.

DOWNING STREET, 28th May, 1834.

I have the honor to acknowledge the receipt of your Despatch, No. 13, of the 22nd of March last, containing accounts of the Casual and Territorial Revenue, from the 1st January to 31st Dec. 1833, and also a statement of the expenditure incurred in forwarding and employing emigrants within that

I have been happy to receive so favourable a report, upon the whole, of the success of the emigrants who settled in Upper Canada last year, and I approve of your determination, in pursuance of the authority you obtained in Lord Ripon's Despatch of March 1833, to set apart a township for the reception and employment of such persons as were prevented from securing a subsistance for themselves. I trust that the result will prove satisfactory, and will not ultimately be attended with expence.

Adverting to the many important reasons which have, from time to time, been laid down in the despatches to your government, from abstaining from too easy an alienation of the waste lands belonging to the Crown, I cannot assent to any plan for extending the privileges at present allowed to officers of the army and navy in the acquisition of land.

I have, &c.

(Signed) E. G. STANLEY.

M. General SIR JOHN COLBORNE, K. C. B.

No. 13.

TORONTO U. CANADA, ¿ 21st March 1834.

I have the honor to transmit to you a state-ment of the Casual and Territorial Revenue from the 1st January to the 31st December 1833, and also an account of the sum expended last year in forwarding and employing Emigrants.

From the accompanying report you will perceive, that it is supposed that about 20,000 emigrants entered the Province last season.

The number of emigrants that remain in York, and are either disappointed in obtaining permanent emplayment in the town, or are prevented from leaving it for some months by sickness has rendered it necessary to select a township for the reception of persons of this discription, in which they can be employed in clearing land as they may be induced from time to time to remove. Sunnidale on the River

Nottawasauga is the Township allotted for this purpose, and about sixty families have been conveyed to the township since the antumn from York, and are now employed under the Agent in clearing land for sale.

The rapid progress which the province is making must be chiefly attributed to the Emigration of the last three years; and I am persuaded that I cannot too often advert to the facility with which the destitute Emigrants from the United Kingdom have been provided for, and the benefits which this Colony is capable of confering on the Mother Country, by receiving her redundant population, whenever the Parishes at home may find it practicable to adopt an extensive scheme of Emigration, under the guidance of His Majesty's Government.

I beg leave, however, to observe, with reference to any scheme of Emigration that may be suggested. that no destitute persons should be encouraged to emigrate, or permitted to leave their Parishes, with a view of receiving aid from Government, unless they are fit to undergo the difficulties which must always be encountered in a new country and are in good health, and of an age to support their families, by their labor.

The lands which have been recently explored are of excellent quality and from the reports of the country to the north west of Lake Huron, and the surveyed townships of the Home District, there are extensive tracts of fertile lands which can be prepared for the reception of Emigrants as the population

The Province has derived so much advantage from the exertions of the Officers of the Navy and Army established in the different Districts, that I am convinced that the interests of the Province would be advanced by extending the privileges granted to certain officers under the existing regulations to any officer who intends to settle in the Province, and can obtain testimonials from the Admiralty or Communder in Chief, of his good conduct and services, provided that he has quitted the service since the year 1815, and as the object of His Majesty's Government in granting land is to encourage respectable families to take up their residence in the Province it may be deemed expedient to allow also officers of the Civil Departments of the Army to enjoy similar privileg-

I have &c.

J. COLBORNE.

The Right Hon'ble }
E. G. STANLEY.

Statement shewing the expenditure on account of emigration in the years 1831, 1832 and 1833, and also the amount authorised by His Majesty's Secretary of State for the Colonies for the above service for the same period.

A. B. HAWKE. Emigrant Agent.

EMIGRANT OFFICE. TORONTO, March 22d 1834.

[110] Appendix to Rep. on Petition of E. Kennedy.

MEMORANDUM relative to the Emigration Accounts for 1833.

The expenditure in the accompanying statement from February 6th to July 16th inclusive, having been incurred while the business connected with emigration was under the management of the Commissioner o. Crown Lands, the whole of these charges have been brought into his account current with the Government.

The items from Voucher, No. 1 to No. 64 enclusive will be brought into my Emigration Account current with the Government for 1833.

Taking it for granted that the property belonging to the Government in Adelaide, will cover the amount due to the Estate of the Late Mr. Mount, and that all claims on account of the emigration for 1832, have been satisfied the sum to be charged to the current year will amount to £669 4 2. Ster-

ANTHONY B. HAWKE.

EMIGRANT OFFICE, TORONTO, 18th March 1834.

Emigration Report for 1833.

The number of emigrants who landed at Prescott to the 31st October last is 14,630. But as Mr. Rutton's report is founded upon returns made by the forwarders it might be safely assumed that the total is not less than 15,500, to which should be added at least 6000, for the number, which came into the Province by way of the States-making the accession to our population from emigration last year 21,500.

With regard to their distribution, it would appear from the report of the emigration agents, and the books of the lake steam boats, that about one third of this number landed of York, another third at Hamilton, Ningara, and the other ports at he head of Lake Ontario, one sixth at Cobourg and Port Hope, and the remaining sixth have settled in the Bathurst, Johnstown and Midland Districts.

The number of settlers, having capital, last year was greater than usual, and with the exception of about four hundred sent to Sunnidale, at the expense of the Government, all the Emigrants of last year have either settled on land or succeeded in finding employment and good wages, amongst the farmers and mechanics.

The settlers sent to Sunnidale were generally poor people, who had exhausted their means by the time they reached York, and therefore could not travel any distance in search of work; they are employed by the government in clearing land and making roads, in order to open the extensive tract of fertile land between Lakes Simcoe and Huron for settlement next year.

The past season has been a prosperous one for the Emigrants, and remarkably healthy, only one Emigrant having died at Prescott, and two on the route between Prescott and Montreal.

Not a single complaint has reached me of ill treatment, imposition, or sufferings on the route, and it is gratifying to add, that all the reports concur in stating that the conduct of the Emigrants has been

such as to call for the approbation of all who have been brought into contact with them.

ANTHONY B. HAWKE,

Emigrant Agent.

EMIGRANT OFFICE. York, 8th January, 1834.

No. 14.

EMIGRANT OFFICE.

York, 31st October, 1833.

The Lieutenant Governor being desirous of affording all the relief in his power to destitute sick Emigrants, has directed me to acquaint you that he will authorise the building of a log house in Sunni-dale, to serve as an hospital, and the furnishing of the same with three or four straw beds, a sufficient quantity of bedding, and also a few chairs and a

The house should be built as near as possible to the lots on which the bulk of the Settlers forwarded at the expense of the government have been located. With regard to its dimensions, I am of opinion that a building thirty feet long by sixteen wide will be large enough for the present; it should be divided in the centre and have separate entrances.

Whenever you think it necessary you are at liberty to employ a doctor, and you are also to furnish the patients with medical comforts, which include nourishing food suitable to their situation. If you require a small assortment of simple medecines made up into doses, such as you can administer in ordinary cases, let me know and I will have them forwarded to you.

I am, &c.

A. B. HAWKE.

table.

EMIGRANT OFFICE.

York, 11th November, 1833.

Sir,

The Lieutenant Governor being apprehensive that many of the indigent Emigrants who have been sent to Sunnidale at the expense of the Government will suffer for the want of winter bedding, has directed me to purchase and forward to you forty pairs of blankets. I have this day sent them to the Holland Landing, with a request that Mr. Phelps will forward them to you by the first opportunity. Before you make it known that the blankets are to be given away, you had better ascertain how the families under your charge are situated, as regard to such articles, and to make out a list and distribute them to those who stand most in need of them.

I paid your order in favour of Mr. Sandford, £101 11s. 3d., to Mr. Smith.

There is some omissions in your pay list, but as they are not to be submitted to the Inspector General until the close of the year, you will have an opportunity of supplying them.
Signed,

A. B. HAWKE.

Mr. W. RITCHIE.

NOTTAWASAUGA,

1st April, 1834.

SIR,

Mr. McAulay, Schoolmaster, is desirous of having the west half of No. 24 in the 9th concession as a school lot; there are about 20 acres chopped npon it, and he wishes to know it H's Excellency will allow him to take possession of it without being obliged to pay for the chopping. Should His Excellency not be willing to accede to this, Mr. McAulay has requested me to state, that the settlers are willing to chop an equal quantity on any other lot as a compensation to the Government for it.

The above lot I consider as the best adapted of any in this vicinity for a school lot.

I have the honor to be,

Sir. &c. &c. &c.

H. C. YOUNG.

A. B. HAWKE, Esq.

No. 18.

Copy.

EMIGRANT OFFICE,

TORONTO, 23rd August, 1834.

SIR,

Your letter of the 12th instant, inclosing an order in favour of the Messrs. Thompsons for £327 10s. currency, and also your letter of the 20th instant, inclosing an order in favour of Thomas Crowe for £106 17s. 6d., have been submitted for the information of the Lieutenant Governor, and I am directed by His Excellency to acquaint you, that no part of the expense incurred on the road can be paid until the regular contracts have been submitted and the accounts audited.

On reference to my letter of the 30th January last conveying His Excellency's authority to causeway the road through the ceder swamp in the 7th and 8th concession of Sunnidale, the expense was limited to 10s. per rod, and you were informed that vouchers must be taken by you in triplicate from the persons employed and forwarded to this office monthly for examination and payment.

Again in my letter of the 30th April last, I stated to you, that in order to prevent the emigration ex-

penditure for this year exceeding the sum placed at His Excellency's disposal for that service, you would he required to make up your accounts monthly and transmit thom to this office, in order that His Excellency might be enabled to make any alterations he might deem necessary. These instructions have not been complied with by you, and I am directed by His Excellency to inform you, that unless you strictly conform to them in future ne will find it necessary to employ another agent.

I am, &c.

EMIGRANT OFFICE,

Toronto, 1st September, 1834.

Sir,

I am directed by the Lieutenant Governor to acquaint you that His Excellency has been pleased to appoint you as Superintendant in the Township of Nottawasauga, and that your pay is fixed at ten shillings a day, to commence from this date.

The principle object which his Excellency has in view in appointing you to this situation, is to ascertain whether indigent emigrants may not be advantageously employed on Crown Lands, with a prospect of providing means by their own labour to support the expense incurred in maintaining them until they can find work in the Township, in which they may at first be located. In order to carry on this system with a prospect of success, it will be necessary to select a certain number of lots which you think can be readily disposed of, when partially cleared, to agriculturists, who may be induced to purchase farms in the Township, and you will please to take into consideration, whether it would be better to clear ten, twenty, or fifty acres on each two hundred acre lot,

The lots reserved for the experiment must be near some advantageous situation which may attract settlers, such as a town-plot, mill-site, &c &c. The land should be of the best quality, and the situation

The labourers employed by you must be located on five acre lots, near to the reserve lots.

I arn, &c.

5 Teams from Grantham for their conveyance to Holland Landing.

The families 17 in number received 20 lbs Sugar 2lbs coffee, 20 lbs butter and loaves of bread, and each family 1 pair blankets.

N. B. Mrs. Slade was confined on the Evening of the 14th and got a pair of blankets additional as she had no clothing or means to procure it for her infant.

No. 30.

BARRIE, 14th Oct. 1834.

Sin:

I have received your favors of the 2nd and Sth inst. and I shall be guided by the Instructions therein contained.

When I last had this pleasure, I was in hopesthat I would have been able to cut the road to the place of location with the Emigrants, but after having made trial of them, I found they were making such bad work, that I was obliged to desist. This has placed me under great difficulty as I have not been able to find any one who would take the contract on the terms mentioned in your letter of instruction of the 24th ult. viz: £2 10 per mile owing to the line running through a swamp 1½ mile in extent and very much covered with windfalls and other obstructions.

The lowest rate offered is £4 10 per mile and which as the season is so far advanced, I have thought better to accept.

Mr. Ritchie and myself have carefully examined the line and we are both of opinion that the terms are very favorable and have little doubt but a road through that part will prove of great consequence to the settlement of the township. I hope the urgency of the case will be an apology for my having exceeded your instructions.

The emigrants have for some time been employed in covering the causeways on the Sunnidale road in the way you directed.

As some of the emigrants have become very discontented at being kept so long from putting up their shanties, I have employed Mr. Ross Surveyor of this place, to make out the sites upon which they are to be erected.

It will be necessary to prevent disputes to have the survey completed and if it is agreeable to you, I think Mr. Ross would do it as well and perhaps a little cheaper if a Surveyor was sent from Toronto for the purpose.

Mr. Ritchie states that he has still a few blankets on hand but I have no doubt more will be wanted, he was called off suddenly to the election which has prevented me sending a list of the lots to be reserved, but I will have it done with as little delay as possible. The other stores in Mr. Ritchie's possession he states will be delivered over when required, he has them at disposition to render me all the assistance in his power.

Authory Martin about whom I wrote you some time since is desirous of being returned to Toronto. I have been obliged to give him and family some provisions to prevent them from starving and I feel much at a loss what to do with them.

I am, Sir,
Your most ob't serv't,
H. C. YOUNG.

A. B. HAWKE, Esq.

No. 31.

BARRIE, 25th Oct. 1834.

I have received the 16 families of foreign emigrants and will attend to your instructions

concerning them. 1 regret to say, however, that there are a number of them sick; there has been an addition of one to the number since there arrival here, and three or four more may be expected soon. Two of the men are ill with fever and ague, and one child has died. John Taylor, one of the Highland Emigrants, has been confined to bed ever since he arrived here; the Rev. Mr. Campbell has supported him till within about 10 days since, which he has been on my hands-he is however getting better.

The state of the weather has been very unfavorable for carrying on my operations, and as much retarded the cutting of the Nottawasauga road. I hope, however, to have a number of the Shanties erected the ensuing week.

There four located lots of land will fail very much in my way; if an exchange could be effected for all or any part of them, particularly the first, it would be of great advantage. They are as follows, viz: No. 24 and 27, in the 6th, No. 25 in the 7th, and No. 24 in the 5th Concessions of Nottawasauga. Many of the Emigrants are very much in want of Blankets—a supply would be very acceptable.

Dr. Barton has been very attentive to the sick Emigrants, but complains much of the expense he is put at in supplying them with medicines.

I am,

Sir.

Your most obedient servant.

H. C. YOUNG.

A. B. HAWKE.

No. 32.

EMIGRANT OFFICE, Toronto, 3rd Nov., 1833.

SIR,

I beg to acknowledge the receipt of your letter of the 25th, relative to the situation of the sick indigent Emigrants at your agency,-and am directed by the Lieut. Governor to state in reply, that his Excellency will authorise you to afford them medicill assistance and comforts when necessary.

Dr. Barton states in his letter of the 27th ult., that a suitable building should be procured for an Hospital, but as all those who will have any claim upon the Government, will be located on the Reserve Lots in Nottawasauga, it will be better to defer the erection of any building until you have openod the road, and then if necessary you are at liberty to erect a small log house for that purpose as near the centre of the intended settlement as possible. In the mean time, they can be accommodated in the building which Mr. Smith has been kind enough to give us the use of on the Sunnidale town plot

In order to check the expense you must agree with the medical attendant by the day. The usual allowance is 1s. per day for each patient for medicine and attendance, but when there is a single patient or two, no objections will be made to an increased allowance, the rate however is left to your discretion. Will you have the goodness to send me a statement shewing the probable monthly expendituro at your agency, as I am anxious to ascertain

whether the state of our funds will justify me in forwarding any more indigent settlers to be employed at the expense of the government.

This statement should include your own and Mr. Ritchie's pay and a reasonable estimate to cover contingent expenses.

With reference to the exchange of Lots adverted to by you, I will if possible effect it.

I am. &c.

A. B. HAWKE.

Mr. Hugh Young.

Copy.

EMIGRANT OFFICE. TORONTO, 3rd Nov., 1834.

SIR.

I have this day forwarded 34 pairs of Blankets to the care of Mr. Sandford Barrie.

You please to send them to Mr. Young, and inform him they are to be distributed amongst the indigent Emigrants under his charge, who are in want of winter bedding.

I am, &c.,

A. B. HAWKE,

Mr. WELLESLEY RITCHIE.

No. 34.

SUNNIDALE, 24th Nov. 1834.

SIR.

I draw on you on the 22nd inst. for £50 payable to the of Mr. Syday, Mr. Sandford. The necessary vouchers are herewith enclosed.

Since I had last the pleasure of addressing you Mr. Ritchie and myself have measured the work done by the emigrants on the Sunnidale road, and we find it amounts to 1022 rods. I am eager that it should be inspected before it is paid for, as I have found the greatest difficulty in getting them to put on a sufficient quantity of brush. I informed them at the outset and frequently repeated it to them that unless the work was done in the way directed, that it would he inspected, valued and payed for accordingly .-This I am afraid cannot now be done before spring, unless a thaw should take place soon, as their is now a foot of snow on the ground.

The Nottawasauga road is now opened for waggons for about 8 miles-owing to the number of streems that cross it, a good many bridges have been required, and from the swampy nature of the ground for the first three or four miles, some causewaying will be necessary, but I hope when the country to which it leads is viewed the amount expended on it will not be considered too great.

The House and Store House are now in process of being roofed in,-I thought it lietter to put up what I considered a comfortable Farm House, in case of the Lot upon which it stands being sold -The dimensions of it 22 feet by 26. The Store House will do for a small barn or stable.

The Highland Emigrants have mostly erected their Shanties, but most of them are discontented, the last year's settlers in Sunnidale, many of whom are in a very destitute situation, have prejudiced their minds. The foreign Emigrants are idle and very troublesome.

The wife of Christian Bomer who strayed in the woods died this morning-she has been in a bad state of health ever since she arrived in this part of the country. I shall feel obliged if you advise me how I shall dispose of her seven children. Anthony Martin is again ill and several of his family confined with fever and ague. David Jardine, one of the Highland emigrants, is in a similar way; and I fear neither of them will be able to work this winter. Mr. Ritchie has received the Blankets. I shall endeavour to find out those who are in most want of them and distribute them accordingly.

I remain, &c.,

H. C. YOUNG.

ANTHONY B. HAWKE, Esq.

No. 35.

SUNNIDALE, 9th Jan., 1835.

My DEAR SIR.

Mr. Gilbert Macaulay, an Emigrant of last year, who has for some time past been teaching school in Sunnidale, is desirous of removing to the settlement in Nottawasauga, with the view of opening school there. He speaks the Gaelic language and has in his possession high testimonials as to his character and abilities.

He has petitioned His Excellency for a small grant of Land-I think him a deserving person and if you could render him any assistance in furtherance of his views, I have no doubt but he would prove an acquisition to the settlement. I shall feel obliged if you will send me some more blank vouchers.

I remain,

My dear Sir, Your very sincerely,

H. C. YOUNG.

No. 36.

NOTTAWASAUGA, 10th Jan., 1835.

As I find I cannot at present conveniently leave the settlement, and as Mr. Ritchie has particular business to transact at Toronto, I have postponed my visit until his return.

Mr. Ritchie will hand you my accounts made up to the 31st ultimo.

I have enclosed an account drawn out with the person I contracted with for opening the road to Nottawasauga, with his tenders for building the House, Store House, and constructing Bridges, by which you will be enabled to form an estimate of the expense incurred up to the present time.

Mr. Ritchie will explain what yet remains to be done, and will give you any information relating to the settlement generally.

I will without delay, make out a return of work done by the settlers in Nottawasauga, who I am happy to say are now shewing a disposition to be industrious.

I am,

Sir.

Your most obedient servant.

H. C. YOUNG.

A. B. HAWKE, Esq.

No. 37.

Nottawasuga, 22nd January, 1835.

Sib:

I find I cannot get the German emigrants to do any work, all my efforts to that effect have proved unavailing, and they now tell me that the weather is so cold that they cannot do any chopping before next summer. As I do not see a prospect of their doing any good in Nottawasauga, I shall feel obliged by your sending me instructions how to act

The other emigrants appear to be contented and disposed to do their utmost.

I am, Sir,

Your ob't Serv't,

H. C. YOUNG.

No. 39.

HOLLAND LANDING, 1st Feb. 1835.

I received your favor of 28th ult. from Mr. Ritchie at this place on my way to Toronto yesterday evening.

It is my intention to return immediately to Nottawasauga for the purpose of making out the youchers in the way you have pointed out, I must beg leave to refer you to a letter of mine dated as near as I can remember on the 13th of Nov. last and delivered by my brother to Mr. Robinson in your absence wherein I stated that I had stoped the labor, of the Sunnidale road, and requested to know if it was the wish of the Government to have the work inspected before it was paid for, and as no communication on this subject has ever reached me since, I did not feel myself at liberty to draw for the amount of the work alone and as there are still balances due to some of the laborers, I have been unable to get them youchers so as to settle off the whole amount.

In the letter above alluded to, I made a complaint against the German Emigrants that they would not do any work and requested to know what course to take with them, and I have recurred to the same subject in one or two letters since. I have been much at a loss how to act towards them, having no alternative, but to either allow, their families to perish in the woods through their microaduct or to furnish them with provisions. The latter course L adopted, and I now find a difficulty in making out their Vouchers having little to show as an asset against the sums they had received, the only work they have done has been 42 rods earthed and brushed on the Sunnidale road, one acre chopped in Nottawasauga, their Shanties and a little chopping on their five acre Lots. I shall therefore feel obliged if you will instruct me how to make out their vouchers.

Many of the other emigrants are unavoidably in arrear, but I feel justified that with one or two exceptions they will work them out before the expiry of their time.

I am, Sir,

Your most obedient servant,

H. C. YOUNG.

ANTHONY B. HAWKE, Esq.

NOTTAWASAUGA,

2nd Feb., 1835.

SIR.

As I owe Francis Kewson a considerable sum of money for Teaming, I have this day drawn on you in his favor for £65 currency, in part of the amount due to him.

I am.

Sir.

Your most obedient servant,

H. C. YOUNG.

A. B. HAWKE, Esq.

No. 40.

Copy.

TORONTO, 17th March, 1835.

SIR,

I beg leave to state in answer to Mr. Ritchie's letter dated 10th instant, acquainting you for the information of His Excellency, that a number of deaths had occurred and that sickness prevailed to a great extent amongst the German Emigrants in the Township of Nottawasauga.

I beg particularly to call your attention to part of Mr. Ritchie's letter wherein he says "These settlers complain that they have been for weeks together without any issue of provisions and none of the Charity Blankets were distributed amongst them till deaths had taken place."

I beg to state that in consequence of your Instructions to me relative to indigent Emigrants which were to afford employment to those able to work at stated wages. To give each head of a family 5 acres of Land and to build a Shanty on each lot for their reception, and in the event of sickness to afford them medical attendance and comforts, which included food suitable to their condition; Blankets were also furnished by you to be given to those families who stood in need of winter bedding.

I have not only at all times acted up to your instructions, but have in a great many instances exceeded them. None of the Emigrants were ever without food for any length of time, and as soon as it was known to me that there was sickness amongst I rish settlers have proceeded very actively with

them, Dr. Pass, a medical gentleman residing in Barrie, was immediately called to attend, and who is willing to certify, when called on, that hunger or privation of any kind were not the causes of the sickness that prevailed amongst them. As regards the blankets I have only to state that they were distributed amongst the Emigrants the day after they reached me, and that the Germans got the largest proportion. As a strong proof that the German Emigrants were not allowed to want for any thing, as far as the Government was concerned. I have to state that since they reached me a sum not under £300 has been expended on them, besides the heavy expense attendant on bringing them up from Prescott, &tomy certain knowledge many of them had a supply of money, amounting in some cases to 30 or \$40, of their own.

1 am, Sir,

Your most obedient cervant,

H. C. YOUNG.

EMIGRANT OFFICE,

TORONTO, March 18th, 1935.

Sir,

I have the honor to enclose you herewith, by the direction of the Lieutenant Governor, a letter from Mr. Young, dated the 17th instant, relative to the German Emigrants under his charge. Excellency has also directed me to say, that he will esteem it a favour if you will accompany Mr. Young to Nottawasauga, and enquire into the condition of these unfortunate settlers, as well as to adopt measures for their removal to some place where they will be more likely to obtain work more suitable to their habits.

His Excellency has authorized me to defray the expense of their removal, as also to remunerate you for your services. I beg to add, that Mr. Young is instructed to afford medical attendance and suitable food to the sick, and to give employment to those able to work as long as they remain at his agency.

I have the honor, &c.

A. B. HAWKE, Signed,

Emigrant Agent.

The Rev. Mr. MAYERHOFFER.

No. 42.

NOTTAWASAUGA, April 3rd, 1835.

Owing to the state of the road I was unable to find conveyances so as to reach this place before Monday last.

Mr. Mayerhoffer arrived here on Wednesday, accompanied by two friends, and enquired into the situation of the German Emigrants, and I paid him five pounds to enable him to perform the journey.

I find that during my absence the Scotch and

their work, and it appears to me that upon those lots upon which they have been chopping there is nearly as much done as it would be prudent to do.

The amount chopped on them vary from twelve to thirty acres; there is now only two lots within my limits upon which no chopping has been done, and there is yet too much snow on the ground to admit of logging; I think it will be necessary to put the settlers to chop on those two lots; I think the whole amount chopped may be about ninety acres or perhaps a little upwards.

I am afraid it will be late in the season before I will be able to get in any spring crops, but I am not without hopes of getting in about twenty or thirty

acres.

The Nottawasauga road is at present almost impassable, and I am afraid I will find difficulty in getting through seeds and provisions, I shall therefore be happy to learn if it is His Excellency's wish to have any thing more done to it at present, I think about £100 will make it good.

I find that every one to whom I owe money is present for payment; I have stores on hand amounting to about £145, and there is a considerable amount of outstanding debts due by settlers, and I find the sum I brought with me will fall considerably short of all demands, I think about £100 would do I regret to until my next vouchers are sent in. state that Peter Currie, one of the Scotch settlers, was killed by the falling of a tree during my absence, he has left a widow and five young children, I shall be happy to have your instructions how to dispose of them. A child of Christian Bomers, one of the German Emigrants, died yesterday morning; this is a sickly family and require some indulgence while they remain here. The settlers, in general, are desirous to know if it is the wish of the Government to allow them any seed potatoes this spring, I think they can be laid down here at from about 2s. 6d. to 3s. per bushel.

I have the honor, &c.

H. C. YOUNG.

MARKHAM, April 6th, 1835.

To His Excellency Sir John Colborne, Knight Commander of the Most Honorable Military Order of the Bath, Governor of the Province of Upper Canada, &c. &c. &c.

Saturday, the 21st March, a letter was sent to me by the emigrant's office while I was absent to the service of the next coming Sabbath in Vaughan; but as clouds of snow fell from above, I thought it advisable to remain until Monday, the 23rd March, by coming home I found your Excellency's request, and Mr. Young's orders, if possible, to come out Tuesday next to his brother's house, on Young street, where he intends to wait on me until ten o'clock, A.M. As soon as I came home I made preparation, went away to Mr. Triskeller's, in the 3rd concession of Markham for night, to be sure of meeting him on the day appointed, at eight

o'clock, A.M. Here I made arrangements that on the 30th March following, I shall leave my house and try to be out in Nottawasauga at least Thursday, April 2nd. According this plan I left home on Sunday evening, went six miles to Mr. Frid Quartz, in the 2nd concession of Markham, who accompanied me to Inisfil to attend the funeral of his grand-child, next to Mr. Warwicks,-I attended the funeral on Tuesday morning, preached a sermon, and in the afternoon, at two o'clock, we passed over Kempterfeldt Bay, with a new sleigh hired for the purpose, and arrived in the evening at Mr. Ritchie's, in Sunnidale. I, Mr. Quartz, and Warwick well ruminating that in my case I might meet with disastrous difficulties, difficulties which was of great consequence to me, for from Inisfil up to Nottawasauga I heard monstrous complaints against Mr. Young, the Agent, to which I could hardly give truth until found to be so. Wednesday morning we left Sunnidale from the branch of Nottawasauga River, and arrived by one o'clock at the Agency, found a new log house covered with filth, and the ragged ambassadors of Mr. Young, a desperado Irish Roman Catholic, by the name of Kennedy, and a young lad, an ubiquist of the world. Young being informed of my presence, shewed himself either indifferent, or rather to say impertinent, letting me sit by myself for nearly an hour, although only upstairs in the house. He came and excused himself for having nothing to offer to refresh with, and then in a more humorous term asked me whether I would wish for a cup of Hemlock tea; his countenance and reception made me think him rather tenance and reception make in company with a Scotch disgraceful, he was in company with a Scotch schoolmaster, who was dismissed from one of the Townships for some evil conduct. Mr. Young Townships for some evil conduct. intended to make application to place this gentleman in Nottawasauga, that he may have a person to regulate his book concern, of which he is incapable; I thought not to spend a minute idle, by the loss of time, but to go to the Dutch shanties, and assembling them together, to hear their complaints; Mr. Young was my pilot, and the whole road he barked at me, abusing me, and said that there was no need for me to come out at all, as he thought that I was already filled with prejudices against him; but I said-Mr. Young it is shameful to speak thus to me, as I have no interest whatever in coming hither, I did in no manner offend you, neither do I wish it, but if you have a good conscience, believing to have done justice to your commission, you have nothing to fear. He objected, having many enemies; I answered do not mind them, all men have such, if we can only shew the contrary of what we are accused; I then told him what I had heard not only from Dutch but Scotch and others, that from the town of Barrie until the settlement of Nottawasauga, I had not heard one person speaking in his behalf; he tried to bring me into a resolution to visit the Scotch, of whom he has friends, and to whom he appears alone to be addicted, as a countryman, I told him that I had no order to enquire about the Scotch; he lead me on, and to my surprise ee did not even know where the Dutch shanties were, he showed me a shantie saying, there is a Dutch shanty, and when we arrived a Scotch boy came out, he wanted to blindfold me that it was a Dutch shanty once, but I asked the boy freely who openly declared that there was never Dutch in that shanty, the boy was requested to bring us on the way to them, which being done appeared to me very singular, and declared the open indifference for those people, meanwhile I told him that I had a report that he often got intoxicated, which he denied as being an untruth, but I have this report. from two credible persons; finally, under such disagreable conversation on the road for more than two miles on foot, we reached the Dutch shanties, I ordered them to assemble in one place, which they

As soon as they convenied I took up the German family nomination and found them thus:-

Mr. George Klipert, widower.

His son by the same man.

- 3. Anna Elizabeth Knauf, widow, 2 children. Frederick Scharallen.
- 4. Maria Elizabeth-his wife-2 children
- 3. Nicholas Santenshleicher, widower-2 children.
- 3. Christnia Guider widow-2 children.
- 2. Jacob Fuoy, widower-1 child.
- 4. Adam Mertz, Maria his wife-2 children.
- Christian Bomer, widower—5 children.
- 4. Christopher Vater Fredrica, his wife a new couple, married by me April 2nd, 1835.

On our road we met one family just wandering through Innisfil.

3. Anthony Irsel, his wife and one child.

These I sent to Vanghan where they found a place by my direction.

3. John Serf, his wife and one child.

Another widow I found in a shanty in Innisfil with three children.

2. John Icrs, his wife-I provided for them a place at William Kepper.

Mr. Frederick Queentz in Markham employed one who says he was in English service.

Mr. Haucke (single.)

2. Old Mr. Ritter in Markham has one family.

has one boy only. 1. Mr. John Hunter do.

one old couple. 2. Mr. Lunan do

Sum 18.

These are scattered about living yet.

Now to their complaints.

The principal impediments may be ascribed to the incapacity of conversing with their language.-The inclemency of the weather, the severe and harsh. treatment of Mr. Young upon the Germans an indifferent emigrants.

When they arrived at Barris Mr. Young took them to Sunnidale, 12 miles, & set them into an old cabin, September the last—here he left them to December when the snow fell knee deep No shanties were built for them—the provisions but scarcely administered 'till they unanimously resolved to enter theerfully to the place of destination in Nottawasauga: They built themselves jumbers, packed their property on them-tied their children on their backs, marched on dragging through the unbroken road 24 miles. When they arrived Mr. Young reproached them for coming in such a beautiful procession; the view of this pilgrimage was sufficient to raise feeling, and yet the welcome and reception was ra-

ther too severe-No shanties found-to 14 labourers only 7 axes given—they fixed their habitation upon the snow, and began their own shanties to build. Mr. Young dwelleth at Gilespies, 10 miles from the settlement to which they had to come for provision, without taking any consideration upon the quantity of people in a family. He gave rations to the one. who had one child not more or less, who had eight. For one week 12 pounds flour—six pounds pork.— He kept them as perpetual couriers on the road hunting him up-that after they had to run 37 miles to Barrie to apply for their provision-doing thus they were often twice 24 hours without the least provisions—and in this manner they bore upwards of six The inclemency of the season and the provision scarce, even sour flour returned by the Scotch' and distributed amongst the Dutch, brought sickness amongst them—they knowing nothing of the allowance of any medical aid, and destitute of means to procure a docter. Some died-suddenly cut off from the few of the earth. This being reported to Mr. Ritchie he went down to Barrie and engaged Mr. Pass, M. D. to come up to Nottawasauga to visit the sick; and when they arrived there they found two dead bodies.—They visited the other sick, and by the kindness of Mr. Ritchie and the exertions of the doctor, being provided with medicines and fresh meat, and Rice, the others recovered. Mr. Young was visited by the doctor and Mr. Ritchie, and reported that two of the germans died-he answered that he did not know whether there was any sick amongst them. Mr. Young told me that the doctors bill already to the Dutch amounts already to £40.-I asked the doctor-he told me that it is not more than £15, and this he did not receive yet.

Some of the Germans were accused as lazy peo-Linvestigated upon the truths of this assertion and found that they gave them axes that bend like lead, and how can they labour with such. I and Mr. Young saw that exhibited to us. Blank vouchering having been sent by the government printed, they declared that they were forced to sign their names without knowing what is to be set to fill up these blanks. They resisted—first wanted to throw them into the fire-but afterwards by cunning and craftiness pacified, they submitted and signed their names. This is an easy matter to lay the burden and loss upon the Dutch. In blankets they were scarely kept, as some only received a half, others a whole, and the Scotch some as much as five.

The Germans had one wise proceeding in marking down each of them their provisions which they received, and at the highest amount does not run for the half year higher than from £5 to £7. And there is some who cleared 5 acres of land. Those who had sickness in their shauties were hindered to go to labour as they had had to tend to their patients and this is natural. The 'ill treatment of the sick and the inclemency of the weather made three or four of the children destitute of eye sight they are perfectly blind with the white star—what a misery for parents with such cripples!

Thave in hand that account of that mans provision I met in Innishl, Anthony Irtel amounting in all-

1 bushel potatoes,

400 pounds flour,

143 do. pork or mest.

Is not this an economical living for a half year, three persons, man, wife, and one child 8 years old.

The like accounts all have, and it is easily to find out whether Mr. Young expended on the Dutchet300 if all confronted.

The new house of agency he charges as I hear £100 is not worth fifty; the provision store £80 is not worth £30; the bridge built instead by the people amounts by contract £80 is not worth £25; thus acting, the government money is not used either profitably or suitably.

The widow in the shanty of Innisfil in her desperate situation came to Mr. Young stating to him her misery, and requesting him for advice what she should do with her poor children? he took a knife from the table, and said to her, cut their throats, and this was acknowledged by his own Barret-what a great kindness! Thus far I relate to Your Excellency what I after strict examination found. The present settlers are well satisfied now since Mr. Ritchie provided for them—they wish to remain and work faithfully if they should be treated kindlythey feel thankful for the kindness of your Excellency having sent out a person to inquire into their hard complaints, and beg for the continuance of Your Excellency's patronage. As spring will soon appear they requested me humbly to beg that at least fifty bushels of potatocs might be prepared for them to plant on their lands, five acres for them all; they will amount with transportation the most ten pounds and perhaps be got in Innisfil if applied in time, besides, that two baking kettles with which they may bake their bread by exchange.

Should I trust the conversation of Mr. Young with which he declared to me confidentially that he feels indifferent what I report as he has the favor of your Excellency thus far that he defy me in my report. I think I have reported rather more than it is easy to prove that Mr. Young is neither a suitable nor a

profitable Agent in Nottawasanga.

I would have some other things to relate yet, but amongst all, I cannot conceal what happened the This I can prove same night I was on the place. with those creditable persons with me that the staple of the provision house was broke, the key left in the lock and fresh coals which fell from the flambeaus in the night, found in the store, what had those to do, this is suspicious to me. I believe that provisions are stolen out and finally all laid upon the dutchcould not in this way the fire spread and burn down the whole concern.

Thursday morning I hurried to return, leaving Nottawasauga we arrived safely at Mr. Warwicke on Friday evening at eleven o'clock A. M.

I preached and had service, baptised three children-after dinner we left Innisfil, came out through a shocking dire to Mr. Evans in West Guillimbury-Saturday I appeared in Vaughan—Sunday evening reached my house in Markham—my labour in this concern I reckon ten days, received towards my expenses five pounds from Mr. Young for which I gave

With duty bound, I remain,

Your Excellency's most ob't humble srv't. V. PHILIPS MAYERHOFFER. Missionary of Markham, &c. No. 44.

Copy.

EMIGRANT OFFICE, 9th April, 1835.

SIR. I am directed by the Lieutenant Governor to state, in reply to your letter of the 3d inst., that the widow Cornell and her children are to be subsisted until they can be removed. If the children are old

enough to be placed at service, perhaps the Rev. Mr. Meyerhoffer could obtain places for them. His Excellency will authorize the repairing of the

road leading from the Sunnidale road to your settlement, provided the expense does not exceed one hundred pound. You may also chop 20 or 30 acres on the lots you mention, but His Excellency has instructed me to say that he is anxious, that you should get as many acres into spring crop as possible, and that you should employ the people under your charge in clearing and fencing the land already chopped.

You are also authorised by His Excellency to purchase a quantity of seed potatoes and corn for the settlers upon the five acre lots, but you are not to give more than five bushels of potatoes and a peck of seed corn to each family.

As I am called upon by His Excellency to make up my accounts quarterly, it is not in my power to make any further advances until I receive your

Signed.

A. B. HAWKE.

Mr. H. C. Young.

No. 45.

NATTAWASAUGA, 27th May, 1835.

DEAR SIR:

As I am indebted to Mr. Thomas I. Thompson for the articles purchased, and various services performed on account of the settlement, and as he is very urgent for to get some money to settle a very pressing demand, I have this day drawn on you for £20 currency.

As I am now making up my vouchers to send in, I hope it will not be inconvenint to advance the above amount for a short time, and it will prevent an execution falling on the goods of the person to whom Mr. Thompson to pay over the draft.

I am,

Dear Sir,

Yours very truly,

H. C. YOUNG.

ANTHONY B. HAWKE, Esq.

No. 46.

EMIGRANT OFFICE,

Toronto, June 15th 1835.

Sir, In obedience to the commands of the Lieut-Governor, 1 visited the indigent settlers located last autumn on five acres each, in the township of Nattawasnuga. The number of families forwarded was 52—consisting of nearly 300 persons, of this number 45 families are living on their respective allotments, and have been employed up to this period in clearing land belonging to the Crown.

With few exceptions they have carned not only sufficient to maintain themselves and families, but have on an average cleared three acres each on their grants.

Finding that they could not obtain seed to till the land they had cleared, in consequence of their poverty and their being 30 miles from any settlement in which it could be procured. I authorized the Agent-Mr. Young, to furnish each family with sufficient seed potatoes and Indian corn to plant their respective clearances.

The object in sending these persons to this township was two-fold-1st. to ascertain whether indigent settlers who were unable to obting work in consequence of their arriving late in the season could be profitably employed in clearing & chopping land at the at the Government expense-& 2d.to form such a nucleus in a new & remote township, as would lead to its settlement.-As to the first I would beg leave to remark, that, in consequence of the lateness of the season when the experiment commenced last year, the Agent had to uncounter a great many difficulties. These, in myopinion, are now principally surmounted. The settlers have chopped 130 acres of land for the Government, and are now employed in logging it preparatory to tillage. These improved lots will form a very desirable location for settlers of a better class, who may be able to pay for the improvements, and the money thus obtained may be applied to an extention of the system, or in the event of their not being disposed of, they can be cropped, and the produce applied to a similar purpose. I do not think that the whole amount expended will be repaid, but I am of opinion that the increased value given to the Crown Lands in the township, will make up for any deficiency.

With regard to the second object, viz: the settlement of the township, I am of opinion that it cannot full of having the desired effect.

Already the attention of settlers is directed to the township, and there is every probability of its leading to the immediate settlement of the lands lying between the lakes Simcoe and Huron. The first communication by means of a road between these Lakes was contracted for last spring, and only completed in September. The quality of the land, immediately along the road, is very inferior, but the communication is one of great political importance to the Province, & in order to keep it open & to settle the adjacent lands, it is absolutely necessary to offer such advantages to the first settlers as may induce them to take up lands on the routes in question.

If the countenance of the Government were withdrawn from the settlement at the present moment, I am apprehensive that a large proportion of the settlers would be obliged to abandon their lands.

I have the honor to be,

&c. &c. &c.

A. B. HAWKE.

Col. Rowan, Civil Secretary. No. 47.

Copy.

EMIGRANT OFFICE, Toronto, June 15th, 1835.

Sir,

Having been directed by the Lieut. Covernor to investigate the charges made by Mr. Hew-son against Mr. Young, I beg to state, for His Ex-cellency's information, that on my arrival at Barrie I called on Mr. Hewson to afford him an opportunity to prove the charges made by him in the accom-The charges brought by Mr. Hewpanying letter. son against Mr. Young, in the second paragraph of his letter, are that he was encouraged to provide teams to transport Government stores, and that after having done so, Mr. Young refused to employ him and has withheld payment for services so rendered; that Mr. Young has grossly insulted him; and Mr. Hewson asserts that he was thus ill-treated because he would not consent to bribe Mr. Young. Although it does not appear that Mr. Hewson has incurred any additional expenses in providing teams, or that he has any particular claim to be employed in preferenc : to others; he has nevertheless received a large amount for teaming since Mr. Young has been entrusted with the management of the settlement than has been paid for similar services to all others. Mr. Hewson asserts that there is still money due him for services performed, while Mr. Young contends that he has been paid in full; but that if Mr. Hewson can prove the contrary he will allow it. The accusations as to insult and bribery are supported by Mr. Hewson's assertions only, and are positively denied These charges, therefore, appear by Mr. Young. unfounded.

Mr. Hewson has also charged Mr. Young with permitting a shameful waste of the provisions in his possession, und unpardonable neglect of duty, and also of employing a ruffianty set of drunkards, and Mr. Ritchie and a person named Gellespie was referred to in support of the charges.

Mr. Ritchie being absent I called on Gellespie and a person named Gilchrist, who I was given to understand could corroborate the correctness of the above charges, and also prove Mr. Hewson's verbal assertions, that Mr. Young was a very dissipated character.

It was admitted on all hands and by none more readily than Mr. Young himself—that in consequence of the provisions having been stored in the government building before it was finished, that they were liable to be pilfered; but it does not appear that such has been the case to any extent, or that Mr. Young could get the store rouse finished at an earlier date; neither was proof adduced that Mr. Young has been guilty of neglecting his duty, or that with the exception of a man named Kennedy that he has employed any person who could be designated a ruffian or a drunkard.

I would beg to add that from the lateness of the season Mr. Young has had many difficulties to encounter, and that under all circumstances. I am of opinion that not a single charge affecting his sobriety, integrity or zeal has been established.

(Signed,) A. B. HAWKE.

Col. Rowan, Civil Secretary. No. 48.

Nottawasauga, 20th June, 1835.

Sir:

Herewith you will receive my accounts and vouchers made up to the 30th May inclusive. By the account current you will perceive there is a balance due me amounting to £454 4 11.

I have thus drawn on you for £200 in favour of Alex. Walker at sight, and also in favor of Dr. Arch'd Pass for £31 13 11 the amount of this voucher. As both of these persons are a little in want of money, I hope my drawing on such short notice may not be found inconvenient. The balance I will draw for as it may be required. Messrs. Thompson's are busily employed logging the land as directed by you. I shall have the pleasure of writing you more fully upon the business of the settlement generally in a few days.

I have the honour, &c. H. C. YOUNG.

ANTHONY B. HAWKE, Esq.

No. 50.

Commissioner of Crown Lands Office, Toronto, 9th July, 1835.

I have the honor to inform you by the direction of the Lieutenant Governor, that as your services are not required at Sunnidale, you are to preceed forthwith to the townships of Thora and Eldon for the purpose of superintending the opening of a road through these townships.

The proposed line of road as laid down by Mr. Smith, Deputy Surveyor, commences at the Talbot River in the 10th Concession of Thora, and terminutes at Balsum Lake, a distance of about 15 miles.

As it is His Excellency's intention to visit that part of the Province, early in August, you are directed to enter into as many contracts with different persons as may anable you to complete the road by the 30th inst. and also to build two. comfortable log houses, one at the commencement, and the other at the termination of the intended road.

You are also instructed and authorised to contract for building bridges across the creeks and ravines that intersect the line of road, as well as to causeway such parts of it as may be necessary.

The road is to be a common sleigh road about 16 feet wide, and the expense has been estimated at £3 per mile, exclusive of the bridges and causeways. I would beg to observe that you are not confined to the exact line of road laid down by Mr. Smith, but that you are at liberty to deviate from it whenever the nature of the ground may make it necessary for you to do so.

I have the honor to be,

Your most obed't humble Serv't. PETER ROBINSON.

Mr. WELLESLA RITCHIE.

EMIGRANT OFFICE, TORONTO, 6th August 1835.

(Copy) Sir:

The bearer Nathaniel Willing hav-ing made improvements upon a lot of land in Ves-pra which has been deeded to Capt. Gardiner, and as Capt. G. is not disposed to surrender the Deed unless he obtains a grant for two lots in Gainsborough in lieu of it, I am directed by the Lieut Governor to inform you that as he cannot comply with Capt. Gardiners proposition and as he considers Willing's case a very hard one, that he will authorize his location upon one of the improved 100 acre lots in Sunnidale or Nottawasnuga, you will therefore please to give him a list of the improved lots helonging to the Crown to enable him to select one. When he has chosen a lot you will send me a description of it and state the extent of the improvement upon it, as it is His Excellency's wish that he should be fully compensated for the loss he has sus-(Signed) A.B. HAWKE:

Mr. H. C. Young.

No. 52.

NOTTAWASAUGA, 14th August 1835.

As the Government wheat in Sunnidale will be ready to cut in about a week. I have made arrangements for having it harvested. Messrs Thompsom have offered the use of their barn for thrashing If you think this it upon being allowed the straw. a reasonable consideration. I will upon hearing from you accept their offer. I would have erected a shed near the fields for this purpose, but I have been deterred by a fear that the property would not be secure, the wheat is generally of a good quality but thin upon the ground, and I do not anticipate a return of more than 270 bushels after deducting the threshers toll about 100 bushels will be required for seed in Nottawasauga which will have a surplus of about 170 bushels waich I shall be happy to learn how His Excellency would wish to have disposed of, and whether it will be considered most advantageous to have it all threshed out at present, or to leave the surplus until winter. The expense of harvesting it, will be considerable owing to the distance of the field from the Barn I shall however do it in the most economical way.

The settlers are all busily engaged logging and I have no doubt but I will be able to get 100 acres into fall wheat, Messrs Thompsons have finished the work they undertook in a very satisfactory manner. These are 14½ acres under spring crop viz: 11 acres oats 2 acres potatoes and 11 acres turnips. spring crops are backward owing to the season at which they were sown and great return cannot be reasonably looked for, since my return I have got two Dutch families sent away, all the men have gone away in search of work, on their return I will endeavor to get them sent away with their wives and families, owing to their absence I have not been able to get their vouchers sent in as I intended.

There are about 5 acres of land chopt in Sunnidale, chopt last year which will run waste if not logged off soon, as there are several settlers they are in a very destitute situation, I shall feel happy to learn if His Excellency would have any objection to have it prepared for fall wheat, in order to give them a little employment, I have no doubt but the crop will ultimately defray the expense. I shall attend to your instruction regarding Anthony Martin although I am afraid he is not capable of doing much work.

I have the honor to be

Your most ob't. H. C. YOUNG.

ANTHONY B. HAWKE, Esq.

No. 53.

EMIGRANT OFFICE, Toronto, 20th August 1835.

(Copy)

SIR:

I beg to acknowledge the receipt of your letter of the 14th inst. and to acquaint you that I approve of your arrangements for the harvesting and threshing of the wheat in Sunnidale.

From your estimate it would appear that after deducting for the threshing and the seed required to sow the land cleared in Nottawasanga, that there will be 170 bushels of wheat at the disposal of the government, as it is desirable to afford the indigent settlers located on the 5 acre grants, such assistance as may enable them to supply themselves and families, you are at liberty to lend each head of a family sufficient seed wheat to sow from one to three acres according to the quantity of land he may have cleared. As the land chopped in Sunnidale is of very inferior quality, I do not think it desirable to log and fence the 5 acres you mention.

To enable you to meet the current expenses at your agency, you are at liberty to draw for salary to the Elst inst. and also for the sum of £50 currency

I am directed by the Lt. Govr. to transmit Patrick Bertles memorial & to request, that you will return it this office as soon as possible with such explinations in reply to the charges brought against you as you may think necessary.

I am &c. &c. A. B. HAWKE.

H. C. Young.

No. 54.

EMIGRANT OFFICE, Toronto, 25th August 1835.

(Copy)

I am directed by the Lieut. Governor to state in reply to your letter of the 3rd. inst. that His Excellency is surprised to learn that the road lately opened through Thora and Eldon should require a large additional outlay to make it passable. It appears from your statement that there is a Cedar Swamp in the township of Thora from lot No.6 to lot No.1 in the Township of Eldon "which it will be necessary to causeway the greater part of the distance" and that there is another swamp in Eldon through which the road runs which will also require SO rods of causeway to render it passable.

His Excellency understood from Mr. Smith's report as well as from your representation that the line of Road passed through land highly favorable, and under these circumstances he was induced to sanction the route in question in preference to the more direct one; but as it does not appear that any advantage has been gained by the departure, it is His Excellency's wish, that Mr. Smith should accompany you and inspect the land lying between the present road and the Talbot River, and report to him on the subject, as it is desireable to have the road, as direct from its commencement at the Talbot River in the 10th concession of Thora to the Balsam Lake as possible.

You do not state in your letter the number of rods of causeway which you consider necessary to make the road good between the 6th Concession of Thora and the 1st Concession of Eldon, or the rate per rod. You will therefore supply these omissions at your earliest convenience.

I have the honour to be, Sir, Your most obedient, Humble Servant,

A. B. HAWKE. (Signed)

To Mr. WELLESLY RITCHIE.

No. 55.

Nottawasauga, 31st August, 1835.

Nathaniel Willing has examined the improved Lots in this township, and has fixed on Lot No. 24 in the 9th Concession

The above is a superior lot of land. On the half which he has chosen there is as near as I can calculate 13 acres chopt and about 8 logged; no part of it is yet senced. This lot can be divided at a less sacrifice than any other, as the clearance extends across the whole length of the lots fronting Hurontario Street. It is well watered.

I am, &c.

Your obed't Servant, H. C. YOUNG.

ANTHONY B. HAWKE.

No. 34.

Sunnidale, 31th August, 1835.

I have the honour to acknowledge the receipt of your letter of 20th inst. and I shall be guided by the instructions therein contained, and shall write more fully in the course of a few days.

For your permission to draw for the amount of my salary to the 31st inst., and for £50 Currency in advance I feel much obliged, and as I owe W. B. Robinson, Esq, £62 10, being the amount of 50 barrels of flour I purchased from him. I have drawn in his favor for that amount dated 1st ult. at sight. With regard to the charge brought against me by Patrick Bertles, I trust without much delay to be able to send you a satisfactory refutation of the whole.-Michael O'Connor, late a soldier in the 66th regiment, discharged on account of a wound and a commuted pensioner, has urged me to make application to the government to obtain a little assistance for him; he has a family and is at present in bad health; his oldest son while at work under Mr. Ritchie cutting the road to the Balsam Lake received a severe wound accidentally by a stroke from an axe, and their is little probability of him being able to resume work for a considerable length of time. O'Connor describes his situation as being very destitute at present, which I believe to be the case and would recommend him to the favorable consideration of His Excellency.

I am, &c. H. C. YOUNG.

ANTHONY B. HAWKE, Esq.

No. 57.

We, the subscribers, settlers in the township of Nottawasauga, under the superintendance of Mr. H.C. Young do herby declare.

1st. That we never at any time requested or authorized Patrick Bertles, late in his service, to lay before His Excellency the Lieutenant Governor any statement of grievances whatsoever.

That we never were required by threats or other inducements to sign vouchers for articles we never

received, nor did the article of Potatues form an item in any voucher when signed by us.

3rd. That we never found Mr. Young negligent in attending to the business of his agency, or to confide it to other persons, with the exception of his servant for the time being, and then only in serving out provisions or other minor offices.

4th. That so far from Mr. Young acting in a tyrannical or despotic way towards us, he has ever shown a disposition to promote our comfort and welfare to the utmost of his power.

5th. That we never suffered want or privations of any sort, excepting on one occasion, when we beand then only in so trifling a degree that we never thought it of sufficient consequence to make a complaint to him upon the subject.

6th. That we never found Mr. Young addicted to profune swearing. And whereas, there is no magistrate residing within eleven miles of the settlement before whom we can make affidavit of the truth of the above declarations, we hereby express our willingness to do so whenever the same shall be considered necessary.

Signed by the following persons. Archibald Currie, Angus Campbell, Arch'd Adam, Alex, Compbell, John Adam, George Campbell, Arch'd McCalman,. Andrew Jardine, Malcolm Currie, David Jardine, Dugald McDuffe, William Dallas, Duncan McNab, Niel McEwen, John McQueen, Arch'd McEwen, Malcolm Bell, Malcolm McEwen, Peter Hayman, John McFadgen, Senr, Donald Morrison John McFadgen, Jun'r. John McDearmid, Arch'd McFadgen, Dugald McDearmid, Niel McFadgen, Alex. Campbell, Arch'd McGilveary, Duncan McNab, Sen'r. Duncan McGilveary, Alex. Livingstone.

We do hereby certify that the above declarations have been signed by the head of every family at present in the settlement, with the exception of one who has not been aaked, and that no unlair means have been used to obtain the above signatures.

DONALD MORRISON.. (Signed) PETER HAYMAN.

EMIGRANT OFFCE,

Toronto, 1st Oct., 1835...

I heg to acknowledge the receipt of your letter of the 22d ult., and accompanying vouchers.

Lam directed by the Lieutenant Governor to request that you will make up your accounts to the 15th inst., and transmit them to this office, with a statement shewing the extent of the improvement made at your agency. To enable you to ascertain

the exact quantity of land chopped and cleared by the indigent settlers under your charge. I have dirested Mr. Robert Ross to proceed immediately to Nattawasauga for the purpose of measuring the land. In order to afford His Excellency every information relative to the affairs of your agency, you had better bring your accounts to Toronto, and as it is of importance that no delay should take place in putting in the fall wheat, you will please to request Mr. Thompson to take charge of the settlement during your absence.

I have the honor. &c. &c.

A. B. HAWKE.

Mr. H. C. Young.

No. 59:

TORONTO, 6th Nov., 1835.

SIR,

I have the honour to transmit you herewith my account current, for the information of the Lieutenant Governor, shewing the disbursements incurred in subsisting, locating and employing indigent emi-grants in Natiawasauga, amounting to the sum of £760 10 11, currency, which includes all the demands against the Government, at my agency, up to this date except the following:

> A. Martin, - - - £11 15 5 D. Ross about - 7 0 0

I shall endeavour to obtain their vouchers on my return to Nuttewaskuga.

In endeavouring to carry His Excellency's benevolent intentions into effect, I have made it my study to avoid all unnecessary expense as far as consistent with his instructions not to allow any of these settlers to suffer want, and you will perceive, with the exception of the provisions to the Dutch settlers, that the expense incurred for subsistence is very trifling.

The number of indigent settlers forwarded to Nattawasauga amounted to 320, a number of these have since found employment in the adjoining townships; and finding the Dutch settlers likely to become a permanent incumbrance, I have succeeded in getting rid of them except two or three families which still remain in the township.

By the annexed return it will be found that the settlers under my charge have cleared, and fit for chopping, 136 acres, and chopped 20, which will be logged up and framed in the spring.

The number of families located on five acre lots amoun's at present to 35, & I am happy to say they have cleared from three to five acres on their respec-tive Lots, which by the bounty of His Excellency they were enabled to plant with potatoes last spring, and I am of opinion their crops will not fell short of 10,000 hushels; many of the more industrious have also saved enough to purchase a cow and in some instances two; and as I have been directed to furnish them with sufficient seed wheat to sow their potatoe land this full, I think their can be little doubt of their being enabled to subsist themselves and families in future, without any further assistance from Government, and that these settlers will form | Superintendant of Emigrants.

a nucleus which will lead to the settlement of the township.

The wheat sown last fall in Sunnidale has been harvested this season, and the crop will produce about 240 bushels; out of this, nearly 100 bushels will be required to sow the land cleared in Nattawasauga, and the remainder will be distributed among the indigent settlers pursuant to His Excellency's instructions to enable them to till their five acre lots.

I would also beg leave to call your attention to the unpleasant situation I am placed in, by being personally liable to every individual named in my account, and to urge earnestly but respectfully, that funds may be placed at my disposal to enable me to liquidate the same.

I have the honor to be,

Sir.

Your most obedient

Humble servant,

H. C. YOUNG.

Col. Rowan.

The whole number of Acres cleared is. And of Acres chopped but not cleared.

No. 60.

Township of Thora, 12th Nov. 1835. We whose names are hereunto subscribed do certify that we have carefully examined the under mentioned work contracted for to be done in the townships of Thora, Eldon (& that lately surveyed by Mr. Huston) by Richard Titus Wilson with Wellesly Ritchie Esquire on the part of the government viz: A road cut and levelled about sixteen feet wide, so as to admit of the passage of sleighs and waggons, from the Talbot River in the township of Thora to Balsam Lake, the cause waying laid on string pieces, the high causewaying with butments & string pieces as also the bridges over the creeks and ravines and the House at the Talbot river and the one at Balsam Lake, all of which we have found to be performed in a workmanlike manner and in strict conformity to Mr. Ritchie's letter of instructions.

We further beg to observe that the only fault we could find is, that there is still some additional causewaying necessary! having discovered several mud holes, that require to be finished off on the line

To the Commissioner of Crown Lands for the information of His Excellency the Lieut. Governor.

A true copy.

John Fletcher, Wm. Soles, Ezra Parker,

L. M. Cameron, Lt. H. Pay.

P.S. We likewise certify that to the best of our judgment and belief all the above work has been done at the lowest possible rate, and that none of us would take the contract at so low a price.

(Signed)

John Fletcher, William Soles, Ezra A. Parker,

A true copy.

L. M. Cameron, Lt. H. P.

I have the honor to acknowledge the receipt of your letter of the 6th inst. addressed to Col. Rowan for the information of the Lieut. Governor, and also your account current against the government for disbursements made in the township of Nottawasauga both of which have been submitted to His Excellency to enable you to pay the individuals to whom you are indebted. His Excellency has been pleased to issue his warrant for the amount of your account previous to inspection and audit, and I beg to transmit to you herewith the Hon. Peter Robinson's cheque on the Bank of Upper Canada for As the expenses incurred £760 10 11. currency. in Sunnidale and Nottawasauga have been greater than was anticipated, and as it appears from your report that the settlers will in future be able to subsist themselves without any further assistance from the government, I am directed by His Excellency to. inform you that after the land cleared has been tilled and fenced in, no further expenditure can be authorized in that Township, in subsisting and employing indigent emigrants.

I am also directed by His Excellency to convey to you the expression of his thanks for the zeal which you have displayed in the discharge of the arduous duties of your situation.

I nave the honor to be άc.

A. B. HAWKE. (Signed)

Mr. H. C. Young.

No. 62.

Received 20th Feb. 1836.

TORONTO, 15th Feb. 1836.

I have the honor for the information of the Lieut. Governor to state that in the mouth of September 1835, I was directed by His Excellency Sir John Colborne to proceed to Nottawasa ga with instructions to examine that Township and to select a certain number of lots, for the purpose of trying the experiment how fur Indigent emigrants could be employed with advantage in clearing, fencing and chopping land at the expense of the government.

In accordance with His Excellency's commands I made choice of such lots as I considered best adapted for that purpose, and in consequence of instructions conveyed to me through Anthony B. Hawke Esq. Emigrant Agent, I proceeded to cut a road into the Township to the place chosen for location.

Nearly 400 emigrants were forwarded at the expense of the government whom I located on lots of 5 acres to each family, which they are to continue in possession of as long as they remain in the township, & having erected shantles for their accommodation, I commenced operations by putting them to work on the lots selected.

With the exception of 16 German families who were quite unacquainted with the English language and who I never could induce to work, I found all the other emigrants for the most part industriously disposed, & although they proceeded slowly at hirst, owing to their being unused to that description of labor, they progressively improved, and have per-formed nearly as much work as might under the circumstances have been expected.

The whole amount of improvements made by these emigrants amounts to 131 acres cleared and fenced, 66 of which were sown with wheat last Fall and 20 acres chopped, which may be logged and fenced and put in crop next spring provided the season be favorable.

I was instructed last spring to supply each family with sufficient seed potatoes to plant on the land cleared on their 5 acre lots, and last full they were supplied with seed wheat from the crop raised on account of the Government in Sunnidale, to sow their potatoe land, and as many of the more industrious have been enabled to purchase cows, I am in hopes with a few exceptions they will be able to subsist without any further assisance from the government.

In consequence of receiving intimation that it was the wish of His Excellency Sir John Colborne to close the business in Nottawasauga on the 31st day of last month. I have now the honor for the information of the Lieut. Governor herewith to transmit you my account current up to the 13th inst. by which you will perceive there is a balance due me amounting to the sum of £217 18 11 C'y which includes all claims against the government at my agency that I am aware of, should however any thing yet remain unsettled I feel satisfied the amount will be very trifling.

I have the honor to be

Your most ob't

Humble servant, H. C. YOUNG.

BARRIE, 14th March, 1836.

DEAR SIR:

The summons sent me to appear before the Committee on Monday I did not receive before that evening and of course could not attend. I understand another was issued for to-day, which has not come to hand. I, however, embrace the opportunity of Mr. Oliver's going to Toronto to send a certificate of the state I found the settlers when I visited them, which you may lay before the committee if you think proper. In haste.

Yours truly,

ARCHIBALD PASS.

H. C. Young, Esq.

Having been called, on the 19th of February. 1835, to visit the Dutch settlers in Nottawasauga, I found a number of the women and children laboring under inflamatory fever; several of the children were also deprived of sight from severe inflamation of their eyes. Three of the settlers had died previous to my arrival, and from what I could learn from their friends, they laboured under the same No post mortem examination would be permitted by their relatives, although repeatedly urged to allow it to be done both by myself and Mr. Barrett, (Mr. Young's assistant at the time.) I consider their complaints to have originated from fatigue and exposure of cold.

ARCHIBALD PASS, C. M.

Barrie, 14th March, 1936,

No. 67.

Copy.

EMIGRANT OFFICE, Toronto, 19th March, 1836.

I have the honour to submit for the Lieutenant Governor's information, a letter from Mr. Thomas I.

Thompson, the person who had charge of the Government property in Nottawasanga.

It appears from Mr. Thompson's statement that there are sixty-six acres of wheat (sown last fall) belonging to the Government in that township, and thirty-six acres of land, upon which the timber has been chopped at the Government expense.

I would beg to observe unless that which has been cleared is seeded down with grass seed, that in course of two or three years, from the rapid growth of Young timber, commonly called underbrush, it will be attended with nearly as much expense to bring it into cultivation as an equal quantity of forest land; and that it is still more difficult and expensive to reclaim land which has been chopped, if the seasecond growth of wood be permitted to spring up.

I beg therefore to recommend that the indigent emigrants who were sent to Nottawasauga in 1834 and 35, and who are greatly in want of work at present, may be employed to log, fence, and put into crop the 36 acres of land above mentioned; and also to seed down with Timothy grass-seed the whole of the 102 acres of land which has been cleared by the Government. The wheat as well as the spring crop will have to be harvested and thrashed next

As there is no prospect of obtaining any returns either from the sale of the cleared lands or of the crops, which will justify any further outlay by the Government in Nottawasauga, it would be well to state distinctly that the Government does not intend. to give any further employment after the work now in progress is finished, so that the settlers who may locate in the township may be informed that they must depend upon their own resources, and not as heretofore look to the Government for assistance. Should this suggestion meet with His Excellency's approbation, I beg that I may be authorised to issue a notice to that effect. I have annexed a statement shewing the probable expense which will be incurred in completing the work on the Government clear-And as Mr. Thompson has been in charge of the settlement, I beg to recommend that he may be employed to superintend the work, and that he may be paid for this 3s 9d a day, currency, until it is finished

In order to give His Excellency all the information in my power, I also annex a copy of my report to Sir John Colborne in June last on the state of the settlement in question.

I have the honor to be,

Your most ob't. humble Serv't. A. B. HAWKE. (Signed)

JOHN JOSEPH, Esq. Civil Sccretary.

No. 68. BARRIE, 19th March, 1836.

I hereby certify that Mr. Young repeatedly employed me to go to Nottawasauga with my team to take the Dutch settlers to Barrie, and although Mr. Young sent his servant on different occasions to apprize them of it, they refused to go, at the same time Mr. Young said to me that if I choosed to take them to the Holland Landing I should be paid for it, to which they the Dutch settlers refused.

> I am, Your most obedient. ALEX. WALKER.

Mr. Perry, M. P.

No. 69. EMIGRANT OFFIGE, TORONTO, 23rd March, 1834.

I have the honor herewith to transmit to you, copies of all the documents in this office respecting the employing, locating, and subsisting indigent emi-grants in the township of Nottawasauga, agreeably to the instructions from the Lieutenant Governor of the 11th inst.

I have the honor to be

Your most obed't humble serv't. A. B. HAWKE.

JOHN JOSEPH, Esq.

No. 70.

EMIGRANT OFFICE, Toronto, 23rd March, 1836.

Sin:

The accompanying letters and reports from No. 1 to No. 25 inclusive, will show the object which the late Lieutenant Governor had in view in employing indigent emigrants in clearing land in Nottawasauga, viz: to ascertain whether the sale of the improvements made by them, and the increased value thereby given to the Crown Lands in the vicinity of the settlement, would cover the expenditure.was an experiment for the success or failure of which I am in no-wise responsible. The instructions given will prove, that, as far as the government was concerned, every measure which humanity could suggest was adopted, and that if there has been any privation or suffering beyond what may be considered inevitable in such undertakings, it has not been the fault of the government.

I also beg to call the attention of the committee to the extracts from my letters to Mr. Ritchie, as well as to my letter numbered 47 respecting the road lately opened through Thora and Eldon, as they will explain the cause of any delay in obtaining payment by persons having claims on the government. Mr. Ritchie seldom acted on the instructions given him, and after having incurred expenses greatly beyond the amount contemplated, it became necessary to make some enquiries before a warrant could issue.

My report on the settlement in June last will show that the object of my visit to Nottawasauga was merely to assertain whether an immediate stop could be put to the expenditure, and not to inquire into the complaints made by the settlers against Mr. Young. Indeed, there were no complaints of that nature existing at the period of my visit, that I was aware of; and Mr. Meyerhoffer had been sent by the government more than three months previous thereto, for the express purpose of reporting to Sir John Colborne on the subject.

I have the honor to be,

Sir, Your most obedient, Humble servant,

A. B. HAWKE.

PETER PERRY, Esq. M. P.

N. B. With reference to the expenditure, it will be seen by the vouchers that it is impossible for me to separate the expenses incurred on the Sunnidale road, and the road made to the settlement, from the sums expended in clearing land in Nottawasauga.

A. B. H.

No. 71.

EMIGRANT OFFICE, TORONTO, March 28th, 1836.

SIR:

I beg to transmit to you herewith the copy of a letter addressed by me to the Lieutenant Governor respecting the employment of the indigent emigrants located in Nottawasauga on 5 acre lots by the government.

His Excellency has been pleased to appoint you to superintend the work, and your pay is fixed at 3s. 9d. per day from the 1st April next, and to continue until the same is completed.

As the settlers have lately petitioned His Excellency to be employed by the government, you will please to acquaint them with the contents of the letter The object is to give employment above mentioned. to the heads of families, and as the prices in the estimate are higher than what is charged for similar purposes in older settled townships, you must not in any instance exceed the sum therein named without first applying to me for authority to do so.

If there is more work than the heads of families can perform you may employ a few of the young men, taking care to give the preference to those belonging to the largest and poorest families.

You had better send me a monthly statement, and in order to insure regularity I have sent you 12 blank returns which you will please to fill up agreeably to the prescribed form. You may also draw on me monthly for the amount expended, including your own pay, and write to me from time to time acquainting me with the state of the settlement.

I wish you to give notice to all persons who may apply to you for information, that the government does not intend to give any further employment after the work now in progress is finished, so that the settlers who may locate in the township may be informed that they must depend npon their own resources, and not as heretofore, look to the government for assistance.

I am.

Your most obed't servant,

(Signed)

A. B. HAWKE.

Mr. Tho's I. Thompson.

The amount £699 2 6 charged against the emigrants for which they have made no return in labour, includes the expense of building their shanties, medicines, medical comforts and attendance; seed wheat and potatoes, and transport of their families and baggage, &c. &c. T. H. C. YOUNG.

TORONTO, 15th April, 1836.

I would beg leave to make a few remarks upon the charges brought against me before the Hon-ourable the House of Assembly by Edward Ken-

To the first charge that I allowed the Government stores be wasted and exposed to the mercy

of the settler...

I would beg leave to call your attention to the very difficult situation in which I was placed, owing to the late season of the year at which these settlers were forwarded to me for location in a new Township thirty-three miles distant from a settlement, and where there were no buildings of any description fit for the reception of these stores, excepting a log shantie hastily put up for that purpose at the nearest point in Sunnidale to the place intended for location, and which I admit to have been very insecure, but which, under the circumstances, it was out of my power to prevent. I have further to state, that I was held personally responsible for all these stores, &

have paid for them to the Government as the accounts will shew, and that whatever loss occurred was sustained by me, which I also admit to have been considerably more than I anticipated.

To the second charge of habitual drunkenness and inattention to the duties of my agency-

assertion of habitual drunkenness I consider to have been disproved in evidence, so that I do not consider it necessary to make any further observations.

To the other assertion, that I was inattentive to duties of my agency. I have to remark that, unless when called to Toronto by an order from the Gov-ernment, I never left the settlement excepting on urgent business, which occured very frequently; but I am not aware that the settlement suffered any injury from that cause.

Another charge is, that I ill-treated and starved the Germain settlers.

I have to state that according to my instructions personally communicated to me as well as to my brother, by Sir John Colborne, and also by letter, I was not at liberty to supply any emigrants with provisions unless for work done except in cases of sickness. And when it was made known to the Government that they refused to work, my orders were to send them away, & I was instructed to supply them with sufficient provisions for their support as far as the Holland Landing, or to any other place they might choose to go, but by no effort of mine was I able to induce them to remove, until I was under the necessity of striking their allowance, and it was with the greatest difficulty that I got rid of three or four families in the month of February, 1835. The Rev. Philip Meyerhoffer, a German clergyman, residing in Markham, was sent to Nottawasauga towards the end of March in that year, with instructions to remove these emigrants, in which he was unsuccessful, and it will be seen by reference to the report made by him on his return to Toronto, that they only complained of having wanted provisions on two occasions for twenty-four hours.

With regard to the expenditure I beg leave to state, that when it is considered that a number of emigrants, varying from 300 to 350 persons, were sent into a new and remote township, the amount will not be considered as very great, and when the amount of labour done by them is deducted, and also the amount expended in making 9\frac{3}{2} miles of road with causways and bridges, building the Government House and store house, and the improvement of the Sunnidale road, &c. &c.—it will be found that a sum short of \$700 has only been expended on these sum short of £700 has only been expended on these emigrants, for which they have made no return in labour, amounting to little more on an average than £2 a head; nearly all of them were entirely destitute when sent to me, and I feel satisfied, when the Nettawasauga settlement is compared with similar experiments made in Sunnidale, Adelaide and Warwick, it will be found to have cost considerably less than either, and I feel confident that whenever a similar settlement is made it will be attended with the same result, as it would be Eureasonable to expect that emigrants newly arrived in the country and totally unacquainted with chopping and clearing land, should maintain themselves and families by that description of labour. It is to be hoped, however, that the money expended will not ultimately

be lost to the country, as there can be but little doubt that so large a number of settlers being thrown into the township, will lead to its settlement, and that the amount will ultimately return into the hands of the Government by the additional value given to the Crown Lands.

Since the commencement of this undertaking I have been continually disgusted and annoyed by a series of petty persecutions which, added to the arduous duties of my situation, were sufficient to have broken down a more robust constitution than mine; & it cannot have escaped the notice of the Hon. Committee the malignant and vindictive spirit evinced towards me by my accusers, and most of the witnesses brought against me which I think is sufficiently proved, by the discrepant and very contradictory nature of their evidence.

I had several very important witnesses in waiting to be examined, but as the Committee did not sit atthe time, and as these witnesses could not longer remain; I was thus deprived of their testimony.

It will be seen by the letters of introductions laidbefore you, that Mr. Ritchie was ordered to assist me in carrying the views of the Lieutenant Governor into effect, but I am sorry to have it to say that he was oftener employed in plotting conspiracies tothwart and undermine me, than in attending to these instructions.

I received my appointment immediately from Sir John Colborne in consequence of a recommendation from Sir James Kempt, who was pleased to express his confidence in my integrity, and I can, if required, produce persons of the highest respectability who can testify that I have heretofore conducted myself with integrity and zeal in all the duties and relations of life to the utmost of my ability.

I have the honor to be;

Sir,

Your most obedient

Humble servant,

H. C. YOUNG.

i gar in Maj kusi

PETER PERRY, Esq. M. P. P.

REPORT

QN

THE PUBLIC LANDS SOLD FOR MILITARY PURPOSES,

WEST OF THE CITY OF TORONTO;

ON

The City and County Mospital;

AND ON THE

MEDICAL BOARD.

The Committee to which was referred the petition of Dr. Latham respectfully report:

That a letter signed by John Strachan, John B. Robinson, W. Allan, Gorge H. Markland, and John H. Dunn, as Trustees of the Hospital, was addressed to the Lieutenant Governor's private Secretary, on the seventh of March last with documents containing part of the information required by the address of Your Honorable House of Feb'y last, numbered one to six inclusive.

- No. 1. Is a report on the Hospital by Archdeacon Strachan, dated 20th February 1835.
- No. 2. Is a statement of monies paid to the Trustees of the Hospital and Park Reserves for sales and rents of lands from 1819 to 1836, the amount being £4,978 to 21—the details of the particular properties sold or leased are withheld.
- No. 3. Is a statement of payments by the Trustees, within the same period; among the items are \$53 for loss on Kingston Bank notes; several sums paid to James Nation in his capacity of Secretary; £494 13 6 last year for the erection of the Don Bridges; £400 for cottages for emigrants; several sums paid the Treasurer, of the expenditure of which no account is given, amounting to about ten thousand dollars; about £50 for surveying; and \$16103 charged by the Treasurer as his per centage on the amount of Park Lots sold by him, amounting to \$32,215.
- No. 4. Is a statement of monies received and paid by the Treasurer from July 1819 to February 1836; the payments are £10,764 15 91, exhibiting a balance due Mr. Nation of nearly £31. Some of the items are building the Rospital £3052; bedding, &c. £250; bought 150 shares of Bank Stock, £1,876; Treasurers allowance £155; Bank Stock and Government Debeatures £375; paid querierly expenses of Hospital, £100, £200, or 300, as the case may be, but no detail shewing what these expenses consisted of, or to whom the money was paid. Such accounts as these

beget suspicion and distrust. If all is right what is the use of concealment? Some of the receipts under this head, are £4,444 from S. McGillivray in 1821: dividends, interest and premium on Bank Stock £2,527; bazarr fund £80; provincial grants £100, £100, £150, and in 1833, £500.

No, 5. Is the annual return of the Hospital up to February last.

No. 6. Is a schedule of lands appropriated for the support of the Hospital under orders in Council. These consist of six acres; the scite of the Hospital five acres, West of Church Street—386 acres, the Government Park, East of the City—one acre on King Street, corner of York Street.

It appears that part of these lands have been sold; but what part, the Trustees did not think proper to state.

It appears by an extract from a minute in Council of the second of December, 1824, that such has been Dr. Strachan's eagerness for worldly riches that he and the Executive Government have not hesitated to plunder the Hospital of its endowments, and the poor and distressed of the benefits it would have conferred on them, by applying for the Old Gaol ground one acre, and the South East acre of Hospital Square, near the Rev. Gentleman's church. These have been granted to the Doctor as an addition to his glebe; the jail ground was given over to the church even before the prisoners were out of it. It is sufficient for Your Committee to state these facts they stand in need of no comments.

Your Committee have not had leisure to read with due attention all the papers relative to the Medical Board, and having reference to the treatment of patients at the Hospital, which were sent down by His Excellency to the House during the present Session, but questions have been asked of the petitioner and several other medical men relative to these documents, and their opinions are hereto annexed.

The documents transmitted by His Excellency relative to the commons or pleasure grounds to the West of the City are as follow:

- 1st. A letter from Capt. Bonnycastle of the Royal Engineers, states that these commons were reserved for military purposes—that Sir John Colborne had proposed to and obtained the permissson of the Board of Ordnance to sell so much of the military reserve as is situated East of the Creek.
- 2d. A letter from the Surveyor General's Office to Mr. Joseph of the 27th February last, relative to the same reserves.
- 3d. A letter from the Commissioner of Crown lands to Mr. Joseph with accounts of sales of and payments for these grounds.
- 4th. Accounts of cash received by Mr. Robinson, Commissioner of crown lands, for lots sold, £4431 14s. 4\frac{1}{4}d.
- No, 5. Shews the appropriation of the above sum of £4431 I4s. 44d. part for surveying, part for fencing the reservation for the future Government House; £240 for a road in front of the lots sold; and the balance £3291 into the hands of the Receiver General.
- No. 6. Statement of the sales of the town pleasure grounds, or military reserve £6-949 10s.
 - No. 7. Amount sales of two water Lots £252.

- No. 8. Is a despatch from the Earl of Aberdeen to Sir John Colborne, authorising two-thirds of all the proceeds of the sales of the city commons or pleasure grounds to be employed in the building of a new garrison or barracks for the troops stationed here; and declining to allow the remainder for the building of a new Government House, also other letters to which that despatch has reference.
- No. 9. Is a despatch from Lord Glenelg to Sir John Colborne, dated the 30th of November last, in which his Lordship makes some observations on the value of the commons about to be sold. Their value is estimated at £65,900 if a certain pier is erected, and only at £54,425 if it is not erected. It would appear from the correspondence that it was intended to lay out the greater part of these large sums, to be raised from the industry of the Colonists on barracks and fortifications for the troops to he sent here.
- No. 10. Is a petition for ground for a catholic church out of the military reserve, signed by Bishop McDonell and others, the executive Council recommended the grant as it would raise the value of adjoining lots.

No. 11. Is an order in Council of 3d June 1817, dedicating the reserve in the neighborhood of the old French Fort to military purposes.

At the late period of the session at which the attention of your committee was called to the matters contained in these documents they were unable to extend their enquiries more minutely; and they annex the documents to their report, as the information is important, in the hope that other proceedings will be had thereon in a future session.

All which is respectfully submitted

JOHN McINTOSH, Chairman.

Committee Room }
April 18th 1836. }

APPENDIX TO REPORT.

Committee Room, 11th April, 1836.

Committee met.

Messrs. McIntosh, Chairman, Gibson, & Mackenzie.

The petitioner, Dr. Latham, and three other Medical gentlemen, were permitted by the Committee to peruse the Hospital Report and accompanying documents—and Dr. Latham was asked whether he had any observations to make for the information of the committee, when he handed in the following paper:

"The report is drawn up in a manner calculated to impress the members of the Assembly with an idea of the great benefit which the public derives from the institution, with a view, I presume, of inducing them to grant an annual sum towards its support; but previous to their doing so two things are worthy of their most serious consideration: the first is whether the necessity of making the applica-

tion may not be in a great measure removed?—and the second, whether the funds already at the disposal of the committee have been applied in a manner likely to confer upon the public the greatest possible advantages?—Upon both these heads I shall make a few observations.—With regard to the first, in my opinion the benefit of the institution might be greatly extended without the necessity of applying to the Provincial Legislature for pecuniary assistance, merely by placing the institution upon the same footing with all similar institutions in the old country; in a word granting it a liberal constitution by doing which I am satisfied that the annual subscriptions will far exceed the amount of any grant that has hitherto been made by the Assembly towards the support of the institution; so far back as the year 1830: the Trustees seem to have been aware of the necessity of adopting such a course, and it appears that they caused to be printed a pamphlet entitled, "Rules and regulations proposed for the government of the General Hospital," in which pamphlet provision is made that persons contributing twenty five pounds to the funds of the Hospital, or £2 10 annually, may be chosen governors or directors;" also "persons contributing £10 to the funds, and

£1 5 annually, shall be entitled to vote at the election of governors." The rules further add, that governors and subscribers may be entitled to recommend patients to the extent of their subscriptions at the rate of one shilling per diem for each patient, thereby offering an inducement to persons to become subscribers, which I have little doubt would have the effect of increasing the funds of the institution considerably, and certainly of securing to it the confidence of the public, for each and every subscriber would then be more or less interested in the institution and aware of its effects so far at least as the patients recommended by them were concerned.

In a document signed by the president of the Medical Board it is asserted, Ibelieve, that the foregoing rules and regulations have served as a guide for the management of the hospital; but it has fallen within my own personal knowledge that they, so far as relates to the election of governors and officers, &c. have not been adopted-for wishing to become eligible as a governor, & going for that purpose to deposit, in the hands of the Treasurer, the sum of £25, as prescribed by the rules and regulations, he informed me that he was not authorised to receive the same; the rules and regulations then have not been adopted, nor have they been acted upon in toto, and it is not my wish that they should, for I consider them in some respects deficient, in others calculated to sanction great abuses. They are deficient in not providing for the election of medical officers, which officers, in my opinion should be elected as they are in the Royal Infirmary at Edinburgh (that is, periodically) by the directors; the consciousness of having to perform which important duty would induce many to become directors. In this young province where the Hospital in this city is the only one at present in operation, I would recommend that a sufficient number of medical officers be chosen annually by the directors from the great body of practitioners throughout the province, this would have the effect of greatly extending the benefits of the institution; for an Hospital is beneficial to the public not merely in relieving the afflicted, but also in affording the youth of the country an opportunity of becoming acquainted with the rudiments of their profession, and the practitioner a field for studying the diseases incident to the climate: the funds of the institution might be still further increased, and the benefits derivable from it extended, if provision was made that any amateur or pupil should be entitled to walk the wards upon paying a small sum annually. I by no means think that pupils should be entitled to benefit by the instructions of the medical officers gratuitously. I consider it high time to talk of that when the medical gentlemen commence giving clinical lectures; the Rules set forth, moreover that more than twenty paupers cannot at any one time be provided for in the institution, and that all patients over that number must pay not less than one shilling per diem, the object manifestly is, to provide medical at-tendance for servants and poor individuals who cannot be altogether regarded as utterly destitute, but the effect may be that medical officers may bring their patients in from the country; provide them with comfortable lodgings and attendance in the Hospital at the rate o one shilling per diem-and thus enable them amply to remunerate their doctors for their attendance. Thus then I say that the rules if adopted are calculated to sanction great abuses. I do not mean however to object to strangers in good circumstances being admitted into the Hospital—it is usual in all Hospitals with which I am acquainted—but then they are made to pay proportional to their means into the funds of the institution and not into the private purses of the medical attendants.

I now proceed to consider whether the funds al-ready at the disposal of the Trustees have been judiciously expended or not-in other words whether the public have derived from the institution the greatest benefit that its resources would admit of. The report says that the number of patients daily attended in the Hospital averages between forty and Sixty and Seventy. I suppose that this means that throughout the year the smallest number of rationts in the Hospital at one time amounts to forty,—the greatest to seventy. It also says that the total number of patients admitted within the year amounts to five hundred and thirty—taking then the average number of patients daily on hand at fifty-five, and the total number admitted during the year five hundred and thirty, it is plain that the average number of days that each of the patients remains in the Hospital consuming the funds of the institution amounts to thirty-cight days less a fraction, which at the rate of one shilling per diem, costs the institution £1 18s., for each patient, many of whem left the Hospital incurable and many more merely relieved. The report is drawn up in so loose and untechnical a style that it is impossible for any person to arrive at the most distant idea of the benefits which the public have derived from the institution or in what manner the funds have been disposed of. The report, for instance, in enumerating the diseases mentions diseases of the brain, without stating what those diseases were—for aught we know they may have been merely nervous or bilious headaches—and subsequently we have in the column Delirium tremens, Intoxication!!! Epilepsy, concussion, all of which surely are diseases of the brain—again diseases of the lungs and subsequently in the column Catarrh—diseases of the liver, and subsequently jaundice—diseases of the bowels and subsequently Diarrhea, Disenteria, Piles, Colics, &c. Wounds (the nature of which is involved in mystery) they may have been cut fingers, so that it is quite impossible to arrive at any conclusion respecting the mode in which the institution is conducted. This much however is plain that the funds of the institution have been expended in treating patient labouring under diseases which never should have been admitted into the Hospital, thus, generally speaking. Epilepsy, Piles, Gonor-rheea, Cohes, Catarrh, &c. Moreover, according to the calculations which I have made above (which I believe to be correct) we must allow to each patient on an average, 38 days—a time far exceeding that averaged by patients even in Hospitals solely occupied by fever cases.

Referring to the Report of the Managing Committee of the House of recovery in Cork-street, Dublin, for the year, 1827—in which year 10612 patients were admitted, I find that the everage number of days for each patient is 111 days. Now when we compare the character of fever cases with the character of those diseases mentioned in the report, it is evident that the everage number of days in

the latter should be much less, and consequently that the funds have been in this respect uselessly expended.

GEO. A. LATHAM, M. D. JAMES SINCLAIR EGAN, M. B. WILLIAM C. GWYNNE, M. B. WALTER TELFER, Surgeon.

Hospital, Toronto, 18th April, 1936.

The members of this committee must from their local knowledge be well aware of the frequent calls that are made upon the community in this city for charitable purposes, and how readily, and with what munificence, they have, in all instances, been answered. The Trustees of the Hospital, we believe have been actuated by a sense of the oppressive burthen which the support of a numerous pauper population inflicts upon the inhabitants in withholding any appeal to them for pecuniary aid as long as it is possible to continue its beneficial operations without such assistance.

The rules and regulations for the general government of the Hospital, which were printed in 1830 have not therefore been adopted so far as regards the raising of contributions, and the choice of directors. They have been the guide as to the admission of patients and the internal economy of the institution and no further, and so it is stated in the report. Nearly the whole of the patients admitted have been paupers, for it appears by the Steward's book that for the last year the sum of £4 4s. 6d. only, has been received from pay patients.

These paupers are many of them in such an abject state of misery and want, and their diseases so frequently the result of that condition, that they often remain in a tedious stage of convalescence, requiring a long stay in the Ho pital after the actual disease has vanished.—Many also of this description return a short time after their discharge from the Hospital in consequence of exposure to the causes which rendered it necessary to admit them.

It must be recollected that their is no house of industry, or asylum of any description, for the destitute, yet established, where the recently recovered pauper might be sheltered and provided for until he could obtain employment. These circumstances will readily account for the long detention of patients in the institution, and for the numerous relapses and repetitions of admission of the same person during an inclement season. The rule, then, which limits the pauper patients to twenty, it is evident, could not be complied with; and as it appears that the sum of \$\mathscr{L}4\$ 4s. 6d. only was received during the last year for pay patients, the effect has not been "that medical officers have brought their patients in from the

country and provided them with comfortable lodgings and attendance in the Hospital at the rate of a shilling per diem, and thus enabled them amply to remunerate their Doctors for their attendance."

If it is an abuse of this public institution that the medical officers of it are selected from the experienced and respectable members of the profession, this is an abuse that exists in all the Hospitals in Britain, we believe on this continent. The system of annual elections we are totally unacquainted with. In the great metropolitan Hospitals, where such men as Sir Astley Cooper, Brodie, Earle, and Lawrence, have officiated, the annual election is unheard of; they are appointed for life, or for as long as they choose to serve; and it is by such nominations that the public confidence, and the poor man's hopes, under disease, are sustained.

The funds of the Hospital might be augmented by admitting students to visit the wards at stated hours with the attending medical officers upon the payment of a fee. But this admission of students upon such terms would be productive of a very trifling revenue at the present period. In the event of a medical school being established in the city the clinical practice of the Hospital might become subservient to the purposes of instruction, and in that case the city would become the focus of a numerous assemblage of students whose fees for admission might become of considerable amount.

The committee no doubt must have been a good deal surprised, though not deceived, by the criticism on the Hospital report, which is described as so loose and untechnical. This report was drawn up loose and untrunnical. to convey as full information to the Legislature as the nature of a numercial return can afford, and therefore the more simple it could be made to appear the better it would be deemed to answer the purpose of its production. We shall not therefore consume the time of the committee by canvassing the propriety of introducing a column for intoxication, and another for one of its effects, Delirium Tremens! nor in arguing on the distinction of Catarrh from diseases on the lungs; or jaundice from those of the liver; for the fact must be familiar to the committee that frequently in neither case are these complaints identical with affections of the chest or liver.

The whole weight of the question which can interest the committee appears to rest on this one point. Has the Hospital been successfully and economically conducted? Those who are capable of judging, viz: the Trustees, admit that it has! The Hospital surgeons are satisfied with their approbation, and regardless of all vituperation and calumny that may be heaped upon them they will continue to pursue the steady course of their duty to the institution; a course that they are well assured will not fail to secure to them the favorable consideration of the Honorable the House of Assembly, and of the public generally.

C. WIDMER, Surgeon.

REPORT

ON THE

PETITIONS RELATING TO SURVEY

OF THE

TOWNSHIP OF NORWICH.

REPORT of the Select Committee to which was referred the Petitions of Stover and others, Lossing and others, and various other Petitions of the Inhabitants of the Township of Norwich:

To the Honorable the House of Assembly.

The Committee to which were referred the several Petitions of sundry inhabitants of the Township of Norwich, in the County of Oxford—consisting of that of Stover and others, Lossing and others, Lawson and others, Lancaster and others, Cromwell and others, Tomkins and others, Sackrider and others, Palmer and others, and Wilson and others, upon the subject of the lines and roads of said Townships. Beg leave to report:—

That the evidence and documents heard and produced in the case, are of that nature that your Committee deem it necessary, in order that the whole matter may be brought fairly before your Honorable House, to append the same together with copies of the principal petitions, to this Report.

Under all circumstances, your Committee recommend that a Bill be passed appointing Commissioners to examine, on the spot, into all the matters of fact relating to the case, with power to settle the same equitably between the parties, and have prepared a draft which they respectfully beg leave to submit for the adoption of your Honorable House.

CHARLES DUNCOMBE,

Chairman.

Committee Room, Commons House of Assembly, 30th March, 1835.

To the Honorable the Commons House of Assembly, in Provincial Parliament Assembled.

The Petition of the undersigned Inhabitants, Freeholders, Leaseholders, and occupiers of Land in that part of the Township of Norwick, called the Wilcox Purchase.

MOST HUMBLY SHEWETH,

That in or about the years 1811 and 1812, Peter Lossing and others, settled in Norwich, having purchased of William Wilcox 15,000 acres of land. This land lay scattered in unsurveyed, but described

lots, over the East half of the Township, having Crown and Clergy Reserves interspersed through the purchase.

They found the Township but partially surveyed—out of 12 concessions they found the 1st, 3rd, 5th, 7th, 9th, and 11th lines run; and the 2nd, 4th, 6th, 8th, 10th and 12th omitted, with posts standing on the Eastern Township line, to meet the points where they should commence.

Situated as the Company then was: no time to lose, and Surveyors at a great distance, they agreed that Peter Lossing should survey the omitted concession lines, and designate the lots constituting the purchase. Lossing consulted the then Surveyor General, who, in the presence of witnesses, signified his approbation of the undertaking.

It was soon ascertained that the middle town or proof line had not exactly halved the township, but that in consequence of some mistake, the part East of the central line, was less than that to the West. And it was also plain from the original monuments on the first concession line, that No. 14, the lot next the proof line, was actually a scant lot. In the North East corner of the township was a block of land, belonging to Mr. McDonald, an absentee, which the company agreed to leave entire and to take the scant lots to themselves. On the 2nd and 3rd concessions, they agreed to make No. 14 the scant lots; and on the fourth and succeeding concessions they agreed to make No. 1, the scant lots, all which appeared to be agreeably to the original survey as far as it could then be discovered, and no law, then existed to prevent this generous procedure in regard to the McDonald block. Adam Stover made choice of Nos. 13 and 14 in the 3rd concession, knowing 14 to be a scant lot

On the Eastern boundary as before stated, monuments, were placed at the points where the omitted concession lines should commence. Between the the post thus planted for the second concession line, and the monument for the 3rd concession-line, was discovered an overplus of 19 chains, while on the middle Town, or proof line, these two concessions contained no more than their complements. Peter Lossing could not feel clear in his views of correctness or honesty, to include all this land in the second concession, in which the ancient posts appeared to

He therefore, from the post set up for include it. the second concession measured the distance of a concession, and thence ran a line intending it as the rear of the second concession, which line being parallel with the Northern boundary of the township, in crossing the East half of the township, intersected the 3rd concession old line, at the proof or centre line. Thus making a gore of about 354 chains in length, with 19 chains for a base, containing upwards of 330 Peter Lossing corresponded with various public officers upon the subject of this gore, who treated of it as Crown land. It has been made subject of consultation with the Governor and Council, who certainly could not have considered the existing deeds to hold it as they issued orders to the Surveyor General for the survey of it, with a view to attach that small strip of it opposite the Wilcox purchase, to the lots in the third concession. Much opposition being made to this by persons living in the first and second concessions; the Governor and Council next recommended to split the gore and divide it between the 2nd and 3rd concessions; and advice was given that the contending parties should each appoint a discreet person to whom a deed of trust of this portion of the gore should be given and by whom it should be appointed to the several lots in these two concessions. This being also opposed by those in the 2nd concession-it was next recommended that the Quarter Sessions of this District should nominate two Commissioners, which was done; and the deed of trust to those Commissioners was at one time in the act of being made out. In 1827, Peter Lossing received a letter from the Surveyor General, stating that the Governor and Council should defer issuing their deed until all the parties were agreed. facts are mentioned, first to shew that the Governor in Council considered the existing deeds insufficient to hold the land in this gore, and secondly, to shew the pertenacious opposition which the opposite party has always borne to every conciliating proposal, when that proposal did not fully accord with their own interested and selfish views.

The inhabitants of the 1st and 2nd concessions have latterly arbitrarily adopted a method of their own—they have in the face of all that is stated above, and in total contempt of the original monuments bounding the first concession divided the gore among themselves by the aid of a Surveyor; and the people of the 3rd concession look on and behold the strong man's magisterial movements.

The survey made as above stated was assented to by the parties. The scant lots (except the one chosen by Adam Stover) were disposed of among the company by casting lots. The 15,000 acres being transferred to Peter Delong and Peter Lossing; deeds of partition were executed between them; and Peter Lossing executed deeds to the remainder of the company, in good faith, they all knowing their boundaries at the time the deeds were given; and in those deeds was inserted the following clause, "As the stakes and lines now stand." The settlement commenced in harmony,—clearings were made,—fences set,—roads wrought,—orchards planted, and buildings erected agreeable to Peter Lossing's survey.

Some time after, Adam Stover found an old monument and got in a licenced Surveyor, who renewed it as the corner between 12 and 13, in the 3rd concession, which gave to Adam Stover full lots. Thus

was the early kindling of that flame, which for some years burned faintly and without much notice, but which has since enveloped the one half of this beautiful township in uproar and confusion.

In or about 1828, Mr. Eliakim Malcolm came in and commenced a general wreck of Lossing's work; working professedly in accordance with the Statute He undertook in the oldest settlements to make sub-divisions between ancient boundaries. He recognized Adam Stover's lot as full; and finding a marked black Ash tree along the same line, he adopted it as the N. E. angle of No. 4, thus throwing the scant lot on the East side of the town, instead of next the proof line, where Peter Lossing had placed it, and made an equalization of lots between those two points. His new lines along this concession shoved far to the East of the first calculations, and make the most desolating work upon the improvements. line between the 3rd and 4th concessions he ran further to the South than where Lossing had run it; which would throw away many years of statute labor and put houses and orchards in the road. He ran a central line between the Northern boundary and the third old concession line, in direct infringement upon the Statute he professed to fulfil; for the monument which bounded the South end of the second concession can still be attested to by many living witnesses, and he made that second concession to commence Nine chains further South than where that old monument stood. This he did in order to divide the gore between the 1st and 2nd concessions, which is certainly wrong, for if the gore is not the property of the Crown, it most truly belongs to the 2nd concession, and no other. There appeared to be another motive in this,-by throwing the bait of interest before the inhabitants of the first concession, the faction enlisted a number of recruits into their service. This partly legal, partly illegal and alto-gether most unjust, unequitable and overbearing procedure, has injured Norwich beyond calculation. For years strife has characterised the place, -man is soured towards his fellow man, -internal public improvements are neglected for want of unison,-philanthropy is lost—patriotism is unattended to—and a gloomy jealousy, cruel as the grave, withers and blasts every proposition that benevolence can dictate for the good of the people.

Your Petitioners would further state that in 1830 a petition was presented to the Legislature on this subject, when at the suggestion of Dr. Baldwin, Peter Lossing desisted from pressing the matter. Mr. Baldwin was of opinion that the law was already sufficient to secure these lines; Lossing as the tenant in fee having a right to survey his land as he pleased. Mr. Baldwin gave Mr. Lossing his writen opinion, concluding as follows:—

"To ascertain this" (i. e. whether Lossing went beyond his power and encroached upon the reserves) it seems most prudent that a government survey be made of those reserves and roads, and instructions might be given from the Surveyor General, that the survey might be made with as little inconvenience to the actual settlers as possible, and such a survey may be confirmed by act of Parliament at a future session."

To which is added the following concurrence, "I agree in this opinion." "M.S. BIDWELL."

"JOHN ROLPH."

Your Honourable House will observe by what follows, that your petitioners now present themselves consonant to the views and opinions of the three authorities above quoted. The report hereafter stated of commissioner Robinson, and the recommendation of His Excellency, makes the re-survey of Peter Lossing's line, now petitioned for, virtually a government survey of the reserves and roads.

In the course of the present year a female minister of the Quakers, touched with the broils that agitated the society, drew a short petitition to the Governor and Council, which was signed by many of both parties. An answer was received from the Government House, in documents, of which the following are copies.

Copy of the Commissioner's Report.

COMMISSIONER OF CROWN LAND'S OFFICE,

Toronto, 10th April, 1834.

" The evils complained of by the petitioners arise " from the circumstance of having employed Peter " Lossing, not a licenced Surveyor, to divide the " blocks, originally surveyed by the Government, into lots. The subject has frequently been brought " before the Council, and the fullest information af-" forded; but the Executive Government had no " authority to settle the dispute between the parties. " I should recommend, as the most effectual way of " amicably arranging the difficulties existing, so as " to prevent law-suits in future, that the parties " should employ a licenced Surveyor to run the " lines and put down the boundaries to correspond " with the views of the petitioners, and assigning to each as near as practicable, the allowance originally purchased, conformable to Peter Lossing's " survey; and having done this, to petition the Le-" gislature to confirm the survey so made. The " usual notice should be given of the intended appli-" cation to the Legislature."

("Signed")

"PETER ROBINSON."

Copy.

GOVERNMENT HOUSE, Toronto, 12th April, 1834.

"SIR,

"With reference to your letter of the 4th inst. I am directed by the Lieut. Governor to forward to you the accompanying copy of a report from the Commissioner of Crown Lands, and to acquaint you that His Excellency recommends to the inhabitants of the Township of Norwich to pursue the course pointed out by the Commissioner."

1 am, Sir,

Your ob't serv't, Wm. ROWAN.

Mr. E. Cook, Post Master, Norwich.

Notwithstanding many of the opposite party signed the petition, which resulted in the above communication, yet they contemptuously rejected the benevolent proposal. Your petitioner hailed it as the harbinger of peace, and proceeded implicitly to follow the course pointed out by the Commission-

er, and recommended by His Excellency. They employed John Arthurs Tidey, a licenced surveyor who, as nearly as practicable, retraced and renewed Peter Lossing's survey, a diagram and notes of which survey will be presented to your honourable House.

To save a township from disgrace—to save many of its inhabitants from ruinous law-suits—to realize expectations honestly formed and justly continued, respecting a survey which is not more irregular than many Government surveys have been—to interpose the powerful hand that can hush the storm, when every other means have failed and will continue to fail—to stop those disgraceful passions and tempers which have already gone great lengths, and to what lengths they may go no man can prognosticate, to do an act at once of justice, mercy and magnanimity, is the prerogative of your honorable House—is a subject worthy the exercise of your Legislative wisdom.—Your petitioners are convinced that nothing but an enactment of your honorable body will save the Township from ruinous law-suits; nothing but that can cut the gordian knot of our difficulties.

Your Petitioners therefore most earnestly pray, that your House will suffer no want of form, no paltry quibble which may be thrown in the way to cause a put off, and a further delay of the settlement of this distracting matter.

They pray your Honorable Body that the renewal of Peter Lossing's survey, in the Township of Norwich, now made by John Arthur Tidey, Deputy Surveyor, be established and confirmed by an Act of your Honorable Bodies.

They pray that should your Honorable Body not see fit to grant immediately, the above prayer, that your Honorable Bodies will magnanimously devote attention to their remarkable and suffering case; dispassionately pass judgment upon its merits: and render them that justice to which they think they have an undoubted claim.

And your Petitioners as in duty bound will ever pray.

Norwich, Nov. 17, 1834.

Your Petitioners aver that their names to this Petition are all made up from Inhabitants of the Wilcox purchase, exclusively. This, they considered the only fair way of Petitioning.—Had they gone among persons no way interested or concerned in this matter, they might have greatly swelled the list of names. This however their opponents have done. And your Honorable Houses unless put upon your guard will be greatly imposed upon thereby.

Signed, Nicholas Lossing and one hundred and nineteen others.

TO THE HONORABLE THE COMMONS HOUSE OF ASSEMBLY IN PROVINCIAL PARLIAMENT ASSEM-

The petition of the undersigned inhabitants freeholders and residents of the Township of Norwich.

MOST HUMBLY SHEWETH,

That your Petitioners have heard with deep feelings of repugnance, that it is the intention

of a certain party of persons in this place, to make an application to your Honorable House for an enactment to lay the allowances for road on the North side of the concession lines and on the West side of the Middle Town or proof line; and the said applicants state, at the same time that such an enactment would be agreeable to the original survey of this Township.

Your Petitioners without wishing to draw the notice of your Honorable Body to the absurdity of making an enactment to establish a matter, which by their saying, is agreeable to the original survey, would be already the law of the land without the necessity of an enactment, would go to declare that the proposed application is but a continuation of that strife and resistance to good order with which a turbulent and factious party has for many years past tormented this Township.

That your Petitioners are prepared to prove at the Bar of your Honorable House, that the original Government survey of this Township placed the lines in the centre of the allowances for roads.—Colonel John Bostwick, who assisted Mr. Hamley, the first surveyor of this Town, in the year, 1799, together with a cloud of witnesses, can fully establish and settle this question. The original monuments pointing out the road to be 50 links on each side the lines, can be fully proved by many old settlers; among whom, are actually many of the factious party; and upon this proof the Court of King's Bench made a discision in August last, in a case we beg leave hereafter to mention.

That the first statute labor in the Township was done upon this principle, and the whole of the line between the 4th and 5th Concession,—a distance of nine miles, has been opened and wrought upon this plan:—Buildings erected, fences set and orchards planted:—So that the grant of the Petition of which they have given notice would be attended with incalculable injury to inhabitants living on the North side of this line; throwing the Methodist Meeting House, two Stores and many dwelling houses and gardens entirely in the public road.

That divisions in opinion about the place of the roads waxed warmer from the year 1828, when Eliakim Malcolm, Surveyor, was invited into the Township, to make a general ripping up of surveys, which had many years before been made by Peter Lossing, of a large purchase on the East side of the Township of which the said Peter Lossing was at the time of his survey, the tenant in fee.—The said Surveyor Malcolm aiming to fulfil the prescriptions of the Statutes of 1818, undertook to make an equalization of lots between ancient Boundaries, but in his zeal to accomplish his object, he neglected to avail himself of the evidence which he might have had respecting the ancient survey, and inconsiderately determined the road to be West of the Middle Town or proof line, and North of the concession lines.—It would be an impeachment to Mr. Malcolm's good sense, to think that he has not since been convinced of his error; as he acknowledged in August last, in the witness box, at the Court of King's Bench; that the Concession lines of Norwich, might be in the centre of the allowance for road; but as he has in his subdivisions of Lots on the East side of the Township, worked upon the above mentioned

principle, and also guaranteed the stability of his lines, he knows well that disappointments will arise in the minds of his employers, and his work have to be altered, provided the plain law should now take effect among them. And this is the only ground upon which your Petitioners in the exercise of their best judgment, can account for the warmth with which he attempts to sustain this turbulent party, and his own inconsiderate work.

That in the year 1832, the first bold and effective move was made to carry an unrighteous cause by force and in the face of law. Gilbert Stover removed his fence which had been two rods distant on the East side of the middle town line or proof line, into the travelled road, as near to the line as the bridges and causeways would permit him. His neighbors remonstrated to no purpose. He was afterwards complained of to the Magistrates in the Township, but they not feeling clear in their duty dismissed the Thus situated these persons have presumed to trample upon the laws, and to violate the good order of society, under the presumption that there was none hereabout capable of calling them to an account. Matters lay thus to the grief of the well disposed, when a complaint was made before the Grand Jury, and Stover was found guilty of a nuisance on the public high way. This misguided man buoyed up by his party, still continues to dare the Laws, still continues his fence in the same place in despite of all the remonstrances of his neighbors and the warnings of the road master.

That your Petitioners wish nothing more than the plain law, in this case, should be fulfilled in making the lines the centre of the road, this would at once put the west half of the Township at rest, and remove every uneasiness worthy of notice, and by granting the Petition of the Partizans, a great portion of the West half of the Township will be thrown into derangement.

That your Petitioners, with unmingled feelings of regret, cannot withhold the fact from your Honorable Body, that the most plausable professions of ingen-uousness are resorted to by the party against whose proceedings your Petitioners remonstrate. Where the influence of this combination has extended, and interest not otherwise intervened, they have worked the roads upon their own plan; and such contend for the roads to go North of the lines; but where many of their adherents live on the lines, which their interest has led them to assist in opening and working according to the old and lawful principle, such cry loudly for a law to save the statute labor, and to lay the roads as they have been partially worked. new movement of the party is entirely at variance with the notice which they have given in the Gazette. It is an imposition, inasmuch as they might as well make application without any notice at all, as to make it contrary to their notice. It is a proceeding palpably dictated by selfishness and policy. It is nothing more than an artful contrivance to get signatures to their petition, to accomplish one great aim : which in respect to roads, more than all the rest, is to throw the allowance for road on the centre line of the Township, all on the West side of that line. In this new movement of the faction, there is inconsistancy and confusion. Granting this—an anomalous resurvey of the Township will become necessary, which, from the present situation of the place, and

the disposition of the people, it would be utterly impossible to perform, with the most studious regard to equity, so as to produce conciliation and satisfaction. And the party well know this to be the case, whatever plausable impression they may seek to infuse into the minds of your Honorable House:

Since Mr. Malcolm's surveys, roads have been opened and partially worked on the North side of the Concession lines, but generally speaking, no inconvenience will follow in deranging buildings, &c. by placing the roads on both sides the lines, except for a small space on the Ninth Concession line; where in one only place a few buildings have latterly been erected near the South side of the line, which buildings have many of them been built within the present year, in a pertinacious and daring manner, even while the above named suit was pending; and it remains for your Honorable House to say whether the smaller evil must not give way for the greater good.

The Petitioners therefore pray your Honorable House to discountenance the gross attempt to cause your Honorable House to make a law to establish what unreasonable men call already lawful; but which is clearly contrary to law—contrary to the earliest conceptions of the settlers—and contrary to the present wishes of peaceable men.

The Petitioners also pray your Honorable body to make an act declaratory of the law in this case upon the clearness of which, the Court of King's Bench, at London, has already made a solemn decision.

And your Petitioners as in duty bound will ever is species with it was been a Pray.

W.M. LAWSON;

and 124 others.

Norwick, 17th Nov., 1834.

and the following the property of the property of the color of the col

To the Honorable the Commons House of As-SEMBLY IN PROVINCIAL PARLIAMENT ASSEMBLED. The undersigned Petitioners, Inhabitants, Freeholders and House-holders of the Township of Norwich.

HUMBLY SHEWETH:

The inhabitants of the township of Norwich have suffered, and are still likely to suffer, great inconvenience from the difference of opinion respecting the road allowances, as laid down in the original survey of the Township, from which difference, vexatious and ruinous law-suits bave arisen, and more are likely to arise, without the intervention of Your Honourable body. By the evidence of those who employed Hamley, the original surveyor, ten years after the first survey of the Township, Hamley laid the road allowance in rear of the lots and front of the concession lines, and west of the middle centre town line. Lewis Burwell, deputy surveyor, being called to survey, laid the roads in the same manner. Etakim C. Malcolni, Esq deputy surveyor, being called to survey, and being called to survey, and being the lift of the control of the lift of the control of the lift of the control of the lift of the control of the lift of the control of the lift of the control of the lift of the control of the lift of the control of the lift of the control of the lift of the control of the control of the lift of the lift of the lift of the control of the lift of the lift of the control of the lift of the control of the lift of the lift of the control of the loss and lift of the control of the loss and lift of the control of the loss and lift of the control of the loss and lift of the control of the loss and lift of the control of the apprised of the difficulties; previously searched the field notes in the Surveyor General's office, and found no mention of roads, and nothing but the angles

of the lots, and by admeasurement finding the centre town line nearly seven chains east of the centre of the town, and laid the road of the centre line, and in the rear of the lots; and our roads are nearly all worked accordingly and on the front of the ninth concession is a village laid out, and two large houses and one store built, which would cost the owners one thousand dollars to remove.

Your Petitioners respectfully pray your Honorable House to pass an act to establish the roads on the west side of the centre line, and in the rear of the lots, as laid down in the original survey, except the road in the rear of the fourth, and front of the fifth concession, which being a good road, worked each side of the line in front of the fifth. The lots in the fifth concession being longer than the fourth, and buildings erected, we, your Petitioners, respectfully pray you may establish the same,

ou may establish the same,
And your Petitioners as in duty bound will ever

JOSEPH LANCASTER,

and 42 others. To THE HONORABLE COMMONS HOUSE OF ASSEM-BLY OF THE PROVINCE OF UPPER CANADA IN

PROVINCIAL PARLIAMENT ASSEMBLED Respectfully Sheweth:

That your Petitioners observed a notice in the Upper Canada Gazette, signed "Norwich," wherein is stated that the Inhabitants of said Township intend making application at the next session of Parliament for an enactment to establish and confirm the lines, and appointment of lots made, and assented to by the inhabitants previous to the act of 1818;

That some of your potitioners at the first settlement of said township employed Peter-Lossing to survey their lands under the impression that said Peter Lossing was capable of executing the same. and that the said Peter Lossing did in said survey materially stray from the original survey of said township, and in several instances run these lines, governing the same lots, varying from twenty to thirty ro s, and in many instances, paid no attention whatever to the original monuments, whereby, very great alterations were made, and consequently your petitioners had every reason to doubt the legality of said survey. That your petitioners since employed Lewis Burwell and Eliskim's Malcoling regularly licensed Deputy Surveyors, and whose survey corresponds with the assigned monuments and survey of said township, and also with a draft of the same, and with the field notes procured at the Surveyor General's Office, and which survey gave full and

entire satisfaction to your petitioners.

That your petitioners understand it is the intention. of certain individuals; as by said notice above quoted, to apply to your Honorable House: for an acree confirm and make valid the survey of said Peter Lossing? which would very seriously injure some of your petitioners, and take from them's considerable quan-uty of land, besides altering their boundaries, which are now in unison with the original survey. It would also cause a very great loss of statute labor, and would furthermore, create confusion, throughout said township and render abortive any grounds at a regular

survey.

Your petitioners therefore humbly request that your Honorable House will be pleased to take this petition into serious consideration, and not hastily pass any law to alter said original survey, and otherwise do in the premises as your Honorable Body may deem right, and your petitioners as in duty bound will ever pray.

JOSEPH LANCASTER,

and 42 others.

OBSERVATIONS respecting the business in the township of Norwich, by Eliakim Malcolm, Deputy Surveyor.

1st. The lots on the Easterly side of the middle town line only average 25 c. 45 ls., consequently there is a deficiency East of the middle line, of 1 c. 12 ls., allowing no part of the road between Norwich and the gore of Norwich to come off Norwich.

2nd. The lots on the Westerly side of the middle town line average 26 c. 22 ls., making a surplus of 9 c. 68 ls., which, taking those two items together, is a strong argument in favor of placing the allowance on the Westerly side of the line supposed to be run through the centre of the township.

3rd. All the admeasurement which I have made (from original monuments) in the course of my practice in the township plainly shews to me that it was originally intended for the allowance to be on the Westerly side of the line.

4th. In a conveyance dated 4th April, 1816, Peter Lossing conveyed the North half of lot Nos. 13 and 14 in the 3rd concession to David Nichol; -in that deed Mr. Nichol's deed binds him on the middle town line, and gives him the full width of two lots as laid down in the original survey.

Note.-Mr. Lossing at that time certainly must have known where the road allowance was; if he did, it does not seem reasonable that he would deed part of it to Mr. Nichol, which I think argues strong in favor of putting the allowance on the Westerly side of the line. Here I beg leave to refer you to the affidavit of Joshua H. Corbin, who particularly mentions the situation of the stakes on the line in front of the township, where the middle town line intersects it.

I am fully of the opinion that there would be a saving of labour by throwing the road on the Westerly side of the line. The road is worked partly both ways, but the most part of the labor is put, allowing the road to be on the West side of the line. Land Bright Stranger Control

CONCESSION ROADS.

1st. In all the Townships in which I have practised—surveyed from the year 1819—I never knew an instance of the line being in the centre of the road, neither does it look reasonable to me that a person's governing post, or monument, should be in the centre of the public highway.

2nd. The Concession roads (with the exception of the road between the 4th and 5th Concessions) are all worked, allowing the road to be on the North side of the line run in front of the concession.

3rd. The road between the 4th and 5th Concessions is principally worked on each side of the line, and several buildings placed accordingly; wherefore I think the prayer of the Petitioners should be granted, in order to save the labor and the necessity of removing the buildings.

4th. William Cromwell has laid out a village adjoining his mills—allowing the road all on the North side of the line run in front of the Concession, and several large buildings are placed accordinglyalso the bridge across Otter Creek.

5th. The stakes, or monuments, designating the lots in the original survey stand directly on the line

Respecting the establishment of Peter Lossing's Survey in lieu of the original.

1st. Mr. Lossing was an interested individual, and under no responsibility.

2nd. Mr. Lossing paid very little regard to the stakes, or monuments, erected in the original survey; but made new divisions of the lots, differing materially from the original.

3rd. Mr. Lossing run different lines between the same lots, differing materially one from the other, which will appear from some of the affidavits.

Query-Which of those lines do they want established ? and the second second and the second

4th. Mr. Lossing's Survey does not agree in any way with the original.

5th. The intermediate line he run between the 3rd and 4th Concessions (East of the middle line) crooks about three chains in the centre.

6th. The intermediate line he run between the 5th and 6th Concessions, where it intersects the middle town line, is about four chains too far to the North.

Note-In the first Survey only every other of the Concession lines were run.

DEAR SIR,

Sir,
I deeply regret that I had not an opportunity of stating the case in person before the Committee, as it is impossible in this way to give the Committee but a faint idea of the circumstances relative to the case.

I am, Sir,

Your most obedient

Humble scrvent,

ELIAKIM MALCOLM,

Deputy Surveyor

To C. Duncombe, Esquire,

Toronto, 19th March, 1835.

DEAR SIR,

BRANTFORD, 10th March, 1834.

Having been requested to state to you, for your information, my opinion of the nature of the original Survey of the Township of Norwich; I beg to say that from what information I have gathered. when surveying in that Township, I am decidedly of opinion, that the allowance for road passing through the centre of the Township from North to South lies to the West of the line commonly called the middle town line, between Lots No. 14 and 15, and that the Concessions run in the original survey, were run in front of the Concessions, and not in the centre of the allowance for road between the Concessions.

I sincerely hope that a law may be passed, which will prevent the almost endless confusion and litigation which will continue there if matters remain as they are.

I am, dear sir,

Your very obedient servant,

LEWIS L. BURWELL,

Deputy Surveyor.

CHAS. DUNCOMBE, Esq., M.P.P. TORONTO.

Observations respecting the Surveys in the Township of Norwich.

1st. It has been observed that the circumstance of there being more land on the West side of the middle line than there is on the East affords a strong argument in favor of placing the road allowance on the West side of that line; but such reasoning in the mouth of a Surveyor is untenable—as a licensed Surveyor I am bound to respect the original monuments, without regard to the quantity of land. The statute of 1818 distinctly binds a Surveyor to work according to the original monuments. The abundant proof which I had that the lines in Norwich were run as the centre of the roads prevented my working by any other method. Colonel John Bostwick testified in court that he run the original lines of Norwich in 1799, under authority, and that he distinctly knew the lines to be the centre of the roads. (See affidavits of Col. Bostwick, Claymond, Vanderburgh, Paul Averil, and many others who have seen the posts standing.)

2nd. Respecting the opinion given that there would be more saving of labor of placing the road on the West side of the middle town line.—I can distinctly aver that that opinion is not correct. To my certain knowledge there would be no saving of statute labor by so doing, on the contrary, the labor lost would be far greater than that saved.

3rd. Respecting Peter Lossing's deed to David Nichol, bounding him to the middle town line—He did nothing more than the circumstances of the case made necessary; the original patent made no mention whatever of roads, and how could Mr. Lossing do so in his transfers? The lots which were made scant lots in the Government Survey were described as full lots in the Patents, and how could Mr. Lossing venture to do otherwise in his transfers?

4th. The posts which were found standing on the lines were never intended to be (in Norwich) at the angles of the lots, they never were marked as such—they were marked as mere trace stakes, or guides to the proper corners; therefore the oft repeated objection that a man's corner cannot be the centre of the road, is made without any foundation or force whatever.

5th. The line between the 4th and 5th concessions is worked throughout upon the principle of the line being the centre, and the buildings and improvements made accordingly. This is the oldest street in the place, which proves plainly that the old survey placed the lines in the centre.

6th. The buildings at Cromwell's, on the line between the 8th and 9th concessions, are neither very large nor very costly, and the bridge across the narrow Otter, is but a common rough country bridge. Many of those buildings were latterly erected while suits were pending, as if to dare the laws, and the stability of ancient surveys.

Respecting the establishment of Peter Lossing's survey.

1st. If Peter Lossing was under no responsibility, those persons who deliberately agreed to accept of his surveys certainly were by the sanctity of contracts.

2nd. Mr. Lossing so far from paying "very little regard" to the original monuments in the Government survey, availed himself of every opportunity to be guided by them; and in the case where he differed from the original, if he ever did so, it was because the posts were missing and gone, and under circumstances in which he could not honestly have acted otherwise than he did. Refer to the diagram and see if Peter Lossing ever made such a departure from the original survey as did the licensed Surveyor, who commenced the second concession line 9 chains and a half further South than where the original monuments pointing out that commencement stood.

3rd. If Mr. Lossing ran different lines between the same lots, it was no more than other Surveyors have done—it being the privilege of every man to correct what he considers an error. Previous to 1818, when the instructions were to run from post to post across the concession, it was hardly possible for a Surveyor to make a line correct at the first running.

4th. If Mr. Lossing's lines are in some cases irregular, the irregularities of the original survey are far greater, as the diagram will shew. Expectations honestly formed and justly continued—fears of great losses and sacrifices—and earnest desires for justice, loudly call for the establishment of Peter Lossing's lines.

JOHN A. TIDEY,

Dep't P. Surveyor.

The Gaol, capable of containing six deletors and six criminals, on an emergency twice the number. By accommodating twelve persons, second, and two in a third.

The Prison is a Common Gaol, having a Court Room in the upper story. The name of the Gaoler is Angus Shaw, and the affairs of the Prison are constantly under my own supervision. No effects but the Gaoler, who holds his situation from me. But one debtors room and two criminal wards. The Prison is not surrounded by any yard, but the lot granted from me. But one debtors so the Gaol require them, and the means of the District will enable the Magistrates to go on with the work. Allowance to King's acround, so that extensive yards may be constructed when the wrates their present high prices of provisions about six shillings per week. There is a standing order of the Magistrates to have the prisoners one and a half pounds of bread and half a tound of pork per day, worth at the present high prices of provisions about six shillings per week. There is a standing order of the Magistrates to have the still kept for the use of the prisoners. Attendance of a Surgeon of Physician soldom hitherto required. No regular Physician appointed to attend prisoners. Solitary confinement, whipping, or irons, never yet resurted to—irons have been provided for the prison. There is now in the prison an unknown transient female, apparently about thirty years of age, and insane at times; she said her name was Susan Horrory, other circumstances have induced me to believe that her name is Sarah Bradley—she has been confined since the 12th of January, 1835. It is not known how long she has been deranged—she had women kept in different wards -no other classification. No duties performed by a Chaplain. The Ottawn District Bible Society voted one copy of the Bible and a New Testament some years since, which are prisoners, when in any confinement, provided with blankers and bedding actually necessary. From settlern having prisoners in custody no arrangement has been made to render their labor available. Men and

The Prison is a Common Gaol, but Common Gaols are by Provincial Statute, to be used for Houses of CorShould there be a female Debtor or Criminal the means of accommodation would be lessened. perform Divine Service in Gaal, nor has any minister performed service therein—no provision for instruction—nor Bibles or other books supplied.—A Surgeon attends when necessary, at the expanse of the District—there are no separate apartments for the sick. Gooler is notherised by Quarter Sessions to put an offender in solitary confinement and keep him on bread and water for not more than 24 hours, for disrerection until such be erected-Is under the superinteend and the District, who appoints the Gaoler, who is the only officer. Destitute Prisoners are allowed daily by the District 12 oz. fresh beef according to the evidence produced. These allowances, furnished by contract, given out by the Magistrates—Clothing and bedding supplied by the District to those prisoners, who are unable to supply themselves—No employment for prisoners, no regulations laving been adopted on this subject. Separation of District conficultion the construction of Gaol admits of. If Females are committed they are necessarily confined to their room-if necessary, to allow them the use of the passage for exercise, male prisoners are locked up-plan of Gaol very defective in this respect. No Clergyman appointed to gard of prison rules, assaults in prison, produnc cursing and swearing, or indocent or refractory behaviour, noting particulars in his journal. Solitary confinement and whipping in obedience to a Court of Justicoin prisoner put in irous except in cases of absolute necessity, and particulars to be entered on Journals by keeper and submitted to Magistrates in General Quarter Sessions assembled. Gaol Regulations direct insno female named Mary Staphens was received into one of the Criminal's cells in December, 1834, by order of S. Washburn, Esq., and continued there 18 days, and then forwarded to Toronto by desire of her husband, an old soldier, by moans of a subscription contributed by the Magistrates, Grand Jury, and other individuals charteably disposed. From the recent formation of the District, and want of funds, the Sheriff reports on this head to each Quarter Sessions, and allowance confirmed or disallowed One prisoner, a colored man, was whipped by order of the Magistrates in Quarter Sessions. No insane person confined at present—an God is yet unprovided with many requisite comforts and conveniencies, which will, no doubt, be provided by the Magistrates as the means of the District will admir. The Gaol has four rooms for Debtors, and will accommodate 20, allowing the smallest room for use of the sick. Ilb. salt pork, Ilb. potatoes, Alb. bread, with allownees of salt-average weekly cost, about 5s. 9d., per head.

CHARD BULLOCK, SHERIFF.

FIRST REPORT

OF

SELECT COMMITTEE

ON

WELLAND CANAL AFFAIRS.

To the Honorable the House of Assembly.

The Committee appointed to investigate the affairs of the Welland Canal Company:—

Respectfully beg leave to Report as a First Report ::

That the accompanying Report and Letter from Francis Hall, Esq., Engineer, employed upon the works of the Welland Canal having been submitted to Your Committee by the Government Directors, they deem it their duty to submit the same to the serious consideration of Your Honorable House, with the evidence of the said Francis Hall, Wm, H. Merritt, Esq. M. P. President, and John Clark, Esq. Secretary of the said Welland Canal Company, with a view of drawing the attention of Your Honorble House to the propriety of granting the sum of £2,000 for the immediate relief of the said Company without which it appears that the navigation of the said Canal for the ensning summer must be closed.

All which is respectfully submitted.

JAMES E. SMALL, Chairman.

Committee Room, House of Assembly, \\ 13th February, 1836.

EVIDENCE.
Comittee Room, Thursday,
11th February, 1836.

COMMITTEE MET.

Present.

JAMES E. SMALL, Esq., Chairman, and Messrs. Chisaulm,

CHISTOLM,
PARKE,
McDonell,
Roblin,
Shaver, and
Thorburn.

FRANCIS HALL, Esq. Civil Engineer, called in and examined.

1st. Have you any knowledge of the state of the funds of the Welland Canal Company? I have not:

2nd. By whom were you employed as Engineer on the works of the Welland Canal?

By the Government Directors on the 1st July last to examine the Welland Canal, and report upon all its works according to written instructions, and subsequently by the General Board, as Engineer to superintend the works. 3rd. Are you satisfied that the facts contained in your letter and report to the Government Directors, and read to you, are true in all its particulars?—They are true.

4th. Will the sum of £2,000 be sufficient to make preparations for the opening of the navigation next spring?—The works under contract on the Canal, amount to £6,500, but £2,000 will be sufficient to make preparations for the opening of the navigation by the 1st of April next.

5th. Are you satisfied, that if you do not carry an assurance from Parliament, that you will obtain the sum of £2,000 to the Contractors now engaged on the Canal, that the works will not proceed?—I am confident that will be the case, as the Contractors have proceeded with the works since November last, without any advance of money.

6th. What security does the Company take from Contractors for the performance of their contracts?—There are regular bonds given by the Contractors to the Welland Canal Company for the due performance of the work, and in one instance for re-building Lock No. 7, a certain proportion of the contract price is to be withheld for 12 months after completion of the contract.

7th. Is it usual for the Company to advance on the amount of the contract as the works progress?—It is; on works of this nature a monthly estimate is made of the labour actually performed, and the contracts rate of a proportional part is allowed, payable in negotiable notes of the Company, the contracts entered into at present, in some cases, are higer than they would be if entered into to be paid in the ordinary way. Tenders were received from McArthur and Gum for re-building Lock No. 16, at 1s. 9d. per solid perch; when applied too to execute their contract they declined, in consequence of the payments: the next lowest tender for this Lock was 2s. 1½d., and is now contracted for.

Sth. Have you less apprehension of the failure of the Locks now than when you reported to the Directors last?—I have,—in my general Report, dated October last, I have explained where any defects were observable; but I could not do so generally as to the foundations, until the canal water was withdrawn, by the Supplementary Report, the foundation timbers of most of the Locks are stated to be in a better state than previously expected; subsequent observations have tended to confirm the statement.

9th. Do you think that withholding part payment for work done is a sufficient security?—I do—if precautions are taken to make correct monthly estimates, and to retain a due proportion of the same.

JOHN CLARK, called in and examined.

10th. Are you Secretary of the Welland Canal Company ?—I am.

11th. Shew the state of the funds of the Welland Canal Company?

The balance sheet shews the state of the funds, but the balance appearing there does not shew the

cash in hand, as the whole tolls for 1834 are charged but not paid in at the time the balance sheets were made up. The cash in hand was about £100, but from this I have made payments. The debts due by estimate and contingencies after the balance sheet was made up, are about £1,000. I cannot, without reference to the books, state what debts are due to the Company which are principally for tolls unpaid.

12th. Do you think the Company could raise the sum of £2,000 within two months, upon the debts due to it?—I know the Company has not the means within its power of raising, within two months, the sum of £2,000 upon the debts due it.

13th. What are the incidental expenses of the Company?—There is, at this season of the year, little incidental expenses independent of the contracts except the salaries of officers.

14th. Do you think the contractors can proceed with the works in progress without a grant of money from Parliament?—I know the contractors cannot go on without money being advanced to them, and if they do not go on, the Canal must be stopped the ensuing season.

WILLIAM HAMILTON MERRITT, ESQUIRE, M. P. called in and examined.

15th. You are President of the Welland Canal Company ?-I am.

16th. Has the Company any means whereby the sum of £2,000 might be obtained within two months for the purposes of the Canal?—They have not.

17th. What are the present debts of the Company? The present debts of the Company are £1,000 on the work, besides about £3,000 for damages to individuals.

18th. Do you confirm the statement of Mr. Hall? I do.

19th. How was it intended to redeem the notes spoken of by Mr. Hall?—On the tolls of the ensuing year.

20th. Can you compel the Contractors to fulfil their contracts without assisting them with money?—I cannot.

21st. Are the Contractors generally men of property?—No,—they require advances as they proceed with the work.

22nd. Have the Company abandoned the idea of issuing Notes?—They have, unless necessity should compel them. I do not believe they would answer so good a purpose as contemplated.

23rd. What sum will be required the ensuing scason to complete the works?—I think that £10,000 will be required. The expenses attending the Canal yearly, amount from £3,500 to £6,000.

24th. What is the object of the £2,000 now required?—To furnish provisions, &c. to the different Contractors.

Welland Canal Office, 2nd February, 1836.

WM. LYON MACKENZIE and DAVID THORBURN, Esqr's, M. P. P's.

Have enclosed my last report upon the works of the Canal to the 1st April, by which it will be seen that every thing proceeds with as much activity as practicable.

The only thing wanted is funds; we shall have all the excavation done in the course of a few days, when advances of some kind must be made to the different Contractors for timber, stone, and other ma-

We had a meeting of the Board yesterday, previous to a removal of the officer to Toronto, but from what I can understand, no funds are provided, or probably there are none to provide. I wish to have your opinion as to the propriety of trying the House of Assembly, under existing circumstances, to pass a Resolution for an advance of as much as would keep us going, say two thousand pounds; if we had any assurance of this sum, I think the navigation may be opened by the beginning of April as contemplated, but without some such assurance, I think it would be well to stop the works at once. If you can hold out any hopes, I may come over for a few days, without injury to the works, and give what explanations may be desired by Honourable Members. All here are aware of the difficulty of our present position, viz: three Locks pulled down and must be re-built before opening of spring navigation, otherwise the character of the Canal is materially injured, and the tolls diminished to an extent that cannot be calculated.

I have the honor to be,

Gentlemen,

Your very oled't serv't,

FRANCIS HALL.

N. B. Upon hearing from you, 1 could be in Toronto by Monday or Tuesday next. The enclosed report is the only copy we have, it was read and approved at yesterday's board.

Enclosed also a copy of my report upon cutting the banks at Helms, the calculations may be useful.

F. H.

Report relative to cutting the Canal Banks near junction.

Upon the 9th day of December last, after a particular examination of the Canal line in conjuction with the President, it was determined, before leaving Port Robinson, in order that the Contractors should have the full benefit of the season, for the prosecution of their respective works, that Mr. Donaldson should have the control of all the Canal water above Port Robinson Stop-gates. Written instructions were same day left with Mr. Donaldson to the following purport, viz: That Mr. Donaldson was authorised to cut the banks of the Canal above said Stop Gates in whatever place or places he might consider most expedient for the purpose of draining his

works, which cut or cuts, were to be made at the first ensuing thaw, at the same time he was instructed both verbally and by that order of the 9th, to inform Mr. Stockley the precise day he would make those cuts, that Mr. Stockly might use the necessary precautions in securing the Stop Gates at Port Robinson.

A few days after the 9th, and upon the succeeding Sunday, so far as I can remember, Mr. Stockly informed me, at St. Catharines, that the Canal banks had been cut near Helms' mill, and requested to know from whom the authority had been derived.—In reply, I could only inform him that I had no knowledge of the transaction, and immediately wrote to Mr. Callaghan, Canal Superintendant, upon that division, requesting him to repair the breach without delay, and report to the office the name or names of the parties implicated; Mr. Callaghan in reply stated, that Helms was the aggressor who had cut the bank upon his own responsibility, and that the breach was repaired by him (Callaghan) at the expense of the Canal Company.

Such being the state of the facts, and the water of the Canal summit reduced 22½ inches, it was considered advisable to allow the summit level again to rise before proceeding with the contracts. The time of letting out the water was postponed until the 19th December, upon that day all the parties were to hold themselves in readiness; notice was also sent to Mr. Stockly, Mr. Thomas Merritt, Messrs. Keefers, Squires, Graybell, and to Mr. Thompson, for the Stop Gates at Dunnville.

But in consequence of ice in the Feeder and Canal, and notwithstanding all the precautions that have been used, it was found that the water in the Canal did not rise to the original head, but that it diminished instead of otherwise, thereupon the Contractors, adhering to their instructions of the 19th December, proceeded with their various operations.

By the foregoing statement it appears that Helms was the original cause of the Canal depression, and that a postponement of the works followed, if possible to refill the Canal by authority of the President and myself. The loss of water upon the summit pond, between Port Robinson Stop Gates and Allanburgh mills may be stated as follows: Length of Canal 4,400 yards=13,200 feet × 38 × 1,833=917,928 cubic feet. But Allanburgh Mill, with a head of 12 feet and an aperture at mill flue, of 176 inches, will, with this head and aperture, discharge 720 solid feet of water per minute when in full operation; therefore $\frac{9178}{770} = 1275$ minutes, or 21½ hours=the time this water wasted by Helms would supply Allanburgh mills.

I have the honor to be,

Gentlemen,

Your very obed't serv't,

FRANCIS HALL,

Fngincer.

To the President and Board of Directors of the Welland Canal.

St. Catharines, 27th January, 1836. To the President, and Board of Directors of the Welland Canal.

GENTLEMEN:

The works under Lock No. 7, remain as last reported upon. The excavation at Lock No. 7 proceeds under Fluellan and twelve men, with as much rapidity as practicable; both sides are excavated to nearly the bottom of the side walls. The Lock head is protected from the surface water by a dam, and acutis now making through the Canal bank, in the direction of the head of Mr. Phelp's To carry off this surplus water, a saw-mill. dam has likewise been constructed below the Lock to check back water from the lower level, and proper pumps placed to drain the centre of the Lock. Operations are here so far advanced that, with favorable weather, the masons may be expected to commence some time during the ensuing week. Look No. 16 excavation is completed from the Upper Hollow Quoin to the recess; from the recess downwards all the excavation will be done in six working days;some of the foundation stone are already placed; timber and other material are ready to proceed with so soon as the foundations are observed to be in a proper state of preparation. The masonry of this Lock will be finished with ordinary weather before the first of April.

The excavation of Lock No. 20, proceeds with every expedition, but as the lower piers upon both sides require removal before building can begin, it will be, at soonest, 14 days before the masons can proceed with re-building this Lock. One of the lower piers, composed of stone and lime, occupies a great deal of time in removal, for which something extra must be allowed to induce the Contractor (there) to continue with that part of the work. All the gates under contract to Collier are in a forward state. Timber is all upon the ground at Centreville and the framing far advanced.

All Mr. Thompson's timber for foundations and side walls has been drawn out of the Canal, and is now depositing at the respective Locks. In consequence of the failure of Lundy's Quarry, for large stone, the Company's Quarry at Lock No. 25 has been reopened, and stone is quarrying to meet any deficiency. Boyle and Kerr have undertaken the quarrying of 284 cords at their former prices.

The Lock Gates under contract, by Moore, at Allanburgh, and Port Robinson, are in progress, and will be ready by the time specified. The timber is will be ready by the time specified. also prepared for the different Road Bridge Contracts by Moore, and the Stop Gates at Gravelly Bay, are framed and ready for insertion, so soon as the foundations are prepared.

Contracts are likewise entered into with Moore to provide timber for a certain number of Lock Gates that will be required during the ensuing season, this timber is to be cut while the sap is down, and delivered at the opening of the navigation where required.

Mr. Burger's Contract for widening the Canal is in progress, with about ten mon, a force sufficient to accomplish the work in due season.

Mr. Donaldson has finished nearly all his side excavation upon the Canal, south of Burgers, some bottoming is still required, this cannot at present beadvantageously executed in consequence of ice.-The rock excavation near Stone Bridge proceeds with activity. I have recommended an extra force upon that work, with which the same may be finished in a week or ten days from this date.

No Contract has yet been made respecting an enlargement of the Canal surface near Gravelly Bay.

Owing to the severity of the weather Mr. Thomas Merritt has not commenced regularly with the Berm Bank, but as a sufficient number of workmen can be obtained at short notice, he will have no difficulty in accomplishing his contract by the time specified. I would recommend to the Board the appointment of an overseer upon the whole line of the feeder, or wherever embankments occur, as the occasional visits of an Engineer is not sufficient to ensure a due. performance of works of that nature.

> I have the honor to be, Gentlemen,

> > Your very obedient servant, FRANCIS HALL.

WELLAND CANAL OFFICE, ST. CATHERINES, 1st February, 1836.

REPORT

OF

SELECT COMMITTEE

ON

PETITION OF RICHARD MURPHY AND OTHERS.

TO THE HONORABLE THE COMMONS HOUSE OF ASSEMBLY.

The Committee to whom was referred the Petition of Richard Murphy and others— President and Members of the Mechanics' Institute in the Town of London, beg leave respectfully to Report:

That they consider the diffusion of knowledge among the People of this Province in every effectual and cheap way an object vitally affecting the peace, welfare, happiness and harmony of every class of the people and highly worthy of receiving the countenance and patronage of Your Honorable House.

The organization of Mechanics Institutions has for a considerable time engaged the attention and received the warmest support of many of the most eminent and distinguished individuals and communities in Great Britain and America with a view to disseminate information and promote the diffusion of knowledge Great Britain and America with a view to disseminate information and promote the diffusion of knowledge among its members and the public—and the results have been found greatly conducive to their intended object and in an eminent degree to answer all that was expected from them.

That the Mechanics of Upper Canada are a class of our community highly respectable, and who assist in a large degree by their industry, character and contributions to make up the aggregate of our public and common weal; and it is a question if any class of our community have received less direct assistance from that common stock to which they so largely contribute.

Your Committee are further of opinion that in Upper Canada, and particularly in the sequestered parts of the country, the Mechanics are unable from their exertions alone, to procure such a library—and Philosophic and other apparatus for the advancement of knowledge—as these associations are so peculiarly adapted to secure to its members and the community generally: And Your Committee therefore feel a pleasure in recommending that the liberal aid so judiciously and generously given to similar institutions in pleasure in recommending that the liberal aid so judiciously and generously given to similar institutions. Toronto and other places may be further continued by a donation of one hundred pounds to the Mechanics. Institute of the rising Town of London.

All which is respectfully submitted,

THOMAS PARKE,

The second of the west the provide the state of

Chairman-

Commons House of Assembly, 29th February 1836.

LE LOS BALOS BAHAR

REPORT OF THE SELECT COMMITTEE

TO WHICH WAS REFERRED THE

SEVERAL PETITIONS PRAYING FOR THE FURTHER IMPROVEMENT OF THE ROADS LEADING FROM THE CITY OF TORONTO.

The Committee to whom was referred the Petition of John Finch, and others, praying for the further improvement of the York Roads, Report the following Resolution:

Resolved, That it is expedient to authorise His Majesty's Receiver-General to raise, by way of Loan, the sum of £40,000, on the Credit of the Tolls, and such other security as the Legislature may provide, to be applied as follows:—

£20,000 to Yonge Street. £10,000 to the East Road. £10,000 to the West Road.

W. B. ROBINSON, Chairman.

Committee Room, House of Assembly, March 1, 1836.

No. 121.

REPORT

OF

THE SELECT COMMITTEE

ON THE

PETITION OF SILAS V. YORK.

TO THE HONORABLE THE HOUSE OF ASSEMBLY.

The Committee to whom was referred the Petition of Silas V. York, praying to be placed upon the Militia Pension List of this Province in consequince of severe wounds received by him in action with the enemy during the late war with the United States of America, beg leave to Report:

That they have enquired into the claims of the Petitioner, and are of opinion that he is a propor object for the favorable consideration of your Honorable House, and would recommend that an Act be passed to enable the said Petitioner to be placed upon the Pension List of this Province, and that £20 per annum be granted to His Majesty, His Heirs and Successors, during the life of the said Silas V. York, for his pension.

JAMES E. SMALL, Chairman.

Committee Room, House of Assembly, February 18, 1836.

MESSAGE

FROM

LIEUTENANT GOVERNOR,

WITH

CERTAIN DESPATCHES FROM SECRETARY OF STATE

TO

LIEUTENANT-GOVERNOR OF THIS PROVINCE.

SIR F. B. HEAD,

The Lieutenant-Governor, transmits to the House of Assembly, in compliance with the Address of the House dated the 11th instant, copies of the public Despatches from His Majesty's Secretary of States for the Colonies to the Lieutenant-Governor of this Province during the years 1830, 1831 and 1832, relative to the Independence of the Judges—the surrender of his Majesty to the control of the Provincial Legislature of the Revenue raised under the Statute of the Imperial Parliament of the 14th Geo. 3d, chap. 88; and the provision for the principal officers of the Government, required by His Majesty to be made by the Legislature on the cossion of the said Revenue.

Government-House, Feb. 25th, 1836.

(Copy.)

No. 2.

Downing Street, 20th December, 1830.

Size,
You will perceive by the enclosed copies of Despatches which I have addressed to Lord Aylmer, that instructions have been coaveyed to his Lordship, with the hope of bringing to an amicable settlement the differences which have so long existed between the two branches of the Logislature of Lower Canada, in consequence of the right claimed by the Assembly to appropriate the Revenue raised under the British Act of 14 Geo. 3, which has hitherto been applied to the support of the Civil Government under the warrants of the Lords Commissioners of the Treasury.

His Majesty's Government is of opinion, that this important object will be best accomplished by placing the Revenue in question at the complete disposal of the Provincial Legislature; and by calling upon the Assembly in return to provide for such a moderate Civil List as may be indispensably necessary, in which the Lieutenant Governor, the Judges and other Principal officers of the Government, whose salaries ought not to depend on the sanual votes of the Legislature may be included.

This course having been deemed expedient in the Lower Province, every consideration of prudence and policy combine to render its application to Upper Canada almost a matter of course.

You will accordingly taking the instructions, which I have conveyed to Lord Aylmer as your guide, proceed to the arrangement of this important point, and in making the proposition, which it will be your duty to bring forward, you will not fail to assure the Assembly of the sincere and affactors desire of His Majesty to meet the wishes of his loyal and affectionate subjects in Upper Canada, and his confident expectation, that this feeling will be reciprocal on the part of their representatives.

I transmit to you No. 1; an estimate of the funde now at the disposal of the Crown, which it is proposed to give up to the appropriation of the Assembly; and No. 2; the Civil List, which you will invite them to grant in lieu of these revenues; viz:—

(No. 1.)

It will not however be necessary to call upon the Legislature to grant the whole of the sum of £10,300, innamuch as by the Provincial Act of 53rd Geo. 3rd the sum of £2500 currency, (equal to £213) sterling) is granted towards the minimum of the Civil Government; the moderate sum of £3669 is therefore all that is required for the completion of the proposed arrange-

The manner, in which it is intended to relieve the Lords of the True sury from the appropriation of the duties ruised under the 14th Geo. 3rd, being fully detailed in my despatch to Lord Aylmer, it is unnecessary for me to enter into any further explanation on that part of the subject. The duration of the Civil List mast as in Lower Canada be fixed in Upper Canada, either for the life of His Mujesty or for a term of not less than seven venus.

I have only in addition to express my earnest hope that no exercise on your part will be omitted to induce the Legislature to accede to the proposal, which you are instructed to make to them; since besides having the merit of sortling a point of great importance if not difficulty, it will place at the disposal of the Assembly a sum larger in amount than the Civil List, for which they are called upon to provide.

I have, &c.

GODERICH. (Signed)

Major General Sir John Colbonne, K. C.B. No. de. Se.

(Copp.)

DOWNING STREET. 24th Dec., 1230.

No. 11.

My LORD:

Amongst the first objects, which heve called for my attention since His Majesty was pleased to place the Scals of the Colonial Office in my hands, is the painful state of disunion, which has for many years prevailed in Lower Canada, respecting that part of the revenue, which is raised by duties levied under various acts of the British Parliament and appropriated by warrants from the Lords of the Treasury. Your Excellency will doubtless have felt, how seriously this state of things embarrass all the operations of the Local Government. But whilst its present effect is to weaken the just influence and authority of the Excentive Power, its future consequences upon the connection between the Province and the Mother Country, might become most disastrous if not fatal. It appears to me, therefore as it has appeared to my predecessor Sir George Murray, to be indispensably necessary that an immediate and amicable adjustment of the question should be brought about and His Majesty's Gov-Amongst the first objects, which have called for of the question should be brought about and His Majesty's Goveriment is decidedly of opinion that any attempt at such an adjustment would be ineffectual which did not involve the entire assignment of the revenue raised under the acts in question, to the signment of the Provincial Legislature, under a conviction, that they will consent to such a reasonable grant of a Civil List as may be necessary for ensuring at all events the independence of the Governor and Judges.

I cannot think that such an assignment of these duties would be inconsistent with the honor and dignity of the Crown. The duties are neither levied not appropriated by the mere Royal Prerogative, they owe their existence to a specific act of Purliament passed at a time, when there did not exist in the Province may legal means, by which duties of that description could be imposed; and although it be true, that the act of Parliament which imposes them, directs the Lords of the Treasury to appropriate them, it must nevertheless be admitted, that the same Parliamentary nuthority might without any violation of the Royal Prerogative, have directed in the first instance and might now direct by amendment, the appropriation of them in any manner. I cannot think that such an assignment of these duties rect by amendment, the appropriation of them in any manner.

The subject being thus disembarrassed of the difficulties arising out of the Royal Prerogative and the dignity of the Crown, arising out of the Royal Prerogative and the dignity of the Crown, it mastives steelf into a mere question of expediency, viz: Whether the advantages supposed to be derived from retaining the

existing mode of appropriation are or are not counterbulanced by the munifold evils occasioned by the encreasing and apparently irrecuncilable disunion between the Governor and the Legislature of the Province. In considering this question it may are once be admitted, that there are conveniencies attending the preonce be admitted, that there are conveniences are more the persent system, which ought not to be undervalued in a country-where the relation of the government and the people are not held; together by the same sort of ancient ties, which units the various classes of society in the parent state. But these conveniences classes of society in the parent state. But these conveniences may be bought at too dear a rate, and the experience of the last few years has convinced His Majesty's Government that a different policy is not only expedient but indispensible. In order, however, to render the change effectual to the object of restoring harmony and cencord, it must be complete: To give up part of the duties in question to the disposal of the Legislature, and at the same time to reserve the remainder at the disposal of the Crown as a matter of right, would on the one hand be a distinct admission of the principle, that the present mode of appropriation is defective, whilst on the other it would effectually prevent the concession from being either gracious or conclusive. Its ungracions usual be in proportion to its inefficiency; and the arrangement never could be final so long as any part of the obnoxious practice were remined.

The principle, therefore, upon which His Majesty's Government is of opinion, that you ought to proceed in endeavouring to settle this question is derived from the practice of this country, as recently exemplified in that part of His Majesty's Speech from the Throne upon the opening of the present Session, which refers to the Civil List.—His Majosty there gives up all his interest in His Hereditaty Revenues and in some other sources of His Royal Income to the free disposal of Purliament; and His Majesty asks in return for such a Civil List as l'arliament may deem adequate for that important object. It is not attempted to balance an exact amount of the Revenue given up against the amount of the Civil List, which the Legislature is invited to grant, but on the contrary, whilst His Majesty freely gives up His interest in the Revenues, which are thus left to Parliamentary disposal. The amount of the Civil List is left to be arranged upon principles in which it is intended to combine a reasonable economy, with a just consideration of what is due to the honor, the dignity and comfort of the Crewn.

There is something in this mode of proceeding at once so simple in itself, so free from future difficulties and disagreements, simple in itself, so tree from inture difficulties and disagreements, so consistent with the King's honor and with the dutiful attachment of His People, that the King's Government cannot doubt that a proposition similar in principle and emanating from the that a proposition similar in principle and emanating from the same feelings, will not full to be received by His Majesty's fulth-ful subjects the Legislature of Lower Cunada, as an undoubted proof of His Majesty's paternal anxiety for their welfare, his desire to consult their feelings and his confidence in the Loyalty of His North American Subjects.

The instruction, therefore, which I am now commanded by His Majesty to convey to you is, that you should at the earliest convenient period make a communication to the Legislature to the following effect :-

That His Majesty taking into consideration the best mode of contributing to the prosperity and contentment of His faithful subjects of the Province of Lower Canada, places at the disposal subjects of the Province of Lower Canada, pinces at the disposal of the Legislature all His Majesty's Interest in these Taxes, which are now levied in the Province by virtue of different Acts of the British Parliament, and which are appropriated by the Treasury under His Majesty's commands together with all lines and forfeitures levied under the authority of such Acts. That His Majesty relying on the liberality and justice of the Legisla-His Majesty relying on the incertainty and parties of hower Canada invites them to consider the propriety of making some settled provision for such portion of the expenses of the Civil Government of the Province as may, upon examination appear to require an arrangement of a more permanent nature, than those supplies, which it belongs to the Legislature to determine by annual votes.

That His Majesty has directed an Estimate to be prepared and laid before them, of the sum which may be required for that purpose; and that in directing the preparation of that estimate his Majesty has been guided by a wish, never absent from his heart, to call upon His faithful Subjects for no other supply than heart, to call upon His faithful Subjects for no other supply than such as may appear to be required for the due execution of those services which it is proposed to charge upon the Civil List.

His Majesty concedes the disposal of these Revenues with cordial good will and cannot doubt that it will be met with a reciprocal feeling by the Representatives of an attached and loyal

Such being the nature of the communication which it will be your duty to make in the King's name to the Legislature .- L have now to submit to you an estimate of that, which it is proposed to concede, and that which the Assembly may be invited to grant as a Civil List.

The Revenues to be given up are as follow-namely:-

Total£ 31,699

The Civil List to be proposed to the adoption of the Legislature should be divided like the Civil List in this country into separate classes, with a definite expenditure assigned to each Class.

It may consist of three:-

1st. The Civil Government as far as regards the Governor and his immediate Executive officers.

2nd. Judges and Administration of Justice.

3rd. Pensions and Miscellaneous Items to meet unforseen Contingencies.

No. 1 may be composed of the following items:

| | £. ı. d. | at ∎, d. |
|--|----------------------------------|-------------------------|
| Governor's Salary, | 4500 0 0
400 0 0
300 0 0 | |
| No. 2 as follows: | | Marketter |
| Chief Justice,do. Montreal,
Six Puisne Judges, £900 each, | 1500 0 0
1200 0 0
5400 0 0 | |
| Judge Vice Aumiralty Court, | 300 0 0 | |
| Solicitor General, | 200 0 0 | and the American to the |
| 3rd Class: | | 11150 0 0 |
| Pensions, | 1000 0 0
1750 0 0 | |
| 그 가장선생님들이 하는데 되었다. | l 3 classes, £ | 2750 0 0
19100 0 0 |

It will not, however, be necessary to call upon the Legislature to grant the whole of the sum, £19,100.0 0, inasmuch as by the Provincial Act of Geo. III, c.—— the sum of £5000 is permanently granted towards the maintenance of the Civil Government. The moderate sum of £14,100 0 0 is, therefore, all that is deemed necessary to ask for the completion of the proposed arrangement.

Having now stated to your Lordship the nature and details of the proposition to be submitted to the Legislature, I proceed to explain the mode in which the arrangement can best be carried into effect.

As the duties, with which it is proposed to deal in the manner above described, are appropriated by Acts of the British Parliament, the change in their disposition cannot take place without the sanction of the same authority. A Bill will therefore be submitted to Parliament in the course of the present Session, for the purpose of releasing the Lords of the Treasury from their present obligation of appropriating the duties, and for authorising His Majesty to leave their appropriation to the Colorial Logislature. The date at which it is proposed that the Bill should come in operation is on July 1st, 1832. This distant period is taken in order, on the one hand, to give full time for the Legislature of Lower Canada to make the necessary provision on their part, and on the other, to enable His Majesty's Government to meet the possible (though, I trust, highly improbable) contingency of such a satisfactory result not taking place.

In order, however, to enable the Government at home to give the earliest possible effect to the measures, which may be taken by the Colonial Legislature for the satisfactory settlement of this question, it is proposed to give His Majesty in Council a power to bring the British Law into operation at an earlier period than July 1st, 1832. If, therefore, the Canadian Act should

provide for the commencement of the proposed Civil List in-January 1st, 1832, (which I should be inclined to recommend), or at an earlier period, then His Majesty's Government wouldlose no time in advising the issue of an order in Council to accelerate the commencement of the British Act, so that the wholeplan would come simultaneously into effect.

It now only remains for me to state, that the duration of the Civil List may be either for the life of His Majesty, or for some definite term of years, not under seven, as may be more agreeable to the Provincial Legislature.

Litrust, that the arrangement detailed in this despatch will be received in the spirit, in which they are detailed, a spirit of conciliation and confidence. His Majesty is prepared to surrender a large and increasing Revenue. He asks in return for a fixed and moderate Civil List, much less in amount than the Revenue given up, and the settlement of this long agitated and perplexing question will be deemed by His Majesty one of the happiest evenus of His Reign, the glory of which, the peuple of Canada may be assured, will be the promotion of the happiness and content of all clusses of His subjects in every quarter of the globe.

I have, &c.

(Signed,) GODERICH.

Lieutenant General
Lord AYLMER, K. C. B.

&c. &c. &c.

(Copy.)

Downing Street,

8th February, 1831.

Sire,

In the Despatch, dated the 24th December last, No. 2, which I had the honor to address to you on the subject of the financial arrangements to be proposed to the Legislative Council and Assembly of the Province of Upper Canada, I signified to you His Majesty's pleasure, that you should propose to the Provincial Assembly to grant such a Civil List as migt be necessary for securing, at all events, the independence of the Governor and of the Judges. The various sums proposed in that despatch for the maintenance of the Judges, amount together to the annual sum of £3,300. The other expenses of the proposed judicial establisement being required for the Attorney and Solicitor General and contingencies, amounting together to £700.

In making this demand upon the liberality of his faithful Commons in Upper Canada, His Majesty was desirous to secure to his subjects in that part of his dominions the full enjoyment of those advantages which have been so largely derived in this kingdom from the independence of the Judicial Office. A question of very grave importance connected with that subject was not noticed in the despatch, to which I refer, because the Ministers of the Crown were unwilling to submit to the King any opinion upon so important a topic until they should have found an opportunity for more mature deliberation than had been practicable at the date of that despatch. I now proceed to convey to you the commands, which it is His Majesty's pleasure to issue, upon a full review of the great question of judicial independence in his Canadian Provinces.

The connection which happily subsists between the Canadas and this kingdom suggests the propriety of transferring to those Provinces every institution, which the more ample experience of Great Britain recommends as calculated to promote at once the stability of government and the welfare of society at large. There is no branch of our civil polity, which has been more fully proved to be conductive to these great only than the establishment of judges independent at once on the royal authority, and on the pleasure of the popular branch of the Legislature.

There was not, I apprehend, any legal or constitutional reason which would have prevented the King from granting the offices of the judges of England during their good behaviour, but to render that principle immutable, it was necessary, that Parliament should prescribe the form of Commission to be used on such occasions. Accordingly the statutes passed in the 13th year of the reign of William the Third, and in the first year of George the Third, have deprived the Crown of all discretion on the subject.

In conformity with these precedents and in pursuance of the great general principle on which they were founded. The King is graciously pleased to command, that you do avail yourself of the earliest opportunity for proposing to the Legislative Council

 \mathbf{B}

and Assembly of Upper Canada the enactment of a bill, declaring that the Commissions of all the Judges of the Supreme Courts shall be granted to endure during their good behaviour and not during the royal pleasure, and you will in the name and on the behalf of His Majesty assent to a bill for carrying that object into effect.

It is of course an essential condition of this arrangement that an adequate and permanent provision should be made for the Judges, and I am happy to find that the repeated assurances of the House of Assmbly preclude the possibility of any objection being made by that body to this part of the proposal.

In further pursuance of the general design of imparting to the Canadas the benefit of this important principle of the British Constitution, I am to signify to you His Majesty's communds to communicate to the Legislative Council and Assembly, His Majesty's settled purpose to nominate on no future occasion any Judge as a member either of the Executive or of the Legislative Council of the Province. Whatever raliance might be placed on the personal integrity of the Judges, it is desirable, that they should be exempted from all temptation to interfere in political controversies, and even from a suspicion of any such interference.

The simple exception to this rule will be that of the Chief Justice of Upper Canada, who will be a member of the Legislative Council, in order that they may have the benefit of his assistance in framing laws of a general and permanent character. But His Majesty will not fail to recommend even to that high officer a cautious abstinence from all proceedings by which he might be involved in any political contentions of a party nature.

You will perceive that these rules are framed with reference to the corresponding practice in this kingdom, where although it has not been unusual to elevate the Chief Justice of the King's Bench and other Chief Judges to the Peerage, the Puisne Judges cannot vote in either House of Parliament.

I am persuaded, that the Council and Assembly of Upper Canada will perceive in the measures which I have thus had the honor of explaining, an additional proof of the desire, by which the King is at all times actuated to promote the best interests of that important part of the British Empire.

I have, &c.

(Signed) GODERICH.

Major General
Sir John Colbonne, K. C. B.
&c. &c. &c.

(Copy.) No. 8.

Upper Canada, York, 21st March, 1331.

My Lond,

I have the honor to acknowledge the receipt of your letter of the 24th December, with copies of Instructions, which have been conveyed to Lord Aylmer respecting the Revenue proposed to be placed under the control of the Legislatures of these Provinces, and to acquaint your Lordship that I took an early opportunity of loying that important subject before the House of Assembly.

I regret to state, that it was not considered expedient by the Assembly to grant the amount proposed in my message. They objected to provide for the part of the Lieutenant Governor's Salary which had been always defrayed from the Casual and Territorial Rdvenue, and also for Pensions of every description,—and decided that the sum for Contingencies ought to depend on an annual vote. But they have granted the sum of £6,500 permanently for the salaries of the undermentioned officers and have repealed the Provincial Act of the 56 Geo. III, cap. 26.

| Salary | of the | Governor. £2,0 | ۸۸ |
|--------|--------|----------------|------------|
| | 11 | Judges | UU.
DA⊹ |
| | ** | | 00 |
| | •• | | 00 |
| | 11 | 5 Ferrancia C | 00 |
| 1. | ** | (*)1. C.1 & | nn. |

I have without hesitation assented to the Bill, being persuaded that if the Independence of the Principal Officers and Judges can be ensured it is most desirable to dispose of this question as soon as possible in a manner that will give satisfaction generally in the Province.

Your Lordship will perceive from the enclosed copies of my communications to the Assembly, that it was left entirely to them to adopt the arrangement which might appear best suited to

the interests of the Province as to the duration of the Grant in lieu of the Revenue proposed to be relinquished.

I however think, that much inconvenience would have arisen had the sum been granted for a limited period.—A copy of the Bill passed for the grant is enclosed.

I have, &c., (Signed)

J. COLBORNE.

The Right Hon'ble LORD VISCOUNT GODERICH.

(Copy.) No. 26.

Downing Street, 23rd May, 1831.

SIR,

I have received and laid before the King, your despatch of the 21st March last, No. 8, announcing that you had assented to a Bill for settling the Civil List of the Province of Upper Canada; and I have the satisfaction of assuring you that His Majesty entirely approves of your conduct upon that occasion.

It is certainly to be regretted, that the Assembly did not think proper to grant a Civil List to the full extent, which you had been instructed to ask; but as the Provision, which they have made, limited as it is, is nevertheless permanent instead of temporary, and as the management has been made without bringing into inconvenient discussion the question of the Casual Revenue, I cannot but flatter myself, that the result will prove advantageous to the Province, and tend to maintain due harmony and good understanding between the different branches of the Legislature.

The Bill, which had been introduced into Parliament at the commencement of the late Session, had not been passed into a Law before the dissolution took place. His Majesty's formal assent to the Provincial Act cannot therefore be immediately given: but assoon as the new Parliament meets, the Bill will be re-introduced.

I think you acted with sound discretion in so for departing from your Instructions as not to include the Free Fund amongst the Revenues to be given up to the Legislature. It is very doubtful, whether that additional concession would have induced the Assembly to make a larger grant, and you would in that case not have had at your command adequate means for meeting those charges which the Assembly declined to include in the Civil List, and which they probably would not be disposed to provide for by annual votes. I trust, however, that the addition of the Free Fund to the other resources at your disposal will relieve you from all difficulty on that score.

But as that addition will not be equal to the additional charges to be provided, it will be necessary to make a distribution of the Casual Revenue different in some degree from that contained in my despatch of the 24th December last, No. 2.

The Casual Revenue may now be estimated as follows :-

| 414 | Canada Company£16,000 |
|-----------------|---|
| 100 | Lands and Timber 5,000 |
| | Incidental |
| | Free Fand 1,500 |
| De | £23,500 duct charge of collection 2,000 |
| na 165
Salah | Total£21,500 |

It may safely bear the following charges:-

| Lieutenant Governor to complete his salary to £3,000£ | 1 000 |
|---|-------|
| | 1,000 |
| Compensation in lieu of Frage | 2,700 |
| Royal Grammar School | 2,566 |
| | 500 |
| | 1,000 |
| | 3,000 |
| Avoided Califolic Islands | 1,000 |
| Roman Catholic Clergy | 500 |
| Pensions, (supposed to be about | 1,000 |
| Pensions, (supposed to be about) | 1,700 |
| Emigration | 300 |
| | 5;000 |

Total£20,266

SIR,

Leaving a reserved balance of rather more than £1,200, which would be liable to increate as proportionate as the floating charges such as Pensions, retired allowances, and compensations for fees may fall in.

This distribution may, however, be liable to change before the Civil List Act comes into operation, and if you have any suggestion to offer as to the proposed application of the Casual Revenue, I shall be glad to receive them, at as early a period as may be convenient.

I have, &.,

GODERICH.

M. General Sir J. Colborne, K. C. B., &c. &c. &c.

(Copy.) No. 42.

DOWNING STREET, 30th September, 1831. With reference to my Despatch of the 23rd May last,

No. 26, I have the honor to transmit to you an Act of Parliament passed in the present Session to amend the Statute 14 Gco. 1II, c, 88, which places at the disposal of the Legislature of Upper Canada the Revenues of that Province arising from the Statute of Geo. III.

The Act having been passed on the 22nd instant, it has not been practicable since that time to issue the necessary order of His Majesty in Council for confirming the Provincial Statute of the first year of His Majesty's reign c. 18,2 That order will, however, be issued by the earliest possible opportunity. The Provincial Act will in the meantime have its operation.

I have, &c. GODERICH.

M. General Sir J. COLBORNE, K. C. B. &c. &c. &c.

No. 123. The Control of the Co

AMHERSTHURG, 18th January, 1836.

We have the honor to acquaint you, for the information of His Excellency the Lieutenant Governor; that the Act of the Provincial Parliament providing for the erection of a Light House at or near Bar Point, on Lake Erie, and vesting us with authority to carry the same into effect, was not received by us until the month of October last, at a period much too late in the season to enable us to adopt any measures for the accomplishment of that desirable object until the ensuing spring; and finding itso that an opinion generally provaled, with the masters of wessels employed. an opmon generally provided, with anomasters of vessels the ployed in the navigation of the Lake, that the site chosen for the intended Light House is totally uneligible, we deemed it proper, before entering into any contract, to ascertain by inquiry where the Light House ought to be erected to ensure its greatest possible utility. To enable us to arrive at that conclusion, we consulted several of the most experienced and respectable ship masters several of the most experienced and respectable ship masters employed in the navigation, both British and American, who are most decidedly of opinion that the south and of the island of Bois Blane, at the entrance of the river, is the fittest and by fur the best site for a Light House. We found also upon investigation, that independent of its sphere of utility being greatly increased by placing it upon the island (certainly is primary consideration) there are other and substantial reasons for giving it a preference over the bar point. The bar point is allow spit of very trifling elevation above the surface of the Lake, and is composed entirely of lobse gravel and beach sand, to the depth of several feet. To obtain a substantial and nermanent foundation upon such a bottom

being private property, could only be obtained by purchase. By placing it upon the island, independent of its increased utility, a superior elevation of fifteen feet/can be obtained, rendering a tower of forty feet in height sufficient for every useful

obtain a substantial and permanent foundation upon such a bottom would be attended with great expense; a tower of from fifty to

fifty-five feet in height from the ground to the lantern would also be necessary to render it of any real use, add to that, the ground

purpose, and a solid and permanent foundation can be secured at much less expense:

Taking these various circumstances into consideration, we had Taking these various circumstances into consideration, we had the plans, specifications, &c. prepared accordingly; and latter giving due public notice, tenders for crecting the buildings were received, a schedule of which we beg to enclose for His Excellency's information, but we regret to add that even the lowest tender greatly exceeds in amount the sum appropriated; a sum undonbtedly quito inadequate to the purposes of the Statute, we were the lowest tender greatly exceeds in duty to proceed no turber at present, but wait until it can be ascertained if Parliament will grant the additional'sum' required to carry the provisions of the Act into effect. We beg leave here to observe; that in preparing the plans and specifications of the buildings required, the strictest economy. and specifications of the buildings required, the strictest economy consistent with strength, accommodation and durability has been observed.

We further beg leave to remark that a Light House at the entrince of the river has long been required, and is vitally and essentially necessary to the safety of the increasing shipping and commercial interests of the district and country at large.

We have the honor to be,

Sin

Your most obedient servants,

ROBERT REYNOLDS, CHARLES FOTIER,

Commissioners for erecting Light Houses.

Libut. Col. ROWAN,

Civil Secretary,

&c. &c.

SCHEDULE of Tenders for building a Light House and Keeper's House on the lower or south end of the Island of Bois Blanc; on Lake Erie, received by the Commissioners, pursuant to their public advertisement, viz:

| No. of

Should any of the Tenders be uitimately accepted, the party is prepared to give ample and unexceptionable security for the due and proper performance of the work.

ROBT. REYNOLDS, CHARLES FORTIFR, Commissioners for building Light House, &c. &c. &c.

REPORT OF SELECT COMMITTEE

ON

PETITION OF PEARSE, DUMBLE, AND HORE.

TO THE HONORABLE THE COMMONS HOUSE OF ASSEMBLY.

The Committee to whom was referred the Petition of John Pearse, Hore, and Dumble, have taken the same into consideration, and beg leave to make the following Report:

It appears that in the session of 1833 an Act was passed granting the sum of £2000 to improve the inland navigation of the Newcastle District and that James G. Bethune, Col. Brown, John Hall, Thomas Need, Mr. Huston, Wm. Whitla Esq. and A. McDonnell Esq., were appointed by the House of Assembly as Commissioners to lay out the amount granted in such places and manner as they might deem proper.

From the Report of the Commissioners contained in the Journals of 1834 it seems, that they considered it advisable to make a Lock and Canal at a place called Bobcaygean Falls in order to connect, the navigation between Sturgeon and Pigeon Lakes. And John Pearse, William Hore and William Dumble contracted to construct said works for the sum of £1,600. The act making the appropriation, directed that the amount granted should be paid to all or any one of the Commissioners. And it appears that James G. Bethune being the only active Commissioner, was permitted to draw and pay over the money as he thought proper and to take upon himself the principal direction of the work.

It appears by the Receiver General's account that the Debentures were given to J. G. Bethune on the 3d June 1833 and that Pearse & Co. contracted on the first of June of the same year and proceeded immediately upon the work and that they finished the work about October 1834, but not without suffering many hardships and sustaining much injury in consequence of Mr. Bethune failing to advance them money as they required to pay their workmen and for other purposes in the prosecution of the work. The Contractors however managed to finish the said work, but were unable to procure the attendance of any of the Commissioners to examine or accept the same, they were therefore under the necessity of employing a Civil Engineer at considerable expense to examine the works: from whose report it appears that the work is finished and executed as well or better than the contract and specifications bound them to do it, and that the work was taken at too low a rate.

From the best information Your Committee are able to procure it appears that there is now the sum of £766 still due the Contractors on the original contract, which they have no means of obtaining from James G. Bethune, who has become a defaulter and insolvant. As the Contractors undertook the work from Mr. Bethune and the other Commissioners at a time when he stood high in the confidence both of the Government and People—and as there are no means by which they can recover the same from Mr. Bethune, and if left in their present situation with a heavy debt hanging over them, contracted in the prosecution and completion of said work, these hard working Mechanics and their families and others who have wrought for them will be entirely ruined.

Your Committee therefore think it just and expedient that Your Honorable House make good to the Contractors the amount justly due them, with such other sum as Your Honorable House may consider a compensation for the damages and heavy losses they have sustained in not receiving the money they were justly entitled to.

JOHN GILCHRIST,

Chairman.

MESSAGE

LIEUTENANT GOVERNOR,

REPORT OF THE EXPLORING PARTY,

EAST SHORE, LAKE HURON.

F. B HEAD,

The Lioutenant Governor, transmits for the information of the House of Assembly the accompanying copy of a Report of the officer at the head of an exploring party appointed to examine the County on the East Shore of Lake Huron, during the past summer.

GOVERNMENT HOUSE, 25th Feb., 1336.

A Summary of Facts and Remarks on a portion of the Lake Huron Territory traversed by an Exploring Party despatched in the summer of the year 1835, by order of his Excellency Sir John Colborne, K. C. B., &c. &c. &c.

FACTS.

- 1. The agricultural character of every country is greatly influenced by the class of rocks which prewailing it; for the soils which cover them, or are formed in their vicinity, are in general the result of their disintegration and discomposition.
- 2. Those rocks of a thoroughly crystalline structure, which some Geologists denominate Primary, such as granite, gruiss, sicnite, greenstone, hornblade sonist, are usually associated in all countries where they occur, with soils of an inferior description, resulting from their disintegration, and such rocks, with one limited and rare exception, are those which occupy the unsettled portions of the lands we traversed.
- 3. These rocks and the hills and mounds (mountains are never seen;) they compose or give prominency to attain little attitude; are noticed isually at comparatively low levels in relation to the waters which traverse or intersect them; are rarely more than fifty feet above such waters and never 400.
- 4. In consequence of the little height to which the rocks attain, the country they characterize is comparatively low and level, (which joined to the fact

REMARKS.

- 1. Leis not necessary to insist upon so obvious a fact and one now so generally admitted. The general rule, however, is, not without its exception, and it occurs when a deluvial action has swept from remote regions a soil foreign to the lands it is left upon.
- 2. It is true that good soils sometimes have their origin in the decomposition of sienite, and disintegration of greenstone; but the former is not readily effected, and although the latter is the soil which is the produce, is usually too ferrugenous to be good. The exception alluded to, is a secondary, or as it is sometimes called, a transition limestone which may be traced (a luergi intervalli) from Lake Winnepeg to Bradone, skirting and abutting against the more ancient rocks which barits, progress to the northward, in which direction we lost all traces of it eight miles from the N. E. corner of March.
- 3. The crystalline rocks in Europe sometimes attain a height of 10,000 feet, and are usually elevated in Canada, with the exception of the Rocky Mountains, we are not acquainted with any which exceed 4,000, and they usually fall far short of this. Captain Bayfield, R. N., measured the highest pinnacle of the Gaspesion chain, as seen from the Gulf, and found it to be 3,700 feet above the sea; but all his his previous and subsequent measurement are much less.
- has often decieved, and will continue to deceive. persons who seek no other sign of its agricultural

FACTS.

that such lands are often covered with hard woods,) occasions the hasty observer to conclude that the quality of such land must be excellent, if however recourse be had to the agricultural probe, (as was always done by us,) the only sure mechanical, though ready test of soils, far the greater portions of those we saw will be found otherwise.

- 5. The predominating soil of the country traversed is a meagre, red, or yellow, ferruginous, sandy loam, varying in depth from feet to inches, often not exceeding three of the latter dimension, and not unfrequently absent altogether, leaving the rock bare but for its hoary covering of lichen clay, or clayey loams, were rarely seen, and when noticed, their usual position was either in some of the swampy valleys between the rocks or forming alluvial deposites on the banks of rivers, often deeply covered up by a silicious sand.
- 6. The country traversed is much intersected by lakes and swamps; the former (the latter also I think) are usually directed in their greatest length either North and South, or more usually between that rumb line and N. E. S. W., such is also the prevailing bearing of the rocky scrap, which are so frequently met with in the woods, and which probably represent the bearing of the predominating lines of stratification.
- 7. All the waters met with by the exploring party fall either directly or indirectly into Lake Huron, consequently the dividing ridge which throws all the waters eastward of it in an opposite direction, was not passed.

S. The abundance of water communications renders the country very accessible to canoes, either by following the twindings of the rivers, or what is more common, by making portages between river and lake, to avoid the frequent obstructions on the for-

REMARKS.

character. In forming a just estimate of it, we can neither depend upon level nor quality of timber, we must touch the soil itself. Repeated explanations in this country have convinced me that a growth of hard wood on land, is by no means a positive indication of a good soil, neither does its absence imply the reverse necessarily. Hard woods were frequently and abundantly noticed by us, growing within six inches of the rock, in a soil of the most meagre quality... The luxuriance in timber which such soils sometimes exhibit, may be owing to the renovating influences which wood lands experience, particularly at the fall of the leaf; removed from such influences, they would soon become barren. There is also another view of the subject-a good soil which the top root of a tree may reach and derive nourishment from, may be too deep for agricultural pur-Again, a very fertile substratum of soil may be so incumbent with decomposed vegetation and underwood, as to be prevented from bearing fine

- 5. This red ferruginous soil is, I think, derived in a great measure from the disintegration of the greenstone and hornbleude schists, which so greatly abound in the country, and which are readily acted upon by the weather. I must qualify the unfavorable impression this fact (5) is calculated to give by observing that the line upon which we principally moved, was too much to the westward to afford us a fair chance of meeting with the good land which some of our lateral excursions to the eastward, gave us an opportunity of seeing.
- 6. It is characteristic of a country composed of chrystalline rocks, to be full of lakes and swamps; for such rocks allow of no percolation to the waters which fall upon them, but shed them to their bases where, dammed up, they stagnate or become nearly currentless. I believe, however, that many of the lakes, swamps bogs, and portions of rivers, owe their existence to the disintegrating character of the hornbleude schists and greenstones; for on many of them (particularly conspicuous on the rocky islets of Lake Huron,) the crossive influence of water is not only very visible but very curious.
- 7. In our latest lateral excursions up the Stinonaga River from its great Lake of the same name, we reached within a days journey of the dividing ridge, and were greatly tempted to cross and descend it to the Ottawa, but the lateness of the season, the want of a guide, and also the uncertinty we were in of getting a fresh supply of provisions, prevented it.—In our first and second day's journey up this river from the lake we met with excellent and extensive tracts of land, and the same was seen by Messrs. Richardson and Hawkins, who were at the same time exploring right and left of me; consequently I beg permision to call His Excellency's attention more particularly to this point of our labours in case the exploration of this country be persevered in.

FACTS.

mer, which arise from falls, rapids, and jams; were it not indeed for these, the rivers might be ascended in Steam Boats, being usually both wide and deep.

- 9. The lands to eastward of the Line are decidedly better than those met with either on the Line or to westward of it; and in that direction, during our latest lateral excursions, we noticed soils which in quality, depth and superficial extent demand attention; they are, however, separated on the Lake of country, either totally unsusceptible of cultivation or so insulated by portions which are, as to totally destroy the hope of being able to approach them with a view to settlement.
- 10. The highest observed latitude reached in the direction of the line was 45° 42' beyond this for seven or eight miles, to which point the line extended, the land wore a very unfavorable aspect being little better than one continued swamp; which circumstance together with the lateness of the season and the unfavorable Reports we had received of the country stretching further to the northward induced me in the absence of Lieutenant Carthew (having previously consulted the Surveyor) to discontinue the line and terminate our operations for the season by lateral excursions, reporting to that officer what had been done and naming the rendezvous to which the canoes should be sent to withdraw us.

Humbly submitted,

By His Excellency's, Obedient Servant,

(Signed) F. H. BADDELEY. Capt. R. Engineers.

REMARKS.

9. It seems more reasonable to expect that the Rice Lakes and the Ottawa will be the channels through which the country in question will be settled

10. Owing to the want of a chronometer, we are not able to give with the same confidence the greatest Longitude reached east of the line, but as lar as we may judge independently of courses taken, though not yet protracted, it was 50 miles.

REPORT OF THE COMMITTEE ON GEOLOGICAL SURVEYS.

TO THE HONORABLE THE HOUSE OF ASSEMBLY.

The Committee appointed to consider and report a plan for the Geological Survey of this Province, beg leave to Report to your Honorable House what they conceive to be some of the strongest reasons in favor of a Geological Survey of the same.

Of the resources of a new country, manufactures are necessarily out of the question. Old countries where labour is reduced to the lowest possible amount which will sustain human life, must always possess a superiority in the manipulation of commodities over a country where labour is both scarce and dear. Agriculture and Mines are the only things which a new country can cope with an old. The former on account of the low price of land and the absence of taxation, and the latter, from the superior facility of procuring the property in them in fee simple, and as the case may be, the superiority in the productiveness of the mine itself.

The first advantage to be derived from productive mines in a country such as ours is, that those who work them consume the produce of the agriculturist within our own bounds, and thus convert a commodity which is bulky, expensive in transport, and liable to damage, into one which is small in proportion to its value, cheap in transport, and which, if it be not totally lost in the passage, can suffer no injury from wind and waves.

Thus: suppose a copper mine was discovered on the Huron, and that the copper could be worked at a rate that would repay the miners when sold in England, the persons engaged in the mining, cleaning, and smelting of this copper, must consume agricultural produce, in the shape of provisions, to perhaps one-half of its price in England, and a considerable portion of the remaining moiety must come from England in the shape of British manufactures.

Again, when time has equalized every thing, the farmers of the western parts of this Province cannot expect to get the present prices for their wheat—this wheat has to be converted into money in England by a tedious process of transmission; but let it be used on the spot by those who mine and manipulate the copper, and we will obtain a higher price for it; because, what we cannot supply on the spot putate the copper, and we will obtain a nighter price for it; because, what we cannot supply on the spot must be brought at the risque and charges from a distance, and, by consequence, our profits must be theirs must be brought at the risque and risque of bringing it from a greater distance, which is of itself a great addition to the profit. Again, the charge upon the transmission of goods comes out of the pocket of the farmer. Wheat at Montreal sells for, say five shilling, per bushel, whether it is grown at La Prarie or on the Huron; but the La Prarie farmer can put his wheat into his canoe and run it across the rapid to his market; whereas the western farmer must pay for agency, storage, and freight at shpping; incur the risque of wind and waves; pay for bags, agency, and storage when it arrives; all which is necessarily deducted from his profit, even if he ships on his own account; but if, as it is most probable he does so, through country store-keepers,

he has their profits and those of their Montreal agent (or principals, as the case may be) to pay in addition. Now, supposing a bushel of wheat be, say two shillings and six-pense on the Huron, and it is converted into three pounds of copper, which, at 10d. per pound, is of the same value, you get it to market at one-eighteenth of the frieght, and at one-hundreth the risque of damage, all which profit goes into the pocket of the farmer. By calling the mineral riches of our country to the aid of her agricultural resources, you at once give an impulse to her commercial prosperity, increase the means of internal improvement, and greatly extend those for the moral and religious instruction of the people.

provement, and greatly extend those for the moral and religious instruction of the people. Again: suppose coal fields could be found in this Province—and we believe every indication exists of their presence in several districts-in the manufacture of our various minerals, coal would be of incalculable value. Wood, under any circumstances, is an expensive fuel, even for domestic purposes, or those connected with the steam engine, and for those of the coarser or cheaper manufactures, altogether inapplicable. At present, so far as we can learn, the average of cultivated farms does not amount to thirty acres; but a man is obliged to keep more than twice that quantity to supply himself with fuel. Could coal be found, the best cultivated parts of the country would maintain three times the number of inhabitants it does at present and bring us in the same ratio pages of an old country. at present, and bring us in the same ratio nearer to the power and conveniences of an old country.

Again: we know that the country abounds in Salt: a knowledge of its various local situations is

highly desirable and of the utmost importance, more especially to those great sources of our national wealth

Again: as statistics consist in a knowledge of the means and resources of a country, a professional and prosperity, the fisheries. man might as well be supposed to pursue his vocation without his instruments, a merchant to carry on business without his books, as a nation or community to govern itself without statistics.

We therefore strongly recommend the geological survey of this Province, so that a report of our natural wealth and recourses may be decided a large transfer of the statement of the stateme

tural wealth and resources may be laid on the table at the commencement of the next Session of Parliament,

COMMONS HOUSE OF ASSEMBLY,

Ast March, 1836.

R. G. DUNLOP, Chairman.

No. 126.

RETURN of the Saint Lawrence Inland Marine Assurance Company for the year 1835.

MESSAGE

FROM

HIS EXCELLENCY.

WITH THE

REPORT OF THE TRUSTEES OF YORK ROADS.

F. B. HEAD.

The Lieutenant Governor transmits to the House of Assembly the accompanying Report of the Trustees appointed by an Act of the Provincial Legisture passed in the year 1833, to make and improve the three principal approaches to the City of Toronto.

GOVERNMENT House, } 7th March, 1836.

> To His Excellency Sir Francis Bond Head, Knight, Commander of the Royal Guelphic Order of Hanover and of the Prussian Order of Merit, Lieutenant Governor of the Province of Upper Canada, &c. &c. &c.

The Trustees appointed by an Act of the Legislature, passed in 1833, to make and improve the principal approaches to the then Town of York, now the City of Toronto—

RESPECTFULLY REPORT,

That since their first Report to Sir John Colborne, in the Winter of 1834 & 5, for the information of the Legislature, they have endeavoured to benefit the public by proceeding with the work intrusted to their charge in the best manner which the limited funds remaining at their disposal enabled them to do.

It must be recollected that when that first Report was made, 21 miles of Yonge Street had been perfected—the first mile being 20 feet wide and the remainder 16 feet only. In performing ing 20 feet wide and the remainder 16 teet only. In performing the first part of which, a very extraordinary expense was incurred from causes explained in that Report, the whole cost of which two miles and one half amounted to £5,866, while a part was paid for after the enormous rate of £3,960 per mile; another part £2,420 for the same distance, and a third part at the reasonable rate of £1,320; only the latter being the smallest sum for which a mile has been represented and again of the two last for which a mile has been performed and each of the two last rates have been reduced about one third from the one immediately preceding the particulars of which expenditure were respectively detailed in that Report.

Early in the Spring of 1835, the Commissioners met and after authorising the necessary expenditure for repairs, which for the first year is usually large, proceeded to the consideration of the best method for arranging for the season and how the Eastern and Western Roads might be proceeded with to the greatest advantage, when they came to the determination of placing the immediate superintendance of those roads respectively in the hands of Mr. Small to the East, and Mr. Dennison to the West; those two Trustoes necessarily passing daily over their respective Roads. The remaining unsold Debentures were divided as follows:—£1,900 to the Western and £2,276 18s., to the Eastern, the Trustees meeting once a formight to examine estimates and authorise advances.

These Gentlemen proceeded with the work on their respective roads, early in May, very much according to their own discretion—Mr. Small to the Eastward, having Leonard Watson, one of the two persons who had succeeded so well when acting under the Board immediately under him in charge and Mr. Demison to the Westward, having John Bell, the other of those who superintended the North Board in deeper. who superintended the North Road in charge.

On the Western Road but little difficulty appeared in the way of procuring stone, as the fields adjacent abounded with the metal. Mr. Dennison commenced on Lot Street, at the corner of Peter Street, the old limit of the Town, a Road 20 feet wide of Peter Street, the old limit of the Town, a Road 20 feet wide and 10 inches deep; which has cost 20s., per yard, and of which two thousand three hundred and seventy-one yards are finished, being at the rate of about £1.800 per mile, exclusive of Bridges, leveling. Hills, &c., as per exhibit No. 1. On the Eastern Road there being no stone in the neighbourhood, the Trustees deemed it expedient to try the Gravel which was supposed to exist in large quantities about four miles below the City. Mr. Small in exploring and excavating about 13 Toise, found the vein to runs so shallow and the expense attending it so heavy, that he was obliged to abandon it altogether and search for material elsewhere. where.

The most expeditious and cheapest method then appearing to the Trustees was to procure stone by water from the Beach in the front of the Townships of Scarborough and Pickering—a metal equal if not superior to the field Granite which was delivered in front of the City at £2 per Toise and broken there for £1 8s. 6d., per Toise.

Mr. Small commenced laying the Gravel one mile East of the Don Bridge, 16 feet in width and 10 inches in depth, the 13 Toise covering about 66 yards of road; and the broken metal was continued the same width and thickness except the distance of phony 440 words which is laid only 7 inches days and the same width and thickness except the distance was continued the same width and thickness except the distance of about 440 yards, which is laid only 7 inches deep on large flag stones as an experiment,—the first mile costing the same as Mr. Dennison's; 20s., the yard, exclusive of Bridges, as jor exhibit No. 2. Although it only four-fiths of the width, in addition to which mile East of the Don 1020 yards was laid the same width as the less called as a greatly 24s. width as the last on the Don 1020 yards was tain the same width as the last only at an expense of nearly 24s., per yard, as per the same exhibit which also shows the expense of preparing a mile and one half of road for metal in the Spring and for Bridges, Toll House Gate, &c.

Exhibit No. 3, will give the particulars or the total exden-diture upon both roads, and from what sources the means were

The most pleasant part of the duty which the Trustees have yet had to perform they now commence doing, which after shewing the total amount of expenditure from the beginning, is to ing the total amount of expenditure from the beginning, is to exhibit the amount of their receipts also, and by comparison to show the real advantages which has accrued to the public by the undertaking. There has been expended in all £12,700 only in perfecting about five and one half miles, including very heavy outlays for Bridges, of which there are a great number, changing the surface of the spaces week materially threshop with the the surface of the several roads most materially, together with the expense of three Toll Houses Gates, &c., and three side Gates. out up to prevent fraud upon the principal gates, the Interest upon which sum total amounts to £762, and exhibit No. 4, will show that at the present rate of Tolls the three established Gates will produce about £2,250 per annum, which will, after deducting the above Interest and Toll Keeper's wages leave a sufficient sum to pay the Interest of £20,000 more and which is necessarily on the increase.

The Trussees, after making these very pleasing statements and proving their correctness by the Exhibits annexed, feel very confident that the Legislature will not hesitate to authorise further loan, to the extent of at least £20,000, being, as shewn, no more than the present income will pay the interest of, and which, whee expended, will authorise the establishment of other Gates, likely to produce in their turn funds sufficient to proceed with the work as fast as the country requires, and also as fast as laborers will be found to accomplish the same, without an increased rate of expense.

The Trustees have occasion once more to remind the Legislature that none of the monies which has as yet been raised under the authority of Parliament on the security of the Tolls, only could be obtained until one or more of the Trustees at different periods made themselves personally responsible for the amount borrowed, none of the monied institutions in the Province having been found willing to advance on the security of the Tolls without such guarantee.

The different Trustees having made themselves responsible for separate parts on the faith of Parliament and their opinion of the produce of the Tolls, take it for granted that now the work is so far advanced, and its success so satisfactorily proved, the Legislature will see the justice and propriety of releasing them from the responsibility, by rendering either the Province or the District accountable for such part of either principal or interest as the Tolls may not discharge. Should any defalcation take place from circumstances beyond the reach of probable conjecture, the Trustees also take the liberty to state, that in their opinion the statute labour at present applicable to those roads should be changed to commutation, and to be collected and paid over

for the good of the said roads the same as the Toll, or in such manner as the wisdom of Parliament shall see fit to appoint, and if the commutation was raised to five shillings a day the person residing upon the respective roads would still be gainers when the vast increase to the value of their property is taken into consideration.

They would also recommend an addition to the number of Trustees on the respective roads so as to ensure resident ones on those parts likely to be proceeded with soon to take especial charge in their neighborhoods.

The trustees in closing their Report for the second year consider it their duty to draw the particular attention of the Legislature to exhibit No. 6, because it will enable them to judge as to the probable expense necessary to macadamize a mile of road; it will also be a guide to others employed in similar services, and serve as a caution to those who may have occasion to contract with strangers for like services. The extraordinary disparity between the different estimates shows how wanting in information or management our first contractor must have been, when, although he estimated for a mile at £1250, and contracted to perfect at £1500, he, nevertheless, asked to be paid at the rate of more than £4000 the mile, and that when he, a professed practical civil engineer declared that he had expended beyond that rate, Watson & Bell, workmen under him, finished the same mile which he had began, at the rate of £2400 per mile, at the worst season of the year, and the following summer for £1320 per mile, 16 feet wide, or £1650 of the same width, which facts have never been accounted for.

All which is respectfully submitted,

D. BOULTON, Chairman.
CHARLES E. SMALL.
G. T. DENISON.
CHARLES THOMPSON.

CIRCULAR.

GOVERNMENT HOUSE, TORONTO, 12th Feb. 1836.

(Copy)

With reference to the communication addressed to you on the 26th of May last, by command of the late Lt. Governor, acquainting you that the King had been graciously pleased to approve of your being called to the Legislative Council of this Province, and that his Majesty's Warrents for that purpose had been received by His Excellency; I am commanded by the Lieut. Governor to request you will have the goodness to state for His Excellency's information whether or not it is your intention to take the usual oaths and to assume your seat in that body.

I have the honor to be,

Sir, Your most ob't, Humble Serv't J. JOSEPH.

ARCHIBALD McLEAN, GEORGE HAMILTON, JOHM MCAULAY, PHILIP VANKOUGHNET, Esqrs.

TORONTO, 13th Feb. 1836.

(Copy)

SIR:

I have the honor to acknowledge the receipt of your letter of yesterday's date, requesting by the desire of His Excellency the Lt. Governor, to be informed whether or not it is my intention to take the usual oaths and to assume my seat as a member of the Honorable the Legislative Coun-

I feel deeply grateful to His Majesty and to his late representative in this Province, Sir John Colborne, for the honor intended to be conferred upon me by this appointment; and I trust that I shall not be considered as offering the slightest disrespect to them in the course which I now think it my duty to adopt. If I were influenced by personal considerations, I should without hesitation accept of this high mark of His Majesty's approbation of my conduct as a public servant for nearly 16 years; during which I have had a seat in the Provincial Assembly: but having been elected by general acclamation to represent the Town of Cornwall in the present parliament, under peculiar circumstances, I feel that I cannot with propriety abandon the discharge of the duties which I have undertuken; and I have therefore to request that you will be pleased to signify to His Excellency the Lt. Governor that it is not my intention to assume a seat in the Honorable the Legislative Council.

I have &c.

ARCHIBALD McLEAN.

J. Joseph Esq. Secretary &c. &c. &c. }

CORNWALL, 25th Feb. 1836. (Copy) -I have the honour to acknowledge the receipt of your letter of the 12th Instant, requesting me to state for the information of His Excellency the Lieut. Governor, whether or not it is my intention to take the usual oaths as a member of the Legislative Council, to which the King had been graciously pleased to call me, and to assume my seat in that body-I beg to say for the information of His Excellency that it is my intention so to do, and to repair to Toronto within a short time for that purpose.

I have &c. Signed) P. VANKOUGHNET.

John Joseph, Esq. Civil Secretary, Toronto.

> DISTRICT OF OTTAWA, March 4th 1836.

(Copy)

I have the honor to acknowledge receipt of your communication of the 12th ultimo and to state for the information of His Excellency the Lieut. Governor, that it is not my intention to take the usual oaths, and assume a seat as a member of the Legislative Council of this Province; at the same time I have to express my grateful sense of the honor conferred on me by His Majesty, by his issuing His Warrant calling on me to form one of that Honorable Body, and to assure His Excellency, that His administration of the Government of this Province, shall receive my warm and zealous support, the undisguised object of his instructions being firmly to maintain the happy constitution of this country inviolate.

I have &c. (Signed) GEORGE HAMILTON.

John Joseph, Esq. &c. &c. &c. Toronto.

> GOVERNMENT HOUSE TORONTO, 15th March 1936. (Copy)

SIR: I am commanded by the Lieut. Governor to enquire of you if Mr. Morris, Mr. Mc-Aulay and Mr. Vankoughnet, have taken their oaths as Legislative Councillors.

I have &c., J. JOSEPH.

GRANT POWELL, Esq. Clerk Legislative Council.

> LEGISLATIVE COUNCIL OFFICE, 15th March, 1836.

(Copy)

I have the honor to acknowledge receipt of your letter of this day, and to state in reply, that Mr. Morris, Mr. McAulay and Mr. Vankoughnet have taken their seats in the Legislative Council, the first on the 25th January, the second on the 19th February and Mr. Vankoughnet yesterday.

I have &c GRANT POWELL.

John Joseph, Esq.

MESSAGE

FROM

HIS EXCELLENCY THE LIEUTENANT GOVERNOR.

WITH

A REPORT FROM THE COMMISSIONERS

FOR

ERECTING A BRIDGE OVER THE RIVER TRENT.

F. B. HEAD.

The Lieutenant Governor transmits to the House of Assembly the accompanying copy of a Report from the Commissioners appointed to superintend the erection of a Bridge across the River-Trent.

GOVERNMENT HOUSE,

7th March, 1836.

RIVER TRENT, 4th March, 1836.

SIR.

We the undersigned Commissioners of the River Trent Bridge, beg leave to transmit to you, for the information of His Excellency the Licutenant Governor and the Legislature, the underwritten statement of our proceedings as such Commissioners, since the period of our last Report.

In our report of the 10th March last, we stated that the sum of one hundred pounds, Halifax C'y. remained in the office of the Bank of Upper Canada at Cobourg, unexpended, which sum we recommended should be laid out in improving the approaches to the Bridge, putting in windows, &c. &c. &c.

We have now to state, that we have, since that time, expended the sum of one hundred pounds for the purposes aforesaid, and in making other improvements and amendments deemed necessary by us. Upon drawing upon the Bank of Upper Canada, however, for the said one hundred pounds, and upon subsequent investigation, we thave found that the sum of £S 2 5 only was in that Bank; and that the residue of the said one hundred pounds was in the hands of our fellow Commissioner, James G. Bethune Esqr. unaccounted for. The sum of ninety one pounds seventeen and seven pence still remain in Mr. Bethune's hands. Having become liable for the amount to our Contractors and others, we have paid it from our private means.

We have further to state for the information of His Excellency and the Legislature, that we advertized for tenders for the Tolls of the Bridge for a year; and that on the 24th March last the tender of James Holland of this township, being the highest, we leased the toals to him for one year from that day, taking due security for performance of the yease. A copy of the tolls we have annexed. We

have received from Mr. Holland the sum of onehundred and fifty-three pounds, Halifax currency, being the amount of the tolls, and have paid overthat sum to the Receiver General of the Province, to the uses of this Province.

All which is respectfully submitted.

ROBERT C. WILKINS. REUBEN WHITE.

Joun Joseph, Esq. &c. &c. &c.

ROBERT C. WILKINS., REUBEN WHITE.

MESSAGE

FROM

HIS EXCELLENCY THE LIEUTENANT GOVERNOR,

WITH THE

REPORT OF THE COMMISSIONERS

OF THE

LATE PRETENDED BANK AT KINGSTON.

F. B. HEAD,
The Lieutenant Governor transmits to the House of Assembly the accompanying copy of a Report of the Commissioners of the late pretended Bank at Kingston.

GONERNMENT HOUSE, 7th March, 1836.

(Copy.)

To His Excellency Sir John Colborne, Knight Commander of the Most Honorable Military Order of the Bath, Licutenant Governor of the Province of Upper Canada, &c. &c. &c.

The Kingston Bank Commissioners beg leave to present the annual Report of their proceedings to

Your Excellency:

In our last the particulars were stated of the arrangement made with Mr. Smith Bartlet, one of the principal creditors to the institution. The wild lands conveyed for the balance of the instalments due by him, have been the source of much trouble, difficulty and expense.-The Clerk has made several journies to the lots of land scattered about the Province, experienced great difficulty in tracing the titles and some he found actually occupied by people who produced a conveyance.

It was the intention of the Commissioners to dispose of these lands, and with the proceeds to discharge the personal obligations against them for the necessary expences of their office since they commenced their duty, and for that purpose offered them for sale, and doubts have arisen if the authority under which the act empowered them to convey real property, although it expressly permitted them to receive such property for debts due the institution.

It is absolutely necessary that the Legislature do pass an act to enable them legally to convey all such property which they may hold as Kingston Bank

Commissioners.

The Commissioners regret notwithstanding their utmost endeavours, that they have not before this period been able to bring this very unpleasant duty to a close, but new difficulties are constantly presenting themselves which made it impossible..

The want of funds prevented the Commissioners proceeding to the best advantage. The Legislature omitted to furnish the means which the various and complicated duties imposed upon them at all times required. Many debts which are lost might perhaps have been recovered, and no arrangements could be made within the very short limitations allowed by the act.

There could be no prospect of receiving current. money, as long as payments could be made, and also awarded in Bills of the Institution procured at eighty and ninety per cent discount. Nevertheless. the Commissioners with such a prospect before them, and trusting to the Legislature to make good to them all necessary disbursements, have upon their own responsibility procured funds to support their office, which required a Clerk whom it is impossible to discharge until the affairs of the Institution are finally arranged. On that account he had to be detained, and by that means prevented from engaging in what he expected to be more profitable for his family. It was supposed his services would be required for two years, consequently he made other engagements far beyond that period, which he had to relinquish.

The Commissioners were appointed under the Provisions of an Act of the Legislature of Upper-Canada. To that authority they wish a full statement to be made of all their proceeding from the commencement of their duty. For that purpose they respectfully request that Your Excellency will be pleased to recommend the Honorable the House of Assembly to appoint a Committee of that Honorable House to investigate all matters and things: done by them as Kingston Bank Commissioners, and for that purpose their Clerk be sent for, who from his general knowledge of the proceedings, is the most competent person to give the necessary information to the Legislature.

All of which is most respectfully submitted.

JOHN STRANGE THOMAS MACNIDER, Commissioners: KINGSTON, January 2nd, 1836.

A true Copy.

REPORT

ON THE

PETITION OF JAMES KING,

AGENT FOR W. R. HOPKINS, Esc.

To the Honorable the Commons' House of Assembly.

The Committee to whom was referred the Petition of James King, of the City of Toronto, Esquire, Agent for William R. Hopkins, Esquire, have agreed to the following Report:—

Your Committee, after having carefully examined various persons, connected with the Land Granting Department and others and after having perused various books and documents in support of the several allegations contained in the Petitions, find that Mr. Hopkins a meritorious British officer, of 24 years service was induced to emigrate to this Province in the year 1833 under the provision of the general order of the Horse Guards of first of August 1831 by which he was entitled to \$692 worth of land.— On his arrival he was located by the late Government with the sanction of Sir John Colborne, for lots No. 2 and 3. in the first concession of the township of Vespra in the Home District and that on the faith of this location of the late local Government, he with his wife and family settled on the said lots, built a house and made other improvements thereon where they remained for four months. At the expiration of six weeks of this time Mr. Hopkins was obliged to come to the city of Toronto for medical advice, in consequence of a breaking out of a wound received in the Castle of Badajos after it was carried by Escalade. On his arrival in Town he was informed for the first time that the lots with others were reserved for Park Lots, for an intended Town on Kempenseldt Bay.

At the expiration of four months from the time of location, Mr. Hopkins received from Mr. Surveyor General Hurd an official letter of the 1st of October 1833, intimating that the land in question was a reserve and would be laid out in five acre lots, two lots of which, would be put up to auction, to afford him an opportunity of purchasing his own improvements.

Mr. Hopkins finding all remonstrances with the late local government in vain, referred his case to the consideration of the Right Honorable the Secretary of State for the Colonies, who adjudged that

Mr. Hopkins should be at liberty to purchase twenty five acres of the alledged reserve at ten shillings per acre.

The Committee are of opinion that if Mr. Spring Rice, the then Colonial Secretary, had been aware that Mr. Hopkins was located by the local government with the sanction of Sir John Colborne.

ment with the sanction of Sir John Colborne.

That four hundred acres of this alledged reserve with a frontage on Lake Simcoe were recently sold to a Captain Oliver, at five shillings per acre and that three hundred acres more were granted to the North West Company. He would have come to a different conclusion.

The intended town of Kempenfeldt after the experience of over twenty years, its situation not being such as to induce people to settle on it, was abandoned and the town of Barrie two miles distant being at the head of the navigation of Lake Simcoe was selected a few months before Mr. Hopkins obtained his location.

Your Committee, in the course of their enquiry have had occasion to look to the Provincial Act 41st Geo. 3, C. 2. Sections 1 and 3, commonly called the Heir and Devizee Act, whereby the commissioners appointed under that Act have the power to reject or allow the claims of the Heir and Devizee of the Nomince of the Crown where no Patent is issued to a lot or lots of land, as in their judgment the justice and equity of the case may require, without any regard to legal forms or solemnities whatsoever, and to report on the same accordingly, such report to be final and conclusive.

The Lieut. Governor for the time being on receiving a favorable report, has in the opinion of the Committee no discretionary power to prevent the issuing of the Patent to such heir or devizee.

If Mr. Hopkins had died intestate, after being located for, the lots in question Your Committee humbly conceive his heir at Law would have both a legal and equitable claim to them. If therefore Mr. Hopkins's eldest son would be entitled to them after his decease, it is respectfully submitted that to deprive the Father while living appears to be at variance with common justice. It appears in evidence before Your Committee that a man of the name of Patrick Strange was located for a lot in the township of Markham, and that for some cause or other, his name was erased from the Map, and that at the expiration of twenty years after his location, and two years after his death, his heir at law applied to the Commissioners under the Heir and Devisee Act, the name of Patrick Strange was ordered to be restored to the Map and the Patent issued in the name of Richard Strange his brother and heir at law.

Your Committee taking in consideration the peculier hardship of Mr. Hopkins's case and the great

injustice done him and considering that if his case is left unredressed it may have (from its publicity the effect of discouraging the settlement amongst us of valuable emigrants. Your Committee therefore recommend an humble address to His Excellency the Licutenant Governor, praying His Excellency to restore Mr. Hopkins to his land and to compensate him for his loss of time, inconvenience and the great expense he has been put to without any fault of his own upon his surrendering to the Crown the seven hundred acres already granted to him, they respectfully submit herewith the draft of an Address for the adoption of your Honorable House.

W. B. WELLS,

Chairman.

COMMITTEE ROOM, 28th March, 1836.

No. 132.

MESSAGE

FROM THE

LIEUTENANT GOVERNOR,

WITH A

PETITION FROM CERTAIN CHIEFS

OF THE

CREDIT INDIANS.

F. B. HEAD.

The Lieuvenant Governor transmits to the House of Assembly for its consideration, the accompanying Petition of certain Chiefs of the Mississagua Tribe of Indians of the River Credit.

GOVERNMENT HOUSE, 28th March, 1836.

To His Excellency Sir Francis Bond Head, Knight, Commander of the Royal Guelphic Order of Hanover and of the Prussian Order of Meril, Lientenant Governor of the Province of Upper Canada, &c. &c. &c.

The Petition of the undersigned Chiefs of the Mississagua Tribe of Indians of the River Credit—

HUMBLY SHEWETH,

That Your Petitioners are the owners of certain property situate upon the River Credit, and with a view to increase the value of the same, Your Petitioners became and are now the holders of one half of the Stock of a certain adventure or undertaking for constructing a Harbor at Port Credit, which resisty of Stock amounts to the sum of £2,500 currency; and upon which your Petitioners have already paid up one half.

That the work at the said Harbor, is considerably advanced and Your Petitioners are in expectation of being called upon shortly by the River Credit Harbor Company to pay up the remainder of the Stock, for which the Petitioners have so subscribed as aforesaid, to enable the said Company to discharge the sum due and owing to the Contractor for the execution of the said work.

That Your Petitioners are at present without fands to meet such demands, but having sold certain lands belonging to them at the Twelvo Mile Creek and at Port Credit, payable by three annual instalments and being also possessed as before mentioned, of one half of the said Harbor and of the profits to accruotherefrom, your Petitioners are desirous of raising the sum of £1000 by a Mortgage thereof, for the purpose aforesaid, for which they consider the same would afford an ample security such loan to be repaid by your Petitioners in five years.

That Your Petitioners humbly hope and request that Your Excellency will be pleased to cause this Petition or the subject matter thereof to be laid before the Commons House of Assembly, and if Your Excellency should not doem it improper so to do accompanied by a recommendation that, that branch of the Logislature would if they should so think fit, cause such arrangements to be made for advancing to Your Petitioners the sum of £1000 for the purpose sforesaid, and to be secured with interest on the property of Your Petitioners above referred to, in such manner as to that Honorable House may seem meet. And your Petitioners as in duty bound will ever pray.

JOSEPH SAWYER, his mark-PETER JONES,

SAMUEL WAHBAHEEB his mark.

Chiefs of the Credit Indiana.

Caraji (Cjerikasi Piri

RIVER CREDIT, 2 21st March, 1836. §

REPORT

ON THE

LIGHT HOUSE

LATELY ERECTED ON THE ISLAND OF BOIS BLANC

BY FINANCE COMMITTEE.

To the Honorable the Commons' House of Assembly.

The Committee on Finance beg leave respectfully to report:

That they have examined the matters referred to them relating to the Light House at Bois Blanc, on Lake Erie, and respectfully recommend to the Honorable the House of Assembly to grant the sum of three hundred pounds, which with the sum of eight hundred pounds already granted will amount to the sum of eleven hundred pounds currency.

The accompanying document A is a "schedule of tenders for building a Light House and a Cottage

for the keeper, on the lower or south end of the island of Bois Blanc, at the entrance of the Detroit River, in the County of Essex, in the Western District—received by the Commissioners pursuant to an act of the Legislatuge.

Document B is a letter from Robert Reynolds, Esquire, shewing the advantages of Bois Blanc over Bay Point, as a scite for a Light House.

All which is respectfully submitted.

CHARLES DUNCOME, Chairman.

SCHEDULE of Tenders for Building a Light House and a Cottage for the Keeper, on the lower or south end of the Island of Bois Blanc, at the entrance of the Detroit River, in the County of Essex, in the Western District—reserved by the Commissioners, pursuant to an act of the Legislature, viz:

| No of Tender. | By whom Tendered. | Name, of Sureties. | Amount Paid, Currency. | |
|------------------|-------------------|--------------------|------------------------|---|
| 1
0
3
4 | J. Moor | | 1175 0 0
1075 0 0 | One thousand one hundred pounds. One thous'd one hund'd & seventy five £. One thousand and seventy-five pounds. One thous'd two hund'd & forty-five pounds. |

It is understood that the party whose tender may ultimately be accepted, is prepared to give good and sufficient surety for the due and perfect performance of the contract.

(Signed)
(Signed)

R. REYNOLDS, Commissioners.

Mr. Fortier and myself as joint Commissioners for crecting the intended Light-House and Keeper's House in this neighborhood, made an Official Report to the Lieut. Governor on the 18th January, of the measures adopted by us for carrying the provisions of the Act into effect, and stating our reasons for so-lecting the lower end of the Island of Bois Blanc in preference to the Bar Point, for the scite of the Light-House; and transmitting for his Excellency's information, a schedule of the tenders received, for constructing the buildings.

To this communication we have as yet received no reply From the unexpected and sudden changes of Governors, think it rom the unexpected and suduan-analogs of Governors, think it probable that His Excellency may not have been able to communicate our Report to the House. Under this impression I think it as well to enclose you a copy of the schedule of Tenders received; and, at the same time, I think I had as well endeavor to point out to you one reason for deserting the Island as the seite for the Light House—and I trust the reasons I shall be able to assign, will be considered sufficiently cogent to justify us in

An opinion generally prevalent with the musters, of vessals and steamers on the lake, that the Bar Point is a very ineligible selte for the purpose of a Light House. We deemed it proper before taking any active measures for carrying the act into effect, to ascertain by enquiry where the Light House ought really to to ascertain by enquiry where the Light House ought really, to be placed to render it of the greatest possibutility. To enable us to arrive at that conclusion, we consulted several of the most experienced and respectable ship anattra employed in the most gation, both British and American, who appeared unanimous in opinion that the South or Lower and of Bois Blancis decidedly the most eligible scite for that purpose.—Independently of its sphere of utility being greatly enlarged by placing it on the island—certainly a primary consideration—there are other and substantial reasons for giving it the preference.—Inceed hardly point out to you that the buriss a low spit of very trilling elevation above the surface of the Lake, and is composed entirely of loose gravel and beach sand, to the depth composed entirely of loose gravel and beach sand, to the depth of several feet. To obtain a substantial and permanent foundation upon such a bottom would be attended with great ex A tower of from 50 to 55 feet in height from the ground line to

the harrown would also be required to render it of much real use the intern would also be required to render to small the area and the ground being private property could only be obtained by purchase; add to all this, the expense of transporting the stone for would be greatly enhanced to the contractors. Now stone, &c. would be greatly enhanced to the contractors. Now by placing it on the island independent of increased utility, a su-perior elevation of fifteen feet can be obtained, rendering a tower perior elevation of atteen seet can be obtained, removing a tower of '40 feet in height sufficient for every useful purpose; and a solid and durable foundation can be secured at a comparatively trifling expense. Taking these various circumstances into consideration, we had the plans and specifications prepared accordingly, with a view to placing the buildings on the island. Yet under all these advantages, you will perceive, that even the lowest tender exceeds the sum appropriated by two hundred and seventy-five pounds. We have in consequence come to the determinution of proceeding no further in the business, until we can ascertain if the Legislature will grant a sufficient additional suffito enable us to carry the provisions of the act into execution.

As this is the proper season for providing stone and other heavy materials, had you not better, increase one Report should not have been laid before the Legislature bring in a bill for an not have been faid before the Legislature bring in a billion an additional grant of three hundred pounds to enable us to go on? I need hardly remark to you that a Light House at the entrance of this port is vitally necessary to the navigation, and commercial interest of the district. The disastrous gales of last full have shown how much such a thing is required.

I have been confined to the House for several days by a ver severe cold, and could not go to town to see my brother commis-sioner on the subject of this letter—but I make the communicattion for your own personal information, in case you may deem it necessary to bring in a bill for a further grant, which cortainly should be done and the result ascertained as soon as possible; as the work may otherwise be greatly retarded of course should you find it necessary to do so; you are at liberty to make what use of this communication you wish.

I am, my dear sir, Your very faithful And obcoient servant, ROBERT REYNOLDS.

No. 134.

To the Honourable the Commons House of Assembly, &c. &c. &c.

The Committee on Finance beg leave respectfully to Report,-

That they have examined the allegations contained in the Petition of Edward H. Molloy, Esq., complaining of the conduct of John Bostwick, Esq., of Port Stanley, in the London District,—that they have examined the parties, and Elias Moore, Esq. a member of your Honourable House, whose evidence and statements are hereunto appended.

All of which is most respectfully submitted.

CHARLES DUNCOMBE, C airman.

COMMITTEE ROOM, 9th April, 1836.

FRIDAY, 1st April, 1836.

EDWARD HAMILTON MOLLOY, of Port Stanley, in the County of Middlesex, Forwarder, called in and examined.

Q.-1. Have you been for a long time in business at Port Stanley ?- Ever since 1828. I settled at Kettle Creek.

Q:-2. You have stated that Mr. Bostwick holds a plurality of offices. What are they ?-He is Post Master at Port Stanley—he is Collector of Customs at the same place—he is Collector of harbor dues for Government at the same place—he is a Justice tisement of the Peace for the same County—he is Commis-chandize.

sioner of the Court of Requests at Port Stanley-heis a licensend Surveyor-and he is Col. of Militia in the same County.

In what vessels trading to Port Stanley is this Collector of Customs interested as an owner ?—He is part owner of the Britannia, a Schooner trating to Port Stanley, and collects the harbour tolls and custom duties on his own vestel. His son is in the Custom House, and the managing owner of the Sir Robert Peel: His son-in-law, Mr. Chrysler, is also an owner of the Sir Robert.

4. Is the Collector of Customs, at Port Stanley, a forwarding merchant?—He is—I give his advertisement for forwarding goods, produce, and mer-

\*\* PORT STANLEY, KETTLE CREEK, UPPER CANADA.

Storage and Forwarding.

THE Subscriber still continues the above business at Port Stanley, and is prepared to receive and forward all

PRODUCE AND MERCHANDISE

that may be entrusted to his care, at as low rates as any other establishment. He is also ready to make advances and pay frieght on all property that may be consigned to him.

"JOHN BOSTWICK."

Port Stanley,
 Kettle Creek, U. C.

- 5. You state in your petition that Mr. Bostwick was a defaulter to the Government, to what amount and under what circumstances was he thus deficient?—Mr. Bostwick was Auctioneer to the Commissioner for the sale of Crown Lands. Col. Talbot gave him the situation—he received monies for the sale of these lands and became a defaulter. I cannot state the particulars, but have heard that he had paid up since.
- 6. Are you in arrear with Mr. Bostwick, the Collector of the Harbour Dues, that were due in December last?—I am not. The harbour dues, up to December last, might amount to five or six shillings which I did not pay, as Mr. Bostwick was in arrear to me for stone for a builing.
- 7. What sum does Mr. Bostwick receive for collecting Harbour Tolks?—I think it is 5 per cent.
- 8. You say Mr. Bostwick's son is employed in the Custom House?—Yes—he officiates as Collector of Customs and Harbor Dues, and I don't think he is sworn as a deputy, nor is there any comptroller, examiner or check upon their collections.
- 9. How is the Post Office managed?—Sometimes he delivers the letters himself—sometimes the members of family, male and female—the people complain, but are afraid to speak out, because Bostwick has power in so many ways to injure those who may offend him
- 10. Did you first apply to the Lieutenant Goververnor for redress of the grievances which you have brought under the notice of the House of Assembly ?—I did, by Petition, but redress was refused.— I give in the answer of His Excellency as communicated through His private Secretary, Mr. Joseph.

"GOVERNMENT HOUSE,.

4th February,

"With reference to your Memorial of the ult., signed by you in behalf of four other getlemen, submitting, for His Excellency's consideration, the propriety of appointing to the Office of Collector of Customs and Harbour Tolls, at Port Stanley, some person not engaged in vessels or engaged in warehousing. I am commanded by the Lieutenant Governor to inform you, that in the event of that situa-

tion becoming vacant, your suggestions shall be taken into consideration; but as there appears to be no charge brought against the official conduct of the present holder of that Office, His Excellency cannot deem himself called upon to remove him.

"I have the honor to be,

"Sir,
"Your very obedient,
"Humble servantt,

"J. JOSEPH."

"EDWARD, H. MOLLOY, Esq."

11. Is Mr. Chrysler the merchant and son-in-law of Bostwick, a part owner in the Britannia?—He is—and also an extensive importer from the United States of Salt and Merchandize, on which the son and the father-in-law collect the duties. No one knows what is collected.

What profit is made by Mr. Bostwick's Warehouse, and does he do the principal business in that line in Port. Stanley?—I would say not less than £250 annually, which he would not do were he not. Collector of Customs. He monopolizes the business in consequence of his official situation.

(Signed).

E. H. MOLLOY.

ELIAS Moone, Esq. M. P. for Middlesex called in and examined.

- 13: Have you heard the evidence given by the last witness, and do you know whether Mr. Bostwick holds the office and carries on the business stated by Mr. Molloy?—I have heard the evidence given by Mr. Molloy, and have understood that Colonel Bostwick holds the offices and carries on the business mentioned by him.
- 14. What property does Mr. Bostwick hold at Port Stanley?—Port Stanley and the property round it, and the Creek for nearly a mile up are owned by him—I understood that he had a grant of six hundred acres in that place and eight hundred in Carradoc.

Copy of Petition of EDWARD H. MOLLOY, on which those proceedings were had.

To the Honourable the Commons House of Assembly of the Province of Upper Canada in Parliament Assembled.

The Petition of EDWARD H. MOLLOY, of Port Stanley, in the County of Middlesex, in the London District:

HUMBLY SHEWETH,-

That Your Petitioner has been located at Port Stanley, in the County of Middlesex in the London District for some years past, where he has erected, at very considerable expense, a Warehouse, Wharves, and other Buildings, in expectation of partaking of the advantages likely to accrue in consequence of a harbour being constructed at the mouth of Kettle Creek—that the presente

Collector of Customs is engaged in the same line of business as your Petitioner, viz: in the ware-housing and forwarding: and being owner of two vessels and Collector of Customs and Harbour Tolls, Post Master and Magistrate. That by reason of the said Collector of Customs holding these public offices, he possesses such decided advantage, over your Petitioner, that he is unable to obtain but a small share of public support. That your Petitioner in his repeated applications to the importers of merchandize and the shippers of produce for a portion of their business, has been invariably answered to the purpose, that a part would be given under other circumstances; but that they, as owners of goods, found it more to their interest to consign their goods and produce to that establishment, conducted by a Collector of Customs, than to any other—that the importation of goods from the United States (subject to duty) and destined for the surrounding country, is considerable in quantity. The importers and merchants in the said District are induced to give that establishment the preference owned and conducted by a Collector of Customs, in consequence of a lenity which can be extended to them by the said Collector in awaiting their convenience for the payment of duties on Harbour Toll on their goods. And that moreover, your Petitioner would observe, that the said present Collector of Customs has been a defaulter to the Government it is said to a considerable amount of monies received by him for School Lands, sold in the London District some years since, which has not yet, or but recently, been paid over by him. That a son-in-law of the said collector is extensively engaged in the importation of salt and goods, and which enables him, in consequence of his connection with said collector, in a great measure to monopo-That your Petitioner humbly prays lize the trade. your Honorable House, to cause enquiry to be made into the truth of the allegations herein set forth, and to address the Lieutenant Governor, requesting the removal of the present incumbent, and the appointment of some person not concerned in vessels, or ware-housing, or forwarding, in order that your Petitioner may receive a share of public support to enable him to support his family, and in some measure to compensate him for his heavy outlay and expenditure on warehouses and wharves. That your Petitioner is of opinion, that the emoluments arising from the joint offices of Collector of Customs and Harbour Tolls would support a person in a respectively. table manner.

That the present Collector of Customs at Port Stanley is John Bostwick, Esq., an extensive land proprietor, and owner of that place, with the exception of a few Town Lots sold to Petitioner and

Confiding in the justice and attention of your Honorable House, your Petitioner, as in duty bound, will ever pray.

EDWARD H. MOLLOY.

PORT STANLEY, January 1836.

Observations on preceding Petition, addressed by Mr. Bostwick to the Committee.

To the Honorable the Finance Committee, to whom the Petition of Edward H. Molloy has been referred.

HONORABLE GENTLEMEN:

Having been favored with a copy of

said Petition, I beg leave to submit to the consideration of your Honorable Committee the following remarks: That after carefully examining the said petition, I observe, that the prayer of Mr. Molloy is, that I shall be removed from the situation of Collector of Customs for the port of Port Stanley, in the London District, solely with a view to his benefit, without having made the slightest charges against me for any dereliction of duty. It seems almost useless to reply to his reasons, (if reasons they can be called) for urging my dismissal from office.

I cannot forbear however to make some remarks on the allegations set forth in his petition. Mr. Molloy did not crect his warehouses and wharf previous to the construction of the harbor at Kettle Creek, with the expectation of deriving advantages from its completion, for they were not erected until some years had passed after the construction of the harbor-neither does my holding the offices he enumerates influence any individual, I am confident, in making his selection of house, through which to forward his merchandize and produce, as a great proportion of them sent their goods through my hands years before Mr. Molloy commenced business as a Forwarder and Wharfinger-and had ever expressed their entire satisfaction in the manner I had conducted their business, so much so that they had no desire to withdraw their custom from me and give it to others; and I very much doubt Mr. Molloy's averment, that they assigned as a reason for not giving him their custom, was in consequence of my holding the office of Collector of Customs and Harbor Toll. I positively deny that any lenity has been extended towards my own customers, in awaiting their convenience for the payment of duties and harbor toll, that has not also been equally extended towards his customers and all others—the same lenity has been extended to Mr. Molloy himself, and he is at this moment indebted to me the amount of his harbor toll due in December last. Another reason Mr. Molloy assigns is, that I was a defaulter to the government of monies to a large amount, received by me on sales of school lands, which have not yet been paid, or but recently.

I do not deny that I was in arrear to the government for a time for a certain sum, not to say a very large one, but which was paid many years sinceand the government was perfectly satisfied that there was nothing venal on my part in the transactionbut subsequently to which I have received the appointment to all the offices I have now the honor to hold under the government.

Another singular reason assigned is, that I have a son in-law who imports largely, and in consequence of his connection with me, it enables him to monopo-lize. Nothing can be more absurd or unfounded— Mr. Crysler at St. Thomas, the person alluded to, is in a situation not to require the favors of a Collector of Customs to enable him to carry on his business; neither has he received more from me than has been equally extended to all others.

Mr. Molloy insinuates that I hold a plurality of offices that are incompatible—as for the situations of magistrate and post master, no doubt your honorable committee will readily believe, are not sinecures, but on the contrary are attended with considerable expense. The office of Collector of Customs is the only one that I actually derive any profit from:—the income is £100 per year, together with fees of office to the probable amount of fifty dollars per annum—I received 5 per cent on the amount of money collected for harbor toll, which does not remunerate me for the time and trouble in collecting.

Mr. Molloy states that it is his opinion that the income derived from those two sources is amply sufficient to support a family respectable—in opposition to which, I may offer my opinion, that Mr. Molloy has no knowledge from personal experience, what sum is requisite for the decent support of a family, as his own selfish person is the sum total of the family he has ever supported.

Mr. Molloy would lead your honorable committee to believe he is in danger of being deprived of the means of subsistence in consequence of my holding the office of Collector of Customs; which can scarcely be apprehended as he possesses I believe nearly or quite as much real estate as myself.

Mr. Molloy asserts that I am interested in vessels, which he seems to impute to me as a crime worthy to deprive me of office, when he well knows that I am the owner only of one fourth part of a small schooner, over which I never exercised the least control, and which I should be well pleased to have taken off my hands, by himself or any other person, at less than cost.

I cannot think that your Honorable House, after a due consideration of Mr. Molloy's Petition, will think it reasonable or just to comply with the prayer thereof.

I have the honor to be,

Honorable Gentlemen,

Your obedient servant,

JOHN BOSTWICK,

Collector of Customs, Port Stanley.

CITY OF TORONTO, 24th March, 1836.

No. 135.

REPORT

OF THE

SELECT COMMITTEE

ON THE

SUBJECT OF A SUSPENSION BRIDGE OVER THE RIVER NIAGARA.

To the Hon. the Commons' House of Assembly, &c. &c.

The Committee appointed upon the subject of a suspension Bridge over the River Niagara or the construction of a Tunnel under the same.

Beg leave to Report:-

That they have given the subject all the time and attention the multiplicity of their various other parliamentary duties would permit, that they have examined Civil Engineers and other gentlemen likely to afford them information upon this subject which might be relied on, the particular details of the information thus derived will be found in the appendix to this report.

That Your Committe from all the information which they have thus collected are led to believe that the construction of a Suspension Wire Bridge across the Niagara River is practicable, and would be of great convenience to persons desirous of travelling across this River at all seasons of the year, but more especially during such periods in the Spring, Au-

tumn and winter in which the anchor or flood ice floats in such abundant, as to prevent the passage of scows, steam, or horse-ferry-boats, and that they have reason to believe that the travel across this river will be very greatly increased upon the completion of a Rail Road from such part thereof as shall be chosen as the site of said Bridge to Hamilton in the Gore District, to London in the London District and to Sandwich in the Western District, and from London to Lake Huron or to the River St. Clair, for the incorporation of a company for which purpose a Bill is now in progress before Your Honorable House—has been twice read, and Your Committee trust will become a law.

That Your Committee have drafted a Bill which they herewith present to the consideration of Your Honorable House, and in the appendix to this Report will be found a copy of a Petition to the Legislature of the State of New York upon the same subject, in the views of which Your Committee generally coincide;-

They beg therewith also to transmit the draft of a Bill for the Incorporation of a Joint Stock Company for the purpose mentioned.

All which is respectfully submitted, DAVID THORBURN, Chairman.

COMMITTEE ROOM, HOUSE OF ASSEMBLY, 11th April, 1836.

> ST. CATHARINES, 23d March, 1836.

Sin, I regret that I have not sooner had an opportunity to present, for your investigation, the enclosed papers, No. 1 and 2, respecting suspension curves.

Upon a comparison of the drawing with the reasoning adduced, it appears that a span for any ordinary catinary may be correctly calcul ated, & the best theoretic dimensions found.

Mr. Gilbert proceeds much further with his investigations than I have at present followed him; & his theoretic has been reduced to practice not only at the Menai, but upon spans of less magnitude, at all these works certain minutia have been observed, that were only acquired by experience.

I have the honor to be, Your very obed't serv't, FRANCIS HALL.

CHARLES DUNCOMBE, Esq. &c. &c. &c. Toronto.

F. HALL, Esq. examined.

Ques. 1. What is your experience of the construction of Suspension Bridges ?

Ans. 1. During experiments conducted in England by Mr. Telford, prior to the construction of his great works of that description, I had the honor to be in that gentleman's special employment. connection with this subject I examined the chain bridge then in construction by Capt. Brown, R. N. across the Tweed near Rockliff, in company with Mr. Telford; this was the first of the kind of a large span in the country in actual operation. I subsequently assisted at all the calculations, designs, and execution of the Menai between the County of Carnarvon and the Island of Anglesea, also with the designs for a suspension bridge at Newcom, across the Mersey, intended to have spans of 1,000 feet each; this bridge has not been constructed, although experiments upon a large scale fully warranted the mea-

Wire chains 1,000 feet in length, and of proportional dimensions, with intended cables, were made, loaded and tested; the results of these experiments are given by professor Barlow, also his calculations

of curves, appropriate for spans of different dimensions. Professor Gilbert's method of deducing the catinary in finate terms, is also valuable in practice.

Q. 2. What is your opinion of a chain bridge of 1,000 feet span ?

A. 2. The expense of a suspension bridge does not so much depend upon its span as upon the nature of the adjoining banks; if the banks are low the expense of abutments and towers are considerable of course, regulated by the vicinity of good building materials, the towers and abutments of the Menai bridge are about 80 feet in height. Without going into a minute estimate, I think at present prices of iron, a span of 1,000 feet will cost £8,000, and a span of 600 feet will cost £5,000, exclusive of masonry.

Q. 3. What is your experience of Tunnels?

A. 3. I have been professionally employed with Tunnels and Mines of various descriptions, for Canals, navigable Feeders, and water works, and have the experience of the cost of cutting through soft strata, with Brick lining; also, through mixed strata, com-posed in some cases of freestone, in others of Basalt or Lime stone, where the excavation was sufficiently indurated and free of shakes or fissures, the bottom, sides and roof were formed out of the rock, in other parts brick and stone, was substituted for rock.

Q. 4. What is your opinion of the expense of Tunneling per lineal yard?

A. 4. The expense per yard, will in a great measure depend upon the nature of the materials through which the same passes, in ordinary freestone or limestone rock the expense for a Tunnel 25 feet in width and 16 feet high, will be about £25 per lineal yard.

Q. 5. What is your opinion of the proposed communication across the Falls of Niagara?

A. 5. The accompanying sketch will shew my present view of that subject, the measurements are taken from plans in the Surveyor General's office, and supposed to be nearly correct.

By this design it is proposed to pass from the Canadian shore by a Suspension Bridge of 990 feet span, to an Island in Niagara River, from thence by a Tunnel under the bed of the river 500 yards in length to Goat Island; passing over the same by a common road to a second Suspension Bridge of 594 feet span, to the American shore; from my knowledge of the river and adjoining banks, I have no doubt of the practicability of the measure.

Q. 6. What is your opinion of the expense of this proposed communication?

A. 6. Before entering into a detailed estimate of the expense, it will be necessary to have very accurate data to proceed upon, such as measurement of the river and islands at and near the intended scite, also, if practicable, the various depths, above intended line of Tunnel, the height and inclination of the adjacent banks, -elevation to the rail way surfacethe proximity and value of building materials, &c., &c. But I think the work contemplated may be executed for £32,300 as detailed below.

| 4 Towers of | solid mas | onry, fo | reach &\$00 | € 3,200 |
|-------------|-------------|-----------|-------------|---------|
| Tunnel entr | ances, eac | h £300 | | 600 |
| Suspension | Bridge 9 | 90 feet | span | 8,000 |
| Suspension | Bridge 6 | 00 feet | span | 5,000 |
| Tunnel, 500 |) yards lin | cal, at & | 30 per yard | 15,000 |
| Access and | egress, fo | rmation | of roads | 500 |

£32,000

TORONTO, 12th March, 1836.

DEAR SIR,

I have considered the subject upon which I talked with you, at the house yesterday, and think the location of the bridge or tunnel deserves further investigation.

A great point in chain bridge building is to obtain undoubted security for the abutments and as little vibration as the nature of the space to be passed admits.

The Iron work must also be very carefully estimated and no scruples of economy interfere in obtaining the very best description of material that is to be had.

The means at hand of repairing the bridge must also form a part of your estimate.

I have not seen Mr. Hall's plans and cannot therefore judge of them, but recollect that you talked of a thousand feet—did this mean the space of tension or the whole distance from land to land. The Menai Bridge is only five hundred and sixty.

I have thought of the locality, and for the purposes of Trade conceive that three situations naturally point themselves out—

1st. That at the Falls connecting Manchester with Clifton is the least in consequence in a commercial point of view, but the greatest in a national one, as the magnificence of the scenery and the grandeur of such a conception evince.

2nd. At Queenston there are fewer obstacles to overcome, and the transit to the Lake is so much shorter, but it is questionable whether the expense of construction and repair would overpay the difference of outlay between the bridge and the shipment by steamboat—which can navigate the river to Queenston and of course take goods from either side with the greatest case.

It strikes me that there is a third scite and a very feasible one for the chain bride, which would perhaps combine the magnificent with the useful, as future Rail Roads could be brought to it, and that is the Whirlpool, where the shores approach each other very closely, where good abutments could be formed and stone easily procured.

A road to the Falls may be easily made on the Government chain of Reserve and a Rail Road of about four miles in length, or a little more, would take the goods for shipment to Queenston, thus benefiting every place. The transit from the Whirlpool to the Falls would be but an affair of a few minutes by rail road as the direct line is not much more than three miles.

Against this last scheme is the visible interest of Manchester, for visitors would of course prefer seeing the Whirlpool, if they had a good opportunity; it deserves however, consideration as the locality is the best on the river for a bridge of the kind and the distance in a commercial point of view, well divided.

The Engineer must take some things into considerations, if the chain bridge is built at the Falls or the Whirlpool, which do not enter into similar calculations elsewhere.

The continual motion of the air which is much greater and more variable than is generally imagined, and its effect on such a structure may be imagined by the sensation experienced at night in one of the front rooms at the Pavilion.

He must calculate well upon the perishable nature of the shale rock upon which his abutment foundations are to be established, and he must take into serious consideration the continual teemidity of the situation, which no pains will effectually counteract and therefore the expenses in repairs must be greater than usual.

With respect to a Tunnel in such a situation, I should scarcely venture to advise it.-The nature of the rock is against such an undertaking and although it in the end, if favorably completed, is less expensive than a chain bridge, those are obstacles to be overcome that are rather startling, and it would be somewhat difficult even to ascertain the probable nature of the bed of the river from the swiftness of the flood, the eddies and vortices, which would prevent accurate conclusions about holes, fissures, &c. I shall be glad to give any opinion which may be deemed of use upon particular parts of the undertaking or on the measure generally, when I see its details, but should not desire further to interfere with the professional gentlemen employed, who are, I am sure competent for the task, being willing only to act as an impartial and uninterested adviser upon a matter of so much consequence to the commercial interests and the future benfit of the country.

I am,
Dear Sir,
Very faithfully, yours,
R. H. BONNYCASTLE.

To the Honorable Legislature of the State of New York, in Senate and Assembly convened.

The Petition of the subscribers, citizens of the County of Ningara,

RESPECTFULLY SHEWETH.

That the pass between Lewiston and Queenston, Upper Canada, is now an important one, and is yearly becoming more so: that in the winter season it is much obstructed by Icc, and in crossing at all seasons of the year, more or less delay takes place, especially in the night time. In view of present and future inconveniences, existing and to occur in using a Ferry instead of a Bridge, across the Niagara river at a point where the space of water is 587 feet, and at which point a suspension chain bridge of 600 feet span will be sufficient to cross the

River at an elevation of 120 feet above the level of the water, your Petitioners, in their enquiries, have ascertained that some ten years past, a gentleman then residing at Queenston procured the opinion of an able and scientific English Engineer on the subject. That opinion was entirely in favor of the practicability of the work and at a moderate expense compared with the great utility and magnificent character of the improvement. Your Petitioners are aware that authority must be obtained from the Provincial Government as well as from the Legislature of this State, in order to accomplish the object in view.—That a public meeting has recently been held at Queenston and a Committee appointed to take the necessary steps to procure an act of incorpora-tion, which Company, if incorporated, will act in conjunction in erecting the bridge with any Company

that may be incorporated by the authority of this State. Your Petitioners find that the Ferry is granted to the Lewiston Academy for a term of years yet unexpired—the incorporation of a Company may interfere with the interests of that institution. Your Petitioners have therefore consulted with the Trustees, who have agreed to waive all objections provided that certain provision shall be contained in the Act hereinafter prayed for—considering that, as a full equivalent for the loss of the Ferry to the Academy. Your Petitioners therefore pray your Honorable body to pass an act to incorporate a Company for the purpose aforesaid with a Capital of \$50,000.

And as in duty bound they will ever pray. March, 1836.

No. 136.

SECOND REPORT ON THE

ADMINISTRATION

JUSTICE.

the state of the Administration of Justice, respectfully submit herewith their Second Report:-

The Courts of Requests in this Province consist of a body of irresponsible Commissioners, resident in the immediate neighbourhood of the litigant parties, and to them are committed the Administration of Justice, in cases of debts under £10, without the medium of a Jury, or the power of Appeal.

The Sheriffs are chosen during the pleasure of the Governors of Upper Canada, and have very extensive powers entrusted to them by the laws and usage of the Colony, some of which, especially the latitude allowed them in practice in the choosing of Juries, is very dangerous to the liberty of the subject, under a government, the officers of which deny a responsibility to public opinion.

The laws relating to debtor and creditor are very unsatisfactory to the community. A well considered

regulation, by which the unfortunate debtor would be enabled to divide his property equally among his creditors, is much wanted. At present the creditor who prosecutes and obtains judgment first, is paid in full although perhaps pathing is left for all although perhaps. in full, although, perhaps, nothing is left for others who were more indulgent and forbearing.

> The legal fictions in use in actions of ejectment, as well as special pleadings and the other technical formalities that are calculated to render the laws obscure and difficult to be understood and to retard the ends of justice, ought to be abolished.

As to imprisonment for debt the following maxims appear to be incontrovertible. Debt infers credit; credit ought to infer ability to pay; all credit beyond this is erroneous; payment is the only satisfaction for debt, the possession of the person in a Gaol as a prisoner is no satisfaction. It appears to us that as the law now stands credit rests too much on the power of arrest. The means of payment can only be derived from the property of the debtor or his friends, therefore property, the only proper source of credit, should, be put within the reach of the crediror; the person of the debtor, only as a means to force discovery of his property,

The rigor of the Law might be softened by giving the defendant in actions for debt the privilege of admitting judgment to be, entered up against himself at a very small expense, and that the Plaintiff should demand this before proceeding with his action. if he asked more than the defendant admitted and refused to accept a judgment for the sum which a jury might afterwards award, the costs in that case ought to be payable by the party found to be in the wrong.

The Lieutenant Governors have had the appointment of Justices of the Peace for the last forty years, and it appears to us that they have too often made use of their power for political purposes. At this late period of the session it might be inconvenient for the House, to enter into details, but it appears to Your Committee that an expression of opinion is, called for on the question of the right of appointment to the offices of Justice of the Peace and Commissioner of the Court of Requests

Your Committee think that the time has come in which the power to nominate and appoint these officers, should be placed in the hands of the only safe depository, namely the People of the Province; and that the mode of their election should be by hallot. the foregoing Resolutions.

The power of electing City and County Coroners to serve for a limited period, could also be exercised with the greatest propriety by the freeholders in their several sections.

As the law now stands, many respectable persons decline to act as informers. Were the pecuniary inducement removed, there can be no doubt, but that those whose love of Good Government would induce them to exert themselves to maintain order and enforce the equal and impartial execution of the laws would be greatly augmented.

Your Committee respectfully submit three Resolutions:

> JAMES WILSON, Chairman: W. B. WELLS: DAVID GIBSON, HENRY W. YAGER, JOHN McINTOSH, CHAS. WATERS, DENNIS WOOLVERTON, W. L. MACKENZIE.

1st. Resolved, That it is expedient to place the appointment of Justices of the Peace in the hands of the people in their respective Townships, and that the mode-of their election be by ballot.

2nd. Resolved, That the power of appointing the Commissioners of the Courts of Requests, the Sheriffs of Districts, and Coroners throughout this Pro-vince, belongs of right to and ought to be exercised by the people in their respective townships, and that the mode of their election should be by ballot.

3rd. Resolved, That a select Committee be appointed to draft and report bills in accordance with

No. 137.

REPORT

SELECT COMMITTEE ON PETITION

HAMMILL JOHN

To the Honorable the Commons' House of Assembly.

The Committee to whom was referred the petition of John Hammill beg leave to report, that they have examined the papers and heard the statements of the said John Hammill, and are of opinion that he has sustained considerable loss in the erection and completion of the bridge over the Grand River at Dunnville, and

would recommend that, there be paid to the said John Hammill the sum of one, hundred and fifty pounds.

All which is respectfully submitted.

ALLAN, N. McNAB,

Chairman:

REPORT OF THE

COMMITTEE SELECT

ON THE

REVEREND D. MACAULAY. PETITION OF THE

To the Honorable the Commons' House of Assembly.

Your Committee to whom was referred the Petition of the Rev. D. Macaulay, respectfully report,

That it appears from Returns sent down to Your Honorable House from His Excellency the Lieut. Governor that the sum of £403 9 1½ of the annual grant of £100 per annum for the District School in the Home District remains unexpended. And whereas in the opinion of Your Committee it is desirable to encourage the delivery of public Lectures upon the arts and sciences by the Masters of the several District Schools within this province, Your Committee suggest the propriety of granting to His Ma-jesty the sum of £100 for each and every District of this Province to be paid to the Trustees of the seve-

ral District Schools so soon as the Governor or person administering the Government, shall be satisfied by the Board of Education that the Master of such District School is capable of and desirous to deliver lectures illustrating the principles of natural philosophy provided that no District School should be entitled to the said sum of £100 for the purpose aforesaid, unless it contained at least twenty Scholars.

All which is respectfully submitted.

James e. Small.

Chairman.

COMMITTEE ROOM, HOUSE OF ASSEMBLY, 12th April, 1836.

No. 139.

REPORT

CATHARINE EFFENER.

To the Honourable the Commons' House of Assembly, in Provincial Parliament Assembled.

of Catharine Effener, respectfully Report,-

That they have investigated the allegations contained in the said petition and find that Lot No. 13, in the first Concession of the Township of York, with the broken front containing about two hundred and seventy acres, was granted to Frederick Brown, in fee by deed, bearing date the 15th October, 1801-That the said Frederick Brown died intestate on or about the 31st January, 1814, seized in fee of the before mentioned Lot, leaving his only daughter Catharine Effener in possession of the said Lands, and extitled at Lands, and entitled to the inheritance thereof, in consequence Matthias of Brown, the only son of the said Frederick Brown, having voluntarily withdrawn himself from his allegance early in the year 1813, during his father's life time. That by inquisition dated the 10th July, 1816, the said property was

The Committee to which was referred the petition | declared forfeited to the Crown as the estate of the said Matthias Brown, when in fact and in law he had no estate therein; but the same was in fact and inlaw the property, of the said Catharine Effener. That the said lands, were subsequently sold by the Crown for the sum of £1,178, 10s.

That the said Catharine Effener, until lately being ignorant of her rights, neglected in due time to traverse the inquisition, whereby she has been deprived of the only inheritance from her late father Wherefore Your Committee report the justice and expediency of passing a Bill granting to the said.
Catharine Effener, the said sum of eleven hundreds. and seventy-eight pound ten shillings, the price for which the said premises sold in 1819.

All which is respectfully submitted.

JAMES E. SMALL, Chairman.

COMMITTEE ROOM, 12th April, 1836.

REPORT

OF

SELECT COMMITTEE

ON

PETITION OF JOHN TAYLOR AND OTHERS.

To the Honourable the Commons' House of Assembly of the Province of Upper Canada.

The Committee to whom was referred the Petition of John J. Taylor and others, inhabitants of the Township of Hope,

RESPECTFULLY REPORT,-

That the Petitioners complain of disorderly conduct of certain Magistrates of the Newcastle District, namely, John T. Williams and William Kingsmill, Esqrs., at the last township meeting for the said township of Hope.

Your Committee, however, beg leave to remark, that from the difference in the statements of a number of the persons who were present at the said township meetings, and who have been examined before your Committee on this subject, they deem it uite unnecessary to lay before your Honourable House the evidence with respect to the proceedings which took place at the said meeting, which resulted in the appointment or return of different individuals to the same offices, appointed in different ways at However desirable it might be the same meeting. that the inhabitants of the township of Hope should be relieved from the embarrassments to which they have become subjected, your Committee deem that this object could only be attained by that part of the proceedings which took place in the street being taken to have been entirely ineffectual.

Your Committee, however, notice, that subsequently to the township meeeting, certain resolutions, (purporting to have been passed at the said meetings signed by the said John T. Williams as Chairman, but which it appears were not drawn until the day after) were transmitted to Sir John Colborne the then Lieutenant Governor, accompanied by a petition, signed, amongst others, by the said John T. Williams and the said William Kingsmill, requesting that as a lust act of Justice, the name of John Brown, Esq. the chairman first appointed at the said township meeting, who is also a Magistrate, might be left out of the commission of the peace. Your Committee, however, cannot discover in the conduct of that gentleman, as a chairman of the said meeting, cause of complaint to justify such a course of proceeding against him.

Your Committee report an address accordingly to His Excellency the Lieutenant Governor.

All which is respectfully submitted.

DAVID THORBURN,

Chairman.

Committee Room,
House of Assembly,
11th April, 1836.

REPORT

SELECT COMMITTEE

ON THE

LIBRARY.

To the Honorable the Commons' House of Assembly, &c. &c.

The Committee appointed by your Honorable House "to enquire into the state of the Library with a view to its augmentation, and as to the condition of the books belonging to the House which have not been arranged and deposited therein, as also what improvements can be made for the better accommodation of Select Committees," beg leave to Report:

That on the Eleventh day of February, 1833. the House agreed to a Resolution for the augmentation of the Library as follows :-

" Resolved, That the sum of five hundred pounds " be placed in the hands of the Speakers of the " Honorable the Legislative Council and House of " Assembly, to purchase books for the Library."

On which the yeas and nays were taken as follows:

YEAS—Messrs. Attorney General, Berczy, Boulton, Brown, Burwell, Chisholm, Clark, Crooks, Duncombe, Elliott, D. Fraser, Jarvis, Lyon, McMartin, McNab, McNeilledge, Randal, Robinson, Samson, Shade.

NAYS-Messrs. Bidwell, Buell, Hornor, Howard, Ketchum, Perry, Roblin, Shaver.

The following is an extract from the address to His Excellency for the payment of the Contingencies of the House :-

" And also in favor of the Speakers of the Hon'ble the Legislative Council and House of Assembly for the sum of five hundred pounds to purchase books for the library."

The grant thus included in the above address was covered by a Statute of 1833-4. But the books were not purchased—the money was not expended according to law-and your Committee felt it to be their duty to call before them the Honorable George H. Markland, and Grant Powell, Esq., whose evidence is hereto appended.

It appears that the sum of five hundred pounds were appropriated by law to a specific purpose, namely the increase of the Library; that it was not so applied; that the Receiver General paid it to Grant Powell, Esq., without the legal authority so to do. That Mr. Powell paid it to Mr. Crookshank, and that it has not been returned to the Receiver General, nor accounted for according to law. Any

warrant that may have been given for this money is clearly illegal, and ought to be cancelled, and the Receiver General ought to be made to account for the money according to law.

T. D. MORRISON,

Chairman.

Commons' House of Assembly, 19th April, 1836.

THURSDAY, 14th April, 1836.

The Committee met.

PRESENT:

Messrs. Morrison, Chairman, Bruce, Parke, and Mackenzie.

The Hon. G. H. MARKLAND, called in and examined.

Question. We would desire to ascertain from you, as the Inspector General of public accounts, in what way the sum of £500 voted for the increase of the Library, on 11th Feb'y, 1833, has been expended ?-I am not aware in what manner the money was expended—on the sixth of August, 1834, a warrant was brought to me for £500, payable to Grant Powell, Esq., under the authority of the 4th Wm. IV, chap 52, having ascertained that so much remained of the appropriation and that the contingencies of the House of Assembly had been received, I entered and passed the warrant supposing that amount remained due on account of the Legislative Stration (Carolinian) Council. 1978, Programme Andrews

Can you state, as a member of the Legislative Council, whether this sum of £500, for which His Excellency Sir John Colborne was addressed, on the 12th February, 1833, [page 137, Assembly's Journals, as being in favor of the Speakers of the Honorable the Legislative Council and House of Assembly, to purchase books for the Library "was expended for a different purpose with the concurrence of the Legislative Council?"—I am not aware that it was.

D

Evidence of GRANT POWELL, Esq.

Would you have the goodness to state what procoedings were had by the Legislative Council relative to the sum of £500, voted on the eleventh of February, 1833, by the Assembly for the purchase of Books for the Library of the Legislature?-The proceedings are recorded in the printed Journal of the Legislative Council, 6th March, 1834, pages 155 and 156.

This Committee wish to be informed of the purposes to which the said sum of £500 has been applied, and the authority for the special application of the same?—The money was paid by the Receiver

18th April, 1836.

General, as will appear by the public accounts, under the authority of the Provincial Statute, 4, Wm. IV, ch. 52, and placed in the hands of the Committee of the Legislative Council, towards defraying the expenses of furnishing the Council Chamber. What authority there was for that special application I have no means of knowing, but think that the intention of the Assembly to devote it to the purchase of books, had altogether escaped recollection-and that it was considered a sum in the Receiver General's hands, applicable to the contingencies of the Legislature, and as such advanced at the request of the Committee of the Legislative Council.

GRANT POWELL.

REPORT

OF THE

COMMITTEE $\mathbf{0}\mathbf{F}$ FINANCE

PUBLIC ACCOUNTS.

To the Honorable the Commons' House of Assembly, &c. &c.

Your Committee upon the Public Accounts beg leave to Report,-

That, upon a careful investigation of the Public Accounts they find that there is a gradual falling off of the Revenue collected in Lower Canada, as will be clearly shown by the comparative statement of the amount of revenue collected quarterly at their ports, as returned to this House per Public Accounts, while there is an increase of the revenue collected upon imports from the United States, and from some other sources, as will be shewn below in the comparative statements of these revenues for the years

The whole amount of Upper Canada's proportion of the revenue collected on Imports by sea, for the four quarters preceding the 10th of October, 1835, is £49,137 16 7½, showing a falling off this year of £4567 17 0½ as £4576 17 0½

of £4567 17 01 as compared with the corresponding periods of the preceding year.

£4576. 17 01 £4576, 17 01

Add to the preceding annual returns, the Upper Canada pro-portion of the receipts for the quarter ending the 5th of

January 1836, viz: 5102 11 3

There will be shewn an apparent advance of£525 14 2½

The increase upon the other revenues of the Province this year, as compared with the last, is ...

So that the real falling off in the revenue of this year, as compared with the last: 1340/ 3 101/

£ 3236 13 2

4576 17 04 [falling off of 1835.

Note.—The Returns from the Niagara District are only from the 5th July, 1835, to 5th of January, 1836; the late Inspector having made no Returns for the Quarter ending the 5th of April and 4th July.—His bonds are in the hands of the Attorney General for prosecution.

The following letter has reference to one of the items of the foregoing amount of arrears:

Inspecton General's Office, 27th February, 1836.

Sin,

I beg to state for the information of the Finance Committee, that although the account of Mr. John Chishelm shews him to be indebted to the Province in a large amount, yet that he has a set off for repairs of the Canal, say £715, advanced to the Commissioners under an Order in Council. I did not give him credit for the amount, as I considered the question would be to the House of Assembly.

I have the honor to be, sir,

I have the honor to be, sir,
Your most obedient servant.
GEORGE H. MARKLAND,
Inspector General.

REPORT

OF THE:

COMMISSIONER

PURCHASING A STEAM DREDGE.

Message from Licut. Governor with the Report of Commissioner for purchasing a Dredging Machine.

F. B. HEAD.

The Lieutenant Governor transmits to the House of Assembly the accompanying copy of the Report of the Commissioners appointed by an Act of the Legislature passed at the last Session granting a sum of money for the purchase of a Steam Dredging Machine.

Government House, 28th March, 1836.

> House on Assumpty, 5th March, 1836.

Sir, The Commissioners appointed under the authority of an Act passed in the 5th year of his present Majosty's reign, entitled, "Au Act granting to Ilis Majosty a sum of money for the purchase of a Steam Dredging Machine"-beg leave respectfully to submit the accompanying Report for the consideration of His Excellency the Lieutenant Governor, for the information of the Legislature.

Will you have the goodness to present the Report to

His Excellency.

We have the honor to be,

Your obedient servants,

CHARLES DUNCOMBE, DAVID THORBURN,

Commissioners

John Joseph, Esquire, Civil Secretary,

&c. &c. &c.

Cory.

The Commissioners appointed under the authority of An Act passed in the 5th year of His present Majesty's reign, entilled, "An Act granting to His Majesty a sum of money for the purchase of a Steam Dredging Machine"—beg leave respectfully to submit the following mit the following REPORT

to His Excellency the Lieutenant Governor for the information of, the legislature.

MAY IT PLEASE Your Excellency,

After calling with Mr. Thorburn a joint Commissioner, upon the President and Directors of the Ni-

agara Dry Dock Company; I was referred by them to their Engineers, who explained the defects in the Steam. Dredge at that place; and also furnished me with estimates of the expense of purchasing or building one sufficiently powerful for the business required by the Act authorising the purchase.

Mr. Wood, the shipbuilder at that place, who was. about visiting New York proposed obtaining plans and, ostimates from the several chief Engineers, and builders of that city, which were afterwards forwarded to me by Mr. Thorburn, while I was at Pittsburgh. I proceeded to Buffalo, spent a considerable time with the founders, and engineers there, and even at that place began to learn that I should find it extremely difficult, if not impossible to procure a dredge to bu built and imported in season for that summer's use, particularly as most of the Engineers with whom' I conversed agreed in representing low priced dredges as having invariably proved failures; and that I had but half the amount of money necessary for the purchase of such a steam dredge as I required, at my disposal. When made acquainted of this fact by one Engineer, I visited others, many of whom were at that time awaiting the opening navigation of the lake; and I felt confident that from men of their description I should be most certain of acquiring the most valuable. information, and advice on the subject of my cr-

I inquired of them where dredges could be best built, at the shortest notice, for the least money ?-From these gentlemen I obtained references and letters to many of the principal founders and engineers in the United States, though a majority of them were of opinion, that I would best succeed at Pittsburgh or Cleveland. To the latter place I went, visiting the intermediate ports, and thence to Sandusky city.-There I met with nothing suitable to my purpose, although I found here as at Buffilo abundance of cast off engines which the owners endeavored to convince me, were of the kind I sought, and that their deficiconsider however that my own judgment upon the matter would justify my attempting to patch up a machine of the kind solely on account of its reduced price.

leresolved not to purchase an imperfectione, even though I should not succeed to my wishes in obtaining an unexceptionable Machine for the amount of the money granted.

Besides had I been in favor of patching up a Machine Emight have availed myself of any advantages. flowing from repeated offers made and urged upon me.

in this Province.

Epreferred, that such parts should be formed here, as could be equally well constructed by our own work-.. men and furnished by our merchants, provided tho quality should not be inferior in respect to either material or workmanship; but the more thoroughly I investigated the matter, the greater number of failures I discovered; and the more conspicuous were the numprous imperfections in the few that succeeded. After examining any one machine and obtaining an engineer's apinion thereon, I hore in mind the several defects, of which he complained, and thus regulated my questions upon succeeding examinations. I accordingly retained. notes; references and opinions of various engineers of high character intending to have embodied them in this report, but having already, offered several very langilly reports upon subjects of far deeper importance.

and interest to the Province, to the Honorable the House of Assembly, and having others yet to be presented, my present remarks shall be as brief as possible.

Suffice it to say, that I proceeded to Pittsburgh, where I commenced observations and examinations. I there found it impossible profitably to bargain for a dredge under the limitation of the sum at my command. Major Wade, of the house of McCard & Co. Engineers and Founders of eminence, interested himself much on my account, and having carefully provided me with estimates, stated candialy his conviction of the impracticability of executing such an order as I presented, limiting the cost of the work to the amount granted, even though the lighters and transportion should be excluded from the account.

He directed me however to many of the principal mechanics and chief engineers throughout the city, and personally accompanied me to several of them, with whom I at first heped to succeed; but upon insisting on having proper security given me for the completion and eventual goodness of the dredge-that it should prove a perfect, easily understood and managed, and rapidly operating machine, I soon found, that no one would take the contract.

I visited Wheeling and other places, along the Ohio, and examined every thing of the kind I could meet with in that country.

Returning to Pitisburgh, I next travelled eastward, and examined the steam dredges in Philadelphia, and those in New York and upon the Hudson River .-From Albany I proceeded to Lake George and Lake Champlain, desirous if possible to save expense of transportation; but although I met with numerous! founders and engineers, willing to engage in the undertaking, yet I had become acquainted with the defects and difficulties likely to be encountered and also with the important fact, by the way, that my purse was quite too small. I was still unwilling to make a contract that would in the end render it necessary to apply to the House of Assembly for more money, especially as I had always maintained that Commissioners should not, if at all avoidable, contract a debt without the previous consent and authority of Parliament.

Ingain returned to New York, where Mr. Wood and Mr. Sabbaton again generously interested themselves for me, seeing I had not yet succeeded Mr. Sabbaton could only make such a dredge as he describwheels for the money named, such an one would not, however answer my purpose. On my former visit to New York, these gentlemen had gone with me to examine the steam dredges employed in that harbor. The lowest price one was more than \$20,000, and one had lately been procured from Boston at \$25,-

After further and more general examination of all the Engineers and Founders of that city likely to engage in the business, and finding no prospect of success, I returned to Philadelphia, where I had previously received some degree of encouragement; but I there found on stating particulars, viz:-the size of engine and the boilers, materials to be used, &c. (estimating the horse power myself) that no one felt inclined to accept the contract upon condition of security, and warranting the work for less than about \$16,000 to \$25,000.

I next went forward to Baltimore where by the aid

gineer, I thought I could manage to get my contract accepted. The latter nerson accompanied me to Washington to examine the steam dredge in use on the Potomac, belonging to the former gentlemen, and which had been constructed upon the most approved and perhaps successful plan of any that had come under my observation, when used in still water. Its On closely viewing it however, it cost was \$25,000. was found impossible to cut it down or to reduce it so as to bring it within the compass of my means. Being provided with letters to the proprietor of the famous steam dredge at Pamlico Sound, I visited it. A powerful steam-boat indeed it was. Its cost was 35,000 dollars, it was fitted for soa, but ill adapted to my

On returning to New York Mr. Sabbaton proposed sending his engineer to Washington with a view of uniting the cheapness and simplicity of the Albany dredges with the efficiency of the one at that place, hehowever could not find time for that purpose, I employed another person well recommended to accompany me with the hope of obtaining plans and specications of the best and cheapest machine of the kind in the United States, and of employing some Canadian Artists to finish the work in this Province.

I thus obtained a plan of a dredge most generally approved by engineers, but I found the cost still exceeded my means, and fearing that my plans might not be perfectly understood by persons not previously intimate with such work, as it combined different principles, and was in fact a union of two dredges; and as I feared that it would prove too much of an experiment for me to undertake, I abandoned the pro-

Returning to New York I proceeded easily to Boston along the coast examining such dredges as had become famous, but I always found the demand upon. consulting with the engineer to exceed my limits:-At this time the American government had also instituted an enquiry into the cause of failure in so many dredges, and authorised a committee composed of engineers engaged in that business; to report upon the subject, and to recommend such a plan as they could most approve-which was done.

The government entered into contract for four steam dredges with Messrs. Lyon and Howard, of Albany. (who had obtained the contract by public competition) upon the plan thus approved of. To these gentlemen ed to Mr. Wood, without either lighters or paddle I went and offered to contract with them on the same terms with those they had agreed upon with the United States government—they giving me the same secued States government—uny group and rity for the completion and successful operation of the rity for the completion and successful operation of the this they for a time dissented asking me for an additianal \$1000 to cover the extra expense of transporting such materials, &c. as could not be obtained of suitable quality in this Province; besides the consideration that they must pay higher wages to workmen, who would have to leave their homes; and moreover they contended, that the contract for dredging which was offered them after the completion of the muchines, was worth much more to them, than what they had demanded as difference in price, by which means they intended to indemnify themselves for the low price at which they had been compelled to contract under the circumstances of so many competitions for the same ល្ងេក សម្រើស៊ីកំណាម

After some further conversation between us they of Messes. Ellicots and a Mr. Large, an English En- | contracted with me upon the same terms that had been as agreed upon between the U.S. government and them. They were under an expectation of advantages to their business from the extension of a knowledge of the superiority of their machine, as well perhaps as their being also employed for a time in working the dredge, while being put into successful operation in this Province.

The contract was entered into and the security taken with a certificate from the Judge of the county court as to the goodness and solvency of the surcties. It is agreed by the commissioners in the contract to be at all the extra expense of the importation of the machine, if constructed and built wholly there, to be delivered by the contractors at the coast of Lake Ontario; or of that of the materials and workmen, if built in Upper Canada, they furnishing the best materials for each and every part of the work, and building it in this Province, should a suitable machine shop, &c. be reasonably obtained. Col. W. Chisholm, very generously gave permission for the contractors to use his premises, buildings and timber (under certain circumstances) free of charge, and to afford them an opportunity of purchasing such sawd and other lumber as they might require at reasonable prices. I wrote to the contracters and they accepted the proposal for building the machine, with six lighters at Oakville; and all would have been nearly completed by this time, but after I had advised Mr. Lyon to engage a vessel to bring over the Steam Engine and materials, which vessel had gone to Oswego, the Eric Canal frozo up so much sooner than usual, that the Engine, &c. was frozen in it about 150 miles from Oswego.

In order not to delay the work the contractors have been compelled to order on such parts of the materials as could not be procured of the same quality in this Province, together with the Juniette ron for particular work, such as bolts, &c. Some of the best spikes, American Machine Oukum, &c. These have been imported by land during the winter, that the machine may be ready for operation early the ensuing season.

There are to be six lighters, adapted to the different situations in which they may be required to be used, and all at once if necessary. Two of them dump from the centre of the bottom for deep water, two of the sides in shoal water, or where embankments may be desired to be commenced under water; and two are covered with decks and have the earth wheeled or shoveled off for making embankments and filling piers with the earth. The rapidity with which this machine is to remove the earth, one to remove the earth as fast as it shall be raised by the machine.

The expense of the steam power dredging machine with the improvements. £2187 10

| is estimated at, (| (if not all required 187 10 0 |
|--------------------|-------------------------------|
| | £3400 0 0 |
| Deduct amount of | last years grant ex- 2000 0 0 |

There still remains to be provided for £ 1400 0 0. This contract, the the best I had in my power to make was not entered into until after I had received some severe rebukes from an honourable member of the House of Assembly for my not having procured a dredge in less time. Nor until I had received a letter from Mr. Thorburn, one of the Commissioners, advising me to purchase one without delay, provided it were cheap and good, even the its cost should exempt the sum granted by the Legislature.

I then concluded an agreement with Messrs. Lyon & Howard for the purchase of this machine under the circumstances here recited. I exerted myself to the best of my judgement to fulfil the spirit of the act of the last session, and in doing so have arranged that our merchants and mechanics shall have the benefit of the sale and manufacturing of as much of the underials to be used as can be equally well and cheaply manufactured here, and to have the other parts made of the best materials known in America and in the

I have taken security for the fulfilment of the work specifying the contract, and this security is certified as being perfectly good, by the Judge of the county court. I have omitted inscring a very voluminous correspondence upon the subject herein treated of, partly because the names of the persons would be brought before the public without their consent-there communications were semi official only; and the right to make public use of papers of that nature, withour the previous concurrence of the parties appears to be questionable. Indeed the principal advantage of those papers would be to prove the fact that steam-power dredges, like wheat threshing machines, have generally proved to be failures, when cheaply made and at low prices; and these have resulted in being the dearest in the end.

I became early apprised of the danger of purchasing one that would be doubtful of succeeding, and resolved rather to investigate the subject fully myself, than risk the chances of obtaining a more experimental and cheap article, similar to that sold the Welland Canal Company under the prospect of its being a prodigy of cheapness and convenience, the it became worse than nothing.

It is matter of regret that the early freezing of the Eric Canal has delayed the completion of the dredge and added to the expense of the importation, &c. as also the inconvenience of importing at different places.

I had asked and obtained from Sir John Colborne, the late Lieutenant Governor, permission to import the dredge or materials into the Province duty free. It was to have been entered at Ookville, and, Col. Chisholm, the collector at that port consented to relinquish his share of the duties. When, however the articles were to be entered at the Port of Queenstan, I was not in possession of a copy of the Lieut. Governors order; but Mr. Grant, the collector, permitted the importation upon my assuring him by letter that the order should be procured or the duties paid:

The accompanying plan or drawing of the steam dredge will better afford a correct idea of its structure than any written description, however minute. It

may be remarked that when the frame in which the machinery works is removed, and paddle wheels shipped, it may pass through the Welland Canal, and be made applicable to useful purposes in the harbours of both Lakes.

It is now in such a state of forwardness as to justify the hope of its completion and readiness for use

early in the ensuing spring.

All which is respectfully submitted,

CHARLES DUNCOMBE. (Signed)

Acting Commissioner.
DAVID THORBURN.

LANDS SURRENDERED

BY THE

CLERGY:

Documents sent down by His Excellency the Lieutenant Governor, in compliance with an address of the House for a return of lands surrendered by the clergy.

Secretary and Registrar's Office,) 2nd February, 1836.

I have had the honor to receive your letter of the 30th ult. accompanied by an address of the House of Assembly, signifying His Excellency the Lieutenant Governor's command to furnish you with any information this office can afford on the subject of the address,-and I beg leave to state for His Excellency's information, that patents have Intely been completed in this office in favor of most, if not all, of the Clergymen of the Church of England, for lands as endownents for parsonages within this . Province, but that there are no receivals or documents in this office respecting any surrenders that may have been made to the crown by the clergy.

I have the honor to be

Your most chedient humble Servant, D. CAMERON

JOHN: JOSEPH, Esq. dec. dec. dec. Socretary & Registrar.

Socretary's Office, 5th February 1836.

SER. In obedience to the command signified in your letter of yesterday's date, I have the honor, to transmit herewith a schedule of the patents which have been completed in this office for endowments to the clergy of the Church of England in this Province.

Lliave the honor to be

Sir, Your most obedient humble Servant,

D. CAMERON. Secretary & Register.

JOHN JOSEPH, Esq. dec. dec. dec.

(See Report on Executive Council, page 57)

Executive Council: Office. Toronto, 2 February, 1836...

Sig. In obedience to the commands of His Excellency the Lieutenant Governor, communicated tome in your letter of the 30th ultimo, herewith you will receive a return of property surrendered by certuin-clergymen of the church of England, and others, shewing the value of said proper.y, with the lands, granted in lieuthercof intended as emoluments—which: return comprehends all the information this office can afford on the subject.

I have the honor to be

Your obedient Servant, JOHN BEIKIE. Clerk Ex. Council.

John Joseph, Esq. Sucretary, &c. &c. &c.

Anno septimo & octavo.

GRORGE IV REGIS.

CRAP IXII.

An Act to authorise the sale of a part of the Clergy-Reserves in the Province of Upper Canada.

2nd July, 1837.

WHEREAS by an Act passed in the 31st year of the reign of His late Majesty King George the Third, entitled,-" An Act to repeal certain parts of an act : passed in the fourteenth year of His Majesty's reign, entitled, " An Act for making more effectual provision for the govornment of the province of Quebec in North America," and to make further provision for the government of the said, Province," it is among other things enacted, that it shall and may be lawful for His Majesty, His heirs or successors, to authorise the Governor, or Lieutenant Gevernor, of each of the provinces of Upper Canada and Lower Canada respectively, or the person administering the government therein, to make from and out of the lands of the crown within such provinces, such allotments and appropriations of lands as therein mentioned, for the support and maintenance of a protestant clergy within the same; and it was further enacted, that all and every the rents, profits, and emoluments, which might at any time arise from such lands so allotted and appropriated as aforesaid, shall the applicable solely for the maintenance and support of a protestant clergy within the Province, in which the same shall be situated, and to no other purpose whatever: And whereas in pursuance of the said act, such allotments and appropriation of land as aforesaid have from time to time been reserved for the purpose therein mentioned; which lands are known within the said province by the name. of the clergy Reserves : And whoreas the said clergy reserves have in great part remained, waste, and unproductive, from the want of capital to be employed in the cultivation thereof; and it is expedient to authorise the sale of certain parts of such clergy reserves to the intent that the monies arising from such sale may be employed in the improvement of the remaining part of the said clergy reserves or otherwise for the purposes for which the said lands are so reserved as aforesaid : Be it therefore enacted by the King's Most Excellent Majesty, by and with the consent of the Lords Spiritual and Temporal and Commons in this present Parliament assembled, and by the authority of the same, that it shall and may be lawful for the Governor and Lieutenant Governor or officer administering the government of the said Province or either of them, with the consent of the Executive Council, appointed within such Province for the affairs thereof, in nursuance of any instructions which may be issued to such Governor, Lieutenant Governor, or other officer as, aforesaid by His Majesty, through one of his principal Secretaries of State, to sell, alienate and convey, in fee simple, or for any less estate or interest, a part of the said Clergy Reserves in each of the said Provinces, (not exceeding in either Province one fourth of the Reserves within such Province) upon, under, and subject to such conditions, provisoes, and regulations as His Majesty by any such instructions as aforesaid, shall be pleased to direct and appoint : provided nevertheless, that the quantity of the said Clergy Reserves so to be sold as aforesaid, in any one year in either of the said Provinces, shall not, in the whole, exceed one hundred thousand acres: Provided also, that the monies to arise by or to be produced from any such sale or sales, shall be paid over to such officer or officers of His Majesty's revenue within the said Provinces respectively as His Majesty shall be pleased to appoint to receive the same, and shall by such officer or officers be invested; in the public fund of Great Britain and Ireland in such manner and form us His Majesty shall from time to time be pleased to direct: provided also, that the dividends and interest accruing from such public funds, so to be purchased, shall be appropriated, applied and disposed of for the improvement of the remaining part of the said Clergy Reserves, or otherwise, for the purposes for which the said lands were so reserved as aforesaid, and for no other purpose whatsoever; save only so far as it may be necessary to apply the same, or any part thereof, in or towards defraying the expenses of or attendant upon any such sale or sales as aforesaid; and which appr opriation shall be so made in such manner and form, and for such special purposes, as His Majesty from time to time shall approve and direct.

I. And be it further enacted, that it shall and may be lawful for the Governor, Lieutenant Governor, orofficer administering the government of the said Provinces, with the consent of such Executive Council as aforesaid, in pursuance of any instructions which may in manner aforesaid be issued to him to give and grant in exchange for any part of the said Clergy Reserves any lands of and belonging to His Majesty within the said Provinces of equal value with such Clergy Reserves so to be taken in exchange, or to accept in exchange for any such Clergy Reserves from any person or persons, any lands of equal value; and all lands so taken in exchange for any such Clergy Reserves, shall be holden by His Majesty, his heirs, and successors, in trust for the several purposes to which the said Clergy Reserves are appropriated by the act so passed in the 31st year of the reign of His late Majesty King George the Third, or, by this present act.

REPORT

OF THE

BRANTFORD BRIDGE COMMISSIONER:

House of Assembly, 17th March, 1836.

Sir.

I have the honor to enclose, for His Excellency's information, the report of the state of the Brantford Bridge. The acting Secretary informs methe tolls collected have been, or will be immediately, remitted.

> I have the honor to be Sir, Your obedient Servant, CHARLES DUNCOMBE.

John Joseph, Esquire, Civil Secretary, &c. &c. &c.

REPORT OF THE BRANTFORD BRIDGE.

The regular notices for the sale of the Bridge for one year, from the 9th June 1835, to 9th June 1836, was put up, and the bridge struck off to John Benjamin for £227 15 0 with a deduction of ten pounds for unexpired commutation tickets, and the necessary bonds taken for the securing the payment thereof.

F. YEOWARD,
Assist. Secretary.

Brantford, 15th March, 1836.

The above report would have been forwarded at a much earlier period, but owing to the death of the late Mr. Jedediah Juckson, acting Superintendant, the necessary papers could not be obtained to enable me so to do.

F. YEOWARD,
Assist. Sccretary.

REPORT

OF SELECT COMMITTE

ON IMPOVEMENT OF THE

OTTAWA RIVER

To the Honorable the Commons House of Assembly :

The Committee to whom was referred the subject of the improvement of the Ottawa River, beg leave to report as follows :-

That the attention of your committee has been drawn towards the importance of that river. universally allowed that the enterprise of the lumbermen in penetrating the forest, cutting roads, and using other means of forming their establishments, makes them rank as the pioneers of the country-settlers readily follow their track. After the forest has yielded the treasures to the hardy Lumbermen, the agriculturists trend in their path and the wild and unproductive lands, after having been stripped of their timber afford food and employment to the active farmer from the parent state.

While this trade was in its infancy and the timber easy of access upon the lower sections of the rivers the facility with which it could be got, and as no crown price was exacted for it,—which your commit-tee believe was about the year 1818 or 1319 the trade was embarrassed with fewer difficulties than at present; but now that the lumbermen have to go a great distance for their timber and are obliged to pay a large annual revenue for the privilege of cutting timber from the Crown lands, it becomes indisputably necessary that every means be used to facilitate the passage of the timber down the river to the Quebec market.

It is well known that when the Crown charge was could be conferred on the lumber trade. The disap- examined witnesses and agreed to the following reports pointment which has been felt in consequence of the

With respect to the apparatus mentioned in the ad- revenue derived from crown timber not having been

the nature of the country are obstructed by rapids, shallows, and falls,-and those coming from the south have the spring floods, and the time which admits of the timber to descend those streams is of very short

The Port of Quebec, from whence the timber is shipped, being open only during the summer season of the year, renders it necessary to remove as far as possible all impediments to delay in order that the Lumbermen may reach Quebec in time for the summer shipment. Add to this the heavy expense attendant on the delay of breaking up, and re-rafting at the falls in the rivers, furnish cogent reasons for effective means being adopted to improve the navigation of these

In those situations where individual means and enterprise have been partially applied (for it is beyond their means to do it effectually unless aided by the government) the Lumbermen have found great benefit from them.

Your committee having taken a full view of the subject, recommend to your Honorable. House that the sum of four thousand pounds be granted out of the casual and territorial revenue, which, together with the tolls collected, may be applied by their commissioners towards the improvement of the Ottawa River and its tributary streams.

All which is respectfully submitted

T. McKAY. Chairman.

Committee Room, House of Assemby 4th April, 1836.

(No. 151.)

REPORT

THE PETITION

OF THE

PROPRIETORS OF THE VILLAGE OF MILLE ROCHES

IN THE

TOWNSHIP OF CORNWALL

To the Hon, the Commons House of Assembly. dec. dec. dec.

The Select Committee to which was referred the first imposed, it was alleged that it would be applied petition of George Robertson, Sewell Cutler, Elijah to improve the navigation of the rivers, and under this Burpee, Thomas H. Maxwell, Nelson Stevens, Win. impression, the lumber traders cheerfully submitted to J. Hamilton, and twenty nine others, proprietors of the the exaction of the Crown charges and anxiously look- Village of Mille Roches, on the River Saint Lawrence, ed forward to the expenditure of this money in the have, in obedience to the order of the House, enquired manner contemplated as one of the best boons that into the allegations and complaints of the petitioners, The petitioners set forth that Mille Roches is signa-

the Saint Lawrence, in a situation conferring extensive water powers, which the inhabitants had improved; that at the time the Saint Lawrence Canal was laid out, the Village was in a prosperous condition, and that the main high-way, or post-road, between Montreal and Toronto passed through it, forming its main street; that the canal has intersected the post road both below and above Mille Roches, and the Commissioners have altered the highway and taken it to the other side of the canal at a distance from the Village, thereby isolating the Village and entirely cutting off all communication by land with the adjacent country, except by a small culvert, which is stopped by ice in the winter and very inefficient as a carriage road in summer; that the trade and intercourse of the inhabitunts are greatly impeded; that the fuel in the neighborhood is burnt up by the laborers on the canal; that the Commissioners decline or refuse to build those bridges which would restore Mille Roches to its uccustomed prosperity, although premises which three years ago would have rented at from thirty to fifty pounds yearly, could only be now let to the canal laborors at a trifling rent.

Your Committee have examined Messrs. Shaver and Norton, two of the Saint Lawrence Canal Commissioners, who state, that besides the culverts the Board contemplate the erection of scows, to be drawn across the canal; that bridges were not built because it was considered by the Board that their erection would be very injurious to the navigation; and that no compensation was ordered to be paid to the inhabitants of Mille Roches for damages, although injury had been done them by the loss of the post road and the traffic of their Village, for which, in the opinion of Messrs. Shaver and Norton, "they ough to receive a fair compensation by arbitration as stated by the act."

These Commissioners think it would be better that the peritioners should be paid their dainages, and that would be required under the act would prove ruinous to the navigation; as also, that there is reason to fear that the culvert will not fully answer, and that the people shold be remunerated whether the scows and culvert fail or succeed.

Mr. McLean, Member for Cornwall, considers that the former road should be restored by bridges as the only effectual means of affording full relief to memorialists who have very strong claims for relief. Your Committee are of opinion that it was the duty of the Commissioners to hasten to compensate the proprietors of property in Mille Roches, whose claim to relief is well established.

On a reference to the Canal Act there appears to be ample powers conferred on them for that purpose.

Your Committee respectfully submit herewith for the consideration of the House a resolution framed in accordance with the views they entertain, as stated in dis report.

D. Æ. McDONELL, Chairman.

Committee Room, House of Assembly, 7th April, 1836.

"Resolved, As the opinion of this House, that the canal navigation, relief ought to be extended to grew on land exterior and far beyond the area allotted

ted about five miles above Cornwall, on a branch of those proprietors of Mille Roches who shall be found to have sustained injury by the operation of the Commissioners, while carrying into effect the provisions of the Canal Act."

COMMITTEE ON PETITION OF THE INHA-BITANTS OF MILLE ROCHES.

Friday, April 1st, 1836.

The Committee met.

Mr. McDonell was called to the Chair.

The Petition was read as follows:

To the Honorable the Commons House of Assembly of Upper Canada, in Provincial Parliament assem-

The Memorial of the Proprietors of the Village of Mille Roches, in the Townships of Cornwall and Eastern District.

Most Humbly Showeth:

That the said Village is situate upwards of five miles above the Town of Cornwall, on a branch of the River Saint Lawrence, being a stream adequate to every mechanical work and manufactory requiring water privileges, which happiness of situation was no enjoyed by any place, within the distance of fifty miles, either up or down the river.

That, therefore, said Village was rapidly improving, an extensive Grist Mill, Marble Factory, and Marble Saw-Mill, Carding Works, and Clothers Works having been erected, and many artisans and mechanics settled, and preparing to build and settle therein.

That the manner in which the canal is now laid out no bridges should be erected, it being the opinion of has destroyed all these prospects, the line of which the Canal Board that the erection of the bridges that strikes from the river above the Village, intersecting the main road, and then runs South East until it again intersects the road and goes by the river a considera-ble way below the Village, and the Commissioners have, in consequence, altered the said high-way which formed its main street and led from Montreal to Toronto, running the same still East of the canal, thereby completely isolating the village and entirely cutting off all communication with the adjoining country, except by a small tunnel or current totally inadequate for the transaction of business, and turning uside the concourse of travellers; and which now is, and every winter will be stopped with ice by the rising of the river throwing back water therein; as the annexed map

more fully explains. That by these destructive changes all lucrative intercourse is absolutely lost, and your memorialists, instead of the pleasing hopes of trade and competence are now obliged to look for other homes, many of whom after residing there the best portion of their existence. That in addition to the above calamitous state of their affairs, a few of your memorialists own lands contiguous to the marble quarry in the vicinity of the village, now excavating to build the Locks, where Mr. Mills the Engineer laid out a few acres for the use of the labourers, entirely insufficient for as the Commissioners for the improvement of the St. the purpose; there being upwards of forty houses, or Lawrence have power to afford compensation to in- shantees, now erected round the quarry-and the ladividuals whose property may have been injured by bourers have now used a large quantity of such which and unwilling to pay therefor coercion would had to chains across the canal to enable the people to cross evil consequences and only tend to a bill of expenses with tenms. No bridges were ordered to be built, as on the district—thus the owners are deprived of the it was considered that it would be very injurious to fuel necessary for their own houses, without hopes of the navigation-neither was any compensation orderredress.

That your Memorialists would by no means trouble lages. your Honorable House with their grievances only after submitting them to the Commissioners, praying for ra- | numeration, they declined acting on the case, by arbitration or otherwise on the plea that the power vested in them gave them no authority, thereby throwing your Memorialists on the decision of the Legislature. Nevertheless your Memorialists conceive that the act in reference to the Village is full and explicit-therefore they have no desire to trouble your Honorable you will be pleased to desire the Commissioners, forthwith, to act up to its spirit, as well as its letter, and further to extend its benefit towards the payment by them of the wood now used, or which may be used by the laborers in said Quarry, extrato the quantity allot- the navigation and be very expensive. ted by the Engineer, which has long since been used in creeting their shanties and for fuel.

sirable to occupy valuable buildings.

Thus your Memorialists humbly lay their case beter into the merits thereof and act with as much islature. promptitude as its nature admits, and their distressed bound, they shall ever pray.

Signed by

GEORGE ROBERTSON, And thirty-four others.

Dated Mille Roches, March 31st, 1836.

PETER SHAVER, Esq., a Member of this House, and one of the Commissioners for the improvement of the Saint Lawrence, called in and examined.

1. Have you seen the petition of the inhabitants of Mille Roches, praying the interference of the House to enable them to obtain compensation for the damage they have sustained in consequence of the line of the canal having cut off their communication with the main road, which was the principal street of the Village ? - I: have.

2. What proceedings have the Commissioners had for the purpose of remunerating the petitioners?-The Commissioners are building a culvert under the canal to enable the peop's of Mille Roches to pass and repass, with carriages. The Board at the same time Concurfully in the opinions expressed by Mr. Shaves.

them by the Engineer, and as the poor men are unable contemplated the erection of scows to be drawn by ed to any inhabitant of Mille Roche for dam-

> 3. Do not the inhabitants sustain great loss by the road and traffic being taken from their Village 1-1 think that it must certainly be an injury to the inhabitunts of Mille Roche, for which they ought to recoive a fair compensation by arbitration, as stated by

4. The committee desire your opinion as a Commissioner, whether would it be better to build bridges ncross the canal, as contemplated by the law, or to House with any amendment therein, but merely that injuration to the inhabitants the amount of damage that might be awarded them in case no bridges were erected?-I think it better for the public and for the welfare of the canal to pay the people their damages and build no bridges, as bridges would greatly obstruct

5. Do you consider that the Commissioners have a discretionary power to dispense with the provisions of That these grievances are by no means exaggerated, the law requiring that bridges may be crected?-The as the premises, which, only three years since, would Commissioners taking into their view, at the Board. let from thirty to fifty pounds yearly, could not now be the number of bridges required to be built, were of rented for any sum, except to laborers on the canal opinion that their erection would prove ruinous to for some trivial pittance-a class of tenantry not de-the navigation of the canal-therefore substituted culverts.

6. Is then the opinion of the Commissioners to be fore your Honorable House, confiding in your elemen- held as superior to the statute law, giving them the ev and in full confidence that you will be graciously power they have ?-No-1 think the Commissionpleased to desire the Commissioners to effectually en- ers ought to have submitted their opinion to the Leg-

7: Does the culvert at Mille Roches answer any and uncertain conditions crave, for which, as in duty practical good purpose?-It is not finished-I am afraid of the water and ice in the spring-the backwater of the Saint Lawrence interferes.

> 8. Ought not the people to obtain their damages. whether the culvert fail or succeed-or whatever benefit the scows may be ?-I-think they ought.

ARCHIBALD McLEAN, Esq., M. P. P., called in and examined.

9. Do you consider the claims of the inhabitants of Mille Roche as well founded-and in what manner would you recommend relief to the petitioners?—I consider that the inhabitants of the Village of Mille Roche have very strong claims for relief-ns I have no doubt whatever that, should no relief be afforded, property in that, hitherto, thriving village, will hereafter be of little value. It appears to me that the only effectual means of affording full relief will be by the erection of bridges so as to restore the communication. by the former roads.

Mr. NORTON being called in and examined,

No. 152.

REPORT

SELECT COMMITTEE

ON THE

PETITIONS OF

JACKSON, ARDIEL, AND LEWIS.

To the Honorable the Commons House of Assembly :

The Committee to whom were referred the petitions of John Ardiel, William Jackson and Levi Lewis, beg leave to submit the following

REPORT:

That John Ardiel was located by Col. Talbot on the North half of Lot No. 9 in the 7th Concession of the township of London, containing 100 acres, in the year 1819, and the said half lot was re-located by Col. Talbot in the year 1830, to one William Armitage, to whom a patent issued on the 20th August 1933.

William Jackson was located by Col. Talbot on the South half of Lot No. 24 in the 9th Con. of the township of London, which was re-located by Col. Talbot in the year 1832 to one George Kennedy, to whom a

patent issued the 28th August, 1833.

Levi Lewis was located in 1824 by Colonel Talbot on Lot No. 21 in the Sih Concession of the township of London; one half of which lot the Colonel also re-located to another person .- On enquiring at the Surveyor General's Office the whole lot is found to be entered as a Clergy Reserve.

It appears these several petitioners, by the documents already on the Journals of your Honorable House, (See Appendix, Vol. 2d, Report No. 95, of Journal of last Session,) and those attached to this Report, were for a number of years, in the peaceable possession of their lands, and had improved them according to their means-and that their characters were unimpeached, Colonel. and yet capriciously and arbitrarily driven off by Col.

The petitioner Ardiel, a native of Ireland, came to this Province when a young man, with his father, in the year 1819. His father was aged and infirm, and had a young and helpless family, who depended on the petitioner principally for their support, and by whose and clear up a farm. industry and filial obedience, whatever value was given been located, was through the unremitting perseverance of the petitioner, who very frequently, when his own and the family's means were exhausting, repaired to different public works to procure by his own personal labor any additional pecuniary aid which he might in his laudable zeal faithfully devote to the improvement of these lands and the support of the

Annexed to this Report, is the certificate of B. Springer, Deputy Surveyor, of the quantity of clearing done on the petitioner's location, which Mr. Springer snys he had informed Col. Talbot of-before re-locating it to another person. In the evidence of Joseph O'Brien (See Appendix of Journals of last Session, 2d Vol. Report on petition of Win. Jackson & others) it is also shewn, that clearing was made by Ardiel on his location, in which O'Brien aided him.

ces of the Peace of the London District, it is shown that on the application of Ardiel, Talbot put him Ardiel in possession of the said North half No. 9 in the 7th Con. of the township of London, and that he had known Ardiel for 13 yours—that he is of good private and public character-that Armitage the second locatee of Col. Talbot again gave possession to Ardiel, on receiving value for improvements made by him while on the said half lot; -which Armitage as omed, and again remined possession of-that he knows no cause why Ardiel should not be restored to his land. Col. Talbot's reasons for depriving him of the said location and giving it to another, not being sufficient, as the Colonel has never required any thing specific as to time and kind of settlement duty to be performed in the township of London, (See Appendix to Journals of last Session, Vol. 2d, Report on petition of petitioner.)

By the certificates of John Cook, Geo. T. Fitzgerald and Thos. Gleeson, it appears Armitage the 2nd locatee for the half lot in question, did acknowledge to have received value from Ardiel for any improvement made by him on the same, -and freely put Ardiel in possession again, although he afterwards unfairly drove him off and obtained a patent for it after acknowledging to these persons his wrong in depriving his fellow subject of his just right; which suid certificates Joseph O'Brien deposes he transmitted to Col.

Talbot in October 1830.

The affidavit of Ambrose Powell before Wm. King Cornish, a Commissioner for taking affidavits in the King's Bench, London District-proves that Ardiel had performed some extent of settlement duty on his said lot:-that Armitage after his assuming the possession of the same, admitted he had done so by bad advice, received a valuation for his improvements and left it :- that he heard Col. Talbot say that he had no objection to Ardiel's again possessing the lot, on he and Armitage agreeing; & that Armitage again made violent and forcible entry on the same, and drove away Ardiel, he verily believes with the consent of the

And also that John Ardiel's own affidavit before the same Commissioner to the same effect, with the exception of a stronger expression as to the permission of Col. Talbot, that Ardiel should re-possess his lot, re-entered his name on the plan for it, with the assurance on the part of the Colonel that he might go home

It appears the petitioner Wm. Jackson, a native of Ireto clearing made on the lands for which they had land, came to this Province with his father R. Jackson, in the year 1819. In 1823, having attained the age of 17, Col. Talbot allowed him to locate the South half of Lot 24 in the 9th Con. of the township of London. By the evidence of Robert Jackson, the father, taken before a committee of your Honorable House, the last Session of Parliament, (see Appendix of Journals of that Session, Report on the petition of. Wm. Jackson and others,) it appears the petitioner was in possession of said lot for 8 or 9 years, paid the tuxes and performed the statute labor for the sameduring the greater part of that period-(which is shewn by the certificate of the Clerk of the Peace of that District attached to this Report,) and occasionalally labored on the lot 'till he had chopped five acres and the road across the said lot with the exception of what was swampy. That in consequence of petitioner's father requiring his services, he being the oldest That in the month of October, 1830, by the affi- son, in clearing a wild lot to make a farm, petitioner. davit of Edward Allen Talbet, Esq. one of the Justi- could only occasionally be on his own land, the clearthe case for the most part in that Township, owing to had one child, and now has six.

a person said to be under 19 years of age: that he taxes for the whole since the year 1825 to the year Robert Jackson employed a deputy surveyor to measure the ground chopped, who reported there were five acres-and two other persons to appraise the same, and yet the petitioner received no pay for his improvements on the land-and that he believes Colonel Talbot had no other reason for depriving him of his land, than that he the Colonel supposed that he William Jackson and his son had signed a petition about the period above mentioned, called the Grievance petihad not done so, and went and presented it to the Colonel, who threw it on the floor and declared he was a Methodist rebel-that neither he nor any of his family should have an acre of land in the Province; he also presented recommendations from respectable persons for village lots in the town of London, and the Colonel utterly refused thom to him or his son.

The affidavits of Levi Lewis taken before the aforesaid Commissioners of the King's Beach, corroborate the statements made by Jackson as to the conduct of Colone! Talbot towards him in applying for redress.

There is also attached to this report a certificate of Dr. Charles Duncombe, that the petitioner had been so seriously injured in his head as to incupacinte him for active and hard labor.

The petitioner Levi Lewis is a native of this Prevince, the son of John Lewis of Grimsby, in the District of Niagara, an industrious farmer, and by the certificate of Robert Wells, Esq., a very early settler formerly a member of your honorable House, of the said District, (see appendix and journal last session, 2nd vol. report on petition of Jackson and others) they sustain an excellent character. Lewis, in the year of 1824, was located on 200 acres of land by Colonel Talbot, being lot No. 24 in the 8th concession of the Township of London, to which place he moved in that year, and has ever since resided on this particular lot; about one year after his house and all he possessed was consumed by fire; that he has 20 acres of land cleared, a house, barn, and orchard on the samethat at the period he was located, Colonel Talbot was giving 200 acres to other settlers that were not sons of U. C. Loyalists- that the one half of this lot the Colunel took from Lewis and located to a man by the name of Thomas English and the petitioner had at the time 12 acres cleared and fenced on it. The said Thomas English gave his own lot which the Colonel had located him on, to his father to make up to him 200 acres, previously to his getting half of Lews' lot, on which he merely erected a log house, never lived in it, and has since sold it to another person for The petitioner is also represented to be an industrious man with a large family of small childrenall which appears by the testimony of Robert Jackson and Joseph O'Brien before the select committee of last year. (See appendix of journals of last session, 2nd vol. report on peition of Juckson and others.)

Attached to this Report is a certificate of nine persons, neighbours of Lewis, who state they never heard Lewis boast of any deception he had practised on Colonel Talbet to obtain a location of 200 acres of land as it was usual for the Colonel at that time to give to- ceive to be paramount to all other obligations; and cations of 200 acres—that Lewis has been living on your committee therefore contend that the Executive

ing of which consequently progressed slowly, as was the lot for 10 years. When he moved to London he

the settlers therein being poor.

Annexed is also the certificate of the Clerk of the That in 1832 Colonel Talbot located the said lot to Peace of that District, stating that Lewis has paid the Annexed is also the certificate of the Clerk of the

These petitioners severally made application to the Executive government of this Province during the administration of Sir John Colborne, (to have their lands restored to them) who referred their potitions to the Executive Council, and Colonel Talbot was called upon to report on the statements contained therein The substance of the Colonel's report was, that Jackson had only slashed a few trees on his lot: that Ardiel had done nothing more on his, and used fraud to make it appear otherwise, by removing the corner stake of the lot so as to take in a clearing on the one in the rear, which was so reported to him by the Deputy Surveyor, Springer, before mentioned;-that Lewis had deceived him by representing he was the son of a U. E. and that he was stated to be very lazy, and not ever likely to be able to clear more than ten acres of

The Executive Council, accordingly, did not re-commend the prayers of the petitioners; in one case, because ten years had elapsed without settlement duties being performed, and in the others for reasons

mentioned in Colonel Talbot's report.

Colonel Talbot was called before and examined by the Select Committee on these cases last session, and gave the most extraordinary testimony as to the proof upon which he founded his conductiowards these men, and made his report to the Executive government en statements which he admits he obtained by hearsay; whether from interested persons or not he could not tell, nor had he any written document to attest to their truth, nor did he recollect the names of the persons from whom he derived his information, on which he acted so promptly and so much to the injury of these unfortunate individuals :- in fact it appeared to the committee he removed the one sett of locatees and put in possession the others with as much unconcern as if he had been moving figures on a chess board.

Your committee are not a little surprised the Executive Council arrived at the conclusion they did on these petitions with all the facts before them. committee have always been led to believe the power of the Executive in the rigid enforcement of its rules, in the general, admit of a relaxation, in cases where they appear to be violated more from unavoidable circumstances than intention. In these instances it is quite apparent there is not the most remote evidence that anything was wanting on the part of these three persons to observe whatever was required of them to perform, either to the government, to themselves or to society; your committee therefore cannot imagine how the Executive council could decide against their petitions. Your committee also suppose clemency is peculiar to the royal prerogative, and they think if any thing could call forth its exercise, it was the petitions and statements of Ardiel, Jackson and Lewis, and as your committee assume that the Executive government is the paternal protector of the subject, and bound to preserve to him his property and liberty, (if in its power) and not to allow persons, subordinate, in authority, by their mere will to deprive them of either, especially when the faith of the government is concerned, which your committee con should not have allowed these persons to be dispossessed of their property so long held by them, on the authority of the mere statement of one person.

Your committee cannot perceive what reasons the councils could give for not placing as much confidence in the facts alleged in the petitions in question as in those of Col. Talbot, who must have been as much interested as the petitioners, and even more so, as he was complained of for having been guilty of a most arbitrary stretch of power towards these men; and if any thing could bias a decision in favor of one side of the question more than the other in this matter, your committee are compelled to say the Council had more reason to be so on the side of the petitioners, who had supported their claims by more evidence than their own, while the Colonel's wholy depended on his own bare assertions; and their complaints, your committee humbly conceive, were of that peculiar character which required such investigation as would have led to further explanation than the lucomic decision "not recommended, for the reasons contained in Colonel Talbot's

When your committee take into consideration the irresponsible nature of our government, which defies control either by the people or their representatives, they must admit such occurrences cannot be rare, and they think are only a further proof of the necessity of such reform in our institutions, as will cause the first rights of the subject to be respected and his complaints regarded-and not to leave one fourth of the Province (said to be one of the richest, most fertile and flourishing, with a population of 33,000) in rights and property at the sole disposal of one individual, uncontrolled either by the Executive government of this Province or its Legislature, and acting under a verbal authority, without any specific instructions or limits to his power, or apparently only (as in these cases,) on his mere caprice; and when appeals are made against his decisions by those aggrived, his unfounded and unproved statements are sufficient authority for his op-

Your committee must request the indulgence of your honorable House when they thus strongly animadvert on these proceedings, as they think they are merited from the following considerations:—

These persons, honest, loyal & industrious; located on land under the authority of the crown; in possession of the same for at least 9 years; the taxes and the statute labor for which they had seduously paid; no one condition of settlement violated by them, as yet made apparent to your committee, struggling to keep and secure the tittles to their estates; and in an instant deprived forcibly and violently of the same with the color of authority, without even the least reward for their labor or the possibility of redress, and this too under British laws and British usage, as the fruit of the hard toils of so long a period of residence in the Province, to which they came to seek an asylum under the protection and fostering care of the British Crown.

Under this review of the whole case, your committee would recommend that speedy means be taken by the House, either by address to be laid at the foot of the Throne, or to present the whole matter to the consideration of the local government the second time accompanied by this Report, and documents, to restore to Ardiel, Jackson and Lewis, their lands, or an equivalent for their loss.

For this purpose therefore they submit the accompanying addresses.

THOMAS PARKE, Chairman.

Committee Room, 16th April, 1836.

(COPY.)

I do hereby certify that the examination of improvement I made by the request of John Hays, brother-in-law to Armitage, was on the North half of Lot No. 9 in the 7th Con. of London—a report of the quantity of the above improvement I sent to Col. Talbot—the amount of which, I think, was two acres of meadowland; about one acre of chopped land, not logged, and five acres of underbrushed land with the road cut out in front of said lot.

Given under my hand this fourth day of April, 1835.

B. SPRINGER,
Deputy Surveyor.

To whom it may concern.

(Corv.)

London, 4th April, 1835.

We, the undersigned and neighbours of Levi Lewis, do hereby certify, that we never heard Lewis boast of any deception that he used to Col. Talbot to deceive him; for he drew the lot when the Colonel was giving 200 acres to others, and he the said Lewis has been living on the said lot for ten years together, and is on the lot yet; and had a wife and two children when he came here, and when taken he had six children.

LONDON, May 4th, 1835.

To His Excellency Sir John Colborn, K. C. B. S.c. Sec.

MAY IT PLEASE YOUR EXCELLENCY,

The committee of the House of Assembly to whom was referred the petitions of John Ardiel, Levi Lewis and William Jackson, claiming the interference of the House of Assembly in the case of their being dispossessed of their lands in the township of London by Col. Talbot, had proceeded so far as to report all the evidence in the case to the House-but owing to the press of business at the close of the Session, and not receiving a copy of the instructions under which Col. Tulbot locates settlers, and for which the committee were unable to make their final report at the past Session. But the committee were fully of the opinion from the evidence which they received in the matter, and placed on the Journals with the intention of taking the business up again early next Session, that a manifest and very serious injustice has been done to Ardiel, Lowis and Jackson; and advised me to write to Your Excellency and request, that Your Excellency will issue no deeds for the said lands except to Ardeil, Lewis and Jackson, until the House of Assembly will have the opportunity of bringing the business before His Majesty's government.

I have the honor to be, Your Excellency's Most obedient Humble servant. THOMAS PARKE.

MESSAGE

FROM THE

LIEUTENANT GOVERNOR

WITH MEMORIAL.

FROM THE.

INSPECTORS OF THE

PROVINCIAL PENITENTIARY.

F. B. HEAD.

The Lieutenant Governor transmits to the House of Assembly, the accompanying Memorial of the Inspectors of the Provincial Penitentiary, to the subject of which he invites the attention of the House.

Government House, 12th April, 1836.

To the Honorable the House of Assembly in Provincial Parliament assembled:

The Memorial of the Inspectors of the Provincial Penitentiary in Upper Canada,

Respectfully States:

That on the first day of February last there was only remaining in the hands of the Warden of the Establishment, the sum of £78 18 11, and that under the full expectation that provision would be made by your Honoruble House for the due maintenance and support of the establishment: they have endeavored to carry on the discipline of the Prison and support of the convicts, and were encouraged to hope that His Excellency the Lieutenant Governor might have had at his command some funds which he could have placed at their disposal: but they regret that His Excellency has "no funds under his control from which he could authorise the issue of a sum of money for the use of the Penitentiary." The Inspectors would further represent that all the Officers, Keepers and Guards, are in arrear of pay for three months, and that including several accounts due-for materials, the establishment owes the sum of about £1200.

They would respectfully urge the immediate advance of money to enable the Warden to pay these demands and carry on the establishment,—and to prevent the necessity of discharging the Keepers and Guards—thus endangering the safe keeping of the convicts and the ultimate closing of the Prison; by which means the great earnings of the convicts in preparing materials for the North Wing of the Prison must be lost to the public.

JOHN S. CARTWRIGHT, A. PRINGLE, W. H. GRAY.

Provincial Penitentiary, 5th April, 1836.

COMMUNICATIONS

FROM THE

DEPUTY POST MASTER GENERAL.

F. B. HEAD.

The Lieutenant Governor transmits to the House of Assembly, the accompanying communication and enclosures, received from the Deputy Post Master General of British North America, on the subject of the Post Office.

Government House, 12th April, 1836,

> General Post Office, Quebec, 19th March, 1836.

Sir:-

Aware as I am that the Post Office question is now undergoing consideration by the Government of Upper Canada, I conceive that I should be neglecting a duty, if I failed to transmit to His Excellency the Lieutenant Governor, the carliest intimation in my power of the steps which have been taken by the legislature of this Province, in reference to that sub-

The House of Assembly having sent up to the Council, a bill entitled, "A Bill to establish a Post Office in this Province, [Lower Canada] and to provide for the future management of the same," the Council on the 15th instant voted an address to His Majesty on the subject, and at the same time passed an order, directing that copies of the Bill, together with the report & evidence from the select committee to which it was referred, should be transmitted to the Speakers of the Legislative Councils of the several Provinces in British North America.

I had obtained transcripts of the address and order, with the intention of forwarding them to the Post Master General, and it having occurred to me that it would be right [as I have already stated] to convey the information which I have thus acquired to Sir Francis B. Head, [more especially as I understand that the intentions of the Council cannot be fulfilled for some days, owing to the report and evidence not being yet printed] I have to request you will be so good as to submit the accompanying copies of the address and order alluded to, to His Excellency.

I have the honor to be,

Your most obedient;
Humble servant,
T. H. STAYNER,

D: P. M. G. B. N. A.

(PROVINCE OF LOWER CANADA.)

Legislative Council, Tuesday, 15th March, 1836.

Ordered.

"That a copy of the bill sent up from the Assembly for the concurrence of this House to establish and regulate a Post Office in this Province, together with the report and evidence reported from the select committee to whom the said bill was referred, and a copy of the address of this House to the King on the subject of the Post Office, he by the Speaker of this House immediately transmitted to the Speakers of the Legislative Councils of the Provinces of Upper Canada, New Brunswick, Nova Scotia, and Prince Edward Island."

TO THE KING'S MOST EXCELLENT MAJESTY.

May it please Your Majesty:-

We the Legislative Council of the Province of Lower Canada in Provincial Parliament Assembled, having had under our consideration the despatch of Your Majes-ty's Principal Secretary of State for the colonial department, addressed to His Excellency Lord Aylmer, late Governor in-Chief of this Province, dated 5th October, 1834, with the draft of a bill for the regulation of the Post Office in this Province which accompanied the same, and also the bill founded thereon and sent up by the Assembly for the concurrence of this House during the present Session; again approach Your Mujesty humbly to represent that, having carefully examined the plans detailed in the above mentioned bills for the control and regulation of the Post Office department, and maturely considered the subject, we have been led to the conclusion that it would be exceedingly difficult, if not impracticable, to provide for such a degree of concert & harmony of design & action in the serarate Post Office Establishments of the several Provinces connected with us, as would appear essential to attain the purpose of these measures. Among Legislative bodies composed of the representatives of communities, naturally influenced by local circumstances or sectional interests, varying and conflicting views, respecting particular regulations and arrangements must unavoidably occur, and produce delay and embarrass ment, and this inconvenience was probably felt or foreseen in a neighbouring country, where, notwithstanding a keen regard for State rights, the power to legislate for the entire control and management of this department is delegated to the Federal Government. The Post Office being intended for the safe, speedy and regular conveyance of letters, not to and from places within the limits of each separate Province, merely, but to and from places within one part of Your Majesty's dominions to places within another part of the same, however remote, the proposal to vest the rights of separate legislation in each of the Colonial Legislatures, even under the restrictions provided in the draft of the bill prepared in England, is one of a grave character, involving important consequences.

The intervention of the Imperial Parliament was found necessary to adjust a division of revenue between Lower and Upper Canada, and with this instance before us, it is difficult to conceive that the five North American Previnces will spontaneously concur in the various regulations and arrangements essential to insure the steady and uniform action of the Post Office department, or amicably dispose of the intricate questions which will undoubtedly arise if the several Provinces be left to legislate independently in this matter.

The bill prepared in England has now been some time before the respective Legislatures, and we are not aware that any one of them has offered to adhere to the general provisions of the measure. If the object were merely to establish and regulate a Post Office for the limits of this Province, there would be little to amend in the bill proposed to us by the Assembly; but viewing the institution as essential to the encouragement and convenience of commerce, and eminently calculated to strengthen the ties which connect the several portions of Your Majesty's dominions, we are of opinion that it would be more advantageous to the inhabitants of this Province, and in particular more effectually provide for the regular, safe and speedy transmission of the correspondence, both public and private, to and from the same, if the Imperial Parliament should still continue to preserve in its own hands the exclusive power of legislating for the government and management of the Post Office, as well in Lower Canada as in all other parts of the Empire.

For these reasons the Legislative Conneil have deemed it advisable to withhold its concurrence to the bill sent up from the House of Assembly of which a printed copy is herewith transmitted, and to bring the question again under the consideration of Your Majesty's Government.

If it should be thought inexpedient to sanction the establishment of independent local Post Offices in the several Prrovinces, and be determined not to persist in the plan for regulating the management of the department therein, in conformity with the provisions of the bill prepared in England, we venture with all lumility to suggest to Your Majesty, that it would be desirable in order to satisfy the reasonable wishes of the people of this Province, that the following propositions should be acceded to on the part of the Imperial Parliament and Legislature, and that corresponding modifications of the Laws and Regulations of the Postoffice should be with all convenient speed effected.

1. The Provincial Government and Legislature should be authorised to demand and receive all the requisite information respecting the Department in this Province from the Post-Master-General's Deputy residing therein and

having charge of the Department.

2. The accounts of the Department for the whole of the North American Colonies should be annually submitted to the Provincial Legislature in lucid form and order, and in sufficient detail.

3. The privilege of Franking, as exercised by the Imperial Parliament should be accorded to the Members of the

Provincial Legislature.

4. Your Majesty's Representative should have authority to remove or suspend the resident Deputy of the Post-Master-General, on the joint address of the two branches of the Provincial Parliament.

5. The principal officers employed in the management of the Department in this Province, should be placed upon moderate but adequate fixed salaries; and the postage of newspapers, pamphlets, &c. and every thing carried by the Post, should merge in the revenue of the Department.

6. A just and equitable proportion of the excess of Continental Postage, if any, beyond the necessary expenditure of the Department should be allotted to the several North American Provinces; the proportion to be based either on the provision contained in the Bill prepared in England, or on the population of the said Provinces.

7. Such alterations and modifications of the rates of Postage, the establishment of Post-routes and Post-offices, and such other arrangements for the regulation and management of the Department, as the several Legislatures by joint-address of both branches thereof to your Majesty, shall, from time to time, show to have become reasonable and expedient.

(No. 155.)

REPORT

OF THE

GOVERNMENT DIRECTORS

OF THE

WELLAND CANAL,

RELATIVE TO

BRIDGES.

To the Hon. the Commons House of Assembly. &c. &c. &c.

The Government Directors, in conformity with the authority of an Act of Parliament of this Province, passed at the last Session, beg leave respectfully to

REPORT:

That they have had before them the Report of Francis Hall, Esq. Civil Engineer, which is hereunto annexed, marked A,—and also a letter from D. Thompson, Esq. marked B, from which, together with such other information as they could obtain, they are induced to recommend the erection of three bridges across the Welland Cand; one across the main canal on the road allowance between the Burgar and Silverthorn farms in Thorold, to supersede the old bridge at the Burgar farm; the other over the feeder on the Lynns's creek road, near the junction where the old bridge was; and the other across the feeder on the road allowance between the townships of Humberstone and Wainfleet.

All which is respectfully submitted.

CHARLES DUNCOMBE, DAVID THORBURN, W. L. MACKENZIE.

Α.

ENGINEER'S REPORT.

WELLAND CANAL BRIDGES.

It will be observed by the plan No. 1, that the concessions pass each other at right angles—that the canal cuts the concession to Allanburgh, opposite Wilson's farmh ouse, where a new bridge is proposed, by which at least one mile of distance will be saved from the point A, to Allanburgh, or Port Robinson.

Two ways may be proposed to obviate the necessity of this new bridge,—1st by passing from the point A upon the present road, across the present bridge B, then passing upon the trucking path to the concession at C.

Or by a new line of road at the base of the canal path embankment, as shewn by the dotted lines D. D. all through Marlatt's farm.

Both these lines are objectionable—upon the first, the truck path is too narrow for the passage of waggons, and the expense of widening the same would exceed the cost of a new bridge.

The second line proposed by the base of the Canal embarkment, will occupy a considerable portion of ground, will pass through Marlatt's orchard and require at least one road bridge, and on the whole be more expensive to execute than a new bridge across the canal; but if once established there would be an end to the expense. If the land upon this line could be purchased at a price equal to the new bridge I would prefer it, as the increase of distance to the public from it to Allanburgh would only be 220 yards,—Wilson, in going to Allanburgh, would have to pass out of his way 1600 yards, but then he will save at least 1800 yards upon the diminished distance direct to Allanburgh.

Land required for this new road-

800 ×22=17600=33 acres

4840

Equal per acre in valuation £\*

Price of new canal Bridge & abutments...£200
Difference in favor of.....

\* From an uncertainty of the value of this land, I have left it blank, which you can probably fill up.

(No. 2.)

It will be observed that Allenburgh new bridge is 707 yards distant from the old High bridge, length by present western access, say 950 yards. It is only those families in the immediate vicinity that are put to inconvenience by the want of a bridge here.—The general traveller makes for Allanburgh direct, and from thence in a straight course, or nearly so, to the Falls, Stamford, or St. Davids.

A bridge at this point would, however, be a great accommodation to the adjoining farms, could the same be done without impediment to the navigation, but as this cannot at present be effected without an outlay of four or five hundred pounds, I would recommend that the present access to Allanburgh new Bridge be improved and shortened as much as possible.

(No. 3.)

By the Diagram No. 3, it will be seen that a bridge at either A. or B. will afford equal accommodation to the public in passing from Port Robinson by Mr. Burger's farm; but the public occupying the Concession line c. will be benefited by having a bridge at n., particularly in going towards Port Robinson. or Chippewa, they will then save a distance of 1000 yards. The substitution of a bridge at the point B. is now called for, as Burger's present bridge is so much decayed as to render it unworthy of further repair. It will however save making a temporary bridge by the company while the new one is in construction.

N. B.—the contractor is ready to doliver his timber upon the ground for this bridge; I have desired him to place it in the new position for framing.

F

(No. 4.)

This plan shows the connection of the Canal line with the feeder, also the position of the present bridge at A. also former bridge across the feeder at n., having an open concession, passing by c. B. & D. to A.; but as this line is both swampy and indirect to any assignable point upon the canal, it will always be ojection-The centre line r. c. shows the most direct line that can be obtained to the present canal bridge at A. as the approach to this point at c. is all through wild land, it may connect with the nonrest side or concession line as may be found most convenient for the pub-The next and cheapest point for passing the canal is upon the present stop-gates, which will form abutments for a bridge. If a passage here would suit the convenience of the public, I would prefer this last point, as the ground is more firm than at any of the other points proposed.

FRANCIS HALL,

Engineer.

30th January, 1886.

N.B.—I have endeavoured to make the above remarks as distinct as possible—they may assist the Commissioners in their decisions.

F. H.

Toronto, 8th April, 1836.

The government Directors agree with the Engineer, and recommend the building of the Bridge No. 3. as stated by him.

CHARLES DUNCOMBE, Chairman. DAVID THORBURN; W. L. MACKENZIE,

LETER FROM MR. THOMPSON TO THE DIRECTORS.

B

City of Toronto, 5th Feb'y. 1836.

GENTLEMEN,

I beg respectfully to state, that a bridge over the feeder to Welland Canal on the road allowance between Wainfleet and Humberstone is indispensable. That it is also the most direct line of road from Port Robinson to Dunville, being nearer than via the Canal, and also avoiding the narrow and dangerous parts of the towing path from the aqueduct to Wainfleet (which towing path can only be made sufficiently wide for a road at a very great expense.) It is moreover the mail road, and at the same time opens a direct and near communication to the Welland canal company's land; much money and labor has already been expended on the road in question. So sensible were the inhabitants of the necessity thereof that they built a bridge over the feeder and gave many days labor to the road gratis. That the statute labor of this year will make it passably good at all seasons of the year, particularly so when once the Welland canal company opens up a dich to where the feeder cuts off | Committee Room Helm's creek and which will have to be done at all events, to prevent said creek overflowing its 14 April, 1836.

This ditch will not be expenbanks and much land. sive, not over 3 feet cutting a distance of about 20 chains. The correctness of the preceding statement is indisputable, and I am authorised on the part of a large portion of settlers to most earnestly solicit, that you will adopt such measures as will insure to the public a bridge over the feeder on this road as well as on the old road leading, from River Welland to junction.

I have the honor to be. Gentlemen.

Your obedient Servant
D. THOMPSON.

To the Directors of the W. C. C. authorised by act of Parl't. to locate bridges on the line of the Canal.

NOTE BY ENGINEER.

N. B.—Mr. Thompson's reasons seem to be correct; with regard to the road and road approaches, if the public are satisfied that the line, c. B. D. is the best for its interests. The difference of expense in forming the bridge will be immaterial to the Canal company.

F. HALL.

No. 156.

REPORT

ON

FINANCE:

To the Honorable the Common's House of Assembly: &c. &c. &c.

The Committee of Finance beg leave respectfully to

REPORT:-

That the situation and condition of the Burlington Bay Canal is such that unless some aid is afforded by the Legislature at this present session, the work will become nearly useless during the ensuing summer; that is, if the same means be not resorted to that were employed last season by His Excellency the late Lieutenant Governor, authorising the expenditure of the tolls collected at that work; to keep the same in.

Your committee therefore, respectfully recommend your Honorable House to pass a bill granting to His Majesty a sum of money for the purpose of putting the

the said canal in repair.

All which is respectfully submitted,

CHARLES DUNBOMBE.

Chairman.

House of Assembly

An account of Expenditures in repairing the South Pier of the Burlington Bay Canal, on the Lake Ontario side—say 600 feet in extent—Also repairing the North Pier in Burlington Bay, 60 feet, and filling with stone—including repairs to the Bridge across the Canal, and making new Lamps, &c. &c.

WILLIAM J. KERR,

Secretary & Superintend't, B. B. Canal.

Burlington Bay Canal, December 7th, 1835.

EVIDENCE

TAKEN BEFORE THE COMMITTEE.

Committee Room. 16th April, 1836.

Ashuel Davis, Esq., - Called in and examined.

Question 1.—Having examined this account of W. J. Kerr, Esq. for materials and work done to the Burlington Bay canal, and dated December 7, 1835, what remarks have you to offer respecting the items and the prices charged ?-Of the bridge, I would say that it is not, in my opinion, worth more than forty pounds-I would have repaired it in a better manner for less money. The quantity of stone named and charged at £129, I conceive to have been of no use, and rather a damage to the work, being only gravel taken from the beach. As to the prices I conceive them to be high; the planks, spikes and other articles, could have been furnished to my knowledge, at a much lower rate,-for instance, the spikes charged at six-pence Halifax, could have been purchased at five-peace New York

Q. 2.-What is the present condition of the canal and works ?- I think had.

Joshua Freeman, Esq.—called in and examined.

Q. 3.—The same as the first put to the preceding

witness,-

The prices, I consider very extravagant; I particularly examined the bridge, and conside, that thirty five or forty pounds would have been quite a sufficient sum for the repairs done to it. The quantity of stone is not specified, but is charged at about £129. Halifax currency, I think, after a close examination of the work done to the piers, that it was of little service Should there be any further grant of money, I should think that by proper management, if no further injury be done the piers, three hundred pounds would put it in repair.

Q. 4.—When were you a Commissioner of the Bur-

lington Bay canal ?-In 1830.

the canal?—and if so, how much and on what security? la select committee of the House.

-We loaned him upwards of three hundred pounds, on his note upon the security of Wm. Chisholm.

Q. 6 .- Did he ever retund the money according to your knowledge ?- He never did to the best of my

knowledge.

Q. 7. To whom was the note given? to the company or an individual, or into whose lands was it pm? -I do not recollect the precise words of the note.-It was put into the hands of Alexander Brown one of the Commissioners.

Q. 8.—How was the note to be redeemed?—It. was agreed by Mr. Chisholm, that an Act should be passed by the House of Assembly granting a further som of money to the Canal and the note would then

be cancelled.

I would further remark upon the price of the planks which are charged in this account of Mr. Kerr, at 10s., that they could have been bought and delivered for seven and six-pence per hundred feet. The Piers were badly putt, and instead of solid stone being used they were filled up with sand and gravel.

Capt. Bates, - called in and examined.

Q. 9.—What could you purchase the stone for, such as has been used for the piece at the Burlington Bay canal, and charged for in this account at seventeen and six-pence per cord?-Mr. Kerr, for his own pier, pur-

chased stone at ten shillings per cord this last year.

Q. 10.—Did you ever hear any of the hands employed at the Burlington Bay canal, under the superintendence of the present commissioners, say that they were making great wages, and if so how much per day ?- I have heard them say they were making great wages.

Q. 11 - Have you any reason to believe that boat loads of stone were sold twice over?-I have reason to believe so.

(No. 157.)

ANSWER TO ADDRESS FOR DOCUMENTS

IN THE

CASE OF JAMES DAVIDSON.

GENTLEMEN.

In compliance with this Address, I deliver to you the papers requested by the House of Assentily.

Communications from the Lieutenant Governor Sir J. Colborne, to His Majes(yj's government on the subject of Davidson's claim.

(Cory.)

Toronto, U. C., 13th June, 1835.

My Lond,

I have the honor to transmit to you a Q. 5.—Did the commissioners at that time lean to a copy of an address of the House of Assembly res-W. J Kerr, Esq. a som of money out of the funds of pecting a complaint from James Davidson, referred to

It appears from the accompanying documents that the name of the late Wm. Dickson from whom Davidson derives his title to a lot of land, was marked on the Surveyor General's map on lot No. 27 fronting on Like Erie, in the township of Humberstone, under an order in Council of the 19th of October, 1796, for a location; that the claim for this lot, after remaining dormant for thirty-five years, was brought forward when the Welland Canal Company had decided to carry the canal through the lot in question, and to effect the juncture of the canal with Lake Erie at that point:-and that in consequence of an application from the Board of Directors for the lot, an Order in Council was passed granting it to the Company, on condition that another lot on the line of the canal should be assigned to Davidson.

As it is probable a further appeal may be made to his Majosty's government relative to the decision of the Executive Council, I beg leave to forward for your Lordship's information the annexed copy of a Report of the Council in which the case is fully explained.

I have the honor to be, ČU.

(Signed)

J. COLBORNE.

The Right Hon'ble The Lord Glenelg,

&c.

Despatch from the Secretary of State for the Colonies, in reply:

Copy-No. 30.

Downing-Street, 30th July, 1835.

I have received your despatch dated the 13 h June last (No. 29) respecting the case of Junies Davidson and its enclosures.

You have transmitted these documents in order that I might be provided with an answer to any application which might be made to me on Davidson's behalf.-No petition of that nature has been received at this department; but on a careful review of the whole case, I have deemed it inexpedient to postpone the decision

of it on that account.

It appears that on the 19th of October, 1796, a lot of land in the township of Humberstone, was located to one William Dickson, who is since dead. By this expression, according to the habits of that time, was meant that the land was promised, though not actually granted to Dickson, and that, in proof of the engagement, his name was inscribed on the public charts of this township against that lot. The land being wet and swimpy, was not, however, brought into cultivation, nor even accupied; and in this condition it remained till the year 1831, that is for a period of 35 years. At that time the operations of the Welland Canal Company had imparted a new and very considerable value to this property, and application was made for a regular grant of it under the public seal of the Province by James Davidson, the heir of Dickson. It is admitted that under ordinary circumstances, this request would have been accorded without hesitationnot indeed as of strict legal right, but as a matter of grace sanctioned by general, if not invariable usage. It was not thought right, however, to extend this favor The public interest was supposed to to Davidson. The Exe- involved. forbid the acknowledgment of his claim.

cutive Council by an order dated on the 14th Nov. 1831, directed that Dickson's lot should be granted to the President and Directors of the Welland Canal Company, imposing on them, however, the condition of giving to the heir of D ckson, some other lot of qual value-the value being computed not as it existed in the year 1831, but as it had existed in 1796—after 25 years, this order was rescinded, for on the 8th May, 1833, the Council recommended that the company should be required to " transfer to Davidson as heir to Dickson, any lot unlocated upon the line of the canal which might be selected by him, subject " to the approbation of the Welland Canal Commis-" sioners.

In consequence of this order a lot of land was offered to Davidson as a compensation; which he refised to receive; maintaining that it was of very lithe value, and decidedly infector to the lot of which he had been deprived, which he estimated at £500

Halif x currency.

Unable to obtain redress by other means, Davidson presented a petition for relief, to the House of Assemibly. By that House it was referred to a Committee. The Committee on the 80th March last applied to you for copies of the documents. On the 2nd of April they were informed by your Secretary that you could see no objection to those copies being transmitted to On the 8th of April, however, they had not been received, when in order to prevent the loss of the Session, the committee reported to the House their opinion, that the reasons alleged in defence of the transaction were insufficient, and recommended that an address should be presented by the House to vourself, to procure for the petitioner that justice which his case demanded.

On the following day the 9th of April, the House adopting the views of their Committee, accordingly addressed you, requesting you to "look into the muiter, and to direct that justice to be awarded to Duvidson which the case demanded; and which alone "could be spendily accomplished by your favorable

" consideration."

After an interval of seven weeks the case was taken into the consideration of the Executive Council, at which Mr. Archdencon Strachan, Mr. Peter Robinson; and Mr. Markland were the only members present .-Those gentlemen made a report vindicating and adhering to the original decision of the Council, on the ground that the interests of the Province were at stake, and that if Davidson had been secured in the possession of his land, he might have raised a most exorbicant demand for property indispensable to the success of a great public undertaking; and that, therefore, it was equitable to enforce against him the extreme legal rights of the Crown upon the terms proposed.

Such is the history and the present posture of this question; I proceed to the remarks which it has sug-

gested to myself.

First, even if I were persuaded that the House of Assembly had taken an erroneous view of this subject, I should scarely feel myself at liberty to advise His. Majosty to oppose their wishes; the case must be clear indeed, and the motives of the most urgent nature, to justify a refusal on the part of the Crown of a request made by the representatives of the people for the application of a part of the public property in furtherance of any object in which they may consider the interests of justice compassion and liberality to be

On an occasion when the whole matter in debate does not exceed £500, and in which the concession could not compromise any ulterior interest on any general principle, the withholding it appears to me to have been an unfortunate and ill-advised measure.

Secondly, I the more regret this decision, because it was founded on the report of three gentlemen, all of whom held very high and lucrative public employments under the crown, and became therefore it must appear to the Assembly not so much in the light of an impartial adjudication, as in that of a resolve, to the propriety of which the Executive government of the Province is directly committed.

Thirdly,-I am compelled to add, that in my opinion the House of Assembly were right, and the Executive Council in error, in the views taken by those hodies respectively, of Davidson's claim. If it could have been truly alleged that he had no title, legal or equitable to the property, it would have been the necessary consequence, that for the resumption of it by the crown, he would have no claim to compensation. But the Council resolved that he should be compensated for the loss. They required that the Canal The Company should assign to him other lands. question therefore was not, whether the loss should be made good; but in what manner and on what principle the company or the government should proceed fer that purpose.

The first resolution was evidently unjust; for after 23 years the council themselves rescinded it. give to Davidson in 1831 what the land would have been worth in 1796, was to pay a consideration altogother nominal for a detriment which was not less clear-

ly substantial.

The Resolution of 1833 gave to the claimant a compensation governed by no definite principle whatever. He was to receive any unscaled lot adjoining the canal, to be chosen by himself if certain commissioners should approve his choice. In plainer terms he was to take whatever the commissioners might think proper to concede to him.

If compensation was to be made at all, the claimant should have received either in money or in land, property, equal in value to that which was taken from him; and in assessing the value reference should have been had to arbitrators selected on either side.

It is my opinion that such a compensation was justly due, and I am confirmed in this conclusion by the judgement of the Executive Council, which fully admits the principle upon which the claim was founded.

It is not without great relucionce that I have advised ! His Majesty to over rule your decision in this case. I carnestly deprecate any invidious contrast which ill disposed persons might be induced to draw between ernment. But for the reasons already mentioned, I land Canal campany, who will be invited to concur in the decisions of the Home and of the Provincial govhave thought it impossible to refuse to Davidson the relief which he solicits.

You will, therefore, signify to him that His Majesty acknowledges his right to full compensation for the loss of the land, to the occupation of which he was equitably entitled as the Heir of Dickson; and the loss will be made good to him by the payment out of the heredmary and territorial revenue, of such a sum of money Mr. James Davidson, as shall be fixed by the joint award of two arbitrators, one to beappointed by the local government & the other

by Davidson himself; or, in the event of the disagreement of such arbitrators, then, according to a separate award to be made by, an Umpire previously, selected,

by them.

The payments which may thus be made by the Provincial government will of course constitute a claim against the Welland Canal company, who will therefore, be invited to concur in the choice of the government arbitrator. Their refusal, however, must not arrest the course of the proceedings in which it is necessary that no time should be lost. I should much regret if, at the next meeting of the general Assembly, that body, in addition to the numerous complaints which they have already laid before His Majesty, should have to urge that of a disregard to their wishes on an occasion like the present; in which, independently of the respect due to them, the claim is recom-mended by so many substantial considerations of equity.

I have, &c. GLENELG. (Signed) Major General Sir J. Colborne. K. C. B. &c. &c.

CORRESPONDENCE ON DAVIDSON'S CASE

Pursuant to the directions contained in the preceding Despatch.

[Copy.]

Government House, Toronto, 6th November, 1835

Sin. I am directed to acquaint you, that in consequence of the address of the House of Assembly, recommending your case to the favorable consideration of the Lieutenant Governor, His Excellency transmitted a statement of your claims to His Majesty's government; and His Excellency is directed by the Secretary of State for the Colonies to signify to you, that His Majesty acknowledges your right to full compensation for the loss of the land, to the occupation of which you were equitably entitled to as the Heir of W. Dickson, & that the loss will be made good by the payout of the territorial revenue of such a sum as shall be fixed by the joint award of two arbitrators, one to be appointed by the local government and the other by you; or, in the event of the disagreement of such arbitrators then according to a separate award to be made by an umpire previously selected by them.

This payment is to constitute a claim against the Wel

the choice of the government arbitrator.

In stating that your right has been acknowledged, you are to understand that it is assumed, that you have established your claim as Heir at Law to the late William Dickson.

I am, &c.

WM. ROWAN.

Nelson, Gore District. (Copy.)

Government House, Toronto, 9th November, 1835.

Sir,

In transmitting to you the accompanying copy of a Letter addressed by direction of the Lieutenant Governor to Mr. James. Davidson, I have it in command to acquaint you, that, with reference to the instructions contained in the Secretary of State's Despatches of the 30th of July ;- His Excellency has been pleased to nominate Mr. Robert Grant of Queenston to be Arbitrator on the part of the Crown; and I am desired to invite the concurrence of the Board of Directors of the Welland canal company to the appointment of Mr. Grant.

I have &c.

WM. ROWAN.

President Welland, Canal company, Scc. &c.

(Copy.)

Welland Canal Office, St Catherines, 20th November, 1835.

I have the honor to acknowledge the receipt of your favor of the 9th Instant, which has been this day laid before the Board of Directors, who have directed a negociation to be made with Mr. James Davidson for an amicable settlement, which, if not effected, they will most cheerfully acquisee in the appointment of Mr. Grant. The result of their negotiation with Mr. Davidson will be duly communicated to you.

I have &c. (Signed.)

WM. HAMILTON MERRITT, President W. C. Company.

Col. Rowan, &c. &c. &c. }

(Copy.).

Nelson, 2±th Nov., 1885.

Sin.

Your communication of the 6th Instant was duly received by me a few days since, by which I find that my claim with respect to the lands in Humberstone has been recognised. It also find that the manner proposed for settling the amount to be paid government, and to request that you will communicate me is by arbitrators to be chosen, one by the local government and one by myself—no time particularly is mentioned. But I have in pursuance of the course mentioned above and in your communication, appointed an Arbitrator on my behalf, and should be happy that the one on the part of the government would be appointed as soon as convenient. I have appointed Miles O'Reilly of Hamilton, Esq., as my arbitrator; and would beg that when the appointment shall be Robert Grant, Esq. ? mode on behalf of the government, that circumstance

with the name of the person so appointed may be communicated to him directly, instead of me, as I live rather out of the way, and have given him instructions to act for me.

I would also beg leave to suggest, that inasmuch as the amount to be awarded to me is to constitute a claim in favor of the government against the Wolland canal company, it would be fair that the government, in appointing their arbitrator, should be careful that the appointment may not fall upon any one interested in or in any way connected with the canal company.

I have &c. Col. Rowan) &c. &c. &c. \

Government House. 23rd December, 1835.

Sin;

The Secretary of State for the colonies having signified to the Lieutenant Governor, that the claim of Mr. James Davidson to compensation for the loss of the land which he is entitled to possess as the heir of William Dickson, should be decided by arbitration, and that two arbitrators should be nominated, one by the Lieutenant Governor and the other by Davidson, as in the event of the disagreement of such arbitrators, that a separate award should be made by an umpire previously selected by them; I am directed to acquaint you that His Excellency has been pleased to nominate you to be the Arbitrator on the part of the with Mr. O'Reilly of Hamilton, the arbitrator appointed by Mr. Davidson, in regard to the time and place for the arbitrators to meet.

The accompanying copy of the report of the Executive Council on the claim of Mr. Davidson, is transmitted for your information and guidance.

I have, &c.

WILLIAM ROWAN.

Queenstori.

REPORT

OF THE

EXECUTIVE COUNCIL-

ON THE CASE OF

JAMES DAVIDSON.

(Corr.) EXECUTIVE COUNCIL CHAMBER, At Toronto, Saturday, 30th May, 1835.

PRESENT :

The Hon: and Von John Struchan, D. D. Archdeacon of York-Presiding Counciller.

> The Honorable Peter Robinson, George H. Markland.

To His I zcellency Sir John Collinenc, K. C. B. Lieutenant Governor of the Province of Upper Canada, and Major General com-manding His Majesty's Forces therein, S.c. St.

May'rr PLEASE Your Excellency,

With reference to the Address of the Assembly on the perition of James Davidson, it will be seen by the various proceedings had thereon that said Davidson claims as the Heir of William Dickson who was located under an order to Council of the 19th October, 1796, for lot No. 27 in front upon Lake Eric in the township of Humberstone.

Owing to the quality of the soil, being wet and swamey; no application to procure a patent was made for 35 years, but after it was decided that the lot was important to the operations of the Welland Canal Company from being near the projected barbor on Lake Erie, and that it had become valuable by the expenditure arising from that great public work, a claim was set up by the petitioner Davidson for a grant of

The Council have generally considered all locations of land an de by entering she name of the party upon the map in the Surveyor General's office, as a pledge even after an equal number of years; but it is evident that such consideration is merely matter of grace, there being in assurance that persons will be waited for during such a length of time.

In this case therefore, where the interests of the Province were at stake, where the claim had him dormant since 1796, and where the property had been rendered valuable by the outlay of a Company partly, and partly by a grant of the Legislature, they did not consider it necessary to allow an individual to enjoy a benefit which would not otherwise have been derived by any of the ordinary means of improvement in the Province.

They deemed it equitable to declare that the lot, Sing under the circumstances, could not be granted to Da-

his title as the beir of Dickson which they recognised, it was required that the Welland Canal Company should transfer to him any unlocated lot on the line of the canal in either the township of Wainfleet or Humherstone, subject to the approbation of the Commissioners appointed by the Legislature to report upon the Welland Canal, and leaving the selection thus restricted to Davidson himself.

This the Assembly have declared was "subjecting the petitioner to a wrong," and should the opinion bu concurred in by His Majesty's government, it is quite competent for them to order any remuneration they may deem fit; as the Council could have no other desire than that of rendering justice, and at the same time

protecting the King's rights.

The Council however have little doubt, that had their decision been otherwise, and the claim of Davidson been confirmed, upon any representation from the Welland Can'd Company to the Assembly, they would on more mature consideration have scarcely deemed it r vid n & wise to place a public institution assisted and supported by the Provincial Treasury, at the mercy of an individual who might demand a most exherhitant value for property indispensable to their welfare.

All which is respectfully submitted

(Signed) JOHN STRACHAN, P. C.

GOVERNMENT OFFICE, Toronto, 23d December, 1835.

With reference to my letter of the 6th ultimo, 1 am directed by the Lieutenant Governor to acquaint you for the information of Mr. James Davidson, that His Excellency has been pleased to appoint Mr. Rohert Grant, of Queenston, to be the arbitrator on the part of the government, to determine on the amount of compensation to which Mr. Davidson is entitled as the heir of Wm. Dickson, for the loss of the land granted to the Welland Canal Company.—Mr. Grant will be instructed to communicate with you in regard to the time and place for the meeting of the Arbitrators.

I forward to you a copy of a letter which has been written to the President of the Welland Canal Company on this subject.

1 am, &c.

Wm. ROWAN.

M. O'Reilly, Esq. Hamilton.

(Cory.)

GOVERNMENT OFFICER Toronto, 23d December, 1835.

With reference to your letter of the 20th ultovidson; but upon being satisfied with the legality of I am directed by the Lieut. Governor to acquaint you

James Davidson, satisfactorily, His Excellency has ney of the Province of Upper Canada, to me in handconsidered it incumbent on him to nominate Mr. Rob't paid by the Welland Canal Company, the receipt Grant, the arbitrator on the part of the government, and to request of him that should the arrangement which you have proposed to Davidson not be carried into effect, mat he will be prepared to proceed with the arbitration so soon as it shall be notified to him by you and Mr. O'Reilly, that the offers of the Welland Canal Company have not been accepted by Mr. Davidson.

I have the honor to be dec. dec. dec.

Wm. ROWAN.

President Welland Canal Company, &c.
