" Brant's deed to Cozens, Cozen's power to Clark, "Clark's power to Barrell & Servante."-And also the amount of about £250, advanced by said firm to said Clark-but no account of any sales, neither can deponent ascertain who the assignees were with whom it is presumed the said deed still remains, or their heirs, in all probability, among papers which are considered of no value or have been lost-or so mislaid as not yet to be found, and deponent saith that his said, agent, Clark; is also dead. J. Y. COZENS. (Signed)

Sworn before me at Cornwall, in said District, this 1st day of July, 1834. G. C. WOOD, J. P. (Signed)

(No. 4.)

Lower Canada, Before me the Honorable Fear District of Montreal. Roch Rolland, one of the Justices of His Majesty's Court of King's Bench in and for the Province of Lower Canada, personally appeared Joshua Henshaw of St. Therese in the Parish of Chambly, gentleman, and being duly sworn deposeth and saith-That he was present in the City of Middletown and State of Connecticutt in the year 1796 when Joshua V. Cozens, Esq., now of Cornwall in the Province of Upper Canada, put into the hands of Samuel Clark of said Middleton, merchant, sincein trade having caused a failure to a large amount in deceased, a deed of bargain and sale written on parchment, purporting to be made by one Joseph Brant, and signed by him in his own right and as agent for the Five Nations of Indians; there was likewise an instrument either annexed to the said deed or accompanying the same, the deponent at this distance of time does not recollect which, purporting to be a power of attorney from the principal Chiefs of the said Indians e power to sell the said township to the said Hamburgh to the said Joseph Brant with their names and crosses. And deponent further saith, that his said fixed to the same, and appearing to be duly executed. authorizing and empowering said Brant as their agent to sell a certain tract of land to the said Cozens, being according to my best recollection described as a part of a certain parcel or tract of laud known by the name And deponent further saith, that he then wrote to of the Grand River Tract in the Province of Upperthe house of Barrell & Servante but got no answer -- | Canada, belonging to the said Five Nations of Indians

said tract of land containing to the deponents best recollection and belief 92,160 acres, more or less, he baving a copy of said deed in his possession for many ears, and thinks he still has one, as he has seen it within two or three years, but cannot readily find the same; and this deponent further saith that he was a witness to the letters of attorney executed by the said Joshua Y. Cozens to the said Samuel Clark authorizing him to sell the said tract of land in Europe, where he intended to proceed for that purpose; and the deponent further says that the said Clark thinking the deponent more conversant in transactions of this nature than himself, requested him to examine said deeds and papers to ascertain whether the chain of titles were regular, and the other writings and papers correct, which the deponent carefully did, and as far as his recollection serves him found them correct; and further that said Clark did proceed to London for the purpose of disposing of said land and continued there for more than three years and not effecting a sale of said land or any part thereof returned to America to the house of the deponent, being his brother-in-law, where his family at this time was, said Clark informed this deponent that he had left said doeds &c. &c. with authority to sell said lands with a mercantile house trading under the name and firm of Barrell & Servante in London; and this deponent further says, that some years since having a son in London said Clark requested him to write to his son to make application for this deed and papers and procure and bring them with him on his return, which the deponent did, and after much enquiry and trouble his son was only able to ascertain that the said house of Barrell & Servante had long before become bankrupt and both deceased-(that their papers and effects had passed into the hands of assignees, and the deponent believes that application was made to the assignees for said deed and papers, but that none could be found; and the deponent further saith that since writing the above he has found said copy of said deed and herewith annexes the same.

(No. 5.)
This Indenture made the eight day of September in the year of our Lord one thousand seven hundred and ninety-six, between Captain Joseph Brant of the Province of Upper Canada for himself and Agent for the Five Nations of Indians, he being lawfully appointed and invested with full and sole power to convey and confirm all the right, power, interest, claim or demand of all and every part or parcel of a certain tract on body of land belonging to him the said Captain Joseph Brant and the Five Nations of Indians, and Joshua Y. Cozens of the town of York and Province

aforesaid, of the other part;
Whereas General Haldimand in 1784 being Governor and Commander-in-Chief of His Majesty's Province of Quebec now known by Upper and Lower Canada, having full and sole power to give, grant, convey and confirm any part or parcel, tract or tracts of His Majesty's lands in the Province aforesaid, and the said Governor Haldimand did for certain losses and good services, give, convey and confirm unto Captain Joseph Brant aforesaid, for himself and the Five Nations of Indians, their heirs, executors, admin-

istrators and assigns, a certain tract of land known by the name of the Grand River Tract, bounded as follows;—Beginning at Lake Eris where said Grand River empties, and extending to the head of the waters of said river, six miles in width on each side said river, reference being had to said deed of gift and conveyance, bearing date the 25th day of October, 1784, which is recorded in the Secretary's office of the Province of Upper Canada in Lib. A, folio 8, will more fully appear.

Now this Indenture witnesseth, that the said Capt. Joseph Brant for and in consideration of the sum of five hundred pounds, estimating dollars at eight shilings, to him in hand well and truly paid by Joshua Y. Cozens aforesaid, at or before the ensealing and delivery hereof, the receipt whereof is hereby acknowledged, - fluth granted, bargained, sold, aliened, enfeoffed, released, conveyed and confirmed, and by these presents doth grant, bargain, sell, alien, enfeoff, release, convey and confirm unto the said Joshua Y. Cozens, his heirs and assigns, a certain tract of land, being a part of the aforesaid tract known by the name of the Grand River Tract, lying and situated as aforesaid, and bounded as follows; - Beginning at the corner stone adjoining a certain tract of land purchased of the Five Nations of Indians by William Wallace and Tiffuny, the 1st of May, 1796, said corner being 36 miles distant from the Forks of said river, running from thence the different courses of the Grand River tract twelve miles square, containing ninety thousand acres, more or less, together with all and singular the improvements, ways, waters, water-courses, rights, members, privileges, hereditaments and appurtenances whatsoever to the same belonging or appertaining; with the reversions and remainders, rents, issues and profits thereof and every part thereof, and also all the right, estate, title, interest, profit, claim and demand whatsoever of him the said Joseph Brant for himself and Agent for the Five Nations of Indians of, in and to the said 90,000 acres and every part thereof either in Law or Equity, to have and to hold the said 90,-000 acres, hereditaments and premises hereby granted, mentioned or intended to be, with the appurtenances, unto the said Joshua Y. Cozens, his heirs and assigns forever,-And the said Captain Joseph Brant for himself and the Five Nations of Indians aforesaid, and their heirs, doth covenant, promise, grant and agree to and with the said Joelaa Y. Cozens, his heirs and assigns by these presents in manner following, that is to say, - That he the said Captain Joseph Brant for himself and the Five Nations of Indians and their heirs the said tract of land, hereditaments and premises here by granted and every part thereof with the appurtenances, unto the said Joshua Y. Cozens, his heirs and assigns against him the said Captain Joseph Brant and the Five Nations of Indians and their heirs, and against all and every other person or persons whatsoever, lawfully claiming any estate, right or title therein, shall and will warrant and forever defend by these Presents,-In witness whereof the said Captain Joseph Brant for himself and Agent for the Five Nations of Indians as aforesaid, hath hereunto set his hand and seal, dated the day and year first above written.

Note.—This taken from a copy in the hands of J. B. Heashaw, New York.

#### (No. 6.)

Know all men by these presents, that Joshua Young Cozens of the town of Cornwall in the Eastern Disrict of the Province of Upper Canada, Esquire, for and in consideration of the love and affection that he hath for his son Nelson Cozens, as also for the further consideration of a title for two hundred acres of land in East Hawkesbury, sold for two hundred pounds, as also two hundred pounds in cash paid at different times heretofore, making four hundred pounds of lawful money of Upper Canada, the receipt whereof is here-by acknowledged.—Ho the said Joshua Y. Cozens hoth given, remised, released and forever quit claimed, and by these presents Dorn for himself and his heirs, give, remise, release and for ever quit claim unto the said Nelson Cozens of Cornwall in the District and Province aforesaid, gentleman, and to his heirs and

Gore in the Province of Upper Canada, containing by admeasurement ninety-two thousand one hundred and sisty acres of land be the same more less; which said township of land is bounded as follows, that is to say, beginning at the corner stone adjoining a certain tract of land purchased of the Five Nations of Indians by William Wallace and Isaiah Tiffany the first of May, 1796, said corner stone being thirty miles distance from the Forks of the Grand River and running from thence the different courses of the Grand River Tract twelve miles square, which said township or tract of land being a part of that certain tract of land known by the name of the Grand River Tract, which was given and granted by General Frederick Haldimand, Governor and Commander-in-Chief of his Majesty's Province of Quebec (now known by Upper and Lower Canada) having full and sole power to give, grant, convey and confirm any part or parcel, aract or tracts of land, that is his Majesty's lands of the Crown in the Province aforesaid; and the said Governor Haldimand did in the year 1784 for certain losses and good services give, grant, convey and confirm unto Captain Joseph Brant for himself and the Five Nations of Indians, their heirs, executors, administrators and assigns that certain tract of land known by the name of the Grand River Tract, and bounded as follows, beginning at the Lake Eric where said Grand River empties, and extending to the head of the waters of said Grand River, six miles in width on each side of said Grand River. Reference being had to a deed of gift and conveyance bearing date the 25th day of October, 1784, which is recorded in the office of the Secretary of the Province of Upper Canada in Liber A folio 8, will or may more fully appear. Which said title was ratified by John Graves Sincoe, Esquire presiding as Licutenant-Governor of the Province of Upper Canada in the year 1793, as may appear by the survey of said tract-land registered in the Surveyor-General's office by order of his Excellency Governor Simcoe. And whereas the said Captain Joseph Brant for himself and agent for the Five Nations of Indians aforesaid, did grant, bargain, sell, convey and confirm unto the said Joshua Y Cozens the said township of land above-mentioned being part of the said above-mentioned Grand River Tract containing 92,160 acres of land, more or less as aforesaid. Now know ye, that the said Joshua Y. Cozens for and in consideration of the love and affection that he hath for his said son Nelson-Cozens, and the sum of four hundred pounds paid by the said Nelson Cozens as aforesaid, bath given, granted, bargained, sold, remised, released, and forever quit claimed, and by these presents doth give, grant, bargain, sell, remise, release, and forever quit claim unto the said Nelson Cozens and his heirs forever the said township or tract of land with the hereditaments and appurtenances thereunto belonging or in anywise appertaining, to have and to hold the same unto the said Nelsen Cozens, his heirs and assigns forever.—So that neither he the said Joshua Y. Cozens nor his heirs nor any other person or persons for him or them, or in his or their names, or in the name, right, or stead of any of them, shall or will by any ways or means hereafter, have, claim, challenge or demand any estate, right, title or interest of, in, or to the said premises above-mentioned or any part thereof, but they and every of them shall be literally excluded and barred forever by these presents. In witness whereof the assigns forever, all and singular that certain township or said Joshua Y. Cozens liath to these presents set his tract of land situate, lying and being in the District of hand & seal at Cornwall in the Eastern District aforesaid, this second day of July in the year of our Lord one thousand eight hundred and thirty-three (1833.)

(No. 7.)

Extract of Letters from Joshua Y. Cozens to his Agent, Samuel Clark, London.

Montreal, 4th Jan'y, 1798.

DEAR SIR,

I wrote you in September but can receive no answer from you since, I once wrote you the papers necessary to attend the Brunt title would come on by the Halifax mail, which I certainly expected would have been executed, but was not effected. I have been trying over since to obtain them but could not until within a formight, I have obtained the inclosed, with the Secretary's Seal of Office, which I conceive will be every thing."

MONTREAL, 7th March, 1798.

DEAR SIR.

Yours inclosed to Mr. E. Smith I received, which astonished me, as you say you have not heard from me since April, as I have wrote at least ten let-ters since that, and have sent two certificates, two months different in date,—as follows—"a copy of Haldimand's deed to the Six Nations—a confirmation of four townships by government empowering Brant to convey in fee simple, referring to my deed as one, and it being clear of mortgage—this certified by the Secretary, with the Provincial Scal affixed theretothis is all I could get which is certainly every thing Decessary.

(No. 8.)

Upper Canada, Bosore me James Pringle, one Eastern District, of His Majesty's Justices of the To My appeared Joshua Y. Cozens, of Cornwall, in said district, Esquire, and being duly sworn depo-

nent received by purchase from Capt. Joseph Brant, and as Agent for the Six Nations Indians, a Warrantee Deed for a township of land on the Grand River, supposed to be that designated as Block No. 4, &c. in the Gore District, containing 92,160 acres, he deponent would have had said deed recorded but was prevented from so doing by the absence at Montreal of the Registrar, John Powell, Esquire, and no other person being at the office anthorised to make records at his office; -That Dr. Kerr thereupon assured deponent that the acknowledgement of the due execution of said deed before him, as Judge of the Surrogate Court, was quite sufficient without its being re-corded, which acknowledgement was made.—And deponent further saith, that on sending said deed to England he retained a duly certified copy thereof, witnessed by two Lawyers named Hosmer, brothers, both of whom are now dead. That said certified copy was with many other papers and documents public and private, totally destroyed in the interior of said District whither they had been removed for safety by John Low Farrand, Esq., then Registrar and Clerk of the Peace for said District, on the invasion of the Province by General Wilkinson's army in 1813;-And deponent further saith, that in 1797 his Agent. Clark, in London, wrote to deponent that he had or was about to negetiate with a Company of Hamburgh Merchants, for the sale of said township of Land, but that they did not fully comprehend the nature of the said Warrantce Deed as based upon the Indian title whereupon deponent obtained and forwarded to said Agent in London, for the full satisfaction and conviction of said Merchants, as to the strength, legality and validity of said deed, a certificate with Seal of Office thereto attached, from Wm. Jarvis, Esquire, Provincial Secretary of Upper Canada, setting forth the full knowledge, consent and approval by government of said sale by said Captain Brant to deponent; who immediately forwarded to his said Agent in London said certificate, in a letter, which letter also bearing the various Ship stamps and Post marks, deponent lately obtained from said Clark's last residence and has now in his possession, together with another letter recapitulating the substance of said certificate and the fact of its having been forwarded; -And doponent further saith, that in dining with the late Sir John Johnson, Superintendant General of Indian Affairs in Canada, Sir John Johnson in the presence of his private Secretary Captain P. Langon, and other gentlemen guests, speaking of said purchase by deponent and Warrantee Deed aforesaid from said Capt. Brant, expressed himself fully and freely to deponent, and assured deponent that as to his title from Brant none could possibly be better.—That the only government question that could arise might originate in the con-stitutional reservations of two-sevenths; — That shortly after said conversation and opinion of Sir John, deponent had an interview with said Captain Brant, who promised to obtain from government and deliver to deponent, a full relinquishment of said two-sevenths. upon the receipt from deponent of a further consideration of £1000 as specified by deponent in anterior depositions by him made, but that deponent always considered upon possessing the opinion and assurances as aforesaid of Sir John Johnson, also that of said Capt. Brant that the Government Patent for said land; substituted for said Warrantee Deed, could only be desirable or deemed preferable in case of sale of said soth and saith. That when in the year 1796 he depo. lands to persons abroad, or strangers at a distance not

ully acquainted with the Indian title as derived from Governor Haldimand.

(Signed) J. Y. COZENS.

Sworn before me at Cornwall, in the Eastern District, this 23d day of Feb'y, 1835.

(Signed) JAMES PRINGLE, J. P.

(No. 9.)

Lower Canada, Before me Jacob Glen, Es-District of Montreal. Squire, one of His Majesty's Justices of the Peace for the said district, personally appeared Joshua Henshaw of St. Therese, gentleman, and being duly sworn deposeth and saithhe was personally present at Middletown in the State of Connecticut in the year A. D. 1796 and saw put into the hands of Samuel Clark of said Middletown, a deed of bargain and sale duly executed, signed by one Joseph Brant for himself and as agent for the Five Nations of Indians, for a tract or township of land belonging to the said Indians (as said deed expressed) situated upon the Grand River in the Province of Upper Canada, containing 92,160 acros more or less, as appears from a copy of said deed in the hands of the deponent, together with a power of attorney either annexed to or accompanying said deed, the deponent does not recollect which, with a number of signatures and crosses, purporting to be the names and signatures of the Chiefs of said Five Nations of Indians, authorising the said Brant to sell and convey said tract or township of land; and the deponent further says, that said deed of conveyance was to Joshua Y. Cozens and by him delivered to suid Clark, accompanied with a power of attorney authorising said Clark to sell and dispose of the same in Europe.

And further, that the said Clark did go to London with said deed and writings, for the purpose of selling the said land, and continued there nearly three years-and the deponent received letters from said Clark after his arrival there, and this deponent suys that in A. D. 1797 he was informed by said Cozens that he had made a conditional sale of the said tract or township of land for one dollar the acre, if his agent had not sold it previously to the person's arrival in London from America, a Mr. Broom, agent for a company in Hamburgh, and that said Cozens wished the deponent to communicate this information to said Clark his agent, with his intention of embarking for Europe himself according to the deponent's best recollection after confirming the sale in America, & the deponent accordingly wrote to said Clark communicating this information and requesting him to forward said deeds and papers by the British Packet as being the most safe mode of conveyance, and to remain in London until the time should expire for making the first payment and receiving the same, all which appears by a letter written by the deponent to said Clark at said time to the above effect, and now before him; and the deponent further says that he gave his deposition before the Hon. J. R. Rolland, J. B. R. at Montreal in October last at the request of said Cozens, and not at that time having the said letter could not recollect the circumstances stated above.

(Signed) JOSHUA HENSHAW.

Sworn before me at Chambly,
this 22nd day of May, A. D. 1834.

(Signed) JACOB GLEN, J. P.

For the District of Montreal.

(No. 10.)

Memorandum of an agreement made and entered into this 14th day of July, A. D. 1796 by and between Joshua Y. Cozens, and Capt. Joseph Brant, both of the Province of Upper Canada, viz :- Said Cozens doth promise and agree to and with the said Capt. Brant for himself and the Five Nations Indians. to confirm by an instrument of writing for that purpose, to pay or cause to be paid to them the Five Nations £1200 per year, estimating dollars at 8s. each in consideration of a certain tract of land to contain 100,000 acres, belonging to the said Five Nations, known by the name of the Grand River Lands, they confirming the same to said Cozens by Deed. Said Cozens to be at liberty to pay the principal when he shall or may think proper, estimating the same at £20,000 currency as aforesaid.—Said Cozens doth further agree that if the said Capt. Brant cannot accommodate him the said Cozens with the aforesaid number of acres, to confirm as aforesaid to him the said Capt. Brant of the Five Nations, six hundred pounds per year, currency as aforesaid, in consideration of 50,000 acres when confirmed by deed to him. the said Cozens, he being at liberty to pay the principal as above, estimating the same at £10,000 currency, as aforesaid.

Said J. Y. Cozens doth further agree to give or cause to be given unto the aforesaid Capt. Brant, exclusive of the aforesaid consideration, £500 like currency if said Capt. Brant confirms to said Cozens by Deed 100,000 acres, and if said Capt. Brant should confirm by Deed 50,000 acres, said Cozens to give or cause to be given to him said Capt. Brant £250 currency as aforesaid, exclusive of the consideration as aforesaid.

As witness our hands and seals.

(Signed)

J. Y. COZENS. JOS. BRANT.

(Signed) JOS. BRANT.
(N. B.—There are no witnesses to this memorandum.)

WELLINGTON SQUARE, 20th April, 1835.

DEAR SIR,

The annexed is a true copy of an agreement between your father and the late Captain Jos. Brant, which is quite different from the receipt you showed me, mentioning £1000 as the full consideration money. And upon reference to your father's letters to the late Mr. Durand, I find the copy of an indenture inclused, in which indenture £500 is stated as the consideration money—the thing does not appear clear to me. I have therefore written to the Lieutenant Governor's office, requesting to be present when your claim is taken up by the Executive Council.

And I am, dear Sir,

Your obed't Servant,
(Signed) WILLIAM J. KERR.

Nelson Cozens, Esq. }

Upper Canada, Before me, Wm. Bruce, one Eastern District, of His Majesty's Justices of the To wir: Peace in and for the said District, personally appeared Joshua Y. Cozens of Cornwall in the said district, Esq. and being duly sworn deposeth and saith,—That he deponent entered into a memorandum of agreement in the month of July in the year 1796 with the late Capt. Joseph Brant, pur-

porting to be an agreement for 100,000 acres of land belonging to the Five Nations of Indians, and known by the name of the Grand River Lands, which said 100,000 acres was to consist of Block No. 3, which the said Capt. Brant had granted to Wm. Wallace and Isniah Tiffany as he Capt. Brant informed deponene; and deponent further saith that the said Capt. Brant informed him that Wallace and Tiffary had failed in paying what they had promised on the first of May previous, and that he Capt. Brant entered into an agreement with him deponent to confirm a title for 12 miles square, being block No. 3, and 800 acres supposed to be a bed of Iron Ore—That deponent agreed to pay for said 100,000 acres of land at the rate of £20,000 N. Y. currency, to be at liberty to pay either £1200 annually or to pay the principal when the yearly amount was to cease; that deponent also agreed to pay a further sum of £500 New York currency, when he should receive a deed in fee simple for 100,000 acres or £250 if only 50,000 acres were confirmed by deed .- And deponent further saith, that he set out from Niagara, on the 16th July 1796 for Philadelphia for £2000, which he had placed in the hands of Mr. Phineas Bond, the then British Consul; that deponent returned to Niagara where he arrived on the 2nd of September, and when and where he again met with Capt. Brant at Dr. Kerr's, who informed deponent that he had come to a further understanding and agreement with Wallace and must cancel the agreement he had entered into with deponent, which deponent agreed-that the agreement was in Capt. Brant's desk at the Grand River, 60 miles from Niagara—that Capt. Brant promised to send said memorandum to the care of Dr. Keer, who was to destroy it in the presence of deponent; and deponent further saith, that a day or two afterwards when Capt. Brant ascertained that deponent had £500 in his trunk and a draft ou Mr. Russell, Receiver General of the Province for 650, he Capt. Brant proposed selling to deponent a township 12 miles square, supposed to contain 92,160 acres—that after two days continually occupied in bargaining for said township with the ussistance of Dr. Kerr, deponent purchased said township for £2000 currency—£500 at the time of receiving the deed or title, £500 to be paid in one year, and £1000 to be paid when deponent should be furnished with vouchers that the government had no claim to said township of land—That Mr. Angus Mc-Donell was about to insert in the dead of conveyance the £2000 consideration, which ought to have been, but Capt. Brant would not agree to have more inserted therein than he was about to receive, to wit, the £500, but would of course give a receipt for the next payments as part of the consideration money, which he did on receiving the second payment in 1797-and deponent further saith the said township so by him purchased, was considered as the poorest of the Indian Tract, and that it was but of little value-that Capt. Brant assured deponent that 30,000 acres were good land, and that the rest he had not fully explored being far distant from his settlement, and was not expected by the chiefs to ever be settled, and only volu-ed as hunting ground.—That dependent being employed in secret services was sent with despatches to Mr. Liston, British Minister at Philadelphia, and did not afterwards return to Upper Canada but remained set-

tled in Montreal until 1799; and deponent further saith that Capt. Brant at the time of receiving the second payment of £500 declared to deponent that he had sent the fermer memorandum of agreement for Wallace's township to Dr. Keff, which he since told him to destroy.

(Signed) J. Y. COZENS.

Sworn before me at Cornwall, this 30th day of April, 1835.

(Signed) Wm. BRUCE, J. P.

## (No. 11.)

"Received June 26th, 1797, of Mr. Joshua Y. "Cozens, the sum of five hundred pounds making one thousand pounds Halifax currency, with the five hundred pounds he paid me when I signed a deed to the said Joshua Y. Cozens in October 1796, for a township of land, being part of the Grand River tract, containing 92,160 acres, purchased by the said Joshua Y. Cozens from me and as Agent for the Five Nations of Indians; and I hereby action where the said above sum to be in full of all demands for said township of land, until I deliver said J. Y. Cozens a full relinquishment from government that they have no claim on said lands, which I bind myself and heirs, as Agent aforesaid, to do.

"JOSEPH BRANT."

(No. 12.)

ROCHESTER, May 18th, 1836.

SIR.

father's came duly to hand, giving me to understand that you had a claim before government for a tract of land on the Grand River purchased of the Indians, and that the deed from Captain Brant with a copy of a Power of Attorney from the Chiefs to Brant, was lost in London—and that you wished to know if I recollected your having such a deed.

I think that I do remember hearing the deed read, and that Devenport Phelps, Esq. was present, and that he gave his opinion that it was a strong deed.

I send you a copy of the Government deed to Wm: Wallace, confirming the Indian title to block No. 3, on the Grand River, which has reference to the Haldimand title to the Indians. The right for them to dispose of their lands, and that of Captain Brant to convey the same in fee simple, by a special power of Attorney from the Indian Chiefs.

# AN ABSTRACT OF THE POWER.

"In witness whereof we have hereunto set ourhands and scals, the same being first read and fully explained to us in behalf of our said Nations, the seventeenth day of May, in the year one thousand seven hundred and ninety-six, and in the thirty-sixthyear of the reign of our Father His Britannic Majesty King George the Third.

Corr,

State of New York, Before me, H. Humphrey, To WIT: Justice of the Peace for the city of Rochester in the State of New York aforesaid, personally appeared James Wallace, of the city of Rochester in the State of New York aforesuid, Esquire, and after being sworn deposeth and saith,that in the year 1796 deponent in company with Joshua Y. Cozens, Davenport Phelps, Esquire, and a number of others at Niagara, Province of Upper Catnada, Mr. Cozens informed the company then present hat he had just received a deed for the township of land he had purchased from Captain Brant for himself, and as agent for the Five Nations of Indians, being the next tract of land adjoining block number three sold to Wallaco and Tiffany—That Cozens asked lawyer Phelps, then present, what he thought of the form of said deed of conveyance; Phelps replied it was as good and valid a title as could or need he drawn; that deponent further suith, that he has heard Captain Brant declare that his intentions and reasons for selling those lands was to enable the Indians to improve their lands and farms below, and that he had first offered to sell to Governor Simcoe for the government; that Governor Simcoe declined purchasing, but told him to sell to them that would give the most; that deponent further snith that this tract of land was called No. 4 and extended up to what was called the Purchase Line.

JAMES WALLACE.

Sworn before me this 14th day of Sept. 1835. H. HUMPHREY, J. P.

No. 14.

COPY.

Brant's Deed to Cozens. Cozen's Deed to Clark. Power to Clark and other immaterial pa-Clark's power to Barrell & Servante.

London, 16th March, 1799.

Mr. Samuel Clark,

The above are the papers belonging to you which remain in our hands of all those formerly deposited by Mr. Henshaw and yourself.

We have accepted your bill in favor of Stevens & Rankin for £216 3 3, payable 14th & 17th March, 1800. If you do not find it absolutely necessary to appropriate this money to the use of the Carver estate, or if we do not come into the commission of that business, we then rely on your honor to remit us the same soon as you possibly can, not failing to do it in time to meet the payment.

Mr. Cox not having got his documents ready we cannot write Mr. Johnson by this convoyance, however it will be best for you to see Mr. Johnson as soon as you arrive, and tell him we are promised the documents so as to come by next packet—nor would it be amiss if Mr. Johnson would send us for our satisfaction his opinion what will be done, and whether any difficulty will arise in the recognition of the title to Curver's daughter, and as it is possible we may commit some informality in the papers now to be sent, we should be much obliged if Mr. Johnson would enumerate to us the most essential documents as they strike him, and any particular form which may be required by the laws of New York for our guidance.

By communicating what you know of the matter

you may aid him in this information.

We wish you a good voyage, Being very respectfully,

Your obed't Servants,

(Signed) BARRELL & SERVANTE London, 16th March, 1799,

Mr. Sam'l Clark.

Original letter of Barrell & Servante, every word of which being in the proper hand writing of the senior partner Mr. Colborn Barrell. Quod Attestor,

THEODORE BARRELL. (Signed) 27th May, 1835.

COPY.

I the subscriber, Theodore Barrell, do hereby declare that the letter on the other half of this same sheet of paper, addressed to Mr. Samuel Clark and subscribed Barroll & Servante, dated at the commencement, and likewise at the close, London 16th March 1799, and attested on both sides of the same, in lines at right angles with the contents, by myself as the original letter of said Barrell & Servante, is in every part of it in the original hand writing of my father's brother Mr. Colborne Barrell, at the time of writing it senior partner of the commercial firm of Barrell & Servante, agents for the disposal of lands in North America, having agency offices at No. 24 Threadneedle Street, No. 48 Upper Marylebone Street, and principally at No. 6 Ingram Court, Fenchurch Street. I furthermore declare that I cannot possibly be mistaken in the hand writing of the letter now vouched to be that of my uncle Colborne Barrelland with which I have been most familiar from the time of early youth, and having compared it with numerous other letters and documents at this moment in my

possession touching the original deed from Capt. Joseph Brant, with power from the several Chiefs of the Six Nations to sell to Cozens. I can say nothing more than I wrote in date second of February of the present year to Mr. Nelson Cozens, which communication may be relied on, as I vouch for the facts detailed in that letter, copy of which I transcribed in page 149 of my letter book for the present year, now received by me and confirmed. It is my own conjecture, amounting to conviction, that the documents belonging to the firm of Barrell & Servante, which were deposited after the decease of Mr. Colborne Barrell, in a certain trunk in an upper room of the linen draper's shop of Mr. Henry Servante, Junior, in New gate Street, from whence I took the original journal of the said firm some time in the winter of 1804, 1805, if not disposed of or destroyed as useless rubhish, or by vermin, must, after a lapse of so long a course of years, in a climate so humid as that of London, have perished by natural decay—and that the deed of said bond with power from the several Chiefs of Six Nations to sell to Cozens was among those documents I verily believe.

Witness my hand, village of Ulster Friday, 27th May, 1835. (Signed) THEODORE BARRELL.

# British Consulate, New York.

I hereby certify that Theodore Barrell to me personally known appeared personally before me and affirmed to the truth of the above statement subscribed by him.

In testimony whereof I have hereunto affixed my

seal of office this 30th May 1835.

(Signed) JAMES CLARK BUCHANAN. British Vice Consul. [L. S.]

DEAR SIR,

I last evening received a letter from Boston relative to the land, the contents of which I commu- Published in the Registry Office, District of Gorev

nicate and shall wait your answer, which I request you to give without delay. A nephow of one of the partners of the house with whom Mr. Clark left the deeds happened to be in Boston on the receipt of your letter. He says the house failed-his uncle died; these deeds together with all property which they possessed were put into the hands of assigness. He presumes nothing has been done with them, and that they can still be procured by refunding what was advanced upon them-this he will undertake to do provided he can be adequately remunerated; that is to receive a proportion of the advantages which may result from his exertions—he therefore wishes to have the following questions answered before he will embark in the business. What is the quantity of land? What its situation? or local advantages? Whether any part is settled? Its distance from York? Its present value? Whether there any and what objections to its title (except the absence of the deeds) and finally whether there would arise any obstacles to the immediate possession on procuring the deeds?

If you will be good enough to answer the above questions, as far as in your power, I will forward you

the result.

With esteem, your ob't Servant, J. HENSHAW.

(No. 17.)

#### NOTICE. •

Whereas the subscriber did in the year 1796, constitute and appoint Samuel Clark, of Middletown, State of Connecticut, United States, Merchant, his Attorney to sell and convey in Europe a township of land containing 92,160 acres purchased by the subscriber from Captain Joseph Brant and the Chiefs of the Five Nations of Indians, said land situate on the Grand River, Province of Upper Canada.

I hereby, as formerly revoke and disannul said letters of Attorney, and all right or title given to the said Samuel Clark or any other person or persons whatsoever, and that no person or persons have any just right or title to said township of land or any part

thereof, except myself.

(Signed)
Upper Canada, New Longueil,
District of Ottawa, 24th of Vebruary, 1825.

A true copy,

JOHN BEIKIE, Clk. Ex. Council.

J. Y. COZENS.

KNOW ALL MEN BY THESE PRESENTS, That I, Joshua Y. Cozens, of Upper Canada, did empower Joseph Burnham Henshaw, of Boston, now of New York, Merchant, my Attorney, by letter dated 29th March, 1825, to demand and receive from Samuel Clark, late of Middletown, Connecticut, Merchant, or from any other person, all papers and writings whatsoever by me heretofore given, in any wise relating to a certain tract of land by me purchased from Captain Joseph Brant for himself and Agent for the Five Nations of Indians, being twelve miles square, containing ninety-two thousand one hundred and sixty

acres, known by the name of the Grand River Tract ! in Upper Canada; and also therein empowered said Henshaw to grant, bargain, and sell all my title to said land; but not being satisfied with the proceedings of said Henshaw, he having neglected the trust reposed in him, I do hereby revoke and disannul every part of said Power of Attorney, and declare all proceedings thereon, either heretofore or hereafter, to be mull and void and of no effect, any thing contained in said letters of Attorney to the contrary notwithstanding.

Witness my hand, this twelfth day of February,

JOSHUA Y. COZENS.

To ALL WHOM IT MAY CONCERN, -Know ye, that whereas I did in the year 1827, publicly revoke the above mentioned letters of Attorney given to the said Joseph Burnham Henshaw, in the words above stated, which was inserted in the New York American Newspaper of 1st March, 1827; and I do hereby again revoke and disannul every part of said power of Attorney, and all or any power in what manner soever heretofore by me given to the said Henshaw, either by letters of Attorney, or by any letter or writing whatsoever, relative or relating to the said tract of land above mentioned, by me purchased of the Five Nations of Indians, containing 92,160 acres, as aforesaid; and declare all proceedings thereon, either heretofore or hereafter, to be null and void and of no effect, any thing to the contrary thereof, or therein or thereby, to the contrary notwithstanding, having sold and conveyed said tract of land to Nelson Cozens, late of Cornwall, Upper Canada, now of the city of New York; and I do also hereby revoke and disannul all authority or propositions heretofore made (if any), by letter or otherwise to David Page, late of Middletown, State of Vermont, touching or concerning the said above-mentioned township or tract of land, by me purchased from the Five Nations of Indians as aforesaid, in the year 1796.

Witness my hand, this twelfth day of February,

1834.

" BARRELL AND SERVANTE.—The above firm car-" ried on business in Ingram Court, Fenchurch Street, " about the year 1800, as Agents for the sale of lands " in North America.

"The advertiser is desirous of finding out their " Successors, and any person who can give informa-"tion respecting them will be REWARDED for his trouble on application to Mr. Thomas Ward, 84 " High Holborn."

No. 20.

London, 2nd Decr. 1831.

Mr. Nelson Cozens New York.

I am sorry at not having been able to obtain for you any satisfactory information relative to the papers left in the possession of Barrell and Servante, otherwise I should have communicated it to you at an earlier period.—Some time after the receipt of your letter I had continued to make enquirics among the oldest Merchants and others in the City but could obtain at most a bare recollection that such a firm had existed. Mr. Marchant the printer, in Ingram court, recollected the house where they resided, but that was all the information I could gather from him--He was the oldest inhabitant, having resided there upwards of 30 years,-I also tried what could be learnt at the North & South American coffee House, but without any further success. the Advertisement into the Times newspaper of which I sent you a copy, and this enabled me to find out the residence of the widow of the late of Mr. Servante, No. 18 Hunter Street, Brunswick Square, and also that of his daughter, No 7 Lower Terner, Islington. This was communicated to me by George Service who had several journies with me to see the parties, and to whom I paid £1 for his trouble.

I then waited some time (and having left my address with each of the parties) in hopes that they would be able either to find out the papers sought for, or to furnish me with some additional clue for obtaining them. I have, however, heard nothing from them since, and therefore conclude, that whatever may have become of these documents remains at present wholly

unknown.

Mrs. Servante told me that they had not been in her I am directed, by the Lords of the Committee possession, but Miss Servante does appear to have for Trade to acknowledge the receipt of your letter of some, connected with the sale of lands in North

America, part of which I saw, but the names and places were wholly different from those you mention. I send you a letter from Mr. Rowbothum, who did not was not married to my brother till after he had left call on me till this week, and if I should learn any Newgate Street.—At the time Mr. Ward applied to thing more you may depend upon hearing from me, me I was not aware of there being any mention of but I really think the case is hopeless.

had been passed about through various hands without

any regular account of them being taken.

I am Sir, Your most obed't Servt. (Signed)

THOS. WARD.

(No. 21.)

London, March 12th, 1833, 7 Lower Islington Terace.

You will no doubt have felt surprised that I sho'd not sooner have replied to your latter dated November 1st, which I should have done but felt desirous to make what inquiry I could previous to answering

Between 20 and 30 years ago, before my brother married, I kept his house in Newgate Street, and remember an old trunk being there, which contained charts and papers on American business,-after he married I wont out into a situation in a school, and at the time of his removing from Newgate Street I was a considerable distance from London, and consequently know nothing more relating to things that were there before that time. - Since I received your letter I have endeavoured much to find out not only from Messrs. Bakers, who succeeded my brother in the house, but also from the party that succeeded them, whether I could obtain any knowledge or trace of the trunk, thinking that perhaps there might have been papers in it relative to your business, but without effect, as they all assure me they have not the least recollection of to, and who now reside in Yorkshire, have only replimay account to you for not hearing from me sooner.

American business there are three letter books, and in one of them some copies of letters on the subject upon which you are making enquiry. Whether these might prove serviceable I cannot tell—perhaps they might, and if there is any one in London that you wo'd like to appoint to call upon me to read them or to copy following:

them out, the book shall be shewn. My real opinion respecting the greater part of the American papers is that they have got lost, or destroyed, owing to there not having been any one person in particular appointed to take care of them. I never heard of any one being left Executor.-I am sure my dear father had none, having nothing to bequeath to his family but that which must ever be most highly prized (a good name).-He died in the year 1817, and for many years previous to that time had been in very slender circumstances and under the necessity of doing with very confined apartments.-Had he kept house until the time of his death, and room had been no object, perhaps there might have been trunks or

been dead some years, and Mrs. Servante has not any papers upon the subject,-She is the second wife and was not married to my brother till after he had left the subject you are enquiring about in one of the day What appears to render it more so is that the papers books, or would have requested him to have read them, and I find he is since dead. The only loose papers I can find I have enclosed. I have some grants almost in a mildowed state, of land in Montgomery County, Georgia, with the name of Sarlin attached to them, and signed by the Governor George Matthews, 1794, and truly glad should I have been had they been applied for, as it might not only have proved useful perhaps to the parties themselves, but also to myself and sister who for years past have been struggling hard to earn a respectable living.

> You mention in your letter having engaged different gentlemen to call upon me to make enquiry and I think it proper to remark that no one has ever applied to me for information but Mr. Ward, and the papers I now enclose I had not then found.—Sincerely wishing that the grants or deeds had been in my possession

which I can assure you they are not.

I remain,

Your obedient servant, E. SERVANTE. (Signed)

Mr. Nelson Cozens, 108 Broadway, New York, America.

(No. 22.)

VILLAGE OF ULSTER, Monday, 9th December, 1833.

Though you have a dark passage to grope through you have a dark passage to grope through any thing of the kind. The last party which I wrote by dint of perseverance the fortunate outlet may possibly be discovered. It is true that Stevens and ed to the enquiries I made of them very lately, owing Rankin were once creditors of Barrell & Servante; I find to my letter having been mislaid and conse-but that the original deed from Brant was assigned to quently not knowing how to direct to me, until it was that firm seems most unlikely, because their claim was found again; I merely mention this circumstance that it discharged, as is certain from the following extract verbatim from the same journal which I cited before. Among the few papers that I have relating to the Recollect this journal is only a continuation of a preceding one; how far Stevens & Rankin were concerned in that preceding journal may be infered from a catalogue of " Bills and Notes due" by Barrell & Servante when the journal now in my possession began-January 1800. Among the catalogue I find the

> 1799 March 14th-Samuel Clark on us to Stevens & Ranken, due March 17th 1800.....£216 3 &

> After this we find no further mention of the business until February 1801—then come the following which Lextract from among other entries, verbatim as, they appear.

> Samuel Clark, Dr. to Stevens & Rankin, for interest, noting and charge of protest. £ 11 2 & Stevens & Rankine, Dr. to Theodoro

Barrell, for Monroe's oill on Baillie & Co...... 130 5

^{*} Monroe's bill on Baillie & Co. was:a remittance from boxes of the papers still existing.—My brother has Demarary to my uncle in London by mayelf.

From all this it is plain you must seek elsewhere for the depositary of the original deed. I almost think that Barrell & Servante had no assignees. Mr. Servante kept himself out of the way of arrests, and the' my uncle died at my fathers house, yet was he a prisoner of the Poultry counter at the suit of one of the creditors, and removed only in his last sickness as I suppose, for I was not there, on my fathers responsibility. I have no plausible conjecture than that the Deed might have been removed with the other papers from Ingram Court to the residence of Mr. Henry Servante Junr. in Newgate street, where I well remember a Trunk in a large upper room in which he told me that papers of the concern were inclosed: but that they contained nothing that could diminish the desperate state of Bankruptcy.—My intimacy with the younger Servante was during a residence I made in London in 1834 and 1835.—Some private papers of my uncle might have been left at my father's; I have an indestinct recollection of such in a closet at his house, but they were on topics altogether distinct from business. However I will endeavor to get more certain information when I next write to my sisters who live near Miss Eliza Servante, the daughter of my uncles copartner, would, I doubt not, if properly applied to, search among her father's old papers, if she has them, and the point could be cleared up.-Either. this Lady, or a Mr. Tulk a very intimate friend of both the deceased, respecting whom she purhaps can inform; or Mr. Hindmarsh a noted printer in those days, might be able to say positively whether there was an assignee, and indicate who he was. The fact is clear that Brant's deed was left as security for Clark's punctuality; now if you or your father prove that the deed is indeed yours, which I believe it to be, any honest holder of the same will give it up on satisfaction being mede for Clark's debt, if not otherwise extinguised.

The Journal which I possess, in my uncle's own hand writing, was given me by Mr. Servante, junior to whom I expressed a desire to know how certain remittances I had made from Demerary had been appli-

upper story, giving me permission at the same time to look over the papers: but I never considered it worth the trouble.

Some years ago I was applied to for information respecting my uncles assignees, or where the papers of the firm of Barrell & Servante could be found. The application was made to me in the City. And my verbal reply, whatever it may have been, was noted down by him who enquired in pencil. This might have been one in behalf of your father.

I do not know that any thing I can say further might throw light on the mystery—If a letter to Miss Eliza Servante should be considered desirable, I will cheerfully furnish you with one, cautioning you however not to subject her to charge of postage. letter to my own sisters will avail you nothing; I will acquaint you with such answer as they make to my enquiries of them.

I am ignoran t of Mr. Stayner's address, or perhaps might write him. I presume he will have communication with my sisters previous to his return, and doubt not his readiness to oblige, especially as his trouble will extend no further than to make the enquiries of my sisters and of Miss Eliza Servante, of whom he may learn from them. Should the latter permit access to her father's old papers, Mr. Stayner would on examination of the parchment deeds easily ascertain the grant to Brant, and with it might find the transfer to your father, your father's power to Clark, and Clark's authority to Barrell & Servante. A letter from yourself to Mr. Stayner, backed by a suitable introduction from Mr. Macaulay, at Kingston, would amply suffice. Your friend, &c.

THEODORE BARRELL.

No. 23.

Village of Ulster, Sangerties 15th January, 1834.

Mr. Nelson Cozens,

SIR,

As you deem it important to be furnished with a letter from me to the daughter of that Mr. Servante' who was of the firm of Barrell and Servante in London, I have prepared a letter for her, to be inclosed to a sister of mine living near Islington, in the belief that she knows where Miss Servante resides which I do not: and that she will give or transmit it to her. I give you a transcript of my letter on the other half sheet, having said every thing in my power to revive her recollections, and to stimulate her diligence in the search for mislaid documents which you so much require. Servante', or my sister after communicating with her, give me any more information on the subject, I will not delay to impart the same to you.

Stranger as I am to the widow of Mr. Henry Servante junior, even as much so as yourself, I really do not think a letter from me could promote your views, and therefore content myself with asking her sister-inlaw to apply to her, if she believes her possessed of the trunk in question, which I really do not think like-Although I have mentioned Mr. Tulk and Mr. Hindmarsh, I suspect them to be numbered with the dead many years ago. Mr. Barrell, now were he living, would be little short of a hundred years old: I have an impression that neither of these gentlemen were his junior. On the whole, I fear your search ed. He took it out of the trank I mentioned in the for the documents will be altogether bootless. If that

trunk was left at Newgate Street, the papers have most probably been wrappers to pennies-worth of cheese in what they call chandler's shops in that country; (retail groceries) and the Parchment cut into tailor's measuring slips. I say not this to discourage your pursuit, but to incline you to prosecute your rights in some more effectual way, and to moderate your disappointment, should Miss Servante's reply strengthen my conjectures.

I should be gratified if I could render you assistance

-and remain

Your sincere wellwisher,

THEODORE BARRELL.

Copy of a letter to Miss Eliza Servante under cover to my sister Abigail Barrell—Old Street Road—London,

> VILLAGE OF ULSTER, State of New York, 6th Jan'y, 1834.

DEAR MISS SERVANTE.

Although five or six and twenty years have passed since we have seen each other, I have still a pleasing remembrance of the satisfactory acquaintance I had with your family. Mrs. Barrell to this day often speaks of the kind attention shewn to herself in particular, and we have always felt deep interest in the occasional communications of your concerns by my sisters. Not long ago my reminiscences were revived | by the perusal of a letter in your hand writing to a Mr. Nelson Cozens, a gentleman of the city of New York, being in reply to some interrogatories on your father's and my uncle Colborn's concerns. It is in behalf of Mr. Cozens that I more especially address you at this time. His father many years ago purchased from some Indian Chiefs, certain Territories in Canada, granted to them by the British government in remuneration of services. Mr. Cozens, the father, took advantage of a certain Mr. Clark's going to England to send the title deeds there, to sell the lands to speculators or intended settlers as was customary with American lands. Barrell and Servante were Agents for such sales, as you cannot but well remember. With them Mr. Clark left all the necessary documents and they were authorised to make sales, &c. Canada lands were then in no repute, and Barrell & Servante did nothing more than keep the documents until their failure in business and subsequent death,-The tide of emigration having now set in that direction, these lands are so desirable that settlements are continually making thereon, and pretenders to the ownership of the territory are robbing Mr. Cozens of his just right, through his incapacity to prove his title by reason of the loss of the original documents deposited with Barrell & Servante.

The question is, where can these documents be, that Mr. Cozens may recover them? If Barrell & Servante had assignees, of which I am very doubtful, they would be the proper persons to apply to—and they would restore the documents on reimbursement of whatever claims might stand on the Bankrupt books against Mr. Clark, as Attorney for Mr. Cozens. You perhaps can say who the assignees were, or may learn the fact from Mr. Tulk, Mr. Hindmarsh, or some other friend of your father or my uncle. But if they had no assignees; and I am strongly impressed that I learnt as much from your brother and from my father;

where were the books and papers deposited, and are they yet extant?—If you can have access to them, Mr. Cozens may through your medium recover his property, if the documents were kept with the other papers. To facilitate the search he will describe to you particularly what they consist in. I suppose they may be of parchment, which will be more readily discovered.

In the year 1805, my uncle being deceased but your father still living, I was desirous to know what application they had made of some remittances I sent them from Demcrary. Your brother Henry took me into an upper room of the house at Newgate street, and shewed me a chest or trunk I do not remember which, containing all the business papers, so he told me, of Barrell and Servante.- Had there been assignees, I think the papers could not have been there; and he gave me permission to examine them at my I however had no curiosity to return to them, but took a Waste Book or Journal, in my uncle Colborn's hand writing, which I still possess, neither your father nor brother caring about its return. It com-mences in January 1800, and the last item is entered in August 1802. I think it highly probable the documents of such importance to Mr. Cozens, were in that same chest or trunk. Do you know or can you by inquiry find out what became of the same ? Was it left in the house at Newgate street, or carried to Homerton where your father resided? Or might it not have been removed into the country with your brother? If the latter, could not you make enquiry of his widow, to whom I would myself write had I been acquainted with her. Your brother, you may remember, was not married when I was in England.

All this may look like imposing a great deal of trouble on you, but I do not believe you will shrink from it when you reflect what would be the course your father would take were he living. Certainly ho. would desire that every man should have his own.— The receipts of Barrell and Servante, which Mr. Cozens possesses, will shew whether the deposite of the documents was without consideration in the ordinary way of an agency, or in pledge for advances made to Mr. Clarke, or others for Mr. Cozens. Whatever the terms were Mr. Cozens professes the most cheerful willingness to comply with. I might suspect the possibility of papers belonging to Barrell and Servante, having been left on my uncle's decease, at my father's house, and now at my sisters control. But I am convinced of the contrary, well remembering that nothing was there but certain writings of my uncle on subjects very foreign to business. If you reside still in the neighbourhood of my sisters, or continue your ancient intimacy with them, do me the favor to communicate to them such reply as you may be enabled to make, which they will forward to me. I hope it will be favorable to Mr. Cozens.

Mrs. Barrell unites with me in affectionate regard. The little girl you may not have forgotten, has been a number of years married; and is in her turn the happy mother of three as promising children as may any where be met with. We have two other children settled in life, a daughter and son, with families too; and one unmarried daughter of nineteen.

Farewell, dear Miss Servante, may you long live happily.

Your old Friend.

THEODORE BARRELL.

Village of Ulster, 19th December 1834.

MR. NELSON COZENS,

I received your lotter from Cornwall, Upper Canada, yesterday evening.—The following extract of a letter from my sister in London, dated 5th Sebtember, will show you the utter hopelessness of further application there for the last deeds.

"Your letter to Miss Servan e I sent to her on the " very day it came but I find with her that the subject " of it is quite a hopeless business. She described to " us at great length a vast deal of trouble she had taken "of late years in endeavoring to find out what had be-" come of the old Trank of papers of which you speak; "it would be useless to give you the particulars, if I " could of the many long walks, rides, postage of let-"tors, which she could ill spare, and fatigues she has " had, all ending in disappointment in seeing after persons, some of whom she found had long been " dead, others totally ignorant &c. &c. My opinion " of Miss Servante is, that in any thing she takes in "hand she is indefatigable and her desire on her own " account, in this instance, has as the tells me led her " to leave no stone unturned in order to succeed if pos-"sib'e. She expresses surprise that Mr. Cozens sho'd "still have hopes from her, when she has been per-"feetly explicit to him many times. Not choosing to "write again herself she desired me to explain to you, " and above all things to discourage any future applica-"tion either to herself or to her brother's widow, both " of whom are utterly unable to assist him with a single " paper, or in any other way. I have no doubt from "all that I have heard that the trunk & all its contents " have been destroyed as valueles; and Miss Servante " seems to have arrived, with great reluctance, at that "conclusion also; and to have made up her mind to be " at no more voluntary trouble and expense about it, " as she cannot see another single step left for her "which she can take in the business, having, I have "no doubt, racked her invention to the uttermest.

Miss Servante is probably removed from London, as she contemplated joining a married sister in some more central part of the kingdom. I hope you will desist from writing here again, as it is next to impossible to correspont between those regions and England, without a charge for pistage in the latter place. So is it too between Canada and this place. You think you pay the postage there, but it is only to the lines; and postage is again exacted at the office

You hope I may have come to the knowledge of some new fact favorable to your hopes from my possession of Barrell & Servante's Journal; but you may be assured that except the extracts I formerly furnished, there is not an item that can any way clucidate the subject.

I should have been pleased could I have rendered you more effectual service, but now entirely despair

> Your sincere well wisher, THEODORE BARRELL.

Mr. Nelson Cozens

(No. 25.)

Mr. NELSON COZENS:

two years in England I was on terms of much intimacy with Mr. Henry Servante, surviving partner of the late firm of Barrell and Servante, of Ingram Court, London, Agents for the sale of American lands; of which firm my uncle, Mr. Colborn Barrell, deceased a year or two before, had been the senior or most active partner. I was likewise intimately acquainted with the son of Mr. Servante, a linen draper residing for many years in Newgate Street-at that time a single man with his sister Miss Eliza Servante at the head of his domestic establishment.

Owing to heavy advances on lands of which they held the title deeds, Barrell and Servente failed in business I believe in 1802-or possibly about the close of 1801. My uncle Mr. Colborn Barrell was arrested and for a time was a prisoner I think in the Poultry Counter; but Mr. Servante kept out of the way, having lodgings a few miles from the City, at Homerton. My uncle being taken sick was removed to my father's house where he shortly afterwards died.

I learnt from both the Servantes that all the paper securities of Barrell and Servante had been removed into the house at Newgate Street, together with their books of account.

Mere curiosity incited no desire on my part to investigate a concern which the Servantes who were best acquainted with it conceived to be in a desperate state; but stimulated by my father, at that time living, who had been drawn in, to vest a considerable sum in what was then known by the title of the North American Land Company, and which suddenly had ceased to be productive. I wished to look a little into their affairs to be satisfied whether or not that particular scheme had been fairly conducted, and to ascertain where a remedy should be sought, if Mr. Servante's own surmises were well grounded that there might have been foul play among some high sounding names in Philadelphia.

To satisfy my wishes the Servantes gave me free access to an upper room in the house at Newgate St., in which as they assured me, were deposited all the effects from the counting house, in Ingram Court .-Among the books of account I judged that a certain journal embracing the time of the transactions I would enquire into might be useful to me, and with the sanction of the two Servantes I took it to my lodgings, and as they were altogether indifferent whether I returned or kept it, I never carried it back, but retained and have it in possession at this date. I remember indeed their pressing me to take away all the books and papers: but after a cursory examination of them, felt no inclination to berden myself with what I considered useless rubbisli.

I perfectly remember in that room one large trunk, containing accounts, letters, invoices and other documents usually found in the counting houses of men of business, all done up and labelled in the exactest form. Some few of these I was induced to look into-but judging them of no use left them as I first had found them after visiting the trunk a second, perhaps a third time. I remember too that others beside ordinary mercantile packages were in that same trunk; documents of various kinds, some on parchment, some paper, with seals and colored ribbons, as legal instruments are often-times prepared by lawyers. But for me to say that the original deed from Captain Joseph Brant with power from the several Chiefs of Six Nations to sell to Cozens, was actually among them, and In 1804 and 1805—during a residence of near seen there by me would be egregiously absurd. And

yet it is highly probable that those identical papers did [ indebted to Barrell & Servante in the sum mentioned: pass through my hands, for into that very trunk must they have been put, as that alone contained all the deeds and securities Barrell and Servante had in their possession when they failed.

And although in the year 1799 I was living in the Dutch Coluny of Demerary, and consequently could not witness events happening in London at the time, yet am I as sure as if I had been present that on the 16th day of March in that year, those identical papers were remaining in the hands of Barrell and Servante; for I see the fact attested in an origidal letter of that date to Mr. Samuel Clark with the to me well known signature of that firm, every letter and figure of which letter being in the proper hand-writing of the senior partner of the firm my uncle Colborn Barrell; in which I cannot be mistaken having been intimately acquainted with it during more than half a century.-Moreover it so exactly accords with the writing in the journal before alluded to, and with very many other specimens I am able to exhibit, that any observer competent to judge of such things would instantly pronounce that one and the same hand alike executed the whole.

A circumstance strongly corroborative of the fact that the deeds and powers were deposited in Barrell & Servante's hands is that they made Mr. Clarke advances to the amount of two hundred and fifty pounds, eighteen shillings and four pence sterling. Commission merchants are not in the habit of making advances without good security—and such securities as deeds of lands and powers to sell, were what these gentlemen dealt in. Now that advances were made, the journal in my possession attests. It commences in January 1800, and among a catalogue of bills and notes payable introductory to the years business, I find:

"1799, March 14-Samuel Clark on us to Stevens & Ranken, due March 17th, 1800 ... £216 3 3." Observe how exactly this corresponds with the let-

ter to Mr. Clark dated two days afterwards. "We have accepted your bill in favor of Sievens & Rankin for £216 8 3, payable 14th & 17th March, 1800."

The following items I extract from the journal bea ore me picked out from the haterogenous entries with which the book is filled, and which alone have any connection with or in any wise concern the individual Samuel Clark.

1800, Feb'y 8th, -- Samuel Clark, Dr. to Stevens & Rankin, for the nett insurance of his goods by the Little Sarah for New York, per their account .... £ 11 Samuel Clark, Dr. to agency, for our commission on £227 6 9 at 5 percent.... 1801, Feb'y .- Samuel Clark, Dr. to Stevens & Rankin, for interest, noting, and charges of protest..... 2.8 Stevens & Rankin, Dr. to Theodore Barrell, Monroe's bill on Baillie and 130 Stevens & Rankin, Dr. to bills for C. B. on H. Servante, Junr., dated 1st April 50° Stevens & Rankin, Dr. to cash, paid them in full to this day..... 58 Samuel Clark, Dr. to office, discount al-

and not only that it was for a responsibility which might never have been made good, but that Stevens and Rankin were faithfully paid in the manner de-

The only further consideration now seems to be, what has become of Joseph Brant's original deed with power to Cozens to sell from the Indian Chiefs ?-This must be answered most discouragingly.-It was doubtless in the trunk so often mentioned in an upper room at Mr. Servante's, the linen draper in Newgate That gentleman married, removed from the city, and died several years ago. But it does not appoar that the trunk of papers was removed with him, otherwise Miss Eliza Servante, who owns herself privy to its existence, would not have taken a journey from the country to see for it in the upper apartment of that same house, which she did a few months ago at my solicitation, as you will find particularly described in an enclosure from London which I transmitted to you so lately as 19th December last. Worn out with the utter hopelessness of recovering these documents, the trunk itself being no longer to be found, she desists from further vain pursuit. And it is my own conjecture amounting to conviction that the do-cuments are irretrievably lost. In the lapse of so long a course of years neglected in a garret in a climate so humid as that of London, if not destroyed by rats or moths, or dispersed among the neighboring Chandler's sliops by apprentice boys and servants, to envellope cheuse or snuff, it is most rational to suppose that they have mouldered into dust. case they are certainly lost to the world.

The foregoing being all I can say on a subject which has so much agitated you of late, I am glad to relinquish the subject with my hearty good wishes that you may reconcile the disappointment easily,

I am sincerely, Your obedient, THEODORE BARRELL.

Village of Ulster, 2d February, 1835.

Postschift.-I received your letter dated 12th ult. on Monday the 2nd, you will see in the preceding what I can say, and am willing to attest if my doing so can be of any service to you. In regard to the form I could wish you to be explicit. A simple aftesprobably be rejected in any court of law in Canada. Would it not be better that you take advice from some Counsel? Sometimes evidence is required by interrogatories sanctioned previously by one of your Judges, and by him addressed to one of our competetent authorities to take evidence. Then follows the attestation of our County Clerk—the County-town being 14 miles distant from this-that such a Judge or Justice is of competent appointment-and then again the Governor certifies that such a one is County Clerk. All this I have myself had to go through in the British Colony of Barbadoes. However, do you direct, and I will follow instructions. I will keep a copy of what I have written above to save you the

^{*} Much trouble might be saved perhaps by a deposition 

trouble of transcribing, if your Counsel deems that | that alone, in its epistolary form, will answer, with the addition at bottom of an attestation before a Commissioner appointed to take acnowledgements, or a Justice of the Peace. And perhaps you may think I act prudently in detaining Mr. Colborn Barrell's original letter, that such particular form of verification may be added to it as your Coursel may deem requisite.

Two dollars were likewise inclosed in your letter; I presume sufficient for the payment of fees.

I shall truly be glad if your perseverance meets with the recompense I think it deserves.

I will lose no time unnecessarily on receipt of your definite instructions.

Your sincere well-wisher, THEODORE BARRELL.

Village of Ulster, Ulster County, Thursday, 5th February, 1835.

(No. 26.)

Copy of Minute in Council, approved by His Excellency the Lieutenant Governor, on the Position of Nelson Cozens respecting a claim to a certain tract of land said to have been purchased by his father, Joshua Y. Cozens, from the Six Nations Indians.

In Councir, 31st July, 1834.

Referred to the Trustees for the Six Nations Indians to be reported on by them before further decision.

(Signed)

JOHN BEIKIE, Cik. Ex. Council.

Josnua Y. Cozens, Esq. Sc. dec.

(No. 27.)

Cornwall, 27th September, 1834.

The Honorable

G. H. MARKLAND,

Under favor of the liberty you politely granted me in Toronto, to address you again on the subject of my petition upon my father's purchase from Captain Brant, I now beg to inclose you the third affidavit furnished by Joshua Henshaw, Esq., of St. Therese, dated the 20th instant. This aged gentleman is the brother-in-law of the late Samuel Clark, my father's agent to London, and was present when the papers were put into Clark's hands-examined them himself, because of his legal knowledge of conveyancing, and was privy to all the transactions between my father and Clark his agent. This document will, I trust, conclusively show that the title from my father was never transferred in fact, and that whatever papers David Page holds from father to Clark are such only as were required for the latter to act upon as an agent; and it is to those papers that Page looks for a continuation of whatever tide or claim he dishonestly acquired from Clark. I should never have spoken of, or done more than to allude to this same Page, but for the purpose as it were of rendering "assurance doubly sure" in obtaining from him the Notarial copies of originals in corroboration of facts sworn to in the

several affidavits affixed to my petition-and which seemed at the date of my going to Detroit to be called for by the Council and Trustees. When I took the liberty of requesting by note that some steps might be taken by the Council or Trustees wherehy a strong inducement might be held out to Page to bring forth the papers that his daughter E. Page had written to Mr. Lee respecting, it was not with any other idea of benefiting by such auxiliary assistance, than that of clearly confirming all the assertions which my father and I had already advanced; at the same time too that such additional documentary evidence would be in your hands, I would have the proud satisfaction of establishing honesily the most important fact by the very means which had been resorted to by a villain fraudulently to profit by the paper he had purloined. Not having heard from Toronto on this affair since I had the honor of speaking to you on the subject, I am ignorant as to whether any further matter has been received from Page, either by His Excellency the Lieutenant Governor, the Executive Council, or Mr. Lee himself as agent; and I cannot but indulge the hope that should the certified copies of papers still be thought by the Council and Trustees of consequence to be exhibited by me, and through fear or design be withheld by Page, some further allowance will be made for the almost total impossibility of their being obtained contrary to Page's consent, without the te-dious process of Chancery proceedings and the delay that may be occasioned by legal evasions. I do humbly conceive the propriety of some such step on the part of the Council or Trustees as would embolden Page to produce all the papers he holds. For the result of such production let me again, Sir, beg to assure you that I feel most certain and secure. I predict as well the total confusion and disgrace upon the part of Page, as the fullest establishment of the facts of my petition.

I beg also to inclose to you my father's affidavit going to shew that whatever power he gave to Clark as agent, he fully and repeatedly revoked, with whatever formality of publishing was required. This affidavit added to Joshua Henshaw's, will, I hope, remove from your mind all doubts of the man Page's deep and

nefarious designs.

In addition I beg to send you copies of two letters addressed by me to Page, to which he denied me any reply & also one of an curlier date--back as far as 1880, from me to my father on my first seeing Clark a few months before his decease. I can solemnly swear to the facts in that letter as stated to me, and coming from Clark's own lips, viz :- that Page had purloined all the papers he once held belonging to my father.-Mr. Lambert's letter, also inclosed, will acquaint you of the manner in which Page treated my letters, and the several questions put to him about the land, and refusal to show certain papers spoken of.

In conclusion, I beg to request that I may be made acquainted at the earliest day with whatever may transpire upon this important business either before the Executive Council or the Trustees, and that as I trust there has been no semblance of aught than the most honest and unreserved openness on my part, in the most minute manner, amounting perhaps to unnecessary freedom of remark, there will be as little delay or obstruction to the final security of my claim as the magnitude and nature of the case will admit of.

I have the honor to be, Sir, Respectfully your obedient servant, NELSON COZENS. (No. 28.).

Copy.

St. Theresc. 20th Sept'r, 1834.

J. Y. Cozens, Esq.

DEAR SIR,

My son has just handed me your favor of 15th inst. requesting some further testimony to points which I did not touch upon in my last affidavit, and which are so clear in my mind that I have no hesitation in complying with your request without delay—as I am but without success. morally certain that you could not have disposed of them (the lands) at any period subsequent to your placing the papers in Clark's hands—because you could not have had access to the papers and vouchers to satisfy any purchaser of the validity of your title to those lands, and no person would probably purchase without this satisfaction. I therefore feel perfectly confident that your title to these lands, for any disposition that you have made of them, is as good at this time as it was at the time when Brant made the conveyance to you.

Yours, &c. &c.

J. HENSHAW.

(No. 29.)

Copy,

District of Montreal, Holt, one of His Majesty's Justices of the Peace in and for the said district, personally appeared Joshua Henshaw, of St. Therese, gentleman, and being duly sworn deposeth and saith—That in addition to the deposition by him, made and taken before J. Glen, J. P. &c. &c. on the 22d May, 1834, that the deed of burgain and sale from Joseph Brant and as Agent to the Indians, to Joshua Y. Cozens, executed in the year 1796, for a tract of land situated on the Grand River in the Province of Upper Canada, which deponent saw put into the hands of Samuel Clark, of Middleton, State of Connecticut, deceased, for the purpose of selling the same in Europe as Agent to the said Cozens, was at the time, as the deponent has no reason for doubting, and really believes, the sole property of said Joshua Y. Cozens as expressed in said deed, as no other name was mentioned as being concerned or in-terested with said Cozens—that said deed, power of attorney and other papers were given to said Clark to enable him to sell said tract of land in Europe, and that he the deponent understood and verily believes that the said Joshua Y. Cozens purchased the said township or tract of land solely upon his own account and not in partnership with any other, and agreeing to allow said Clark a share of the profits arising from the sale of said land; and the deponent further saith, that the said Clark informed him upon his return from Europe, that he had left said deed and papers with a Mercantile house trading under the firm of Barrell & Servuate, in London, with power for them to sell and dispose of the same at a limited price, but that the said Cozens still retained the same right and power to factory compensation for controul the disposition of said lands that he ever Indian Department. the lands were in every respect his the said Cozens's property, and the deponent further says that he verily believes and has no reason for doubting that said Cozens is still the rightful owner of said lands; for that he

is fully impressed with a belief that he has seen a letter or letters from said Barrell & Servante to said Clark informing him that the sale of lands in Europe had become flat, meaning that they were no longer in demand, and that they could not effect a sale of any part of this tract—and the deponent further says that he really believes that the said deed from Brant to Cozens, with the papers, are lost or in some way, mislaid so that they cannot be had. As he at the request of said Cozens took much pains to recover them

JOS. HENSHAW.

Sworn before me at St. Therese, in said District, this 20th day of September, A. D. 1834.

G. J. HOLT, J. P.

P. VANKOUGHNET, J. P.

K2

(No. 31.)

CORNWALL, 6th October, 1834.

The Honorable George MARKLAND,

I took the liberty of inclosing to you on 27th Sept. sundry letters and affidavits confirming additional facts relating to my fail or's purchase from Capt. Brant and Indians and tending to prove his sole and undivided interest therein at and since the date thereof, tending likewise to subvert the false title Dear Sir: which David Page asserts having derived from Clark, father's agent, by which he fraudulently obtained the notarial papers now in his hands. The affidavit I have now the pleasure on my part to inclose for your examination and that of the Hon. Dr. Strachan (and if reached your hands thro' His Excellency in Council following six copies of papers which I shall hand over and otherwise) goes still further, and tends to crimito the Trustees of the Indians, viz: hate Page, who it will be perceived has juster claims upon the State Prison, than upon lands or equivalents-It is dated Middlebury, Vt. (where Page resided) and made by the daughter and son-in-law with whom Clark lived at the time-sworn to, under seal, 19th Sept. and now received by me by mail. This with Mr. Henshaw's and my father's affidavits of a corroborative nature, will dismiss the idea of any joint interest. Weight will no doubt be given to the early and recent revocations of all powers, published by medium of newspapers and public notices in Durand's Registry Office near the Grand River land; always keeping alive and in view my father's claim to such a tract.

I have exercised the liberty you kindly granted me to address you, and have now as I conceive established the requisite facts concerning that swindling alien Page, whose character is known to Mr. Campbell of

the (Toronto) Ontario House.

agent, to the letter from Page was to the purport of to convey land to him. advising an appeal to the Lieut. Governor.

thereof will doubtless give me the earliest notice.

But my fears are that those notarial copies will not be brought forward unless some means are resorted.

H. L. Hosmer and S. Titus Hosmer. to, different from the many exertions already used by otherwise been confirmed (in the simple unadorned pers Nos. 1, 2, 4, and 5, which he (Clark) left with language in my petition and my father's memorial, rethem about the 17th September, 1898. lating to the purchase and title) by the several affidavits from Mr. Henshaw of St. Therese-that the papers were as described.

What can I-what shall I do further; and immedi-

To hasten a decision upon my petition, there is no question that will not be most candidly, honestly answered, no matter what its nature, and no steps that shall not to the utiermost of our means be speedily STATE OF VERMONT, taken, if advised or suggested by the Venerable Arch-

deacon and yourself.

Ifear you will deem me impatient in my importunisaid County, personally appeared Samuel Hart ties, and beg to be pardoned for my anxiety. I am of Middlebury, in said county, hatter, and Sarah out of employment, my means are limited, my friends Hart, his wife, and daughter of Samuel Clark formerfew, and from the partial reduction of the Carvill's ly of the town of Middleton, State of Connecticut de-

firmly I repose my present and ultimate hopes in the issue of the case in your hands.

I have the honor to remain.

Most respectfully your ob't Servant. NELSON COZENS.

No. 32.

Toronto, 6th December, 1834.

I duly received yours of 27th September and 25th November, and would have answered the former long since, but nothing new having occured respecting your claim I had not anything to communicate. Since your last I have received from Charles you please to be added then to all the others that have Berczy, Esq. the Postmaster at Amhertsburgh, the

1. Indenture made 8th September, 1796, between Capt. Joseph Brant for himself and agent for the Five Nations, and Joshua Y. Cozens of the Town of York, of a part of a certain tract of land known by the name of the Grand River Tract, containing 90,000 acres, consideration £500, estimating dollars at 8s. and witnessed by A. Macdonell and Robert Kerr.

2. Indenture made 13th Oct. 1796, between Joshua Y. Cozens and Samuel Clark of the town of Middleton, State of Connecticut, of the above tract, consideration \$90,000, witnessed by S. Titus Hosmer and

H. L. Hosmer.

3. Indenture made the 25th March, 1825, between Samuel Clark and David Page of the town of Middlebury, State of Vermont, the above land, consideration \$100,000, witnessed by Joel H. Reed and Peter

establishment in New York, by necessity, my occupation there is gone. This will plead for me with you and Dr. Strachan, and will show how confidently and Michigan Territory, persuaded deponents father, the

said Samuel Clark, by having a number of private meetings with him apart from his children and friends, "to put him, Page, in possession of certain papers, then in his, Clark's possession, relating to the purchase of a township of land situated on the Grand River, Province of Upper Canada, purchased from Captain Joseph Brant for himself and Agent for the Five Nations Indians, by Joshua Y. Cozens, now of Cornwall, Upper Canada, in the year 1796," which the said Samuel Clark was empowered by the said J. Y. Cozens to sell in Europe as his Cozens's agent, that the papers alluded to were notarial copies of the deed from Brant to Cozens, with a power of Attorney annexed to it from the Indian Chiefs to Brant, ulso blank conveyance and letters of attorney from Cozens to Clark, to enable him to sell said township of land in Europe, which said deed and papers were left with a Mercantile house (by Clark) in London, in or about the year 1799, the foregoing, deponents verily believe to be the true statement of said papers between Cozens and Clark, all which power from Cozens to Clark was to enable him to sell as Agent in Europe, and for no other purpose, which power was never acted upon as per their information from their deceased father, &c. And deponents further say, that they are confident that the said David Page has never paid the said Samuel Clark or his heirs or assigns any thing whatsover for said papers, and verily believe that he, Page, obtained them in a fradulent manner, the said Samuel Clark being at the time in a state of dotage, his mental faculties being so impaired as to render him incapable of transacting any business of consequence.

SAMUEL SWIFT,

Clerk, Sec.

Addison County Court, Vermont, [L. S.]

(No. 34.)

Eastearn District, Before me, Guy C. Wood, Esq. To WIT: one of His Majesty's Justices of the Peace in and for the said District personally appeared Joshua Z. Cozens of the town of Cornwall in said District, Esquire, and being duly sworn deposeth and saith: That a certain Deed of conveyance which appears to have been made from deponent to Samuel Clark, late of Middletown, State of Connecticut (deceased) in the year 1796 purporting to be a Deed of bargain and sale of a certain Township of land containing 92,160 acres, situated on the Grand River, Province of Upper Canada, which was purchased by deponent from Capt. Joseph Brant for himself and as Agent for the Five Nations of Indians in the year 1796, was given by deponent to said Clark for the purpose of selling said Township of Land in Europe, as the agent of deponent; -That deponent gave to said Samuel Clark a power of Attorney to sell said Township of Land at the time above mentioned—that upon taking the opinion of an Attorney at Law, a Mr. Hosmer of Mid-

the Governor of the State, to make it valid in Europe, and recommended a conveyance to accompany the power. should it be objected, and as the vessel that the said Samuol Clark, deponents agent, had taken passage in was about to sail, and before the Governor's signature could be obtained from Boston, deponent furnished the conveyance in Blank, with power to be filled up in Enrope if found that the Power of Attorney was objected to and necessary to complete a sale in Europe.

And deponent further saith possitively that he did not bargain and sell said Township of Land to the said Samuel Clark nor receive any consideration thereon what-soever, but that said Samuel Clark at the time of executing said writings was indebted to deponent for engagements entered into with the said Samuel Clark for lands by them purchased in the year 1795, to a large amount; and de-ponent further said that he purchased said Township of Land from Capt. Brant after the said Clark left the Province and had returned to Middleton, and paid the consideration money in all £1000; with his own money, and that neither the said Clark nor any other person had any share or right in the same, nor has yet, except his deponents son Nelson, and deponent further saith that the said Samuel Clark after his return to America from Europe in the year 1799 declared to deponent that he had left said Deeds, Power of Attorney and all papers and writings relative thereto with a Mercantile House trading under the name and firm of Barrell and Servante in London: and deponent further saith that the said Samuel Clark came into this Province in the year 1795 with letters of introduction to Wm. Jarvis the Secretary of the Province, and others, recommending him as the son of a Mr. Clark who was for many years a Minister of the Gospel of the Episcopal Church in Middleton, previous to and during the American Revolutionary War, and that his said Father retained his loyalty to the King of Great Britain to the day of his death, and that the said Samuel Clark made known his political sentiments when in this Province, as a natural born British Subject willing to take the Oath of Allegiance and become a settler in the Province, and this deponent further saith that he entered into an agreement with the said Samuel Clark to purchase Township Lands that had been granted to certain persons and associates in Governor Simoue's time, and that deponent and said Clark did purchase the one third part of the then named Township of Glanford in the year 1795 from Davenport Phelps of Niagara, Esq. for which they gave their promissory notes jointly and severally to be paid by instalments for the sum or consideration of £2345 14s 0d and to receive a conveyance for the same on receipt of the first payment which deponent paid and received the title after the said Clark had left the Province, a copy of which conveyance attends this affidavit. and out of which grew the debt due from Clark hereinbefore alluded to; and deponent further saith that the principle he acted upon in endeavouring to negociate with DAVID PAGE, was to obtain the Deed from Brant to deponent, and the other documents relative thereto as the said Page assured deponent that he knew where said papers were and could lay his hands upon them at any time if deponent would engage to pay him excessive remune-ration, or would give deponent \$10,000 for his right and title for said Township of Land, but upon his offering to sell to said Page depoment discovered that he was a Yankee Speculator and dishonest man, and that all the papers he had got in possession of relative to said Town-ship of Land, the just property of deponent, had been fraudulently obtained from deponents former agent Clark. when in a deranged state of mind, &c., which has been proved by the depositions of Joshua Henshaw now of St. Therese, Lower Canada, and Samuel Hart and wife the son-in-law and daughter of said Samuel Clark of Middlebury, State of Vermont, with whom Clark lived. some years and died with them, and who lately informed, opinion of an Attorney at Law, a Mr. Hosmer of Mid-depouent that their said Father had suffered for some dierown aforesaid, he advised that the said letters of At- years previous to his death under aberrations of mind in torney ought to be attested by the signature and seal of such a degree as precluded the possibility of his being

Sworn before me the 2d day of Jan'y. 1835. G. C. Wood, Commissioner K.B. (Copy.)

(No. 35.)

Cornwall, 3d Jap. 1835.

The Honb'le

George H. Markland.

Sir:

I beg leave to say that my father yesterday inclosed to you another deposition of his, explanatory as well of the character of his late agent Samuel Clark, as of the only interested connection in landed matters between them ;-all for the purpose of elucidating the subject of my petition and claim, yet under the consideration of the Trustees of the Six Nations Indians.

Being made aware, by Mr. Lee's late letter to me, of the presentment by David Page of several copies of nota-rial transcripts from my father's original deed from Capt. Brant and Chiefs, and other documents, I hastened to seek for either of the two Hosmers, witnesses to the blank deed to Clark, described in my father's last mentioned deposition, as a subsidiary paper to be made applicable to the exigencies of a case of sale by Clark in England of the land in question. To my inquiries of the postmaster of Middleton, Connecticut, the friend of the very notary, Russell, who transcribed the certified copies now in the hands of David Page, I have this morning received the enclosed, viz :- Joshua Stow's letter dated 25th ultimo. I beg to say by my father's dictation in this particular that the Captain Cozens named, was his uncle, the late Capt. Daniel Cozens [half pay] one with my father, of the first settlers in the Province, and the Mr. Peters was the brother-in-law of the late Provincial Secretary Jarvis. It seems to have been at the instance of the Hosmers, men of legal eminence, that the blank deed was drawn up as a precautionary measure against delays or objections in the absence of the Gubernatorial seal and sign. Both those gentlemen are now unfortunately for us as it appears deceased.

I had lately the pleasure of receiving an answer from my young friend Mr. Wm. II. Herchimer of Queen's college, Oxford, to a letter written him from New York city in 1833. The purport is that he could gain no intelligence respecting the original papers in question for which he was good enough to assist me in making search.

A few days since, baving previously written to Theodore Barrell Esq. some of whose letters to me on the subject in hand are already before you and who is a nephew of one of the late firm, Barrell and Servante, with whom the Brant Deed to father was by Clarke doposited in London, I received the inclosed reply dated 19th ult. It is discouraging to me, indeed, but will I trust tend to your conviction of the degree of exertion used by me, and others for me, in ascertaining whatever to a certainty might be the actual case of the lost Deed. This Mr. Barrell is also a connection of Mr. Stayner, D. P. M. Genl by whom the former's letters to his sisters and to Miss Servante were borne to Loudon a year since, Mr. Stayner likewise through a friendly request from Mr. Macauly made himself, personally, yet alas! ineffectually, all the enquiries he could while in London about the lost papers and the parties concerned. This Miss Servante of whom Mr. Barrel speaks in his letter is the daughter of the other of the firm of Barrell and Servante, and a former letter of hers is already in your hands. It was to her he addressed the long letter a copy of which is contained in one of the two letters from him to me which accompaof his in conjunction with his present one?-From these combined failures I have now too certain cause to fear the

original deed is irrecoverably lost.

It had perhaps been advisable for me in September last, at addressing to you old Mr. Joshua Henshaw's (of St. Therese L. C.) 3rd affidavit, to have allowed the envelopein which it came to my Father by mail; to accompany it. Upon recurring to it, its tenor seems of so positive a character, as scarcely to fail, taken relevantly with my Father's proclaimed, sole and undivided right yet existing in him in fee simpleto interest you in perusing it. I beg now herewith to offer it.

The epistolary testimonials presented to you, in collateral confirmation, as far as they extend, of various passages in our amplified, perhaps ill digested petition, memorial and narrations, will I doubt not meet with the Honorable Trustees' concurrent approval—written as such papers generally are with a freedom and familiarity in contrast with more formal qualified documents. In this case, an indifferent one to the parties writing them, they pass from my hands bearing accumulating convictions of the immutable verity of the main facts I have humbly soughe to bring before you. Their substance, now by your permission submitted to you, will I flatter myself accord with your conceptions and be regarded as auxiliaries tending to perfect the minuter links of the chain on which my father and I have long indefitinably wrents.

and I have long indefatigably wrought.

Of Mr. Page's unfounded pretensions I can only again repeat that whatever of a certified nature he may produce of originals, cannot fail to add weight on our part to the facts assumed in the premises; whatever he does advance as matter of right to him, in the land we claim, either directly or otherwise, must in the prevalence of equity, and

please Heaven shall be, totally overthrown.

I beg, Sir, to apologise by my anxieties in this business, for again troubling you with statements which the Honora-ble the Trustees may not have taken for granted, and which any peculiar circumstances, that I may yet be ignorant of, unfolded by Mr. Page's circumventions, or emanating from his intermediate claim, may eventually require being made.

I have the honor to be, Most respectfully, Your obedient servant. NELSON COZENS.

(No. 36.)

Post Office Middletown Ct. Dec. 25th 1834.

Nelson Cozens Esq.

Dear Sir :

Your favor of the 13th instant is at hand.—1 was well acquanted with S. Titus Hosmer and Hezekiah L. Hosmer, Esquires—They were both brothers and both Lawyers—are both dead—H. L. Hosmer died at Hudson in the State of New-York many years since, Judge S. T. Hosmer died in this town a few months since.

As I know nothing of the case you mention I cannot afford you any assistance that I know of.

In the spring of 1796 on my way with four boats and about 40 men to that which is now the state of Ohio, I became acquainted and journeyed with two gentlemen from Rome to Oswego—one by the name of Capt. Cozens who was then charged with despatches from Mr. Bond then charge d'affaires to Governor Simcoe—when provision was made by Congress for carrying into effect what was called Jays Treaty.

The other a Mr. Peters who I believe was brother-in-law to the Secretary of State in one of the Canadas. I mention this to acknowledge the very friendly favors I then received from those gentlomen, especially from Capt Cozens who I have not since seen. Possibly, he may be nies the pocuments under your notice, and to which the a connection of yours, if so and he is living, where you extract is an answer, may I crave a reference to that letter can see him, please to present to him my grateful respects. and say to him that it would give me great pleasure to meet him again in this world of changes.

I am, respectfully.

Your obedient serv't,
JOSHUA STOW.

(No. 37.)

City of Toronto, 24th Jan'y, 1835.

papers from time to time transmitted by you to the Trustees of the Six Nations Indians, in support of your claim to a tract of land on the Grand Rever, alleged to contain about 92,160 acres, and to have been purchased from the late Captain Joseph Brant, the Agent of the Ionians, have been fully investigated cyclic Trustees.* and they have come after due deliberation, to the determination of requiring in this, and all other cases, the production either of the mixinal deed from Captain Brant in accrification of it from the Register. It would appear from the papers, that you are post or the reasons there assigned, in a situation to comply with the former of these two requisitions, and it will be for you now to-see whether you can supply the secondary evidence required in the absence of the first. 1 remain, Sir,

[Signed]

Your very obed't serv't,
WILLIAM EIEPBURN.
A Trustee of the Six
Nations Indians.

P. S.—You will be good enough to remember that all correspondence with the Trustees must be post paid.

To Mr. Joshua Y. Cozens, Cornwall, U. C.

No. 38.

Cornwall, 2d February, 1835.

Web. HEPBURE, Esq.

Sin

I beg to acknowledge the receipt of your letter of 24th January, addressed to my father J. Y. Cozens, wherein you state as a primary requisite to the establishment of our claim, for which I had the honor in July last to present to His Excellency the Lieutenant Governor my petition, the production of the original deed from Captain Brant to my father; or a certified copy from the Register as a secondary evidence demanded by the Trustees of the Six Nations Indians. Having the various documents before you. establishing the fact of the existence at one time of said original deed, and forcible scriptory testimony under seal to a copy of the same, being a true copy thereof in the absence and irrrecoverable loss of said original, Thad strong hopes, unchecked by the difficulties of procuring the vouchers so furnished, that the fullest admission would be made by the Honorable the Trustees of the validity of our claim, and thus enable His Excellency the Lieutenant Governor, unhesitatingly to yield to the prayer of my petition.

See His evidence buffere Committee.

† See has evidence brespecting a claim by Thomson made in the loss or absence of the original conveyance; and as to its being Recorded in a Registry destroyed.

See his evidence to the contrary.

In the context of the several depositions from time to time obtained and forwarded for your consideration will be discovered a recital of the peculiar hardships under which our case has so long existed.-Tho various dates of communications during upwards of twenty years, will exhibit a like accumulation of disappointments and breaches of trust and trials of fraud, on the part of correspondents and agents. together, they will, I presume, appear to you of good foundation for our hopes that no lears on our part or expectations on that of others should be allowed to prejudice our case, nor obstruct the plain and straight forward path we have trodden in the advancement of our claim, nor yet should any particular circumstance that time had not obliberated. There has ever been but one point from which we have proceeded in our endeavours to possess ourselves of the originals and all other papers, there is but a single point held in view to which those endeavors are yet directed—the scrupulously exact and just narrative of facts—the simple acknowledgement by the Trustees and His Excellency the Lieutenant Governor of our equally just claim. In no case of equity could matters have been more fully developed than we have sought to expose in the facts of ours. In this feeling which we always have entertained and always will, in closest adherence to positive facts within our knowledge, I cannot but solicit your candid reply heretog and take the liberty of asking you whether you have not already, through other hands than ours, had ocular evidence before you of a certified or notarial copy of the oriparticular. There has been and will be good faith on our part, throughout. I trust you have observed nothing in our exposition to render you doubtful. Let me therefore, Sir, entreat you to inform me whether an attempt has not been made by one Page (of whose base character I have supplied you proofs and possess further still stronger proofs, from Vermont) to establish, through a direct application from himself, or indirectly through the medium of an Agent of high respectability, by the production of a notarial copy of our deed from Captain Brant, a right by purchase to the land in question .- Such papers as that man Page possesses, were obtained by stealth-by arts of fraud, in hope of profiting by them, and by repeated attempts to make sale of his unfounded claim.

I cannot, Sir, dou't the pure and honorable intentions of the Trustees of the Six Nations, norican I question their desire that justice should, in this case of ours, as in all others pertaining to their concern, have its full effect: and I therefore beg permission to say, that should such secondary proof as is demanded, and as constituting that degree expected in the absence of a pesitive and original dead, have been brought forward by any other persons, and by them submitted to the consideration of either of the Honorable Trustees, I most sincerely and respectfully beg to be informed of it. I do so the more fervently, for that no allusion has been made in your letter to the attempts which an unprincipled speculating slich has made to form the semblance of a title, and comravene our rights. Of those attempts, fruitful of such difficulties to my father and medor a series of years. full relations have been written down in the justice.

The certified Notarial copy of the original deed is known to have been in the hands of the Page spoken of. To obtain it my father and I at the first moment

of learning its nature travelled for and near, and pur- | ferred early in July to the Trustees for the Indians, sued our exertions to the sacrifice of such amounts of time and money as we could in our circumstances too That Notarial deed has been, I verily believe, in Upper Canada-it has been attempted to be exhibited to the inspection of the Trustees either in its reality or form and substance. - May I, Sir, therefore under these assertions, be pardoned in asking if any such document has appeared to the Trustees?

In conclusion, I beg to ask whether a friendly cooperation would be denied me by the Trustees in bined efforts of the Notarial deed alluded to-

I humbly submit the foregoing with a respectful reference from myself, through you, to the Honorable Mr. Markland-and

I am,

Most respectfully, Your very obd't servant, NELSON COZENS.

(No. 39.)

City of Toronto, 9th Feb. 1835.

Sir:

I am in receipt of your letter of the 2d inst.

which came to my hands this morning.

I am not aware that any notarial copy of the alledged deed from the late Captain Brant to your father has been produced to the Trustees by Page or any person on his behalf, at least I have searched among the papers and cannot find any such document; but even were such evidence forthcoming I am not sure that it would induce the Trustees to deviate from the rule laid down by them and to which I referred in my former letter, viz: of requiring in all cases the production either of the original deed from Capt. Brant or a certified copy of it from the Register, and the inclination of my opinionlis that it would not.

I remain, Sir,

Your very ob't serv't,

[Signed]

WILLIAM HEPBURN.

A trustee of the Six Nations Indians.

Mr. Nelson Cozens, Cornwall, U. C.

Lt. Colonel RowAN. Private Secretary, &c. &c. SIR.

I have the honor to address you on the subject of my petition presented in July last to His Excellency the Lieutenant Governor, praying a confirmation of title to such part of 92,160 acres of land as was yet unsold on the Grand River, of a Tract purchased in 1796 by my father, by warrantee deed to him from Capt. Brant, for six Nations of Indians, and for an equivalent for that portion of said tract which had been disposed of by Government.

My petition, I learned, had, with the memorial

and during eight and a half months that have since elapsed, I have used all possible means to furnish the Trustees with such conclusive vouchers as would leave all the facts of my case as narrated by me and sworn to by others, fully corroborated. I received at Cornwall, late in February last, a letter from Wm. Hepburn Esq, Trustee, stating a determination on the part of the Trustees not to admit the validity of any claim upon Indian lands, unless accompanied with the original contract, from Brant, or its certified copy gaining sight or possession through their and our com- from the original. The impossibility of my compliance therewith, for the causes assigned in my petition and my father's memorial to His Excellency, led me me hither on 1st inst., and into an explanatory conversation with Mr. Hepburn. I produced Capt. Brant's recipt for the second payment by my father, of £500 Halifax currency, a copy whereof had been furnished the Trustees; I also personally endeavoured to remove whatever doubts were apparent in the minds of the Trustees, and succeeded I believe by the above receipt, citing all the material points save the boundaries of the land, and by other confirmatory papers, in establishing the fact of the existence at one time of the warrantee deed from Brant, its deposit in London and subsequent loss.

> I had engaged on my father's account as early as the year 1825, in enquiries and searches for the lost originals in London, and continued the pursuit up to the close of 1830, when perceiving how tardy had been my advance, my father invested in me his entire title to the lands in question, and I then with all possible energy renewed my exertions, which I have uninterruptedly continued to this moment, at all the expences my limited means allowed, and eventually at the loss

> My father accompanied me hither in July last, hop-ing for an opportunity of personally relating to His Excellency in Council, the numerous circumstances and particulars attending his purchase and deed from Brant, and its loss in London. He hoped also for his Excellency's gracious permission to recunt the various eventful and unhappy changes and embarrassments Those opportunities did not occur. in a long life.

of my Mercantile situation.

consecutively and collectively, and that he will be which my father and I labor in maintaining our title pleased to cause such an expression of opinion upon the merits thereof as it may please him to sanction.

I beg humbly to speak my hopes for such a decision by His Excellency in Council, as will involve any power in a high Court of Equity, unprescribed by legal rules; and I beg to state my conviction of the justice of ascribing to Ilis Excellency in Council and to His Excellency's favorable comprehensive decision the most plenary power of the highest equitable tribu-

I have the honor to be, Sir, Respectfully your obe't serv't, NELSON COZENS.

### (No. 41.)

The following letter from Samuel Clark written on the eve of embarking to return to America, is from a copy in the hand writing of one of the firm of Barrell and Servante—the original having been by them sent as is said;—"Sent the original to S. Barrell. 6th March, 1801, per the Minerva, with other papers."

London, 16th March, 1799.

Messrs. Barrell & Servante,

GENTLEMEN,

The goods which I purchased of Stevens and Rankin amount to £216 3 3 for which you have accepted my bill at 12 months. Should there not be a necessity of appropriating them to the prosecuting the establishment of the Carver claim (for which purpose the purchase was made) I shall without fail remit you the amount in time to meet the payment of the bill. Any communication you wish to forward me, you will direct to the care of Mr. Daniel Henshaw, Albany. The goods above mentioned are at my own risk.

I am with respect, Your humble servant, SAM'L CLARK.

(No. 42.)

(Copy.)

Toronto, 21st April, 1835.

Lt. Col. Rowan Private Secretary, &c. &c.

Sir:

I had the honor to address you on the 24th March, on the subject of my father's purchase from Captain Brant, and begged His Excellency the Lieutenant Governor in Council would take into consideration the subject of that purchase, as contained in my father's memorial and my petition presented in July last; that His Excellency would for that purpose cause the various documents and papers in support of the claim to be withdrawn from the Trustees of the Six Nations Indians, into whose hands they had been transferred, and from whom I have received, after an interval of nine months no definite reply. say that I have been two months in town, but feared, during the sitting of the Parliament, to make any encroachments upon His Excellency's lime.

I am greatly anxious personally to submit to His Excellency in detail, the numerous hardships of the case in question, and the various difficulties under

and substantiating our rights. But should such a personal interview be deemed by his Excellency unnecessary, I have in that case to request your recurrence to the substance of my last communication, and to pray that his Excellency will grant me such an investigation of the matter in Council, as will lead to a final decision upon the question. And in consideration of the length of time already elapsed since the setting forth of the claim in question, I have to pray his Excellency will permit my personally explaining before the Council all such circumstances relating to the case, as may seem to require exposition.

I pray His Excellency to appoint the earliest day on which my claim may be taken up; and I beg you to assure His Excellency that I shall feel sentiments of gratitude for any facilities that may be afforded for the full and early consideration of a matter which, though brought forward by me alone, involves the interests of my father and his other eleven unprovided

for children.

Those children, let me in digression observe, look to my father and me alone for present support; and he of my brothers to whom I looked for joint exertion having become a Maniac, I cannot but feel hopes that His Excellency's knowledge of such facts, and the recollection of my father's many difficult and important services, commencing in 1791 as detailed in his Memorial of July last to the Lieutenant Governor, will induce an early and favorable entertainment of our claim.

> I have the honor to be, Sir, Most respectfullly, yours NELSON COZENS.

P. S.

Wednesday, 22d April, 1835.

Mr. Cozens begs permission to say, in addition to the foregoing, that he looks upon his father's situation in life as one of a peculiar nature—being attended for a series of years with more than ordinary hardships and distress; -he having met with frequent disasters before the late War-with a casualty which deprived him of the free use of his right arm while in actual service as Captain of Militia at the head of his Company during the War; and with several unlooked for as unmerited disappointments of office from govern-ment since. He having also an existing, perhaps never to be indemnified claim, as heir for losses sustained by his father during the old War as a refugee Tory ;-his having also (unkindly) without assigned cause, been excluded from a new Commission of the Peace, as Magistrate, during Governor Maitland's administration, although six hundred freeholders petitioned for his continuance in such an office, and for

the reasons of his exclusion,—but ineffectually.

The writer hereof, therefore, humbly hopes that his father's services, losses, hardships and disappointments, his tried loyalty through two Wars-as also the loyalty and attachment of his children-together with the merits of the pending claim, may all be fully reflected upon by His Excellency the Lieutenant

Governor.

Respectfully

NELSON COZENS.

Lieut. Col. Rowan,

(No. 43.)

GOVERNMENT HOUSE, Toronto, 23d April, 1835.

I am directed by the Lieutenant Governor to acquaint you in reply to your communication of the 21st inst., that you must be aware that your father's claims are altogether of a private nature. Your statements of July and March last were immediately referred to the Executive Council, and also to the Trustees of the Six Nations; and although His Excellency does not think that the Executive Government will have it in their power to grant any relief to you, he will transmit your letter to the Executive Council, and suggest the expediency of your being heard by the Council in explanation of the various documents relating to the negociation with the late Captain Joseph Brant for a portion of the Indian lands.

Your obd't serv't,

[Signed]

WM. ROWAN.

Mr. Nelson Cozuns, åc.

(No. 44.)

EXECUTIVE COUNCIL CHAMBERS YORK.

FRIDAY, 14th MAY, 1830.

PRESENT.

The Hon. Jno. Bev. Robinson Chief Justice, Chairman. James Baby. & Ven. J. Strachan, D. D. Archd. of York.

To His Excellency Sir John Colborne, K. C. B. Lieut. Governor of the Province of Upper Canada, and Major General commanding His Majesty's forces therein, &c. &c. &c.

May it please Your Excellency :

In abedience to the desire, &c.

The Council beg to lay before Your Excellency the following Report on the history and present state of the several Trusts created for the benefit of the Five Nations

of Indians in the County of Haldimand in this Province. The Fige Nations, sometimes designated, (with less propriety) the Six Nations on Grand River were acknowledged to have had such strong claims upon the consideration of His Majesty, from their devotion to the Royal cause during the American Rebellion, and the loss they sus ained, that it was one of the first concerns of the Government on return of peace to provide for them in this

Sir Fred. Haldimand 1784 Oct. 25th by an instrument under his hand and Scal at arms declared "that they and their posterity should be allowed to possess and enjoy a Tract of Land six miles in depth each side the Grand River running into Lake Erie, being part of a large Tract lately purchased by Government from the Chippawa Ludians.'

Lands thus set apart for Five Nations, extensive and well situated—but soon encroached upon by the whites and settlers-and the Indians hunted upon the grounds of the Chippawas with whom they were friends.

In 1796 the Five Nations in a great measure civilizedamong them many were christians-wished to dispose of portions of their large tract and retain enough to cultivate and raise a fund by sales as an annuity for their comfort,

such occurred to themselves or was suggested thy theh white friends.

Captain Joseph Brant their principal Chief who resided near them and who from his influence among them and his intelligence, took a prominent part while he lived in all then transactions, was by a solemnAct in Council appoint. ed the Agentor Attorney of the Five Nations to negotiate with the Government whatever might be necessary for effecting their wishes upon this occasion.

The principal chiefs and warriors in the name of the whole executed on 2d Nov. 1796 a formal power of Attorney authorising Captain Brant to surrender into the hands of the Government, certain portions of the lands possessed by them, and for which they had found or intended to find nurclusers, to the end that His Majesty thus holding those portions of their lands relieved from the pledge, which had been given for their exclusive possession, might make a clear and free grant in fee simple by Letters Patent to such persons as the Indians might agree to sell to. method of proceeding was clearly in accordance with the nature of the tenure under which the Five Nations held, and was in principle at least, as proper as could be devised for protecting the interest of the Indians and guarding them against hasty and indiscreet sales.

The Tract which Captain Brant was authorised to surrender was described in the power of Attorney referred to, and was stated to contain 310,391 acres.

The object of the surrender was therein expressly stated to be that the same lands " might be re-granted by His Majesty to such person or persons as their brother and Agent Captain Brant might think meet and proper, and full authority was by the same instrument given to Capt. Brant to nominate to the administrator of the Government such person or persons in order that grants under the Great Seal of the Province might issue for their (the purchasers) further satisfaction."

By the same power of Attorney authority was given to Cupt. Brant after the passing of such grants "to ask and receive such security or securities, either in his own name or the names of others to be by him then and there nominated as he or they might deem necessary for securing the payment of the several sums of money that should become due and owing from the purchasers, and likewise to receive all such sum or sums of money as should be due and owing therefor, and to give acquittances in as full a manner as all kis constituents (the Indians of the Five Nations) could do if personally present." Under this authority it is supposed, with the perfect knowledge and approbation of the Indians, sales of very large Tracts were effected by Capt. Brant, and on 5th Feb. 1793, pursuing the power delegated to him, he executed in the name of the chief warriors of the Five Nations 2 formal Deed surrendering relinquishing and quitting claim for the Five Nations their possession of such parts of the said lands as are mentioned in a Schedule to that Deed annexed, "beseeching that His Majesty would be pleased to grant the same in fee simple to the persons mentioned in the said Schedule for the several and respective considerations to the said land annexed, which the Five Nations were to receive from the said persons as equivalent to the same."

The schedules specifies the following tracts and particularizes Block No. 1 sold to P. Stedman £8,841 0 0, about 94,305

" Richard Beasley, Jas. Wilson & Jno. B. Roussean .... 8,287 0 0 " Wm. Wallace 16,364 0 0 -- 85,078 No purchase or price named W. Jarvis, Esq. 5,775 0 0.

Given originally to John Dockstader by 5,000 0 0 --- 19,000 him sold for the benefit of his Indian children to Benjamin Canby.

£44,867 0 0, acres 353,700

It occurs to us to remark upon this schedule, that the lands specified in it somewhat exceed in the whole the quantity which is mentioned in the power of Attorney to Capt. Brant - a difference probably unimportant as the boundaries given in the last mentioned instrument were it is presumed, understood and intended to comprise all the tracts particularized in the schedule.

To the tracts set opposite to the name of Mr. Jarvis and Benjamin Canby * no names are given in the schedule, but they are tracts described in subsequent acts and pro-

ceedings as Block No. 5 & G.

The making these contracts with the individual purchasers, and the fixing the consideration, were as it appears the acts of the Indians themselves either concluded upon in their Councils or negociated by their agent Capt. Brant who was fully authorised for that purpose.

The government of this Colony seems merely to have assented to the general measure and to have given their sanction and assistance in the conviction that it would be beneficial to the interest of the Indians.

There is indeed strong reason to believe from communications received by Mr. President Russell from His Grace the Duke of Portland, the Secretary of State for the Colonies which have been submitted to the Council upon an occasion connected with these transactions, that His Majesty's Government were not without extreme reluctance brought to give their sanction to these transfers of land reserved for the use of the Five Nations, and it is important to bear in mind that in one of these despatches it is plainly declared that the previous sanction of Ilis Majesty must be received before any similar negociation shall be entertained by this government in future-better for Indians now had Duke of Portland's advice been followed, i. e. making Government of England the purchaser at same price as they were willing to sell to individuals—Government yielded too easily to the importunities of the Chiefs to confirm their sales.

Before the execution of the formal surrender above mentioned, this government had been fully apprised of the particulars of each sale that had been effected, and patents had been prepared for conveying the parcels to the respective purchasers, so that on the 5th Feb v 1793 when the surrender bears date, Capt. Brant attended before Mr. President Russell in Council, and as Attorney for the Five Nations, delivered into the hands of the President the deed of surrender to His Majesty for the several tracts described in the schedule, and the same being accepted, the Attorney General for this Province, Mr. White being also in attendance produced five deeds of grant for the several purcels (a purchaser not having been yet found for Block No. 4 as appears by the schedule) which grants or Letters Patent the President signed in presence of the Council, and ordered that the Great Seal of the Province should be affixed thereto, and that the Secretary of the Province should be instructed not to deliver the said deeds to any of the parties to whom the said lands are thereby conveyed, unless they shall produce and leave with him a receipt under the hands and seals of the Hon. David W. Smith, Wm. Claus, Esq. & Alex. Stuart, Esq. Trustees, authorised by the Five Nations to receive moragages of the said lands, that the said persons have done every thing required of them and necessary to secure to the Five Nations and their posterity the stipulated annuties and considerations which they agreed to give for the same.

The above is an extract of the recorded proceedings of the Executive Council on the occasion, from which as well as from previous and subsequent transactions it is evident that the most sincere desire was entertained by the Govcriment to comply with every reasonable wish of the In-dians in regard to the disposition of their lands, and to con-cur with them for their good in securing the full accomplishment of their wishes

It is but just to remark that Capt. Brant though himself an individual of the Five Nations, and a principal Chief and warrior among them, was also a person possessed of a good English Education and of superior intelligence, the with the sum of £5,000 affixed to it; is said with Schedule antimate friend and associate of many of the most respectato have been given to John Dochstader and add by him for

able white inhabitants of the Province, familiar with their transactions and mode of dealing and fully as capable (as his correspondence in the possession of the Council shows) of managing business by writing, or verbally, as most of those with whom he might come in contact. The Indians also by the instrument they executed had reposed in him untimited confidence, and under such circumstances the Government might well be excused if they did not assume so minute and immediate a control, or make so particular an enquiry into the circumstances of each contract, as duty and humanity might have constrained them to do in the case of Indians wholly uncivilized, and not represented by so intelligent and responsible an agent of their own Indeed there is much reason to believe from a review of these proceedings that any apparently unnecessary interference of that kind might not have been graciously received. Appointment of agents gave great trouble to the Government. Power to Brant gave him authority to nominate three Trustees—Smith, Claus and Stewart—to receive the securities from the purchasers, Government merely assenting to the desires of the Indians .- First idea of alienaling a portion of their lands originated with themselves and pressed upon the Government—they or Brant found purchasers and made bargains and Brant nominated the Three Trustees by their express authority and sanction.

The Government have nevertheless from time to time at the request of the Five Nations to adjust matters for them and aid in the sale disposition of the Trust Funds.

For many years past all affairs of the Indians have been transferred from the Civil Government to the Military Service, but recently put again in charge of the civil administration to extricate their pecuniary concerns, from difficulty and perplexities. The result of enquiries are that No. 1, containing 94,305 acres sold to Stedman for £8,841 after various transfers (and the discovery of a forgery pretending to assign from Stedman to a man in the United States) this Tract at last came into the possession of Hon. Wm. Dickson, principal and interest paid up about 1816.

Number two, of 94,012 acres to Beasley and others £3,887 paid up. No. 3, respecting this tract there are no documents whatever in the Executive Council. The registry of the Letters Patent which followed the surrender has been referred to, & it is there recited that one William Vallace the Grantee (purchaser from Brant) had given security for the money to the trustees, but where the Mortgage or other security may be, whether any thing has been paid for the principal or interest, and what remains due, the Council have no means of knowing-applied to proper source for information (Claus) without effect.

Block Number 4 has been sold to the Hon. Thomas Clark, who has given his bond dated 25th October, 1808 for £3,564 payable in a Thousand years from the date, to William Claus and Alexander Stewart, Esquires, and the interest to be paid annually. The Council are not aware interest to be paid annually. whether any Mortgage has been given, or what has been received from Mr. Clark either for principal or interest. It is most probable that the interest has been regularly paid as Mr. Clark is perfectly responsible and punctual in his transactions.

Number five originally contracted for by Mr. Jarvis was afterwards sold to Lord Selkirk for £3,850, and has come into the hands of Henry J. Boulton, at present Attorney General.

The principal is unpaid but the interest has been discharged until within the last three years, and the present proprie-tor is ready to pay the arrear under the direction of the Government for the use of the Indians if he can be seeur-Government for the use of the Indians if he can be seeured against any legal claims of the representatives of the late Col. Claus. It appears by some of the papers before us that £600 New York currency had been paid by Mr. Jarvis, the first purchaser, on account of the principal, which sum was repaid to Mr. Jarvis by the Earl of Selkirk to secure the sum remaining due £3,475 and interest a Mortgage was given by Lord Selkirk to Wm. Claus, Esq as sole trustee for a term of years, his Executors therefore have the legal interest in this security. have the legal interest in this security.

Number Six, described in the Schedule as 19:000 acres

the benefit of his Indian children, to Benjamin Canby. We imagine that no part of the princ pal or interest has been paid and it is doubtful if the Indians as a body have any interest in the purchase money. Sale made by Canby for the benefit of Dockstader's Children.

On Blacks one and two there is nothing due. On Three and Four we are not sure that Mortgages were taken—presume they were similar to that of Mr. Beasley, of which a copy is before us—the form is by conveying the lands to the Trustees, in fice an joint tenants, (expressly noticing the trust) and subject to be defeated by payment of the purchase money in one thousand years with interest in mean time annually, with covenants to pay and condition of reentry on non-payment. ———Sinth always in England has not acted, he holds the estate and is in fact sole siezed, being the only surviving Trustee—therefore in his power to enforce payment by author zing his name to be used here in any action of Ejectment, debt or covenant necessary.

5. A mortgage by Lord Selkirk for the sum due £3475 to Wm. Claus Esq. his executors administrators—for 1000 years—Claus deceased, his executors to enforce this

mortgage.

No. 6. To Canby—he managed contrary to injunctions by the Government to obtain his Patent without band or mortgage—Government enquired and found he got it surreptitiously—is yet living and believed to he a man of property—upon the propriety of enforcing it the Council perusing correspondence from Capt. Brant, and the substance of several Indian Councils and the conflicting nature of the transactions of those Councils can form no satisfactory opinion—Claus died—Stuart died much earlier—connected by marriage with the Mohawk Nation—Smith in England never act d.

Col Claus as in the case of Lord Selkirk took security in his own name, Stewart being dead and Smith in Eng-

land as Brant and chiefs desired he would.

Recommended that Sir David Wm. Smith, Bart. who resides at Alawick, Northumberland, resign to some one to represent him here .- Col. Ciaus made a will and his executor is the only one who can sue for the securities given only in Claus' name. Col. Claus always anxious to submit every thing to the Government and from documents marked I, 46, he was ready to do so on 18th May, 1804. When he died. Indians appointed his son John Chans a Trustee (1826?) he for 2 years failed to give the Indians an account of their affairs,-they complained of non payment of dividends, &c. the council examined what documents they had, but had to refer to Mr. Claus and Cant. John Brant, the latter attended in Council but his answers to questions intended to be put to the former gave little information. Claus refused to appear, he has all his father's papers on Indian affairs as Truster, but there is no Court of Equity to compel his yielding them, besides the Indians have no corporate capacity whereby to suc, unless in all their names—a thing impossible. A bill was framed by Legislative Council, but rejected by the As-sembly. Governor Hunter ordered affairs of the Indians to be looked into 24th June, 1803, and 18th May, 1804, and reports of these two days contain all the information the Government then possessed on the subject. Governor Gore ordered 3d Novem'r 1806, papers to be deposited in Council office, to show the investments of monies for the Indians remitted to England, viz:—3 per ct. Consolidated Bank Annuities. £5,666 9 3 sterling, so invested as to purchase £9,244 5 11, 3 p. ct. The Council cannot say what part of all the monies received the above sum embraces. From account furnished us by your Excellency, dated 17th Feb. 1826, it appears sums of money had been lent by the Trustees to individuals on interest, it is hoped on good security. No account up to Col. Claus' death of how he stood with the Indians. A sterling bill of £772 is so carried to Col. Claus' credit as to give him the advantage of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control tage of the exchange, probably 10 p. ct. In their Councils the Indians were not always consistent, sometimes desiring that confirmations be made by government of portions of land to those white persons settled thereon, and at other times wishing the contrary as to the same persons. speeches in Council relating thereto are, 1st 10th & 13th

March, 1809, and Captain John Brant promised 1830 to send down additional information, but it did not come. The Indians sometimes complained of the Whites encronching on them, then would sanction it and loudly assert their right to lease and sell as they chose. Had the Chiels been allowed to do as they liked they would soon have get rid of their lands. Governor Haldimund gave it to them and to their posterity, by an instrument under is sign manual which assured them they might enjoy it forever. It is hardly necessary to remark that an estate in fee simple in lands belonging to the crown could not be conveyed by Sir Frederick Haldimand's mere licence of occupation under his seal. Letters patent under the Great Seal of England, or of the Province of Quebec, could alone have conferred such a title. That the Indians were never to alienate their lands without the assent of the crown was expressly proclaimed by royal proclamation in 1763 when Canada had been finally ceded to Great Britain. The speech and letter of Lord Dorchester in 1788-9 are most express on this point with reference to the Five Nations in particular, and several proclamations published in this Province have given notice of this restriction from an carly period.

In conclusion the Council recommend that the Crown Officers or the Superintendant of the Five Nations, be instructed to ascertain what sales have been made of the Indians and how far the conditions complied with, and

how made available.

That the opinion of the Crown Officers be taken as to how the trust in Mr. John Claus can be divested and how get account of affairs at his father's death—that an assignment he obtained from Sir D. W. Smith of the trust in him—that a bill be proposed by the Legislative Council as before, at next Session—that a full Council be called by the Indians on the Grand River and in presence of the Superintendent (Capt. John Brant) and other officers as Your Excellency may appoint, and a report be made of their affairs.

The Council cannot avoid adverting to a document which they have found among the papers relating to the Five Nations, purporting to be the copy of a deed executed by the flon. William Dickson in March 1809 by which he engages to transact all necessary professional business for the Indians. The consideration for this promise was a grant of land which the Five Nations made to Mr. Dickson with the assent of the Crown. But it is no longer necessary that the government should be at the expense of proceedings to protect the interest of the Indians.

pense of proceedings to protect the interest of the Indians.
On 26th Feb'y and 14th April 1807 are proceedings in the Executive Council books—refer to Council book D. page 342 and 346, and page 359 and 378, entered. It there appears Col. Claus gave account to that time of money received of £8718 10 0 Provincial Currency, and had remitted to Sir John Johnson, Bart, a joint trustee, £8117 and paid Indians & Brant the difference £601 0 0.—Col. Claus held these securities for monies lent to individuals by Capt. Brant, viz:

£775 0 0

The Council suppose the £400 to Mr. Ridout to have been paid up, ignorant of the other sums.

In page 343 will be found particular information respecting No. 3, soid to Wm. Wallace—the Indians acknowledge themselves to have been paid by Wallace for Acres.

That of the same tract they had given to Mrs. Ann Claus, daughter of Sir Wm Johnson,	10,000
To Capt Brant	5.000
Sold to Capt. Pilkington R. E. for security they	)
say had been given to the success	15,000

Say had been given to the trustees.

Given to Mr. Beasley to make up a deficiency in 8,000 No. 2 sold him.

40,000

The remainder of No. 3 being 45.185 they had agreed to them on the Grand River by the late Governor Sir to sell to Jacob Erband others for 1 8 per acre to be paid

1st May, 1807. John Claus writes (1830) to the Executive Council,

To John Small. Esq. Ec. Lin. &c.

In reply I beg leave to state for the information of His Excellency that an imperious regard which I owe to the interests of my father's family and my own, constrains me to decline affording any information or explanation whatever on the subject of the trust unsolicitedly committed by the Indians to my charge, and whenever the Executive Government of Upper Canada shall see proper to confirm by Patent a certain tract of land situated on the Grand River and surrendered by the Indians for the benefit of my father and his heirs, I shall cheerfully resign a situation which has only been prolific of trouble, ingratitude and misrepresentation. I am Sir,

Your most ob't humble Serv't, (Signed) JOHN CLAUS.

A true copy, (Signed)

## No. 45. THE REPORT

Of the Honorable John Henry Dunn, the Honorable George Herchimer Markland, and William Hepburn, Esquire, the Trusters appointed by His Excellency the Lieutenant Governor, on behalf of the Six Nations Indians, to investigate and report for his information, on claims preferred by various persons to lands belonging to the said Six Nations and situated on the Grand River.

Excellency, for your information and consideration, principles by which they have been guided in the the various claims submitted to their investigation :and they would, in the outset, observe, that the several claims classed in manner hereinafter referred to being equitable only, and not in any light to be viewed as legal rights, the Trustees have considered the present inquiry simply as a mode adopted by Your Excellency of satisfying yourself, through their medium, by a calm and impartial investigation into the nature of those claims, how far the Crown is equitably and conscientiously bound to sanction them, and not imposing on the Trustees the strictness of a legal investigation, which indeed the actual situation of the Trustees conceive, to the present inquiry, as the Inpossible to the Grant of Sir Frederick Haldimand,

The Trustees are satisfied, from copies laid before in him. them of the correspondence in the year 1797, between the late President Russell, and Captain Joseph Brant, doceased, as well as af a Power of Attorney, dated allowing such of them only as are preferred under 10th October, 1804, and executed it appears by the grants and leases executed by Capitain Joseph Brant, Sachems and Chiefs, at a Council specially convened as the lawfully constituted Agent of the Indians, the

Frederick Haldimand in the year 1784; and which grant, it would seem from the correspondence above alluded to, was confirmed by the Home Government during the Duke of Portland's administration. It also appears from the copy of the Power of Attorney, that Captain Joseph Brant had also full power, on behalf of the Indians, to sell such parts of their lands for their benefit as he should think fit; and the Trustees consider that having such authority, he had a right to grant leases of those for 999 years, (a term equivalent to a fee simple,) if he so thought proper, and this mode of conveying them he most usually adopted.

Numerous claims have been submitted to the Trustees and taken into their careful consideration, and the documents accompanying them have been thoroughly investigated; from which it appears that some of the claimants seek a confirmation from Government of their alleged titles on the ground of having derived them under leases for 21 years, or for a less term from individual Indians residing upon different portions of the Indian Territory: others under leases for similar terms from one or more of the Chiefs; some under bare permissive occupations from individual Indians or Chiefs, (all of which three described classes of claimants appear to have paid a greater or less consideration for their lands to the parties from whom they purchased, and in many instances to have made considerable improvements on the lands,)-others as the children or descendants of Indian women, with respect to whom a custom is alleged to exist among the Indians entitling them to portions of their lands-and others again claim either under existing or lost or destroyed grants in fee simple or loases for 999 years executed by Captain Joseph Brant, as the Agent of the Indians, for valuable considerations therein expressed to be paid to him.; which deeds almost invariably re-The Trustees, in laying their report before Your cite or refer to the powers of selling and leasing wasted in him, and are stated to be granted in execution think it proper and satisfactory briefly to advert to the of them. In some instances these latter deeds appear to have been (though it is conceived unnecessarily) present inquiry, and in coming to their decisions upon confirmed at Indian Councils subsequently held, but in the great majority of cases they seem not to have been so confirmed.

Whether Captain Joseph Brant did or not on all occasions execute the trust reposed in him faithfully towards the Indians, the Trustees are unable to judge. no evidence having been laid before them upon that subject; and it is indeed only right to observe, that no improper conduct whatever has been imputed to him before the Trustees; and they are therefore, bound to assume that he discharged his duty with due fidelity. This, however, is a question wholly immaterial, as the Indians, with respect to the Crown, entirely precludes, dians, so far as regards third persons, are doubtless inasmuch, as after giving the most extensive effect bound by the acts of their Agent in all matters within the fair and legitimate scope of his authority, whathereinafter alluded to, it confers an equitable title ever legal redress the Indians might have had against merely upon the Indians in the Grand River lands, him for any damage accruing by reason of the breach, leaving the legal title still vested in the Crown. neglect or abuse, of the confidence they had reposed

The Trustees liaving duly weighed the several classes of claims above referred to, came to the decision of for the purpose, that Captain Joseph Brant was the originals of which have been or can be produced; and accredited Agent of the Six Nations Indians, and in-they would here observe, that they do not find from wested withfull power on their behalf to obtain deeds any documents in their possession, that any person or the Captain the tracks of leading any documents in their possession, that any person or the Captain the tracks of leading and documents in their possession. The Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Brant Bra from the Crown conveying the tracts of land granted persons, after the death of Captain Joseph Brant

was invested with powers similar to those conferred upon him, notwithstanding the assumption of them on the part of certain individuals.

The Trustees would further observe, that they have adjudicated upon the claims mentioned in the two following schedules to this Report upon the principles above adverted to; but they have abstained from setting out the facts of each case, as it would have greatly swelled and incumbered the Report, and unnecessarily, it is thought, when it will be seen that reference is made in the Schedules to the bundles and numbers of the papers in the possession of the Trustees, containing a full detail of such facts, to which immediate reference can be at any time had if required.

And lastly, the Trustees would add, that they have confined their attention solely to the single point, whether the original claims ought or not in equity to be confirmed by the Crown; and have wholly excluded from their consideration, the claims of parties under derivative titles, finding it would lead to a very wide and difficult field of enquiry, upon which the Trustees could not hope to arrive at any satisfactory result.

All which the Trustees beg most respectfully to submit to Your Excellency's consideration.

JOHN H. DUNN, GEORGE H. MARKLAND, WILLIAM HEPBURN.

Indian Office Toronto, 1st January, 1835.

To Claimants of Lands of the Six Nations Indians, on the Grand River.

Notice is hereby given, that all persons deriving title under the several parties whose claims to lands belonging to the Six Nations Indians, on the Grand River, are recommended to His Excellency the Lieutenant Governor to be confirmed by the report of the trustees, and which claims are enumerated in the first schedule to the said report, are required forthwith to transmit all deeds, documents and papers, in support of such derivative titles, post paid, to William Hepborn, Esq. city of Toronto, one of the said trustees; and further, that upon the leases from the late Capt. Joseph Brant, or certified copies thereof from the Register being produced, as required by the said report, in proof of the validity of the original claims, and the derivative titles under the same being satisfactorily coduced, deeds will be issued by the Crown to the parties who upon such investigation shall be found equitably entitled to receive the same.

J. GIVINS,
Chief Superintendent of Indian
Affairs in Upper Canada.

Indian Office, Toronto, 1st February, 1835.

To claimants of lands of the Six' Nations Indians on the Grand River.

Notice is hereby given, that all persons deriving title under the several parties whose claims to Lands belonging to the six nations Indians on the Grand River, are recommended to His Excellency the Lieut. Governor to be confirmed by the report of the trustees, and which claims are enumerated in the first schedule.

to the said report, and also, all persons deriving title under any other parties whose claims may have been investigated and confirmed since the publication of the said report, or which may hereafter be investigated and confirmed, are required to transmit all deeds, documents and papers, in support of such derivative tirle, past paid, to William Hepburn, Esquire, City of Toronto, one of the said trustees, on or before the 1st April next ensuing, the date hereof, otherwise in default thereof, such persons will be excluded from all benefit under the present investigation before the said trustees-and further, that upon the leases from the late Captain Joseph Brant, or certified copies thereof from the Register, being produced as required by the said report, in proof of the validity of the original claims, and the derivative titles under the same, being satisfactorily deduced, deeds will be issued by the Crown to the parties who upon such investigation shall be found equitably entitled to receive the same.

J. GIVENS,
Chief Superintendant Indian
Affairs in Upper Canada.

No. 46.

Report of the Trustees of the Six Nations Indians upon the accompanying Petition of Mr. Nelson Cozens referred to them for that purpose by the Honorable the Executive Council, on 31st July, 1834;

The Trustees in their investigation of the various claims submitted to them by individuals for a confirmation of their titles by the crown to lands belonging to the Six Nations Indians on the Grand River, recommended such claims only for confirmation by the crown as were founded upon leases or conveyances executed by the late Captain Joseph Brant, who, upon the evidence laid before the Trustees, appeared to them clearly to have been the accredited agent of the Indians, and whose acts in the sale and leasing of their lands had been many years since fully sanctioned by the Home Government.

That this was the rule by which the Trustees were guided in the investigation referred to, will be satisfactorily seen on reference to their report on Indian claims sometime since published.

But although the Trustees felt themselves bound to sanction the sales and leases made by Capt. Brant, they have done so in such cases only, where either the criginal conveyance or lease, or a certified copy from the Register could be produced as evidence of the claimant's title.

They have uniformally rejected every other species of evidence (such as affidavits, &c. accounting for the loss or destruction of the original documents) having much reason to apprehend that had such evidence been admitted the Trustees would have opened a wide door for the commission of fraud.

But lest injustice might be done in some instances by the application of the rule, the Trustees have where the parties have desired it, referred the matter to the Indians in Council assisted by their Superintendent Major Winniett, and if they were satisfied of the justice of the claims the Trustees have invariably recommended a confirmation of the titles, thereby avoiding on the one hand any infraction of their rule, and on the other the defeat of Justice by the rigorous operation of it.

and which claims are enumerated in the first schedule. Trustoes found on investigating the claim of the pre-

P. C.

sent petition, that neither the original document executed by Capt. Brant nor a certified copy of it from the Register could be produced in support of the claim as required by their rule, above adverted to, and the Trustees therefore feel that they cannot without a most unjustifiable deviation from their own uniform practice recommend the confirmation of the present petitioner's title, or the payment of an equivalent for his land, unless he obtains the sanction of the Indians in Council, agreeably to the course above alluded to.

As regards the equitable circumstances disclosed in the documents accompanying the petition, the Trustees cautiously abstain from commenting, leaving them to operate with the weight to which they may be considered entitled in the view of the Executive Council.

The Trustees feel that they have discharged their duty in thus reporting upon the present claim for the reasons they have assigned, and would now leave the case with the Executive Council to be dealt with as they may deem most consistent with equity, desiring merely to call the attention of the Council to the long period during which the petitioner has slept upon his rights, and permitted sales of the land included in the alleged conveyance from Captain Brant to take place, without any notice, so far as the trustees are informed, having been given by or on behalf of the petitioner to the proper authorities of the existence of the pre-

EXECUTIVE COUNCIL CHAMBER AT TORONTO

Saturday, 30th May, 1835.

PRESENT.

The Hon & Ven. Jno. Strachan, D. D. Archd. of York, (Presiding Councillor.)

Peter Robinson.

George Herkimer Markland.

May it please Your Excellency :

The Council have had under consideration the Petition of Nelson Cozens, and Joshua Y., Cozens in which the former claims, as assignee of the latter, a quantity of land equal to about 92,000 acres lying in the Grand River Tract, said to have been purchased by Joshua Y. Cozens from the late Capt. Joseph Brant, for a valuable ested in wat greature being

The Council have taken much trouble to investigate the claim, and have perused the various documents produced to substantiate it. They however consider it a question involving such important interests both to the Crown and to the party, that they are nowilling to assume the responsibility of advising Your Excellency upon the subject without first obtaining the opinions of the Crown

be required for the information of His Majesty's Government, to whom the matter will be referred.

(No. 48)

Attorney General's office, 19th June, 1835.

Lieut. Col. Rowan. Secretary to his Excellency the Lieutenant Governor &c. &c. &c.

I have the honor to return the Memorial of Mr. Cozens and the papers which accompanied it, which were referred to me by command of His Excellency the Lieuxs

I think that in finally considering this claim His Excellency, in council need not again undergo the labour of reading through the whole of these voluminous docu-ments—They consist chiefly of evidence, or what is intended to be evidence of the former existence of a lost deed of conveyance from Captain Joseph Brant to Mr. Cozens, of a Township upon the grand River 12 miles square containing upwards of ninety two thousand acres, a paper writing purporting to be a copy of which, is appended to the Memorial, together with extensive correspondence between Mr. Nelson Cozens aed others with reference to the loss of the original.

I have no doubt that such an instrument did exist, and for argument sake will give to the alleged copy all the benefit which Mr. Cozens could have derived from the original

This admission will disencumber the case of all the documents except the Memorial and affidavit annexed. the copy of Brants Deed together with his receipt, the memorandum of agreement between Brant and Cozens. and the subsequent and supplemental afridavit of Mr.

If Mr. Coxens claim were confined to any legal right which he could acquire under the Deed from Brant as agent for the Indians, it is clear that it must be dismissed. Brant could not either alone or with the consont of the Indians sell the Lands of the Crown which had been appropriated to the perpetual accupation of themselves and their posterity by Governor Haldimand; even supposing the consideration paid were a fair one. If any doubt were ever entertained upon, this point, it has been completely removed by the late decision of the Court of King's Bench in the case of Doe ex dem Jackson vs. Wilks. In this view it would have been a transaction betweenthe Memorialist and Brant which the Law could not have

supported or the Governor have recognized.

Mr. Cozens however claims the equitable intervention of the Executive Government to confirm his title to the Land in question in consequence of the purchase having been made under the sanction of Governor Simcoo, who it is insinuated rather than positively asserted; was desirous of rewarding the services rendered to the state by Mr. Coxens, by thus giving full effect to a beneficial purchase from the Indians, in addition to a grant from the Crown of twelve hundred acres, which it appears was made by Governor Simcoe to each and, every of the Cozens." The expressions used by the Memorialist are that he "by the consent and persuasion of Governor Simcoe purchased from Brant and the five nations, Indians, a large and valuable tract of Land." That Governor Simcoepersonally assured Memorialist that to ensure the title which Memorialist held by deed from Captain Brant being known embject without first obtaining the opinions of the Crown as fully and completely executed, he. Governor, Simcos, ments should be referred for their report thereon, as under Deed, there being no Registry offices established, to be made in Council. In his affidavit too, in support of the

Memorial, he states, "that His Excellency advised deponent to close the bargain and take the Indian title, and he would confirm it less 2-7ths and advised deponent to take his conveyance to Europe where it would command a large sum." And it is further stated "that Governor Prescott assured Memorialist that he would cause that public confirmation should be made of Memorialist's Deed from Brant and the Five Nations by virtue of a Mandamus

irom His Majesty.

It is somewhat remarkable that so many years should have been allowed to elapse by Mr. Cozens without any attempt on his part to substantiate his claim. For several years after the loss of the Deed Capt Brant was living, and others who could have borne witness to the bona fides of the transaction and the sanction which it is alleged to have received from the Executive government. It is indeed singular that in the year 1793 when all the sales made in pursuance of the Power of Attorney executed by the Indian Chiefs to Brant on the 2nd November 1796 were confirmed, and which sales were the only alienations of lands on behalf of the Indians then admitted or known, no allusion whatever is found to this vast claim of Mr. Cozens, as His Excellency will find on reference to the elaborate roport upon the subject of these alienations made by the Executive Council and dated 14th May 1830. The Block or Township No. 3 alluded to by Mr. Cozens as having been the subject of an agreement between him and Brant, and lying adjacent to the one stated to have heen finally purchased by him, appears from the Schedule in that report to have been sold for £16,364 though it contains less land by more than eight thousand acres than that which is the subject of the present claim.

This delay is not sufficiently explained by saying that Mr. Cozens was making fruitless searches after the Deed which had been sent to Europe; for as Mr. Cozens then knew that the title was not complete without the confirmation of the Crown, and that the Crown would only confirm purchases fairly mide, he must have known equally well that it was then and not at the distance of thirty years that his equitable claim against the Executive Government could be best proved, if it were capable of being

proved at all.

As the only evidence respecting the terms and conditions of this bargain with the Indians and the concurrence of Governor Simcoe therein consists in the statement of Mr. Cozens himself in support of his own claim, (for I cannot on account of his assignment to his son consider him as a disinterested witness) such statement ought at least to be consistent with itself, and not repugnant to

conscience and probability.

The memorial and affidavit in support are dated 1st July, 1834. Mr. Cozens states that the consideration of this purchase from Brant of the township on the Grand River, twelve miles square, containing 92,160 acres was one thousand pounds, currency, which was to be "in full of all demands until he received an acquitance of all claims from Government for the said township of land, when deponent was to pay a further sum of £1.000."—That he paid Brant £500 on receiving the deed which bears date 8th Oct. 1796, and made another payment of £500 on 26th June, 1797, and he exhibits a receipt from Brant which is in the following words:

"Received June 26th, 1797 of Mr. Joshua Y. Cozens the sum of Five hundred pounds Halifax currency, making one thousand pounds Halifax currency with the £500 he paid me when I signed a Deed to said Joshua Y. Cozens in October 1796 for a Township of Land, being part of the Grand River Tract containing 92,160 acros, purchased by the said Joshua Y. Cozens from me and as agent for the Five Nations of Indians; and I hereby acknowledge said above sum to be in full of all demands for said Township of Land, until I deliver to said Joshua Y. Cozens a relinguishment from Government that they have no claims to said Land, which I bind myself and heirs and as agent uforesaid to do.

JOS. BRANT."

It may be remarked that in the deed of October 1796, and in the receipt endorsed upon it, the sum of £500 is mentioned as the full consideration, and that the lands

professed to be conveyed are particularly described as adjoining a certain tract purchased of the Five Narions Indians by Wm. Wallace and Isaiah Tiffany 1st May, 1796, being Block No. 3 before referred to.

In the month of April 1835, while Mr. Cozons claim was before His Excellency in Council, an original memorandum in the handwriting of Mr. Cozens, and signed by himself and Capt. Brant, is discovered among Brant's papers, bearing date 14th July, 1796, less than three months anterior to the date of the deed, and to all appearance is the agreement upon which the intended sale was founded, and if so, the consideration alluded to in the latter part of the above receipt is very widely different from the one stated by the memorialist. The substance of this agreement is that Cozens should secure to Brant for himself and the Five Nations Indians the sum of £1,200 per annum, cstimating the dollars at 8s. in consideration of their conveying to him a tract of their land of one hundred thousand acres. Cozens to be at liberty to pay the principal £20,000, New-York currency, when he thought proper, or half that quantity of land at a proportionate considera-And it ends with this remarkable proviso, "said J. "Y. Cozons doth further agree to give or cause to be gi-ven unto the aforesaid Capt Brant, exclusive of the aforesaid consideration, five hundred pounds like cur-"rency, if said Capt Brant confirms to said Cozens by "Deed, one hundred thousand acres, and if said Capt. "Brant shall confirm by deed fifty thousand acres, said "Cozens to give or cause to be given to him, said Capt. " Brant two hundred and fifty pounds currency.

"Witness our hands and seals

J. Y. COZENS JOS. BRANT."

When the discovery of this agreement is reported to Mr. Cozens, he sends a supplemental affidavit explaining this memorandum as referring to a transaction distinct from that upon which he founds his present claim. He represents it to have been an agreement to purchase, not the land conveyed by the Deed of 8th October 1796, but the adjoining Tract (Block 3) recited in the Deed to have been recently sold to Wallace and Tiffany. This affidavit tends to any thing but to remove from my mind the difficulties which stand in the way of Mr. Cozen's claim.

I do not understand how Brant on the part of the Indians could negotiate to sell, and Cozens be willing to purchase, for twenty thousand pounds (besides a gratuity to the Agent of £500 one Township or Block of land, and that at the same time or immediately afterwards the adjacent Township of like extent should be sold to Mr. Cozens by the same parties for one thousand—withanother upon a contingency, without any gratuity to the agent whatever.

I counct find that their was ever a time when the last mentioned price would have been deemed a fair consideration for land on the Grand River. Nor can I persuade myself that Governor Simcoe would be desirous of rewarding the services of Mr. Cozens at the expence of the Indians by promoting with his advice and "persuasion" this bargain for "a large and valuable tract of land" which was in Europe to "command a large sum" upon terms so inequitable.

It would seem that Mr. Cozens when he made his supplementary affidavit was conscious that there must appear a considerable discrepancy in this part of his case, for he now represents "this large and valuable tract of land" of which he was to make so advantageous a purchase by the advice and persuasion of Governor Simcoe, as being "considered the peorest of the Indian Tract and but of little value."

Upon a perusal of this affidavit it will further appear that this negociation was entered into, not by the advice and persuasion of Governor Simcoe, but of Brant himself, who upon Mr. Cozens, return from Philadelphia on the 2d September, 1796, a ascertained that deponent had £500 in his trunk and a draft on Mr. Russell the Receiver General for £650, and proposed selling to deponent as Township twelves miles square, supposed to contain

"92,160 acres—that after two days continually occupied in bargaining for said Township with the assistance of Dr. "Kerr, deponent purchased the said township for two "thousand pounds currency."—He then proceeds to explain why £500 only was inserted by Brant in the Deed, as the consideration, instead of £2,000, which he says "ought to have been"—all of which is possible, but it is exceedingly unsatisfactory. At all events adopting the account of the transaction as now given by Mr. Cozens, I cannot discover what countenance Governor Simcoe gave to it, so as to bind his Majesty's present Representative on account of his sanction, to confirm the sale. I can see nothing in it but a bargain between Mr. Brant and Mr. Cozens.

Had it not been for the explanation given by this supplementary affidavit, there would have been no great difficulty in coming to a conclusion, however erroneous that conclusion might in reality have been. Taking the agreement of 14th September, 1796 as that upon which the deed of the 8th October, 1796 was based, I should have been inclined to look upon it as a speculation by which upon payment of £500 to Brant, an instrument was given upon which Mr. Cozens might enter into contracts with purchasers in Europe, as he avows his intention to have been, and thus obtain the means of paying the £1,200 New York currency interest on the £20,000 New York c'y principal. The fact of £500 only appearing on the deed as the consideration, would not, under such circumstances have appeared more singular than it does as explained by Mr. Cozens. It is not necessary to examine what would have been Mr. Cozens' claims to the assistance of the Executive Government upon this agreement, since he repudiates it as having been cancelled by mutual consent, and rests his claim upon a distinct transaction.

Whatever may have been the real terms and conditions of such transaction, taking it as described in the affidavit above quoted, I can look upon it in no other light than a speculative bargain between Brant and Mr. Gozens which Brant had no right to make, and which he certainly never recognized and which not succeeding in Englad was allowed to drop altogether. There is no evidence whatever that the alienation was ever sanctioned by the King's Government then, and unless His Excellency views the case in a very different light there is little probability of its being

confirmed now.

I have the honor to be, Sir, Your most obd't,

(No. 49.)

Solicitor General's Office, Toronto, 22nd June, 1835.

In the matter of the claim of Joshua Y. Cozens. I concur in the opinion expressed by the Attorney General in his report to His Excellency the Lieutenant Governor, of the 19th instant, that Mr. Cozens has not established his right to the indemnity he claims.

It may be questionable whether in Equity he ought not to be reimbursed any money he may have actually paid to the late Capt. Brant, by the heirs of that Chief—but it does not appear to me that His Majesty's Government can be called on to interfere in the matter.

[This in answer to my demand for my original papers by which my claim was brought forward]

(No. 54.)

Toronto, 26th August, 1835.

Col. ROWAN,

Private Secretary, &c. &c. &c.

I beg leave again to present to His Exchllency the Lieutenant Governor's notice the subject of my petition and my father's memorial for the Grand River Lands. I availed myself of His Excellency's permission to examine those documents in the office of Executive Council which relate to the Six Nations affairs, and made copious extracts therefrom; in those documents there appears nothing to operate against the many facts of the case as delineated in my father's statements.

I have maturely considered the report drawn up by the Attorney General, in his official capacity, and adopted by the Executive Council; I have duly weighed the objections which are therein arrayed against the claim, and I conceive them to be such as upon reconsideration will not appear insurmountable. There is a possibility it will be admitted, that had the question been dealt with, free from any colouring which was certainly aimed at being thrown upon it by the counter claim for a portion of those lands by W. J. Kerr, Esq. who must be considered an interested party, it would not have been treated in the terms used in the report.

hope that they were convinced of the truth of my father's statements; but that they deemed it necessary that redress should be sought for from Brant's heirs. But from what would seem to be the operation of our laws, I should be sorry to imagine that ought was in-tended by the Honorable the Executive Council that could possibly be construed into evasion.

I perceive no mode of procedure now, but that of throwing myself upon the combined generosity and justice of the government.

I see no remedy, nor the possibility of prosecuting the matter, even by any amicable suit against any party concerned.

But the government, His Majesty's government are intermediately in the possession of the disputed lands, and it is upon them, upon His Excellency the Lieutenant Governor, that I again humbly call for aid, in this a matter of such peculiar hardships.

I respectfully solicit His Excellency's reverting to the Report of the Trustees, to my father's Memorial supported by his own and others' affidavits, and to the

final report of the Attorney General.

In the latter it will be seen that the only important obstacle presented by the Trustees, viz: the particular degree of evidence for the existence of Brant's deed to Cozens, quoted in Brant's receipt, is entirely removed by the inevitable admission of the Attorney General that the deed did exist, having as he properly observes no doubt of it. The Trustees had laid down a rule of evidence as their guide, to which they consider themselves bound invariably to adhere. But for that rule it must be supposed they would at once freely have admitted the conclusive proofs which are allowed by the Attorney General, as to their being a deed from Brant.

That objection, then, the only one insisted upon by the Trustees, being done away with, there remain only two others adhered to by the Attorney General. I say, only two, because the right of Brant to sell is not only acknowledged by the Ezecutive Council, in their issuing Patents free of reservations, and admitting that it devolved upon Brant alone while acting as Agent, to name the purchasers; but has been repeatedly set forth to a certainty by the published advertisements of the Trustees. One of those other objections is as to the consideration—its amount and value. In answer thereto I have first to notice that the Attorney General has made a comparison of Cozens' £1000 paid down in specie, with the promise of another £1000 upon contingency, to Brant, for the lands in question, with the price of Wallace's tract, viz:— No. 3, which was the very highest priced tract that had been sold; and passing over larger tracts, 1 and 2 which brought only half the sum of No. 3, yet selects the last as a criterion of value, although Cozons asseverates to the fact of that being the one he and Brant formed the written memorandum agreement upon, viz: for 100,000 acres. Upon it there was a Mine of Iron Ore. But the adjoining tract, of which Block No. 4 (Nichol) is the first one-third was looked upon as the poorest, upon the whole, save that portion, one-third, vouched for hy Brant to be good land. For Cozens' tract ultimately deeded to him, £2000 would be nearly 6d. an acrc. Now the Records of sales in the Executive Council. Office of lands in not only that day, by several years subsequent thereto, will shew that that price was a very common one. It was the rate at which good lands, much nearer to markets than No. 4 could be bought.—It was remarked to Wm. Hep-The decision of the Executive Council led me to burn, Esq. Trustee, and repeated to the Attorney

General that Cozens asserted that all Yonge Street tions of our limited means of sustaining further exermight have been purchased in his day, for 1s. Halifax Currency, per acre, to which both declined assenting. Now it is a matter of easy proof that several of Cozens' relatives sold nearly 4,000 acres in Vaughan, upon Yonge Street, several years after his purchase, some at 5d. some at 6d. and at 72d. the acre. years ulterior thereto, as is universally known, U. E. and other rights, with the privilege of choosing were disposed of in scores for \$5 the 200 acres.

Indeed Mr. Strange in 1828 writes to Mr. Galt (as is published) that lands in the Gore District had to his knowledge been bought for Is. per acre; and gives an instance of a Deputy Surveyor selling a 200 acre

lot for a barrel of Pork.

But returning to sales of large tracts .- In 1806 or thereabout, a very considerable period after Cozens' purchase, were sold by government, the townships of Nonwich and Dereham, both most eligibly situated, and nearer the mouth of the Grand River and to Lake Erie by perhaps 100 miles. They are each 12 thiles by 9 and yet they together brought only £3062 5 0. It is upon record. The proceeds were applied to cut The proceeds were applied to cut out the main road hence to the Bay of Quinte. alone is sufficient to give an estimate of Cozens' pur-

There remains but the concluding objection to be disposed of the Memorandum Agreement, discovered as is said and produced and characterized by Mr. Kerr. This memorandum is so viewed by the Attorney General and so made use of, as to occasion pain to the feelings of any one entertaining a strict sense of honor and honesty. It is hard, Sir, it is very hard, that my father's affidavit in this case should be discarded. Even allowing him to feel an interest in an event, and in this matter, his right to which he invested in me, as well for value received, as for natural affection, can it be imagined that any consideration short of that which can be classed with life would operate to bias or to prejudice his solemn declaration before high Heaven? and opposed to that declaration under oath, what has appeared to tend to a contrary conviction? Is it the Power of Attorney from the Chiefs to Brant, designated as a deed of Gift; dated in 1804 and unknown to the light for 31 years? I should hope that whatever has impressed the Attorney General with an idea of his having properly treated that memorandum, may be put forth in some more tangible shape than surmise or opinion, in opposition to an asseveration of a man who can fully appreciate the sanctity of an affidavit.

I would beg, Sir, that I might call His Excellency's attention to this last-this perhaps only objection of the Attorney General, and to the consideration as well of my father's statements, as of any thing, be it what it may, from which a construction of the memorandum, such as the Attorney General has put upon it, can possibly be derived.

Beset on all sides by the early difficulties of the case and the late objections heaped upon the claim, I feel myself incompetent to convey to His Excellency, without the use of terms which if dictated in the warmth of feeling might engender pain, the precise situation and difficulty in which the claim now stands.

Of my father's purchase, payments and deed, what doubt does there remain? to the internal evidences of facts stated, independent of outward proofs, what reasonable objections can yet exist? to an equitable claim tions what can be required to be known beyond our repeated assertions?

What then Sir, must we suffer not vally delays but losses in contending? and contending with whom?

With the powerful! the government itself!
Forbid it Heaven! that Cozens, the father, should be denied the aid and mediation in his old days, of that government which it was the pride and boast of his youth to abide by and defend, and I the son, pray that the day may be late in which I can have to think or to speak of that government with enmity or dis-

I have the honor to be,

Respectfully, Your ob't Servent, NELSON COZENS.

Copy, N. C.

Toronto, 27th August, 1835.

Col. Rowan, Private Secretary, &c. &c. &c.

Were I impressed otherwise than with the justice and extreme hardships of the case of my claim, or were I sensible that it could be divested of that equitable ground upon which I studied to introduce it to the notice of His Excellency the Lieutenant Governor. I should have been far from continuing to urge a scrutiny of its merits; I should have been far from devoting to it my entire time and the whole sum of my means, even to the extent as I assure you has been the case, of the loss of the occupation in which I was engaged. Fourteen months have gone by since the preliminaries of the claim were arranged and presented, and fully have my feelings and anxieties in the matter been put to the test.

But, Sir, while my hopes endure in the honor and magnanimity of a government I yet look up to with a degree of filial reverence, I cannot relinquish my

claim to it's protection.

I must therefore ask your bearing with me yet further Sir, while I respectfully ask leave to submit through your hands to His Excellency the Lieutenant Governor the accompanying strictures upon the report of the Attorney General.

I humbly offer the review of that report, Sir, with the most entire confidence in its minutest correctness, and I pray His Excellency may be induced to give it an attentive perusal and his serious consideration

It is a matter upon the final disposition of which rests very much of the worldly comforts and future prospects of a large family of us, who are sprung from those who long did honor and service to that Crownto which we continue to pay reverence and owe allegiance.

It is not an ordinary litigation between individuals of recent occurrence and limited amount, but an old transaction founded in justice, suffered to linger under long and accumulating adversities attending my father's career in life; and a subject apon which the full force of moral obligations in the liberal dectrine of centracts, should be permitted to exercise its in-

It could not I hope have been desired by the Atfor equivalent what can be justly adduced in opposition means of any redress; and yet upon an extended torney General's Report that we should be precluded

view of its bearings, its adoption will necessarily tend to that effect.

Let me crave His Excellency's reflection upon my comments and upon the tendency to which the report,

as it now stands, must lead.

I continue to hope that His Excellency may see grounds for recommitting the case. There is much it will be admitted to be said in favor of the claim-there is much already by admission established in support of it-there is no one fact adduced to invalidate the statements made, nor any truth to overthrow them.

Must not my confidence, Sir, then remain unimpaired, in its justice? It does Sir.

I have no other wish-I never conceived the idea of a demand-I have no other wish than to meet with fair and honorable, with equitable dealing, on the part of the government, and some reasonable equivalent, how can it, how will it withhold from us? The possession of the lands is theirs, the power to yield or retain is theirs. On our part there may be what amounts to weakness, to be sure, yet Sir there is justice, say that the degree be deemed inconsiderable-there is the money paid, and its value swelled by a long time-there are the circumstances under which it was paid. Let these Sir, I pray you, be kept in view in thinking upon the question.

The outlines of the work were at first perhaps not deeply, but they were faithfully sketched-and did the picture of our case enjoy but the benefits of its natural lights and shades, the lineaments of its unalterable truth would prominently appear. As it is, I beg His Excellency to look upon it as the work not of

strangers in the land.

Humbly beg His Excellency to consider that such terms as one man of probity & a sense of honor wo'd feel impelled to extend to another, ought not in the exarcise or indulgence of that honor to be denied to the prayers of those who now feelingly supplicate him through

> Your respectful and ob't Servant. NELSON COZENS.

Copy N. C.

On the Attorney General's Report upon Cozens' clain

The evidence in support of the claim consisted of papers Nos. 1 to 50 inclusive, the most material of which were those in support of the absent originals,

Power of Attorney-from the Six Nations to Captain Brant to sell to Cozens, and convey lands in fee simple and receive money, 17th May, 1796.

Warrantee Deed—from Brant (for self and as A-

gent) to Cozens for a tract bounded upon Block No. 3, and containing 92,000 acres-October 1796-the consideration money £500, witnessed by Angus M'Donell (Collackey) the Lawyer, who wrote the deed, having Governor Haldiman's Grant before him; and Dr. Robert Kerr, one of the Judges of the Home District, the consideration money as endorsed thereon.

Receipt (original) by Brant from Cozens for £500 in June, 1797, being £1000 in full until the Government Patent issued—this receipt recites the deed, number of acres, and binds to furnish Cozens the Government Patent whenever he paid up the second £1000 as specified in Cozens' affidavit and Langon's

bond.

Certificates by Jarvis, Provincial Secretary, with seal of office affixed, that the sale of four townships. specifying that to Cozens in particular had been made by Brant under the sanction and approval of the Go-

(See Cozens' letters of 1798, Jan'y, &c.) dated last of 1797? 1st of 1798?

Of the disposition of those originals and their probable loss (excepting the original receipt as above exhibited) proofs are adduced in the letters and memorandums of Samuel Clark (Cozens' agent to London) in letters from Barrell and Servante with whom they were deposited; -in the statements and affidavits of Cozens, Henshaw and others, all more or less particularlizing the incidents and circumstances attending them and their ultimate deposit in London. and deed to Cozons was well known to the Trustees and all connected with the Government at that day, and Col. Claus repeated it by letter to the Executive Council, saying that No. 4, &c. had been sold to Cozens-this letter was in 1803 and is among the Indian papers in Executive Council. Alexander Stewart, Esq. another Trustee, also knew of the sale, and hesitated when called upon by Col. Claus to participate us Trustce in the execution of a deed of sale from the Government of that part of Cozens' purchase designated as Block No. 4, now in the township

of Nichol, as late as October 1806.

It was, indeed, matter of notoriety among all the officers of the Executive Government, that Cozen's purchase began with Block No. 4, and ran six miles in depth on each side of the Grand River, and when in February, 1798, Brant for the Six Nations formally surrendered the lands then sold by him, that the Government might issue Patents. No. 4 was also specifically denoted as being sold-it so appears on the schedule accompanying the surrender on that day, and Brant declared it to be sold, and though he handed in no name as purchaser, nor the amount of the sale, yet he continued to protest against the Trustees taking upon themselves, as late as 1806, to dispose of what it devolved solely upon him, as agent, to nominate the nurchaser for. When in October of that year Col. Claus urges, in apparent haste, that Mr. Stewart should assist in effecting and concluding the sale to Thomas Clark, and importunes him to complete it by execution of the conveyance, the latter remonstrates, terming it a rash step and one not free from inter-estedness and marked with circumstancs of a delicate nature—as appears in Col. Claus's copies of communications between them. Up to 1803, Brant having withheld the name and amount of purchase of No. ? from the Government and Thomas Clark and Augustus Jones being in treaty with the Trustees and the Government for purchasing Grand River lands, Col. Claus writes to John Small, Esquire, clerk of the Executive Council, that it appeared Block No. 4 "bad been originally sold to Joshua Y. Cozens—afterwards to Wilson and subsequently to a Mr. Beale, neither of whom had complied with the conditions of sale." It does not before whom Brant made formal acknowledgement of appear that Wilson and the others, were even purchasers separate from his partner Richard Beasley concerned in Block No. 2,—Brant, up to 1806 recognized to the Government no purchaser for No. 4, but continued asserting its being sold, and that he would nominate to the Government the purchaser when called upon for the Governmet Patent. Cozens' deed, &cc. being in England, and not supposed or feared to be at all lost or mislaid till after 1805, when his applications home

ended in disappointment, it could not be produced as the leases for Blocks Nos. 1, 2, 3 were, for the purpose of exchanging for a Government Patent; nor indeed did it appear necessary at that moment, for the sale was advised and approved of by Governor Simcoeit was certified by the Secretary of the Province-the deed from Brant was fully and formally executed with its peculiar solemnities before Dr. Robert Kerr, and an acknowledgment thereof signed by Captain Brant before him as one of the Judges of the Home District, in 1796, and it was not more than eight or nine months afterwards that Brant was paid the second £500, for which he gave his separate Receipt, the original whereof has been and now again is exhibited, stating that sum together with the amount named in the deed as the consideration-money, viz: £500, in all £1,000 in cash, to be in full—in full until he should, as he bound himself and heirs, and as Agent furnish to Cozens, when called upon so to do, the Government acquitance, shewing that they had no claims upon the land; on which Cozens was further to pay £1,000, as stated in his affidavit and borne out by the conditions of Captain Langon's bond.

In the Report by the Trustees, upon a reference to them by the Executive Council, upon Cozens' claim, it is distinctly set forth that they felt themselves bound to adhere in all cases to a rule they had laid down, not to admit any claim which was unsupported by the original conveyance from Brant, whose acts are invariably acknowledged by the Trustees as binding, lawful and valid on the part of the Six Nations, or else substantiated by a copy thereof from the Register .-Brant's receipt, together with other papers produced, wherein all the main points of the Deed are quoted, or referred to, save only the boundaries of the land, seemed clearly to tend to the full proof of the existence of the Deed; yet the Trustees, however thorough might, and indeed must have been their conviction, continued unwilling to deviate from their prescribed rule of evidence, and under that mode of thinking and acting they Report and return the claim to the Honorable the Executive Council, for their equitable treatment of the case, and that under that view they might conclude upon the fact which the Trustees were only loth to admit, lest it should form a precedent and thus lead to a deviation from the rule they had estab-There is not a doubt that had the original deed from Brant to Cozens been produced, or according to the required proofs, its certified copy from the Register, the great, the only objection indeed insisted upon by the Trustees to the admission of the claim would, as it must necessarily have been, totally remo-

Now the only fact requiring full and positive proof by the rule of the Trustees, which they seem bound to observe, is by the admission of the Attorney General most perfectly established. He at the very outset of the Report, which he draws up upon an investigation of the documents permaining to the claim, freely admi.s the existence at one time of the deed from Brant to Cozens, the warranty deed, a plain copy whereof was before him. He says that "he has no doubt such an instrument did exist" and having no doubt thereof, he unequivocally accords to Cozens the full benefit to be derived from such an instrument, and all the advantages he could obtain from it were the original deed present. This admission by the Attorney General made no doubt with reluctance and only after the strictest examination and weighing of fect the negociation between them.

the various documents produced in evidence of the Deed with its accompanying Power of Attorney from the Six Nations to Brant to sell to Cozens and convey in fee simple, wholly removes the only objection which the Trustees had brought forward as a bar to their allowing the claim. The Trustees knowing that no question could ever fairly arise as to Brunt's power and agency, required in all cases such and such proofs of his act and deed, and entertained those claims, and those only, that came supported by the articular description of proofs; thus what they deemed deficient in point of form, not substance, in Cozen's claim, the Attorney General fully and freely admits, "not having a doubt of it."

After having removed from the minds of the trustees the only difficulty which they dwelt upon as insurmountable by the operation of the rule of evidence which they had laid down to abide by in all cases, to the exclusion thereby of all cases and claims unsupported as thus required; the Attorney General revives a subject which the Trustees, as well as the Executive Council, had so long set at rest, and had mutually with the Six Nations, agreed over to regard in future in but one point of view, viz :- the right of Brant to con-Hereupon is built the opening, the great leading objection which the Attorney General assumes as conclusive in law against Cozens' claim, and this too in defiance of the expressed opinions and conclusions of the Executive Council—the repeated public notices published by the Trustees in accordance with the opinions of the Council, likewise their several official advertisements in the government and other newspapers to the contrary notwithstanding.

A reference to those public advertisements will demonstrate the strikingly opposite views taken of Braul's conveyances to the Trustees, assenting to and upholding on the one hand Brant's Acts where proven, and the Attorney General on the other in his report pertinaciously controverting and opposing that right.

The bearings upon Brant's transactions, he constantly personating the Six Nations, as their head Chief and accredited Agent, in all things appertaining to them to do for them, and under the sanction of the government, are Sir Frederick Haldimand's written assurance that the promises of Sir Guy Carlton (then his predecessor, and afterwards his successor) made to the Six Nations upon their services and losses of territory, should be to the utmost realized, so soon as the troubles consequent upon the war were fairly over. This was in 1779-in 1784 he carried into effect those purposes towards them by a free, and as the Six Nations on their part ever considered and to this day declare to have been their uniform and continued understanding thereof an unconditional grant to them of the Grand River Tract-They accepted the grant, thus understanding it, declaring at that time and afterwards, that short of Four Millions acres of arable land, would not compensate for the losses they had sustained in the heretofore happy valley of the Mohawk.

They spoke not of the sufferings they had endured and hardships encountered in services under their leader Brant, but reposing their faith in promises, and relying upon the expressions so addressed to them, they with one voice exclaimed that they confided fully in their Futher the King, whose word they added lusts for ever, and in the mediation or instrumentality of his servant Gavernor Haldimand, who was to ef-

They took possession of the tract under the impression which to this day is fresh upon them—that it was theirs to do with it as best comported with their wishes, wants and circumstances. Difficulties however growing out of misconceptions and perhaps mismanagement of their concerns, arose to require Brant's journey to England, where us far as he land those whom he represented were concerned, the King in Council removed the troubles that were engendered here between the Executive Council and Brunt; and his powers as Agent, and his acts as such and as head Chief were fully recognized before Governor Simcoe's departure, and in 1798 were set at rest for ever-

Lord Dorchester the Governor in Chief, had previously ordered the Indian Department, upon the Six Nations having commenced exercising their declared and admitted right to sell their lands, to sound them upon the subject of selling the whole tract to the government and to report and consult with Governor Simcoe upon the terms and so forth. In May 1796 when an extensive sale was made by Brant, of No. 3. to Wallace and Tiffany, Brant made public declaration that upon his offering to sell all the land to Governor Simcoe, that distinguished man declined purchasing for the cogent reason that the government could not themselves dispose of their own lands; and that therefore Brant was at full liberty so far as he or the government were concerned, to sell to the highest bidder, and effect the most advantageous disposition of the lands that it was in his power to do. He therefore did sell publicly and privately, and those sales were subsequently with those previously made, fully ratified by the government who to those who could and did come forward, surrendering their leases (for be it remembered that Cozens alone, at the date he purchased, purchased by Warranty Deed) the Patents of the Crown issued, free of any reservation or deduction-Cozens had proposals from Brant, and consulting with Governor Simcoe upon those overtures, received that gentleman's unreserved approval of his so investing his money, and indeed it became matter of advice and persuasion to Cozens to purchase.

Upon the latter's return from Philadelphia, where he settled up all his business and sold his property, he l again with Brant entered into treaty on the subject, and after fully discussing its merits, and agreeing upon terms, he in presence of Dr. Kerr, Brant's intimate friend, and Angus McDonell, Esq. (Collacky) a lawyer of eminence, paid Brant £500 in specie, and Brant delivered his Warrantce deed for the tract twelve miles square, bordering and bounded upon the tract they had previously bargained for-that is previously negotiated for as expressed in their memorandum agreement in July before Cozens' journey to Philadelphia, That tract sold to Wallace and Tiffany, as noted in deed to Cozens, had been leased to them, but the terms of payments had not been complied with when Cozens and Brant formed the memorandum agreement for 100,000 acres to include that, and at the like nominal price. When Cozens returned, the failures of Tiffany to pay with Wallace his portion, led Brant to extend forbearance to Wallace, by repeated prayer so to do, and consequently he bargained anew with Cozens for the adjoining tract.

When Cozens had foregone the agreement for 100,-000 acres to comprise that sought for by Wallace and Tiffany, and received his deed for the next tract, Tiffany still failing to comply with his part of the

and Brant's memorandum had expired, and upon Wallace having alone re-engaged with Brant their bargain ended in a new sale, and instead of a long lease to Wallace and Tiffany, Brant gave a deed to William Wallace alone, in January 1797; -But as already mentioned, the lease being to Wallace and Tiffany, their names are in October 1796 coupled together and quoted by the deed to Cozens, which would otherwise have by no means possible been the case. panying Brunt's deed to Cozens was a full and formal Power of Attorney from the Six Nations signed by their Chiefs authorizing Brant as their Agent to sell lands to Cazens and to receive money—that Power is with the Deed.

The Attorney General's objections resolve them-lves into three. The first having been reviewed selves into three. and its diametrical opposition to the opinion conveyed in legal terms by the Trustees as to their understand. ing of the subject, it may be required to notice the in. cidental remark of the Attorney General growing out of his denial of Brant's power to convey. It is that Cozens should allow so many years to elapse without attempts to substantiate his claim. Setting aside the cruelty of this remark of which that man's feelings can hardly be divested who goes through a full perusal of all the attendant documents explanatory of the difficulties with which Cozens contended; it will be sufficient to observe, that to render the Attorney General's objections at all available, it must be argued that Cozens had always the second £1000 at his command that he was aware before 1805 when his first fears took ground, that the deed, absent, was to all purposes irrecoverably lost,—that no misfortunes or disappointments ever occurred to him, nor succeeded upon the failure of his Agent—that he had wherewithal to travel abroad in search of his papers—that there was no fear of any jealousy ever springing up in the breasts of Trustees or others interested of early advantageous purchasers from Brant; -indeed to be brief, it would needs be assumed in concurrence with the Attorney General that prosperity in all shapes accompanied Cozens, and that what under Providence occurred to mar his prospects, were purely the consequences of wilful negligence or indifference.

But if faith be to be reposed in the asseverations of men of various conditions in life, and as various in all other respects as total disinterestedness can render them, then is the very reverse of the Attorney General's inferences most clearly and conclusively

The Attorney General declines viewing the case as one of an equitable nature. He does not consider that Cozens having made over his right and title th the purchase in question to his son Nelson, for value received as well as for that equally strong consideration natural affection, can claim that weight to be given to his affidavits that would be due to those deposed by one wholly uninterested. Waving what may be known by the Attorney General professionally, to be really legally objectionable, let the case of Cozens be otherwise looked upon, i. e. his affidavits. He is now upwards of 70 years of age. He has been an active man, and with the ills and privations attending a long and eventful life, the vicissitudes he has encountered have combined to impose upon him a hard service. His constancy and zeal during youth and the concluding years of the old war—his activity in aiding his father and those who fought with him in agreement, it died of course, in the manner Cozens that perilous time-his early sufferings from spolia-

tions made upon his father's estates, this day unpaid, General points out this sum, the very highest ever unrecompensed, his having been chosen to succeed given up to the period of purchase, and compares it his uncle (a captain worn out in the regular service) ters and Canada—the unbounded and well reposed confidence placed in him by General Simcoe and other Governors-his loyalty to one cause, and continued strenuous defence thereof with that of his country during our last war-his exertions and ever prominent personal alacrity throughout that periodnot to repeat his consequent misfortunes and numerous disappointments—with the loss of the free use of known or described, were feared to be as bad as Caphis right arm--and these without a murmur against tain Brant had tacitly allowed, and was in reality what the government he has lived but to protect and defend .- All these trials let it be ventured to be said sold. do not warrant the probability, it might be said the possibility, that any consideration of less consequence than life, if life itself could be staked, would operate with Cozens to sway his word much less his declaration under oath, of events and incidents, circumstantially and substantially us they were, and existing facts as they are.

Bearing upon those facts also, whether closely or remotely, are the affidavits of all living witnesses whose memories serve them to add their testimony in relation to the business in discussion. Opposed to those affidavits what are there? Vague conjectures in the shape of doubts - mere imaginings indulged in querulously and ingeniously-without one single circumstance whereon to build a positive assertion, or even one proof to which aught but an unsound opinion could cling to-and so far short of probability or reason are such remarks, that the opinion they would studiously convey must be discarded as untenable. Such are the contents of the report of the Attorney General, and all in the very face of ample details in the Memorial, succinct and explicit statements under outh, and a combination of peculiar circumstances derived from memorandums, letters, &c. of various dates & origin, composing such auxiliary supports to the claim advanced, as scarcely any thing the production of the originals themselves not excepted, could superadd

The second main objection insisted upon by the Attorney General is that £1000 paid in cash, with another as a contingency, making in all £2000 was never a fair consideration for 90,000 acres of land. He says he cannot find that that sum was ever considered a fair price for lands on the Grand River. He adduces the sum paid, or agreed to be, for Block No. 3, £16,364. Cozens' affidavits, seninst the facts of which nothing can be brought forward of a contrary nature, distinctly declares, that he bargained with Brant in the first instance, by memorandum agreement, before returning to Philadelphia, for about 100,000 acres, to include Block No. 3, originally agreed for by Wallace and Tiffany, but in the interim forfeited by the noncompliance of Tillany, together with so much more than No. 8 as woold include a Mine of Iron Ore, and make up 100,000 acres, at the rate of £20,000 New York currency.

given up to the period of purchase, and compares it with Cozens' purchase. If the Atterney General had to bear despatches of a secret and most confidential receded a step or two, and recurred to Block No I. nature, for several years, between the British minis- situated in a more eligible position as regards made, navigation, and the conveniences of roads and markets, 48 miles nearer the mouth of the River and to Lake Erie, he would have discovered that that Block would present in its price more to wonder at than did Cozens! purchase. But he seems designedly to have selected the highest sum for a comparison with that given for what, as far as the uppermost 2-3rds on the River were was loouked upon as the least valeable of the tracis

> Now Block No. 1 containing 94,300, thus admirably situated as compared with No. 4, &c. with also clearings and settlers upon it, sold for £8,840. No. 2 of 94,000 sold for £8,800; these sums are separately but half that of No. 3; they are each for far greater quantities of Land, and yet witness the disparities between them. How is this to be accounted for ?-And yet it must be, as it certainly ought, fairly accounted for before wonder be excited that Cozens bought 90,000 acres more than 48 miles higher up the stream in the wilderness, with not an acre known to be cleared, with but 1-3rd of the tract vouched for by Brant to be really good land (the other 2-3rds having been traversed only by the Hunters) for £1000 in cash and another £1000 upon contingency.

Cozens states that the £1000 additional was to be paid to Brant whenever he should come forward and demand of him an acquittance from Government that they had no claim upon the Tract :- And Brant acknowledges in his receipt of the second £500 that the £1000 then so paid was in full until he did furnish the same, and which he in conclusion binds himself and heirs and as agent aforesaid to do. It will be seen that this sum, £2000, was to the full extent of the value of that land at that period. Were it otherwise it is very far from being probable that Brant after exe cuting the deed to Cozens, and receiving the first £500 would wait from October 1796 till June 1797 for the second £500, and then, after an interval of 9 months sign a receipt in full until, &c. when by the production of the memorandum agreement, which had not been as he promised sent down to Dr. Kerr for destruction in Cozens' presence, if realy as the Attorney General would anxiously have it, it were the ground work of Cezens' final purchase, he could scarcely fail overthrowing the entire bargain. But such an extravagant idea had no foundation. Such was not the case between Brant & Facts upon record, to possess A knowledge of which any person placed in the Attorney General's situation, and too slightly acquainted, if acquainted at all by a few years residence with the early history of Upper Canada, and its landed interests and transactiens, may succeed by merely turning to the annual transfers of land from one hand to another. As the most authentic source however, the Executive Council But on Cozens' return from Philadelphia, as is shewn more explicitly in the sequel liereto, Wallace had managed to make good his conditions with Brant as to the first payment, and thus retained what is described strictly as No. 3. The consideration was £15,354; payable by instalments or rather yearly interest. There were 85,300 acres. The Attorney

of the Province running beside or through them, sold for (£3062 5 0.) Three thousand and sixty-two pounds five shillings for both townships together, and this in 1806 or later, or full 10 years after Cozens for his purchase had paid down £1000 in cash, for only the 1-3rd part of which, being good, Brant would pledge his veracity. This is perhaps the most clear and palpable instance of disparity of price, quality & situation between the purchasers named that could be submitted in refutation of the Attorney General's arguments or rather his inferences. This is speaking however only of quantities of land of great magnitude. These sales of Norwich and Dercham, be it remembered were made to the best bidders, and the minutes of the sales are recorded in the Chambers of the Executive Council.

When it was observed to Wm. Hepburn, Esq., Trustee, that Cozens declared that in his early day he saw that all Yonge Street might have been bought at the rate of 1s. Halifax per acre that gentleman, the trustee whose opinions upon Cozens' claim were to be respected, and whose only serious doubts of the bona fide agreement with Brant were as to the amount of the consideration, expressed these words, "I doubt it." To give no character to this afterance, and to charge it, with allowances, to Mr. Hepburn's short residence in this country, his limited acquaintance with early and it may be added with even very late land sales, to his unchanged English notions and conceptions of the value of 90,000 acres of land, the' in the wilderness, and purchased no less than 40 years ago, what can be urged for the Attorney General who had before him or at his command and beck all the means of acquiring the truth in a matter upon which his opinion was to have a powerful, and as it most unfortunately seems to have had a decisive effect? He has in his report laid full stress upon the considera-tion money. But he was not ignorant that the sum would be persisted in by Cozens as being at the day of its payment a most valuable consideration. It was remarked to the Attorney General also that all the lands on Yonge Street could have been purchased at 1s. per acre, as observed to Mr. Hepburn, taking good and bad, far and near. At this he evinced a feeling of unbelief-tho' it was repeated to him that several of Cozens' friends, and one of his own name did actually sell near 4000 acres upon Yonge Street, viz: in Vaughan, several years afterwards for some 5d. some 6d. and some 71 the acre—the standard rates at those days for those good lands, and only 9 or 12 miles distant from York the capital of the Province.— To descend to a later period-down to 1828. At that day Mr. Strange, a land agent, making a report to John Galt, Esq. for the information of the Canada Land Company, says he had known 200 acres in the Gore District, (and not far from Cozens' tract) to have been purchased from a Surveyor for a barrel of pork, and not long before the time at which he was writing, that rights had freequently been bought, with the choice of selecting situations for location for \$5 the 200 acre lot-that in that same year 1928 he could purchase lands in the Gore District for 1s. per acre. These are cases in point, not to speak of the sales to the Land Company, nor of those also in other and more Eastern portions of the Province throughout which the same ratio for wild lands prevailed.

But how were those lands situated, and what was their real as well as comparitive value? Blocks 1 and 2 sold nominally for 3s. New York currency, but 'twas by long leases. In 1792 and up to 1798 it is well known that 3s. New York currency or 1s. 10dd. Halifax was the maximum, as 6d. Halifax was not I will say the minimum, but the average price of lands choicely situated—as witness the sale of No. 4 one-third of Cozens' purchase by the Government and Trustees in 1806 to Thomas Clark for 4s. New York currency per acre, 10 years after Cozen's purchaseand sold to Thomas Clark too, who was a, perhaps the monied man, of the day, on a lease of 1,000

But upon this head it will not be desired further to remark, the universal experience and knowledge of every old inhabitant of the Province, tending to the support of the foregoing statements and triumphantly overturning the influences and suppositions of the Attorney General.

It is proper to remind of the fact, that at the period of Cozens' purchase specie was so enhanced in value, and all other mediums of exchange so greatly depreciated by the effects of a recent war, that merchandise, bought for cash in Lower Canada or New York, would produce a clear profit upon the Frontier of betweeh 300 and 500 per cent. sometimes 600 per cent. What then at that accumulating rate would Cozens' £1000 consideration money paid down in cash, have amounted to at this day, under the ordinary prospects and profits of prudent mercantile operations? and in conjunction therewith what has been the comparative value of lands and their fluctuations in price during that long interval? Much more might fluently be said upon these points, but enough has been said to establish the desired truth of the matter.

We now arrive at the third and in the Attorney General's exclusive mode of treating it, equally important objection. The memorandum agreement, a ready alluded to at large, which Cozens upon Governor Since's opinion and persuasions entered into with Captain Brant for a Tract to embrace Block 3 bargained for with Wallace & Tiffany, previously to Cozens going to settle his affairs in Philadelphia and returning with his money—is discovered, as it is said in April, 1835, and brought forward by W. J. Kerr, Esq., with permission to appear with it in Council when Cozens' claim is taken up, for the purpose, if for any purpose at all, of defeating the claim.--And how is this to be achieved? It is to be performed by the Trustees the only Agents the Government treats with upon the Indian affairs? Or what is the purport of this memorandum agreement? It is, as it reads, agreed between Cozens and Brant that 100,000 acres of undescribed lands shall be saleable by the one to the other at the nominal rate of £20,-000 New York currency, the maximum price of the choice of any lands upon the Grand River, not upward from No. 3 but downward, including No. 3 to the It is said, of course it must be said to form even the very slightest objection at all, or to serve any purpose whatever of its being produced that it was the bargain for the identical land, viz: -92,000 acres afterwards deeded by Brant to Cozens. This bold assertion is made in opposition to a full, distinct and apparently to the unprejudiced, a most satisfactory ex-It was totally unnecessary for the Attorney General plication made by Cozens under oath, and previously to speak exultingly of the sales of lands on the Grand River being made in some cases at 83 per acre. It is the paper. Cozens states that No. 3 was sold to Walallowed that in some few cases such was the fact.— lace and Tiffany. Such was the case in May 1796,

which upon the execution of the deed, subsequently died of course, Wallace and Tiffany had not as Brant averred complied with the requisitions of their bargain. In July 1796, when the memorandum was written, Brant proposed to sell 100,000 acres to Cozens which was to comprise all of No. 3, not so called at that day, and to embrace a Mine of Iron Ore-inwhich case no objections from the prevailing prospects of such a possession could arise to the maximum price of that tract. Cozens then proceeded to Philadelphia and brought in his money-£500 in specie, and Drafts on the Public chest of the Province, drawn by the British Minister. Brant now observed that he had received money in the interim for No. 3, upon the original promise between him and Wallace and Tiffanythat Wallace had in the mean time paid, though Tiffany had not, on the contrary he had gone away:therefore Brant contracted anew with Cozens, and in the presence and with the intermediation of his friend Dr. Kerr, sold Cozens the adjoining tract for the amount specified, viz:-£2000 Halifax currency.-The memorandum agreement having then of course expired, was to have been destroyed by Brant, but being as he said in his desk at home at the Mohawk Village, 80 miles distant, should be sent down to Dr. Kerr and be destroyed in Cozens' presence. Cozens was not a Lawyer, Brant and Dr. Kerr were looked upon as being men of honor.

The deed to Cozens states explicitly the bounds of his purchase to be upon those of No. 3, naming Wallace and Tiffany as the purchasers of that tract, or rather Cozens' Tract is said to be bounded upon and commencing after that sold Wm. Wallace and J. These names being given, the Attorney General following the view taken of the memorandum agreement, and the purpose for which alone it could have been brought forward, viz:-to attempt to designate that and the subsequent sale and deed to have been for the same land, quotes the circumstance of Cozens' Deed mentioning Wallace and Tiffany's Tract. Now the deed to Cozens does indeed mention those two names, and conjointly—it is totally impossible to separate them in the deed, and this will exhibit one of the many fallacies of the opposite reasoning.-There is not an other reference of consequence made by the Attorney General to those names, nor to any dates not mentioned casually. He takes for granted that the memorandum agreement was the one out of which grew the deed to Cozens, and for the same

Now there is day and date for every transaction bearing upon Block No. 3 in relation to its sale. In September 1796 when Cozens returned, Wallace and Tiffany's Tract, included as agreed in the 100,000 acres was withheld from Cozens by reason of further terms between them and Brant, and a payment made in the interim to Brant by Wallace. Therefore he sells to Cozens the adjoining Tract, and the doed quotes Wallace and Tiffany. But when a subsequent payment became due what was the consequence? A recurrence between them and Brant of the former difficulty such as intervened and held when the memorandum agreement was written and when No. 3, their Tract was to be sold to Cozens, because of forfeiture, and the failure on their part to pay up the sum stipulated for. The difficulty arose out of Tiffany's delinquency, and were it not for the great ex-

at the time he and Brant made the memorandum; ment, that Block No. 3 would have been a second which upon the execution of the deed, subsequently time in the market. Tiffany had gone to the United States to raise money for his share of the dues, and not returning to fulfil his engagement, Wallace did it alone, but it was not till after Cozens deed had been delivered him and the money paid. Then it was that instead of the names Wallace and Tiffany standing together as formerly coupled, and as quoted in deed to Cozens in 1796 a new conveyance was made, viz: in January 1797, and made out to Wm. Wallace alone. If the Attorney General had considered this circumstance, or had alluded at all to January 1796, he must have thought there had happened some event resembling the occurrences described by Cozens in his affidavit, to account for the singularity of Wallace and Tiffany being quoted as proprietors of No. 3 under direct purchase from Brant in May 1796 and then again conveyed to Wallace alone in January 1797. The same record that contains the deed of No. 1, 2 and 3, on their being surrendered and regranted by Patents, contains the same above mentioned distinct and separate dates. Can it he possible that the Attorney General would assume, and permit himself to take for granted, in a serious case like the present, the mere assertion and surmise of an interested party, a rival claimant of part of those lands, to the entire exclusion of references and investigation of facts registered in deeds and in their records, however laborious and tedious such references might be? Such it is to be feared has been the case, for there is not throughout the Report the least mention of the particulars of these dates and circumstances respecting No. 3, which are so intimately, if not inseparably allied to Cozens' purchase. In support furthermore of the Attorney General's imaginings, from whatever porson or source derived, it is added that Cozens' purchase was a mere speculative bargain, out of which he was to realize in Europe the means of further payments. In this the Attorney General seems to hesitate when he compares such a belief with the insuperable fact of the consideration money named being in accordance with the real payment, £500. It must indeed to any man, let alone the Attorney General, seem somewhat astounding that in a more matter of speculation a large tract of land should be offered for sale through a specious purchase and under no bonds or realities, with a consideration named of only £500; and this too offered in England—in England of all places in the known world.
Yet the Attorney General will not admit such a difficulty in the way of credibility to be greater than in his view of the question, attends the transaction on other sides.

One would have supposed that if money were designed to be raised desperately by such means, the very first occurrence would be carefully to render the article on sale as apparently valuable as possible; and it is certain that the Attorney-General will readily admit upon reflexion that it was not by a reduction of £20,000 New York, down to £500 Halifax consideration, such an object would be accomplished. It would be singular indeed that Brant should insert £20,000 New York currency in his leases for No's. 1, 2, 3, up to the date of Cozens' purchase, and yet in a matter of a speculative nature, where every thing depended upon external proofs of valuable consideration, as well as valuable land, there should be only £500 Halifax currency at the same time he would be in receipt of another £500 from Cozens, making up ertions of Wallace alone, in making good his pay- the real sum agreed upon, before it was more than

It is also extraordinary that, carrying out the Attorney General's idea of speculation, Brant should give his receipt in full, not in prart of the consideration, not on account, as would be proper in such case, but in And in full of what? In full us the receipt specifies for the consideration of the 92,000 acres, in full of the agreement and Warranty Deed-in full of all acts done by him as far as they went, and in full until, &c .- until that acquittance was furnished which the agitated question by Government of Reservations, might render it necessary and indispensable to Cozens to obtain; and then, and not till then, was he, as his various affidavits and memorial state, to pay Brant other £1000, but for the consideration money, the second payment, as the receipt states, was in full.

Such and such only are the real facts of the case

which divested of the Attorney General's hypothesis present no intricacies beyond an ordinary comprehension, and against which not a syllable of proof nor a counteracting evidence is adduced to prop the mere opinion or surmises which the Attorney-General if he did not primarily conceive has at least entertained and

It is not desired to animadvert with unnecessary severity upon the Report of the Attorney-General; but it cannot be overlooked that there appears to be something resembling an inuendo occasionally, and something bordering upon hypercriticism, which do not amount to any proof and cannot claim other notice than such as is inevitable to the feelings of those

aggrieved.

It is important, as bearing upon this matter, that Wm. J. Kerr, Esquiro discovers, viz :-- in January 1835, six months after the presentation of Cozens' claim became public, a Power of Attorney and Deed of Gift, as it were combined in one parchment paper, from the Chiefs to Captain Brant, of a Tract of the Grand River Lands, and this Gift is dated 1804, 31 years ago. This the Attorney General may not with propriety have felt himself called upon to speak of in the remarkable Report now under review-nor is it known whether this Gift was required by the Executive Council to be submitted to the Crown Officers for Meir legal judgment upon it. But it will be all important to keep trace of that document in connection with Cozen's claim lest peradventure it should eventually appear that the lands alledged to have been the object of that Gift and amounting to 30,000 acres constitute a part of the same tract conveyed by Brant in 1796 by Deed to Cozens under due power from the Six Nations. This Gift was claimed by Mr. Kerr before the Council, not on the part of Brant's heirs, but in the name of Mrs. Brant, his widow. The Gift has also been so described as, (so it has been represented to the writer hereof by the claimant) not to trench upon the Lands transferred by Government in 1806 under Brant's remonstrances against it, to Thomas Clark, brother-in-law to Mr. Kerr as above. All these incidents are deemed worthy of note and remembrance. So, too, Mr, Kerr just named is married to a daughter of Brant's.

NOTES.

Cozens' claim was presented through the medium of sundry documents amounting in number to 50. The Attorney General select only 4 viz. Memorial of Cozens, one of his 5 affidavits and the memorandum agreementand mentions Brant's receipt only incidentably-thus

possible that a sale could be effected in England—for simplifying the case as he terms it, and as he observes the second £500 was paid in June 1797. clusion of a hond between Cozens and the Secretary of Sir John Johnson the superintendant General to all Indian affairs throughout Canada; which bond relates to Cozens purchase and is described in his affidavits. He excludes also from notice proofs of Secretary Jarvis having issued Cermicates, under seal of office, that Cozens' purchase was made by sanction and approval of the Government & subject to no claim upon it by them. The testimeny thereto, the certificates being with the lost Deed, is contained in two letters, the originals produced and read in Council. bearing the several ship letter stamps and letter marks of the Post Offices; written by Cozens in 1798 to his Agent Samuel Clark in London, as follows—(The first inclosing one of Jarvis' Certificates, the 2nd referring to the same, and specifying the forwarding of two of them at different

Note—Of the subject of consideration money as named in Deed, the following may be some explination. On the 19th April 1830 an Indenture was made between George 4th and Six Nations for 807 acres of the Grand River Lands, the consideration money named is 5s in full. How will the Attorney General view this and reconcile it with his remarks upon Cozens' £1000 paid in Cash, which was a full price and double the amount named in the Deed?

Norwich and Dereham, townships of the 1st magnitude sold in the Council Room A. D. 18—Present the Hon. Robert Hamilton, Rev. Mr. Addison, William Willocks Esq. The two townships brought together £3,062 5 0, part of that land sold shortly after for 2s. 6d .- \$1 per

ANSWER.

"Остовек, 31st 1836.

Dear Sir;

After the answer given last night by me to Mr. Clark, I am surprised in being pressed in the business. I unequivocally told him that I would not sign it, without either legal advice, and perhaps I might have added disin-The whole of this transaction is in the present terested. juncture too delicate for me to comment upon. I shall take no rash steps.

> Yours, &c. ALEX. STEWART." (Signed) A true copy. W. CLAUS. (Signed)

Now of the Council of 23rd September 1806, Captain Brant accused John Norton the Chief of having forged a speech for the signatures of himself and other Chiefs and passed it off as the real one delivered at the Beach above named, and which was directly contrary in purport and offset. He (Capt. Brant) also protested by letter to Governor, Gore on the following November 4th against the sale of any lands above No. 3 as it devolved upon him to

name the purchaser.

It appears in Executive Council 18th May 1804 that the It appears in Executive Council 18th May 1804 that the Six Nations still continued that right they originally asserted to the land on the Grand River. "to do as they thought best with it:" The same occurs almost annually up to present 1835. In 1814 they accuse Claus of deception and mismanagement. See Speech. The sale of No. 4 to Clark (Thos.) in 1806 seems to have been attended with an unaccountable mystery and haste not incidental to honest actions—Brant and Chie's remonstrate and Trustee Stewart demurs. and Trustee Stewart demurs.

Government House, 27th August, 1835.

I am directed to acquaint you that the Lieutenant Governor will forward your statements of the 26th and 27th inst. to the Executive Council.

Sir, Your ob't Servant, Wm. (Signed) Wm. ROWAN. This is in answer to my strictures, &c.

No. 56.

Copy of a minute in Council, approved by His Excellency the Lieutenant Governor on the memorial of Nelson Cozens with a letter addressed to Col. Rowan.

In Council 3rd September, 1835.

With reference to the above, the Council do not consi der it expedient to occupy Your Excellency by any detail of the particulars and facts alluded to, in the first place because they could not advise Your Excellency to adopt and act upon a decision contrary to the opinion of both the Crown Officers; and next, because under any circumstances they would deem it as not acting in accordance with the Instructions of the King's Governmentto dispose of so momentous a question without a reference of the whole matter to that Government.

The only course left for them is therefore to suggest to Mr. Cozens, that as he is dissatisfied with the conclusion that has been errived at here, he may make his appeal to His Majesty and the Council will readily report for the information of the Secretary of State, that the documents offered for their consideration are in conformity with the details furnished by Mr. Cozens, if they prove to be so. (Signed) JOHN BEIKIE.

 $\mathbf{Q}2$ 

Clerk Executive Council,

Mr. Nelson Cozens, Toronto.

(No. 57.)

To His Excellency Sir John Colborne, Lieutenant Governor of Upper Canada, Sc. Sc. Sc.

May it please Your Excellency:

Fifteen months have nearly elapsed since my Father and I presented to Your Excellency the claim for Grand River Lands, out of that period my Father during two journies hitherto devoted four months. I have bestowed in personal attendance upon its progress 10 months. During all this period we incessantly prayed in feeling and respectful terms for an early investigation of our case in Council. In July 1834 it was referred by the Executive Council to the Trustees of the Six Nations who returned no answer until pressed to do so in May last. was still uninvestigated by that Hon. body until last July, when my Father was in attendance with me, and in waiting upon the Council, to be heard give a statement and his testimony. He was not admitted but Wm. J. Kerr Esq. a person deeply interested himself, was admitted to speak before the Council, if not in his own interest and behalf of a claim for a portion of my Father's purchase, he was at least permitted to speak against our claim, on the part as it was averred of the Six Nations, whether accreditedly or not is unknown. He was allowed also to give his opinion and definition of a "memorandum agreement" in opposition to facts set for by my Father under oath. The prayer of my Petition and my Father's memorial, together with our united addresses to Your Excellency and the Council was that our case might be acted upon conscientiously and in a manner after that of cases of Equity. The first intimation of the Attorney General's having been called upon in the matter induced me clearly to state the question to that gentleman and to place before him certain facts, the importance of which was and is infinite, and the trith of which no human testimony can overthrow. Such truth as is established by official records, and the concurrent experience of living witnesses. Those statements, thus founded, thus important, were scarcely noticed by the Attorney General, and only remarked upon in discredit and as the sequel of his Roport manifests, to-tally unregarded. The Solicitor General then became the object of like statements and to him I explicitly laid down the matters of fact which I had previously placed verbally before his learned colleague. I did and yet do deem them matters of truth within that gentleman's own personal experience. What I of my age and observations know in regard thereto, he individully and officially, most certainly in his professional capacity need not to be taught. Yet with all those declarations before them, they liave concurred in a report endorsed by the Council tending to the establishment of propositions which inferences alone give support to, and which it has been shewn to Your Excellency in my strictures upon that report are void of foundation. The Council adopted that report, Your Excellency approved it. We prayed for the Council's Report—their report—their free undisguised opinions upon the merits of the claim—their full conviction upon all the circumstances adduced—Yet none has been given us.— There has been no communication from that body upon the subject, save their concurrence, in the briefest possi-

ble terms, with the report of the Attorney General.
Your Excellency was dissuaded by the Atttorney Goneral from perusing all the documents passing through his hands, out of fifty of which he discarded furty six, and framed his issue upon the materials of but four. Your Excellency has read my strictures upon that decision and consequently my disproofs of those premises which the Attorney General assumed. Your Excellency has like. wise noticed the two communications II had the honour to annex thereto. The Council by Yodr Excellency's command have again spokes upon the subject, but to what extent? to what effect! there is yet no expression of opinion upon the claim, no expression of opinion upon the strictures. There is a studied avoidance of the least remark or reflection which might be construed to deviate from the unhallowed spirit of the Report.

In respectful confidence do I assure Your Excellency that there is fear on the part of that Honorable body, I speak it, Your Excellency, with great deference, and yet with deep sorrow, to depreciate the opinions advanced by the Attorney General. Has it then arrived at this pass, I ask it honestly and respectfuly of Your Excellency, that Your Excellency's council shall be moulded in their views by the views and exparte statements of a gentleman, who though high in rank, as in Your Excellency's confidence, I have fully proven to have acted and to have decided most erroneously, most irrationally? is not the silence of the Council, may it please Your Excellency, upon my strictures, some little evidence of the unhappy character of the Report? I repeat it to Your Excellency, and again I do so with respect, that no human testimony can be induced to shake the foundation of my strictures. They proudly assent facts—they embody however only a repition of my declarations seasonably conveyed to the Crown Officers, to which declarations nothing save heed. lessness, discredit and disrespect has been extended.

The writer of the Trustees Report disbelieved, the Attorney General doubted and the Solicitor General remained silent. And upon what occasion? upon that of my assert ing the prices of lands to have been as low in 1806 as those my Father purchased and paid for in cash in 1796. The sales in the Executive Council Chambers support my assertions, and hundreds of witnesses can confirm it. They question the right of Brant to sell and convey;— The Reports of the Executive Council and their actions clearly substantiate what I put forth as law of the land adopted and acted upon by all former Attorneys General, and sanctioned by Your Excellency's predecessors. The Trustees cannot and do not but concur and act accordingly. The Executive Council Report in 1830, the Attorney General and Solicitor General Report in 1835. What the law was to the former, forms no precedent for the guidance of the latter. Mr. Kerr is allowed to speak against our claim, and produces a paper, under his construction of it, which my Father solemnly describes objectively and under his oath. But the Attorney Generaislights that oath and entertains but one opinion the opinion of Mr. Kerr. Let me call Your Excellency's attention to the fact of that opinion thus ventured by Mr. Kerr. What will Your Excellency think of the Acis and of the character of that same Mr. Keer's Father, who as a Judge in the Home District took Brant's acknowledgement upon the back of that Deed to Cozens, to the contents and execution of which he was also a subscribing witness, and in whose presence the first £500 was paid, if as Mr. Kerr the son would have it to be, the "memorandnm agreement" alluded to the same land Deeded, and wsa allied to that transaction? But Doctor Kerr was a man

I am growing tedious to Your Excellency, but I am discharging a christian duty in maintaining my rights, & in retaining my opinion of those rights and which proofs, as strong as those I have presented to Your Excellency's notice can alone affect. In this discouraging present stage of my case, what can I do but again appeal to Your Ex-Not now to Your Excellency in Council do I appeal .- I appeal to Your Excellency and to Your Excellency alone do I appeal, in my character of an humble obedient subject of a King to whom I bear allegiance, as to the Governor of UpperCanada the administrator of its Government and the proud Representative of His Majesty. I am aggrieved, Your Excellency. I have spoken to that effect—I have feelingly and often written to that effect I write it again, and I do so sorrowfully to your Excellency, despairing of that hearing and that faithful upright decision by Your Excellency's Executive Council which I felt myself prepared and as it were justified in almost swearing to in advance. Yet what, let me pray Your Excellency to think, have been the character and hues of that decision, of that report, which gave an opening for the strictures produced?

Thus far I stand upon the vantage ground from which I again repeat; without the hazard of displeasing a per-

sonage of Your Excellency's sense of honor and truth, no human force can dislodge me. I have asserted plain facts to Your Excellency, and the facilities of rendering those facts into truths evident, are within the walls of Your Excellency's Executive Council Office. I pray Your Excellency to meditate one moment more upon our case. View it, if it please Your Excellency as we have set it forth unadornedly, with the simplicities belonging to truth. View it as one bearing upon the happiness and comforts here of those who have only honesty of purpose, truth of assertion, and justice of right beside them—who have no power derivable from rank, wealth or talent, but bent upon establishing by honorable means alone their just title to the lands laid claim to.

I pray your Excellency to cause a revision of that Report, so edious and indefensible-to cause it to be reversed. If I have furnished a means in my disproofs, let them in the name of Equity be enforced.

I pray Your Excellency to cause that Report to be set Let it be Your Excellency's pleasure to hear me when I solennly declare to Your Excellency that that Report is founded upon the grossest errors. It is a matter of opinion, not of law, with the Attorney General, and that opinion is most egregiously unsound. If I have used freedom herein beyond measure, I pray Your Excellency not to ascribe it to a want of that respect I study to bear and to feel toward Your Excellency.

Your Excellency's devoted and faithful humble servant,

NELSON COZENS.

Copy.
To the Superintendent General of Indian affairs;

We this day have met in Council to consult each other, and to collect and express our opinions one towards the other, upon the calamitous situation in which we find ourselves placed, by the unexampled and wanton cruelty which has been exercised to the faithful supporters of their Father across the great water, by his Agents

for these many years past.

Brother:—We felt proud to be called the allies of so great a King; and the Mohawks have not forgotten the great sacrifice they have made, when they took up the hatchet to fight his battles. They look back to the fertile fields which they have abandoned and which they moistened with the blood of many of their most brave warriors.

Brother :- We thought when the servant of our Father [Governor Haldimand] gave us in his name, the lands upon the Grand River that we should be secure, and with-

ont interruption enjoy it as our own.

Brother:—In this we have been most egregiously deceived, and to our great surprise and grief, we find our selves by the contrivance of artful, faithless and wicked men stript of our property. What little is yet left us we are denied the lawful right of controlling or disposing of without our master's leave.

Brother: -We are determined no longer to be asleep, nor give up our just rights to children and base selfish men their wicked advisers.

Brother :- We have often requested you to give us an answer concerning our money, which you among others many years ago received in trust for us, arising from lands which we resigned to the King's government according to their desire.

Brother:-We have been told again and again that it was sent to England, but that is all we have heard of it, promises and empty words will not satisfy us, it is time to have a direct answer one way or the other; tell us no more tales, for on them we cannot be fed or clothed.

Brother :- You continually advised us to be of one mind yet at the same time you have spared no pains to create jealousies and distrust among us, and that by a partial distribution of the presents which our Father intended should be justly and equitably distributed to all.

Brother:-In all this we do not see that honor and sin-

cerity which we had a right to expect from you.

Brother:—We call upon you to look back to the promises made to us, and the way we land a great number of chiefs who have gone to their Fathers, and archere no more] have conducted ourselves since our first connexion. with our Father the King. We have acted like men, honorable and unsuspecting, and should it happen through your fault that our hands should unlock, we think your fingers would straighten first.

Brother :-- As respects the white people on the Grand River, they were placed there by our forefathers and ourselves, and according to the rules of christianity, we can-

not pull to pieces what has been solemnly past and done.
Brother:—We respect our word, when once pledged, and we cannot think of disturbing the greatest or the meanest among them we will not make a God of one man and a beast of another.

Brother:-As to the great fire placed at the Onondago Village, we think it our own as we found the wood and

made the fire.

-We further understand that the sale of the Brother:-Stedman Township so called is about to be completed; we feel satisfied at this but should have been more so, had it been done years ago, according to our wishes.

Brother:—It is expected that your word of honour will be binding upon you in regard to Mr. Augustus Jones, whom we named as purchaser (and no other person) on the 26th November 1808, and who was accepted by your-

Brother:-We also expect that the money which may be raised on the sale of this Township may not be sent to England like the former, but that it should be at our disposal, for we think we can make better use of it.

Brother: -We apply to you as the person appointed to watch over our interest as your own, and not suffer us to be imposed upon. It is very true we are ignorant, but is it a sufficient reason that because we are the aboriginal inhabitants of the wilderness, and not learned in the arts of white men, that we should be plunderd, and our rights trodden under foot?

Brother :- We demand of you that only to which we think we have a claim; namly, Justice, and if it cannot be found here; we have been led to believe it may be obtained from our Father the King, whom we think must

be the fountain of Justice.

Grand River, 18th April, 1811.

Tononto, 28th September, 1835.

To Col. Rowan, &c. &c. &c.

I beg leave to offer the following pages of additional remarks upon the subjects of the Attorney General's Report upon my claim;—that His Excellency the Lieut. Governor may be pleased to peruse them in connexion with the communications I had the honor to address to His Excellency on the 9th inst.

With g.eat respect Sir.

Your obedient Servant,

#### NELSON COZENS.

P. S .- I beg also to submit two vouchers obtained since the production of the main body of Documents presented before the Hon. the Executive Council, viz :—Theodore Barrell his verification of an original letter, and James Wallace's deposition on Brant's sales in 1796.

N. C.

NOTES TO MY STRICTURES ON ATTORNEY GENERAL'S BEPORT.-NELSON COZENS.

The grant from the King, by Governor Haldimand, to the Six Nations is regarded by the Attorney General, guided it ference to be drawn from the fact of their strength, numbers and services, and the mighty consequences likely to be produced by their alliance with other Tribes in opposition to the King's cause, is that they were capable of exacting their own terms. Their demand for remuneration by the King, for their services and loss of Territory in the United States was made many years before the date of Haldimand's grant. Previous to 1799 they had preferred a claim upon the King for compensation in lieu of that which in fighting his ultimately unsuccessful battles, they had lost forever. They declared that less than four millions of acres of arable land would not be equivalent to the territory they had abandoned. Six miles on each side the Grand (or Ouse) River from its source to its embouchure were given them. What are the contents of that Tract? How did they ask it—on what terms? They ever practised one set of terms, and those terms were clear and unequivocal. "We thought when our Father the King gave us this land, it was ours to enjoy for ever and to dispose of as we should think best." What do these quoted words imply, which are so similar to the words of the grant? Either they were designedly written in correspondence and coincidence with the terms of the demand or claim or they were expressly intended to become obnexious to legal evasion. But the latter of the two, is the least honorable, least rational, and least probable conjecture. The Attorney General insists upon there being jecture. The Attorney General insists upon there being no ambiguity in the grant, and that it will not bear the honorable, rational and probable construction the Six Nations accorded and do accord to it. Why then, let me ask the Attorney General, was the Parchment Deed prepared in the year 1793—5 which pointedly forbade the Six Nations to dispose of any of the prescribed lands of which they were in possession? What was the origin of that Deed? Was it presented to the Six Nations? Yes, to Brant, who personated them it was shewn once, and but once. He appeared at the seat of Government withhis face painted. He swore that if ever it was again presented or spoken of hewould swore that if ever it was again presented or spoken of hewould dig up the tomahawk from beneath a butternut tree where it was known to have been buried, and would come down upon the Government with 10,000 warriors. What effect had this language? That of the fullest acknowledgment by the government of the entire right of the Six Nations to the Tract they were upon. President Russell seems by the Duke of Portland's despatches to have been compelled by Brant to act upon the principle of the grant as construed by

him and his chiefs, being the very procise terms upon which they received it.

The new Deed therefore disappeared and was never again brought to light until early in 1834, for the purpose of giving a semblance of truth to the exposition of Haldimand's grant emanating from some exposition of Haldi-mand's grant emanating from some expounder of our Laws, that extraordinary Deed I say went out—it was withdrawn into Lower Canada—to Quebec, where some wicked head gave it origin. Let me ask the Attorney General if he has seen that Deed.

Does it contain the great seal so particularly alluded to by him as bearing a mystic virtue a sort of abracadabra in the ab sence or want of which no Deed,—no conveyance, though signed by the Governor General in the name of the King, and signed by the Governor General in the name of the King, and indeed so countersigned as to speak the very imperial language of the King, by concluding with the words "in the 25th year of our Reign," is genume?—But what was the object of Brant's journey to see the King? This may be answered, not by the Attorney General, in his scantiness of early historic knowledge, and his proneness to inferuponall occasions; but by the following extract from a letter of Thomas Acton Ceffin to Joseph Chew Esq., dated "Quebect 15th April 1795. Lord Dorchester wishes that Col. "McKee might dissuade the Indians from selling their lands "on the Grand River, but if they persisted in doing so, to "sound them on the subject of selling the whole to the go-"vernment, and to consult Governor Simcoe as to the mea"sure and terms thereof—if by yearly annuity &c. and not "sure and terms thereof—if by yearly annuity &c. and not to decide it till further orders."

In 1796, the very next year, and after Blocks No. 1 & 2 each 12 miles square had been leased for 999 years, Brant made public sale of adjacent tracts.—James Wallace, the living brother of William, the purchaser of block no.3, in his affidavit says, that Brant declared publicly he had offered the whole Indian Tract to Governor Simcoe, who declined purchasing it, or having any thing to do with more lands, when the Government could not even get rid of their own; and advised Brant to sell to the highest bidders.

Cozens in his affidavits and Memorial declares it was by the advice and persuasion of Governer Simcoe, with whom he was deservedly intimate, that he invested his money brought from Philadelphia in September 1796 in the purchase of a Township from Brant. The Attorney General sneers at the idea of Governor Simcoe's advising and persuading. Yet the Executive Gouncil in 1830 write that the sales by Brant were by consent and approval of the Governor, i. e. that the Governor extended his sanction and assistance. Why were Government putents issued? This question I answer by saying that it would be a cogent if not the whole reason for passing a patent through its labyrinth of forms, that it secured to the Government, I mean to the Clergy after 1791, one seventh of the whole Indian tract which the King before his act of 31 had secured for ever to the Six Nations exempt from any taxes or duties or reservations

The Indians desiring the improvement of their settlement, the lands they disposed of above Brantford enabled them to enhance the value by increased cultivation of their farms nearer to Lake Erie. They always conceived they had the fullest right to do so, and from their earliest, up to their latest grand Councils, they unequivocally assumed the power to dispose of their property as they deemed most beneficial to themselves.

They held Councils in 1784 in 1792—95—96—98 in 1802—3—4—5—6—7—9—11 in 1826—29—30 and 33, the primary objects of which were to discourse together on the primary objects of which were to discourse together on their land affairs to reiterate their original right and title to the entire proprietorship of the Grand River Tract; and making such concessions to the King and the Colonial Government as the persuasions and entreaties of the several Indian agents and interpreters led them to confide in and approve of, as acts and favors of friendship between them and their Father the King whom they continued to revere.

Taking up a medium date between 1784 and 1834, say 1802, and putting aside all intermediate transactions, the Indians in Council 10th Nov. of that date, proclaim to the government and the country that they would resist any encroachment upon their lands and any interference in the management by them of its sales, against any party what-soever; deeming it a duty and a virtue to maintain their

I know not whether the Indian Councils were held year. ly of course, but the periodical dates quoted above are those on which there were conventions of the Chiefs for the purposes expressed, and those purposes thus expressed were matters of cogitation in the Executive Council 18th May,

It oppears that after the death of Mr. Stewart, Colonel Claus was the only managing Trustee, and upon him at Brant's decease devolved the whole transactions of the Indians. He was their grand factor who kept their accounts and their monies. But gradually the Chicis grew dissatisfied, and their complaints of mismanagement began even in 1811 to appear alarming. In that year they plainly in 1814 to appear alarming. In that year they plainly evinced a determination of acting in such a decided manner as to preclude all possibility of future misconceptions. While Brant lived and regulated them, they were generally unanimous, but when their white Agents and Trustees became pensioners upon their estates they were liable to the came pensioners upon their estates they were have to the consequences, which ensued from dissensions, envy and jealousies. Of the Council which they called and held in September 1806 it may be said that there was foul play on the part of some one besides Norton. It seems a sale was in negotiation by Col. Claus with some person for Block No.

4 being a part of Cozens' purchase.

Cozens bought and paid for his Tract in 1796 before the appointment of any Trustees, and when Brant alone was the Agent and authorised representative of the Six Nations

and so acknowledged by the Government.

It may be said that at Col. Claus' uppointment as a Co Trustee, and up to 1606 he had only a knowledge of Cozens having negotiated with Brant: but that he was aware of Cozens' payment of £1000, and of the warrantee Deed from Brant, who that judges for himself can deny?

But this is certain that the sale to Thomas Clark of No.

at this is certain that the sale to Thomas Clark of No. 4 in 1806 was attended with such remarkable incidents as to render the fairness of his purchase more than doubtful. Those doubts may be shaped thus.—What were the inducements for the Scotchman Norton to fabricate a false report of the speech of 23rd Sept. 1806 delivered at the Beach, of the fact of which, Brant's written declarations and deprecations are proof, as shewn also in his protests addressed to Governor Gore, in which he loudly exclaims against the treachery practised by Norton in gaining his and other Chief's signatures to the spurious speech and in which he forbids the sale of No. 4 to any one not named by him, as he had disposed of it alroady.

What was the origin of the flat refusal on the part of Mr. Stewart to conform to the wishes of Thos. Clark when the overtures of the sale between Claus and him were then going on? What were the motives of Col. Claus in hurrying the sale to Thomas Clark to a close, and importuning Mr. Stewart to officiate in the transfer? What were the true reasons for Mr. Stewart in the letter to Col. Claus characterizing the sale as a matter not disinterested and for characterizing the sale as a matter and assinteressea and for styling it one of a delicate nature and too much so to comment upon—and that in it he would take further legal advice, and would take no rash steps? These circumstances demand explanation. The sale was carried thro' against the express wishes of the Chiefs whom Brant spoke and wrote for—it was made to Thomas Clark—it was of block No. 4, so designated two years after Cozens' purchase; it was about 1-3d of that purchase apathe very third which 10 years previously had been vouched by Brant to Cozens as being the best part of the 12 miles square, and being all the first quality of land. It was sold for about £3,000 payable after the expiration 1000 (one thousand vilas) interest yearly. Was the Government knowing to all the particulars of Thomas Clark's method of negotialing with the Indians for No. 4? They must have had knowledge of it, else why would Brant's protest appear in Cooneil, & why would they issue a Patent in 1806 for the very land which had been acknowledged in the schedule of 1798to have been sold? Was the Government aware of the sale in styling it one of a delicate nature and too much so to combeen sold? Was the Government aware of the sale to Cozens? Yes most decidedly—nost unquestionably. Did not Mr. Jarvis the Provincial Secretary issue his Certificates officially, of the Government sanction and approval of the which added a control of the sale to cozens in the name of Thomas Clark! Provincial Secretary issue his Certificates and the Provincial Secretary issue his Certificates and the Provincial Secretary issue his Certificates and the Provincial Secretary issue his Certificates and the Provincial Secretary issue his Certificates and the sale is effected, though Mr. sales of lands by Brant, comprehending that to Cozens in Stewart styles it not disinterested—too delicate to com-

rights invisiate which Governor Haldimand for the King particular? That certificate was sent by Cozens to London, and was there received by his accent who described in the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the co and was there received by his agent who deposited it with the original Warrantee Deed from Brant and Power of Attorney. That certificate had the Provincial Secretary's Attorney. That certificate had the Provincial Secretary's seal of office attached to it. Was not that known to the Government. It may be said that Col. Claus might or might not have known in 1798 that Cozens had in 1796 paid £1000, and received his Deed; but it appears from his letters addressed to John Small Esq., Clerk of the Executive Council in 1803 that he then knew there had been appears to Eczons. The latter was absent in Lower ecutive Council in 1803 that he then knew there had been a sale by Brant to Cozons. The latter was absent in Lower Canada, and in the eastern District, and was totally ignorant of their proceedings in 1803, and unsuspecting of any sale of his lands in 1806 or subsequently. He was conscious of the knowledge every officer of consequence in and attached to the Executive Government had of his fair and honorable purchase from Brant, and could not suspect a resort to bribing the Cinefs, to forging speeches, to countain a countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the countain the coun vance of a Trustee, to the interposition and interference of the Government which he knew were acquainted with his purchase, Cozens knew his Deed from Brant would speak for itself and that the Government had confirmed every act of his as far as related to this purchase. When a few years before the war he began to dread the fate of the Deed, and to fear its loss, he consulted with Mr. Attorney General Boulton (the elder) who advised him to strive further to get hold of the Deed, without which it would be vain to come forward and the land would not disappear and was far distant—not then very saleable—that every thing wo'd depend upon the Deed, no question or doubt being ever en-tertained as to its validity nor as to its existence. But it was not upon record, and the Government required a sur-render of all conveyances from Brant whenever they issued their Patent Deed.

Had it been suspected by Cozens that dishonesty was in practice against him—that speeches were prepared by persons, in anticipation of the meeting of Indian Councils, (for it seems that when certain objects were to be accomplished against the doing of which the chiefs were certain to rebel, set speeches, denominated "proposed speech" were in readiness to receive by a slight of fund pass the real signatures of the main body of the chiefs, as for instance in the case of the speech which Norton imposed upon Brant and to which he obtained his and other signatures, & which soon proved to be an accommodation speech upon which the sale to Thomas Clark was introduced and effected;) I say had Cozens suspected such surreptitious movements, he would instantly and most effectually have brought to light whatever of mystery and doubt these dealers in Indian credulity had drawn over the transactions in question.

The Attorney General would appear destrous of defending most stoutly any acts of any of the officers of the Government however distant, the transaction, however high or low the character, so long as the rank is important. Well it is good to defend reputation, but not at the sacrifice of truth, and the rights of the poor. If the government in a body have interposed between Cozens and his rights, and have assumed the responsibilities growing out of a second sale and grant by them to Thomas Clark, a favourite of the government and a rich man (though not perhaps because a rich man) of the land, the sale of which to Cozens they had ten years previously confirmed, why let the men who formed and executed the Deeds of that Government now answer for their mjustice. The man who as trustee wrote in 1803 that Brant had sold to Cozens, writes in 1806 that he the low the character, so long as the rank is important. for their injustice. The man who as trustee whole in 1806 that he the that Brant had sold to Cozens, writes in 1806 that he the Trustee had sold to Thos, Clark, and by the wishes of the chiefs expressed in a forged speech! Another official signs a certificate and attaches a seal of office thereto, that Cozen's purchase was by consent and approval of the Government, and in a few months only, less than six, he officially passes through his hands the schedule naming the sale tho in blank, of what was latterly named No. 4; and yet he subsequently passes a Deed under perhaps the very seal and press of his office which stamped his certificate relating to

ment upon-indicative of rashness, and requiring legal advice before he would conform to the proposals made to him.

The Attorney General's obligations compel him to advocate these acts, even such acts, and even the acts of others not in the government, so long as his employers in the government are at all concerned in the issue, no matter if they interpose between any humble individual and him whose title they would defend against all but themselves.

There were present at the moment when Cozens paid Brant the consideration money, Dr. Kerr, Mr. Lynch, and Mr. Stewart, the trustee. Well indeed might the latter hesitate when called upon by Col. Claus to sign with him the deed to Thos. Clark! Well indeed might he term the affair a delicate one, too delicate to comment upon-Well might he write that he would take no rash stops. Well might he, a witness to the payment of the consideration money by Gozens to Brant pause and allude to Claus negociation as being at variance with the wishes of the Chiefs and directly opposed to Brant's protestations, and as one requiring legal advice. Mr. Stewart, himself a lawyer and one of the trustees, designates this hasty sale to Thomas Clark of a part of the land paid for by, and deeded to Cozens, as a transaction of too delicate a nature to comment upon. His words are,

" 31st October, 1806.

Dear Sire

After the answer given last night by me to Mr. Clark, I am surprised in being pressed in the business. I unequivocally told him that I would not sign it, without other legal advice, and perhaps I might have added disinterested. The whole of this transaction is in the present juncture too delicate for me to comment upon. I shall take no rash steps.

ALEX. STEWART.

To, Col Claus."

What is there within the bounds of probabilthat could have prompted such a letter, which Col. Claus acknowledged to have received, but something dishonest? From what but treachery could it have possibly arisen? No—let Cozens speak out and the mystery will be unravelled. Recur again to the bond between him and Langon, Sir John Johnson's Secretary, recur to its dates and its covenants, the purpose for which it was done, and let Cozens be heard to explain why that bond was not ucted upon or its engagements carried through.

Sir John Johnson was the superintendant General of all Indian affairs throughout Canada. Capt. Patrick Langon was his private Secretary. Did the latter early in 1798, go forward to pay for Cozens to Brant the 2nd £1000? Had he the money ready to do so? was Col. Claus the medium through which the payment was to be made, if made at all? was there any understanding between Langon and Claus, as to the Patents issuing in Capt. Langon's name? was there any understanding between them, and what did it arise from? What promises, and to whom were they required to be made for a portion of Cozens' purchase upon the Patents going out in Langon's name? Cozens will reply hereto, and if required will do so under oath.

'That Brant's Deed to Cozens was valid—that a valuable consideration, viz: £1000 had been paid—that the purshase was made by consent and approval of the governmeut, and that Secretary Javvis, under seal certified thereto, were all matters of fact needing no further conviction with the Trustees and the Government; they knew however that it was desirous the Government Patent should issue and thus secure a reservation of other lands, according to the Constitutional requisition; they also knew that such Patent would be desired by Cozens, and perhaps indispensable for the purpose of sale in England, and to accompany the transfer to be made at sale by Cozens; and Claus it appears having failed to obtain Langon's consent to a participation in the benefits of a sale abroad. more easily effected perhaps then through a Government Deed, negotiates a sale, as Trustee, to Thomas Clark in 1806, and thus drawing forth from Mr. Stewart his opinion of that sale.

Unfortunately the certificate alluded to is with the lost Deed in London, but that it did exist, strong proofs are adduced in addition to Cozens' affidavits by the two letters produced and read in Council written by him from Montreal in 1798 to his Agent in London, the Ist inclosing as it says the 1st certificate: the second referring to the 1st and an intermediate letter and describes the contents of previously forwarded letters with Secretary Jarvis' certificates. These old mutilated letters bear all the original Post marks, letter stamps and ship-letter marks of the date. The one is dated,

"Montreal, 4th Jun., 1798.

" Dear Sir,

"I wrote you in September but can receive no answer "from you since—I once wrote you the papers necessary.

"to attend the Brant title would come on by the Halifar.

"mail, which I certainly expected would have been executed, but was not effected. I have been trying ever since to obtain them but could not until within a fortnight. I " have obtained THE INCLOSED with THE SECRETARY'S SEAL OF OFFICE, which I conceive will be every thing."

Again Cozens writes his Agent-

" Montreal, 7th March, 1798.

"Yours inclosed to Mr. E. Smith I received which " astonished me, as you say you have not heard from me " since April, as I have wrote at least ten letters since that, " and have sent two certificates two months different in date, as follows, copy of Haldimand's deed to the Six Na-"tions—a confirmation of four townships by Government " empowering Brant to convey in FEE SIMPLE, REFERRING "TO MY DEED AS ONE, and it being clear of mortgage, this "CERTIFED BY THE SECRETARY WITH THE PROVINCE "SEAL AFFIXED THERETO. This is all I could get which is certainly every thing necessary."

Of these papers, viz: Langon's bond and the two above letters, the first of which was the very envelope which contained Jarvis' certificate, not one word is said by the Attorney General, who never even names them. Not a word is mentioned of any other documents among the 50 in number before him, even to state what they were, what intended to substantiate, or what of weakness or strength there might be about them. In fact the whole treatment of the case as it is exhibited in his report, is distinguished by short-sightedness of views, imbecility of reasoning and inferences untrue to the facts developed.

The Executive Council in 1880 assert Brunt's full and indisputable power to sell, convey and receive. The Atty. General at once denies it and in fact ridicules it. The Executive Council deemed £3,062 a fair price for two of the largest townships of land, through which a high road-ran—near to the lake and to settlements with other advantages. The Attorney General in effect denies that also, for he says £2000 would not have been a fair price for Cozens' township, ten years before the sale of the above two, though valuable consideration he terms it a speculation.—Now, what is the character or nature of a speculation, in the Attorney General's opinion? Is it where a fair consideration is paid at the average, at the standard price of lands in 1798, which here a mail is not not to the nature of the standard price of lands in 1798, which here are small in natural to the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature of the nature 1798, which bears so small a proportion to the prices of the

same lands 40 years thereafter? What is it likely that the price will be per acro for a Tract of Land bought in 1830 from the Indians, by the Government, viz: in the name of George the 4th amount-Government, viz: in the name of George the 4th amounting to 807 acres at the period when 40 more years shall have expired! Will it be £5 or more likely £15 per acre? and yet the sum of the consideration money paid therefor is only 5s (five shillings). But the Attorney General's mode of induction is a novel one, it takes not in either things prospective or retrospective—neither dates, names nor occurrences bear weight with him when jumping at a conclusion, as may be seen in his passing over the names of Wallace and Tiffany quoted in Cozens deed and the new agreement between Brant and Wallace. —and the new agreement between Brant and Wallace, and the Deed not lease, to the latter, in his own name; on 17th January 1797, a date and transaction not adverted to

by the Attorney General notwithstanding their deep im-

portance.

The moment I learnt the papers had been referred to the Attorney General I threw myself in his way-I begged to assist him in the arrangement and collocation of them which he declined, stating his intimacy with all sorts of transactions and every possible case ho wever intricate being professionally acquainted with all difficulties likely to bear upon things of the kind. But after a day or two I repeated my visit and offers, when he seemed desirous of knowing whether I relied much upon the saying that Go-vernor Simcoe bestowed upon the purchase both his sanc-tion and advice. I said I did rely upon that as well as other circumstances—to which it was said that it appeared to him as if that was a matter which could serve me very lit-tle. Such an unexpected observation startled me. I knew it was right in endeavouring to place information before a person whose short residence in the country would probably need it but I feared to speak freely upon the whole matter, but as it seemed to me I should be thought to be obtruding my speech upon one whose duty perhaps forbade him to do more than civilly listen to me.

He afterwards writes down in his report the great im-

probability that Governor Simcoe should have been desirous of rewarding Cozen's services to the state, at the expense of the Indians, as he says is insinuated rather than asserted. Where, let me ask, is it even instantated? All that Cozens says in his memorial and affidavits is that his purchase was by consent and persuasion of Governor Simcoe; so to invest his money and was not that a propriety in its highest sense? What said the Executive Council in 1830? That the Government assented to the council in 1830! I mat the Government assented to the measure (the sales of Brant for Indians) and seem to have given their sanction and assistance, in the conviction that it would be then the Attorney General has Guoted the "elaborate report of the Council" as above without perusing it or extending the least faith to its contents? Who drew up that report of the Executive Council? The very hand which wrote another report, or rather decision of the Judges in the case also alluded to by the Attorney General, viz:—that of Jackson vs Wilkes. Of this last case I have no means of maining a knowledge. have no means of gaining a knowledge. It ought not to be weighed against the deliberate report in Council—The council are equitable in character as a tribunal the Judges

constitute but a legal commission.
In relation to Col. Claus the superintendant of Indian affairs in Upper Canada, the Cniefs in a grand Council held in 1811 thus deliver themselves in a speech remarkable for a bold and uncompromising tone of resistance to the frauds practised upon them by the Trusteeship of their affairs, so often exclaimed against and denounced by their

favorite Brant.

A pity it is—an exceeding great pity, that reflections should be made upon those who are dead, yet more is the pity that the living should undergo the penalties not intended for them. For those who are absent; let those who are living, and participated, and perhaps designed whatever of a dishonorable character then transpired now bear the blame."

In 1806 the sale of part of Cozens' purchase to Thos. Clark was by Brant, for his kindred, solemnly protested against. The following are extracts from the great speech delivered as above and signed by 28 chiefs, commencing with that celebrated old Patriarch and Warrior Tekarihogen, and concluding with Justice Thomas,—to Col Claus, with whom was the comptrollership of their affairs.

"Brother: -We are this day met in Council to consult each other, and to collect and express our opinions one "towards the other, upon the calamitous situation in which we find ourselves placed, by the unexampled and wanton cruelty which has been exercised to the faithful "supporters of their Father across the great water, by "his Agents for these many years past."

" Brother:-We thought when the servant of our Father "[Governor Haldimand] gave us in his name, the lands "upon the Grand River that we should be secure, & with-

ont interruption enjoy it as our own."

"Brother:—In this we have been deceived, and to our "great surprise and grief, we find ourselves by the con-"rivance of artful, faithless and wicked men stript of our " property. What little is yet left us we are denied the " lawful right of controuling or disposing of without our "master's leave."

promises and empty words will not satisfy " us,it is time to have a direct answer one way or the other; " tell us no more tales, for on them we cannot be fed or

" clothed."

You continually advised us to be of one mind vet at the same time you have spared no pains to create " jealousies and distrust among us."—" In all this we do
" not see that honor and sincerity which we had a right
" to expect from you."
" Brother:—We have acted like men, honorable and

unsuspecting, and should it so happen, through your "fault, that our hands should unlock, we think your fiu-

gers would straighten first."

· Brother :- We demand of you that only to which we think we have a claim, namely, Justice, and if it cannot "be found here, we have been led to believe it may be ob-"tained from our Father the King, whom we think must " be the fountain of Justice.

These last words in particular portray the features of the case between them and their Trustees, whose appointment gave dissatisfaction at a very early period, as may be seen in a speech or part thereof in the Indian Department Office, marked A.

Down so late as 1883 (July) they express continued censure of acts done for them and not by themselves. The Trustees have a full portion of obloquy dealt out to them, as they seem to have had a very considerable portion of

lands from them undeservedly.

ECHO and CLEAR SKY repeat the assertions made from 1784 downward of their understanding of their title from the King, between whom and them, they say, "the chain of friendship if it rusts a little, yet brightens again, being of silver." How expressive of their trust and confidence in their First. in their King !

The Executive Council in 1803 had it in contemplation they say to grant a Patent for block No. 4 but "owing to "some circumstances which did not distinctly appear to the board, in 1798, no grant was ever made" what were those circumstances but the actual purchase and payment by Cozens of the Tract which that was part of?

The Government acknowledged 13th August 1806 that they were bound to grant a Patent No. 4 &c. when Brant should designate to them the purchaser.

Col. Claus writes to John Small Esq. Clerk of the Executive Council in 1803 that Brant had sold No. 4 &c. (quere 4 only?) to Cozens at 50 cents per acre, and yet the same Col. Claus strikes a bargain for No. 4 and sells. to Thomas Clark for the same price. Those were remarkable times when No. 4 stood stationary in price for

10 years.

The only admission made by the Attorney General is the existence at one time and subsequent loss, of the warranty deed from Brant to Cozens which circumstance is a more important one than the Attorney General was

probably aware of.

From the general tone of his report it will be argued that the proofs of the conveyance from Brant to Cozens, founded upon the acknowledged power so to do, must have been well founded, to merit the full admission, as far as their existence at one time, in 1796, require to be established, from one of the Attorney General's precision. He quotes also Brant's receipt for the 2nd payment. If the Deed did exist and was honorably and in good faith executed and delivered, if Brant received a second £500, eight or nine months thereafter, for which he gave his receipt in full, until &c. &c. if he had the power which the Government have ever acknowledged he had, to do so and if the consideration as the Council do tacitly, and all

[.] Hon. Thomas Clark was alive when this document was NELSON COZENS. read in Council.

the country at large must fully admit being a valuable and | cation by the lessees or nominees, the Government Patents adequate consideration, what is there in the world to provent or to affect the establishment of the claim set forth, and the speedy restitution of the property claimed? I ask this of the Government. Are there ill feelings, jeal-ousies or envice in way? Surely such feelings ought not to be cherished! what then is the obstacle? Is the Area to be cherished. torney General's report alone in the way? This I do fear is the case. I really fear that my having proved his Report to be a false report, a delicacy of a nature not to be commented upon, as Mr. Stewart wrote to Col. Claus, renders it expedient that of the Report and the appellant; it is not the former that must be sacrificed. it is not the former that must be sacrificed. I say sacrificed, for things have gone that length now, that either the Report or the review theref-must be declared to be false the one upheld, the other repudiated. Let it come to this. I am before the only equitable tribunal technically speaking in the Province. Before them have been placed and read both the Report and its disproofs. No character has been assigned to either, save the concurrence at the first with the report, the question being again before them, I look either for their acknowledgement of the truth of my Statements in relation to the Report, or the reason of their

I pray my interest, indeed my sacred rights, may not be put in jeopardy, toyscreen, out of delicacy, to his feelings and his rank, the Attorney General of Upper Canada if in my dissection of his official paper I have disclosed

inefficiency, partiality, or prematurity of judgement.
I put my trust in His Excellency the Lieutenent Governor; if in Council again, then to His Excellency still, for to him do I look up for a dignified stand against the unfair decision of his Attorney General, which it is not a triffing exertion on the part of any of life Excellency's Council individually to be foremost in hazarding.

When in February last, I returned to Toronto, to enquire into the delays of examining some papers, and the loss of others. I was informed that Wm. J. Kerr Esq. had presented a claim as the heir of Brant for about 30, 000 acres. Mr. Kerr explained to me that according to a diagram in his hands, not fully understood by the Trustees, it was for a portion of land not comprehended within Cozen's purchase. It would appear however that his voucher, dated in 1804, eight years after equally as strong a power of Attorney from all the Chiefs to Brant to sell to Cozens and to convey, and a much stronger separate deed, being one of warranty, were executed, specifies that this tract now newly and unexpectedly claimed by Mr. Kerr is certainly upon Cozens' purchase. This docu-Kerr is certainly upon Cozens' purchase. This document it seems lay hidden for 31 years. Never was it heard or spoken of since Brant's death, and not one word is said or known respecting it in any of the Indian papers or records.

The circumstances of its execution and the peculiarity of mode in which the document is precluded from the benefit af Brants' legal heirs, merit some little attention. The subscribing witnesses ought to be keown, and since so much has turned up of a suspicious character, 'tis but fair that all should suffer, who have been accessary to

The trial of witnesses may sometimes be resorted to effectually to disclose secret incidents.

It would be worthy enquiry whether Brant ever subsequently to 1806 made known to the Government the existence in 1804 of a Power of Attorney and Deed combined in one Instrument to him from the Chiefe for a part of that very tract, which he, under their special Power, for that nurpose, sold for cash and conveyed by dood to Cozens in 1796,—Landa which Col. Claus rendered his extraordinary

were forthwith to be issued; tracts among which was that in particular which in the Records of the Executive Council office from 1790 to 1803, will be seen the government repeatedly asserted their having pledged themselves to grant a Patent for, when called upon by Brant, upon whom alone that act devolved, to do so.

The difficulty attending the reply to this question deters me by no means from making it.

Of the specious mode of reasoning adopted by the Atty.

General in his report, the following is a speciment—" It's General in his report, the following is a speciment—"It is somewhat remarkable that so many years should have been allowed to elapse by Mr. Cozens, Ge." and in the succeeding parsgraph "It is indeed singular, Ge." compare this with the instances adduced by Mr. Abercrombie "On the Intellectual powers," p. 3, on fallacies, viz:—"Fallacies are introduced in what may be termed an oblique manner, or, as if upon a generally admitted authority: the effect of this is to take off the appearance of the statement being made directly by the author, and resting upon his own bare authority, by which we might be led to examine its truth. authority, by which we might be led to examine its truth. For this purpose it is put, perhaps in form of a question; or it is introduced by such expressions as the following.—

"It is a remarkable fact, &c."—" it is somewhat singu-

Toronto, 27th Nov., 1835.

Col. Rewan, Private Secretary,

&c.

I had the honor to address you on the 9th September inclosing my third appeal to His Excellency, the Lieutenant Governor upon my claim; and I subsequently presented to His Excellency's consideration extended and familiar remarks thereto relating, as additional comments to the body of my strictures which it became necessary for me to place before His Excellency in Council upon the report of the Attorney General.

Attached to my last communication to His Excellency were two vouchers not before read in Council; one of 1799, from Barrell and Servante, London, the other from James Wallace of September last.

My father, Sir, came up a third time from Cornwall, praying His Excellency for permission to be heard speak upon the claim, in Council, and begging the favor of His Excellency's personal attendance there. This, observe Sir, was a third journey made by my father, and a third potition to be heard speak in Council of such matters as affect the claim—as for instance the early and constant knowledge of the Executive government of his purchase and deed from Brant under Power, &c. of the payment therefor and the government approval under the certificate of the Secretary of the Province—There was no hearing, allowed

Where, Sir, are the papers I have above enumerated. —
Are they still before His Excellency? Or have they been thrown aside as unworthy, of notice? Or transmitted by His Excellency to the Executive Council? It is two, months Sir, since I took the liberty of addressing His Excellency under a most reasonable hope that the whole claim might undergo a new investigation—and that His Excellency might himself so far deviate from the usual routing. cellency might himself so far deviate from the usual routing of duties as to call for and peruse, the entire documents pertaining, to the claim. The principal object I had in view was to purge the whole matter of that most unfounded 1796,—Lands which Col. Claus rendered his extraordinary view was to purge the whole matter of that most unfounded co-operation hastily, and more than suspiciously to effect a conveyance of to Thomas Clark, in 1806. If the claim presented by Mr. Kerr be a just and a real one, and actually originated in 1804, the date assigned to ment of the truths and incontrovertible reasonings of my it, why was it not known when the land it describes came to be sold by Col. Claus in 1806 and when Brant himself stood up and averred, as he had previously averred, viz in 1798, be had disposed already of that land: and in fact had included it in a schedule of tracts for which on appli- been given to all this? Are my patience which has had included it in a schedule of tracts for which on appliand inconsiderate report so hazardously put forth by the Attorney General; and thus to render the claim, by the preparatory adoption on the part of the Executive Govern-

are but too limited to be still further taxed ? Have I Col. Rowan, been viewed by the eye of a tactician, and my slender resources regarded as giving promise of my being soon obliged to raise the seige and retire? Reccollect if you please sir, that this latter interval of 2 months is not a solitary instance of delay and silence in the period since I first approached His Excollency with my claim in July 1834. approached the excellency with my claim in July 1004. Let me therefore I beg of you sir, be given to understand if I am required to undergo further probation of virtues and forbearance of right. My wearied though not totally exhausted patience will admit the former—my arguments and elucidations of the claim justify the expression of the latter. I am fully content sir, that if the Government of Upper Canada foot unauthorized to allow or to entertiam my claim. am fully content sir, that if the Government of Upper Canada feel unauthorised to allow or to entertain my claim, to the amount of a reasonable compensation, it should be referred to the King; but sir I am not and never will be content that it should be accompanied with a document which I have proved to be composed of the grossest, not to say unpardonable, mis-statements and fallacies.

I prayed His Excellency and now repeat that prayer that said Report be thrown aside as a wolfully ignorant and unjust production, if it escape the charge of wickedness it cannot that of weakness. I prayethen sirthat His Excellen-

cannot that of weakness. I pray then sir that His Excellency may cause my being speedily informed whether I am to remain further in suspense—whether the Report named is to be considered inseperable from the claim—whether I am to expect from the Executive Council a full and conscientious declaration of their opinion of the claim; or whether in the absence of the latter I am to be doomed again to require to the labour of the deak or the duck for the purpose of our to the labour of the desk or the ditch for the purpose of acquiring wherewith again to assert my rights—even tho many years more elapse—and thus re-appearing to supplicate for justice, render myself hable as has my Father been, under misfortunes, for so long a period to that feeling remark from the Trustees to the Council "How long the Petitioner has slept upon his rights!"

is ... I am, Sir,

most respectfully Your very obed't servant NELSON COZENS.

(No. 64.)

Government House, Toronto, 10th Nov'r, 1835.

I am directed to acquaint you with reference to your letter of the 7th inst., that when you first made your application to the Lieutenant Governor on the part of your tather respecting his claim on the late Joseph Brant, His Excellency considered your case from the statements placod before him to be a private transaction which could not be settled or disposed of by the local government.

The Lieutenant Governor at your solicitation laid your tatement and papers before the Executive Council, who after a minute examination of them referred them to the Law Officer of the Crown for his opinion. been repeatedly informed of the decision of the Executive Council, that the Executive Government have it not in their power to afford you relief.

I am desired to state further, that your different appeals and statements have been forwarded for the consideration

of the Executive Council.

I am. Sir,

Your ob't Servant, Wm. ROWAN.

(Signed) Mr. NELSON COZENS.

No. 65.

Токонто, 11th Nov'r, 1835.

Cot. ROWAN,

letter of the 7th instant, I must beg the liberty with grea letter of the 7th instant, I must beg the liberty with gread efference to His Excellency's opinion of the private character of my claim, to explain, that my reasons for retaining a belief opposed to His Excellency's are—1st. The public, authorised character of Brant as the only fully accredited and invariably acknowleged Agent of the Six Nations Indians.—2ndly. The only contending party upon whom my claim under any mode of procedure whatever would rest, being the Executive government of this Colony. Upon the latter I again humbly call to report in conformity with the details of the case presented through statements, vouchers, &c., so that all parties here, agreestatements, vouchers, &c., so that all parties here, agreeing upon the facts elicited, will abide the issue of a reference to His Majesty. To support the first reason it needs but to refer to the lengthy Report of the Executive Council May 1830, and the general and special reports printed and written by the Trustees of the Six Nations. In enlarging upon the second proposition above, I have to suspect that an important fact has been overlooked by His Excellency—I would respectfully call His Excellen-His Excellency—I would respectfully call his excellency attention to the isolated position in which, as regards the action of the law, the Six Nations in reality standbeing subject to no consequences, as the Executive Council aver, of the proceedings that might be instituted against them as a body, originating in the acts of their duly constituted Agent, Captain Brant, whose power the Executive government always did and yet do acknowledge. Executive government always did and yet do acknowledge. The sale to my father was an act of a public and lawful Agent, approved and sanctioned, nay almost as the Council say in 1830, was sometimes the case, assisted by the government. The sale was known, early and late, to the Executive Government, and yet in 1806 a Patent was sufficient to increase of the parent was sufficient to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to increase of the parent said to fered to issue to Thomas Clark for a portion of the purchase, although Brant cautioned and protested to Governor Gore against it—and though Stewart, a Trustee, wrote to Claus, the principal Trustee, in terms indicative of the absence of justice in the hasty transfer to Clark.

What the Crown has granted the Crown must defend. How then I would respectfully enquire can the act of Brant a public agent doing for a body in alliance with the Crown and by the Crown defended and protected and patronized, yet out of the reach of the law of contracts as regards prosecutions, be termed one of a private nature? The government having become possessed of the lands including my Futher's purchase, ulterior to the date of the deed to him, and having granted by patent a portion thereof, are no doubt the party on one side concerned, and it behoves them to treat for the same in a spirit of amity and fairness due to the loyalist who has called upon them therefor, and

to the extent of their power derived from the King.

I have taken the liberty of thus reasoning upon the subject with His Excellency the Lieutenant Governor under the firmest conviction of the soundness of my arguments; and I trust it will appear satisfactory to this Excellency, that my mode of treating the case, in regard to its public or private character is strictly correct, and that it warrants my dissenting from His Excellency's view of it.

It is true that I have been informed of the brief remarks of the Hon. Executive Council upon the claim, but the necessity having arisen for further action thereon, by the production of new facts originating in a counter claim for a part of my father's purchase as well as from adverse views of the consideration money, &c. paid, I deemed it necessary to recur to his Excellency again—that unfair inferences might not pass unnoticed nor erroneous statements go undetected. I consequently strove to divest the matter of mystery, and having His Excellency's approbation that the Executive Council should reflect upon the materials before them, I have to return thanks therefor; and I hope for It is true that I have been informed of the brief remarks fore them, I have to return thanks therefor; and I hope for an early opportunity of further expressing my gratitude to Hie Excellency for such indulgence, should the Executive Council in their good pleasure recommend to His Excellency the allowance of the boon prayed for in the document

I am Sir,

Your obedient Servant,

WM. ROWAN.

(Signed)

Mr. NELSON COZENS.

(No. 67.)

TORONTO, 13th November, 1835.

To Col. ROWAN, Private Secretary, &c. &c. Ŀ.

I have the honor to acknowledge the receipt this morning of your communication of vesterday, conveying the opinion of His Excellency the Lieutenant Governor that my claim for Grand River Lands purchased by deed from the accredited agent of the Six Nations Indians under the sanction of the Executive Government of this Province, which recognized the Agent named, as well as the sale to my Father (granting a certificate to that effect under the Provincial Secretary's Seal of office) is now regarded as a matter of a private nature between my Father and the late Capt. Joseph Brant.

Having entered upon the several questions which must necessarily connect themselves with such a view of the case, and having already produced arguments adapted to the treatment, as I thought, of every possible point of sub-ject, I am apparently forbidden to prolong the discussion of matters of a nature affecting the faith of the Executive

Government of this Colony.

Great indeed is the mutation which our language is dooined to suffer in the following expressions; the words of the Executive Government, as recorded in their Council in 1830, the echo of earlier reports, bear no signification whatever. Writes the Chief Justice of Upper Canada, as Chairman of the Honourable the Executive Gouncil on the 14th of May 1830 in the Council Chamber, the following words of a report approved of by His Excellency Sir John Colborne: "The Government of this Colony seems merely to have assented to the GENERAL MEASURE (i. e. the sales by Brant in fee, or endless leases) and to have given them their sanction and assistance in the conviction that it would be beneficial to the interests of the Indians.

What in the name of any power on earth could they do more than assent, sanction and assist?—the almost precise words of my fathers affidavit as to the Government approval of his purchase. The Trustees of the Indians, on approval of his purchase. The Trustees of the Indians, on 19th May 1835, "Reccommend such claims for confirmation by the Crown as were founded in leases or convey"ances executed by the late Capt. Joseph Brant, who upon 
"the evidence laid before the trustees appeared to them 
"clealy to have been the accredited agent of the Indians, 
"and whose acts in the sale and leasing of their lands had 
"been many years since fully sanctioned by the Home Go-

" vernment.

"The Executive Council us above further say, "they " surrendered into the hands of Government certain por-" tions of the lands possessed by them, and for which they " had found or intended to find purchasers,"-" the object of the surrender was therein expressly stated, that the same lands might be re-granted by His Majesty to such persons as their Brother and Agent, Captain Joseph "Persons as their prother and agent, captain Joseph Brant, might think most meet and proper, &c."—and further, "in order that grants under the Great Seal of "the Province might issue for the purchasers further "satisfaction,"—Again are these words, "the making these contracts with the individual purchasers, and the " fixing the consideration, were as it appears the acts of "the Indians themselves, either concluded upon in their "Council or negociated by their Agent, Captain Joseph "Brant, who was fully authorised for that purpose."— These are but a few of the thousand like declarations throughout every report of the Executive Council and the Trustees that I have had before me;—they suggest by the way the following queries. Did the surrender to Government include all Cozens' purchase? What person was it to whom No. 4, &c. was sold by Brant as by him asserted in Council and by them admitted in 1798? By what authority was the sale of No. 4, &c. (one-third of Cozens' purchase) which Colonel Claus informed the Executive Council in 1803 had taken place, made to Tho's Clark in 1806 in defiance of Brant's remonstrance? Had the Trustees any power to sell while Brant was ulive? Did the Executive Government know that Cozens had purchased? Did they know in 1798 he had a deed in tee simple? Did the Provincial Secretary certify thereto? Was that sale, deed, &c. known in Council when Tho's Clark obtained a Government Patent? What occasioned the extraordinary correspondence between the Trustees, Alex. Stewart, Esq. and Col. Claus, 31st October, 1806, at the sale to Tho's Clark? Here I will pause and take leave to ask if His Excellency the Lientenant Governor will be pleased to reflect upon the conclusion to which replies to the above, either negatively or affirmatively must inevitably lead. It must be allowed that the report of the Executive Council in 1830 and those of the Trustees in 1834-5, are in direct opposition to that of the Attorney General. To whose injury does it operate? To whose benefit does it incline?

I have a favor to request of His Excellency the Lieut. Governor. It is permission under His Excellency's favor to refer to correspondence on Indian Affairs as recorded in the Office of the Executive Council, to which correspondence I have yet had no access, and which it is my earnest desire to be acquainted with. If such a reference should be permitted by His Excellency. I shall feel my-self most happy in relieving the Clerk of the Executive Council of any unnecessary trouble by pointing directly to the documents which are supposed to contain matter of connection with my father's purchased tract; and I therefore beg the favor of His Excellency causing permission to be given me to make extracts therefrom if it seem desirable, as also to receive from the office the papers furnished by me, so soon as they shall have been disposed of definitely, in relation to the claim before.

them. I have the honor to be, Sir.

Your obedient Servant. NELSON COZENS.

No. 68.

Government House, 14th Nov'r, 1885.

I am directed by the Lieutenant Governor to acquaint you in answer to your application to be permitted! to refer to certain documents in the Executive Council. Office relating to Indian Affairs, that His Excellency can, see no objection to your being furnished with any infor-

mation connected with your claim, that can be obtained in the Council Office. His Excellency is desirous however that you should be reminded that the case which you have brought before the Executive Council, cannot be disposed of by the local government.

I am Sir,

Your obd't serv't,

[Signed]

WM. ROWAN.

Mr. Nelson Cozens.

(No. 69.)

(Copy.)

Copy of a Minute in Council, approved by His Excellency the Lieutenant Governor, on the several applications of Mr. Nelson Cozens, relative to his claim for lands on the Grand River.

In Council, 19th Nov'r, 1835.

The Council having taken into consideration the communications of Mr. Cozens, can only recommend a reference to the order of the 3rd of September last, in which they are more fully confirmed.

They see no objection to copies of the correspondence desired being given which Mr. Cozens considers necessary to elucidate his case.

JOHN BEIKIE, (Signed)

Clerk Executive Council.

Mr. Nelson Cozens, Toronto.

No. 70.

To the Honorable the House of Representatives of Upper Canada, in Provincial Parliament assembled.

The Petition of Nelson Cozens, of Cornwall, in the Eastern District, son of a U. E. Loyalist,

That your petitioner and his father Joshua Y. Cozens, of Cornwall, did in July, 1834, present by Petition and Memorial to His Excellency the Lieutenant Governor in Council, a claim for a tract of land immediately above Block No. 8, so called, upon the Grand or Ouse River purchased by Petitioner's father in 1796 from the late Capt. Joseph Brant, the accredited and acknow-ledged public Agent of the Six Nations Indians, for a valuable consideration, by deed of bargain and sale and warranty under special Power from the Chiefs to Brant to sell and convey to Cozens, and under the sanction and approval of Governor Simcoe signified by the hand and seal of the Provincial Secretary.

That said Power of Attorney, Deed of conveyance on Parchment, and Government certificate, were at the instance of Governor Simcoe, entrusted by Cozens to his confidential Agent and borne to London for the avowed purpose of disposing of to British emigrants and actual purpose of disposing of to British emigrants and actual settlers; but that upon failure to dispose thereofafter two or three years, said Agent returned to America, depositing said original deed and documents with an eminent Mercantile house in London, which shortly after became insolvent, and the partners whereof, Messas. Barrell and Servante in a few years both died Servante, in a few years both died.

That owing to a series of adverse circumstances up to the period of the last war, your petitioner's father, as is known to members of your Honourable House, was debarred the means of personally seeking to recover said deed and papers, which until of late years he had no just ground to fear were lost; and that from the close of the war to the present, such have been the hardships through which your present, such have been the hardships through which your petitioner's father has struggled in the care of a large family, with his right arm crippled, that it was impossible he could have personally made those exertions for the recovery of his absent titles which his friends and agents and his son, your petitioner, have for the last 10 years unceasingly

That your petitioner in whom is now vested his father's right detailed most accurately and minutely to His Excellency in Council, the numerous particular circumstances attending the titles in question, and prayed for the recognition by government of your petitioners right to such portion of the land described, as His Majesty's Colonial Government were presently in possession of; and for an equivalent for that portion which with the knowledge of the pre-vious sale by Brant to your petitioner's father, they the government had ceded to others.

That upon reference of the matter by the Executive Council to the Trustees of the Six Nations, and their report thereon, it was submitted to the legal Crown Officers. and firstly underwent an investigation by the Attorney-General of Upper Canada, a person of then only two years residence in the country; unqualified for the high office he fills, and wofully ignorant of the early history of the landed transactions of this Colony.

in by the Executive Council and approved by His Excellency.

Your petitioner obtained a copy thereof and having proved the entire report to have been based upon error and ingustice, and so far convinced the Executive Council and His Excellency the Licut. Governor of the falsities and fallacies thereof as to cause a third hearing upon it; and it becoming inevitable that either your petitioner or the learned Attorney General the first legal adviser of the Crown in Happe Canada was the honorificad was positioned. Crown in Upper Canada, must be sacrificed, your petitioner was informed that His Excellency the Lieut. Governor inclined to view the case as one of a private nature; and that the honourable the Executive Council of Upper Canada could not consistently with their instructions from the home government, advise the Lieut. Governor to act in opposition to his first legal adviser the Attorney General; and your Petitioner on manifesting his dissatisfaction at the defence of error and imbecility, was given to know that he might appeal if he desired to his Majesty's Government.

Your Petitioner still humbly remonstrated in mild, feeling and respectful language, against the Attorney General's Report—begged it might be set aside, or that the Council might express their undisguised opinion thereof; solemnly declaring his readiness to appeal to His Majesty, but condemning the attachment to the claim of the uniform but condemning the attachment to the claim of the uniounded Report of the Attorney General.

Your Petititioner therefore humbly calls upon Your Honourable House the Representatives of his Country to afford him that remedy which in this case has been denied him; he prays Your Honourable House will cause an investigation into the merits of his claim upon the Government—the treatment it had experienced during his personal attendance thereon pending most of the interval since July 1834, entreating the Lieutenant Governor and Council to hear him, to reason with him, or promptly to decide with him.

Your Petitioner prays your Honorable House will receive and examine the various vouches pertaining to the claim in question, and pass indgment upon that report of the Attorney General, which the Liutenant Governor and Council have forborne to condemn or defend; and that Your Honorable House will so act as will ensure to your Petitioner and his aged Father, His Majesty's favourable reception of the claim in question, to the end that Your Petitioner and his Father may be speedily re-invested with their equitable

And Your Petitioner will ever pray

NELSON COZENS.

Toronto, Upper Canada, 21st January, 1836.

(No. 71.)

COMMITTEE ROOM. Thursday, 10th Feb'y, 1836.

Messrs. PERRY, COOK, and YAGER.

AUGUSTUS JONES, Esquire, of Cold Spring, Surveyor, called in.—Shewn a receipt purporting to be that of the late Captain Joseph Brant from Joshua Y. Cozens for £1000, dated June. 1797-Says the signature is that of Captain Joseph Brant-Says he is Executor to the estate of the late Captain Joseph Brant;—had various conver-sations with Capt. Brant, respecting Grand River lands that Captain Brant frequently spoke of having sold to Joshua Y. Cozens the tract of land commencing above the tract sold Wm. Wallace—Was engaged by Captain Brant to survey Grand River lands .- Along the River, which was crooked, the Indians were hunting, and they described the land as being low, and gave a bad account of it, that is, the upper part of the tract sold to Cozens,about two-thirds of it :- disagreement arose between Captain Brant and Col. Claus, the acting Trustee, -the latter always encouraged a party of Indians and other persons adverse to the former to create dissensions—Claus principally managed the Affairs of the Indians alone, without consulting the Chiefs or Brant: - Witness is shewn a letter dated Fort George, 31st December, 1803, addressed to John Small, Esq., Clerk of the Executive Council—says the signature is that of the late Col. W. Claus:— Shewn also a letter or copy of a letter in said Claus' hand writing, from Alexander Stewart, Esq. dated October 31st, 1806, addressed to said Claus-purporting to be a copy-says the handwriting is that of Claus.—Shewn a paper purporting to be a speech of Indian Chiefs of Six Nations, addressed to Col. Claus, Trustee, dated Grand River, 18th April, 1811—Signed by Tekaribogen and others, Chiefs,—cannot say for certain if it be authentic, it is on the subject of complaint against the Trustee, and is in principle the same as Captain Brant entertained of the Trustee and his management.

AUGUSTUS JONES, D. P. S.

(No. 72.)

COMMITTEE ROOM, 13th Feb., 1836.

PRESENT.

MESSRO. PERRY, CHISHOLM & BRUCE.

WM. HEFBURN Esq. Trustee, called in and heard speak as follows:—Is the acting trustee, examined Brant's receipt from Cozens for money paid for Grand River Lands, never investigates the consideration of Leases from Brant, but upon being convinced of the originality of the conveyances produced, or certified copies thereof reports favorably to the Governor and the Patent issues. to the Governor, and the Patent issues;—says that Patents have issued to persons who appear to have paid but a trifling if any amount for Lands, and Lands too in considerably large tracts to various persons. Every conveyance from Brant, as agent, allowed without any investigation by the Trustees of the consideration. There are cases referred to the trustees by the Executive Council, on which that council required a report by the trustees, where the original conveyance is lost, and which claim depends upon the satisfactory proofs of the existence at one time of an original deed—the case of David Thomson is of this nature, and involves the tract of about 4000 acres. The trustees reported thereon that there was sufficient evidence of the existence of that deed, and recommended the admission of the claim, and that a patent might issue, as tho' the original deed had been produced.

#### INTERROGATED.

When you made the following remark in your report of 19th May, 1835. "Calling the attention of the Executive "Council to the long period during which the petitioner " has slept upon his rights and permitted sales of the land "included in the alleged conveyance from Capt. Brant to " take place without any notice, so far as the trustees are "informed," was it in reference to an investigation of all the documents accompanying the petition and claim of Mr. Cozens? No:-I did not investigate the documents.*

WILLIAM HEPBURN.

(No. 73.)

COMMITTEE ROOM, House of Assembly, 23rd February, 1836.

PETER PERRY, Chairman. CHISHOLM, and BRUCE.

#### ATTORNEY GENERAL Interrogated.

Question 1.—Did you understand that the Government were not authorized to recognize the sales of Captain

Answer 1 .- The Government are authorized and have recognized all sales made by Brant under sanction of the Government

Q. 2—Had you examined Mr. Cozens' papers previous to making your Report?

An. 2—I did of course very carefully and frequently

examine them.

Q. 3-Were the admissions of the existence of the Deed to Cozens founded upon the papers of the claim?

An. 3-Of course it was-but this and all admissions in the Report being for arguments sake, must be taken with relation to the reasoning upon the case generally.
Q. 4—Have parallel cases been referred to you, to that

of Mr. Cozens?

An. 4-In my capacity as confidential law adviser of the Executive, many cases parallel in their nature are referred to me.

Q. 5-In cases where the purchasers from Brant appeared satisfactory, what has been the nature of your Reports ?

An. 5-I am not at liberty to state what have been my answers to particular cases referred to me from the Executive.

Q. 6—Have you reported unfavorably upon any cases referred to as above!

An. 6-I respectfully submit that my last answer applies also to this question.

Q. 7.—How do you reconcile your answer to the lat question with your Report and decision upon Cozen's claim?

An. 7-I never considered the case of Mr. Cozens as An, 7—I never considered the case of Mr. Gozens as coming within that class. It is not one of those sales which have been sanctioned by the Government and to which I referred, I particularly meant the sales made under the power of attorney given to Brant by the Indians and which was recognized by the Government.

Q. 8.—Do you say the sale to Cozens was not made in pursuance of that power of attorney.

An. 8—It could not; inasmuch as the transaction is stated by Mr. Cozens himself to have taken place long anterior to the date of the power of attorney referred to.

terior to the date of the power of attorney referred to

Q. 9.-Are you aware that the Government have recog-

^{*} Nore - Compare this confession with his assertion in his letter 24th January, 1835.

nized purchases from Brant independent of any power of Attorney?

An. 9.—I have no knowledge of any such cases. Q. 10.—Is the circumstance of Cozens' Deed from Brant appearing to you not to have originated in a power of attormay, that which led to your reporting unfavourably upon his ciaim?

An. 10 .- The want of authority on the part of Brant, whether derived from power of attorney or otherwise appeared an important objection; my opinion however against Mr. Cozens' claim was drawn generally from the evidence adduced by Mr. Cozens himself, in its support, which appeared to me unsatisfactory.

Q. 11.-To what particular part of the evidence do you

allude, as being unsatisfactory?

An. 11.—My objections are more fully stated in my Report than I could set forth from my recollection of the documents before me when I made that Report ; I particularly however allude to the affidavits of Mr Cozens.

Q. 12.—Are you aware of the Executive Government having ever rejected any claims under Brant on the plea of

inadequacy of price?
An. 12.—I do not know what the Executive government may have done in the cases alluded to.

Q. 13.—Do you think it would be fair and right for the Government to do so?

An. 13 .- I am incompetent to give an opinion upon a supposed case: the particular circumstances of each case may be so different.
Q. 14.—Do you understand the Government recognized

sales by Brant upon the expediency of the cases as they were presented, or upon one general principle?

An. 11.- I cannot take upon myself to sny what might be the principle reasons that actuated the Executive Gov-

ernment at that time.
Q. 15.—In a legal point of view do you consider a man's title might be defeated for want of a fair consideration?
An. 15.—Want of fair consideration is one among many circumstances which might legally be brought forward to vitiate a sale, but in itself it is not conclusive.

Q. 16.—In your Report you particularly dwell upon the circumstance of Mr. Cozens not having paid a fair consideration for the land; were you aware then that vast tracts of land, about the time of Mr. Cozen's purchase, and since, have been sold for about 5d. or so per acre?

An. 10.-1 am not aware of sales upon such terms. My remarks upon the smallness of the sum stated to have been paid by Mr. Cozens, were made chiefly with reference to contemporaneous sales alluded to in my report which were

made at so very different a rate.
Q. 17.—Had you known that equally large tracts of land in 1828 to 1831 had eeen sold equally low, would you have

laid the same stress upon the consideration ?

Q. 17.-I do not think that my general impression respecting Mr. Cozen's claim would have been materially altered, though the particular fact of price might have appeared less remarkable.

18.—Supposing the objections as to Brant's power and the stress laid upon the consideration were removed,

what would then be your decision or report?

An. IS.—If those two objections were removed, of course the reasons founded upon them must, as far as they are of importance, be removed also.

Q. 19.—Are you aware that the Government have of late recognized purchases under Brant of long standing?
An. 19—I am aware that they have recognized such pur-

chases.

Q. 20.—Are you aware that the purcha 3 by Wallace and Tiffany was confirmed? -Are you aware that the purchase of Block No.

An. 20.—I belive so.

Q. 21.—Do you know if the sale was made by Brant to Wallace and Tiffany previous to that made to Cozens?

An. 21.—I believe the date is anterior.

Q. 22.—From what source did you derive your know-

ledge of the Indian title?

An. 22 .- From Haldimand's Grant.

Q. 23.—Do you know of any other title?
An. 23.—I am not aware of any instrument other than that of Sir Fredk. Haldimand.

T2

Q. 24.—Do you consider the circumstance of a free grant of 1200 acres of land made to Mr. Cozens and to his brothers as U. E. Loyalists, by Governor Sincoe as weakening his claim to the Grand River lands?

An. 24.—I do not say that it weakens his claim, because I cannot persuade myself that he ever had any claim.

Q. 25.—Supppose that he had a claim for the purchase of this Grand River Land?

An. 25.—If he had such claim I do not affect to see that the Grant of 1200 acres would in any way interfere with it.

Q. 26.—Explain then why you introduced that grant of lands from the Government to Cozens into your Report upon his claim for Grand River lands?

An. 26 .- I introduced that as I have introduced many other parts of Mr. Cozens' statements that I might test their consistency generally.

Q. 27.—Did you think it necessary to adduce the sale of Block No. 3 as of the highest price, rather than that of No. 1 and 2, lower down the River, as a comparison with Cozen's purchase ?

An 27.—Being adjoining Blocks the comparison in price appeared to me to be the more remarkable, as the value might be supposed to be the same or nearly so.

ROBERT S. JAMESON.

# MESSAGE

From His Excellency the Lieutenant Governor transmitting School Reports.

## F. B. HEAD.

The Lieutenant Governor transmits to the House of Assembly, copies of such Reports of Trustees of District Schools, and of Boards of Education, as have been received for the year 1835.

GOVERNMENT HOUSE,

25th February, 1836.

# DISTRICT SCHOOL REPORTS.

# ANNUAL REPORT OF THE OTTAWA DISTRICT SCHOOL.

To His Excellency Sir John Colborne, K. C. B., Lieutenant Governor of the Province of Upper Canada, &c. &c. &c.

The undersigned majority of the Trustees of the District School of the Ottawa District;

HUMBLY REPORT:

That the Annual Public Examination of the said School was this day held at the School-house in Longueil, pursuant to public notice to that effect.

Since the last annual report an increase of six has taken place in the number of Pupils, there being at present twenty-eight, four of whom are studying the Latinlanguage.

The meeting was numerously attended by the friends of the Pupils, who witnessed with much satisfaction the evident advancement of the Scholars in their res-

pective departments of study.

The Trustees have much pleasure in repeating their former commendations of the attention of the Teacher, Mr. Gregor, and of the competent manner, in which that gentleman fulfils the important duties confided to his charge.

All which is humbly submitted.

(Signed)

GEORGE HAMILTON, T. KEARNS, RICH'D PHILIPS HOTHAM.

COPY.

REPORT OF THE JOHNSTOWN DISTRICT SCHOOL—BROCKVILLE, FOR 1835.

## I.—Time.

1st.—Hours of attendance.—The School has been regularly opened every morning with prayer and calling of the list at a quarter before nine o'clock; but in the summer months, from April to October, there was school every morning from 6 o'clock to 8, partly to overtake some extra subjects of study and partly to diminish the duration of attendance during the heat of the day—The school continued in the former part of the day till half past twelve—It met again in summer at 3 o'clock P. M. but in winter at 1, and continued two hours and a half. Thus making an aggregate of about seven hours attendance every day except on Wednesday and Saturday which are half holidays.

2d.—Its general distribution.—The forenoons have been chiefly occupied with studies in the department of language, viz: English, Latin, and Greek, Reading, Grammar, Translations, Compositions, &c.—but on Wednesday and Saturday, Geography has been substituted for one of the ordinary lessons in this department.—The afternoons were employed in Writing, Ciphering, Mathematics and History.

#### II.—Studies.

3.—Subjects.—1st. Language, English, Latin and Greek.—History, Composition and Elocution. 2d. Mathematics, Geometry, plane and solid; Trigonometry, plane and spherical, Algebra, Mensuration, Book-keeping, Arithmetic, Geography. Writing and Stenography. 4. Text Books—1st. English Mavor's spelling book, Walker's Dictionary, New Testament, Paley's Works, English Reader, History of England (Goldsmith's), Murray's Grammar, Kirkman's Elocution, &c.

2nd. Latin, Ruddiman's Grammar; Seley's or Westminster Grammar;* Corderius;* Select Lessons;* Cornelius Nepos;* Cæsar;* Sallust;* Livy;* Phædrus;* Ovid;* Virgil;* Horace;* Terence; Exem: Minora; Mair's Intro; Adam's Anti-

quities;

3rd. Greek-Grammar-Moore's; Mathias's;* New Testament; Xenophon;

Herodotus; Homer; Potter's Antiquities;

4th. Mathematics, &c.—Euclid;* Leslic Ingram for Geometry and Trigonometry; Algebra; Bonnycastle and Bridge;*—There is no work on Book-keeping suited to affairs in this Province; an attempt has been made to supply for the school this defect by adopting Morrison's excellent work as a basis; In Arithmetic; Colburn's In-

^{*} Used in College at Toronto-The Text Books of which will soon supersede all others in the School.

tellectual Arithmetic—Bonnycastle's,* Ingram's, Walkingham's;—In Geography—Woodbridge's, Bell's (6 vols. 8 vo.), Keith on the Globes, &c., Guy's Astronomy;

Mayor's Stenography simplified.

5th.—Method of Instruction.—The above enumeration of Studies and Text Books by no means gives an adequate idea of the business. Of the scholars, and the extent of their pursuits besides the ordinary business of a school in the regular recitation of the appointed lesson; each class has been compelled frequently to review what had been already learnt, to condense it; to abstract principles from their illustrations, to illustrate afresh these principles by new and familar examples, and thus at once thoroughly to understand the subject, to expand their views concerning its use; and so to judge and reason clearly and accurately on all topics. These effects have been further heightened by a system of interrogation often extending far beyond the immediate topic of study—but tending more fully to explain it—to shew its relation to kindred topics, and the connection between all the branches of human knowledge,-to elicit the views of the scholars themselves; and so, by exposing their mistakes, and making them seek and give a reason for every thing, to teach them to correct what they perceived to be erroneous, and believe more firmly and on better grounds what they discovered and felt to be true and right.—This is really a system of logic not the less useful and valuable because stript of its abstract and scholastic dress.-Thus in Grammar and Composition, besides reciting the principles, definitions, and rules, and applying them to analysis of the numerous and well selected examples contained in Murray's large exercises, the scholars have been led constantly to apply them to every work they might be reading to illustrate them in frequent and extensive translations from the classic authors already enumerated. cultivate their capacity to discern good composition, to form surely and soundly their The design of this is to taste and habits of mind, and give them the desire and ability to imitate or practice what their judgments approve. This has been especially the case with the more advanced scholars who have been taught to consider the origin and structure of language in general—its progressive variations—the canons by which it should be tried and established, and the applications of these universal principles of all languages to the regulation of their vernacular tongue.

6. The accompanying sheet exhibits concisely the number and names of the scholars who have attended during any part of the year; all the branches which they have studied, whether successively or at one time, the highest rate of charge during the whole period—though that was often much lower, especially when more than one scholar attended from the same family, in which case a considerable deduction from the current rates has been made. The last column indicates who have left, and how many remain—the whole number has been 68; of whom 40 remained all the vacation. The average is about 45—the highest at once was 51. Several who reside at a distance are detained by the season—the whole number that have not paid any thing has been 3. These were not expected to pay—several others have not yet paid, and some have paid in part, but both of these latter are expected still to pay.

7. A preceding paragraph has explained in some degree the system of teaching—the objects sought and the means of endeavoring to attain them. This will explain what have been the agents in putting these means into operation. The monitory system or that of mutual instruction so far as was deemed prudent in the circumstances of the school has been adopted. The best scholar of each superior class has been distinguished by being called on to aid or superintend a class inferior to his own. Besides this—Mr. Isaac Gregory was employed regularly as an assistant, receiving in addition to his education £20 per annum—likewise Mr. Richard Chaffey and Mr. Thomas Reynolds each receiving his education for his assistance. Another regular assistant was engaged at £50 per annum, but the impropriety of his conduct prevented

#### REPORT

OF THE

#### MIDLAND DISTRICT SCHOOL.

COPY.

To His Excellency Sir John Colborne, K. C. B. Lieutenant Governor of Upper Canada, and Major General commanding His Majesty's Forces therein, &c. &c. &c.

MAY IT PLEASE YOUR EXCELLENCY:

The Trustees of the Public District School for the Midland District respectfully report and submit for Your Excellency's information, the present state of the Seminary under their charge and superintendence.

It will appear from the schedule accompanying the report and containing the classes of the Pupils of the Midland District School, at the public examination held on the 24th day of July, 1835, that the Institution embraced five classes, and that the entire number of scholars in the several classes amounted to thirty and two. The ages of the pupils did not exceed fifteen, and some were below nine years of age; affording evidence from their juvenile ages, and the branches of education, in which they were examined, that they had succeeded many who had retired from the District School, and had entered upon a course of study and employment to qualify themselves for the several professions in life. In their turn they are now in a course of discipline and education to become useful and respectable members of society in public and private life, and to reflect credit and distinction upon the Teacher who now fills that office.

The Trustees respectfully remark to Your Excellency that the Pupils in their examination afforded proofs of attention and diligence in their studies; and evinced a laudable spirit of emulation for pre-eminence and distinction in the classes to which they are assigned; and the Trustees further add that Mr. Baxter continues to discharge the duties of Master of the Midland District School with the confidence and approbation of the Trustees, and with an encouraging share of public patronage.

While, however, the state of the Public School and the progress of the Pupils are satisfactory to the public, the Trustees have cause to regret the want of a new and suitable edifice for the accommodation of the Pupils, and the comfort of the Master. The erection and appropriation of a decent building for these objects is a tribute justly due to the cause of literature and science, from whose diffusion and extension next to religion, society derives its most valuable blessings. It is to be hoped that measures will soon be taken to obtain from Government the pecuniary aid and supplies required for an edifice, and in the furtherance of which laudable object, the Trustees are fully sensible that Your Excellency will readily promote the undertaking.

All which is respectfully submitted.

(Signed)

GEORGE O'KILL STUART, THOMAS MARKLAND, JOHN MACAULAY, JAMES SAMPSON.

#### REMARKS.

The Pupils in the Greek Class evinced a minute knowledge of the elementary principles of that language.— The Latin Class read in Casar and Ovid with correctness and fluency, and the Class in Geometry demonstrated propositions from the first book of Euclid with accuracy.

The greater part of the boys in the school were examined in the principles of English Grammar, English reading, arithmetic, writing and gave satisfactory evidence

of progress.

Upon the whole we declare our satisfaction with the proficiency of the pupils (most of whom are under the age of twelve years) and our increasing conviction that the public school for this district under its present management deserves well our approbation, and commends itself to public patronage.

#### REPORT

OF THE

# BOARD OF EDUCATION

FOR THE

#### DISTRICT OF OTTAWA.

To His Excellency Sir John Colborne, K. C. B. Lieutenant Governor of the Province of Upper Canada, &c. &c. &c.

The undersigned a majority of the Members of the Board of Education of the District of Ottawa;

HUMBLY REPORT:

That a meeting of the Board was this day held at the Court House in

Longueil in the said District, pursuant to public notice to that effect.

The number of Common Schools reported for the current year is twenty-nine, comprising about six hundred and thirty-four scholars; the schools appear to be conducted in accordance with the Statutes which have been made for their regulation; and the Board recommend that the sum of three hundred and forty-nine pounds nine shillings and seven pence, be appropriated for the support of the said schools for the fiscal year ending on the first day of June next inclusive of the Clerk's salary.

The present situation of the affairs of the common schools, however, is such as to demand from the Board some additional remarks which they respectfully beg leave

to submit to Your Excellency's consideration.

It is known that the population of the District has increased upwards of seven hundred in the year ending on the first day of April last; and a similar rate of increase is reasonably supposed to have taken place between that day and the

. It would be natural to expect that, with so large an addition to the population a corresponding increase would take place in the number of common schools; but, on the contrary, on comparing the present list with the last year's report, there appears a decrease of three in the number of schools, and a proportionate deficiency in the

This declension in the prosperity of the common schools is, however, the natural result of the suspension of the payment of the funds allowed by law for their support: a fact which it becomes the unpleasant but imperative duty of the Board to state and

explain.

When Mr. Donald McDonald Roy was removed from the office of Treasurer of the District by the Court of General Quarter Sessions in the month of April last, one of the causes which led to his removal was, the very general complaint of the Teachers and Trustees of the common schools of the irregularity and inattention which that officer had for a long time manifested in his administration of the Common School

The amount recommended by this Board to be appropriated for the support of the schools for the year commencing on the 1st of June, 1834, and which Mr. Mc-Donald ought to have applied for, and undoubtedly might have obtained, in the course of last winter, remained then, and does still remain, in the Provincial Treasury. Of this sum (amounting to nearly £350,) the Teachers for the last mentioned period have been hitherto deprived through what the Board conceive to be the unjustifiable conduct of the late Treasurer.

By the Provincial Statute of 60th Geo. 3rd, chap. 7, section 5th, it is enacted that

" it shall not be lawful for the Governor, Licutenant Governor, or Person administer" ing the Government, to issue any further Warrant on the Receiver General to any
" District Treasurer, until a faithful account shall be rendered, authenticated by

"proper vouchers, and attested by the oath of the respective Treasurers, of the expenditure of the sums already advanced, or to be hereafter advanced, on account

" of their respective Districts."

Shortly after the removal of Mr. McDonald from the Treasury, his successor, Mr. Johnson, applied to the Receiver General for the amount, which as above stated, had been appropriated for the support of the common schools for the then current year; but was informed, in reply to his application, that it would not be granted until the late Treasurer had complied with the requisitions of the above recited clause.— Upon receipt of this information the Treasurer waited on his predecessor in person, and requested him to furnish the vouchers and accounts as required by law; but the latter peremptorily refused to do so, and has ever since persisted in his refusal.—The consequence is that the Teachers not only remain unpaid, for the year commencing on the 1st June, 1834, but they must also remain unpaid for ever hereafter, unless the late Treasurer can be compelled to furnish his accounts or unless the law itself be altered.

With the view of remedying as far as lies in their power a grievance so serious, and so justly complained of, the Magistrates of the Disirict in General Quarter Sessions, have caused proceedings to be instituted in His Majesty's Court of King's Bench against the late Treasurer: but accidents have occurred to delay the course of those proceedings, rendering the prospect of obtaining ultimate justice very remote. Under these circumstances the Board most respectfully represent, that where, as in the present instance, the administration of the fund in question has been transferred to a new recipient, it really seems hard that a large and respectable body of men employed in the important task of instructing the youth of the country, should be injured and impoverished by the deprivation of their principal means of support, through the obstinacy of any public servant whose official delinquency has occasioned his removal.

The Board are aware, however, that no discretionary power remains with Your - Excellency to overlook or dispense with the direct provisions of the statute; they only desire to place the subject in such a point of view as to demonstrate the propriety of a speedy alteration of the law in question to suit an emergency of this nature,

and to render justice to the parties injured.

All which, nevertheless, is humbly submitted.

(Signed)

GEO. HAMILTON, Chairman. ALEXANDER GRANT, PHILO HALL.

COURT HOUSE, LONGUEIL,

District of Ottawa, January 5th, 1836.

A true copy.

REPORT OF THE BOARD OF EDUCATION FOR THE

#### EASTERN DISTRICT.

COPY.

To His Excellency Sir John Colborne, K. C. B., Lieutenant Governor of the Province of Upper Canada, &c. &c. &c.

The Board of Education for the Eastern District, beg leave to Report:
That from the 1st July, 1834, to 31st December, 1834, reports were received.

from ninety-six schools, by which it appears, that two thousand six hundred and twelve pupils were receiving instruction in the ordinary branches of a common education. The sum of three hundred and fifty-eight pounds, seventeen shillings and three pence was divided amongst the Teachers during this half year.

From 1st January, 1835, to 30th June, there were ninety-nine schools and two thousand, seven hundred and eighty-three pupils. The amount paid from the Gov-

ernment allowance was three hundred and fifty-eight pounds and sixpence.

From the 30th June to 31st December last, there appears to have been a diminution in the number of schools as well as pupils, the number of the former being reduced to eighty-three, and the pupils to one thousand, seven hundred and seventy-seven. The Trustees of the several schools express themselves satisfied with the conduct of the Teachers generally, and the Board have no reason to doubt, that much benefit has been derived from the monies provided by the Legislature.

ARCH'D McLEAN, Members of the D. MACDONELL, Board of Education, JOS'H ANDERSON, Eastern District.

CORNWALL, January 2, 1836.

Copy,

STATEMENT of payments made to the Teachers of Common Schools in the District of Johnstown for the year ending 6th March, 1835.

#### FIRST REPORT

OF THE

# BOARD OF EDUCATION

FOR THE

#### PRINCE EDWARD DISTRICT-1835.

COPT.

To His Excellency Sir John Colborne. K. C. B. Lieutenant Governor of the Province of Upper Canada, and Major General commanding His Majesty's Forces therein, &c. &c. &c.

The Board of Education for said District respectly Report:

That in consequence of the recent organization of said District into a separate jurisdiction, the situation and standing of the common schools in said District could not conveniently be ascertained and regulated in time to report thereon in 1834. The Board now finds there are forty common schools in said District, the Teachers of which are mostly men of good moral habits and of good English education, the Board are using their endeavors to get employed in said schools altogether such Teachers as are designed by law.

That about one thousand scholars are taught in said schools, Spelling, Reading,

Writing, English Grammar, Arithmetic, Geography, History, &c.

The Board are gratified in being able to report that they are assured the rising generation are receiving great benefit from the common schools in said District;—which benefits are greatly advanced by the benevolence of the Government, in aiding said schools by a yearly allowance of money, which new seems to give encouragement for Teachers of respectability and education to offer themselves to fill such situations.

The Board feeling anxious for the prosperity of the pupils, and the promotion of good schools, recommend the continuation of the liberal support above mentioned; without which the said schools would inevitably decrease in the benefits and advantages now derived therefrom.

By order of the Board,

SIMEON WASHBURN,

Chairman.

HALLOWELL, 14th July, 1835.

#### REMARKS.

The above Teachers were publicly examined by the Board of Education in the different branches taught in their respective schools, particularly in Orhography, English Grammar, Writing and Arithmetic, and a strict regard was had to the qualifications necessary for the proper instruction, and management of a respectable school. It was painfully manifest that a higher standard of qualifications in the Masters generally of our common schools is called for and a more liberal public provision for their support required.

The amount provided by law for the support of common schools was apportioned to approved Teachers in July. The annual grant in January of this year, with due regard to the period within the year for which a proportion could be claimed. The number of schools and consequently of Pupils has considerably increased.

(Signed)

ROBERT McGILL, ROBERT DICKSON, ROBERT HAMILTON, THOMAS CREEN.

The Honorable

G. H. MARKLAND, Inspector General, U. C.

Sworn before me, at Cornwall, this 13th day of January, 1836.

JAMES PRINGLE, J. P.

#### TREASURER'S OFFICE,

Brockville, 1st January, 1836.

Sin:

I have the honor to transmit, herewith for the information of His Excellency the Lieutenant Governor, a statement of Treasury accounts for the District of Johnstown—from 16th Murch, 1835, being the date of the last publication and up to 31st December, 1835, inclusive.

I have the honor to be,

Your obedient servant,

A IEL SHERWOOD. Treasurer District Johnstown.

Lieut. Col. Wm. Rowan, Private Secretary, &c. &c. &c. Toronto.

STATEMENT of Treasurer's accounts for the District of Johnstown, from the 16th March, 1835, to 31st December, 1835, inclusive, the 16th March, 1835, being the date of the last publication.

JOHN HARRIS, T. L. D.

Treasurer's Office, London, 1st April, 1835.

Approved in committee, (Signed) PETER CARROLL, Chairman.

In open Court of General Quarter Sessions, the above account current, with the abstract of Disbursements, and abstract of Receipts, as also the Vouchers which relate to the above charges, having been examined, the same is approved, leaving a balance in the hands of the Treasurer, of seven hundred and forty pounds eleven shillings and seven pence.

(Signed) WILLIAM YOUNG, Chairman.

Dated London, this 17th July, 1835.

John Harris, Treasurer London District, maketh Oath that the within Account contained on two sheets is a true copy of the Districts as audited the 17th July, 1835.

JOHN HARRIS.

Sworn at the town of London, this third day of October, 1835, before me, WILLIAM YOUNG, J. P.

The Townships in the county of Middlesex, London District, in account with the Treasurer, on account of Road Tax from 1st July, 1831, to 31st March, 1885.

JOHN HARRIS, T. L. D.

Treasurer's Office, London, 1st April, 1835.

In open Court of General Quarter Sessions, the above account current, with the different Townships, in the County of Norfolk, contained in two sheets, as also the Vouchers which relate to the same, having been

examined, the same is approved, leaving such balances, in the hands of the Treasurer, as appears by the account current within set forth.

Dated London, this 17th July, 1835.

(Signed)

WILLIAM YOUNG, Chairman.

Approved in committee, (Signed)

PETER CARROLL, Chairman.

John Harris, Treasurer of the London District, maketh Oath that the within Account contained in three sheets is a true copy of the Road accounts with the different townships as audited the 17th July, 1825.

JOHN HARRIS.

Sworn at the town of London, this third day of October, 1885, before me, WILLIAM YOUNG, J. P.

### WESTERN DISTRICT.

DR. The Western District, in account with WILLIAM HANDS, Treasurer of the said District,

## MESSAGE FROM HIS EXCELLENCY

WITH

## Despatch

ON THÉ

### SUBJECT OF PRISON DISCIPLINE.

F. B. HEAD.

The Lieutenant Governor transmits to the House of Assembly, the accompanying copy of a Despatch from His Majesty's Secretary of State for the Colonies on the subject of Prison Discipline, together with the copy of an act recently passed by the Imperial Parliament relative thereto.

The Lieutenant Governor also forwards to the Assembly, copies of Reports of the Chief Justice and Judges; and of Magistrates of several Districts, respecting the condition of the Gaols and treatment of Prisoners therein,—to which important subject he invites the attentive consideration of the House.

Government House, 7th March, 1836.

(For Despatch see printed Journal, Page 261.)

(Copy)

TORONTO, 22nd December, 1835.

Report of the Chief Justice and Judges on the subjec: of Gaols and the treatment of Prisoners in Upper Canada.

MAY IT PLEASE YOUR EXCELLENCY:

The Judges take the liberty of suggesting to Your Excellency, that the treatment of Prisoners confined on criminal charges in the several Gaols in this Province appears to call for the establishment, by Legislative authority, of more precise and satisfactory regulations than are at present provided.

In some of the Districts, the Gaol allowance of food to such Prisoners includes a proportion of mean and vegetables, but we are not sure that this is the case generally; and we are informed that the Magistrates of the Home District have, for a long time, declined to authorise the furnishing of any other diet than bread and water. At the present time, during the inclemency of a severe winter, there are in Gaol of the Home District many prisoners both convicts and persons yet untried, who have no other sustenance.

It may probably be difficult, or impossible, for the Magistrates in some of the Districts to defray, out of the present rates, all the charges to which the District funds are liable; but it appears to the Judges that there can be no claim upon those funds entitled to take precedence of the indispensable charge for providing wherever may be necessary for preserving

prisoners from absolute suffering: The wants of medical attendance, fuel, bedding, clothing and food; should, we conceive, be provided for in all cases to such an extent as to prevent absolute suffering, and the danger of permanent injury to the health of the prisoner.

We do not conceive that bread and water alone ought to be considered a sufficient diet, though in the quantity and quality of the meat and vegetables to be added to it, it will of course be reasonable and necessary to consult economy.

With respect to convicts under sentence of death for murder, whose term of imprisonment cannot be long, the law makes special provision; but with regard to other convicts, a better diet than bread and water should, we think, be supplied; and most certainly those prisoners who are awaiting their trial should not be restricted to what is barely sufficient, even under more favorable circumstances, to sustain nature.

Such bedding also and coarse warm clothing, as may be necessary, ought in our opinion to be furnished; and, if the charge of providing these things, together with the other expenses of the District, cannot be defrayed out of their ordinary means, it may be found expedient to apply to the Liegislature to bestow their consideration upon the subject.

Our reason for troubling Your Excellency with this representation, at the present moment, is, that there are now confined in the Gaol of this District a number of prisoners, some of whom, we have reason to apprehend, are in a state of suffering from the want of what we regard as the absolute necessaries of life; and we earnestly recommend their case to the immediate notice of the government.

We are aware that private charity might, and would; if appealed to; extend its aid to those miserable objects; but besides that such a resource is precarious and unsteady, it is already heavily burthened by other claims; and the proper maintenance of prisoners seems to us to be a charge peculiarly incumbent upon the civil authority.

We have the honorito be,
Your Excellency's most obedient,
Humble Servants,
JOHN B. ROBINSON, C. J.
L. P. SHER WOOD,
J. B. MACAULAY,

### GAOL REPORTS.

OTTAWA DISTRICT-GAOL REPORT.

(Copy.)

LONGUEIL, February 9th, 1836.

SIR

In reply to the Government Circular of 22d Dec., last, on the subject of the maintenance of Prisoners confined in the Ottawa District Gaol, I have the honor to state that I laid the same before the Court of General Quarter Sessions of the Peace of the said District at its recent sittings, and I am requested by the Court to certify, for the information of His Excellency the Lieutenant Governor, that by a permanent order of Court passed at the General Quarter Sessions, on the 23rd of September, 1830, all prisoners confined in the said Gaol, except prisoners for debt, are allowed one pound and a half of bread, and half a pound of pork per diem, with a sufficiency of water; and further that an adequate supply of firewood and blankets is at all times provided.

I have the honor, &c.

(Signed) GEORGE HAMILTON, J. P.

Chairman Quarter Sessions, District of Ottawa.

John Joseph, Esq., Civil Secretary, &c. &c. &c. Toronto.

BATHURST DISTRICT—GAOL REPORTS. (Copy.)

PERTH, 25th January, 1836.

Sir,

I have to acknowledge the receipt of your letter of the 22nd ult., enclosing a printed copy of a representation made by the Judges respecting criminals confined in the District Gaols of this Province, in reply to which I beg to say, that I laid the same before the Magistrates, and on their behalf I am authorised to state, that the prisoners confined within the Gaol of this District have at all times been treated with the greatest humanity and made as comfortable as circumstances and their unfortunate situation could admit of; they have always been allowed bread, meat, vegetables, fuel, and blankets, as well as medical aid when required, and no complaint as yet has ever reached the ears of the magistrates on that head; this liberality however has caused a great drawback on the limited funds of our district, and prevents the magistrates from adopting many measures of utility in contemplation for the public good, and although very desirable and absolutely necessary, the want of funds prevents the accomplishment of many requisite improvements, suggested and recom-mended by both Mugistrates and Grand Juries; this being the case the Magistrates respectfully recommend that some provision may be made by a Legislative enactment for the maintenance of Prisoners and Insane persons in each district; the funds of this district are now inadequate to the maintenance of so many prisoners as are from time to time confined within our gaol, and the operation of the late law for the appointment of Township Officers will swallow up the amount of assessment to that degree that it will put it out of the power of the magistrates to make the usual provision for the support of the prisoners.

I have, &c.

#### MIDLAND DISTRICT, GOAL REPORT.

To His Excellncy Sir John Colborne, K. C. B., Licutenant Gov. rnor of the Province of Upper Canada, and Major General commanding His Majesty's Forces therein, &c. &c. &c.

The Magistrates of the Midland District in-General Quarter Sessions assembled, most respectfully beg leave to bring under Your Excellency's notice the absolute necessity which it is obvious to them exists, of a semi-annual circuit of the Judges of the Court of King's Bench for the purpose of holding Courts of Oyer and Terminer and General Goal delivery in each District.

In consequence of the increase in population there is an increase of crime, as well as of litigation of private rights; and instances similar to those requiring the late special Court of Oyer and Terminer conceded to this District by Your Excellency, are daily occurring in all the Districts of the Province, and unhappily compel the Magistrates to urge the matter thus on Your Excellency's consideration.

Although by that special commission the Goal of this District was delivered on the 29th day of last month, yet the Calender now affords four instances of commitment for Felony since that time; and of such unfortunate persons there may be individuals innocent of the offences laid to their charge; but who must remain incarcerated until the next annual circuit, unless the general wish for a second circuit be in the mean time acceded to; herein operating injuriously to the accused, and to the pecuniary interests of the District.

The Magistrates therefore most respectfully beg leave to submit the matter to Your Excellency's attention; and to entreat that your Excellency will be pleased (if you see fit) to recommend it to the consideration of the Legislature at its next session.

JOHN MACAULAY,

Chairman, Q. S. M. D.

Kingston, Oct. 21st, 1835.

MIDLAND DISTRICT GAOL REPORT.

(Copy.)

KINGSTON, 30th December, 1835.

Sir,

I have had the honor to receive your circular letter of the 23rd instant, accompanying the

printed copy of a representation from the Chief Justice and Judges respecting the allowances to prisoners confined in the District Guols, and the regulations which the magistrates can legally authorise in their respective districts, and further conveying the desire of His Excellency the Lieutenant Governor that the magistrates may comply with the recommendation of the judges relative to the food, clothes, and bedding which should be provided for prisoners during the present winter.

I beg to state that on the 28th instant, immediately after the receipt of your communication, I laid it be. fore such of the magistrates of the district as could be conveniently assembled in special sessions, who after its perusal, accompanied by the Sheriff and the Gaoler, proceeded to inspect the cells and debtors apartments, in the gaol of this district, and inquired of the inmates separately whether any of them had suffered from the recent severity of the weather, or from want of necessary sustenance. I am gratified to have it in my power to state that the result of this inspection was most satisfactory.—The appearance and condition of the gaol were unexceptionable in all respects. The prisoners as well as the debtors have sufficient and suitable food, clothes and bedding, and their rooms and cells are furnished with stoves and due supply of fuel .- The magistrates felt on this occasion that they were justified in the reliance they have always placed on the humanity and attention of Mr. Ashley, the Gaoler, in the discharge of his

It will be seen by the return of the gaoler, that the number of persons now in confinement, under his custody is small, viz:—

Convicted of Murder,	1
Prisoners in Cells,	6
Total	8

The Prisoner under sentence of Death subsists on the allowance customary in such cases, but complains of the discomfort of his shackles, from which, however, the magistrates could not undertake to relieve him.

Two of the persons charged with offences, furnish themselves with food at their own expense. The other two receive each, one pound of bread, one pound of beef, and half a pound of potatoes daily—a similar allowance is extended to both the individuals confined in the debtors rooms.

I take the liberty of herewith submitting for His Excellency's examination, a copy of the rules and regulations framed under the authority of the statute by the justices of this district in sessions, and confirmed by the judge of assize, in the year 1833. These rules will, I trust, shew that in the Midlaud District due care is taken to protect persons committed to the gaol from suffering by reason of the rigours of the winter or the want of sufficient food.— This has indeed been always a primary consideration with the magistrates, and they have not allowed any question of finance to interfere with it, although a

heavy debt has unfortunately for some time past pressed severely on the revenue of the district.

It will be noticed that in conformity to these regulations, the gaoler is bound to produce at the Quarter Sessions, semi-annual statements, in the months of April and October, by which means a record a preserved in the office of the Clerk of the Peace of all commitments within the District, with the names of the persons committed, and of the court, or magistrates by whom such persons were committed, the nature of the offence, and the time and manner of discharge.

The physician and surgeon make quarterly reports on the health of the prisoners and the several cases of sickness which have occurred with the term just ended. For his services he is allowed a compensation of fifty pounds per annum—and though engaged for the benefit of the inmates of the cells only, he never hesitates to extend his professional aid to unfortunate and pennyless debtors when required. It is understood to be the duty of the physician to direct any change in the diet of prisoners, which the state of their health may from time to time render advisable.

As it frequently happens that persons are imprisoned for debt, who are without the present means of subsistence, the gaoler, under the eighteenth rule makes him an allowance of food at the expense of the District, and reports thereupon at the next adjourned Sessions to the magistrates, who direct it to be continued, if it is ascertained that the party thus relieved, is actually destitute.

The course of my inquiries respecting penitentiary institutions having led me to observe the manifold defects which prevail in the plans of the common gaols erected as well in Canada as in the United States, it has been my earnest desire to devise some essential improvement, that might hereafter be adopted in the construction of our District Prisons.—It is important to prevent our Common Gaols from becoming schools of vice, in which by means of the intercourse which may be maintained among prisoners associated in large rooms or cells the elder criminals have opportunities of contaminating the minds of the younger and less experienced offenders. To check this spread of moral depravity, is better than to punish for it, after its development and exhibition in actual deeds of villainy—and this is, perhaps, all that can be accomplished by any improvement that is attainable in the architecture and discipline of Common Gaols.

It is clear that the first step which should be taken by Society for the prevention of the growth of vice is the careful and correct education of youth, not merely by instruction, elementary or otherwise, in profane literature, but by the unremitting inculcation of Religious truths and impressing on the Juvenile mind the necessity and value of self-restraint. The polity of nations even the most enlightened has not yet devoted suitable attention to this, high duty, on which rests so much of social order and happiness, as well as of individual purity of life and manners. A wide field here expands before the labors of Christian Philanthropists and Statesmen, which it will daily become more imperative on them to occupy, as mankind advance in the path of civilization and refinement because the incentives to crime are multiplied

according to the increase of wealth and luxury and it cannot be doubted, that if men are not under such circumstances carefully impressed in their youth with a deep sense of their moral obligations, they will sink under temptations, and indulging freely in their vicious and criminal propensities incur the penalties of the law, and be exposed to public disgrace and punishment. Early religious instruction should form the basis of all schemes of national education, without it, a people may become eminent in general literature and intelligence, but not in morals. But to return from this digression; -I beg to remark that with the aid of Mr. Powers, Deputy Warden of the Penitentiary, I have nearly completed the plan of a District Goal, in which I have endeavored to provide for the separation and classification of Prisoners in such a manner, that while they may be allowed greater purity of air and better opportunities of exercise, than are attainable in the present Goals, their intercourse with each other shall be either prohibited entirely or regulated in any other way that may be considered desirable.—It is my intention to submit this plan, when prepared, to the Judges, and request them to examine and determine whether it may not be well to recommend it for general adoption on all future occasions of constructing District Prisons.

It appears to me that the present manner of proceeding in building Gaols is an unfortunate one. When the Justices of a District undertake business of this nature they appoint a Committee to superintend it; which commonly consists of certain members of their own Body, and perhaps the Sheriff or Clerk of the Peace. These gentlemen immediately procure a number of Plans from the best builders in their part of the Province, discuss their several merits with an intention of ascertaining the best, and finally select one, which after beingacted on at no trifling expense, turns out to be defective in many important particulars. This scene is repeated in the very next District, in which a Goal is to be built.—The super-

intending Committee of one District does not profit by observation of the errors committed by that of another District. They are in fact, all without experience, when they commence their duties, and the experience which each Committee subsequently acquires is lost, not only to its particular District, but to the whole country.—Now, I am inclined to think that this evil might be remedied, if the Executive Government were authorised to select and establish a general Plan for the construction of goals and court houses, from which no deviation should be allowed, except by consent of an Inspector of Prisons, appointed under the provisions of a Statute, whose other duties are implied by his name; or if the Insti ution of such an Office should not be approved of by the Legislature, let a Board be created at Toronto, consisting of three or more persons, to which all plans for District Prisons should be submitted for approval.—If even this suggestion should be discountenanced, it might possibly be arranged that no departure from the Plan sanctioned for general use by the Government should be attempted until confirmed by a provisional Board to be composed of the Judge of Assize and Crown Officer on the circuit for the year, and the Chairman of the Quarter Sessions for the time being -The objection which lies to this proposal is that the Judge of Assize and Crown Officer might be unable to bestow as much attention to the matter as would be requisite for a satisfactory decision.

Be pleased to pardon me for troubling you with remarks, which are not directly called for by your Circular. The public importance of the subject to which they relate even as it respects mere pecuniary considerations will I trust plead in my behalf.

I have the honor, &c,

(Signed)

JOHN MACAULAY,

Chairman Quarter Sessions,

Midland District.

HOME DISTRICT,-GAOL REPORT.

TORONTO, Sth December, 1835.

Copy,

Sir.

I have the honor to transmit to you for the information of His Excellency the Lieutenant Governor, a petition drawn up by the Grand Jury of the Home District at the last Assizes, accompanied by a representation of the Justices in Quarter Sessions, upon the urgent necessity of adopting immediate measures for erecting a more sufficient gaol.

The petition is addressed to the House of Assembly, and was delivered to the Court with the paper which accompanies it, in order that the subject might through the interposition of the government he pressed upon the favorable consideration of the Legislature.

I beg also to transmit to you a presentment of the Grand Jury of the District of Niagara, at the last Assizes respecting the gaol of that District, upon which it may appear proper to His Excellency to make some communication to the Legislature.

I have the honor, &c.

(Signed)

JNO. B. ROBINSON.

Lieut. Col. Rowan, &c. &c. &c.

To the Honorable the Commons House of Assembly, in Provincial Parliament Assembled.

The Petition of the Grand Jury of the Home District,

RESPECTFULLY SHEWETH:

That the Gaol of the District is insufficient for the safe keeping of prisoners; is so ill arranged that the prisoners cannot be permitted to take air and exercise without affording them facilities of escape which in the exercise of a sound discretion neither the sheriff or Guoler can permit them to have recourse to; and that from the great increase of population in the District it is become insufficient for the proper accommodation of the prisoners committed to it. That under these circumstances the Magistrates, the Sheriff and the other persons exercising authority in the District are either impeded and embarrassed in the performance of their respective duties, or suffer loss and duninge through the escape of prisoners and from other causes. That increased rigour si necessarily exercised towards the prison-ors, debtors as well as criminals, causing them to suffer more than the laws would sanction or humanity approve. That this state of things has existed for upwards of eight years, the evil complained of increasing from year to year. That repeated applications have been made to the Legislature for an Act to increase the taxation of property within the District to enable the Magistrates to apply the needful remedies to these evils, but that hitherto no such inactment has been passed. That the Grand Jury now applies to the present Parliament for relief in the premises, and to this petition annex certain resolutions, adopted by the Magistrates at a general meeting in Session assembled, with the view more strongly to impress upon the Legislature the neces-

sity of making Legislative Provision for the relief of the District during the next Session of Parliament

The Grand Jury therefore prays that such additional assessment be laid on rateable property throughout the district as may be deemed sufficient for the increasing wants of the district.

For self and fellows,

JAMES FITZGIBRON,

Foreman.

GRAND JURY ROOM, City of Toronto, 17th Oct., 1835.

(Copy.)

Home District P.

In General Quarter Sessions, Tuesday, 30th June, 1835.

PRESENT:

D'ARCY BOULTON, Esq., Chairman. Frederick S. Jarvis, Esq., J. P. George Monroc, Esq., J. P William Thompson, Esq., J. P. Charles Fothergill, Esq., J. P. John Cowan, Esq., J. P. Alexander Armstrong, Esq., J. P. R. C. Gapper, Esq., J. P. Benjamin Thorne, Esq. J. P. P. Paterson, Esq., J. P. John Baldwin, Esq., J. P. John Barwick, Esq., J. P. John Lynch, Esq., J. P. Alexander Wood, Esq., J. P. John Dawson, Esq., J. P. Peter Neeson, Esq., J. P. Wm. Crookshank, Esq., J. P. Wm. Parsons, Esq., J. P. Robert Stanton, Esq., J. P. C. C. Small, Esq., J. P. Robert Gillespie, Esq., J. P. J. B. Warren, Esq., J. P.

The magistrates present having had laid before them the communication from the Lieutenat Governor, with the representation of the Grand Jury at the last assizes with respect to the inadequacy and insecurity of the Gaol of the Home District have personally visited the building, and fully concur in the representation made by the Grand Jury as to the necessity of opening, if practicable, a new Gaol for the Home District, and it was Ordered—

That a committee of five (three of whom to form a quorum) be appointed to make the necessary inquiries on the subject embraced in the foregoing resolution, and to report to a General Meeting of the Magistrates of the District at such time as they may be prepared to do, and that the Clerk of the Peace dogive notice of such General Meeting when he is informed that the Committee is so prepared, and that the said Committee consist of the following gentlemen:—

Grant Powell,
Alexander Wood,
Christopher Widmer,

F. S. Jarvis, C. C. Small, Monday, 3rd August, 1835. present:

Grant Powell, Chairman—pro hac vice.

Hon. J. Elmsley,
George T. Dennison, Esq. J. P.
Alexander Wood, Esq. J. P.
John Lynel, Esq. J. P.
William Campbell, Esq. J. P.
John King, Esq. J. P.
James Fitzgibbon, Esq. J. P.
William Gamble, Esq. J. P.
John Phillips, Esq. J. P.
Christopher Widmer, Esq. J. P.
William Thompson, Esq. J. P.
P. Paterson, i.sq. J. P.

The Committee appointed by the order of the Sessions of the 30th June last, to inquire into and Report on the subject of the Lieutenant Governor's communication relating to the Gaol of the District, having taken the subject into consideration and being fully impressed with its importance as connected with the due and efficient administration of the Criminal Law have embodied their sentiments in a series of resolutions, and which being presented to the Court as their report was accordingly read as follows;—

Resolved, That in the opinion of this Committee the Goal of the Home District, from the materials of its construction, is altogether unfit for the safe keeping of the Prisoners, and that it is necessary for the property administration of the Criminal Law that a Prison of greater so unity should be provided with the least probable delay.

Resolved, That as the funds of the District still remain burthened with a great portion of the Debt contracted under the sanction of the Legislature for the erection of the present Goal and Court House, it is in the opinion of the Committee inexpedient to incur further debt under the present rate of assessment while that burthen remains.

Resolved, That in the opinion of this Committee it would not be prudent as regards the public health to shut up the only space, with the exception of the Burial Ground, situated amongst the densest population of the City, by selling the Goal and Court House for building lots, the only means now available whereby the expense of erecting a safe and sufficient Goal can be met.

Resolved, That in the opinion of this Committee the greatly increased wealth, population, and prosperity of the Home District will fully justify a small addition to the now almost nominal local taxation; and that an additional assessment on rateable property throughout the District of Ad., in the pound for six years to be applied solely to that especial purpose would be the means, and as far as this committee can judge the only means of effecting a loan whereby the object of the reference to this committee can be obtained without great delay.

Resolved, That in order to carry into effect the views of this committee, the Grand Jury at the ensuing Assizes and also at the Quarter Sessions supported by the sanction of the Magistrates, be urged to units in laying the case before the Legislature at its next session, and praying for an act giving au-

thority to impose the required increased rate of Assessment.

Ordered—That the foregoing report be adopted, and that the Clerk of the Peace do cause the same to be laid before the Grand Juries at the ensuing Assizes and Quarter Sessions, with the view mentioned in the last resolution; and also that he do forthwith give notice in the Gazette, and some others of the Newspapers—of an intended application to the Legislature for authority to impose the additional rate above alluded to."

Truly extracted,

(Signed) S. WASHBURN.

TORONTO, 13th October, 1835.

GORE DISTRICT GOAL REPORT.

(Copy.)

DISTRICT OF GORE, UPPER CANADA, COURT HOUSE, HAMILTON, 20th Oct. 1835.

Sir,

In reference to your letter of the 1st of August last, accompanying an extract of a Despatch from the Secretary of State for the Colonies in reference to a Petition from the late James Owen Mc-Carthy,-The Magistrates of the Gore District in General Quarter Sessions assembled-beg leave respectfully to state that not only at and during the Courts of Quarter Sessions and Assizes but at all other times the Goal, particularly the cells have always been found in a state of as great cleanliness as their crowded state would admit of; and that no situntion in the Province can exceed the scite of the Hamilton Gaol for freedom from damp, the same being built on an eminence of dry sandy soil; but from the cells being partly under ground, they must necessarily be affected in wet weather;—Indeed the magistrates have greatly to regret that from being restricted in the first instance, in the amount of the loan required, they were compelled to abandon an equally eligible situation with two acres attached thereto on the opposite side of the street intended for a Gaol and yard, and to erect on the present scite a Gaol and Court House in one building—so much (in the increased population of the District) to the detriment of the Gaol, that they have been compelled to give public notice that they intend to apply to the Legislature at its next session for authority to raise an additional half rate for the purpose of building a new Gaol, and liquidating the District debt; succeeding in which they hope to be enabled to build a Gaol proportionate to the increased population and crime attendant thereon, and in a manner the most conducive to the health of the prisoners confined therein.-However, as the Penitentiary in the Midland District is so far finished as to free the District Gaols of the Province annually of a good number of criminals, and if, added to this, a second circuit, (the necessity of which has been so often urged) was to ensue during the year, the Gaols would be still more unincumbered for the use of the District Prisoners, who, if the state of the District funds would admit, might be beneficially employed—making use of the Gaol as the law contemplated as a house of correction. From the number and hardened character of. the prisoners remanded from the Quarter Sessions to the Assizes, the District has been put to no inconsiderable expense of guarding the Gaol by night and by day, not for a short period only but for the space of a whole year from one assizes to another, must urge still more strongly (connected with the interest of a dense and still increasing population) the absolute necessity of a second circuit.

I have the honor to be, &c.

GEORGE HAMILTON, (Signed)

Chairman Quarter Sessions,

District Gore.

By order of the Court, ROBERT BERRIE, Clerk Pca c.

(Copy.)

DISTRICT OF GORE, COURT HOUSE, Hamilton, 15th January, 1836.

In reply to your letter of the 23rd December last respecting the allowance of food, clothing, and other necessaries to the prisoners confined in the Gaol of this District, I beg to state for the information of His Excellency the Lieutenant Governor, that I had the honor to lay the same before the Magistrates of the District in General Quarter Sessions assembled, who, having taken the same into their most serious consideration have desired me in their name to say :- That the Justices have at times authorised the prisoners to receive an allowance of ment, potntoes, &c., and at other times the limited means at their disposal have induced them to restrict prisoners in the allowance of meat, while they have on the other hand increased the quantity of bread; but at all times the prisoners have received so ample a supply as to silence or prevent all complaint; but the Justices would be desirous of having either some well concerted and approved directions of the Judges, comprising the most complete instructions for the whole economy for the management of the Gaolto whose suggestions they have at all times been dispossd to give the force of law-or otherwise that the whole arrangement should be defined and regulated by the Legislature.

It has also been an object of the greatest solicitude with the Justices that the Goal should be kept as clean and comfortable as circumstances would allow, and they have also been at great pains, and put the District to very considerable expense in providing Clothing and Bedding. Stoves and Fuel, that there might be as much comfort as would be compatible with safe keeping or answer the intendment of Law.

> > Chairman Quarter Sessions.

To Col. ROWAN, &c. &c. &c.

NIAGARA DISTRICT.—GOAL REPORT.

(Copy.)

The Grand Jurors on their Oaths present that they have examined the Goal and have the satisfaction of being able to report, that the comforts of the Prisoners seem to be as well attended to as the

construction of the Building and the very limited means of accommodation will admit of.

The Grand Jury are of opinion that the Ward for Criminals is not calculated to contain more than twenty Prisoners, though at one period during the current year thirty-five were under confinement.-If it were enacted that two Gaol Deliveries were to be held annually in this District the accommodation would probably be sufficient, but the impurity of the air, owing in some degree to the want of ventilation, but chiefly to the injudicious location of the building which precludes the possibility of draining, can-not in the opinion of the Grand Jury be effectually remedied.—The Grand Jury have examined the Prisoner Donolly,-from the statements of the Goaler and Prisoners, and the certificate of the Physician in attendance, it appears that he is still evidently insure, and consequently the necessity of his confine-ment still continues and the Grand Jury confidently trust that the Legislature will speedily give their attention to the necessity of instituting a Provincial Asylum for the safe keeping and proper treatment of persons so unfortunately afflicted.

In closing the responsible duties which the Laws have conferred upon the Grand Jurors, they feel impressed with the conviction that much the greater portion of crime which has come under their cognizance has been occasioned by the intemperate use of ardent spirits, which the vast number of Taverns and Tippling Houses in every part of the District, and more particularly in the Towns and Villages cause to be but too easily procured. They are fully aware that the Law vests the practical right of granting Licences in the majority of the Magistrates in sessions, but from the Houses having been long kept as places of resort, and the proprietors in many cases not having any other apparent means of supporting their families, the evil has been suffered to continue and probably will exist till the Legislature in its wisdom shall by Law, devise some effectual method of rendering the Taverns what they ought to he, places of accommodation for travellers and not what they too often are Asylums for drunkards.

> T. BUTLER, Foreman. JAMES ROBINSON, DAVID BOYD, JOHN GIBSON, JOHN C. BALL, G. CONOLLY, E.S. ADAMS. NATHAN PAWLING, J. H. MACKENZIE, JACOB KEEFER, CHARLES BAIN MALCOLM LAING. WILLIAM SHIOOS, ROBERT HAMILTON.

GRAND JURY ROOM. NIAGARA, 8th Sept. 1835.

LONDON DISTRICT-GAOL REPORT. Section of Links (Copy.)

London, 31st December, 1835.

I beg to acknowledge the receipt of your circular of the 23rd instant, enclosing copy of a representation from the Chief and Puisne Judges respecting an allowance of food to Prisoners confined in District Gaols, with His Excellency's suggestions thereon

For His Excellency's information 1 beg to state, that at an early period after the formation of the London District the subject matter of recommendation now emanating from the judges was taken into the serious consideration of the magistracy—and though not expressly authorised by Legislative enactment to incur an expense out of the District Funds for the maintenance of prisoners, or the supplying of medical aid, bedding or warm clothing during the inclemency of winter to convicts, persons committed for trial, or even to indigent debtors-the London Magistrates in the exercise of their power over the District Funds felt it an imperitive duty and thought themselves fully justified in ordering all such and other necessary expences of the Guol to be paid out of the funds so entrusted to them-economy being ever most rigidly observed.

By an order of sessions made at Christmas, 1830 and which has the sanction of the present magistracy, 1½1b bread, 11b meat per diem, with potatoes or other vegetables in season, when such can be obtained, was ordered to be distributed by the Gaolor to each prisoner in his custody, whether under sentence or merely committed, charged with felony or larceny and this has also been extended to indigent debtors previous to their obtaining the usual order for payment by the plaintiff in action, of the allowance of a dollar per week.

At the October Sessions, 1832, a Medical Gentleman was appointed as Surgeon and Apothecary to our District Gaol at a salary of £15 per annum, he finding all medicines.

Necessary hedding for the health and comfort of the prisoners, whether criminals or debtors, has at all times (&in extreme cases warm clothes has also) been supplied to the destitute.

As His Excellency is pleased to intimate that it is his intention to lay before the Legislature at their next sitting the observations of the Judges—presuming that it will not be deemed improper on my part as Chairman of the London Sessions, I now venture to suggest to His Excellency's consideration some other topics connected was the gaols throughout the Province.

As the health of the prisoners in our several gaols appears to be a main object to which the Judges have directed their attention, I beg to state that the Gaol in this District, and I believe it is the case with many others throughout the Province, is ill constructed, badly ventilated, and without yards where the prisoners can at seasonable hours take air and exercise, which I consider most essential to the preservation of health.

This subject has long occupied the serious attention of the magistracy of the District—all are convinced of the importance of it—Grand Juries both at the sessions and Assizes have invariably presented our gaol as most insecure, and wholly unfit for the purpose Within the last year several successful attempts at escape by debtors have occurred and the magistrates are now most desirous of effectually remedying so serious an evil. Plans for certain altera-

tions in the present building have been agreed to, the even such would still leave the gaol very far from complete, but the tenders sent in for carrying on these works, exceed any funds at the disposul of the magistracy-and it is generally considered more desirable that an entire new gaol should be erected contiguous to the present Court House rather than to make the proposed amendments and additions, and in the end such would also prove the cheapest However this cannot be accomplished unless the Magistrates are empowered by Parliament to continue for three years the present Tax of on third of a 1d. in the Pound, on all rateable propertywithout His Excellency's recommendation to the Legislature to take the subject of enlarging Goals and improving the condition of Prisoners into their serious consideration, and the matter being made a General Measure throughout the Province, my bre-thren doubt whether the present Parliament would pass an act for the sole purpose of falling in with the views of the Magistracy of the London District, however desirable the attainment of the object may

Another advantage of not less importance might be obtained by authorising the Magistracy generally to enlarge and improve Goals, viz: The setting apart a Room in every Goal as a Chapel for the performance of Divine Worship, at least once a week. Not a Goal in England is without this, and not one in Canada supplied with any thing of the sort.—The Magistrates should of course be empowered to appoint and remunerate a Chaplain, at least to the extent of £20 or £25 a year from the District Funds.

Convicts under sentence of death (with the sanction of two Magistrates) should be attended by any Minister or Preacher of whatever denomination they may desire.

Trusting I shall be pardoned for troubling His Excellency with these observations,

I have the honor, &c.,

(Signed)

WILLIAM YOUNG,

Chairman,

London District Quarter Sessions.

F. B. HEAD

The Lieutenant Governor transmits to the House of Assembly such further reports respecting the state of the gaols and the treatment of prisoners as have been received since his message to the House on that that subject of the 7th instant.

GOVERNMENT HOUSE, 28th March, 1837.

REPORT of the chairman of the Quarter Sessions Home District, on the state of the Gaol, and the treatment of prisoners therein.

> To His Excellency Sir F. B. Head, K. C. H. Lieutenant Governor of the Province of Upper Canada, &c. &c. &c.

MAY IT PLEASE YOUR EXCELLENCY:

Previous to the departure of His Excellency Sir-John Colborne, a reference was made to the magistrates of the Home District on the subject of a letter. addressed to His Excellency by the judges of the Court of King's Bench, with respect to the treatment of prisoners confined on criminal charges in this province "as appearing to them" to call for the establishment by Legislative authority of more precise and satisfactory regulations than are at present provided" and alluding more particularly to the allowance of food made to prisoners in this district, making various suggestions as to their treatment in other respects, as to medical attendance, fuel, beding and clothing; to prevent absolute suffering, and the danger of permanent injury to the health of the prisoners, and stating that if the charge for providing these things together with other expenses of the district cannot be defrayed out of the ordinary means it may be found expedient to apply to the Legislature to bestow their consideration on the subject.

The reference thus made to the magistrates, involving as it does a great variety of considerations and requiring information on several points connected with it, which rendered certain returns and statements necessary, has unavoidably delayed their making a more immediate answer, and being anxious of placing the subject in as full and ample a manner as possible before the Executive Government, in the event of its being brought under the consideration of the Legislature, they trust the delay will be accounted tor from the desire to collect & afford every information within their power on a subject of so much importance.

After procuring these returns and statements and having given to the whole matter their most attentive consideration, the magistrates in adjourned Quarter Sessions beg leave most respectfully to report for Your Excellency's information:

That in the early settlement of the Province, and from the thin and scattered state of the population of this district, as well as the comparative absence of crime, and the unfrequent detention of persons in custody on civil process for debt, the means for the safe-keeping of criminals and others, was, perhaps, but a secondary consideration—a known place for their reception under the proper officers, was, at such period, all that was found to be indispensably necessary, and for many years without any serious inconvenience being found to result from such an arrangement, an ordinary building, constructed in almost the rudest manner, with a common enclosure marking its precincts, was found sufficient for the existing wants of the district.

As the population increased and with it the inmates of the prison began to be more numerous, the necessity for a building better adapted for their safe custody became apparent, but in the absence of any express provision for defraying the charge of such an erection as well as the increased expense which must be incurred for a sufficient establishment for its support, it was some time before such an undertaking could be commenced. As the subject continued to press upon the consideration of the magistrates it received from time to time their attention. After various suggestions for providing the necessary accommodation and convenience for the then increasing wants of the district, and with a view of its being afforded without causing any additional burthen upon the inhabitants by additional assessments or taxes—the result of these deliberations was an application to the Legislature in the year

1823, for authority under the sanction of law, to loan an amount for the purpose of erecting adequate buildings for a Court House and Gaol, to be repaid from the income of the district, with interest in a given number of years. This mode having received the approval of the Legislature, and an act being passed, the present buildings which are used as a Court House and Gaol were erected, without any additional rate or tax upon the inhabitants, and since which time all necessary repairs as well as incidental expenses in the supply of various articles for the use and convenience of prisoners, and salaries &c. to the officers, have been defrayed from the ordinary rates of the district.

With respect to the buildings, & the Court House especially, it may be stated, that from the circumstance of their being situated in the Home District at the seat of Government their occupation has at different times been unavoidably rendered subservient to other purposes generally useful, but not immediately applicable to the especial purpose for which they were intended.—Such as for the sittings of the King's Bench, in which the business of the public generally throughout the province is attended to: and at one period when the Legislature was unfortunately deprived of its usual place of meeting by accidental fire, as the place for the meeting of the two houses.

At the period of the erection of those buildings it is also proper to observe, that in the proposed accommodation considered as necessary, at a time when though the population had considerably increased it was yet comparatively limited in amount, that accommodation was estimated for, and made rather with a regard to the ordinary increase of inhabitants than with any reference to the rapid growth of numbers, the result of an unexpected emigration from the Mother Country, which has of late years brought to the province so great an increase of population, and in the benefits of which the Home District has had the good fortune to partake, in, perhaps, a larger proportion, than any other district in the province.

From these remarks the Magistrates trust it will be apparent that while it is admitted that the present buildings are not efficient for the purpose intended to the existing state of the population, that efficiency was duly consulted at the period of their erection when the amount of that population with a reference to its ordinary increase, would not as they think have justified them either in soliciting from the Legislature its authority, or expending in their construction, a larger sum, in advance, by way of loan on the credit of the district. Other causes which have had the effect of producing to a considerable extent, the present inefficiency from their occupation for other purposes than those which were contemplated will be adverted to hereafter.

In illustration of what has been before alluded to, however, it may be sufficient to Rate the amount of population at the three following periods.

In 1820—The Home District, including

completed the amount was.................21,329
In 1835—The district contained....47,543

The City of Toronto. do. ....9,252 56,795

C

From which it will be observed that the buildings which were erected without any additional tax having been imposed, at a period when the accommodation required was regulated with a view to the ordinary increase of a population of 21,329 have within the short period of eight years been found inefficient in consequence of the rapid and extraordinary growth of numbers by emigration for a population of more than 56,000, when the inhabitants of the town alone, which at the former period were included within the Jurisdiction of the district, bears a proportion of nearly one half of what the whole then amounted to, and since which period from the increased growth of the town (now City of Toronto) it has been found expedient to give it a separate jurisdiction with enlarged means for defraying its expenses while at the same time the buildings in question have been placed equally at the disposal of the corporate body for the administration of justice, the district rates remaining the same as they were in the year 1827.

A return is annexed A. of the state of the Gaol with the number of prisoners confined, embracing also other general information under the several heads, on reference to which it will be seen that during one year the total number of persons received into the Gaol was two hundred and ninety five, of which were committed by the district magistrates fifty three, leaving city commitments two hundred and forty two, and that during the continuance of the city corporation (little more than two years) the whole number of commitments by their authority has been four hundred and twenty eight.

Independent of the ordinary expenses incurred for the safe keeping of prisoners within the Gaol, and for which purpose it was more expressly designed from the necessity of the case, and in the absence of other provision for such an object an additional item of expenditure of no inconsiderable amount has been incurred in the care and maintenance of insane per-The return before alluded to gives the particulars in this respect, and in the return B. is shewn the expense under the head for the year 1835 for this description of persons kept in the Gaol of the Home District, amounting to £216 15 9. In this return is also shewn the current gaol expenses for 1835, £516 8 11. It is proper to observe that this extraordinary application of such a building as well as the attendant expense, is imposed by law in which no extra provision is made for the concurrent extra charges to be incurred, but which the magistrates of the district are bound to see borne from the ordinary rates, in an estimate fixed by a grand jury, and which at the time those rates were imposed were not contemplated as being applicable to other than ordinary district purposes. The provision thus made for the care and maintenance of the insane, was in the first instance confined to the Home District, but was afterwards extended by a general act to the several During the interdistricts throughout the province. val however it became the painful duty of the magistrates of this district, attended too with some expense, to cause the removal of some insane persons who had been sent from other parts to this district, where the only legal provision existed at the time.

It is with great satisfaction that the magistrates have in prospect the relief which may be expected in this respect from its having attracted the attention

of the Legislature, where measures they understand are in progress, which they have no doubt will have the effect of providing more ample means than can be expected within the walls of a gaol, for the care and support of a portion of the community labouring under the severest of all dispensations, and which, while it will render them the object of general care to the whole Province will, at the same time, free from an expense not specially its several provided for, insuring to the unfortunate beings the objects of solicitude, a greater degree of comfort and convenience, than can possibly be extended to them under the present inefficient, though allowedly expensive, system. It would add much to the relief of the district, if in any comprehensive measure which may be adopted, provision were made for refunding the amount expended in an object which had never been contemplated under the ordinary assessment for District purposes. While adverting to the subject of extraordinary items of expense it may not be improper to observe, that in former years the detention of persons under sentence, was from the circumstances of the case, to a certain extent unavoidably confined to the gaol of the District; imprisonment being in most cases the ordinary punishment for minor offences, the maintenance of prisoners imposed upon the district funds, and in the absence of any provision or means for putting them at labour of some kind, that maintenance was without any return, the prisoners being in a state of idleness. The establishment lately of a Provincial Penitentiary holds out the expectations that in future years, if such establishment continues to receive liberal support for its due efficiency, relief may be anticipated in this respect, at the same time however while remaining for their trial, the evil must still continue to be felt to a certain extent, and which can be only further lessened by the holding the courts of assize more frequently than at present. In this respect, it must be admitted, that the Home District is more favoured than the outer districts, as an assize is held within its limits twice in the year, while in the other The popudistricts they are held but once a year. lation of the province being taken at 400,000, it may not be unreasonably held that in either case the recurrence of assize courts is not adequate to the wants of the community, putting out of consideration the great convenience which might otherwise be afforded to civil suitors and to the public business generally.

Another item of expense which has been laid upon the ordinary funds of the district, by a late act of the Legislature, is the defraying the expenses of elections, and for which no extra provision has been made. At the last general election in 1834 the amount of this item (being for poll clerks and their disbursements) was £134 0 0. It is true that under ordinary circumstances this item of expense will occur only once in four years; but some contingency upon it may from time to time be expected to occur in the event of death or any new election being ordered.

But by far the most serious additional expense which has been imposed upon the district funds without any special provision being made for defraying it, leaving it to be paid from the ordinary rates, is the late act commonly known as "the township officers bill;" under the provisions of this act a very large number of public officers who are to be paid

for their service are appointed in each township. Three commissioners and a clerk, four in all at the total charge for each township of £1 0 0 per diem while employed—the minimum of their attendance to township matters being fixed at three days-the maximum left to their own discretion, according to the quantum of service which the commissioners may find it necessary to devote to the transaction of the township business. In this state of the law it is quite impossible for the magistrates to form any idea of the probable amount which may be required to meet the demand under this particular head of service; but whatever it may be it is incumbent upon them under the provisions of the statute to defray it without any mode being pointed out by which any deficiency in the ordinary funds is to be made up, to meet this new and unascertained expenditure. It is sufficient to observe that these demands cannot -& the mafail of being very considerable in amountgistrates feel themselves bound to state their apprehension that either their claimants must be disappointed in that prompt payment which is desirable to public officers acting under a law granting compensation, or that other items of equally beneficial and unavoidable expenditure must be delayed in the payment, and great difficulty and embarrassment ensue, unless some amendment is made in the law with a view to the relief of district funds.

An item of expenditure which also occurred during the late afflicting visitation by cholera, the magistrates beg leave to take this opportunity of adverting to. In the years 1832 and 1834 when the pestilence raged in this city with a destructive virulence the expenditure of money within strictly legal bounds was absorbed in the pressing calls upon all classes for the immediate relief of the numerous sufferers.

The greater part of the expenses incurred on those occasions were promptly met and covered by the Legislature in the repayment of sums advanced from public sources. The exigency of the case however included some outlay from the funds of the district which could not properly be asked for or included in those repayments. It was on the pressure of such an emergency when other suitable buildings could not be found for the increased number of patients, that the magistrates felt that they could not hesitate at such a time of general suffering and distress to accept the kind suggestion of His Excellency Sir John Colborne, in the offer of a piece of ground on which to erect an additional building for the accommodation required at the moment, and for future use in the event of a recurrence of the calamity.

It was under these circumstances that the additional brick building on the westerly corner of the square on which the general hospital stands was erected in 1832, under the direction of the magistrates of the district now known as "the Emigrant Asylum" and which proved of infinite service during 1832 and 1834 while the cholera raged in the city. The building having been erected in haste at a time when materials and labour were difficult to be procured and high in price, the magistrates are aware that the expence was greater than it would have been under other circumstances. The pressure of suffering and the necessity of meeting it by immediate measures were such, however, as they felt fully justified them

in the course adopted. The expenditure on the occasion with some additional items necessarily attendant on it amounted in all to £283 13 3. The land on which the building is erected being in trust to others for a special purpose is now of course without the controul of the magistrates and is devoted to other useful purposes—they would however beg leave to suggest whether some arrangement might not be effected by which the district funds would be made good the amount expended in the providing a building so indispensibly necessary at the time, and which has since been found beneficial for other purposes not immediately connected with the district.

From the observations thus offered it will be seen that although with an increased population the amount of rates must also have experienced a somewhat proportionate degree of increase, yet that the funds arising from this source have at the same time been rendered applicable to other purposes than those previously contemplated, leaving them chargeable, not only with those ordinary items of district expenditure which the law in the first place had in view but rendering them by subsequent statutes, chargeable with the payment of other and new services without providing any additional means for meeting them.

It must be observed also that since the passing of the act establishing the city corporation (formerly included in the district) the district Gaol and Court House having by the act been declared applicable to the city purposes, have been equally at the disposal of the city authorities, while the rate paid by the citizens for district purposes remains as before the passing of that act. The return annexed with the number of persons confined for a certain period shews the great disproportion between city and district prisoners, yet the district rate is chargeable with the maintenance of the whole number a proportionate share of expenses not having as yet been defray-The collection of the dised by the city authorities. trict rate within the city is all placed under the direction of the city authorities, to be paid over to the district treasurer, under the act of incorporation, this collection has no doubt been duly enforced, but it is with extreme regret that the magistrates are compelled to state that the proceeds have only in part been rendered available for district purposes; and in order that this part of the subject may be placed in as clear a point of view as possible the following statement it is hoped will serve to shew the difficulties which the district must continue to labor under in pecuniary matters, unless the necessary amend-ment is made in the law on the subject. The latest ment is made in the law on the subject. official return to which they can refer on this point is that of 1834 but which will be sufficient for the purpose of illustration.

From this the following is made to appear.

| Population 1835 | Taxes collected | Rate per head | £2,300 16s. 11½d. | 11½d. | 2,336 16 6 | 5s. 0½

The result of the operation of the law as it now stands, is to entail on the district funds the whole care and charge of city prisoners, which independent of the increased expenditures which have been imposed upon them without any extra means for defraying the additional charges, cannot fail of impressing upon the magistrates the conviction, that unless a remedy is applied in the proper quarter it will not

be in their power to meet these increasing demands with that degree of punctuality so desirable in the conduct of public affairs. It may be proper also to observe in this place that of the debt incurred for the erection of the present buildings £3000 remain yet unliquidated and that by the provision of the act authorising the loan for the purpose, a fixed amount per annum is expressly directed as having a priority over other claims or demands. It is under these views that the magistrates are of opinion that the expense attendant upon providing all the items enumerated in the letter from the Judges, desirable as they may be considered together with other expenses which have been adverted to cannot be defrayed out of the ordinary means, and that the subject is one which may be considered as highly deserving the consideration of the Legislature, as they have before mentioned they cannot but apprehend the most serious embarrassment unless a favorable consideration is bestowed upon the subject generally.

With these observations which are most respectfully submitted for Your Excellency's information and consideration, the magistrates beg leave to proceed to the more immediate subjects which are embraced in the letter from the Judges as relating to this district.

With respect to food—the ordinary allowance to prisoners confined in the Gaol has been limited to a supply of bread.—In most cases the class of persons who have been committed has been such that either with means of their own or the assistance of friends, any extra wants could, it is presumed, be supplied. In such instances, however, as may have occurred, where this may not have been the case, and when the necessity has been pointed out, this extra provision has not been withheld.

The ingress and egress of friends to the Gaol, with articles of food for prisoners, has been attended to by affording every reasonable facility for the purpose.

On the subject of medical attendance they beg leave to observe, that it has been their constant care to have a gentleman who stands deservedly high in his profession, employed in attendance upon prisoners in the Gaol and who is ever prompt in giving his immediate attention to every call that is made upon That this department has met with its proper degree of attention may be attested by the fact, that during the three last years there have occurred but three deaths within the walls of the prison, and it is hoped that this fact may serve further to attest that the general state of the Gaol under the superintendance of the persons in charge of it, may reasonably lead to the conclusion that it must have been such as to preclude as far as it was practicable the chance of suffering on the part of the prisoners—and the more especially that in addition to this general state of good health which has so fortunately prevailed, even during times of more than ordinary calamity, it is not within the knowledge of the Magistrates that the health of any prisoner after being discharged has suffered in his ability to labor if so disposed in any degree lessened.

With respect to fuel, bedding and clothing, of the two first items, the annexed return will shew that with regard to them, there has, as the Magistrates trust, been no want of proper attention, and that the

comfortable warmth of the building during the inclement season as far as a due regard to safety is concerned, has not been lost sight of. In the article of bedding, supplies have been furnished from time to time as may have been found necessary, the de-struction of them by refractory prisoners, in a wanton manner has been the cause of repeated complaints on the part of the Sheriff and his Gaoler, but in no case has the real wants of any persons confined in the Gaol been suffered to remain unprovided for, in consequence of the improper conduct of their more unworthy associates. Clothing for ordinary prisoners has not heretofore been considered an item which should be incurred at the District expense .-The insane have been provided in this respect, and the charge has been of considerable amount, that the apparent condition of some of the prisoners in the gaol may have given rise to an apprehension that they were in a state of suffering, the Magistrates cannot presume to deny; without more particular inquiry, it may probably have been confined to such of them as from their own intemperate conduct and continued insubordination it may have been found necessary to keep within more than usual restrictionthey would however express their hope that from the known humanity of the Sheriff, that apparent suffering may be attributed to other causes than the want of absolute necessaries; the Grand Juries of the district, both of the superior and inferior courts have on several occasions made their presentments to the Courts on the state of the Gaol, and though very generally of late years they have felt them-selves called upon to express their opinion as to the inefficiency of the buildings to the existing wants of the country, they have not found occasion to complain of the conduct of the persons in charge of it, in the general care and treatment of prisoners consistent with a due regard to their safe keeping and the responsibility imposed upon them. On the subject of presentments relating to the Gaol, documents are annexed which it is hoped may be useful in any examination which may be had on the subject of this report;-It is as respects the article of food perhaps that the apprehensions alluded to are chiefly grounded, and in this matter the Magistrates, if on a full consideration of the subject it should be considered necessary and proper to extend to prisoners, such an indulgence, would have much satisfaction in having it in their power to afford a more ample and permanent provision, while the whole charge of city prisoners however continued to devolve upon them any hope they may have in this respect has but little prospect they fear of being realised.—From every consideration it would be preferable that the distinct Jurisdictions should be rendered liable for the safe keeping and maintenance of those whom they may commit to Gaol,-in distinct buildings for the purpose, and chargeable each to its distinct funds. In the mean time the Magistrates have assumed the responsibility of ordering in the Gaol, a daily issue of soup, at a cheap rate and of a wholesome and good quality. They cannot but be aware, however, that this will afford but limited relief, if the number of city prisoners should continue in the same proportion as it has done for the time past, they doubt whether strictly speaking, they would be justified in continuing such an allowance at the district expense to those who may be committed by a jurisdiction which is not rendered liable to a proportionate share of that

expense,—the subject they apprehend cannot but be considered as well worthy the attention of the Legislature. As regards the inefficient state of the building, it is beyond all doubt that for the present population increasing as it is, this cannot be denied, and that it must be apparent to general observation that for the purpose to which it is now by law rendered applicable in the safe keeping of ordinary offenders and those under sentence of imprisonmentin the asylum it is made to afford to the insane—in being rendered applicable for all city purposes, serving as it does for a lock up house for disorderly persons and night brawlers—and when the maintenance of any of these classes cannot be compensated for in any way by useful labor—it is perfectly inade-quate; and that the period has arrived when the means for erecting proper and commodious buildings, applicable to the district purposes is loudly called for. It is with those views of the subject therefore that the Magistrates, in presenting this report avail them-selves of the opportunity of respectfully soliciting that your Excellency would be pleased to suggest to the Legislature the adoption of such measures as to your Excellency may appear advisable for a general revision of the laws, on the subject of prisonsand the maintenance and support of the several descriptions of persons alluded to as would ensure the means for such desirable ends and at the same time lead to such a regard in the construction and accommodations of buildings as would enable a proper degree of attention in the classification of offenders to be observed, and the introduction of a system of moral discipline, and useful employment while under confinement than it has been found practicable heretofore to enforce.

All which is most respectfully submitted.

By order of the Magistrates in Quarter Sessions.

D. BOULTON,

Chairman.

TORONTO, 9th March, 1836.

SHERIFF'S OFFICE, TORONTO, 7th January, 1836.

Sir,

In compliance with the orders of the Magistrates, I have prepared a report of the Gaol, which will be found annexed, shewing at one view the state of the same, with regard to the number confined therein—the furniture, food, clothing, &c.

The Gaoler is of opinion that if a sum equal to £350, was judiciously expended the Gaol could be made "the best and safest in the province." I am of a different opinion.—I consider any large sum a complete loss. The building is ill fitted for convenience, being so arranged as

to prevent any classification of prisoners—any accommodation as to air, exercise, or the calls of nature, and from the quality of the material of which it is built—so easy for prisoners to escape from—frequent escapes have taken place of late from the upper, centre, and under ground cells—the latter of which from being damp are unwholesome—the Gaoler is now planking with oak one of the lower cells by way of experiment, and he is in hopes that it may be made secure.

The necessity of Iron Bedsteads, and a day room where no communication can be had by the prisoners with their sleeping apartments is essentially necessary. Provision should be made for their allowance to be cooked and served to them and no cooking allowed in the cells.

I am of opinion that at least one regular meal of cooked provisions consisting of meat and vegetables, together with a moderate supply of bread would be not only humane but what reason would dictate, as it is unreasonable to suppose that every person confined is guilty of the crime laid to his charge—and if guilty the law does not contemplate injury to his health from a want of food.

The expense of increasing the Gaol allowance and providing the means of attendance will add very materially to the charge upon the district funds—no permanent benefit can accrue so long as the present building is used and I see no other remedy than that now contemplated by the Magistracy, viz: the erection of a new Gaol of durable materials, so arranged that every convenience can be had for the prisoners at a moderate expense, and from the circumstance of having made a good deal of enquiry into prisons and houses for the insane, I would not hesitate to state that in a properly arranged building, fourfold convenience would be afforded at the same expense which is incurred in the Goal of this District.

I would respectfully recommend if a new Gaol be built, that some person (and I would gladly undertake the task) be sent to the neighboring country with a skilful architect to visit and take plans of such buildings as would be considered the most eligible for the intended Gaol in order that when a new one is erected, not only an ornamental building, but one that for years to come would afford such accommodation that every attention to the health and safe keeping of the prisoners should be afforded.

I have the honor to be,

Sir.

Your obedient servant,

W. M. JARVIS.

Sheriff.

To S. Washburn, Esq., Clerk of the Peace, H. D.

#### F. T. BILLINGS,

Treasurer Home District.

## RESOLUTIONS RESPECTING A NEW GAOL.

The Committee appointed by the order of General Quarter Sessions of the peace for the Home District, held 30th June, 1835, to enquire into and report on the subject of the Lieutenant Governor's communication, relating to the gaol of the district, have taken the subject into consideration, and fully impressed with its importance as connected with the due and efficient administration of the criminal law, have embodied their sentiments in a series of resolutions which they present as their report.

Resolved—That in the opinion of this Committee, the Gaol of the Home District, from the nature of the materials of its construction, is altogether unfit for the safe-keeping of prisoners, and that it is necessary for the proper administration of the criminal law, that a prison of greater security should be provided with the least possible delay.

Resolved—That as the funds of the district still remain burthened with a great portion of the debt contracted under the sanction of the Legislature, for the erection of the present Gaol and Court House, it is in the opinion of this committee inexpedient to incur further debt under the present rate of assessment while that burthen remains.

Resolved—That in the opinion of this Committee it would not be prudent, as regards the public health, to shut up the only public open space, with the exception of the burial ground, situate amongst the densest population of the city, by selling the Gacl and Court House reserve for building lets—the only means now available whereby the expense of the crection of a secure and sufficient gool can be met.

Resolved—That in the opinion of this Committee, the greatly increased wealth, population and prosperity of the Home District, will fully justify a small and temporary addition to the now almost nominal local taxation, and that an additional assessment on ratable property throughout the district of a halfpenny in the pound, for six years, to be applied solely to that especial purpose would be the means, and as far as this Committee could judge, the only means of effecting a loan, whereby the object of the reference to this Committee can be obtained without great delay.

Resolved—That in order to carry into effect the views of this Committee, the Grand Jury at the ensuing assizes, and also at the Quarter Sessions, supported by the sanction of the Magistrates, be urged to unite in laying the case before the Legislature at its next session, and praying for an act giving authority to impose the required increased rate of assessment.

In addition, the Committee would further suggest that, in the event of the success of their recommendation, the space between the present Gaol and Court House will afford ample room for the new edifice, and the present buildings, or gaol alone, might be transferred to the city authorities for a Bridewell or any other such purpose, under the exclusive control of the municipal tribunals, and further, that the Provincial Penitentiary being now in operation, for the reception of convicts, will, in a great measure, render the district gaels prisons for the detention of persons charged with offences.

Copy.

### GRAND JURY PRESENTMENT.

Upper Canada, Home District, have visited the Gaol of this District, they found the Wards much crowded, and one of them exceedingly close, but have nothing to charge upon the persons to whose care it is entrusted. The Grand Jury, however, feel it imperative upon them to represent, that the building is totally inadequate for the purpose of confining the number of persons now imprisoned with a due regard to their health. The prisoners complained that their allowance of one pound of bread per diem, was not sufficient, and also that they were not provided with a sufficiency of bedding to protect them from the cold in winter, and that their blankets were never changed. That the pickets enclosing the yard are quite in a decayed state, and wholly ineffectual to prevent the escape of prisoners, and the Grand Jury are decidedly of opinion that the gaol is wholly insufficient, as a general recepticle for prisoners committed by the civil and district authorities consistently with a due regard to health-and the Grand Jury would, therefore, carnestly recommend the Magistrates to apply to the Legislature for the purpose of enabling them to sell the present gaol and site thereof, and to apply the produce towards the erection of a new guol more suited to the existing wants of the district, and if necessary to raise, by a tax thereupon, such a sum as may be required to answer such purpose, in case the district funds should prove deficient.

Alexander Wood, James F. Smith, Geo. Gurnett, P. M'Donald, Wm. Hepburn, Thos. Carfrae, Francis Hinks, William Roe, Jesse Ketchum, Geo. P. Ridout, Peter Paterson, Jas. Buchanan.

GOVERNMENT House, Toronto, 9th June, 1835.

SIR,

I am directed by the Lieutenant Governor to request, that the accompanying copy of a presentment of the Grand Jury of the Home District may be laid before the Chairman of the Quarter Sessions and the Magistrates of the district, and to observe that the defects in the construction and arrangement of the goal of this district have been so frequently brought before the Chairman of the Quarter Sessions, it appears expedient that a special meeting of the Magistrates should be called as soon as possible, in order that such active measures may be adopted by them as may be required to remedy the evils arising from the state of a gaol, which the Grand Jurors are of opinion is, in every respect, unfit for the reception of prisoners.

I have the honour to be,

Sir,

Your most obedient

Humble servant,

(Signed,)

WM. ROWAN.

CLERK OF THE PEACE, Home District.

#### GONERNMENT HOUSE,

Toronto, 25th April, 1835.

SIR

I am directed by the Lieutenant Governor to forward to you the accompanying copy of a presentment by the Grand Jury to the Court of the last Assizes for their district, respecting the district gaol, and to request that you will be pleased to lay the same before your brother Justices for such observations as they may think proper to make on the subject for His Excellency's information.

I have the honor to be,

Sir.

Your most obedient Humble servant,

(Signed,)

WM. ROWAN.

THE CHAIRMAN

Quarter Sessions, Home DISTRICT.

Home District.

OFFICE OF THE CLERK OF THE PEACE,

Toronto, 10th March, 1836.

SI

By directions of the Magistrates in adjourned session assembled, I have the honor herewith to enclose to you their report on the subject of the prison discipline, and arrangement of the public gaol of this district, having reference to the report of the Judges to His Excellency Sir John Colborne and by him referred to their Lordships for their consideration.

I have the honor to be,
Sir,
Your most obedient
Servant.

S. WASHBURN.

J. Joseph, Esq.

Modical assistance is only given to the Criminals, and they are well attended to; they are often unwell, awing to the late diet furnished them, though on several occasions the Gaoler has given them soup, &c. Soup with the one pound of bread per diem would be a great banefit to the Criminals.

E

#### CLOTHING.

No Clothing of any description allowed to any prisoners either debtor or criminal.

#### BEDDING AND FURNITURE.

32 Blankets, 12 Bed Ticks, 2 Cooking Stoves and utensils, 4 Brooms, 3 Water Pails, 3 Wash Tubs, 12 small Wash Tubs, 1 Axe, 1 Saw, 6 common Stoves.

ROOMS OCCUPIED BY PRISONERS.

12 Rooms and Cells.

#### STOVES AND FIRE PLACES.

6 Stoves during the day, and one day and night for an insane woman; one fire place in the summer, one fire place and two Cooking Stoves.

#### WOOD

The average quantity of fuel for the last three years has been about two hundred cords.

STRAW.

Two Tons of Straw per annum.

#### DEBTORS.

The number of Debtors now in Gaol, is thirteen, and one hundred and seventy-four have been confined during the last year, twenty-one of whom have been without any means of support. No relief allowed to Debtors from any public funds, with the exception of five shillings per week in certain cases, which sometimes is long in being ordered, from which cause great suffering arises.

#### CRIMINALS.

295 have been committed during the last year; out of that number 242 have been committed by the city authorities, and 53 by the Home District Magistrates and the Assizes. Since the incorporation of the City its authorities have committed 428 prisoners for not shorter periods than forty-eight hours.

#### PERSONS EMPLOYED.

One Gaoler at £125 per annum, who employs and pays £25 to a Turnkey. He has other assistance rendered by Debtors, to whom he has to make remuneration. His duties are arduous in the extreme, and in addition to the superintendance of the Gaol and the care of prisoners, has a very unpleasant duty in taking charge of the insane. The salary allowed is quite too small, and few persons would accept the office if a vacancy were to occur. The Gaoler has no fees—his losses in boarding Debtors generally amounts to more than his profits, and I believe he has now two persons in confinement for debts incurred by them while in custody on former writs.

There are four insane persons in Gaol, viz: Margaret Finch, committed in 1821; John Long, in 1832. George Adamson, in 1832; John Morrison, in 1834'

Margaret Finch, is about 40 years of age, has not been a single day sick the last five years—enjoys a good appetite—is very simple and quiet; she married and resided near or at the Humber, many years. She has a brother now living in Etobicoke—a son of about twenty-two years near Brantford, in the Home District—her husband lives in the State of New York.—She receives more care and better attendance than the others, having extra coffee, tea, milk, toast, &c., and yet at the same time it is found almost impossible to keep her clean.—She is furnished

with the cheapest and most simple clothing as are all the others. John Long, an Negro, 29 years of age—born in the Township of York, Home District—he did not generally reside in this town—he has one or two brothers in Toronto—he is 3 or 4 times a month very outrageous and becomes quite unmanageable. George Adamson, 36 years of age, is an Englishman—resided 7 or 8 years in Chinguacousy, where he married a Miss Hopkins—she and her father yet live in that township—he is religiously insane. John Morrison, 47 years of age—lived several years in the township of Toronto—has no friends or relations—is frequently very bad. They are all furnished with good wholesome soup once a day—meat twice a day with bread—one blanket to each male, the females three biankets.

#### REPORT.

Chairman of Quarter Sessions on the state of the Goal and Treatment of Prisoners in the Newcastle District.

COLBORNE, 16th March, 1836.

SIR,

I have the honor to acknowledge the receipt of your letter of 29th ultimo, conveying the commands of his Excellency the Lieutenant Governor, and calling my attention to the circular letter issued from the Government office on the 23rd December last, relative to the Gaol, and the treatment of the prisoners in the District of Newcastle, and as his Excellency has been pleased to direct that I should transmit for his information any observation that myself and brother Justices might deem necessary to offer regarding the Gaol and the treatment of the prisoners in the Newcastle District.

In compliance therefore with His Excellency's commands, I would beg leave to submit the accompanying report of Messrs. Perry and Ham, (two Magistrates of this District), relative to the state of the Gaol and prisoners therein, which you will please have the goodness to lay before his Excellency. This report so far as I know conveys a correct statement of the condition of the prisoners in the Gaolat present.

On referring to the report of the Gaol Committee, his Excellency will perceive that all the prisoners appear to be well provided with bedding and fuel; but some of them complain of not having sufficient bread allowed them per day for their support. The prisoners that complain most, appear from the Report to be James Johnstone and Sylvester Glem. The female prisoner Mrs. Cooper, as mentioned in the report, seems to complain of being in a weakly condition and wants wine. In taking the respective cases of these three prisoners into consideration, please inform his Excellency the Lieutenant Governor, that I shall in the mean time recommend to the Committee of Supply, to allow the Gaoler to increase the allowance of bread to the prisoners, Johnstone and Sylvester Glen; and should the Gaol Physician deem it necessary to allow Mrs. Cooper, some wine or any other restorative; he may see proper to recommend.

On submitting the circular of the 23rd December last, with the copy of a representation from the Chief Justice and Judges, respecting the allowance of food to prisoners, &c., to the consideration of the Magistrates, at the last Quarter Sessions, held in January, they did not then deem it necessary to order any report of the state of the Gaol and of the prisoners to be made, in consequence of the Grand Jury having given a very favorable report of the state of the Gaol and the prisoners. The Magistrates when assembled in Quarter Sessions declined making any provision for the prisoners, as they sup-posed it was not necessary after hearing the report of the Grand Jury; and besides, they considered that they had no legal authority to make any further allowance to the prisoners. I perfectly coincide with the Committee in expressing their opinion, that the allowance of food to prisoners and their treat-ment should be more amply provided for by Legis-lative enactment, when the Magistrates would have it in their power to administer to the wants and necessities of destitute and sick prisoners more efficiently and humanely than the existing Gaol regulations authorise them to do at present. It was my original intention to have extended these desultory remarks, but having been lately visited with severe bodily indisposition, and just recovering therefrom-I have nevertheless deemed it to be my duty, with all due deference to submit the foregoing observations to his Excellency's consideration as early as possible, and would respectfully beg to apologize for their present crude and incomplete form.

I have the honor to be,

Your most ob't and very humble serv't, JOHN STEELE,

> Chairman Quarter Sessions, NEWCASTLE DISTRICT.

To John Joseph, Esq., Secretary, GOVERNMENT HOUSE, TORONTO.

garn arealt hongoli energi ex-

To the Chairman of the Quarter Sessions, in and for the Newcastle District.

We the undersigned Committee for supplying the Newcastle District Gaol, have according to your request, examined the prison of said Gaol and prisoners confined therein, on the 12th day of March instant, and now beg to report the result of

The first prisoner on the Calender is Joseph Chisholm—says he has comfortable bedding and plenty of fuel. The second prisoner, is James McCammissays be has one and a half pounds of bread per day, and with his own means makes himself comfortable -bedding and fire comfortable.

and the Herman of the John of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the se

The third prisoner, is John Green-does not find the allowance of one and a half pounds of bread perday sufficient—gets meat from the Gaoler occasionally-bedding and fire comfortable.

David Cooper, has Gaol allowance, one and a half pounds of bread per day, and from some means obtained heretofore by his wife sewing, who is confined with him, has made them tolerable comfortable.

Mrs, Cooper, wife of the said David Cooper, says she now is in a very feeble state; and requires some wine and some other necessaries to make her comfortable-bedding and fire comfortable.

James Johnstone, says he has one and a half pounds of bread per day, not sufficient—leaves him in a very feeble and hungry state-bedding and fire comforta-

William Philp—has bread and water, is comfortable on the same—bedding and fire comfortable.

William Hurst, says one and a half pounds of bread per day would not be sufficient; but his wife works out and provides meat and other necessariesbedding and fire sufficient.

Sylvester Glen, says one and a half pounds of bread per day is not sufficient—feels bad with hunger and weakness-bedding and fire sufficient.

Thus the Committee aforesaid have gone through the Gaol and examined the prisoners from the Sheriff's Calendar, which is hereunto annexed the present regulations of the Gaol is one and a half pounds of bread per day for each criminal together with water, bedding, and fire. Medical aid in all cases has been furnished, and for the last few years a regular salary has been given to a medical gentle-man. We beg further to state that we are of opinion that in most cases a little beef and pork, together with some Rice or Oatmeal is necessary for the comfort of prisoners—but we are clearly of opinion that the district funds with the heavy debt of two thousand pounds hanging over it, and due for building the said Gaol and Court House, will not admit of any further claims, than the law allowances for prisoners.

We, the Committee aforesaid, think it advisable and would recommend that a fund should be provided by the Legislature and given to the Magistrates of the District for the purpose of providing necessaries for prisoners confined in the Gaol, over and above the present law allowances, when they with a medical adviser find it absolutely necessary for the medical adviser find it absolutely necessary for the preservation of a prisoner's health.

We are,

The second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of th

#### REPORT.

Chairman of Quarter Sessions of the District of Prince Edward, on the state of the Gaol and the treatment of Prisoners.

COBOURG, March 7th, 1836.

SIR,

I have the honor to acknowledge the receipt of your letter of the 29th ultimo, relative to a circular letter from the Government office, of the 23rd December last, respecting the treatment of prisoners in the Gaol of the District of Prince Edward.

In reply thereto, I beg to enclose a copy of the "Rules and Regulations," adopted by the Magistrates in General Quarter Sessions of the Peace, in April, 1834, and which, in September of the same year, were approved by the Chief Justice; by which it will appear that the humane suggestions of the Judges of the Court of King's Bench, had been anticipated by the Justices of the Peace for the District of Prince Edward; and since I have had the honor of being Chairman of the Quarter Sessions. I have invariably directed the attention of the Grand Jury to the state of the Gaol, and the treatment of the prisoners confined therein; and I have always had the satisfaction of learning that the regulations adopted by the Magistrates were duly observed by the Gaoler, and that there was no cause for complaint on the part of the prisoners.

I have the honor to be,

Sir,

Your most ob't humble serv't,

D. BETHUNE,

Chairman Quarter Sessions,

DISTRICT OF PRINCE EDWARD.

#### RULES AND REGULATIONS.

DISTRICT OF PRINCE EDWARD, To be observed To Wit. and obeyed within the Gaol of the District of Prince Edward—framed

and drawn up by the Justices of the Peace of the said District, in General Quarter Sessions assembled.

1st. The lower apartments of the Gaol, commonly called the cells, shall be appropriated for the safe keeping of persons convicted of or charged with felonies, or misdemeanors, or committed for want of sureties. The apartments in the second, or upper floor of the Gaol, shall be appropriated for the safe keeping of debtors, and persons confined for contempt of Court in civil process.

2nd. The male and female prisoners shall be confined in separate cells or parts of the prison; and the prisoners of each sex divided as far as the dimensions, plan and accommodations of the building may allow, into distinct classes, so that prisoners of the following classes shall not intermix, viz: 1st. Prisoners convicted of felony. 2nd. Persons convicted of misdemeanors. 3rd. Persons committed on charge or suspicion of felony. 4th. Persons committed on charge or suspicion of misdemeanors, or for want of sureties. 5th. Vagrants.

3rd. The Gaoler shall keep a book containing a register of the persons confined in the cells, specifying the offences with which such persons are severally charged, or of which they are convicted; and stating their classification and separation in the different cells, which book shall be regularly submitted to the Magistrates, when in Quarter Sessions assembled, for their inspection and examination, in the months of April and October, in each and every year.

4th. No prisoner is to be put in irons, except in cases of absolute and unavoidable necessity; and the particulars of every such case are to be entered in a Journal by the Keeper, who shall submit the same unto the Magistrates at the first Quarter (or adjourned) Sessions, held in the township of Hallowell. No prisoner shall be kept in irons longer than may be found strictly necessary.

5th. Prisoners who receive no allowance from the District, may procure for themselves and receive, any hour within the time prescribed in a subsequent regulation, a reasonable quantity of plain, wholesome food, as well as bedding clothing and other

necessaries; provided that such supplies shall neither conduce to extravagance nor to luxury. All articles of clothing, bedding and other necessaries, admitted under this rule into the gaol, shall be strictly examined by the Gaoler, or his deputy, in order to ascertain that no such articles are introduced as may facilitate the escape of any prisoner.

6th. No prisoner who is confined under the sentence of any court, or in pursuance of any conviction before a Justice, shall receive any food other than the Gaol allowance, as provided by Law.

7th. Prisoners shall be provided at the expense of the District, with suitable bedding—when they cannot provide the same at their own expense.

8th. As much air shall be allowed the prisoners as the situation and plan of the Gaol will allow.

9th. The walls and ceilings of the cells, rooms and passages, used by the prisoners, on both floors of the Gaol shall be cleansed and lime washed at least once in each year, in the month of April or May. The floors of the several cells and rooms in use shall be washed or cleansed once a fortnight, or oftener if required—a reasonable supply of water, soap and towels, shall be furnished the prisoners in the cells for the purpose of washing themselves, as the same shall be found requisite.

10th. Prisoners committed for trial, or convicted of any offence may see persons with whom they wish to communicate, at the doors of their cells, each day in the week, between the hours of nine and ten o'clock in the forenoon, and the hours of one and two o'clock in the afternoon. The Keeper of the Gaol or his deputy shall be present on all these occasions, and shall take care that no articles are given to the prisoners by their friends that may enable them to make their escape. Provided that persons convicted, and sentenced to die, or to the cells, for any enormous offence, shall not be allowed any communication without leave of the Sheriff.

11th. Prisoners confined for debt may have communication with their friends at the grated door of the upper range of apartments, each day in the week, between the hours of eight o'clock in the forenoon and six o'clock in the afternoon, in summer; and in winter, from nine o'clock in the morning until four o'clock in the afternoon;—the Gaoler or his deputy being careful to ascertain that no articles are given to the debtors by their friends, that may enable them to make their escape.

12th. Letters, newspapers, or packages left at the Gacler's apartment for his prisoners, shall be delivered to the person for whom they are intended without delay: the Gacler or deputy ascertaining as correctly as possible (without opening any letter) that nothing is enclosed that might tend to effect an escape.

13th. No gaming shall be allowed among the prisoners.

14th. Upon the death of a prisoner, notice shall be forthwith sent by the Gaoler to a Coroner of the District, and also to the nearest relative of the deceased, if practicable.

15th. For disregard and disobedience of prison rules and regulations, assaults in prison, profane

cursing and swearing, indecent or refractory behaviour, on the part of any prisoner, the Keeper of the Gaol is authorised to put the offender into solitary confinement, and keep him on bread and water only for a space of time, not exceeding 24 hours; noting the particulars of all such cases in his Journal.

16th. It shall be the duty of the Surgeon, employed in behalf of the District, to attend the Gaol, administer to the medical wants of the prisoners in the cells, and report to the Justices at their Sessions, in April and October, in each year, the state of the health of the prisoners, and the number and nature of the cases in which his services have been called for in the course of each term.

17th. In all cases where application shall be made for support from the District by any person confined for debt or committed for trial, the Sheriff, provided he is satisfied that such prisoner has no other means of procuring provisions, shall be authorised to furnish to each prisoner so applying, sixteen ounces fresh beef or twelve ounces of salt pork, one pound of potatoes, half a pound of bread, with an allowance of salt daily; and that the Sheriff shall report such cases to the next ensuing adjourned Quarter Sessions, when such allowance shall be confirmed or withheld according to the evidence which may be then and there produced.

18th. No Beer, Wine, Cider, or other fermented Liquors, shall be admitted for the use of any prisoner confined for debt, or committed for trial, except as follows: viz:—one pint of wine, or one quart of beer or cider for the use of each prisoner daily, who may provide these liquors at his own cost, or at the cost of his friends.

19th. Divine Service may be performed in the upper and lower range of apartments, on Sunday, by such Clergyman as may be appointed by the Sessions for that duty, or by other Clergyman who may offer his services.

20th. No Tap shall be kept in the prison, nor shall spirituous liquors of any kind be admitted for the use of prisoners, except in conformity to the 15th Section of the Statute, 32 Geo. III, chap. 6. which provides as follows:

Provided always, that no license shall be grant-"ed for retailing any spirituous liquors within any of "the said Gaols or prisons, and if any Gaoler, Keep-"er, or Officer of any Gaol or prison shall sell, lend, "use or give away in such Gao, or prison, or know-"ingly permit or suffer any spirituous liquors or "strong waters to be sold, used, lent or given away "in such Gaol or prison, or brought into the same, "other than except such spirituous liquors or strong "waters as shall be prescribed or given by the pre-"scription and direction of a regular Physician, Sur-"geon or Apothecary; every such Gaoler, Keeper, "or other Officer shall for every such offence, forfeit "and lose the sum of twenty pounds, current money of this province; one moiety thereof to His Majesty, his heirs and successors, for the public uses "of the said province, and the support of the Gov-"ernment thereof; and the other moiety of the said "sum with full costs of suit to such person or per-"sons as will sue for the same, in any of His Majes-"ty's Courts of Record in this province, by action of "debt, bill, plaint, or information, and in any case

"any such Gaoler, or other officer, being convicted "thereof, as aforesaid, shall again offend in like manner, and be thereof, a second time, lawfully convicted, such second offence shall be deemed a forfeiture of his office."

21st. The Keeper and his deputy are strictly forbidden to demand or receive any fee, perquisite or gratuity from any prisoner, or other person, on any pretext whatsoever.—The Keeper is allowed a reasonable salary from the funds of the District, according to the 7th Section of Statute, 32 Geo. III, ch. 6, by which it is enacted, "That it shall and may be "lawful for the said Justices, within the respective "limits of their commissions assembled as aforesaid, "or the greater part of them, and they are hereby "authorised and empowered to ascertain and appoint "a reasonable yearly salary, according to their dis-"cretion, to be paid to the Gaoler; and that the said "salary shall be in place of all fees, perquisites or im-"positions of any kind or sort whatsoever, and that "it shall not be lawful for the said Gaoler, or any "officer belonging to the said Gaol to demand or re-"ceive any fee, perquisite, or other payment, from "any prisoner, who may be confined within any of "the said Gaols or prisons."

22nd. That the Keeper of the Gaol shall cause these rules and regulations, when printed to be fixed in some conspicuous part of the Gaol, for the information and guidance of the prisoners and others.

23rd. All lights to be extinguished in the debtors apartments at ten o'clock at night, except in particular cases, at the discretion of the Gaoler.

I do hereby certify that the foregoing is a true copy of the rules and regulations proposed to be observed in the Gaol of the District of Prince Edward, as amended by the Committee named for that purpose at the Quarter Sessions, in April, 1834, and presented to the Court in the same Sessions, upon which it was ordered that the same should be submitted to one of the Judges of the Court of King's Bench for his approval and confirmation.

I do hereby certify that a copy of the foregoing rules and regulations was submitted to the Honorable John Beverly Robinson, Chief Justice of the Court of King's Bench, in September, 1834, and was by him approved.

DAVID L. FAIRFIELD,

Clerk of the Peace,

P. E. DISTRICT.

CLERK OF THE PEACE'S OFFICE,
HALLOWELL, 4th March, 1836.

BROCKVILLE, 5th March, 1836.

SIR,

I have the honor to acknowledge the receipt of your letter of the 29th ultimo, and had previously called upon the Gaoler to make a report upon the state of the Gaol, &c. after the receipt of Colonel Rowan's letter of the 23rd December, referred to in yours.

From the terms of that letter, however, I did not understand that any observations were called for

from the Justices. The accompanying report will, I trust, give the required information.

I have the honor to be,

Sir,

Your most ob't servant,

JONAS JONES.

J. Joseph, Esq., Secretary, &c.

REPORT of Christopher Leggo, keeper of the Gaol in the District of Johnstown, on the treatwent of prisoners confined therein.

The cells in the main building of the gaol are appropriated to the safe keeping of all prisoners other than debtors, and persons confined for contempt of Court in civil process. The females in all cases are kept separate from the males, and the prisoners classed according to the nature of their offences, as well as the accommodation of the gaol will admit. The wards in the two wings are appropriated to debtors. A book is kept by the gaolers containing a register of every person confined in the cells-specifying by whom committed—the time of his commitment-the offence with which he is charged or convicted-the time of his discharge, and by whom, or in what manner—which book is laid before the Justices at every General Quarter Sessions of the Peace, to be then signed by the Chairman in proof of the same having been there produced.

For attempts to escape—disobedience of prison rules—assaults in prison—profane cursing & swearing—indecent or refractory behaviour—disturbance of gaoler or other prisoners, the keeper of the gaol is authorised by the rules and regulations framed by the Justices of the Peace in General Quarter Sessions assembled, and approved by a Judge of the Court of King's Bench, pursuant to the sixteenth section of the Provincial Statute 32, Geo. 3rd, Chap. 8, to put the offender into solitary confinement, and keep him on bread and water only, for a time not exceeding 24 hours at any one time; and in case of absolute and unavoidable necessity only, may put prisoners in irons. The particulars of all cases of solitary confinement or putting in irons to be noted at the time, in the book before mentioned.

Priscners may see persons with whom they wish to communicate at the doors of their cells (the gaoler or keeper being present) each day in the week, Sunday excepted, between the hours of nine and ten in the forenoon, and one and two in the afternoon, except persons under sentence of death who are not allowed to have any communication with other persons without leave of the Sheriff. Clergymen and the physician appointed to the gaol, are admitted at all times. It is the duty of the physician employed in behalf of the district to attend the gaol, administer to the medical wants of the prisoners in the cells, and report to every General Session of the Peace the state of the health of the prisoners and the number and nature of the cases in which his services have been required. Prisoners who receive no allowance from the district may procure for themselves, and receive at any hour within the time prescribed above, a reasonable quantity of plain wholesome

food as well as clothing, bedding and other necessaries, under the inspection of the gaolor. Destitute prisoners are provided with suitable bedding at the expense of the district and a supply of water, soap and towel for washing. As much air as the situa-tion and plan of the gaol will admit is allowed the prisoners. The walls and ceilings of the cells, the debtors wards, and the passages are cleansed and lime washed two or three times in the year-the floors once a fortnight and sometimes oftener. In case a prisoner confined for debt shall in the judgment of the gaoler be unable to provide himself with subsistence, or without friends able to do so, he is provided with food sufficient to keep him from want 'till the next Session, when the case is reported, and such allowance is confirmed or withheld according to circumstances. No beer, wine, cider, or other fermented liquors, are admitted for the use of any in isoner or debtor, (unless prescribed by the physician appointed for the district) except in quantities to be specified at the time by the gaoler-nor are spirituous liquors admitted within the gaol except as provided in the fifteenth section of the 32 Geo. 3, Chap. Letters, newspapers or packages left at the gaolers appartments for prisoners are delivered to the person for whom they are directed without delay, the gaoler or keeper having satisfactorily examined the same by opening scaled letters or otherwise, which he generally does in their presence. No cards, dice, or gaming are allowed within the gaol, nor lights admitted in the cells except at the discretion of the gaoler, in case of necessity, and all lights are extinguished in the debtors' wards at ten o'clock, except at the discretion of the gaoler under the like necessity. Upon the death of a prisoner notice thereof is sent to a coroner of the district, and to the relations of the deceased, if practicable. Divine Service may be, and is occasionally performed on Sundays in the halls or passages. Sufficient wood for cooking and warmth is provided by the gaoler for all the cells and wards occupied.

Sixty-four prisoners have been committed to the gaol within the last year—two of whom were for murder, one for arson, twenty-six for larceny and other felonies, one for forgery, thirty-three for misdemeanors, and one for returning from banishment.

C. LEGGO.

District of Johnstown Gaol, 5th March, 1836.

REPORT of the Chairman of the Quarter Sessions, Western District, on the state of the Gaol and treatment of the Prisoners in that District.

Sandwich, 10th March, 1836.

SIR,

In replyt oyours of the 29th instant, calling "immediate attention to the circular of the 23rd of December last, relative to the gaol and the treatment of prisoners in the Western District," I have the honor to state that I laid that circular and its printed enclosure, the representation of the Judges, before the last Court of Quarter Sessions. The magistrates being therein simply recommended to supply the prisoners with "such an allowance of food as may be deemed necessary during the present winter," immediately acquiesced as the enclosed certificate

will evince; and, understanding the arrangement made by them would be merely temporary, in fact, "during the present winter," that the subject would "be more precisely regulated by a Legislative enactment" they did not imagine the circular required from them either an answer or opinion, and consequently discussed the matters no further than to add to the prisoners former allowance which daily consisted of water and one pound and a half of bread.

In justice to our magistrates I must observe that "the wants of fuel and bedding" have always been provided, not only "to such an extent as to prevent absolute suffering" but, to such an extent as to render the prisoners comfortable; "clothing" has also been provided when required and a medical gentleman has constantly attended the gaol, therefore, the only respect in which the benevolent suggestions of the Judges have not been anticipated, is in the article of food, hitherto confined, in the Western District, to bread and water. The diet of prisoners since I have been chairman has been, more than once deliberated upon, and, I think, meat would have been granted, had it not been deemed more injurious than beneficial to their health during the rigid confinement, which their security necessarily demanded.

The chief question with us has been, whether humanity did not urge us rather to consult the health of the body than the gratification of the palate; however the paucity of our district funds also, in some measure, enforced our decision. For some years past the Legislature has increased our annual disbursements, without providing any additional means to meet those expenses. Our present revenue is far inadequate to carry on the business of the district properly, and will shortly be much more so, in consequence of the operation of the new township officer's law. The treasurer and I were compelled last year to make ourselves privately responsible to the Commercial Bank for a loan to the district for its immediate and pressing wants to the amount of £189 7 10. Our poverty, indeed, does not even permit any assistant to the gaoler, except in cases of urgent necessity. Our gaol too has been constructed on such an injudicious plan that there is only one fire-place in the whole building, and that is in the keeper's private apartment. This was one reason why, at the last Sessions, we did not order meat during the summer—there is no fire place by which the prisoners meat can be cooked—in the winter they can dress it themselves by their own stove.

I have deemed it my duty to mention the foregoing circumstances, not in the slightest degree to obstruct any generosity that can be shewn to an unhappy class of beings. It would be a subject of public regret, if a measure calculated to alleviate their misfortunes did not succeed, and it is to prevent any after difficulties from retarding the charitable and truly laudable intentions of the Judges, that I would endeavor to invite the attention of the Legislature to create funds for these increasing charges upon the districts.

I have the honor to be, Sir,
Your most obedient and
Most humble Servant,
CHARLES ELIOT,

Chairman, Q'r. Ses. W. D.

John Joseph, Esq. Civil Secretary, &c. &c. At the General Quarter Sessions of the Peace holden at the Court House Sandwich, which commenced on the twelfth and ended on the sixteenth day of January, in the sixth year of our Sovereign Lord William the Fourth.

Ordered—That Prisoners be allowed half a pound of meat per day each, during winter, and butter and

cheese at discretion of Sheriff during summer, agreeable to a recommendation from His Excellency the Lieutenant Governor.

I certify the above to be a true copy.

CHARLES ASKIN, Clerk Peace, W. D.

CLERK OF THE PEACE'S OFFICE, SANDWICH, 28th August, 1835.

CHRLES ASKIN,

Clerk of the Peace, W. D.

# FIRST REPORT

OF THE

# COMMITTEE ON FINANCE.

# POST-OFFICE DEPARTMENT.

#### Members of Committee.

MR. CHARLES DUNCOMBE, Chairman, Messrs. Perry, "Roblin, Mosers. Mackenzik,
Thornurn,
Chisholm,

Messrs. SHAVER,

" M'MICKING, and
" GILCHRIST.

~~~£\$3.0~~~~

TO THE HONOURABLE THE COMMONS' HOUSE OF ASSEMBLY.

THE Select Committee on Finance have carefully examined the documents referred to them by the House, concerning the Revenue of the Post Office Department, and respectfully submit the fol-

lowing Report,-

Your Committee have not the means of ascertaining whether the statements laid before them as computed by Mr. Stayner the Deputy Post Master General at Quebec, are or are not correct. They have been obtained with great difficulty after the delay of a year had taken place from the date of the Address of the House to the late Lt. Governor requesting information, they enter into many minute and important details, and as reported herein they contain the greatest fund of informati on on the subject of the Financial affairs of the Post Office of the Canadas ever laid before the Legislature. From a perusal of their contents it will be seen-that in 1834 the number of Post Offices in the Canadas was 234, or 3 less than in 1833, the number of miles of Post roads only 3988 or 7 less than 1833,—the wages to Carriers £10,371,—the Salaries, £3,467 —the Contingencies £1005.—the Dead Letters £1529—the Gross Revenue £30,-632, of which £12,092 were remitted to London.

The Salaries in both Provinces are stated in the Returns of which the above is an Abstract, at £3,467,—Elsewhere the emoluments of the Post Masters in Upper

Canada alone for the same year are made to be £4,732.—Hence it is evident that the above sum of £30,632 is not the Gross Postage.

The gross letter Postage of Upper Canada in 1832, is given at £14,009—in 1833 £16,510 and in 1834, £17,680 or £48,199, in these three years.

The gross Newspaper Postage for this Province for 1832, was £1336—for 1833, £1433, and for 1834, £1231, or in these three years, £4000.

Nearly the whole of the Newspaper Postage, £4,000, went to Quebec and formed a perquisite of Mr. Stayner's office there. Of the gross Letter Postage reckoning in the proportion that the whole revenue derived from the Canadas bears to the whole revenue derived from Upper Canada, which is the greatest part, upwards of £20,000 of specie have been taken out of the Province and sent to London chiefly as profit or surplus Revenue.

Mr. Stayner states that he has remitted to London of Surplus Postage collected in both Canadas, as follows:

In 1832 £12,519—1833 £10,833—1834 £12,092 or in three years £35,444, a very small part of which was British Postage.—The Inland Postage of Letters from Nova Scotia and New Brunswick, for both Canadas in 1834 was only £562—Mr. Stayner transmitted to Washington as United States Revenue, in and for 1834, \$22,351.

There were collected in the Canadas

Α

in 1834, of Inland British American Postage on Letters forwarded to England, by the Falmouth Packets, via Halifax £16 4s. 6d.

Among the papers laid before the House are detailed statements of the expense of conveying the Mails in both Canadas in each of the following years viz:

| 1832 | | • | | ι | | | • | • | • | | • | | £8,644 |
|------|---|---|--|---|--|---|---|---|---|---|---|--|--------|
| 1833 | * | | | | | e | | | | | • | | 9,896 |
| 1834 | | | | | | | | | | z | | | 11,203 |

And Mr. Stayner states the Contingent Expenditure of the Department which is chiefly in the Lower Province for printing, advertising, Mail locks and keys, seals and stamps &c. &c. &c. at—for 1834, £1874.

There is also a large and costly establishment of Clerks, Accountants, sorting Clerks and other officers, the greater part of whom could be dispensed with in case the general Post Office of Upper Canada were placed at Toronto.

Mr. Stayner gives his salary and emoluments as Deputy Post Master General as follows:

| In | 1832. | • • |
 | |
 | • | | | £3,123 |
|----|-------|-----|------|---|------|---|------|-------|--------|
| | 1833. | |
 | |
 | |
 | · · · | 3,311 |
| | 1834. | |
 | • | | |
 | | 3,122 |

to which we may add the allowance made him for his expenses to London of £842 = £10,398:—Ten thousand three hundred and ninety eight pounds of income in three years to one Office, residing out of Upper Canada, deriving his chief emoluments from the industry of her population, and yielding them a most unsatisfactory return. This is a state of things that is surely susceptible of improvement.

The patronage of the Department is enormous. The largest gross amount of letter postage in Upper Canada were collected as follows; at (Year 1834.)

| | , |
|--------------|--------|
| Toronto | £4,366 |
| Kingston | 1,314 |
| Hamilton | 582 |
| Brockville | 506 |
| Amherstburgh | 453 |
| Bytown | |
| Belleville | |
| London | 337 |
| Niagara | 330 |
| Prescott | |
| | |

The emoluments of the Post Masters of the following Offices, in 1833, and in 1834, were as follows:

| POST OFFICE. | 1833. | 1834. |
|--------------|-------|-------|
| Toronto | £738 | £713 |
| Kingston | 470 | 503 |
| Queenston | 411 | 438 |
| Hamilton | 175 | 184 |
| Niagara | | 146 |
| Prescott | 137 | 138 |
| Brockville | 118 | 118 |
| Cobourg | 102 | 118 |
| Amherstburgh | 110 | 103 |
| | | |

The Postage collected at Queenston in 1834 by the Post Master who is also the High Sheriff of the District amounted to £72. He receives and distributes the United States Mail on that Frontier.

The whole of the emoluments of the Post Masters of Upper Canada in 1833 was £4,428—and for 1834 £4,732.

Part of the emoluments of the Post Master in Toronto are stated to be from fees on Letters mailed by him after a certain time, over and above the current postage.—It is probable that some other Postmasters exact similar perquisites from the public.

Among many other curious and interesting returns, the documents laid before your Committee contain the Postage accounts of all the Newspapers in the Canadas for several years past.—Very few fines appear to be exacted from Mail Contractors for carelessness, delay or neglect. Only £22 15 0 were collected in 1834 in Upper (anada viz: from Messrs. Cook, Stephenson and Weller.

Assuming as correct the official statements laid before us it may be estimated that in the ten years, ending the first day of July there will have been collected from Upper Canada and transmitted to Quebec as salary and perquisites of the Deputy Post Master General and his inferior Officers, and transmitted to London as Tax or Tribute over and above the Inland Postage accruing to England and Packet Postage, the enormous sum of £48,000 Hlf. Cy. a sum sufficient to have enabled five of the Districts of the Province to have commenced operations, each

with a District Bank suited to its local wants and the necessities of its population.

Were a General Post Office established at a oronto a very large expenditure that now centers in Quebec would add to the wealth of this City, and give employment to its Inhabitants, the patronage of the Post Offices in the Province would be in the Province, the power would rest with the country to increase the number of Post Offices from one hundred and upwards to five hundred and upwards; to Townships so distant as not to admit of even a weekly Mail, we might despatch the Post man once a fortnight or once a month, so that no class of persons nor section of the country would be without the means of cheap and convenient post communication.

In case a Bill founded upon the principles adverted to or laid down in this report and the accompanying resolutions shall become a Law, the Post Masters in the country parts of the Province will be far better remunerated than they are at present, the postage rates on letters will be reduced to a more moderate scale, to be counterbalanced by the increased use to be made of the facilities afforded by the Post; the Newspaper Postage rates will be greatly reduced and that too with a gain to the Province; for at present the Deputy Post Master General takes nearly the whole to himself.

The franking privileges to be granted may swell the contents of the Mail Bags, but will not as at present impose a tax upon the Colony of about £3,000 a year, payable in London for Legislative and Executive Correspondence.—In short all classes within the Colony will be gainers by a change such as is contemplated by Your Committee and an efficient and most important department organised from which very great advantages may be obtained.

At present the department is scarcely recognised by Law, and the Legislature have no means of knowing the extent of the abuses which may be practised in it, they can neither examine the accounts, nor check improvident expenditures,

It is inexpedient that this state of things should continue longer. The Imperial Parliament have called upon us to consult the public convenience by the establishment of a domestic Post Office and His Majesty has promised the Royal assent to any practical measure which the Legislature may present for the Royal consideration. Lord Glenelg's Despatch to His Excellency the Lieut. Governor correctly adverts to the greatest impediment in the way of a local Post Office, to wit, the want of an uniform system of laws on the subject in all the colonies. objection is as nothing when weighed against the innumerable benefits it might confer. It will be far easier for the department to open accounts with the present or any other Post Office establishment that may be organised in Lower Canada and the other colonies, than it is to arrange our present correspondence with the United States, with which a great deal of business is now done in the receiving and forwarding of letters without the aid of any Law whatever.

Another advantage in a domestic Post Office is the opportunity it affords of checking extravagances in the system of contracts, affording room for a fair competition and enabling the whole of the accounts of the officers of the Department to be inspected by a Commission from the Executive, a Board of Audit, or a Committee of the Legislature, whether it yielded a surplus revenue or not, its increased benefits would be speedily felt and acknowledged from one end of the colony to the other.

Apart from the Establishment for the Canadas and Newfoundland, there is, it appears, a subordinate department of the Post Office at Halifax, for the Provinces of Nova Scotia and New Brunswick, returns from which for the year ending on the 5th January last, have been communicated to Mr. Howe the Deputy Post Master General to Mr. Stayner, and by the latter to the Government here. These accounts enter into a very few details, but are useful as exhibiting some important particulars which shew the working of the present system.

land through the Military

The Receipts of the Post Office at New Brunswick for 1835, is £4,483, and the expenditure £4,483, of which £535 is sent to England. But the Assembly are not called upon to furnish any part of the sum as in Nova Scotia. Nothing is said of the Newspaper, Pamphlet and Magazine Postage. It is therefore to be presumed that this large branch of the Revenues of these Provinces is the perquisite of some person to us unknown.

Your Committee would recommend that in any Act to be passed for the establishment of a Post Office Department, the following, essential variations or additions to the Bill which passed the House of Assembly of Lower Canada, should be introduced.

It should provide:-

1st. That the Mail be carried six times a week between the line of Lower Canada and Queenston.

2nd. That all Contracts be annually reported to the Legislature.

3rd. That the Salary of a Post Master should in no case exceed £400.

4th. That the Post Master General and all other Collectors of Post Office Revenue receiving upwards of Fifty pounds a year income, shall be ineligible to seats in the Legislative Council or House of Assembly and shall not interfere in Elections.

5th. That a moderate allowance off their Post Office bills should be made to those Editors who will publish in their papers every bill of a general or public nature when it has become a Law.

6th. That Letters or Packets weighing one ounce should only be charged three times the price of a single letter, and in proportion for heavier packets.

7th. That the subscriber of any Newspaper may send a memorandum of the amount due on the same at the price of a Newspaper sheet postage.

8th. That Pamphlets, Magazines and Reviews shall be charged one penny persheet of postage.

9th. That the Post Master General may establish 2d Post Offices.

10th. That the Letters of Private Soldiers and Seamen in the Royal Navy, shall be carried on such conditions, as the Post Master General, with the consent of the Governor and Council shall direct.

11th. That the Post Master General may enter into arrangements with the General Post Office of any other State Province or Country for the forwarding and receiving of paid and unpaid Letters and papers and concerning the manner of accounting for the Revenue that may accrue to or from such State or Country in the same.

12th. That no fee, perquisite or gratuity shall be taken on any occasion by persons employed in the Department.

13th. That a Surveyor of the Post Office shall be employed for such periods as his service may be required.

14th. That a suitable Building be erected for the use of the Department, to be paid for only out of its surplus Revenue.

15th. That the Post Master General shall enter into any arrangements he may think fit for increasing the speed, security

and cheapness with which Letters can be sent to or received from Europe, and the West Indies, via the United States, with the consent of the Governor in Council.

16th. The usual accounting Clause in Money Bills.

17th. That each Post Master and Mail Contractor shall transmit to the Post Master General a report on the state of the Roads, and suggesting improvements in the Department. Said reports to be laid before the Legislature.

18th A premium to be paid for the three best Reports.

19th. That £100 a year may be expended on the purchase and collection of Books, Pamphlets, Legislative Reports, Drawings, Road Instruments, Treatises, or other documents for the improvement of Roads, to be deposited in the Library for reference by the Legislature or the Department.

20th. That the Post Master General shall regulate the hours at which each Post Office be kept open.

21st. That the Accounts of the Department shall be kept on the Italian or Merchantile principle of a double entry of Debtor and Creditor, made from the original transaction; and shall shew specifically from what sources the Revenue is derived and to what purposes it is applied.

22nd. That as soon as the other Colonies, or any of them shall extend the Franking privileges within the said Colony or Colonies, to the classes in this Province authorised by the Legislature to frank Letters, the favor should be made reciprocal.

23rd. That the Provincial Statutes shall be placed in the Post Office by the proper Officer and distributed by mail through the Province free of cost.

24th. That the Post Master General shall be required to endeavour to effect some arrangements by means of which to lessen the expense of Letter Postage between the United Kingdom and this Colony.

25th. That a more perspicuous and definite system with respect to the advertising of Mail Contracts, than that provided in the Lower Canada Bill, should be devised.

26th. That milder punishments than those generally provided in the Bill printed by order of the House might be resorted to.

27th. That the Oath of an informer shall be taken as evidence, but no informer shall have any share of any penalty, fine or forfeiture, nor any pecuniary interest in obtaining a conviction.

28th. That the Post Master General shall enquire and report to the Legislature whether it would be advisable to provide by Law, authorising the Department to insure moneys sent by Mail, and if so under what regulations.

29th. That this Act may be altered or amended by any other Act to be passed this Session.

30th. That 2000 extra copies of the Post Office Law may be printed separately for the use of the Department.

31st. And that so much of the Act as gives power to the Department to appropriate part of the Post Office Revenue in the payment of Salaries, Percentages, wages, Contractors &c. shall only continue in force for three years, leaving the supplies of the Department to be provided thereafter by estimates to be passed by the Legislature for such period as it may think fit.

Your Committee herewith report several Resolutions containing a Tariff of duties proposed to be levied on Letter and papers and providing for the temporary appropriation of the proceeds to the service of the Department.

All which is respectfully submitted.

CHARLES DUNCOMBE,

Chairman.

Committee Room House of Assembly, 18th March 1836.

APPENDIX

TO THE

FIRST REPORT

OF THE

SELECT COMMITTEE ON FIRANCE.

ON THE

POST-OFFICE DEPARTMENT,

CONTAINING

DOCUMENTS TRANSMITTED BY THE DEPUTY POSTMASTER-GENERAL, AT QUEBEC, TO HIS EXCELLENCY THE LIEUT. GOVERNOR, IN COMPLIANCE WITH THE ADDRESS OF THE HOUSE, LAST SESSSION, TO HIS EXCELLENCY:

TOGETHER WITH

CERTAIN ACCOUNTS OF THE RECEIPT, EXPENDITURE, AND GENERAL MANAGEMENT OF THE POST-OFFICE DEPARTMENT IN CANADA.

GENERAL POST-OFFICE. Quebec, November 25, 1835.

SIR. In compliance with the requisition of the House of Assembly of Upper Canada, conveyed through your letter of the 26th February last, addressed to me by command of His Excellency the Lieutenant-Governor, I have now the honour of transmitting, for the information of the House, the Returns and Statements connected with the Post-Office Establishment in these Provinces, called for by the Address of the Assembly, dated the 24th February last, so far as I am able to furnish them. I consider it incumbent upon me te explain that it was absolutely out of my power to render those Statements within the last Session, as it was the wish of the House I should do. The demand, it will be recollected, was made at a late period of the Session; and although I applied myself without delay to the task set before me. I soon had cause to apprehend that the amount of resourch, as well as of labour, which the different Sintements reed, and more especially the necessity of communicating with every Postmaster in the country, for certain items of information which I could only satisfactorily obtain through them, would involve a consumption of time much beyond that assigned to me by the Assembly. The execution of the work has justified my apprehension, for, notwithstanding I have devoted every hour which I could spare from the current and indispensable duties of my office to the preparation of the required Documents, it is only now that I have been able to complete them.

It is further necessary for me to explain, in order to account for the absence of any Returns from Nova Scotia and New Brusswick, that, immediately upon the receipt of the requisition from the Assembly, I forwarded a copy of it to the Deputy Post-Master-General at Halifax, (who is in charge of the Lower Provinces) requesting him to supply me with the information called for. That Officer informed me, in reply, that he was about preparing Statements of a similar character at the desire of Sir Colin Campbell, the Lieutenant-Governor of Nova Scotia, to be ready at the next Session of Parliament of that Province, and that he would send me copies thereof for the information of the Assemily of Upper Canada. Those copies have not yet been received, but I do not doubt that they will shortly reach me. I beg to be ad copy of my letter to Mr. Howe, the Deputy Post-Muster-General, and of his answer thereto, that the House may he satisfied I have, as far as in me lay, attended to their wishes in this, as is other respects connected with their desire for information on the subject of the Post-Office.

I have the honour to be, Sir, Your most obedient servant,

T. A. STAYNER. Deputy Postmaster-General.

Licut.-Col. Rowan, &c. &c. &c.

I request you will do me the favour to acknowledge the receipt of this letter and accompanying documents, that I may be assured they have reached you safely,

T. A STAYNER.

(Copy.)

Sir,

GENERAL POST-OFFICE. Quebec, March 10, 1835.

Sir.,

Herewith I beg to hand you copy of an Address from the House of Assembly of Upper Canada, sent to me by Sir John Colborne, the Lieutemant-Governor of that Province, desiring certain information relative to the Post-Office Establishment in British North America; and I have to request that, in furtherance of the said requisition, you will be pleased to transmit to me the Statements required by the Assembly, so far as they can be furnished by you, in relation to the Provinces of Nova Scotia and New Brunswick, and the Island of Prince Edward.

I have the honour, &c

I have the honour, &c
THOS. A. STAYNER, Deputy Postmaster-General.

John Howe, Esq., Halifax.

CCPY.

GENERAL POST-OFFICE, Halifax, April 20, 1835.

Six,

I have to acknowledge the receipt of your letter of the
10th ultime, accompanied by an address from the House of Assembly of the Province of Upper Canada, to His Excellency Sir
John Colborne, praying for certain information respecting the
Post-Office Department in Prince Edward Island, New Brunswick and Nova Scotia.

Having been directed by His Excellency Sir Colin Campbell, to proper Returns to be presented to the Legislature of this Province at the next Session, which will embrace much of the

required information, I will lose no time, after they are completed, in forwarding copies of them to you, and in further complying, as for as I am able, with the requisition of the House of Assembly of Upper Canada.

I am, Sir,

Your obedient servant,

(Signed)

J. HOWE, Jun.,

. . .

Deputy P. M. G.

THOMAS A. STAYNER, Esq.,

Lic. Sic. Sic

SCHEDULE of Returns prepared by the Deputy Post-Master-General at Quebec, and transmitted herewith to His Excellency Sir John Colborne, for the information of the House of Assembly, conformably to an Address of the Assembly to His Excellency, dated Toronto, 24th February, 1835.

| Number of
Return. | Descripten of the Return or Statement. | Number of

Deputy Postmaster-General

GENERAL POST-OFFICE. QUEBEC.

Note.—To account for there being two Offices in Upper Canada and one in the Lower Province less this year than in 1833, I have to state that this difference was occasioned by the unavoidable necessity of reducing, for a time, (until competent persons could be found Postmasters,) the Offices of East Williamsburg and Alexandria in Upper Canada, and of St. Remi in Lower Canada—all those are, however, again in operation.

GENERAL REMARK.

The Address from the House of Assembly, amongst other information connected with the mails, requires that the rate (i. c. the rate of progression as I understand it) at which the mails are conveyed, should be stated. I have endeavored as far as possible to comply with this requisition, by giving the average rate of progress of the respective mails, as burgained for between me and the contractors; but persons acquainted with the climate and roads of the Canadas must be aware of the impossibility of enforcing a strict compliance with the stipulations of a mail contract in this country (as regards the rate of travel) at all periods of the year. On many of the roads it is quite possible in dry weather to travel seven or eight miles an hour, whilst in a rainy season, or in the spring and fall of the year, the same road cannot by any exertion be travelled at a faster rate than three or four miles! In forming the contracts I endeavour to ascertain what rate of speed is necessary and attainable under ordinary circumstances, and I make my agreement accordingly, exercising my judgment in imposing times upon the contractor when it can be proved that he or his people have not used report efforts to get over their stages in time. I beg to observe, that as a check upon the couriers of mail-drivers. I take care that upon all important routes a "time or road bill" accompanies each mail. On these are noted by the different Postmasters the time or steps against them for neglect of day.

GENERAL POST-OFFICE, QUEBEC.

T. A. STAYNER, Deputy Postmaster-General.

No. IX.-1833.

A RETURN shewing the Expense incurred in the Canadas for the conveyance of the Mails during the Year 1833, the Name of each Mail-Contractor, the Amount received by him, and the Rate at which the Mails are conveyed.

T. A. STAYNER,

GENERAL POST-OFFICE, QUEBEC.

Deputy Postmaster-General

No. XI.

STATEMENT of the Contingent Expenses incurred in the Canadas during the Years 1832, 1833 and 1834, including every incidental Disbursement, except that for conveying the Mails, which is given in a separate and detailed Return. See Returns Nos. 8, 9 and 10.

| PARTICULARS OF DISBURSEMENTS. | A) | OUNT CURRE | NCY. |
|--|-----------------------------|--------------------------------------|--------------------|
| | 1832. | 1833. | 1834. |
| A. The Printing work and Advertising | £ s. d.
513 5 9 <u>4</u> | £ s. d.
318 19 9 | £ s. d.
610 2 9 |
| 3. Law charges. Travelling expenses, mail bags, and portmanteaux, office rent, carrying out letters, fuel and candles, mail locks, seals and stamps, scales and weights for weighing packets, maps and various other objects | | | |
| | | 568 0 3 <u>4</u>
887 0 0 <u>4</u> | |

A. The amount of printing work varies considerably for the different years, this arises from my being obliged to order a new supply of accounts and other official blanks, for which the charge may be made one year, although the supply may be sufficient. for two

B. The expense of each individual item classed under the head of "incidental dishursements" can only be effectually got at by such a minute and laborious analysis of the accounts as does not appear to be called for by the requisition of the House of Assembly; the chief items of charge therefore, such as "the expense of conveying the mails," and or "Printing work," are given under distinct heads in this and other Returns, and all the other items are classed together.

THOMAS A STAYNER,

Deputy Postmaster-General.

No. XII.

RETURN of the Gross Amount of Letter Postage received at each Office in Upper Canada during each of the years 1832, 1833, and 1834; and shewing in what manner the proceeds have been applied.

The proceeds, after compensating the Postmasters for the collection, ore appropriated under the Deputy Postmaster General's

Privilege to him as an emolument of office.

Norg.—There is an observation on Return numbered XX, which may, I think, with propriety, be introduced here—namely, that I have never undertaken to keep such critically correct accounts of my emoluments of office, as I have of public monies coming into my hands, and that I cannot, therefore, pledge myself that there are no errors in my Returns relative to Newspapers and Pomphlets. I, nevertheless, am not aware of the existence of any inaccuracies in the Returns now sent forward.

T. A. STAYNER,

Deputy Postmaster-General.

GENERAL POST-OFFICE, QUEDEC.

I am unable to state what proportion of this sum of £6 6s. 7d. was paid by each paper. † For three quarters, viz :—April, July, and October, 1832.

A.—This is so returned by Mr. Bethune, the late Postmaster of Cohourg, and I can obtain no further information from him on the subject: I have reason to suspect that the Newspaper Returns from Mr. Bethune for the years 1832, 1833, and until he was removed from the Department in November, 1834, are incorrect; but Mr. Bethune being bankrupt I have no recourse against him—the sums brought to account in these statements are all that were ever remitted to me.

GENERAL OBSERVATIONS.

The proceeds have been appropriated as an emulument of the Deputy Postmaster-General under a privilege recognized by the Postmaster-General since the curlicat introduction of the Post-Office system in the British Provinces (vide, observation at the four of the statement showing the emuluments of the Deputy Postmaster-General from every source,) in addition to which I will here re-

(52) Return of Gross Amount paid by Printers in Canada.

mark, as it affords a reason for the creation of the privilege, that the Imperial Statutes under which the Post-Office Department in these Colonies now exists, contain no provision for the transmission of Newspapers or Pamphlets by post, except as letters! and as it is obvious that the exaction Letter postage on such papers, &c. would have amounted to an interdiction, as regards them of the benefits of mail conveyance, the Government, or the Postmister-General; (as I have understood.) judged it expedient to permit the Deputy Postmaster-General to frank those papers, &c. through the post for a consideration such as should being reed upon between himself and the printers, appropriating the compensation as a personal emolument. I have been informed that this privilege is sanctioned by an old Act of Parliament, but I cannot vouch for it. I beg further to romark, that, for many years past, they trouble attending the making up and transmitting newspapers and pamphlets has become so serious, that, as a matter of necessity as well as of justice, I have compensated my Deputies for the service, out of the amount received by me. I now subjoint opies of all orders or other authorities from the General Post-Office, London, having any bearing upon the question, that have been addressed to this Establishment since my annoinment as Deputy Postmaster-General, a period of between seven and eight years; any thing previous theremark, as it affords a reason for the creation of the privilege, that the Imperial Statutes under which the Post-Office Department in blishment since my appointment as Daputy Postmaster General, a period of between seven and eight years; any thing previous there to that may have existed. I can have no access to, as my predecessors, upon retiring from office, took away with them all letters and documents, except such as were considered necessary for conducting the duties of the Department.

The first communication upon this subject received by me was in a letter, of which the following is a copy, from the Secretary to the General Post-Office, dated 3d September, 1830. It is in answer to a letter from me to the Secretary, forwarding copy of a Petition from the Printers in Lower Canada to His Excellency Sir James Kempt, then Governor of the Province, praying that their papers might be circulated "free of postage as in England."

THOMAS A. STAYNER. Deputy Postmaster-General. GENERAL POST-OFFICE, ? QUEBEC. GENERAL POST-OFFICE, Sept. 3, 1830. SIR, My Lord, the Postmaster-General, having taken into consideration your letter, transmitting copy of one from the Secretary to the Governor General of the Canadas, with a Petition to His Excellency from the Proprietors and Printers of Newspapers in the Province, praying that their papers may be circulated free of postage as in this country. I am commanded to observe, that the applicants do not appear to recollect that the newspapers in this country contribute largely to the Stamp Revenue, which may be considered as the price of their conveyance by post, and to acquaint you, that, as the papers in Canada are not subject to the same during the contribute largely to the Stamp Revenue, which may be considered as the price of their conveyance by post, and to acquaint you, that, as the papers in Canada are not subject to the same during the contribute largely to the Stamp Revenue, which may be considered as the price of their conveyance by post, and to acquaint you, that, as the papers in Canada are not subject to the same during the contribute largely to the Stamp Revenue. ties, His Grace cannot deem them entitled to a similar exemption. I am, Sir, &c., (Signed) F. FREELING T. A. STAYNER, Esq., Quebec. The next communication on this subject is as follows: GENERAL POST-OFFICE, London, April 7, 1831. SIR. Mr. Armour, the Proprietor of the Montreal Gazette, has transmitted to me formal protests against the proceedings of the Postmaster of that place, who, it appears, refused, on two occasions, to forward his newspapers by post without the payment of the usual annual gratuity to you,—and having laid the same before My Lord, the Postmaster-General, I received His Grace's commands to reply to Mr. Armour, as you will see by the enclosed copy of my letter, which I send for your information. Without imputing any blame to the Postmaster at Montreal, it appears, upon these occasions, he has misconceived his instructions, and you will be pleased to give directions that newspapers, when deposited in the Post-Office, must be forwarded without de-lay, and if not circulated under your privilege, they should be charged with the full rates of postage. I am, Sir, &c. &c., (Signed) F. FREELING. T. A. STAYNER, Esq., Quebcc. GENERAL POST-OFFICE. Loudon, April 7, 1831. SIR,

I beg to acquaint you that I have hid before My Lord, the Postmaster-General, your representations on the subject of the Deputy Postmaster at Montreal having declined to forward your newspapers. By the post without the payment of the usual gratuity to the Deputy Postmaster-General at Quebec, and I am commanded to acquaint you, that the gratuity in question is the long established and authorised perquisite of the officer in question, and that all newspapers circulated by the post in British North America, otherwise than under his privilege, are liable, by law, to the charge of the full rates of postage.

I regret the delay which occurred to your newspapers on the occasions alluded to, which appears to have arisenfrom a misconception of his instructions on the part of the Postmaster at Montreal; but you will see from the foregoing explanation that if he had forwarded them, they must have been charged with postage.

1 am, Sir, &c. &c.,

(Signed)

F. FREELING.

No. XVII.-1833.

STATEMENT of the Gross Amount paid by each Printer or Proprietor of Newspapers in the Canadas for the transmission of his papers by post for the year 1833, shewing in what manner the proceeds have been appropriated, with copy of any Orders, Despatches, or other Authority under which such Postages have been exacted in the Colonies during the last ten years.

For two quarters, ending 5th April and 5th July, 1834, for which Mr. Mackenzie gave notes of hand, which are not yet paid:

T. A. STAYNER,

Deputy-Postmaster General.

A .- Vide Remark under this head upon corresponding Statement for the year 1832:

No. XIX.

STATEMENT shewing in detail the Emoluments of the Deputy Postmaster-General of British North America, whether from Salary, Fees, Allowances, Newspaper Postages, Pamphlet Postages, Per-centage on the collection of United States Letter or Newspaper Postage, or from any other source whatever, during the years 1832, 1833, and 1834, and shewing the Authority under which he receives the several items of income.

A.—1 have stated these sources of Income in Sterling because they are paid in that money. Up to the month of October, 1334, I was £200 per annum towards paying for assistance in my office. From October, however, that allowance was struck off, and a new arrangement of a portion of my duties was determined upon by the Postmaster General, as described in Return numbered III., accompanying this. It is not in my power to refer to the original authorities under which the salary and allowances in question were granted—they were enjoyed by my predecessors in office from a remote period, and I acquired a right to them by virtue of my commission.

mission.

B.—The Deputy Postmaster General for the time being has possessed this privilege since the first establishment of the Post-Office in the British Provinces. I cannot point out the authority under which the privilege originated; but I know that it has been repeatedly recognized by my Head of Department in England, and never considered it incumbent upon me to inquire into the date or form of the authority. It will be observed that the total sum derived through this privilege exceeds the gross amount paid by the Newspaper Printers; the difference between these sums is produced by casual papers and pamphlets (American and Provincial) forwarded by others than printers.

forwarded by others than primers.

C.—This is a source of income altogether independent of the Imperial or British Revenue; nevertheless, as the amount is required to be stated by the House of Assombly, I furnish it with the same unreserve that I do the other items of my income. I am the General Agent of the United States Post-Office for the collection of American Postage in these Provinces, and am held responsible for this postage, which I collect and transmit regularly to Washington.

T. A. STAYNER, Deputy Postmaster-General.

GENERAL POST-OFFICE, QUEBEC.

No. XX.—Duplicate.

A STATEMENT shewing the several Payments made by the Editor and Proprietor of the "Patriot" Newspaper, first published at Kingston and now in Toronto—from the commencement of the Series, with the Dates of the several Payments—so far as the latter can be ascertained.

A .- It is not in my power, neither can Mr. Macaulay nor Mr. Howard, the Postmusters at Kingston and Toronto, who collect A.—It is not in my power, neither can Mr. Macaulay nor Mr. Howard, the Postmusters at Kingston and Toronto, who collected the above monics, to state the precise days of the respective payments—though that the monies were all paid (with the exception of an abatement of £17.5s, made by me and explained in Note B.) the above gentlemen and myself are prepared to declare upon onth, if necessary. Why the precise days of payment cannot now be cited will, I trust, be found satisfactorily accounted for in the following note from Mr. Macaulay, to whom I referred the question—the reason stated by him as regards Kingston applying in substance to Toronto. Mr. Macaulay says—"Mr. Dalton was not panetual in paying up his newspaper dues—cometimes I accounted for them myself to the Deputy Postmuster-General at the quarterly periods, though the money was not actually received by me at the time; but generally they were settled for by Mr. Dalton by a. Promissory Note, payable in 90 days after date, or by a draft!—a species of accommodation which, I beg to add, I have never refused to any printer who has requested it.

At Toronto Mr. Dalton did a considerable amount of printing work for the Department, and any difference between his claims on this score and his debt for the transmission of his papers was accounted for by himseither in cash or by his promissory obligations

on this score and his debt for the transmission of his papers was accounted for by him either in cash or by his promissory obligations on this score and his debt for the transmission of his papers was accounted for by him either in cash or by his promissory obligations on this score and his debt for the transmission of his papers was accounted for by him either in cash or by his promissory obligations on this score and his debt for the transmission of his papers was accounted for by him either in cash or by his promissory obligations on this score and his debt for the transmission of his papers was accounted for by him either in cash or by his promissory obligations on this score and his debt for the transmission of his papers was accounted for by him either in cash or by his promissory obligations on this score and his debt for the transmission of his papers was accounted for by him either in cash or by his promissory obligations on this score and his debt for the transmission of his papers was accounted for by him either in cash or by his promissory obligations on the cash of the ceived, by the Romark in the proper place, that Mr. Dalton paid for the transmission of his papers when they were taken to the

B.—It became necessary to introduce into this statement an account of the charge made against Mr. Dalton for the transmission of his paper "The Catholic," because when he discontinued the publication of that paper he stated that he was a severe sufferer both by it and the "Patriot," from the non-payment of the subscriptions and other causes; and on this ground he appealled to my consideration of his case, as regarded my claim upon him for the transmission of those papers. He was then indebted to me £17 5s., and having every reason to believe that his statement was true I cancelled my demand against him for this sum, distinctly explaining to him at the time that although the peculiar circumstances of the case induced me to forego my claim in that instance, it

was not to be assumed as a procedent either by him or any other newspaper proprietor.

C.—I beginned a wail myself of this opportunity to explain, in reference to payments on account of the "Patriot" which appear in the Statement of Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between that Statement of Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between that Statement of Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between that Statement of Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between that Statement of Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between that Statement of Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between that Statement of Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between the Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between the Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between the Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between the Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between the Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between the Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between the Newspaper Postage laid before the House of Commons in 1933, that the discrepancy between the Newspaper Postage laid before the House of Commons in 1933, that the discrepance is the Newspaper Postage laid before the House of Commons in 1933, that the discrepance is the Newspaper Postage laid before the House of Commons in 1933, that the laid before the Newspaper Postage laid before the Newspaper laid before the Newspaper laid before the Newspaper laid before the Newspaper laid before the Newspaper laid before the Ne pear in the Sintement of Newspaper Postage and before the crosse of Commons in 1999, that the discrepancy between that Sintement and the present arises from the fact, that, in making up the former, the Clerk who was employed at the task, finding, amongst the Kingston accounts, memoranda of only two payments in behalf of the "Patriot," supposed that no more had been made, and, wi hour referring to me on the subject, filled in the amounts accordingly! I was at that time engaged in preparations for my departwe non-renerring to me on the same at make in the amounts accordingly. It was at that time engaged in preparations for my departure for England, and being nearly overwhelmed with business, was unable to revise all the papers which were being made out in my office as under any other circumstances. I should have done—and in this way the error escaped my notice. It is due to myself further to say, with regard to what is called. "Newspaper Postage." that this being an emolument of my own, I never conceived, it necessary to be so particular in preserving the accounts connected with it as of those relating to Government monies—neither have I ever sary to be so particular in preserving the accounts connected with it as of those relating to Government monies—neither have I ever sary to be so particular in preserving the accounts connected with it as of those relating to Government monies—neither have I ever exacted from my Deputies, who assist me in the collection of these monies, such formal, and precise accounts as they render of the public revenue; and this I hope will be borne in mind should other inaccuracies under the same head (of the existence of which, however, I am not aware) be detected. It is not my wish to render any other than correct statements, and I have taken every means in my power to make those I am now preparing perfectly correct—still trifling errors may have crept in, and should it prove so, I repeat that they have arisen from causes such as I have attempted to describe.

Deputy Postmaster-General.

GENERAL POST-OFFICE, QUEBEC.

No. XXI.

A STATEMENT shewing the Sums remitted by the General Post-Office Department in Canada to the General Post-Office, London, and also the United States Postage remitted to the Post-Office Department of the United States, in and for the Years 1827, 1828, 1829. 1830, 1831, 1832, 1833, and 1834; and stating the balance now in the hands of the Deputy Postmaster-General at Quebec, and the period up to which the last remittance to London was made.

16,777 8570 |
| or the year 1833or the year 1834 | 10,333 6 8 | 22,3517 1 |

Note 1.—I assumed charge of the Department as Deputy Postmaster-General on the 5th April, 1828, and am not in possession of documents to show the sums remitted to either the General Post-Office in London or Washington previous to that date.

Note 2.—It is impossible for me to discover to a certainty the balance of monies in my hands on the 24th February, 1835, which is the date of the Address of the House of Assembly, because that period is in the middle of a quarter, and it is only when a quarter's accounts are closed, and the balance struck, that I can tell precisely how much I am indebted to the General Post-Office; as nearly, however, as I can judge, the balance in my hands, on the 24th February, was about £1500 or £1600. At that date the accounts for the October quarter lud been transmitted, and the regular quarterly remittance made, and the accounts from my Deputies, and their balances from the succeeding quarter (January) had only in part been received. I beg to add, that I remit to the General Post-Office in London four times a year, and when I make those remittances I generally discharge the whole balance for which I am liable, so that four times in each year I am actually not in possession of any money belonging to the General Post-Office: it happens, ladeed, not unfrequently that I am in advance to the Department.

Note 3.—The great increase which will be observed in the amount of United States Revenue collected in this country and remitted to Washington within the last four years has arisen chiefly at Queenston, or rather through the accounts kept at that office.

T. A. STAYNER,

GENERAL POST-OFFICE, QUEBEC.

Deputy Postmaster-General.

No. XXII.

A STATEMENT of the Amount of Money found in Dead and Misdirected Letters in Upper and Lower Canada from 1827 to 1834, both years inclusive, and shewing the purposes to which it has been applied.

T. A STAYNER.

GENERAL POST-OFFICE, &

Deputy Postmaster-General.

No. XXIII.

A STATEMENT of the Amount of the Colonial Postage, whether on Letters or Newspapers, charged at Quebec and Halifax to the Department in London, and collected, or intended so to be, in England, or other parts of the King's Dominions beyond North America, for 1832, 1833, and 1834.

No such posinge as that above described is collected in Great Britain or Ireland. Letters come to us by the British Government Prackets, via Falmouth and Halifax, charged with British posinge, and we collect that posinge here.—but upon letters for Great Britain and Ireland we require the inland, or what is here called "Provincial Postage," to be paid to Halifax at the time of posting—such has always been the usage.

T. A. STAYNER.

Deputy Postmaster-General.

(52) Return of Classes of Persons who Frank Letters, &c. 41

No. XXIV.

A RETURN shewing the several Classes of Persons who Frank Letters, or who have the privilege of transmitting Letters through the Post-Office at reduced Rates of Postage—with the extent to which their privileges extend

The Deputy Postmaster-General and the Surveyors have necessarily the right of franking without limit as to the number

or size of their letters or packets.

Postmasters have a right to free postage on letters to and from themselves to the extent of half ounce packets or double letters without limitation as to number. It forms part of our regulations, that no Postmuster can frank his correspondence except at his own office. On business of the Department, Postmusters are authorized to frank and to receive free packets of any No person, or class of persons have the privilege of transmitting letters through the Post-Office at reduced rates of postage.

T. A STAYNER.

GENERAL POST-OFFICE, QUEBEC.

Deputy Postmaster-General.

The Committee have required to be prepared a Statement showing 1st, The available claims due from Postmasters and others in Lower Canada to the Post-Office Department on the 5th day of October, 1835—2dly. The funds belonging to the Department in my hands, or at my credit—whether as cash in hand, cash in the Banks, or Bills of Exchange—on the same day—3dly, The amount of claims against, and debts due by, the Department on the same day.

Likewise similar Returns for Upper Canada to the same date.

When this order was handed to me, I informed the Committee that I would, as far as lay in my power, endeavour to furnish the Statements; but the impression upon my mind at the time (and which I expressed to the Committee) was, that it would be imprectable to prepare Returns in literal conformity to the order. Since then, having carefully studied the requisition, it has become practable to prepare Returns in literal conformity to the order. Since then, having carefully studied the requisition, it has become evident that there is no possibility of making up all those Sintements in the form required; and it appears to me that the Committee cannot but see the truth of this declaration, when I have explained that the accounts of the different Provinces being unavoidably blended together in my Returns to the General Post-Office, it cannot be ascertained what proportion of my old balance may be considered applicable to either Province. In my general Statement, therefore, which I may prepare, that balance must stand alone. I have, accordingly, made a Return, in which the total balance due to the General Post-Office in London is stated in the manner just described; but, with a view to clucidate the subject as much as possible, I have, in addition, prepared a distinct and separate Return of the amount of Postage collected in each of the two Provinces for the quarter ending the 5th October, with the charges applicable to each, (as nearly as they can be got at,) and the balances accruing to each Province by the operation appear in those statements.

As to the funds belonging to the Department in my hands on the 5th of October, 1835, I must again represent to the Committee the impossibility of complying literally with the terms of the order. I am not required by the Postmuster-General to keep a deposite of monies belonging to the General Post-Office separate from my own monies; and I have never done, so. It is necessary, for the proper conducting of my duties, that I should keep monies in several Banks in both the Canadas; and I also keep monies in my own chest. I take care to have at all times more money, either in Bank or in my own immediate custody, than is sufficient to satisfy the claims of the Post-Office; but even if it were otherwise, the large securities lodged at the General Post-Office London, in my behalf, are a sufficient guarantee to Government against any possible loss or defalcation that could arise through me. I consider that I have an undoubted right to deposite Post-Office revenue where I think proper, my securities being responsible to Government that it shall be forthcoming at the time I am required to remit it to England.

On the 5th October, 1835, when I appear to have been indebted to the General Post-Office about £2,200, I had more than that amount in Bank in Upper and Lower Canada, besides a large sum in Notes and Bills of Exchange in my own chest jobit it is inamount in Bank in Opper and Lower Canada, pesses a large sum in Notes, and Dins of Exchange in my own crest; but it is impossible for me to state officerwise than I have done what proportion of Post-Office money was in my own hands, and what in the Bank. I have judged it necessary to enter into this somewhat lengthened explanation of the circumstances connected with the custody of the Pos-Office monies, as, from the form of the questions put to me, the Committee seem to have thought that I kept accounts at the Banks specifically for the Post-Office revenue, a thing which I have never attempted doing.

I shall now proceed to furnish Statements approximating, as nearly as circumstances will permit, to the letter of the order, hoping that, with the explanations afforded above, and the notes which I shall subjoin, the Committee will be satisfied that I have done every thing in my power to meet their wishes.

In reply to the third division of the requisition, I beg to say, that I am not aware of any claims existing against the Post-Office, except one of Mr. Henry Hoyle, who undertook the conveyance of the mail between Montreal and Dundee, in the month of July, 1833. Upon the failure of the contractor, Mr. Schuyler—his son-in-law.

Mr. Hoyle has never made a demand for a specific sum for his services; but, so far as I can understand his arguments, he appears to consider himself entitled to about eight hundred dollars. I have offered him \$500. We are now engaged in correspondence on this subject.

I have not brought into the foregoing Statements any debts, whatever they may be, which are due to the Deputy Postmaster-General, and not to the General Post-Office.

(Signed)

T. A. STAYNER,

GENERAL POST-OFFICE, Quebec, January, 1836. Deputy Postmaster-General.

GENERAL Instructions to Edwin James King, Esq., Accountant to the Post-Office in British North America.

You will take upon yourself the charge and management of the Accounts of the Post-Office in British North America, including the claims and allowances for re-directed, refused, and undirected letters, for which purpose the accounts of Nove Scotia, New Brunswick, and Prince Edward's Island will be sent to you to be incorporated in one General Account of British North America.

The accounts and checks should be maintained and furnished upon the principle that obtains in this country, so for as is practicable; and you will not fail to adopt any improvements which your experience may suggest, or any alterations which may occur to you as necessary, from the nature and character of the Post in the Provinces, reporting, by the first opportunity, such alterations as you may propose to make, or as you may have found necessary to make for the consideration of the Postmaster-General.

The object of your appointment is not only to place the system of Accounts in the British North American Provinces upon a satisfactory footing, but to establish a neck upon the Deputy Postmaster-General, as well as the subordinate Postmasters and Public Accountants of every description attached to the Post-Offices in all matters relating to the accounts, but not interfering with the maintenance of the check. You are to obey such instructions as you may receive from the Deputy Postmaster-General, and, bearing in mind his responsibility for the collection of the revenue, you will afford him every information and assistance which he can possibly require.

The Annual, Quarterly, and Periodical Accounts should receive the signature of the Deputy Postmaster-General, as an admission of their correctness, in addition to your own; they are to be transmitted to this country with the least possible delay after the expiration of the year or quarter, as the case may be; and in the event of any hesitation on the part of the Deputy Postmaster General, the accounts are not, therefore, to be detained for that cause, but to be accompanied by your report and the Deputy Postmaster General's reasons for declining to admit them.

You will be particularly careful in all cases to give an exact analysis of the apparent balance, shewing the cash in hand and bills received and though not in time to be included.

You will furnish, on the special requisition of the Legislature of the respective Provinces, through the Deputy Postmaster. General, similar accounts to those laid annually before the Parliament of the United Kingdom, so far as regards the revenue arising.

It is presumed that the two clerks which are allotted to you will be amply sufficient for all the purposes of your appointment if you take that full and active share which you ought to do in the business of your Department; these clerks are acting under your superintendence and control, and in the event of actual incapacity, or of gross misconduct, you will not hesitate to remove either, or both, provisionally, subject to the pleasure of the Postmaster-General, engaging in the mean time a competent person, so that the

Your own salary at the rate of £300 sterling per annum, and those of your clerks, viz.:—the first clerk at £150, the second clerk at £100—will be paid by the Deputy Postmaster-General, and charged in his disbursements; and he will also provide an office, and stationery for the service of your office at the public expense.

You are further to observe such instructions as you may, from time to time, receive from the Postmaster-General, or by his

By command of His Majesty's Postmaster-General, (Signed)

F. FREELING, Secretary.

SECTION of the Act of Geo. III. respecting the Franking of Newspapers which Mr. Stayner grounds his claims to the Postage on Newspapers.

4тн OF GEO. III., CAP. 24тн, SECTION 6.

And for as much as it hath been usual for the Clerks in the Offices of His Majesty's Principal Secretaries of State, and also for certain Officers in the Office of His Majesty's Postmaster-General, to frank printed Votes and Proceedings in l'arliament, and printed Newspapers to be sent by the Post, be it, therefore, enacted, by the authority aforesaid, that it shall, and may be, lawful for such Clerks and Officers as aforesaid, being thereunto licensed by His Majesty's Principal Secretary of State or His Majesty's Postmaster-ner as they have heretofore been accustomed to frank the same, provided that such printed Votes, Proceedings, and Newspapers, shall be sent without covers. Or in covers open at the sides.

44 Probable effect for 1 year upon the P.O. Rev. in B.N.A. (52)

With reference to the desire of the Committoe that I should furnish a copy of my estimate of the probable effect of the proposed Post-Office Law upon the Revenue, I beg to say that I have been so fortunate as to find amongst my papers the original Notes upon which I drafted the estimate in question, which enables me to comply with the order in a more satisfactory manner than I feared I

PROBABLE Effect for One Year upon the Post-Office Revenue in British North America by the operation of the proposed new Act for the government of the Post-Office in the several Provinces, viz.:—

| D.
E.
F. | Probable loss by the reduction in the rates of postage | 1,500
200
3,000
1,500 | 0 0 0 0 0 | - |
|----------------|--|--------------------------------|-----------|----------------|
| | North America, and the expense of metalling | 18,700 | 0 | - 0 |
| | Contra. | | | |
| | Supposed Nott Revenue of the Post-Office annually at this time | 14,000
4,700 | | 0 |
| | | 18,700 | 0 | 0 |

This estimate shows a probable deficiency of £4,700; and although the calculation is necessarily a loose one, I thought, at the time I formed it, and still think, that in practice it would, as regards the aggregate, be found not far wide of the truth. I stated to the Postmaster-General, when rendering this statement, that all the Provinces, more especially the Canadas, stood in need of further post accommodation; and I considered it right, in order to meet those wants, and thus give satisfaction to the public, that we should make the sum to be provided £6,000. I apportioned this sum of £6,000 as follows:—

| Lower Canada | |
£2.00 |
|------------------------------|------|-------------|
| Lower Canada
Upper Canada |
 |
2,00 |
| Nova Scotia |
 |
 |
| Now Bennawick |
 |
 |
| Prince Edward's Island |
 |
20 |
| | | Total £6.00 |

To be accounted for by the Postmaster-General to those Provinces, respectively, in the accounts to be kept with them.

I beg leave now to furnish some remarks, by way of justifying the view I took of the subject when I prepared the foregoing es-Amate-to assist me in doing which I have lettered the several items.

A .- I think that the loss to be apprehended under this head cannot be counted at less than I have made it.

B .- When in England I had no certain means of judging what might be the amount of the Postage Accounts of the several Provinces under this head; but I should think they amount to as much as I have stated.

C .- I think this a low estimate.

D .- I only learnt in England that these sums of money were provided by the Legislatures of Nova Scotia and New Brunswick towards supporting certain lines of post. I could not find, by reference to the accounts of the Deputy Postmaster General at Halifax, any trace of the appropriation of the money, nor do I know how the account is kept—but it was necessary that, in forming a place for the re-organization of the posts, this money should be brought into the calculation.

-Upon the line of communication with New Brunswick a number of families are settled, for the purpose of keeping the road and assisting the courier at difficult passes. These families are supplied with rations of flour at the expense of the Military Chest, and a man is paid 2s. a day, from the same source, to look after them, and see that they fulfil the obligations of their agreement. The total cost is about £200 a year: and as the British Government, upon a transfer of the Post-Office Revenue, could not be expected to bear the charge, I included it in the estimate.

F .- I believe I am not far wrong in fixing this item at £3,000. It was formerly much more, but the New York Merchant Packets have taken a great deal of the correspondence away from the old Hulifax and Falmouth line.

G .- I now think this item far too low.

H .- And this also; but, taking the whole together, if I were now called upon to form an estimate for the object under discusson, I would make the total amount very nearly what it appears in the statement which I have the honour to hand to the Commit-(Signed)

GENERAL POST-OFFICE, QUEEEC.

ACCOUNT CURRENT with the United States.

I beg to lay before the Committee, as required, copies of my Account Current with the United States General Post-Office for the year 1834, in four Quarterly Statements; and in reply to the demand that I should state the arrangements under which I conduct the monied transactions with the United States, I desire to inform the Committee that I am the General Agent of the United States Post-Office for the collection of their Revenue in the Canadas, and that I am held personally responsible to that Department for such Revenue. In my capacity as such Agent I compile quarterly the accounts of the several receiving and distributing Officers for American Postage in both Upper and Lower Canada, receiving the Revenue from the several Postmasters, and remitting it to Washington, as will appear by the Accounts Current sent herewith.

My arrangement with the General Post-Office at Washington is, that in consideration of collecting the United States Postage, examining and compiling the accounts and making myself responsible for the due transmission of the Revenue to Washington, I am allowed to charge the same commission as is granted to American Postmasters.

In Lower Canada the great mass of American Postage is collected at Montreal and Quebec. The accounts are made up at the former office, which is the chief distributing office for American Postage in Lower Canada.

The commission allowed by the American Government, on its Postage collected in the Lower Province, has always been applied

as the personal emolument of the Deputy Postmaster-General, who gives a proportion of it to his Deputies, as a compensation to

them for their trouble.

With regard to Upper Canada, I take the same trouble, and am liable to the same responsibility, with the Accounts and Revenue of American Postage in that Province that I am for the Lower Province; but I derive no advantage from this source from Upper Canada, as I allow the whole commission to be divided amongst the several Doputies. At Kingston I have sanctioned a separate Agency for the collection of American Postage, in the person of my Deputy, Mr. Macaulay, who makes up an account in his own name with the Postmaster-General at Washington.

I remit the American Postage collected in those Provinces to the Postmaster-General at Washington quarterly, in Bills of Ex-

change.

(Signed)

T. A. STAYNER,

November 20, 1835.

Norg.—The amount shown by these Vouchers to have been disbursed for such contingent expenses as come under the heads noticed by the order from the Committee is £26 12s. 1d. more than returned in the General Statement laid before the Committee, numbered XI. This has arisen in the hurry of selecting the items which composed that Statement—when charges which should properly have been included therein have been erroneously considered as coming under another head. The liability to an error of this kind will the more readily be understood when it is explained, that the vouchers supporting the total charge included under the heads of the Account now rendered are included in our General Accounts, in several different Abstracts. I have bestowed great care in removing the present Statement. preparing the present Statement, and have no doubt of its correctness. (Signed) T. A. STAYNER,

Deputy Postmaster-Cieneral.

EXPLANATORY REMARKS.

| No | tes. |
|----|------|

C.

M.

This letter was mailed at Toronto City to Mr. Weagant's address at Williamsburg, and was supposed to have been abstracted by a young man named Westley, Assistant in the Williamsburg Post-Office, who declared that the mail from Toronto which contained Mr. Weagant's money letter never reached the Williamsburg Office. Of the truth of the suspicion which attached to Westley no legal proof could be obtained. From proofs elicited, at the time this affair occurred, of the manner in which the duties of the Williamsburg Office were conducted, I considered it necessary to dismiss the Postmaster, and break up the Post-Office until an eligible person to take charge of it could be found.

- B. The Montreal Packet which contained this letter never reached Isle aux Noix, and no trace of it could be discovered.
 - This was a remittance made by the Branch Bank of Upper Canada at Cobourg to Kingston, and was abstracted from the mail at Haldimand by the son of the Postmuster of that place. He was tried for the offence and convicted. The principal part of the money was given up by the thief, and the deficiency was made good by his father, who at the same time resigned his office.
- D. Every possible exertion was used to discover the author of their losses, but without effect.
- E. This letter not having reached its destination in due course, was supposed to have been lost. It was, after some time occurried in the enquiry, discovered to have rested in the Montreal Post-Office, the direction being so imperfect as to render it impossible to determine to what place the writer intended the letter should be sent.
- F. No trace could be discovered of the mail which conveyed this letter.
- G. The mail which conveyed this letter never reached the Quebec Post-Office, and no clue to its loss could be found.
- H. The mail bag which conveyed this letter was lost in the St. Lawrence by the Courier, in attempting to cross from Caughnawaga to Lachine; the tee gave way with the Courier, and he narrowly escaped being drowned. No fault could be attributed to him, as the loss of the bag was purely accidental.
- No record of this money letter appeared in the Quebec Office books, and the Postmaster of Quebec denied that any such money letter was ever mailed by Mr. Gagnon at the time he stated.
- K. A money letter appears by the Quebec Office books to have been mailed at Yamaska on the 28th December, 1833, addressed to Mr. L. R. Blanchard; this Mr. Gagnon states to have been a money letter put into the Quebec Office by him, intended for Mr. L. R. Blanchard, of St. Hyacinthe. This latter place is frequently called "Masca" and "Grand Masca," and it is supposed that some ambiguity in the address of the letter (Mr. Gagnon writing a very obscure hand) caused it to be mailed for Yamaska. The Postmaster of Yamaska stated, that the mail from Quebec of the 28th December never reached his office; and, after diligent enquiry, no trace of either the mail or the money letter could be discovered. This subject is more fully treated in a Special Report made to the Committee in December last, 1835.
 - Mr. C. Ross mailed at the Quebec Office for L'Assomption on the 4th and 15th January three money letters addressed to J. Emond, of Repentigny, J. Dugas, of St. Jacques, and Madame Gagnon, of L'Assomption. Not receiving any acknowledgment from those persons of the receipt of the sums remitted by him. Mr. Ross requested that enquiry might be made on the subject. This was done, and Mr. Therien, the then Postmaster of L'Assomption, stated that the money letters in question had been received at his office, and delivered to the parties addressed as soon as called for; and, on being urged to explain a complaint which had been made to the General Post-Office, that though the parties had, after considerable delay, received the money remitted to them by Mr. Ross, yet that Mr. Therien land in two cases opened and withheld the letters, merely delivering the enclosures; Mr. Therien denied this accusation, and maintained that any irregularity or delay which had taken place in the delivery of the letters arose from Messrs. Dugas and Emond having neglected to come into L'Assomption for them. As the Deputy Postmaster-General's return to Canada was daily expected at this time, Mr. Therein's conduct in the matter was left for his decision; and the Deputy Postmaster-General, on his return, considering that Mr. Therein had laid himself open to just suspicion of improper dealing with the money letters in question, he removed him from the charge of the L'Assomption Office.
 - Mr. Therien, Postmaster of L'Assomption, affirmed that he had mailed a money letter addressed to Mr. Deschamps, at Quebec, on the 7th February, with three other letters for the same city. No such mail was over received at the Quebec Office.
 - This letter was mailed at Toronto City for L'Orignal, by a Mr. Radenhurst, addressed to C. P. Treadwell, Orignal, and purloined, with its contents en route, by A. R. M'Donell, then Postmaster of St. Raphaels, U. C. For this offence Mr. M'Donell was tried at the Cornwall Assizes, convicted, and sentenced to seven years imprisonment in the Kingsten Penitentiary. A part of the money, found on the person of Mr. M'Donell, was handed over to Mr. Treadwell by the Court—say £62 10s.
- O. A Commission was appointed to inquire into the circumstances connected with the loss of these money letters; but, after a laborious and strict investigation, the gentlemen who composed it were unable to determine by whom or in what manner the depredations had been committed. The letters appear to have been duly forwarded from the London and St. Thomas Post-Offices, but the mails containing them never reached the Toronto City Post-Office, for which they were intended.

(52) A Return of the Amount of Bills of Exchange, &c. 55

| Notos. | |
|--------|---|
| | This was a remittance on account of Post-Office Revenue due by Mr. Merritt, Postmaster of St. Catharines, U. C. Mr. Merritt's Assistant stated, that he had mailed the sum noted in the Return on the 9th December, 1834. This mail was never received at the Quebes Office; and, from various circumstances calculated to raise his suspicions, Mr. Merritt was led to conclude that the money had not been transmitted, as stated by his Assistant, and he made good the loss. |
| | The mail from Kingston for Montreal of the 16th February, 1835, containing the money letters stated in the Return, was dropped from the stage near Osnabruck, U. C., on the night of the 17th February; it was picked up by a labouring man, named Gook, broken open, and plundered by his wife, and the greater part of the contents burnt. Andrew Gook died in Cornwall Jail. His wife, Fanny Gook, was tried, and found guilty at the Cornwall Assizes. A prosecution against the Mail Contractors for the Montreal and Kingston route, by whose want of care the mail was dropped, is now in progress, and when the penalty sucd for shall be recovered, the parties who have sustained loss by this occurrence will be reimbursed. One hundred and twelve dollars of the money found in Cook's possession have been deposited with the Deputy Postmaster-General, by order of the Court. |
| R. | This letter not having been recorded as a money letter could not be traced. |
| | This letter was mailed from Montreal on the 6th July, but did not reach its destination until (I believe) some time in October last; and in consequence of this great delay was supposed to have been lost. The cause of the retardation could not be ascertained, but the conclusion is that it was accidental, and not criminal. |

This sum of money was stated by Mr. Bishoprick to have been inclosed in a letter from a Mr. Playter to Messrs. R. F. Maitland & Cio., of Montreal, which letter was by Mr. Bishoprick inclosed in one from himself, addressed to the same Firm, and mailed at the Bytown Office. Mr. Maitland received this letter himself, (immediately after the arrival of the Bytown mail at Montreal,) with the seal perfectly uninjured, and the inner letter from Mr. Playter was in the like good order; yet on being opened the money stated by Mr. Bishoprick to have been enclosed therein was not to be found. From the impossibility of abstracting money from the inner letter, under the circumstances above detailed, without damage to the seals of either that or the envelope, combined with other causes of suspicion, it is more than probable that Mr. Bishoprick's statement was not

GENERAL REMARKS.

Never having kept a book specially for recording the facts and correspondence connected with missing money letters, the difficulty of research, in order to prepare such a statement as is required by the Committee, has been greater, and the task has occupied much more time, than I had calculated upon. In the Return now rendered I have made a collection of all the cases of which I have any knowledge; and in reference to those appearing to me to require more information than could be conveniently conveyed under the heads in the form laid down by the Committee, I have appended certain explanatory notes, which shew the steps taken by this Department to trace the lost property, and the causes of the losses. In laying these Statements before the Committee, it is only a duty to the Post-Office Department for me to remark, that although there can be no doubt that Bank Notes and other available monies are occasionally stolen from the mails by individuals belonging to the Establishment, or others, yet, considering the large sums daily transmitted, the proportion of losses is by no means great, nor would they be near so considerable as they are, if persons sending monies by the post were to use a moderate degree of care in folding and addressing their packet. Letters containing Bank Notes are frequently so carelessly folded that the enclosures are visible,—those letters are, perhaps, entrusted to a messenger to be deposited in a Post-Office, and his cupidity being aroused by a knowledge of its contents, the letters are suppressed by the way, and the contents stolen, whilst the Post-Office sustains the edium of the loss. Besides this, there are good reasons for believing that there are persons so base as to pretend to have forwarded money to their correspondents by post, although they never did so, their object being, by this strangem, to get rid of their obligation to pay debts which they are either unwilling or unable to discharge.

(Signed)

T. A. STAYNER,

Deputy Postmaster-General.

GENERAL POST-OFFICE, Quebec, January, 1836.

A RETURN of Bills of Exchange found in Dead Letters at Quebec.

1831.—May 15. A letter, containing a Bill of Exchange for £150, was sent to Mr. Howe, Deputy Postmaster-General at Halifax, to be returned to the writer.

1835.—Jan. 28. A letter, containing a Bill of Exchange for £100 Sterling, was sent to Sir Francis Freeling, to be forwarded to Mrs. Cameron at Ayr. This Bill was drawn at Antigun, addressed to Mrs. Cameron, G'ore District, Upper Canada. The lady, before its arrival in this country, had gone to Scotland.

The above are all the Bills of Exchange of which I can find any record.

(Signed)

T. A. STAYNER,

Deputy Postmaster-General.

GENERAL POST-OFFICE, Quebec, December, 1835.

Canadas. |

A.—On the 6th of April ten new Offices went into operation,—on the 6th July about twenty more will be organized,—and by the end of this year. I have no doubt, the total number will amount to two hundred.

B.—The annual amount of Dead Letters is considerably less than it was, notwithstanding the business is so much increased; and I hope in a short time that the Dead Letters will bear a still less proportion to the aggregate amount of postage than they do a present.

C.—It will be seen by these two columns that the Revenue is rapidly increasing, and that the Nett Revenue of 1831 bears a larger proportion to the Gross Receipt than that of 1828.

T. A. STAYNER, Deputy Postmaster-General. (Signed)

GENERAL POST-OFFICE, Quebec, June, 1831.
ed Conv. (Signed) T. A. STAYNER, D. P.-M. G.

Note A.—British letters sent to the Dead Letter Office, London, £483-11s. 11d. Currency. Provincial letters amounting to £609-18s. 6d. taken credit for us being destroyed at Quebec, but a large proportion of these letters are returned to the writers for payment of postage, and the money thus saved to the Revenue. Probably 20 or 40 P cent. of the amount is secured in this way.

B.—It will be perceived, that besides increasing the number of offices since 1831 in the proportion of 50 \$\P\$ cent., with a large additional outlay for Couriers, Postmusters' Salaries, and Contingencies, the Nett Revenue remitted Home is £1475 Currency more than it was in the year 1831.

Since April last 14 new Offices have been created, making the total number in the two Canadas at this date 241.

GENERAL POST-OFFICE, Quebec, February 29, 1836.

SIR.

The House of Assembly of Upper Canada having, at its Session last year, made a requisition upon me, through His Excellency the Lieutenant-Governor. Sir John Colborne, for certain Returns relative to the Post-Office in the several Provinces of British North America, I was under the necessity, in the case of the Provinces of Nova Scotia and New Brunswick, (not having the materials for preparing the accounts in my own office,) of sending a copy of the requisition to Mr. Howe, the Deputy Postmaster-General at Halifax, requesting him to comply with it as far as lay in his power.

Mr. Howe was unable to render the Statements in time to be submitted to the Assembly within the Session in which the application was made; but by the post of this morning I have received from him a letter and two accounts, of which the within are copies, which I lose no time in forwarding to Sir Francis Head, for the information of the Assembly.

(52) Return of Receipts & Credits of Gen. P.-Office, &c. 61

I cannot have failed to observe that these statements are less copious than those prepared by me under the same requisition; but as Mr. Howe has afforded me no explanation on the subject, I am unwilling to offer any.

(Signed)

To the Honorable the Commons House of Assembly, &c. &c. &c.

The Committee of Finance respectfully beg leave to call the particular attention of your Honorable House to the documents received from the Receiver General, relating to the loan which

was negotiated last year in London, under the provision of an Act of the Legislature.

The letters amply testify that the Receiver General had no ordinary difficulty in effecting it, and from a variety of causes well known to your Chairman, who was engaged in matters of enquiry on such subjects last year in the United States, your Committee feel quite satisfied that the Receiver General's negotiation should give satisfaction to the Province, and cannot resist to remark, that the conduct of the Receiver General has been testified by one of the most respectable Mercantile Houses in London, Messrs. Baring, Brothers & Co., and your Committee are quite convinced, from the general character of the Receiver General, that his best exertions were used for the general interest of the Province, and therefore he is entitled to the thanks of this House.

Your Commmittee beg to remark that the Receiver General has been on two occasions to London:—first, to raise £200,000; and secondly, to raise £400,000; and no charge has been made or remuneration given. Such duties are responsible and are attended with much anxiety; and the Receiver General incurred additional responsibility and risk in leaving his own office, to proceed to London on this extra service; besides the labor and trouble of completing the various documents

required, connected with this important extra duty.

It cannot be supposed that his salary, which is £700 a year from the Province, and £400 a year from the Crown out of the Casual and Territorial Revenue, making £1100 a year, would be

sufficient compensation for such extra duties.

Your Committee beg leave to remark that this loan is at one-half per cent. premium, and no commission or charge whatever. The former loan was not under such favorable terms, consequently the saving to the Province must be very considerable, as will appear by reference to the Report of the Finance Committee last year, besides the advantage of a better rate of Exchange

All which is respectfully submitted.

CHARLES DUNCOMBE, Chairman.

Committee Room, Commons House of Assembly, } 18th March, 1836.

A STATEMENT exhibiting the annual saving to the Province by the terms of a Loan negotiated in London, by the Receiver General.

(COPY.)

Gould Square, London, 8th July, 1835.

SIR.

We have to acknowledge receipt of your letter of the first instant, referring to a communication dated 4th May, and which you addressed to us from Toronto, respecting a loan for £400,000, which you are authorised to contract here, by an Act of the Legislature of Upper Canada also submitted to us.

In reply, we have to state that though we consider the security offered by the Province to be perfectly good, we decline, from the present state of the money market here, to offer for any

part of such loan on the terms prescribed by the Act in question.

We may further state that we think it unreasonable to expect any contractor to take the payment of annuities for a period of twenty years without remuneration; and though we, from our connexion with the Canadas, might be inclined to forego this for the present, it is a burden with which we think no House could engage on behalf of their successors.

We have the honor to remain, Sir,

Your most obedient Servants,

(Signed) (Signed) GILLESPIE. MOFFAT, FINLAY & Co. GOULD, DOWIE & CO.

To the Hon. John H. Dunn,

H. M.'s Receiver General for Upper Canada.

[No.54.] Report of select Committee on Timber Duties.

TO THE HONORABLE THE COMMONS HOUSE OF ASSEMBLY.

The Select Committee appointed to enquire into the amount of duties collected on timber cut upon the waste lands of the Crown, on and near the Ottawa River,

BEG LEAVE TO REPORT:

That they have examined the accounts and correspondence submitted to them, and which

they now lay before your Honorable House.

In the accounts of 1833, they find a deficiency of £3,635 currency, occasioned by the defalcation of Messrs. Jones, Murray & Co., of Quebec; a branch of the firm of the late Horatio Gates & Co., Montreal, who acted as agents for Charles Shirreff, Esq., and received the amount

of duties collected, as stated in the accompanying accounts.

That on examining Mr. Shirreff, the Committee found that no security whatever was required from Jones, Murray & Co. for moneys collected by them, and that he Mr. Shirreff, appointed them on his own responsibility, but acquainted the Government at the time. It does not appear to your Committee that he had any instructions to make such appointments, also that he never was required to give security for the office he holds as Collector of Timber Duties, as will be shewn by the accompanying documents.

Your Committee consider it a responsible office, and that security ought to be given for the

due fulfilment of said office.

The Committee also find that no direct appointment as collector of timber dues in Upper Canada has been issued to Charles Shirreff, Esq., but in consequence of his son being appointed by Lord Dalhousie collector of timber dues in Lower Canada, the Honorable Peter Robinson thought proper to continue Charles Shirreff, Esq., as collector along with his son, who was appointed also for Upper Canada, and has acted for and with him since the year 1825.

The Committee also beg leave to state that there is the sum of £644 14 6 currency not brought into the returns or accounts furnished, which sum is now in dispute, but is explained in the accompanying documents as being in the hands of the Attorney General of Lower Canada, for collection.

The Committee beg leave to refer to Mr. Shirress's letter of the 8th instant, in which a full explanation is given of the circumstances under which he has acted as collector, and also of the causes which led to the employment of Jones, Murray & Co. in the collection; which appear to the Committee to be satisfactory.

T. McKAY, Chairman.

Committee Room, House of Assembly, 25th day of March, 1836.

[COPY.]

House of Assembly,

I am directed by a Select Committee of the House of Assembly to request that you will transmit to them, without delay, a statement of accounts of money received and disbursed for timber duties collected on Ottawa River; from January 1833 to January 1836, with amount still due and by whom, if by bond or otherwise.

I have the honor to be,

Sir,

Your obedient Servant,

(Signed)

T. McKAY, Chairman.

To

The Hon. P. Robinson, Commissioner of Crown Lands, &c. &c. &c.

> Commissioner of Crown Land's Office, Toronto, 22nd February, 1835.

SIR,

I have the honor to acknowledge the receipt of your letter of this morning, requiring "a statement of accounts of money received and disbursed on account of timber duties collected on the Ottawa River from the month of January 1833 to January 1836, with the amounts still due and by whom, if by bond or otherwise." In reply to which, I beg to assure you that the information you require shall be furnished with the least possible delay.

I have the honor to be,

Sir,

Your most obedient humble servant,

PETER ROBINSON.

T. McKay, Esq. M. P. P.

COMMISSIONER OF CROWN LANDS' OFFICE, Toronto, 24th February, 1836.

SIR.

I have the honor herewith to transmit to you "a statement of accounts of money received and disbursed for timber duties collected on the Ottawa River, from January 1833 to January 1836, with the amount still due," which has been furnished me by Charles Shirreff, Esq., collector at Bytown, and which corresponds with the statements heretofore received at this office: I have only to remark, that Mr. Shirreff is now here, and if any further information is required, he will attend at any time the Committee may require.

I have the honor to be,

Sir.

Your most obedient humble Servant.

PETER ROBINSON.

UPPER CANADA.

STATEMENT, showing the amount of Dues received on Crown Timber by Charles Shirreff, Esquire, Collector at By-town, from January, 1833, to January, 1836. as well as the amount of the Disbursements made within that period, and also the amount still duc.

C. SHIRREFF.

(Errors Excepted)

Toronto, 23rd February, 1836.

[COPY.]

COMMITTEE ROOM, HOUSE OF ASSEMBLY, 26th February, 1836.

SIR. I am directed by the Committee appointed to examine into the accounts of timber duties, to request that you will furnish a statement of the defaulters, in detail.

> I have the honor to be, Sir.

> > (Signed)

Your obedient servant

T. McKAY, Chairman.

The Hon. Peter Robinson. &c. &c. &c.

> COMMISSIONER OF CROWN LANDS OFFICE, Toronto, 26th February, 1836.

SIR. I have the honor herewith to transmit to you the copy of a communication, I received this day from Charles Shirreff, Esq., furnishing a statement, shewing the names of the defaulters for

[No. 54.] Report of Committee on Timber Duties.

dues on Crown Timber, and as it refers to a letter addressed to me the 1st April, 1834, I also send a copy of that letter. Trusting that these documents will afford the information required by the Committee.

I have the honor to be, Sir,
Your most obedient humble servant.
DETER ROBINS PETER ROBINSON.

T. McKay, Esq. M. P.

Toronto, 26th February, 1836.

Sin. The Committee on the timber dues, having required a list in detail of the defaulters at Quebec, I have to mention that they remain still in the hands of Mr. Ogden, Attorney General for the Lower Province, agreeable to the state I handed you, 1st April, 1834, viz:

W. Halliday, (Bond dated 9th August, 1830, disputed by W. Price & Co.)....£ 95 9 . 8 J. Murray, (for D. McDonald, 19th August, 1830, secured by arrest,)...... 159 10 6 11th do. 9 13th J. &. D. Moore,

£644 14

For the last mentioned three sums, the timber was seized by the Attorney General, and the amount consequently secured, but it has been locked up by a law suit with the Trustees of Messrs. Dykes & Co.

I have the honor to be,

Sir.

Your most obedient humble servant,

(Signed)

C. SHIRREFF.

The Hon. Peter Robinson,

Surveyor General of Woods and Forests, &c. &c. &c., Toronto.

[COPY.]

Montreal, 3rd May, 1834.

SIR.

In order to explain fully, the principle or footing on which I employed Messrs. Jones, Murray & Co., in collecting the Crown dues on the timber from the Ottawa, I feel it necessary to state, that in the year 1825, when the system was formed for collecting the Crown dues on timber, the Faul of Delbourie proposed that I should also the Table of Delbourie proposed that I should also the Table of Delbourie proposed that I should also the Table of Delbourie proposed that I should also the Table of Delbourie proposed that I should also the Table of Delbouries proposed that I should also the timber to be a supplied to t the Earl of Dalhousie proposed that I should take the charge. I declined the appointment for myself, but requested that my eldest son, Robert Shirreff should be named, which was done, and he received a Great Scal Commission from the Upper Province, and a Mandamus from his Lordship, to enable him to act also for the Lower Province. From the shape the collection took by transferring the payments to Quebec, I found it necessary to assist him, but he was still considered the Collector. The bonds for the dues being made out payable to him as such, and all the accounts and returns transmitted to the local Government were signed by him.

When Messrs. Davidson and Robinson came out as Surveyors General of Woods and Forests, my son's appointments, were of course annulled, but he still continued to act in the same capacity, until the summer of 1830, when he was obliged on account of his health to go to the Southern

States to avoid the winter in this climate.

Up to that period the monies collected for the Crown dues were directly paid into the Bank, and as they accumulated, paid from time to time to the Government of each Province respectively. But from the very bad state of my son's health, I was under the necessity of accompanying him as far as New York, and I accepted of Messrs. Jones, Murray & Co's friendly offer of taking charge of the collection during my absence, of which I informed the Departments in both Provinces.

They of course lodged the money as they received it on their own account with the Bank, and opened one for the collection in their own books. But still considering my son as more properly the Collector than myself, I directed that the account with Messrs. Jones, Murray & Co. should be opened in his name not in mine, and altho he has been absent for three years, it has been continued in the same shape. The amounts of the bonds for the dues being carried, when received, to his credit as nominal Collector, and the monies paid to Mr. Felton and Mr. Robinson placed to his debit.

The following correspondence between Mr. Perry, Chairman of the Committee of the House of Assembly, in Upper Canada, on the Casual and Territorial Revenue, and Messrs. Jones, Murray & Co. respecting the Timber dues will shew the relative position, in which they as well as the

Government considered they stood with regard to the collection:

"COMMITTEE ROOM, HOUSE OF ASSEMBLY "Upper Canada, 2nd January, 1834.

" Messrs. Jones, Murray & Co.

"GENTLEMEN,

"Being informed that you have for several years acted as agent under Charles Shirreff, Esq. for the collection of duties charged by the Government of Upper Canada, for Crown timber descending the Ottawa, I have to request that you will favor us with a statement of the amount received by you, during the years 1830, 1831, 1832, 1833, for the information of the Committee appointed by the House of Assembly on that subject.

(Signed)

"I have the honor to be, &c.
"PETER PERRY, " Chairman."

Quebec, 15th January, 1834.

P. Perry, Esq.,

Sin,-Your letter of the 2nd instant, calling for a statement of duties received here on Upper Canada Crown Timber, descending the Ottawa, was duly received, and in the absence of both Messrs. Jones and Murray, I cannot render the said statement, but my instructions are from Mr. Murray to say, that a statement shall be forwarded immediately on his return to Quebec, which will be most likely next week.

I remain.

Your most obedient Servant,

(Signed) for JONES, MURRAY & CO. A. D. FERRIER.

Quebec, 22nd January, 1834.

Sir,

We addressed you on the 15th January, and annex, as at foot, a memorandum of duties collected by us, and paid during the years '30, '31, and '32. The year 1833 being incomplete, we shall take the earliest opportunity of transmitting to Mr. Shirreff the account in detail, the payment of which we have Mr. Shirreff's orders to pay in due course.

We have the honor to be,

(Signed)

Sir,

Your most obedient Servant, JONES, MURRAY & CO.

P. Perry, Esq., Chairman in Committee, House of Assembly, U. C., &c. &c. &c.

It is evident from the above correspondence that the Government considered Messrs. Jones. Murray & Co., the actual collectors of the timber dues during the years mentioned, and that they were not only advised distinctly that they were so, but also acknowledge that they have still in their hands the collections of last year, having my orders to pay them, as formerly, in due course, direct to the Commissioners of Crown Lands, for each Province, in the proportions which would

appear when the accounts were completed.

The unforeseen and distressing events of the deaths of Mr. Gates and Mr. Bancroft, having plunged their whole concerns into difficulties, it becomes a question which I beg leave to submit, if the Estate of Horatio Gates & Co., of which firm the House of Jones, Murray & Co. was a branch, be liable for the dues collected by the latter, who engaged in it with the knowledge and approbation of the House in Montreal, who generally made the payments to the Upper Province, the funds coming into their hands, of course from the collection at Quebec, and thus both Houses. independent of their close connexion, otherwise acknowledged the transactions, and were involved in them?

I have the honor to be. Sir.

Your most obedient servant,

(Signed)

C. SHIRREFF.

Charles Ogden, Esquire, Attorney General, &c. &c. &c. [COPY.]

MONTREAL, 7th May, 1834.

Mr. Holmes wrote you on the 28th ultimo, explaining the omissions in the account of which

I understand he has sent you a corrected copy, and I hope you now find it right.

I would have written then, but found it necessary, in consequence of the sudden deaths of Mr. Gates and Mr. Bancroft, and consequent suspension of the transactions of their Houses to proceed immediately to Quebec, to consult with Mr. Ogaen the Attorney General. He said the first thing to be ascertained was upon what principle Messrs. Jones, Murray & Co. had interfered with the collection of the dues. For if they were merely the depositaries of the money collected by me. I could only claim as a common creditor, but if they could be considered as the actual collectors, and had direct communication with Government, by paying over the money or otherwise, that he could then claim for the Crown, and by an extent have a preference both on Jones, Murray & Co. and on H. Gates & Co.'s estates, in which case nothing would be lost.

He said a good deal might depend on the shape of my transactions with them, whether the money was stated by them as being received from me as a private individual, or as coming into their hands as public money and stated to my credit as collector; and he desired that I should state to him in writing all the circumstances which I thought could bear on the case, and as he was to be at Montreal in a day or two, he would consult with the Solicitor General on the subject. I accordingly did so in the letter, of which the enclosed is a copy, and he informed me yesterday that the Solicitor General is of his opinion, that there are sufficient grounds to form a claim for the Crown, but as no payments will be made from the funds for a considerable time, they think it unnecessary to take immediate steps, it may be settled by the Trustees without legal

The correspondence which took place in January last between Mr. Perry and Messrs. Jones, Murray & Co. has turned out, under present circumstances, to be of material importance in determining the question respecting their liability. I regret deeply what has happened, but the very essential assistance I received from Messrs. Jones, Murray & Co. led me to take the benefit of it, during my son's absence, not conceiving there could be any risk with the branch of a house universally considered one of the most wealthy and respectable in the Province.

I go to Bytown to-morrow, and when I return to Quebec I shall get the accounts adjusted with Jones, Murray & Co., from whom I have got all the bonds which were in their hands remaining unpaid, and I shall, agreeable to your instructions, open an account in my own name in the bank and remit you in drafts upon it.

I have the honor to be. Your most obedient servant,

(Signed)

C. SHIRREFF.

The Honorable Peter Robinson.

Commissioner of Crown Lands, &c. &c., Toronto.

Toronto, 1st April, 1834.

I have the honor to be, Respectfully, Sir.

Your obedient humble servant,

(Signed)

C. SHIRREFF.

The Hon. Peter Robinson, Surveyor General of Woods and Forests, &c. &c. &c., Toronto.

Toronto, 8th March, 1830.

Having been asked by the select committee on the timber dues, if I held a commission or letter of authority from the Surveyor General of woods and forests for collecting the crown timher dues on the Ottawa, and my answer in the negative having been made a subject of animadversion, I beg leave to state as distinctly as I can the circumstances which led to my having acted without a formal appointment from the head of the department.

In the year 1825 when the plan of the collection was formed, Lord Dalhousic, (as I declined the situation for myself,) appointed my son Collector by Dedimus Potestatem, and he received for the same purpose a great seal commission from the Lieutenant Governor of the Upper Province.

By his instructions he was to collect the dues at the Chaudiere falls; but finding it impracticable to do so, the mode of taking bonds at that place for the amount payable at Quebec upon the sale of the timber, was adopted. This created a double duty, for it was necessary that one person should remain on the spot where the timber was measured, to take the bonds and that another should follow it to Quebec to attend to the collection when the timber was sold. I was therefore led to take a more active part than I intended to have done, and went to Quebec to receive the

bonds, and look after the payment of them.

In this early stage of the business it was not considered necessary to make any alteration or addition to the appointments, until it could be ascertained by further trial what might be the best mode of conducting it, and I continued to act jointly with my son, without any formal document

authorising me so to do.

When Mr. Robinson came out as Surveyor General of woods and forests, he found the collection of the dues in the situation stated above. He found my son and myself acting under an arrangement made directly by Government, and he did not feel himself called upon to interfere with it, further than to give to each of us, as his agents, authority to seize any timber that might he found cut without license, and giving us also from time to time such instructions as appeared to be necessary.

As a proof, however, that I was fully recognized by Government in the part I took in the collection, I beg leave to give you an extract from a report of the Honourable Executive Council

of Lower Canada, dated 6th December, 1826.

" The Committee having examined the accounts rendered by Mr. Shirreff, sen'r, of the money "collected and disbursed by him, arising from the prices of timber collected on the lands of the Crown as established by Your Excellency's proclamation of the 24th June last, and that of His Excellency Sir Peregrine Maitland of the 3rd May preceding, and considering that this plan of raising a revenue at the disposal of IIis Majesty is a growing fund which whilst it has tended to introduce order and obedience among a numerous and useful class of men, and when pro-" perly applied will prove of essential benefit to both Provinces, has been suggested by Mr. "Shirreff and carried into effect by his own personal exertions, they are of opinion and humbly " recommend, &c. &c. &c."

I deeply regret the occurrence which has locked up for a time in the estate of Horatio Gates & Co. of Montreal, so great a balance of the collection of year 1833, but it has arisen, I may say from circumstances which I felt to be pressing, at least the primary cause was one of real necessity. In the autumn of 1830 my son was in a very bad state of health and I accompanied him as far as New York, on his way to the Southern States to avoid the winter in this climate. Messrs. Jones, Murray & Co. of Quebec, a branch of the above mentioned house of Horatio Gates & Co., took charge of the collection of the dues in my absence, and finding their assistance so beneficial I was induced to take the advantage of it until my son should return from Europe, having gone home in the spring of 1831, for the more perfect recovery of his health.

I certainly had no express permission nor instructions from the Surveyor General of woods and forests to take the assistance of that house-but it was done all along with the knowledge of the departments in both Provinces. I could not have any motive for concealing it. It did not create any additional expense to Government, nor was it of any pecuniary advantage to myself, and it certainly tended apparently to make the collection more secure by the additional guarantee

of a house of the greatest respectability.

During the four years that Jones, Murray & Co. were engaged in the collection, very little of the money passed through my hands, the details of the collection made by them were hunded to me at the end of the year, to enable me to make up my returns for both Provinces, and the dates fixed for paying up the monies were most punctually attended to, and generally paid into Mr. Robinson's account with the Montreal Bank by Mr. Gates himself.

While this plan was carried on with so much regularity, and with every appearance of safety

for Government, there could be no reason for objecting to it.

I attribute much of the success I have had in the collection, to the essential assistance I have had from that house. Their knowledge of the trade and of the individuals engaged in it afforded me often valuable information, and I could particularise instances in which they were the means of recovering sums of money which might have been lost, if I had been acting entirely by myself. In the year 1832, when the cities of Quebec and Montreal were thrown into a state of distraction by the cholera, as well as my own place of residence, Bytown and other parts of the country, I should

have been very much at a loss what to do had it not been for the repeated assurances of Messrs. Jones & Murray, that the collection would be attended to, as they were obliged at any rate to remain at their post, and when I went to Quebec in the autumn of that year, I did not find a single bond neglected.

I shall only add on this subject that you will see by the documents in your hands, that I have consulted the Attorney General of Lower Canada respecting the amount of the dues remaining with Jones, Murray & Co., in consequence of the death of Mr. Gates, and his opinion was, that there appears to be no doubt of the estate paying in full, it may not be necessary to go to the expense of attempting to establish, by a law suit, a preference on the part of government.

Every attention has been paid to the collection for these ten years past; and I have acted to

the best of my judgement in conformity of course with my instructions.

The accounts and returns have been rendered annually, and it is consistent with my own personal knowledge, that Mr. Robinson has carefully examined them, having come to this place generally myself, with my accounts, to give every explanation that might be wanted.

I am far from thinking that official regularity is not necessary in forms of appointment as well as in other matters. But I hope the circumstances I have detailed will account to the Select Committee for its not having taken place with perfect exactness in my own case.

I have the honor to be,

Sir.

Your most obedient humble servant,

C. SHIRERFF.

Thomas McKay, Esquire Chairman of the Select Committee on the timber dues.

> COMMITTEE ROOM, HOUSE OF ASSEMBLY, Wednesday, 2nd March, 1836.

COMMITTEE MET.

Present-THOMAS McKAY, Esq., Chairman, Messrs. BRUCE and MALLOCH.

CHARLES SHIRREFF, Esq., called in and examined.

Do you consider the firm of Jones, Murray & Co. bound by law to pay the debt due to the Province upon duties on Crown timber? Yes, certainly.

Did you ever have any written authority from the Crown to act as Collector of duties on Crown timber? I have the same authority as others have, from Mr. Robinson, the Surveyor General. I have had many occasional written instructions. [The witness withdrew.]

Adjourned.

COMMITTEE ROOM, HOUSE OF ASSEMBLY, 26th February, 1836.

Present-Messrs. McKAY, Chairman, Lewis, Bruce, Malloch, and Roblin.

CHARLES SHIRREFF, Esq., called in and examined.

Do you know any other person than yourself authorised to collect duties on timber cutjupon the waste lands of the Crown adjacent to the Ottawa River Ans. Duncan Macdonell, (Greenfield,) and Mr. Treadwell.

What portion of the money in the hands of the late Horatio! Gates & Co. has been paid; if han er began de er ige te dom a der kieden middle mit the

Had you any instructions from the Government of Upper Canada, to appoint agents in Lower Canada to collect duties upon timber? None, but lyinformed the different departments at the Little to design provincial for the first for the

Doyou or your son give security for the office you hold as collector of duties on timber! I wmyself give none; but my son did when he received his appointment, give security, but his appointment was cancelled, and I merely act under the appointment of Mr. Robinson.

REPORT ON PETITION OF J. PATERSON AND OTHERS.

To the Honorable the Commons House of Assembly.

The Committee to whom was referred the petition of John Paterson and others of the Gore District, praying for further aid for the Desjardin's Canal, beg leave respectfully to report.

That your Committee have carefully examined the accounts of the Company, and particularly that part thereof relating to the expenditure of the late loan of £7,000 by the Legislature to the Company, by and under the authority of an Act, entitled "An Act authorising a loan to the President and Directors of the Desjardin's Canal Company." And your Committee feel bound to acknowledge that the said loan hath been faithfully and economically applied towards the completion of the said Canal, but notwithstanding the care and economy used in the expenditure of the same, they find the work is still in an unfinished state, and to accomplish the same from a fair estimate made, the sum of Your Committee £6,600 will yet be required. have minutely examined the President and Directors of the said Company, as also the Secretary and acting Engineer with their books and papers, as well as the estimate necessary to complete the Canal.

It will be seen by the Company's Report annexed, that they have debts to call in and stock for sale to the amount of £6,924 7 10d. which does not appear likely to be available for some time to come, and the stock will not sell to any advantage while the Canal remains in its

present unfinished state.

The importance of the work to the commercial interests of the head of the Lake, and the populous and productive country around it, induced the Legislature to extend their aid to it. The sum of £7,000 was loaned to the Company upon security of the bond and mortgage of the said Company, besides other real and personal security given against the estates of a portion of the stockholders. But it is not only the interest of the Company which now becomes the object of consideration, the stockholders appear to be quite unable to complete the Canal without some further assistance. And your Committee feel it would not be either wise or expedient to allow the work, so far advanced, to remain unfinished and fall into decay, after so large a sum has been already expended on the same by the stockholders themselves, and the loans that have been made by the Legislature to the amount of £12,000. The sum now required for its completion is a question well deserving the consideration of your Honourable House, and which your Committee trust will not be refused to the Company, and they feel satisfied that the loan already granted, when compared to the usefulness of the work to such a great extent of country, is yet small and especially the canal if it was once completed.

when compared to similar repeated grants to

other public improvements.

Your Committee therefore recommend that the sum asked for, say £6,600 be loaned to the Company to enable them to finally complete the work the ensuing summer, on the same terms of security as required for the last loan, and therefore trust your Honourable House will extend your further liberality to the work at Dundas. It is indeed formed by nature the great depot and outlet of some of the most fertile and populous Townships which surround the head of the Lake, and extend to the source of the Grand River. An improvement in the navigation which would confer such extensive benefits cannot it is hoped be allowed to remain long unaccomplished, and both policy and economy concur in sanctioning such further assistance, when the sum required is so small to insure its completion.

Your Committee have the less resitation in submitting this recommendation from a conviction that the work when finished, with the proposed grant, will undoubtedly pay the interest immmediately and in a very few years the principal also. Your Committee are happy to be able to annex to this report, a detailed account of the exports and imports at Dundas, of which they have satisfied themselves of the correctness and of the sufficiency of the commerce in that part of the country, to justify the most favourable expection of the future prospect of the

undertaking.

Your Committee also annex the Report of the Directors, and an abstract of their accounts. All which is respectfully submitted.

JAMES DURAND, Chairman.

Committee Room, House of Assembly, 28th March, 1836.)

MESSAGE

FROM HIS EXCELLENCY,

TRANSMITTING

RETURN

RELATING TO THE

FUNDS OF THE KING'S COLLEGE. UPPER CANADA COLLEGE,

AND THE LATE GENERAL BOARD OF EDUCATION.

F. B. HEAD.

The Lieutenant-Governor transmits to the House of Assembly, with reference to an Address of the House, presented to his predecessor during the last Session, the accompanying Returns relating to the Funds of King's College, Upper Canada College, and the late General Board of Education.

GOVERNMENT-HOUSE, March 28, 1836.

King's College Office, Toronto, March 14, 1836.

I have the honour herewith to trunsmit various Abstracts and Explanatory Statements relating to the Funds of King's College, Upper Canada College, and the late General Board of Education, which, by direction of the late Lieutenant-Governor, in compliance with an Address of the House of Assembly, were ordered to be prepared.

Those now sent are in addition to a former mass already furnished to the late Secretary, with a letter explanatory of the dehas that occurred in the preparing of them. A description of them now sent will be found to accompany the same, in order to facilitate a reference to them.

I trust that His Excellency the Lieutenant-Governor will be satisfied with the pains that have been taken, on my part, to render these multifarious accounts clear and explicit, for I have been most anxious so to render them.

I have the honor to be,

Sir.

Your most obedient

Humble servant,

JOS. WELLS.

To John Joseph, Esq., Civil Secretary, &c. &c. &c.

No. IV.

Explanatory Remarks by Lieutenant-Colonel Wells, as Registrar and Bursar of King's College and Treasurer of Upper Canada College.

Paragraph }
No. 1.

In reference to that part of the paragraph, No. 1, in the Address of the House of Assembly, which calls for the authority under which the buildings, &c. of Upper Canada College were erected, and from what funds the payments have been severally taken, the Treasurer remarks, that the late General Board of Education were requested, by the late Lieutenant-Governor, to undertake, with his express sanction, the entire management attending the erection of them; and the Treasurer was authorised by the Board to temporarily make use of the funds in his hands, until those of King's College were enabled to repay the same, and to which arrangement the College Council gave their assent. One member of the Board was appointed to superintend the execution of the plans approved of; and the said member, with another, were appointed to act as Auditors of the different Accounts, and to certify their correctness, prior to their being presented to the Treasurer for payment. Those accounts were then paid by chaques upon the Bank of Upper Canada, payable to order; they thus formed additional vouchers of the sums having been actually paid, as separately receipted upon the several accounts.

The sums temporarily borrowed from the funds of the late General Board of Education have since been restored, and paid into the hands of the Receiver-General of the Province.

The Statement of the Expenses of the Buildings, &c., as called for in this paragraph, is herewith transmitted.

Paragraph No. 2

In the accompanying detail of expenditure on the Grounds of King's College, as called for in paragraph No. 2, it may be proper to explain, that, as the Bursar can process vouchers for each and paid to the Overseer of the Grounds, he did not suppose it could be intended, that he should send copies of the numerous pay-lists of labourers. See which are filed in this Office, inasmuch as each list (most of them weekly) contains the names of every labourer employed, with the amount of wages due to each, and a column with the signatures, or marks, of each individual, acknowledging the having received the respective sums charged against their several names; nevertheless, (if required,) copies can be furnished, but it will be difficult to trace any beneficial result from the trouble it would occasion. All other payments, for Salaries to Officers, See, of the Institution will be found particularized in the various Abstracts; some of which are now sent, and others since the requisition was made.

Paragraph No. 3. An explanation of the Communication required, in this paragraph, has been already sent in by the individual whom it concerns.

Paragraph }

The Treasurer refers to the Abstracts (some of which are now sent in, and others since the requisition was made,) upon those parts of it which concern his department.

Paragraph No. 5. The detailed Statements, here called for, accompany this communication. The explanation required in the latter part of it has been already furnished.

Paragraph No. 6

The information here required will be found in the Abstracts, some of which are now sent, and others since the requisition was made.

In reference to the enquiry (in the latter part of this paragraph) "into the reasons (if any) why the funds of King's "College and Upper Canada College might not be paid to and by the Receiver-General, and the burthen of a plural"ity of Officers and offices removed," the following is respectfully submitted:—

The daties of the Registrar and Bursar of the former Institution, and the Treasurer of the latter are so multifurious and onerons, that it would be impossible for the Receiver-General, with his other important daties, to undertake the management of them; and any person imagining the contrary, has only to visit the Office to be convinced of the fact. No additional salary has yet been awarded for the extra duty thrown upon the Registrar and Bursar of King's College, by his appointment of Treasurer to the Upper Canada College, although the responsibility and labour have been so much increased by it.

JOS. WELLS.

Registrar and Bursar of King's College, and Treasurer of Upper Canada College.

RETURNS

FROM THE

TREASURER OF THE EASTERN DISTRICT.

F. B. HEAD.

The Lieutenant Governor transmits to the House of Assembly with reference to the address of the House of the 12th ultimo, the accompanying returns received from the Treasurer of the Eastern District.

GOVERNMENT House, 28th March, 1836.

CORNWALL, 22nd March, 1836.

SIR, I have the honor to transmit to you herewith two of the Returns prayed for by the House of Assembly, and ordered by His Excellency the Lieutenant Governor, as transmitted to me on the 18th ult.—The other two will take some time to complete, but when done I will lose no time in forwarding.

I have the honor to be, Sir,
Your most obed't, humble serv't,
ALEXANDER McLEAN.

J. Joseph, Esq., Treasurer, E. D. &cc. &cc. &cc., Toronto.

EASTERN DISTRICT in account current with the Bank of Upper Canada.

J. JOSEPH, Esq., Secretary to His Excellency the Lieutenant Governor, &c. &c. &c.

S.D

In compliance with His Excellency's desire, founded on an address of the House of Assembly, I had the honor of transmitting to you, a few days ago, two of the returns required by me by said address, and herewith transmit the remaining two; I beg, however, to point out a few circumstances which must have escaped your notice, one of which is that in one of these returns the House of Assembly have requested a return of the lands in this District that were not on the assessment rolls in the years 1835 and 1836. I would wish to saste that the assessment for 1836 has not yet been taken by the Township Assessors, and though that for 1835 has been taken, it is not in such a tatte as to enable me to include it in my return, I have therefore of necessity been obliged to omit these two years. In the next, the House of Assembly wish for a "return of taxes due on the uncultivated lands in this District on the 1st of July, 1828, and advertised in the Upper Canada Gazette of the 17th September, 1829, shewing the appropriation of said taxes or rates," &c. In reply to this latter clause I beg to state to the House of Assembly that these accounts were kept by the late Treasurer, and settled by him previous to my appointment to the Treasurership, and that I know nothing more of the appropriation referred to than is contained in the District accounts of that period, a copy of which, I presume, has been forwarded to the Government Otice, for the use of the House of Assembly, and was signed by the Chairmon in General Quarter Sessions, as the law directs.

I regret that it has been out of my power to forward these Returns sooner: I have been unceasing in my endeavors to prepare them, and with the assistance of a clerk have wrought at them from nine in the morning to nine P. M. I beg to submit his account, as well as my own, for the labor done—amounting

to thirty-one pounds ten shillings currency, which I hope will not be considered unreasonable—and shall feel obliged by your causing the amount to be transmitted. A part only of the required information was asked for by a few of the Magistrates at the October Sessions, in the present form, and was refused by the majority, on the grounds of the required information being of a nature from which no good could be expected to result, and that the state of the District funds were such as not to justify so useless an expenditure.

I have the honor to be, Sir,

Your most obedient humble servant,

ALEXANDER M'LEAN,

Treasurer Eastern District.

ALEXANDER McLEAN, Esq.
TO JOHN McDONALD, DraTo 18 days attendance in writing Returns of lands
ordered to be done by the Lieutenant Governor
&c. at 15s......£13 10 0

Cornwall, 14th March, 1836.

£31 10 0

0 0

ALEXANDER McLEAN, Treasurer, E. D.

RETURN of Lands in the Eastern District that were not on the Assessment Rolls in the years 1829, 1930, 1831, 1832, 1833, & 1834—also shewing when any part of the rates due on each lot was paid to the Treasurer.

ALEXANDER McLEAN, T. E. D.

DOCUMENTS

TRANSMITTED BY

Dis Breekency the Lieut.-Covernor.

RELATIVE TO THE BUILDING OF CERTAIN

PARSONAGE HOUSES.

~~~~~~

#### F. B. HEAD.

The Lieutenant-Governor transmits to the House of Assembly, with reference to its Address of the 18th instant, such papers as have been received relative to sums granted from the proceeds of rents of leased Clergy Reserves, in aid of the building of certain Parsonage Houses;—and acquaints the House that the Rev. William Macaulay has been called upon for a statement of the expenditure by him of the grant of Three Hundred Pounds for the use of the Glebe House at Cobourg in the year 1824.

GOVERNMENT-House, March 28, 1836.

SIR.

TORONTO, March 24, 1836.

I have the honour to acknowledge your letter, dated the 22d instant, covering an Address of the Commons House of Assembly, and beg leave to state, for the information of His Excellency the Lieutenant-Governor, that the Provincial Government's attention has frequently been called to the erection of Parsonage Houses, being fully authorised by His Majesty's Government, as well as by the provisions of the 31st Geo. III., chap. 31.

That applications for such erections having become numerous, it was resolved that no allowance should exceed £500; and that all Parsonage Houses should be built of brick or stone.

In regard to proceedings had in respect to any particular Parsonage, they are doubtless recorded in the Office of the Executive Council, to which His Excellency is respectfully referred, as there are no documents upon the subject in my possession.

With reference to this parish, £300, part of the maximum of £500, were placed in my hands for its benefit, "being in aid of defraying the expense of erecting a Parsonage House at York, authorised by a Despatch from Lord Bathurst, dated 10th June, 1823, and in virtue of an order of the Executive Council of the 2d March, 1825." Why the remaining sum of £200 has not yer been paid over I do not know; it is, perhaps, because I happened to have a house of my own, or that other cases were more pressing.

This sum of £300 remains with me in abeyance, to be expended whenever such additional assistance shall be given by Government as has been accorded to some other parishes, and by the congregation; as to effect the object intended by purchasing or building a Parsonage of suitable dimensions and durable materials.

I ought to add, that some steps have been taken, in order to secure an eligible house already built, under lease, on the Parsonage ground, in the full persuasion that assistance will some be obtained from the quarters alluded to;—had, indeed, such aid been furnished, the proposed arrangements would have been completed.

I have the honour to be,

SIR.

Your most obedient humble servant,

JOHN STRACHAN,

JOHN JOSEPH, Esq., Private Secretary. Sec. Sec. Sec.

IN Council, December 24, 1823.

Read the Petition of the Rev. William Macaulay, praying that the sum of Three Hundred Pounds may be granted for the use of the Parsonage House at Cobourg, agreeably to a certain bond entered into respecting the same.

Ordered on filing a new bond for the reduced sum of £300.

JOHN BEIKIE.

Clerk Executive Council.

### Extract from the Minutes in Council of the 2d March, 1825.

"That the allowance to be authorized from the Clergy rents towards erecting Parsonages shall not exceed, in the whole, £300

"currency, nor in any case more than one half the charge of the erection.

"And that every application for such allowance shall be accompanied by an estimate of the cost of the building, and a bond from the Church-Wardens and Incumbent, that the sum allowed shall be faithfully expended, and that insurance and repairs shall be made at their charge on the I ailding."

Truly extracted.

JOHN BEIKIE.

Clerk Executive Council.

EXECUTIVE COUNCIL OFFICE, Toronto, March 24, 1836.

I have the honour to acknowledge the receipt of your letter of the 22d instant, transmitting copy of an Address from the House of Assembly of the 18th received this morning, and herewith enclose two documents—which is all the information this office can furnish in respect to the said Address.

I have the honour to be,

Your obedient servant.

JOHN BEIKIE.

Clerk Executive Council,

Jenn Josuph, Esq., Sec. Sec. Sec.

(APPENDIX, No. 69.)

## **DOCUMENTS**

SENT DOWN BY

# Wis Ercellency the Lieut.-Covernor.

RELATING TO THE

## PROVINCIAL HOSPITAL

AND ITS

## REVENUES AND ENDOWMENTS.

F. B. HEAD.

The Lieutenant-Governor transmits to the House of Assembly, in compliance with the two Addresses of the House of the 11th ultimo, relative to the Provincial Hospital and its Revenues and Endowments, and the several reservations of Land within and adjoining the Town of York, the accompanying documents;—and acquaints the Assembly that the Block, comprising six acres, formerly designated "the French Lots," forms the site upon which the General Hospital, the Emigrant House, and the Choiera Hospital have been erected.

GOVERNMENT-HOUSE, March 28, 1836.

Letter from the Trustees of the Provincial Hospital at Toronto, transmitting various Returns and Statements respecting the conduct and resources of that Establishment, with reference to an Address of the House of Assembly of the 11th February, 1836.

Toronto, March 7, 1836.

Trustees Hospital.

We have the honour to acknowledge your letter of the 9th of February, transmitting, by command of the Lieutenant-Governor, a copy of an Address to His Excellency, from the Commons House of Assembly, respecting the management of the Towa and Country Hospital of this City, and other matters said to be connected therewith; and we beg to enclose various documents, numbered from one to six, inclusive, embracing the different points, and containing the information which His Excellency desires.

We have the honour to be,

Sir,

Your most obedient humble servants,

JOHN STRACHAN, JOHN B. ROBINSON, W. ALLAN, GEORGE H. MARKLAND, JOHN H. DUNN,

JOHN JOSEPH, Esq., Private Secretary. &c. &c. &c.

#### No. I.

### REPORT of Trustees of the General Hospital.

MAY IT PLEASE YOUR EXCELLENCY,

The General Hospital was built in 1819, from the residue of a subscription to the Loyal and Patriotic Society made in London, and which remained unexpended after the purposes, for which that useful and meritorious institution was established, had been fully accomplished.

The money was in the first place entrusted to the Archdencon of York, the Treasurer of the Society, in conjunction with the Hon. William Allan, who were to avail themselvs as to its final disposition, of the advice and suggestions of the members of the institution, residing in Upper Canada.

After mature deliberation it was resolved to erect an Hospital for the general benefit of the Province, but expressly on condition that the Directors or Trustees should, at all times, be prepared to answer the orders of the Transurer of the Loyal and Patriotic Society, to the amount of the legal interest of the sum expended on its erection about £3,000. This condition, so just and reasonable in itself, in order to guard against the possibility of disappointing any individual who might have a claim on the Society, has not been attended with any disadvantage to the Hospital, for the Treasurer who was one of the principal promoters, as well as the dispenser of its benevolence, feels qualified to state that no application has been made for relief from its funds for very many years. The accounts of the charity may, therefore, be considered closed, and all claims upon it fully satisfied; hence it follows, that the stipulation imposed in regard to the interest, has become altogether nominal. The Provincial Hospital, may, therefore, be pronounced, in as far as the buildings are concerned without any incumbrance, and entitled to the dividends accruing from certain shares of Bank Stock, purchased with what was still left of the money after its erection, and which now produce about £165 per annum.

At the same time, the Trensurer and the Hon. William Allan, consider themselves responsible to the original subscribers, but to none else; and here it is not irrelevant to state, that a portion of the same funds raised in London, for the Loyal and Patriotic Society, claimed in Lower Canada, was in imitation of the disposition here, applied towards the building of an Hospital in Montreal.

In order to meet the munificence of the Loyal and Patriotic Society in building, and to a small extent endowing the Provincial Hospital, His Excellency Sir Peregrine Maitland, then Lt. Governor, ever anxious to promote the good of the Province, represented to His Majesty's Government the propriety of endowing it with lands, the only way of giving permanent support in this innland Colony, to great public establishments, and on a scale that might enable it, in addition to the advantages of an Hospital, to be come an Asylum something like Chelsea, for persons disabled, and likewise to have branches in other parts of the Province; but whether the plan was deemed too complex, and the endowment suggested for its support too extensive, or that such an institution was not yet required, the representation appears to have failed, and only a very trifling endowment in land conferred upon it, which, after the lapse of many years, scarcely yields £145 per annum.

The buildings were finished in 1819, but the means of support being totally inadequate, even for an ordinary Hospital, on the smallest scale of utility, the Trustees were unable to apply them to the purpose for which they were intended, till August, 1829, at which time the Hospital was opened for the reception of patients, and has been struggling as it were for existence, with an increasing expenditure and uncertain income ever since.

Nor could the Hospital have been opened even ten years after its erection, had we not been encouraged by the fostering care and assistance of His Excellency Sir John Colborne, who directed a supply of beds and bedding to be given for the wards, and added, from time to time, donations in money, to place us in a condition to receive the sick.

His Excellency has further, in his anxiety to render the Hospital more efficient, called annually on the Legislature to grant it support, but no permanent provision has been made, and last year the message was totally neglected. The average of the small sums thus occasionally bestowed, scarcely amounts to £170 per annum.

In 1830 an attempt was made to assist its means of support by subscriptions, and in order to induce them, certain privileges as to direction and recommendation of patients were offered, but the attempt in a great measure failed, owing to the incessant calls made upon the benevolence of the community by the poor and destitute emigrants, which increase yearly, and are, during the winter season, exceedingly multiplied. Add to these calls the misery which has been produced by two severe visits of the Cholera, by which several hundred children and widows have been thrown totally destitute on the charity of the public.

A regulation was likewise introduced imposing a charge of one shilling per day for every patient during his or her continuance in the Hospital, but it has been found of little avail, because more than three-fourths of the patients are strangers, poor and destitute, and without friends or resources of any description.

The institution has, nevertheless, proceeded for more than five years, admitting patients from all parts of the Province, without distinction, and especially sick emigrants, though contending with the most serious pecuniary difficulties, in the hope that after manifest evidence of its great utility and absolute necessity to the welfare of the Colony, it might be able to satisfy the Legislature that its claims for adequate support had become irresistible. That period has now arrived. The following tables demonstrate that great and increasing advantages of the institution to the Province at large, and that the patients keep pace with the growing population. They also show the very inadequate support which the Hospital possesses—that a portion of the endowment has already been taken to defray the current expense, and that without speedy assistance and a certain permanent income equal to the probable expenditure the institutution must soon perish.

## GENERAL HOSPITAL, TORONTO.

TABLE I.

Date.	Admitted.	Discharged	Death s.	Expense of the Institution.
1829 1830 1831 1832 1833	52 146 331 548 555 612	35 124 258 437 519 455	7 10 39 61 51 73	£239 18 52 368 18 42 697 18 6 954 0 02 913 14 10 1000 0 0
				£4,174 10 23

# TABLE II. Resources permanent and casual.

		_	=
Dividends from Bank Stock	£165	٥	Δ
Rents of land granted by Government	145	ŏ	ŏ
rage for five years—no grant last Session—the			Ĭ
resource therefore uncertain	170	0	0
Average of donations from His Excellency—the Emigrant Society and Ladies' Baznar	115	0	0
Total average, annual income for five years from all sources	£595	0	0

This sum multiplied by five gives the actual receipts for five years, viz: £2975, which appears from table first less than the actual expenditure by £1200, a sum which may be considered as so much abstracted from the capital of the institution, small as it was previous to such deduction.

#### TABLE III.

Showing the present income of the Hospital, exclusive of casual gifts or donations on which there can be no dependence.

Dividends on Bank Stock	£165 145 200	0 0 0	600
Present certain income	£510	0	·0

An additional endowment producing a revenue of not less than £1500 per annum, is evidently wanting to secure the permanent efficiency of the Hospital in a manner adequate to the growing wants of the Province.

Even this income will leave the Trustees scarcely the means of remunerating the physicians and surgeons who have hitherto, with so much credit to themselves and advantage to the public, given their attendance gratis. To Doctor Widmer, the consulting physician, the institution is under the greatest obligation, for it was chiefly through his exertions that it was brought into operation. His services have been invaluable, and his superintendence incessant, down to the present time; nor is it too much to

sny, that without his able and judicious arrangements, the Hospital must have fullen through, and hundreds would have perished for the want of that assistance which he has so generously and kindly administered.

All which is respectfully submitted.

(Signed)

JOHN STRACHAN, Senior Trustee.

His Excellency SIR JOHN COLBORNE, K. C. B. }
Toronto, February 20, 1835.

### No. II.

SCHEDULE of Lands appropriated under the authority of Orders in Council for the support of the York General Hospital.

SIX ACRES.—The Site of the Hospital.
FIVE ACRES.—Hospital Reservation, west of Church
Street.
THREE HUNDRED AND EIGHTY-SIX ACRES, being
the Government Park, east of the City of Toronto.

ONE ACRE, on King Street, corner of York Street.

A portion of the Park Lots, and also of those forming the Hospital Reservation, have been sold, and the proceeds applied to the maintenance of the Hospital.

## ORDER in Council appropriating certain Lots in the Town of York to the use of the Minister of the Church of England for the time being.

In Council, December 2, 1824.

Read an extract of a Despatch addressed by the Right Hon. Earl Bathurst to Sir Peregrine Maitland, K. C. B., on the subject of Church Lands and Parsonage in the Town of York, duted 10th June, 1823.

The Committee having under consideration an extract of a Despatch addressed by the Right Hon, the Earl Bathurst to His Excellency Sir Peregrino Maitland, K. C. B., dated Downing-Street, 10th June, 1823, stating, that "whatever may have been the causes of the alienation of so considerable a portion of the lands originally appropriated in the Town of York for the Church, and for the use of the Rector for the time being, there annears to be no better mode of remedying the evil than that

"appears to be no better mode of remedying the evil than that " which you have suggested, of making up the number of acres

"formerly set apart for these purposes by a suitable transfer of "my lots which may be still reserved, or unappropriated, in the "Town Plot and Township of York," most respectfully recommend, that the Town Lot on which the old Gaol now stands be appropriated for this purpose, so soon as it becomes vacant, and that the Trustees of the six acres of land, situated near the Church, usually known by the Hospital Square or Block, he requested to release the south-cost acre of the said block for the quested to release the south-const acre of the said block for the same purpose, these two acres being as nearly equivalent to the two acres granted from the Church Plot as can now be found.

A true copy,

JOHN BEIKIE,

Clerk Executive Council.

## MEMORIAL of Dr. Gwynne.

To His Excellency Sir Francis Bond Head, Knight Commander of the Royal Hanoverian Guelphic Order, Knight of the Prussian Military Order of Merit, Lieutenant-Governor of Upper Canada, &c. &c. &c.

The Memorial of William Charles Gwynne, Bachelor of Arts and Medicine in the University of Publin, and Licentiale of the Royal College of Surgeous in Ireland,

HUMBLY SHEWETH:

That the Hospital in this City, which is the only institution of the kind at present in operation in the Province, is supported principally by a revenue derived from lands with which the Government has endowed it.

That there appear to be no fixed principles by which the Institution is regulated; but, on the contrary, that the entire management of it is in the lands of three or four medical practitioners, who seem to be guided solely by their own inclinations, and who alone, to the exclusion of all the other members of the Profession, in this city, enjoy the advantages derivable from the in stitution.

That the great majority of the medical practitioners are thus deprived of the principal means of becoming acquainted with the diseases incidental to the country and climates, and their pupils diseases incidental to the country and climates, and their pupils of the power of acquiring the first rudiments of their profession. That up persons are appointed whose duty it is to visit the Hoseital and see whether the patients are properly attended to or not. No periodical Reports inform the public of the number of patients admitted, their aliments, recovery or death. &c., or of the results of capital operations, which are frequently occurring in the feature of the results of capital operations, which are frequently occurring to the country of the results of capital operations, which are frequently occurring to the country thing country the feature of the country of the country that are the country that the feature of the country that the feature of the country that the feature of the country that the feature of the country that the feature of the country of the country that the feature of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of in fine, that every thing connected with the Institution is involved in an obscurity which is calculated to increase the prejudice against such institutions, which is known to exist in the minds of the poorer classes in all countries.

Your Petitioner, therefore, humbly prayeth, that your Excellency may think proper to cause an inquiry to be made into those matters, with a view to placing the Hospital in this city upon such a footing as will secure to it the confidence of the public—and to the medical practitioners, generally, the means of studying their profession under the greatest possible advantages

The Memorial of your Petitioner also further sheweth, that, by an Act passed by the Provincial Legislature in the fifty-ninth by an Act passed by the Provincial Legislature in the fifty-ninth year of the reign of George the Third, the Lieutenant-Governor, or person administering the government, is empowered to constitute a Medical Board, consising of five or more members, three of whom should be a quorum, for the purpose of examining persons applying for Licenses to practice Physic, Surgery, or Midwifuly in the Province. That the present Medical Board, having originally consisted of eleven members, is now in point of fact reduced to three, the remaining members being, from various reasons, unable to attend; which three members are frequently obliged to be under the painful necessity of examining their own som, unable to attend; which three members are trequently ob-liged to be under the painful necessity of examining their own pupils. That it is contrary to the practice of other countries and inexpedient, that three individuals should have, from year to year, the power of pronouncing, without appeal, upon the profes-sional merits of their own pupils, or those of others, who may be obliged to submit to their decision, their future prospects in life.

Your Petitioner, therefore, humbly prayeth, that your Excelthe Medical Board, from the resident practitioners in this city; and to introduce such other changes into the constitution of the said Board as may to your Excellency seem best calculated to remedy the above defects.

And your Petitioner, as in duty bound, will ever pray.

(Signed)

WM. C. GWYNNE.

Toronto, January 29, 1836.

## MEMORIAL of certain Resident Practising Physicians.

To His Excellency Sir Francis Bond Head, Knight Commander of the Royal Hanoverian Guelphic Order, and of the Prussian Military Order of Merit, Lieutenant-Governor of the Province of Upper Canada.

The Memorial of the undersigned Resident Practising Physicians and Surgeons of the City of Toronto,

That your Memorialists are impelled by a sense of public duty to solicit the attention of your Excellency to the present state of the Medical Board of this Province.

By the Provincial Statute of the 59th Geo. III., c. 13, it is emotted, "that it shall be lawful for the Governor, Lieutenant-

Governor, or person administering the Government, to constitute and appoint, under his hand and Seal at Arms, five or more persons legally authorised to practice Physic, Surgery, or Midwifery, in this Prevince, to be a Bontd, whereaf any three to be a quorum, to hear and examine all persons desirous to apply for a Liceuse to practice Physic, Surgery, and Midwifered ory, or either of them, within this Prevince, and being satisfied to be another accountable of the method of the same processed in duly constituted. by such examination that any person is duly qualified, to certi-ty the same under the hands and seals of two or more of such

By the same unner the manus and was of two or more of such. Board. Whereupon the Governor, Lieutenant-Governor, &c., being satisfied of the loyalty, integrity, and good morals of such applicant, may, under his hand and Seal at Arms, grant to him a License to practice," &c.

The Board as originally constituted under this Act consisted

of ten Members and a Secretary, their names and residences being as follows:-

Toronto. Toronto. Kingston. Toronto. Kingston. Toronto. Oxford. Toronto.	Retired. Retired. Non-Resident. Retired. Retired. Non-Resident.
	Toronto. Toronto. Kingston. Toronto. Kingston. Toronto. Oxford.

In consequence of some of the members having died, and others having retired from the Profession, the highly important trust confided in this Board has now devolved on three individual

practitioners in this city, viz.:—Drs. Widmer, King, and Rolph.

Your Memorialists wish to abstain from making any remark
that might be construed to reflect, in the slightest degree, upon
the efficiency of the present Board. It is their object and wish
only to call your Excellency's attention to the reduced, and now

very limited, number of acting members: and should any vacancy occur among them, it would be difficult to make a quorum without having recourse to a non-resident member, who might not find it convenient to attend.

The Legislature appears to have contemplated an efficient Board of " live" or more members, although giving the power to " three" of forming a quorum or majority.

Your Memorialists humbly conceive, that the interests of the public new require the re-organization of the medical Board, by the addition of other members; and your Memorialists are confident, that such an addition would give very general satisfaction; and, therefore, humbly pray:

That your Excellency will be pleased to take an early opportunity of nominating such additional members as will render the Medical Board more efficient, and better calculated to promote the objects of the Act.

And your Memorialists will ever pray.

WILLIAM WINDER, M. D.
JAMES SINCLAIR EGAN, M. B.
WALTER TELFER, SURGEON.
WILLIAM REES, SURGEON.
GEORGE A. LATHAM, M. D.

## OBSERVATIONS of Medical Board.

(COPY.)

The Medical Board having perused the Memorial of Dr. Gwynne, referred by His Excellency the Lieutenant-Governor to the Board for any observations they may deem it necessary to offer on the subject, respectfully beg leave to state to His Excellency, that the Hospital of this city was built from funds remaining in the hunds of the Loyal and Patriotic Society of Upper Canada, at the termination of the late war with the United States of America, upon lands originally granted for that purpose by the Crown. These lands are now vested in certain Trustees, to whom the Executive Government have also left the general management of the affairs of the Hospital.

Owing to causes not known to the Board several years clapsed before the building was opened for the reception of patients, but early in the administration of His late Excellency Sir John Colborne, Mr. Widmer was instructed to organize it, and requested, in conjunction with Dr. Diehl, to undertake the Medical superintendence. As the number of patients increased, Dr. King and Mr. Rolph were subsequently appointed; and on the removal of Dr. Diehl from the city, Dr. Hornby, a Graduate of the University of Edinburgh, was selected by the Trustees to fill the vacancy.

The number of intern patients varies from forty to sixty-five or seventy, and it has been considered that four Medical Officers are amply sufficient for the performance of its duties; with what degree of zeal and ability these duties have been executed it is not for the Board to declare. The Trustees us a body, and that vigilant and active visitor of the Institution, the Archdeacon of Toronto, must be referred to on this point.

A Code of Regulations, printed many years ugo by the Trustees, is appended to this Report; although in certain parts it is not applicable to the fiscal concerns of the Hospital, it has been the guide which has directed the admission of patients, and the general economy of the Institution.

As regards the exclusion of all the other members of the Profession in the city, the Board submit the utter impracticability of admitting all those members of the Profession not connected with the duties of the Hospital to visit it when they please; and it would be an invidious task to decide what particular portion should have that right. If a Hospital is to be efficient, and obtain the public confidence, a certain number of responsible medical persons must be selected, and the duties confided to them; if other practitioners are admitted, it must be by the courtesy of those in attendance.

The Wards have ever, heretofore, been cheerfully open, during the visiting hours of the Medical Officers, for all the well conducted students of medicine resorting to the city; those who attend are always aware of the performance of any capital operation, and the benefits derived from the Institution to the stu-

dents generally has been sufficiently obvious. This admission of students has been allowed by the Medical Officers, in the absence of any rules upon the subject in the printed regulations, without assuming, however, any right to exercise such a power. But as the question of the unconditional admission of the pupils of the Profession generally in the Province to participate in the instruction afforded by attending the practice of the Hospital, is brought by this Memorial under the consideration of His Excellency, the Board recommend, that, pending such an investigation, the Medical Officers forbear further interference. The Board, however, respectfully submit, that the Medical Officers ought not to be required to become granuitous instructors in the Hospital, until it is appended to a Medical School to meet the growing wants of the country.

There is no instance within the knowledge of the Board, either in Europe or America, where the great majority of the medical practitioners of a city derive their means of becoming acquainted with the diseases incidental to the climate through the practice of a Hospital. The Medical Officers of our best Provincial Informatics in England are all elected, and the practice of these Institutions confined to a convenient number.

"That no person is appointed whose duty it is to visit the Hospital and see whether the putients are properly attended to or not." may be accounted for, when it is understood that the professional character of the attending Medical Officers has never been, justly or successfully, reproached with want of skill, hu manity, or attention. It is, therefore, presumed that the Trustees do not participate in Dr. Gwynne's suspicions of the necessity of appointing such a person.

A periodical Report, detailing the number of admissions, discharges, and deaths, of each disease or accident, together with a statement of prevailing diseases, has invariably been presented to the House of Assembly, through His Excellency the Lieutenant-Governor, at each Session, up to the Session before last, when it was discontinued, owing to the failure of the accustomed annual grant of £100 by the House in aid of the funds of the Hospital.

That no prejudice exists against the Institution is sufficiently evident from the numerous daily applications for admission. The Board believe that the confidence of the public in the Hospital remains unimpaired.

The Medical Board have endeavoured faithfully and conscientiously to discharge the duties entrusted to them by His Majesty's Government; and they have yet to learn that there is any dissatisfaction in the country, or in the medical practitioners of the country, with the exception of the Memorialist and a few others, who have too recently come into the Province to form a just opinion. But should His Excellency think proper to increase the number of the Medical Board, they respectfully refer to the documents in the Appendix for evidence of the truth, that

there are persons with whom the Board could not associate in the performance of any duty.

It is obvious that the pupils of any member of the Board must, of necessity, be examined by the Board; but they report, that in no instance of the kind has the member, of whom the candidate was a pupil, taken any part in the examination, which has always been, in such cases, scrupulously rigid.

The Board are willing to give the names of such candidates who have been examined and passed by the Board, that His Excellency, the public, and the Profession may judge of their morit,

to which the Board desire to bear their distinct testimony, in anto which the Board desire to bee. swer to the insinuation to the contrary.

C. WIDMER, President.

February 4, 1836.

PRESENT.

C. WIDMER, President W. W BALDWIN, M. D. R. C. HORNE, Esq. JOHN KING, Esq., M. D. JOHN ROLPH, Esq.

## (APPENDIX.)

No. I.—Rules and Regulations for the government of the General Hospital. No. II.—Extract from the l'atriot Newspaper.

(COPY.)

The Medical Board to whom was referred the Memorial of William Winder and four others, for any observation they might think it proper to make on the subject thereof, for the informa-tion of the Lieutemant-Governor, respectfully report, that the Appendix No. I. will exhibit the whole number of persons who have constituted from time to time the Medical Board, with their standing in the Profession, and period of residence in the country. It appears that the selection has heretofore been made not merely of those whose opportunities of education have been favourable, but whose long professional practice and residence in the country had previously obtained for them the confidence of the public and of their medical brethren generally.

The Board cannot but observe, that while, on the one hand, the Government appear to have been guided by this circumspac-tion of choice, the gentlemen signing the present Memorial, in-cluding Dr. Gwynne, comparatively are strangers, and not asso-ciated in this complaint with any of the practitioners in the city or country, who have been, more or less, cognizant of the competency, sufficiency, and fidelity of the Board, from its original organization.

This Colony, particularly since the attention of emigrants has been directed to it, has, within some years, had many transient professional men, who, after a very limited and unsuccessful re-adence, have left it; and the Board submit, that neither the public nor the Profession could be expected to enlarge their confidence by any accession to the Board from that class.

The members of the Board do not desire to retain their office longer than they possess the confidence of the country, for whose

benefit the Government has appointed them; but they cannot recognize the representation of these gentlemen, including the Mecognize the representation of these gentlement, including the amount of Dr. Gwynne, as evidence of the desire of the public for any such additions, to give very general satisfaction. But whenever His Excellency finds such an increuse desirable it is neither their duty, nor their inclination to object to it.

It appears, however, that the Provincial Parliament, with many medical gentlemen in it, better acquainted than the Me-morialists possibly can be with the character and efficiency of the Board, have continued satisfied with its present organization, and have, by law, provided, that three shall be a quorum; nor in a limited community like this can a large quorum be at present expected, or long insured.

The members resident in the country can only give a very occasional attendance; but their addition has, no doubt, contributed to extend over the country the confidence which it is desirable. the Board should poseass, and led to greater uniformity in that private instruction, which, however inadequate to the wants and merits of students, continues to be the only opportunity they en

#### No. L

RULES and Regulations proposed for the Government of the General Hospital

### GENERAL HOSPITAL PATRON,

## The Lieutenant-Covernor Sir John Colborne, K. C. B.

#### SECTION I.

ELECTION OF GOVERNORS, OFFICERS, &cc.

Persons contributing £25 to the funds of the Hospital, or £2 10s. annually, may be chosen Governors or Directors.

Persons contributing £10 to the funds, or £1 5s. annually, shall be entitled to vote at the election of Governors.

The whole number of Governors, including the Trustees, shall in no case be less than thirteen.

The Governors to be elected, whose number shall not be less than seven, shall be chosen from among those who pay £2 10a annually towards the support of the Hospital, or Donors of £25.

The votes shall be given in the ratio of the contribution, that is, one vote for every £1 5s. of annual contribution, provided that no person be entitled in any case to more than five votes.

No person shall be eligible to the office of Governor, unless he be in a situation to discharge its duties, being resident in York or its vicinity.

No subscriber or contributor shall have a right to vote at any election of Governors until he shall have paid his subscription or contribution for the current year

The Governors shall be elected on the first Tuesday in the month of May in each and every year, in the Committee-Room of the Hospital, at 11 o'clock, A. M.

In case the number of Governors elected shull at any time, by death, resignation, absence, neglect of duty, or refusal to act in their office, be less than thereen, their number shall be filled up for the current year by the Board.

At their first meeting, which shall take place on the Monday after their election, the Governor shall choose a President, a Vice-President, a Screetary, Treasurer, and Committee of Management, to consist of three Governors, and the Medical Attendants, any three of whom shall be a quorum, and who shall remain in office one year from the date of their appointment.

A meeting of the Board of Directors shall be held in the Committee-Room of the Hospital on the first Tuesday in February, May, August, and November, which shall be called Stated Meetings; all other meetings being known by the name and style of Special or Extraordinary Meetings.

Any two Governors, by application to the President, or, in his absence, to the Vice-President, with his concurrence shall have power to call a meeting of the Board of Governors, giving at least one day's notice.

The Secretary shall state in his notice calling such special meeting, the business to be laid before it.

Five Governors, with the President, or, in his absence, the Vice-President, shall be a quorum, and shall have power to transact all business relating to the Hospital, according to the existing rules and regulations.

The Governors shall have power at any ordinary or extraordinary meeting to appoint such officers, and fix their compensations or salaries, as they may deem necessary for the management of the Hospital.

It shall be incumbent upon the medical officer in charge to attend at the Hospital at least once a day, and if he is prevented so doing by sickness, or urgent professional avocations, he shall give notice thereof to one of his conditions who may be able to attend for him.

An ample supply of Medicines having been produced for the Dispensary, and a Resident Apothecary having been appointed, any indigent persons whose cases are not of a nature to require Hospital treatment, may receive advice and Medicines by attending personally, without any recommendation, at the Hospital, at the hour of noon throughout the year.

#### SECTION 11.

#### OF THE PRESIDENT AND THE VICE PRESIDENT.

The President, or in his absence, the Vice President, with the concurrence of two Directors, shall call a meeting, whenever he shall think it necessary, giving, at least, one day's notice thereof.

The President, or in his absence, the Vice President, or in their absence, any member, who may be elected by a majority of those present, shall preside at all meetings of the Board of Directors.

#### SECTION III.

#### OF THE TRASURER.

The Treasurer shall give such security as may be required by the Board of Directors, for the due accounting for, and payment of the monies which he shall receive from time to time, for the use of the Hospital.

He shall receive all monies belonging to the Hospital, and pay out the whole, or any part thereof, on receipt of a written order from the Board of Governors, or the Committee of Management, but not otherwise.

He shall deliver to the Secretary, seven days, at least, previous to the general annual meeting, held on the first Tuesday in May, in each and every year, a full statement of all his accompts, with the vouchers for the preceding year to be laid before the said meeting.

#### SECTION IV.

#### OF THE SECRETARY.

The Secretary shall attend all meetings of the Board of Governors, take minutes of the proceedings of each meeting, and transcribe the same into a bock.

He shall, at each meeting of the Board, read the proceedings of the last meeting.

The first of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the cont

He shall keep another book; into it, he shall transcribe the minutes of the Committee of Management, which meeting it shall also be his duty to attend.

Throng h the Secretary, all communications, of whatsoever nature, shall be made to the Board of Governors, and by him, from the said Board, to the public, or any department of the Hospital.

He shall, within two days after the election of the Governors, or other Officers of the Hospital, give notice thereof to the different persons so elected.

On the day preceding each and every meeting of the Board of Directors. (special or stated,) it shall be his duty to send notice of the time and place of each meeting, to each Director and Medical Officer of the Hospital.

He shall, twenty days before any election of Governors, hang up a notice in the Committee Room of the Hospital, and shall state therein the persons entitled to be elected, and the qualifications required of the electors.

He shall, on the Saturday preceding their week of attendance, notify, by letter, the weekly Visiting Directors.

He shall keep the necessary books for entering all the transactions of the Hospital, and abstracts of the all the accompts.

On the first Tuesday in April, in each and every year, the Secretary shall send a monitory letter to each and every person whose subscription shall be in arrears.

#### SECTION V.

#### OF THE COMMITTEE OF MANAGEMENT,

The Committee of Management shall meet at the Hospital, at least, once a month, and shall have power, and it shall be their duty, to inquire strictly into the domestic economy of the house, to order all things necessary for the same, to inquire into the conduct of officers, matron and servants of the Hospital, to examine and order all repairs, to oversee and control every thing connected with the management of the Hospital, to credit, inspect and approve all accompts, and to order payment of the same, and to report, by the Secretary, a statement of all their transactions to each quarterly meeting of the Board of Governors.

They shall have the general charge and care of the property of the Hospital, and shall enforce all necessary attention to economy, cleanliness and good conduct.

They shall have power, by application to the President, or in his absence, to the Vice President, to call whenever they think it necessary, a meeting of the Board of Governors.

They shall, at their meetings, make minutes, which the Secretury shall transcribe in a book kept for that purpose.

They shall have power, and it shall be their dury, to engage and discharge all servants of the Hospital, and to fix their wages.

The Committee of Management shall, five days previous to the general annual meeting, or the first Tuesday in May, in each and every year, draw up a report of the state of the Hospital, and of the state and number of patients admitted and discharged, and an abstract of the proceedings of the Board of Governors, and of all the accompts of the Hospital for the preceding year.

#### SECTION VI.

#### THE STEWARD OR PURVEYOR.

The Steward or Purveyor shall purchase, under the direction of the Committee of Management, fuel, provisions, and all other stores for the use of the Hospital, except Medicines and Medical stores. He shall present to the Committee of Management every three months, or oftener if required, a statement of his accounts.

#### SECTION VII.

#### ADMISSION OF PATIENTS.

It shall be the exclusive prerogative of the Medical attendants to judge if the person or persons recommended as patients be fit objects for admission.

Every Governor and Medical Officer of the Hospital, and the Clergymen belonging to such congregations of this town as make collections in aid of the funds of the Hospital, may recommend patients for admission.

Subscribers to the Institution, not eligible as Governors, may recommend patients to the extent of their subscriptions, at the

rate of one shilling per day for each patient, but such recommen-dation must be countersigned by one of the Governors.

That no Governor or subscriber be allowed to send their serwants, as putients, to the Hospital, unless they pay one shilling per day during their stay, for subsistance.

That no patient be admitted by the Steward, unless he produce a recommendation signed by a Governor, except in case of vio-lent wounds and severe accidents.

No patient shall be admitted into the Hospital whose case shall be considered incurable, or who is insure, or an idiot, nor any whose cure does not require the particular benefit of in-door

No woman advanced in prognancy shall be admitted as an indoor patient.

Such patients as are unable to pay for their maintenance, shall be received as paupers; such as are able to pay, shall be admitted into the Hospital as pay patients, at the rate of not less than one shilling per day.

The person recommending any patient or patients shall men-tion in the recommendation for admission if they are paupers, and if not, the sum they are to pay per week; in cuse of any doubt as to the ability of the patients to pay the Hospital dues, the Committee of Management shall send to inquire the same.

More than twenty pauper patients cannot be provided for; it is, therefore, necessary that no patient from a distance should rely upon being admitted without a previous communication with the Directors; it is carnestly hoped, however, that such assistance may be afforded by the Provincial Legislature, as may enable the Directors to extend the benefits of the Institution more generally.

Patients admitted into the Lock Ward, shall pay 1s. 6d. per day.

When a pauper dies in the Hospital, the Steward shall give notice to the Clergyman to whose congregation or Church he or she may belong, that the burial may not be at the expense of the Hospital.

#### SECTION VIII. OF THE PATIENTS:

Any patient absenting himself without leave, or being guilty of drunkenness, or any irregularity, such as swearing, or speaking or acting disrespectfully to any of the servants of the Institution, or breaking through any of the regulations, or neglecting the directions prescribed for his behaviour and recovery, by the Medical Control of the control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medical control of the medi

cal Officers, shall, upon being reported, be immediately dismissed by any member of the Committee of Management.

SECTION IX.

On the first Tuesday of the month of May, a general meeting shall be held of the Trustees, Governors, and Subscribers, before which a Report of the State of the Hospital shall be laid, detailing the number of patients admitted and discharged, an Abstract of all the proceedings of the Board of Governors, and of all the Accounts of the Hospital for the preceding year, with such other matters respecting the Institution as may be thought worthy of consideration; and after such proceedings on this information as may be deemed proper, the meeting shall proceed to the election of Governors for the ensuing year.

The original Board appointed by Commission, dated January, 1819, composed of six members.

For the Patriot.

MR. EDITOR:

In our communication of the 10th inst., we adverted to the Medical Gentlemen in such a manner as in our opinion, would have drawn forth an explanation of the treatment they pursued in the case of the late Mr. Wasnidge, and had we been misinformed we would have made an ample public acknowledgment. In consequence of their silence we have taken the trou-ble of enquiring more minutely into the case, and the more we learn, the more unaccountable their treatment appears to us. We should be glad to hear from them, what was their object in using the trepan thrice, and as near the same place as possible .-The practice, undeniably, is novel in modern times.

We are aware that by some our attack is thought unhandsome; but when it is considered that these gentlemen fill the responsible situations of Hospital Surgeons, and Members of the Board of Examination, it must be allowed that the public at large, more especially the medical public, have an undoubted right to canvass their conduct.

Sir Astley Cooper, in speaking of the operation in question mentions the case of a dresser in one of the Hospitals, who, having had no accident during his week, said, "I will make a cut in the head of one of my patients, with fracture, for he may perhaps have depression, and I shall in this way have something to do before my week is up." This dresser ought to have a cut made in his own head—he should have been cut for the simples—this was putting his patient to considerable hazard—for the simple fracture would by the incision be rendered a compound fracture. ing had no accident during his week, said, "I will make a cut in

#### No. IV.

(COPT.)

From the "Recorder," of Wednesday, Jan. 6, 1836.

A meeting of the Medical Practitioners of the City of Toronto, pursuant to public advertisements, was held at the Court House, on Monday, the fourth instant, when the following resolutions were unanimously adopted.

Dr. Gwynne in the chair.

Dr. Rees was called upon to act as Secretary.

1. Proposed by Dr. Egan, and seconded by Dr. Latham.

That it is the opinion of this meeting that no institution has poorer portion of society labouring under disease or suffering from accident, than a well conducted Hospital, under the superintendence of a number of skilful and zealous medical practitioners. It being a subject of general notoriety, that there exists in the minds of the lower classes of society a prejudice against such institutions, partly arising from ignorance, and partly from an ill-grounded apprehension that medical men require themselves for unpaid services by the extensive field of experimental practice thus opened to them.

2. Proposed by Dr. Lithgow, and seconded by Dr. Egan,

That it is of the utmost importance to remove this prejudice That it is of the utmost importance to remove this prejudice as far as possible by adopting the precautions used by such institutions at home, viz: appointing particular days in each week for the performance of such important operations as admit of delay; when medical men and their pupils, and all per sons interested are at liberty to attend, publishing periodically full statements of the number of persons admitted, their ailments, recovery or death, &c., and generally by affording to visitors such easy access to the wards as may be consistent with the comfirt and well-being of the patients.

3. Proposed by Dr. Telfer, and seconded by Dr. Latham,

That it is the opinion of this meeting, that a veil of obscurity impends over the proceedings of the Hospital of this city, there being no stated days appointed for the performance of operations, which the markly precitions with the complex precitions with the complex precitions. which the regular practitioner might attend, nor any published reports imforming the public of the number of those who have been restored cured, to their friends, or fallen victims to the progress of disease; the passing bier alone affords a melancholy proof that the institution still exists in active operation.

4. Proposed by Dr. Rees, and seconded by Dr. Lithgow.

That a respectful application be made to the Lieutenant Go ernor of this Province, requesting information upon the following

subjects:-The original constitution of the Hospital-the number and mode of election of the medical attendants—whether there exists a board of control; if so, of whom composed;—whether a periodical statement of patients admitted, their ailments, recovery, death, &c. be submitted to the Lieutenant Governor, or any board authorised to receive or demand such state-

5. Proposed by Dr. Telfer, and seconded by Dr. Egan,

That it is the opinion of this meeting that the medical board of this city, consisting as it does, for the most part, of members who, from the remoteness of their residences, and being devoted to other pursuits, cannot, therefore, attend to the important duties entrusted to them, as an efficient body.

6. Proposed by Dr. Egan, and seconded by Dr. Latham,

That it is contrary to the practice in other countries, and manifertly inexpedient, that two or three medical practitioners, holding their inquisition in atter darkness, should have, from time to sional merit of their own pupils, or those of others, with whom they may possibly be at variance.

7. Proposed by Dr. Telfer, and seconded by Dr. Egan,

That a respectful petition be presented to the Lieut. Governor, oraying him to introduce such changes into the constitution of the Medical Board as may seem to His Excellency best calculated to restore it to the confidence of the medical men of this Province, and of those persons who are about to submit their future prospects in life to its decision.

8. Proposed by Dr. Lithgow, and seconded by Dr. Latham,

That an immediate application be made to the Provincial Legislature, praying them to extend to the Licentiates of the Colleges of Surgeons, of Dublin, Edinburgh and Glasgow, those privileges which they have ulready conceded to that of London, making thereby an invidious distinction insulting to those Colleges, and to the countries to which they belong.

9. Proposed by Dr. Egan, and seconded by Dr. Telfer,

That a Committee, consisting of Doctors Latham, Telfer, Egan, Lithgow and Winder be appointed to draft the memorials as above, and wait upon His Excellency the Lieu. Governor, for the purpose of carrying into effect the objects of the meeting-

WILLIAM C. GWYNNE, Chairman. (Signed) WILLIAM REES, Secretary.

## REPORT of Captain Bonnycastle on the Military Reserves.

TORONTO. UPPER CANADA, 26th February, 1836.

I have the honor, in obedience to the commands of His Excellency, the Lieut. Governor, as contained in your letter of the 24th instant, this day received, respectfully to report, ter of the Settlement matters contained in the Address from the Commons House of Assembly to His Excellency, bearing date the 11th Feb. 1836.

- The portion of ground, therein described "as the commons east of the city" not being military lands, as far as 1 am aware, I am consequently unable to afford any observations upon.
- 2. The land therein named as "The Commons, west of Peter Street, up to the Garrison, and south of Lot Street, west," is a a portion of the Military Lands of the Crown, having been originally and expressly reserved for military purposes.
- 3. His Excellency's predecessor having found that the town of York was very rapidly increasing, suggested to His Majeaty's Government the propriety of some alteration in the site of the present Garrison, and obtained permission with the acquiesence of the Hon. the Board of Ordnance, gradually to sell that part of the Military Reserve, east of the small creek, which nearly distributions are reserved to the land vides the reserve itself into two parts—the proceeds of the land thus sold, to be appropriated as has been decided upon by His Majesty's Government and the Honourable the Board of Ord-
- 4. For a statement of the funds derived from those sales by public auction, had within the past two years, I beg to refer you to the Commissioner of Crown Lands, as not being a Provincial accountant; I have had no control of the proceeds, neither am I required, otherwise, to do more than to report, from time to time, as to their nature and extent, for the information of the Ordnance.
- 5. The portion of the military reserve thus mentioned as being set apart for sale, has been regularly surveyed and entirely laid out in streets, squares & loss by the Surveyor General's department, for the express purpose of extending the city; and the lots hitherto sold

have been deeded, upon payment in full by the purchasers, according to descriptions issued, from the Surveyor General's Office, in which the final approved plan of the new part of the city is lodged.

- 6. In thus forming the new town, no lot has been given, granted or leased to any person whatever, and no reservations have been made, excepting for future public purposes connected with the city as laid down on that plan.
- 7. With respect to the application of the funds, I have to represent that, having been employed by the Local Government, only to form the original plan, and to carry on such services as were deemed requisite for the improvement of the new part of were ascened requisite for the improvement of the new part of the city, and which would render the lots more immediately saleable, I must again refer for particulars to the Commissioner of Crown Lands, feeling myself, however, ableto remark, that no other application was made of those funds, further than the en-closure of the site of the future Government House grounds, the forming a road and foot path to the new pier, with some drainage, &c., and the payment of the surveyors employed.
- 8. I think it but due to myself, here, to observe that I have received no emolument of any kind; nor have I had the prospect ceived no emoument or any kind; nor have I had the prospect of any remuneration whatever held out to me, or to any other person under my orders, for carrying on these public works, nor for any other similar professional services rendered to the Province at the desire of His Excellency the Lieutenant Governor.
- 9. In conclusion, I beg to state, that the sales are always made by public auction to the highest bidder, and are previously arranged by a Committee, consisting of the Commissioner of Crown Lands, the Surveyor General, and the Officer of Engineers, acting on the part of the Ordnance.

I have the honor to be,

Sir,

Your most obedient, Humble servant,

> R. H. BONNYCASTLE, Capt. Royal Engineers.

## Acting Surveyor-General's Report relative to the Reserves at Toronto.

#### SURVEYOR GENERAL'S OFFICE,

February 27th, 1836.

In compliance with the commands of His Excellency, the Lieutenant Governor, of the 24th instant, I have the honor to state to you, for His Excellency's information, that the Garrison Reserve, in the city of Toronto, was, by Order in Council, of 3rd June, 1817, dedicated to Military purposes, under the control of the Honorable Board of Ordnance—a survey thereof, into Town Lots, under the directions of Captain Bonnycastle, commanding the Royal Engineers, has been returned to this office, and the following descriptions issued under certificates from the Commissioner of Crown Lands, viz:

The Hon. Levius P. Sherwood.	£	<b>s</b> .	d.
Lot No. 4, in Section A., consideration money paid to the Commissioner of Crown Lands,	534	0	0
To Francis Nesbit.			
Lot No. 18, in Section A., containing 57,240 square links, consideration money paid to the Commissioner of Crown Lands,	152	0	0
To William Rees.			
Lots Nos. 1 & 6, South side of Adelaide Street, con- taining 3-10ths of an acre, consideration money paid to the Commissioner of Crown Lands,	251	10	0

To James Fitz Gibbon. Lots Nos. 1, 2, 3, 4, & 5, North side of Adelaide Street, containing 1 & 9-10ths of an acre, consideration money paid to the Commissioner of Crown ... 559 13 0

To D'Arcy Boulton, Junior. Water Lat designated E., consideration money paid to the Commissioner of Crown Lands,..... 121 0 0

To John Bishop, the Elder.

Water Lot designated F., consideration money paid to the Commissioner of Crown Lands,...... 131 0 0

To the City of Toronto.

The Water Lot in front of the Market Square-Orin Council, 26th August, 1835,..... Patent free.

To James Fitz Gibbon.

A certain piece or parcel of land lying North of Adelaide Street, East of Brandt Street, and Southerly of lands heretofore granted to the late William Halton, deceased; and a certain piece or parcel of land lying North of Lots Nos. 1 and 2 on the North side of Adelaide Street, and Southerly of Lands granted to the late William Halton—1 acre and 7-10ths, in exchange for a piece of land contiguous, to be surrendered to the Crown—by Order in Council, 6th August, 1835.

The part East of the city of Toronto, was described under Oader in Council, 2nd May, 1818, to the Honorable Chief Justice Powell, the Honorable James Baby, the Honorable and Reverend John Strachan, and their heirs and assigns for ever, in trust, to make such conveyances of the same to such persons and upon such trusts as His Majesty's Executive Council, for the time being, shall, from time to time, direct—and any further appropria-tion of the said lands is not known to this office.

I have the honor to be, Sir. Your most obedient, Humble servant J. RADENHURST.

To John Joseph, Esq., Civil Secretary.

## STATEMENT from the Commissioner of Crown Lands.

Cummissioner of Crown Lands' Office,

Toronto, March 4th, 1836

Toronto, March 4th, 1836.

I have the honor to transmit to you herewith, a statement shewing the amount of the receipts and disbursements on account of the Military Reserve, within the city of Toronto, and which contains all the information this department can supply.

I beg to observe, that I have had no control over the disbursements, and that the different payments were made by the authority of the late Lieutenant Governor, agreeably to requisitions and certificates furnished by Captain Bomycastle I also forward to you a statement of sales of Water Lots, in the city of Toronto.

I have the honor to be,

Sir, Your most obedient,

Humble servant,

PETER ROBINSON.

To John Joseph, Esquire, Civil Secretary.

COMMISSIONER OF CROWN LANDS OFFICE, }
Toronto, March 3, 1836.

PETER ROBINSON.

Downing Street, 23d January, 1835.

With reference to your Despatches of the dates and numbers mentioned in the margin, I have now the honor to transmit to you copies of a correspondence which has taken place between this department and the Board of Ordnance relative to the application of the money arising from the sale of the Military Reserves lying to the westward of the city of Toronto. By

July 3. " 50. relative to the application of the money arising from the sale of the Military Reserves lying to the westward of the city of Toronto. By this correspondence you will perceive that the Board of Ordnance Ordnance, Dec. 31, 1834. have requested, and that I have accordingly Jan. 17, 1835. of all the proceeds of these sales should be paid ever to their officers, until the sum so paid over shall be sufficient to cover the expense of erecting new Barracks, with their necessary defences, for the Garrison of Toronto. I have therefore to desire that you will make these payments accordingly, and I have no doubt that you will shortly receive an estimate of the whole expense contemplated on this account, in compliance with the wish expressed in my Under-Secretary's letter of the 17th instant.

With reference to your Despatches of the 3d and 4th July last, Nos. 50 and 51, recommending the erection of a Chapel and of a Government House out of the surplus which will remain from these sales, after the erection of the military works, and transmitting estimates of the sums necessary for that purpose. I have to inform you that I have not considered myself at liberty to sanction so large an expenditure without first consulting the Lords Commissioners of the Treasury. I have, therefore, referred your Despatches for their Lordship's consideration, and I shall communicate further with you upon the subject, as soon as I shall have been favored with their opinion.

I have, &c.

(Signed)

ABERDEEN.

MAJOR GENERAL

SIR J. COLBORNE, K. C. B.

&c. &c. &c.

(Copy.)

- Office of Ordnance, 31st December, 1834.

Sir.

Having submitted to the Master General and Board your letter of the 33d September last, requesting copies of any Reports received from the Ordnance Officers at Toronto, (York) Upper Canada, shewing the present condition of the Burracks; at the same time requesting the opinion of the Master General and Board, whether the state of the existing Barracks, with reference to delapidations and insufficiency of accommodation for the troops, would appear to require the erection of a new building; I have it in command to acquaint you, that no report has been received from Toronto since July, 1833, when the Barracks were described as being in a bad state, and the sum of £395 6s. 5d. was authorised to be expended by the Ordnance for repairing them.

The Master General and Board, however, desire me to request you will draw the attention of the Secretary of State to the correspondence which has taken place relative to the construction of new Barracks, by the Colony, a question brought forward by the Lieut. Governor with the object of obtaining a portion of the reserve contiguous to the present fort and barracks, for the enlargement of the town, and to observe that if the present communication has reference to this subject, the Master General and Board consider that it is not the actual state of the buildings as the position in which it would be placed by the extension of the town close to the defences, which renders it imperatively necessary to require the Province to rebuild their establishments, if the militury reserve is to be allotted for Colonial improvements.

The Master General and Board at the same time beg to recal the attention of the Secretary of State to the conditions on which they consented to the Lieut: Governor's original proposition, to sell a part of the military reserve to the westward of York, as stated in their letter to Mr. Lefevre, dated 10th April, 1833, and I am to add, that the Master General and Board expressed their opinion in a minute dated the 7th August last, that no new works should be undertaken until Colonial funds (arising from the sale of the reserve at York) sufficient for their completion, are placed at their disposal, and they accordingly notified the same to the commanding Engineer in Canada, with direction not to undertake any new work at York, or incur any expense whatever without their authority; and the Master General and Board beg to ex-

press a hope that the Secretary of State will instruct the Lieut. Governor to pay into the military chest two-thirds of the money received from the sale of the reserve, to the account of the Ordnance Department, for the purpose of being applied (when a sum sufficient for the purpose is obtained) to the construction of a sew military establishment at the point which has been selected for the purpose. ed for that purpose.

I have, &c.

(Signed)

R. BYHAM.

R. W. HAY, Esquire,

&c. &c. &c.

(Copt)

DOWNING STREET,

17th January, 1835.

SIR.

I have had the honor to receive your letter, 31st oltimo, relative to the construction of a new Barracks at Toronof time, relative to the construction of a new Barracks at 1 oronito in Upper Canada, and of the proceeds of the sale of the military reserves lying to the westward of that town, and stating for the information of the Earl of Aberdeen, that, in the opinion of the Master General and Board of Ordnance, it is not the actual state of the Barracks, so much as the position in which they would be placed by the extension of the town, which renders the interpretable to the processory if the their reconstruction by the province imperatively necessary, if the military reserve is to be allotted for Colonial purposes.

Lord Aberdeen, fully aware that the original consent of the Master General and Board of Ordnance to the sale of the military reserve was conditional upon the reservation of a sufficient portion of them for erecting new Burracks with their necessary portion of them for erecting new business of their construction out of the proceeds of the sales, His Lordship has no disposition to recede from these stipulations—on the contrary, he is quite prepared, in compliance with the desire of the Master General and Board; and in order to avoid delay in commencing those works, to instruct Sir J. Colberne to pay into the hands of the Ordance Department two thirds of the proceeds of the sales of the military reserves, until they shall amount to the sum required for the construction of the Barracks and their defences. But, for the construction of the Barracks and their defences. But, with a view to correct, in some measure, the indefiniteness of such an instruction, and in order that Lord Aberdeen may be able to form some calculation of the sum that will remain available for other public works, after the completion of the Ordnance buildings, I am to request that you will move the Master General and Board to direct their offices in the Province forthwith to prepare and transmit an estimate of the whole sum that will be required. and transmit an estimate of the whole sum that will be required for the Barracks and defences, furnishing at the same time, a copy of it to Sir John Colborne.

I am, &c.

R. W. HAY.

L. BYHAM, Esquire,

Sec. Sec. Sec.

(Cory.)

No. 62.

DOWNING STREET

November 30th, 1835.

I have had the honor to receive your despatch of the 18th August, No. 43, on the subject of the sale of the Military Reserve, at Toronto, and suggesting that certain public works should be undertaken, and, more particularly, a pier into deep water, as a means of augmenting the price to be obtained for those Reserves.

The expense of this Value, if pier is erected, £65,900 The expense of this if not erected, .... 54,425 pier you calculate at no more than £600, while £11,472 the probable rise in the price of the Reserves is

stated at £11,476. As a preliminary step, I have thought it necessary to refer your despatch to the consideration of the Master General and Board of Ordnance, for such observations as they might desire to offer upon it. But you will perceive from the en-closed copy of their answer, that they have not had it in their

power to afford any information for my guidante; and as your despatch does not contain any calculations upon which a judgment could be founded, I am under the necessity of again referring the subject of it to yourself. I have to request that you will subject of a contain to the Commanding Officer of Engineers, in These Country and they are united to the commanding officer of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the in Upper Canada, and that you will require from him a report, not only as to the expense of constructing the proposed pier, but as to the effect of such a measure upon the price of the Reserve.

The very important discrepancies which have heretofore existed in the calculations connected with the sale of these Reserves, and the erection of Barricks, sufficiently prove the necessity of proceeding only upon the most accurate information.

With reference to the last paragraph of Mr. Byham's letter, I have to desire that whenever you may hereafter have occasion to refer, for the consideration of His Majesty's Government, any question involving estimates upon which the Master General and Board of Ordnance, may be required to report or to act, you will submit those estimates to the Commanding Officer of Engineers, in the Province, previously to transmitting them to this country.

I have, &c.,

(Signed)

GLENELG.

OFFICE OF ORDNAHCE.

·October 9th, 1835.

SIR:

The Master General and Board of Ordnance having The Master General and Board of Ordnance having had under their consideration your letter, dated the 25th ultimo, with the accompanying copy of a despatch from Sir J. Colborne, relative to the sale of the Military Reserve, lying to the Westward of the city of Toronto, in Upper Canada, and the erection of certain public works at that station; on which points, the above Officer expresses an opinion, that, in order to realize a higher price for these Reserves, it is very desirable other public works, besides the new Barracks, should be commenced upon them, particularly, a pier into deep water, the probable result of which, is stated to be an increase in the value of the land, from £225 to £300 per acre—the expresse of this undertaking being £225 to £300 per acre—the expense of this undertaking being calculated at no more than £600, and the augmented price of the land at £65,000; in communicating which particulars, you observe, it is evident, that, assuming the correctness of the estimates referred to in my letter of the 18th February last, it would be quite possible to build the pier without trenching upon the funds required for the erection of the Barracks, adding, that it appears to Lord Glenelg, that if Sir John Colborne's opinion is correct, this measure will be indispensable, in order to obtain such a price for these lands as may justify the construction of Barracks, upon the Lordship's request to be informed, before taking any further step in the matter, whether the Master General and Board have yet received the more precise estimates of the expense of the Barracks which had been required from their Officers in Upper Canada, and whether the information in this department enables the Master General and Board have yet Master General and Board to offer any suggestions for his Lordship's consideration in regard to the propriety of acting upon those of Sir J. Colborne.

I um directed to acquaint you for the information of Lord Glenelg, that the Master General and Board have not yet received the revised estimates for the re-construction of the Military buildings, near Toronto, neither are they enabled to furnish his Lordship with any information as to the probable effect that the construction of a new pier might have upon the sale of the adjacent lots.

The Muster General and Board have received no communication from the Commanding Royal Engineer in Canada, upon the tion from the Commanding Royal Engineer in Canada, upon the subject, and they beg to suggest to Lord Glenelg for such instructions as his Lordship may be pleased to give, that upon all subjects involving estimates upon which the Ordnance may have to act, and which the Lieutenant Governor of Upper Canada deems it necessary to submit to his Lordship, the plans and estimates should undergo examination by the Communiting Engineer is should undergo examination by the Communiting Engineer is canada, before leaving that country, as he will then be enabled to acquaint this department of what is contemplated, and afford such local information as may enable the Master General and, Board to meet the views of the Secretary of State, without the delay of a reference to Canada.

I have, &c.,

(Signed)

G. BUTLER,

FOR THE SECRETARY:

Jas. Stephens, &c.,

  - " JOHN McGILL
- " and Reverend Doctor JOHN STRACHAN.

His Excellency was pleased to call the attention of the Council to the Rerserve in the neighbourhood of York; the site of the old French Fort, part of which, it appears, although not alloted for location, was granted in the former absence of His Excellency, notwithstanding its obvious importance to the defences of this post, and to the accommodation of the present Garrison, and by the advice and consent of the Council, it is ordered—that the remainder of that Reserve be dedicated to Military purposes, under the controll of the Honorable Board of Ordnance, and that a copy of this order be transmitted to the Commander of the Forces in North America, accompanied by a report and plan from the Surveyor General, comprehending, as well the Military Reserve, East of the Garrison, as the land recommended to be reserved.

A true copy.

JOHN BEIKIE,

Clerk, Executive Council.

(COPY.)

To His Excellency Sir John Colhorne, K. C. B. Lieutenant Gowernor of Upper Canada, and Major General Commanding His Majesty's Forces therein, &c. &c. &c.

The Petition of the Honorable and Right Reverend Alexander M Donell, Bishop of Regiopolis, The Honorable Alexander M Donell, of the city of Toronto, Esquire, The Honorable John Elmstey, of the same place, Esquire, and John King,

of the same place. Doctor of Medicine—Trustees of the Catholic Church Ground in the city of Toronto,

HUMBLY SHEWETH,

That swing to the great increase of the Catholic Congregation of this city, the present Church is by no means large enough to accommodate those who resort to it.

That in seeking for an eligible site for another Church, it seems to your Petitioners most advisable to select a spot in the western portion of the city for convenience of those residing there, and also for the use of the military, large numbers of whom, in almost every regiment in His Majesty's service, are Catholics.

That your Petitioners, aware of the inability of the Catholics to purchase a suitable lot whereon to creet a Church, are induced to pray that Your Excellency will be pleased to grant them (under the same trusts as those by which they hold the ground already granted) a lot in the Garrison Reserve, in consideration that the military at this post shall at all times hereafter be permitted to have free access to any Church or Chapel erected thereon.

That your Petitioners upon examination of the place of the said reserve, are of opinion that the lot designated as that part of the city, reserved for public purposes, between Adelaide Street and Bathurst Street, and containing about one acre and a half, would be the most suitable for the purpose.

Your Petitioners do not desire to use my portion of the ground in question as a place of interment, and will readily consent to be expressly prohibited in the Patent, from so doing.

And your Petitioners, as in duty bound, will ever pray.

(Signed)

ALEXANDER M'DONELL,

Ep. of Regiopolis.

ALEXANDER M'DONELL. J. ELMSLEY. JOHN KING.

> GOVERNMENT-HOUSE, 28th May, 1835.

Referred to the Honorable the Executive Council.

By command,

(Signed)

WILLIAM ROWAN.

In Council, 11th February, 1836.

Should it meet with the views of Your Excellency, there is reason to believe that the erection of a Catholic Church on the Reserve will increase the price to be obtained for the remaining lots to be sold to an extent equal to, if not greater, than the amount to be abstracted by granting the land prayed for. It should, however, be conditioned that the Church be immediately creeted, and the site should not be near that of the English Church.

PETER ROBINSON.

Clerk Executive Council.

THEREAS it is expedient the more effectually to promote the cause of Education and for the better encouragement of learning, to make provision for the establishment and support of minor classical institutions throughout this Province. Be it, &c. That from and after the first day of January, 1837, the several laws now in force in this Province relating to the district schools within the

same are hereby repealed.

2. And be it, &c .- That when the inhabiants of any town, township, village or place, shall meet together and enter into subscriptions by stock, and build or otherwise obtain a school house to be called a Provincial Seminary, the same shall be endowed with £____, ananally, to be paid out of the treasury of this province or from money that may be derived from school lands or any other source that may be devised by the Legislature of this province. Provided always nevertheless, that each Provincial Seminary so to be built, shall be in a town, township, village or place, where there shall be resident at least one hundred children between the ages of four and sixteen years. and within the distance of one mile and a half from the said Seminary, and shall not be within the distance of ten miles from any such Seminary previously built; And provided also, the inhabitants of such town, township, village or place, and the trustees of each such Seminary, shall comply with the several clauses and provisions of this Act: Provided always, that no district shall be entitled to more than three such Seminaries.

3. And be it, &c. - That before the inhabitants of any town, township, village or place, shall be entitled to the benefits and privileges of this act, they shall erect and build a good and substantial Seminary, not less than two stories in height, and fifty feet long by thirty feet in breadth, finished with a cupola and spire, and furnished with

a suitable bell.

4. And be tt, &c. - That as soon as such Seminary shall be erected and finished, it shall and may be lawful for the subscribers or stockholders to meet together in the said Seminary; and at such meeting shall be chosen by ballot, from amongst the subscribers or stockholders by a majority of them then and there present, voting by shares as hereinafter provided, five trustees, three of whom shall be a quorum for transacting all business relating to the said Seminary; and that after the first meeting and election of trustees, each succeeding meeting of the subscribers or stockholders for the election of trustees, shall be held at the said Seminaries on the first Monday in May of each and every year, and no person shall be elected to be a trustee of the said Seminary, unless he shall have resided in the district where such Seminary shall be crected, for the space of three years next before such election.

5. And be it, &c .- That the said trustees shall appoint a treasurer, who shall enter into bonds with two sureties, made to the said trustees and their successors in office for the due fulfilment of his office, and shall also appoint a secretary and other necessary officers, make such bye-laws, and transact such other matters as to the said trustees shall appertain to do; and it shall be the duty of the trustees. for the time being, to give public notice, at least two weeks previous to the annual meeting of the stockholders on the first Monday in May in each year; and also the said treasurer, secretary, or other officers

brie

shall be liable to be removed by the said trustees or a majority of them. for any neglect or misconduct in their offices, and others may be ap-

pointed in their places by the said trustees.

्रेयका**ल्या ४ स्ट्रिस्**र्याचा And be it, &c.—That the said trustees of each of such Seminaries as shall be built under the provisions of this act; and their successors to be chosen as aforesaid, shall be and they are hereby declared to be a body corporate and politic in deed and in law, by the names of the trustees of such Provincial Seminary, of the name of the town, township, village or place, where the same shall be erected; and shall have perpetual succession and a common seal, with power to change, alter, break or make new the same; and they and their successors, by such name, may sue and be sued, defend and be defended, in all courts whatsoever, in all manner of actions, suits, complaints, matters and causes whatsoever; and also, that they and their successors by such name shall be in law capable of purchasing, having and holding, to them and their successors for the use and benefit of each of the said Seminaries, five acres of land, with the tenements, and hereditaments thereunto appertaining; and also all goods and chattels for the purposes of said stockholders, and for no other purpose whatsoever; and the said trustees and their successors, or the majority of them, shall have full power to pay and dispose of the revenues, and manage the said estate and affairs of the stockholders in each of the said Seminaries, in such manner as they may judge will best promote the object of the institution.

7. And be it. &c.—That a share in the stock of each of the said Seminaries shall be and that each stockholder shall be entitled to a number of votes proportioned to the number of shares which he, she or they shall hold in his, her or their names, at least three months prior to the time of voting, according to the following ratios, that is to say—one vote for each share not exceeding three; four votes for six shares; five votes for eight shares; six votes for ten shares; and one vote for every five shares over ten; and also that the shares of stock in the said Seminary shall be transferable, and may be from time to time transferred by the respective persons so subscribing and afterwards holding the same: Provided, that such transfer or transfers be entered in a book or books kept for that purpose by the secretary; to which books and all other records of the proceedings of the trustees, every stockholder shall at all times have free access.

8. And be it, &c.—That it shall be the duty of the trustees at every meeting appointed for the election of trustees, and previous to proceeding to the election, to give an exact and particular statement of the affairs of the said seminaries to the stockholders then

present.

9. And be it &c .- That it shall and to any be lawful at any time when the trustees shall wish to call an extra meeting of the stockholders, to give notice as above stated, to take into consideration . any further measures connected with the school or interests of the rode ber deste best notes de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de la calificia de l said seminaries.

10. And be it &c.—That in case may vacancy or vacancies shall at any time happen or occrue to the trustees, treasurer, secretary or other officers, by death, resignation or removal from she district, the same shall be filled for the remainder of the period of service, by such person or persons as the majority of the trustees may appoint

## Bill for estab. of Prov. Seminary.

11. And be it &c.—That it shall not be lawful for any or either of the said corporations, to hold stock, poroperty or effects for the purposes aforesaid to a larger amount than pounds.

12. And be it &c.—That so soon as any seminary shall be erected and finished in any town, towship, village or place, where there shall be resident such number of children as aforesaid, and trustees elected for the same, the said trustees shall immediately report the same; designating the place where such seminary shall have been built, and that the same has been completed according to this act, and their intention of applying for the annual endowment, and otherwise

complying with the provisions of this act.

(70)

13. And be it, &c.—That the said trustees of every such Provincial Seminary, shall make an annual report to the Governor, Lieutenant Governor, or Person administering the Government for the time being, stating the number of children taught, their progress in the different branches; and that the teachers continue to sustain a good moral character; together with all other such information touching the prosperity of the said Provincial Seminaries, as shall be deemed necessary—and if the said trustees or any of them, of any such Seminary shall wilfully make a false report or statement for the purpose of obtaining the endowment, they shall not only be liable to repay the money if they had received it, but shall also, each one who may be found guilty of making such report or statement for the purpose aforesaid, or of signing the same with such intent, be fined the sum , with costs to be recovered upon the oath of one or more credible witnessess, before any two of His Majesty's Justices of the Peace—the same to be levied of the goods and chattels of the offender, and the money so recovered shall be paid by the said Justices into the hands of the Receiver General to be applied as other monies for the use of this Province.

14. And be it, &c.—That each Seminary so to be erected as aforesaid, shall be furnished with three or more teachers—a principal and two assistants, one of whom shall be a female, to be appointed as hereinafter mentioned—that the Principal shall be well qualified to teach the classics, mathematics, and the English branches of Education, so as to prepare pupils for any class in college. The female assistant shall be well qualified to instruct in all the essential branches of female education, comprising spelling, reading, writing, arithmetic, English grammar, geography, projecting maps, history, and the rudiments of rhetoric, and of natural and moral philosophy. The male assistant shall be qualified to teach spelling, reading, writing, arithmetic, English grammar and geography, and shall take charge of the smaller children of both sexes in the said seminary; and also that each teacher shall have a separate room for his or her class, and the principal shall have the charge and superintendance of

the whole.

15. And be it, &c.—That if at any time there should be more pupils in attendance at any one of said Seminaries than can be well taught or accommodated, it shall be the duty of the trustees to decide who shall be taught; but in all cases to give the preference to the children of the stockholders of said Seminary.

16. And be it, &c.—That no person either male or female, shall be deemed qualified to hold the situation of assistant teacher in the

said Seminaries, nor shall the trustees appoint any, unless he or she shall produce satisfactory testimonials of his or her good moral character, and shall pass an examination by the principal of some of the said Seminaries, who shall grant a certificate of such examination, and that the certificate shall continue as a license to him or her, no longer than he or she shall sustain a good moral character, and which certificate shall be a sufficient license to the person obtaining the same, to apply for and receive of the trustees of any Seminary such situation as assistant.

17. And be it, &c.—That the monies hereby granted for the support of schools in such seminaries us shall be built according to the provisions of this act, shall be paid by the Receiver General for the time being, into the hands of the treasurer of each Seminary so built and conducted as hereinbefore enacted, in discharge of such warrant or warrants as shall or may from time to time be issued, by the Governor, Lieutenant Governor, or person administering the Government of this Province for the time being, and shall be accounted for to His Majesty, His Heirs and Successors, through the Lords Commissioners of His Majesty's Treasury for the time being, in such manner and form as His Majesty, His Heirs and Successors shall be graciously pleased to direct.

## REPORT

OF

## COMMISSIONERS

ON THE SUBJECT OF

PRISONS, PENITENTIARIES,

S.c. фc. ₫·c.

To the Honorable the Commissioners appointed by order of the House of Assembly to obtain certain information, &c. Doctors Morrison and Bruce.

#### GENTLEMEN:

I hope I shall not be thought trespassing upon your time or upon the indulgence of the honorable the House of Pittsburgh which is upon the Auburn plan. Assembly, unadvisedly, when I again beg you to allow me to present some remarks upon State prisons, penitentiaries, almshouses, houses of refuge, retreats and prisons, the efficiency of which so much depends upon a correct knowledge of the the absence of all communication among past, both in Europe and America, than the convicts. The Philadelphia system some instruction may be derived from previous experience and example for the cell of the convict. benefit of the future. I, therefore, visited that were to be met with in the Eastern, the same system has been :--according to States; examined the situations, and comreformation; of moral and intellectual imconcerns; how convicts were confined with his labour. the most certainty and safety, and how secret of the reformation of convicts, than in any other respects I shall give you a brief statistical account of the penitentiamy opinions. I have given in the Appen-sufferings, and spread and profit by their

dix extracts from the reports of many of the most useful penitentiaries in the United States; and the report of the superintendent of the penitentiary in this province, at Kingston, to shew how much the cause of humanity has been aided by the recent improvements in criminal jurisprudence. and penitentiary systems throughout the civilized world.

There are several systems prevalent in the penitentiary institutions in the United States;—that of Auburn, in the State of New York-of Philadelphia, in the State of Pennsylvania; and the old penitentiary systems still prevailing in many of the Western States. The whole of the penitentiary prisons in the State of New York; and throughout the New England States; are upon the Auburn system. Those of Pennsylvania and New Jersey are upon the Philadelphia system, excepting the one at The essence of the penitentiary system is silence by day and solitary confinement by The Auburn system combines seclusion, with work in company, under the presence of coercion enjoining silence and combines entire seclusion with work in the

CHARLES DUNCOMBE.

Acting Commissioner for obtaining certain suformation, 

### PENITENTIARY AT BELLEVUE.

QUESTIONS, and the Answers of ARTHUR BURTIS, Esq. Superintendent of the Penitentiary at Bellevue, State of New York, relative to the discipline, &c., of that extensive establishment.

Ques. 1. What number of boys are sent to the penitentiary in the course of a year, and of what ages; and what is the average number at one time in the prison?-Ans. The average number of boys sent to the penitentiary for the last three years has been seventy-five per year—from twelve to sixteen years old. The average at one time in the house is about thirty-five.

Ques. 2. For what offences, generally, are they imprisoned !- Ans. Most generally for petit larceny and vagrancy.

Ques. 3. What proportion of them are sent there for the second or third time ?--Ans. About one-half are in for the second or third time; but it is impossible to be exact, as the same boys come in by so many different names.

Ques. 4. How far are the boys instructed ?-Ans. They are taught the catechism, and to read and write.

Ques. 5. How far are they put to labor in the penitentiary?-Ans. We have not put them to labor except a part in the Pin Factory.

Ques. 6. What effect has the present tueatment upon them in reference to their reformation and future usefulness?-Ans. The effect of their present condition is deplorable. Instead of reformation they must become worse, as we are compelled a keeper. to put a boy for his first; perhaps small crime with the old offender, if not in years, in crime, in the same room.

destitute of parents or other persons to the sea, into which empties a small stream take charge of them?—Ans. About two-called St. George's river. 'The village of thirds have one or more parents, but in Thomastown is to the east of it, and conalmost every case their parents have taken tains about 1.500 inhabitants, chiefly envery little or no care of them.

guardians; when small they are allowed to run at large without restraint. child will be a vagrant, if put and kept steadily to a well regulated school, but for a few years. But the reason why their parents will not send them, is, the encouragement which is given, (and no doubt from the best motives) to begging.— When a poor child calls at a gentleman's house for a little cold victuals, who can refuse when they have it, and especially, since, if not given, it must be thrown away? But if people were aware of the evil I am sure they would make a universal stop-I cannot learn of one child that has been in the habit of begging, who has not turned out a prostitute or vagrant; and their begging serves only to keep their parents in idleness and profligacy; for they find it so profitable, that if they have one or two good begging children, (as they term it,) it is all they want; all they can get by other means goes for drink. Another cause, is, sending small children round the docks, under the pretence of picking chips, and whatever they can find; in peddling small articles on board of sloops, and through the streets,&c., these habits introduce them into bad company and prove an almost certain cause of their ruin. It is hoped that they may be discountenanced by all good citizens.

Ques. 9. What proportion of them can read and write at the time of their committal?-Ans. About one in eight.

Ques. 10. How far are the boys separate from old offenders by day and by night?-Ans. They are kept entirely separate, except a few who are in the Pin Factory, and they are under the care of

This prison is situated at Thomastown Ques. 7. What proportion of them are in the State of Maine, a port on a bay of ry little or no care of them.

prison are deep quarries of limestone or | The enquiries made of the inhabitants gen coarse white blue veined marble. On the granite, which is brought as before stated from near Augusta by water, and when worked into building stone, sent chiefly to New York by sea. Blacksmith's shops are dependent on the quarries for the making and repairing of the tools, and the other workshops are wheelrights and shoe-mak-The prisoners are generally young stout and healthy, dressed in hat, shirt, and trousers, one half of which is blue, the other white canvas. view, and begin and leave off by signal. The whole lot which may be about four or five acres in superfices, is surrounded, excepting where the prison stands, towards the road, by a wooden enclosure, about 20 feet in height, with a footway all round on the outside at a height so that the guards may look over it. These guards are seven in number, and have lodgings in commanding positions; they are armed with rifles, and have spare arms in these lodges they are authorized to fire in certain cases and have fired on parties who were attempting to force their way out. Flogging with the horsewhip is resorted to when necessary to produce obedience. Punishments are, solitary confinement and short allowances. Seven escapes have taken place in ten years, out of about 500 prisoners, besides two or three that were retaken.

The cells for the prisoners are built of large masses of hewn stone; all is stone, outside and inside; and they descend into these cells by holes like those of the hold of a ship, secured with iron trap door gratings and pad-locks. They have paillasses on a coarse bedstead to lie upon and buckets for necessary uses, and nothing else. The inside and outside are whitewashed. They generally eat in a wooden building near the kitchen, which also serves for chapel and sunday school. The officers guards and servants, not prisoners, are fourteen. Some prisoners are employed as spies over the rest; and for cooking &c. Beyond the enclosure, to the west there is a piece of ground belonging to the institution, perhaps 2 or 3 arpents or french acres, cultivated in potatoes and garden stuffs. The prisoners appear to

erally respecting the disposition to employ bank of the, river are the stone-cutters of persons known to have been in the state prisons, have been answered that no one would employ them if known, no one will take them into their families.

The Chariston Penitentiary is situated north-west of Boston on the opposite side of Charle's River, and to the west of Charleston and Bunkers Hill. It is on a lot of about 10 acres fronting on the river, or rather arm of the sea, which nearly surrounds the town of Boston. It has a wharf They work under for the purpose of receiving and sending articles by the navigation. The whole prison and lot is inclosed with a wooden picket sence from 15 to 20 feet in height, with a wooden road or gallery round the outside for the guards to walk round, and see on both sides, the fence with sentry boxes in convenient positions. jail or penitentiary stands in front, the yard and workshops back, and the new penitentiary to the cast. This is the only building suited for the penitentiary system. The old building serves for offices, hospitals The new building contains 300 cells seven feet 6 inches long, by three feet 6 inces wide, two deep, with doors on opposite sides, and rising four stories, to which access is had outside, by stone stairs at the end, and stone gallaries supported by iron columns. The roof and floors of the cellar are coarse cut or split grante, and in pieces of two or three feet wide, and six to twelve long. The whole is: whitewashed inside and out, and also the floors whenever they become soiled. There is throughout a clean wholesome smell, and each cell has a flew for air, beside the door, which is of iron bars only. The cell contains a seat, a shelf for books &c., and canvas frame of bed blanket &c., the frame is raised up against the wall in the day time, with the bedding. The prisoners have buckets which they bring out in the morning and take in at night. They all eat in their cells and bring with them their tin dishes when they come out to return to work, placing according to the order of their cells and taking them up in the same order, when they return. Every thing is done by signal, ringing of a bell &c., and the whole is conducted on the plan of milwork with spirit, and are not very ill look- itary discipline, on pain of personal chasting, wer apparently much discontented. tisement, but by the warden or deputy

bearing.

The Warden thinks the cells sufficiently large, but that they ought to be raised a and managed in the same way. It is if little above the level of the floor, they form red sand stone, three stories. The who c a house built within a house. The space upon the cheapest plans to suit the reveto the outer walls about 9 feet, he says is nee of the State, which is small. The too small, it ought to be 12 feet at least, cells are rather larger than in Charlestown and the lights in the outer wall, which are and the distance to the outer wall greater; very small, double the size. The prison the onter windows larger. The doors of is upon the Auhurn system. The prison-the cells are of wood guarded with iron; ers are better off and healthier, although the stairs and gallaries are of wood; the wrought hard & there is reason to believe whole slight work but well secured. The that several do reform, and lead an honest furniture of the cells nearly the same as life in places where they are not known, at Charlestown. STATE PRISONS OF NEW-YORK.

The principal of which, are at Black-The wells Island, in the city of New York, shops and convicts are frequently hired to at Sing Sing and at Auburn, the house trades people, who carry on these branches of refuge in the City of New York, at Bloomingdale is one of the most humane institutions in the United States. The Bellevue hospital, is the recepient of the female convicts of this city.

The Penitentiary on Blackwells Island, in the east river, a mile to the west of hellgate, is under the corporation. The building is of stone, quarried on the Island, and the work principally done by convicts, it is an extensive square in the centre rising four stories & a look-out on the top. In the east; a situation uniting the advantages centre are the lodging for officers, hospital of healthiness and room, with a command- and servants; each wing is to have cells ing view of the whole of the rich, beauti- on the Auburn plan, but only one wing is ful and extended valley of the Connecticut finished; and the whole can hardily yet from the northern range of the mountains be said to be in operation. It is a source

no distinctive dress, others were working The females are at at the building. Bellevue hospital, on the opposite shore of New York island, but it is no regular Penitentiary Prison. The inmates are mostly employed in picking Oakum, washing, making and mending clothes for the establishment, and in nursing the sick.

### STATE OF PENNSYLVANIA.

The Penitentiaries of this state are at Pittsburgh and Philadelphia, the former upon the Auburn plan, and the latter is situated at Cherry Hill, north west of Philadelphia, near the Schuylkill. It is an extensive building in the form of an Octagon, the cells diverging from a common centre like the spokes of a wheel from the nave. The keepers lodgings and offices occupy the whole front, extending 650 feet with two castellated turrets in the centre, and at each end, in the style of ancient Gothic buildings in Europe. In the rear of the centre is a high watch-tower to overlook the whole premises, all of rough hewn reddish sand-stone.

The system followed here is solitary confinement, with work in the cells at different Money-making is not considered as a very important object. The cost of confinement and of the institution cannot be well ascertained till the work is finished, two radii only being yet completed. building will cost about half a million of dollars, and opinions are hazarded that the current expenses will not be met by the The Legislature has however, apsales. proved the plan and system, and hitherto cheerfully provided for the expenses.

The effect of the system on the health of the convicts will be best learned from the returns of the hospital, and deaths as per reports, which may be compared with similar returns from prisons conducted on a different system, namely, the Auburn system which prevails throughout New York

and New England.

The main object of the Philadelphia system, beside protecting the public from the depredations of persons who it is to be presumed have become habitually lost to moral restraint, and unsafe to be trusted abroad, is to bring the convict back to a state of mind to govern himself by moral rules, and live in society without committing offences, which are incompatible with well calculated to subdue the malevolent

victs were employed in quarrying and had its peace and welfare, and forbidden by law.—If success can at all be obtained in the objects which the authors of this system had in view, the institution appears to be well calculated for the purpose.

The convict is separated from that society whose laws he has contemned: he is cleaned and his dress changed on his arrival, blinded with a hood and led to a cell he cannot tell where; he remains shut up in that cell (with the use of a small high walled separate yard adjoining it, for one hour each day) is known only by his number even to his immediate keeper and sees no other person, excepting the superintendant—a religious teacher and a Physician occasionally, he is furnished with books and work, and if he does not work he does not eat, excepting what is just necessary to preserve life: he is in every way treated with humanity, spoken with as a being susceptible of reason, and to be guided by reason; he is not under the presence of mere force or arbitrary infliction; he is restrained only in obedience to the law after a fair trial, and under the sentence of the law which he has violated. Nothing vindicative appears, but rather regret at the necessity of that restraint to which he has subjected himself, and in which regret (with time for reflection out of the reach of exciting causes and temptation) he can hardly fail to participate, and form resolutions, at last against so great a falling off in future.

The plan of the Cherry Hill Penitentiary admits of only one radius, or an eighth part of the cells being erected to render it applicable to a Penitentiary Prison, even a part of a radius might be built to commence the system. The distance between the outer walls and the cells is admitted to be too narrow.

One of the radii is now building without yards to the cells for the use of the prisoners and the upper story of the older radii have no yards; but two apartments are allowed one to work in, and the other The residence of the keepfor sleeping. er and officers, is considered as too far distant from the radii of cells, and has been remedied in the plan of the New Jersey State prison, by the same Architect, viz: Mr. Haviland.

The Philadelphia system is admirably

passions, and were it practicable for the the village of Sing Sing. The farm was with the good and virtuous, there is reason to believe that this system of confinement would be preferable to that of Au- parts of the farm at work in the quarries, burn, at least, so far as reformation was concerned, but that is not the lot of the tioned on eminences, so as to view every convicts, they must be immediately exposed to temptation and are too often the victims of those who have had years of experience in wickedtess during their confinement.

The new penitentiary now building at Trenton in the State of New Jersey, is of the building work was, and is done by red cut sand-stone, brought by the canal convicts, the management appears to be about 9 or 10 miles. The style of Architecture, Egyptian. the building about 90 feet with two wings of 175 paces. The depth of the radii is The cells are about 9 feet 120 paces. wide, 18 deep. 15 in height, with light at the top in one end, the opening slanting downwards, well provided with ventilators. The plan is for five radii of cells; two of &c. which containing 88 cells, are to be finished immediately. No yards are provided.

The lot is situated south of the town, about a mile, and consists of 20 acres, same order for supper; their conductors more or less; the main road down the Delaware being the western boundary, and the Raritan and Delaware canal the east-The building will accommodate 150 convicts, and before the whole is completed, cost, it is supposed, about \$148,000. Thirty thousand has been appropriated by act passed 13th February, 1833. (vide laws of New Jersey, 1833). This act has adopted the Pennsylvanian system, although objected to in the Senate on the ground of its being more expensive than the Auburn system. These objections were yielded up however, on proof of prisoners whose term had expired and who had reformed, and were doing well where they were not known, being ruined and compelled to return to crime from their being known to other released convicts with whom they had wrought in common in the same penitentiary.

The prison at Sing Sing, in the State of New York, is erected on a farm of 133 acres, purchased by the State—the whole substratum, being a course marble or lime stone, of a whitish blue. This farm is on the bank of the Hudson 31 miles above New York, and about half a mile above!

closure for the farm but a common board or rail fence, and the convicts are in different but guards with loaded muskets are stapart where the convicts work, few or no oscapes take place. The whole system of the prison government is based on great watchfulness and coercion, and conducted like an extensive manufactory. It is actually profitable, although not yet finished. excellent, and the Keeper one of those The main front of men whose personal character is the best security for the success of the system .-The prisoners are remarkably healthy. stout, and turn out a great deal of work. Many of the shops are let to contractors.

I inspected the State prison at Auburn: went over the work shops, cells, kitheons, The prisoners consist of 13 companies and move in military order, lock up step taking up the articles served out for them in succession, and proceed in the marching as officers, & placing themselves in their given positions, the convicts here are dressed in striped jackets, and trowsers and caps. At Sing Sing they have no distinguishing or uniform dress. These prisoners are chiefly from the Western part of the State, they are not generally so stout as the men at Sing Sing, and have fewer blacks among them. They have less of a determined downcast look than those at Sing Sing, and appear to be governed with greater tenderness. gent has strong hopes that many of them are reformed—and states that there is little repugnance among the people to employ convicts whose term is expired. This is confirmed by other information. is a Chaplain of the Presbyterian church attached to the establishment. The whole of the establishment is clean and well conducted; the work shops are managed like extensive manufactories upon the best plan, the work good, substantial, of neat pattern, and well finished. Most branches are in the hands of such contractors as offer the most advantageous terms for the labor of the convicts.

The building stands at the north west

of the town, on the margin of a small creek, the common gaols before conviction, in and empties into Lake Ontario from which coming, it would nearly render penitentia-Auburn is only about 30 miles distant, west ry prisons unnecessary. of Oswego. The prison & walls are built of lime-stone, picked; with cut red sandstone round the doors and windows The building fronts to the east, with two wings to the north and south containing the cells. To the west and partly on the north and south there is a high stone wall, against which are the work shops in sheds. ground between the wings, the centre and the western wall forms a clear square for drawing up and marching the convicts in and out.

On visiting the House of Refuge at Bloomingdale, about a mile and a half north of the City Hall, I found it to consist of two departments, one for males under 16 the other for females, it was commenced by a private association, countenanced by the city authorities, and finally sanctioned by the legislature. The whole is under the management of Mr. Nathaniel C. Hart, who was assistant to a Lancasterian school in New York, and is allowed a large salary as a compensation for the place he gave up. The order and spirit of the Lancasterian system is maintained in the Institution, exciting self respect in the inmates, and stimulating rather by rewards and distinctions, than controlling by fear of punishment. Order, cleanliness, contentment, confidence, and even attachment seem to reign throughout. No youth is received excepting after conviction for some offence among which vagrancy is in-The establishment, although a prison, looks more like good school and manufactory, than a place of involuntary detention. Every thing tends to show, that its beneficial results as stated in the reports, are not ex-The reform of the convict aggerated. both for the present and future, real or probable. Society is relieved from the almost certain depredations and crimes which would have followed the course in which these youths had commenced, and also from the expenses and disgrace of that something may be done towards imfuture convictions and imprisonments: proving their moral condition; certainly Whatever conclusions may be come to, in in arresting the contagious influence of respect to the other penitentiary prisons, vice and depravity, and in securing a more this house of refuge is a positive good, and willing obedience to the laws, such we if followed up with separate detention in are informed are the salutary results of a

#### EXTRACTS.

From the report of the committee of directors appointed to prepare plans for the new buildings to be erected in the yard of Maryland penitentiary.—(These gentle-men had been restricted to the construction of plans on the principals of the Auburn system, and visited the prisons at Washington, Philadelphia, Sing Sing, Blackwell's Island, Auburn, Weathersfield, and Boston, in accordance with this object.)

It is not our province to enter upon the consideration of the question what method is more likely to promote the great objects of the penitentiary system; nor, restricted as the directors are by Legislative enactment to the principals of a single system. would we feel at liberty to occupy their time in discussing the relative merits of the (The Pensylvania and the Auburn systems) each has its advocates, and however powerful the arguments that may be adduced in favor of a plan, that secures beyond the possibility of infringement the most perfect separation, yet the expense of erecting another prison, upon such a plan, would be greater perhaps than the public would sanction; until the less expensive system, to which our present buildings can be best adapted, has been fairly tried.

With reference to instruction in religious morals as a part of the Auburn system. That a chapel is a necessary appendage to a penitentiary, is an assertion which we think can be made equally without argument and without contradiction, if in an institution of penitence, moral instruction and devotional exercises be unnecessary. If the most guilty of the community need not the offices of religion, who else can require them? Without being among those who are sanguine in the belief of radical regeneration of criminals, we doubt not

disputation, and treating only of religious sons as may have business with him, and morals; instruction equally applicable to three smaller entrances opening at the all christian sects, promoting a general sides and behind, into each story of the good, and avoiding the evils, of conflicting lodge. Corridors to lead off from these prejudices, and partialities. Thus conducted and in no way interrupting the deciplinary regulations of the prison, religious instruction is now considered by the advocates of the Auburn system, an essential & constituent principle of that system,

The Auburn system secures a four fold object viz: subserving the purpose of punishment for crime, it prevents mutual contaminarion, promotes habits of industry and order and affords the probability, in many cases the certainty, of moral im-

provement.

An important, and in the opinion of the Auburn disciplinarians, an essential detail of that system, is the existance of an apparent omne presence an invincible all-seeing eye, whose gaze cannot be shunned, whose detection cannot be avoided.

In regard to the plan of building which affords the readiest means of facilitating the operation of this material feature, thus fulfilment of the prescribed system, your purposes; and which will admit, at any preserving the harmony of architectual arknowledge extends, it is the one now uniknown prisons at present in progress of erection are being built accordingly, both in this country and in Europe.

octagonal tower, which will answer the double purpose of an inspection lodge and keeper's office; this lodge to be two stories in height, to be open from the ground floor to the roof, and to have a gallery running round the second storie to commu-A door in the front of the lodge or office the wall guard commanding an uninter-

system of instruction free from doctrinal for the use of the keeper, and such perlatter entrances, and at a specified distance from the lodge to become continuous with inspection avenues, which shall pass lengthwise through three radiating buildings, each two stories in height. spection avenues not to be carried so high as the cealing of the corresponding workshops, thus allowing of free ventilation; to be furnished with loopholes or apertures, through these appertures (which should be narrow and have the external margin cut away) the shops may be distinctly examined, while from their narrowness, and the dim light of the avenues, the inspector cannot be seen from the shops of observation; to have doors for admitting the keeper into the shops when necessary; to have lateral branches at the nearer extremity of each shop elevated above the level of the floor so as to afford an advantageous longitudinal view; to project slightly into the yard and their remote extremities, so as to alguaranteeing as nearly as practicable, the low of secret inspection as the prisoners are passing to and from their cells; and to committee after considerable investigation be closed at these latter extremities, except and reflection, give a decided preference for the admission of moderate light, which to the radiating; which embraces so much may be readily excluded when required. of the building as is necessary for present The entrances by means of which the avenues shall communicate with the central future period, of such additions as may be- office, to be closed by sash doors, or sashed come necessary for the accommodation of doors, [R.C.Long, Esq. Arch't.] By a coman increased number of prisoners, still parison of the proposed plan [which see] with the ground plots of the various prisons, rangements, and those features which give submitted for the examination of the board, it peculiar advantages. In recommending the advantages of the former will be apthe adoption of the radiating plan, your parent. In the erection of all buildings committee would state, that, so far as their intended for manufacturing or other purposes where a considerable number of versally approved of, and that all the persons are to be congregated, that location which secures in the greatest degree the advantages of light and ventilation, is the most desirable; and in prison estab-The proposed plan consists of a central lishments, enclosed by high walls, the central space or as near thereto as practicable is the one indicated. Besides the advantages of light and ventilation, which are thus more tully secured in central workshops, the prisoners being more remote from the wall, the likelihood of attempts nicate with the floor by a flight of steps, at scaling it are greatly diminished, and

rupted view of the contiguous enclosure, mainder are employed for the state; the can more readily notice and prevent uncalled for approach. By placing the keeper in a central position, with avenues radiating from his office, greater facilities are afforded of superintending the institution than can possibly be secured by any other arrangement. Situated equi-distant from the different workshops, and commanding at a glance the avenues leading from his office. he exercises a constant personal supervision over the movements over his avenue keeper or sentinel; is equally and readily accessible to those of his subordinates who may wish to consult him, and has at hand the most convenient possible method of inspecting either secretly or openly, the industry and policy of the establishment.

Not only is the entire economy of the workshops brought thus under his easy supervision but the yard and wall can also be overlooked from his office.

The original introduction of the inspection avenues was for the more particular purpose of supervising the inferior officers.

Besides the reasons we have given in favor of a radiating building, we might enumerate the greater facility with which such a building can be heated by the means now being advantageously resorted to in some of the Prisons, (steam or hot air flues) its superiority in point of architectural appearance, which every thing else being equal, as a public building it ought to have, and the readiness with which it will admit of future additions, without impairing either the harmony or architectural arrangement, or of established disciplinary regulations.

Extracts from the report of the direct-1835

The present number of convicts in the prison is 207: 118 males, and 19 femules; the males are employed as follows: 23 in the carpenters shop, 21 in the black smith's shop, 45 in the chair shop, 43 in the cane scating shop, 17 in the shoe shop, 22 in the brittannia ware shop, seven waiters & nursers, ten sick and invalids. The 19 females are employed partly in the kitchen, cooking, washing and mending, and those not so engaged, are employed in making

latter are generally engaged in making such articles as are sold on contract by the quantity so that the warden does not go into the market with his manufactured commodities. When contracts expire with individuals, the worden generally gives public notice that such a number of men that are accustomed to such labor are offered to let, and after a reasonable time, he closes with the best offer; this gives the public a fair opportunity for competition in their service. The income from the visitors and the labor from convicts the past year is \$17,384 95; the average number of convicts thro' the year, say 190 which makes an average income from each conconvict for the year of about \$91 50. The whole amount of the expenses, for the support and guard of the Prison, the past year, is \$12,116 12, making the average expense for each convict including all the expenses of the prison establishment \$63 77. These calculations show that the prison has carned over the expenses thro' the past year \$5,268 83, or a net average given on each convict of \$27 73. The inventory taken this day shews that there is on hand in provisions, stock, furniture, tools, clothing, bedding, hospital stores, &c.—(as the report of the Warden will explain) property to the amount of \$9,356 99, there is due the prison on

close affinity of ignorance with crime; but fearing to friends in behalf of the convicts. carry evidence in support of education as a corrective to the abuses of society, beyond convenient limits, it is reluctantly withheld.

Generally speaking, the Physicians' reports of all these Iustitutions, are very favorable to the health of the inmates. "It is believed that the amount of sick ness among the convicts has not been greater than that which has prevailed in the surrounding country."

### RULES, REGULATIONS AND BYE-LAWS

For the government and discipline of the Connecticut State Prison, at Wethersfield, adopted January 2nd, 1835.

Art. 1 .- The compensation to each and every officer, shall be fixed and settled by the directors.

convict, any article or thing whatever, nor shall they sustain the safety of the prison, and prevent the estake or receive for their own use, or that of their fam- cape of convicts.

The Chaplain's report of this State prison, is also lilies, any fee, grutuity or emolument, from any person a valuable document; tending greatly to establish the committed to their custody; nor from any of their

Art. 3 .- Spirituous Liquors shall in no case be furnished the convicts, except by order of the Physician, and every officer is hereby required wholly to abstain from their use during the period of his employment at this institution.

Art. 4.—The convicts shall have at all times the liberty of speaking to the Directors, or Director, when present at the prison. The Directors will not however, suffer a convict to hold any conversation with them in the hearing or presence of other convicts.

Art. 5.—No officer, except the Walden, or in his absence, the Deputy Warden, shall strike or punish corporeally any prisoner except in self defence; but should personal violence be offered, or the security of the person be in danger, each officer shall use all lawful means to defend himself, and the other officers and to secure the convicts so opposing or offering resistance.

Art. 6 .- The arms belonging to the institution shall be kept well loaded, in good order, and ready for use Art. 2 .- No officer shall buy from or sell to any and every officer is required to use his best efforts to

Art. 7.- The convicts in going to and from their cells, shall march with the lock step, in such order as shall be designated by the Warden. Convicts shall be required always to approach their officers in the most respectful manner, and all their communications with the officers must be as brief as the case will admit. They are not to converse with one another, nor shall they be allowed to communicate any intelligence to each other in writing, nor shall they under any pretence, (without leave from the Warden or Deputy Warden,) speak to any person who does not belong to the institution, nor shall they write a letter to, or receive one from any person, except by leave of the Warden. Their whole demeanor must be in accordance with the most perfect order, and in strict compliance with the rules of the prison. They shall be industrious, submissive, obedient, labor diligently and in silence.

Art. 8 .- Each convict shall have a straw mattrass, three blankets in winter, and two in summer, and two coarse cotton sheets. The usual dress of the convicts shall be a round-a-bout Jacket, vest and pantaloons, made of coarse sattinet, also a cap made from the same material, and shall be allowed stout woollen socks, and be supplied with coarse leather shoes, their shirts shall be made from stout cotton cloth, & washed and changed once in each week.

Art. 9.—The rations for each convict per day shall

be as follows:-

Viz .- One pound salt beef 4 days in the week. of a pound of pork one day in the week. pound of fresh meat, with the necessary vegetables made into soup, one day inthe week.

# of a pound of bread made of rye flour. for the breakfast and dinner each day.

Five bushels of potatoes to each hundred rations. 35 pounds corn meal, and six quarts of molasses for supper, to each hundred rations, made into mush.

One gill of vinegar per week, each, and a sufficient quantity of salt and pepper.

Art. 10.-The clothing and the property of the convicts on their arrival at the prison, shall be taken from them, and, (if worth preserving,) securely kept, and restored to them on their discharge.

Each convict when discharged, shall at the discretion of the Warden, be furnished with a cheap and suitable laborers dress, and a sum of money not exceeding

\$3, shall be given him to defray his expenses home.

Art. 11.—The deportment of the officers towards each other, in the presence of the convicts, shall be of the most gentlemanly and dignified character. shall be the duty of the subordinate officers to aid and assist the Warden in the discharge of those duties imposed upon him by the Laws, in the government and discipline of the prison, to enforce that duty with promptitude and firmness but with mildness and humanity; they shall not absent themselves from the prison on any pretence or cause, except by permission of the Warden, or in his absence, of the deputy Warden, and in case any one shall be absent through sickness, or hy obtaining leave, his place must be supplied with such substitute as the Warden may think proper to receive.

#### POWERS AND DUTIES OF THE WARDEN.

He is by law entrusted with the entire control and

management of all the concerns of the prison, subject to the rules, regulations and written orders of the Directors, and is held responsible for the manner in which said prison is conducted.

It is his duty to select and nominate all the subordinate officers and to oversee and command them in their various duties, The Warden is directed and authorised to make such rules and regulations for the government of the subordinate officers of this prison, as he shall judge proper, provided they are not incompatible with the law or bye-laws, relative to the government of the prison; and also to make such rules and regulations relative to spectators and others, who may be admitted within, or shall be found lurking without the prison yard, as the case may require, and to enforce such regulations, by rendering the offenders liable to be apprehended and proceeded with according to law.

He is to prescribe the mode of punishment to be inflicted on the convicts, for their violation of the prison rules either by confinement in dark and solitary cells, by putting fetters and shackles on them, by moderate whipping, not exceeding ten stripes for any one offence. He is to reside at the prison and examine daily into the state of the same; visit every apartment and see every prisoner under his care, as often as the good order of the prison and the necessities of the prisoners shall require. He is not to absent himself from the prison more than a night without giving notice to one or more of the Directors. He is to exercise over the whole establishment a general supervision as it regards discipline, police, and the busi ness concerns thereof, to make all purchases, to superintend the manufacturing business carried on within the prison, to receive the articles so manufactured, and to dispose of the same for the benefit of the

It shall be his duty to cause the books of the prison to be so kept as clearly to exhibit the state of the convicts, the number employed in each branch of business, their earnings and the expenditure of the Institution; to specify minutely in his quarterly accounts the persons to whom or from whom moneys are paid or received, and for what purpose, with an abstract of vouchers, for all expenditures, which with the vouchers, he shall prepare and lay before the Directors, at the end of every three months, for them to audit and

It shall be his duty to close the books of the prisonon the 31st March arnually and render a report exhibiting a complete and comprehensive view of the transactions of the prison during the preceding year, shewing the various branches of business in which the prisoners have been employed and the profits to the State (if any) arising therefrom.

He shall see that the prisoners are treated with humanity, and that no unnecessary severity is practised by the inferior officers, and that the sick and complaining convicts have proper medical attendance, and are supplied with such food as may be directed by the Physician.

### DUTIES OF THE DEPUTY WARDEN.

The deputy Warden is the principal assistant of the Warden.

And it shall be his duty to attend to the opening & closing of the prison, to be present during divine service, to have a constant care and superintendence, under the direction of the Warden, of the internal af-

fairs of the prison, to see that every subordinate officer strictly performs his appropriate duties, especially to attend to the police and discipline, to see that the rules and regulations of the Institution, and the directions of the Warden are enforced.

He shall constantly be moving about the interior of the prison, visiting the shops, yards, hospital, cells & other apartments, take every precaution for the security of the prison and prisoners, see that the overseers keep their men diligently employed during the whole time they are in their workshops, the guard are vigilent & attentive to their duties, and he is required to report to the Warden, every neglect of duty and all impropriety of conduct on the part of any of the oificers.

He shall attend to the clothing of the convicts, see that it is whole, properly changed, and in order.

He shall see that the cells, shops, yards, and other apartments of the Prison, are kept in a proper state of cleanliness; that the rations are such as are allowed, and required to be delivered to the convicts, and that they are properly cooked and served.

He shall morning noon and night ascertained whether any convict is missing before he dismisses the officers from the hall, or gives the signal to the Watchmen on the walls.

And in the absence of the Warden from the Prison, all the duties and powers of Warden, so far as the same relates to the discipline of the prison, and the safe keeping of the prisoners, shall devolve upon, and be executed by the deputy warden. He shall see that ladies and gentlemen visiting the prison are treated with attention and politeness, and that they are admitted and conducted thro' the several departments at all proper times.

He shall frequently go into the hall in the evening, and see that all is right, and that the guard on night duty are vigilant and faithful.

### DUTIES OF THE CHAPLAIN.

The Chaplain shall, as required by law, devote his whole time to the religious instruction and moral improvement of the prisoners.

He shall perform morning and evening service daily with the convicts, who shall be assembled for that pur-He shall perform Divine service in the chapel every Sunday. He shall have the care and management of the sabbath school with the co-operation and concurrence of the Warden.

He shall see that every convict is furnished with a Bible, and may apply to the Warden for a proper sup-He shall have the privilege, and it shall be his province to visit the convicts at all times when in their cells, or in the hospital & administer to them such instruction as he may deem best calculated to promote their subordination, reformation, spiritual and eternal welfare, and at all proper times endeavour to impress upon their minds the justice of their punishment, the necessity of amendment, and a strict conformity to the rules of the Prison. He shall not furnish them with the cells and work rooms, and every part of the esany information or intelligence, other than relates to tablishment under her care, to exhibit neatness and their duty without permission of the Warden.

He shall use his utmost endeavours to instruct thro' the grating of the cell doors all who are unable to | read. Me shall conform in all cases to the general rules and regulations of the Institution.

### DUTIES OF THE PHYSICIAN.

It shall be the duty of the Physician to visit the Institution every other day, before 9 o'clock A. M., and personally examine every sick and complaining convict who may be reported by the several overseers of the work shops, or who may be confined in the Hospital, or cells, and prescribe such medical treatment as their cases require. He shall repeat his visits thro' the day and at all times when the condition of the sick require it, and when sent for is to repair immediately to the Prison, to the exclusion of all other engagements.

He shall furnish the Warden from time to time as may be necessary, a memorandum of such medicines, provisions, supplies, and furniture as may be neces sary in his department.

He shall keep a book to be called the " Hospita. Rocord," in which shall be entered the names of al the convicts reported as sick, or complaining, requiring medical treatment, their diseases and the prescriptions therefor. He shall also record the names of all who may be reported as ill, and by him returned to their shops as able to labor, the time when any are discharged from the Hospital, or have died. When a convict dies he shall record the nature of the complaint, and all the circumstances connected with the death, that he may deem necessary and proper, and shall subjoin such other remarks as he may consider necessary and expedient, respecting the nature of each case and the treatment thereof. He may apply to the Warden for such assistance as may be necessary to nurse and attend upon the sick. The Physician shall direct in all cases the diet to be prepared for the sick and complaining convicts, and if it should so happen that the directions or prescriptions of the Physician should not be complied with, he shall report to the Warden, that proper measures may be taken to prevent future omission.

#### DUTIES OF MATRON AND ASSISTANT MATRON.

It shall be the duty of the matron and assistant to reside at the prison, to attend to the labor and conduct of all the female convicts, and all such rules and regulations as are required to be observed and enforced by all the subordinate officers in the Government of male convicts, as are applicable to the female department, shall be enforced by the matron under the direction of the Warden. And it shall be the duty of the matron to attend personally to the weighing and measuring of rations for the day, as ordered by the rules and regulations, and she shall keep an exact account of all such rations weighed or measured, and shall, under oath render such account to the Warden quarterly to be laid before the Directors. She shall personally superintend the cooking of the daily provisions, and dividing them into rations. She shall assemble the female convicts every evening, and on the Sabbath for religious instructions.

She shall use her utmost endeavors to cause the order, and to be at all times ready for the inspection of the Directors, Warden, or persons visiting the Institution. For any violation of the Prison rules by the female convicts, she shall confine them in their cells, and report the offence to the Warden that he may give her such instructions in regard to punishment every reasonable exertion to promote the interest of as the nature of the case may require.

#### DUTIES OF OVERSEERS AND TURNKEYS.

The Overseers and other officers acting as Turnkeys, shall consider themselves as the immediate agents of the Warden and deputy, in enforcing the police and discipline of the prison, and carrying into effect the intentions of the law for the punishment of the convicts in the prison, and at all times while in the employ of the state are to consider themselves subject to the rules and regulations adopted for the government of the prison, and are to govern themselves in strict conformity thereto.

They shall keep a list of the men under their charge with the number of the cell in which each convict sleeps, opposite his name, and upon locking up morning, noon, and night, shall note the absence of any convict from his cell and immediately report the same to the deputy warden.

They are to march their men to and from their shops in close order, taking the luck-step; they shall require the convicts to keep their faces inclined towards their keepers, and shall use the utmost efforts to enforce perfect non-intercourse, and observance of all the rules and regulations necessary for their govern-

They shall require from the convicts an uniform, sober, orderly and humble deportment. It shall be their duty to instruct them in all the rules of the shop and prison, necessary for their government, and shall admonish them upon the least appearance of insubordination, and report them for punishment, to the warden or his deputy, whenever they shall refuse to obcy orders, (or neglect their duty.)

And it shall be the duty of each overseer of the several work-shops, to preserve in his department the most perfect order. He shall not hold any common place or unnecessary conversation with the convicts, nor shall they be allowed to make any enquiries relative to any subject, not immediately connected with their duty, employment or wants.

The Overseers are not to appropriate to their own use, any article or thing whatever manufactured at the prison, however small in value, except by the permission of the Warden. Nor shall they, or any other officer, receive any present or reward whatever, for services, supplies, or as a gratuity, nor shall they deliver to any convict, any book, paper, or other articles, without the permission of the Warden or Deputy.

They shall not allow the prisoners to leave their work, or shop without permission; nor shall they aflow them to speak to or look at visitors; and as all the business between contractors and convicts is by agreement to be done thro' the agency of the Warden or overseer having charge of the men and work, no conversation shall be allowed between the contractors and convicts except by permission of the Warden.

And it shall be the duty of each overseer, to keep an exact account of all labor performed, and articles manufactured, under his care, and taken therefrom, and shall render to the Warden every Saturday evening, an account of the labor and enruings of each conthe institution and of the contractors who may employ

No overseer will leave his shop during the time the convicts are therein, unless upon urgent necessity, but before leaving he shall procure a watchman, from the guard-room, or hall, to take his place, and it shall be the duty of the person relieving to keep the convicts in perfect order while the regular overseer is gone, and to report to him on his return, any misconduct that may have occurred.

It shall be the duty of the overseers to preserve the greatest possible cleanliness in the persons and cloth-

ing of the convicts under their immediate care.

They shall make a report in writing every morning about 9 o'clock, of those under their care, who are sick or complaining, which report or list shall be handed to the deputy Warden, or officer having charge of the hall, to be delivered to the physician at his regular visits to the prison.

No officer or guard shall, while on duty in the shops hall, guard-room, or the wall, or any other station, be engaged in reading any newspaper or books, neither shall they do any writing, except to make their necessary entries, or engage in any other employment, calcointed to interfere with constant watchfulness and vigilance, neither shall they hold any conversation with one another, in the presence or heuring of the convicts, while on duty, or with contractors, other than relates to the business under their care & management. Each overseer shall perform his regular tour of night duty as he may be directed by the warden.

It shall be the duty of the officer having charge of the hall, during the day, to cause the cells & hall to be swept at least once in each day, to see that thebeds and bedding are kept clean and in good order, to cause the cells to be frequently cleansed and white-washed, and the half, cells, and hospital, generally to exhibit throughout, neatness, good order, and cleanliness.

He shall every afternoon examine the blankets, beds, furniture, locks, doors, and the cells generally, and see that they are not injured, by any attempt of the convicts to make their escape from the cells, and whenever he discovers anything wrong, he shall take down the number of the cell, with the offence committed, and report the same to the Warden or deputy immedintely. He shall also attend upon the physician at his regular visits to the prison; shall take him to see every convict, who may be sick or complaining, in the cells or hospital; shall send to the several shops for all who may have reported themselves as wishing to see the physician; and he shall also attend personally to the directions and prescriptions of the physician, and secthat they are duly observed and administered.

He shall also report to the Warden before 9 o'clock. every morning, the names of any remaining in their cells with the number of the cell opposite each name, together with their complaint, and shall spend his whole time in the performance of those duties, unlessotherwise instructed or directed by the warden or depory, in which case he shall perform all, and every other duty or service, as they may direct.

### DUTIES OF THE WATCHMEN.

It shall be the duty of the watchmen or guard, to be vict under his care during the week, that the necessary at the prison during the whole time, day and night to be entries may be made on the books of the prison. They vigitant de active; and whom not on duty on the wall or shall see that the property in carefully preserved; and at the gate, they are to repair to the guard-rooms and the work well and faithfully done, and they shall use there remain ready to relieve the overseers of the

and to perform such other duties and services for the safety and security of the prison, as they shall be directed by the Warden, or his deputy, both by day and

during the night.

They shall at all times maintain towards each other and all persons visiting the prison, a gentlemanly deportment. They shall refrain from all immoderate laughter, hoisterous conversation, exciting discussions upon politics, religion, or any other subject while in the guard-room or on any post of duty, and treat each other at all times with mutual respect and kind-They shall not allow any person to go upon the wall, without permission from the warden; nor shall they allow (under any circumstances) any intoxicated or riotous person to pass into the prison. They are not to leave their post on any pretext without being relieved, and are not to suffer a convict to pass thro' the gate or guard-room, except in charge of a proper efficer; and it shall be their duty to keep the arms clean and is order, ready at all times for use, and they are constantly to keep in mind that it is required of them to prevent, at all hazards, any convict from making his escape.

No watchman shall be allowed to hold any conversation with a prisoner, except to direct him in his duty nor shall he receive from, or deliver to a prisoner, any article or thing without the knowledge and consent of

the warden or his deputy.

It shall be the duty of the guard having charge of the hall, while the convicts are in their cells, either at mealtimes or during the night, to keep constantly moving around the block of cells, with socks on in a silent manner that he may be able to detect any unnecessary noise, and it is strictly enjoined on him not to hold the least conversation with the convicts, or suffer them to speak to him except to make known their immediate wants, and to use the utmost endcavours to suppress noise of any kind, and to report to the warden or deputy any violation of the laws of the prison, by the convicts while in their cells. The examination of the cells and doors, after the prisoners have retired to their beds, shall be done by an extra watchman, so as to enable the watchman on guard in the hall to con-tinue in the performance of his regular duty. He shall not on any present wha ever, sit down or lay his weapons aside, but shall be constantly patrolling the galleries and pavement around the cells.

Should any disturbance be made in the prison during the night, he shall awake a watchman in the guardroom, who will immediately acquaint the deputy warden, who will repair to the spot, and make use of such means as are necessary to quell it; and while ou duty about any part of the prison, the guard should keep constantly in mind, that they are required to keep a strict and vigilent observation of the convicts, and not for a moment have their attention abstracted from the object of their charge, but be in

readiness at all times for any exigency.

Has two distinct boards for the charge of the poor; viz:—the Overseers of the Poor, and the Directors of the house of industry. The overseers give: relief of the house of industry. only to the poor who are at large in the city. The directors of the house of industry have the charge only

of those who are in the house.

The House of Industry contains 55 lodging rooms, in the main house for the poor, and 32 in two our-That is, it has \$7 lodging rooms for the poor. It has also 6 cells for the punishment of refractory inmates, six do mitories for insane men, and eight for insane women. Husbands and wives are not allowed to live in the same room. The contre of the building contains apartments for the family of the superinten-dent, and others for the officers of the establishment. The male inmates live in the eastern wing, and the females in the western. There is also a chapel in the house, in which the innertes worship on sunday, and a school house in which the children are instructed.

When this establishment was commenced, it was intended for the reception and employment of the ablebodied poor, who sliculd claim the charity of the city, and hence it was called the house of industry. But it has no effectual means of detaining this class of the poor, when they are disposed to make their escape They go to it, therefore, only for temporary relief when they are worn down by intemperance or disease; and leave it as soon as they have acquired strength toreturn to their former indulgences in the city or to lead a wandering life in travelling over the country. Instead of being a house of industry, the institution has therefore become at once a general Infirmary —an asylum for the insane, and a refuge for the deserted and most destitute children of the city, so great is the proportion of the aged and infirm, of the sick insane, idiots, and helpless children in it, that nearly ail the effective labor of the femiles, and much of that of the males, is required for the care of those who cannot take care of themselves. Cooking, washing and ironing, making and mending clothes, scouring the house, nursing the sick, and the charge of small children and lunatics, make a great amount of labor. For these reasons, the house of industry furnishes a very unfair specimen of the self-supporting capacities of the poor. During the spring, summer and autumn, the cultivation of the farm and garden, employs most of the ablest men, and oakum picking the more infirm. There are generally two or three carpenters among the inmates, one or two blacksmiths, as many shoemakers, and sometimes a muson. For these, employment is found in making repairs within and about the buildings.

It is a great evil of the institution that the children who are in it, cannot be kept apart from its adult in-

The cost per week for board and cloathing is estimated to be about 80 cents for adults, and 50 cents for children.

The directors of the house of industry, and the overseers of the poor, have no salaries. The salary of the Superintendent af the house is \$1,000 of the assistant Superintendent \$650; -of the farmer \$250; of the overseer of the kitetien \$130; of the over-

superintendent of the house of industry says,—" within the last 3 weeks, 67 persons have been admitted been admitted been admitted been admitted been of whom 58 are State paupers. conrict labour, the following are the considerations of which surround the bottom of each tier of cells. These greatest weight—that the manufactured articles may platforms are three feet wide and supported by heavy be produced by the exercise of ordinary skill; the iron castings, which are fastened in and project from raw materials not subject to great waste; the product the walls in such a manner as not only to be without suited to general want, and in demand, and yielding reach of the prisoner when in his cell, but without his the largest profit from the least capital.

With these views the following are the branches becorn : carding wool; and employing other machinery driven by a steam engine, wagon making, blacksmithshoe making, tailoring, coopering, making bagging & buil rope, dying, weaving carpets, jeans, linsey, &c. &c. together with many minor collateral branches.

Of the internal and moral improvement of the convicts, the keeper feels sincerely gratified in saying that facts authorizing the indulgence of encouraging and comfortable hopes; and the benevolent philanthropist will rejoice that the strong and blended lights of knowledge and religious truth, are casting rays of brightness and warmth into their minds and hearts, dispelling much of the misery of their dark and cold abodes. Under a new organization and arrangement of the schools on the sabbath, which he has adopted, indications are decidedly apparent of an active spirit of mental improvement; and from the labours of the ministers of the gospel of various religious denominations, who have kindly lent the aid of flieir pious exertions, manifestations have been given of an unquestionably reformatory tendency

described.

The edifice designed as the keepers dwelling is five ! stories in height, including the basement and attic stories, and surmounted by a handsome dome 12 feet in diameter, it is 50 feet wide in front, and runs back with its outer walls 30 feet, where it is connected on lis wells: one side with what is called the cast wing. are of cut limestone, and when completed the entire building will evince much architectural taste in the designer, as well as durability in its structure.

front of three stories in height. It encloses a block of who has had the perfect and free use of his organs of 350 cells. They are averaged in tiers, 5 tiers on ei speech, to withhold all conversation under any and

In choosing the branches of business (says the ther side, and thirty five in a tier, at the end of the keeper of this establishment) for the application of blocks are flights of steps terminating upon platforms

The west wing which will be in progress during the lieved best adapted to the Institution, viz :- grinding present summer will bear in all respects a resemblance to the East wing, and when completed will make up a front view of the building 400 feet in length. The ing, stone cutting, chair making, and painting, boot & several stories of guard and sleeping rooms, are in the rear of the keepers residence, forming the division between the two wings and from each of which can be viewed every range of cells with almost a single glanco of the eye.

The building denominated the north wing, is attached to the north side of the east wing at its extremity It is two stories high, one hundred and forty feet long and forty feet wide, the lower story is divided into a dining room kitchen and bake house. The upper story is designed as a hospital, with its necessary divisions. altho' it is at present in part only occupied as such. These apartments being large and admitting of free ventilation, the sick will be as well situated in these respects as in the rooms of the most commodious and celebrated hospitals.

The prison wall which is being rapidly constructed, is three feet in thickness at its base, its intended height 20 feet and it will embrace 6 acres of land.

The prisoners are governed by a firm and energetic The OHIO PENITENTIARY is next briefly discipline, constant and active daily labor is required of them with perfect and uninterrupted silence. punishment annexed to a violation of these requirements is, as in all other cases rigidly enforced. And much good it is conceived will be the result, not only in cutting off the great evils of intercourse among the prisoners; not only in preventing the young in years and novice in crime, from receiving instruction from the old in iniquity; but by forcing all into the practice of self denial-a virtue to which they have proven themselves to be more or less strangers. Self denial is the The East wing is 175 feet in length and presents a term, for it must be difficult in the extreme, for one

associated. But the denial must be made; silence sinned to their disgrace and ruin, of which it was must be kept, or a severe penalty will be enforced .-By possibility a prisoner may speak and escape detection, but it is a luzardous experiment; for although there may be no guard in his presence, an eye from tions of a talented and forcible preacher. They are the secret passage which separates the shops may be again alone—the denunciations and promises of the resting upon him.

In going to & from their shops, dining rooms, sleeping rooms, or when they are called from one place to another, they are divided into companies of 35, corresponding with the number of cells in each range, and march under the command of the guards of each respective company with the lock step, their backs and

They have been seen to march from their shops to the dining room and stand at their places at the table, as motionless and silent as if each one was expecting his last doom to be sealed, until the Chaplain solemnly and impressively uttered, "let us pray." sound of such words, with a new scene before one of deep and thrilling interest, every fibre of the frame is liable to be affected almost to trembling. But when the preacher and the calprit kneels down together; when one who has spent a long life with the book of salvation in his hand, has offered up his fervent and heart-searching prayer, that the prison house of the wicked may become a tabernacle of thanksgiving and praise, the mind receives strong and indescribable impressions.

The convicts take their places at table, and arrange themselves for eating upon the sound of a hand-bell used by the deputy Warden. While here the same silence is maintained as elsewhere. If bread, meat, or water, be desired; significant signs instead of words are used; and when the repast is ended, their caps are replaced upon their heads, after which they rise from and march back, all at the sound of the bell.

It is not however the hard labor required of the prisoners-it is not the severe and certain punishment for a violation of prison discipline—it is not the continu-cd silence which is demanded—it is not the general order and regularity of every movement-it is not, emphatically, these things alone by which the great lesting and important demands. They will, however, amount of good is to be effected, as regards the reformation of the prisoners. It is in part, and perhaps materially, by the separation of the convicts at night, together with the moral and religious instruction which is imparted to them. Many of them too, are destitute of the rudiments of education, which they are also taught. Among 210 in confinement, near 30 were unable to read and a number read but imperfectly. If it be true that ignorance and idleness beget crime, their removal will tend to an opposite result.

To avoid prolixity, one day of the week is singled out for remark—the Sabbath. In the morning the rational principles. Not only was the nature of pun-prisoners are alone in the cells, holding communion ishments vindictive, but the modes of inflicting them with no associate and without having any other reflectorrespond less with the character of the crimes than tions forced upon them, than such as would naturally with the spirit of the laws. The penalty of death was arise from their own cheerless solitude. There they attached to almost every offenermain save a short time while at breakfast, until af-most rigorously enforced. ternoon preaching, except also the more ignorant who alive; mutilated; broken on the wheel; their bodies are formed into a sabbath school. At the hour for transfixed to the gallows and left bleaching in the wind; preaching they are all assembled and candor allows or their mangled remains inhumanly exposed to the that it has never witnessed a congregation more feel- public gaze. ingly attentive. The teat is seen to trickle down the the par has been arrested with the audible sob,—and they have been found to produce contrary results from it is believed, that although they were culprits, they those which were designed. Instead of proving salu-

every circumstance, from those with whom he may be have been affected like men who felt that they had

needful that they should repent.

When the service is ended they retire again to their cells, carrying with them their admonitions and instrucchristian law dwelling upon the ear—their consciences upbraiding them—their Bible before them, and the invitation search and believe-every thing quiet but the deep commotion of their own thoughts-and it would seem that their heart sooner or later must become softened if made of adamant.

During the continuance of the old prison, frequent pardons became necessary to make room for new comers, but the prisoner cannot now base his hopes upon any such necessity. The pardoning power of the Governor will be exercised with great discretionand no one's confinement will terminate until the expiration of his sentence, except in very peculiar in-And when the prison wall is completed it will be folly even to hope that an escape may be effected.

#### EXTRACTS

From the Report of the Select Committee-in Senate -on a Resolution directing an enquiry into the propriety of abolishing public executions. April 8th, 1835, State of New York.

Mr. Mack, from the Select Committee to whom was referred the Resolution directing an enquiry into the propriety of abolishing public executions.

REPORTED :-

That the committee have not considered themselves warranted at this late period of the Session, in retaining the resolution before them a sufficient time for that mature examination which a subject so intersubmit some facts and reasons which have influenced them in forming the conclusion to which they have arrived.

In the early and more barbarous eras of civil government, punishments were vindictive; justice was untempered with mercy; severity was deemed essential, not only in retaliation for crime, but as an example to deter from its repetitions-Terror was the agent of the law; and its administrators arbitrary in power, attempted to restrain mankind by fear, rather than to reform them by the inculcation of just, human and rational principles. Not only was the nature of punattached to almost every offence, and that penalty was Culprits were impaled

But in every age and country in which these barcheek, -the bosom to heave with half suppressed sighs, barous punishments and exhibitions have prevailed,

their tendency has been to harden and brutalize the feelings of the populaco; to familiarize them with scenes of blood, to excite disgust instead of terror or respect for the laws, and to increase offences both in number and enermity. These results are proved by the history of the times, and admitted by the most intelligent writers upon criminal jurisprudence; and the spirit of christian benevolence, the lights of education and the assuasives of refinement, whenever their progress can be traced, many claim their proudest triumphs over the exactions and inflictions of the criminal codes.

In almost every nation of Europe the number of offences to which the penalty of death was attached have within the last half century been greatly diminished and the barbarous methods of inflicting this punishment have been abolished, or where these sanguinary statutes have not been repealed, those changes which have softened the character of the people and refined the public manners and opinions, have influonced the administrators of the laws and rendered those laws, to a great extent, a dead letter. During the reign of Henry the VIII, 72,000 persons were publicly executed in England, being an average of 2000 in each In the reign of Queen Elizabeth, 400 were executed yearly. From the years 1825 to 1831 inclusive, out of 85,257 criminal convictions in England and Wales, 9,316 were condemned to death, of which only 410, an average of 68 a year, were executed.-In Ireland for the same period, of 65,719 convictions sentence of death was passed upon 1,814, and inflicted upon 224 or about 48 per year. In France during the year 1826, of 4,348 persons convicted, 150 were condemned to death, most of whom were executed,—In Prussia from 1818 to 1827, 210 persons were capitally sentenced, only 87 of whom suffered death, -and it is the conclusion of all writers by whom the imperfect statistics of crime have been investigated, or who have had personal experience upon the subject, that in every country, offences against the person have decreased in proportion as the severity and public exhihition of punishments have diminished. In France, for example, a greater number of executions take place in proportion to the convictions, than in England; and offences against the person bear a greater proportion both to the whole number of offences and to the population, in the former than in the latter country. also remarked as an important and interesting fact, that " in England and every other country these offences are diminished in the proportion that the means of education are enlarged." Hence it follows, that it is neither the severity nor the public nature of punishments, but the dissemination of knowledge and the inculcation of pure moral principles, which deter from the commission and prevent the increase of crime.

In the United States rational liberty is the basis of our civil Institutions, and the principle of humanity is the foundation of our criminal codes, -the constitution itself declares, that "cruel and unusual punishment shall not be inflicted." While in Great Britain, the laws of which are less sanguinary than those of some other European governments, about 150 crimes are punishable with death, in no state of this Union is that punishment inflicted for more than ten enumerated By the revised statutes of this State, but 3 crimes are declared punishable with death-and to extend this principle of humanity, the revisers recommended a discontinuance of Public Executions, as

ary as examples to deter from the commission of crime, then and at present conducted, and the substitution of a more private infliction, within the prison or some adjoining enclosure, in the presence of the County Judges, District Attorney, Surrogate, and other public officers who were required to attend as witnesses.— Those provisions, they observed, had "been drawn with a view to avoid the consequences frequently attending the parade of public executions. While on the one hand, the security of our fellow citizens requires that the punishment of death should never be inflicted in secret on the other, it is believed by many, that the manner in which it is usually conducted defeats the great end in view-a solemn and monitory A medium between the two has been simexample. ed at.

> But the legislature which enacted these statutes halted at the threshold, and stopped short of the important object by leaving it to the discretion, and resting upon the responsibility of an Executive officer. With such timidity or reluctance do we cast off the shackles of custom, even when humanity pleads and reason is convinced!

> As might have been foreseen, in no instance since the adoption of the revised statutes had a Sheriff exercised the discretion of departing from the former method of conducting executions in public; nor will any be found, in opposition to the solicitations of depraved curiosity, and the importunities of self interest, to take upon himself such a responsibility as would be imposed under the present provisions of the sta-

> Your committee, therefore would not be warranted in anticipating that all minds are now prepared for repealing the discretionary power of the statute and declaring the more private execution of criminals imperative. The propriety of public executions has been defended, and may continue to be urged, upon the grounds-

- 1. That they have a legitimate and salutary influence in deterring others from the commission of like offences, which cannot be otherwise effected; that they are the only means of impressing upon the mass of the people a salutary dread and warning, and serve as a public admonition of the certainty of punishment following upon crimes.
- 2. That all punishments ought to be subjected to the public scrutiny, so that it may be certainly known that the requirements of the law, and no more, have been fulfilled; and that if punishments were privately inflicted, it could not be known whether they were actually, and justly and properly, inflicted, upon the persons condemned, or that innocent persons had not become the victims.

To the first of these propositions, your committee have in part anticipated their reply. It may however be well to fortify their views, by referring to those whose opinions may be deemed better authority, and entitled to greater respect than their own.

All the writers whom the committee have had time to consult upon the subject, [Dagge on criminal law; Sir Samuel Romily on do.; Old Baily experience, Sc.; An English Publication Jurisprudence, 1831; Rees' Encyclopedia; Sir Edward Cooke, Beccarice, Bentham and numerous authors quoted in those works] agree in the opinion that public executions have not been salutary in their effects; that they have not deterred from the commission or prevented the encrease of crime; but that on the contrary they have had a

blunting the genuine sensibilities of the people—a German writer [Encyc. Amer. Art. Criminal Law,] treating of the doctrine, that suffering is to be inflicted upon the guilty, for the purpose of deterring others from the commission of crime, remarks:—

"By the punishment of the offender others are to

be deterred from similar acts. The punishment is therefore inflicted publicly; and the more horrible the crime, the more effort is made to confirm the popular abhorrence of it by severe penalties. This system is liable to the most neightly objections. It cannot be allowed to put the a human being, simply with allowed to put the view that otlers may receive from his sufferings such an impression as to be proof against the temptamon to crime. In point of fact, THIS END HAS NEVER BEEN ATTAINED, and would require a scale of punishment offensive to sound reason. The mere fear of punishment is of very little weight. Men are kept from crime principally from the natural abhorrence of wrong heightened by a good example."

Again: "It is evident, that the sentiments of men, and their moral reformation, cannot be the direct object of legislation, from the very circumstance, that this effect is not of a kind to be ascertained."——"On the other hand it is found by experience, that the punishment of death is not sufficient to deter men from the commission of offences to which they are tempted by their passions or their wants." - Dagge ["considerations on criminal law,"] observes: "The circumstance of example, which is often insisted on, does not seem to have so much weight as is often ascribed to it; for delinquents are frequently hardy enough to perpetrate the most atroclous crimes, even when malefactors are, for the same offences, expiring before their eyes with all the dreadful circumstances of agony and infamy. Men whose depraved dispositions lead them to the perpetration of capital offences, are slightly if at all affected by the sufferings or punishments of others." "If ever the dread of punishment, or the terror of example, comes across their thought; such reflections are soon obliterated by the more flattering prospects which strike their senses and corrupt their judgment. The end of punishment, therefore, with regard to example, appears to be of less consideration than is generally imagined." "However (says the same writer,) political casuists may pride themselves in subtleizing and reconciling moral repugnances with public necessity, we may venture to conclude, that whatever shocks the common sense and feelings of mankind, is faulty in its original establish-"Severe laws it will be allowed, are best calculated for the support of despotic power; but modcrate governments are to be maintained by a milder system." "Therefore the great stress which has been laid on the advantage of public executions, seems to rest on a weak foundation; for they who are indued with a great degree of sensibility, will not behold them and hardened offenders view them without being affected by them."-"Moral habits are not to be enforced by criminal laws; they are to be inculcated by moderation and good example; but the principal means of making virtue habitual, is to sow the seeds of it in early education."

The author of the late able and interesting English treatise entitled "Old Baily Experience," &c. in spectacle which in some excites compassion inixed treating of the effects of executions, remarks, "The with indignation. These sentiments occupy the mind

deleterious influence upon the public morals, brutaliz- committing crime, would of itself be thought sufficiing the habits, exciting the morbid sympathies, and ently striking to convince all law makers of the inutility and falacy of relying on sanguinary punishments as deterring men from crime." Fazakerley says with great truth, "Sir there is something in the nature of man that disdains to be torrified, and therefore severe punishments have never been found effectual for preventing crime." Again: It cannot be that men commit crimes for the sake of daring death, yet their numbers encrease with the penalty. Another cause must therefore be sought. Is it excitement? Boys say their first ideas of crime came on while witness-ing an Execution. This fact which is indisputable, proves that there is some strange and hitherto unexplained compound principle of action in the human species. One effect is sufficiently evident, that it hardens and brutalizes all who witness these scenes, & all who are concerned in carrying the law into effect!"

The Rev. Dr. Ford for many years ordinary (or chaplain) of Newgate Prison in a letter to Mr. Benthan which we find in the work above quoted, on the efficacy of Executions, says, "From every thing I have witnessed on these melancholy occasions, I am decidedly clear, that executions managed as they are at present, answer no end whatever either for punishment

or example."

After describing the treatment and deportment of the culprit in prison, previous to the day of execution

he continues:

"At length the long dreaded morning arrives; he knows he must quit this world, and he may as well do so with a good grace as not. What would his old associates say, if they were to behold him die soft; (as the phrase is.) 'His memory would be despised and had in abomination.' He mounts the drop resolute in appearance, however he may be within; bows to the spectators; shakes hands with the ordinary, and such others as may be with him travelling the same journey; and according to the expression in the dying speech, which at this moment is publishing in all parts of London, is launched into eternity. This man is not punished, nor are his compeers intimidated. It is like the acting of a tragedy; a momentary tear of pity may be slied, but the next ribaldry obliterates the whole of the foregoing catastrophe. For arguments sake, we will suppose the convict a true pentient, and resigned to his fate, with a full trust in, or even modest hope of salvation. The spectators are ignorant of what is passing in his mind, but they see him resigned in his countenance; consequently they are not intimidated by his example."

The same gentleman, after several years of subsequent experience, repeats his convictions; that " executions are of no avail, either for punishing criminals

or intimidating others from the perpetration of crime."
"The death of a criminal (says a writer on this subject in the Edinburgh Encyclopedia,) is a terrible but momentary spectacle, and therefore a less efficucious method of deterting others than the continued example of a man deprived of his liberty," "The terrors of death make so slight an impression that it has not force enough to withstand the forgetfulness natural to mankind even in the most essential things, especially when assisted by the passions. Violent impressions surprise us, but their effect is momentary. "The execution of a criminal is to the multitude a well known fact, that in every country where the laws much more than that salutary terror which the laws are most severe, the people are most in the habit of endeavour to inspire, doc."

import, from these and other eminent writers upon criminal jurisprudence. But enough has perhaps been quoted to answer the object designed. It is indeed true that many of these writers have arrived at conclusions favorable to the entire abolition of capital punishment. But they have come to this result thro the convictions forced upon them by observation and experience, that public exhibitions, while they have little or no effect in deterring from crime are of a positively injurious and demoralizing tendency. And in their cherished feelings of humanity, and in the exercise of their moral sensibilities, these statesmen and philanthropists seem to have lost sight of the only principle upon which it is justifiable to cut off from existence those who wantonly destroy the lives of others, or commit treason against the government from which all derive protection, and to which they owe a common allegiance—the public safety

In conclusion upon this point your committee have quoted foreign authorities, would appeal to those who have witnessed, or made themselves acquainted with the manner of conducting public executions in this country. Who are they that comprise a majority of the immense crowds that assemble on such occasions? Are they of that class of citizens whose reason is to be convinced or those whose animal feelings are to be exited? And what are the scenes usually exhibited Are they not those of thoughtless levity, and even of ribaldry, rioting and dissipation? the spectators as have their sensibilities awakened on the occasion, regard with more or less repugnance the attendant formalities, and view them as the act of despotism rather than justice. They look almost with horror, even upon the executioner, legally and indispensibly the minister of the violated laws; and the horrors of the final spectacle, and the sympathies excited, are much longer cherished in memory than the criminal cause which produced, and the end of public justice to be accomplished by it. To those who are criminally inclined, a violent death so terrible in description, now that they have witnessed it seems but It is they reason soon ever; the affair of a moment. and will not compare in its bitterness to the sweetness of indulgence or revenge. Such indeed, as are predisposed to crime will find in all the attendants of our public executions, rather incitives and encouragements to go on, than impressive admonitions to repent and refrain.

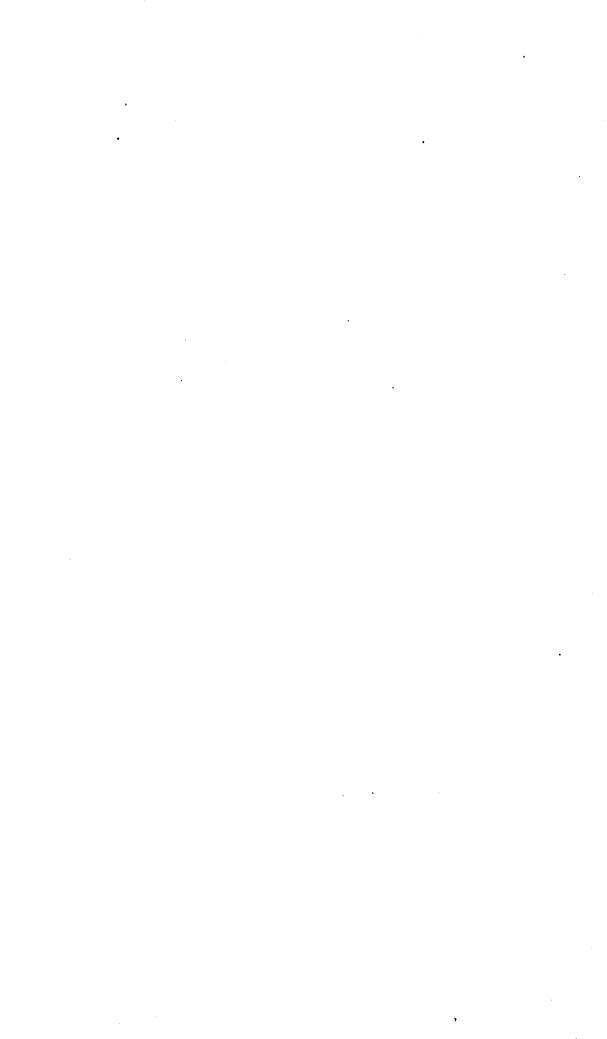

And even to the culprit, whose last moments, whose cternal peace, ought not to be wholly disregarded by the law, a private execution would, in the opinion of your committee, be much more salutary and impressive than a public one, as now uniformally conducted. In the whole proceedings which attend these exhibitions, liumanity overacts and becomes estentatious. The criminal receives during his confinement, numerous and indiscriminate visits, and protestations of kindness and deep regard for his present comfort and eternal happiness. He is led forth amidst military array, to the sound of solemn rousic, and followed by a long procession, is escorted with "pomp and circumstance" to the gallows. There he is surrounded by professed friends, public functionaries and spiritual advisors, & sees before him an immense mass of his fellow beings, whose sympathies and good will in the awakened pride of human nature, he still seeks and hopes to conciliate. At this moment he feels himself of greater consequence than he ever was before. It cannot but recur to his mind, as it will to the minds of the spectators, that he, who is there the object of so much

Your committee might multiply extracts of the same | dwelling, " unnoticed and unknown;" that few of the many that then surround him, would have felt the least interest in his fate; that none would have called to sooth his dying hour, or have expressed any concern of his temporal or eternal welfare! A midst these exciting scenes, amidst reflections such as these he passes from time to eternity, regarding himself and regarded by many others as a martyr rather than a malefactor, expiating his offence upon the altar of jus-

But on the contrary let the condemned criminal bo apprized that he must meet death in comparative solicitude; that the opportunity will not be allowed him of receiving and returning the public gaze, that as one who has forfeited the privileges and consolations of society, he will not again be permitted to look upon the collected countenances of his tellow beings, for the safety and protection of whose lives his own life is demanded of him-and may he not be led to appreciate his situation? Will he not turn his thoughts upon himself, and the anticipations of his final hour be more solemn and impressive? there is solemnity in silence. It is in solitude and not in crowds, that the human mind receives its deepest & most thorough convictions. the glare and the murmurs of the multitude; attended only by the officers and appointed witnesses of the law whose duty he appreciates and whose character he respects, the culprit who is about to expiate his offence, will be most likely to realize the justice of his sentence, and to meet the solemn crisis with "a broken and contrite heart"—with true contrition and sincere repentance.

The second proposition in support of public, and against private executions, which the committee have quoted, merits consideration. It is true that punishments should be certain, that they should not be evaded, and that the public should know, or have the means of knowing, that every sentence of the law has been positively and properly executed. But how small a proportion of the entire population of the state, who have a common interest in these matters, do now, or can have ocular evidence of the execution of a criminal! will it not be sufficient to guard against any evasion, perversion or abuse, that a specified number of officers and respectable citizens shall be present at each execution, as public witnesses, not as private spectators thereof? Will not an official account from these officers and witnesses, duly attested and published, convey to the public a full knowledge of the event with all its solemnity and salutary influences, unaccompanied by any of its contaminating and counteracting effects? Your committee believe that every intelligent and reflecting mind must answer in the af-They believe that the objection they have firmative. last noticed, though not without weight, may be thus obviated; or that it cannot, in this age of intelligence and general information be sustained against considerations involving the cause of humanity and public

Already have several of our sister states, Massachusetts, Pennsylvania, New Jorsey, &c., preceded us in this measure of reform; and your committee hope that the example will be followed by carrying out the principle virtually recognised in the revised statutes of this State. But they are of opinion that a simple repeal of the discretionary clause in section 26 of chapter 1, title 1, 4th part of the revised statutes would not accomplish the object in the manner to be desired, but that the enactments should be specific & positive, obviating every reasonable objection, and leaving as little as possible, in so delicate a matter to curiosity, solicitude and attention, might have died upon the discretion or responsibility of the public officer, the couch of poverty, within the walls of his humble whose duty it may be to carry them into effect.

# THIRD REPORT

OF

### SELECT COMMITTEE

ON THE SUBJECT OF THE

#### CANAL. WELLAND

To the Honorable the Commons House of Assembly,

Your committee appointed to examine and inquire into the management of THE WELLAND CANAL, and to whom was referred all the accounts, reports, books, documents, &c., that were or might be brought before your Hon'ble House, relative to the Welland Canal Company, or any charges that might be preferred against the same, and to whom were given power to send for persons and papers, hooks and documents, or records, in any way connected with the affairs of the Canal or its Company, and also power to employ a clerk or clerks, or any person that might be deemed necessary, so as to enable your committee to arrive at the knowledge of the actual state and condition of the past and present affairs of the said Canal or the affairs of its Company, and to report to your Honorable House, coming to some satisfactory conclusions immediately removed to Toronto, to one ing to his appointment to that office, put

of the committee rooms of your Honorable House:

### RESPECTFULLY REPORT,

That, in obedience to the order of your Honorable House, your committee having met on the 27th January last, and being organized, took immediate measures to obtain the production of all the books, papers and documents of every description, relating to the business of the Welland Canal, and the expenditure of monies connected with that work, and had them deposited in the charge of the clerk to your committee—and also summoned the Secretary and Book-keeper of the said Company to appear before your committee, who appeared, and produced the books, &c. of the Company, in conformity to the summons.

That your committee summoned before from time to time, for the purpose of them W. L. Mackenzie, Esq., one of the Directors of the Welland Canal Compawith regard to the said Canal and its ny, appointed by your Honorable House, management, and to take steps to have and having ordered the reading of that the Welland Canal Office and its contents | part of the Journals of last Session, relatto him the following query, viz:-Did you enter upon the duties as a Director of the Welland Canal Company in conformity to the appointment just read !-Answer. Most assuredly I did.

That, on the 3rd day of February, your committee received a communication from Mr. Mackenzie, containing charges against the Directors, Officers and Managers of the Welland Canal Company, which are as follows :-

1st. That the books are improperly kept, and, as I think, purposely, with intent to defraud the public and the Canal proprietors.

2nd. That very many erasures have been made in the journal and leger, some of which are to the evident disadvantage of the Company and the benefit of persons connected with the management of the Canal, while there are others concerning which, nothing could be traced by which to discover the original entries.

3rd. That false and erroneous entries have been made on the books of account, to a large amount.

4th. That there is a great defalcation on the part of the officers of the Company.

5th. That false accounts have been sworn to and laid before the Legislature.

6th. That important transactions of large amount have been improperly withheld from the Company's books of account for several years.

7th. That the charges by the officers for casual expenses are, in many cases, improper, and some of them such as no gentleman ought to have made, nor any Board andited.

8th. That the officers in late years have taken their own salaries out of the funds of the corporation without any authority of the Board.

9th. That persons in the employment of the Company, or others who appear to

papers, have increased and decreased and changed and altered account at their pleasure, and made entries on the books unauthorised by the minutes of the Board, and even in direct contradiction to its standing orders.

10th. That loans have been made to Directors, Officers and others, from the Company's funds, and without the consent of the Board-and the interest sometimes placed to the Company's credit, and sometimes kept back by the clerks and officers.

11th. That one set of books of account are kept by the Officers, in which their accounts with contractors and others, and even private accounts are entered, and another set of books, very different indeed from the others, and sometimes in direct contradiction to them, prepared for the inspection of the Board.

12th. That Wm. Hamilton Merritt. Esq., who succeeded Mr. Black, as Secretary to the Company, and Mr. Clark, who succeeded him, appear to have made no entries in the Leger or Journal, although that was an important part of their prescribed duties: and that they have declared to me that they have not even examined the entries made by Bookkeepers, hired to perform their duty for them, occasional servants and others. some of them manifestly incompetentand Mr. Beaton, the principal occasional person employed, is habitually intemperate, and as I think, evidently dishonest, judging by the entries he has made, and the proceedings he has connived at.

13th. That a system of favoritism has prevailed, in the letting out of contracts, injurious to the interests of the Company; and that some of the contracts performed by these favorites, have been most imquitously performed.

14th. That fraud and deception have have been allowed access to its books and been practised, to induce persons of wealth

and property to invest their funds in the Welland Canal; and that in this system of deception, the British Consul at New York, has been an important actor and instrument.

15th. That Mr. Merritt used the seal of the Company to serve the purposes of Henry John Boulton, Esq., when he was going to England in 1925—so as to incur the risque of £100,000 of the stock of the Company, being paid in London to an individual, without making him responsible for the money so to be obtained; and that Mr. Boulton was paid in advance £300 sterling, for services which appear to have been never rendered, and that vote afterwards improperly confirmed by the Board.

16th. That valuable mill sites have been given away without recompense, after stockholders had been induced to subscribe, by means of reports by the Board, that great wealth would be derived from the leasing of these mill sites.

17th. That the President, Agent, and some of the Directors have been improperly employed in forwarding goods on the Canal, and in leasing the water power thereon, while acting as such officers.

18th. That a bargain deeply injurious to the interests of the Company, and of the Province, as connected therewith, has been attempted to be carried into operation, by which valuable property granted to the Company at Port Colborne, and other lands and water power would be alienated from the company unjustly and improperly, and many thousands of pounds of debt incurred by them, without value being received therefor.

19th. That George Keefer, Esq. was improperly connected in the contract for the locks, while a Director, and that he received undue advantages from that contract.

20th. That important original estimates the Board, in releasing him from the obcontracts, receipts, and other papers, are ligations the Company had against his

missing at the Canal Office, and that the officers in no way account for their being missing.

21st. That the accounts of W. B. Robinson, John Macaulay, and Absalom Shade, Esqrs., commissioners appointed to expend \$30,000, granted by the Legislature, and taken as Canal Stock, were withheld for years from the country and the company, and found very inaccurate and unsatisfactory when produced by them.

22nd. That the Board has frequently entered into contracts it was without the means of paying, and agreed to issue paper money it could not possibly redeem.

23rd. That the Canal Directors and Officers, and their correspondents, have unnecessarily, and improperly, mixed up politics with the business of the Company, and tampered with the public press.

24th. That after the first election, the nominees of certain persons in New York always had the nomination of the majority of the Board, although holding a very small share of the Stock, and that the elections have not been on all occasions conducted according to law.

25th. That the Canal has been taken to particular places, to the injury of the company, to serve the purposes of interested individuals.

26th. That in the case of the steam Dredge, and others very similar, extravagant charges have been made against the Company, and paid from its funds under suspicious circumstances.

27th. That \$10,000 were loaned to Mr. Yates while many creditors of the Company remained unpaid.

29th. That \$30,000 of debt due by Oliver Phelps has been improperly placed in the profit and loss account, although he is a person in good standing; and that the Board, in releasing him from the obligations the Company had against his

property, forgot the interests of the canal and the country.

29th. That many thousand pounds were lost by the neglect and carelessness of the Engineers, Directors and Managers of the Canal Company in not taking proper precautions to prevent the catastrophe of the slides, which took place in November 1828 at the Deep Cut-and

30th. That after the Board of Directors at an extraordinary meeting, held last October, had resolved, that there appeared to them to be good cause for a speedy and efficient investigation of the monied concerns of the Company, and had taken the books and papers out of the hands of Mr. Merritt and the other officers, and sealed them up, they (the said board) returned them to the officers without any investigation at all, and thereby enabling them to commit other offences if so disposed.

That Mr. Mackenzic was requested to proceed with the production of such evidence as he might have to adduce in support of the above charges.

On the 9th day of February, Mr. Mackenzie commenced giving evidence before your committee, agreeably to the above requisition, and after examining at great length such witnesses as he thought proper, finally closed on the 26th of March last

That your committee being desirous to afford every opportunity for the thorough investigation and proof of charges of so serious a nature, patiently allowed Mr. Mackenzie so great a proportion of their time.

(For evidence, see Appendix to this Report.)

That your committee deemed it necessary for the purpose of assisting them in arriving at the true state of the affairs of the Company to employ two competent

their labors in investigating those books and accounts.

(See evidence of Book-keepers in the Appendix to this Report.)

That William Hamilton Merritt, Esqr. President of the Welland Canal Company, on behalf of the Board of Directors and officers of the said Company, requested permission of your committee, to be heard in answer to the charges brought against himself and the Company by Mr. Mackenzie, and likewise adduce evidence in contradiction thereto—which requisition was readily complied with.

That on the 28th of March Mr. Merritt commenced on the part of the defence, produced his evidence, examined his witnesses, and finally concluded on the 31st of the same month.

(For evidence, see Appendix to this Report.)

That your committee after having called for such evidence, and examined such witnesses, touching the above charges and the general affairs of the Company, as they deemed necessary for the purposes of justice—now proceed to submit in the first place the conclusions they have arrived at upon the several charges made by Mr. Mackenzie:-

Numbers 1, 2, 3, 4, 5, 6 and 9, of these charges relating solely to the books and accounts of the Company, and the manner in which they have been kept may be taken together. The evidence upon these, in the opinion of your committee fully substantiates the charge that they have been kept in a very careless, irregular and improper manner, highly discreditable to a public body, but your committee cannot say that any intentional fraud against the public or canal proprietors, has been brought home to any individual officer of the Company, or that the misconduct complained of in this respect is calculated to benefit the individuaccomptants, who have given evidence als connected with the management of before your committee as to the result of the canal. With regard to the defaloation on the part of the officers of the Company your Committee deem it proper to state that the accountants employed by them proceeded in the first instance to balance the books of the Company from the commencement of their operations, and then turned their attention to such accounts as Mr. Mackenzie thought proper to point out, as the investigation of all the accounts of the Company from the commencement to the present time, would have occupied them at least six months. Upon this partial investigation it appears there is a defalcation on the part of the officers of the Company to the amount of £1,724 11s. 0½d.—this sum is made up of the following items, viz: unaccounted for on general cash account, £378 0s 5½d. on tolls of 1830, '31, '32, and '33, £422 17s. 4d.—over charges and over credits, £560 16s. 1d.—sundry sums at the debit of individuals, and not charged to them till December 1835, in all £362 17s. 2d. Since, however, these errors were discovered, the clerks of the Company have to a certain extent accounted for £266 6s. which should be deducted from the balance on the general cash of £378 0s. 5½d; but it is quite impossible for the committee to say, whether upon a general investigation of the whole accounts, these sums would be increased or diminished.-With respect to false accounts having been sworn to, and laid before the Legislature, it appears that John Clark, Esq., Secretary to the Company, as such, swore to the accounts laid before the Legislature in 1832 which have, upon investigation, proved to be incorrect so far as regards the sum of £579 12s. 3d. stated to have been paid to George Keefer upon Grand River claims, when in fact it was amount appears to have been expended books themselves justify; are any themselves for canal purposes, and was, in fact, en-but creditable to the Company's officers

tered, though erroneously, to Mr. Keefer's credit.

Upon charge No. 7, your committee are of opinion that so far as the expenses of Mr. Merritt, upon his journey to York, Quebec, and New York—the amount of Ware's account—the expenses opening the Canal-and upon the visit of His Excellency Sir John Colborne to the Canal, are concerned, they are unworthy of remark, as upon an undertaking of such magnitude, and of so great importance to the Province, the Directors might, upon such occasions, have charged the actual expenditure as contingencies, without specifying the items; and without reference to which it would not appear that these expenditures were With regard to the payunwarrantable. ment of £300 to Mr. Boulton, for his journey to England, your committee cannot, under the circumstances, form so favorable an opinion; as it appears that his journey, in the manner it was undertaken, was not only without the consent of the whole of the Directors, but decidedly in opposition to the views of some of them. There are other items under this charge that may be questionable; but your committee are of opinion, that they are not of such importance as to warrant dwelling upon them in detail, particularly as they have before been investigated by a committee of your Honorable. House in 1830, with the exception of a charge of £447 10s. for loss on steamboat Peacock, which at present is enveloped in mystery, and can only be unravelled by Messrs Smith and Macey, of Buffalo, the Agents of the Company.

Charges 8 and 11 might properly have been classed with the first 6 and 9 Your not so expended, but your committee committee cannot but express it as their have no besitation in exonerating Mr. opinion, that the irregularities complain-Clark of criminal intention as the whole ed of in these charges, and which the

Under charge No. 10, it appears that a loan of £2,500 was made to J. B. Yates, Esq.—£1,000 to Geo. Keefer, Esq.— £178 13s. 5d. to R. Burns, Esq.—£164 14s. to O. Creighton, Esq.—and £100 to Thos. Butler, Esq., all of them, with the exception of that to Mr. Yates, without any authority of the Board. When your committee reflect, that almost all these gentlemen were officers of the Company, they cannot but condemn a practice that never would be tolerated in a banking or mercantile establishment.

With respect to charge No. 12, it appears that although Mr. Merritt was appointed Secretary for a short time, upon Mr. Black's leaving, yet that he never discharged the duties of that office, except upon one occasion he signed an agreement between Thos. Merritt and the Company, for Lock and Harbor at Gravelly Bay, in that capacity. The appointment of Mr. Clark to that office was highly injudicious, in the opinion of your committee, as it is evident he was quite incompetent for the discharge of its duties. At the same time, your committee cannot but declare it as their opinion that Mr. Clark's character as a gentleman, and a man of honor, stands unimpeached; and judging of Mr. Beaton, the principal clerk employed in the office of the Company, from what your committee have seen of him during his attendance in the Committee-Room for upwards of two months, and in the absence of other evidence than that produced, feel themselves bound to acquit him of the charge of habitual intemperance and dishonesty. At the same time, in their opinion, he is censurable for continuing the books in the same careless manner in which they were kept previous to their coming into his possession.

Upon the 13th charge, your committee are of opinion that the direct evidence of

slight; but viewing the evidence upon the whole investigation, your committee have no doubt but that most improvident contracts have been entered into, and some of them most shamefully performed, to the serious injury of the Company.

The material part of the evidence upon the 14th charge refers to transactions which took place upon the formation of the Company, and previous to the Legislature or the Province being interested in it; and as the conduct and character of gentlemen at a distance, and who have had no opportunity of being heard, is implicated, your committee refrain from expressing an opinion, or making any remarks upon this charge, and have foreborne to report the evidence upon it, as at this late day the publication of it can have no other effect than that of injuring the feelings of gentlemen whose conduct, whatever it might have been nine or ten years ago, can have no bearing upon the present state of the affairs of the Company.

Your Committee have, in their observations upon the 7th charge, disposed of so much of the 15th as regards the £300 to Mr. Boulton. The remainder of this latter charge, which affects the conduct of Mr. Merritt, in placing the seal of the Company to an authority to Mr. Boulton, which had the effect of enabling him to raise the sum of £100,000, without the direct and positive approbation of the Directors, was, to say the least of it, highly injudicious, and might have involved the Company in serious difficulties.

Upon charge No. 16, the only evidence is with respect to a mill site and water power for four run of stones being given to Mr. George Keefer, Sen, upon the condition that the mill should be finished and ready to go into operation immediately upon the water being let into the Canal As Mr. Keefer was necessarily favoritism in letting out contracts is but to incur a great outlay which might have proved a total loss had any circumstances arisen to prevent the completion of the Canal, which at that time was by no means certain, and as the great object of the Directors was, by making a beginning of works of that description on the line of the Canal, to encourage others, your committee are of opinion that the propriety of this gift is questionable; but of this, your Honorable House and the public are equally capable of judging.

Upon charge No. 17, your committee have no hesitation in stating, that, in their opinion, it is highly improper for any of the officers of the Company to be in any way connected with the water privileges or transport upon the Canal-that they ought to be above the suspicion of having any interest to serve beyond those of the Canal proprietors—that some of them have been, and still are, so interested, there can be no doubt.

In observing upon charge No. 18, your committee have to state, it appears by a deed in fee, bearing date the 4th day of August, 1831—that the Company sold to Alexander McDonell, Esquire, (J. B. Yates, Esquire, being the purchaser but incapable of holding the same he being an Alien) "all the lands of the Company, amounting to 15,576% acres, together with all other lands they might be possessed of by operation of law, and the whole of the water privileges and the water" except so much as should be required for the canal, for the sum of £25,000, to be paid in ten years, the interest to be paid halfyearly. About 18 months interest upon this sum is said to have been paid and principally refunded in the shape of bonuses for damages said to be sustained for want of water—that it further appears that on the 9th day of June, 1834, the Company relinquished their claim for the £25,000 and bought back the lands and water privileges with the exception who was the Commissioner entrasted by of about 200 acres, being the Town his brother commissioners to expend

Plots of Port Colborne and Allanburgh which are of great value, as Town Lots of a quarter of an acre in the latter place having sold for £25—and some valuable Mill sites as detailed in the evidence, they giving the Company's bonds to Mr. Yates for the payment of £17,000 with This transaction to your committee is inexplicable, no statement that they have heard has satisfied them of the justice or even expediency of an arrangement which, if applied to the ordinary transactions of life, would not only be deemed ruinous but the result of insanity. The value of property sold, or the amount of profits received by the Hydraulic Company is quite uncertain. Your Committee are of opinion that it is well worthy of the consideration of your Honorable House how far it would be advisable to take immediate steps to cancel the whole agreement.

Upon charge No. 19, your committee remark that it appears George Keefer, Sen. Esq., while a Director, contracted with Oliver Phelps for the delivery of a quantity of timber for locks, that Phelps had contracted to build. Upon the evidence adduced, your committee are unable to arrive at the conclusion contained in this charge, that Mr. Keefer received undue advantages from that contract, although it is not improbable he may have done so.

Upon the investigation of the 20th charge, your committee find that there are important estimates, and other documents amounting to large sums of money, belonging to the Company missing, and of which the officers can give no satisfactory account.

With respect to charge No. 21, your committee have to remark, that upon an investigation of Mr. Robinson's accounts.

£7,500, there appears a deficiency (after allowing sums claimed without vouchers; as also vouchers for sums paid, executed with a cross without a witness) of about £300—it is due, however, to Mr. Robinson to state, that he accounts for the delay in not having furnished his accounts properly authenticated, by stating, that Mr. Mackenzie was to have furnished him with a report, upon the receipt of which, he would have been enabled to proceed to the line of Canal, and procure the necessary details to rectify any apparent errors; and that not having received such report, it will be impossible for him to give a satisfactory account, until after he shall have had an opportunity of doing so, which his Parliamentary duties at present prevent; even presuming this statement to be correct, your Committee cannot acquit Mr. Robinson as a Commissioner, entrusted with the expenditure of public money, of a very great dereliction of duty, in not having been prepared long before the commencement of the present session with a detailed statement of his expenditures, corroborated by such vouchers as would defy a suspicion, which in the opimion of your committee, and those who know him, his character stands too high to allow ever to attach to him.

On the 22nd charge, your committee would remark, that in this extensive work, the company had frequently to contend with that bane to the correct progression and successful termination of all public works, viz: a deficiency of means and funds, and if in their anxiety to proceed with the work, and bring it to a speedy completion, they should sometimes have failed in the means of paying their contracts, your committee are of opinion that it should rather be attributed to their anxiety to forward the work and to disappointment in resources with which they anticipated to meet their contracts, than to any premeditated design of doing injury by entering into contracts

which they had not the ability afterwards to pay-and your committee would further remark on this charge, that when the Board of Directors, agreed to issue paper money to enable them to proceed with finishing the work, (however objectionable such a course might be as a general principle) it seemed to have been the only feasible means of proceeding with the work at that period—and your committee have reason for thinking, that the Company had grounds to anticipate resources to redeem such paper issues, before any serious injury could happen to any person into whose possession their notes might come.

Upon charge No. 23, your committee remark that the principal evidence is the production of a letter from the Editor of the Patriot, soliciting support, and slandering the majorty of your Honorable House. As to any attempts that may have been made to tamper with the press, your committee are of opinion they are of no moment, as they conceive it is not in the power of the Welland Canal Company, or, indeed, of any other, to corrupt the press of this Province.

With regard to the 24th charge, your committee are of opinion, that it is no fault of the officers of the Company that the agent of the New York stockholders was generally more attentive to the interests of those who employed him, than the Canadian stockholders were to their own, in attending to the election of Directors. With respect to elections having been conducted contrary to law—it appears, that the Honorable John Henry Dunn was upon one occasion elected President by acclamation instead of being ballotted for as the law directs.

attributed to their anxiety to forward the work and to disappointment in resources with which they anticipated to meet their contracts, than to any premeditated design of doing injury by entering into contracts to the proprietors, but which would not

have been so beneficial to some individuals as the present—your committee, however, cannot pretend to say that the course adopted was with a view of serving the purposes of interested individuals.

The evidence upon the 26th charge, clearly proves the very improvident manner in which the monies of the Company, were expended, and particularly in the case of the Steam Dredge and other contracts of a similar description.

Charge No. 27, is contained in charge No. 10, upon which your committee have in part remarked. In their opinion the affairs of the Company at the time did not justify this loan.

Upon charge No. 28, your committee would remark, that it appears Oliver Phelps owed the Company a debt of £7,500, over and above any claims he had against them upon his contracts, that the Company held a mortgage upon his property, which, by an order of the Board of Directors, dated the 6th of June, 1832, was given up to him without any reason assigned; in the evidence of Mr. M'Donell, however, it appears that the Company took from him a deed for 50 acres of land, worth about £10 per acre, which is the only consideration for the relinquishment of the above debt. The President. nevertheless, contends that allowing Mr. Phelps the above sum, he is only then paid the actual value of all his contracts.

In charge 29, Mr. Mackenzie contends, that the slides at the Deep Cut were caused by the carelessness of the officers of the Company, whose duty it was to superintend the works, in allowing the earth to be placed too near the edge of the Cut. The evidence upon this subject is contradictory; but your committee are led to believe that the accident was occasioned rather from the nature of the soil at the bottom, than from any culpable negligence.

With respect to the 30th and last charge, it appears that there was an investigation made, at the instance of the Directors of the Company, by Messrs. Bowery and Burns, which they (the Directors) conceived warranted them in replacing the books in the hands of the officers, although that investigation, in the opinion of your committee, has turned out not to have been pursued to the extent, and with that exactness, which the circumstances warranted.

Your committee having thus remarked upon all the charges brought before them, would state, in conclusion, that, after the investigation they have been able to make, they are fully satisfied, that for some years past the affairs of the Company have been conducted in a very loose and unsatisfactory manner, which may have, and no doubt has, originated in their being frequently much cramped for means to carry on the necessary repairs required to keep the canal open; and when your committee take into consideration the magnitude of the undertaking, and the many unforeseen disadvantages the Directors have had to struggle against, they feel inclined to put the most favorable construction upon their general conduct, and to acquit them of any intentional abuse of the powers vested in them-although it is difficult for your committee to account for or excuse their conduct in the sale of the Hydraulic Works, or in the relinquishment of the £7,500 to Oliver Phelps, who appears to have received advantages withheld from other contractors, in the opinion of your committee much more deserving. Their conduct also in the purchase of £1,340 worth of timber for a tunnel, which was abandoned, is also highly reprehensible. as it appears that a portion of this timber was allowed to be stolen and lost to the Company, without one shillings worth ever being accounted for; another portion appears to have been purchased by Gilbert M'Micking, Esq., M. P. P., and others, without any authority from the Directors, or the Company deriving any advantages from such sales; and large quantities of it made use of by Oliver Phelps in the Locks, for which he does not appear to have been charged.

In order to enable your Honorable House to form a correct opinion upon the general state and affairs of the Canal, and to come to some correct conclusion as to its future management, your committee deem it their duty to lay before your Honorable House a concise statement of the property in the said canal, as it is held by individuals and the public, as follows:—

			=
Loan by G. Britain, Provl. Cur. Do. Upper Canada,	100.000		2
Stock taken by Provincial Legis- lature, Stock taken by Lower Canada	107,500	0	0
Stock in England by private individuals,	25,000 30.137		0
Stock in United States by do, Do. in Lower Canada by do	69,625 13,825	0	0
Do. in Upper Canada by do, Do. in New Brunswick by do,	3,712 500	10 0	0
Advanced this year by Parliament,	£405,855 2,000	11 0	2
Total,	£407,855	11	2

Since the canal went into operation, in

1830, the gross receipts have been as follows:—

	1		
Tolls in 1830 and 1831-Gross	İ		
reccipt,	€ 1,956	18	71
Tolls in 1832,	2,432		
Do. 1833,	3,618		
Do. 1834,	4,300	8	53
Do. 1835,	5,807	5	114
From lands and water rents to 1st	1,500	•	
January, 1834,	100	0	0
Since January, 1834,	454	_	
Interest upon Hydraulic Sale,	1,531		9 <u>1</u> 8
	£20,300	16	10
Exchange on Bill on England, .	7,156		
Making the whole amount of the	£27.457	12	3

By which it appears that the sum of £435,213 3s. 5d. have been expended upon the canal since its commencement, after deducting £100, which appears by the last returns and evidence of the Secretary to be the balance in his hands on the 30th of December, 1835.

All which is respectfully submitted,

JAMES E. SMALL,

Chairman.

DAVID GIBSON,
PETER SHAVER,
THOMAS PARKE,

Parke. Roblin.

Room.

Shaver, and Thorburn.—7.

The Chairman reported having received a communication, signed Wm. L. Mackenzie, embodying certain charges against the officers, managers, &c. of the Welland Canal Company, which was read by the Clerk, and is as follows:— Toronto, 28th January, 1836.

To
James Edward Small, Esq., Chairman of the
Select Committee of the House of Assembly
on the Welland Canal Company's Ac-

counts, &c.

Sir,

As a Director of the Welland Canal, appointed to enquire into the management of the Company, with the consent of the Board of Directors, and by the special request of the Directors on the part of the Government, I begto state, as the result of my observations, after an examination of two years proceedings, and a partial investigation of the management during the remainder of the term during which the Canal Company has been in operation, That

1st, The books are improperly kept, and, as I think, purposely, with intent to defined the public and the Canal proprietors.

2nd, That very many erasures have been made in the journal and ledgers; some of which are to the evident disadvantage of the Company, and the benefit of persons connected with the management of the Canal; while there are others concerning which nothing could be traced by which to discover the original entries.

3rd. That false and erroneous entries have been made on the books of account to a large amount.

4th. That there is a great defalcation on the part of the officers of the Company.

5th. That false accounts have been sworn to, and laid before the Legislature.

6th. That important transactions of large amount have been improperly withheld from the Company's books of account for several years.

77th. That the charges by the officers for casual expenses are in many cases improper and some of

them such as no gentleman ought to have made, nor any Board audited.

Sth. That the officers in late years, have taken their own salaries out of the funds of the corporation without any authority of the Board.

9th That persons in the employment of the Company or others who appear to have been allowed necess to its books and papers, have increased and decreased, and charged and altered accounts at their pleasure, and made entries on the books, unauthorised by the minutes of the Board, and even in direct contradiction to its standing orders.

10th. That loans have been made to directors, officers and others, from the Company's funds, and without the consent of the Board, and the interest sometimes placed to the Company's credit, and sometimes kept back by the clerks and officers.

11th. That one set of books of account are kept by the officers, in which their accounts with contractors and others, and even private accounts, are entered, and another set of books, very different indeed from the others, and sometimes in direct contradiction to them, propared for the inspection of the Bourd.

12th. That William Hamilton Merritt, Esquire, who succeeded Mr. Black as Secretary to the Company, and Mr. Clark, who succeeded him, appear to have made no entries in the legers or journal, although that was an important part of their prescribed duties—and that they have declared to me that they have not even examined the entries made by bookkeepers hired to perform their duty for them, occasion-al servants and others, some of them manifestly in-competent, and Mr. Beaton, the principal occasional person employed is habitually intemperate, and, as I think, evidently dishonest, judging by the entries he has made, and the proceedings he has connived at.

13th. That a system of favoritism has prevailed in the letting out of contracts, injurious to the interests of the Company, and that some of the contracts performed by these favorites has been most iniquitously performed.

14th. That fraud and deception have been practised to induce persons of wealth and property to invest their funds in the Welland Canal—and that in this system of deception the British Consul at New York, has been an important actor and instru-

15th. That Mr. Merritt used the scal of the Company to serve the purposes of Henry J. Boulton, Esq., when he was going to England in 1825, so as to incur the risk of £100,000, of the stock of the Company being paid in London to an individual without making him responsible for the money so to be obtained: and that Mr. Boulton was paid in advance, £300 sterling, for services which appear to have been never rendered, and that vote afterwards improperly confirmed by the Board.

16th. That valuable mill scites have been given away without recompense, after stockholders had been induced to subscribe by means of reports, by the Board, that great wealth would be derived from the leasing of these mill scites.

17th. That the President, Agent, and some of the

warding goods on the Canal and in leasing the water power thereon, while acting as such officers.

18th. That a bargain deeply injurious to the interests of the Company and of the Province as connected therewith, has been attempted to be carried into operation, by which valuable property granted to the Company at Port Colborne, and other lands and water power, would be alienated from the Company unjustly and improperly, and many thousands of pounds of debt incurred by them, without value being received therefor.

19th. That George Keefer, Esquire, was improperly connected in the contract for the locks while a director and that he received undue advantages from that contract.

20th. That important original estimates, contracts, receipts, and other papers, are missing at the canal office, and that the officers in no way account for their being missing.

21st. That the accounts of W. B. Robinson, John McAulay and Absalom Shade, Esquires, Commissioners appointed to expend \$30,000 granted by the Legislature, and taken as canal stock, were withheld for years from the country and the Company, and found very inaccurate and unsatisfactory when produced by them

22d. That the Board has frequently entered into contracts it was without the means of paying and agreed to issue paper money it could not possibly redeem.

23rd. That the Canal Directors and officers and their correspondents have unnecessarily and impro-perly mixed up politics with the business of the Company and tampered with the public press.

24th. That after the first election the nominees of certain persons in New York always had the nomination of a majority of the Board, although holding a very small share of the stock, and that the elections have not on all occasions been conducted according to law.

25th. That the canal has been taken to particular places to the injury of the Company, to serve the purposes of interested individuals.

26th. That in the case of the steam dredge, and others very similar, extravagant charges have been made against the Company and paid from its funds under suspicious circumstances.

27th. That \$10,000 were loaned to Mr. Yates, while many creditors of the Company remain unpaid.

28th. That \$30,000 of debt due by Oliver Phelps, has been improperly placed in the profit and loss account, although he is a person in good standing; and that the Board in releasing him from the obligations the Company had against his property, forgot the interests of the canal and the country.

29th. That many thousand pounds were lost by the neglect and carelessness of the Engineers, Directors, and Managers of the Canal Company, in not taking proper precautions to prevent the catastrophe of the slides which took place in November 1828, at the Deep Cut, and

30th. That after the Board of Directors, at an extraordinary meeting held last October, had resolved Directors have been improperly employed in for- that there appeared to them to be good cause for a

speedy and efficient investigation of the monied concerns of the company, and had taken the books and papers out of the hands of Mr. Merritt and the other officers, and sealed them up, they (the said Board) returned them to the officers without any investigation at all, thereby enabling them to commit other offences if so disposed.

The particulars I will state to the committee specifically from time to time, with their permission, in such a form as may be found suitable.

I have the honor to be. Sir.

Your obed't, humble servant,

WM. L. MACKENZIE.

Adjourned.

TGESDAY, 9th February, 1836.

Committee met.

PRESENT.

JAMES EDWARD SMALL, Esq., Chairman.

Messieurs Chisholm,

McDonell,

Solicitor General, &

Thorburn-6.

WILLIAM L. MACKENZIE, Esq. M. P. P. called in, and examined,

[BY COMMITTEE.]

1. Did you enter upon the duties of a Director of the Welland Cunal Company, agreeably to your appointment by the House of Assembly? Most assuredly I did.

Adjourned.

THURSDAY, 11th February, 1836.

Committee met.

PRESENT,

James Edward Small, Esq., Chairman,

Messieurs Chisholm, McDonell,

Parke,

Roblin,

Shaver, and Thorburn-7.

The Chairman reported having received a communication from Ogden Creighton, Esquire, a Director and Stockholder of the Welland Canal, to the committee, which was read by the Clerk, and is as follows:

CLIPTON, Falls of Niagara, February 2nd, 1836.

To the Chairman of the Committee on Welland Canal Affairs.

In a recent personal communication with the Stockholders of the Welland Canal Company residing in New York, I found them all of opinion that the present system of conducting the affairs of that great work, was detrimental in the extreme to its best interests; and that either the Provincial Government, or the private stockholders should possess the Canal in toto, in order that the work might be kept in the best possible order, energy given to its management, and a spirit of activity and enterprize diffused throughout the whole line of the canal.

Overtures to this effect, were made through me to His Excellency Sir John Colborne, which recent events have rendered unavailing—therefore some decisive measure is now more than ever necessary, unless it be intended by the Province that this stupen-dious work, should, at the period when it shews evi-dence of the greatest utility, be altogether abandon-

The amount owned by individuals in

canal stock, is,

£115,000

Debentures issued, bearing 5 per

5,750

cent, would be, The stock owned by the province, is

107,500

The interest on which, at 5 per cent would be,

5,375

I would therefore most respectfully suggest, that either the province purchase from the stockholders, or sell its stock to them.

If the proposed first plan should be adopted. Debentures might be issued, redcemable in 40 years, at 5 per cent: and after the Tolls on the Canal shall exceed £12,500 annually, ten that a further issue of Debentures should be made to an extent that will cover the back interest on the capital already paid inor let the Stockholders assume the canal, by paying the Government on the same terms.

Which is submitted by.

Sir,

With respect,

Mr. Mackenzie again called, and further examined. By Mr. MERRITT.]

- 2. Do you perfectly understand book-keeping by the Italian method of double entry?-I consider myself acquainted with that method, others must judge whether I understand it properly.
- 3. Were the books kept by Mr. Wenham on that plan ?- I think they were fairly kept by Mr. Wenham on that plan.
- 4. Were they well kept by that gentleman?—I think so, but have not examined all he did.
- 5. Were the books kept by Mr. Black, on the same plan or method as Mr. Wenham?—Partly so.

(Witness withdrew.)

Adjourned.

WEDNESDAY, 17th February, 1836. Committee met.

PRESENT.

Janes Edward Small, Esq., Chawman.

Messieurs Chisholm,
Gibson,
McDonell,
Parke,
Roblin,
Shaver, and
Thorburn—S.

Mr. Love NewLove, called in and examined.

## (By Mr. Mackenzie.)

- 6. How long was you employed as a Contractor on the Welland Canal?—I commenced as a Contractor at the commencement of the work upon the canal and continued until it was finished with the exception of part of one summer.
- 7. Did the officers of the Company or any of them, over attempt to impose upon you in the settlement of your accounts, by insisting that you had received sums of money which had never been paid to you?—Mr. Black once did—he had charged to me more than I had received—but I afterwards got it on the same day—and all was made right.
- 8. What was the sum which it was attempted to deprive you of, in this way, and when was it?—I cannot tell the day, I think the sum was \$400 that was improperly charged against me, it was Mr. Clark first told me I had received so much this was, upon reference to the books, as I think—Mr. Black was then sent for, and admitted it was wrong, I was paid the amount of my demand in full the same day.
- 9. Did Mr. Black, when sent for, and after looking over the books, at once admit the books to be incorrect, or had you some dispute with him, before he allowed the \$400, or whatever the difference was?—We had some argument; Mr. Black said he did not see how his books could be wrong. I answered, I did not care for his books, look for my receipts for all I have received. Mr. Black answered—I gave your son \$600—this payment I acknowledged, but still claimed as my due the 4 or \$500 above referred to, over what I was willing to admit, which was afterwards admitted and paid.

#### [BY COMMITTEE.]

- 10. Did Mr. Black read from the books the different items of the aggregate making the difference he said was against you?—I think he did, some of them but not the whole.
- 11. Did Mr. Black get convinced that the books were wrong, and afterwards correct them, and give or allow the sum claimed?—I cannot tell whether he admitted the books wrong, or altered them—he did admit my claim and paid it.
- 12. Was there a particular charge read from the books that you denied, or was the different entries wrong?—The sum total was wrong 4 or \$500; no items were read from the book that I remember.

# [By Mr. MACKENZIE.]

13. In what manner did you satisfy Mr. Black that he was in error as to the 4 or \$500 of difference?

—I cannot tell how Mr. Black satisfied himself that he was in error; I did not hear him admit any error in his books; we were 4 or 5 hours before we agreed. Mr. Merritt came in, and said if there is a penny due to Newlove let him have it; I am desir-

- ous he should be paid. I am of opinion that if it had not been for Mr. Merritt, they would not have settled.
- 14. Was this your account as Love Newlove, or as Newlove, Porter & Co.?—It was as Love Newlove.
- 15. When was your account for Nos. 10 and 11 contract finally settled?—The account was settled or adjusted at the time spoken of, in the fall of 1832, but I was not fully paid at that time.
- 16. Was £250 paid you in June, 1832 1—I think it was.
- 17. How was you paid that sam?—By an order on the Bank at Buffalo.
- 18. Did you get \$600 in August of the same year?—My son got that sum.
- 19. Did you get a \$1000 in May, 1833, from the Company?—I cannot say.
- 20. Did Mr. Merritt ever pay you money as contractor, and under what circumstances?—He has paid me a great deal of money at different times, in more than one or two years; he always paid me whenever and wherever I met with him and wanted it, if he had not the money of the Company he paid me with his own.

### [By Mr. MERRITT.]

- 21. Upon what part of the line was you situated in your contract Nos. 10 and 11?—Within 4 miles of Lake Eric.
- 22. Was the Company not often out of money at this time ?—I think they were.
- 23. Did I not frequently bring money up from St. Catharines and pay to you?—Yes. You did at different times. You told me not to come down any more, as soon as the the Company got money, you would pay it or send it to me, which you did, \$400 at one time.
- 24. Did I ever pay you money at the Canal Office?

  —I do not remember that you did, except before Mr. Black came.
- 25. Do you know that I paid you money out of my own pocket, when the Canal Company had no means?—I believe you lent me money in York, stating that you could do better without it than I could; I believe it was \$50; you have done so more than once.
- 26. Was any other person present in the office, when the conversation took place between you and Mr. Black, besides Mr. Clark?—I think there was some men came in to see Mr. Clark—I do not remember who they were.
- 27. Did Mr. Black at the time of your settlement, give you a statement of your account in writing?—He did not give me a statement of the balance.
- 28. When you came to settle with Mr. Black, did you think he intendeded to cheat you out of the amount of 4 or \$500 that was in dispute between you?—I decline to answer that question.

#### [By Mr. CLARK]

29. Do you think when I told you that it appeared that you had received 4 or \$500 more than you admitted, that I did so withintent to defraud you?

No I am sure you did not—you told me you were not able to settle with me, that Mr. Black must be sent for.

30. Do you think there was any disposition on the part of the officers of the Company to withhold from you, what was due to you?—No: there never was except the time spoken of, with respect to Mr. Black, and whether he did it wilfully or not, I cannot say.

31. Who were the officers that kept the accounts and paid the monies in the office, during the time you were employed?—Mr. Black and yourself.

# [By Mr. MACKENZIE.]

32. Was you acquainted with a contractor by the name of Oliver Phelps, either before or after he came to Canada, and if yea, what circumstances was he in ?—I was acquainted with Oliver Phelps before he came to Canada, I have heard it said, he was considerably involved before he came here—I had a partner in a contract on the canal, and Oliver Phelps bought him out as I was informed by himself, he (Phelps) was to give him \$150—but did not pay it. I afterwards bought him out for \$125.

33. Before the Deep Cut was given up to Oliver Phelps by the contractors, did Mr. Merritt shew an anxiety that you should resign your contract in favor of Phelps?—He did not that I recollect, I had as I conceived a good contract upon the Deep Cut.—There was verbal contract that I should be paid by valuation—Mr. Merritt persuaded me to give it up upon the pretext that it was to be finished in a different way by Mr. McTaggart—My contract was taken from me by stratagem—And I was then informed it was given to Oliver Phelps.

#### [By COMMITTEE.]

34. What did you value your contract at per square yard, at the time you gave it up?—I cannot tell.

### [By Mr. MACKENZIE.]

35. What were Oliver Phelps' worldly circumstances when the slides at the Deep Cut took place? Do you think he gained by the stockholders in that unfortunate job?—To the first part of the question I cannot tell—it was reported he was much involved, it was also reported he took the Deep Cut at his own price. I think if he was not paid more than the reported contract price he must be a looser by it. I took a letter to Hovey, from Mr. Merritt which stated that Oliver Phelps was doing the canal at his (Phelps') contract price, and that Hovey owed the Company, instead of the Company owing him. I think he, (Phelps) had a hard bargain by his contract unless he got more than was stipulated for—I have since heard it said that Mr. Phelps is very rich, I have heard him speak of property as his, consisting of a farm, a grist-mill and saw-mill, within a mile of St. Catharines.

# [By Committee.]

36. What do you think would be a fair price per yard, for the work Mr. Phelps did at the Deep Cut? I think Mr. Phelps never bottomed any of the Deep Cut, and cannot say, unless I knew how near the bottom he did go.

37. What reason have you to suppose Mr. Phelps never bottomed any of that work? Because I never saw any of it bottomed. I am certain he did not bottom any, unless a very small portion indeed.

- 38. So far as you know Oliver Phelps went with the work, what do you think it was worth? It was worth between 25 and 30 cents per yard. Myself and David Thompson, bottomed a part of the work in a worse state than that of Phelps, and we got I think 311-2 cents: I was a foreman to Phelps on the Deep Cut.
- 39. What was Phelps' conduct as a contractor on the Deep Cut—Did he give a proper slope to the excavation, in order to prevent the slides? The first slide came in on my own job, in consequence of sand at the bottom. I think Mr. Phelps did not give the excavation a proper slope, even if it had been no more than 12 or 14 feet deep, I do not think the muck was taken far enough back.
- 40. Oliver Phelps and others, contracted for the 34 locks at \$2,200, and got between 3 and 4,000. Was \$2,200 a fair price? It was little enough. I told Smith Ward that I thought it could be done for 2 or 3 and 20 hundred dollars—it was because timber was both cheap and plenty then, if it had to be drawn far, it alone would have cost the money.

# [By Mr. MERRITT.]

- 41. Was not the contract on the Deep Cut, first let to Beach, Hovey, and Ward, at 25 cents per yard, and did they not surrender that contract, because they could not finish it at the price? I think it was. I always heard that Hovey and Ward were unwilling to give it up, they told me they never did give it up, that they had subcontracted it at 20 cents per yard; they told me the Company had taken away their contract against their will.
- 42. After they left the work, were not you and every other subcontractor working for one month at the estimate of the Engineer? I was, and I think Hathaway was: I think they all were, but I do not know.
- 43. At the time they left the work, did not I notify the contractors during that month to give in proposals at a certain day that the directors would be there, stating the price at which you would finish your respective jobs? I do not know that you did.
- 44. Do you not know that proposals were given in by the contractors on the day that Oliver Phelps took the contract in presence of the Directors? I gave in proposals myself to please you, but I do not know that others did.
- 45. Were not you and the other subcontractors continued on the work as foremen and labourers under Phelps, who bought your teams and implements? Having been turned out of my contract, I was obliged to work under him as a foreman, or look somewhere else for work.—Phelps bought part of my teams, but not the whole; he also bought Hovey's and Hathaway's teams and shanties.
- 46. Supposing Phelps had taken out the Deep Cut to the bottom, what do you think it would have been worth per square yard, from where he commenced his work? I think it was worth over 25 cents, but not worth 30 cents per yard: I think it would have been worth considerably more, if Phelps had put the muck over the banks instead of inside.
- 47. Do you think the laying the muck on the banks, was the cause of the slides? I think that no Canal was ever made, where the muck was laid as it was by

Phelps—I think it was a help to the slides. My contract with Hovey was not to lay any dirt within 30 feet of the canal—Phelps laid the dirt close to the edge of the Canal.

# [By Mr. Mackenzie.]

48. I perceive that over and above the prices allowed Oliver Phelps, for going on win the Deep Cut, after it was taken from Hovey, a present was made him of \$2491, for loss on sale of his cattle, the same allowance baving been (as it is alleged) made to other contractors when Mr. Phelps took the job, besides another allowance of \$1077 for wintering the same after the work stopped. Was a like allowance made you as a contractor? Never, I applied for it a great many times, but never we3 allowed a penny. I went there with \$1500, and lost every shilling, which was lost by the Deep Cut slipping in, and the work stopping—by my cattle, 39 yoke of Hartwell's valuation, 6 yoke of my own, and 18 yoke of Thompson's wintering.

# [BY COMMITTEE.]

49. Where did you lay the earth when you did work on your own account, per the month, between Hovey's contract and Phelp's contract? Always 30 feet from the edge of the canal.

# [BY MR. MACKENZIE.]

50. What is your opinion of the line of Canal where you descend the mountain, and from thence to Port Dalhousie? I have always thought there was a better route for the Canal down the mountain: I would not have gone down Dick's Creek, unless satisfied by the Engineers that it was the best route. I would have gone as straight as possible to Port Dalhousie.

#### [WITNESS WITHDREW.]

The chairman reported having received a communication addressed to the Honorable the Speaker, from J. B. Yates, Esquire, which was read by the clerk, and is as follows:

ALBANY, January 26th, 1836.

To

The Honorable the Speaker of the House of Assembly, of the Province of Upper Canada.

SIR.

I have recently received some numbers of a printed paper, entitled, The Welland Canal Journal, in which there are many communications from William J. Mackenzie, Esq., on the subject of the

transactions of that company.

These communications have not been made in his character as member of Parliament, but presented to the public by him as an individual, or at least, not in any more important relation than as a Director of that Company. I solicit, therefore, permission to submit to the Honorable the House of Assembly, through you, some observations relative to the course he has chosen to pursue, and also a very brief examination of the charges made by Mr. Mackenzie, so far as I am concerned.

I would not have felt myself authorised to address this letter to you officially, if it were not, that the communications may be considered more important for having emanated from a man placed in the Board of Directors, by the House of Assembly, to represent the Provincial interest; and more especially, as the

facility of transmission in the nowspaper form, has been adopted to send, and widely to diffuse his exparti-statements, and in many important particulars, untrue and calumnious averments, throughout the whole country, not only in Canada, but every where, to all interested, and many not interested in the Canal.

If he has acted as a Director, it is, indeed, a matter of surprise that he should have adopted this highly exceptionable and irregular mode, instead of preparing a proper representation of his facts, and presenting it to your Honorable Body at the Annual Session. He has not done so, and the singularity and impropriety of his course remains unexplained, except by the shallow pretext, that His Excellency the Lieutenant-Governor of the Province had not yet issued a proclamation convoking Parliament. One of the objects of this communication is to show, that the publication of his calumnating charges has been induced by other causes, and arising from judicious measures contemplated by the stockholders for relief and security, both to themselves and the Province.

Viewing the Company with reference to its debts and satisfied that its operations must be embarrassed even with entire faithfulness in the performance of daty on the part of the Directors, I made enquiry in a quarter where I thought and still think correct information might be obtained, whether a negotiation for a loan sufficient to pay the whole debt of the Company, and provide amply for the renewal and enlargement of such parts of the canal, as would render it more convenient, could probably be succossfully made. The answer I received was decidedly invorable to the whole extent of what we I submitted this information and might require. applied to the Company for authority to negotiate a loan for that purpose. When the proposition was submitted to the Board, Mr. Mackenzie resisted it with warmth; it was however, carried, since which he has made every effort to counteract such negotiation, and has adopted this sinister mode to effect this object; endeavoring thus to impair the prospects and credit of the Company in the estimation of monied men. I have requested the Secretary of the Company to make out a copy of the report of the committee, consisting of the government directors, who made the last negotiation and arrangement with the Hydraulic Company, which you will see from the terms of the contract is closed. That report contains a history of the transaction, including the resolutions and proceedings on the first purchase, together with the names of the directors present at each meeting. You will readily perceive, on examining it, that the whole transaction from the beginning to the end has been conducted with the greatest regard to what was thought to be the interest. of the Company, and with the utmost publicity and deliberation as well as fairness. In no one instance has any agreement or arrangement been made without an entire concurrence of all the government directors as well as the other members of the Board. Indeed I do not know in what manner to conduct my affairs, if my transactions with the Welland Canal Company have, properly, subjected me to censure, and particularly as I must be deeply and largely a loser, if the canal be unproductive. Mr. Mackenzie has said that I had always a sufficient number of votesto controus the election of directors.

This will not be denied. My friends and I own, either in our own names or in the names of others, nearly or quite, three-fifths of the stock of the Company in the hands of private persons. Many of us took a portion of this stock for the sake of sustaining the Company in its utmost need, and to prevent its forfeiture. But in the exercise of this power on my own account, and as the proxy for my friends, I refer with pleasure to the manner in which I have used it.

The Directors appointed by the Legislature were retained in office; and as they resigned, were their places supplied, and always without any difference of opinion. They were gentlemen of the first respectability. I never considered their selection a choice develving on me, but a favor they conferred on the stockholders, to be willing to serve as directors. Until the change in the usage of the Company was introduced by Mr. Mackenzie, no director had charged any thing for his services—except that his actual expenses were paid. I have been told that the pay for attendance is now four dollars per day, insisted upon and demanded by Mr. Mackenzie himself, and that such allowance has been made for all the time employed in the examination, the result of which with all the exaggeration and dark coloring his malignity can give it, has thus dishonorably, and in violation of faith and duty, been published.

1 have seen a certificate from Messrs. Bowery and Barns, the two gentlemen appointed by the Board of Directors to re-examine the accounts, from which I think, the inaccuracy of Mr. Mackenzie's views must be evident. I leave this however for correction by particular examination, merely remarking that I am at a loss to perceive how the public interest or that of stockholders can ever be promoted, even if there should be errors or mismanagement by adopting such a course as Mr. Mackenzie has thought proper to take. But to return to those acts in which I am personally implicated. In one view he appears to me to be placed in a dilemma-I am charged by him, with being descreedly a loser by the canal, because the directors who had the control of it were chosen by me, and that of course, I was stupidly sustaining their mismanagement to a large extent, at my own expense; and then again, I am charged with sagacious arrangements with the Company, from which I derived large pecuniary advantages.

I believe that I might with confidence leave this personal subject to the care of the gentlemen in Canada, who know me and have seen my anxiety and efforts—an explanation however may be proper. It is true my expenditure on the canal, and in improvements along the line of it had occasioned em-barrassment and want of money. I supposed that as a portion of the money the Company then had would lie idle, it would be no injury to its interests, but an accommodation to me, if for a time, and until it should be required, I could have the use of a part of it and pay interest on it. I therefore made the application contained in the letter, a copy of which he has published, and borrowed £2,500. But when this assertion was made by Mr. Mackenzie, he neglected to say that a great part of it was then repaid by me, and the remainder has also been fully paid. This was a temporary convenience but bears no proportion as a return to the amounts paid by me, or procured in aid of the operations of the Companyat previous times. I acknowledge that no exertions of

mine in favor of the Company would entitle me to an accommodation of this sort, if there was danger of injury from it; but there could be none with the means of security within reach of the Company.—

The directors considered the matter in that light, and the resolution authorising the temporary loan will shew their view of it.

I have in my own right stock to the amount of \$128,500, and I own one-third of \$36,500, the other two-thirds being the property of Archibald MIntyre and Henry Yates, besides \$25,000, owned by Mr. McIntyre individually. We were originally stockholders, and have lost the interest on these sums from the times of their payment, in addition to this I have personally expended large sums in buildings and improvements on the property along the line of the canal. The Hydraulic Company did not desire to sell, and it was only in compliance with the urgent request of the public directors, that it was done. I am not desirous on my own account, that the government shall take the canal, and therefore would comply with any reasonable measure by which the whole debt of the Company, adding to it if desired, the stock of Upper Canada, should be consoledated, and a distant future day fixed for its payment, on the regular payment of the annual interest.

By a measure of this description, the government would retain the whole canal as security, leaving the stockholders unannoyed by the danger of such heartless and reckless interference as they have recently experienced.

Not knowing what may be the present public impression in relation to the propriety of purchase from the private stockholders—I have merely alluded to it. I am however satisfied, that if we had been permitted to continue unmolested, and we had received from Mr. Mackenzie an official and candid exposition in the proper channel and form, instead of one so directly its opposite, we would now be enabled to raise money from capitalists on our own responsibility, to pay off the Government debt entirely.

To recur, however, to the charges of Mr. Mackenzie. He censures my having received £500 for going to England, and, during an absence of six months, having succeeded in relieving the necessities of the Company; and also, in another transaction, having received one per cent commission for negociating a loan in the United States. He is mistaken in the assertion, that the loan was negociated at Buffalo. It was negociated by me in Philadelphia, and, under the then circumstances, accomplished with some difficulty; and here I beg leave to suggest, that previous to that time, no loan had yet been made, even under the direct security of the Province, at less than six per cent per annum. The whole sum received by me from the Company for these services, for which I was absent six months at one time, and at another was engaged in travelling and negociating a great part of the Spring and Summer of 1831, bearing my own expenses, was one thousand pounds. The whole amount of this sum is certainly small enough for the services, and more especially when it is considered that no individual connected in interest, or associated with the Canal, has made both personal efforts and pecuniary sacrifices for its sustentation during the ten years past, in any degree to be compared with mine. I make

this assertion confident of its perfect accuracy, and do it only because required by existing circumstances.

I grant that others have been assailed for their persevering efforts in support of this work with great virulence and acrimony; but when they defended themselves successfully against any unjust aspersion, the injury ceased. I am not so placed; if the prospect of the Canal is darkened—if its hope of making a fair return upon the outlay is weakened, personal vindication will not restore my rights. The other gentlemen who have been wantonly assailed are in the Province; they have a full opportunity of repelling the calumny. I am a foreigner, necessarily absent; but I trust, with unshaken confidence, that my character, my rights, and my interest will be sustained and protected from injury, when assailed by a man, clothed by the Honorable the House of Assembly, with a power which he has manifestly abused, and who appears to have no conception of the honorable obligation by which a public agent, so placed, should be governed.

I am, Sir,

With the greatest respect and esteem,

Your obedient servant.

J. B. YATES.

Mr. Mackenzie again called, and further examined.

[By Committee.]

51. Your 14th charge against the Officers, &c. of the Welland Canal Company is as follows:—
"Fraud and deception have been practised to induce persons of wealth and property to invest their funds in the Welland Canal; and in this system of deception the British Consul at New York has been un important actor." What proof can you bring forward to prove these accusations well founded?

[The evidence produced by Mr. Mackenzie in support of this charge, and that brought by Mr. Merritt in explanation thereof, the committee has ordered to be expunged.]

Tuesday, 23rd February, 1836.

Committee met.

PRESENT.

JAMES EDWARD SMALL, Esq., Chairman.

Messieurs Chisholm.

Gibson.
M'Donell.
Parke.
Roblin.
Shaver, and
Thorburn.—S.

Mr. Mackenzie again called, and further examined.

[Br Committee.]

52. What have you to submit in support of your charge No. 21?

WELLAND CANAL MANAGEMENT IN 1833, UNDER MESSRS. ROBINSON, MA-CAULAY AND SHADE, PARLIAMENT-ARY COMMISSIONERS.

### CONTENTS.

Messrs. Merritt and Robinson try to stifle 'enquiry,—600 Shares taken by Parliament,—Arbitrators and Commissioners named,—Mr. Robinson to be their Resident Manager—their Report—Mr. Wright to be their Engineer—Wages to be paid Mr. Robinson—a W. C. Committee, 1833–34—their Opinion—the Company ask a Statement of Accounts—which is not easily obtained—Mr. Macaulay's Explanation—Mr. Robinson asks a Balance—the Commissioners Accounts analyzed—they are very incorrect indeed—List of Blunders—Vanderburgh's Stone Accounts—Crosses—a Plan for keeping Accounts—Cyrus Rose's Accounts—Keefer and Barrett measure Boyle's Work, and disagree—Rose's Payments—Commissioners omit to charge many Payments made by them—£200 lent the Company—Thomas Merritt's Pier Contract—Blunders in Vanderburgh's Bill—The Commissioners' Contingent Bill—Remarks—Crosses—Vouchers—Work for Lessees of Mills—1000 gallons of Whiskey—Appendix containing Original Documents or Copies.

One of the most interesting statements I can possibly lay before the Province, as an example by which to profit in future, is the account of the expenditure of thirty thousand dollars of the money of Upper Canada, under the superintendence of Commissioners W. B. Robinson, John Macaulay, and Absalom Shade, in the summer of 1833.

Instead of entrusting vast sums of money to individuals wholly irresponsible, and then turning round, when all confidence in them is gone, and employing others equally deficient of checks and accountability, surely, an efficient Board, possessing at once the confidence of the governors and the governed, would be infinitely preferable, when acting under the sanction of a well defined law. Mr. Yates frankly admits that public confidence in the Canal Board was entirely at an end when the Commissioners were appointed. I quote his words:—

Extract of a Letter from Mr. J. B. Yates, of the Firm of Yates & Macintyre, New York, to a Select Committee of the House of Assembly of Upper Canada on the Welland Canal.

"At the end of the year 1832, the Directors again found their funds exhausted, the Company deeply in debt, and without any means or credit to prepare the Canal for the business of the Spring. On this representation, I am told, the most unbounded vituperation was used. Some of their oldest and warmest friends faltered, and nothing more was done than the purchase, on the part of Government, of £7,500 of the remaining capital stock of the Company, on the express condition that this money should be expended under the direction of three Commissioners appointed by the Province; with such limitation and restrictions, as to imply a Legislative consists on the Board of Directors, or agent, for misapplication of money—and an engineer was employed to examine and report upon the work. In all this no provision was made for the payment of the debts of the Com-

pany, and its creditors were, in some instances, ruined by proscrastination."

On the 13th day of February, 1833, an Act was passed authorizing the Government to subscribe for, and hold as public stock, 600 shares, equal to £7,500, of the Stock of the Welland Canal Company.

It provided that the whole sum should be expended in deepening the Feeder, repairing the Canal, and in defraying the expense of a survey to be made by a competent Engineer. And it appointed Absalom Shade and W. B. Robinson, Esqs., Members of the Legislature, and John Macaulay, Esq., Postmaster at Kingston, and now a Member of the Legislative Council, Commissioners to superintend the said expenditures, and otherwise to carry into effect the intentions of the statute, and authorized them, in conjunction with Samuel Street and David Thorburn, Esqs., to determine the amount of damages done by the Welland Canal Company to individuals holding lands adjoining the navigation, and provided that the award of any three out of these five should be final.

It does not appear that the Board of Arbitrators, thus constituted, ever met to fulfil the duties imposed on them. The Commissioners met at Toronto, on the passing of the Act, and decided that Mr. Shade and Mr. Robinson should inspect the whole line of Canal, which, it is presumed, they did. The Directors of the Company then recommended that one of the Commissioners should give his attendance on the line until the Canal was rendered navigable, and Mr. Robinson, being entrusted with this duty, became the Resident Commissioner.

A Report was made by the Commissioners on the 7th of December, 1833; it is signed by Mr. Macaulay and Mr. Robinson, and forms part of the Appendix to the Assembly's Journal, Session 1833-4, commencing on the 79th page.

The commissioners there state, that "Mr. Robinson had made the necessary contracts and managed the disbursements."

That "a detailed account of the expenditure of the money appropriated by the Act, particularizing its application, would be submitted."

That they had employed Mr. Wright of New York, as the Engineer to survey and examine the canal, and that his report was annexed to theirs.—[It commences at page 81 of the App. to the same vol.] And, as the money, the expenditure of which had been entrusted to them, could not be borrowed at 5 per cent, the difference would have to be made up to the Receiver-General.

# MR. ROBENSON'S WAGES FIXED.

Instead of presenting a detailed statement of their expenditure under the Act, and leaving it to the Legislature to judge of its correctness, and of the extent of the remuneration which should be severally made to their for their services. Mr. Macanlay, in a note to their report, mentions that he and Mr. Shade had agreed that out of the mones ordered to be expended on the Canal, \$5 a day, should be deducted by Mr. Robinson for his attendance, and it appears that that resolution was acted upon.

A WELLAND CANAL COMMITTEE.
On the 6th of December, 1835, the House of As-

sembly, after having negatived a motion made by Mr. Perry, that the accounts of the Welland Canal Company, should be laid on the table for the inspection of members, referred them to a Select Committee, composed of Messrs. Burwell, Samson, H. Jones, Berczy and McNeilledge, with authority to summon such documentary evidence as they might think necessary.

This Committee reported about six weeks afterwards, and their report concludes as follows:

"As the Committee had not before it the details of all the sums charged in the several accounts, they could enter into no scrutiny of their correctness; but as, undoubtedly, the whole have been audited by the Commissioners appointed by the Legislature, as well as by the agents of the company, it is presumed no improper expenditure was allowed to pass unnoticed."

The members of the committee were in constant communication with Messrs. Shade and Robinson, two of these commissioners, and with Messrs. Chisholm and Elliott, the Provincial Directors for 1833, all of them being then in the Assembly; and either of these gentlemen could have informed them that the commissioners had neither examined nor audited that expenditure, of the correctness of which, the committee, after enquiry, thus proceeded to declare its ignorance.

The committee appear to have made no enquiry after the details of the expenditure, of that part of the Welland Canal monies, for the year before them, which had been entrusted to Messrs. Macaulay, Shade and Robinson, and these gentlemen did not fulfil their promise made to the Lieutenant Governor several months previous, to submit the details duly audited.

The records of the canal office, show, that on the 20th of March, 1834, Mr. President Merritt thus addressed the commissioners, through Mr. Robinson, for an account of their expenditure.

"The object of this letter, is to request you will make some general statement, shewing the amount of your receipts and expenditures, stating what you now require us to pay, so that we may proceed with authority, and with an understanding. The accounts should first go through the commissioners for approval." &c.

The Commissioners did not render the account of their expenditure as required.

I find that applications were made from time to time to the Board of Directors, for the payment of debts; or balances of debts contracted by the commissioners; and that at a meeting of the Canal Board, held at St. Catharines, on the 6th of November, 1834, at which Messrs. Merritt, Duncombe, Butler, and Chisholm, were present, it was ordered—

"That W. B. Robinson, Esquire, the acting commissioner, be written to for a statement of the expenditure of the £7,500; placed at the disposar of the commissioners; that the same may be entered on the company's books."

The application was made as directed, but the commissioners continued to waithold their accounts from the company notwitistanding.

The first Session of the new Parisment assembled

in January, 1835, but although one of the first of its proceedings was to demand of the Welland Canal Company an account of their receipts and payments, the Commissioners continued to neglect to send the accounts and vouchers promised in their report of 1833.

At a meeting of the Board of Directors, held 2nd of July, 1835, present, Messrs. Merritt (President), McDonell, Butler, Thorburn and Mackenzie; it was ordered,

"That the Secretary be directed to address Lieutenant Colonel Rowan requesting that the original accounts and vouchers of the expenditure of £7,500 granted to the Welland Canal Company in 1833, and expended under the authority of W. B. Robinson, A. Shade, and John Macaulay, Esquires, Commissioners for expending the same, be transmitted to the office of the Company for reference of the Directors, and subject to be returned to the proper office in Toronto—reference to the accounts being necessary in consequence of applications to the Company for various balances due to individuals, contracted over and above the amount of the Parliamentary grant entrusted to them."

Finding that I could not clearly understand certain accounts of 1832 and 1833, without reference to the Leger of the Commissioners, and that the above resolution had not had the desired effect, I addressed Colonel Rowan on the subject, and my letter was enclosed by him to Mr. Robinson.

On the 11th of August, I wrote Mr. Macaulay that Mr. Robinson had promised to send the accounts, but that he had kept them back beyond the period I could have best spared to examine the general expenditure of that year. His reply is annexed.

It appears that he had "been fully impressed with "a belief that the accounts were in the possession of the Government, and before the Legislature, in "the month of January, 1834;" and that being desirous that a statement of disbursements, supported by regular vouchers, should be appended to their report, as was usual with all public commissions to which he had been a party, he had waited some time after presenting it in December, 1833, for the receipt of some vouchers which Mr. Robinson said he had ordered to be sent to him from St. Catharines, but was at length obliged to return home, "with an "assurance from Mr. Robinson that the accounts "were all correct and regular, and should be got "ready as soon as possible."

Mr. Macaulay is of opinion, that "if the accounts "have been long in possession of the government, "no censure can attach to the commissioner, if the "company should have failed in obtaining a copy of them. If, on the other hand, no accounts have yet been rendered, the chief responsibility for this extraordinary remissness rests with Mr. Robinson. "He (Mr. M.) has however, so much confidence in that gentleman's honour, and habits of business, as "to believe that he can exonerate himself from the blame to which as the matter now stands, he would "appear liable."

But is not the charge of "extraordinary remissioners" also applicable to the other commissioners!—
They were associated with Mr. R. by an Act of Parliament,—every proceeding was taken in their all funds as follows:

joint names, and with their implied approbation.—
They had acted as commissioners—and as such had not failed to demand and obtain payment of their own bills of contingent expenses. Was it not then a duty incumbent on them to account for the money entrusted to them by the country, to examine the charges and see whether they were such as they could justify? Instead of doing so they allowed years to elapse without asking a single question on the subject, and at length, in August, 1835, one of their number transmitted an account of their transactions, which the others had never seen, and which no one will ever be able fully to understand. In this account he determined the term for which he had paid to himself \$35 per week, and concluded a letter to the Secretary as follows:

"If the small balance due me can be paid to Mr. "M'Cormick, it will oblige me. I should sooner "have asked for it but always intended going over "to your office myself with the account; thus various circumstances prevented."

# THE ACCOUNTS.—ERRORS.

How far Mr. Robinson had examined and audited his own accounts or those of the superintendents employed by the commissioners, and how far he could with propriety claim from the company a "small balance" beyond what he had retained in the course of his intromissions, the public will be able to form an opinion from the facts; which are as follows:

1833.

Messrs. Macaulay, Robinson, and Shade, Commissioners, in account with the Welland Canal Company.

Dr.

To cash, the value of 600 shares of the Company's capital stock, placed in their hands to expend on behalf of the Corporation, £7,500.

To sundry items charged twice by them, as per accounts numbered—and to overcharges on the accounts of the superintendents, as per statement numbered three—also to cash 'paid Mr. Commis sioner Robinson's order in favour of Goodenough. [I have not added the amount until W. H. Sanderson, John Moore, N. Robb and others can be examined.]

Cr.

By the commissioners' General Bill of Expenditures, received by Mr. Clark the Secretary, 4th September, 1835, £7500.

By sundry sums paid by them, which they have forgotten to charge in their detailed bill of expenditures.

The difference will be the unexpended balance due the Company.

I perceive by reference to the books of the Wel-Canal Company, that they have paid of interest and debts contracted by the commissioners on their account, £316 6 4, but these payments do not affect the above account, and are therefore not included in it.

Mr. Robinson classes his expenditure of the Canal funds as follows:

Payments by S. H. Farnsworth, per his account and annexed receipts, Payments by J. Donaldson, per do do Payments by Cyrus, Rose, per do do Payments by J. Fisk, per receipts Miscellaneous payments (by Mr. R. himself) per vouchers.	657 678 242	11 6
	£7500	00

#### No. 1

On comparing Mr. Robinson's miscellaneous payments with the vouchers, it was found that he had charged the following items against the Company twice. First, as payments made by Rose, Farnsworth or Donaldson; and a second time, as if they had been receipts for money paid by himself, over and above their expenditure.

1. Widow McKeefer, boarding, 12th March, charged to and paid by Donaldson, £12 10 0.

The other \$50 should be at Donaldson's credit, and deducted from W. B. R's detailed statement, £12 10.

- 2. John Toyne, Mar. 9, paid by Donaldson, and charged also, and properly by him, £6 5.
  - 3. Wm. Murray, Mar. 11, do. do. £2 10.
  - 4. Henry McKeefer, Mar. 28, do. do. 10s.
- 5. John Fisk, Mar. 12, charged in W. B. R's detailed statement as a payment to John Vanderburgh; but the receipt and Fisk's account shew that it was also charged by Mr. Robinson to the Company in his settlement with Fisk, £7 10.
- 6. Silverthorn—a payment made by Donaldson and charged as per voucher £2.
- 7. Thomas Merritt, jun.—a charge made in Farnsworth's schedule, Sept. 20, but for which he had no voucher, it being part of £200 paid on piers, and charged by Mr. R. Oct. 16, per receipt, £50.
- S. Andrew Thompson, June 14, for 50 yards gravel, paid by Cyrus Rose, and so stated in A. T's general bill, of which Mr. R. paid the balance on the 7th of August £7 0 71.
- 9. Carson, Sloan & Co. April 17, were settled with and the balance paid them on a bill of £34 17 5, the whole bill is charged, altho \$20 were paid by Donaldson on it, and charged by him £5.

The following sums are to be deducted as overcharges, the same being charged twice in different shapes, in Mr. Robinson's detailed account; as per statement of particulars annexed and numbered 1 to 6.

_	<u> </u>	***	
_	1. Johnson Orr, do	£ 3 10:0	=
	2. Henry McKeefer, do	2 10 0	
	3. John Vanderburgh do	75 0 0	
	4. John X Shore, do	·  10 0 0	
	5. Thomas Martindale, do		
	6. And w Radeliff & Co. do -	12 10 0	

James Hands, (doubtful) - - - -£ 8 8 0 8. David Fleming (doubtful) - - - -

Nos. 7 and 8 I am rather doubtful of, and the accounts of John Moore, Nehemiah Robb, and W. H. Sanderson will require the powers of a committee to bring the purties to testify and show their books.

#### No. 3.

Farnsworth's detailed statement of payments amounts to a less sum than is charged by the Commissioners, the difference being £104 2 2.

Rose's do. do. do. do. £98 8 13.

Total £202 10 31.

Donaldson's detailed statement amounts to more, by £8 14 11½.

Overcharge £193 15 4.

Johnson Orr's accounts in March, April, and May, amount to £49 8 0.

The payments by Mr. R. and Mr. D. to £49 6 5.

There is a separate account dated April 5, and endorsed by Mr. R. April 29, also a receipt of that date as an account £3 10 0.

This money was to pay 4 cwt. superfine flour and 2 cwt. shorts to Geo. Keefer, I have therefore added it as an overcharge.

There is also a receipt of Orr's in November 16. for £12 6 101, paid him by Farnsworth, "for three several bills" for dredging, &c., but they were not forthcoming, and F. could give no information on the subject: I allowed this bill.

3. H. McKeefer, 43 days assisting Engineer, to 13th May, £10 15 0.

Payments thereon:

9th May, in part, €2 10 0.

13th May, in full, £10 15 0.

Total £13 5 0.

Overcharge by Mr. R. £2 10 0.

4. John Vanderburgh's account for teams, hauling stones, settled April 11th, 1833, is £133 13 24.

Less, certain accounts paid in detail, £7 18 (Charged as one payment)

But it appears by the vouchers, the time, and Mr. V's statement, that he never received £125 at once; that £50 were paid him on account, Ist April, (by Mr. Clark, in two payments to Mr. R's order) and that there were other partial payments; one of them is also charged by Mr. R., besides the final payment, as follows:

£25 0 0 50 0 0 February 25th April Ist

Overcharge, £75. (See Mr. Clark's Leger, pages 3 and 10.)

I examined Mr. Vanderburgh himself, respecting this account on 3d October. Ite says the first pay. 6 And w Radchiff & Co. do - 12 10 0 ment he ever had of the commissioners, and the first imen he say them, was the show \$25,00 the 25th overcharge on several other accounts, Mr. R having of February in part of the account for handing stone, no detailed statements and the parties not having attended to explain until called by the Legislature. on taking the lock contract with Ostrum (see pages 3 and 4 of Mr. Clark's Leger)—that the £50 on 1st of April, was a payment on the account of hauling the stones, and that Mr. Robinson counted these and other previous payments, when he settled with and paid him the balance in his own house, on the 11th April. Mr. Robinson cannot give any account of the matter, except as is shown by the bills. Mr. Vanderburgh says he never received \$500 of Mr. Robinson at any one time, as stated in the receipt of April the 11th. The voucher and Mr. Robinson's order of April 1st, mention that the payment was on account of the hauling of the stones. The Commissioners' general account says it was "on account of Locks." The errors in computation, and the extra credits on the payments to Mr. Vanderburgh, are entered in another part of this report.

5. John ⋈ Shore, for completing cribs at Vander-burgh's, charged April 5th, £18 10s.

The receipt is altered from £S 10s.—the order by Farnsworth being £S 10s.; the entries in Mr. Clark's book the same; and the mark by Shore not certified by any witness, £S 10s.—Overcharged £10.

- 6. Thomas Martindale—his contract, account, and payments are correctly entered, but his bills of labour and board contain a double entry; £10 paid and charged June 1st, being a payment on the account [board included] extended in full, £21 2s. 7½d. June 24th, [See Mr. Clark's book.] £10 additional wages are also charged by Mr. Robinson, same day.—Overcharged £10.
- 7. A. Radcliff & Co.—Their bill for June, July, &c. [with time lists] amounts to £51 10s. in payment of which John Donaldson paid them [and has charged per voucher left in the Canal Office, 25th August,] £12 10s. Mr. Robinson paid the balance in October and instead of charging the difference, claims for the whole account. This overcharge is £12 10s.
- S. James Hands and Erwine, a payment to them in part of J. Fisk's estimate for quarrying stone, and so charged in Mr. Clark's book, page 12, charged also separate by Mr. Robinson, April 18th, & Ss.
- 9. There is a payment to D. Flemming, on the same contract, March 12th, which, it appears by Mr. Clark's book, forms part of Fisk's book, quarrying paid by estimate. [See page 12, Clark's Leger, £5.]

#### DONALDSON'S ACCOUNTS.

The Commissioners charge £657 10 for expenditures under the care of Mr. J. Donaldson, and refer to vouchers. I found three schedules enclosing receipts taken by him, amounting to £494 10 7, and he had paid £75 18 9, the balance of the commissioners' money, into the office of the company. sums left a deficiency of £87 0 71, which Mr. Robinson accounted for, by stating, that he had forgotten to enter in the bill of disbursements, and to take a receipt for Mr. Donaldson's wages, and for other \$60 paid him for the use of tools. Mr. Donaldson was sent for, and gave the receipt, and charged nearly \$40 more for expenditures, for which he had no vouchers, but which seem to have been made, by a reference to his book, which he sent me down on his return home. There was an error in his schedules, P. Tomkins being entered &S 8 11, instead of Ss. 11d., which was checked. I credited Mr. Robinson every disbursement

he charged under this head, whether it was vouched for or not.

Mr. Donaldson's book had entries of \$25 more, as paid by him to John Toyne, than Mr. Robinson had given him credit for. If these entries be correct, he loses the \$25; he had also some other entries, such as \$8 paid to Ewers, &c., which are not in his schedules.

One of the receipts sent to the Canal Office mentions places where a variety of tools had been left. I questioned Donaldson about them, for I find that a large aggregate sum is charged for tools and implements. He said "all go off in the Fall," unless there be care taken. I remember that last year, in Toronto, all the tools were returned by adhering to a regular system of entries and receipts of such articles.

The commissioners charge John Donaldson with cash for disbursements, &c. as a superintendant, £657 10s. They support this charge, by reference to three schedules and two receipts amounting to £491 11s. 7 1-2d.

A receipt for Donaldson's services and use of tools, £74 5s.

Repayment to canal company, £75 1Ss. 9d.

The 2nd \$50 of E. M'Keefer's \$100 for board, entered in Donaldson's book as a payment made by him, and deducted from commissioners general bill [\$50 \times \$50 \times \$50] £12 10s.—Total £654 5s. 4\frac{1}{2}d. Deficient £3 4s. 7 1-2d.

But he claims payments without vouchers £9 9s. 7d. to which add a \$10 receipt from Aikens.—Assuming this balance to be correct, I have placed it to the credit of the commissioners in addition to their claim, but it is probable that Donaldson has paid in a larger balance at the canal office than he really had in hand, exclusive of Toyne's \$25, elsewhere noticed. Some of Donaldson's voucher's are crosses not witnessed—others refer to no particulars of service done or materials furnished. John Beatty received \$159 from Donaldson at various times to expend, but there is no voucher for any part of his payments, only a memorandum noting, that he had paid out \$109. I admitted the whole account without any other explanation, for this is now the third year, and the memory of laborers in such cases is not good.

### WHISKEY.

There is one matter which appears to me to require clearing up, although I have admitted it as the receipts are given in. It is a charge for whiskey of £29 9s. Sd. There is an invoice of four barrels purchased of Mr. Kirkpatrick, of Chippewa, April 1st, by Mrs. Paterson at 3s.—this is charged to the commissioners: then on the 9th there is a purchase of a barrel from Mrs. Paterson by the commissioners at 3s. 6d.—Again, on the 10th, there is another invoice of four barrels in Mrs. Paterson's name at 3s. and that also is charged to the commissioners—i.e. nine barrels or 300 gallons in ten days.—There are other large May bills for the same liquor, and a purchase at same place of two barrels on the 12th of June. I cannot help thinking that there is some mistake, for the number of men employed could not possibly warrant such whiskey bills under any system.

FARNSWORTH'S ACCOUNTS.

I sent for Farnsworth, who resides in St. Catha-

rines, to explain his accounts, and in some few cases he did so. In a great many instances he appeared to know little or nothing about his receipts and payments—They having been placed in the hands of an innkeeper in Thorold, of the name of Huntly, who took charge of his papers when he was unwell and unable to superintend the workmen. These receipts often refer to vouchers, bills, contracts and estimates which are rurely forthcoming, and it therefore remains a problem resting on the authority of Farnsworth's delegate, whether many of these services were really performed, or whether the parties named ever had a being. It is impossible to cavil at a receipt like the following:

"Received, Aug: 19, 1833 of the Welland Canal "Commissioners, by the hands of J. H. Farnsworth, one pound nine shillings and half-penny.

# " WM. BRADLEY'S ⋈ Cross."

There is no witness, no signature, no time list, no service stated, and as for Farnsworth he told me he knew nothing about it and said the same of many more.

The following receipt of John Boyle, for £24 19s. is accompanied by no explanation or time lists, and Farnsworth had no documents or details to show—Mr. Robinson had none. It is a specimen of a class, and if such accounts be admitted as correct and business like, the control of money is taken from the Commissioners, the Canal Directors and the Legisture, and vested in S. H. Farnsworth, or his deputy, or the deputies of those who may hereafter be similarly situated. John Boyle, and there are two of them, may have done service, but the twelve pieces of job work should be duly enumerated.

"Received, Stone-lock, June 10th, 1833, of the "Welland Canal Commissioners by the hands of S. "H. Farnsworth, twenty-four pounds nineteen shillings and sixpence, it being for twelve pieces of "job work done by me and company.

# "JOHN BOYLE."

This is a specimen—vouchers, with bills of particulars, have been deemed superfluous in very many cases, but the whole of the documents will doubtless be submitted to the Legislature wherea correct opinion can be formed by those who may inspect them.

The Commissioners, in their Report of December, 1833, speak of Farnsworth as a clever superintendent; and it appears he was paid \$21 a-week for months, when he was sick and unable to attend. It was not unreasonable to expect from him that he would explain the errors and ommissions in his account; but when he did attend, he was exceedingly impatient to be off—his explanations were unwillingly given, and his whole demeanour showed a dogged determination to tell as little as he possibly could. Huntly was not sent for; Donaldson, the other superintendent, and Vanderburgh, waited willingly to give all the information in their power.

One of Farnsworth's bills, £8 17s. Id., (Burns & Bassett) contains a charge of July "15th, cash paid Gilleland, £2 3s. 1 1-2d." No one could inform me what Gilleland did for the money, but I did not deduct the account.

Farnsworth's statement of expenditures, called his cash book, is a document made out at one time by

Huntly; the payments are not entered in it regularly as alleged to have been made, but in a confused manner, after the fashion of the Commissioners themselves.

Farnsworth's charge of \$20 for tools, is not supported by any voucher, nor did he explain the transaction satisfactorily. 1 did not, however, deduct the claim.

£15 6s. 5d. were paid by Farnsworth, to John Boyle, 22nd November, for excavating and puddling; and £12 5s. 10d., by his locum tenens, Huntly, to Robert Cumming and Alexander M'Donald; October 17, for 82 days' work, 9 days' board and lodging and travelling expenses. The rate of payment, the time when, and the place where the labour was performed, and in the latter case, the nature of the work, are withheld. Farnsworth could tell me nothing more than than he had sent all his papers to Mr. Robinson. Mr. Robinson knew nothing at all about the transactions—and there was the alternative of admitting the receipts or refusing them—investigation in October, 1835, was out of the question. There were many such accounts—I admitted them all.

Crosses by principal, and crosses by deputy are very frequent among the receipts taken by Farnsworth and Huntly—but they are not witnessed, therefore no vouchers. I admitted them, however, in my calculations. On the 24th of October, Huntly manufactures a voucher for \$5, to one C. Franks, by adding "for C. Frank, Patty Conly's mark \times." On looking over the vouchers, I found (14th May) that Conly writes very well. Why then a mark by Deputy, to be enquired into at this distance of time?

I admitted the following receipt, although no service is specified, but rejected a subsequent charge of £10 for the same person, until a voucher of some kind or other were produced:—

"Received, St. Catharines, Sept. 9th, 1833, from S. H. Farnsworth, on account of the Commissioners of the Welland Canal Company, three pounds currency.

"SILAS ST. JOHN."

# S. H. Farnsworth's Accounts.

The Commissioners (see Mr. Robinson's general account) charge for expenditure by Farnsworth, £2,201 11s. 4 1-2d.

But the entries in his book sent to support this charge, which entries he (Farnsworth) declares to be correct, amount but to £2,124 5s. 5 1-2d.

Overcharge, £77 5s. 11d.

There are also the following errors to be deducted:—April 15, Robert Fletcher's receipt, overcharged, £1 5s.

Samuel Sands' board bill, charged twice—13s. 9d. Henry Ker's bill charged 30s. instead of 20s.—

May 13, Pat Conogan 43s. 9d. for 33s. 9d.—10s.

June 16, Order from M Chesney, no receipt to
E. M Arthur, &I 12s. 9d.

Sept. 16, Stephen Isles's receipt for 21s, 3d. charged 26s. 3d.—5s.

18, overcharge, Rufus Wright, 2s. 6d.

20, overcharge, John M'Comb's receipt, entered 57s. 6d. instead of 47s. 6d.—10s.

27, charged a payment made to H. B. Ostrum on Fisk's account, on 4th May, twice, namely, 4th May and 27th September. The voucher being for May 4th, £1 10s.

Nov. 13, Wm. J. Steward's bill 24s. N. Y. currency, extended as Halifax currency, error 9s.

10, W. H. Merritt, no voucher, £10.

St. John, no voucher, £10.

L. Dyer, no voucher, £2.—Total, £106 13s. 11d.

Deduct.

May 4, James Bradley's receipt under charged, Ss.

Aug. 14, John Shore's, 3s. 9d.

Nov. 16, John Messmore's, £2.

Nett overcharge by Mr. Robinson, £104 2s. 2d.

Cyrus Rose's Accounts.

At the time the Commissioners determined on their plan of operations, (if any plan or system they ever had) a day book and ledger, placed in the care of some respectable and intelligent youth, (and many such they could have obtained for one hundred pounds during the season) would have rendered their monied transactions less liable to confusion and distrust. They could not have remained ignorant beyond the first month, that Cyrus Rose was a most unfit person to expend and account for \$3,300, to be paid to a variety of individuals, in many small sums, from time to time, for labour and materials, the blame, therefore, rests on Rose's employers, and he has had too much employment on the Welland Canal.

Mr. Robinson, when he sent his accounts to Saint Catharines, did not attempt to state in detail, the sums expended by Rose; he sent neither check rolls nor board bills, but left us to classify the receipts and other memoranda so as to find out the particulars if we could. He afterwards brought over some of the check rolls and estimates, which we found useful.

Many of Rose's bills and vouchers bear no dates, and only a signature by Rose himself, with a cross without a witness. As to particulars, we were left in general, to guess when, and how, and where the workmen were employed; the receipts in a great number of cases have little or no reference to the monthly accounts made out by some person for Rose; to check such productions is impossible. every seeming voucher, no matter how, or when, or where attested, to be good, whether supported by a time list, or a date, or not. I assorted all Rose's vouchers for labour, materials, board contracts, merchant's bills, whiskey, &c.—and the amount was \$2,797 69. I directed the clerk to add together the time lists, the November bill, the board and laborers' wages, gravel, miscellaneous items and Rose's wages with Marshall's contract, and the amount, after deducting \$75 45 for board and labour paid by Donaldson at Rose's request, was only \$2,777 88.— The difference between the largest of these sums and the gross sum charged by the Commissioners as payments to Rose was placed to the debit of Mr.

claim from such vouchers as he produced. Mr. Robinson having stated that he had left the frontier at the end of October, and the check rolls and other memoranda for his two last charges of \$234 03 and \$152 61, for board and labour at the Grand River after the 16th of that month, and after the 16th of November, being deficient, I examined the Company's books and it was found that of the first ill the greater part had been paid by the Corporation in August, 1834, and that the Company had paid the whole of the second through St. John, &c. soon after the work was done! I accordingly disallowed the last bill, which the Commissioners, under the circumstances, ought not to have presented.

Mr. Samuel Keefer was employed by the Commissionersto measure Boyle's and Bradley's contract. He did so in April and found 3,369 yards. Mr. Barrett was next employed and he reported that there was 2,921 yards—the difference was \$112,—Mr. Keefer was considered in error, and Boyle and Bradley were paid by the corrected measurements. How much the Company may have lost by the incompetence of some of their surveyors and engineers we never will know, but such facts leave room for unfavorable inferences.

It appears that Mr. Merritt acted in conjunction with the Commissioners in their proceedings. In the contract with Hands & Co. £137 7s. 9d, Samuel Keefer, Engineer, certifies first, it is then written, "Examined and found correct, Wm. H. Merritt, Agent Welland Canal Company." On the back is endorsed an order for the money, and afterwards a receipt by the contractors.

Payments made to Cyrus Ruse by the Commissioners and others:

By Mr. Robinson, per his general account, £678 11s. 6d.

By Mr. Donaldson, November 16, £2 10s.— 18th. £2 10s. Oct. 10th. £12 10s. 11th, £12 10s.

By Farnsworth, Aug. 1st, &S 5s. Septr. 26th, &25. Nov. 1Sth, &25.

Amount paid by Mr. Robinson, Do. by Donaldson & Farnsworth	678 88	11 5	6 0

			=

To 16th Nov., 1833; per the receipts, bills, vouchers and memoranda sent by Mr. Robinson, \$2,797 69, - - - 699 8 5

Overcharge, - - - 98 8 1

# OMISSIONS OF PAYMENTS MADE.

and the gross sum charged by the Commissioners as The following items are to be added to Mr. Robpayments to Rose was placed to the debit of Mr. inson's detailed account, being payments made by Robinson, being much more than he had a right to him to many persons and not charged in the Commissioner's account, and for other errors in his favour:

- 1. Wm. Milburn's receipt, May 8th, short entered 5s. 5d.
- 2. Hiram Slate's receipt, May 17th, St. Catharine's post office, 8s. 2d.
- 3. Thomas Merritt, junior, admits in his general account the payment by Mr. Robinson of \$100 on 3d May, and \$50 for Tench, June, which items I do not find elsewhere charged by Mr. Robinson, 37/. 10s.
- 4. Alfred Barrett. I find an order to pay this gentleman 10l in the hand writing of Mr. Robinson, although the services are not stated, and although no charge is made by the commissioners, I presume the payment was made and have therefore credited it.
- 5. John Vanderburgh. There appears to have been paid him for repairs on the locks, to 16th of November, 1833, per contract, over and above the monies charged against him on the books of the Welland Canal, 74l.

When the commissioner, Mr. Robinson, came to St. Catharines, last September, he produced a memorandum of Mr. Clark's for 2001. lent the Company by a draft on Mr. McCormick in September, 1833, and declared that he really did not know whether he had or had not entered in the commissioners' general bill of disbursements all the payments made by Mr. Clark on their account from that fund. Mr. Clark's accounts are involved in as much confusion and obscurity as those of the commissioners, but I came to the conclusion on a careful investigation that all had not been entered. I think that on a further examination it may be made to appear that Mr. Clark has erroneously charged 201. or 301. to the Canal Company in this account, and should it prove to be so, Mr. Robinson will be entitled to a like credit.

It will have been observed, that \$200 charged by Farnsworth in a payment to T. Merritt, junior, and for which there is no voucher, was deducted from Mr. Robinson's general bill, it having been a part of 200l. on piers, for which he gave Mr. Robinson a receipt on the 16th of October—but as it was paid by Farnsworth, his (F.'s) account is not thereby charged. Farnsworth, on the 16th November, charges 103l. 9s. 2d. as paid to T. Merritt, in full of another account; on examining the details of which, I find that 25l. of it were paid by Mr. Robinson himself, through Mr. Clark, November 4th. If Mr. Robinson settles with Farnsworth agreeably to the statement exhibited to the Company, that 25l. should, undoubtedly, be deducted by him from Farnsworth's bill of payments.

Being associated with Mr. Butler and Mr. Thorburn, as a committee to enquire into the claims of Thomas Merritt, junior, on his Gravelly Bay contract for piers, I carefully compared the payments made that contractor in 1833, through the Company and through Commissioners, with the work done for each, and found that \$800 had been paid him in part of that contract by Mr. Robinson out of the funds entrusted to the Commissioners, which sum had never been charged to him (Mr. Merritt) on the Company's books, although paid at the express request of the Board of Directors. Had not Mr. Robinson been carefully questioned on this matter, ow-

ing to the wording of one of T. Merritt's receipts to him, the 2001. would have been absolutely lost to the Company.

Errors in the Commissioners' accounts which I have not deducted, but would recommend that they be charged to the parties whom Mr. Robinson has overpaid.

1stJohn Vanderburgh's account of 11th		".	
April, 31-2 days of team, \$51-4, extended \$50—error		3. 9	
56 cents extended \$5 06—difference,	1	26	
Another error of	0	10	

2. Aaron Helmer received six cwt. superfine flour of Geo. Keefer, 8th October. On the 18th October Mr. Robinson paid 25l. 9s. to Helmer in full of his job, without deducting the flour, which Farnsworth paid George Keefer for on the 16th of November. To be charged to Helmer 4l. 10s.

To be charged to J. Vanderburgh, - - - £12 7 3

Whether the greater part of the charges in the commissioners' account are or are not correctly calculated must remain a matter of doubt for the details are not forthcoming.

#### CONTINGENT EXPENSES

The contingent expenses of the commissioners and payments to engineers and interest amount to \$5,216, viz:

1. Wm. B. Robinson, in the beginning of his bill he enters "paid my own salary for 254 days, at 25s. per day (in part,) 2391. Ss. 5d."

254 days at 25s. is 317l. 10s. and this would leave a balance of 78l. 1s. 7d. due to Mr. Robinson, who in another account charges wages for 31 weeks and 5 days, February to October, 1833, at per week 35 dollars—\$1,108; extras \$46.

- 2. S. H. Farnsworth, foreman or superintendent under Mr. Robinson, 36 weeks and 5 days, at per week, \$21—\$771. Add horse keep, \$20; sundry charges \$30.
- 3. John Donaldson, another superintendent under Mr. Robinson, 79 days at \$3 per day, \$237.
  - 4. John Clark, for keeping accounts, \$160.
  - 5. Travelling expenses of Commissioners, \$155.
- 6. Cyrus Rose, superintendent, 81-2 months at \$30 per month, \$255.
- 7. John Macaulay, commissioner, bill of expenses, \$100.
- 8. Absalom Shade, commissioner's bill of expenses, \$731-2.
  - 9. Interest paid on loan to Government, \$712.

    And for engineering:
- 10. Benjamin Wright, 4 weeks, at per week, \$175; \$700; premium \$14.
  - 11. Sundry postages, \$47.
  - 12. G. Keefer, Engineer, 20 days at \$3; \$60.
- 13. Samuel Keefer, assistant engineer, 27 days at \$2 1-2; \$67 1-2.
  - 14. Alfred Barrett, Engineer, \$44.

And for Whiskey, about a thousand gallons, \$500 nearly.

The receipt of Thomas M'Chesney for £100 6s. 6d., dated 27th of May, 1833, is entered in the Commissioners' account as if it had been for £115 6s. 6d. The nett sum paid to M'Chesney I do not know; but as the larger sum appears to have been then due to him, I have made no deduction from the Commissioners' charge.

On adding up all the time lists and charges made by J. Toyne, it was found that they exceeded the payments made him on account by £3 7s. If, however, the \$25 which Donaldson has entered in his book as a payment made to Toyne, over and above the claims presented to the Commissioners by him (D.) be a correct entry, it will rather over-balance Toyne's claims, but I have allowed the difference to go to the Commissioners' credit as a surplus until further enquiry be made.

Between the 28th of April and 13th of May, £23 18s. 8d. are charged as payments to R. Hanna, but only £10 5s. are accounted for. It is, therefore, impossible to say whether the first named sums were all paid.

#### CROSSES.

About a thousand dollars of Mr. Robinson's acknowledgments for money paid, are receipts with the signatures in his own hand writing, and a > annexed, but no witness subscribing to the payment. These are no vouchers at all, and in most cases they do not even tell when, where, or how the parties were employed; neither the number of days, nor the rate per diem. Mr. Robinson, at this distance of time, recollected nothing about them, and it was impossible to say whether any of the payments were charged in another shape, or whether the charges were correct. In one place there is a Robert & Coote for £14, (Oct. 23d) and in another £6 3s. 8d. a partial payment to the same person by the name of William Cotes. Wm. Mac-Murray came forward to receive 56s. 3d. at Port Robinson on the 13th of May, and signed a receipt in a plain legible hand; on the same day, and at the same place, he received 36s. 3d. for John Reynold, and having lost the power of writing, he made his for three different persons' money; but there is no witness to their marks, nor are we informed what the service was. A £14 11s. 3d. receipt, dated May 13, has the cross and "Richard Johnson" to it, all in Mr. Robinson's writing, and the only explanation is "for work on the Welland Canal." It has evidently been altered, but I know not when. There are many such; but although I could get no explanation, I did not deduct them from the general charges. Mr. Robinson, when he thought proper to do so, called a witness to legalize the crosses. Fisk's vouchers are full of crosses; and I have little faith in them. Mr. Robinson states that \$233 of his expenditure in 1833 were paid for work which ought to have been performed by the Lessees of Mills, and ought to be collected from them, namely:

1.	Work	done	at	the	F	loom	at	Mare	h-		۱
	ville	Mill,	•	• •			• •		- 8	58 <b>08</b> .	١

Carried forward, - - - - 8 58 08

-	Brought forward,	18	58	08
2.	Stopping Water at the Floom of Bow-	1		
	ery and Butler's Mills, three different			
	times, at an expense of,	1	50	00
3.	Expense incurred by the Floom break-	1		
i	ing at Allanburg Mills	ļ.	25	.00

The mill rents were collected by the Hydraulic Company in 1833; but I do not find that they or the millers reimbursed the Canal Company for one shilling of the above expenditure. The Bowery

named here is the person employed to report for the Board of Directors!!!

There are about \$600 charged in May, on receipts not attested with a  $\bowtie$ , in sums from one to ten pounds, or more; but what service the parties rendered, or when, or how, or at what rate, it is probable that no one will ever know. I allowed them all; but with regard to the impropriety of taking such receipts, and then of withholding them until two or three years have elapsed there can be but one opinion. "Received from W. B. Robinson &8" 12s. 6d. in full, for work to this date, Richard Laffan," is a very imperfect voucher to be paid over as money, without explanation years after, to an incorporated Company.

Mr. W. B. Robinson's vouchers, with very few exceptions, were taken in the office or at a stated place, and not on the line of Canal, or in haste. Nearly half his receipts for the year were dated between the 8th and 13th May.

### 1000 GALLONS WHISKEY.

About a thousand gallons of whiskey are a formidable item of the expenditures of the Parliamentary Commissioners. Three hundred and nineteen galls., or about ten bris., were purchased on one part of the line in the course of ten days, and the receipts are often drawn in so ambiguous terms, as to leave room for the inference that there is more whiskey than appears on the face of the bills. Such unlimited supplies of whiskey must have incapacitated the workmen for the performance of their labour, and surely it afforded a pernicious example. On the line of the Delaware and Chesapeake Canal, the Directors, in their Report, of 1826, speak with unqualified approbation of the spirited, humane, and wise conduct of the managers " in expelling from their borders the pest of tippling shops, which had infested the whole line. These nuisances, by furnishing the pestiferous draught by day and by night, rendered the workmen, not only unit for labor, but the ready instruments of riot and disorder. When drunk, they frequently fell, exposed for hours, unsheltered, to the rays of the sun, and the evening dews—fever and death were but too often the mel-ancholy consequences." In the Annual Reports of the Ohio and New York Canal Commissioners the practice of temperance is strongly inculcated; and it is now a standing order of the Welland Canal Company to pay no bills presented for intoxicating liquors.

Although this is now the third year since the Commissioners received the proceeds of the 600 shares to expend on the Canal, neither the shares, nor the expenditure of the proceeds are as yet emerged on the books of the Company.

### Mr. ROBINSON'S MEMORANDUM.

"Thomas Merritt agrees to dredge and clear out "the Lock and between the Piers at Gravelly Bay "to eight feet water, and keep it at that depth during the summer for 150l. from the running into the "canal above the lock to the lake—also to make a "wing of stone wall each side of the upper end of "the lock, at one dollar per perch."

At a meeting of Directors held at the Parliament Buildings, York, (before Mr. Robinson had exhibited his accounts.)

PRESENT.

WM. HAMILTON MERRITT, Esq.—President.

ALEXR. M'DONELL, Esq.—Vice-President.

Messieurs Creighton, Elliott, and Chisholm.

It was Ordered—That the Board being fully satisfied with the zeal, industry, and ability of Wm. B. Robinson, Esq. the past season as a commissioner on the Welland Canal, they have determined on offering him the situation of agent of the Company at a salary of 400l. ber annum, to include contingent expenses, for the coming year, if he thinks proper to accept the same.

Mr. Robinson replied that he could not then conveniently close his business at Newmarket.

The following extract of a letter from Mr. Robinson, dated at Newmarket, 8th April, 1834, shews that he repented not having taken the agency: He says "times are so dull that I almost regret not having accepted your offer at the canal—I shall put all things in order, and be ready for any good thing next year."

It appears that no member of the House of Assembly, cognizant of the transactions of 1833, thought it expedient to insist last winter that Messrs. Robinson and Macaulay should exhibit their accounts.

# CANAL POLITICS.

The commissioners in their character of Arbitrators, gave no assistance to the settlers whose lands had been injured and wrested from them by violence by the canal agents. Indeed the commissioners could never be brought to meet to hear their complaints—when one could come another either would not or could not. The Canal Company most unjustly authorised the contractors to enter upon people's lands without having first compensated them. I have shewn by the letters hereto appended that both Mr. Robinson and Mr. Macaulay's correspondence is well spiced with politics.

When the Welland Canal Company were organized in 1834, General Beach, of Rochester, and Messrs. S. Ward and Alfred Hovey, of Montezuma, became extensive contractors—and the two latter subscribed largely for stock. After they had done work to the value of 45,357l. 12s. 1d. proceedings were taken against them which many thought harsh, and which we elsewhere state at length. Mr. Ward died of a broken heart, and Mr. Hovey's sufferings we have described in the Advocate of former years.

They were supplanted by Mr. Oliver Phelps, whom they had invited into the country,—Chief Justice Robinson was then a Canal Director, and he laid down a rule by which a settlement ought to be made with Messrs. Hovey and Ward, which was as follows:

### CHIEF JUSTICE ROBINSON'S RULE.

# (Office Copy.)

The Company cannot settle with Hovey, Ward, and Smith until they have an account furnished shewing under one view, all the transactions between them and the Company. This account must contain on one side all the work done and every item, (without regard to the balances ascertained by former statements) that makes the Company debtor to those contractors, and on the other every payment, and every other item that ought to go to the Company's credit, so that such general account may exhibit without reference to other accounts, not only the actual balance but the particulars from which it results, and the vouchers supporting it, must be collected and exhibited at the same time."

"This account also must be proved by its corresponding with a general balance sheet of the Company carried up to the same time and its correctness must be vouched for by the signatures of the Secretary, Agent and Engineer, and no items should be inserted in the account on either side of which the allowance and the account have not been perfectly settled."

"Every matter on either side which remains yet to be determined must be submitted on a separate statement as totally distinct from the general account."

LETTER.

Col. ROWAN to W. L. MACKENZIE, Esq.

Government House, Toronto, 12th August, 1835.

Sir,

I have to acquaint you that your communication of the 10th instant has been referred to Mr. William Robinson, one of the commissioners appointed by the 3d Will. 4th chap. 55, to superintend the expenditure of a sum of money on the Welland Canal. No information has been received at this office respecting the purchase of a Steam Dredging Machine.

I am, &c.

WM. ROWAN.

W. L. Mackenzie, Esq. St. Catharines.

LETTER.

JOHN MACAULAY, Esquire, to Wm. L. MACKENZIE, Esq.

Kingston, 17th August, 1835.

Sir.

It was not without assonishmen that I received on Saturday last your letter dated at the Welland Canal office, on the 12th inst in which you state that although every effort had been made to obtain the details and vouchers for the expenditure on the Welland Canal made by the commissioners under the statute of

3d Will. 4th chap. 55, yet up to the time of writing, the Company and the country were alike ignorant con-cerning the matter. You also express your surprise that the commissioners on the Welland Canal should have so long been the cause of impairing the Company's means of settling accounts in full, by withholding essential statements to which the public were early entitled, and which are essentially necessary to the Company for an understanding of what has been done with the proceeds of 600 shares of their own capital stock. You also add, that Mr. Robinson, one of the commissioners, has promised to send you the accounts, he nevertheless keeps them back beyond the period at which as one of the Provincial Directors of the Welland Canal, it would be convenient for you to examine

This communication I beg to repeat, has excited my I have been fully impressed with a ustonishment. belief that the accounts which the commissioners are charged with having withheld were in the possession of the Government, and before the Legislature in the month of January, 1834—I must now infer that such has not been the fact, otherwise instead of addressing the Commissioners for copies of the accounts, you or the Company, would have at once applied for them to the Executive Government and obtained them.

By reference to the report made to the Lieutenant Governor, on 7th December, 1833, it will be seen that Mr. Shade, the first named commissioner was absent from Toronto at the time when Mr. W. Robinson and myself the other two commissioners, met and prepared that document. You will observe it stated in the concluding paragraph of the report that a detailed account of the expenditure of the money appropriated by the act particularizing its application, would be submitted, I was desirous that a statement of disbursements, supported by regular vouchers should be appended to our report, as usual in all the public commissions to which I was named as a party. Mr. Robinson who alone has managed the pecuniary transactions of the Board, and acted during the season as resident superintending commissioner on the line of the Welland Canal, had not in his possession all the requisite vouchers, but informed me that he had requested their transmission to him from St. Catharines. After waiting some time for the receipt from that quarter of such vouchers as were deficient, I was obliged to return home, with an assurance from Mr. Robinson that the accounts were all correct and regular and should be got ready as soon as possible. Satisfied with this assurance and supposing that the Legislature would receive and examine the accounts before the prorogation. I have from that period absolutely and entirely dismissed the subject from my thoughts.

Since the Company however, through you as one of their Directors, complain of the failure of their efforts to obtain copies of the accounts—I shall not rest until I learn the actual situation of the accounts I shall immediately address my late associate, Mr. Robinson, and if the accounts have not been yet transmitted to the office of the Lieutenant Governor, I shall arge the necessity of instant attention to this duty. If the accounts have been long in the possession of the government, no censure can attach to the commissioners, if the Company should have failed in obtaining a copy of them. If on the other hand, no accounts have yet been rendered, the chief res Wat. H. Manners, Esq.

ponsibility for this extraordinary remiseness rests with Mr. Robinson. I have however so much confidence in that gentleman's honor, and habits of business, as to believe that he can exhonorate himself from the blame to which as the matter now stands, he would appear liable.

> I am, Your very obedient Humble Servant, JOHN MACAULAY.

I replied to the above letter by enclosing copy of Col. Rowan's letter to Mr. President Merritt, and Mr. Robinson's letter to Col. Rowan, and by referring to the times at which in 1834 and 1835, the Company had agreed to resolutions asking for the details of the expenditure.

LETTER.

JOHN MACAULAY, Esquire, to WILLIAM HAMILTON MERRITT, Esq.

DEAR SIR

I have recently had some correspondence with W. L. Mackenzie, Esq. (a Director of the Welland Canal appointed by the Legislature on the behalf of the Province) respecting the accounts of the commissioners who expended £7,500 of the public money on the canal in the year 1833—and in consequence thereof, have enquired of Mr. Robinson, my associate in the commission, the cause of the delay which has occurred in submitting the accounts to the government. Mr. Robinson in a letter dated 25th ulto. informs me that he was engaged in making copies of all the requisite statements and vouchers, and that he would take care that the original documents were at your canal office before the close of the month. I therefore trust that all grounds of complaint on this score have now been done away.

Mr. Mackenzie in his letter of 26th ulto, mentions your having in March, 1834, applied for the accounts to Mr. Robinson on behalf of the Welland Canal Company. I regret that I had not been apprised of this matter at an earlier period. I dislike much that any delay or irregularity in accounting for public monies should occur in any commission in which I am concerned. Mr. Robinson explains how it happened that delay occurred in the present instance.

Please communicate this letter to Mr. Mackenzie, whom I should have addressed instead of you, if I had been certain that my letter would find him at St. Catherines.

I hope the business on the canal continues to improve, and that the locks are in a good state.

> Dear Sir, Your obd't servent, JOHN MACAULAY.

LETTERS.

WM. B. ROBINSON, Esquire, to WM. L. MACKENZIE, Esquire.

Newmarket, 15th September, 1835.

Sir.

I am in receipt of yours of 11th instant, by yesterday's mail, and regret to learn from you that my accounts prove unsatisfactory. Having just returned home from Penetanguishine after a week's absence—I am much engaged, or I would instantly set off to St. Catharines, with all the papers in my possession relating to the expenditure of the £7,500. As it is, however, you may expect me early on Friday, which, as you remain the whole week, will answer all purposes, I trust.

Your's, &c.

WM. B. ROBINSON.

W. L. Mackenzie, Esq.

Newmarket, 17th September, 1835.

Sir,

Since writing to you by yesterday's post, I received a letter by the stage last evening, which obliges me to remain at home till after Saturday. I shall be able to go any day next week, though at great inconvenience to myself—this, however, would not prevent me. You state that both the other members of the Examining Committee are absent. I should much prefer seeing you altogether, and if you will inform me when you meet again, I will attend without fail. In the mean time, I trust no report will be made until I have an opportunity of explaining any thing requiring explanation, as I have no doubt of satisfying the Committee that all the money entrusted to me was expended as intended, and to the best advantage.

Our mail from Toronto is only semi-weekly, arriving here on Mondays and Thursday's. I mention this in case you write, that you may know when I will got the letter—to which I shall pay immediate attention.

Your's, &c.

WM. B. ROBINSON.

Wm. L. Mackenzie, Esq.

LETTER.

WM. L. MACKENZIE, Esquire, to WM. B. ROBINSON, Esquire.

(OFFICE COPY.)

St. Catharines, Saturday, 18th Sept., 1835.

Wm. B. Robinson, Esq., M. P. P., Newmarket.

SIR.

I beg to acknowledge both your letters—that of the 17th came to-day, through Mr. Clark.

Last winter Mr. Merritt in the select committee on the Welland Canal, of which I was not a member, proposed that the House should appoint men who would fairly investigate the canal accounts, and set the question of the expenditure at rest. I was one of those appointed, with the express understanding at the time that I would fairly go into the question of the expenditures, and the Government Directors

named me a committee for that purpose. I have been for some time busily employed in that investigation, you are therefore in a mistake in supposing that part of the committee are absent. But there is a special committee of the court of Directors of this canal—Mr. Thorburn, Mr. Butler and myself, upon the accounts of Thomas Merritt, junior—involving an expenditure of \$30,000 on which he claims a balance. Now, your accounts with him want (very much want) explanation and clearing up, previous to a settlement with him, and as I have laid over his papers in the hope that you could be here to give that explanation. I am glad there is a probability you will be here early next week.

As to your own accounts, I am satisfied that into a great part of them you have never once lookedand I can satisfy you that it is so when you come over. If you had looked into them, I am sure they could not have taken their present form. Were your accounts to be reported on without the requisite vouchers, contracts, bills, time lists, and other documents referred to in the papers already sent and with the charges of the same things made once, twice, and even thrice, against the Company and after all not shewing any thing like the expenditure indicated in the general statement, it would be un-pleasant to you, but it would not be unfair, for there has been time sufficient for you to have presented a correct and intelligible statement of expenditure. But I thought that the candid way, the way I should like to have had followed towards myself was to ask you to come and supply the defect from papers which are or ought to be in your possession. Directors being present, you and I and Mr. Beaton, will go over these papers with far greater ease and much more to the purpose than if all the House of Assembly were present, and the question of the expenditure is, after all to be determined by the facts. If all the Directors were present they could not prove error to be truth nor the reverse. But Mr. Butler and Mr. Thorburn will be at home before you can be over, and they can be sent for when it is your wish. All I want is the facts and surely that you yourself will not deem unfair in a case where three gentlemen whose integrity is unimpeachable were placed by the Legislature in the delicate charge of your commission of 1833.

I have, &c. &c. W. L. MACKENZIE.

Soon after this, Mr. Robinson came over to St. Catharines, where he remained for some time, and we went into an investigation of his accounts, the results of which I have herein stated.

LETTER

FROM WM. HAMILTON MERRITT, Esquire, TO WM. B. ROBENSON, Esquire.

(OFFICE COPY.)

WELLIAND CANAL OFFICE, St. Calharines, 26th March, 1836.

Wm. B. Robinson, Esq.

My Dear Ser,

I have ordered the payment of £178 is 7d.,

the amount of interest due on your note in the bank; but, of course, am personally responsible for it, until sanctioned by the Board of Directors. This they will do as a matter of course; but we require from you some statement to lay before them as a docu-ment or voucher for their authority. Mr. Farnsworth has sent orders to this office, and says, you have or will authorise it. There is only one or two as yet in small amounts; but Mr. Clark cannot pay them without the sanction of the Board—they meet the first Wednesday in April. The object of this letter is to request you will make some general statement, shewing the amount of your receipts and expenditures; stating what you now require us to pay, so that we may proceed with authority, and with an understanding. The accounts should first go through the Commissioners for approval, but if you think proper, we will pay to Mr. Farnsworth any amount you think necessary; but I certainly think the most proper course would be to pay it to you, and you to him, if there should be debts due. I understand from Mr. Clark the Company has paid the Commissioners what was borrowed. Pray when will you be over; when will it be convenient for you to attend the arbitration; I have written to Mr. M'Aulay to appoint a day. The Canal will be open by the first of April, if the weather continues. have just returned from Gravelly Bay. Lake Eric is full of ice below Sugar Loaf, but all broke up, and will soon be out. Let me hear from you soon on the subject of our monied matters, as I am desirous to have all those small demands paid up as soon as we can.

Yours, &c. Wm. HAMILTON MERRITT.

Extract from the Minutes of the Board of Directors, of the 5th June, 1834.

At a meeting held at St. Catharines, 5th June, 1834.

#### PRESENT

WM. HAMILTON MERRITT, Esquire, President.

Ogden Creighton.
Charles Duncombe.
Wm. Elliott, and
Wm. Chisholm.

It appears that the minutes of a meeting held at Toronto, stating that Wm. B. Robinson, Esq., declined acting as Agent for the Company, and granting the President £400 per annum, was not regularly entered at the time.

Ordered, That a record of the transaction be now made.

Ordered, That the salary of the late Agent be continued from the 6th June to the 13th July of the past year; his time being occupied in settling claims, attending arbitration and the affairs of the Company generally for a much longer period.

Extract of a Letter from Wm. B. Robinson, Esq., Canal Commissioner, dated Neromarket, 8th April, 1834.

" Times are so dull that I almost regret not hav-

ing accepted your offer at the Canal. I shall put all things in order, and be ready for any good thing next year."

Extract from the Minutes of the Board of Directors, of the 6th Nov. 1834.

At a meeting held at St. Catharines, 6th November, 1834.

#### PRESENT

WM. H. MERRITT, Esquire, President.

Dr. Duncombe.
Thomas Butler.
Wm. Chisholm.

Ordered, That W. B. Robinson, Esq., the Acting Commissioner, be written to for a statement of the expenditure of the £7,500 placed at the disposal of the Commissioners, that the same may be entered on the Company's books.

#### LETTER

From WM. B. ROBINSON, Esq., TO WM. HAMILTON MERRITT, Esq.

(OFFICE COPY.)

Newmarket, 16th July, 1834.

MY DEAR SIR,

By a letter from Mr. M'Aulay, I find that the 3d August is the time appointed for the meeting of the arbitrators, if Mr. Shade and others of us can attend. In reply to him, I stated that later in the month would suit me better, but that if the rest would then attend I would not derange your plans, but attend also. You will, therefore, please inform me of the exact time. I am just getting the cellar of my house laid in stone, and fear I shall hardly finish by 3d, but will attend if the others do-not otherwise. About 15th or 20th August would have suited me better. I would wish you to pay the small accounts still due to individuals without delay, and when I come over I can give the authority in any form you may desire. I thank you for the interest you take in my election. Nothing but the same motives which actuate you, would have induced me to come forward. I feel very sure of my return, and did so before Mr. Hume's celebrated letter made its appearance—that, however, will be in favor of us I think, in all parts of the country. The Townships in my county are—West Gwillimbury, Tecumseth, Adjala, Mono, Tosorontio, Mulmer, Innisfil, Oro, Vespra, Medonte, Orillia, Floss, Tiny, Tay, Thorah, Mara, and several others not settled; I was through the two former Townships on Monday last, and found and reserve. I hope you and others of the RECET SORT feel secure of being returned. Another four years and we may laugh at the RADICALS I THINK. Remember me to Mr. Clark and all friends.

Yours truly,

WM. B. ROBENSON.

Wm. Hamilton Merritt, Esq. &c. &c. &c. (OFFICE COPY.)

LETTER

FROM WM. B. ROBINSON, Esquire, TO WM. HAMILTON MERRITT, Esquire.

Newmarket, 14th October, 1834.

DEAR SIR,

I received a letter from Mr. M'Aulay last evening on the subject of the arbitration, which he thinks will take place on the 5th November. I have written to him to say, that liaving lost so much time with the election, and now having to attend the Assizes as a witness, I really cannot think of leaving home so soon, if at all. I would not go at all events till the last of November, or beginning of December. I am building, and must get my house roofed in before winter.

I had a very sharp contest, kept it up till half-past six on Saturday evening, when I was returned by a majority of 22.—YANKEE BEEF and PORK, the WELLAND CANAL, and the EVERLASTING SALARY BILL, were the principal things brought against me by the Radicals. I made no concessions, said I did not regret one single vote I had given, and would under the same circumstances act in a similar way. Imade no pledges or promises for the future, but said I would support the Constitution entire—my opponents took Radical ground, and avowed the same principles as Mackenzie and Hume—under these circumstances, my triumph was very satisfactory. I was happy to hear of your success, and hope we may yet have a decent house.

Yours truly,

WM. B. ROBINSON.

WM. H. MERRITT, Esq. &c. &c. &c.

LETTER

FROM HONORABLE JOHN MACAULAY, Post-Master of Kingston, TO WILLIAM HAMIL-TON MERRITT, Esquire, President of the Welland Canal Company.

Kingston, 18th Oct. 1834.

MY DEAR SIR,

I learn from Mr. Robinson, that he cannot possibly proceed to the Welland Canal before the latter part of November, which circumstance puts an end to my plan of getting the arbitration settled this fall. I am now ready to act in this matter, and could act at any time until the 10th November, but after that period, it would be requisite for me to proceed to St. Catharines, as well as return by land—a journey considering the season and the roads, that nothing could tempt me to undertake. I must there fore bid adieu to the Welland Canal, and if the other Commissioners do not meet, must only leave it to the new Radical House to appoint other persons in our stead.

I congratulate you on your re-election. There will yet be in the House some ten or twelve good men and true, who will not bow the knee to the innovating demon of Radicalism and Revolution.

Yours truly,

JOHN MACAULAY.

WM. H. MERRITT, Esq.

(OFFICE COPY.)

LETTER.

WM. B. ROBINSON, Esquire, to WM. H. MERRITT, Esq.

Newmarket, 2nd December, 1834.

W. H. MERRITT, Esq.

My DEAR SIR,

I had a long chat with Knight yesterday, about the Canal, and am pleased to hear such good accounts of it, both as regards business and the state of repair. If you carry into effect during the winter, all the improvements that he says are intended, the work will be in high order next year. I feel a great desire to run over yet, late as it is, descend the Grand River, and visit the Canal, that I may be able this winter, in case of any discussion on the subject, to speak from personal observation. Do you think either of the works will come before Par-liament for assistance in any way? Mr. Fitzburgh writes me that he hears Bidwell, the "King of the Radicals," is already boasting that the Welland Canal and St. Lawrence, shall receive no further aid. I think nothing will put down that party, but their unvaried opposition to all public improvements—this if the people will permit any thing to unglue their eyes, should be sufficient to convince them of their total disregard of the best interests of the country while under the present Government. We shall have a stormy useless session I fear, but must do our best to get the necessary public business attended to.-What is your opinion as to the speakership? I hope we can get McLean again or Morris, but fear that Bidwell will be the man after all. I shall send over the copy of account you want in a few days, which please mention to Mr. Clark. You will oblige me by paying Mr. Goodenough, who will call on you, fifty dollars, which I will repay you when we meet shortly. The roads are too bad for me to go to town just now—that is, if quite convenient to you,— The low price of produce, and our distance from market, make me almost desire to be among the noise and bustle of your more busy canal again—and if I could only dispose of my property here to tolerable advantage. I would be inclined to accept your last year's offer if repeated, with some small addition for travelling expenses.—We have a line for a canal surveyed, to connect Lake Simcoe with Huron, miles, 40 locks of low lift, and a favourable route.-We are also having the levels taken for a Rail-way between this and Toronto. The Engineer is nearly done, and speaks most favorably of the line-no stationary power will be required; probable cost about £80,000. I shall be glad to hear the amount of your receipts, now that the canal is closed.

Yours truly, Wm. B. ROBINSON.

53. What is there to alledge in support of charge No. 19?—As references of an unfavorable nature relative to Mr. George Keefer, senr., are made in Captain Gordon's letter, addressed through the press to Mr. President Merritt, and hereto annexed, I endeavored to ascertain whether he really had interested himself in money contracts while sitting at the Canal Board as a Director: and it is evident

that he was then a large sub-contractor under Phelps.

On the 2d June, 1826, the ex-President, Keefer, writes, "I have 120,000 feet of timber, cubic measure, got out for Mr. Phelps, and 13,000 feet of ties; GEO. KEEFER."

On the 1st of May, Phelps estimates to Mr. Director Keefer, 20,000 feet of lock timber, \$\$00.

In June, Phelps & Co. gave in no estimate for Mr. Keefer, but Mr. Barrett, the Engineer, supplied the defect as follows:

Mr. Keefer wrote to Mr. Barrett thus:

" Mr. BARRETT, Engineer:

" Dear Sir,

"Mr. Phelps called here yesterday while I was from home, to know how much timber he should give in for me this estimate, and left word for me to send it to you this morning to include with his—I have over 14,000 feet got out since I gave in before at \$35 which I will vouche for which will amount to about \$500 which you will please include in his Estimate.

"I remain,

"Yours truly,

"GEO. KEEFER."

" 5th June, 1827.

Mr. Barrett wrote accordingly under Phelps's estimate-

"Esquire Keefer got out 14,000 feet timber at \$40, ---- \$560."

This was a friendly turn done to a contracting Director by his Engineer—Keefer had given in at \$35, and estimated 14,000 feet at about \$500.—Barrett added \$5 per thousand, and thus made his employer \$60 richer.

On referring back to Phelps' estimate of the previous month (given in in May) I found that although Keefer had, as he states in his letter to Barrett, estimated his timber at \$35, Phelps had used the friendly freedom to add \$5, thus extending \$800 to Keefer that month in place of \$700, which he had required. This I presume he did to enable himself with a better grace to estimate his own at the same rate.—The current price in that part of the country was about \$30.

In July, Phelps's estimate for Keefer is 15,000 cubic feet of timber, at \$40, and so the Engineer reported.

On 1st August, we have—"Esq. Keefer, 10,000 feet, \$400."

In September, we have—"Add for Esquire Keefer, \$250."

In October—" Esquire Keefer's bill of timber, \$200."

In December—"Esquire Keefer's bill of timber, \$400."

In March, 1828—"Due Esquire Keefer, \$1,000"

In the May bill—"Timber of Esquire Keefer, \$400."

In June—" Esquire Keefer's timber, \$400."

In September, Phelps writes Barrett that Keefer's claim for timber, was about \$1200, and in the November estimates the Engineer enters \$600 for him.

So it would seem that in 1826-7, Mr. Keefer sat as a Director to pass upon Oliver Phelps' accounts, in which he was thus personally interested to the amount of at least twelve or fifteen thousand dollars!!

[The Company's accounts, in proof of this, and the original letter wanted.]

54. What have you to offer in support of your 13th charge?—When Mr. Black retired from the Secretaryship in June, 1832, he was succeeded by Mr. President Merritt, who contracted officially as such with Thomas Merritt, junior: for the harbor in September of that year.

At a meeting of the Canal Board at St. Catharines, on the 7th and 8th of October last, the following proceedings were had, on the report I this day submit to you:

"The select committee on the accounts of Thomas Merritt, junior, presented their report, which was read," and it was "Resolved—That the report be received and laid over for future consideration, and that Mr. Hall and Mr. Thorburn be requested forthwith to proceed to Gravelly Bay and enquire fully into the system under which the check rolls, time lists and bills of labor and materials have been compiled and warranted for the last 12 months: that Mr. Thomas Merritt, junr. be requested to transmit to this office for examination the books in which his accounts with this Company, for such time and labor were kept, and for the work done for Mr. Robinson in 1833."

The minutes of the canal board are the only official day book kept, but although they shew that a supply of money from Mr. Robinson, was the condition of T. Merritt's continuance in the summer of 1833, that contractor is actually allowed interest in the Company's books on the £200 the commissioner had paid him, and the money is paid him over again out of the loan of 1834!!—An attempt was made to get an order that he be paid the balance in this way, but I steadily resisted it, and being supported by Messrs. Thorburn and Butler, got the accounts referred to a special committee, whose report is in the Company's possession, and is as follows:

# TO THE PRESIDENT AND DIRECTORS OF THE WELLAND CANAL COMPANY.

The Special Committee appointed to examine and report upon the accounts of Thomas Merritt, Jun., of Gravelly Bay, and concerning the balances that may be due thereon, have completed their investigation, and respectfully submit for the consideration of the Board, the following statements as a final report:—

The Committee have found it necessary, to a complete understanding of Mr. Merritt's accounts, to review the several monied transactions between him and the Company since January, 1832, the year in which his contract at Gravelly Bay had its commencement.

In September that year, Lewis, Garrison & Little were discharged from the further prosecution of the improvements contemplated by the Company at the Lock and Harbor of Gravelly Bay, and the work they had begun was given to Thomas Merritt, Marshall Lewis, and Sloan & Clinton: It does not appear that the contract was publicly advertised and officred to general competition. Mr. Geo. Keefer, the Engineer, who drew it up, states that it was not advertised in any of the newspapers of the District or Province, but that notices were written and circulated along the line, and put up in the Canal Office.

The specification for the work is dated the 15th September, 1832, and signed by Lewis and Ostrom, two of the persons proposing to contract for it. The competitors appear to have been Thomas Merritt, Jun., & Co., September 14, and Thomas Merritt, Jun., & Co., September 17,—a different proposal—and Mr. Merritt's foreman, H. B. Ostrom.

The contract is a very informal document, dated at Gravelly Bay in September, 1832, but the day of the month left blank; it would appear that when it was drawn out and signed, the Canal Company did not know who all the parties were, for the names Sloan and Clinton are subscribed at the foot, but are not to be found in the body of the instrument, blanks being left instead. No security is taken, no bond or penalty is mentioned, neither the President nor Vice-President's signatures are appended, nor the scal of the Company, as was usual and right, nor any seal of any person whatever.

Mr. W. H. Merritt signs on behalf of the Company as its Secretary; and there is a standing order of the Board of the 10th of May, 1828, present Messrs. Dunn, Wells, Robinson, Keefer, and H. J. Boulton, "that the Board will not consider itself bound by any contract, which the Agent or Secretary may make, until it has received the sanction of the Board."

This contract was to complete the Lock and Harbor, and build as many piers so might be required—the piers were to be completed in July, 1833, and the harbor in September following.

A great many very important things required to be done, in order to complete the contract, were omitted to be inserted in it by the Engineer, and being also omitted in the specification, are charged as day-work, to a large amount. These matters if forgotten in the first contract, might have been placed in a subsequent one, for it is not prudent to have the contractor employing many men by the day and charging work in that way, in the same place and at the same time and on the same work he is engaged to do under a special agreement.

The contract concludes by a declaration that Mr. T. Merritt was the only partner who was authorized to receive the money to be drawn from the Canal Company under it, "in witness whereof the parties have hereunto set their hands the day and year first above written." Now it so happens that there was no one day in the year, 1832, written above that declaration, which is witnessed by George Keefer, Jun."

Mr. Keefer informs us that Thomas Merritt, Jun., & Go. failed, like their predecessors, to fulfil their engagements—that they were dispossessed—and that the whole work was again relet to Thomas Merritt, Jun., one of their number, again without penalty bond or security, and without any particu-

lar month or year having been agreed on for its completion.

We do not find that Mr. Merritt entered into any specific engagement to complete these or any other works under the contract which himself and his associates had thus forfeited, or that any deductions were made from the payments made to his partnership concern by the Canal Board; the Board changed its plans from time to time with regard to the piers, and before the completion of the contract the lock was ordered to be lengthened by day labour at a great expense, and by the same contractor too, before his work was taken off his hands.

No new contract was made with Mr. T. Merritt; the omissions in the former one were not supplied—but on the 20th day of July, 1833, he wrote a letter to the President and Directors, declaring his willingness to continue the work on certain conditions, one of which was—" I will endeavour to sink the whole "of the Western Pier, where it may be pointed out "this season, and continue the work at my own "risk,"

The Board agreed that he should so continue, provided the Canal Commissioners would advance him money to enable him to build the Piers, and they applied to Mr. Robinson, the Acting Commissioner, to advance £375, on the provisional understanding thus entered into.

Mr. Robinson has shewn us that he advanced, first \$100, then \$800, but that \$100 of these advances were taken for other purposes, copy of Mr. T. Merritt's receipts for these monies are hereto annexed, and the bills and settlements he made with Mr. Robinson detail the transactions. Two hundred pounds ought to have been charged Mr. Merritt on his Pier contract, in the Company's books, October, 1833. Yet no such charge appears to have been made, nor has that sum been deducted from his estimates on other work. His bill for work done to the order of the Commissioners, 1833, and shewing the payments made to him, were forwarded to this office by Mr. Robinson last September.

Mr. T. Merritt's letter in July, and its acceptance as recorded on the minutes of the Board, is a very questionable substitute for a contract duly defined and specified, although under it works to the amount of many thousand dollars have been paid, but we find no other.

Three months after the date of Mr. Merritt's letter, engaging to continue the work on his own risk, he came forward and demanded \$1,070 from the Company for damage alleged to have been sustained in a gale on the 17th October, 1833, in which he had lost four scaws, worth \$380, nine thousand seven hundred fee. of timber missing, and 50 cords of stone swept off the piers. The Board paid him the \$1,070 without deduction.

Encouraged by this success, another application was made for \$308.98 as compensation for damages caused by the gale of January 2d, 1834; Osurum, Fisk, Cary and McChesney certified as follows:—
"We, the undersigned inhabitants of Port Col"Borne, certify that we believe the above statement to be correct, having been on the spot at the time and before the gale; H. B. Osurum and J. Fisk are positive in the loss, having measured and counted the whole."

H

The Board refused to make an allowance on this certificate, and Mr. Keefer the engineer, was directed to measure the work, which he did, and found that 400 feet only were missing, although Fisk and Ostrum had certified to 1200 feet on their previous measurement.

We find that Ostrum certified a second time to the correctness of the 400 feet measurement although he had declared before that he knew it was 1200.

Fisk and he are the principal witnesses to the former claim for alleged damage, and probably on equally strong grounds.

Mr. Hull's statement of this date, indicates an organized system of overcharge at Gravelly Bay; it was not, perhaps, without good reason that Mr. Commissioner Robinson wrote Mr. Merritt, 13th March, 1833, "I have not much faith in Fisk."

Mr. Merritt's offer of taking the risque is not unusual. The Ohio Canal Commissioners, in their report for 1832, declare that it is a rule on their line that "all work of every description is to be considured at the risque of the contractor, until his whole job shall be finished and accepted, the contractor having no right to demand that any part of his work shall be estimated, until the completion of all the work contained in the contract." A very different course appears to have been pursued towards Mr. T. Merritt.

We find that in 1833, Mr. Merritt was at one and the same time, contractor for the lock, piers, and Harbor at Gravelly Bay, lock-keeper at that lock, at \$20 per month, engaged in fulfilling an agreement for dredging with the canal commissioners to the value of \$600, and employed with his labourers and teams on job work by the day, all at the same place, besides being concerned in the light house pier with T. McChesney. So many different engagements as this, ought not to be entered into with one man; it looks like favoritism, and is not calculated to promote the welfare of the canal.

Contractors should not be superintendants, lock-keepers, and overseers by the day, at one time and

Since January, 1832, nearly fifty thousand dollars have been paid Thomas Merritt, for labour and materials, as contractor or superintendent of work on the canal. His Gravelly Bay estimate is about \$15,000; the Commissioners paid him about \$2000 in 1833. He has received on the Berm Bank Job unfinished, nearly \$3600; on the light house pier and light house about \$4000, on sections 8 and 9, new route \$ , as lock-keeper \$120, for work at Broad Creek nearly \$900, besides large sums on a variety of other bills and contracts, and for day labour. The lock and piers, including the light house at Gravelly Bay have already cost upwards of \$40,000

The light house pier appears to have cost \$3000,

and the light house itself nearly \$2,500.

Mr. Thomas Merritt, charges for dredging sand out of the lock and lock entrance at Gravelly Bay, besides the dredging done by Lewis, Garrison and Little, the original contractors, as follows:

1833, 1834,	•,•	:	•	•	5	10 77 78 60 50
١	1833, 1834,	1833, 1834,	1833, 1834,	1833, 1834,	1834,	1833,

There are numerous other charges of a similar nature, besides the sum of \$600 paid in 1833 by the commissioners.

For about \$1000 value in labour and materials, there are no certificates of any kind. The bills and check rolls are made out by Fisk, but in many cases they afford little or no information relative to labour performed, end services rendered.

Fisk is a person of intemperate habits, he likewise introduces himself, occasionally, into the check rolls as a labourer on the dredging machine, at 12 shillings per day, and 10 shillings per night. We see no reason to make any alteration in the decision of the board, made at a former sitting, relative to the price to be allowed for spikes and iron work, in charges not covered by the contract of September, 1832. H. B. Ostrum, is entered in the Company's time lists drawn out by Fisk and certified by Mr. Black, and said Ostrum, as a lock-keeper at Gravelly Bay, receiving \$30 per month, or one dollar per day for attending a single lock, through which, probably, not more than two or three vessels pass one day with another. How he can act in this capacity, and also appear on the check rolls, as working day's work at \$2 per day, 71 days in June 1835, 91 days in July, 7 days in August, and 23 days in September, is only to be accounted for by referring to Mr. Hall's explanation, by which it appears that if 7 men do some work on a wet day, the toll-collector and Ostrum are ready to certify that hard labour on that day was performed, by at least fourteen persons, many of whom are absent when the rolls are to be signed, and the most of those others, only able to make their marks. Ostrum, as lock-keeper receives a third more wages than were allowed to Thomas Merritt in 1833, although the duties could be easily performed by any intelligent and able-bodied laborer, at the former price. If Ostrum opens and shuts his lock by deputy, the deputy at a fair price should be made lock-keeper if he be a proper person.

The WELLAND CANAL COMPANY,

To THOMAS MEDBETT, Jun'r. Dr.

To Thomas Merritt, Jun't. Dr.						
1835. August 31. To Engineer's estimate of this date,	\$ 3443	cts. 20

The practice of deducting monies from the general estimate, without allowing them to appear in the Leger is improper; the full amount of work done, and of payments made, should appear under the contractor's name.

NO. 2.

Mr. Robinson contracted with Thomas Merritt early in the summer of 1833, to dredge and clear out the Lock at Gravelly Bay, and between the Piers to 8 feet of water, and to keep it at that depth during the summer for \$600, which Mr. Robinson paid him on the 25th of June, in that year. Within a month after he got this money, Mr. Merritt came forward with a claim for \$266 more, for 266 cubic yards of dredging.

We have disallowed it, and hereto subjoin Mr. Robinson's memorandum of his agreement with Merritt. The wings of stone wall above the lock, were made and charged separately.

### Mr. ROBINSON'S MEMORANDUM.

"Thomas Merritt agrees to dredge and clear out the Lock and between the Piers at Gravelly Bay to "8 feet water, and keep it at that depth during the summer for £150, from the running into the canal above the lock to the lake, also to make a wing of stone wall each side of the upper end of the lock, at one dollar per perch."

Mr. Keefer states, that when he made out the estimate of July he had no knowledge of the agreement with Mr. Robinson, and that he had never seen it until now.

#### NO. 3.

In examining the details of Sections 8 and 9, Gravelly Bay route, we find—

1st. That they were let to H. N. Monson, of St. Catharines, on the 3d day of June, 1831, at 12 cents per cubic yard for excavation on No. 8, and 121-2 on No. 9.

2nd. That the contractor agreed to complete his contract for the above, and three other sections, by the 1st of April, 1832.

3rd. That the penalty for non-performance of this contract was only £100, although it includes labor of the value of many thousand dollars.

4th. That after Mr. Monson had excavated 2,830 yards on Section 8, and 1,950 yards on Section 9, at the above prices, these Sections were taken from him and given to Thomas Merritt, junr.

5th. That the penalty of £100 was not exacted from Mr. Monson.

6th. That the Board of Directors, at a meeting held2d February, 1832, (present Messrs. McDonell, Butler, and Randal,) certify in the minutes that an agreement had been entered into with Thomas Merritt, junr. at 13 cents for excavation on these sections. But your committee can find no such document, and the President thinks there was none written.

7th. That it appears by the estimate book, page, 4 that the original number of yards of excavation on No. 9, is 21,988, of which only 165 yards are deducted from Mr. Thomas Merritt's amount, as having been done by Monson, although 1,950 yards had been previously allowed to Monson, and that the original number of yards of excavation on No. 8 is 18,484, for which Thomas Merritt is paid at 13 cents, less only 2,372 yards, although Monson is shewn to have excavated and been paid before for 2,830 yards on that same section.

Sth. That the first estimate of the whole excavation of No. 9, was 19,401 yards, and of No. 8, 14,968 yards. The final estimate to Merritt on both is 40,472 yards, shewing an increased quantity of 6,103 cubic yards over and above an allowance of 945 yards, for four feet extra width on five stations.

Monson excavated and was paid for 4,780 yards of the whole, and Merritt was paid assecond time for 2,243 yards of the excavation done by Monson.—For 4,780, less 2,637,—2,243. The sum thus overpaid is (2,243 × 13 cents) = \$291.59.

9th. That if Merritt was paid for the work he did on Sections 8 and 9, at an increased price without any written agreement, and without any penalty or stipulation as to time of doing a certain quantity of work, he was not entitled to the reserved fourth, on any part of the work which Monson had contracted for and forfeited. Yet in page 5 of the Book of estimates passed 28th February, 1833, (and of which the original is missing) there is a credit to Thomas Merritt, as follows:

"Allow one quarter reserve from Monson on 2,537 = 634 yards at 12 1-2 cents = \$79 25."

This charge appears to have been uncalled for under the circumstances we have stated.

10th. That in a work of such importance, a specific agreement in writing ought to have been entered into with the excavator, including the items of grubbing, ditching, chopping, embankment, &c. If this was held necessary in the agreement with Monson, so was it with Merritt,—yet it seems not to have been done in the latter case.

We have asked Mr. Keefer, why the forfeited reserve by Monson was paid to Merritt with an encreased price, the minutes of the Board giving no such directions. He states he does not remember, and that until Mr. Barrett shall arrive he cannot shew why the work done by Monson, and estimated by him, is not deducted from the estimate of Nov. 1832, allowed to Merritt.

The records of the office afford no explanation of this matter.

Mr. Keefer imagines that the difference may in some degree be accounted for by the supposition, that the work done by Monson, surveyed by Mr. Barrett from time to time and admitted to be correct and right, was out of the line. If so, it should have been so stated in the estimate and the causes explained to the Board at the time the transaction took place.

NO. 4.

We now proceed to notice the latter bills given in by Mr. Merritt for day labour at gravelly Bay.

They are as follows:

1st June—Check 2nd July— do. 3rd Aug.— do. 4th Sept.— do.	Roll, do. do. do.	· -	•	-	-	\$ 156 157 139 309	35 23	
4th Sept.— do.	do.	•	•	-	-	\$762		

Mr. Black the Superintendent, and Mr. Ostrum the Lock-keeper, certify, that in June, the labour was "excavating and levelling about the canal office, cutting and hauling brush, building brush piers and setting snubbing posts about the basin." In July, "making brush piers, framing timber for same and filling them with stone, and hauling brush and timber to the canal." In August, "cutting brush, scowing stone, and building brush pier." And in September they say, "brush piers and ditch for waste wear is the principal work for this month."

Mr. Black, the Superintendent at Gravelly Bay, is engaged but a small part of his time in attending to the duties of his collectorship; he has both time and

opportunity to detect false returns by personal observation, as to the number of persons employed, and with regard to their being diligent at their work and employed usefully. The appearance of the work done, as compared with the time lists, gave reason for a suspicion that Mr. Black was not so careful to perform this important duty as he ought to have been, although his instructions are very full and explicit.

The personal observation of Mr. Hall, the Engineer, tends to confirm this impression. His memoranda relative to Gravelly Bay which he visited lately, are as follow:

# " Memoranda respecting Gravelly Bay.

"When examining Mr. T. Merritt's time list for the month of September last, I observed ten men marked for the 21st and fourteen for the 22d. Upon those days the numbers employed, were five for the 21st, and seven for the 22nd—the reason assigned for the small number of men the first day, was, that they had probably got tipsy upon the previous Sunday. The 22d it rained all the morning, and labourers could not work to advantage. Upon a review of the work done for the Company at Gravelly Bay, since the 7th day of July last, I observed only some advance upon the brush pier, probable expense about \$100, to be tested by measurement, and some trifling work upon back drains, to the extent of fifteen or twenty dollars."

It thus appears to be Mr. Hall's impression, that all the work lately done by Mr. Merrit by day labor, and for which nearly \$600 are charged since July 7, is only worth about \$100. He informs us that the labor for which about \$600 are thus charged, would, in his opinion, have been accomplished by Townsend the contractor at the Grand River, for about \$100.

We are of opinion that any balance which may appear to be due to Mr. T. Merritt, on the engineer's estimate, should remain unpaid until the next meeting of this Board, subject to the report that may be made upon a full enquiry properly instituted at the harbor, relative to the system on which check rolls and time lists have been drawn up during the last three years.

We find that the check rolls are in very many cases supported only by the crosses of the persons entered on them; that in other instances these workmen are declared gone, or absent; and that the almost continual witness to the payments made and to every thing else, is that very doubtful authority "John Fisk."

To a bill of \$4,551 73, for labor and materials, up to May last, credited to Mr. Merritt, the official certificate of Mr. Black is not attached, but in its place we have that of "John Fisk," Mr. Merritt's Clerk. If it should be determined by the Board to institute an enquiry, this \$4,051 73 account ought to be included, so that the entries on which it is founded might be duly checked, if it be possible.

Mr. Merritt was written to some time ago to attend at this office with his books of account, but he has not yet complied with that request. The Board might perhaps induce him to do so.

By withholding the small balance which appears to us to be properly at Mr. Merritt's credit, until an investigation has taken place, and his books been checked, no injury will be done him. His contract for the Berm Bank ought to have been fulfilled by the 1st day of April last, and although it is very far from fulfilment, and has been but once estimated by the Engineer, he received the full amount estimated in May, without the reservation having been made which is usual on such occasions, and which the nature of his contract seems to have particularly required. It is true we do not find the usual claim to reserve a fourth until the work be completed inserted in his contract, neither was a penalty mentioned, but the general usage of the Canal may be presumed to have been intended and meant in his case, seeing it has been the practice for years, with very few exceptions.

W. L. MACKENZIE, DAVID THORBURN, T. BUTLER.

Received from Wm. B. Robinson, twenty-five pounds, currency, on account of the Pier at Gravelly Bay. T. MERRITT, JR.

August 16th, 1833.

Received from Wm. B. Robinson, two hundred pounds, currency, on account of Pier at Gravelly Bay. T. MERRITT, JR.

October 17th, 1833.

(Corv.)

Memorandum of agreement made and entered into, at Gravelly Bay, Welland Canal, on the -day of September, 1831, BETWEEN THE WEL-LAND COMPANY of the one part, and THOMAS MER-RITT, JUNIOR, MARSHALL LEWIS, and the other part, Contractors.

WITNESETH, that the said Thomas Merritt, Marshall Lewis, and _____, covenant, promise and agree to finish and complete, in the best manner, the lock, with the two sets of paddle gates in the upper lock gates, &c. &c., according to the plan and specification heretofore laid down by Mr. Burrett and Marshall Lewis-likewise the piling, excavation, walls and every thing necessary to be done to finish and complete the Canal to deep water in the lake on the same level or depth of the mitre sill, all of which is to be finished and completed on or before the first day of November next. Also, to sink, fill up and finish and complete as many piers as may be deemed necessary by the Welland Canal Company's Engineer for constructing the harbor, and making a wall on the points now projecting, on each side of the harbor-to sink as many piers as may be required for covering the entrance to the canal this winterto finish the piers on or before the 1st day of July next, and to finish and complete the harbor on or before the 1st day of September next.

In consideration of which, the said Welland Canal Company, promise, covenant and agree to pay the said Thomas Merritt & Co. as follows:

For Pumping the Water-Fifty pounds, Framing and placing in Mitre Sill—Two pounds,
Do. Braces for inside of Lock—Six pounds,

Gates and Paddle Gates-Seventyfive pounds,

Hollow Quoins-Seven pounds, ten shillings,

Planking per square-Seven shillings and sixpence,

Furnishing per square—Five pounds, Coping, for Lock per 100 feet—Twenty-five

Spike per hundred-Three pounds, ten shillings and six-pence,

Iron per lb .- Fifteen cents,

Stone per perch, when laid in Lock-Five shillings,

Embankment on each side of Lock-Eight cents, Puddling 11 yards wide in addition-Ten cents, Bringing clay for puddle-Twenty cents.

#### BELOW LOCK.

For removing all the earth which does not require dredging, per yard-Twenty cents,

Removing all that which is to be dredged—Five shillings,

Furnishing and driving each pile-Two dollars,

Furnishing per thousand feet of plank, to lay behind piles, underneath, by side of water— Twenty dollars,

Each perch of stone in dry wall-Eighty-seven and a half cents,

Removing sand and earth behind piles, per yard—Twelve and a half cents.

Timber sunk in piers, ten dollars per hundred feet, twelve feet ties, thirty cents; sixteen feet ties, forty

For all the stone delivered and filled in the same, two dollars per cord, measured, to include the ties. The payments to be made as follows: three-fourths each month; on completing the lock and cut to lake, seven-eighths; and remainder on finishing the work. All materials, now at the harbor, to be taken by the said Thomas Merritt & Co. at their fair value.

The work to be under the direction of the Company's Engineer in every stage, and to be executed under the particular direction of Marshall Lewis, the stone to be large and substantial, and all materials of the best quality, and should there not be as many hands on the work as the Engineer may think necessary to finish it in time, the work to be reported by said Engineer to the Company, who may at any time thereafter enter and dispossess the said contractors, and re-let the same again.

The money drawn from the Welland Canal Company by Thomas Merritt, Junior, only, who is the only person authorised by the Company to receive the same. In witness whereof, the parties have hereunto set their hands, the day and year first above written.

WM. H. MERRITT, Sec., W. C. Co. T. MEERRITT, JR. MARSHALL LEWIS. SLOAN & CLINTON.

In presence of GEORGE KEEFER, Jr. On conversing with Mr. Hall, I do not find that he was able to ascertain what it was that the labor was charged for; it appears they admit that it was not for what they asserted in the time lists. Ostrum gave such an account as he thought fit, and Mr. Hall, under the order of the Board, had to allow it. Mr. Merritt has since then received more money of the Board, but has not fulfiled the terms of his berm bank contract.

# Mr. HALL'S REPORT UPON WORK AT GRAVELLY BAY.

In compliance with the order of the Board of 8th October last, I have examined the work at Gravelly Bay, and beg leave to submit the following measurements and remarks:

Brush Pier—length, 350 feet; width, 12 feet; three tier of timbers on each side; ties, 106; stone, average 3 feet deep; brush under the base of pier, estimated at 3 feet in thickness, after being compressed with timber and stone.

Estimate of timber, stone and ties,	\$363 92	80 00
Coping stone pier, separate contract, Timber for extension of 40 feet of eastern	92	00
pier, not placed,	60	00
Total of work done by T. Merritt, up to 28th October, 1835,	\$515	80

Having also compared the time lists, paid by the Company, per June, July, August, and September, said to have been partly occupied with work upon the brush pier, framing timber, and scowing stone for the same. In estimation I am at a loss how to discriminate between the proportion of work done under crontract and by the Company's laborers. I would therefore propose to the Board to allow Mr. T. Merritt credit for the whole of the brush pier, including brush, timber, stone, and ties, and from this estimate to deduct a proportion for work done by the Company, to he, determined as the Board may deem most expedient.

(Signed) F. H.

November 19th, 1835.

#### "Ordered-November 20th, 1835."

"That Mr. Hall be requested to re-examine the work done by daily labor under Thomas Merritt, and if the quantity does not appear satisfactory to him that he appoint some person, and he, Thos. Merritt, another person, to determine the same by arbitration."

#### Report upon Works at Gravelly Bay.

In pursuance of an order of the Board, dated November, I have re-examined the work done by days labor at Gravelly Bay, and beg leave to present the following report:

		===
1st. H. B. Ostrum states that at an early		
period in July last, while forming the	ł	
foundations of brush pier, and after all	1	
the necessary brush was cut in the	·	
woods or adjoining swamps, that the		
same was totally destroyed by fire-	ľ	
this he estimates at	\$ 40	00
Also two brush piers sunk and lost in		
floating round the harbor	20	00
Brush in rear of mill pier, not before es-	i	
timated,	33	50
Also, one scow load of stone for do	14	00
Levelling round office, 420 yards, at 10	il	
cents per yard,	42	00
(I have taken this item at the fullest al-		
lowance, both as to price and quantity		
—the quantity cannot be correctly determined.—F. H.)		
Snubbing Posts, ten in number, timber		
and placing \$2½ each,	25	ሰሰ
Brush under Pier, calculated at double	20	00
the previous statement \$90—in conse-		
quence of shallow water-Ostrum		
states that great delay often occurred	1	
in discharging the same. Sometimes	)	
the Scow would not float to the Pier		
face with its full load, and had to be	1	
lightened by men and carried to the	1	
Pier	180	00
Stone per Brush Pier, foundation 112		
cords \$2	224	00
(This item was incorrectly stated by Os-	1	
trum or Fisk in the time list "for fill- ing the Piers with stone," should have		
been for loading the foundations.)	ľ	
Repair of stone wall on both sides of		
the lock downwards to the entrance,		
14 cords of stone—This is also an item		
that Ostrum had omitted, until the 22nd		
December, 1835,	28	00
Also omitted until same date, 7 cords of		
stone, breaking and laying the same		
on the Pierhead,	19	00
Also omitted, Brush behind Warehouse		
in August and September,	5	00
A		-
Amount of work in bills for June, July,		
August and September,	\$ 630	
Zactore mere remains for dich,	121	13
Total of time lists for June, July, Au-		
gust and September, 1835	\$751	63
I hereby certify the above statement to to the best of my knowledge.	De COTT	ect
C:		

(Signed) HIRAM B. OSTRUM.

The above statement contains all the information of extra work at Gravelly Bay, that I have been able to collect, and so far as I can judge, is as nearly correct as the present state of the works will admit a measurement of.

Respectfully submitted by, Gentlemen,

Your very Obedient Serv't.
(Signed) FRANCIS HALL.

Welland Canal Office, St. Catharines, 6th Jan'y, 1836.

# MERRITT'S BERM BANK CONTRACT.

I will here state what first excited my suspicion of pecuniary mismanagement on the part of the officers of the canal after I came upon the work.

The first day I had a seat at the Canal Board an estimate of about \$40,000 was placed before us for our sanction, the first item in which was 22,000 cubic yards of embankment by Thomas Merritt, cousin to the President, in part of a contract for nearly 40,000 yards, which he ought to have completed previous to the opening of the navigation last May. I perceived that 15 cents were charged as the price per yard, and asked to see the original estimate of the engineer, Mr. Keefer, in whose hand-writing also was the esti-mate before the Board. The first estimate was at mate before the Board. 14 cents. I then called for the contract, and it also was 14 cents. The canal rules require the Secretary, Agent (President,) and Engineer, to certify that estimates are correct, and I asked Mr. Merritt to explain why so many persons with the originals before them had allowed this false charge, by which \$398 would have been put in Mr. Merritt's pocket improperly, to be offered to us, and he said it was the first occurrence of the kind that had ever happened at the Board. We deducted it, and allowed the account as per contract. In this we acted in ignorance—onefourth should still have been retained by the Company, till the work was completed, as is done with others. We called, however, for security, which Mr. Merritt had forgotten in the first contract, and his instructions to Mr. Clark, the Secretary, shew how little he valued the order of the Board. They are these:-

- "Mr. Clark will draw a bond for Mr. Thomas "Merritt.
- "One or two securities is necessary, and it is of "little matter who they are.
- "Thomas Merritt says the work can be done by "1st February—providing the water is taken off by "20th November.
- "If not it will require until 1st April—this appears "reasonable, and the bond should contain this pro"vision."

A bond was drawn under this loose order, and I afterwards found by Mr. Keefer's letters that he had previously reported to Mr. President Merritt that that contract and others had been grossly violated, but he told nothing of this to the Board.

Extract of a letter from Mr. G. Keefer, then the Company's Engineer, to W. H. Merritt, Esquire, President, respecting Thomas Merritt's Berm Bank contract, through H. J. Boulton's lands, dated April 2d, 1835:

"The embankment will not be finished, and I think we will not regret it; there is the same iniquity practised in regard to filling in logs as when you were there, notwithstanding I have written to "Thomas Merritt, to Rose, and St. John, and even stopt some of the sub-contractors, which still appears to have done no good. I took Rose with me to the spot and convinced him of the fact."

# REMARKS BY MR. HALL, ENGENEER.

By estimate book, from the 1st December to the 1st May, 1835, it appears that St. John was employed as a superintendent of workmen at Dumwille,

during the following months, viz: December, January, February, March, but not in April or in any succeeding month, the names of Rose and St. John are not entered as contractors, or for doing any other work, they must therefore have been sub-contractors either under Thomas Merritt or John Donaldson, who were then employed with large contracts, upon the main canal and feeder. A breach of contract of this nature ought to have been provided for in the succeeding estimate by withholding a very large proportion of the monies due, until such time as the works had been thoroughly tested.

F. HALL,

Engineer.

Instead of this the President procured full pay for his relative, and the work is not nearly completed.

The following is a copy of a letter from Messrs. McDonell and Creighton to the Secretary. Notwithstanding what they state, Messrs. Donaldson and Merritt were paid in full at the then ensuing Board—Mr. Thorburn and I not knowing how matters stood.

(Copy.)

St. Catharines, April 23, 1835.

Whereas it appears that Thomas Merritt, John Donaldson, — O'Brian have failed to complete the works for which they severally contracted on the line of the canal, this is to require you to retain in your hands from this day forth all monies due to said contractors until the opinion of the Board of Directors be had upon their non-compliance with contracts.

Your Obedient Servants,

A. MACDONNELL,

Vice-President.

OGDEN CREIGHTON,

Dir. W. C. Co.

The greater part of the Company's contracts are in dollars and cents only, for the convenience of calculation. The contract with John Donaldson, dated the 17th of October, 1834, is a memorandum in dollars and cents, without penalty, or an agreement as to the proportion to be reserved, or the mode and conditions of payment,—it includes many thousands of dollars worth of work. The contract was not completed to agreement. Part of his contracts, Donaldson fulfils, and part he lets out at a reduced price. Of about \$30,000 worth of estimate work laid before the Board last year at our first meeting, we had almost entirely to depend on whatever the Engineer might be of opinion was correct—it was scarcely possible to afford a check.

Thomas Merritt had given to him sections 9 and 10 in the feeder Canal, very light easy work, at 125 cents per cubic yard,—on which he turned to Daly & Co. and agreed that they should perform the contracts for 92 cents, and he would give them orders on the Canal Office at that rate. The Engineer's bill was in this form:—

		==			===
"Daly & Co., Sec. No. 9." 5090 yards Excavation—9: Grubbing SI-100—\$12 "7½ days work at Marshvill "Earth on Berm, 300 yards-	i c—89.	•••	\$	483 10 6 28	55 08 68 50
" Section No. 10.			s	528	81
" 5382 yds. Excavation—94.	8512	29			
"Grubbing \$4-100	10	08			
" Mucking on Berm, 480 yds.	45	60			
" Deduct Basin by T. Merritt	\$567 22	97 00		545	97
Į.			-  \$:	1074	78

" N. B.—This is the amount due Daly & Co. on Sections 9 and 10, for which they hold Thos. "Merritt's order, payable at the Welland Canal Of-

" fice, at the above prices.

" Signed

G. KEEFER, Jun."

Daly & Co. did the work, and got \$1,074 78 on the order of T. Merritt; and then T. Merritt called and drew an additional \$337 56, as his profit on their hard labor. His price was kept a secret from them, and his gain by their industry did not reach the public ear. Mr. President Merritt studies to keep all contract prices a secret.

[Witness withdrew.]

WEDNESDAY, 24th February, 1836.

Committee met.

PRESENT.

JAMES EDWARD SMALL, Esq., Chairman.

Messieurs Chisholm,
Gibson,
McDonell,
Parke,
Roblin,
Shaver, and
Thorburn—S.

FRANCIS HALL, Esq., Civil Engineer, called in and examined.

# [By Mr. Mackenzie.]

54. (a) Have you seen the agreement under which the extensive Berm Bank contract, near Dunnville, was given to Thos. Merritt, Jun., and in what way has that work been carried on? I have seen the contract; the banks appear to be generally well constructed; complaints have been made of logs being inserted; I have not had any opportunity of seeing more than three or four; these logs were observed after the water of the feeder was drawn off. The works seem to be of a fair quality under that contract, in their unfinished state. I consider that those logs can be of no benefit to the Canal banks; they are expressly against the spirit of all

contracts for embankments, and against general usage or rules for conducting works of that nature.

- 55. May there not be a great many more logs in those banks?—There may be.
- 56. Will you be able to measure the work, so as to form an accurate judgment of what has been and what has to be done—the work not having been finished in the year in which it was agreed to be concluded? I will be able,—by placing any quantity of yards of earth into a regular or irregular form, the correct contents can be obtained; this earth embankment is of a regular form, and can be measured exactly.
- 57. Does Mr. Merritt do the work himself, or has he hired it out to sub-contractors; and if so, at what prices? I was not upon the works last season, when they were in operation; but understand that the works were done by sub-contract—I only know the contract price.
- 58. What is your opinion of large contracts, such as that of T. Merritt, Jun., for the Berm Bank, and John Donaldson's contract of October, 1834, ought not the fulfilment of such as these to be guaranteed by sufficient surcties; and have they not both failed for the want of them? I see no reason to object to large contracts, if the same is in proportion to the means of the parties,—sureties in most cases of contract should be demanded. I know those contracts have not been complied with, but I cannot say the reason why, unless from a limitation of time.

#### [BY COMMITTEE.]

59. What will it cost to fulfil the contracts now in operation?—It will cost no more than formerly, because the same contractors are going on with the work; the principal loss is that of time.

# [By Mr. MACHENZIE.]

- 60. Has not the non-fulfilment of the berm bank contract, been, in your opinion, very injurious to the health of a large tract of country!—Its non-fulfilment floods a great quantity of land, that will ultimately be of value to the owners thereof, and as the country is drained and improved, its salubrity will be promoted.
- 61. Was it fair towards the Company and country, that Mr. Merritt, while holding several important contracts, unfinished and in progress, should, at the same time and place be employed by the day with a number of laborers?—I do not think any person can fulfil more duties than one or two at most, upon canal works. It is neither usual nor proper, to be engaged by the day and with contract work at the same time and place.
- 62. What is your opinion of the practice of the Company in having very large contracts in the hands of individuals, which they could neither oversee nor fulfil; and which had to be taken from them again compromised, or given out to sub-contractors who had far less prices?—Admitting such to be facts, I think them very improper.
- 63. When you went to Gravelly Bay, at one time you took a note that one day when they had 10 men entered on the time list, afterwards sent to the Canal Office, there were but 5 present; and that at another time, entered 14, when there had been but 7 at work. When you were afterwards sent up by an order of the Board to enquire into the validity of these lists,

did it appear that work, such as was stated in the lists, had been done in these months to the extent stated, or were they obliged to admit that it had not, and to say that it was other work they were employed at ?—Upon examining the works at Gravelly Bay upon the 21st and 22nd of September last, I observed 5 men on the 21st, and 7 on the 22nd at work. When the monthly time lists were produced at the office, a greater number of hands was inserted therein; the explanations given in by the overseers at Gravelly Bay were such as induced me to withhold the extra allowance charged. Fisk and Ostrum, the overseers, stated that the extra hands were for Sunday work; in consequence, Fisk place the extra hands upon the time list of the Mondays and Tuesdays following. On re-examining the time lists of those days alluded to, I observed there was cattle charged. The exact number can only be found by reference to the time list for September. There was two yoke of oxen charged, but I saw none, the weather was not favorable for wood work, it being very stormy on the 22nd. I will also add, that on the 21st of October last, I measured the brush pier, the total estimate \$363 80, at the contract price.— Upon examining the monthly time lists for June, July, August and September, amounting to \$750 63, said to have been partly occupied with work, stone and timber, and timber framing for the same; and comparing the expense with the total amount of work done, I was at a loss how to reconcile the apparent discrepancy. Mr. Ostrum was called to apparent discrepancy all the work done was included in explain whether all the work done was included in my measurement. Upon the 19th of December last, I received an account of extra items, exhibited in a statement of extra work at Gravelly Bay, with my The 5 and 7 men observed by me remarks threon. upon the 21st and 22nd of September were employed upon the ditch at Gravelly Bay.

64. Did not the same overseer state to you at first that he had less men working on the Monday because they had been intoxicated on Sunday; and was there any unforseen eccurrence to render Sunday work necessary ?-Fisk, the book-keeper, to Thos. Merritt did so state, on Monday 21st. I was not aware of any unforseen occurrence, to render Sunday work necessary, but I have understood since, that there was a scow sunk at Gravelly Bay and raised upon a Sunday, but the same time list shews Sunday work.

65. Did you enquire into particulars of the bill of work and labor, amount \$4,000 and upwards, paid Thomas Merritt, Jun., for which there was no other souther than Mr. Thos. Merritt's clerk, John Fisk's certificate ?- I examined and compared all the time lists that could be found at Gravelly Bay, of 1834, and up to October, 1835; I found the same to be correct copies of those in the office. The bill of \$4051, was examined by me in the canal office, and the various items then explained to my satisfaction by Thos. Merritt; but, as the work referred to was not done under my directions, I am not so competent to judge as those under whom the work was executed.

66. You have read the report by Messrs. Thorburn, Butler and myself, relative to Thos. Merrita's accounts and contracts; what was your opinion of the proceedings under which Monson's forfeiture was given to Merritt, and the allowances made him, without a new contract or the security that had been

demanded of Monson !- I do not think an Engineer that was not present at the execution of the work can give a proper answer to that question: to fail a result

67. Were the prices charged by Mr. Thos. Merritt for spikes and iron, by contract, and when he had no contract, fair and reasonable !—The prices were certainly high, compared with St. Catharines prices; those spikes that Mr. Merritt charged for, were stated to be cut spikes, which bore a higher price than common; whether the same was an overcharge I cannot say.

68. After the locks had been renewed or repaired at great expense last winter, did not two of them break down in the summer and interrupt the navigation for weeks together, and was not the stone and the workmanship a miserable failure ?-There was a stoppage of the navigation twice during the last summer, after the 3rd day of July, but more in consequence of foundations giving way than sidewalls; the plan is not commendable, if it could be avoided, and should not be adopted but in cases of emergency; without stopping the navigation, the locks could not be repaired at any other time than the winter .-The interruption of the saw-mill lock was the longest, it was, I think, 9 days, the other lock I think not so

[By Mr. MERRITT.]

69. Did you not examine the estimate of Mr. Keefer from his original level on the Berm Bank which was let to Thomas Merritt and find the computation correct?-I did, and found all the calculations correct.

70. Did you ascertain or know that proposals were received for performing this work, and what was the lowest price per yard offered ?—I know nothing about it, farther than from minutes in the canal office

of which I have no copy.

71. What was the price paid Thomas Merritt per yard—is the price high or low, and will he make money or save himself by it?—I think it was fourteen cents per yard. I do not think he will make a great deal of money by it. It might have been a fair price at that time, but tenders have been received this year much lower, for smaller jobs of the same description. In consequence of a year's trial, the banks will have subsided at least 12 inches upon their height, which extra height the contractor has to make up at his own expense, without receiving a measurement for it—as the contract specifies certain dimensions and quantities to be executed.

72. Do you know or have you heard the reason that work was not finished last Spring in time as well as the contract of Donaldson?—I have heard the reasons but cannot express them at present, beyondwhat has already been stated, in reference to time.

73. Did you hear the reason why the rock on bottom was not taken out on New Cut !- I am not aware of any other reason than that Donaldson was limited to time. In consequence of dams being necessary to prosecute the lock work at Gravelly Bay, which dams interfered with his work.

74. Cannot the work by Donaldsonand T. Merrita be done now at the same time the rock is taken out? Certainly now is the best time both to finish the Rock and the Berm Bank as the waters are entirely exchided from the canal, and no impediment exists at Gravelly Bay lock.

- 75. Are not both Donaldson and T. Merritt, considered good contractors and able to execute the contracts alluded to by Mr. Mackenzie?—I never heard any thing to the contrary.
- 76. Do you know the situation of the lock at Gravelly Bay?—I do.
- 77. Do you not consider the work of lengthening that lock 25 feet, a most difficult and arduous undertaking in the winter season and hard frosts?—Yes. I think it was one of the most troublesome of any job on the whole canal.
- 78. Was the work well executed and well done? The lock work appears to be very well constructed, but part of the lower wing walls from some fault either in the foundation or embankment have bulged—the extent of this bulge will be about 35 or 40 feet. I think the cost of repairing it may be about \$200. It does not form part of the lock, but is part of the West entrance wall in connection with the lock.
- 79. Did you not get the opinion of Mr. Culp on the value of those prices of iron work, and did he not say it was not the value?—Mr. Culp's letter was before the Board and I understood Mr. Culp has allowed higher prices than Mr. T. Merritt charged.
- 80. Do you consider the price of \$4,000, high for the work done in damming, pumping, and keeping out the water and in lengthening the lock?—For lengthening the lock 25 feet it is difficult to say without calculations, but I think £1,000 is a fair price, for both lock and adjoining walls.

## [By Mr. MACKENZIE.]

- 81. Have you had any evidence to shew you what the sums amounted to, which included the charge for lengthening the lock, seeing it was done by day work, and you was not then on the line of canal?— I have made no calculations upon it—but an estimate something nearly correct may be made by those who know where the old work terminated, or was displaced, and where the new commenced.
- 82. You saw the Dredging Machine that Mr. Yates sent in, the cost of which was from 7 to £800—What was it worth, and when set up at auction and advertised in the papers, what was bid for it?—I have seen the Dreding machine—I think it may have been worth £100—there was \$300 bid for it at St. Cutharines—I do not know the cause of the depreciation of its value—but I understand the machinery is only fitted for a uniform motion without strain.
- 83. Do you remember that Mr. Wm. H. Merritt wished very much to induce us (the Directors) to give \$2,000 for the Sir Walter for a Dredging machine—what could have been its value to the Company for that purpose?—I recollect visiting the Sir Walter with part of the Board, but what the President offered the Sir Walter for I do not know, I do not think it was worth any thing for a Dredging machine, as in my opinion the expense of remodelling the boat and machinery would be considerable, and the result doubtful.
- 84. What is the opinion of masters of schooners passing on the canal of the manner in which the water power is disposed of?—I have heard many complaints from masters of vessels, some of them

say that it is more a canal for mills than for vessels—that is, when they happen to come to a level, that is a few inches under level, or where bara exist—they are sometimes detained for a short time, then the mills have the blame. I think the millers are generally to blame. Bars are produced by saw-mills on the line, that requires frequent dredging—saw dust generally finds its way into the canal, which ultimately subsides and forms these bars. Tinline, the lock-keeper at Mr. Butler's mills, says he is ready to prove having detected the millers at that place, wheeling saw dust into the canal during the night—there are bars upon the canal line independent of saw-mills, which are now being removed.

S5. What do you consider to be the fair value of the water privileges at Allanburgh, now in the possession of Messrs. M'Donell, Yates, and Creighton, with the 100 or 150 acres of land, exclusive of what they have laid out on the mills?—It would take some time to answer that question; but I think about £2000 would be near the value. I think a fair value per annum would be \$600 or \$700 for these mill privileges and lands.

#### [BY COMMITTEE.]

S6. Did you know of your own knowledge of vessels being detained by the mills?—Yes, frequently. I cannot state the number per day. Upon short levels it is almost impossible to keep their levels up where a saw-mill is situated, more particularly during the night, when the lock tenders are absent and the mills in operation.

# [BY MR. MACKENZIE.]

- S7. Did you become acquainted with any valuable improvements made to the Canal Company's property by the Hydraulic Company during the time they held the lands and water power?—I have not heard of any, and none has been pointed out to me, so far as I can remember.
- SS. Do you think that, considering the very great expense to the Canal Company of the St. Catharine's Feeder, and temporary aqueduct, the extent of the water privileges it gives to Mr. Merritt, Mr. Phelps and the other occupants, any thing like a reasonable compensation is obtained for the very valuable and extensive powers thus conceded?—So far as I can make out the estimates for that work, the expense has been about £1,695; the interest upon this should be at least ten per cent., or £169, independent of repairs. If £125 only is given, it is too little; because this mill race, from its heighth above the Canal at Phelp's Grist-Mill, provides to the St. Catharine's Hydraulic Company mill privileges to an almost unlimited extent.
- S9. Have not Messrs. Merritt and M'Donell so engrossed the lands on the Canal line at Port Colborne, that, although the Directors mention, in their report in 1823, that there is the Port Colborne Lot, (about 140 acres,) as the site of a town belonging to the Company, enough cannot now be found for wharves, basins, and roads at that harbor?—I do not know who the land belongs to on each side; but my opinion is, that the ground laid out for basins and wharves is extremely limited. Basins cannot be extended in a circular form; but only in a longitudinal direction, according to the plan at Gravelly Eay Town; the width for basins and wharves is only 218 feet 8 inches over all.

# [By Mr. Merritt.]

- 90. On what levels does this detention occur? I have seen upon Partridge's level, near lock 3, early in the morning, the water reduced fully a foot; if vessels should pass at that time, they would be sure to be detained.
- 91. How often and how long have you known vessels detained on that level? I cannot refer to that level particularly for detention of vessels; but I have observed the water more than once reduced during the month of July last upon that level.
- 92. Do you not know there is a positive order of the Board not to reduce those waters more than an inch below water mark?—I am aware of the order, and of the extreme difficulty that lock-keepers sometimes have to comply with it; for instance, betwen locks No. 2 and 3, where a saw-mill is crected at each, if both mills go at the same time, each requiring an equal portion of water, the levels will remain uniform; but whenever the upper mill stops, the levels become deranged, which requires constant attention of lock-keepers, although no vessels are near, during the night, no lock-keeper is in attendance.
- 93. Do you think any preference is given to the mill owner as being a Canal Director?—I think none whatever.
- 94. Had you not the whole power to enforce these regulations without reference to the Board?—Certainly, since the month of August last, I considered that all the overseers upon the canal were placed under my directions. But it was the special duty of John Vanderburgh, according to a resolution of the Board, dated 15th May, 1835, to superintend the passage of vessels through the locks, and to observe that lock-keepers attended to their respective duties.
- .95. If they do that, is there not an order, on complaint of a lock-tender, to close up those mill races?

  —I have not seen the order, but I believe it exists.
- 96. Do you know that a hundred or hundred and fifty acres of land is sold by Mr. McDonald & Co., at Allenburgh, as stated by Mr. Mackenzie?—I know nothing about it.
- 97. Do know of my having purchased any part of this property, of the Welland Canal Company !—I know nothing of those transactions.
- 98. Do you know from whom I purchased the land at Port Colborne, as referred to by Mr. Mackenzie in question No. 89?—I do not.
- 99. Is there not a chain and a half in width on each side of the canal above the lock, left for canal purposes and all below?—I think, as far as my recollection serves me, from an examination of the place, there is less land allotted on one side than upon the other—there is 78 feet, S inches upon the east side, and SO feet upon the west; allowance of canal, 60 feet; but 15 feet has since been added to the canal surface and taken from the west bank; there is abundance of room below the lock, upon the eastern side of the canal, but it is limited to 33 feet between the canal water and mill upon the west side.

#### By Mr. MACKENZIE.

100. Do you remember that when you and I went up to see about a stoppage on the canal, that Boylan,

the lock-keeper told us, he never had seen or heard of any printed regulations about the saw mills?—I remember it distinctly, and immediately, sent him a copy of the regulations, which was the first copy that I had seen.

101. Did you ever know that any mill owner was fined by the Board for neglect of orders with respect to low levels above his mill?—None has come to my knowledge, but complaints have been made at the office, by lock-keepers.

#### [By Mr. Merritt.]

- 102. When was Boylan put in charge of his locks?

  —I am not aware of the date of his appointment.

  But from the minutes of the Board, dated May 15th,
  1835, (a copy of which was furuished me,) it appears
  that Boylan was then a lock-keeper for four locks at
  Thorold.
- 103. Did you know of any man having been fined on the line of canal; or any difficulty occurring in consequence of disobeying of orders?—I do not recollect of any lock-keeper having been fined, but they have been discharged for inattention, as in the case of Bonar and Hanning at the saw-mill lock, or No. 7.

#### [By Mr. Mackenzie.]

104. Has not Mr. Keefer got possession of a very valuable mill seat on the canal, with the water conveyed to his mill to turn four run of stones, and for which he pays no rent at all?—He has; I understand he pays no rent.

# [By MR., MERRITT.]

105. Do you know the circumstances under which Mr. Keefer became in possession of that mill seat alluded to?—There was an order of the Board to grant a mill privilege at Thorold to the first person that erected a mill there without rent for an indefinite period.

# [By Mr. Mackenzie.]

- 106. Can'you state what mill privileges Mr. Merritt and other Directors, hold on the line of canal?—The first erection on the line is Mr. Buder, a grist and saw-mill at lock No. 3; Mr. Merritt at lock No. 4; Allanburgh mills by Messis. Yates, McDonell, Creighton & Co.; Gravelly Bay, by a Company, I do not know for certain, but I think Mr. Merritt is connected with it.
- 107. Do not the saw-mills, by saw-dust and other obstruction, impede the passage of schooners on the canal, from time to time, to the injury of the navigation; and does not great carelessness prevail on the part of the saw-millers?—They occasionally do; and great carelessness does prevail on the part of the saw-millers. The water does not return to the canal at Dunville, Marshville or Port Robinson milks.
- 108. Is it for the interests of the Company that the President and Canal Directors should hold, as leases or otherwise, the most valuable milisites and water power privileges on the canal, or that they should be interested in such leases or water power.—I think it would be better they had not, as no blame would then attach to them for deficiency of water that may occur or upon any mill regulations that may be made.
- 109. Have any bad effects resulted from the present system of raining lumber and saw-logs out the

canal?—No bad effects that I know of, but the occasional delay in the passage of vessels; I am not aware of the present price of saw-logs, but think they pay 4d. each, the printed regulations will shew. I have not a copy with me.

#### [By Mr. Merritt.]

- 110. Do you know the price paid for water power, and the system on which they are let on the line of Canal?—I do—my general report states the price paid for each grist and saw mill on the line of the Canal is \$100 each upon a ten years lease.
- 111. Do you consider the price paid for this power ample?—I think it is low enough for grist mills, but too low for saw mills, in proportion to water consumed. Marshville mills are as well constructed as any upon the Canal line; the grist mill, with a head of two feet and aperture of 100 superficial inches, requires a supply of about 500 lbs. weight of water per second; the saw mill, with a head of 6½ feet and aperture 192 superficial inches, requires about 1,300 lbs. per second,—the proportion, therefore, is nearly as 5 to 13.
- 112. Do you know whether the Directors are desirous of disposing of those situations, and to procure crections?—Yes; I believe they are. Several new leases are now in execution for mills at Dunnville, and other parts of the Canal line.
- 113. Are the Directors owners of any of the saw-mills referred to?—Messrs. Yates & Co., at Allanburgh, I believe, are the only owners of saw-mills upon the line connected with the Directory.
- 114. Is the rate of tolls on saw logs lower than on the Eric Canal for same distance?—I am not aware of the rate of saw logs upon the Eric Canal.
- 115. Are saw logs brought through the entire line of Canal to lower saw mills; if not, what is the reason?—I do not think I have observed any rafts below Thorald's mills. I do not know the reason, unless it be the delay and expense attending the Mountain Locks.
- 116. What are the description of mills owned by the Directors, which you say they are concerned in?—Mr. Butler's saw and grist mill; Messrs. Yates & Co.'s grist-mill, (two run of stones,) saw-mill, (two saws.) carding-mill, fulling-mill, lath-mill, and shingle saw. Mr. Merritt, Gravelly Bay, has a grist-mill, propelled by steam or water; also grist-mill at St. Catharine's.
- 117. Do you know of any instance where the Company have been injured by any Director holding an interest in any mill?—I am not aware of any.
- 118. And do you think those extensive grist-mills would have been erected without aid of the Directors?—I scarcely think they would, at least for some time after the opening of the Canal.
- 119. Will they not bring a much greater revenue to the Canal, in the transit of wheat and flour, by the erection of those mills in toll, than the value of the water power?—The grist-mills must increase the revenue, because they must carry their wheat from a distance, and, consequently, pass through the Canal to the respective mills. I can see no objection to grist-mills upon canals, under proper regula-

tions; but I am not of the same opinion as to saw-mills.

[Witness withdrew.]

SATURDAY, 27th February, 1836.

Committee met,

#### PRESENT.

JAMES EDWARD SMALL, Esq., Chairman.

Messieurs Chisholm,
Gibson,
McDonell,
Parke,
Shaver,
Solicitor General, &
Thorburn—8.

MR. HALL again called and further examined.

#### [By Mr. MACKENZIE.]

120. Have you examined the locks built by Oliver Phelps as contractor and superintendent, did he do his duty as a contractor and so as to merit the large additional payment made him beyond his contract, or did he neglect that duty, and if so, what bad results have ensued or are likely to ensue?—I have, the particulars are detailed in my general report. The injury to the works from the apparent deficiency of the workmanship cannot well be estimated, they cause a constant re-construction during the winter when such works should not be attempted.

#### [BY COMMITTEE.]

- 121. When were these locks built?—About nine years since.
- 122. If the locks are well constructed, how long ought they to stand?—About 10 or 12 years above the water, but below the water, they will be more durable.

## [BY Mr. MACKENZIE.]

- 123. Have you ascertained that Mr. Phelps employed a number of persons as sub-contractors at low prices to build these locks, and afterwards charged and was paid a far larger price than his contract without allowing all those persons their proportion of that increased price?—I understood from Mr. Squires that he had done so, but never from Mr. Phelps.
- 124. Was you present when about the commencement of the Deep Cut excavation a well was dug to try the foundation, and if yea, what was the result of the experiment?—I was shortly after, I observed the pit nearly filled with water—the workmen informed me when the water commenced to rise, they were obliged to retreat as fast as possible.
- 125. Had judicious precautions, founded on that experiment been taken, is it not reasonable to infer that the great loss sustained by the Deep Cut caving in might have been prevented?—I cannot say, because the line of the canal was afterwards varied from where the pits were sunk.
- 126. Are you aware that the earth taken out of the Deep Cut by Phelps, was placed a reasonable distance from the margin of the canal, or do you

consider the neglect of the contractor in that respect, a probable cause of the slides?—I consider that the earth in most places has been placed too near the margin, but am not aware under whose contract—this neglect is one cause, but springs in the banks and want of surface drainings are the principal reasons in my opinion of the slides, connected with quick sands near the bottom of the cut.

127. You have been residing at St. Catharines for some time, are you of opinion that Mr. Phelps is a person likely to be able to pay £7,558—the sum for which he is entered as a defaulter in the Company's looks?—I do not personally know any thing of Mr. Phelps' private affairs, but I understand he owns considerable property in the neighborhood of Saint Catharines, in the shape of mills, houses and lands, as to their value I do not know.

128. Were not Mr. Phelps' mills at Drummondville, now owned by Hezekiah Davis, built upon a lock erected by the Company for the benefit of the navigation in descending from the level of the Grand River dam to the natural level of the river?—I know that Mr. Davis has mills at Dunnville, but do not know who they were built by—I know nothing of the lock, it never was pointed out to me or brought under my consideration.

# [By Mr. Merritt.]

129. You have given your opinion and made an estimate of the locks on the line of canal built by Mr. Phelps, did you make your estimate of that value from the specification of Mr. Lewis, if so, what is the length of the chamber according to that specification, and what quantity of iron is in the gates?—I made my estimate from Mr. Lewis' estimate—the length of the chamber is 100 feet by 22 feet—I do not recollect the quantum of iron in the gates—I likewise examined all the documents relative to that subject that could be found in the canal office, my reply to Mr. Mackenzie's letter contains the result of that examination.

130. Do you know whether the locks are built according to Mr. Lewis' specification or not?—I think Mr. Lewis' specification referred to a model, which I have not seen. I think the present locks are all 110 feet within the chamber, with the exception of the lock at Gravelly Bay which is longer; particulars will be found in my general report, and therefore I cannot say they were according to Mr. Lewis' estimate.

131. Have you examined Mr. Barrett's estimate of the locks from the actual measurement?—I think I must have done so, otherwise I should not have placed his statement of it in my special report upon that subject without mentioning errors.

132. Was Mr. Barrett's estimate correct or not? I cannot say positively; but I think his calculations, founded upon that estimate, must be correct.

133. How many locks were built by Mr. Phelps on the line of Canal—how many have ever broke under the mitre sill, or at the foundation?—I think he had the contract for thirty-three locks—only one, to my knowledge, has broke under the mitre sill, or at the foundation, since July last. I never heard of any but the one having broken under the mitre sill; the engineers or overseers that preceded me; will be better able to speak upon that point.

134. You state there is a deficiency in the work-manship of the locks, to whom should the fault be attributed, to the engineer, contractor, or operator? In the first place, I do not like the design of the locks. It is not the operator that is to blame, but the contractor that employs him. The engineer and contractor are the responsible persons; if the engineer passes a work that is deficient, then he is responsible.

135. Do you understand from that, Mr. Phelps got an increused price on those locks, over Mr. Barret's estimate?—I understand he got \$116,412. It does not appear to be equal to Mr. Barrett's estimate, some waste wiers not being required.

136. Do you know what depth they sunk those shafts, before coming to quicksands?—It occurs to me it was about the bottom level, but I am not quite certain.

137. Do you know that a well was dug at each end of the Deep Cut prior to the commencement of the work?—I have no recollection about the wells.

138. Has a single slide on the Deep Cut from end to end arisen from placing the earth too near the banks?—I do not recollect of having observed any of those slides with extra excavation upon their surface.

139. Is Mr. Phelps a defaulter to the Company?—
I know nothing of that question.

#### [By Mr. Mackenzie.]

140. Has Mr. Beaton been employed as a confidential clerk of late by the Welland Canal Company, and have you had opportunities during the last eight months of observing his habits—Is he or is he not in the habit of being under the influence of strong drink and unable to attend to business for weeks, and is not the business of the canal injured thereby?—have the goodness to state to the committee such facts as come under your personal observation while acting for the Government Directors as Engineer in that respect. He has been so employed. There were particular periods when I did not consider Mr. Beaton capable of discharging his duty to the Company. I have seen Mr. Beaton in that state for days when he could not transact public business.

141. Do you remember what situation Mr. Beaton was in, about the time when the difficulty took place about the Company's books?—I do. He was in such a state that he could not regularly attend the office. It appeared to me from intemperance, although I never saw him drink liquor in my life.

142. Did Mr. Clark ever complain to you or to others, to your knowledge, that after the books were taken from the officers, he found Mr. Beaton transacting business in the canal office without his consent, and that although he complained of this to Mr. Merritt, he (Mr. Mr.) upheld Beaton and ordered him to continue to act in the office, independent of the Secretary?—I remember it distinctly during the time the books were taken away. Mr. Clark mentioned the circumstance as having occurred previously.

# By Me MERRITE

143. How long was Mr. Mackenzie at the Canal Office — I can only say he was there from the list of July, to about the maddle of October; I think he left St. Catharines upon the 24th October for Quebec.

- 144. Did not Mr. Beaton attend to him with great diligence until Monday, 24th October?—There was about a week that Mr. Mackenzie and I had the office to ourselves.
- 145. How long was Mr. Beaton absent ?—I cannot say how many days.
- 146. What time was it that Mr. Beaton was unable to come to the office and how long?—I think it was before or about the 24th of October. There was a number of days about that time, but I cannot tell exactly.
- 147. What day was it that Mr. Mackenzie examined Mr. Beaton's desk?—I cannot say positively, but think it was Monday, 19th October; my minutes state that I visited St. Davids upon this date. It was upon the same day I returned from St. David's.
- 148. Who opened Mr. Beaton's desk and who was present?—So far as I can remember, there was Mr. Mackenzie, myself, and you, present in the committee room when a conversation arose about some papers, which Mr. Mackenzie supposed were in Mr. Beaton's desk; you authorised Mr. Mackenzie to open or break open the same, if Mr. Beaton refused. We all left the committee room, and Mr. Mackenzie and I proceeded to the clerk's room, where, shortly after, we found Mr. Beaton, who opened the desk; during the examination of the papers you returned.
- 149. Do you consider Mr. Beaton a competent book-keeper?—So far as I am a judge of books, I consider him to be highly competent.
- 150. Do you know if ever Mr. Beaton entered a single charge in the books at the time you state him to have been intemperate?—I cannot tell—he was generally absent upon those times.
- 151.—In what situation was Mr. Beaton employed in the canal office?—Book-keeper, as I understand.
- 152. Did you ever hear that he was responsible to the Company for any monies?—Not that I am aware of. I considered him to be only responsible to Mr. Clark for what monies might be placed in his hands for payment of estimates.
- 153. Do you know that any loss whatever was occasioned by employing Mr. Beaton, as book-keeper?—I do not know; I never heard of any.
- 154. What is the character of Mr. Beaton, generally, as a book-keeper and man of integrity?—As a book-keeper, I have already answered, as to being a man of integrity, I would trust him with almost anything.
- 155. Did you ever know a more attentive, active and diligent person in the office?—Unless upon the occasions alluded to, I have considered him to be very attentive and constant at his duties.
- 156. What loss or injury could possibly accrue to the Company by the book-keeper being occasionally absent?—I cannot say.

#### [By Mr. MACKENZIE.]

157. Would you choose to trust a man who has the habits you have described Mr. Beaton as having, with the whole of such duties as devolve on the officer who keeps all the books and accounts of a large Corporation like the Welland Canal?—I would not at those periods alluded to.

### BY MR. MERRITT.]

158. Do you think a more competent man could be selected for the situation he fills in the canal office?—I think Mr. Beaton very capable of conducting the duties of his office, with the exception of the times alluded to.

#### [By Mr. Mackenzie.]

159. How long were the books and papers of the Company withheld from the officers and in your possession and that of the committee, by order of the Board; and under what circumstances were they returned to them?—I cannot state the precise dates, but think the books and papers were retained from the 24th of October to the 19th November, when they were returned to the Secretary and placed under the care of a member of the Board for one week, another member of the Board was to attend the second week, and a third in succession.

#### [By Mr. Merritt.]

- 160. Were the books ever in the hands or possession of myself?—I cannot tell whether they were or were not—they were never in your exclusive possession.
- 161. Who is Secretary of the Company?—John Clark, Esquire.
- 162. Are the books in his charge or in possession of the President or Board of Directors?—I cannot say what the duties of the Secretary are, but I think they should be in the Secretary's hands, subject to the inspection of the President and the Board.
- 163. Have not all the Directors the same access to them as the President?—The books are in charge of the Secretary, so I imagine, I do not mean exclusively, but subject to inspection, either by President or Board.

#### [By Mr. Mackenzie.]

164. What is your opinion of the route in the bed or bottom of the 12 mile creek by St. Catharines—was not the taking the canal 4 miles out of the line in the bottom of a ravine, a very great injury to the Stockholders and the Company!—I have explained my views upon that subject, very fully, in my general report. I think the present route is not the best that might be obtained from the mountain near Thorold, to Port Dalhousie. That a better and more direct line could be made between those points, saving from 3 to 4 miles in distance.

#### [BY COMMITTEE.]

165. What is the effect of the canal being lengthened the 3 or 4 miles alluded to?—I can give no idea of the expense of the original, and consequently cannot tell the difference of expense between the lines, but if we can morten the direct communication between the lakes, a valuable improvement will be made in the navigation.

#### [BY MR. MACKENZIE.]

166. The canal is carried through Chief Justice Boulton's lands to Dunnville and thereby extended 4 or 5 miles up the Grand River, instead of terminating at or near its mouth; was not this a great waste of money, besides entailing a constant bill of expense on the Company or the country, to uphold the artificial banks now building by T. Merritt ?—The feeder might have reached the Grand River by a pro-

longation of the same  $3\frac{1}{2}$  miles instead of the present circuitous route of 8 or 9 miles to the same point.—
The saving of the difference between the  $3\frac{1}{2}$  miles and the 8 or 9 miles, would have been accomplished.

167. What course would you recommend to be taken with the canal under existing circumstances, taking into consideration all the facts that have come to your knowledge?—I should recommend the government to take the canal into their own hands and complete it without delay, in the most substantial manner.

#### [By Mr. MERRITT.]

- 168. Did you know that the present line of canal was laid out by Engineers employed by the Company?—I have always understood so.
- 169. Did not Mr. Clowes lay it out and report on it?—Mr. Clowes published a report, but that it was upon that line, I am not sure.
- 170. Did you not yourself report on Mr. Clowes' estimate?—I did—but I think the estimate was upon another branch of the 12-mile-creek.
  - 171. Did not Mr. Roberts also ?-I do not know.
- 172. Did you know or hear at the time that I, either directly or indirectly influenced the Engineers in laying out this route?—I am not aware of any such influence.
- 173. Does not the line as now laid out answer every purpose for which it was designed?—It does very well if the locks were good.
- 174. Has not less expense been incurred on the part down the valley of the 12-mile-creek, from the stone lock at Centreville to Lake Ontario, than on the locks above it?—I am not aware that there has, as all the locks from 6 upwards to No. 31 have been repaired or require repair. Upon the locks below St. Catharines, no repair of consequence has been hitherto required.
- 175. Did you level and measure the grounds or did you make the estimate from supposed distance? I took the data for the present line of the canal from the canal sections, I walked over the ground upon the short route, and found so few inequalities as to render a level unnecessary; the distance was taken between those points from a map of the district supposed to be correct.
- 176. Do you know the cause of carrying up the canal five miles from the mouth of the Grand river? I understand the Government would not permit the canal to terminate nearer the mouth of the Grand River than Dunnville,
- 177. Did you ever hear it attributed to Mr. Boulton 3-No.
- 178. Is not the Dam as now situated in a most excellent position?—It is in a good position as regards wasteweirs, and is well situated as to water power.
- 179. Could it be made in a better position as regards the works?—It could be made to accommodate the public better—I should have preferred it to be placed below, near to Grand River harbor, where direct access with Lake Erie and the Grand River would be obtained.
- 180. Do you think the canal will ever succeed if it remains under the present partnership, controlled

by Directors appointed by the House of Assembly and private Stockholders?—I do not think it will—it should either be placed in the hands of the Government or of the Shareholders.

## [By Mr. MACKENZIE.]

- 181. Are not 3 or 4 miles additional length, out of 7 or 8 on a ship canal like the Welland, occasioned by taking a worse route—a very serious hindrance to the navigation?—Certainly; the shortest communication between the lakes is the best, where no impediment exists.
- 182. Does not the situation of the locks in the 12 mile Creek ravine render them much more liable to serious accidents, than if they had been placed on the favorable high land of which you have spoken? I prefer locks in dry situations if possible. Locks are liable to more accidents, and greater expense in repairing them, when placed upon wet ground, such as the bottom of ravines.

#### [By COMMITTEE.]

- 183. Is it your opinion that the hydraulics should be a separate interest from the navigation interest? I think the Canal proprietors should have the perfect command of all the mills and hydraulic privileges of the navigation, so that the Canal proprietors may stop or regulate them, as the navigation may require.
- 184. Is it your opinion that a lock at Dunnville would be of advantage to the Company and the country generally?—I think it would, as access would then be afforded to pass and repass by the Grand River to Lake Erie, and to the Canal by the feeder.
- 185. Is it your opinion that the aqueduct across the Chippewa could be dispensed with without any material injury to the Canal?—It cannot be dispensed with; but two descending locks might be placed from the present Canal near the aqueduct to Chippewa River, which would afford public accommodation from Port Robinson nearly equal to the Chippewa; by this lockage all boats, barges and vessels that navigate the Canal could then pass and repass to the head of Chippewa River navigation—rafts of timber would descend under the aqueduct as usual.
- 186. Have you formed any probable expense required to put the Canal and locks in thorough permanent repair?—I have made two estimates for improvement of the locks. That for the general improvement of the Canal, cut stone locks, of the best description, with east iron tunnels, with the proper sluice gearing, will cost £117,471 8s. 6½d.—the other estimate, to be done in a less substantial way, will be £111,186. These works could be undertaken and go on without interrupting the navigation of the Canal, and comprehends new locks, waste wiers, raising and repairing Canal banks, improvement of harbors, and every thing requisite to place the Canal in a permanent situation, excepting the expense to convert the feeder into a ship navigation.
- 187. How much money would be required to be granted annually to complete the present works permanently?—I would recommend the whole lock expenditure to be made within two years, as then less expense would be required in rebuilding the present locks to keep the Canal open. The new locks required will cost £70,305—one half of this is £35,000

for two years, and the residue to be expended upon other parts of the Canal by the end of the third year.

188. According to your views, which do you think to be the most advantageous to the Province, to continue repairing the present works, or to adopt the least expensive of your estimates of putting the Canal in permanent repair?—I would recommend the new route, for the locks to be executed immediately. During its execution, which may occupy two years, I would repair the most defective of the present locks, so that the navigation would not be interrupted.

[Witness withdrew.]

Mr. John Leys, Engineer, called in, and examined.
[By Mr. Mackenzie.]

189. You have had an opportunity of trying the Steam Dredge sent in by Mr. Yates—what was it worth for that purpose to the Company?—I did not see it in operation. I do not think it qualified for dredging. I do not think it has sufficient power. My opinion is, it is worth nothing as a dredging machine.

190. How much do you consider that the "Sir Walter Scott" was worth to the Canal Company for a Dredging Machine?—She has never been converted into that as yet. I do not think it possible to convert the Sir Walter into a Dredging Machine.

191. Is Mr. Wm. H. Merritt an owner of the Sir Walter !—I have always understood he was one.

## [By Mr. Merritt.]

192. What price was paid for the engine on the Sir Walter Scott?—I do not know.

193. What did the boat cost, including the engine ?—I do not know.

194. Do you think that engine and boat (if it had all the necessary apparatus for dredging) could be converted to that purpose?—I think the engine, if the apparatus for dredging was furnished, would answer the purpose of a Dredging Machine. The engine was a good one, and has sufficient power.

[Witness withdrew.]

Mr. Mackenzie again called, and further examined.
[By Committee.]

195. Have you any specific allegations to offer in support of No. 10?—

Independent of the \$10,000 borrowed from the Tolls, by the aid of their notes, Captain Creighton horrowed, September 1, 1834, from Tolls, £100—and he borrowed, February 4, 1835, and gave his note for other £164 14s.—on 3d May, he borrowed other £97 4s. 9d. None of these loans appear on the Company's books, although made from its funds, nor was there any order of the Board for them, and the debtors of the Company had to wait to accommodate the Captain. On the 6th of August last, the day my investigation commenced, the Captain paid up. See petty leger, p. 49, &c. I have already

mentioned that Beaton entered the interest on these loans to the Company's credit. The last entry he made in the cash journal, before I left for Quebec, was £15 18s. 11d. But the transactions out of which this sum of £15 18s. 11d. arise, nowhere appears on the regular books, and, indeed, they could not, for they were improper and unauthorized. On enquiry, I learn that £170 5s. 4d. of these last loans was borrowed for Alex. Y. M'Donell.

It will be seen that the officers kept their personal accounts mixed up with the public transactions of the corporation in a very reprehensible manner. Mr. Merritt, too, while Agent to the Company, was a forwarder of goods,—a practice which I have shewn to be prohibited in New York State by a positive law.

Some of the letters I annex hereto in explanation.

St. Catharines, July 10th, 1833.

ROBERT RANDALL, Esq.

Dear Sir.

There is an order of the Board, authorizing you to keep an account with various individuals, of whom I am one.

You will charge me with all Tolls passing in my vessels, or on my account—it is not on my individual property or the individual property of any other person whose name is mentioned—the consideration was, the Company's being indebted to those individuals.

Your's,

(Signed)

W. H. MERRITT.

Mr. Treasurer Creighton to Mr. Secretary Clark.

CLIPTON, March 19.

My Dear Sir,

Our Posts arrive late at night, and are off at day-light every other day, so that our letters often remain four days unanswered—such is the cause of not replying to yours before.

I really did suppose Mr. McDonell had paid up the loan before this, finding he has not, I will settle it by drawing for it, as you ought not to suffer for your kindness. The Commercial Bank has given me a credit for £1,000 on Mr. Yates—but having preposed better terms to ourselves than those given, I only wait their answer from Toronto, when I will liquidate, with many thanks, the debt to the office.

Sincerely yours,

(Signed)

OGDEN CREIGHTON.

The same to the same.

St. Catharines, April 2, 1334.

Dear Sir,

For travelling and other incidental expenses, I have been at an outlay that has inconvenienced me for the present. May I bee, therefore, you will be so kind as submit to Mr. Merritt whether he can oblige me by the loan of £100 for two or three months. Should the Company require it to be paid within that period I shall be ready to do it.

Yours faithfully,

(Signed)

OGDEN CREIGHTON.

John Clark, Esq.

Sec'y. W. C. C.

#### (Endorsement.)

I would recommend your obliging Mr. Creighton with the within.

W. H. MERRITT.

The same to the same.

CLIFTON, August 20, 1835.

My Dear Sir,

Your enclosure, acknowledged as correct by Mr. McDonell, shall be presented to Mr. Yates to know his pleasure thereon—I cannot name any definite period when Mr. Yates will find it convenient to pay up the remainder of the loan to him, but I have reason to think, from his last letter, that he will in a short time be here to answer for himself.

Very truly yours, in haste, OGDEN CREIGHTON. (Signed)

The Treasurer to the President.

CLIFTON, (Tuesday evening,) June 16th, 1835.

My Dear Sir,

I saw Mr. Ridout last evening, and presented him Mr. Yates' two drafts—he told me there was no necessity for putting them in the Bank, as it was well understood by the Board that all Mr. Yntes' business would be satisfactorily arranged to-morall Mr. Yates' business would be sent and the row (Wednesday). It was put off last Wednesday in consequence of a press of other matter before the Board. When this shall be effected we can pay you up the whole \$10,000 if required—but until Mr. Ridour satisfies Mr. Yates and he desires us to do so, we cannot move in the affair. I wrote to him by the United States Steamer, to send me authority, and the Capthe United Status Staturer, to send me authority, and the Captain promised me he would mail the letter to-morrow at two (Wednesday). Mr. Y. will get it Thursday morning and will reply in three days. In the mean time I left a check at Lockhart's, for Mr. Clark for £500, which I hope will keep you going for a few days. Clark will wait at Toronto to know precisely whether the draft for £7,000 has been negotiated.

Very truly yours,

(Signed)

OGDEN CREIGHTON.

CLIFTON, July 8th, 1835.

My dear Sir:

By Mr. Yates' desire, I am to pay to the Welland Canal Company, the sum of £1,000, in addition to the check for £500, which was dated the 17th ult., making, together, I now enclose you a check for £500, and will let you have £500 more next week if you like. Mr. Yates stopped all discount at the Banks, in his name, as he will pay up all he owes without going into Bank; he, consequently, requested me to get back the two notes in your possession. as they are virtually uscless—will you, therefore, please send them when you send for the remaining £500 to me. We shall soon be in funds to meet every remaining £500 to me. thing, I hope.

Your's faithfully,

(Signed)

OGDEN CREIGHTON.

There is also a loan to Keefer, entered in the petty leger; and in the 118th page of that leger, I find that Mr. Robert E. Burns, the lawyer, received a loan of £178 13 5 of the funds of the Company, without any authority of the Board of Directors, and that Messrs. Clark and Beaton collected \$16% of interest for the same, from Burns, which is entered on the petty leger, as if the interest had been carried to account. Mr. Beaton, who keeps a cash book, in which his own and Mr. Clark's transactions are recorded, entered the interest collected from Burns, in that book, and when I perceived the £15 18 11 entered in the cash journal, I looked back some time, to see if the \$162 was also entered in it, as it was a much older transaction; but found that Beaton had not made any such entry. There is also a loan to Mr. Butler entered on the petty ledger, but I see no authority quoted by the officers for making it from

of the officers of the Bank of Upper Canada, if they were to loan the Bank funds without consulting the Board ?

196. What facts are you prepared to adduce in support of charge No. 27?—This loan seems to have been contracted to pay Mr. McDonell's and other private debts, and as a fund for other purposes; 60% went to Mr. Merritt. On the 31st July, 1834, \$536 of it went to retire A. McDonell's note to W. H. Merritt, endorsed by O. Creighton, Commercial Bank. Mr. McDonell's debt of it was paid to Mr. Burns. to Ferrie & Co. was paid, £50. James Fitzgerald, for McDonell got £84. Other £757 12 6 of it for McDonell got £84. went to the Bank of Upper Canada, in September, to retire McDonell's paper there. On the 16th September there was a note in favor of J. B. Yates of £176 5s. A. McDonell had £75 out of the Tolls. In September, 1834, they had the \$10,000, all out of the funds of the Canal. On the 1st of June, 1835, there stood a balance in the petty leger, as "Loan to J. B. Yates," the amount being £3,443, and on June 19. Mr.T. Dalton had £17 5s. from the same concern.

(OFFICE COPY.)

ST. CATHARINES, June 10th, 1834.

WM. H. MERRITT, Esq., President, &c.

Dear Sir:

Dear Sir:

In the arrangements required to be made by me consequent upon my agreement with the Company, a large sum of money must be paid by me, and if it can conveniently be done, I would be happy to receive from the Company the sum of £2,500, for which I will give my obligations to pay whenever it shall be required by the Company. This advance will be mere temporary arrangement, for which interest will be paid.

I am, very respectfully, Your obedient servant,

J. B. YATES.

197. What have you to offer in support of charges 28 and 29 !- The expenditure in constructing and repairing the wooden locks on the Lake Ontario side of the Deep Cut, cannot be correctly obtained, by reference to the obscure, ill-arranged and irregular records of the Canal Office. Mr. Wenham established an excellent system for classifying expenditures, but it cost some labour and was (as well as for other reasons) abandoned. Phelps's bill was about \$120,000; his additional contract for the Deep Cut locks after the slides, with the timber, would be about \$6,000; there is also the Gravelly Bay lock, and the costly alteration in it; the repairs of locks by the commissioners in 1833; the repairs by the Company 1827 to 1835; pumping water out of lock-pits; embankments; excavation of the lock-pits; repairs of the ship-lock at Port Dalhousie, and a great variety of miscellaneous charges scattered through the esti-mates of several years. Last May and June we voted about ten thousand dollars for lock improvements, and two of the locks so attempted to be mended are already in ruins. Some well informed persons calculate the locks expenditure at \$270,000; others attempt to shew that it has exceeded \$200,000. The expense of lock tending, engineers, and repairs is greatly increased by the use of wooden locks—they the funds of the Corporation. What would be said are community getting out of order. Not so with stone locks, well attended to—once completed they endure for ages. In nothing are the locks built by Phelps's sub-contractors more deficient than in the puddling, an important process, respecting which better rules and regulations ought to be copied. The engineer has been very particular in his report concerning the state of the locks; I also have sought as much information as the Company's books and papers would afford, relative to the original cost, the materials used, the expense of repairs, their durability, and the charges for tending and probable cost of renewing them:

The first cost of all the locks on the Welland Canal was about \$175,000—they are chiefly made of wood. From Mr. Hall's report, added to my own observation, I am convinced that the whole of them will soon require to be renewed; some of them are now in ruins. The charges for tending them are much higher than would be the case if there were substantial stone locks—the expense of repairs and renewals is enormous-the cost of renewing locks may be learnt from the Engineer's estimatesand the documents and facts I have collected and arranged for the use of the Legislature, have confirmed my opinion that in the disposition of some of the original contracts, favoritism, and a desire to lavish the funds on particular individuals influencing the management, were the guiding principles of the Board, and that by this means the public have suffered deeply and the best interests of the canal been sacrificed.

When the 34 locks were proposed to be let out by contract in October, 1825, the proposals were numerous—the excavation, embankment, puddling, and grubbing, formed no part of that agreement. Some persous offered to contract for \$1,800, others for \$1,850, and so up to \$4,000. The offers were numerous.

Maxfield, \$1,800 to \$1,960. Withey, Ward, Sayre, and Co. \$1,950 to \$1,975. Brown and Taylor, \$2,900 to \$3,000. Hayward and Pearce, \$2,650. Brundage, \$292 per foot lift.

Extract from the Minutes of the Welland Canal Company.

26th October, 1825.

PRESENT.

Messieurs. Allan, Keefer, and

Many proposals were delivered in for the construction of the locks, and some on lower terms or for a less sum than the offer accepted, but from the character and responsibility of the Company, as well as the importance of having this work properly and faithfully executed, the Board decided on letting the whole to Messrs. Beach, Hovey, Ward and Phelps, at the sum of £550 currency for each lock.

The following extract from the Journals when compared with these details, will show how successful Mr. Phelps was in deceiving the country, us to his and Keefer's lock jobs:

> House of Assembly, Monday, Dec'r. 5th, 1825.

The Committee met.

Mr. ATTORNET GENERAL ROBINSON in the chair.

OLIVER PHELPS called in and examined.

Are you a contractor for any part of the Welland Canal?—I am a contractor for all the locks from the Welland to Luke On-

tario, exclusive of the lock at the harbor at the mouth of the 12-mile-creek. There are 34 locks, and I have taken them at \$2,200 per lock, which will complete them in the very best manner, entirely of wood.

Why have you not undertaken the lock at the harbor?—It was commenced and put under contract before I came in.

What are to be the dimensions of the locks?—Twenty-two feet in width and one hundred feet in length—(the chamber of the lock.)

Have you been asked to estimate what would be the increased expense of making all the locks thirty-six feet wide in the clear?

—I have. I think it could be done for \$20,000, including the excavation—thirty-two feet in breadth for about \$16,000. I am sure it would not greatly differ from that.

Would any addition to the length be necessary for steam-boat navigation?—I think not, for a steam-boat of 150 to 200 tons, well proportioned. From the greater space required for opening the gates of the locks when widened, an additional length of about six feet would be advantageous. The charge for the additional length would be in proportion to that for the whole length of the side, and might occasion an additional charge of about \$3,000 for the whole.

The contract for the locks was entered into on the 4th day of January, 1826, with Oliver Phelps, Smith Ward & Co., and John Legg. The locks were to be built of white oak and pine agreeable to a certain model; the size was 100 feet by 22, the price \$2,200 per lock, or £18,700 for the whole 34 locks, which sum was fully understood to be to complete and finish them all. One-fourth of the contract price was to be retained, to ensure the fulfillment of the contract by the 1st of April, 1827.

To this contract the seal of the Company is attached, and it is drawn out, witnessed and executed in a business like manner, and altogether different from the slovenly and imperfect documents now in use.

It appears by the Company's books, that at the period when the contract was to be completed (1st April, 1827,) little more than a quarter of it had been fulfilled. The Company allowed Phelps at the same time to be a contractor for all the locks and for the Deep Cut; contracts of \$300,000 value and which ought not to have been given to one person.

By the contract of 1826, five hundred and fifty pounds were to ensure the completion of each lock, and for the 34 locks the price was to be \$74,800.

- 1 find, however, the following estimate by Barrett, in 1828:
- "Estimate of thirty-four locks, Welland Canal "Oliver Phelps, Esq., Cr.

So that Messrs. Phelps, Geo. Keefer, and whoever else may have shared the profit of building the miserable patch-work called the locks with them, had paid them in cash \$116,270 for building the 34 locks Phelps had engaged to build for \$74,800—the difference being \$41,470.

On the 13th day of June, 1827, Oliver Phelps applied to the Board of Directors to have the lock contract continued to him alone, and that Messrs. Smith, Ward, Hovey & Co. might be relieved from their share and responsibility in it. This was agreed to, and Phelps became the sole nominal contractor in the place of his friends who had brought him into

the country, and whose ruin was so speedily consummated. Phelps, as I have shewn, conciliated Keefer, the Director and Ex-President, by giving him a large and lucrative sub-contract. The proper course would have been to let out the locks under the supervision of careful engineers and superintendents-three or four locks to one contractor-two or three to another, and so on, according to their means.

The Directors of the Chesapeake and Delaware Canal, in their report to the Stockholders, 1826, thus state the results of their experience of very large contracts being given to one man :

"The Board were now convinced of the error of committing so large a contract to an individual. Experience had taught them, that it was not safe to surrender so considerable a portion of the interests of the Company into the hands of one man, who, or the interests of the Company into the hands of one man, who, should he prove incompetent, intractable or faithless, could cause them much provocation and anxiety, and even mar some of their best efforts for accomplishing the duties assigned to them. By purcelling out the work to several, the failure of one would be attended with little comparative injury, and that injury could be more speedily repaired."

#### MINUTES OF THE BOARD OF DIREC-TORS

Messicurs Dunn. J. H. Boulton. Robinson. Col. Wells. D'Arcy Boulton, and Keefer .-- 6.

The Directors particularly called the attention of Mr. Phelps and the Engineer to the state of the locks, and urged the necessity of a more strict regard thereto, and that they will not consider Mr. Phelps in the slightest degree relieved from his responsibility in that respect from the circumstances of his recent con-

(OFFICE COPY.)

CANAL OFFICE, St. Catharine's, Sept. 23, 1835

To Francis Hall, Esq., Engineer, Sc. Sc.

In the course of my investigations into the expenditure of this corporation, I perceive, that in 1826, a contract was entered into with Oliver Phelps and others to furnish timber, iron, and other materials, and construct 34 locks, 100 feet by 22 in the chamber, agreeable to a model said to have been in the Canal Office. nal Office.

The price for the whole was to be \$2,200 per lock in full of workmanship and materials, and the lock pits were to be excavated by the Company. Marshall Lewis was to be the superinvatishing and inderinary, and the total pits were to be easily vatished by the Company. Marshall Lewis was to be the superintendent, and I perceive that another master workman of the name of John A. Benjamin was also employed to give an estimate of the work to be done on each lock, and that many thousand dollars have been paid to the contractor on this contract, over and above the stated price, although the locks were sub-let, and the work very badly fulfilled, long after the period agreed on. I am desirous to learn from you, officially, the regular and fair prices of the materials and the workmanship, taking Benjamin's and Lewis's estimates of such materials as your guide as to the quantity; and the regular and usual prices paid at the time, as shewn in the Company's books, as the rates to calculate by. I would also like to be informed of the sum which ought to bave been paid to a contractor for a lock 100 feet by 22, say for each of the four locks built by Phelps after the slips at the deep cut, the timber being furnished him, as was the case, although the plain reading of the contract appears not to have warranted such a course. such a course.

Respectfully yours,

W. L. MACKENZIE. (Signed)

St. Catharines, Sept. 23, 1835.

To W. L. MACKENZIE, Esq., M. P. P., &c. &c.

In reply to your communication of this date, I beg leave to submit the accompanying statement, being first an estimate founded upon a particular specification for locks upon the Welland Canal by Mr. Lewis. The prices of timber, iron, &c. are taken from the current rates of that date. Total expense of lock by that specification is \$2,058 51.

Secondly, comparing this estimate with the quantities exhibited by Mr. Benjamin, in his report, dated 20th June, 1827, of materials delivered and required for locks, from Nos. 5 to 30, it will be observed that the total expense of a lock by this estimate is \$2,329 89.

Thirdly, the expense of a lock of the ordinary dimensions for 100 feet by 22 within the chamber, timber being provided, according to the above data, is \$1,103 32, and tenders have been received by the Company to execute a lock, all the materials provided, for \$1,250, exclusive of earth work.

2,100 Total of 34 locks, according to contract...... Extra work, recommended by Mr. Thomas, Principal Engineer, dated Nov. 1826, £5,991 76.900 23.964 59 2s. 11d., equal..... Less, 4 Mountain Locks founded upon rock..... Total of Lock work, according to contract..... 99,864 59 Mr. Barrett's final estimate of the above...... 116,412 44

Excess, above estimate, per contract 16,547 dollars and 85 cents The sum of \$116,412, ultimately paid for these locks, has been extremely liberal, and this extra expenditure might have been considered as well applied, had the work been executed in a substantial and faithful manner; but taking into consideration the great deficiency of workmanship generally existing, a destitution of treenails and ordinary fastenings, in the mountain in that the arter avenue has not only been a locks, my opinion is that the extra expense has not only been a total loss to the Province, but has involved an expenditure in repair that cannot easily be calculated.
Sir,
I have the honor to be,

Your very obedient se FRANCIS HALL.

After Mr. Hall had sent me the letter I have already laid before you, he handed me the following memorandum concerning Mr. Squires' portion of the Phelps locks:

# Lock Contract by Phelps, Notes by the Engineer.

Lock Contract by Phelps, Notes by the Engineer.

"Mr. Squires states that upon his taking the sub-contract un der Mr. Oliver Phelps for building four locks at Thorold, he was to receive from Phelps, for each, the sum of \$1050, all timber, iron, and other materials to be found by Mr. Phelps, also one or two yoke of oxen, if required. For said sum of \$1050, Squires was also to construct a waste weir to each lock 40 feet wide, all materials being provided, but as no waste wiers were required by the Engineer upon either of these four locks, Mr. O. Phelps deducted from Squires the sum of \$50 for each waste weir. Keefer supplied the timber. Previous to this deduction of \$200, O. Phelps agreed, by a memorandum in his books to give Squires \$50 extra upon each of his locks, or \$1,100 in all for each lock, in consequence of extra work done by Squires beyond his original contract, this Phelps has hisherto failed to do, besides reducing the contract price to \$1000 for each lock, notwithstanding that Phelps received from the Canal Company for building each of these locks the sum of \$2,200, besides \$1,300 and upwards upon each lock in addition to his original contract. All the above, Squires is ready to confirm."

I have already shewn that Mr. Phelps had assur-

I have already shewn that Mr. Phelps had assured a committee of the Assembly that \$2,200 would complete each of the 34 locks in the very best manner, and even at that it appears he made a profit.

After all, he did his work in a disgraceful manner, and by a charge of which the following is a detailed

^{*} Meaning that for the Deep Cut.

copy, saved thousands by a job, which, after much labor and money has been wasted on it, is now fast going to ruin.

The original of the following is in the hand writing of Phelps.

1 afterwards wrote and sent the following letter to Mr. Phelps:

Canal Office, St. Catharines, September 23rd, 1835.

MR. OLIVER PHELPS,

Q:- -

In my examination of the accounts of the Welland Canal Company, I find matters connected with your extensive transactions, which uppear to me to need more explanation than I am able to obtain without referring to yourself—I therefore wish you to step over to the office, where you will be detained a very short time.

Your obedient servant, W. L. MACKENZIE.

I had some conversation with Mr. Phelps, which in no respect altered my opinion, which is, that he ought to refund he \$30,000—The first contractors for the Deep Cu. were Ward, Hovey & Co. In the report of the Directors, understood to be by Dr. Strachan, they are described as "well qualified for the undertaking," and such must have been the opinion of the Board, for Clowes offered to contract for 16 cents, while Hovey & Co. asked 25. Mr. Clowes accused Mr. Merritt with being a party concerned with them—this they denied—and Mr. Clowes, senr. was then discharged. Hovey had also £696 allowed him for expences incurred in preparing to tunnel the Deep Cut. Speaking from memory only, I would say that more than £40,000 were paid these contractors.

During the first twelve months after the Canal was organized, £250 were paid in by Mr. Hovey as a stockholder, while only £369 13s. 9d. were paid in by all Upper Canada besides. Hovey & Co. at length became embarrassed; Ward died, as it is said, of vexation; and Hovey returned to the

States. Their capital stock payments were returned to them at the settlement, in all £3,562, and Oliver Phelps, who then had the contract for nearly 40 locks at the time, made strong efforts to get the Deep Cut contract out of the hands of the original contractors, although they were his friends, and it was by their advice he came into the country. He succeeded in supplanting them, and after many allowances had been made him, was a defaulter for thirty thousand dollars when the slips took place in the Deep Cut, November, 1828. His lock contract was shamefully executed, yet he found no difficulty in inducing Messrs. Keefer, Merritt & Co. to part with the security they had on his property; and I have reason to believe that he is now a man of very great wealth.

St. Catharines, July 2, 1825.

To the President and Directors of the Welland Canal Company.

GENTLEMEN,

We will refer to a proposal made yesterday as the basis of this, and we will further propose that we will do all the grubbing and the excavation at the Deep Cut, let it be rock, hard pan, or quicksand, for the sum of twenty-eight cents per cubic yard.

Respectfully, your obedient,

E. S. BEACH. SMITH WARD. ALFRED HOVEY.

They sent in a third proposal on the same day, three cents lower, and offering security.

Mr. Merritt, in his account of the Welland Canal, 1827-8, thus describes the Deep Cut, or dividing ridge between Lakes Eric and Ontario:—

"The entire distance through this cut is one mile 54 chains, averaging about 44 feet cutting. To the depth of from 12 to 18 feet from the surface, it is composed of clay, with a small mixture of sand, and below this, tenacious—blue clay."

It is remarkable that the Directors and their agent should have neglected the salutary warnings of the majority of the persons proposing to excavate, whose proposals to excavate carefully excepted hard pan and quicksands. Mr. Merritt omitted to tell his readers that a layer of quicksand would be found within bottom level in this important part of the Canal, but far below the blue clay.

Mr. Merritt proceeds to state, (page 2,) that the excavation, which commenced in September, 1825, contained 1,477,700 cubic yards, of which, at the close of 1827, only 370,000 yards remained to be removed. At 25 cents per cubic yard, the price agreed on by Ward and Hovey, the whole expense would not have exceeded \$369,425 for excavating the cut to bottom level; but it so happened that, after that sum and much more was expended, the quicksand, or rather the manner in which Phelps fulfilled his contract, prevented the completion of the work.

Mr. Hall, the Engineer, informs me that he was present when Ward, Hovey & Co. sank a shaft in the Deep Cut, and that when the men who were working came down to the quicksand, the sand and water rose so quickly upon them, that it was with difficulty they escaped with life. The water nearly filled the shaft; this was before the excavation.

Although it was the universal topic of conversation, that the Deep Cut was bedded in quicksand, and, of course, unable to sustain, upon such a foundation, surmounted by soft clay, the immense weight of the banks of the Deep Cut, yet the Directors took no pains to obtain a full knowledge of these facts, until they had expended nearly £100,000 in the useless excavation. It was in vain that many prudent contractors personally, and in their proposals for excavation, warned them, and excepted the quicksand and water from their offers, otherwise unconditional. The Board of Directors took no heed.

When Mr. Martindale and several other gentlemen who had given in propositions to excavate the Deep Cut, informed me of facts like these, I went and examined the proposals made to the Office in 1825, 1826, and 1827, the years before the disastrous slips took place, and their contents fully confirmed what I had heard.

They are these :-
