## **PROCEEDINGS**

OF THE

## HOUSE OF ASSEMBLY

OF THE

#### PROVINCE OF NOVA SCOTIA.

SESSION, 1863.

#### 26 VICTORIA.

Begun and held at Halifax on Thursday, the twelfth day of February, in the year of Our Lord one thousand eight hundred and sixty-three, in the twenty-sixth year of the reign of our Sovereign Lady VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and of the United Church of England and Ireland on earth the Supreme Head.

#### Thursday, 12th February, 1863.

The House having been, by several proclamations, prorogued to this day, then House meet, to meet for the despatch of business, and being met,

A message from his Excellency the Governor, by John James Sawyer, Esquire, Message from Governor, the Gentleman Usher of the Black Rod:

Mr. Speaker,—

His Excellency the Governor commands the immediate attendance of this honorable House in the Council Chamber.

Accordingly, the House went up to attend his Excellency in the Council House attend Chamber,

·And being returned,

Mr. Speaker reported that the House had attended his Excellency in the Council Chamber, and that his Excellency had been pleased to make a Speech to both Houses of the Provincial Parliament, of which Mr. Speaker said he had, for greater accuracy, obtained a copy, which he read in the House, as follows:—

Mr. President, and Honorable Gentlemen of the Legislative Council:

Mr. Speaker, and Gentlemen of the House of Assembly:

1°. While neighbouring States are still disturbed and impoverished by civil war, and large and populous districts of Europe are threatened with destitution, it becomes us reverently to thank Almighty God that we can resume our legislative phors in a country where peace reigns, where capital increases, where the industious can find employment, and the humblest classes food.

dosernor's speech

2°. I am happy to be able to inform you that the general commerce of Nova Scotia, injuriously affected by the civil war in 1861, rapidly recovered its healthy activity in 1862, and that, throughout the year, that activity has been maintained; that our merchants have found new markets, our shipwrights profitable employment, and our vessels remunerative freights in all parts of the world. A bountiful harvest, a moderately successful fishery, a yield of fruit almost unexampled, an expanding coal trade, and the fair results of our experiments in gold mining, have supplied the materials for commerce, and it is satisfactory to know that among all classes of the people, the happy results of a year of profitable exertion have been very generally diffused.

#### Mr. Speaker, and Gentlemen of the House of Assembly:

3°. The Public Accounts shall be laid before you without delay. The increase of revenue has been most satisfactory. The ordinary services have been met, the interest on our debentures, and the sums borrowed under the act of last session, have been paid, leaving at the close of the year, a considerable surplus in the treasury.

4°. The income from the Provincial Railways has rapidly increased. Four years ago it was necessary to draw a large amount from the Treasury to pay their working expenses. During the last year the income has not only met the outlay, but yielded besides, a sum nearly equal to one sixth of the interest on the cost of

construction.

Mr. President, and Honorable Gentlemen of the Legislative Council:

Mr. Speaker, and Gentlemen of the House of Assembly:

5°. It affords me much satisfaction to inform you that the Volunteer Corps throughout the province still maintain their organization and efficiency. The period which has elapsed since the passing of the Militia bill last session, has not been neglected. Active measures have been taken for the re-organization of the militia; and although much difficulty and some delay were unavoidable in this re-construction of a force utterly disorganized by long neglect, the result has proved that the loyal inhabitants of this province are not unwilling to assume the responsibility of contributing to their own defence. In forty one, out of forty eight battalions, the enrolment has been completed, shewing an aggregate of more than 43,000 men, and measures are now in progress for their thorough re-organization. Eight hundred officers and applicants for commissions, are at present under instruction, while nearly two hundred have passed for their commissions.

6°. The report of the Adjutant General of Militia will be laid before you, and will shew in detail the steps which have been taken. Much has been done; much still remains to be accomplished—but by steady perseverance I doubt not that the militia will shortly attain an amount of discipline sufficient for the present require-

ments of the province.

To pay and maintain the militia, as that force is maintained in England, would be difficult if not impossible; but by a constant and efficient enrolment, by maintaining a thorough system of regimental organization, by careful training of the officers, and by occasionally mustering and training the men in their own districts, a force may be secured without pressing unduly on the resources or industry of the country, at all times available for active service in the event of war. I confidently rely on you to make such provision for this branch of the public service as its importance demands.

7°. A despatch was received after the close of the session, from the Secretary of State for the Colonies, conveying a proposition from Her Majesty's Government with a view to the construction of the Inter-colonial Railroad; and that proposition has, throughout the year, formed the subject of anxious deliberation to the Governments of the three provinces concerned. A conference was held at Quebec in September, and the great interests involved were subsequently discussed with Her Majesty's Government by delegates despatched to England. All the paper connected with these negotiations will be promptly laid before you, and I chall rejoice if a common measure can be matured for the early realization of the most entertained from the completion of this great enterprize.

Your attention will be invited to a measure, having for its object a fairer adjustment of the division lines of the districts, and a more judicious and equitable distribution of the Franchise. You will be gratified to know that at the Industrial Exhibition Nova Scotia was honorably distinguished, that her Court was attractive, and that those who contributed to the illustration of her resources, have not, in the distribution of prizes, been overlooked.

The experience of a year has enabled the proper officers to collect such information as will aid the Legislature to improve the measure passed at the last session, for the regulation of our Gold Fields. When the Commissioner's report and accounts have been laid before you, your attention will be called to the consideration of the changes and modifications which would seem to be required.

For many years a stream of Emigration has been passing the British Provinces into the United States. The Governments of Canada and New Brunswick have made very creditable efforts to draw into those provinces some portion of the surplus labor of the Mother Country, and it is desirable that we should follow their example. You will be asked to consider a measure to provide for the distribution and settlement of industrious emigrants, who may be attracted into this province by the new light recently thrown on its resources. Though the agricultural interests of the province are steadily advancing, the annual exhibitions, which, in other countries create a generous emulation in all branches of husbandry and in the improvement of stock, are much required here. Your attention will be turned to the means by which it is hoped the want may be supplied. ting to your charge the great interests of the country, I confidently rely upon the zeal, intelligence, and public spirit, with which I know your high duties will be discharged.

Mr. Blanchard, pursuant to leave given, presented to the House a bill to proRegistration of births, &c.

Registration of births, &c. vide for the registry of births, marriages, and deaths; and the same was read a first, and ordered to be read a second, time.

Mr. S. Campbell then proposed the following Address in answer to the Speech Address moved. of his Excellency the Governor, and moved that the same do pass, viz.:

#### TO HIS EXCELLENCY THE RIGHT HONORABLE THE EARL OF MULGRAVE,

Lieutenant-Governor and Commander-in-Chief in and over Her Majesty's Province of Nava-Scotia and its Dependencies, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY,-

We, the Representatives of the people of Nova Scotia, thank your Excellency for the speech with which you have been pleased to open the present session of the Provincial Parliament.

We feel, with your Excellency, that it becomes us reverently to thank Almighty God for the privileges we enjoy, for the blessings of peace, and for the rewards, which in the happy condition of the country, are offered to the enterprize and industry of the people.

We are pleased to be informed that the depression of trade, which succeeded the first outbreak of the American war, has been followed by a favorable reaction, and that our merchants and shipowners are enjoying the benefits of the improved condition of mercantile affairs.

We are gratified to learn that in the most important branches of our Provincial industry, the exertions of the year have been rewarded by a success very

generally diffused.

We learn with great pleasure, that the satisfactory increase in the Revenue has enabled your Excellency to close the year with a handsome surplus in the treasury, after meeting, in addition to interest on the bonded debt, and the ordinary demands of the year, the amount borrowed under the act of last session.

It gives us pleasure to be informed of the large increase in the revenue of the Builway, and that the excess of the revenue over the outlay is nearly equal to

one-sixth of the interest upon the cost of construction.

7°. We are glad to be informed that the condition of the Volunteer Corps

throughout the Province is satisfactory.

8°. The success of the measures adopted by your Excellency for the reorganization of the Militia, under the act of last session, is very gratifying. We are pleased to know that so many of those who hold, or aspire to the position of Militia officers, are qualifying themselves for the responsible duties of the service. We shall cheerfully make such provision for keeping up and maintaining the organization of the Militia, as we feel we can justly do, consistently with the other demands upon our provincial resources.

9°. When the papers relating to the Intercolonial Railroad shall be laid before us, we shall give to their consideration that grave and deliberate attention which

a subject of such magnitude and importance deserves at our hands.

10°. The measures for the re-adjustment of the division lines of districts, and for an improved distribution of the franchise, shall receive our careful and deliberate attention.

11°. The credit which the Province has derived from its contributions to the Industrial Exhibition, and from the prizes which have been awarded to our contributors, is a great source of pleasure and pride to the people of Nova Scotia.

12°. Any amendments which the experience of a year may suggest in the act

of last session relating to the Gold fields, will command our careful attention.

13°. We shall consider the proposed measure on the subject of emigration with an anxious desire to make such provisions on that subject as the situation and circumstances of the province require.

14°. Any measure by which our agriculturists may be stimulated to increased exertions in the different branches of husbandry and stock raising, shall receive

our careful consideration.

15°. In dealing with the great interests of the province it shall be our aim to act under a deep sense of the responsibility we owe to the people whose interests are committed to our charge.

Debate on Address.

Adjourned.

Which being seconded, and a debate arising thereon, after some time spent in such debate,

Ordered, That the debate be adjourned until to-morrow.

Then the House adjourned until to-morrow at three of the clock.

#### Friday, 13th February, 1863.

PRAYERS.

Address resumed.

On motion of Mr. S. Campbell, the House resumed the consideration of the Address proposed yesterday in answer to the Speech of His Excellency the Governor.

And thereupon,

Read by clauses.
Several clauses passed,

Ordered, That the same be again read and considered, clause by clause; and accordingly the respective clauses thereof, from the first to the ninth inclusive, were, upon the question put thereon, severally agreed to by the House.

And consideration adjourned.

Ordered, That the further consideration of the Address be deferred until tomorrow.

Then the House adjourned until to-morrow at three of the clock.

#### Saturday, 14th February, 1863.

PRAYERS.

Mr. Tupper moved that the House do come to the following resolution:

Resolved. That the Postmaster General be directed to furnish to each member of the Legislature postage stamps to the value of twelve dollars, in lieu of the usual franking privilege—this resolution not to extend to letters received by the members.

Resolution as to frank

Which resolution being seconded,

Mr. Grant moved, by way of amendment thereto, the following resolution:

Amendment moved.

Resolved, That the franking privilege remain as at present, but shall only extend to the Provinces of Nova Scotia, New Brunswick, Prince Edward Island, Canada and Newfoundland.

Which being seconded.

Mr. Bourinot moved, by way of second amendment, the following resolution: Second amendment.

Resolved, That the usual franking privilege of members be continued.

Which being seconded and the House dividing thereon, there appeared for such Second amendment last mentioned amendment, nineteen; against it, twenty-eight.

lost on division.

So it passed in the negative.

The question being then taken upon the first amendment that the same do pass, First amendment carand the House dividing thereon, there appeared for such amendment twenty-five; against it twenty-two.

ried on division.

So it passed in the affirmative.

And accordingly,

Resolved, That the franking privilege of members of the Legislature remain as at present, but shall only extend to the Provinces of Nova Scotia, New Brunswick, Canada, Prince Edward Island, and Newfoundland.

On motion of Mr. S. Campbell, the House resumed the consideration of the Consideration of Ad Address in answer to the speech of His Excellency the Governor, at the opening of the session.

dress resumed,

And the tenth clause thereof being read and a debate arising thereon, after some time spent in such debate.

Ordered, That the debate be adjourned until Monday next.

And adjourned.

Then the House adjourned until Monday next at three of the clock.

### Monday, 16th February, 1863.

PRAYERS.

Mr. Churchill moved that the resolution passed on Saturday last, relating to Motion to reseind. the franking privilege of members of the Legislature, be rescinded.

Which being seconded, and the House dividing thereon, there appeared for the Lost on division.

motion seventeen; against it twenty-nine.

So it passed in the negative.

On motion, the House resumed the consideration of the address in answer to Address considered. the speech of his Excellency the Governor, at the opening of the session.

Orders thereon.

And thereupon, the remaining clauses thereof, from the tenth to the fifteenth And passed. inclusive, being again read clause by clause, were, upon the question being put thereon, severally agreed to by the House.

And accordingly,

Resolved, That the address do pass.

Ordered, That the address be engrossed.

Ordered. That the address be presented to his Excellency the Governor by the whole House.

Then the House adjourned until to-morrow at three of the clock.

#### Tuesday, 17th February, 1863.

PRAYERS.

Announcement respecting Address. The Hon. the Provincial Secretary, by command of his Excellency the Governor, announced to the House that his Excellency had been pleased to appoint this day, at half-past three of the clock, at Government House, to receive the House with their address.

House attend Gover-

Accordingly, at half-past three of the clock, Mr. Speaker and the House went up to Government House, to attend his Excellency with the Address of the House, in answer to the Speech of His Excellency at the opening of the session.

And return.

And being returned,

Mr. Speaker reported to the House that he had presented the Address to his Excellency, and that his Excellency had been pleased to give this reply thereto:

Governor's reply.

Mr. Speaker, and Gentlemen of the House of Assembly:

I thank you for your address, and receive with satisfaction the assurance it contains, that the various and important subjects alluded to in the speech with which I opened the present session, shall command your careful consideration; and I pray earnestly that your deliberations may conduce to the future prosperity of the country.

On motion of the Hon. the Attorney General,

Selecting committee.

Resolved, That a committee be appointed to prepare and report lists of members of standing committees on general subjects.

Ordered, That

Mr. Blanchard, Hon. Mr. Johnston, Mr. Chipman,

" Henry,

" Grant, " Robertson,

"Killam,

be a committee for such purpose.

Newport School Lands bill. Mr. Chambers, pursuant to leave given, presented to the House a bill to authorize the sale of School Lands in the Township of Newport;

Naturalization bill.

Mr Henry, pursuant to leave given, presented to the House a bill to naturalize certain aliens; and,

Acadia Fire Insurance Company bill. Mr. Tobin, pursuant to leave given, presented to the House, a bill to amend the act to incorporate the Acadia Fire Insurance Company.

And such bills were severally read a first, and ordered to be read a second time.

Pet. of J. R. Currell.

A petition of John R. Currell, of Bridgetown, in the county of Annapolis, miller, and other persons, was presented by Mr. Longley and read, setting forth that the said John R. Currell is the owner, together with other parties, of a set of mills and water privileges in such county, and praying for the passing of an act of incorporation to enable them to manage the same efficiently.

Ordered, That the petition do lie on the table.

Then the House adjourned until to-morrow at two of the clock.

#### Wednesday, 18th February, 1863.

PRAYERS.

At the suggestion of Mr. Bourinot, that twenty-four members, besides Mr. Speaker, were not present,

The House being counted by Mr. Speaker, it appeared that twenty-four members, besides Mr. Speaker, were not present, and the House was adjourned by Speaker, without a question first put, until to-morrow at ten of the clock.

#### Thursday, 19th February, 1863.

PRAYERS.

The hon. the Provincial Secretary, by command of his Excellency the Governor, Intercolonial Railway. presented to the House papers and documents relative to the construction of the Intercolonial Railway, which were read by the Clerk, viz.:

The report of the hon. Provincial Secretary and hon. J. McCully of their delega- Report of delegation tion to Quebec during the last summer, relating to the proposed Intercolonial Rail-

way, with the correspondence and documents relating thereto.

Also, the report of the hon. the Provincial Secretary of his delegation to And England. England during the last autumn, on the same subject, with the correspondence and documents relating thereto.

(See Appendix—Railway; Intercolonial.)

Ordered, That the papers do lie on the table.

The hon, the Provincial Secretary, by his Excellency's command, also pre- Provincial Railway sented to the House the annual report of the Chief Commissioner of Railways, as to the management of the Provincial Railway for 1862, with reports and tabular statements relating thereto.

annual report.

(See Appendix—Railway; Provincial.)

Ordered, That the report do lie on the table.

On motion of the Hon. the Provincial Secretary.

Resolved, That a select committee be appointed to consider and report to the Public department House relating to measures necessary to be adopted to afford increased accommodation for the offices connected with the public departments.

Ordered, That the following members be a committee for such purpose, viz:

Hon. Financial Secretary,

Mr. Tobin,

- Townsend,
- McLelan,
- Chipman,
- Harrington,
- Coffin.

The Hon. the Provincial Secretary moved that the resolution passed on Satur- Franking resolution day, the fourteenth instant, relating to the franking privilege of members of the Legislature, be rescinded, which being seconded and put, was nem. con. agreed to by the House.

The Hon. the Provincial Secretary, by command of his Excellency the Governor, Adjutant General presented to the House the report of the Adjutant General of Militia for 1862, and the same was read by the clerk.

(Sec Appendix—Militia.)

Ordered, That the report be referred to the following members to examine and select committee report thereon, viz:-

Mr. Blanchard,

- " Pryor,
- " Chipman,
- " Cochran,
- Heffernan,
- Henry,
- Longley.

The Hon. the Provincial Secretary, by command of his Excellency the Governor, Correspondence as to presented to the House correspondence relating to the conviction and punishment of George Leizer, detected in counterfeiting Treasury notes of this Province, in Beston; and the papers were read by the clerk.

forgery of Tree

(See Appendix—Treasury Notes.)

Ordered, That the papers do lie on the table.

Report of committee as to accommodation of public departments. The Hon. Financial Secretary reported in part from the committee appointed to consider and report to the House relating to the measures necessary to be adopted to afford increased accommodation for the offices connected with the public departments; and he read the report in his place, and then delivered it in at the clerk's table, where it was again read.

(See Appendix—Public Departments.)

Ordered, That the report do lie on the table.

Report of selecting committee.

Mr. Blanchard reported from the committee to prepare lists of committees on general subjects, that the committee had agreed to such lists; and he delivered them in at the clerk's table, where they were read, and are as follows:—

McDonald, from the committee on private and local bills reported, that Private bills com. they had considered the bill relating to poor districts in the county of Cumberland, Cumberland poor district had had made amendments thereto, which they had directed him to report to the House with the bill; and he delivered the bill, with the amendments, in at the Clerk's table, where such amendments were read.

Ordered, That the bill, with the amendments, be committed to a committee of Committeel. the whole House.

Pet. to suppress liquor traffic.

A petition of Columbia Division of the Sons of Temperance, was presented by Mr. A. Campbell and read, praying the passing of an act for the suppression of the liquor traffic.

Ordered, That the petition do lie on the table.

Assessment rolls presented. The hon. the Provincial Secretary, by command of his Excellency the Governor, presented to the House, copies of the assessments of the various counties and districts of this province, for the year 1862, together with an abstract thereof.

(For Abstract, see Appendix.—Assessment.)

Ordered, That the papers do lie on the table.

Representation bill.

The hon, the Provincial Secretary, pursuant to special leave given, presented to the House, a bill to adjust the representation of this Province; and such bill was read a first, and ordered to be read a second time.

Message.

A message from the Council by Mr. Halliburton:

Mr. Speaker,

Council agree to conference.

The Council agree to the conference desired by this honorable House, by committee on the general state of the Province, and the committee of the Council are now ready to meet the committee of this honorable House on such conference.

And then the messenger withdrew.

Managers appointed who report.

Ordered, That the hon. the Provincial Secretary, Mr. Tobin, and Mr. Blanchard, be a committee to manage such conference.

So they went to the conference.

And being returned,

The hon, the Provincial Secretary reported that the managers had been at the conference, and communicated to committee of the Council the resolution passed yesterday relating to the celebration of the marriage of His Royal Highness the Prince of Wales, pursuant to the instructions of the House.

Motion for order of day on Franchise bill.

The hon, the Provincial Secretary moved that the House do on Tuesday next proceed to the consideration of the bill to regulate the election of members to serve in the General Assembly, on the second reading thereof.

Which being seconded,

Amendment moved.

Hon. Mr. Johnston moved, by way of amendment thereto, the following resolution:

Resolved, That the Government having delayed for many weeks to submit to the House those details connected with the bills for altering the franchise and the constituencies, and the documents which are necessary for appreciating their true bearing, and it will now require some considerable time to examine those details, together with the assessment rolls and poll books, and to obtain information from the country, before the House is prepared to discuss those measures fully and fairly: and therefore it is not just to hasten the deliberation of those bills prematurely, but it will be more consistent with the proper consideration and just despatch of business, to proceed in the meantime to the consideration of those measures of the highest importance to the provincial welfare, of which the leader of the government has weeks ago given notice, and which he has already more than once had a day named to consider, and now professes to be prepared to discuss.

And lost.

Which amendment being seconded and put, passed in the negative.

Original motion car-

The original motion being then propounded from the chair, passed in the affirmative.

And accordingly,

Order of day thereon.

Ordered, That this House do on Tuesday next proceed to the consideration of the bill to regulate the election of members to serve in the General Assembly, on the second reading thereof.

Address relating to the Will of the Wisp reported.

Hon. Mr. Wier, from the committee on trade and manufactures, reported an address to his Excellency the Governor, requesting him to transmit the report of that committee on the subject of the illegal seizure of the schooner Will o' the Wisp; and he read the address in his place, and then delivered it in at the Clerk's table, where it was again read, and is as follows:-

> To His Excellency the Right Honorable the EARL OF MULGRAVE, Lieutenant Governor of the Province of Nova Scotia, and its Dependencies, &c., &c., &c.

THE HUMBLE ADDRESS OF THE HOUSE OF ASSEMBLY.

May it please your Excellency,—

The circumstances connected with the seizure of the schooner Will o' the Wist and her cargo in June last, by the commander of the United States ship of war Montgomery, having been brought to the notice of the House of Assembly by petition, were referred to the committee on trade, and the unanimous report of such committee has been unanimously adopted by the House.

The House of Assembly feel that the facts detailed in such report exhibit a flagrant violation of the law of nations, on the part of the officials of the United! States, concerned in the seizure complained of, and they earnestly request your Excellency, in transmitting the accompanying report, to bring the matter to the notice of the Imperial Government, with the view of obtaining compensation to the parties interested in the vessel and cargo.

Address agreed to.

Resolved, That such address be agreed to by the House.

Ordered, That the address be presented to his Excellency the Governor by the committee by whom it was prepared.

Then the House adjourned until to-morrow, at half-past two of the clock.

second time and

Ordered, That the bill be referred to the committee on bills relating to the city of Halifax.

referred.

On motion, the House resolved itself into a committee on bills.

Com. bills,

Mr. Speaker left the chair,

Mr. Martell took the chair of the committee,

Mr. Speaker resumed the chair.

The chairman reported from the committee that they had gone through,

The bill to regulate the election of members to serve in the General Assembly;

And had made amendments thereto, which they had directed him to report to the House with the bill; and he delivered the bill, with the amendments, in at the Clerk's table, where the amendments were read.

Report Franchise bill.

Ordered, That the bill, with the amendments, be engrossed.

Order to engross.

Mr. Blanchard, pursuant to special leave given, presented to the House, a bill Keith Lodge bill. to incorporate the Keith Lodge of Freemasons, Halifax; and such bill was read a first, and nem. con., a second time.

Ordered, That the bill be committed to a committee of the whole House.

Report of com. on navigation securities. Mr. Chipman reported from the committee on navigation securities; and he read the report in his place, and then delivered it in at the Clerk's table, where it was again read.

(See Appendix—Navigation Securities.)

Ordered, That the report be received and do lie on the table.

Com. report pilotage

Mr. Chipman also reported that the committee had examined the following bills referred to them, viz:

A bill to extend the operation of chaper 78 of the Revised Statutes, "of pilotage, harbors, and harbor masters";

A bill to further amend chapter 78 of the Revised Statutes, "of pilotage, harbors, and harbor masters";

And had made amendments thereto respectively, which they had directed him to report to the House with the bills; and he delivered the bills, with the amendments, in at the Clerk's table, where such amendments were read.

Bills committed.

Ordered, That the bills, with the amendments, be committed to a committee of the whole House.

Then the House adjourned until to-morrow, at three of the clock.

### Friday, 10th April, 1863.

PRAYERS.

Yarmouth amessment bill.

Mr. Killam, pursuant to special leave given, presented to the House a bill relating to the county of Yarmouth, and to legalize certain assessments therein.

Tusket river bill.

Mr. Hatfield, pursuant to special leave given, presented to the House, a bill to provide for deepening Tusket river, in the county of Yarmouth.

Read twice

And such bills were severally read a first, and nem. con., a second time. Ordered, That the bills be committed to a committee of the whole House.

Trade com. report.

Hon. Mr. Wier reported from the committee on trade and manufactures; and he read the report in his place, and then delivered it in at the Clerk's table, where it was again read.

(See Appendix.—Trade and Manufactures.)

Received and adopted.

Ordered, That the report be received and adopted.

Trade com. report bills

Hon. Mr. Wier also reported from the same committee that they had considered the two bills referred to them, viz.:

Importation.

A bill in addition to chapter 16 of the Revised Statutes "of the importation of goods," and the act in amendment thereof;

Smuggling.

A bill to amend chapter 19 of the Revised Statutes "of the prevention of smuging";

gling";

And had directed him to report such bills severally to the House, without any amendments; and he delivered the bills in at the Clerk's table.

Bills committed,

Ordered, That the bills be committed to a committee of the whole House.

Public accounts comreport. Mr. Grant reported from the committee on public accounts; and he read the report in his place, and then delivered it in at the Clerk's table, where it was again read.

(See Appendix—Public Accounts.)

Ordered, That the report be received and adopted.

Milit'a com. report

Mr. Blanchard reported in part from the committee on the militia, by bill, and thereupon delivered to the House,

A bill to amend chapter 9 of the acts of 1862, entitled, an act in reference to the militia.

And such bill was read a first, and ordered to be read a second time.

Mr. J. McDonald, from the committee on private and local bills, reported that Local bills reported they had considered,

The bill concerning the township of Chester;

Chester township.

The bill to revive and continue an act relative to certain streets in the town of Guysboro' streets. Guysborough;

And had directed him to report such bills to the House severally without any amendments; and that they had also considered-

The bill to authorize an assessment on the fire district of Bridgewater;

Bridgewater asse ment

And had made amendments to such bills, which they had directed him to report to the House with the bill; and he delivered the bills, with the amendments to the last mentioned bill, in at the Clerk's table, where such amendments were

Ordered, That the bills, together with the amendments to the last mentioned bill, be engrossed.

Mr. J. McDonald, pursuant to special leave given, presented to the House, a Picton assessment. bill to legalize the assessment for the county of Pictou; and such bill was read a first, and ordered to be read a second time.

Bills introduced

Mr. S. Campbell, from the committee on mines and minerals, reported that they Mines com. report. had considered-

The bill to amend chapter 27 of the Revised Statutes "of the coal mines"; And had directed him to report such bill to the House without any amendments; and he delivered the bill in at the Clerk's table.

Ordered, That the bill be committed to a committee of the whole House.

A message from the council by Mr. Halliburton:

Message.

Mr. Speaker,-

The Council have agreed to the bills entitled, respectively,

An act to naturalize certain aliens;

Aliens.

An act relating to the office of County Treasurer;

County Treasurer.

An act to provide for deepening and improving the harbour of Antigonishe;

Antigonishe harbor.

An act to incorporate St. John Lodge of Freemasons, Halifax.

St. John's Lodge.

Severally without any amendments.

The Council have agreed to the bills entitled, respectively,

An act to incorporate the Halifax and Minas Navigation company;

Navigation company.

An act to amend the act concerning streets and street expenditures within the Halifax streets. city of Halifax ;

As now amended.

The Council have passed a bill entitled an act to incorporate the Diocesan Synod Council's Diocesan

To which bill they desire the concurrence of this honorable House.

And then the messenger withdrew.

The Council's engrossed bill, entitled, an act to incorporate the Diocesan Synod Synod bill read a first of Nova Scotia, was read a first, and ordered to be read a second time.

Mr. Moscley, pursuant to special leave given, presented to the House, a bill to Athole Lodge bill. incorporate Athole Lodge of Freemasons, Halifax; and such bill was read a first, and nem. con. a second time. Read twice. and referred.

Ordered, That the bill be referred to the committee on private and local bills.

An engrossed bill to regulate the election of members to serve in the General Franchise bill read a Assembly, was read a third time.

And thereupon, the usual motion being propounded from the chair, that such Motion thereon. bill do pass-

Hon. Mr. Johnston moved, by way of amendment thereto, the following reso- First amendment.

Whereas, while the bill declares the qualification and system considered proper for the elective franchise in Nova Scotia, it yet proposes that until that system can come into operation all intermediate elections shall be conducted on a different qualification, and on a system which provides no means of correcting the mistakes through which electors of probity and property it is admitted will be disfranchised.

And whereas, it is unreasonable to change the existing franchise until the qualification and system which the Legislature may adopt as sound shall come into operation, and it is unjust to disfranchise, at the approaching general election, large number of the present electors by the introduction of a temporary qualification and system which the bill itself implicitly condemns as unfair and unsuited for permanent adoption:

Therefore resolved, That the first section be amended by leaving out all the latter part thereof, after the words "in which he shall be so assessed," and inserting instead thereof the following words: "and every election to be held before the time shall have elapsed for making up such registry, as prescribed by this act, shall be held under the laws now in force for election of representatives to serve in the General Assembly."

Lost on division.

Which being seconded, and the House dividing thereon, there appeared for the amendment, twenty-five; against it, twenty-eight,

So it passed in the negative.

Seventh amendment to defer bill.

Lost on division.

The original motion being then propounded from the chair, and the question but thereon, was agreed to by the House.

And thereupon,

Resolved, That the bill do pass; and that the title be, an act to regulate the Bill passed election of members to serve in the General Assembly.

Ordered, That the Clerk do carry the bills to the Council, and desire their concurrence.

and sent to Council.

Com. supply.

On motion, the House resolved itself into the committee of supply:

Mr. Speaker left the chair,

Mr. Chipman took the chair of the committee,

Mr. Speaker resumed the chair.

The chairman reported from the committee that they had made some progress in the consideration of the supply, and had come to twenty-three resolutions, which they had directed him to report to the House; and he delivered the resolutions in at the Clerk's table.

The chairman also acquainted the House that he had been directed by the committee to move for leave to sit again on the consideration of the supply, to which the House agreed.

The resolutions reported from the committee were then read, and are as follows:

1°. Resolved, That a sum not exceeding seven thousand five hundred and ninety Civil list \$7,590. dollars, be granted to his Excellency the Governor to defray certain charges on the civil list, not authorised by the permanent laws, pursuant to the estimate.

2°. Resolved, That a sum not exceeding twelve thousand one hundred dollars, be granted to his Excellency the Governor to provide for the expense of the crown land department, pursuant to the estimate.

Crown Land office \$12,100.

3°. Resolved, That a sum not exceeding forty-three thousand nine hundred and Revenue collection ninety dollars, be granted to his Excellency the Governor to defray certain charges for the collection and protection of the Revenue, pursuant to the estimate.

\$48,300.

4°. Resolved, That a sum not exceeding eight thousand one hundred dollars, be Poors' Asylum \$8100 granted to his Excellency the Governor towards the expense of the Halifax Poor's Asylum, pursuant to the estimate.

And being returned,

And report.

The hon. Attorney General reported that the managers had been at the conference, and that the committee of the Council had communicated to the committee of this House copies in writing of three resolutions of the Council, which he read in his place, and then delivered in at the clerk's table, where they were again read, and are as follow:

> LEGISLATIVE COUNCIL CHAMBER, 17th April, 1863.

Councils resolutions agreeing to join in addresses.

On motion, resolved, That this House will join the House of Assembly in addresses of congratulation to her Majesty the Queen and His Royal Highness the Prince of Wales, respectively, on the occasion of the marriage of His Royal Highness with the Princess Alexandra of Denmark.

Resolved, That Mr. McCully, Mr. Almon, and Mr. McHeffy, he a committee of this House to join a committee of the House of Assembly in preparing the said addresses.

Resolved, That a further conference be desired with the House of Assembly by committee, on the general state of the Province, and that the committee of this House do communicate to the committee of the House of Assembly, the foregoing resolutions:

Ordered, That the resolutions do lie on the table.

Com. appointed to prepare addresses,

Ordered, That hon. Attorney General, hon. Mr. Johnston, and hon. Provincial Secretary, be a committee to join the committee of the Council in preparing such addresses; and that the Clerk do acquaint the Council therewith.

Who report addresses.

The hon. the Attorney General, from the joint committee appointed to prepare addresses of congratulation to Her Majesty the Queen, and His Royal Highness the Prince of Wales, on the occasion of the marriage of His Royal Highness with the Princess Alexandra of Denmark, reported such addresses respectively, as agreed on by the committee; and he read such addresses in his place, and then delivered them in at the Clerk's table, where they were again read, and are as follow:

idress to Her Majesty,

# TO THE QUEEN'S MOST EXCELLENT MAJESTY.

The Humble Address of the Legislative Council and House of Assembly of the Province of Nova Scotia.

MAY IT PLEASE YOUR MAJESTY,-

We, your Majesty's dutiful and loyal subjects, the Legislative Council and House of Assembly of Nova Scotia in Parliament assembled, beg leave to approach your Majesty with sentiments of loyalty and affection to your Royal Person and government.

Representing the inhabitants of this province, we desire to convey to your Majesty our assurance of the heart-felt satisfaction with which the people of Nova Scotia hail the joyful intelligence of the marriage of His Royal Highness the Prince of Wales with the Princess Alexandra of Denmark, and to offer with our own, the most cordial and sincere congratulations of all classes of the inhabitants on an event so deeply concerning the happiness of your Majesty, and the interest and feelings of the people committed to your care.

We rejoice in the prospect presented by so auspicious an union, and we fervently pray that your Majesty may long reign in the affections of your loyal people, and that Heaven will crown with choicest blessings, the future path of

His Royal Highness Prince Albert Edward and his illustrious bride.

# TO HIS ROYAL HIGHNESS ALBERT EDWARD, K. G.,

Address to Prince of Wales.

Prince of the United Kingdom, Prince of Wales, Duke of Saxony, Prince of Coburg and Gotha, Duke of Cornwall, Duke of Rothsay, Earl of Chester, Earl of Carrick, Earl of Dublin, Baron of Renfrew, Lord of the Isles, Great Steward of Scotland, and Heir Apparent to the Throne.

# MAY IT PLEASE YOUR ROYAL HIGHNESS,-

We, the Legislative Council and the House of Assembly of Her Majesty's Province of Nova Scotia, now in Parliament assembled, desire to unite in giving expression to the sentiments of universal satisfaction and heart-felt joy, which animate the inhabitants of this portion of the Queen's dominions on the occasion of the alliance in marriage between your Royal Highness and the Princess Alexandra of Denmark.

For ourselves and the people whom we represent, we most respectfully tender to your Royal Highness and the illustrious Princess, the most cordial congratulations on this deeply interesting and most auspicious event; and we fervently hope that your Royal Highness and your amiable consort, may long live in the enjoyment of all happiness under the blessing of Providence, amidst a united, prosperous, and contented people, devoted in their loyalty to our most Gracious Queen.

And thereupon,

The usual question being propounded from the chair, that such addresses, seve- Addresses agreed to. rally, be agreed to, the same were severally agreed to by the House.

Ordered, That the addresses, respectively, be engressed.

The hon. Attorney General, also, from the same committee, reported a joint Com report address to address to his Excellency the Governor, requesting him to transmit the foregoing addresses to their respective destinations; and he read such last mentioned address in his place, and then delivered it in at the Clerk's table, where it was again read, and is as follows:

To His Excellency the Right Honorable the EARL OF MULGRAVE, Address. Lieutenant Governor of the Province of Nova Scotia, and its Dependencies, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY,-

The Legislative Council and House of Assembly have passed the accompanying addresses to Her Most Gracious Majesty the Queen, and to His Royal Highness the Prince of Wales, respectively, congratulating them upon the auspicious marriage of His Royal Highness with the illustrious Princess Alexandra of Denmark, and they respectfully request your Excellency to forward their addresses to their respective destinations, with your Excellency's assurances of the undeviating loyalty and affection of the people of this province to Her Majesty, the Heir apparent to the Throne, and to the Royal Family.

Resolved, That such address be agreed to by the House. Ordered, That the address be engrossed.

Mr. S. Campbell, from the committee on amendments to the laws, reported

Law com. report bills, viz:

The bill to legalise proceedings relative to county assessments;

County assessments.

The bill to legalize the assessments for the county of Pictou;

And had directed him to report such bills to the House without any amendments; and that they had also considered

The bill to amend chapter 136 of the Revised Statutes, "of juries";

And had made amendments thereto, which they had directed him to report to the House with the bill; and he delivered the bills, with the amendments to the last mentioned bill, in at the Clerk's table, where the amendments were read.

Ordered, That the bills, with the amendments to the last mentioned bills, be Bills committed.

committed to a committee of the whole House.

Mr. Shannon moved that the House do now resolve itself into a committee on Motion for com. on bills.

Which being seconded,

Mr. Tupper moved that this House do now proceed to the order of the day; Which being seconded, and the House dividing thereon, there appeared for the motion, twenty-one; against it, twenty-one.

Whereupon Mr. Speaker gave his casting vote in favor of the motion to proceed

to the order of the day.

So it passed in the affirmative.

And accordingly,

The order of the day being read, the House resumed the adjourned debate upon Order of daythe resolution and amendment moved yesterday, respecting the Intercolonial Railway, and after some time spent in such debate.

Ordered, That the debate be further adjourned until to-morrow.

Further adjourned.

Then the House adjourned until to-morrow, at half-past two of the clock.

# Tuesday, 21st April, 1863.

An act for extending to Tusket the jurisdiction of Commissioners of Streets.

An act to amend chapter 123 of the Revised Statutes, "of the post office," and the act in amendment thereof.

An act to continue and amend chapter 60 of the Revised Statutes, "of public instruction.'

An act to change the name of the county of Sydney.

An act relating to the representation of the county of Queens.

An act in relation to the purchase of a site in the city of Halifax for public purposes.

After which Mr. Speaker spake as follows:

MAY IT PLEASE YOUR EXCELLENCY, -

Your Excellency having been been graciously pleased to give your assent to speaker presents appropriation act. all the bills passed in the present session, it becomes my agreeable duty on behalf of Her Majesty's dutiful and loyal subjects, her faithful Commons of Nova Scotia, to present to your Excellency a bill for appropriating the supplies granted in the present session for the support of Her Majesty's Government during the present year, and to request your Excellency's assent to the same.

His Excellency was then pleased to give his assent to the following bill, viz: An act to provide for defraying certain expenses of the Civil Government of this Province.

Governor assents.

His Excellency was then pleased to make the following

#### SPEECH:

Governor's speech.

Mr. President, and Honorable Gentlemen of the Legislative Council:

Mr. Speaker, and Gentlemen of the House of Assembly:

I have had much pleasure in forwarding to the Secretary of State the addresses of congratulation which were passed by you on the occasion of the marriage of llis Royal Highness the Prince of Wales, and you may rest assured that Her Majesty will graciously accept those renewed proofs of your loyalty and attachment, and of the interest which you feel in all that relates to the happiness of your Sovereign and her family.

The completion of an Intercolonial Railway is an object which has long engaged the attention of the Legislature of this and the sister Provinces, and I sincerely trust that the measure which you have passed providing for its construction and management, agreeing as it does in all its details with the bill passed in New Brunswick, may secure the co-operation of the Canadian Parliament, and that the three Provinces being thus united in their action, this great work may at last be completed.

Among the other important measures which have been passed during the present session, that for the re-adjustment of the Franchise has received my willing

The bill that you have passed for opening the waste lands of the crown, and providing for the distribution and settlement of industrious immigrants, is calculated to supply labor much required by the expanding industry of the Province; and

that by which it is proposed to provide for Agricultural Exhibitions, and for the improvement of stock, cannot fail to be regarded with favor by the farmers, for whose elevation and advantage it is designed.

Mr. Speaker and Gentlemen of the House of Assembly:

I thank you for the supplies granted for the service of the year, and you may be assured that they shall be faithfully expended.

Mr. President, and Honorable Gentlemen of the Legislative Council:

Mr. Speaker, and Gentlemen of the House of Assembly:

In relieving you from further attendance on your legislative duties, I have to thank you for the careful consideration you have at all times bestowed upon measures calculated to promote the welfare and happiness of the country, and for the liberal manner in which you have responded to my suggestions in reference to the organization of your local forces.

At the close of the present Parliament it must be gratifying to you to observe the evidences of advancement and prosperity which are apparent throughout the Province; and while we offer up thanks to Almighty God for the blessings which we enjoy, I confidently rely on your exertions to inculcate a feeling of mutual good will among the inhabitants of the districts in which you reside, and of loyal and hearty attachment to the Sovereign and constitution under which you live.

After which,

The President of the Legislative Council, by his Excellency's command, said:

Gentlemen,-

Prorogation.

It is the will of his Excellency that this General Assembly be prorogued to Tuesday, the twelfth day of May next; and this General Assembly is accordingly prorogued until Tuesday, the twelfth day of May next, to be then here held.

ALEX. JAMES, Clerk of the House of Assembly.

### MILITIA.

ADJUTANT-GENERAL'S REPORT FOR THE YEAR ENDING 1862.

Office of Adjutant-General of Militia, Halifax, December, 31st, 1862.

MY LORD.-

In the following Report, made by your commands, I am aware that the subject of the Local Forces is treated at considerable length.

In a public document of this nature it was thought that a full recapitulation of all details, together with more general remarks concerning the present and future state of the service, would be better than a narrow statement of mere statistical facts.

Lest Your Lordship should consider that the Report consists too much of the repetition of matters with which you are cognizant, and on which you have already issued such frequent orders and directions, I have most respectfully to submit that to exclude all subjects that have been under your consdictation as Commander-in-Chief would deprive me entirely of the materials of my Report.

I have, &c.,

R. BLIGH SINCLAIR,

Colonel and Adjutant-General Militia.

His Excellency

The Right Honorable

THE EARL OF MULGRAVE, &c. &c., Commanding-in-Chief N. S. M.

> Office of Adjutant-General of Militia, Halifax, December 31st, 1862.

My Lord;—

I have the honor to submit the following Report on the state of the Militia and Volunteer Forces of this Province.

The progressive organization of the Militia has been encumbered and

embarrassed with many and great difficulties.

The pre-existent organization, if organization it could be called, had to be all but cancelled before any attempt could be made to re-construct it with any prospect of ultimate success; as a preliminary measure circulars were issued in December 1860, respecting the future qualifications of Militia officers, stopping all appointments and promotions until certain conditions of efficiency in drill could be fulfilled by the applicants. Returns of the officers of Battalions were also called for.

Such of these returns as came in unequivocally proved that not a Militia Battalion in Nova Scotia had the officers requisite to form the basis of a reintegration; of the officers that were returned certainly nine-tenths were

long past service from age.

In some Battalions it was only with great difficulty that any officers at all could be found, and when found, they were too frequently incapable of acting, yet unwilling to resign.

It was palpably evident that the delicate duty of causing these old officers to resign had to be undertaken; but this could not be effected promptly and arbitrarily. A precipite and immediate dissolution of the whole service as it stood was at one time contemplated, but this summary measure would have been unjust to the few remaining officers who were able and willing to serve; and even striking off the names of those officers only who were manifestly incapacited by advanced age would have deprived the service of the proffered aid of many willing and zealous officers, who in my preliminary correspondence, conducted under your commands, expressed themselves most anxious to give any assistance in their power in organization and enrollment, although they reported themselves untit for field-duties, and were perfectly cognizant of the difficulties which they would have to encounter in consequence of the want of an effective staff, and the lack of the co-operative aid of subordinate company officers.

In point of fact it becomes my duty to remind Your Lordship that the active patriotic exertions of many commanding officers, who would in Her Majesty's Regular Forces be considered to be very far beyond that period of life when any duty could be expected from them, proved to be of incalculable subsidiary value to this department; the names of several of these officers having been submitted to Your Lordship's favorable consideration, eliciting your unqualified approval, and many of them on the consummation of their services have received further proofs of your distinguishing appre-

ciation of their merits by being permitted to retire with rank.

Notwithstanding the disintegrated and utterly disorganized state of the Militia service of this Province, many unpaid adjutants and company officers have also afforded their voluntary aid in doing their utmost to further the reconstruction of that service; and it has also been frequently my duty to submit their names to Your Lordship's consideration and approval.

Under orders received, it has been my unremitting and constant endeavor to re-establish the service according to Your Lordship's views in favor of its permanence and ultimate success, on a basis which will stand the test of time. An ephemeral, temporarily successful re-organization could have been planned and carried out which would have been superficially more creditable; but such a precipitancy would have seriously compromised the reputation and permanency of the service, and endangered its falling into retrogression.

Such a proceeding would also have sacrificed an opportunity which is not likely to recur: the public feeling in England and the public spirit in this loyal colony are equally attracted to the contemplation and consideration of our local defences, and measures of a merely temporary and ostentatious nature are not likely to secure the approbation or respect either of the mother country, of this colony, or of foreign nations, and the apparently irretrievable state in which the Militia service had fallen can be turned to advantage in reinstating it with the experience of the causes of its deteriorated condition.

Although Your Lordship has been thoroughly conversant with all proceedings carried on under your orders, and although nothing has been done without reference to you as Commander-in-Chief, unless previously determined by your decision as a precedent for conclusion, the previous and subsequent particulars of report are most respectfully submitted as a recapitulation of what has been effected, and as an official anticipation of the

future requirements of the service.

The recorded correspondence of my office, conducted under Your Lordship's commands, suffice to prove the difficulty of inculcating that most important principle, which must ever be the foundation of all permanently successful military details of organization, that particular, individual convenience and claims must always give way to the general good of the service, when the former and latter do not happen to be coincident; but it affords me much pleasure to be able to report that the frequent decisions that Your Lordship has been called upon to make, very often conflicting with the preconceived notions of the applicants, have been invariably acquired.

esced in cheerfully, and with a proper and subordinate spirit, after due

professional explanation given by your directions.

In attending to the contemplated restoration of the Militia service, the regulations approved as best adapted to accomplish the object have been adhered to. Youth, a reasonable amount of practical elementary education, intelligence, physical ability, and willingness to attend training, the proof of actual attendance being furnished by the instructor's diaries, being the required qualifications of all candidates for promotion or first commissions, commanding officers being held responsible for the social standing and moral character of their nominees, and being also answerable to Head Quarters, should they decline to forward applications for commissions or promotion on unreasonable or irrelevant grounds.

In a few instances it has been represented that it will be difficult if not impossible to get officers for Battalions of the required educational standard, but I am not prepared to submit to Your Lordship's consideration any desirable modification on this point; officers unable to make out a return or incapable of writing an ordinary despatch or report, would be useless in command, and would not be condusive to the reputation of the Provincial

service.

It is to be hoped, however, that such representation will turn out not to have been founded on true educational estimates; should however particular localities be defective in the means of furnishing commissioned officers who are able to conduct an ordinary correspondence in their own language, it will become my further duty to represent the matter, and to recommend that such districts be made subject to enrolment by civil county authority, assisted by such officers as may be found to possess the reasonable and necessary acquirements to be appointed in command, the training and mustering of the men when requisite being conducted by the military staff.

### ENROLMENT AND TRAINING.

Enholment.—There are no substantial reasons for submitting to Your Lordship that any recommendation hitherto approved by you be departed

from prematurely.

Military organization, in all its ramifications, implies a chain of acknowledged responsibility residing primarily in a senior officer, but shared by all his subordinates downwards as far as the junior lance corporal of a regiment, and whether it be a large force or a smaller body which has to be got into discipline and military subordination and order, unless the aggregate labor in its minor details be judiciously and practicably distributed by superior authority amongst the various grades, no exertion on the part of individuals, however zealous and energetic, can successfully supply co-operative defect.

Paid enumerators might, for the time being, keep up a crude system of enrolment, which would answer for a limited period, but without proper surveillance, their continued effective services could not be confidently relied on; neither would it be creditable to the officers of the Militia force, that they should turn over the whole of this important duty to officials over whom they could exercise little or no control.

Under the liberal provisions of the act of last Session two enumerators are allowed per company, who are, on certificated completion of their duty, exempt from certain statutory liabilities, these enumerators may be non-

commissioned officers.

 $\Lambda$  captain and two subalterns being the complement of officers in a company, it follows that in a company fully officered there would be five persons for conducting company enrolments, providing that the officers would share the duty; in addition to these however, the non-commissioned officers as hereafter shown should not be exempt from a participation in the performance of this occasional service.

Should it be found that the squad or section system can be successfully adopted, it will have the very great advantage of bringing the officers into closer contact with their men, by which their mutual interest in the defensive service of the country will be much increased, and the former will be learning a practice, in military consequence only subordinate to training, it is almost impossible to conceive that any service whatever can be carried on with zeal and energy where periodical enrollers go their rounds with all the authoritative, inquisitorial, domiciliary, precision of the tax gatherer, to enforce a service which is most honorable in its nature, and if properly and honorably exacted would in most cases be honorably, cheerfully, and loyally acquiesced in by all concerned.

Of course there will be exceptional instances of contumacy and some indifference, but unless the whole weight of collective authority, intelligence, and zeal be brought to bear with proper powers conceded, and this zeal and intelligence be headed by the officers themselves, there will be but little reliance to be placed in the severity of executive enactment carried out exclu-

sively by paid agents.

I am the more confirmed in this opinion, which I respectfully lay before Your Lordship, as it has come to my knowledge that many of the best men of the Volunteers get disheartened and fall off in their attendance at drill on account of the discontinuance of their comrades to muster for training, and unless something less odious than mere coercion be adopted in the Militia service, the men may be forced to muster indeed, but it will only be by the constant exercise of power against inclination, penalties will of course be required for contumacy and indifference, but these should be suppressed and the zealous and willing be encouraged by the example and activity of

superiors and comrades.

These remarks are made in consequence of its having transpired that many officers are inclined to consider that enrolment should be no part of their duty; in connection with this subject I have to submit to Your Lordship that had this duty been annually exacted from the officers, properly assisted by their subordinates in past years, the service could never have subsided into such a deplorable and effete state as that in which it was found when I had your commands to assume the office which I have the honor to hold. Irrespective of military training, there would at any rate have been some kind of organization to commence work upon, as it was, with some exceptions, what was left of the old service has proved exceedingly impedimentary to its reconstruction; had the threatened war occurred a few months ago, it would have been necessary entirely to ignore the existing Militia, and to levy a body of able men without time to arrange equitable and systematic details.

Hence the necessity of establishing a permanent current plan of future enrolment which will be found to work readily and effectively on any emer-

gency however sudden and unexpected.

There may be better expedients, but the best that presents itself is, in case the condition of any Battalion be at any time such that the commanding officer and company officers cannot satisfactorily carry out the annual enrolment, the sheriff or some civil officer should be empowerd to do it at the county expense, and that such civil officer, although exempt from taking command in the field, should exercise the functions of a deputy lieutenant in England, with the rank of lieutenant-colonel, forwarding recommendations for commissions, &c.

### SQUAD OR SECTION SYSTEM.

By the proposed subdivision of men and the distribution of enrolment duty, squads or sections will not consist of more than twenty men on the average, contiguous squads forming a subdivision in case of the temporary absence of officers and non-commissioned officers of squads; these small bodies surely their officers could inspect, muster or enrol, when called upon to do so without any unreasonable trouble to themselves or any great inconvenience to their men.

A competent staff of non-commissioned officers would materially assist the company officers in the performance of their duty, in warning men, noting absentees and in aiding in conducting the general routine regularly.

It is possible that many may decline to serve either as commissioned or as non-commissioned officers, thereby throwing all the onus of duty on a few, and I have to bring to Your Lordship's consideration whether commanding officers should not have some power of enforcing the acceptance of non-commissioned officers stripes and duty by qualified persons, with the alternative of paying a pecuniary fine sufficient to remunerate substitutes for performing the required duty.

In too many instances there has been a difficulty in getting full complements of commissioned officers; such a measure might cause competent gentlemen to seek commissions rather than be subject to serve as non-com-

missioned officers.

I have however substantial reasons to conclude that the rising reputation of the Militia service, under Your Lordship's administration as Commander-in-Chief, is effectually overcoming the apathy which was found generally to exist.

TRAINING.—The regulations concerning Militia training are in the course of being successfully carried out, all officers having to pass examinations in company drill before obtaining commissions either on appointment or promotion.

By this means the most active and zealous officers will be placed at the head of the seniority lists of Battalions,—a consummation which cannot fail to conduce to the ultimate credit and efficiency of the service.

This training is being carried on by means of the Military staff employed

by the Province.

The staff, all ranks included, permanent and temporary (the latter consisting of instructors from the Line engaged for limited periods), is kept up at a less cost than the permanent staff of a single Militia Battalion in Great Britain.

I have to report that their discipline and general conduct, as well as their attention to duty during the last twelve months, have been satisfactory: instances of misconduct or neglect are never overlooked, and I have had to bring but few such instances to Your Lordship's notice in the course of my duty.

The rifles are under Colonel Laurie's supervision, whose duty it is to report on them to the Imperial authorities; but the staff have orders to report to me on the state of the arms at their posts, on their arrival and previous to their departure, and they have also directions personally to

assist in keeping them in order.

As attendance at drill slackens in the summer season, it was thought better to submit to Your Lordship the expediency of reinforcing the Militia staff for the increasing autumn work, by taking advantage of the services of seven instructors from the Line, conceded by the considerate liberality of Major-General Doyle, commanding the troops in this Province, rather than to increase the staff and its permanent expense, these non-commissioned officers have only the complement added to their regimental pay, so as to make their pay and allowances equal to those of our own staff, who have to receive a higher rate of pay than the Line, in consequence of their detached duty, and their living out of barracks causing them to be put to much greater expense.

Four Instructors remain out of six who were selected from twenty, who were sent out to the Province by the Imperial military authorities last win-

ter. These also receive complementary pay.

The whole staff were assembled at Head Quarters for drill and discipline

last summer. This will be indispensable every year.

The duty of inspecting the Volunteers has devolved on Colonel Laurie during the past year. According to his reports, which have been submitted from time to time to Your Lordship, general improvement is taking place in the training of both officers and men. From the same authority, however, it becomes my duty to add that some of the former do not yet manifest that competent proficiency in company drill which might be reasonably expected;

and it is worthy of consideration whether it would not be advantageous also to apply the Militia test of examination to future Volunteer appointees, the elected captains, until approval, being empowered to administer the oath of

allegiance as acting captains.

In connection with the subject of training, and the improvement of officers in practical military acquirements. I have again to remark on the very noticeable fact that as soon as instructors are removed from stations, training is almost invariably discontinued, and after a few months' absence they have a great part of their work to do over again. Unless the men turn out more frequently under their own officers, it may be anticipated that many of the Volunteer corps of this Province will not become effective and capable of taking the field with credit, without much preparatory training of their officers in camp or quarters.

The officers must be aware that it takes much more time and trouble for them than for their men to learn their duty at drill, for an officer must be completely trained as a private before he can assume his post on parade as an officer; and it is not unreasonable to suppose that many officers who are behindhand at drill are too frequently unable to improve because of the unwillingness of their men to muster under them for training and exercise. Officers of the Line have the advantage that their men are obliged to endure their preliminary blunders should they unfortunately happen, whereas Volunteer officers are open to the criticism of their subordinates, and to the aberrations of their temper and patience; so that unless officers exercise extraordinary diligence and attention whilst they have instructors they cannot hope to be very proficient.

The Volunteer Battalion Companies at Halifax, as might be expected, show a state of training superior to that of most of the country companies, although two or three could be named which are certainly little, if any-

thing, behind the best drilled metropolitan companies.

Two of the staff, the sergeant-major and a staff sergeant, are retained at Head Quarters, being constantly employed either with arduous office work or with metropolitan training. It becomes my duty to bring to Your Lordship's favorable notice the conduct, zeal, energy, and very superior ability of Sergeant-Major Brechin, both in field duties and in all the other departmental duties of my office.

I have to submit that metropolitan training is much retarded by too fre-

quent small musters.

The remedy for this state of things is in the hands of the Volunteers themselves. The present system adopted by them is to have "company nights" for drill, the respective companies choosing their own nights. Some of the companies muster very well, others indifferently; consequently the time of the staff is much wasted at times with little result.

I have frequently reverted to the practices observed in the Line, and taken occasion to compare them with our Volunteer and Militia system, not only in military arrangements, but also in all the details of correspondence, and in nearly every particular, military experience, although useful as a general guide in practice, has had to be very considerably modified; and in not a few instances its dictates have been departed from where that could safely be done, to suit the requirements of the Volunteer system, which in time of peace is conducted on principles to which Her Majesty's regulations for the army, the articles of war, and the mutiny act, are manifestly inapplicable.

It is the practice of the army to drill by companies; but commanding officers, should it happen to be more convenient, would certainly have the discretionary power to form divisions composed of men of different companies for drill and target practice. In a regiment formed of professional soldiers this arrangement becomes seldom expedient or necessary, but in the case of the Volunteer Battalion, if the officers and men could be induced to attend more frequent drill under the staff instructors without any distinction of companies, a much greater amount of military instruction would be afforded. By naming particular evenings for each company, many from various causes must

find it inconvenient to attend; and as it is evident that companies are formed of certain classes respectively having different occupations, this in itself may account for indifferent musters on the part of particular corps who are limited to one night a week. Nothing tends to discourage Volunteers so much as poor musters, the injurious effect of which would be very much modified if not removed, were the Metropolitan Volunteers able to calculate on a good numerical muster of men of all companies on any drill night when their inclination may lead them to attend.

Esprit de corps is of course necessary and useful, but this would by no means be injured by this change, on the contrary it would afford the men of particular companies many more opportunities of instruction without the inconvenience of being circumscribed and limited to certain evenings; this is one of those important matters over which "General" or "Regimental orders" can exercise no control, but which I feel is not beyond my province to advert to, as it is intimately connected with the more or less effective administration of the services of the staff.

By consulting the Schedular Appendix Your Lordship will have an opportunity of informing yourself of the amount of instruction afforded by the staff.

The total returned effectives are entered as having attended drill, although the rolls have generally been checked by the staff; commanding officers who sign them are primarily responsible for the accuracy of these returns

During the year 1863 the instructors have orders to furnish nominal diaries by which it will be shown how many drills every Volunteer and Militia officer has attended under the staff, and the results will be compared with the effective rolls as they come in.

In my office is a record of the aggregate daily attendance of Militia officers and Volunteers who have attended drill during the past year, this being far too voluminous to constitute a part of this report, a monthly total statement is appended, by which the number of staff employed can be compared with the number attendant on their instructions during the periods given.

It is impossible to get the general musketry returns of the Province into any shape whatever, many volunteers having not fired at all, many more having only partially fired, whilst not more than two-thirds have fired their sixty rounds, and hardly any two posts in the Province have corresponding ranges; the unavoidable absence of many Volunteers will always cause this difficulty, which will I fear have to be acquiesced in as irremediable, and the annual competitions will have to be the principal test of our proficiency as marksmen.

I need not revert to experience to show that musketry and prize shooting is likely to exercise great influence on the zealous and active youth of the Province, in stimulating them to acquire and maintain those military qualifications which enable them to compete at the useful contests which occasionally take place; several Militia officers entered the lists at the Truro meeting, and should there be another annual gathering this year for the same purpose there is reason to anticipate that many more qualified Militia officers and non-commissioned officers will be on the ground.

It is, perhaps, not beyond the legitimate ojects of this Report to mention that if some small money prizes were added to the more valuable principal prize it would tend to increase the numbers of competitiors, and as a consequence the general interest in the rising importance of rifle shooting in a National and Military point of consideration.

In the time of peace the Militiamen of this Province are not likely to be subject to many days training in the year. I have adverted in this Report to the unquestionably established fact that it is much easier and takes much less time to train men for the ranks than officers to command; it follows, therefore, as an undeniable sequence, that the latter should devote more time to training than the former, and that great pains should be taken with them by the staff.

Should the men, however, be called out for the limited period likely to be

allowed by law for their training, the details of elementary drill prescribed by the book of field exercise are too numerous to practice with effect.

In taking this subject into consideration it should not be forgotten that the field exercise and evolutions of the army is compiled for a standing army of professional soldiers, a great number of whom have never handled fire arms before they entered the service, and who have years of constant uninterrupted practice of the minutest details, in order to secure exact precision in every particular, comprised in five hundred and thirty-seven pages of drill instruction.

Our militia conditions are the reverse; whilst there are but few young men in the Province unacquainted with the use of a fowling-piece, excepting in the case of Volunteers, we can but expect to have very limited and desultory periods of training, unless when men are drafted into camp or quarters in time of actual war.

If the officers take sufficient instruction in the details of drill, notwithstanding the limited training to which the men are likely to be subjected, it will be by no means impossible to teach them to load and fire with celerity and effect, and by selecting only the simplest movements, they may be taught nearly all that could be required of them in the field, leaving squares and formations against cavalry to the last, it being obvious that the Province is ill adapted to cavalry operations, which would not be likely to be employed here or in New Brunswick at the opening of war.

It is not likely that any serious attempt would ever be made by hostile forces to penetrate far into the interior of this Province, but very trouble-

some and destructive local incursions might be made.

Trees and timber are plentiful in all parts of Nova Scotia, and it may be safely asserted that the axe and the forests are elements of Provincial defence hardly inferior to fire-arms and the bayonet. Instructors should take pains to give officers and men a correct idea of the construction of abbatis, and of the best positions to place them in, such as on the defended side of destroyed bridges and of fords, and in defiles which cannot easily be outflanked, and through which an advancing army must pass; intelligent officers should also be prepared to instruct their men in making facines, the materials for which are superabundant on all sides.

A company of riflemen, promptly assisted by their unarmed comrades, the efforts of the latter being properly superintended and directed, could give a very good account of opponents much superior in numbers.

It is unnecessary to advert to artillery training and organization, that

important subject being now under your Lordship's consideration.

I have the honor to submit that the issue of service pouches to the Militia and Volunteers might I think be dispensed with, except in cases of special application being made by the latter. The issue of the old pouches already made in most instances only serve to embarrass and encumber commanding officers, as but very few of them have been converted and taken into use. The Imperial authorities might be applied to to resume the possession of those which have been issued and are not converted and in use. More than eighty per cent of them are laid aside in various parts of the Province, and although commanding officers certify annually as to their state, noting deficiencies, &c., and are responsible by bond for them, some anxiety is felt about them.

Many of the Volunteers provide their own accourrements. It would be better in future to limit their choice to the regulation pattern, the Imperial Government affording them the means of purchasing new ones; or providing themselves with them, by making a sufficient deposit on them to ensure care and safety, this deposit being either on waist belts, ball bags, and bayonet scabbards only, or on the complete sets, according to requisition.

This department could conduct the financial detail, lodging the requisite deposit in a public bank, and certifying to the same to the ordnance depart-

ment on the face of requisitions.

The Province would have to be primarily responsible for loss, holding commanding officers responsible to the Province. On any volunteer leaving

his corps, should subordinate bond have been exacted by his captain, the latter would have to refund on accourrements delivered, officers and men should be made mutually responsible by law on this point, without appeal to Head Quarters, captains being liable to the Q. M. G. from contingent allowance.

Quarters, captains being liable to the Q. M. G. from contingent allowance. The expenses of the Volunteers adverted to in a subsequent part of this Report as a reason why they are not of greater strength. If the Imperial Government would sanction the issue of new accoutrements instead of the old ones, either in part or complete, on a reasonable deposit by the recipients, with full guarantee by the Province in case of loss or material damage, it would much conduce to the efficacy of the Provincial armament, and would ensure regulation and uniformity of pattern henceforward, excepting in instances where Volunteers have already procured their accoutrements.

Some similar mode might be adopted for supplying the first class Militia with new waist belts, ball bags, and bayonet scabbards, the Province becoming responsible to the Imperial Government, and the former taking

precautions against loss.

I feel it to be due to the service, and as far as is legitimate in the performance of military duty, to myself, most respectfully to submit that I should be very unwilling to continue to be responsible for these old accoutrements, some of which are already lost, because it is not possible to influence the indifference and consequent carelessness with which they appear to be regarded by both officers and men, almost without exception. Under Your Lordship's orders it has been my frequent duty to have to refuse the most pressing applications to return them, and on account of their being numbered with the arms, the latter cannot be issued without them.

Not having regular troops to deal with, with officers practised in all the details of regular inspection and report, assisted by subordinates thoroughly conversant with this kind of duty, without intending to imply any censure, I have not entire confidence in the accuracy and exactitude in inspection and report in every instance; although I believe that deficiencies are as yet but small and unimportment, I should not like to extend my responsibility over a longer period with accountrements bearing a value by the recorded bond of the recipients much beyond their real worth.

The old system of issuing arms and accourrements was singularly intricate and inconvenient. Were the latter issued subject to repayment on loss, or penal treatment in default, and the men obliged to appear with them once a year at annual company or battalion muster; or in case of legitimate absence were obliged to satisfy their officers that the accourrements are where they should be, the Province would not be subject to much risk, nor

to suffer material loss.

Commanding officers might also have some discretion in not permanently issuing accourrements to transient persons, not being householders or residents in their districts, the numerical complement being kept in the county

or regimental store, or at head quarters.

Under Your Lordship's directions such aid as the Militia Grant of the current year could afford, has been extended to the encouragement of drill buildings. A very good and spacious structure of this nature has been completed at Pictou, and another of the same class is in course of building at Truro; several smaller ones are completed or constructing in other parts of the Province. It is needless to point out the very great advantages of having these conveniences for winter training in this climate, and the ultimate good effects which are likely to accrue from them; the energy manifested in this particular argues well for the determination of officers and men, and for the permanence of the military institutions of the Province.

A grave difficulty which has often been represented to Your Lordship here presents itself again, there is no Provincial accommodation for arms or any kind of military stores.

It might be inconvenient to the Province to undertake to make a large outlay in erecting at once a great number of armories and stores, but a

development of this most necessary part of the military requirements of the country could be commenced at a comparatively insignificant cost, by beginning to build substantial and suitable structures at a few of the principal towns in the Province; such a proceeding would have the advantage of distributing the requisite expenditure so that it would be less felt.

Whatever may be done with regard to any buildings of this nature, either now or at any future time, it is preferable, both on account of convenience and future expense, that such buildings be substantial and suitable in every respect, although few in number to begin with, rather than that

they should be many in number and indifferent in kind.

The arming of the whole of the first class of the Militia, under the old system with the Entield rifle, and allowing each individual to take this delicate weapon home with him, can hardly be contemplated under any circumstances, so that unless some provision be made for armory accommodation in the different counties, putting arms at the disposal of the Militia forces, will be impossible, unless the Province chooses to go to the expense of purchasing arms of so inferior a description that they may be safely distributed again in that manner.

CLOTHING.—An undress red serge overall having been approved for the Militia, a thousand suits, according to sealed pattern, were ordered from England, which are to be issued to Volunteers on requisition and payment by their commanding officers; these suits are now stored in Halifax, but

the tradesmen's prices have not yet come to hand.

Perhaps there is no subject on which it is more difficult to reconcile diversity of opinion than that of military uniforms, when the matter is left to the choice of the men, as was the case with the Volunteers in their initiatory state, they not only are frequently long in deciding, but they do not invariably decide with the best taste, or with a due regard to expense, which is often added to by subsequent alterations.

But the worst effects of making regimentals a matter of choice on the part of the men, is the incongruous colors and costumes which are thus

introduced.

The expense of a limited number of uniforms of a particular color and

pattern is also enhanced.

There is very conclusive evidence that the strength of the Volunteers in this Province has been materially influenced by the great expense of uniforms, and on this account some corps which have been long enrolled are not yet uniformed, and some of the Volunteers whose uniforms are now nearly worn out, would probably not provide themselves again unless they could do it more cheaply.

Should the Provincial forces be called into service and be brigaded with the troops of the Line, great diversity in costume and color would objec-

tionably distinguish the former.

These and other no less important considerations induced your Lordship to issue your commands to Colonel Laurie and myself to take the matter of Militia and Volunteer uniforms into consideration, and to submit the results of our deliberations.

In recommending the red overall for Militia and Volunteers, and blue for Artillery, which were approved, the expense, climate, convenience, and

comfort of the men were chiefly heldi n view.

In consequence of the great variation of temperature in the British North American Colonies, it was conceived that a dress was requisite which could be worn with comfort at all seasons, without the expense and inconvenience of having to supply two sets of clothing; the red overall was, therefore, recommended, because—whilst it can be worn as a loose cool dress in summer—in the winter time it will admit of any required warm clothing underneath it. That it is adapted to the comfort of the men in this climate, is sufficiently proved by the fact that many laborers adopt a somewhat similar style of dress from choice.

The stiff military collar was rejected, because men do not look well-inju-

who are not "set up" by a long course of recruits drill, without which that habitual gait and carriage, peculiar to the regular soldier, cannot be attained. It is proverbial and true that the military uniform sits awkwardly on any man who has not been well drilled, and is uncomfortable to persons not accustomed to wear it, and even in the regular service the constant tendency during late years has been to do away with all the stiff and tight parts of the soldier's dress.

Another and not an inconsiderable advantage of the loose overall is, that it can be converted into a useful article of ordinary wear when it is done with as a uniform, with no more expense than removing the shoulder cords and buttons; this is important in the case of Volunteers who purchase their

own regimentals.

A better and handsomer overall could be procured at the same or less expense by adopting the more substantial serge which was sent out by the Imperial authorities as a sample, and which would have been preferred but for the conditions annexed to supplying it, which would have delayed us many months; probably these difficulties arose from the manufacturers, who would not choose to keep any considerable amount of the stuff on hand Should the same or a similar style of clothing be permanently approved, the particulars could be contracted for in London, and the contractor be empowered to keep a sufficient quantity of the materials on hand to meet any likely demand on the part of the Province, which could not suffer loss, as the serge, being of very superior quality and fast color, would always be saleable.

Insuperable objections were found to be in the way of importing materials to be made up in the Province; hence, if clothing for the Militia be at any time required in large quantity, the great advantage of having a dress which is sure to fit any ordinary sized man without alteration. I may remark that the Government red serge above alluded to is greatly superior to the white serge which used to be supplied to Highland Regiments for their fatigue jackets.

It becomes my duty to draw your Lordship's notice to the fact that just complaint has frequently been made that the limited circulation of the Royal Gazette retards the general publicity of the orders, regulations, etc., which have to be inserted in that paper, in order to give them proper official authority, and that very considerable expense has to be incurred in adver-

tising in the numerous daily journals in consequence.

The Army List, which was published by authority, had not my personal revisal, on account of very great press of other business. The publication of promotions and Militia appointments has been suspended by Your Lordship's orders, until the reorganization of the greater part of the battalions assumes form, when the reconstructed battalions are to appear in Army List form, as an "extra," with official authority, and under your directions it will be my care that a proper revisal is made, so that all orders and regulations made previous to the issue appear in a compendious and complete form, and every Militia and Volunteer Officer may have ready means to acquaint himself with his duties.

FINANCE.—Being responsible for this department also, by Your Lordship's commands and the requirements of the service, I have endeavored, under your directions, to conduct expenditures as economically as the financial circumstances of the Province require, with as much practical effect as could be produced by the means placed at your disposal.

A proper record of all items has also been kept, audited and published

annually together with the journals of the House of Assembly.

I had to conduct this departmental duty for two years without the assistance of a clerk, together with a constant correspondence with all parts of the Province, interrupted by tours of inspection and other field duties. Colonel Laurie has, during this year, relieved me of nearly all my field duties, and I have, as before-mentioned, had the assistance of two clerks,

who, being on the staff, are also available for Metropolitan field duties, but, on account of the increased labor involved by the Militia organization both office hours and work necessary to be done out of the office, have much increased.

Payments of sums over four dollars were formerly discharged by cheques payable to order, which were produced to the public auditors as vouchers.

The auditors objecting to this, in compliance with what was understood to be their wishes, payments of any kind are not made until after vouchers, in printed form, endorsed, are received; this system has now been current since the conclusion of the first quarter of 1862, and it can be continued so long as no great number of men are under daily pay; in such a case ordinary military procedure would have to be adopted, by means of pay lists and company ledgers, officers signing to quittance and credit, and soldiers to debt, the books being subject to the responsible inspection of superior officers.

In the annexed tables Your Lordship will find a general statement of the

expenses of the various branches of expenditure.

The aggregate of the exact particulars of the accounts, extending over the

four quarters, will doubtless be published in the customary mode.

I shall be happy to conform to orders in conducting correspondence and financial business, as long as it is supposed to conduce to the benefit of the service in which I have the honor to be engaged, although field duties are much more congenial to me.

For specific statements of statistic particulars of work done, I have the

honor respectfully to refer Your Lordship to the following tables.

I have the honor to be,

Your Lordship's most obedient,

And most humble servant,

R. BLIGH SINCLAIR, Col.

A. G. M.

### NOTES TO APPENDIX AND SCHEDULAR STATISTICS.

It is recommended that all Volunteer corps which have been authorized and recorded, but have failed to organize, and have ceased to correspond for a period of six months, be forthwith struck-off the strength of the local forces of the Province.

It will be observed that some Volunteer corps are below the effective strength prescribed by regulation; there are two reasons for not at present recommending their premature reduction,—1st, that as staff instruction will be necessary for the Militia at their posts, even a small muster of Volunteers will conduce to the acquisition of military acquirements; and, secondly, that there is reason to assume that some of these corps will revive in connection with the Militia.

It is most desirable that the Militia and Volunteer services of this Province should go "hand in hand," that in the matter of training they should cordially co-operate, otherwise the trouble and the expense to the Province will be doubled, and the efficacy of the instruction afforded will be most seriously deteriorated. No more can be done on this point than to appeal to the discrimination of the two services, and their sense of the value of superior military qualifications and knowledge to the local forces of the Province at large, reminding them that Volunteer appointments do not disqualify the holders from Militia promotion, and that the spirit and mean-

ing of all regulations and orders hitherto issued is to secure promotion to professional competency, providing no objections intervene of prohibitory

nature in other respects.

The orders issued by Your Lordship from time to time, form a chain of regulations having a definite object in view, the chief being a desire to do away with any thing approaching to a fallacious return of paper men, or paper qualifications. The stringent orders issued and complied with, show a decrease in the returns of effective Volunteers, manifesting the state of that service in a way which is highly creditable to the officers making returns, and showing that their duty has been done at the risk of injuring the military reputation of their subordinates.

It would be invidious to bring to Your Lordship's notice particular instances, but I may state generally, that, although returns might be more punctual, the officers generally appear to have done their duty in this

respect impartially and without respect of persons.

I may, however, state that on account of an accident at the Mines in Pictou County, we are deprived of upwards of one hundred effectives, their commanding officer having very properly declined to report them as such, on account of discontinuance at drill.

Also that some companies have been returned with few effectives, which

are likely to re-organize with better returns hereafter.

As an omission in the body of the Report, I may add that it is my recommendation that as soon as armory accommodation can be provided at Head Quarters all rifles and arms which have been issued for a given time should be recalled for inspection at Head Quarters, and re-issued after being

put into proper repair.

The schedular statement of work done monthly by the staff does not show the total amount of it, as the returns have not been hitherto nominal but numerical; and the staff being moved from station to station precise statistics have been impossible in the initiatory state of the service; but in 1863 nominal returns will be exacted, which will show the respective drills individually attended by both Militia officers and Volunteers of all ranks, and the latter will be stringently checked; all of the instructors have been moved more than once, and some of them three times, in the course of twelve months. It may safely be assumed that an aggregate of between three and four thousand Militia officers and Volunteers have received two months training during the year. This statement is founded on the instructor's diaries, and is irrespective of any training under Volunteer officers.

The financial schedule is of course but an abridgement; items and

vouchers are in the Hon. the Financial Secretary's office for audit.

The stationery bills are undoubtedly heavy; part of them, however, belong to last year. I have already stated that necessity has obliged me to have recourse to many newspapers for circulating orders, circulars and advertisements. To select only one or two of them for this purpose would be invidious.

Constant correspondence with more than-a hundred different Militia and

Volunteer stations has also consumed much paper.

With respect to the numerical return of the Militia of the first class already sent in, I have to observe that the returns have been collected with difficulty, and that I have reason to conclude that they are below actual strength

## INTER-COLONIAL RAILWAY.

### MAY IT PLEASE YOUR EXCELLENCY,-

The papers laid before the Legislature, during the last Session, brought down the history of the Intercolonial Bailway negociation to the period when the Delegates from the three Provinces left England in January 1862. We have now the honor to detail the steps subsequently taken until the close of the negociations at Quebec.

On the 30th April, a Despatch from His Grace the Duke of Newcastle was received by Your Excellency, and which, as it led to the discussions and arrangements that it becomes our duty to explain, we insert at length:

Nova Scotia .- No. 155.

Downing Street, 12th April, 1862.

MY LORD,—

I have already acknowledged the receipt of Your Lordship's Dispatches, the one accompanied by a joint address to Her Majesty from both Houses of the Legislature of Nova Scotia, expressive of their wish that imperial aid may be afforded to the completion of the Inter-Colonial Railway between Halifax and Quebec; the other reporting that the Honorable Joseph Howe had been appointed to represent Nova Scotia in the Provincial Delegation which was intended to visit England on the subject.

Not long afterwards Mr. Howe arrived, and associated himself with the Honorable Mr. Vankoughnet, who had been appointed Delegate on behalf of Canada, and the Honorable Samuel Tilley, on behalf of New Brunswick.

I had several interviews with those gentlemen, who urged with great ability the project committed to their charge, and eventually embodied their views in a memorandum communicated to me in a letter dated the 2nd of December, 1861. But, owing to the urgency of business connected with the threatening aspect of affairs in the United States, I was unable to bring the subject under the consideration of Her Majesty's Government before the Deputies were obliged to return to their homes; and other urgent matters

have hitherto prevented the adoption of a decision. The subject has now been before Her Majesty's Government, and I need scarcely assure you that they have examined it with the care due to the importance of the question, to the high authorities from whom it has emanated in the Provinces, and to the character and position of the Delegates by whom it has been so powerfully presented to notice in this country.

The length of Railway necessary to complete the communication between Halifax and Quebec, is estimated at 350 miles, and the cost, after deducting the right of way, which the Provinces will provide, is estimated at Three Millions Sterling. Such being the data supplied by the deputation, the project is, that the Imperial Government shall join the three Provinces in a guarantee of four per cent upon three millions of pounds, in which case the Provinces are ready to pass Bills of Supply for sixty thousand pounds a year (twenty thousand pounds in each Province) if the Imperial Government will do the same. The selection of the route is left solely to the British Government. Should the sum of three millions be found insufficient, nothing very definite is said on the essential point of the provision to be made for the completion of the Railway.

I much regret to inform you, that after giving the subject their best consideration, Her Majesty's Government have not felt themselves at liberty to concur in this mode of assistance.

Anxious, however, to promote as far as they can the important object of completing the great line of Railway communication on British ground, between the Atlantic and the Westernmost parts of Canada, and to assist the Provinces in a scheme which would so materially promote their interests, Her Majesty's Government are willing to offer to the Provincial Governments, an Imperial guarantee of interest, towards enabling them to raise by public loan, if they should desire it, at a moderate rate, the requisite funds for constructing the Railway. This was the mode of action contemplated by Earl Grey in the year 1851, and is the same method which was adopted by Parliament in the act of 1842, in order to afford Canada the benefit of British credit in raising the money with which she has completed her great system of internal water communications.

The nature and extent of the guarantee which Her Majesty's Government would undertake to recommend to Parliament, must be determined by the particulars of any scheme which the Provincial Governments may be disposed to found on the present proposal, and on the kind of security which they would offer.

I fear that this course will not be so acceptable to the Provincial Governments as that which the Delegates were authorized to propose for consideration. It is, however, the only one in which Her Majesty's Government, after anxious deliberation, feel that they would be at liberty to participate. I trust that the proposal will at all events be received as a proof of their carnest wish, to find some method in which they can co-operate with the Provinces, in their laudable desire to complete a perfect Intercolonial communication over British Territory; and it will be a source of sincere pleasure to me, if, adverting to all the different bearings of the subject, and to the condition of their respective finances, the Provincial Governments should end by finding it in their power to make use of the present offer, and to propound some practicable scheme for applying it to the attainment of the desired object.

I have addressed a similar despatch to the Governor-General of Canada and the Lieutenant-Governor of New Brunswick; and I must now leave the subject in the hands of the several Provincial Governments, who will best

know, in case they prosecute the subject further, how to provide for the requisite mutual consultations.

I have the honor to be,

My Lord, Your Lordship's most obedient,

Humble servant.

(Signed)

NEWCASTLE.

Lieutenant-Governor
The Right Honorable
THE EARL OF MULGRAVE.

As the proposition submitted by Her Majesty's Government involved, if accepted, a Colonial liability so much larger than that which had been contemplated when the offer of the Provinces was made, the first impression left by its perusal here was, that all negociations must now terminate, unless Canada would consent to assume a much larger proportion of the cost of the work than one-third of the whole. To ascertain if there was any probability of this being done, Mr. Howe and Mr. Tilley went to Quebec in June. They discussed the subject with His Excellency the Governor-General, and with the three members of the Cabinet who were at the Capital, and frankly explained to them, that the acceptance of the proposal was impossible, if the Maritime Provinces were expected to provide for two-thirds of the sum required. This did not seem to be expected, and Lord Monk and his Ministers expressed a desire to have the whole subject reviewed in a Conference to be held at Quebec in September, when it was understood that Your Excellency and the Lieutenant-Governor of New Brunswick were to visit that city. The following Despatch was subsequently received here, fixing the date of the Conference:

(Copy.)

Government House, Quebec. 15th August, 1862.

MY LORD,—

In a Despatch which I have received from the Duke of Newcastle, dated April 12th, 1862, containing the conditions under which Her Majesty's Government propose to assist the Colonies in the construction of a railway connecting Halifax with Riviere du Loup, His Grace mentions that he had sent, at the same time, identical Despatches, to your Excellency and the Lieutenant Governor of New Brunswick.

It is very desirable, in order to return a satisfactory answer to the Despatch in question, that the Ministers of the three Provinces interested—Canada, New Brunswick, and Nova Scotia—should come to a distinct understanding as to the part which each of these Provinces will undertake in reference to the execution of the proposed work. I think this end will be best obtained, by a personal conference between the members of the administrations of the three Provinces.

I am aware that it is the intention of your Excellency to visit Canada in the beginning of next month, and I expect the Lieutenant Governor of New Brunswick will be here about the same time.

It appears to me, therefore, that the time which I have mentioned offers peculiar advantages for holding the proposed consultation; and I shall feel much obliged if your Excellency will arrange with such members of your administration as may be deputed to assist at the conference, to attend at Quebec on Wednesday, September 10th, for that purpose.

The question of intercolonial trade will probably be discussed at the same time.

I have addressed a Despatch of the same import as this communication to the Lieutenant Governor of New Brunswick.

I have, &c.

(Signed)

MONK.

1 OF BUT

His Excellency, THE EARL OF MULGRAVE, &c. &c. &c.

The undersigned having been selected by Your Excellency to represent the Province of Nova Scotia, repaired to Quebec accordingly, and were invited, with Mr. Annand, who had gone to Canada on a separate mission, touching questions of intercolonial trade, to take scats at the Council Board. The Hon. Messrs. Tilley, Mitchell, and Steves, members of the Executive Council of New Brunswick, were also present. The Conference lasted three days, and was conducted with great freedom, but in a moderate and conciliatory spirit, honourable to the Provinces, and full of promise of satisfactory results.

Having discussed with the gentlemen present, the immediate question which had brought us together, and all collateral questions growing out of it—of commerce, postal subsidies, immigration and political union—the Delegates from the maritime Provinces professed their willingness to propose to their respective Governments to accept the proposition of the Duke of Newcastle, if the Government of Canada would bear one half of the expense, instead of one-third.

Looking to the extent, population, and resources of Canada, as compared with those of the Lower Provinces, this did not seem to be be a disproportionate share. Looking to the facility with which they could be defended by sea and land at all seasons of the year, and to the imperative necessity for the Intercolonial Railway, as a work of defence for Canada in winter, it appeared to the undersigned that the offer was fair, if not generous.

After a day's deliberation, the Canadian Council communicated their ultimatum, which was an offer to assume five-twelfths of the liability of constructing and working the Intercolonial Railroad, provided that the other Provinces would assume the other seven-twelfths.

To accept or to reject this proposition imposed upon the gentlemen to whom it was made a very grave responsibility. To reject it, was to postpone indefinitely, perhaps forever, the construction of a work of acknowledged value, whether the defence or the development of the resources and elevation of all the Provinces were concerned; and to accept it, in the face of existing liabilities and the cost to be incurred, was a step so grave, that it could not be lightly taken. After serious and anxious deliberation, the Delegates from Nova Scotia and New Brunswick decided to assume the responsibility: and it was satisfactory to us to know, that when communicated, your Excellency and the Hon. Mr. Gordon approved of the decision.

Accord, upon the main point, having been established, it became necessary to adjust some questions indispensable to the harmonious action of the three Governments, and to the further progress of the negociation. The results of our deliberations upon these points, are included in the following Memoranda:

(COPY.)

### No. 1 MEMORANDUM.

The undersigned, representing the three Governments of Canada, Nova Scotia, and New Brunswick, convened to consider the Despatch of His Grace the Duke of Newcastle of the 12th April, 1862, with reference to the Intercolonial Railway, having given the very important matters contained in that Despatch their attentive consideration, are agreed:

- I. That whilst they have learned with very great regret that Her Majesty's Imperial Government has finally declined to sanction the proposal made on behalf of these Provinces in December, 1861, and at previous periods, they at the same time acknowledge the consideration exhibited in substituting the proposal of "an Imperial guarantee of interest towards "enabling them to raise by public loan, if they should desire it, at a "moderate rate, the requisite funds for constructing the Railway."
- II. That, with an anxious desire to bind the Provinces more closely together, to strengthen the connnexion with the mother country, to promote their common commercial interest, and to provide facilities essential to public defences of these Provinces as integral parts of the Empire, the undersigned are prepared to assume, under the Imperial guarantee, the liability for the expenditure necessary to construct this great work.
- III. That the three Governments are agreed, that the proportion of liability for the necessary expenditure, shall be apportioned as follows, namely: five-twelfths for Canada, and seven-twelfths to be equally divided between the Provinces of New Brunswick and Nova Scotia.
- IV. But it is understood, that the liability for principal and interest shall be borne by each Province, to the extent only of the proportion hereby agreed upon.
- V. That, in arriving at this conclusion, the undersigned have been greatly influenced by the conviction, that the construction of the Road between Halifax and Quebec must-supply an essential link in the chain of an unbroken highway extending through British territory from the Atlantic to the Pacific, in the completion of which, every Imperial interest in North America is most deeply involved: and the undersigned are agreed that to present properly this part of the subject to the Imperial authorities, the three Provinces will unite at an early day in a joint representation, on the immense political and commercial importance of the western extension of the projected work.

J. S. McDonald, L. V. Sicotte, J. Morris, W. P. Howland, Wm. McDougall, M. J. Tessier, Representing Canada. Thos. D'Arcy McGee, F. Evantural, Adam Wilson, Joseph Howe, J. McCully, Representing Nova Scotia. William Annand, S. L. Tilley, W. H. Steves, P. Mitchell, Representing New Brunswick. Quebec, 12th September, 1862.

(Copy.)

#### No. 2. MEMORANDUM.

Agreed, at the Conference of the Delegates of Nova Scotia and New Brunswick and the Government of Canada:

- I. If it should be concluded that the work shall be constructed and managed by a joint commission of the three Provinces, it shall be constituted in the proportion of two appointed by the Government of Canada, and one each by the Governments of Nova Scotia and New Brunswick; the four to select a fifth before entering upon the discharge of their duties.
- II. That a joint delegation proceed with as little delay as possible to England, to arrange with the Imperial Government the terms of the loans, the nature of the security required, the amount to be paid for the transport of troops and mails, and, if possible, to obtain a modification of the terms proposed, to the extent of the interest accruing during the construction of the work.
- III. That no surveys be authorized until the laws contemplated shall have been passed, and the joint commissioners appointed. That any profit, or loss, after paying working expenses, shall be divided in proportion to the contribution of the several Provinces.
- IV. That such portions of the Railways, now owned by the Governments of Nova Scotia and New Brunswick, which may be required to form part of the Intercolonial Road, shall be worked under such joint authority as may be appointed by the three Provinces. That the rates collected shall be uniform over each respective portion of the Road. That all nett gain or loss, resulting from the working and keeping in repair of any portion of the road constructed by Nova Scotia and New Brunswick, and to be used as a part of the Intercolonial railway, shall be received and borne by the said Provinces respectively, and the surplus, if any, after the payment of interest, shall go in abatement of interest on the whole line between Halifax and the River du Loup.
- VI. That Crown Lands, required for the Line, and for Stations, shall be provided by each Province.

(Signed,)

THOMAS D'ARCY McGEE. For Canada. JOSEPH HOWE,

For Nova Scotia.

S. L. TILLEY.

For New Brunswick.

A Delegation to England, for the adjustment of financial details of great importance, and to secure the sanction of Her Majesty's Government to the arrangements made at Quebec, having been decided upon, it was very desirable that the gentlemen to be selected should be despatched without delay, as the season was advancing, and it was important that the question should, if possible, be ripened for legislation in the Imperial and Colonial Parliaments during this winter. Your Excellency not having returned from Canada, Major-General Doyle was advised to take the next step, of which the following Minute is the official Record:

#### MINUTE:

At a Council held at the Government House at Halifax, on the 16th day of October, 1862.

#### Present:

His Honor, Major General Doyle, Administrator of the Government. The Hon. Mr. Howe, President of the Council.

- " Mr. Archibald, Attorney General.
- " Mr. McCully, Solicitor General.
- " Mr. Anderson, Receiver General.
- " Mr. Annand, Financial Secretary.
- " Mr. Wier.

The following memoranda [printed on pages 5 and 6] are submitted by the Honourable the President, the Honourable the Solicitor General, and the Honourable the Financial Secretary, and entered on the Minutes as their Report from the conference at Quebec.

Whereupon his Honor the Administrator of the Government, by the advice of the Council, is pleased to appoint the Honourable Joseph Howe as Delegate from Nova Scotia, to represent the interests of the Province in England, in accordance with the resolution adopted on the 12th September by the Intercolonial Conference at Quebec.

His Honor the Administrator, addressed, at the same time, a Despatch to His Grace the Colonial Secretary, which, as it conveys the opinion of an officer of high rank and large experience, as to the importance of the Intercolonial Road, in a military point of view, we include in this Report:

(COPY.)

No. 92.—Miscella.

Government House, Halifax, N. S., 16th October, 1862.

MY LORD DUKE,-

Your Grace has already, I am informed, been made aware by His Excellency the Governor-General of Canada of the result of the deliberations which took place at Quebec last month, when the Lieutenant-Governors of Nova Scotia and New Brunswick, with certain Delegates selected from the leading men of these Provinces, assembled there, for the purpose of discussing the subject of the proposed Intercolonial Railroad. I conceive it nevertheless to be my duty to transmit to Your Grace a copy of the Resolutions adopted on that occasion, and to inform you that, as it has been determined by the Sister Provinces to send certain members of their Governments to England, for the purpose of arranging with Her Majesty's Ministers the nature of the securities to be given to the Imperial Government, with a view to uniformity of legislation in all the Provinces, I have commissioned the Honorable Joseph Howe to proceed to England, and to put himself in communication with Your Grace, for this purpose.

So much has already been written and said upon the subject of the very great importance of this line of Railroad, and being fully aware of the favorable opinion entertained by Your Grace with reference to it, I feel I should only intrude upon your time if I was to enter generally upon the whole question; but I trust I may be excused in bringing to your notice the very essential benefit, in a military point of view, which would be derived from its construction.

I would take leave to bring to Your Grace's recollection the very great difficulty and enormous expense which was incurred in December last, when I was called upon to pass a force, consisting of upwards of ten thousand men, through the Province of New Brunswick, along the frontier of the State of Maine, into Canada, which, owing to a combination of favorable circumstances, was successfully performed, but which, in time of war, could scarcely be accomplished at all, and certainly not without great loss of life.

Although, in the event of any rupture between Great Britain and the United States, the Metis Road is being prepared for the purpose of enabling troops to proceed to Canada during the winter, out of the reach of any hostile force, it must be berne in mind that the risk of passing large bodies of men over it, during an inclement season, would, as in the former case, be considerable, the delay unavoidably great, and the expense enormous; whereas if railway communications were once established, both troops and munitions of war could at all times be rapidly and safely transported to Canada, and mutual military operations would thereby be vastly facilitated.

Under all these circumstances, the great advantages which would be derived from a Railway such as is in contemplation (provided the site be judiciously selected), cannot, in my opinion, be overestimated.

I have, &c. &c.

(Signed,)

HASTINGS DOYLE, Administrator.

Mr. Howe being about to leave for England, the further progress of the negociation will be described by that gentleman in a subsequent Report.

We have the honor to be,
Your Excellency's
Most obedient,
Very humble servants,
JOSEPH HOWE,
JONATHAN McCULLY.

HALIFAX, N. S. 16th Oct. 1863.

## MR. HOWE'S REPORT.

Halifax, February 10, 1863.

MY-LORD,

Having, in conformity with the resolution adopted by the Delegates from Nova Scotia and New Brunswick, and the members of the Canadian Government, assembled at Quebec in September, been instructed by His Honor the Administrator to proceed to England to discharge the duties of the mission contemplated by that resolution, it becomes my duty to report:—

That, having communicated with the leader of the Government of New Brunswick, and ascertained that it was his intention to leave by the boat of the 17th October, I took my passage in the Europa, and we went on together,

reaching London about the end of the month.

The Delegates from Canada, who it was assumed would come over direct from the St. Lawrence, were not expected for a week after; and we thought it only respectful to wait their arrival, before communicating with the public departments. The next mail from Canada brought me a note from the Honorable Mr. Sicotte, dated at Quebec 24th October, informing me that the Delegates had taken their passages, but had been unexpectedly delayed by some difficulty arising out of the militia question, on the morning of their expected departure, but that they would come on in the next boat, and hoped to join us during the following week.

Under these circumstances, I thought it proper to write to the Duke of Newcastle on the 8th November, informing His Grace that Mr. Tilley and myself were in London—that the Canadian Delegates had been unexpectedly delayed, and leaving it for His Grace to determine whether or not we should

wait upon him before their arrival.

We were honored by an interview on the 13th November, and discussed, informally, the resolutions adopted by the Conference at Quebec, and the objects of our mission generally. His Grace appeared, as he had done in 1861, to enter heartily into the views and policy of the Colonial Governments in respect to the Intercolonial Road—thought the questions, to be adjusted, were of so much delicacy and importance, that a Delegation could not have been avoided, if there was to be legislation this winter; and pledged to us his cordial co-operation and aid, a pledge which was amply redeemed.

to us his cordial co-operation and aid, a pledge which was amply redeemed.
On the 17th November, the Honorable L. V. Sicotte, Attorney General of Canada East, and the Honorable W. P. Howland, Finance Minister, arrived. They paid their respects to the Colonial Secretary on the following day, and the Delegates, after mutual consultation, then commenced the business of

their mission in due form.

Though the Colonial Secretary was suffering from severe illness, the Delegates were honored with several interviews, and explained to His Grace the reasons upon which all the resolutions adopted at Quebec were founded, and discussed with him all the questions which came within the purview of his own department; and I am happy to be able to report, that we ultimately obtained His Grace's cheerful acquiescence in all that had been done, and his suggestions as to the best mode of adjusting those questions which naturally came under the control of the Lords Commissioners of the Treasury.

As His Grace's presence in town was no longer necessary, it was arranged that Mr. Howland and Mr. Tilley, the Finance Ministers of their respective Provinces, should discuss those questions with Mr. Hamilton and Mr. Anderson of the Treasury; and that Sir Frederic Rogers, Under Secretary of

2

State for the Colonies, should form the medium of communication between the Secretary of State and the Delegates, if it became necessary to invoke

his Grace's further interference.

Messrs. Howland and Tilley had several interviews with the gentlemen at the Treasury; and, subsequently, all the Delegates met Messrs. Hamilton and Anderson, and discussed with them at large the important questions involved in the guarantee. It was arranged, to our entire satisfaction, that the money should be borrowed by the British Government, and paid over to the Provinces, without any charge for brokerage or commission, other than the ordinary expenses which the British Government are required to pay. This was a very important concession, calculated to save a very large, amount of commissions, which would have been lost, had we been left to borrow the money and manage the loan ourselves. Whether the debentures were to bear an interest of 3½ or 4 per cent was left an open question; but it was understood that whatever the rate, the Colonies were to get the benefit of all the money realized, either in the form of principal or premium. On this point we had nothing more to ask.

On another, of equal importance, we were met in a spirit so liberal, as to leave us nothing to desire. The Treasury proposed to give us forty years to repay the loan, by instalments to fall due at decennial periods; and the sums to be repaid at the end of the first two decades were so moderate (£250,000 at the end of ten, and £500,000 at the end of twenty years), as to bring them quite within the compass of the accumulating revenues of all

the Provinces.

Upon one point only did there seem to be any difficulty, the question of a sinking fund; and that appeared of sufficient importance to warrant us in seeking an interview with the Right Honorable the Chancellor of the Exchequer. Mr. Gladstone answered our application promptly, received us graciously, and discussed with us the whole subject in a spirit at once

frank and conciliatory.

The Chancellor admitted the national character of the work, and the strong claims of the Colonies; but informed us that a guaranteed loan, uncovered by a sinking fund, was a novelty in British legislation :- that it was opposed to the principles he had always advocated, and to the invariable That the whole stream of precedents practice of the House of Commons. was against us, except in the single case of the Turkish loan, which was in the nature of a war subsidy, granted to enable the Sultan to place his army in the field at the outbreak of the Crimean war, and very amply secured. He assured us, that, even if the Cabinet could be got to consent to take down to Parliament a measure without the accustomed provision, they Under those circumstances, alwould be outvoted and the measure lost. though we exhausted all the arguments which naturally occur to the Colonial mind, they failed to shake the Chancellor's strong conviction, and it was evident that we must accept the guarantee, upon the only terms on which it could be given, or abandon all hopes of being able to accomplish the work.

Assuming, therefore, that provision for a sinking fund must accompany the guarantee, it appeared to be sound policy to endeavor to get the stipulation so modified as to render it but lightly burthensome. It was apparent to us all, that if, in addition to the interest to be paid, the Provinces were expected to accumulate, from the commencement of the work, a sinking fund, to be invested in three per cent consols, while money was worth, at least, six per cent in North America, that a large amount of interest would be lost, and that the burthen would be greater at the outset, and before the road was opened, than the Provinces could bear. In this view of the case all the delegates concurred, and, had not the proposition been modified, we should all, perhaps, have abandoned the negociation.

We stated to the Chancellor, that there was a mode by which the requirements of Parliament would be met, and yet by which the Provinces might be enabled to assume the burthen. It would take four years to build the road, and, at least six more to people the wilderness, through which a large

portion of it was to pass. It was unreasonable, therefore, to expect us to begin to repay the money until the object for which it had been borrowed was accomplished. But, if ten years were allowed to elapse before any sinking fund attached, within that period the road would be built, the wilderness peopled, and the population of all the Provinces would be largely increased. They would be enlivened by the animating influences of the work itself, and would, in 1874, be in a condition to bear up buoyantly under obligations, which, in 1864, it might be perilous to assume.

We also pointed out the positive loss which must be entailed upon the Provinces, should they be compelled to invest an accruing sinking fund in the three per cents; and suggested that, as it accumulated, after the end of the first ten years, we should be permitted to invest it in bonds of any of the Colonies, bearing six per cent, or in any other securities, to be approved

by Her Majesty's Government.

Upon neither of these points was Mr. Gladstone prepared to give us an answer. He said they were new to him, and he would reflect upon them, with every desire to meet our wishes, if he could; but, being new and very

important, he must not be asked to decide without consideration.

On leaving the Chancellor's residence, I felt that the whole matter turned upon the concession of these two points. If they were conceded, the sinking fund was shorn of its terrors, and I was prepared to accept the proposition. If they were not yielded, then I was prepared, so far as Nova Scotia was concerned, to have closed the negociation. Mr. Tilley took precisely the same view of our position. We hoped that we could carry both. The Canadian delegates were less sanguine. They believed that, after long delay, the decision would be against us on both, and that the whole negociation would be ultimately unsuccessful. In this belief they left London for a short visit to Paris, Mr. Tilley and I being free to obtain these concessions, if we could.

We at once put ourselves again in direct communication with His Grace the Duke of Newcastle, and made it clear to His Grace, that, in our judgments, the whole negociation hung upon these two points. Our views were communicated to the Chancellor of the Exchequer, and, on the following day, we had the satisfaction to learn from His Grace that both points had

been yielded by Mr. Gladstone.

As the negociations were now virtually brought to a close, and Mr. Tilley was anxious to return home by the steamer from Liverpool on Saturday, 14th December, we arranged with Sir Frederic Regers that the propositions, as they were now mutually understood, should be sent to us in form—that Mr. Tilley would then accept the guarantee in an official letter, leaving me to do the same, if, on the return of the Canadian Delegates from Paris, they were still dissatisfied, and indisposed to join in such a letter as, in my judgment, was required to meet the case.

The following Treasury Minute was sent to us by Sir Frederic Rogers

on the 13th December:

(Copy.)

It is proposed-

1. That Bills shall be immediately submitted to the Legislatures of Canada, Nova Scotia and New Brunswick, authorizing the respective Governments to borrow £3,000,000 under the guarantee of the British Government, in the following proportions: Five-twelfths, Canada; three and a half-twelfths, Nova Scotia; three and a half-twelfths, New Brunswick.

- 2. But no such loan to be contracted on behalf of any one Colony until corresponding powers have been given to the Governments of the other two Colonies concerned, nor unless the Imperial Government shall guarantee payment of interest on such loan until repaid.
- 3. The money to be applied to the completion of a railway connecting Halifax with Quebec, on a line to be approved by the Imperial Government.
- 4. The interest to be a first charge on the consolidated revenue funds of the different Provinces, after the Civil List and the interest of existing debts; and, as regards Canada, after the rest of the six charges enumerated in the 5th and 6th Victoria, Cap. 118, and 3rd and 4th Victoria, Cap. 35 (Act of Union).
- 5. The debentures to be in series as follow, viz.: £250,000 to be payable ten years after contracting loan; £500,000, twenty years; £1,000,000, thirty years; £1,250,000, forty years. In the event of the debentures, or any of them, not being redeemed by the Colonies at the period when they fall due, the amount unpaid shall become a charge on their respective revenues, next after the loan, until paid. The principal to be repaid as follows:

1st Decade, (say 1863 to 1872 inclusive)—£250,000 in redemption of the first series, at or before the close of the first decade from the contracting of the loan.

2nd Decade, (say 1873 to 1882 inclusive)—A sinking fund of £40,000, to be remitted annually, being an amount adequate, if invested at 5 per cent compound interest, to provide £500,000 at the end of the decade, the sum to be remitted annually to be invested in the names of trustees in Colonial securities of any of the three Provinces prior to or forming part of, the loan now to be raised, or in such other Colonial securities as Her Majesty's Government shall direct, and the then Colonial Governments shall approve.

3rd Decade, (say 1883 to 1892 inclusive)—A sinking fund of £80,000, to be remitted annually, being an amount adequate, if invested at 5 per cent compound interest, to provide £1,000,000 at the end of the decade, the amount, when remitted, to be invested as in the case of the sinking fund for the preceding decade. This amount, when remitted, to be invested as in the preceding decade.

4th Decade, (say 1893 to 1902 inclusive)—A sinking fund of £100,000, to be remitted annually, being an amount adequate, if invested at 5 per cent compound interest, to provide £1,250,000, being the balance of the loan at the end of the decade.

Should the sinking fund of any decade produce a surplus, it will go to the credit of the next decade, and, in the last decade, the sinking fund will be remitted or reduced accordingly.

- It is, of course, understood that the assent of the Treasury to these arrangements pre-supposes adequate proof of the sufficiency of the Colonial revenues to meet the charges intended to be imposed upon them.
- 6. The construction of the Railway to be conducted by five commissioners, two to be appointed by Canada, one by Nova Scotia, and one by New Brunswick. These four to choose the remaining commissioner.
- 7. The preliminary surveys to be effected at the expense of the Colonies, by three engineers, and other officers nominated, two by the commissioners, and one by the Home Government.
  - 8. Fitting provision to be made for the carriage of troops, &c.

Parliament not to be asked for this guarantee until the line and surveys shall have been submitted to, and approved of by, Her Majesty's Government, and until it shall have been shown to the satisfaction of Her Majesty's Government that the line can be constructed without further application for an Imperial guarantee.

On receipt of this paper Mr. Tilley addressed the following letter to Sir Frederic Rogers:

internation of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the co

London, 13th December, 1862.

DEAR SIR .-

As I must return home by this night's mail, Mr. Howe and I have anxiously conferred upon the subject of the Treasury Minute read to us this morning. It accurately describes the terms proposed to the delegates in the various interviews with which we have been honored by His Grace the Colonial Secretary and the Right Honorable the Chancellor of the Exchequer.

As I understand the matter, the delegates have obtained the assent of Her Majesty's Government to every proposition they have submitted, and there is no difference of opinion except as to the single point of the Sinking Fund

As the Intercolonial Railroad is a work in which the Imperial and Colonial Governments are assumed to have a joint interest—as, in the Provinces, we regard it as indispensible to national defence, and to the transportation to this country, in winter, of breadstuffs in case war with the United States should ever arise. I hope that Mr. Gladstone may be induced to reconsider the matter of the Sinking Fund, and that the Cabinet may be enabled to convince Parliament that, under all the circumstances of this peculiar case, a Sinking Fund should not be insisted upon. But if it is Mr. Gladstone having consented that the Sinking Fund may be invested in our own or other colonial securities—I will not assume the responsibility of perilling or delaying this great enterprise, by rejecting what the Chancellor of the Exchequer and the Cabinet may regard as an indispensible condition

I have the honor to be, dear Sir,

Yours truly,

(Signed)

S. L. TILLEY.

Sir Frederic Rogers.

Mr. Tilley left London on the 13th December. Messrs. Sicotte and Howland returned early in the following week. To my infinite regret, though nearly all that we had asked had been conceded, and though the single point which had not been yielded was the one which we had been assured Parliament could not yield, and a persistent demand for which must be fatal to the negociation, still the Canadian Delegates appeared to be indisposed to agree to anything which should bind them or the Government they represented to accept the only terms which Her Majesty's Government assured us they could obtain. Having satisfied myself that the views of each delegation must be expressed in a separate paper, I read the following letter to Messrs. Sicotte and Howland, as the expression of my own, and sent it to Sir Frederic Rogers on the 19th December:

(COPY.)

No. 10, Sackville Street, 19th December, 1862

DEAR SIR,

Messrs. Sicotte and Howland returned from Paris yesterday. I showed them the Treasury Minute, and discussed with them the whole subject which it covers. They will address to you, or to His Grace the Duke of Newcastle, their views, in a separate paper. Nothing remains for me therefore, but, on the part of the Government of Nova Scotia, to accept the

terms proposed, as the best that, under all the circumstances, and after full

discussion, can be had.

I concur fully in all that Mr. Tilley has said, or that Messrs. Sicotte and Howland may say, on the subject of the sinking fund. It will give trouble, and must lose us some interest, however skilfully managed. I still hope that Parliament may be induced to rely upon the honor and the ample revenues of the Provinces, for the prompt payment of the instalments, as they become due; but, if that cannot be done, Her Majesty's Government having conceded every other point that we urged, I shall be quite prepared to submit the measure to my colleagues, with my strong recommendation that it be sanctioned by legislation, at the approaching session.

In closing this negociation, which has run over two years, I am quite sure that I express the feelings of all the gentlemen who have been associated with me, when I ask you to convey to His Grace the Duke of Newcastle, our acknowledgements of the urbanity, patience, and readiness of access, by which we have been enabled to discuss this great subject, in all its bearings, with the utmost freedom. To His Grace's hearty co-operation, and personal influence with the Cabinet, the Provinces will largely owe the success of the elevated Colonial policy which it has been the object of our

missions to urge.

Believe me,

My dear Sir,

(Signed)

Very truly yours, JOSEPH HOWE.

SIR FREDERIC ROGERS.

This letter was thus acknowledged:

Downing Street, 31st December, 1862.

SIR,-

I am directed by the Duke of Newcastle to acknowledge the receipt of your letter of the 19th of this month, and to acquaint you that it is gratifying to His Grace to learn that the negotiations which have taken place on the subject of the Intercolonial Railway, have been conducted in a manner satisfactory to the delegates sent to England by the Governments of the North American Provinces.

I am, Sir,

Your obedient servant, FREDERIC ROGERS.

THE HONBLE. JOSEPH HOWE.

The final answer of the Canadian Delegation was not sent in until after I left London. A copy of it has been asked for by telegraph, and promised. In a few days I presume that it will be forwarded, with some official intimation as to the nature of the policy to be pursued by the Government of Canada.

I have the honor to be,

My Lord,
Your Excellency's most obedient,
Very humble servant.

JOSEPH HOWE.

His Excellency.
The Right Honorable,
THE EARL OF MULGRAVE.
&c. &c. &c.

# MESSRS. SICOTTE AND HOWLAND'S LETTER.

To His Grace The Duke of Newcastle:

T.

The undersigned, representing the Government of Canada, as delegates specially deputed to arrange with the Imperial Government the terms of the loan to be effected upon the Imperial guarantee offered, as well as the nature of the security, concerning the construction of the International Railway between Halifax and Quebec, have the honor to submit to Your Grace the following memorial:

On the part of the Government of Canada, they must again assert what has been admitted at every period of the negotiations, both by British statesmen and Colonial Governments, that the construction of a Railway connecting the British North American Colonies ought to be regarded as a matter of Imperial concern, and, to use the words of the late Colonial

Minister. "as a great national road."

A brief review of the opinions expressed by public men, and of the views entertained by the different Governments of Great Britain and of the Colonies, since 1839, is perhaps necessary now to explain fully the conditions proposed on the part of the Imperial Government, as well as on the

part of the Colonial Governments.

In 1839, Lord Durham, in an answer to the Secretary of State for the Colonies, instructing him to turn his attention to the foundation of a road between Halifax and Quebec, in connection with the determination of the Imperial Government to establish steam communication between the former port and Great Britain, strongly recommended the construction of a Railway between the two cities.

During Sir Robert Peel's administration, in 1843, they caused a survey of a Military Road, but, when nearly completed, it was abandoned by the

Imperial Government in favor of a Railway.

In 1846, Mr. Gladstone, then Colonial Secretary, organized a survey for the Railroad, at the joint expense of Canada, New Brunswick and Nova Scotia, and the Imperial Government.

Major Robinson, in his report, expresses himself as follows as to the na-

ture and object of such a Railroad:

"In a political and military point of view, the proposed Railroad must

"be regarded as becoming a work of necessity."

"The increasing population and wealth of the United States, and the "diffusion of Railroads over their territory, especially in the direction of "the Canadian frontier, renders it absolutely necessary to counterbalance, "by corresponding means, their otherwise preponderating power."

"It is most essential that the Mother Country should be able to keep up "the communication with the Canadas at all times and all seasons. How"ever powerful England may be at sea, no navy could save Canada from

"a land force."

"Weakness invites aggression, and as the Railroad would be a lever of "power, by which Great Britain could bring her strength to bear in the "contest, it is not improbable that its construction would be the means of "preventing a War at some more distant period."

The expense of one year's War would pay the expense for a Railway two or three times over.

In 1848, Earl Grey in transmitting the report of Major Robinson to Lord Elgin, stated in his despatch.

3

"I have perused this able document with the interest and attention it so "well merits, and I have to convey to you the assurance of Her Majesty's "Government, that we fully appreciate the importance of the proposed undertaking, and entertain no doubt of the great advantages which would result not only to the Provinces interested in the work, but to the Empire at large, from the construction of such a Railway; but great as these advantages would be, it is impossible not to be sensible that the obstacles to be overcome in providing for so large an expenditure as would be thus incurred, would be of a very formidable kind."

"Before, therefore. Her Majesty's Government proceed to consider the "question, as to whether any steps should be taken to carry this plan into "effect, it is necessary that we should be informed how the several Pro-

"vinces would be prepared to co-operate in its execution."

Lord Elgin declared in his answer to that despatch: "It is obvious that "as soon as Railway communication is extended throughout the Provinces, a smaller Military force than is now requisite will suffice for their pro"tection.

"But looking to the anxiety which Your Lordship has repeatedly expressed, that a diminution in the expenditure incurred by Great Britain on this account should be effected at the earliest period, I am prepared to go a step further in this direction, so confident am I that the mere undertaking of the work in question will tend to raise the Colonists from the despondency into which recent changes in the commercial policy of the Empire has plunged them—to unite Provinces to one another and to the Mother Country, to inspire them with that consciousness of their own, strength and of the value of the connection with Great Britain, which is their best security against aggression—that I would not hesitate to recommend that an immediate and considerable reduction should take place in the force stationed in Canada in the event of the execution of the Quebec and Halifax Railway being determined on."

In 1851, Lord Stanley, in the House of Lords, reviewing the scheme propounded by Earl Grey, stated in a speech which was accepted by the colonies as the expression of the opinions and feelings of the people of England. He held, therefore, that the establishment of a line f communication between Halifax and Quebec for a distance of about 70 miles through an exclusively British territory, rendering two points, and two points essential for the power of this country, which are now separated by a vast extent of wilderness on the one side, and by a difficult, and for a great portion of the year, frozen coast on the other, rendering their communication from being what they now are, most uncertain, most difficult, and most dilatory—rendering it rapid, easy and constant—that, he said, was an object itself of primary importance to the interests, and to the Imperial power of this country on the continent of America."

"But it was also a matter of incalculable importance that we should open to the teeming thousands and millions we were pouring out from this country, where they were unable to obtain a livelihood, that we should open to them a home in a healthy climate, and within a very limited distance from our own shores, which did not exceed a twelve days' passage by steam, and the rapidity of that passage was every day increasing, it was

"of the highest importance whether we looked at it as affording a relief for our pauperism, or an increase of our power in those regions, that we had eleven or twelve millions of acres of unoccupied lands, fertile, and pose sessed of great mineral wealth, and which at the same time would be the

"means of extending our Military power, and securing the permanence of our empire in America. This was no ordinary case of a Railway project." where the question very properly might be, would the line pay or not.

"but it is a Railway which even in a pecuniary sense, he had sanguine ex"pectations would pay, if they took into consideration not merely the train
"on the Railway, but the adjuncts they would raise by the formation of its

"But he said if it would not pay one shilling for the £100 in a pecuniary point of view for the next ten years to come, the interposition of this "Country, not for the purpose of involving itself in an enormous and need-less expense, but for the purpose of aiding with its credit, if not by more "than its credit, those who were anxious to the utmost of their power, and "even beyond their power, not for a local but for an Imperial object, this "was a subject well worthy of the consideration of the Imperial Parliament, and was not to be looked upon as a matter of pounds, shillings and "pence.

"Now, he felt that to grant our aid was a wise, a sound, and even an "economical course in the end, even though, in the first instance, it would "involve an outlay, and sure he was that it would confer immense benefits "on the Colony, and bestow incalculable advantages on this Country itself,

"and confirm its territorial power in North America.

"And if the Noble Earl would only say which course he should be pre-"pared to take, and if the Government would give any sanction and assist-"ance for the execution of what these Colonies could not accomplish unas-"sisted, although he believed a comparatively small aid on the part of the "Government, or its liberal guarantee for the capital required, on account "of which guarantee they would never be called upon to pay a single shil-"ling, such an amount of assistance from the Government, he firmly be-"lieved, would enable the great work to be carried to a successful comple-"tion, and equally certain he was that unless our Government and our Par-"liament did interfere, these advantages would be indefinitely postponed, "the communication between two most important points would be perma-"nently cut off, the stream of emigration would continue to be directed as "it was now directed from this country and Ireland, not to our own colo-"nies, but to the territories of the United States; the communication be-"tween Halifax and Quebec would ultimately be through the United States, "be wholly dependent upon them, and liable at any moment to be cut off "in the case of hostilities; while the United States would be able to reap "all the advantages of the transit in times of peace.

"Now we had the option whether we should give to the United States "these great advantages, and, at the same time, deprive the subjects of this "country of the opportunity of receiving a useful and most valuable population settling in our colonies, and by their emigration relieving the over-burdened Mother Country of its surplus labor; or whether we would, by "a prompt and liberal course of action, which would ultimately cost us "nothing, enable our dependencies to complete that which would cement a "stronger union between our North American possessions, and to teach them to feel that they were regarded by the Imperial Government and "Parliament as an integral portion of the Empire. On the other hand, we

"beg to recall to your Grace's recollection the facts that—

The Legislature of the Colonies and their Governments have always represented the Road as a necessary means for the defence of the country and as a work of national concern.

On the 6th January, 1849, the Legislative-Council of New Brunswick passed a series of resolutions, from which the following extracts are made:

"Viewing the relative positions of the North American Colonies, and the "great importance, in a national point of view, of improving the facilities "for mutual intercourse, we consider it a matter of the greatest moment for "the permanency of British interests on this continent, that a Railway "should be laid down to connect the lower Provinces with the interior of "Canada"

"We believe that no other measure can be devised which will so certainly "consolidate the Colonies, and perpetuate our connection with Great Britain; while without it we fear that our position, as Colonies, will be of "short duration.

"We think the plain broad question on this subject is: Do the people of "England wish to retain the North American Colonies, or not? If they do, the Trunk Railway is indispensible, and should be completed at any "cost."

On the 1st May, 1858, the Legislature of Nova Scotia addressed Her Majesty as follows:

"This great enterprise, of national no less than colonial importance, has been, through many years, pressed upon the consideration of your Ma"jesty's Government.

"The benefits of the measure, both in its national and colonial relations,

" are acknowledged.

"The gigantic work has been facilitated by the efforts and expenditure of "the provinces, but its accomplishment is beyond their unaided resources, "and on the efficient assistance of your Majesty's Government depends the "great result.".

In 1858, the Legislature of Canada passed the following resolutions:

"1. That the construction of an Intercolonial Railway, connecting the provinces of New Brunswick and Nova Scotia with Canada, has long been regarded as a matter of national concern, and ought earnestly to be

"pressed on the consideration of the Imperial Government.

"2. That during several months of the year, intercourse between the "United Kingdom and Canada can only be carried on through the territory of the United States of America, and that such dependence on and exclusive relations with a foreign country cannot, even in time of peace, but exercise an important and unwholesome influence on the state of Canada as a portion of the Empire, and may tend to establish elsewhere that identity of interest which ought to exist between the Mother Country and her colonies.

"That while the house implicitly relies on the repeated assurance of the "Imperial Government, that the strength of the Empire would be put forth to secure this Province against external aggression, it is convinced "that such strength cannot be sufficiently exerted during a large portion of "the year, from the absence of sufficient means of communication, and that "should the anicable relations which at present so happily exist between "Great Britain and the United States be ever disturbed, the difficulty of "access to the ocean during the winter months might seriously endanger

"4. That in view of the speedy opening up of the Territories, now occu"pied by the Hudson Bay Company, and of the development and settle"ment of the vast regions between Canada and the Pacific Ocean, it is es"sential to the interests of the Empire at large, that a highway extending
"from the Atlantic Ocean westward should exist, which should at once
"place the whole British possessions in America within the ready access
"and easy protection of Great Britain, whilst, by the facilities for internal
"communication thus afforded, the prosperity of those great dependencies
"would be promoted, their strength consolidated, and added to the strength
"of the Empire, and their permanent union with the Mother Country
"secured.

In 1861, the Colonies pressed again upon the Imperial Government the advantages and necessity of constructing the Railway.

Their Delegates strongly urged that-

"Without that Road the Provinces are dislocated, and almost incapable of defence for a great portion of the year, except at such a sacrifice of life and property, and at such an enormous cost to the Mother County makes the small contribution which she is asked to give towards its contribution."

"struction, sink into insignificance. With that Railroad we can concentrate our forces on the menaced parts of our frontier; guard the citadels and works which have been erected by Great Britain at vast expense, cover our cities from surprise, and hold our own till reinforcements can be sent across the sea, while without the Railway, if an attack were made in win"ter, the Mother Country could put no Army worthy of the National honor, and adequate to the exigency on the Canadian frontier, without a positive waste of treasure far greater than the principal of the sum, the interest of which she is asked to contribute or rather to risk.

"The British Government have built expensive citadels at Halifax, Que"bec and Kingston, and have stores of munitions and warlike materials in
"them, but their feeble garrisons will be inadequate for their defence, unless
"the provincial forces can be concentrated in and around them. An enter"prising enemy would carry them by coups de main before they could be
"reinforced from England, and once taken, the ports and roadsteads which
"they have been erected to defend, would not be over safe for the naval

"armaments sent out too late for their relief.

"That the subject should be looked upon and dealt with mainly to the "consideration of permanent connection between Great Britain and the "Provinces, and the relative positions of England and the United States "in the event of hostilities between them."

The Imperial Government gave a final answer to all these demands and considerations, by the Despatch of Your Grace of the 12th April, 1862, in which Your Grace says:

"I much regret to inform you that, after giving the subject the best con"sideration, Her Majesty's Government have not felt themselves at liberty
"to concur in this mode of assistance. Anxious, however, to promote, as
"far as they can, the important object of completing the great line of Rail"way communication on British ground, between the Atlantic and the
"westernmost parts of Canada, and to assist the Provinces in a scheme
"which would so materially promote their interests, Her Majesty's Gov"ernment are willing to offer to the Provincial Governments an imperial
"guarantee of interest, towards enabling them to raise, by public loan, if
"they should desire it, at a moderate rate, the requisite funds for construct"ing the Railway."

The Colonies held in consequence a conference at Quebec, in September, and then by their delegates agreed:

"1. That whilst they have learned with very great regret that Her Ma"jesty's Imperial Government has finally declined to sanction the proposals
"made on behalf of these Provinces in December, 1861, and at previous
"periods, they at the same time acknowledge the consideration exhibited
"in substituting the proposal of 'An Imperial Guarantee of Interest tow"ards enabling them to raise by Public Loan, if they should desire it, at
"'a moderate rate, the requisite funds for constructing the Railway.'"

"2. That with an auxious desire to bind the Provinces more closely to"gether, to strengthen their connection with the Mother Country, to pro"mote their common commercial interests, and to provide facilities essential
"to the public defences of these Provinces as integral parts of the Empire,
"the undersigned are prepared to assume under the Imperial Guarantee
"the liability for the expenditure necessary to construct this great work."

"3. That in arriving at this conclusion the undersigned have been greatly "influenced by the conviction that the construction of the Road between "Halifax and Quebec, must supply an essential link in the chain of an "unbroken highway extending through British territory from the Atlantic "to the Pacific, in the completion of which every Imperial interest in North "America is most deeply involved."

 $\mathbf{II}$ 

The Colonies have declared their willingness to assume the whole liability of the cost of the Road, provided they are assisted in raising the requisite funds for its construction at a moderate rate of interest by the Imperial Guarantee. It may fairly be said that the proposal now is not of a Loan of Imperial moneys to the Colonies for Colonial purposes only, but of a mode, involving no actual liability to the Imperial Government, to facilitate the construction of a great National work in the interest of the Empire as well as of the Colonies.

The only question involved as regards Great Britain is the sufficiency of the security offered by the Colonies to cover this distant liability resulting

from the Imperial Guarantee.

If their past condition, compared with the present, does not establish fully their ability to repay the Loan in the periods proposed, such a comparison would only prove, more strongly than any other fact, that this admittedly necessary work of military defence ought to be executed by the Imperial Government alone. But to make evident the ampleness of the security offered by the Colony, it is sufficient to compare the Revenue of the Colony in 1842, when the first Imperial Guaranteed Loan was effected, with the Revenues in 1861.

In 1842, it was £ sterling, in 1861, it is £ sterling, after de-

duction of the cost of collection.

After several interviews with your Grace, and the Chancellor of the Exchequer, when the conditions of the Loan, the nature of the security, and the arrangements of a Sinking Fund were discussed without coming to any positive understanding, the Delegates have now been officially informed that the Imperial Guarantee will be given on certain conditions stated in the annexed Document.

The Delegates regret to state that, in their opinion, some of these conditions are of a nature to render the Imperial Guarantee of no advantage, and other to render its availableness so remote, or encumbered with such difficulties, that the Colonies could not accept it, as an assistance towards an undertaking, and a measure to provide facilities essential to the future defence of the Provinces as integral parts of the Empire.

The stipulation that the Loan is to be the first charge after the interest of existing debts, seems to them shaped so as to operate against the payment

of other debts coming due before the repayment of the Loan.

The annual repayment of the Loan renders the period of payment much shorter than the period proposed, and besides the loss it involves, it deprives the Colony of a large sum which, employed during such a period towards internal improvements, would afford a greater security than this annual payment by the development of the resources and of the wealth of the Country. In any arrangement, the Colonies ought not to be fettered by conditions of payment through any form of Sinking Fund, which would make this Imperial Guarantee an impediment to future internal improvement, while, by increasing the rate of interest and by the expenses and loss incurred in its management, the Imperial Guarantee would thus cease to be of any real aid and advantage.

The investment of these annual payments into Colonial Securities will not give a better security than the engagement of the Colonial Government

to pay a fixed sum at a fixed period.

These investments into Colonial Securities, as Her Majesty's Government shall direct and the Colonial Governments shall approve, will lead to difficulties which, if not of a graver character than those that have already arisen out of the disposal of the Sinking Fund, created for the first Imperial Guarantee, fully satisfy the Delegates that these arrangements are not more favorable than the former.

The experience of Canada is strongly adverse to a Sinking Fund. It created annoyances and difficulties, made the rate of interest higher than

she would have paid by borrowing on her unassisted credit.

The Delegates are informed that it is of course understood that the assent of the Treasury to these arrangements presupposes adequate proof of the sufficiency of the Colonial resources to meet the charges intended to be im-

posed upon them.

When after more than 20 years negotiations the offer of an Imperial Guarantee was made, the Colonies had some right to believe that the sufficiency of their Revenues to meet these increased charges was known and acknowledged, as all information which they could give are already in the possession of the Treasury, and which are set forth in the fullest detail in the statistical table annually published by Her Majesty's Government. No Survey, no Legislation can take place before the Colonies are made aware that adequate proof has been made of the sufficiency of their revenues to meet the intended charges, and it would be important for the Colonies to be informed, at the earliest period, what further proof is wanted.

The 8th condition is, that fitting provision is to be made for the carriage

of troops, &c. &c.

If it is meant that the troops are to be carried free of any charge, the Delegates must observe that when this was offered by the Colonies, it was as a part of the scheme then proposed, that England should contribute half the costs of the construction of the Road.

When it is now proposed that the whole cost should be borne by the Colonies, it cannot be expected that they must also relieve the Imperial Govern-

ment from all expenditure attending the transport of troops, &c.

All these conditions presuppose that the Imperial Government has no interest to serve or no policy to uphold in the construction of this great Railway, that the Colonies must be treated as any other Government asking a Loan from the Imperial Treasury. Proof is required as it is enacted from any unknown debtor, as to the sufficiency of his means to meet his engagement. With an ordinary debtor, when this sufficiency is established he may do what he pleases with the moneys borrowed. But in this instance the funds are to be applied to an undertaking admitted by all to afford an immense developement to the wealth of the Creditor, enabling him to maintain more efficiently his power and supremacy, with the control even of directing the location of this work where in his opinion it will secure all these advantages most efficiently, although the costs to the Debtor may be much increased and the pecuniary advantages made much less, if not a great loss thereby.

The Treasury proposes another condition which must greatly delay all the arrangements, and may, after all the expenses attending the requisite Surveys, the trouble and the difficulties of carrying the necessary Legislation in the different Colonial Legislatures, render all this trouble, all this expenditure, all this Legislation, useless and of no avail, leaving certainly a strong reeling of dissatisfaction in the minds of the inhabitants of the

Colonies.

The Imperial Government is not to be asked for this guarantee until the line and the surveys shall have been submitted to and approved by Her Majesty's Government, and until it shall have been proved to the satisfaction of Her Majesty's Government that the line can be constructed without

further application for an Imperial guarantee.

The proposed guarantee is limited by the Treasury to three millions of pounds. It is possible that the Bailroad may cost half a million or more above this fixed sum of three millions, and this by the fact of a selection of route chosen for its military advantages, and upon considerations certainly as Imperial as Colonial. And then the Colonies, before obtaining this guarantee, must prove to parties not always shewing too much confidence in their wealth, that the line can be constructed without further application for an Imperial guarantee.

Another period of many years will probably elapse before the discussions

upon this point close.

The Schedule presupposes that the rate of interest is fixed by the Treasury at 4 per cent, while it was demanded by the Delegates after consultation

with the fiscal agents of the Province, that the rate should be fixed at 3½ per cent, and that the Debentures should bear that rate of interest.

The surveys and the selection of the route must be settled as preliminary proceedings to any legislation prepared to carry out the offer of the Imperial

guarantee in the Colonial Legislature.

By the proposal of the Treasury it is only after the surveys and after the selection of the route that the Provinces can act in regard to this guarantee, if the cost is established at no more than three millions, and when information is given to the Colonies that their resources are judged sufficient to bear the charge.

If the cost of construction is above three millions, proof must be made to the satisfaction of Her Majesty's Government that the line can be constructed without further application for an Imperial guarantee. Pending the discussion which may follow during a long period to establish this fact or this possibility, no action, no legislation can be adopted.

#### III.

Some of these conditions and demands are a strange commentary upon the official statement made by Earl Grey in 1848. "Her Majesty's Government fully appreciates the importance of the proposed undertaking, and entertain no doubt of the great advantages which would result, not only to the provinces interested in the work, but to the Empire at large, from the construction of such a Railway, but before proceeding to consider the question whether steps should be taken by Her Majesty's Government to carry this plan into effect, it was necessary that they should be informed how the several provinces were disposed to co-operate in its execution."

These demands rather ungracefully unsay the eloquent words of Earl Derby, "That to grant an Imperial aid was a wise, a sound, and even an economical course in the end, even though in the first instance it would involve an outlay, and sure he was that it would confer immense benefits to the Colonies, and bestow incalculable advantages on this Country itself,

and confirm its territorial power in North America."

The question of the Public Defences of the Colonies as integral parts of the Empire, the question of the maintenance, of the extension of the political and social influence of England, over the whole of her immense possessions in North America, the economical questions of so vast magnitude to the welfare of the Nation, the question of unemployed capital, of surplus labor, underlie every link of the great and national road, which Canada is anxious to build by the largest and most liberal contribution, from the Atlantic to the Pacific.

She had a just right to ask the co-operation of Great Britain, and when she only demands for an advance of guarantee, which can, by no eventualities, involve the liability of a single half-penny, to use the language of Earl Derby, she has certainly fair grounds to expect a prompt and liberal

course of action.

If the different groups of population, spread over British America, and which will numerate at least 12 or 15 millions in twenty-five years, are allowed to proceed in different directions, to have no common tendencies, without any centralization of their political existence, no other bond but their disjointed interests fostered by different commercial policies, and settled upon principles of localities, they must continue weak and powerless, and an easy prey for the powerful republic girdled round these Colonies.

Bind all these small communities by closer intercourse, make a whole strong by its unity of interests, of tendencies, of political organization, of common views; create by commercial relations mutual interests amongst themselves and with, England, direct the minds towards a general and comprehensive policy you will thus benefit the industry, the wealth of England, extend your power of civilization, and lay the foundation of large and important states friendly and grateful.

The Canadian Government does not press this undertaking, because it is popular with their people. On the contrary, they have to encounter a strong and popular opposition, but fully appreciating the strength and the importance it will eventually give their Country, and more particularly the facilities it will provide for the public defences of their part of the Empire, they have not hesitated to adopt a policy, which appeared to them sound, highly national and conducive to the greatness and the defence of the Empire at large.

As a measure of defence Canada will cheerfully bear her share of the large burden imposed by the construction of the road. But if the policy of the Imperial Government, in relation to this work, is practically a declaration that they are not disposed to treat it as a measure of national concern and of public defence of a portion of the Empire, the enterprise will not be-

come more popular.

The views and the policy involved and following out of the conditions attached to this, so distant liability of the Imperial Exchequer, are so much at variance with the views and the policy entertained by Canada, that the undersigned have considered themselves bound to review these so long pending negotiations, and to contrast the views of the Colonies as to the military and Imperial character of the work, with the Imperial policy refusing to contribute towards it, and arranging not an advance of money, but of a simple guarantee which the work alone would sufficiently protect, in a manner illiberal, obstructive, and which refuses to acknowledge any corresponding duty on the part of the Mother Country.

They will hasten to submit to their Government the conditions and arrangements proposed by the Imperial Government, to carry out the offer of an Imperial guarantee, with the hope that upon the pressing instances of the Colonies, this aid of an Imperial guarantee will be given in the manner explained by the delegates at their different interviews with Your Grace

and the Treasury.

These conditions urged by the delegates and detailed in the annexed paper, in enabling the Colonies to borrow the requisite funds at the low rate of 3½ per cent, would render the Imperial guarantee a real and tangible assistance, accepted as an equivalent to the contribution of the Imperial Government towards a work of national concern and a measure of public defence. The actual and future wealth of the colonies are ample and sufficient securities of the Imperial Exchequer against the possibilities even the most remote, of any loss, and a satisfactory proof that the road would be constructed if these conditions were accepted.

London, 23rd December, 1862.

(Signed)

L. V. SICOTTE, W. P. HOWLAND.

It is preposed by the Delegates-

1. That the loan shall be for £3,000,000 sterling;

2. That the liabilities of each colony shall be apportioned as follows:

£1,250,000 for Canada, £875,000 for New Brunswick, £875,000 for Nova Scotia.

3. The debentures shall bear interest at the rate of 31 per cent;

4. The interest shall be paid half yearly in London, on the first of May and on the first of November;

# 5. That the sum borrowed shall be repaid in four instalments:

£250,000 in 10 years, £500,000 in 20 years, £1,000,000 in 30 years, £1,250,000 in 40 years.

6. The net profits of the road shall be applied towards the extinction of the debt;

7. That the loan shall be the first charge upon the revenue of each colony

after the existing debts and charges;

S. That the Imperial Government shall have the right to select one of the engineers to be appointed to make the surveys for the location of the road;

9. That the selection of the line shall rest with the Imperial Govern-

ment;

10. That if it is concluded that the work is to be constructed and managed by a joint commission, it shall be constituted in the following proportions: Canada shall appoint two of the Commissioners, New Brunswick and Nova Scotia each one;

These four shall name a fifth before entering upon the discharge of their

duties;

11. That such portions of the railways now owned by the Governments of New Brunswick and Nova Scotia, which may be required to form part of the Intercolonial Road, will be worked under the above commission;

12. That all net gain or loss resulting from the working and keeping in repair of any portions of the roads constructed by Nova Scotia and New Brunswick, and to be used as a part of the Intercolonial Road, shall be received and borne by these Provinces respectively, and the surplus, if any, after the payment of interest, shall go in abatement of interest of the whole line between Halifax and Riviere-du-Loup.

13. That the rates shall be uniform over each respective portion of the

road;

14. That Crown Lands required for the Railway or Stations shall be provided by each Province.

(COPY.)

### MR. TILLEY TO SIR F. ROGERS.

Provincial Secretary's Office, Fredericton, N. B., January 5th, 1863.

DEAR SIR,

Just before leaving London I received the copy of the paper you read to me at the Colonial Office on the morning of the 13th December last, as embodying the terms on which the Duke of Newcastle and Mr. Gladstone would be prepared to propose to Parliament an Imperial guarantee of the Railway loan of £3,000,000.

In the letter accompanying the memorandum you state that the 4th clause is not altered so as to meet my objections, as Mr. Hamilton thought it best that I should receive the paper as it stood, and that I could make my ob-

servations upon that section.

As worded, the provisions of section 4 if embodied in an act of our Legislature, would change the character of our debentures now outstanding. Such a measure could not be sanctioned by the Government or Legislature, and I am confident it will not be insisted on when understood by MicGladstone. The proposed loan must stand as a first charge on the coust

lidated revenue after the civil list and existing legal liabilities including

principal as well as interest.

During one of the interviews with which Mr. Howe and I were favored by Mr. Hamilton, it was understood that if the Imperial guarantee was given, the debentures would be issued by the Lords Commissioners of Her Majesty's Treasury, and these Commissioners would act as trustees of this loan and the sinking fund. This arrangement is only indirectly referred to in the memorandum transmitted to me on the 13th December. You will please obtain the sanction of the Treasury to an additional section containing this proposal.

It is possible that these matters have all been arranged by the Canadian and Nova Scotia delegates before leaving, and the necessary records made.

If so an answer to this letter will not be necessary.

I am, &c.

(Signed)

S. L. TILLEY.

Sir Frederic Rogers, Colonial Office.

(COPY.)

Nova Scotia-No. 10.

Downing Street, 31st January, 1863.

MY LORD.

With reference to my despatch, No. 4, of the 24th of January, I have the honor to transmit to Your Lordship a copy of a minute by the Secretary to the Treasury upon two questions raised in the annexed letter from Mr. Tilley, the delegate of New Brunswick, on the subject of the proposed loan for the construction of the Intercolonial Railway, viz., the mode in which the loan should be raised, and the extent to which it should form a first charge on the Provincial revenue.

I have, &c.

(Signed)

NEWCASTLE.

Lieut. Governor

The Right Honorable

THE EARL OF MULGRAVE, &c. &c. &c.

(COPY.)

With reference to the two questions raised by Mr. Tilley on the stipulations embodied in the memorandum relating to the proposed Loan for the construction of an Intercolonial Railway, the Treasury considers that an answer should be sent to the following effect:

1. Her Majesty's Government never contemplated acquiring a precedence over existing engagements of the Colonial Governments, whether for interest or principal; but the assent of the Treasury to the arrangement, as stated in Article V, presupposes adequate proof of the sufficiency of the Colonial revenues to meet the charges imposed upon them, which charges would comprize not only the Civil List and the accruing interest of any existing debt standing in priority to the proposed Railway Loan, but also any payment of principal standing in the same priority which may fall due within the period at the expiration of which the Railway Loan is required to be fully liquidated, as well as the current interest and the decennial ac-

cumulations for extinction of principal of the proposed Railway Loan.

No statement of revenue or liabilities which would afford this evidence

has yet been exhibited to Her Majesty's Government.

2. In the event of the proposed arrangement being carried into effect, the Treasury will not object to issue the debentures upon the precedent of the Canada Guaranteed Loan of 1843, under the hands of the Lords Commissioners, and to authorize one of their officers to act as trustee, together with a nominee of the Colony, for the investment, in their joint names, of the instalments remitted from time to time on account of sinking fund, provided such a course should be deemed advisable by the Colonial Governments.

(Signed)

G. A. H. 23rd Jany. 1863.

# APPENDIX No. 6.

# NOVA SCOTIA GOLD FIELDS.

No. 53.—Miscella.

Government House, Halifax, 12th June, 1862.

MY LORD DUKE,-

I have the honor to inform your Grace, that, being anxious personally to inspect the Gold Fields now in operation, I applied to Vice Admiral Sir Alexander Milne to provide me with a passage in one of Her Majesty's Steamers, and the Admiral having kindly placed the *Medea* at my disposal I embarked at 7 p. m. on Thursday, the 29th of May, and returned to Halifax late on Monday, the 9th of June, having, during this time, visited the Gold Diggings at Isaac's Harbor, Country Harbor, Wine Harbor, Sherbrooke, Tangier, and Lunenburg Sherbrooke, Tangier, and Lunenburg.

I regret that, in consequence of the lateness of my return, I shall be unable to send my report to your Grace by this mail; but I will do so by

the next.

I have, &c.,

MULGRAVE.

His Grace

THE DUKE OF NEWCASTLE, &c. &c.

(Signed)

No. 57.-Miscella.

Government House, Halifax, N. S., 21st June, 1862.

MY LORD DUKE,-

In fulfilment of my promise, which I made in my despatch No. 53, forwarded by last mail, I now send to your Grace my report on the various Gold Fields, taking them consecutively, in the order in which I visited them.

1. Isaac's Harbor is situated on the eastern shore of Country Harbor, in the County of Guysborough; it is well sheltered, and convenient for

ordinary vessels, but ships of almost any size can find good anchorage within little more than half a mile of the Diggings. The quartz veins extend on both sides of the harbor, and quartz rocks are abundant; but I saw few sights, and no specimens worth mentioning.

On the west side of the harbor, the diggings run about one mile back through a very rough country, the lead being nearly east and west. A Crusher was expected, and it was hoped that it would be at work shortly. On the east side of the harbor, the diggings also extended some distance. There were about 140 men at work, and it was supposed that that number would be considerably increased as soon as seed time was over. On the

east side of the harbor I found a party of old Californian diggers employed in warhing, and apparently with good success, as I observed numerous sights in their trough during the time that I was watching their operations; the site of their claim is on a small stream running into the harbor; but it does not appear likely that these washings will extend much beyond the limits of their claim.

2. Country Harbor is navigable for four or five miles above Isaac's Harbor, and small schooners will be able to lie alongside a wharf, which is

now building from the lower end of the diggings.

Very few claims were being worked at the time of my visit—most of the miners being absent planting their crops; but it was expected that they would soon return. I found about 70 men employed; and from one claim, close to the river. I saw some very good specimens taken out, fine gold apparently pervading the whole of the quartz. One shaft has been sunk to the depth of 25 feet, which has been worked all the winter. The quartz, however, taken from it did not shew any sights. No Crusher has, as yet, been erected, and it is difficult to obtain any reliable information as to the value of the diggings. The Gold Fields both at Isaac's and Country Harbor were only discovered late last autumn, and are as yet less fully developed than any of the others.

3. Wine Harbor I found greatly changed since my visit last year; and the prospects held out seem fully to justify the opinion as to the richness of these diggings, which I expressed to your Lordship at that time. The diggings have greatly extended; and most of the claims on the Peninsula, between Wine Harbor and Indian Harbor, have been taken up. Between 300 and 400 men were steadily at work; but here, as at the other diggings, the number is expected to increase largely as soon as seed time was over. Three small claims on what is called "Hattie's Lead" have proved extremely rich. These claims were among the first opened at Wine Harbor, and were in operation at the time of my visit last year.

Resides a large quantity of quartz still uncrushed, and which has the appearance of being very rich, these claims have each produced, by handerushing, about \$8000 worth of gold. The depth to which these claims have been worked, is about 40 feet; their areas are only 20 feet along

the lead by 50 feet across.

There are several other leads which promise very well, especially that which is called the Middle Lead. No Crusher has, as yet, been erected;

but one has arrived, and would shortly be at work.

Wages were from 3s. 9d. to \$1 per day; and the price of living in a lodging-house is \$2.50 per week; but men living in their own shanties can board themselves for \$1.50 per week. Beef was selling at 3d per lb., veal 21d, eggs 6d per dozen, a 10 lb. codfish 4d, and lobsters 2d per dozen. Numerous houses had been creeted—some of them of a large and substantial description. The depth of water in Wine Harbor will not admit of its being made available for ships, there being only 6 feet of water over the bar; but fair anchorage can be obtained in Indian Harbor, within a short distance of the diggings, and a road will shortly be made across the landing to Wine Harbor—a distance of about 11 miles. I received the most satisfactory accounts of the conduct of the miners; and all seemed contented, and in good spirits.

4. The Sherbrooke diggings are situated about 9 miles from the sea, on the west side of St. Mary's River; and schooners, not drawing more than 10 feet, can lie alongside the wharf at the landing. This Gold Field was discovered late in the autumn; and the progress which has been made is perfectly astonishing. Two substantial wharves have been constructed at the landing; and I found three or four vessels discharging their cargoes. From these wharves a good road had nearly been completed, at Government expense, to the centre of the diggings—a distance of about 11 miles, and it has since been decided to extend it to the present extremity of the Gold Field—about 11 miles further.

The whole of the country on which the diggings are situated, is extremely rough and desolate; for a short distance from the banks of the river the ground is covered by a thick forest; after which there is a large open space through which the fire has passed, leaving nothing to be seen but the charred stumps of the trees, and large rocks and boulders, with which the ground is thickly strewed. At present, the diggings extend over an area of about three miles in length, by one in breadth. About 120 houses and stores—some of them large and commodious—have already been erected; and there is a great appearance of spirit and animation about the place.

Numerous leads of quartz run through the field, and many of them are apparently rich in Gold. Two tons of quartz, taken from the "Hewitt Lead," I was informed, on being crushed, produced Gold worth about \$120 per ton. Mr. Hewit, himself, told me that he and the Company to which he belonged (10 in number) had sold rough Gold—which they had obtained by hand-crushing—to the amount of between \$1600 and \$2000; and besides this, they had about 50 tons of quartz which they valued at over \$3200; and should their calculations prove correct, their earnings would

have exceeded \$4 a head per day.

A ton of quartz, taken from the Drysdale Lead, produced Gold to the amount of \$150; and several of the other leads have produced at the rate of about \$100 per ton. One small Crusher was at work at the time of my visit, and the charge for crushing was \$8 per ton; but, as yet, the miners do not seem to have much confidence in it, and prefer crushing their quartz by hand—an operation which is very tedious, and, at the same time, wasteful, as they are unable to extract a large proportion of the fine Gold. As a proof of this, I, myself, found numerous particles of Gold in some of the tailings, from which all the Gold was supposed to have been extracted. There are several Crushers now in the course of erection; and I trust that when they are completed, the competition will reduce the price of crushing, and that the miners will soon gain confidence in them.

Wages are about the same as at Wine Harbor; but provisions rather

dearer, though the price of board is from \$2 to \$3 a week.

5. Tangier.—These diggings did not present the same appearance of life and animation which I observed on my different visits last year; but I attribute this very much to many of the persons holding claims being still absent on their farms; and also the unwillingness of many to continue their operations until they are able thoroughly to test the yield of quartz which

they have already raised.

Three crushing machines have been erected, one of which, a small Stamper, was in active operation, and seemed to work well. The yield obtained from some of the leads is satisfactory, though not as great as that obtained from some of the best at Wine Harbor and Sherbrook. The general average of the quartz—taking bad and good—that had been crushed by this machine, would yield about \$18 to the ton; but some of the leads have proved almost barren, which, of course, reduces the average of the whole: the highest return was from the North Lead, one ton of which produced \$167. The Ferguson Lead has averaged \$50, and the South Lead \$45 to the ton.

The other two Crushers were not at work. A Stamper, which had been erected on the river, does not give satisfaction to the miners, and they have ceased to employ it. The other—an American invention—has broken down, and does not appear to answer. Some new houses have been erected, and the diggings have slightly extended. I saw some very good specimens of Gold, and although there was not a great deal of work going at the time of my visit, there being only 400 persons on the ground, I have every confidence that this Gold Field will still maintain its position, and prove profitable to those engaged in working it.

Tangier was the first place where Gold digging commenced; and most of the ground having been taken up at an early period, the claims are generally laid off in small areas, which now causes considerable inconvenience, not only on account of room to work to any large extent, but also on

account of the difficulty about drainage.

The Lunenburg diggings have greatly improved since last year, and have a very thriving appearance. One hundred and fifty houses have been built, and among them are several very good lodging-houses, and stores. Six hundred persons were living on the ground, about 350 of whom were miners. The shore washings have not proved so profitable this year, and I only saw one party at work on them; but the dirt that they were washing seemed to yield well. Attention is now chiefly directed to the quartz mining: the veins are extremely numerous, and appear rich; but they are very small, and I fear the expense of getting out the quartz will consequently be heavy. Difficulty will also be experienced by the mode in which almost all the parties are working their claims. Instead of sinking a shaft and working from that, they are working from the surface, and are thus forming large tanks, in which the water must necessarily collect. Considerable inconvenience is already being experienced from this cause; and I trust that they will thus be induced to change their mode of working before the evil is irremediable. The object which induces them to adopt this mode of operation, is their anxiety to realize at once some returns from their labor. The practice, however, is a suicidal one, and, if continued, must soon render the claims unworkable almost on account of the amount of water which will thus be accumulated.

A crushing machine has been crected, and an attempt was made to work it during the time that I was there; but the machinery was defective, and the attempt failed. The Crusher is an American patent; and I fear that it will cause disappointment, as none of those that I have seen of the same

pattern have succeeded.

After carefully inspecting these diggings, and obtaining all the information in my power, I fully anticipate that the Gold Fields of Nova Scotia will ultimately prove a profitable investment for capital, judiciously expended. At present, those employed are generally persons utterly unacquainted with mining operations, and but few of them possess the means which are necessary to meet the vicissitudes incidental upon all mining operations; and being deficient both in skill and capital, it is only those who are fortunate enough to secure very rich claims, who are likely to realize any great return for the labor they are expending. But of the fact, that Gold, in paying quantities, can be found in many of the quartz veins of this Province, I think there can be no longer any doubt. The want of good Crushers and a successful process of amalgamation, are the greatest difficulties which the miners in this country have at present to contend with. Numerous Crushers have been erected, but they are almost all defective in one respect or another. The American machines, of which I have seen four or five, have all of them, up to the present time, proved failures—having either been broken to pieces by the velocity with which they revolve, or else been defective in other respects. The Stampers are most of them too small, and are, therefore, unable to perform sufficient work to enable them to crush at reasonable prices; \$8 to \$10 per ton being the price charged by most of the machines that I have seen—a price which precludes the working of any but very rich quartz.

The best machine which I have yet seen is that erected by Mr. Belt, a gentleman who has had considerable experience in Australia, and who now represents an English Company who have taken claims in this Province. This Crusher has been erected at the Laidlaw Gold Field, about 12 miles from Halifax. It has 12 stampers, and has crushed 26 tons in the 24 hours, at a charge of \$4 per ton. I had a conversation with Mr. Belt the other day, when he informed me, that he had no longer any doubt, that most of the quartz in this country would yield a profit. At Laidlaw's, he considered that one ounce per ton would pay well to work. Since then, I understand that one lot of quartz, amounting to 113 tons, in which little visible Gold could be seen, after passing through his machine, produced

97 oz.

As yet, from the want of good Crushers, only a very small proportion of the quartz raised has been tested, and it is difficult, if not impossible to form any correct estimate of the amount of Gold that has been obtained; but, yesterday, I saw two bars of Gold which had been purchased at Sherbrooke and Wine Harbor, and I understand that, at least, 150 oz. will be sent home by next steamer.

Under these circumstances, I trust I am not over sanguine in thinking, that there is now little or no doubt that this Colony will soon rank as one

of the gold-producing countries of the world.

It is, I can assure your Grace, very satisfactory to me to speak of the exemplary conduct of the miners. Crime and drunkenness are almost unknown at the diggings; and, with the exception of some slight disturbance which occurred at Tangier the other day, I have not heard of any disorder

or irregularity taking place.

The most remarkable feature of the Gold discoveries in this Province has been the entire absence of that excitement so common in all other Gold Fields; seed time and harvest are regularly attended to; and the work upon the diggings is not permitted to interfere with these necessary operations. Whether this judicious conduct will be continued when the mineral wealth of the country is more fully developed, it is impossible to say; but so far, it has been of great advantage to this country, as it has prevented any diminution in the production of the necessaries of life, or any percep-

tible increase in the price of food.

Up to the present time there has been no great influx of persons from abroad; and the gradual developement of the richness of the Gold Fields is chiefly due to the inhabitants of the country. Some few have arrived from the United States and the neighboring Provinces; but they are chiefly persons destitute of capital, and without any practical knowledge of mining operations. This, I fear, is likely to produce some discouragement, as many of them will undoubtedly prove unsuccessful, and, returning to their homes, they will spread unfavorable reports of the Gold Fields; while their failure should more properly be ascribed to their own want of capital and skill in obtaining it.

Undoubtedly, some of the quartz leads are not productive; but this has been the case in all quartz mining, and it is not every one who handles the shovel and the pick who will make his fortune; but it is equally certain that a large number of the quartz veins are rich in gold, and will pay handsomely for working, provided skill, capital, and labor are combined in

seeking for it.

Since writing the above, considerable excitement has been caused by the success of the Chebucto Company on the Laidlaw diggings, \$4000 worth of rough gold having been taken out of their claim in one day; this success will, I doubt not, give a stimulus to the gold diggings, and will probably

induce an influx of people from abroad.

For persons of small means wishing to emigrate to the gold fields of Nova Scotia, my own belief is that they would be more likely to succeed by combining in companies of from 8 to 12, and working together on one common claim, which would preclude the necessity of hiring labor. They should, however, not have less than £40 or £50 a piece after paying the expenses of their passage out.

It should be borne in mind that unless a claim is thoroughly opened before the month of December it would be impossible to work it during the winter, and no other work can be obtained at that season of the year.

The work is very severe, and it may be thought that the rate of wages as compared with those in Australia is small, but the difference is fully made up by the cheapness of living in this country.

I have, &c.,

(Signed)

MULGRAVE:

His Grace

THE DUKE OF NEWCASTLE, &c. &c.

#### REPORT.

Chief Gold Commissioner's Office, Halifax, January 23, 1863.

TO THE HONORABLE THE PROVINCIAL SECRETARY:

SIR.—I have the honor to submit, for the information of His Excellency the Lieutenant-Governor, the following report in reference to mining operations in the several Gold Fields of this Province, during that part of the past year, more especially, in which these operations have been regulated by the provisions of the Act passed during the last Session of the Provincial Legislature.

By the Act referred to, "All rules, regulations and orders of Council relating to the Gold Fields of Nova Scotia," were superceded, and a basis laid by the Act for their future management. In the administration of this Act, however, a vast amount of preliminary proceedings had to be taken, in reference to the limits of the several Gold Districts necessary to be proclaimed, the preparation of reports and plans respecting private lands required for mining purposes, with a view to ordering their re-vestment in the crown, and for ultimately settling the rate of compensation to

be paid to the proprietors.

It became, therefore, indispensably necessary, upon my appointment to office, that I should immediately make a personal visit to the several localities where mining for Gold was in operation. In making this tour, in which I had the advantage of your counsel and assistance, much valuable information was obtained. A personal acquaintance was made with the officers in charge of the several districts. Negociations were commenced, and, in many instances, amicably completed, with the proprietors of the land requived for mining purposes; and arrangements were made for the construction of the necessary roads—so far, at least, as the funds probably forthcoming from the revenues of the mines in the respective districts would warrant.

No time was lost in taking the requisite steps in order to the proclamation of such Gold Districts as it was thought necessary to lay off; and accordingly, at the earliest period possible, the following were proclaimed, viz.: Tangier. Waverly, Oldham and Lawrencetown in the County of Halifax: Wine Harbor. Sherbrooke and Stormont. in the County of Guysborough; Ovens, in the County of Lunenburg; and Renfrew, in the County of Hants.

Before entering into a statement of the results of the Gold Mining operations of the past year in this Province, I would invite attention to the

characteristic features of these districts.

The following general discriptions are chiefly compiled from the reports of the Deputy Gold Commissioners, furnished under instructions from this office. Though these are unavoidably, very imperfect, it is hoped they will afford useful and interesting information. And it is but justice to those officers to say, that they have exerted themselves in a most commendable degree, and have spared no pains in obtaining the information required of them, for the purpose of illustrating the natural features of the districts under their charge.

In the monthly statistical returns furnished by each Deputy Commissioner, information has been obtained in reference to the number of men employed on the mines, the quantities of quartz raised and crushed, and the average yield of Gold per ton of quartz, which is of great importance to the practical miners in the several districts; and yet, such information might lead to mistakes, if viewed as indicating the value of our Gold Fields. The value of an auriferous quartz lead depends not only upon the yield of Gold.

per ton, but very much upon the cost per ton of raising it. The yield of gold per ton may be relatively very high, and the vein so thin as to render the working of it unprofitable; and again, a very low yield per ton may be highly profitable, if the quartz vein is thick and easily worked. It is therefore presumed, that the following account of the different gold districts, will afford some guide to the mining public in this respect, and form the basis for more complete descriptions hereafter.

## TANGIER.

The earliest discovery of gold in the Province, made known to the public, occurred during the summer of 1860, at a spot about twelve miles north from the head of the Tangier Harbor, on the north-east branch of the Tangier river. The discoverer. John Pulsiver, of Musquodoboit, was induced, from what he had heard of the gold-bearing quartz of California, to search for the same substance amongst the rocks on the upper waters of the Tangier river; and, while in company with some Indians whom he had hired, Mr. Pulsiver, found several pieces of gold in quartz, in a brook at a place now known as the Mooseland Diggings. This discovery being known, a number of persons gathered to the spot from various parts of the Province, during the summer and the succeeding autumn, for the purpose of prospecting; but gold not being found in remunerative quantity, the place was abandoned before the close of the year.

In the month of October of the same year, Peter Mason, a fisherman and landowner near the head of the Tangier Harbor, was passing through the woods, about half a mile from his own residence and on his own land. He stooped to drink at a small brook, noticed a particle of shining yellow metal in a piece of quartz, which was there very abundant, and having picked it up and examined it, he concluded, from what he had heard of the discovery of gold up the river, that he also had found the precious metal. Upon this fact becoming known, a number of the inhabitants in the vicinity of Tangier flocked to the locality, and commenced a search for the supposed source from which the specimen had been derived. Owing to the ground being frozen, and Mr. Mason's unwillingness to allow any one to prospect on his land, but little was done towards discovering any further

evidence of the existence of gold, until April following.

On the 11th of April, 1861, pursuant to instructions received, William Anderson, Esq., Deputy Surveyor, proceeded to Tangier, and formally took possession of the District on behalf of the Government, and immediately commenced laying off mining lots of 1,000 square feet, measuring fifty feet across and twenty feet along the supposed course of the leads. Nearly one hundred of these lots were soon leased, at the rate of \$20 annual rent, paid in advance; and in a short time some six hundred men were actively engaged on the ground, in the operations of prospecting and mining for gold. The reported success which numbers immediately met with, occasioned a continued increase in the work; until the discoveries made in other parts of the Province were the means of attracting large parties thither.

The average number of miners employed in this district during the

quarter ended 31st December, is about 70.

There are at Tangier about twelve distinct quartz leads, actually proved to be auriferous, varying in thickness from three inches to three feet; the most valuable of which are supposed to be the South, Leary, and Nigger leads.

The South lead consists of two distinct veins,—the larger being from four to six inches, and the smaller from two to three inches in thickness. They have been traced about 1,500 feet; and a number of shafts have been sunk on both veins, nine of which have been pretty constantly worked since the first discovery. These vary in depth from sixty to ninety-five feet. Several shafts, commenced on these veins, although yielding well, have been abandoned, in consequence of there being no regulations to compel a proper system of work and drainage.

The working of this lead has been quite remunerative. The yield per ton is from half an ounce to six oz.; and Mr. Anderson says: "I may safely average the yield at 3 oz. 7 dwt. per ton." The veins increase in richness as they descend.

The larger of the two veins has a much more rapid underlie than the smaller, and although fifteen feet apart at the surface, they are found at a depth of S1 feet, only four feet apart. The quartz of both veins has a highly transparent appearance, and contains much iron pyrites; native copper, and

arsenical pyrites also occur.

The "Nigger" lead has been traced upwards of 2,500 feet, and ranges from 10 to 14 inches in thickness. The deepest sinking is upwards of 60 feet, and is the only deep shaft on the vein. For the depth of 40 feet it is nearly vertical. Below the depth of 50 feet there is a very rapid underlie.

The finest specimens of Gold yet found in the district, or perhaps in the Province, have been taken from this vein, several having been sold for upwards of \$100; but much of the quartz taken from it has not yielded sufficient to pay the expense of mining and the cost of crushing. It should be stated, however, that it was principally obtained from near the surface. Several tons taken from the deepest working shew heavy nuggets, and are expected, when crushed, to prove highly remunerative. Six tons raised from another shaft, at the depth of 22 feet, yielded 1 oz. 6 dwts, per ton. The quartz is highly crystalized, and contains much iron pyrites, calc spar, carbonate of iron, and, near the surface, oxide of iron.

The Leary lead has been traced upwards of a thousand feet, and has been worked on the whole of that distance. It is from 5 to 7 inches thick, the deepest sinking is about 50 feet, and for that distance it is vertical. The

average yield may be estimated at 1 oz. 11 dwt. per ton.

The Wallace lead at Strawberry Hill consists of two veins, of ten and five inches, respectively, in thickness, and are separated by about 4 feet of intervening rock. The veins are nearly vertical. At a depth 15 feet a yield of 1 oz. 5 dwts. per ton was obtained, while that from the surface yielded little.

At Mooseland, where the first discovery, as before stated, occurred, a company has carried on operations during the past summer, which have partially resulted in the development of that locality. Numerous leads, from 3 inches to 2 feet in thickness, have been exposed by open trenches, but no sinkings have been made.

No correct estimate of the yield of Gold at Mooseland can be furnished, owing to the unsuccessful working of the company's crushing mill. Some tine specimens of Gold have, however, been obtained. The difficulty of access to this section of the district, from the want of roads, has prevented its re-

sources being fairly investigated.

By the table compiled from the Deputy Commissioner's return, it appears that from 707 tons of quartz crushed during the past year, 865 oz. of Gold were obtained, being an average of about 1.22 oz. per ton. The Commissioner remarks, however, "that this is below the real yield, as much visible gold is usually removed by the miners from the quartz before it is sent to the crusher, and no satisfactory account of this can be obtained. Some of the richest of the quartz is hand-mortared;" and he gives it as his opinion that in estimating the quantity of gold obtained, "one third ought to be added to the whole of what has been crushed at the mills now in operation."

By adding one sixth to the quantity reported, the amount obtained would be over 1000 oz., and this would give an average of more than 12 oz. per

miner engaged in the district throughout the year.

#### WINE HARBOR.

Gold was first discovered in this district by Joseph Smith, in the latter part of July, 1860, at or near the Barasois, on the southwest side of Indiana Harbor, at the point where the "Barasois Lead," touches the shore

at which place he found a few small specks of gold in the sand. In the latter part of the month of July in the following year, while prospecting on the north-eastern shore of Wine Harbor, he found a small piece of gold-bearing quartz in front of what was allotted to him as his free claim, which led to the discovery of the "Smith Lead."

The number of prospectors on the ground from that time rapidly increased, and, on the 26th of September, 200 men were at work on the spot, at which time the locality was formally taken possession of by the Government, and placed in charge of a Deputy Surveyor, under similar regulations to those

adopted at Tangier.

The leads, which have actually proved auriferous in this district are seven in number, and are denominated the "Smith," "Middle," "Major Norton," "Barasois," "Halliday," "Wiscassett." and "Gillespie" Leads. Mining operations have, however, been principally confined to the Smith and Middle Leads.

The Smith Lead, from which the largest quantity of Gold has been obtained, comprehends at the surface five veins of quartz, from one to three inches in thickness, and from three to six inches apart, running in a band of slate about three teet thick, and quite soft, with hard whinstone on each side; but at the depth of fifty feet, which is the deepest sinking on the lead, the slate has nearly disappeared, and the whinstone becomes much harder,—and here there are seven veins of about the same size as at the surface. richest quartz taken out of this lead was at the depth of thirty feet, where its average yield is six ounces to the ton. Five tons from the Hattie claim The average yield at fifty feet is about 3 ounces. It dips to gave 125 oz. the south at the surface, about one foot in ten, and at a depth of fifty feet it is nearly vertical, or one foot in twenty. In area No. 24, Block B, from a distance of 200 feet east from the free claim, it sinks at the rate of about one foot in eight, and does not re-appear on the surface within a distance of 1,000 feet, neither has it been struck within that space. It seems also to sink in the same manner from a point 400 feet west of the free claim.

The "Middle Lead" may be considered second in quality, and contains from three to five veins of quartz, from one to four inches thick, from two to twelve inches apart, running in whinstone, with the exception of the largest one, which has a band of slate six inches thick on its south side. The deepest shaft on this lead is 48 feet, where the quartz yields 2½ oz. per ton, which is

richer than at the surface.

The "Major Norton" lead is about two feet thick, and does not appear to be rich at the surface. A few tons of the quartz have been crushed, but have only yielded three or four dwts. per ton. A number of veins run near the main lead, and on each side of it, varying in thickness from one to ten inches, which are rich in ores generally found in auriferous quartz, but have not been tested.

The Barasois lead contains twelve veins of quartz, varying from one to ten inches in thickness, and from one inch to three feet apart, running through bands of slate and whinstone. This lead has not been sufficiently tested to prove its value. A few tons taken from the surface yielded 15 dwts. per ton.

The Halliday lead contains four veins of quartz, from one to four inches thick, and from two to fifteen inches apart, running on each side of a band of slate, fifteen inches thick. Two sinkings of fifteen feet have been made on this lead. Only two of the veins have been found auriferous, and these

not sufficiently so to be remunerative.

The Wiscassett Lead comprehends seven veins of quartz, from one to four inches thick, and from one to six inches apart, running through a band of slate four feet in width. The deepest sinking is thirty feet, at which depth the yield is 12 oz. per ton. The slate, quartz and dirt from the surface of this lead, when crushed, yielded nearly half an ounce per ton.

The "Gillespie Lead" contains six veins of quartz from one to six inchest thick, and from three to six inches apart, running through bands of slate and whinstone. This lead was but recently discovered. The slate, quartz

2

and dirt from the surface of this lead, yielded 5 dwts. per ton. No sinking has been made on it.

The dip of the strata in this district is generally one foot in twenty to the south. The Wiscassett Lead is nearly vertical, or about six inches in twenty feet. The course of the leads would appear to be from south 63° to 65° east. In general, they crop out at the surface about the distance of three hundred feet, and then sink both to the east and west.

#### SHERBROOKE.

The discovery of gold in this district occurred under the following circumstances:

In the summer of 1861, Nelson Nickerson, of Sherbrooke, having, by a visit to Tangier, gained the information necessary to enable him to distinguish quartz from other rocks, returned home, and, while engaged in making hay in a small meadow about a mile and a-half west of the northwest arm of the St. Mary's River, he noticed quartz rocks scattered over the land in different places, that had become exposed to view by the action of extensive fires which had raged through the forests at different times within the previous twenty years. By examining and breaking quartz he found gold, and was so much encouraged by the quantity thus obtained, that it became the principal business of himself and family for some time, which, however, they managed to keep secret.

About the first of October his neighbors began to suspect that he was obtaining the precious metal somewhere in the forest. He and his family were closely watched, in their movements, from that time, until about the fifteenth of the month, when he was discovered, by the sound of his hammer. On the 18th of October, 1861, when this fact became generally known, over two hundred men assembled on the ground, who on that day, as is generally supposed, obtained gold by breaking quartz to the amount of \$400 worth.

A surveyor was immediately sent to the ground, with instructions to lay off areas and receive applications for leases, and in a short time active mining operations were in progress. Previous to the first of March, 1862, the number of applications for leases of mining areas, of various sizes, but principally for class No. 1, was 69; during the month of March, 116; in April, 207; and since that time to the end of the year, 88; or 480 in all.

The Deputy Commissioner remarks, "Many of the areas were taken up by parties on speculation, and never worked; some by persons who, on working a week or a month or two, exhausted their means, and not having obtained gold, abandoned the mines, and circulated injurious reports in reference to them. Others, who had the energy and capital to continue their operations, are generally doing well, and some of them are making fortunes.

The number of the principal distinct quartz leads in this district, the depth to which each has been mined, the maximum and average yield of

gold per ton, are exhibited in the following table:

Name of Lead.	Depth of Sink- ing.	Maximum yield of gold.	Average yield of gold.
Cumminger	20 feet.	2t oz.	11 oz.
Aikens	30 "	7 "	11 "
Hayden	30 "	7 "	3½ "
Drysdale	30 "	8 "	24 "
McKay	32 "	7 "	43 "
Blue	40 "	9} "	48 "
Hewitt	60 "	12 "	4.6

The Hewitt lead is about vertical, others dip at different angles, some south and others to the north. The Bue lead dips northerly. It has been traced on the surface over 400 rods, and its general course is south 75° east.

The following additional information in reference to the auriferous quartz leads in this gold field will enable the practical miner to form an estimate of their value.

The Cumminger lead varies from one foot to two feet in thickness, having a band of slate six feet thick on its northern side, and a dip of 45° north. The north side of the lead yields from one to three ounces of gold, and the south side about five dwts. per ton of quartz.

The Hayden lead consists of a number of small veins running closely

together, varying from one to four inches in thickness.

Aikins' lead is from two to three inches thick—dip nearly vertical.

Drysdale lead is thin at the surface, not being over half an inch; but at a

depth of about fifteen feet it is six inches thick—dip nearly vertical.

McKay lead has a dip of 50° south, and in the Oriental Company's claim varies from three to six inches in thickness, while on the adjoining claim to the west it shows a thickness of one foot. Powerful water pumps are required to keep the shafts in this lead clear of water, as the rock is much shattered and the water flows through it too freely.

Blue lead.—Some workings on this lead have been highly remunerative. The quartz, as the name indicates, is of a deep blue color, and the lead dips 40° north, having a band of soft slate on its north side, and varies in thickness from four inches to one foot. The quartz obtained from some of the

sinkings has yielded little.

The Hewett lead is composed of two veins, separated by a thin seam of slate. The larger vein is denominated barren, as the yield from it is not over six dwts. per ton, and is one foot thick. The smaller one varies from three inches to six inches in thickness. The Hewitt claim on this lead has produced more profitable returns than any either to the east or west of it. Its position is vertical.

The leads worked in this field, in general, increase in thickness with the depth; but it cannot be said that the quartz increases in richness as the depth increases. But, in general, where gold is found in a lead at the surface, it is also found equally distributed to the depth as yet mined; and

where it does not exist on the surface, it is seldom found below-

#### ISAAC'S HARBOR, STORMONT DISTRICT.

Gold was first discovered at Isaac's Harbor on the 14th day of September. 1861, by Joseph Hynes, under the following circumstances: A young man by the name of Elias Cook had been at Wine Harbor mining, a short time previously, and had obtained some specimens of gold-bearing quartz. On his return to Isaac's Harbor he observed a similarity in the rocks of the latter place to those of Wine Harbor, and, in company with Allan McMillan, commenced a search for gold, but found none. At length Cook dropped one of the Wine Harbor specimens, and McMillan, in searching, picked it up. They immediately returned home with the exciting intelligence that they had discovered gold, upon which a number of the inhabitants at once repaired to the spot; but after a fruitless search of several hours, returned disappointed. Joseph Hynes, however, on the afternoon of the same day, resumed the work of prospecting, and on what is now called the "Free Claim," in the west division, obtained several fine specimens of auriferous quartz. On the same evening, John Latham and others found several pieces of gold-bearing quartz from the Burke Lead.

In the east division the first discovery of gold was made by two Indians, on what is now called the "Mulgrave Lead," a short time after the discov-

ery on the west side.

At Isaac's Harbor the Mulgrave Lead stands first in importance as being the most highly remunerative. It is characterised as being richest at or near the surface. Fifteen shafts have been surk on this lead, varying in

depth from fifteen to sixty feet; and the result invariably shows that beyond the depth of fifteen feet the lead diminishes in thickness, and the quartz rapidly deteriorates in quality, and soon becomes entirely destitute of gold. Hopes are entertained, however, that deeper mining will develope an increased thickness of the lead, and a richer quality of quartz. In Gallagher's pit, where the greatest depth has been attained, viz., sixty feet, there are at the bottom five small leads, all converging to the main lead, at an angle which will unite them with the main one, at about seventy feet from the surface; and it is supposed that at the junction the lead will be increased in dimensions, and the quality of the quartz greatly improved. This supposition is founded on the fact that in a few of the other claims similar small leads have appeared after the large one had become diminished in size, and inferior in quality; and in every case after the lesser junction of the leads with the main one, the lead has improved. The average yield from this lead is 1 oz. 13 dwts., and the largest 5 oz. 6 dwts. of gold, per ton of quartz.

VICTORIA LEAD.—This lead consits of one main lead; and in some places two, and in others three, minor leads. These minor leads are arranged vertically, and therefore do not unite with the main one. Three shafts only have been sunk, and these exhibit the main lead as varying in thickness from four inces to two feet. The several veins are all gold-bearing, except in the claim located below high water mark, in which but one is auriferous; and there appears to be no diminution in their thickness, or the richness of the quartz, at the depth of forty feet, which is the deepest sinking on the lead. The average yield from this lead is 1 oz. 7 dwts., and the greatest 2 oz. 12 dwts., per ton. .

Burke Lead. West Division.—This lead, so far as can be ascertained from the limited extent to which it has been mined, presents irregularities not seen in either of the above described. In the shafts that have been sunk, the lead is found to extend but a few feet in a horizontal direction, when it terminates abruptly, and is only found again several feet in advance of the point at which it ceased. Three shafts have been sunk on this lead, in one of which it has not been discovered. In the others it was found at the surface, and proved rich to the depth of ten feet, below which it diminished in thickness, and the quartz gradually became inferior in quality, until at thirty feet .- the greatest depth attained, - it was found to be wholly unproductive of gold. The average yield from this lead is two oz., and the greatest 61 oz., per ton.

France Lead.—On this but one claim has been opened, in which the lead was discovered at about eight feet from the surface of the rock. Its aspect is entirely different from that of any other lead in this district. It spreads out horizontally, and presents a succession of gentle elevations and depressions, which give it an undulating appearance. Although the tunnels now working in this claim is about twelve feet wide, it does not embrace the lead in its horizontal breadth, which is therefore unknown. Forty tons of quartz from this claim yielded one hundred and twenty oz. of gold.

From the foregoing description of the several leads, it will be seen that in all except the Victoria lead, the result of mining operations seem to shew a diminution in the value of the quartz as the depth increases; and yet some of the deeper shafts afford indications of a richer quality of quartz at

a greater depth than has yet been attained.

# COUNTRY HARBOR, STORMONT DISTRICT.

Although mining operations were carried on to some extent during the early part of the season in this locality, they are now entirely suspended until the return of the spring, when it is the intention of a number of the parties holding mining areas to commence work again. There are hereign

•

number of quartz leads which have been proved auriferous, varying from one to ten inches in thickness.—Mining has principally been carried on in this district on a cliff that rises to some height on the eastern side of the river, which empties into the harbor. Numerous quartz veins crop out on this cliff. Two tons and a quarter of quartz taken from one of them—three inches in thickness—and from which the best "sights" had been culled, yielded 11 oz. 2 dwts. of gold.

The course of the leads at Country Harbor vary largely from that of any other worked in the Province, those cropping out at the water level having a course of N. 32° W. and that of the leads on the height being about

N. 52° W.

The mines are advantageously situated, being near the head of a good harbor, and will, very probably, in the course of another season, attract more attention than hitherto. A crushing machine has been erected in the vicinity of the mines, and upwards of thirty areas of class number one have been leased.

#### RENFREW.

The discovery of Gold at Tangier, Lunenburg and Waverley, induced several of the inhabitants of the Nine Mile River Settlement, to make explorations among the rocky barrens in their neighborhood. Quarts veins were discovered in the summer of 1861, by John McPhee, near William Thompson's mill; but the discoverer, probably from the want of experience, does not appear to have found gold. Towards autumn, William Thompson accidently found small particles of gold in a piece of loose quartz in the bed of the brook near his mill. This discovery, although made public, attracted very little attention at the time. Towards the end of April, 1862, Andrew Parker, who was attending Thompson's mill, noticed that a small vein of quartz on the bank of the brook contained gold in unusual quantity. news soon spread through the adjacent settlements and elsewhere, and a few days afterwards a rich lead was found on a brook about a half mile distant from the first discovery. A rush of gold seekers took place, and on the 20th day of April arrangements were made with the proprietors of the It was proclaimed a land to allow mining areas to be laid off and leased. gold district without delay, and Renfrew immediately became the scene of active prospecting and mining operations. In a few months three crushing machines were in the course of construction, and, by the first of November, two were in operation, and a fourth is now being erected.

The auriferous quartz leads in this district may be described as follows:
1st. The "Free Claim Leads" are two in number; their course appear to
be nearly east and west, but have only been traced across two areas; one is
two inches and the other is five inches thick. The quartz of the former is
much the richest. A yield of 73 oz. 4 dwts. was obtained from 17 tons, 12

cwt. of quartz taken from these leads. At the depth of 40 feet the larger lead disappeared.

2nd. On the ninth range of areas a lead exists which varies in thickness from S inches to a foot. The deepest sinking on it is 9 feet. It dips 75° south; and the maximum yield from it is 4 dwts. per ton.

3rd. A lead from 14 to 20 inches thick passes through the tenth range of lots. From a shaft 18 feet in depth on this lead, 22 tons of quartz were taken, which yielded 27 oz. of gold. A ton from another pit yielded 19 dwts.

4th. Another lead, one foot thick, runs through the eleventh range. A small yield was obtained from a ton of quartz taken from a sinking of 20 feet on this lead.

5th. Area No. 343, on the Preeper lead, is one of the richest hitherto worked in the Province. From a trench 80 feet in length; and from 6 to 8 feet deep, 83 tons of quartz were taken, which yielded 180 oz. of gold. It appears to have been disturbed near the Preeper claim, as its course there is about S. 85° E.; while the uniform course of the adjacent leads is about N. 80 E. This lead has not been discovered west of area No. 342 and a

lead found to the east in the line of its course is quite different in appear-

ance, and yields but little gold.

6th. The Shubenacadie lead, which varies from 6 to 9 inches in thickness, has produced the best sights and specimens found in the districts. Thirteen and a half tons, taken from a shaft ten feet deep on this lead, yielded 11 oz., four ounces of which were obtained from specimens when mining.

7th. There are a number of other leads in this district, which have actually proved auriferous, some of which are of such recent discovery that the quartz has not been tested, but which promise to be highly remunerative. Ten tons of quartz, taken from the Hay lead, which is about 6 inches thick, is

supposed to have yielded over an ounce per ton.

From the manner in which mining operations have been conducted at Renfrew, no evidence is furnished in support of the theory that quartz veins become richer as the depth increases. No care has been observed by the miners in keeping the quartz, taken from the surface, and that from the bottom of the shafts, separate. They have crushed all together, and have

no knowledge of which has been the more productive.

In reference to the profits derived from mining in this district, during the past season, the Deputy Commissioner remarks—"The past affords little to encourage the laborer, the small farmer, or the mechanic, to engage in gold mining on his own account. In not more than five cases has the expenditure, probably, been paid, even at a moderate rate for labor, by the gold procured. Even those whose claims have yielded moderately well, find, when the time spent in prospecting, the expense of erecting a log house, and mining a few tons of quartz, is taken into account, that the expenditure is more than they can expect to obtain from the yield of the quartz after paying the cost of crushing. Operations are then suspended, the miner being afraid, and perhaps unable, to expend more, but still unwilling to surrender his claim. Such is the position of many of the lessees of mining areas in this district."

I may add that the above remarks are equally applicable to all the other

gold districts.

#### OLDHAM.

The discovery of gold in this field, illustrates the manner in which similar discoveries have been made in various other districts. The information respecting the gold regions of Australia and California, brought home by such of our people as had returned from those countries, was, in many instances, the real cause which led to searching for gold in this Province. It being made known that in Australia gold was found in rocks similar to those of the metaphorphosed district of Nova Scotia, attention was turned to these.

and the discovery of gold in our quartz veins was the result.

In the spring of 1861, when public attention throughout the Province was excited by the confirmation of the report of the discovery of gold at Tangier, two men. Edward Horne, of Elmsdale, and Samuel Isner, of Gay's River, who had, in their hunting excursions, observed a large boulder of white quartz in a densely wooded tract, about three miles east from the Truro road, determined to examine it, for the purpose of ascertaining whether it contained gold. Having procured the assistance of some friends, they proceeded to the spot, and commenced operations, which resulted infinding some small sights; but as none of the party had ever seen gold in quartz before, they were doubtful as to whether what they saw was in reality the sought-for metal, until some time after, when examined by parties having experience in gold seeking, who pronounced it genuine. The report of the above parties' operations becoming public, several persons commenced prospecting in the neighborhood.

Amos Hough found gold, about the 1st of September, in a brook about a mile and a-half south-westerly from the first discovery; and at the same time, it was found a mile east from Hough's diggings, by Edward.

McDonald and Donald McKenzic, who brought it to the notice of the Government; and, after an investigation, the free claim was awarded to Isner and Horne.

During the winter of 1861-62 mining leases were applied for in the district. Areas were laid off, and on the 25th day of April, 1862, the Commissioner gave formal possession to the applicants of the areas applied and

paid for.

The auriferous lead of quartz in this district are not known by any distinctive names, but generally by the number of the principal areas through which they run. The leads which have proved to be gold-bearing, are thus distinguished in the following table:

No. of area through which the lead runs.	Thickness of lead.	Depth of sinking.	Maximum yield per ton.	Average yield per ton.	
No. 366	5 to 6 inhes.	23 feet.	0oz. 19 dwts.	0 oz. 11 dwts.	
" 1	2 leads each 12 in.	12 "	1 5	0 10	
" <b>108</b>	15 inches.	6 "	Not known.	••• •••••	
" 113	9 "	11 "	ii ii .	••••••	
" 106	2 leads each 6 in.	8 "	"		
" 105	2 inches.	23 "	1 14	1 5	
" 117	6 to 10 inches.	10 "	1 0	1 0	
" 314	6 inches.	8 ".	1 10	1 0	

By the foregoing statement it appears that mining in this district has as yet been conducted to a very limited extent, the deepest sinking being only twenty-three feet. The average yield is low; but it should be remarked that the richest quartz has invariably been obtained from the deepest part of the shafts.

The lead which passes through area 108 is perpendicular, and is probably in the vicinity of an anticinial axis, as the leads lying south of it dip about 80° south, while those north have a northern dip about the same angle.

The general course of the leads at Oldham is N. 82° E.

The "Barrel Lead," so called, on account of its waved or ribbed shape, and which runs through area 314, has the richest uniform yield, the lowest being 14 dwts. and the highest 1 oz. 10 dwts. to the ton. The deepest sinking on this lead is eighty feet. It varies in its course, and has a dip of 60° N:

#### OVENS.

The first discovery of gold in this district was made by James Dowling, Esq. on the 13th day of June, 1861, in a vein of quartz three-quarters of an inch thick, on the promonotary called the Bluff, under which the caves called the "Ovens" are formed.

In the following month John Campbell, by making search, discovered gold on the shore among the sand, and from this source the greater part of

the gold obtained in this district has been procured.

Quartz mining at the "Ovens" has hitherto been unsuccessful. The indispensable necessity in this description of mining—efficient crushing and amalgamating machinery—has not as yet been supplied to the satisfaction of the miners.

The leads of quartz at the surface are generally small, being composed or

a number of very thin veins. The quartz, although reported to have proved in numerous instances highly auriferous by hand mortaring, has not been known to yield gold in paying quantities when subjected to the crushing machine.

Some three or four areas are still being worked, and it is hoped, from the latest account of the operations, that in the ensuing spring a revival of the business will take place. The deepest sinking in the mines is thirty-three feet, none other being deeper than twenty-three. The leads increase in size, and are reported to increase in richness also, as the depth increases. Veins, which were but three-quarters of an inch at the surface, have, at a

depth of twenty feet, increased to a thickness of five inches.

The alluvial washings on the shore, although, to a great extent, exhausted in the summer of 1861, have, in general, been remunerative in 1862. The quantity of gold reported to be obtained gives a slight average over an ounce per month to the miners employed; and it may be assumed that this is rather under than over the amount procured. The Deputy Commissioner estimates the whole quantity of gold obtained from the shore washings, since its discovery up to the end of the year, at two thousand ounces.

#### WAVERLEY.

This district is separated into two divisions by the Shubenacadie chain of lakes, which are known as the cast and west divisions.

The first discovery of gold in this district, brought to the notice of the public, was made by Alexander Taylor, on the 23rd of August, 1861, in the west division, on the eastern edge of Muddy Pond, on the Waverley farm, the property of the late Charles P. Allen. The specimens obtained during two days' search—broken from surface boulders lying about the same spotwere sold in Halifax for \$80.

From the proximity of this place to the city, a large number of people were immediately upon the ground, and a number of claims were applied for. A movement was at this time made, by several merchants of the city, to form an association to prospect this and other districts, on a larger scale than had up to this time been done, and arrangements were made by which the Association obtained the privilege of search on the Waverly farm until the first of May, but were not successful in the discovery of any sufficiently auriforous quartz lodes to warrant the taking up of any large area.

On the first of May a vein of gold-bearing quartz was exposed by the original discoverer, at the place where the first specimens were found, and in ten days new applications were made for over fifty areas of class number.

one.

Though as many as a hundred areas of class number one had been leased up to the 31st of December last, very little work had been done in prospecting this division of the district.

The principal lead is that known as the Taylor vein, which was first found in the free claim, selected by Alexander Taylor as discoverer. In it a shaft has been sunk to a depth of forty feet, which embraces the Taylor vein, and another three feet to the north. The great body of the quartz raised has, however, been taken from an open trench; the quantity crushed up to the end of the year was thirty-six tons, and yielded six'y-four ounces of gold. The Taylor vein is from ten to twelve inches thick, and has a dip to the north of one in five. Gold, in small nuggets, shows frequently in this vein, as much as thirteen ounces having been broken out by hand in raising the quartz crushed. I, however, think this yield too high to be taken as an average. Only a small portion of the quartz from the north leads above referred to, has been taken out, the yield from it having been found insufficient to pay cost of crushing.

On the claim east of the free claim two shafts have been sunk on the Taylor vein, one ninety feet, the other twenty feet, deep. The yield from these has has not been quite so large as from the free claim, but the last quantity crushed gave nearly one and a quarter ounces to the ton.

The rock between these leads and south of the principal lead is a hard slate, that to north of the north lead is a blue quartzite.

Several other gold-bearing leads have been found on these areas, but they

have not been sufficiently tested.

The area, next adjoining on the south, belonging to the Wolfville Company has lately been opened, and several veins discovered, the principal of which is 7 inches thick, and 18 tons of quartz from it has yielded 26 ounces. The dip of this vein so far as exposed, is much greater than on the Taylor

lead, being nearly one to one.

The Nova Scotia Gold Company's operations, on the same ridge of ground, on the side of Lake Thomas, though so far not very extensive, have been conducted in a skilful manner, and have resulted in the discovery of a large number of veins, all of which have more or less proved auriferous. In a width of about 80 feet, in which several drifts have been run, over twenty veins, varying from 3 inches to 18 inches, have been exposed. No fair test has yet been made of the quartz obtained from these veins. This Company now holds in one block an area of about 40 acres, and arrangements are being made to have the same thoroughly tested.

Some prospecting has been done on the west side of Muddy Pond by several parties, but no veins of any consequence have yet been discovered. The general course of the veins in this division is north 74° 48' east. The quartz crushed from this division, up to the end of the year, was one hundred and forty-nine tons, which yielded one hundred and forty-seven

eunces of gold.

Gold was first discovered in the eastern district by James Skerry, on the 14th of September, 1861, on that high ridge of land on the east side of the main post road leading to Truro, known as Laidlaw's Hill, immediately opposite and within three quarters of a mile of the place where the discovery was made in the western division. The attention of the discoverer was first attracted by some loose boulders, which, on being broken, gave sights of gold. These boulders were imbedded in gravel, which at this spot was about three feet deep. On clearing this gravel away, there appeared what at first was supposed to be a very thick vein of quartz. A width of about six feet was exposed, and in breaking up the quartz—which at this point was very rich—that peculiar barrel formation, so called, which has since excited so much curiosity, was disclosed:

I cannot better convey an idea of the appearance of this formation, than by the following quotation from an able paper on Gold Mining and Gold Discoveries, read before the Society of Arts by J. Arthur Phillips, Esq. F.

C. S. an eminent London engineer:

"The most remarkable deposit of auriferous quartz hitherto found in Nova Scotia is undoubtedly that of Laidlaw's farm. The principal workings are here situated near the summit of a hill composed of hard metamorphic shales, where openings have been made to the depth of some four or five feet upon a nearly horizontal bed of corrugated quartz, of from eight to ten inches in thickness. This auriferous deposit is entirely different from anything I had before seen, and when laid open presents the appearance of trees or logs of wood laid together side by side, after the manner of an American corduroy road.

From this circumstance the miners have applied the name of "barrel quartz" to the formation, which, in many cases, presents an appearance not unlike a series of small casks laid together side by side and end to end.

"The rock covering this remarkable horizontal vein is exceedingly hard, but beneath it, for some little distance, it is softer and somewhat more fissile. The quartz is itself foliated parallel to the line of curvature, and exhibits a

tendency to break in accordance with these striæ.

"The headings, and particularly the upper surface of the corrugations, are generally covered by a thin bark like coating of brown oxide of iron, which is seen frequently to enclose numerous particles of coarse gold, and the quartz in the vicinity of this oxide of iron is itself often highly auriferous."

Mining operations in the barrel formations, so far, have been confined with a slight exception to one range of areas, and these do not in any instance embrace their full width. It has not been found further east than the point of discovery. It has been traced west 800 feet, and along this line it becomes overlaid with rock varying from two to five feet in thickness, and this again is in some places covered with earth to a depth of ten feet. The quartz hitherto raised has been from open cast. Two shafts have been sunk to the north of the small stream running from Lake Willis to Lake William, about 800 feet apart, the upper one to a depth of 36 feet, the lower to a depth of 55 feet, but in neither has the quartz formation, peculiar to this section of the district, been reached, and doubts are entertained as to whether it will be found north of the gully forming the bed of the stream. No means have been used to ascertain how far it extends towards the south.

The general course of the ridge of the "barrel" is north 77° 15' east. About six thousand five hundred and ninety-two tons of this quartz has been raised during the year, 3,592 tons of which have been crushed and yielded 1,360 ounces of gold.

#### LAWRENCETOWN.

The discovery of gold in this district was made in the spring of 1861, by William Crooks, and shortly after the commencement of operations at Tangier, when an undue excitement prevailed throughout the Province in reference to these discoveries, which gave Lawrencetown at that time a prominence that has not been sustained by the results of subsequent operations.

There are several quartz leads in the district, which have proved to be auriferous, varying in size from two to fourteen inches; but, so far, mining

them has not given profitable returns.

There being no Deputy Commissioner in charge of this district, no correct returns of the gold obtained can be procured. At Mr. Teare's crushing machine, one hundred tons of quartz have been crushed, the yield of which cannot be ascertained. One lot of nine hundred pounds yielded four and three-quarter ounces, and the smallest yield was three dwts. to the ton. The quartz crushed at this mill was obtained from forty distinct veins, running through a space of one hundred and fifty feet, every one of which proved auriferous.

The quantity of gold obtained in this district during the year may be

safely estimated at seventy-five ounces.

Placer washing has been tried in this district to some extent. On the slope which rises on the western side of the river to a height of one hundred and fifty feet, the bed rock is covered with from five to twenty feet of gravel and boulder clay. In several places gold was obtained on the surface by washing the gravel, and it was anticipated that richer deposits would be found lying next the bed rock; but these anticipations have not been realized. In every instance the gravel next the surface has been found to contain more gold than that below; and thus, the expectations based upon the results of gold mining in other countries, have been disappointed. Still, it may be said, that although mining operations in this district during the past year have not been profitable, they have not, on the other hand, been conclusive of failure, and it is yet probable that they may be resumed with vigor in the spring.

The distances from, and the means of communication between the several districts and Halifax, may be stated as follows: Tangier, Sherbrooke, Winet Harbor, Isaac's Harbor, and the Ovens are all accessible by water; and between those fields and the capital, sailing vessels run regularly the whole

season from April to Christmas.

Tangier is about fifty miles east of Halifax, either by land or water.

coach runs twice a week to and from this district.

The distance to Sherbrooke by water is about 100 miles, and by land 532 miles by railway, to Brookfield, and thence by coach (twice a week) 833

miles=136 miles in all; or by railway to Truro 61 miles, and thence by

daily coach via New Glasgow 96 miles=157 miles in all.

Wine Harbor mines are situated three miles east from the mouth of St. Mary's River, which is about 90 miles by water from Halifax, and by land they are distant from Sherbrooke 13 miles, and consequently are accessible by the same land routes.

The distance by water to Isaac's Harbor is about 110 miles, and by land about 15 miles further than Sherbrooke, and the same routes by land are available, by leaving the road to the latter place at the Forks, a distance of

10 miles from Sherbrooke and 25 from Isaac's Harbor.

The Ovens' district is distant west from Halifax by water 45 miles, and by land 70. Coaches run to and from it three times a week, and sailing packets at all seasons of the year.

Lawrencetown is 12 miles east from Halifax either by land or water.

Communication by coach twice a week.

The Waverley district is distant from Halifax, by Dartmouth Ferry and post road, 11 miles, and by railway 11 miles to Rocky Lake Station, and thence by coach 2½ miles.

Elmsdale Station, 30 miles by the railway, is distant from the Renfrew diggings about 10 miles, and from Oldham 3 miles. Carriage conveyance from this station or from Horne's Road Station (2 miles nearer Halifax) is

always obtainable to either of the districts.

This, deducted from the above balance, reduces the nett pro-

The receipts from the 1st of January to the 30th of April were paid to the Commissioner of Crown Lands, and amounted to \$11,972 25, and the disbursements made by him during the same period amounted to \$6,301 59. (Appendix A 2.)

It should be borne in mind, however, that the greater portion of instalments, paid as a quarter's rent in 1861, were made by the law to cover the entire rent for a year, and a large proportion of the disbursements made by the Commissioner of Crown Lands in 1862 was for services performed in the previous year.

At the close of 1862 nearly all the accounts against the department were

settled and paid.

The amount paid-proprietors for land in the year was large, amounting to \$9,166 52. The construction of roads formed a large item in the expen-

diture also, being \$4,840 15.

These two services can, under no conceivable circumstances, bear so heavily upon the revenue this year as in the past. And, in reference to the future expenditure on roads in connection with the gold fields, I consider it questionable whether the expense should not be provided for out of the ordinary road grants made to the respective counties in which the gold districts are situated. The opening of these roads have, in several instances, been important county improvements.

No royalty has yet been collected on the gold obtained, neither can it be demanded under the law until the expiration of the first year from the respective dates of the leases, consequently the whole revenue received has been in the shape of rent. By an inspection of the Deputy Commissioners' books a large amount would appear to be due, on account of unpaid rents, but, as a great proportion of this is for unworked areas which although not formally surrendered are virtually abandoned, no safe estimate can be made

as to what portion of these arrears can be collected. The difficulty of collecting rent for unproductive claims has assumed such a form, that it canno longer be a question as to whether the terms of the law should not be largely modified in this respect in favor of the miner. After the expenses of the purchase of lands and surveys are provided for, royalty on the gold obtained is the only source from which revenue should be derived; and, if the Legislature adopt measures by which the collection of royalty will be secured, and abolish the rent, a boon will be conferred upon the miners, and a more

rapid development of the mines will in consequence follow.

In regard to the results of the mining operations of the year, it can at best only be said to have been a year of experiments, and although in many instances large sums have been unprofitably expended, yet, in every district where mining operations have been sufficiently extensive to be considered a fair test, some parties have realized handsome returns for their outlay in the past, and entertain high hopes and expectations in regard to the future: Many, it is true, have learned that it is imprudent to risk their all in the business, when the utmost they can command is a few hundred pounds or perhaps as many dollars. Still, the operations of the past season have decidedly proved that, by the judicious and skilful application of capital in the gold fields of Nova Scotia, fair profits may be anticipated. It is true nothing extraordinary has been discovered; as yet no nugget of great value has been found; but, when the average yield of the quartz obtained from the ordinary leads is 1 oz, 17 dwts. 7 grs. per ton, and we consider the rate of wages, the price of provisions, and of all materials necessary for mining; and, that owing to the geographical position of the country, whatever may be the rush to the gold fields, or the demand for labor, no rise in prices can take place above that of the general markets of the adjacent countries, there can be but little room to doubt that our gold mines will, ere long, become the basis or a new but permanent and profitable branch of industry, and one which will be a durable source of wealth and prosperity to the country.

Although a large number of men were congregated in the several Gold districts in the early part of the season, the number employed in the business has been much reduced during the last five months of the year, since

mining may be said to have assumed a settled shape.

The table (see appendix B 1) compiled from the Deputy Commissioner's returns, shows that the average number of men employed in quartz mining in the districts of Tangier, Wine Harbor, Sherbrooke, Isaac's Harbor, Oldham and Renfrew, during the quarter ending the 31st December, was 4S4: and that, upon the supposition that the quartz raised from the mines during that quarter would give a yield equal to the average obtained from the whole quartz which has been crushed in the respective districts, each; miner's earings, during that period, after deducting \$4 per ton for crushing the quartz, would be \$1.18 per day.

By papers, presented to both Houses of Parliament in Victoria, it appears that the number of miners employed in quartz mining in that colony, in 1860, was 18,296, and the whole produce of their quartz mines for the year was 93.025 oz. 2 dwts. which would give to each miner only 5 ounces:

of gold for the year, or 31 cents per day.

No correct account of the gold, obtained from the mines, can as yet be given, except of that produced from the quartz sent to the crushing mag chines; and as but a small number of these were in operation until the latter part of the year, a large amount of gold was, by various methods extracted from the richest of the quartz, of which no correct account can at present be obtained. おけれたないよりを動

The quantity reported, as the produce of the mines for the year, is 7,110

(See appendix B 2).

This would give 5 oz. per man to 1,400 men for a year's employment, but there has not been over an average of 500 men engaged in mining in our Gold Fields throughout the year. During the first four months the operation tions were quite insignificant, and during the last six the average is only 20

The quantity reported would therefore give an average of more than

oz. to each man for a year's mining, including the labor expended in quartz mining at the "Ovens," which, from the want of machinery for extracting the gold from the quartz, has as yet been unproductive.

It is worthy of notice that the mining operations of the year have been principally conducted by our own people, not over twenty per cent. of those

engaged in the mining have been drawn from other countries.

By a return of the quartz, crushed at the several crushing machines in the various gold districts (see appendix B 3) it appears, that from 2,600 tons of quartz mined from the ordinary leads, 5,230 oz. of gold were obtained, which is an average of 1 oz. 19 dwts. 7 grs. per ton.

It will be noticed that the quartz obtained from Waverly is not included in this calculation. Owing to the peculiar deposit of the auriferous quartz on Laidlaw's farm, in that district the cost of obtaining a ton is much less than from the ordinary leads. By a reference to the table (appendix B1) it will be found, that the average quantity of quartz, raised by a miner in the several districts during the last three months of the year, varied from less than two tons to something more than three, while nine tons of the "barrel" quartz is below the average quantity raised on Laidlaw's farm by each miner per month. As the profits of mining in this locality arise not so much from the richness of the quartz as from the easy means by which it is obtained, it should not therefore be classified with the quartz procured from the ordinary leads, in a statement intended to shew the average of the quartz mined in the other districts.

The want of machinery, for separating the gold from the quartz, was, until a few months ago, very seriously felt in most of the districts. The miner of small means (and by such the greater part of the raining operations for gold have been hitherto carried on) cannot long continue the work without a return for his outlay: and, unless the crushing machine is available, he has no means of extracting from the quartz the gold which it contains. Hence many have been obliged to cease operations, who otherwise might have continued them with profit and success. This want is now to a great extent supplied. By a reference to Appendix B (4), it appears that at the close of the year a number of crushing mills has been erected in every gold district in the Province. There are now in operation thirty, which are estimated to have cost \$107,100 (see Ap. B. 5), and the prospect is, that a considerable number in addition to these will be ready for operation by the opening of the coming spring. It would be too much to say, that all of these machines are efficient; still, the large expenditure made is a guarantee that they will yet be further improved.

#### DISCOVERIES IN 1862.

Although the discoveries of the year have not as yet led to the opening up of any new district, or to extensive mining operations, in any locality not previously reported, with the exception of Renfrew, yet the applications made at this office for free leases, accompanied with notices of new discoveries, prove not only that prospecting parties have been actively engaged, but that gold is extensively diffused over a large portion of the Province.

The following list is taken from the file of applications in this office for free mining leases, on account of discovery of gold, in the counties therein named.

In various other localities, gold is known to have been found during the

past year.

It affords me the highest satisfaction, in closing this report, to be able to bear testimony to the orderly conduct and good behavior of those who have hitherto undertaken to develope the resources of our gold fields. visited every gold district in the Province twice, and, with one or two exceptions, oftener, during the past season; I have seen the miners at work in the shafts and trenches; I have noticed them in going to and returning from their work, at morning, noon and night; I have witnessed their evening sports, after the labors of the day were over, and I have never heard an uncivil word, or observed an unseemly action amongst them. And although the "Act relating to the Gold Fields" authorised the appointment of a bailiff in every gold district, it has not been deemed necessary to make more than three such appointments; and, with one single exception, no service from any of these officers has been required. It is true that in some instances unprincipled parties have been too successful in vending the intoxicating cup, which has caused the ever inseparable and mischievous consequences of such traffic. Yet it may be said that, in general, the respect for law and order, the honest condition and the moral sentiment, which pervades our gold districts, is not surpassed in many of the rural villages of the country.

I have the honor to be, Sir,
Your obedient servant,
SAMUEL CREELMAN.

## MR. CAMPBELL'S REPORT.

Halifax, Nova Scotia, 25th February, 1863.

To the Honorable Joseph Howe,

Provincial Secretary:

SIR,-

I have the honor to submit, in accordance with your instructions, for the information of His Excellency the Lieutenant-Governor, the following report of a mineralogical exploration of certain districts in the eastern section of the Province, including the Cape North district in the Island of

Cape Breton:

In my report of some explorations made during the autumn of 1861, in the Gold Fields on the southern or Atlantic coast of the Province, I endeavored to bring to notice, as prominently as possible, certain conditions of structure or arrangement of the rocks occupying the southern coast, which may serve as an excellent guide in the exploration of the country, if carefully observed. I deemed it important that this should be done, being fully impressed with the conviction that some knowledge of the geological structure of the country is necessary to the successful and rapid development of its mineral wealth; for no other point of its natural history is more intimately connected with the formation and distribution of metalliferous veins and other mineral deposits, than the structure or peculiar arrangement of its strata. In all vertical sections hitherto made out across the rocks of the south or Atlantic coast of the Province, but one line of elevation or anticlinal axis is represented, along the centre of a band of strata over thirty miles in breadth.

If this had, in reality, been the stratigraphical arrangement in the south coast band, there would exist but a poor chance of many of its older strata being brought to the surface in lines of upheaval, along the north coast of the Province, where so great an accumulation of newer schistose rocks and carboniferous rocks has taken place; for such an arrangement as one line of elevation in such a broad band of strata, dipping at an angle of sixty degrees on an average, would necessarily imply a vertical thickness of ten

miles, at least, of beds.

As it is, however, scarcely two miles, in vertical thickness, of beds are brought in section to the surface; for they are brought up in six different

lines of elevation, or anticlinal axes, instead of one.

By referring to the section appended to this report, it will be observed that the clay slate is superimposed on the quartzite as a distinct group, and not interstratified with it in occasional bands as is generally supposed.

The quartzite should be regarded, therefore, as a distinct group also, being the oldest and thickest group of stratified rocks in the Province.

Knowledge of these facts clears away much of the confusion in which the rocks of the south coast seem involved, and it renders exploration for gold, in every part of the Province, much easier and far more certain of success, since gold, in this country, appears to be mainly confined to the quartzite group, and to the lowest members of the clay slate group.

The line along which the section is made out, extends from the sea shore at the south-east entrance of Halifax Harbor, to the Renfrew Gold Field, a distance a little over thirty miles, intersecting, in that distance, no less

than six great anticlinal folds.

Those folds, or lines of elevation, run nearly parallel with each other, from the extreme western coast of the Province to the sea shore between Cape Canso and Liscomb Harbor, where they pass beneath the sea. This is owing to a curving of their course, or strike from east and west to south sixty degrees east. In the western section of the Province they also curve considerably to the south-westward.

It will be observed that they do not lie at equal distances apart, which is due, no doubt, to the fact of the strata being folded up to sharper angles of inclination, or dip, in some of them. This is more particularly noticeable in the second line from the sea shore, that passing through Citadel Hill.

Whether the strata were folded in this manner previous to their being hardened, or solidified, and whether a long period of time was occupied in the process of folding, are important questions, but not easily solved. The evidence, however, seems to preponderate in favor of the supposition that they were folded while undergoing the process of consolidation; and hence the formation of planes of slaty cleavage, and the peculiar grain or reed impressed on the strata, parallel to the direction of the axes of the folds. There is evidence also to show that these impressions were produced in lines horizontal in the direction of the axes of the folds.

This is made sufficiently clear by the exact correspondence of the angle of dip of the fibrous grain with the angle of dip of the arched strata, in the crown of the axes of east and west lines of elevation, where they were broken transversely, and upheaved by north and south lines of disturbance.

Indeed it is mainly by observing the direction in which this fibrous grain of the rocks incline, that the existence and position of transverse, or north and south lines of upheaval, can be made out, when the exposures in which the observations are to be made do not happen to be exactly on the axes of the folds; and the chances of finding such exposures along the axes of the lines of upheaval very seldom occur, because the greater part of the surface of the country is covered by drift.

To find the exact points at which the east and west anticlinal lines are intersected by north and south lines of upheaval, is of the utmost importance, for it is chiefly at such localities that gold-bearing rocks are brought to the surface. This fact is worthy of particular notice, for it indicates, unmistakably, that gold is most abundant in the quartzite group, and in the passage beds from it to the clay slate group. Nor is that the only point, in this connection, deserving the most careful attention; for if is true that gold is most abundant in a zone lying at a great depth from what was the original surface of the clay slate group, previous to their being upheaved, transversely to the east and west parallel folds, and denuded, it follows that, from the axes of north and south lines of clevation, that zone will be found dipping at the same angle as the grain of the rock, either to the eastward or westward.

Therefore the angle at which it must be followed, by drifting, is measurable, and the depth at which it can be reached, at any given distance from the axes of the transverse lines of elevation, is measurable also by carefully observing the angle at which the grain of the rock dips.

The extent of denudation of strata of the clay slate and quartzite groups, in some localities, cannot be estimated at much below a mile and a-half of vertical depth; one-third part, at least, of this depth may be regarded as

poor in gold-bearing quartz.

There must, therefore, be extensive areas between the north and south lines of elevation, comparatively poor in gold. Those barren areas may be almost always known by a greater breadth of the surface being found occupied by clay slate, between the east and west anticlinal lines; and when gold occurs at all, in areas chiefly occupied by the clay slate group; it is necessarily confined to a narrow belt along the east and west anticlinal lines. There is an instance of this at the Ovens Gold Field.

As regards the gold removed from the rocks by denudation, and dispersed through the resulting detritus, it is possible that much of it may yet be discovered, if proper search is made for it, in the direction in which it was

removed from its matrix.

In this country the direction of the denuding force appears to have been from N. 15° W. to S. 15° E. as a mean; there being slight deflections from this course observable in some districts.

That the principal part of this abrasion occurred during the drift or glacial period, does not admit of a doubt; therefore all the gold removed from the rocks must lie somewhere in the direction in which the glacier moved; and this direction can be ascertained, for any particular locality, by observing the direction of the polished grooves and scratches on the surface of the rock in place.

In nearly all deposits of glacial drift, or boulder clay, on the south coast, more or less gold is found; but its economical value is much lessened by its dissemination through tenacious clay—too expensive to work by ordinary means. It is only where the glacial drift has been rearranged that gold

can be found sufficiently concentrated to make it worth working.

The close vicinage to the sea of the gold-bearing rocks of the south coast, renders it most likely that the greater part of the gold removed from the rocks by glacial action, is now dispersed through the submarine banks skirting the southern coast of the Province. Perhaps this is proved sufficiently clear by the fact of gold being largely disseminated through the sands of Sable Island, the only point of those banks above the surface of the sea.

In the northern districts, it is most likely that the greater part of the gold liberated may still be found in the drift lying to the southward of those districts; and its presence in the sands of many of the rivers and brooks in the interior, and along the northern coast of the Province, may be regarded as reliable indications of its existence in some of those localities, both in the rocks and in the glacial drift. Those streams, in the greater part of their course, pass over carboniferous and silurian rocks, in which I failed to discover the existence of any gold; and not having sufficient time for examining the high lands in which they take their rise, I was unable to discover the source from which they obtained it. That they carry it in their drift, from areas in which auriferous strata of the older clay slate and quartzite groups are brought to the surface, is most likely; and that it is obtained there, both from auriferous quartz veins and from glacial deposits, is also likely; but to explore thoroughly the whole of those extensive areas, much time, and most careful observation, will be required.

Winter having put a stop to exploration in 1861, before I had an opportunity of examining the Gold Districts of Waverley, Oldham and Renfrew, I therefore made a hurried exploration of these localities in the early part of

the past summer.

The Waverley Gold District, I find, is located on a broad waved anticlinal, with strike nearly east and west. The strata in which the auriferous quartz beds or seams occur, belong to the quartzite groups, and lie in that formation at the vertical depth of little over half a mile below the base of the clay slate group. In the crown of the arch they have an inclination or dip to the westward of one foot in ten, being raised to that angle by a north and south line of disturbance, which lies some distance to the eastward.

But this may not be the angle of inclination of the grain of the rock, and of strata in the crown of the axis of the east and west fold, in every part of this Gold Field. For, in the neighborhood of north and south lines of upheaval generally, dislocations and shiftings, or faults, are of frequent occurrence, often either increasing or diminishing the angle of inclination of the grain of the rock in different sections of the field; thus displacing the east and west quartz veins, in many instances.

Such lines of dislocation are usually found occupied by quartz veins which yield little or no gold, even where it is most abundant in those run-

ning east and west, in the planes of bedding of the rock.

Those cross courses cut and sometimes shift the east and west veins in such a manner as to show clearly that they were formed at a much later

period than the east and west veins; and it shows also that the strata which they traverse were solidified, and, to some extent, metamorphosed, previous to their formation.

That the east and west quartz veins were formed at a much earlier period of time than the cross courses, is still further shown by the manner in which they have moulded places for themselves in the strata which enclose them.

The convoluted, or rolled form, which they are sometimes found to have assumed, shows unmistakably that the strata were not altogether solidified when the veins were formed. It appears, indeed, very probable that the east and west veins were formed while the strata were sufficiently plastic to yield and bend without breaking.

We find here additional evidence to show that the upheaving of the strata, along east and west anticlinal lines, resulted from the first class of disturbance to which they were subjected, and that the north and south lines of upheaval were produced at a subsequent period by a second class

of disturbing forces.

That the first class of disturbing forces continued in active operation up to the close of the carboniferous period, is clearly shown by the manner in which the strata of that age are folded up in the synclinal folds of the older rocks, and mainly conformable with them in their bedding. But the second class of disturbing agencies appears to have been most active after the close of the carboniferous period.

In the way of exploration, much remains yet to be done in the Waverley Gold Field, particularly in the west end of it; nor is it unlikely that rich

deposits of gold exist in the drift lying to the south-eastward of it.

To the northward of this Gold District, at a distance of five and a half, or six miles, after passing over a trough partly filled up by members of the clay slate group, we come to another great anticlinal fold in the quartzite group, on which, at a distance of two miles east from Grand Lake, the gold mining district of Oldham is located.

The great depth at which the gold bearing strata of this field lie in that group, is clearly seen in the section shown by the railway cutting. It can

not be much short of half a mile of vertical depth.

All the mines that have been opened in this district are ranged along a deep narrow valley, which extends for some distance in the anticlinal axis of the field, as if a wide chasm had originally been formed along the line of upheaval. Should this, on further examination, prove to be the case, extraordinary deposits may be expected towards the bottom of this fissure; and shafts should be sunk there for the purpose of exploring it. Quartz viens seem quite abundant; and some of them are of large size, and apparently rich in gold.

The prospects, upon the whole, appear quite favorable; and, no doubt, when the geological peculiarities of the district are better understood, it

will prove an important mining locality.

I made some explorations to the west of Grand Lake, along the Oldham metalliferous band, and found traces of gold in the sands of a small stream, which, I believe, is locally named the Beaver Dam River.

This region is, no doubt, worthy of more extended search than I was at the time able to make; for the surface indications appear to be of a very

favorable character.

Proceeding northward on the Beaver Bank road, another belt of clay slate is crossed before reaching the metalliferous line of elevation on which the Renfrew gold field is situated. This belt occupies the synclinal walkey between the Oldham and Renfrew anticlinal folds.

I obtained gold from fissures in this slate, and from patches of rusty looking soil on its surface; but since no quartz veins appear to exist in the slate itself, it is most likely that this gold was removed by glacial action from the Renfrew band, which lies to the northward.

Explorers for gold should give this district a thorough examination, by sinking pits down to the bed rock, in the most likely places, for thereis

no reason to doubt that some gold lies below the glacial drift deposited in depressions and chasms in the bed rock, even if it should not be found in

the drift itself in sufficiently large quantity to pay the working.

Extensive mining operations are in progress at Renfrew, attended by most encouraging results. Gold is so abundant, in some of the veins, that it is difficult to find a piece of quartz, a few cubic inches in size, that does not contain more or less gold; indeed, some of the quartz is so rich, that scarcely a piece, even one cubic inch in size, can be found that does not contain gold.

The yield, per ton, of such quartz, when crushed, cannot fail to prove

highly satisfactory.

Mining is limited, as yet, to the south dip of the band, the strata on the north dip being covered by a considerable depth of drift from the newer group of clay slates, or upper silurian rocks, lying within a short distance That quartz veins will be found on the of this band to the northward. north side of the axis as rich as those on the south side of it, is highly probable; and efforts should therefore be made for its early exploration.

I examined a section across this metaliferous band, at a point about ten miles to the west of the Renfrew district, where the River Hebert cuts obliquely across it. This stream is a tributary of the St. Croix; it passes through a rich agricultural district, and rolls gold in its sands along the greater part of its course. In all trials made on this stream, I found from one to five pieces of gold to the panful of stuff; and other parties who were assisting me in making the search were nearly as successful.

Quartz rock is very abundant in the neighborhood. On one farm, in particular, I observed a section of over two hundred feet of a massive stone wall, all composed of good looking quartz, enclosing a large field, in which

also great quantities of quartz appear cropping through the surface.

This quartz does not seem to contain much gold; for, in a search extending over two hours, I did not succeed in finding but one small spec of the But in a place like this, where many thousands of tons of the rock can be got ready quarried for the crusher, and where an inexhaustible supply exists, in a district easily mined, even a small per centage to the ton should make it a valuable field for gold mining.

The inducement to try the experiment of putting an exploring shaft down to the depth of, say, four hundred feet, is greater here than in any other place I know; for the geology of the district is of such a character as to render it more than probable that the quartz will be found much richer in gold at some considerable depth below the surface,—for there it presents

but slight traces of the metal.

Perhaps some of the associations, already organized for gold mining, would find it much to their advantage to give this locality a fair trial. Its close vicinity to good water power, on the River Hebert, adds much to its

value.

Extending my researches along this range to a distance of seven or eight miles further to the westward, I observed another spot where, there is reason to believe, extensive operations might be profitably carried on in quartz crushing.

In this locality also the quartz is very abundant at and near the surface, and it appears to be of good quality. One vein, of large size, is exposed for several hundred yards along the bed of a brook, and thousands of tons from the same vein lie as loose boulders near its outcrop.

This locality is about nine miles from Windsor, and one and a half to the

eastward from the post road leading from Windsor to Halifax.

To ascertain by trial, on a large scale, the value of this quartz, and of that in the township of Rawdon, would be very desirable; for there are several localities in which it can be obtained in great quantities in rocks of the same age, viz.: the upper members of the older clay slate group, and lower members of the newer group of argillaceous schists.

On the high range of land, forming the north side of the valley of the Upper Musquodoboit River, it exists in great abundance in many places

医骶骨性切除性 医乳腺性脓肿 医多种毒素 经销售 医多种毒素 化二甲基乙基

where it can be mined at a small cost, and in the vicinity of good water

power.

Under these circumstances, quartz, comparatively poor in gold, might be worked profitably on a large scale. As yet, however, no positive or satisfactory evidence has been obtained to show that gold, in paying quantities, exists in quartz of the upper clay slate group.

Although we find gold in several streams draining districts chiefly occupied by rocks of this age, it cannot be regarded as sufficient evidence; since it is possible that the gold rolled in the sands of these streams may have been derived from the older rocks, brought to the surface in the high lands

in which they take their rise.

I have proved the drift of the Stewiacke River to be auriferous, by many trials made along its course, for a distance of fifteen miles. The quantity obtained on each trial ranged from one to as much as thirty-eight specs to the pan full. This proves the existence of gold, in considerable quantities, in the valley of this stream.

But, as far as I have been able to examine along its course, no rocks in

place are found of greater age than the upper clay slate group.

In a section of several miles, near its head waters, the main stream runs in an easterly direction, along a synclinal valley in the upper clay slates. Here it sends branches of considerable size to the northward across strata

dipping at sharp angles to the south.

I followed one of those streams—named Sutherland's Brook—for a distance of three miles, which would make about two miles of section across strata with continual southerly dip, at an angle of 50° and 60°. The strata forming the north end of the section, I found to be upper members of the lower, or older clay slate group: and if I had been able to follow the stream farther in that direction, I have no doubt that the old gold-bearing rocks of the south coast would be found at the surface along an east and west anticlinal line. It seems, therefore, most probable that the Stewiacke derives its gold from this range of high lands, forming the watershed between it and the east branch of the Salmon River, which runs along the eastern head of the valley of the Bay of Fundy.

The whole of this region is still an unoccupied wilderness. Although the greater part of the land is well adapted for farming purposes, yet it is now

frequented only by the lumberer, the bear and moose hunter.

I spent some time during the summer of 1847 in making examinations among the lower carboniferous rocks which occupy an extensive area in the northern section of this tract.—that bordering the east branch of the Salmon River, on its south side. Here a fine stream named the Calvary falls into it from the south, cutting a deep channel for itself in the rocks at right angles to their strike; thus exposing a section, some miles in extent of lower carboniferous, or Devonian rocks, and upper clay slate, or silurian rocks, all dipping at sharp angles to the northward, or contrary to the direction of dip of strata exposed in section along Sutherland's Brook.

This fact affords ample evidence to prove the existence of an east and west anticlinal line of elevation along the middle of the district, where the older slates, and probably strata of the quartzite group, are brought to the surface. Hence, no doubt, its auriferous character, as indicated by the ex-

istence of gold in the sands of the streams that traverse it.

To explore this district thoroughly would occupy at least two or three months. What has been accomplished in the short time I was able to devote to that object, was merely to expose a few links of a chain which will, no doubt, lead to more valuable discoveries, if carefully followed up a task which I had to abandon, though very reluctantly, and proceed to the east ward to explore the Cape North district, in the Island of Cape Breton.

While on my way to that place. I examined a few points along the road, in which I observed favorable indications of the existence of gold

French River, a small stream which falls into Merigomish Harbor was the first that I examined, and found gold in its drift, which there is reason to believe it derives from auriferous quartz veins in the Blue Mountains range of high lands in which it takes its rise.

I found gold also disseminated through gravel banks, at various levels above the bed of the river, and observed detritus from quartz veins abun-

dant in the gravel banks, and in the bed of the stream.

The second place examined was the Milford River, which falls into Milford Haven, at the head of Chedabucto Bay. From the result of a few trials made here, I infer the existence of gold somewhere in the mountains drained in this stream; and there is reason to believe that it will be found also largely disseminated through that extensive tract of alluvial deposits, known as the Milford Haven Intervale. It was late in the evening when I reached that place, so I had only time to wash three pans full of stuff, in each of which I found from two to three pieces of gold. This was obtained from surface stuff, dug out from among the roots of the grass. It is probable, therefore, that gold in much larger quantities may be found at a greater depth.

I observed traces of gold also in some quartz boulders, in the township of Manchester, about three miles to the eastward of Milford Haven. This quartz was probably drifted from the slate hills to the north, for the dis-

trict in which they occur is ocupied by carboniferous rocks.

I made several trials after this along the road, for a distance of thirty miles, without any favorable results, until I reached the principal streams falling into the Gulf of St. Lawrence between the Strait of Canso and Port Hood.

Two of these streams roll gold in their sands, which they, no doubt, derived from metalliferous lodes at their sources, in the high range of moun-

tains extending eastward from Cape Porcupine.

I could not spare time for an extended search, but feel confident from what I have observed, that rich deposits of the metal may be discovered in the mountains at the head waters of Long Point River, in particular, for every trial made on this stream yielded from three to four sights in every From Port Hood to the River Margaree, a distance of pan full of sand. forty miles, the country presents very little to encourage exploration for gold, being principally occupied by carboniferous rocks. But the region lying to the eastward of the Margarce, comprising the Cape North district, presents great inducements for exploration for the precious metals. The country is much more varied in its mineralogical and geological characters, and it has been subjected to metamorphic action of much greater intensity apparently than any other section of the Province. Several of the streams which drain this extensive region, roll gold in their drift to the sea; but of the character of the country in which they take their rise very little is known. The sources of some of them are even yet enveloped in as much mystery almost as the sources of the Nile. This is partly owing to the fact of the country being still in the wilderness state. But the greatest difficulty, in the way of exploring it, is the extraordinary depth of the defiles, or narrow valleys, in which most of the streams flow from the interior, and the exceeding steepness of the slopes that wall them in on both sides.

The explorer is compelled to travel either in the bed of the stream, all the way, or along the top of the slopes, at an altitude of ten or twelve hundred feet above it. In the latter case he could learn but very little of the mineral character or geology of the country, for its surface is generally found covered, to a considerable depth, by soil, in which but few stones are met with, and the rock is seldom found exposed at the surface, even in the slopes, although they are generally found ranging from an angle of sixty

to seventy degrees of inclination.

It is mainly by wading along the channels of its rivers that the greater

part of this country can, therefore, be explored.

Another great obstacle to exploring this country is the dense growth of luxuriant forest that everywhere covers the slopes and glens, and even the greater part of the table lands, or tops of the mountains; for, in its general topographical features, the Cape North district may be regarded as an elevated plateau, having a main altitude of twelve hundred feet above the level of the sea.

To the Gulf of St. Lawrence, on its north-west side, it presents a bold front of rounded or conical mountains, united at their base, and appearing like buttresses supporting the table lands of the interior on their flanks. They attain, at some points, an elevation of fifteen hundred feet above the sea level; and their general outline is softened and the landscape rendered beautiful by a dense covering of hardwood forest, by which they are clothed from their base to their summits.

The greater part of the district is encircled by a rampart of similar mountains, more or less rounded in their contour; and where they happened to be stripped of their covering of forest, by the ravages of fire, they appear as naked cones of crumbly red feldspar rock, which is the prevailing igneous rock of the district, and that from which the principal part of the soil is derived. Hence, no doubt, its extraordinary fertility.

Viewed from the interior, these mountains appear but little elevated above the general level of the country, which in its main aspects appears comparatively level, although cut by deep valleys and narrow defiles along

all its water courses.

Wherever bottom-lands, or intervale, occurs in the valleys, the soil is remarkably rich. This is evident from the heavy growth of healthy looking timber they produce, consisting principally of maple, birch, beech and elm, with occasional oak trees of large size, and well adapted for staves or ship timber.

I observed some elm trees as much as four feet diameter, and as straight and tall as any I ever saw in the forests of Canada, or the South-western States.

Most of the steep slopes are also heavily timbered; but on the table lands the forest is much lighter, and chiefly composed of spruce, fir and hardwood mixed. The soil generally appears to be good, and comparatively free from stones.

Considerable tracts of the higher or table lands are occupied by peat bogs, which will, no doubt, some time hereafter, prove of great value, as they are capable of yielding an unlimited supply of that description of fuel,

of the finest quality.

The surface of these peat bogs presents the appearance of gently sloping planes of cliptic form, having deep circular basins at their highest points, full to their brim of clear, icy cold water. These basins are no doubt fed by springs from below, and they appear indispensable to the accumulation

of any great depth of peat free from earthy matter.

The geology of this district bears a very close resemblance to that of the Cobequid Mountains; but the brown feldspar rock, or syenite, which is here the predominant intrusive rock, differs from syenite in the Cobequid Mountains, in having much less quartz and hornblende in its composition and it is of a more crumbly and perishable nature. On this account the soil of the district is chiefly composed of it.

The other intrusive rocks are occasional dikes of porphyry and trap; true granite being very scarce if at all present. The prevailing stratified rocks are the newer clay slate, or upper silurian rocks, and devonian, or lower carboniferous rocks—all metamorphosed to a higher degree, and much more disturbed by igneous masses and dikes, than is observed in any other

section of the Province.

To make out the geological structure of the district on the large scale is not, however, a very difficult task, because extensive sections of the rocks are exposed along the sea shore, and in the channels of some of the rivers. The same general arrangement of the strata in parallel folds, appears to be the most important feature of its structure; but the strike of the rock inclines more to the northward and southward than I observed any where else—being N. 20° E., S. 20° W.; as a general rule the greatest amount of inclination I observed was, N. 15° E., S. 15° W. This brings the strata obliquely to the Gulf Coast line, which has a general course of about N. 40° E., S. 40° W., affording an excellent opportunity for observing the phenomena presented by the different groups along their lines of contacts.

To give, however, anything like a detailed description of the geology of a country so little explored, would be premature; more extended research and very careful examination, would be necessary, before such a thing should

be attempted.

The result of my observations in this district inclines me to adopt the opinion that gold is chiefly confined to the south-western half of it. The sands of all streams draining that section are more or less auriferous; but I failed to discover any gold in the sands of streams traversing the other section.

That the streams which carry gold in their drift remove it from more ancient rocks, in the interior of the country, than any exposed in place along the sections of their course that I have been able to examine, is most likely, for the greater part of their drift is composed of detritus of the older rocks.

The Margaree rolls gold in its sands over a bed of carboniferous rocks, a distance of twenty miles, or more; yet the greater part of its drift consists of materials derived from older formations. The Bedeque and Middle River, also, which take their rise in the same region, carry a heavy drift of ancient detritus, in which gold is largely disseminated, for fifteen or twenty

miles, along valleys scooped out in carboniferous rocks.

The main course of those rivers is from north-east to south-west. In the lower part of their course they flow through broad, rich valleys, along which highly prosperous settlements extend far in among the mountains. They discharge a considerable volume of clear, cold water, over pebbly beds of an average breadth of seventy or eighty feet, with a fall of about one foot in three hundred. As might be expected, the gold is not altogether confined to the channels which the streams now occupy, but is dispersed through the whole of the bottom lands, or alluvial deposits, on each side of the streams.

All the trials I made were in surface stuff; but the results were of such a character as to leave no room to doubt the existence of gold in large quantities, in some places at the base of the alluvial drift, in those river

valleys.

I found gold in every trial made on those streams. On the Margaree the quantity ranged from one to six pieces to the pan full of sand; and on the Middle River, from one to seven. The pan used would contain about two quarts when full. This may help to convey a pretty fair idea of the quantity of gold dispersed through the alluvial drift, to those accustomed to scarching for gold in river sands. It is true that many trials might be made in the sands of those rivers without finding a single spec of gold, if the most likely spots, accessible at the surface of the drift, were not selected for making such trials.

But it is well known to all who have had any experience in such work, that this can be done even on the richest gold-bearing streams in any country.

To cut trenches down to the base of the drift, where I would expect to find the gold most abundant, would require more time than I had at my disposal when there; so I had to confine my operations to surface deposits alone. In view of all the circumstances, I have no doubt that gold washings on the north-east branch of the Margaree River, and on the Wagamatcook, or Middle River, will prove remunerative, if the works are conducted skilfully.

Nor is there any reason to doubt that valuable gold mines exist somewhere at the head waters of those streams. No time should therefore be allowed to pass without having a thorough exploration made in the region

in which they take their rise.

There are three other streams that have their sources in the same region, and they also carry gold in their drift, derived, in all probability, from the district in which they take their rise. The first of these discharges its waters into the Gulf, a short distance westward from Cheticamp. Within a few hundred yards of it, stands a spacious new building, designed for a place of worship for the French Roman Catholics, who are the principal inhabitants of this part of the coast. As a chapel, it is not surpassed by any edi-

6

fice of the kind in the Lower Provinces. It is altogether built of freestone. in the old English Gothic style of architecture. It reflects much credit on all concerned, both in its design and execution, and is certainly an ornament to the beautiful country that surrounds it. In this river I succeeded in finding only ten pieces of gold in fifteen pans full of sand which I washed; but I have reason to believe that it is more plentiful higher up the stream. I observed boulders of vesicular trap, or lava very abundant in the drift of this stream, which indicates volcanic action to some extent in the interior at a former period, and it goes far also to confirm the belief that valuable minerals abound in this region, especially gold, silver and copper ores.

Steep Mountain River is the second stream met with after passing the Margaree. It falls into the Gulf at a point six or seven miles past Cheffcamp to the eastward. It is locally known to some as Little River; but this is a misnomer, for it is much the largest stream east of the Margaree.

Gold seems to be quite plentiful in the drift of this river, for it appeared in every trial made in its sands during a whole day's operation; and as much as five, and often seven pieces appeared frequently as the result of a The gold is coarser, and more plentiful the higher up the stream is followed towards its headwater.

I followed it only as far as I could in one day's journey, returning in time to reach the Gulf Shore about midnight, as I had no provision then made to enable me to camp in the forest. I found it impossible to ascend this river otherwise than by travelling in its channel; for the land rises steeply on each side to a height of ten and twelve hundred feet above its The whole of the country, as far as I could see on each side of the river, appears to be cut, by deep defiles, into a succession of rounded mountains, with their sides sloping at an angle seldom found less than sixty or seventy degrees; and they are also covered by a dense forest which greatly increases the difficultly of travelling along the banks of the river.

The channel of this stream is about one hundred and fifty feet wide, and paved by well rounded boulders and coarse gravel, consisting of detritus, chiefly from clay slates, porphyry, and syenite, with occasional masses and pebbles of quartz rock. During floods, the water rises in this broad channel to as much as fifteen feet, sometimes, above its ordinary level; but during the greater part of the summer season, more than half its channel is quite dry, so that there will be no difficulty in obtaining the gold from its chan-

nel, should it prove sufficiently abundant.

The third gold bearing stream alluded to, falls into the Gulf about eight miles beyond the Steep Mountain River, and fourteen or fifteen miles north eastward from Cheticamp. This stream also is known by two names; some call it Lazar River, and others maintain that its proper name is Red Point River. I made but few trials on this stream, but every pan full of stuff washed showed more or less gold. It is but a small stream, about the same size as the stream that falls into the sea near the chapel at Cheticamp. Its channel is not much over twenty feet wide, and is fordable everywhere during the summer season.

Between Red Point River and Cape North I made diligent and careful search for some distance along the courses of four different streams of con-

siderable size, without discovering any traces of gold.

Three of these rivers fall into the Gulf within four or five miles of each other, at Grand Ance, or Limbo Cove, as it is named on some maps of the country. The first met with, before coming to Grand Ance, is named the Fish Pond River; and the second is known as the McKenzie River; and the third is Grand Ance, or Grand Tosh River.

The fourth stream is the North River of Cape North, which, after running twenty-five or thirty miles in a north-easterly course, through a beautiful

glen, discharges its waters into Aspy Bay.

I also made some search along the sea shore around Cape North and towards Bay St. Lawrence, without meeting with any success.

But it is not at all unlikely that gold may yet be found in some parts of the north-eastern section of the Cape North district. the north-eastern section of the Cape North district, since full mine-tentis

of its area remain yet unexplored; still, estimating its value as a mineral region by what I have already discovered within its limits, there seems to be good reasons for believing that it must ere long become the scene of important mining operations, independent of the discovery of gold.

From the mouth of Steep Mountain River, for a distance of thirty miles to the eastward, favorable indications of the existence of the ores of copper,

zinc and barytes present themselves at different points.

Magnetic iron ore also seems quite abundant at some points between Grand Ance and Cape St. Lawrence. This might be turned to good account where fuel of every description can be obtained. I have no doubt that coal exists at Bay St. Lawrence, and I am informed that one bed has already been discovered there; and as for wood and peat for charcoal, the supply is unlimited.

But no mining operations, on a large scale, can be commenced in this region until a harbor of some kind is constructed. This, I have reason to believe can be easily done at Aspy Bay, where a good harbor carrying three and three and a-half fathoms water extends three miles inland from a bar which separates it from the bay, except a narrow pass of three feet most water on the bar. The shore slopes steeply outside the bar, to eight and nine fathoms, with sand and clay bottom. The distance between the points of three fathoms depth outside and inside the bar, will not much exceed three hundred yards; and the holding ground is good, for there seems to be a deep substratum of stiff boulder clay, into which piles can be driven to any depth that may be deemed necessary.

For a distance of twenty-five or thirty miles inland from this harbor, the soil is well adapted for agricultural purposes; and the facilities for lumbering and ship-building surpass those of any other district in the Province.

The cutting of a channel across this narrow bar would also give a great impulse to fishing on this part of the coast, and would be the means of saving much life and property. But apart from all other considerations, the mining interests that will be likely to spring up in this section of the Province in a short time, in connection with its silver, iron and zinc, render it necessary that the harbors should be opened with as little delay as possible; and some improvement should be made on the roads, which are now almost impassable even to a person on foot.

The prospects for silver and zinc mining appear most encouraging, over a considerable extent of the country, but more particularly so in the neighborhood of Grand Ance, where the Mackenzie River falls into the Gulf. This stream flows over a rough boulder bed about seventy or eighty feet wide, with a fall of about one foot in the hundred. It discharges a large volume of water during the summer season. It is not easily forded on this account, except when the water is at its lowest stages, and the difficulty is greatly increased by the large size of the boulders by which its bed is paved.

On each side of it, the land rises abruptly to a height of eight or ten hundred feet, except a short distance near the sea where the land slopes gently down to the shore.

Native metallic silver is found abundantly disseminated through the drift of this stream, in small grains and nuggets; and this appears to be the case along the greater part of its course, for in many trials made several miles inland, I found the silver as plentiful as I found it near the Gulf coast. Nor is there reason to doubt the existence of rich deposits in some places where circumstances favored the concentration of such particles of the drift as were of the greatest specific gravity, such as silver, &c.

The sources from which this stream derived the silver rolled in its drift are, as far as I have been able to discover,—first, from veins of a beautiful variety of spar, closely resembling meerschaum, that abound in some parts of this district. Some of these veins contain native silver, which is imbedded in strings and nests of a softish gray substance of earthy texture, much resembling the carbonate of that metal. The other source I have reason to believe is the general surface glacial drift along its banks and tributaries.

I observed here also some fine veins of zinc ore (calamine) which may be profitably mined, for some of them are of good size, being from three to nine inches in thickness, and in positions that are very favorable for mining.

There is a probability of some of them being also found near enough to the argentiferous veins to be mined in connection with them, which will save a large amount in mining operations where the veins may not be all

of large size.

The rocks in this part of the country appear to be cut in all directions by mineral veins, variously composed; some of them are quite large, being as

much as three feet in thickness.

Transverse sections of some of them may be seen along the coast at some points, particularly in the sea cliffs between the Fish Pond River and the mouth of the Mackenzie River, where masses of galena are found distributed through some of them; but not in sufficient quantity for mining, as far as can be seen on the surface.

But the facilities for mining are of such a favorable character that veins

comparatively poor in ore might be profitably worked.

The prevailing rock here is a hard gray sandstone, either of Devonian or upper silurian age. It is highly metamorphosed, and very much disturbed by intrusive masses and dykes of syenite, and springs of highly mineralized water issue from it in some places, which fact may be regarded as an indication of the existence of extensive deposits of metallic ores.

In closing this report, I cannot but express regret at having been compelled by unfavorable weather and the lateness of the season to abandon exploring operations in this interesting locality without being able to bring

my labors to a more satisfactory conclusion.

However, as much that is of a highly important character remains yet to be done in this district, particularly in connection with the discovery of silver, I trust I shall be enabled to attend to it as early in the ensuing summer as circumstances will permit.

I we the honor to be,
Sir,
Your obedient servant,

J. CAMPBELL.

## COUNTERFEIT NOTES.

(COPY.)

H. M. Consulate. Boston, 2nd September, 1862.

MY LORD,-

I have just received a visit from the U.S. Attorney, who brought with him the Captain of the Detective Police of Boston, to show me a plate and specimens of notes prepared by a man named George Leizer, for the purpose of defrauding the Nova Scotia Treasury. The man is now in custody, but it appears that there is no law by which he could be punished for forging a Foreign Treasury Note, although he might be punished for forging the paper of a Foreign Banking Company. The Attorney General has undertaken to get a remand of a week, in order to take any further action. Your Excellency may direct in the matter; and it would be desirable that I should be apprised by telegraph whether the retention of the prisoner is wished, and if any one will come on here on behalf of the Nova Scotia. Treasury. It is very possible that this is but one of a gang; and there is no doubt but that a great quantity of these notes would easily have been passed here, as N. S. currency bears a premium. I enclose two specimens of an unfinished note, some in a more forward state being in the hands of the Detective above mentioned.

> I have the honor to be, ave the honor to be,
> My Lord,
> Your Excellency's most obedient, Humble servant.

of Province notes recently attempted at that place by a party now in custody

calling himself George Leizer.

You will use every means to have this party, in case his act can be brought within the operation of the criminal code of the United States, brought to trial and convicted. Should the act not be cognizable as a criminal offence by the code of the United States, you will use every means in your power, when the party is brought up for examination or otherwise, to ascertain any facts which may throw light upon this transaction or reveal the number or names of the persons engaged in it, and to what extent the forgery has proceeded, and whether any and what forged notes have been uttered and put in circulation.

I have the honor to be, Sir.

Your obedient servant.

A. G. ARCHIBALD.

E. M. McDonald, Esq.

Halifax, 19th September, 1862.

SIR.

I beg leave to report that having received your letter of the 6th instant informing me of the request of His Honor the Administrator of the Government that I should "repair to Boston, and there put myself in communication with the British Consul at that port, and with the United States, District Attorney, on the subject of certain forgeries of Provincial notes, recently attempted at that place," I started for Boston on the same day, arriving there on the afternoon of the 9th inst. I immediately called on the British Consul, and subsequently on Mr. Sargeant, captain of the Detective Police, from whom I learned the facts, as far as they had been ascertained, concerning the attempted forgery. A person named George Leizer brought a copper plate engraving of the one pound Treasury Note of the Province of Nova Scotia to a printer named George French, with whom he tried to make an arrangement to print a number of copies from it. French feigned compliance with his request, appointed a time for him to come to his shop to have the work done, and then gave information of the circumstances to the Police. At the time appointed. Leizer appeared with his plate, and was arrested, after a desperate resistance. Only a few copies of the note, not more than ten or twelve in all, including those made at the time of his arrest, together with those found in his lodgings, are known to have been printed. On two of them he had forged the signatures of James McNab. Receiver General. and John Naylor and Charles Twining. Com-The signatures of Messrs. Navlor and Twining were fair imitations: that of Mr. McNab was not so well done. The engraving of the note was well executed in point of workmanship, but the design on the plate was not correctly copied—the lion and unicorn in the centre being rampant instead of conchant as in the original. Notwithstanding these defects, however, the imitation both of engraving and signature had so much the general appearance of the genuine note, that had he found an accomplice in the printer, he might have disposed of thousands of pounds of the spurious paper in Boston and other cities of the United States, where the Treasury notes of this Province have not hitherto been much in circulation, but where they are now worth a large premium. There was found in Leizer's pos-session, besides other evidences of guilt, sheets of paper on which he had been practising imitations of the signatures, and a quantity of greyish powder, with which he had experimented in discoloring some of the notes giving them the appearance of having been in use. No clue couled

obtained to the name of the person who engraved the plate, nor could it be

ascertained that Leizer had any accomplices.

The case had already been under the consideration of the United States District Attorney, who gave it as his opinion that the offence of the prisoner was not cognizable as a criminal act, under the code of the United States, or the Commonwealth of Massachusetts, and that therefore he must be discharged. I obtained from him, however, a reconsideration of the case, when he arrived at the conclusion, that Leizer might be brought to trial under the common law, for an attempt to defraud; and the prisoner was accordingly committed to take his trial for that offence, at the October sittings of the Superior Court. Previous to leaving Boston, I placed in the hands of George P. Sanger, Esquire, the District Attorney, such details of evidence in the case as he thought sufficient to enable him to frame an indictment, and secure the conviction of the prisoner. The engraved plate, together with the signed copies of the note, and other evidences of guilt found in possession of the prisoner, I left with Captain Sargeant of the Police, who made the arrest, and by whom they will be produced in evidence on the trial. An unsigned copy of the forged note is herewith enclosed. None of the notes were put in circulation.

I may state that, the prisoner, George Leizer, is apparently of about forty-five or fifty years of age, represents himself as a Nova Scotian by birth, and well acquainted in Yarmouth and Halifax, having for a time worked at his trade as a blacksmith in this city, whence he removed about nine-

teen years ago to Boston, where he has since resided.

I have the honor to be, Sir, Your obedient servant,

E. M. McDONALD.

The Honorable A. G. ARCHIBALD, &c. &c.

Halifax, 7th February, 1862.

SIR,-

In my report of the 10th September last, I stated that Leizer, arrested for counterfeiting the treasury notes of this Province, was to be tried at the October sittings of the Massachusetts Superior Court in Bostom. I have since learned that during the October sittings of that Court, Mr. Moses Sargeant, Captain of Detective Police, who arrested the prisoner, was unavoidably absent from the city. As he was an important witness, the trial could not take place in his absence, and the prisoner was remanded until the December term, when he was tried on an indictment "for attempt to commit an overt act prohibited by law, to wit, to counterfeit," &c., that being the only indictment by which he could be held in the Massachusetts courts. On this charge he was convicted, and sentenced to one year in the Penitentiary, being the severest penalty allowed under the law. I am informed by Mr. Sargeant, that the plate, left by me in his possession, to be used in evidence on the trial, has been destroyed, and that none of the notes are in circulation.

I would beg leave to call your attention to the valuable services rendered by this gentleman in arresting Leizer, and in the subsequent proceedings. In effecting the arrest, he ran a very great risk of personal injury, the criminal being armed, and making a desperate resistance. When I saw Mr.

Sargeant in September, he carried on his person unmistakable evidence of the sharp conflict he had had with the prisoner. Had the counterfeit been upon any of the Massachusetts' banks, he would have been rewarded for making arrest. As it is customary in this Province to give rewards for the apprehension of criminals, there would seem to be no irregularity in rewarding Mr. Sargeant. In Massachusetts there is a law in relation to rewards for services of this kind, authorizing the payment of Fifty Dollars for the conviction of any person passing a counterfeit bill, and of Two Hundred and Fifty Dollars for the seizure of the plate from which the counterfeit note has been printed. The apprehension and conviction of Leizer, is a case that would seem to justify the payment of a reasonable reward; and considering the great personal risk incurred by officer Sargeant, in making the arrest, and the importance of the service he has rendered in preventing the probable issue of a large amount of counterfeit treasury notes, I would suggest that the Government of Nova Scotia should consider the propriety of giving him a reward, equal in amount to that which he would have received from the government of his own State, had the counterfeit been upon any of the banks of Massachusetts.

I have the honor to be, Sir, Your obedient servant,

E. M. McDONALD.

The Hon. A. G. Archibald, Attorney General, &c. &c.

# APPENDIX No. 8.

## LIGHT HOUSES.

(Copy.) No. 76.—Miscella.

Government House, Halifax, N. S. 20th August, 1862.

My Lord Duke,-

I have the honor to enclose the copy of a report, made by Captain Ryder to Vice-Admiral Milne, regarding the Light House at Sambro.

Having had reason to think that the lights at the entrance of the Harbor were not in as effective a condition as they should be, and being anxious to ascertain whether any improvement could be made in them, I proposed to Sir Alexander Milne that we should visit the Light House at Sambro for the purpose of inspecting it, and H. M. Ship *Hero* being fortunately in port at the time, we were able to secure the assistance of Captain Ryder, whose thorough knowledge of the subject renders any report from him of great value.

By the report which I now enclose, Your Grace will perceive that Captain Ryder expresses himself most unfavorably, both as regards the apparatus now in use, and also as regards the mode in which the service is conducted by the keeper. I have lost no time in bringing the subject under the consideration of my Government, and steps will immediately be taken to correct those errors in the management of the Light of which Captain

Ryder complains.

With regard to the recommendation that a new Dioptric Light should be substituted for the present old and defective lamps, I shall not fail to do all in my power to effect a change; but in a position of the importance of Sambro, it is desirable that when a change is made, it should be done in the most effective manner possible; and for this purpose I should be anxious to secure a second, or at any rate a third class Dioptric apparatus; and although the saving in oil would be such as to render the change desirable even in an economic point of view, still the original cost of a light of that description would be such as to render it necessary in the first instance, to obtain a vote of the Legislature, as there is no fund from which the money could be provided, the expense of maintaining the Light Houses in the Province exceeding the revenue derived from the Light Dues.

It is, therefore, my intention to bring the subject under the consideration of the Legislature during the next Session, and I trust that they may see the propriety of granting the sum required for carrying out this improve-

ment.

I beg also to call Your Lordship's attention to the clause in Captain Ryder's report, in which he alludes to the reduction in the charge of powder used in firing the fog guns at Sambro. This reduction, which I understand has been made in consequence of orders from the War Department, materially affects the distance at which the guns can be heard; and in a port like Halifax, which is so constantly frequented by H. M. ships I can hardly think that it is desirable to do anything to dimension the efficiency of

guns which are so invaluable to ships making the port in the foggy weather so prevalent on this coast, for the purpose of effecting a saving which must be very insignificant, the annual amount of powder used under the old sys-

tem being little over 800 lbs., the value of which is about £20.

I should also feel greatly obliged to Your Grace, if you could procure for me a copy of the report of the Commissioners appointed to enquire into the condition and management of Lights, Buoys and Beacons, which was presented to Parliament in 1861, as I fear that sufficient attention has not been paid in this Province to the great improvements which have been made of late years, and there is a large amount of information contained in that report which would be of great service in the management of our Lights.

I have, &c,

(Signed)

MULGRAVE.

His Grace
The Duke of Newcastle, &c. &c. &c.

Nova Scotia.—No. 196.

Downing Street, 8th Sept. 1862.

MY LORD,-

I have the honor to acknowledge the receipt of your despatch, No. 76, of the 26th ultimo, together with copy of a Report by Captain Ryder, R. N., on the Light Houses of Nova Scotia. I have requested the Lords of the Committee of Privy Council for Trade, to afford me the benefit of their advice on the subjects of your despatch. In the meantime I enclose for your information, copy of the Report on Lights, Buoys and Beacons which was presented to Parliament in 1861.

I have the honor, &c.

(Signed)

NEWCASTLE.

Lieutenant Governor
The Right Honorable
THE EARL OF MULGRAVE, &c. &c. &c.

REPORT ON THE STATE OF CERTAIN LIGHT HOUSES IN NOVA SCOTIA, MORE PARTICULARLY ON THAT AT SAMBRO, OFF HALIFAX.

H. M. Ship "Hero," Halifax, Aug. 10, 1862.

SIR,—

Having at your desire visited the Light Houses at Sambro, Devil's Island, and Major's Beach, I beg to report generally on their state.

There is much room for improvement n all of them. They are far below the Light Houses of France, America, and Great Britain, Spain, &c., as to order and efficiency.

It is possible that mariners may not have complained of their inefficiency. They are grateful for any lights, and if told in their Book of Directions not

to expect to be able to discern a light until within 10 or 12 miles, are content if they observe it when they reach that distance; and are not curious to enquire whether at a small cost or with a positive economy, the lights could be made to throw their rays to a much greater distance. Shipowners do not complain, for they would be afraid of an increase in the light dues. Neither insurance offices nor pilots are generally found to take an active part in applying for improved lights.

The absence of complaint on the part of persons supposed to be most interested in this very important question, is therefore no proof of the efficiency

of the Light Houses.

France and the United States have within a short time, entirely relighted their coasts. A comparison between the lights of Nova Scotia and the United States would, I am afraid, be much to the disadvantage of the former; whereas the prevalence of fogs and thick weather during a large portion of the year, and the dangerous gales during the winter, point out that Nova Scotia should be content with none but the very best lights the finances can sustain.

Some improvement could be made in the existing lights at very little expense, and the greatest improvement could be made on others with pro-

bably a positive economy.

I will select the Sambro Light for a special notice. It is a very important light, being the outer sea-light of the harbor of Halifax, a harbor destined to be the terminus of the great intercolonial communication between the British Provinces and Great Britain. Sambro Light, is of all the Light Houses I have visited in Nova Scotia, the most open to unfavorable criticism. There are 13 lamps, of which 9 have reflectors arranged round the edge of a flat and nearly circular table. The lamps appear to be old and battered. The lantern is octagonal, and if the number of panes of glass was a merit in a Light House, Sambro would probably stand at the head of the list of known Light Houses. It contains 128 small panes of glass. The frame work is thick and clumsy, and obstructs a large portion of the light. The reflectors are so slenderly supported that they cannot remain in a vertical position. But even if they could do so, the keeper takes very good care that they shall not, for he invariably and intentionally places them out of adjustment every night, the whole lamp, including its reflector, being thrown back at an angle to the vertical varying 0° to 3°. This is done to prevent the oil running over, when, as the keeper describes it, "it swells with the heat." Each lamp had a different angle of heel. They were wedged back by small pieces of wood of unequal size and variable thickness. The keeper was evidently not a little proud of the ingenuity displayed in this contrivance. It had never occurred to him that reflectors so treated would throw a large portion of their rays to the sky, where they would be wasted, but indeed when one looked at the state of the reflectors, an excuse was easily found for the keeper, for there was so little silver left on them (they were 47 years old), that it could make but little difference whether they were placed at one angle or the other, or indeed, if removed altogether. A new pewter plate would be of greater service.

The average yearly consumption of oil was, the keeper assured me, 875 gallons of seal oil. Now, a first class Dioptric Light in England and Ireland has hitherto only consumned about 500 gallons of Colza oil. In France and Scotland, by the greatest attention to constantly maintaining the maximum height of flame, the keepers succeed in consuming over 700 gallons of Colza oil. I am at a loss to understand, unless seal oil burns very much faster than Colza, at least twice as fast, how this enormous consumption occurs. In the 30 lamps at Beachy Head, they consume only

1000 gallons a year.

A 6th, 5th, 4th or 3rd class Dioptric light, would give a much better light than that now given at Sambro, with, in the case of the 3rd order, a consumption of Colza oil of one-fourth the amount of sea oil now used at Sambro.

sumption of Colza oil of one-fourth the amount of sea oil now used at Sambro.

The saving in oil would much more than pay the interest of the outlay on a third, and permits of the purchase of a second order. I append a list of

the prices paid by the American Government for the different descriptions of Dioptric illuminating apparatus. They obtain them from France, but they are now better made at Birmingham by Messrs. Chance.

American.	List of prices.	Consumption of Colza oil per 100 hours in gals.
1st order	$5,000 \\ 2.750$	$\begin{array}{c c} 15 \\ 10\frac{1}{2} \\ 3\frac{7}{8} \end{array}$
4th order	860 500	17 1.14 1.14

If 600 gallons of oil can be saved by the substitution of a 3rd order Dioptric light, and the oil costs 3s. a gallon, there will be a saving in oil alone, leaving out of account chimneys, &c., of £90, which at 6 per cent. represents a capital of £1275 or thereabouts.

The 2nd order light Dioptrie, gives a splendid light, equivalent in every horizontal direction to the light of 280 carcel burners, each burner very superior in effect to any one of the lamps at Sambro. The 3rd order Dioptrie

gives a light in every direction equivalent to 90 carcel burners.

The reflectors at Sambro being as I have already stated quite worn out, must be replaced by new reflectors, at a considerable expense, (they are never re-silvered,) or a new description of illuminating apparatus must be substituted. The Dioptric fixed is the most suitable for Sambro. The lamps had no fixed position, the keeper could turn them in any direction, and they are probably often not turned exactly right. If the lamps are not placed exactly right, a dead angle in the beam may occur. The ventilation was bad, as evidenced by the smoky state of the roof. There should be metal tubes over each chimney to convey the smoke into the cowl.

The fog signal guns, fired twice in return to any gun heard in a fog, are in charge of three artillerymen. They fire away from 600 to 900 lbs. of powder a year, there being about at the rate of ten days of fog every month, May, June, July and August, or 40 days in all. The charge has been reduced from 8 to 5 lbs. very lately. This must diminish very considerably

the distance at which the guns can be heard.

The lamps at Major's Beach, had tripods and adjusting screws, and the keeper had a plummet to hang against the face of the reflectors and test

their accuracy.

That the less important light at Major's Beach should have this essential adjustment, while the more important light at Sambro is not only without it, but has its reflectors carefully thrown out of adjustment every night, is very remarkable. It is difficult to understand how such an outrage on the first principles of optics can have escaped detection. The keeper and

his father have had charge for nearly 50 years.

It might be worth the consideration of the Government, whether the Light House establishments of England or the United States should not be visited by the Inspector. He could in the course of a few weeks obtain a mowledge of the advance made in the science and practice of Light House work, which would conduce most materially to the efficiency and economy of the service in Nova Scotia. If the Government contemplates changing the illuminating apparatus of Sambro for a Dioptric apparatus, I would recommend them to apply to Mr. Chance at Birmingham, who would send them an estimate for a second and third order light, including the expense of sending a man out to superintend the fitting of it. A new lantern would of course be required. He would supply that also, and undertake to erect it without interfering with the present lamps until the last moment. I would

## VPPENDOX NO 8 DIGERTHOUSES

suggest that Captain Shortland be consulted about the kind of light. He might from his practical knowledge suggest some change in the appearance of the light on certain bearings, so as to enable vessels to clear the dangers in the neighborhood. I need hardly allude to the absolute necessity of ample notice being always given in England and elsewhere, of any contemplated change in the character of a light, the erection of a new, or the extinction of an old light.

I have the honor to be, Sir,

Your obedient servant, ALFRED P. RYDER, Captain.

Vice Admiral

SIR ALEXANDER MILNE, K. C. B. &c. &. &c.

Nova Scotia.—No. 206.

Downing Street, 6th October, 1862.

MY LORD,-

I have communicated with the War Department and with the Board of Trade, on the subject of Your Lordship's Despatch No. 76, of the 20th of August, relative to the Light House at Sambro, and to some of the other Lights in Nova Scotia, as well as to the fog signals.

On the subject of the Lights, I have the honor to enclose for your information a copy of a letter which I have received from the Board of Trade.

With respect to the diminution in the issue of powder for fog signals, I quite agree that it is very undesirable that any change should be made which can diminish the efficiency of those signals, but there seems to be some misunderstanding on the subject. I cannot learn that any order for a reduction in the charge of powder has been issued by the War Department; and if you will refer to the former correspondence relative to the signal stations concluded in your Despatch No. 46, of the 5th of May, you vill find that it was at that time settled, that all the expenses of fog signals should be borne by the Provincial Government, with the exception only of the artillerymen, who were to be furnished by the Imperial Government. I shall be obliged to you to report whether this business has not accordingly been undertaken by the Provincial Government; and, if that be so, it will probably be in your power to procure a revision of any orders which they may have given for a reduction in the charge of powder employed in firing the signals.

I have the honor,

&c.

NEWCASTLE.

(Signed)

The Right Honorable
THE EARL OF MULGRAVE,
&c. &c. &c.

No. 97.—Miscella.

Government House, Halifax, N. S., Nov. 11, 1862,

MY LORD DUKE,-

In reply to your despatch, No. 206, Oct. 6, 1862, I have the honor to enclose the copy of a Report which I have received from the Inspector of Light Houses, by which your Lordship will see that immediate steps have been taken, as far as possible, to rectify the defects in Sambro Light House.

which were pointed out in Capt. Ryder's Report. New lamps and reflectors have been substituted for those which have become defective, and every attention will be paid in order to make the lights as effective as possible, until further and more permanent improvements can be carried out.

With regard to the substitution of a new Dioptric Light for the apparatus at present in use, it will be necessary to obtain the sanction of the Legislature before taking any steps for that purpose, as the expense which it would

entail would be considerable.

I observe that the Lords of the Committee of Privy Council for Trade, have expressed themselves of opinion that no light of less than a 2nd class order would be sufficient. By an estimate, however, which I have received from Messrs. Chance, I find that a light of that description, delivered in Halifax, would cost £1818 stg., exclusive of the expense of putting it up; and I fear that it will be difficult to procure so large a sum without considerable delay. A new Lantern is required, at Sambro, which should be erected during the Summer, and it is therefore very desirable that any change there may be made should be done at that time.

I am anxious therefore to be informed whether in the event of its being found impossible to erect a second order Dioptric Light, on account of the expense, it might be advisable, in the opinion of their Lordships, to adopt a third class Dioptric Light, rather than to erect a new Lantern for the present apparatus, which would, in all probability, delay the introduction of

the Dioptric Light for many years.

Undoubtedly it would be most desirable in a position of so much importance as Sambro, to erect a first, or at any rate a second class Light: the expense however of the Light House service in this Province is very great. The extent of coast to be lighted is about 800 miles, and for this purpose 43 Light Houses of different classes have been erected, and are kept in constant operation. Last year two important Light Houses were erected; one at Cape Sable, and the other at Cape George: during next Summer some extensive repairs will be required in several of the other Light Houses, and as the expenditure far exceeds the Revenue derived from the Light dues, I fear that it is hardly likely that the House will vote so large a sum as would be required to erect a 2nd class Dioptric Light; and in that case it will be necessary to decide whether a 3rd class Light might not be preferable to continuing for an indefinite period the present Catoptive Light.

With regard to the alteration which was made in the charge of powder for the fog guns at Sambro, it appears that it took place in consequence of an order from the Horse Guards, a copy of which I enclose. The whole thing, however, appears to have originated in a misapprehension on the part of the authorities at home, of the object for which the guns at Sambro are fired. This mistake was rectified by Major-General Doyle, as soon as his attention was drawn to the subject. With respect to the expense of the ammunition for these fog guns being borne by the Provincial Government. I regret to say there appears to have been some neglect. The signal stations referred to in my Despatch, No. 49, 5th May, 1859, for which a sum of £250 a year was voted, are distinct from the fog signals at Sambro, and are used for the purpose of reporting vessels entering the harbor. This sum has been regularly paid ever since. During the Session of the same year, a resolution was passed in Committee of Supply, authorising the payment of the ammunition used for the fog guns at Sambro. It does not appear, however, that any claim has ever been made for the payment: and as I do not find that the vote has been repeated in subsequent years, I presume that, the amount being small, and no application being made for payment, it has inadvertently been omitted. I do not, however, anticipate that there will be any difficulty about the payment in future.

I have, &c.,

(Signed)

MULGRAVE

His Grace

THE DUKE ON NEWCASTLE,

(COPY.)

Nova Scotia.—No. 220.

Downing Street, Dec. 24, 1862.

My Lord,-

In answer to your Despatch, No. 97, of the 11th of November, relative to a Dioptric Light for the Light House at Sambro, I have the honor to forward to you for your information and guidance the enclosed copy of letter which I have received from the Lords of the Committee of Privy Council for Trade on the subject.

I have, &c., &c.

(Signed)

NEWCASTLE.

The Right Honorable
THE EARL OF MULGRAVE.

(Copy.)

MR. FARRER TO THE DUKE OF NEWCASTLE.

Office of Committee of Privy Council for Trade.

Marine Department, Whitehall, Dec. 22, 1862.

SIR.

I am directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of your letter of the 5th inst., inclosing a copy of the despatch from the Lieutenant Governor of Nova Scotia, enquiring whether in case there should be any difficulty in providing the necessary funds for the purchase of a second class Dioptric Light for Sambro Light House, a third class Dioptric Light would be preferable to a new Light of

the description at present in use.

With reference to this inquiry, my Lords direct me to state for the information of the Duke of Newcastle, that the Light at Sambro is a fixed Light, and that a third order fixed Dioptric Light is quite unfit for a sea light at the entrance of such a port as Halifax. It is at any rate a question whether the reflectors will not give a better light than a fixed Dioptric Light of the third order; and under these circumstances, and considering that new Lamps and Reflectors have been substituted for those which had become defective, it appears to my Lords that it will be better to defer any alteration in the character of the Light until the means are provided for placing one of at least the second order.

My Lords do not think that any delay, which may occur in providing such a Light, need prevent the placing of the new Lantern referred to by the Lieutenant-Governor; but the Lantern should be so constructed, as to be suitable for a Dioptric Light, of at least the second order, and then the apparatus can be changed when the cost of such a Light is voted.

I have, &c.,

(Signed)

T. H. FARRER.

The Under Secretary of State, Colonial Office.

# APPENDIX No. 9.

# BOARD OF WORKS REPORT.

Office of Board of Works, Halifax, January 1st, 1863.

SIR,-

I have the honor to submit, for the information of His Excellency the Lieutenant-Governor, the report of the Board of Works for the year

ending 31st December, 1862.

The estimated expenditure of the several establishments under the control of the Board for the past year, amounted to \$104,122 68; and the entire payments made during the same period, for all the services, were \$93,414 47—leaving a balance of \$10,708 39 to meet the liabilities of the department to the 31st December, 1862, amounting to \$15,276 39 (this being in excess of the grant to the extent of \$4568 18). The total receipts from all the services, for the year, amount to \$12,610 09.

#### PROVINCIAL BUILDING.

The estimated cost of this service, for the year, was \$5500 00; and the disbursements for the necessary repairs, and other expenses connected

therewith, amount to \$4845 95.

The Board would respectfully recommend, that the window sashes and frames of the building (several of which are much decayed), be repaired, and painted on the outside; also, the halls, which have become very dingy, and, in many places, disfigured, be painted.

The cash received for this service amounts to \$3 00.

#### GOVERNMENT HOUSE.

The amount of estimate to meet the annual outlay of this service was \$2,400 00, and the sum expended in repairs, &c. for the year, was \$2672 55; thus exceeding the sum voted by \$272 55. This excess has arisen from the impaired state of the lower basement of the building, which required more extensive repairs than had been anticipated.

The garden fence is in a very dilapidated state, and will require to be

thoroughly repaired in the early part of the spring.

The stables, which have been so often referred to in former reports, still remain in the same decayed state, and the Board would recommend that steps be taken to construct suitable buildings in their stead. There is a credit of \$48 82 to this service.

#### PROVINCIAL PENITENTIARY.

The number of convicts in this institution on the 31st December, 1862, was forty-five males and two females—in all forty-seven. Thirty males and one female, were admitted during the past, year. Nineteen have been discharged, having served the full period of their sentence; and five have been liberated through His Excellency the Lieutenan-Governor's clemency. Two have broken prison, one of whom has been recaptured

This institution has been laboring under considerable disadvantage for want of sufficient accommodation for the employment of the convicts at the several trades prosecuted therein; and to obviate this difficulty, a range of shops, extending from the main building along the northern wall, two stories in height, (the same to be constructed of granite,) have been commenced during the past summer, which, when completed, will most materially advance the interests of the establishment.

The Board having experienced some inconvenience in disposing of the stock made in the shoe shop, have concluded to hire this branch to one of the city manufacturers, he finding all the materials, and paying monthly,

at a fixed rate, for the work performed.

The Committee appointed by the Legislature of last Session, on the subject of the Penitentiary, recommend that a distinct building be erected for a forge. The construction of the buildings already referred to, has prevented their recommendation being carried into effect; but to meet their views, the forge has been detached from the other shops.

On account of the several escapes from the institution, it was deemed necessary to remove the keeper (Mr. Fish), and to appoint a younger and

more vigorous person in his place.

The sum set apart to defray the expenditure of this establishment was \$7750 00, and the actual sum paid during the year \$8479 88½; being in excess of the sum voted \$729 88½, which arose from the construction of the fence in front of the prison, new padlocks for cells, and the entrance gates, &c.; and the credits amount to \$1101 57.

On reference to the Schedule hereto annexed (Appendix A), it will be perceived that a much larger amount than that already stated, will appear

to the credit of the Penitentiary.

#### HOSPITAL FOR INSANE.

The disbursements of the Hospital for the past year was \$21,222 90, and the estimated sum set apart therefor \$19,100, from which it will be seen, that the outlay has exceeded the estimate \$2,122 90, arising from circumstances which could not be anticipated when the probable expenditure for the year was made out.

In the month of March an easterly gale carried away the old wharff and it became necessary in the early part of the summer to build another in its

stead, at a cost of \$447 80.

In mid-summer it was represented that the large boiler became defective, and on examination it was found to be as stated. This defect at so early a period, arose from the boilers having been improperly built in, or set, at first, the large (that referred to) was built in between the two smaller, and so low, that the action of the moisture being below the level of the drain, had accelerated its decay, otherwise, this boiler would have lasted a number of years; and as they were not built in separately, as they should, they had all to be removed before the large one could be repaired.

It was recommended by experienced parties to reverse their position when reset, and build them in separately, so that at any future period, should any one of them require repairs, it can be removed without effecting in the least degree the working of the others. Those repairs and alterations have been attended with considerable expense, but it is confidently expected that a large saving in the annual consumption of coal will be effected

thereby.

The two small boilers now do all the required heating, washing and cooking, whereas, formerly, the three were almost constantly employed during the winter and spring for those purposes.

The expenditure connected with the repairs of the boiler, &c., amounted to \$1.830 41, to which add construction of wharf, \$447 80, give a total

of \$2,278 21.

The amount received from private patients and several counties during the past year was \$7,778 88. The Board regret to state, that, notwithstand

ing that every means have been used to collect the large balances due the Hospital, there still remains the sum of \$16,859 28 unpaid.

The Board would beg to state that the Honorable Attorney General has given them every assistance in this matter, and it is mainly due to his ex-

ertions that the sum stated has been paid.

The accounts have been regularly rendered through the Honorable Attorney General to all parties in arrears, and in the schedule hereto annexed will be found a statement of the sums due at the end of the year.

The recommendation of the committee on public accounts in reference to the sum of £350—a portion of the "Brown fund" deposited in the Bank of B. N. America—viz., that the amount be withdrawn and re-invested in some fund where the dividends would be more advantageous to the purposes intended by the testator. Their suggestion has been carried into effect, and that sum now realizes 6 instead of 3 per cent. as formerly. The roof and other portions of the building sustained considerable injury by the gale of the 6th December last, and will require a large amount to repair the damage.

The Board would respectfully recommend the perusal of Dr. Dewolf's report, in which will be found a detailed account of all matters connected

with the Hospital.

#### SABLE ISLAND.

During the past year there were two vessels wrecked on the Island. On the 7th May the ship "Zone," of Portland, Maine, from Newcastle, bound to Boston, was stranded on the south side of the north-east bar, and all on board were lost except one man. The articles washed on shore, were a number of casks containing calcined magnesia and chloride of lime. On the 1st of August the barque "Jane Lovitt," of Yarmouth, N. S., from St. John, N. B., with a cargo of deals, bound to Cork, was wrecked on the south side of the Island, the crew were all saved, and by the assistance of the Superintendent and the men at the station the greater portion of the sails and rigging were secured; a large quantity of the cargo was washed ashore. In the month of August the schooner "Daring" brought a cargo of twenty-four ponies off the Island, which were sold on their arrival here at public auction.

Two of the Commissioners visited the Island in the month of August, and during their stay inspected all the outposts, which they found in good

repair.

The disbursements of the Island for the past year amount to \$4,652 70; and the estimated expenditure was \$4,060; the credit of this service amounts to \$1,241 51.

### SCHOONER DARING.

The Daring made the usual trips to Sable Island during the past season, also three trips to the westward, carrying the supplies for the various Light Houses on that station, and a similar number of trips to the eastward, performing the same services for the Light Houses in that direction. The disbursements of the vessel while in commission amount to \$5,912 34‡, and the sum granted was \$4,400, with a credit of \$361 29.

### LIGHT HOUSES.

The undermentioned Light Houses, viz:—Scattarie, Shelburne, Brier Island, Seal Island and Digby, have received extensive repairs during the past season; and those of Brier Island, Seal Island, and Digby, have been supplied with new Lanterns. Deeds have been secured for such of the Light Houses as were erected on private property (eight in number); and the same have been registered in the respective counties in which they are located. The lights on Maugher's Beach, Sambro, and Devil's Island, have been, last year, supplied with Albertine Oil, instead of Pale Seal as former-

ly, and it is found to give a more brilliant and uniform light than that

given by the Pale Seal Oil, and it is expected to effect a saving.

The estimated requirements of this service for the year was \$45,130 00, and the liabilities for the same period amount to \$44,562 54, with a credit, arising from the sale of condemned stores, refuse oil and empty casks, &c., of \$2,075 02; and it will be perceived, on reference to the Report of the Superintendent, herewith submitted, (appendix C), that he has recommended several of the Light Houses for repairs during the ensuing season; also that those of Scatteric and St. Paul's Island be supplied with Albertine or Pale Seal Oil, instead of Sperm Oil as at present.

#### BOARD OF WORKS.

The provision made to meet the outlay of the Board for the year, was \$3,580.00: in this sum is included the salaries of the Chairman and Superintendant of Light Houses, amounting to \$2,600 00, which has been paid by the Honble. Receiver General; leaving the sum of \$980 00 to pay the Clerk's salary, and the current expenses of the office.

I have the honor to be, Sir, Your most obedient servant,

HUGH MUNRO.

Chairman.

To the Honorable
THE PROVINCIAL SECRETARY,
&c. &c. &c.

## APPENDIX (A.)

Provincial Penitentiary,
If alifax, December 31, 1862.

I beg to submit the following report in connection with this establishment.

I have the honor to be,

Sir,

Your obedient servant,

W. A. CHIPMAN, Superintendent.

H. Munro, Esqr.
Chairman of Board of Works

The contract prices of flour and beef were higher, and the cost of potatoes greater, in 1862 than in 1861.

## APPENDIX (C.)

Office of Board of Works, Halifax Dec. 31, 1863.

SIR.

During the present year. I visited the greater number of the Light Houses in this Province, and beg to hand you the following report:

In the months of July, August and September last, new Lanterns were placed on the Light Houses on Seal Island, Brier Island, and at Digby Gut, and a considerable amount of other repairs made to the buildings at these places; and at Scatterie and Shelburne Light Houses various repairs and improvements were made.

The Light Houses on Sambro Island and at Low Point require new Lanterns; for the latter a lantern is already made, and materials provided

for completing the job next summer.

Several of the Light Houses have old and much worn lamps which

should be removed and new ones supplied early next season.

The Light Houses and other buildings on Cranberry Island, White Head, Cross Island and Coffin's Island, require repairs; and the Light House at Apple River should be moved further eastward, say 50 yards, and alterations made in the building that a better light be shown than heretofore,

The Light Houses at Port Williams and at Margaretville should be moved, so as to show light farther down the bay; and the colored glass should be placed at a sufficient distance from the clear glass to show distinct lights. At present the buildings are so situated that vessels running up the bay don't open the lights till nearly abreast of them; consequently, with fair wind and flood tide, they are carried past the breakwaters before sail can be taken in.

Albertine Oil has been introduced into the Light Houses at Devil's Island, Meagher's Beach, and at Sambro, but I cannot state accurately the amount of saving effected, as the oil was some time in use before wicks of a proper description were procured; but I am certain that a clearer and more uniform light is obtained from Albertine Oil than from Seal Oil, and at a

saving in quantity.

I would advise that a buoy be placed on "Nag's Head Shoal," in Louisburg Harbor; one on "Poule Reef," in Arichat Harbor; and one on the "Budget," entrance of Cape Negro Harbor. The buoy placed on the "Budget," in 1861, has gone adrift.

I would recommend that Albertine Oil or Seal Oil be used at St. Paul's and Scatterie Light Houses instead of Sperm Oil; and that some rule be made and observed in supplying Stoves and Boats to Light House Keepers.

I am, Sir,
Your obedient servant,
M. D. McKENNA.

HUGH MUNBO, Esq. Chairman Board of Works. ingerier (n. 1841). Englisher Statement (n. 1841). 

## APPENDIX No. 10.

## PROVINCIAL HOSPITAL FOR THE INSANE.

REPORT OF THE MEDICAL SUPERINTENDENT, 1862.

To the Commissioners of the Board of Public Works.

### GENTLEMEN:

The fifth annual report of the Provincial Hospital for the Insane is herewith respectfully submitted.

On the first of January, 1862, there were one hundred and seventeen

patients in the institution; sixty-two males, and fifty-five females.

During the past twelve months forty-three have been admitted—thirtyone males and twelve females; making the entire numbers under treatment this year one hundred and sixty.

The daily average for the year has been one hundred and twenty-one; thirty have been discharged—nineteen males and eleven females. The present number in Hospital (including three absent "on trial"), is one hundred and thirty.

Of those discharged fifteen have been restored, eight more or less im-

proved, and five have died.

The rate of mortality has been for this year 4.13 per cent., for the preceding three years 6.51 per cent., and for the four years since the opening of the Hospital 5.65 per cent., reckoned upon the average numbers under treatment.

The recoveries are 34.88 per cent. upon the admissions of the year; the average of four years has been 22 per cent.

TABLE
Of monthly admissions and discharges for the past four years.

1859. 1860. 1861.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Malos.	Females.	Totals.

Discharged	6	3	3	6	. 5	7	5	8	10	11	6	6	47	29	76
1862.					1										in the second
Admitted	4	2	2	5	4	1	5	5	2	5	5	ેલ	31	12	43
Discharged	2	5	• 2	5	4	2	•••••	••••	2	4	1	3	19	11	30
Remaining	119	116	116	116	116	115	120	125	125	126	130	130	· 74	.56	130

The whole number admitted since the opening of the Hospital has been two hundred and thirty-six, and one hundred and six have been discharged.

The constantly increasing number of patients renders it necessary, as stated last year, to make provision for their reception and care. Who, that knows the value of early treatment in insanity, will consent to have the Provincial Hospital crowded with inmates to such an extent, as to exclude a great porportion of the recent cases seeking admission? To this sad pass it must soon come unless means be taken to extend the building. Having already strenuously urged this course, it remains only now for me to refer to what was advanced in last year's report.

If the carrying out of the original design be considered at the present time impracticable, owing to want of sufficient funds. I would respectfully submit the propriety of erecting a range of cottages of an inexpensive character upon the grounds, where the more quiet and orderly patients might be domiciled. This course has been followed in several British asylums, so as to extend their means of accommodation, and to give ample opportunity for classification; and the results are looked upon as highly satisfactory.

The plan although modern is not altogether new. In the Asylum Journal of Mental Science for May, 1855, it is recommended "that further accommodation (for chronic lunatics) should be provided, when needful, not by enlarging the existing buildings, but by the erection of distinct houses builting on a simple plan, retaining as much as possible the ordinary arrangements of English homes." In the same Journal for April, 1858, it is stated "This opinion has been subsequently adopted, both by the English Commissioners in Lunacy, and by the Irish Inspectors of Asylums."

These remarks, however, have reference to finished asylums, and are only introduced here as an alternative. If practicable by any means to carry out the original design, it will be decidedly preferable to complete the building, only one-half of which is now erected.

Ages of the patients admitted in 1862, and previously.

10

	1862.	1859, '60, '61.	Total.	Population, 1861
From 5 to 7 years	3 13 8 4 5	3 8 52 48 44 17 10	3 11 65 56 48 22 13	80551 58146 3612 26461 18036 13671 5964
Unknown	5 43	193	1 10 236	•

Nearly ten per cent. of all the admissions are upwards of sixty years of age, showing that the Hospital is made to serve as a resting place for those advanced in years, whose insanity was concealed at home until they became unmanageable. When no longer amenable to family control, they are sent here to be fed and nursed; nor do we complain of this; it is inevitable.

The liability to insanity in those from 10 to 30 years of age, appears from the foregoing table as 1 in 1825 of the population—while from 30 to 50 years, the proportion is 1 in 600.

Former residence as stated on admission.

	••••••		•••••	6	6	ا التعق
	-		43	193	236	387

This table shows that one hundred patients who were insane in March, 1861, are still without hospital care. Many more indeed must be reckoned as either kept at home, or wandering from place to place; since, of the total number received into Hospital, many were cases of recent occurrence, (some subsequent to the taking of the census) and several have been more than once admitted.

By a comparison of the admissions from each county, with the number of insane resident therein, we find that the counties nearest to the institution have sent in a much larger proportionate number than those more remotely situated. This is doubtless partly owing to the greater facility in effecting the commitment, but partly also, it is reasonable to suppose, from their better knowledge of the Hospital and its management.

It is gratifying to find that where the character and design of the institution have been pointed out to patients previously to their being brought here, they have for the most part come with little or no reluctance. Those, who from a recurrence of their insanity have required to be re-admitted, have returned willingly, some even urging their friends to send them back.

Of those under treatment this year thirty were private patients—fifteen males and fifteen females; the remainder being supported by the several counties of the Province, except the transient poor, who form a Provincial charge.

#### DISCHARGED.

During the past year thirty have been discharged, of whom fifteen were restored (eight males, seven females), exclusive of three absent on trial, and probably well. Several of those recovered were from one to three months with their friends "upon trial," before their restoration was pronounced complete.

Eight were discharged, more or less improved, (five males, three females). One of the number has, owing to a premature removal, been re-admitted,

with greatly diminished prospects of recovery.

Three of the above were cases of long standing, and their improvement

was such as to induce their friends to keep them at home.

One patient was informally admitted. He brought medical certificates of insanity, and obtained temporary admission; but the requisite order of two justices not having been given, he was soon discharged.

One patient was brought without any certificate for re-admission, and, on being examined by four medical men, one pronounced him partially insane, and three were of opinion he was not insane; he was therefore allowed to take his discharge.

Five have died during the year (four males, one female). Of the former one died from epilepsy, and one, a child, from marasmus, accompanied by

gradual loss of speech and motion.

One, who was a subject of general paralysis, died of phthisis, the symptoms of which were completely masked during life. The Essay of Dr. Workman, of Toronto, in the American Journal of Insanity for July 1862, led me to look carefully for the immediate cause of death; and, so far as a single case goes to confirm his statement, respecting latent phthisis, this certainly corroborates it. The lungs in this instance were completely studded with small tubercles.

One died of general paralysis. This was a well marked case of the disease. Owing to the patient's helplessness, when passing into the last stages of his illness, he was placed under the kind and judicious care of an experienced female nurse, by which means he was not only rendered far more comfortable, but there is reason to believe his life was thereby prolonged. By using an air bed, on German springs, the sloughing from pressure was retarded until shortly before death; but, when it once set in, it rapidly extended.

The only female whose death we have to record this year, died also of general paralysis. This patient was a kleptomaniac, prior to admission. She was arrested for stealing and sent to Bridewell, where her insanity be-

came manifest, and she was transferred to the Poor's Asylum.

On the opening of this Institution, she was among the earliest cases of admission. Her acquisitiveness continued; she had no regard to the value of what she took; concealing the most trifling things, which, when discovered, she always claimed as her own. She had exalted ideas of her power and wealth; was goodnatured and very generous, offering large imaginary sums to all her acquaintance.

When addressed as to her health, her invariable answer was, "first rate."

She was fond of gay colors, and exceedingly gratified when noticed.

The quivering lip, the tremulous tongue, and faltering voice, were among the early manifestations of the serious nature of her malady. Gradually her ideas became more and more extravagant. She insisted she was only fifteen, while her real age was more than forty. She looked anxiously for the arrival of every Cunard Steamer, expecting the Prince of Feathers, as she said, to come purposely to marry her.

Her sight was somewhat impaired from the first, and ultimately both sight and hearing failed and she shuffled along with an unsteady gait. At

last she became unable to move; her voice was almost inarticulate; the sphincters were not under control; and, notwithstanding every precaution the sloughing was extensive.

Sinking very gradually, she died three years and eight months after admission; having reached the fourth stage of the disease, as graphically described by Dr. Salomon, in the Journal of Mental Science for October 1862

#### OCCURRENCES OF THE YEAR.

Two very determined efforts to commit suicide were happily frustrated. and several minor attempts of the same nature were successfully opposed. Forced alimentation, by means of the stomach tube, has had to be resorted to on several occasions.

One of the female attendants was found to be slightly indisposed a few days after joining the institution, and it was soon ascertained she had an attack of measles. Fortunately this became known in time for her toreturn to her friends, and the disease did not spread, not a single case having

occurred with us, except at the fireman's residence.

During the year, the changes in the staff of attendants have been sew. It affords me pleasure to bear testimony to the continued attention of all to their most harrassing and trying duties. In an exceptional case, where an attendant stood charged with negligence in allowing a patient to escape the Superintendent, before enforcing the strict rule applicable to such cases, called a council of the employees, and they unanimously upheld the discipline of the establishment.

In the summer, the patients had boating parties to McNab's Island and the North-west Arm, as well as fishing parties on the harbor, some of which resulted successfully. Two or three parties went in different directions in the autumn, berry picking. Another group of patients visited Laidlaw's gold diggings, and witnessed the operation of "the crushers."

Several went to hear Mr. Wynter's entertaining lecture on "China." Mr. Passow's reading at Dartmouth afforded another similar treat; and at the time the circus visited Halifax, a number of the patients were taken over to witness the performances. In the winter, nearly all the female patients were indulged with one or more sleigh drives.

We have from time to time been gratified by the visits of several of our restored patients, and by cheering letters from many others, whose gratitude seems unbounded. When fully restored, they always speak well of

the Hospital.

The farm and garden, considering their limited extent, have yielded abundantly, producing all the vegetables we required, except potatoes; and of these, a considerable quantity of the early varieties were raised. The breaking up of new ground has also been attended to.

The old wharf, reported last year as requiring enlargement and repairs; having been washed away in a storm, a new wharf of good size, and with

convenient landing steps, has been built this past summer.

The smallest coal-pits have been housed in, protecting the fuel from the

One of the steam boilers was found to be leaky, and as it had to be re moved for repairs, all three were transposed and re-set during the summer and autumn.

By permission of the Board, and through the kindness of a professional friend, Dr. J. Bernard Gilpin, of Halifax, in visiting the Hospital daily the Superintendent was enabled, for the first time in four years, to enough fortnight's excursion to the country, in September last. For this he desir to return his grateful acknowledgements.

In noticing the occurrences of the year, the re-appointment of a mig watch must not be omitted. Upon the recommendation of members on the Legislature last winter, a watchman was appointed, whose duty in second not only to guard against fire and thefts, but chiefly to act as a night after ant in the men's wards in cases of illness and bad habits?

#### ACKNOWLEDGEMEN

We have as hitherto been greatly indebted to kind friends for many very considerate favors. Their interest in this charity does not diminish, nor does their liberality slacken. This, more than anything else, cheers us on

in the performance of an arduous and responsible duty.

The desire manifested by numerous warm-hearted friends to promote the comfort and welfare of the insane is indeed most encouraging; nor is it by any means confined to the immediate connections of the patients. The subjoined list affords gratifying testimony to the unabated kindness of a benevolent community.

His Excellency the Earl of Mulgrave and Lady Mulgrave have continued to honor the Hospital with occasional visits, and to encourage the patients

by most acceptable presents.

The ministers of different denominations have favored us with Sunday afternoon services regularly as heretofore. The order and devotion observed at these services are most striking to strangers worshipping for

the first time in company with the insane.

In a recent article in the "Revue des deux Mondes," by Mons. du Hailly "Les Acadiens et nouvelle Eccose," his attendance at our religious services during the summer of 1861, is thus alluded to-" The patients of both sexes assembled in the chapel without any apparent preconcerted arrangement, and conducted themselves with a decorum which would have done honor to a congregation in full possession of their faculties. They rose—they sat—they knelt down—they sang in turn without the shadow of a mistake, and I was astonished to find that the service of the following week would be different from that to which they had just listened."

We have had several most interesting lectures during the week evenings. Rev. Thos. Crisp favored us with a pleasing account of Missionary life, il

lustrating the subject by numerous large colored engravings.

Rev. J. Brewster gave a most entertaining address, narrating the incidents of his temperance visit to Her Majesty's ships of war in this harbor.

F. Passow, Esq. considerately favored us with another of his admirable

Professor Hagarty and friends, including the Viscount Kilcausie, gave us no less than five concerts during the year. These were conducted in his usual masterly style, and were highly appreciated.

Mr. Manly and friends also favored us with exquisite music on several occasions. An anonymous friend kindly furnished military music for several

evening entertainments.

G. G. Gray. Esq. indulged us with an exhibition of the magic lantern, with dissolving views, chronotypes, &c., affording a rich treat to the

Dr. A. C. Cogswell generously gave a day's services in denistry, which

resulted in marked benefit to a number of the patients.

The late Rev. Dr. Shreeve gave several volumes of the Illustrated London News for our library. Messrs. Cogswell & Forsythe sent us numbers of illustrated papers at different times.

To E. M. McDonald, Esq., Queen's Printer, we are indebted for a copy of the census returns. Messrs. Hall & Beamish presented us with two

likenesses of General Williams.

J. Sandifer, Esq. of London, has again placed us under obligations by

sending most acceptable decorations for the walls.

G. A. S. Crichton, Esq. favored us with roots and flowers, as well as fruit trees and shrubs. Messrs. Avery, Brown & Co. gave us a variety of choice flower seeds. flower seeds.

Miss McMurray kindly gave a box of colored wools, artificial flowers, &c. for the patients. An anonymous friend gave several articles of wearing Another anonymous friend (formerly a patient) sent two boxes of raisins, and four dollars, for plum pudding for the inmates.

Mrs. H. Y. Mottigave a treat of fruit at Christmas to all the patients, and kindly furnished delicacies for their picnic and evening parties. Not

only those our immediate neighbors, but Mrs. Pilsbury and family at Woodside have very considerately invited convalescent patients to partake of their hospitality on different occasions; and several have thus emerged

gradually into society.

The Halifax "Evening Express," the "Morning News," (St. John, No. 1). B.), and the "Colonial Standard," (Pictou), have been kindly added to our list of newspapers. To the proprietors we desire to tender our specially acknowledgements, and to the press generally for their combined gratuitous supply of newspapers, now as heretofore most eagerly enquired for through the wards.

#### REQUIREMENTS.

We need an airing court for the excited patients. This want has been stated before, and as the resident numbers increase, the necessity for this exercising ground becomes more and more imperative.

We require an additional tank for hot water. When the south wing was being built, the desirableness of this provision was strenuously urged. It

is even more needed now.

A new coal shed in the vicinity of the boiler house is another of our requirements. The old building in which the fuel has hitherto been stored, is now becoming so dilapidated, as to be more or less injured by every gale of wind.

The plastering, as stated in last year's report, requires a great deal off renovation, indeed, nearly all the outer walls of the Hospital need to be furred-out, lathed and plastered. The external surface of the building ought to have some kind of water-proof coating, so rapidly do the walls absorb moisture.

The porches require painting, and the window sashes also, to preserve

them from the weather. The zinc spouting is sadly out of repair.

There are other wants requiring attention, but being of minor importance they are deferred until the foregoing essential and pressing exigencies are attended to.

#### CONCLUSION.

Reviewing the year just passed, we have to record the general results as satisfactory. It is difficult, however, to state the grounds of our gratification, without at the same time making a self-laudatory report.

In an establishment where it is expected that the greatest amount of personal freedom is not incompatible with the most perfect security, our exemption from any serious casualty is of itself a source of pleasing reflection.

We have a most healthful location, an abundant supply of pure water, and ample means of ventilation; to all of which our small mortality rate may in a great degree be attributed, as well as our freedom from epidemic disease, when diptheria and fever have prevailed with unusual fatality on all sides, and measles and influenza have also surrounded us.

We have great cause of thankfulness in the continued amendment of those who have left us to return to their home and friends. Exceptions there are of course, but these are few; and, as the friends of patients become enlightened, respecting the impropriety of too early removals, we

trust that relapses will be comparatively unknown.

For the health and safety that have been vouchsafed to us during the past, and for our exemption from many of the ills of life, we tender our devout and humble gratitude to the great Ruler of events, to whose protecting Providence we confidingly commit the future of this humane Establishment; resolving, at the same time, not to relax in our vigilance and care, but to exhibit our thankfulness practically and habitually.

JAMES R. DEWOLF,

M. D. Edinburgh,

Superintendent

Mount Hope, January 1st, 1863.

## APPENDIX No. 11.

## CIVIL LIST.

Government House, Halifax, N. S., 26th March, 1862.

MY LORD DUKE,-

1. I have the honor to inform Your Grace, that on Friday the 21st inst., on going into Committee of Supply, the enclosed Resolution marked A, was moved by Doctor Tupper in amendment to a proposal of the Government that the tariff should be increased by 2½ per cent. in order to liquidate the deficiency which has been caused chiefly, though not exclusively, by the falling off of the revenue in consequence of the war in the United States.

I also enclose the amendment marked B, by which this proposal was met.

2. This resolution, although it involved a deliberate violation of the contract entered into with the Crown by the Civil List act, and also contemplated reductions, which, even if practicable, would have entailed great hardship and injustice to many individuals, was only thrown out by a majority of two, Mr. Colin Campbell having resigned his seat in the Executive Council, in

order that he might vote with the Opposition.

3. I am fully aware that all matters of a purely local nature must now be left to the control of the Legislature; and there is certainly no subject which comes more legitimately under their consideration than the expenditure of money, and the taxation of the people. If, therefore, the resolution had been confined to such reductions as come lawfully within the control of the House. I should have been perfectly prepared to accept them, however unjust or inexpedient I might myself have thought them.

4. All salaries on the Civil List, however, stand on an entirely different footing, and have expressly and purposely been removed from the control of the Legislature by the Civil List Act.

5. I enclose a return marked C, which will show Your Lordship the annual value in each year, of the revenues, resigned by the Crown since 1850, and also the amount which was charged upon the Civil List. By this Your Grace will perceive that taking the whole period since the act was passed, the Province has gained largely by the settlement which was then made.

6. Nova Scotia is undoubtedly the lightest taxed Province in British North America, if not in the world. There are no direct taxes, and the tariff is at present only 10 per cent, and the amount paid per head of the population is \$2,30, or about 9s. 6d. In New Brunswick, the tariff is 12½ per cent, with 2½ per cent added, to pay for the Railway debt; and the rate per head is \$3,745; and in Newfoundland it is \$3,745, while in Canada, the tariff amounts to 20 or 25 per cent; and yet, such is the impatience of taxation, that when it is proposed to increase the tariff 21 per cent, as a temporary measure, to be applied exclusively to the liquidation of a deficiency which has been caused chiefly by the American war, rather than submit to this small increase, a leading member of the Opposition has proposed, and very nearly a majority of the House has been found willing to support, a resolution, having for its object the violation of a contract, deliberately entered into with the Crown, and by which contract the Province has already secured considerable pecuniary advantage.

7. I find in the "Colonist" newspaper, the organ of his own party, and therefore. I presume, correct, that Dr. Tupper is reported to have said, "I may be told that the Civil List does not terminate until eighteen months "after the demise of Her Majesty; but, as we have good reason to believe "that the British Government are quite willing to concede anything that the "Legislature may consider requisite for the satisfactory conducting of our "local affairs, and, as I am persuaded that the Lieutenant-Governor will not "interpose any barrier, but rather lend his co-operation in the matter, there "is not much prospect of any difficulty whatever in attaining the end proposed."

S. Your Lordship will perceive by this quotation, that Dr. Tupper considers, and I doubt not has persuaded many other members to the same opinion, that the civil list stood in the same position, as regards the control of the House, as any other portion of the revenue of the country; forgetting entirely that it is an equivalent, given by the Province in return for value received from the Crown; and that, although the act continues for only 18 months after the demise of the Queen, at the expiration of that time, the Crown Revenues do not revert to the Province, but to the Crown.

9. Such erroneous views, as I conceive them to be, having been openly taken by one of the leading members of the Assembly, I think your Lordship will agree with me, that the time has arrived when it is absolutely ne-

cessary that this question should be conclusively settled.

10. If, as Dr. Tupper seems to conceive, there is little difference between the Civil List and any other portion of the Revenues, and that salaries, settled by that Act, may be reduced or struck off at the pleasure of the Assembly, then, I think it would be far better to abolish the Civil List altogether, and to place all salaries on the annual votes of the House; because then all who accepted office on these terms, would know what they had to depend upon, and would not be deluded by the belief that the faith of the Crown was pledged as to the remuneration they were to receive for their services.

11. If, on the other hand, as I believe, the Civil List is simply a contract entered into between the Crown on one hand, and the Province on the other; whereby the Province has pledged its faith, in consideration of value received, to pay certain fixed salaries during the life of Her Majesty, then I say that any attempt on the part of the Province to diminish these payments, without the consent of Her Majesty first obtained, would be a breach of faith, which I cannot believe was ever contemplated by the supporters of this motion; and, I am quite sure, that the people of Nova Scotia would never sanction an act, so nearly approaching to repudiation, if the whole circumstances under which the Civil List Act was passed, were brought clearly to their recollection.

12. Even should Her Majesty consent to a revision of the Civil List, no reduction could justly take place without the vested interest of those hold-

ing the different offices being duly cared for.

13. Take for instance the Judges who are appointed for life, and who cannot be removed, except by an address from the two branches of the Legislature, in consequence of some misconduct. Upon what principles of justice could they be told, that although they had accepted office on the faith of the Civil List Act, having in all probability, in order to do so, given up private practice of greater value than the salary they were to receive, that because there was a deficiency in the Revenue, their salary was to be reduced? And yet this proposal has been deliberately made.

14. I need not, I am sure, inform your Grace, that under no circumstances should I have assented to such a proposal as this, without having first received Her Majesty's Instructions. And notwithstanding that the motion was lost, the majority was so small that I think it right at once to inform your Grace, in order that you may be enabled to furnish me with

such instructions on the subject as you may consider desireable.

15. On Monday the 24th inst., Mr. Howe addressed to me the enclosed letter marked D., with a request that I would transmit it to your Grace

with a view of ascertaining whether Her Maiesty's Government would be prepared to sanction a reduction of the salary of the Lieutenant Governor. As this is a question in which I may be presumed to have a personal interest, I have some delicacy in alluding to it; at the same time, as my interest in the matter can, under any circumstances, be only of short duration, I

feel bound to express the opinion which I entertain.

16. The amount of salary to be received by the Lieutenant-Governor is undoubtedly a question which may properly come under the consideration of H. M. Government, at any time when they consider a reduction desirable. At the same time, I have no hesitation in stating, that the present salary is totally indadequate to enable any person holding my present office to maintain the position which should be maintained by Her Majesty's representative in this Colony, without touching largely on his private means. This, I know, has been found the case with my predecessors, who have all stated that it was impossible to live upon the salary; and certainly I have proved no exception to this rule, and were my salary reduced, I could not, under any circumstances, continue to exercise that hospitality which is usually considered desirable in my position.

17. Whether it may be considered creditable to the Province, or advantageous to the public service, that Her Majesty's representative should be reduced to comparative pauperism, is not for me to say; but of this I am quite sure, that if anything like the reduction proposed by Dr. Tupper, were carried out, no one, without large private means of his own, could exist upon the salary: and, further than this, if the settlement of the Civil List is once disturbed, it would not be long before some fresh attack would be made upon it. I may be teld that no future reduction would be attempted; but I think that it is sufficient answer to this to say, that in 1850 the Civil List Act was considered a final settlement of the question, and yet, when a temporary pressure arises, it is proposed to reduce the salary, as settled by that Act, from £3,000 a year to £2,400.

18. It is also proposed to throw upon the Governor the whole expenses of the repairs of Government House, and the salary of the Private Secretary, services which have always been met by the annual vote of the House.

19. The services of a Private Secretary are indispensable to the Lieutenant Governor, and it would be impossible for him to perform his duties without one; and though I freely admit that the salary of the Secretary, not being on the Civil List, it is in the power of the House to refuse it, their doing so would throw an extra expense upon the Governor, which even his present salary is ill calculated to support.

20. As regards the repairs of Government House, it would hardly be expected that any Governor would expend his own private means on the repairs of the property which belongs to the Province—and the consequence

would be, the house would soon become dilapidated.

21. With regard to the present position of the Government, I shall address Your Lordship in a separate dispatch.

I have, &c. &c.

(Signed)

MULGRAVE.

His Grace

Halifax, 24th March, 1862.

MY LORD,-

In the debate on the Estimate, which closed on Saturday night, it was assumed that Her Majesty's Government would interpose no obstacle to the reduction of the salary of the Lieutenant-Governor to \$12,000, charging also upon that salary, the cost of the Private Secretary, now paid by the Province. Though I felt it would be unfair to present incumbents, who had accepted their offices on the faith of an Act of Parliament, to assent to a motion to carry out this policy, I will not disguise from Your Excellency that a very strong opinion prevails in the House of Assembly that the salary of the Lieutenant-Governor may be reduced, and I have certainly no desire to interpose any

obstacle to an independent review of the subject by the Secretary of State. Will you be kind enough, therefore, to transmit this letter to His Grace the Duke of Newcastle, and ascertain whether the assent of Her Majesty's Government will be given to a Bill in amendment of the Civil List Act to the extent of the reduction proposed?

I have, &c. &c.

(Signed)

JOSEPH HOWE.

His Excellency
THE LIEUTENANT-GOVERNOR,
&c. &c. &c.

(COPY.)

No. 30-Miscella.

Government House, Halifax, N. S., 3rd April, 1862.

MY LORD DUKE,

I have the honor to inform Your Grace that on Friday the 21st March, a motion having been brought forward by Dr. Tupper in the House of Assembly, having for its object a large reduction in the estimate submitted by the Government, and also a reduction of the salaries settled by the Civil List Act, Mr. Colin Campbell resigned his seat in the Executive Council, and voted with the Opposition, by which the majority of the Government was reduced to two.

On the meeting of the House, on Monday, Mr. Johnston put a question to Mr. Howe, enquiring what course the Government intended to pursue in consequence of the vote on Saturday night, reminding him, at the same time, of the letter which he had addressed to me on the 4th of January, and of the opinion which I had expressed in my Despatch No. 1, 8th of January, 1861, in which that letter was transmitted to Your Lordship. Both of these documents were laid upon the table of the House last Session.

Mr. Howe, in reply, informed him that his first duty would be to finish the business of the Session, and next, to endeavor to strengthen or reconstruct his Government; but that if he failed in accomplishing this, he should advise a dissolution. Since then Mr. Howe has informed me that he is confident that he has gained support, and that the Opposition would no longer be in a position to reduce his majority below that by which he has been supported for the last year; and that he also hopes before long to make further arrangements by which his Government may be strengthened.

However this may be, undoubtedly the Opposition, having divided on two items in the estimate, both of which had been included in the reduction proposed by Dr. Tupper, two members who had supported this proposition, refused to vote, and they were carried by the Government, in the one case by a majority of four, in the other by a majority of three, and the other votes in the estimate were carried without opposition.

I am still of opinion, that if the Government are really reduced to a majority of two, and are unable either by a re-construction or otherwise, to strengthen themselves, it will be impossible for them to go on with so small a majority. I presume, however, that if the Opposition are united, and anxious to press matters to extremes, they will undoubtedly take some opportunity of again testing the House before the close of the Session.

I own that I am not without hopes, that some coalition may be accomplished, by which a fusion may take place between the two parties, which have for so long a period been in violent antagonism to one another. If this could be accomplished, I believe it would tend more to the real prosperity of the country, than anything that could happen, as the two parties are now so nearly balanced, and the bitterness with which they conduct their

party feuds is so great, that no strong government can be formed, and the time which should be devoted to the legislation of the country, is usually

wasted in party strife.

There is now no great political question which divides them, and which should keep them in perpetual antagonism to one another. The matter in dispute is now simply one of men, not measures; and I believe that the time has now arrived, when the interests of the country demand that this bitter animosity should be softened down.

When great questions of internal policy had to be decided, it was natural that the country should divide itself into two parties, under leaders advocating the different principles for which they were contending, and that sinking all minor questions, they should submit themselves to the dictation of these leaders, and band themselves into two compact bodies, for the purpose of carrying out the great principles in controversy between them.

Now however that these questions have been settled, and the business of the legislature is confined to developing the resources of the country, enacting and revising laws to meet the altered circumstances of the Province, and to voting the supplies of the year, it appears to me that those duties would be far better cared for, and the interests and wishes of the people would be better ascertained, if this state of things no longer existed, and the representatives of the people were left to exercise their free and independent judgment on all matters brought under their consideration, without being transelled by party ties, so strong, that the vote of every member of the party is reckoned on as a matter of course, and that any member venturing to exercise his judgment, is condemned as a traitor to the cause he has been elected to support. I am aware that the real cure for such a system as this must rest with the constituents themselves; and I trust that the people of Nova Scotia are beginning to see the evils which must arise from its continuance, now that the cause from which it originated has ceased to exist: but so long as the two parties retain their old and traditional antagonism, old associations will induce a continuance of the evil. If however, the two parties were once, to any considerable extent, amalgamated, I believe that the system would be no longer tolerated; and members would feel free to exercise their own judgment on all questions brought before the assembly: the feeling of the people would be more truly represented, and each matter in debate would be decided upon its own merifs, and not because it was brought forward, or opposed, by the leader of the party who happened to hold the majority of the day.

The present time I believe to be particularly favorable for such an amalgamation: I shall not hesitate to use every constitutional influence in my power to bring it about, and Mr. Howe is, I know, ready on the part of the

Government to meet the Opposition on fair and honorable terms.

Whether these terms may be accepted by any leading members of the Opposition yet remains to be proved; so far, the attempt has not been successful: but should it prove that the cohesion of the party has already been shaken to such an extent that the Government are independent of this cooperation, I trust that they may yet see the wisdom of reconsidering the resolution.

If on the other hand, Mr. Howe has been too sanguine in his expectations, and their party is still united, and they find that they are able to reduce the majority of the Government to two, then I doubt not that they will take an opportunity of placing the matter beyond dispute; and, in that case. I think a dissolution could not be avoided.

What would be the result of a dissolution, it is impossible for me to say: both parties are sanguine that they would succeed; but my own belief is, that the majority would not exceed three or four, on whichever side it might happen to fall, and the country would still be left with a weak Government, while party animosity having been increased by a general election, it would be more difficult than at present to form any coalition.

How the present difficulty may terminate, it is impossible for me to say: the leaders of the Opposition affirm that a dissolution is inevitable as the have reduced the Government to a majority of two, and that, therefore, I am pledged to take that course, and that Mr. Howe is bound by his letter to me to advise it.

My Despatch, however, was written under circumstances entirely different to those which exist at present; and though I think that the Government could not, with a majority of two, go on without dissolving, it yet remains to be proved whether they are now in that position, and whether they may not be able to add to their strength by some new combination.

It appears, therefore, to me, that if the Opposition are united, and anxious to carry matters to extremes, it is now their duty, according to constitutional practice, not to trust to a single vote on a popular question, such as that moved by Dr. Tupper, but to bring forward a direct vote of want of confidence, which would at once show to the country the true position of affairs, and would relieve my mind of all doubt.

I have, &c. &c.

(Signed)

MULGRAVE.

His Grace

The DUKE OF NEWCASTLE, &c. &c.

(COPY.)

Nova Scotia.-No. 161.

Downing Street,, 30th April, 1862.

MY LORD,-

I have the honor to acknowledge Your Lordship's Despatch of the 26th of March, marked separate, relative to certain proceedings of the Legislature, which would have involved changes in the Civil List of Nova Scotia.

Those proceedings, however, were not successful. Until it shall be proved by some authentic act of the Legislature, I am unwilling to contemplate a possibility that the authorities of Nova Scotia would subvert the terms of an agreement deliberately entered into between the Queen's Government on the one hand, and the Legislature of Nova Scotia on the other hand, that agreement being equally binding upon both parties. I trust that this event will not occur. But since you have been obliged, not merely by the course of discussions in the Provincial Legislature, but also by a letter addressed to you by one of your own Government, to apply for my opinion on the subject, I have the honor to inform you that Her Majesty's Government rely on the good faith of the Province to maintain intact the engagements which they have contracted, and not to revive discussions which it was the very object of the Civil List measure to preclude.

With regard to the salary of the Lieutenant-Governor, I have every reason to believe that it is but barely adequate to the exercise of hospitality, and the maintenance of the dignity suited to the honorable position of Her Majesty's representative in a great and loyal British Province. For this reason I believe that it would be inexpedient to diminish it at any time, whilst to do so pending an existing interest would be unjust, and during the period of the Civil List Act, would be at variance with a settlement which, as I have already said, is binding on all the parties by whom it was

made.

I have, &c.

## APPENDIX No. 12.

### TRADE WITH FRANCE.

(Copy.)

Government House, Halifax, N. S. May 21; 1862.

No. 49.-Miscella.

My LORD DUKE,

I have the honor of enclosing a copy of a resolution of the House of Assembly, expressive of their desire to participate in the Commercial relaxations which have been granted to Canada by the Emperor of the French.

Although the resolution contemplates an united action of the Maritime Provinces in connection with the subject, it appears to me the proper course for me to pursue is at once to address your Grace upon the subject; leaving the other Provinces free to adopt whatever course they may consider most desirable for their own interests.

My Government are not at present in possession of the exact terms on which the Commercial relaxations have been conceded to Canada by the Emperor of the French; but they are strongly impressed with the advantages which would be derived by the encouragement of Trade with that Country. And they are desirous, should those terms prove such as would not interfere to too great an extent with the fiscal arrangements of the Province, that the same relaxations which have been conceded to Canada should be extended to Nova Scotia.

I trust that your Grace will therefore have the goodness to take the necessary steps for bringing this matter under the consideration of the French Government.

I have, &c. &c.

(Signed)

MULGRAVE.

His Grace
The Duke of Newcastle.

#### TRADE WITH FRENCH WEST INDIA ISLANDS.

(COPY.)

Provincial Secretary's Office, 11th September, 1862.

SIR,-

I have it in command from his Honor the Administrator of the Government to call your attention to some difficulties that have arisen in respect of cargoes of Nova Scotia vessels, consisting of articles of the growth, produce, or manufacture of the Province, being admitted into the French West India Islands at the reduced rate of duty to which, under recent alterations in the French code, they are entitled.

These difficulties seem to be in reference to the nature of the certificate by which the origin of the goods is verified.

Will you kindly procure, for the information of the Government, a copy of the law or act now in force in reference to the admission of colonial produce into these ports, and also such information as may enable the people of the Province to avail themselves of the benefit of the more liberal principles upon which it is understood the admission of Colonial goods into the French West India Islands is to be regulated.

I have, &c.,

(Signed)

W. H. KEATING, D. S.

W. Cunard, Esq.,

Vice Consul of France at Halifax.

(COPY.)

Vice Consulate of France, at Halifax.

Halifax, 12th January, 1863.

SIR,-

With reference to your letter of 11th September last, touching the question of trade between this Province and the French West India Islands, I have the honor to acquaint you that having referred your communication to the Consul General at Quebec, I have received the following information:

The Commercial treaties, concluded in 1860 between France and Great Britain, do not extend to their respective colonies, Nova Scotia therefore cannot claim in the French West Indies any more than she could claim in France, the benefits exclusively stipulated in those treaties for the products of the United Kingdom; at the same time the treatment assured in the French Empire to the principal articles of exchange that Nova Scotia possesses, is extremely liberal. For instance, woods (ainsi les bois) are admitted free of customs duty whether they be transported by English or French vessels, the two flags are in fact treated alike, in virtue of the additional articles of the Navigation Convention of 26th January, 1826, and are both subject in the French West Indies to the navigation dues of the Colonial Tariff, which are at present fixed at I franc 60 centimes, or 30 cents per ton measurement of the importing vessel when two thirds of the cargo are wood. This assimilation, which continues to be subordinate to the condition of direct transport and to that of justification of origin, assures particularly to the British flag the

**这种人种类的** 

benefit of exemption from a surcharge, which would be 10 francs, or \$1.70

per ton.

The law of the 3rd July, 1861, has completely changed the customs regulation of Martinique, Guadaloupe, and Reunion; since this law, so liberal in its terms, has come in force, the English colonies of North America, and particularly Nova Scotia, would find it to their advantage to open direct commercial relations with Martinique and Guadaloupe, more particularly at the present time, when these islands, which have until but recently imported from the United States, all the lumber they have required not only for building purposes, but likewise for the packing (emboucantage) of sugar, (which is their principal production,) are now on the point of being completely without that article, in consequence of the war, which has closed the Southern ports.

While this opening for one of the staple productions of this Province will no doubt secure the attention of those most interested in it, I may remark that the articles most required are boards (planches) of 1\frac{1}{4} inch (full inch) thickness; planks (madriers) 1\frac{2}{4}, 2 inch, and even 3 inch, larger than this they take the name of (plateaux), scantling (cartilages) 2 in. by 3 in., 3 in. by 3 in., and up to

8 in. by 8 inches.

The boards and plank ought to be not less than 24 or 25 feet long, the scant-

ling, especially the larger sizes, 34 to 42 feet long.

I take this opportunity of enclosing an extract from a letter recently received from the Consul General on the same subject, of which I believe you have no copy, but which may be useful in connection with the foregoing.

I have the honor to be Sir,

Your obedient servant,

(Signed)

The Vice Consul pro tem.,

JAS. R. MORROW.

The Hon. the Provincial Secretary of Nova Scotia.

Extract from a Letter from the Consul General of France, dated Quebec, 1st September, 1862.

"Already in 1860, in the French West India Islands, a law pronounced the admission, free of duty, of cereals when imported by French vessels, and has fixed the duty at 2 francs per 100 kilogrammes (220 lbs.) when imported in foreign vessels; and the same year another law has reduced from 7 to 3 francs per 100 kilogrammes the duty imposed until then on the importation of foreign codfish. More recently the navigation of the French Antilles, which before was exclusively reserved to the French fiag, has been opened to all vessels without distinction. The exports of the British Provinces of North America, consisting for the most part of natural (raw) productions, which our Colonial tariffs admit either free or at a very small duty, there is no necessity for the treaty concerning the existence of which you make enquiry."

## APPENDIX No. 13.

## ACTS OF ASSEMBLY.

No. 11.

(COPY.)

Downing Street, 2nd February, 1863.

My Lord,-

I have received, and have had under my consideration, the acts noted in the No. 3899 to 3005.

margin, passed by the Legislature of Nova Scotia, in the months of March and 3028 to 3028.

April last, and transmitted to me in your despatch, noted in the margin.

I have reported to Her Majesty in Council, my opinion, that the said Acts should No. 66, July 23, 1863, be left to their operation; and I have the honor to transmit to you, herewith, an order of Her Majesty in Council, dated the 9th of January, 1863, approving the report.

I have the honor to be,

My Lord,

Your obedient servant,

(Signed)

NEWCASTLE.

The Right Hon. the Earl of Mulgrave, &c. &c. &c.

At the Court at Osborne House, Isle of Wight, the 9th day of January, 1863.

#### PRESENT:

### THE QUEEN'S MOST EXCELLENT MAJESTY,

ARCHBISHOP OF CANTERBURY,

LORD PRESIDENT,

DUKE OF SOMERSET,

SIR GEORGE GRAY, Bart.

Whereas the Governor of Her Majesty's Province of Nova Scotia, with the Council and Assembly of the said Province, did, in the months of March and April, 1862, pass 81 acts, which have been transmitted, entitled as follows, viz.:

No. 3899. An act relating to the Gold Fields.

No. 3900. An act for the incorporation and winding up of Joint Stock companies.

No. 3901. An act to continue and amend the law regulating Customs Duties.

No. 3902. An act to continue the laws imposing Light House dues.

No. 3903. An act to amend chapter 126 of the Revised Statutes "of the Supreme Court and its officers."

No. 3904. An act for the amendment of the administration of Criminal Law.

No. 3905. An act to prevent frauds on creditors by secret bills of sale.

No. 3906. An act to amend chapter 18 of the Revised Statutes: " of the exportation of goods and of drawbacks:"

No. 3008. An act to alter and amend chapter 46 of the Revised Statutes "of County Assessment."

No. 3909. An act to amend chapter 23 of the Revised Statutes "of the Post

Office."

No. 3910. An act for imposing an excise duty on certain articles manufactured within this province.

No. 3911. An act to amend chapter 95 of the Revised Statutes "of River

Fisheries."

No. 3912. An act to prevent the distillation of intoxicating liquors, and for protecting the public revenue.

No. 3913. An act to regulate labor on the highways.

No. 3914. An act to amend chapter 157 of the Revised Statutes "of offences against religion."

No. 3915. An act to amend chapter 73 of the Revised Statutes "of Commis-

sioners of Sewers, and the regulating of district and marsh lands."

No. 3916. An act to legalize certain proceedings relative to county assessments.

No. 3917. An act to amend chapter 62 of the Revised Statutes "of laying out roads other than certain great roads."

No. 3918. An act to regulate the sale of staves, bricks, and other articles.

No. 3919. An act to amend chapter 89 of the Revised Statutes "of the settlement and support of the poor."

No. 3920. An act in addition to chapter 92 of the Revised Statutes "of the

preservation of useful birds and animals."

No. 3921. An act to amend chapter 92 of the Revised Statutes "of the preservation of useful birds and animals."

No. 3922. An act to amend chapter 46 of the Revised Statutes "of county assessments."

No. 3923. An act to continue and amend chapter 60 of the Revised Statutes "of public instruction."

No. 3924. An act to amend chapter 78 of the Revised Statutes "of pilotage,

harbours, and harbour masters."

No. 3925. An act to amend chapter 120 of the Revised Statutes "of patents for useful inventions."

No. 3926. An act to regulate the size of apple barrels.

No. 3928. An act for vesting all estates and property occupied by or for the Naval Service of the United Kingdom of Great Britain and Ireland, in the Lord High Admiral, or the Commissioners for executing the office of Lord High Admiral of the said United Kingdom for the time being.

No. 3929. An act in respect of executive and legislative disabilities. No. 3930. An act to continue the act to authorise a provincial loan.

No. 3931. An act to authorise a loan for the public service, and to provide for the repayment thereof.

No. 12.

Downing Street, 3d February, 1863.

My Lord,-

With reference to my despatch, No. 11, of the 2nd instant, enclosing an Order of Her Majesty in Council, leaving to its operation together with other acts of the Legislature of Nova Scotia, one passed on the 12th April last, and intituled "chapter 16, an act to amend chapter 157 of the Revised Statutes, of offences against Religion." I have to observe that I do not consider that Her Majesty's Government are bound to arrest the operation of an act of this kind, but at the same time I cannot but express my great regret at the most unusual severity of its provisions. It appears that any person who allows his child or apprentice to exercise any game, sport or play, on the Lord's Day, however harmless, is to forfeit not less than one, or more than twenty dollars, and may be committed to gaol in default of payment. I cannot imagine that such an enactment, however well intended, can be advantageous to the cause of religion.

I have the honor to be,

My Lord,

Your Lordship's most obedient humble servant,

(Signed)

NEWCASTLE.

The Right Hon. the Earl of Mulgrave, &c. &c. &c.

(COPY.)

No. 66.-Miscella.

Government House, Halifax, N. S, 23d July, 1862.

MY LORD DUKE,-

I have the honor to transmit for the information of H. M. Government two copies, certified under the Great Seal of the Province, of the acts passed during the last session of the Legislature, together with the report of the Attorney General thereon.

I have the honor to enclose a petition from the Nova Scotia Electric Telegraph company, praying that Her Majesty will withhold her assent from the bill authorizing the erection by Her Majesty Government of a line of telegraph between Halifax and the borders of New Brunswick.

During the last winter, I received a communication from Major-General Doyle informing me that it was the intention of Her Majesty's Government to erect a seperate line of telegraph to Quebec for military purposes, and requesting to be informed whether there was any local act which would interfere with this intention, and also, whether any legislation on the subject would be necessary.

I at once referred this communication to the Law Officers, who informed me that, although they did not consider any legislation absolutely necessary, still to avoid any question on the subject, they thought that a short act should be passed. Under these circumstances, a bill was introduced and passed by the Legislature, but there being at that time no immediate pressure for the passing of the act and the Telegraph Company expressing a wish to appeal against it no opposition was made to the introduction of a suspending clause, in order that they might have full opportunity to urge any reason against it receiving Her Majesty's consent, which they might consider necessary.

At the same time, however, that I have been anxious that the company should have full opportunity of representing their case, and of laying before your Grace any grievance they may conceive may be inflicted upon them by this act, I cannot agree with them in the justice of the claim they set forward, nor do I consider that any exclusive right is either expressed or implied in the acts under which they claim their privileges. In the original act, by which the Government of Nova Scotia were authorised to construct a line of Telegraph, it was enacted that, "no company, body corporate, &c., &c., should erect a line of Telegraph without the sanction of the Legislature," thus clearly, and in express terms, reserving to the Legislature the right of sanctioning the formation of other lines, should it see fit to do so.

In the act passed in 1851, by which the Nova Scotia Electric Telegraph Company was incorporated, no exclusive right is conveyed to the company, and therefore I apprehend that the company have no substantial grounds for opposing the

passage of this act.

Undoubtedly the company were bound by their act of incorporation, to conduct their operations under various stringent regulations, and power was reserved to the Government of resuming the entire control of the lines throughout the country on certain conditions; and under these circumstances, so long as the charter exists and the lines are kept in working order, it would be entirely unadvisable, and perhaps unfair, for the Legislature to sanction the formation of other companies, who would compete with them in the conveyance of telegraphic messages throughout the country.

This no doubt was the view taken by the Legislature, in regard to the Transatlantic Submarine Telegraph Company in 1855, and the New York, Newfound-

land, and London company in 1857.

The present bill, however, is of an entirely different nature, and its object being confined exclusively to enabling Her Majesty's Government to erect a separate

line for Military and Imperial purposes.

Notwithstanding this, however, were I of opinion that the bill violated any exclusive right possessed by the company, I should not for a moment hesitate to recommend the petition of the company to your favorable consideration, but as after a careful investigation of the subject, I cannot arrive at this conclusion, I see no reason for adopting that course.

The remaining acts do not, I conceive, require any comment on my part. That relating to the Militia, is a decided improvement on the old law, and will, I trust, secure as thorough a reorganization of the local forces as can be obtained with the

limited sum voted for defensive purposes.

The Gold act has been called for in consequence of the recent discovery of gold in this province; and from the short experience of its working since it has been in operation, I trust that it will prove very satisfactory.

I have, &c.,

(Signed) MULGRAVE.

His Grace the Duk of Newcastle.

(COPY.)

Nova Scotia-No. 213.

Downing Street, 6th November, 1862.

MY LORD,-

I have carefully considered an act passed by the Legislature of Nova Scotia, entitled "chapter 29, an act to authorise the construction of a line of electric telegraph for military purposes, from Halifax to the boundary line of New Brunswick."

This act is enclosed with others in your despatch No. 66, of the 23rd of July last, in which you also transmit a memorial addressed to the Queen by the Presisident and Executive committee of the Nova Scotia Electric Telegraph company, praying that Her Majesty's assent may not be given to this act, (which contains a suspending clause) unless the company is allowed compensation for any loss they may sustain by it.

I have also received letters from Judge Stewart, from Colonel Bazelgette, and

from Mr. Black, preferring the same claim.

In these papers the following facts appear:-

In 1848, an act was passed to facilitate the construction of an Electric Telegraph by the Government of Nova Scotia. It contained the following clause, (IL Vic. chap. 25, sec. 24.) "It shall not be lawful for any person or company whatsoever, directly or indirectly, to make and complete any Electric Telegraph stations and appurtenances, in any part of this province unless by the previous sanction and under the authority of the legislature of this province."

In 1851, an act was passed to transfer to the Nova Scotia Electric Telegraph company, the works already constructed by Government, and to enable that com-

pany to make telegraph lines throughout the country.

That act contains no intimation that the legislature intended to guarantee to the company the continuance of any exclusive privileges, which therefore remained in the position in which they were placed by the act of 1848, that is to say, the legislature was at liberty to authorize the construction of any other telegraph company, or number of companies, but without such authority no such company could be established.

In 1855, an act was passed to incorporate the Transatlantic company. It was apparently, not thought fit that this company should be enabled to intrench upon the profits and privileges then enjoyed by the Nova Scotia Electric Telegraph company, and a clause was added, (and I am ready to believe very properly added); to the effect that nothing in the act should be construed to authorize the construction of a telegraph line within Nova Scotia, or to interfere with the privileges of

the existing company.

In 1857, another company, the "New York, Newfoundland, and London Electric Telegraph company" appears to have been set on foot. And, on this occasion, Colonel Bazalgette states, the Nova Scotia Electric Telegraph company to have asserted to the Legislative Council, that under their act of incorporation they were, "so far as telegraphic rights were concerned, invested with all the privileges possessed by the province at the time when their act of incorporation was passed." What was the exact meaning of this strange assertion, or on what grounds it was made, or how the Legislative Council received it, the papers before me do not show. But it appears that the legislature eventually passed an act, which provides that the carriage of messages through Nova Scotia, should be effected by the Nova Scotia company, which rendered the establishment of the line dependant on an arrangement to be made with that company, and which expressly conferred upon the promoters of the new project the exclusive right for twenty-five years to furnish the province with the means of telegraphic communication across sea.

If this act had been allowed to remain in operation, it might perhaps have been argued with some force, that the exclusive rights which were thus conferred on the more recent company ought not in reason to have been withheld from its predecessor. But this was not the case. It is correctly stated in one of the documents submitted to me by Colonel Bazelgette that the act of 1857 was taken

a slight delay, disallowed on the express grounds "that the grant of such exclusive privileges was highly inexpedient, not only for the interest of the provinces but of

the Empire at large."

"Her Majesty's Government," Mr. Labouchere proceeded "are fully aware that it was urged that similar privileges have been conceded by the legislatures of Newfoundland and Prince Edward Island without the allowance of the Crown, but they must reply that the implied sanction of these acts given without fully adverting to considerations, the magnitude of which has been ever since acquiring a greater developement, does not bind to a continuance of a course of policy which they are satisfied cannot but prove 'exceedingly injurious, and this beyond the limits of the colony immediately concerned."

It had evidently never occurred to Mr. Labouchere, that the Nova Scotia Electric Telegraph company would claim on the ground of some implied and acknowledged understanding, a privilege which if granted to all, could only have been granted by the unequivocal act of the legislature, an act which if passed in Nova Scotia, would probably have been disallowed by Her Majesty as equally adverse

to Colonial and Imperial interests.

It is under these circumstances that the Company, Judge Stewart, Colonel Bazelgette, and Mr. Black, claim of Her Majesty that she will withhold her assent from the act now under consideration, with the object of retaining in the hands of their lessees (an enterprising American company) the profit and control of all the telegraphic communications, public, military and imperial of Her Majesty's Government.

I feel it is unnecessary for me after this statement, of what appears to me the material circumstances of this application, to say that I see no sufficient reason for withholding Her Majesty's assent from this act. It has therefore been submitted to Her Majesty for confirmation, in the usual manner. An order of Council, conveying her Majesty's pleasure, is forwarded to you by the present mail.

I transmit, however, copies of a letter which has been addressed to this office by Mr. Dickie, on behalf of the company; and of correspondence with the War Office, from which you will perceive that arrangements may very possibly be made

which will supersede the necessity of actually establishing a seperate line.

I have, &c.,

Nova Scotia.

Downing Street, 13th November, 1862.

MY LORD,-

I have received, and have had under my consideration, an act, No. 3927, passed by the Legislature of Nova Scotia in the month of April last, and transmitted to me in your despatch noted in the margin.

I have reported to Her Majesty in Council my opinion, that the said act should be specially confirmed; and I have the honor to transmit to you herewith, an order of Her Majesty in Council, dated the 1st instant, approving that report.

I have the honor to be,

My Lord,

Your obedient servant,

(Signed)

NEWCASTLE.

(COPY.)

At the Court at Osborne House, Isle of Wight, the 1st day of November, 1862.

PRESENT:

#### THE QUEEN'S MOST EXCELLENT MAJESTY,

LORD PRESIDENT,

VISCOUNT PALMERSTON.

LORD STANLEY OF ALDERLEY.

Whereas the Governor of Her Majesty's Province of Nova Scotia, with the Council and Assembly of the said Province, did in the month of April, 1862, pass an act, which has been transmitted, entitled as follows, viz.:

No. 3927. An act to authorize the construction of a line of Electric Telegraph for military purposes, from Halifax to the boundary line of New Brunswick.

And whereas, the said act has been laid before Her Majesty in Council, together with a letter to the Lord President of the Council, from the most noble the Duke of Newcastle, one of Her Majesty's principal Secretary's of State, recommending that the said act should receive Her Majesty's special confirmation. Her Majesty was thereupon this day pleased, by and with the advice of Her Privy Council, to declare her special confirmation of the said act, and the same is hereby specially confirmed, ratified, and finally enacted accordingly; whereof the Governor, Lieutenant Governor, or Commander-in-chief, for the time being, of Her Majesty's Province of Nova Scotia, and all other persons whom it may concern, are to take notice and govern themselves accordingly.

(Signed) ARTHUR HELPS.

#### APPENDIX No. 14.

## .CROWN LANDS.

Crown Land Office, 10th February, 1863.

SIR,---

The Crown Land Office during the past year does not exhibit in the customary abstract the same amount of work, as in some former years; the number of grants issued has fallen short, and the receipts do not equal those of 1861; but it is proper that I should explain, that the abstract does not embrace a very large number of applications in Cape Breton, nor the work accomplished there; besides the additional offices now combined with that of the Crown Lands, have largely added to the labors and duties of the officers employed.

The enquiries after the lands still unsettled, both granted and ungranted, whilst they encroach largely upon the time of the clerks in aiding the necessary searches, evidence a growing interest in their value and importance. The altered circumstances of the country—the gold fields and coal mines—with the demand for staves and other productions of our forests, consequent upon the closing of the Southern ports, are bringing the Crown Lands more into notice; and should it be thought advisable to encourage emigration, I do not doubt that we shall soon have

a large increase in the applications for grants.

The act for settling the titles to land in Cape Breton, has occupied the time of Mr. Hendry during the past summer. Under his direction, extensive surveys have been made, and the possessions of settlers have been defined by proper lines and bounds, thus producing a security in the tenure of their lands, which will necessarily stimulate their industry, and lead to other desirable results. The credit allowed to this class of the inhabitants, has not only had the effect of checking the issue of a greater number of grants, but will account in some measure for the fall short in the receipts; it is not intended to issue any of those grants until the instalments are paid. I am not prepared to offer an accurate statement of moneys paid on account of these instalments, but the amount is comparatively small.

The report of Mr. Hendry, the Commissioner, which accompanies the present, conveys very full and satisfactory information respecting the progress of his work. It will be continued the present year, and brought to a conclusion as early as possible. I apprehend some delay and difficulty in collecting the instalments as they fall due. I distributed printed notices throughout the Island, calling for payment of those due, but with little success; partly, I believe, owing to the want of means, but I fear with many from indifference. Some of the squatters have refused to sign any obligation. I recommend stringent measures as regards those parties; it would be unjust to the better disposed to allow them to escape. I respectfully submit to the Government, whether such arrangement might not be made to accept labor on the public roads in part payment, or in opening up new sections of the country for the purpose of settlement. As these surveys are expensive, and the charge at present borne by the province, no exertion should be wanting to realize sufficient money to cover the expenses of the commission.

In connection with this measure, I cannot avoid referring to the numerous com-

plicated questions which are stirred up as the work is in progress, and to enquire whether by some legislative enactment, certain principles might not be established to control the decisions in such cases, and thus present future litigation, as well as prevent injustice to poor and often ignorant men. It would be tedious to enumerate the points to which I allude; but it could never have been contemplated as part of the duty of the Commissioner of Crown Lands to investigate the rights of contending parties to land in possession of the original occupant or his descendants without title, who pretend to claim under judgments or mortgages, or any other supposed lien they may have acquired. It appears to me that the prevailing rule should be to give the grant to the party holding possession under the circumstances I have mentioned, and to leave the creditors to establish their rights before a different The obvious effect of this would be to drive the creditor to a settlement with his debtor, and to arrange between them to whom the grant should It is a very common practice for the creditor to stand aloof until application is made by the occupant, and then to enter his caveat; and it has happened, that children in ignorance of their parent's liability, supposing the property to belong to the crown, have continued to labor upon it, and increase its value, only to be deprived of it by a more knowing creditor. I am the more urgent upon this matter, because I also forsee that if the present system is pursued, every occupant of crown lands adversely, must be dispossessed by the government before the grant passes, or it will be virtually invalid, and perhaps the government be called upon for redress. The present condition of Cape Breton is more open to these remarks than Nova Scotia proper.

I regret to report, that notwithstanding every effort to protect the Crown Lands from trespassers, and several seizures made by the deputies, the system of plunder still continues to a large extent. It is not confined to one section of the province, and it is no easy matter to enforce the law against offenders. I trust the subject will receive some attention from the Legislature, and greater facility afforded for enforcing rigidly the penalty which the present law imposes. Under pretence of some old survey, or nominal purchase from an Indian, or some other frivolous excuse, the trespass is justified. I think such pretences ought not to be accepted, and that any person in future who interferes with Crown property upon which no actual settlement has been made, shall be made responsible, and entitled to no favor from the Government, if any prior application shall be made for a grant. I have taken all proper precaution to make public the determination of the Government to put down the lawless interference with the public property, those who are guilty cannot plead ignorance as an excuse:

I must again renew my observations of last year, respecting the office of Deputy Surveyors. There is an absolute necessity to adopt, as in other colonies, some better system respecting their appointment, qualifications and duties. Every change involves the task of instructing the new Deputy as to the manner in which his duties are to be discharged; this, at present, can only be done through a correspondence, besides the labor of supplying him with copies of plans, which ought not to be thrown upon the office. Every plan relating to his county, ought to be copied by the Deputy himself, they ought to be considered the property of the Government as well as other records, and transferred to the successor, it would save so much labor to the apartment. My views are fully explained in my report of last year, and impressed with the importance of the proposed improvements, I shall hope to receive the aid of the Government and Legislature, in the passage of such a law as will give effect to their operation.

I submit the propriety of repealing a clause in the crown land act, which has led to great abuse by an improper interpretation. The clause refers to the right of possession after application and money paid. In some disputed cases entries have been made, and serious damage done to the property before the controversy has been decided by the Government. No applicant should be permitted to take possession until his grant or authority is given by the Commissioner.

As it is my intention to prepare separate reports upon Indian affairs and those relating to the coal mines. I shall here close my remarks upon this branch of the public service, hoping that I shall have an opportunity of bringing before the

Crown Land committee, if necessary, anything further, which may require the

attention of the Legislature.

The abstracts herewith are in the usual form, and will afford to the Government full information of the aggregate number of acres disposed of last year, and of the moneys paid into the treasury for crown lands. The comparative statement shews also to what extent they vary from the year 1861.

I have the honor to be,

Sir.

Your obedient servant,

SAMUEL P. FAIRBANKS, Commissioner Crown Lands.

The Hon. the Provincial Secretary.

SAMUEL P. FAIRBANKS, Commissioner Crown Lands.

Department of Crown Lands,

Halifax, 18th February, 1863.

SIR,-

I now submit, for the information of his Excellency the Lieutenant Governor, the following statement of the work performed in Cape Breton during the past season, under the act of 1859, to facilitate the perfecting of titles in that Island. The work performed during the past season exceeds that of 1861 by about 20,000 acres, and upon the whole will be found quite as satisfactory. In reporting last year, several matters were referred to that do not require to be repeated. It may be proper in this connection, however, to mention the great advantage of conducting general surveys, or surveys on a large scale, over the system of making surveys by piecemeal; both as regards economy, and the greater degree of accu-The average cost of the surveys made during the past season is racy attained. about four cents per acre, or four dollars per hundred acres, and in plotting the work on the county plans, many of the old errors have been corrected. parts decided carelessness had heretofore prevailed in the mode of conducting surveys. So much so, that in many instances grants will have to be reconveyed to the crown, and new patents issued to correspond with the lines and possessions of the grantees. The number of disputes that are being settled under the operations now in progress, and the amount of substantial good to the settlements that come under the act, although not at present fully appreciated, yet, in after years, as the lands increase in value, and the advantage of having their boundary lines carefully defined and titles set at rest, will be found of incalculable benefit, and fully recognized.

It is hardly to be expected that the instalments will be regularly paid up, or anything approaching it. The larger number, however, will, as they can afford it, pay the purchase money and take out their grants. Last year, on an average, the four counties of Cape Breton Island paid about double the amount for land of that paid by any four counties of Nova Scotia. The amount paid, principally as instalments, was about four thousand six hundred dollars. Cape Breton county alone paid in through me about two thousand dollars. The amount expended for surveys was two thousand seven hundred and thirty-three dollars, leaving a considerable surplus. This is only mentioned to shew that the operations under

the act of 1859 are not burthensome to the province.

The following table shews in a condensed form, the amount of work performed.

The accompanying lists of squatters, with the quantity of land surveyed for each, and who have given bonds for the payment thereof; also the surveyor's plans of survey, on a scale of 20 chs. to one inch, exhibit the work more in detail.

Tabular statement shewing the number of squatters whose lots were surveyed in 1862 under the act of 1859; name of Surveyor employed, and number of acres surveyed; also expense incurred for surveys.

COUNTY.	No. of lots surveyed.	No. of Settlers.	Total number of acres surveyed.	SURVEYORS EMPLOYED.	Amount expended for surveys.
Cape Breton,	80	66	10,400	David McKeen,	\$427 50
Victoria,	43	40	5,898	Donald Ross,	178 00
Do.	130	130	20,856	D. B. McNab,	940 90
Inverness,	135	135	19,712	Murphy & Austen,	412 67
Richmond,	136	136	15,012	Jas. and Francis Mc- Kenzie, and J. J. Robertson,	774 57
	524	507	71,878		\$2733 64

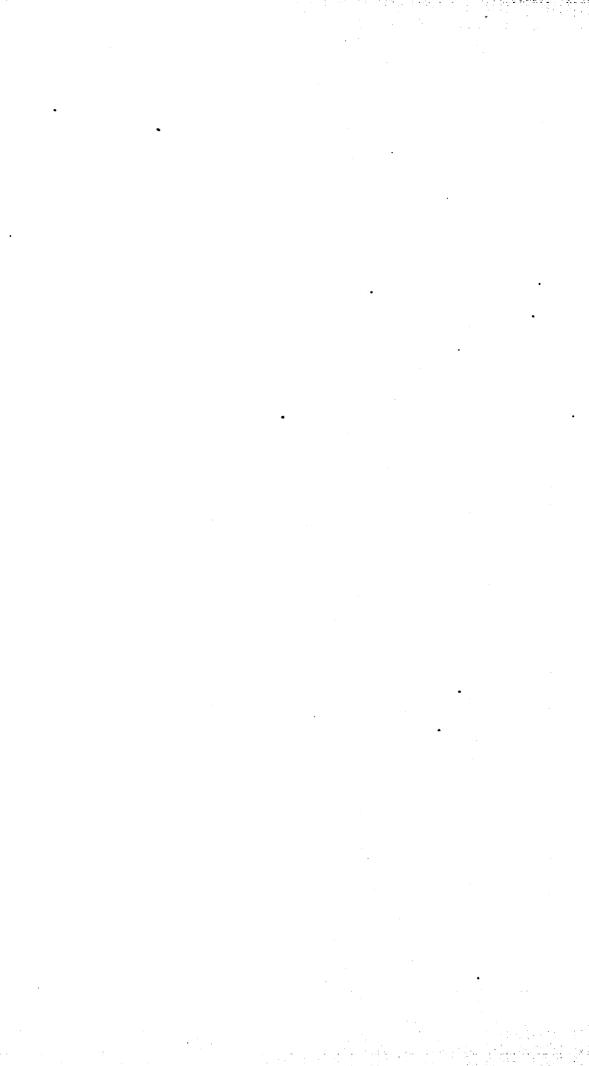

If the work is allowed by the Legislature to be prosecuted during the present year, on a somewhat larger scale than the two previous years, there will be sufficient material to construct a tolerably accurate map of the Island, which is greatly needed, and would be of much public utility.

I am, Sir,

Your obedient servant,

W. A. HENDRY.

S. P. Fairbanks, Esq., Commr. of Crown Lands.

#### APPENDIX No. 15.

### MINES.

Office of Inspector of Mines, 10th February, 1863.

SIR,-

The growing importance of the coal fields of the province, and the enterprise they have awakened during the past year, require a more extended notice than they have hitherto received from this department. The applications for mining licenses, and the receipts from this source, are double that of any former year, and the capital invested has not only developed extensive deposits of mineral wealth, but added greatly to the convenience of shipping and the security of vessels employed in the trade.

The quantity of coal raised and disposed of in the several months, shew a very large increase, amounting to three hundred and seventy one thousand tons of large, and twenty six thousand, two hundred and seventy four tons of small, being in excess of the year 1861, of about seventy thousand tons; and judging from the preparations being made at the different collieries, there is good reason to antici-

pate a still further advance during the present year.

Annexed to this report, are notices of the different mines now in operation, shewing the quantity of coal produced by each. Some of them have hardly commenced operations, consequently the yield is small—it is with the older and longer worked mines that the increase is so perceptible.

An abstract is also furnished of the applications for licenses, and the amount received for the year. The applications I have arranged, so as to represent the different counties for which the licenses issued, and to mark the localities

where the coal is most abundant.

It is gratifying to state that an inspection has been made of all the mines in operation, that under-ground surveys have been completed—a very necessary work, that the lines and bounds of the respective proprietors have been defined, and complete and accurate plans have been prepared, which are open to inspection in the office. It has not been without much labor and diligence that these services have been accomplished.

It is also satisfactory to remark, that a number of conflicting claims have been satisfactorily adjusted; and although there are still several which present some difficulties, it is hoped they will be removed by the investigations now in progress. I endeavour to adhere, as closely as possible, to the regulations in force, but I have sometimes to deal with those who consider their interests as above all rule,

and sometimes with persons who err from ignorance.

The present regulations were framed under the act of 1858, chapter 38; and in order that they may be brought to the notice of the Legislature, I annex a copy. Experience has proved that some modifications and additions are required. Whether any further enactment is necessary, or the powers of the Governor in Council be sufficient for the purpose, will no doubt be considered at the proper time. I respectfully submit, that for greater convenience in preparing necessary information for the Government, as well as the Legislature, a different period should be fixed for making the returns; they should in my opinion, be made quarterly. It would also serve as a check to false returns, if collectors at the

different shipping ports were required to make quarterly returns from their offices at the same period, giving the names of the vessels, the name of the mine, and the quantity of coal cleared in each vessel. There have been complaints, during the past year, of mis-conduct on the part of some of the ship-masters, in representing the coals to come from a different mine from that where they were raised, and thus obtained a larger price than the quality bore in the market.

As regards the cost of the several services connected with the inspection and management of the coal mines, during the past year, I do not think it will exceed the sum of \$150. I have not extracted from the accounts of the surveyors, the items applicable to the surveys of coal mines, the accounts embracing charges both for crown lands and the areas of coal fields, but I refer to the circumstance as evidence, that every endeavor has been made to economise the outlay for the

different services entrusted to my charge.

I have been largely assisted by Mr. Hendry, the surveyor of the department, during the past season, in carrying out a number of useful measures which were suggested by him in a former year, and I have great satisfaction in referring to his report, herewith. In so important a branch of provincial industry as the working of the coal mines, I feel that the fullest information ought to be afforded; especially at a period when public attention has been unusually attracted to the subject. Mr. Hendry has elicited, by his enquiries, a great many interesting facts, and the vigilance which has been exercised, in order to correct many errors incidental to new undertakings, by inexperienced persons, cannot fail to be beneficial hereafter, not only to the proprietors of the mines, but to the public.

Mr. Hendry refers to the amount expended during the past year in making preparations for the extension of our coal trade, which he estimates at \$171,259. I think I can offer no stronger evidence of the hopeful prospects which are enter-

tained by the capitalists who have risked so large an expenditure.

I have the honor to be,

Sir,

Your obedient servant,

SAMUEL P. FAIRBANKS,

Inspector of Mines.

The hon. the Provincial Secretary.

SAMUEL P. FAIRBANKS,
Inspector of Mines.

# Regulations for the leasing of Mines established by His Excellency the Lieulenant Governor in Council.

- The Governor in Council will, upon application through the Crown Land Office, and upon payment of the sum of twenty dollars currency into the office of the Receiver General, grant license to enter upon any lands in this province, and to dig and explore for such minerals as the Crown holds for the benefit of this province, a bond being first given by the applicant or applicants, to the Commissioner of Crown Lands, with sufficient sureties, to be approved by the Governor in Council, that in the event of entry being made upon private lands, recompense shall be made for damages, in pursuance of the act to amend chap. 27 of the Revised Statutes to regulate the mines of the province; the said license not to exceed the period of one year, and shall contain a description of the locality and its boundaries and extent over an area, not more than five square miles, nor with a less breadth than two miles. The applicant to have the privilege of selecting such portion thereof under the restriction mentioned in the next regulation as may be necessary and convenient, for the purpose of working the mines and minerals The search is to be faithfully made, free of all expense to Government, and a report of the result transmitted with all convenient speed to the Commissioner of Crown Lands for His Excellency's information.
- The selection being made, the applicant shall communicate the same to the Commissioner of Crown Lands, with a petition for a license to work the mine within the limits selected, and shall pay the sum of fifty dollars into the office of the Receiver General—whereupon an order of survey shall issue to the principal Deputy Surveyor for the county to lay out, at the cost of the applicant, the portion selected, which shall not exceed one square mile, and shall be in one block, as near the form of an oblong square as possible, the length of which shall not exceed two and a half miles, who shall report the same to the Commissioner of Crown Lands; and, upon such report being approved by the Lieutenant Governor in Council, a license to work the mines and minerals within the limits of the said survey shall forwith be granted to the applicant; and if effective operations be made in opening a mine and working minerals therein, within two years from the date of the license, and if the applicant, or those representing him, within the same period, shall renew the application in writing, a lease to terminate in the year 1886 shall be given him of the mines and minerals within the said area. If effective operations be not commenced within the said period of two years, or shall

not afterwards be continued, the license in the one case and the lease in the other shall determine, and the property revert to the Crown.

- 3. Any person applying to the Governor in Council for a license of occupation to work mines and minerals when no license of search shall previously have been applied for, on filing for the approval of the Lieutenant Governor in Council in the office of the Commissioner of Crown Lands a description of the area applied for, in conformity with the instructions in Regulation No. 2, shall, on His Excellency's approval of the area applied for, be entitled to a license of occupation, and subsequently to a lease, in the manner and on the terms defined in Regulation No. 2.
- 4. All licenses and leases of mines and minerals shall be subject to a royalty to the Crown for the use of the province on the produce thereof, after it has been brought into marketable condition, yearly from such time as shall be determined, as follows, that is to say: of five per cent. of all ores and minerals, except iron and coal, of five pence currency on every ton of iron, and of six pence currency on every ton of 2,240 lbs. of coal, with such guards for ensuring adequate working as may be deemed necessary.
- 5. There shall be a map of the province, kept in the office of the Commissioner of Crown Lands, with all the mineral grounds marked thereon, which shall be opened to the inspection of the public.
- 6. In the granting of licenses or leases, there shall be reserved a space of twenty yards in width between the lines of the respective grantees. But, on the application of both parties interested, the Governor in Council may, by special order, license the working of such reservation on such terms and in such manner as may be just and reasonable.

Department of Crown Lands, Halifax, 23rd February, 1863.

SIR,-

While in Cape Breton during the past season, a considerable portion of time was occupied in making a careful examination and survey of all the Coalmines in the Island; and, in reference to that branch of my duties I beg to report You will recollect, that last year in reporting to you on the character. of many of the underground workings, I called your special attention to several instances in which both the drainage and ventilation were decidedly defective. It was mentioned "that hundreds of yards had to be traversed through mud and water, sometimes fifteen inches deep. That in many instances the lamps burned with a dull red flame, giving very little light, and at the distance of a few yards presenting merely the appearance of a red spark." In every instance, where a want of due regard to regularity and system was observed, the attention of the proprietors and their overseers were called, and I am happy to add, that in each of the five new colleries reported to you in 1861, a decided improvement was observed last season, both in respect to ventilation and regularity of the headways, bords and pillars. In 1861, I urged upon the proprietors of the new mines, the imperative necessity of having correct plans of their underground workings, and last year I employed Mr. Lawson, the Deputy Surveyor of Lunenburg Co., who is a correct workman, to proceed to Cape Breton and accomplish that work, which he has done very satisfactorily and at the expense of the lessees—plans of his surveys are herewith, viz.:

Archbold & Co., Glace Bay.
Caddigan & Co., Dead Man's Cove.
Bourinot & Co., Block House, Cow Bay.
Archbald & Co., Gowrie,
Patrick Collins, Little Bras d'Or.
Simon Geautro and Daniel Laffen, Little Bras d'Or.
C. J. Campbell, Little Bras d'Or.
Ditto Kelly's Cove.

Charles J. Campbell, at Kelly's Cove and Little Bras d'Or, and Archibald and Co., Gowrie Colliery, Cow Bay, are new operations, only just commenced, which, indeed, may be said of the eight collieries above enumerated, none being developed to anything approaching their full extent. The necessary railways, rolling stock, and wharves, are only in course of being laid and constructed. It was therefore very apparent that large expenditures were being made, which it appeared proper should be brought to the notice of the Legislature. To enable you to do so, I addressed the following circular to the proprietors or agents of the collieries within the section of country lying between Cow Bay and Great Bras d'Or, and fully represented on the general plan herewith, shewing the collieries above enumerated and the seams of coal as far as discovered.

(COPY OF CIRCULAR.)

North Bar, Sydney, C. B., 17th November, 1862.

SIR,-

I am requested to prepare, for the information of the Government, a report of all the coal mining operations for the present year within the Island of Cape Breton, so as to convey to the Inspector of Mines full information of the progress and amount of capital invested in working the several collieries, and efforts made in opening and developing the coal fields of the Island, detailing the distinctive branches under which such expenditure has been made.

1st. Boring and digging, in conducting searches for coal, with the number of

hands so employed.

2nd. Number of pits opened on each lease or coal area.

3rd. Thickness, dip, and direction of dip of each seam of coal.

4th. Amount expended in the construction of wharves.

5th. Amount expended on railroads and tramways.

6th. Amount expended for rolling stock.

7th. Amount expended for engines and pumps.

Sth. Amount expended in driving headways or tunnels, and sinking shafts.

9th. Amount expended in the erection of dwelling houses, stores, and work shops.

10th. Number of miles of rail and tramways above and underground.

11th. Number of boys and men engaged upon this work, and their respective employments.

12th. And the number of horses, with such other remarks as you may desire to communicate, in reference to the nature and extent of your colliery works.

I am, Sir,

Your obedient servant,

(Signed) W. A. HENDRY, For Inspector of Mines.

The answers, as far as received, are annexed, and shew an expenditure of \$171,259 during the past season, made on improvements and searches. To simplify it, I have placed the items in tabular form, under their respective heads.

Z	NAME OF COLLIERY.	Boring or digging.	No. of Pits, Stopes or Headways.	Thickness, dip, and slope of seam,	Outlay on W.mrves,	Outlay on Railread and Tramways.	Rolling Stock.	Engines & Pumps,	Outlay on Headways, Tunnels or Shafts.	Dwelling Houses, No.	Extent of Rail No. of boys or Tramways, and men.	No. of hoys and men.	Horses.

		\$9290			\$54000	\$30733	\$11020	\$6732	\$15195	\$32450	64 milos.	707	40

As observed in a former part of this report, the circular above quoted was intended to bring out the amount of expenditures under their respective heads made last season on discoveries and permanent improvements, and therefore does not convey a full detail of the actual operations at each of the collieries. This remark particularly applies to the works at Sydney and Lingan, the property of the General Mining Association. These collieries have been in extensive operation for many years; their expenditure on rolling stock, pumps, and engines, is large, but judicious and economical.

Taking an average for the last six years, their annual shipments would be as

follows:

Sydney, Lingan, 108,542 tons. 18,306 "

Total,

126,848 tons.

Their underground works, so far as I was able to judge from the very limited time at my disposal, are conducted with great regularity and scientific skill. My endeavour was while inspecting the other collieries, to urge upon the proprietors the advantages—as far as circumstances would permit—of adopting the same system as that pursued by Mr. Brown, viz.: to leave a regular and fair distribution of pillarage to support the roof or upper strata until the coal has been worked out from the extreme deep, when the pillars might be removed, and the roof allowed to come down.

In some of the new mines, the parties in their first operations removed so much of the coal that the roof or upper strata has come down and prevented the getting out a portion of the coal, which of course is a loss both to the proprietors and the

province.

I have purposely avoided going into an elaborate description of the collieries above mentioned, or of the coal seams now being worked, but refer you to the statements of the proprietors themselves. An early opportunity will be taken to prepare for reference in the office a full description and section of the coal seams, as far as discovered, within the coal field above described.

I am, Sir,

Your obedient servant,

W. A. HENDRY.

To the Inspector of Mines, Halifax.

Sydney Mines, 11th December, 1862.

W. A. HENDRY, Esq.:

Sir,—

I now beg to submit the information required by the Inspector of Mines. Presuming that the circular of the 17th November, refers only to such new works as have been executed during the present year, I shall confine my remarks to that period.

1. No borings or diggings for coal have been made within the area leased to

the General Mining Association.

2. One new drift has been opened in the seam at Lloyd's Cove, three quarters of a mile to the eastward of the Queen pit.

3. The thickness of this seam is 6 feet, the dip one yard perpendicular in ten yards horizontal, and the direction of the dip is due east.

4. There has been no outlay upon wharves.

5. The expenditure upon earth works in the new branch railway, from the Sydney Mines towards Point Aconi, this year, has been 6,286 dollars; and in the new branch railway, from the Sydney Mines to Lloyd's Cove, 1,467 dollars.

8. No expenditure for rolling stock.

7. Expended on construction of a new engine for the Queen pit underground workings, 232 dollars.

S. A new ventilating shaft, 360 feet in depth and S feet in diameter, has been sunk on the Queen pit workings, at a cost of 3,125 dollars.

9. Expended on new dwelling houses and workshops, 1,400 dollars.

10. No permanent railways have been laid above ground, nor any additions to those in the pits beyond what were required in the progress of the workings.

11. About 48 men and 8 boys were employed all summer in the earth works of the branch railways, referred to in item 5; 10 men and 2 boys in sinking the air shaft, mentioned in item 8; 3 men, during part of the season, in making the underground engine, in item 7; and 4 men on new buildings, named in item 9.

12. Average of about 12 horses, employed in all the above works during the

season, say from 1st May to 31st October.

I do not exactly understand what kind of information is required "in reference to the nature and extent of the colliery works," in addition to that given above. It may, perhaps, be interesting to state, that notwithstanding the additional supply of coal brought into market, from the several new mines recently opened in Cape Breton, the sales of Sydney coal will considerably exceed those of the preceding year.

Steamers of a large burden, trading between England and Canada, have, on several occasions, put in for a supply of fuel, and the General Mining Association are about to construct a large wharf for the special accommodation of vessels

drawing as much as 25 feet of water.

The branch railway, referred to in item 5, was commenced two years ago. It will run directly through the coal field, from the Sydney Mines to Point Aconi, the north-western end of the Association's coal area. This railway may not be required for some years, but it was considered advisable to gradually provide a communication by rail between Sydney Harbour and the most distant portion of the Association's lease, so that in case of any serious accident to the present pits, or any greatly increased demand for coal, new mines might be brought into operation on a short notice Earth works and bridges have been constructed upon the first two miles, and rails and chairs provided for that distance.

Nothing in the shape of new works has been done at the Lingan Mines during

the present year.

If there is any other point upon which you require information, I shall be happy to furnish it.

I remain, sir,
Your obedient servant,
RICHARD BROWN.

To the Inspector of Mines, For the Province of Nova Scotia.

SIR,-

In accordance with the enclosed circular letter, I respectfully submit the

following report :-

1st. The amount expended heretofore upon the lease granted to me in digging, boring, and searching, for coal, including the exploration and opening of the old French mines, was about six thousand dollars.

\$6,000

Expended this year in accurate survey of the locality, and measurement of sections to determine the position and size of the coal seams, 1,250

Total for this item,

\$7,250

2nd. The number of openings to this date are two, each being slopes or inclined planes, one with a simple tramway, the other with a double track. The use of the one with the single track will be hereafter discontinued, except for the purposes of ventilation and access to the work.

3rd. The thickness of the seam now worked is nine feet six inches.

Th Th	e direction of the dip is North, forty two degrees East. e general inclination of the seam is one in thirteen.		
	e maximum slope of the seam, one in ten.		
4th.	The amount expended upon wharves is, previous to this year,  The present year, upon the new harbor, for making	\$5,600	
	landings, and shipping places there, in place of the old wharf,	32,500	
	Total amount for this item,		\$38,100
5th.	The amount expended upon railroads, &c., above ground, Upon tramways under ground,	\$8,250 850	· · · · · · · · · · · · · · · · · · ·
	Total amount for this item,	<del></del> -	9,100
6th.	The amount expended for rolling stock previous to this	. • •	0,200
	year, The present year,	\$1,200 3,280	
			4 400
77.1%	Total amount for this item,		4,480
7th.	The amount expended for engines and pumps:  Total amount,		2,500
8th.	The amount expended for driving tunnels, &c. All the expenditure under this head has been increased, to drive the slopes described in the answer to the second question.		•
	For the first slope, including the level for drainage, and	AT 000	
	other incidental work, For the second slope,	\$1,200 3,250	•
	Total amount for this item,		4,450
9th.	The amount expended in the erection of buildings:  Total amount,		7,600
			\$66,230

10th. The number of miles of railroad.—Above ground, three-quarters of a mile of railroad, heavy iron, from the mine to the harbor; one-fourth of a mile same, in sidings and branch tracks, for shipping coal. Tramways in the slopes and underground, about one-half a mile in length.

11th. The number of men and boys engaged upon the work has been variable, as the mines have not been constantly worked. To work the mines to the extent

already developed, will require:

Miners,	60
Banksmen,	24
Drivers,	10
Engine and Firemen,	6
Hostlers,	2
Smiths,	2
Laborer's general work,	25
Moving and Shipping,	30
Model 150 men and have	

Total—159 men and boys.

Employed during the past year upon the construction of the harbor:

Carpenter's,	•	•	1		15
Smiths,					2
Engineers,				• •	2
Laborers.		1.0			 45

64 being the average number per month for the working season.

12th. The number of horses used the past season has been variable from six to twenty-five, according to the service required.

In accordance with the request in the 12th question, I would remark generally, that during the past year the mine has been largely improved by the construction of the new slope, which reaches the coal at a lower level than was reached, or could be reached, in the old work. This work has been completed, and the mine placed in good working condition for a long term of years, by going only thirty feet below the level of tide water, and the pumps are so arranged that the water need be raised to this height only, which renders the pumping apparatus simple, so that the mine is kept clear of water at a small cost.

By the use of a slope instead of a shaft, the expense of a large and costly steam engine is avoided, and the expense of motive power for raising the coal reduced to its lowest limit. The mining work, under the superintendence of Mr. Henry Mitchell, has been well and skillfully executed, so as to ensure the permanency and safety of the mine. The value of this deposite of coal depends entirely upon

having a suitable place for vessels to lay and load the coal.

To attain this object, the Glace Bay Mining Company, under a charter granted at the last session of the Provincial Parliament, have commenced to open and render navigable, the Little Glace Bay Lake. Already a considerable progress has been made in this undertaking, and vessels have already loaded and remained within the harbor during heavy storms, and one vessel rescued from shipwreck by the shelter thus afforded.

The area which may be rendered available for the accommodation of vessels at this place, is about one hundred rods in length, with an average width of ten rods, and while it will be sufficient to accommodate the vessels intending to load coal from this mine, it is a matter of regret that the port is not larger, so that it might be generally used as a harbor of refuge.

It is expected by the projectors of this enterprise, that the work will be so far completed in the course of the next spring, that the facilities for shipping coal will keep pace with the extension of the mining operations, an expectation fully

warranted by the progress of the work the past season.

I am, Sir,

Your humble servant,

EDWARD P. ARCHBOLD, President and Manager Glace Bay Mining Company.

Halifax, December 19th, 1862.

Statement for Inspector of Mines, giving expenditure, men employed, &c., at the Block House Mines, belonging to Marshall Bourinot & Co.

No. 1. Number of pits opened on lease:

1 pit 62 feet deep, opened in January.

1 " S0 " named the "Dawson" pit, opened in July.

No. 2. Thickness, 10 feet clear coal.

Dip, 1 to 9; direction of dip N. 18° E.

No. 3. Amount expended in construction of wharf, for labor, timber, iron and ballast, has exceeded eight thousand dollars this year. Wharf 372 feet in length.

No. 4. Expended on railways and tramways, two thousand dollars, not including cost of iron. The amount of iron for railroad, tramways, and for the use of the mines exceeds \$2800, exclusive of castings, which appear under No. 5.

No. 5. Rolling stock:

Tubs on tramway on surface, and trams—28 tubs	bne	- 14 to 1
28 trams, cost	and	\$396 00
In pit—20 tubs and 20 trams, cost,		380 00
Railroad—20 waggons, value and cost,	• .	950:00
Wire rope for incline, and turn-table, pulleys, &c.,		660 00
THE TOPO TOP MOUNTAIN WALL OWNERS FRANCES OF MOUNTAIN		,,

\$2386 00

No. 6. Engines and Pumps: I engine, with 2 boilers 35 feet long each, all complete, and Woodworth's pump, and wire rope, &c., \$2600. Engine 50 horse power for the "Dawson" pit.

No. 7. Cost driving headways and levels, \$1250. Sinking in January, \$100; sinking in July, \$700.

No. 8. Cost in erection of dwelling houses:

,				,	~~~		
3	dwelling	houses,	, 52 f	eet b	y 28, cost	\$2100	00
3	"	66	28	66	16,	1250	
1	"	66	32	66	28,	1000	
1	workshop	,			•	300	
1	forge, wi	th impl	emen	ts,		180	

\$4830 00

No. 9.	Numbe	r feet o	tramway		7 700	feet.
*	66	68	66	in pit,	2090	66
	•		e .	Total.	4820	66

No. 10. The greatest number of men employed was in the month of May, when there were—S0 miners, 40 haulers, 2 engine drivers, 8 banksmen, 6 boys, 4 coopers, 4 masons, 10 carpenters, 25 wharf builders, 60 labourers, 36 boatmen—total 280; and from the 1st January till 1st October, the average number of men each month employed was 180 men and boys.

No. 11. Average of unwrought coal in the lease:

250 acres "Block House Mine," coal 10 feet thick, the present seam worked.
480 "McAulay" seam, which lies under the Block House seam, and which is five feet thick of coal; and there are also several other smaller seams underlying the Block House seam; and by exploration it is supposed the Block House coal does not extend further back than the lease line.

No. 12. A large anchor, 4000 lbs. weight, with an iron buoy and chain, has also been put down opposite the Block House mines, for vessels to moor at.

No. 13. 12 scows cost \$432.

Sixteen thousand nine hundred tons coal have been shipped this season; and early in the summer the 50 horse engine will be employed raising coal from the "Dawson" pit. Coals will be raised during the winter as usual; and arrangements made for the completion of wharf, new houses, and many other improvements impossible to mention in this statement.

MARSHALL BOURINGT.

Block House Mines, December, 1862.

Answer to Mr. Hendry's queries respecting the Gowrie Coal Mine.

lst. We have expended in boring, digging, and in searching for coal at different times, \$600, and have employed 6 to 8 men in all about three months of the past summer, for this purpose.

2nd. Number of pits opened, Two.

3rd. The seam averages 4 feet 8 inches in thickness, and dips 1 foot in 7, to the east.

4th. About two acres of coal wrought. Number of acres of coal unwrought, estimated at 600.

	a & 000.	
5th.	Amount expended in construction of wharves,	\$11,000
	In railroads and tramways,	1,200
	In rolling stock,	2.900
	In engine,	1.000
	In driving headways and sinking shafts.	600
10th.	In erecting houses, &c.,	13,000

\$29,700 00

11th. Half a mile of railway constructed above ground, and a quarter of a

mile of tramways under ground.

12th. We have employed continually on an average, during the past season, 1 overseer, 24 cutters, 8 haulers, 3 banksmen, 2 engine men, 4 smiths, 20 carpenters, 16 wharf-builders, 20 laborers.

13th. Two horses above ground—at present have opened up a slope, for horse

road from level, and will run horses in pit next season.

ARCHIBALD & CO.

Jany., 1863.

Little Bras d'Or, C. B., 16th Jan'y., 1863.

W. A. HENDRY, Esq.,

DEAR SIR,-

According to your request, I send you an account of my pit, viz:—Cost of discovering coal, 5 men engaged, \$100; wharf, \$400; shaft, \$400. Driving slope to coal, \$600. Driving deep, \$800. 112 rods tramways underground and 78 rods railway to wharf, \$480. 4 waggons, at \$44, 18 tubs at \$7. Total cost \$3231. Thickness of seam 5 feet 8 inches. Direction of dip N. 78° E. Dip, one foot to 10 feet; and 35 men and 10 boys are generally engaged, likewise 8 horses.

If the above will not answer your purpose, please let me know.

Yours, respectfully,

PATRICK COLLINS.

#### Report of Coal Mining operations conducted on Campbell Mines, Little Bras d'Or, 1852.

1.	Boring in search of coal in three places,	\$200	00	
2.	4 men employed at the same.			
3.	I pit on the lease.			
4.	Thickness of coal seam, 2 feet 9 inches.			
	Dip, 1 foot to 6 feet.

#### APPENDIX No. 16.

### INDIAN AFFAIRS.

Crown Land Office, 9th February, 1863.

SIR,-

Having been directed, upon the resignation of Capt. Chearnley, the late Indian Commissioner, to discharge the duties appertaining to that office, I have endeavoured to make such an appropriation of the funds provided by the Legislature, as afforded the most benefit to the necessities of those people. The amount of the grant during the last session was \$1200. There was expended, before I took charge, the sum of \$24; and there had been provided about nine hundred blankets, at a cost of \$922 50, which has since been paid from the fund. Since the commencement of the year, other existing liabilities have been discharged, and additional expenditures made, as will appear from the account herewith, leaving a balance in my hands at this date.

After my appointment, I addressed letters to respectable individuals in different parts of the Province, enquiring into the numbers and necessities of the Indian families wherever they were to be found, and I made as equal a distribution amongst them as my information warranted. I annex to this report a return of the districts, accompanied with the names of the agents, and number of blankets

forwarded to them.

I found it impossible to meet the demands of every family, owing to the deficiency of blankets at my disposal. My instructions were to supply the aged and destitute, leaving the more healthy and active to supply their own wants. I have reason to believe that some of them benefitted by being driven to their own resources.

The act of the Legislature confines the expenditure to the supply of blankets and clothing; but I believe my predecessor exercised some discretion in relieving cases of extreme poverty, and I have been urged from different parts of the Province to continue the practice. I have not felt at liberty to do so, with those at a

distance, and I have not met with any such cases near the capital.

There are two provincial acts relating to Indian Reserves—one authorizing the Government to vest the title in the Commissioner of Crown Lands, and the other requiring the Indian Commissioner to protect them from trespassers. As both these officers are now united, and measures have been in progress for some time past to make these lands available for settling the Indians, and to encourage them to engage in agricultural pursuits, I think it very desirable that the control over the lands, for the present, should be confined to one officer. I trust within another year it will be ascertained how far the proposed policy will be accepted, or prove beneficial.

Since the last report presented by me, an arrangement has been perfected to make an exchange of the reserved lands in Cumberland, for a similar quantity in a different district, more acceptable to the Indians. The former have been disposed of as Crown land, and the latter subdivided into lots to be apportioned amongst the heads of families, who express a desire to have such a title as will secure to each the exclusive right over the lot apportioned to them. The necessary documents are to be prepared, and I trust the arrangement will be the means of settling a number of families.

During the past summer considerable attention was given to the Indian lands

in Cape Breton, and much progress made in carrying out the views of the Government and Legislature. I append to this report the information I have received from Mr. Hendry, and approving of the suggestions which he offers, and the prices he has fixed on the lots intended for sale, I hope to receive also the approval of the Government, and be authorized to proceed in perfecting those measures, which I consider not only beneficial to the Indians, but calculated to relieve the department in future, from a very difficult and troublesome part of its duty.

I have taken the necessary steps to obtain information respecting the Indian lands in Queen's county, and I transmit herewith the report of Whitman Freeman, Esq., on the subject. I shall be glad to receive the directions of the Government how I am to act in this case. There is no doubt that in some districts the extension of settlements is retarded by these reservations—and they are of no value to the Indians. The sale of them would be preferable to leaving them in the present condition, a temptation to trespassers, provided the proceeds are added to the Indian fund now in the treasury, and kept exclusively for the Indians.

The recommendation of the committee on Indian affairs has been acted upon by me in various other instances, and the information received will enable the Government to decide what course is best to be pursued in reference to them. I have caused to be retraced the lines and bounds of the reserve in the county of Lunenburg; and have obtained also a report of the case of Lewis Alexis, who claimed to be protected in his right to a lot of land situate on Salmon River, in the county of Shelburne.

The Indian fund is gradually increasing, and I annex to this report an abstract shewing the amount now to their credit. There is a considerable amount still due from persons who purchased part of the Indian lands on which they had settled; and if the proposal to make further sales is sanctioned, I do not doubt the fund will soon be considerably enlarged.

At the close of the present year, I confidently expect that all controverted cases in connection with the Indian Reserves, will be settled, and thus one source of

trouble to the department for years past, will be removed.

A proposition has been submitted for purchasing a tract of land, situate about one mile from the town of Pictou, for the purpose of settling a number of Indians in that county, where there are no Indian Reserves. I most earnestly recommend this proposal for the consideration of the Legislature; and that the land should be paid for out of the Indian fund. At a proper time I shall be prepared, with such evidence of the importance of such a purchase, as I think cannot fail to satisfy the Government as well as the Legislature, that it would be a wise and judicious measure, giving to the Indians of the county of Pictou a home, of which they are now wholly destitute.

It has been a pleasing part of my duty to aid in every way the measures which are in progress to turn to the best account the landed property which has been set apart for the benefit of the Indians, and to further those measures which tend to promote their comfort and relieve their sufferings. I find it impossible to obtain from them any views or suggestions which would induce me to recommend any course different from that which has been adopted by the Government and Legislature in the policy which is now pursued. Every Indian family can now possess, if they desire it, a tract of land sufficient for a farm. The sick and the needy are liberally provided for by the Legislature. There will soon be a fund in hand sufficient to aid those who are willling to farm, in purchasing seed and stock; and it will not be the fault of those who are thus generously disposed to make those provisions for their welfare, if in future the condition of the Indians throughout the province is not changed for the better.

I have the honor to be,

Sir.

Your obedient servant,

SAMUEL P. FAIRBANKS, Indian Commissioner.

The Hon. Joseph Howe, Provincial Secretary.

Crown Land Department, Halifax, 25th Feby, 1863.

SIR,-

In reporting the progress made in Cape Breton during the past year, towards a settlement with the squatters upon Indian lands, I beg to say, that the only parties with whom I had to deal were those settled upon the Indian lands on the east side of Middle River, in the county of Victoria, referred to in the report of the committee on Indian affairs for 1862—vide appendix No. 30, of the Journals for 1862; in which it is said, "with regard to the squatters who are settled on the east side of Middle River, in the county of Victoria, your committee recommend that they be dealt with in the same manner as those at Whycocomagh, viz: that the lands be valued, and the settlers called upon to pay the valuation decided on, or otherwise be compelled to leave the property."

The same report also recommends, "that a small piece of land, where John McLeod, blacksmith, is settled, be laid out to include his improvements, but not to extend above the post road;" and also, "that Angus Muuro be allowed to purchase the land occupied by him. The remainder of the reserve, extending from 'he shore of St. Patrick's Channel to the upper settlement, and bounded eastwardly by the river, to be surveyed and marked out by well defined boundaries for Indian

ettlement."

That portion of my instructions above quoted, have been literally carried out. A list of the squatters who come under the conditions imposed by the Legislature, for completing their titles herewith, follows:—

No. of Lot.	Name of Settler.	No. of Acres.	Price per Acre.	Price of Lot.
30 12 14 15 16 17 18 19 20 22 23 24 25 26 2 (a)	John McLeod, blacksmith, Angus Munro, Malcolm McDonald, Donald McLennan, John McDonald, Alexander McKenzie, Angus McLeod, John McLeod, Hugh McLeod, Neil McDonald, John McKitchie, Kenneth Gillis, Donald McLennan, George Buchannan, Kenneth McLennan,	50 150 121 130 123 106 100 98 100 98 83 112 94 . 25	\$0 50 1 25 1 05 1 10 1 00 1 50 1 05 1 05 0 90 0 85 1 00 1 05. 0 85	\$40 00 185 50 127 25 143 00 128 00 159 00 105 00 105 00 102 90 90 00 83 30 83 00 117 60 97 90 35 00
1 (a)	John McRae,	16	1 60	25 60 \$1605 05

These valuations await the approval of the Legislature.

In fixing them I exercised the best judgment I could, after proper enquiry and a careful examination of each lot. A strong feeling however prevailed, that the prices were too high, which was to be expected, but did not in any way induce a change of opinion; and I have no hesitation in saying, that fully the sums mentioned could be obtained for every acre of the lots above mentioned.

In dealing with the Indian lands I humbly conceive, that under the circumstances, they are entitled to the highest market value that can be obtained for them.

Agreeably to your instructions, and the report of the Legislature above referred to, that portion of the Indian Reserve at Whycocomagh, situate on the western side of Skye River, within the county of Inverness, containing 1890 acres, has

been divided into twelve farm lots, for settlement by those of the Indians who may desire to farm on the lands so divided. The lots contain from 150 to 160 acres each.

Much patience will be necessary to accomplish anything like a satisfactory settlement of the Indian families upon their lands, without exciting jealousy and disturbance amongst them, because they like to "have everything in common, even their wigwams—they wish to be as children of the same family."\*

In 1861, you will recollect, I informed you that a portion of the land belonging to this reserve, lying on the eastern side of the river, and forming part of Henry Bishop's possessions, was at that time set a part for a town plot. Last season it was staked off, according to the plan transmitted in August.

If the prices then recommended had received the sanction of the Governor and

Council, a large number of the lots would have been sold last fall.

This plot contains 26 acres, and the total valuation amounts to \$602.

The total amount that will be realized from the sale of the portions of Indian land now in course of alienation, amounts to \$4813, of which \$1549 16 have been paid to the Receiver General.

This fund may be very much increased without interfering with any of the land occupied or used by the Indians, and with careful and judicious management, applied in the purchase of seed and agricultural implements, will be of far more importance to them than certain portions of the lands are ever likely to be.

I have only to add, that the plans necessary to illustrate the views above expressed, are, as you are aware, in the office, and ready to be produced when

called upon. Also, a list of the Whycocomagh Indian families.

I am, Sir,

Your obedient servant,

W. A. HENDRY.

SAML. P. FAIRBANKS, Commr. Indian Affairs.

Milton, January 16th, 1863.

This will acknowledge the receipt of your letter of the 5th November last. on the subject of the Indian Reserved Lands in the county of Queens. You had desired me to report, for the information of the Government, stating the locality, quantity, state, and value of the land, whether occupied, and to what extent, and what portions it would be expedient to lease to the Indians for settlement.

There was about 3,000 acres surveyed, and returned as reserved for the Indians. nearly the whole of which is situate near the inhabited lands of Brookfield and Caledonia—our northern district. . 2,000 acres of it is nearly all of a good quality, as regards the soil and timber, especially hardwood. About 2,400 acres was set off into 100 acre lots, and allotted unto 24 families, 100 acres each, for farm lots. At that time these lands were as profitable as any ungranted lands then in this The result has been, the Indians concluding that they had right to do as they pleased with this property, as then put into their possession, took the liberty to make it pay them, by transfering all that could be moved off the land-consequently, as regards timber, wood, &c., the value of the lots has been vastly diminished.

There has also been a number of removals of those first Indians, as claimants to these lots—some have died, others gone away; in some cases there is no family connection left to claim their lot, and of the whole of those persons put in possession of these lots, there has not one of them done anything like making a farm upon the lot in possession.

There was one lot set off to John Jeremy, (Indian) and a small house was put up for him by Government. He began very well, but soon died; his family moved off; another Indian went into the house, and has resided there three years. He has done more towards farming than any other Indian in the county. Jeremy's

family are dissatisfied with his proceedings.

I have considered the subject, and come to the conclusion, that there is about 2,400 acres of the Indian Reserved Land—that if it could be purchased for about the price of \$44 per 100 acres, would be purchased by the inhabitants of our county. Well, give those Indians who can be found, of those that were first put in possession of these lots, free grants, with power to give a good title, I think every one of them would sell their lot immediately, and the purchaser would cul-

The fact is, these Indians think the land has already been given to them, and any change short of giving them a grant, would cause dissatisfaction with them, and they would be immediately applying for more land; but if a grant is made to

them, whether they sell or keep their lot, they cannot complain.

By such measures, these lots that are capable of settlement, will soon be settled, and if the Indian prefers to sell to making a farm, let him do so; but if they could sell and give a title, they would all sell in a very short time. Their situation would be no worse than it is now, and there would be a chance for the lands to be settled.

There will be some of this reserved land that will not sell to command the sum There is a about 600 acres that has been destroyed by fires. of \$44 per 100 acres.

I have conversed with Lewis Smith, Esq., M. P. P., who takes an interest in this subject, and have enclosed his letter to me, which will shew his views pretty fully.

The returns of survey of those lots, and my report thereon, were made to the Government at the time of their having been laid out, which will as fully explain their locality, and give as full information, and perhaps more so, than I could copy from my papers.

I do not know that I can write any more that will give further information in

the premises.

Any further information required shall be obediently given. I am, sir, your obedient servant,

WHITMAN FREEMAN P. D. S., Queen's Co.

Samuel P. Fairbanks, Esq., Commissioner Crown Lands, Halifax. Brookfield, 15th November, 1862.

DEAR SIR,-

In answer to your enquiries as to my views respecting the Indian Reserves, I would say that I think it is quite evident that the land reserved for the Indians in Queen's county, as now held for them, checks the settlement of the country, wthout being of the least benefit to the Indians. The Indians do not seem disposed to become permanent settlers and cultivators of the soil; as far as I can learn all the Indians in this county have not raised farm produce enough the present year on their reserved land to maintain one family six months.

I believe the best thing that can be done with the large tracts in Queen's county, is to give a free grant, without any restrictions, to the head of every family that have lots laid off to them, and then if there is any among them industrious to make a farm, they could own it on the same terms as other people; and if any of them had rather sell their land than keep it, they could do so—they would be no

worse off without it than they are now.

I can see no good it can do the Indians to keep such large tracts of lands as reserves, which they are not likely to make a good use of.

Yours respectfully,

· LEWIS SMITH.

Whitman Freeman, Esq., Milton.

#### APPENDIX No. 17.

#### INTER-COLONIAL UNION.

Government House, Halifax, N. S. 21st May. 1862.

(Cory.)

No. 47—Miscella.

My LORD DUKE,-

Towards the close of the session of 1861, a resolution, a copy of

which I enclose, was passed by the Assembly of this Province.

For various reasons my Government were of opinion that it would have been inexpedient to have acted upon this resolution during the last year, but they are now anxious that the subject should be brought under the consideration of your Grace, in order that you may sanction such consultation between the different provinces as will enable the important subject of a Union of the Colonies to be considered in all its different branches with a view of deciding upon its practicability and the character of the union which would be most conducive to the permanent advancement and prosperity of the North American colonies.

As an abstract question the union of the North American colonies has long received the support of many persons of weight and ability, but so far as I am aware, no practical mode of carrying out this union has ever been

The question has assumed various shapes and proportions, some advocating a federal union of the whole of British North America; some a legislative union of the Lower Provinces. With all this diversity of opinion as to the character which the union should assume, the feeling in favor of a union of some sort is decidedly on the increase in this Province.

Under these circumstances my government are of opinion that a meeting of the leading men of the different Provinces should take place, in the hope that, after full deliberation and discussion, some practical scheme may be devised to which public attention may be directed in the future consi-

deration of the subject.

I have, &c.

(Signed) MULGRAVE.

His Grace THE DUKE OF NEWCASTLE. &c. &c.

(Copy.)

Nova Scotia-No. 182.

Downing Street, 6th July, 1862.

MY LORD,-

I have duly received Your Lordship's despatch, No. 47, of the 21st of May, accompanied by a copy of a Resolution which was passed in the House of Assembly on the 15th of April, 1861, relative to an amalgamation of part, or all, of the British Provinces in North America. The resolution points out that the question might be considered either of a distinct Union of the Maritime Provinces, or of a general Union of them with Canada; and suggests that it might be desirable, upon so important a subject, to ascertain the policy of Her Majesty's Government, and so promote a consultation between the leading men of the Colonies.

Your Lordship explains that, for various reasons, your Government were of opinion that it would be inexpedient to act on this resolution last year,

but that they now wish it to be brought under consideration.

No one can be insensible to the importance of the two measures which are alluded to; and I am far from considering that they do not form a very proper subject for calm deliberation. They are, however, of a nature which renders it essentially fit, that if either of them be proposed for adoption, it should emanate in the first instance from the Provinces, and should be concurred in by all of them which it would affect. I should see no objection to any consultation on the subject amongst the leading members of the Governments concerned; but whatever the result of such consultation might be, the most satisfactory mode of testing the opinion of the people of British North America, would probably be by means of resolution or address, proposed in the Legislature of each Province by its own Government.

Beyond this expression of the views of Her Majesty's Government as to the preliminary steps which might be taken towards the decision of this great question, I am not prepared to announce any course of policy upon an invitation proceeding from one only of the British North American Provinces, and contained in a resolution of so general and vague a character as that which you have transmitted to me. But if a Union, either partial or complete, should hereafter be proposed, with the concurrence of all the Provinces to be united, I am sure that the matter would be weighed in this country, both by the Public, by Parliament, and by Her Majesty's Government, with no other feeling than an anxiety to discern and promote any course which might be the most conducive to the prosperity, the strength, and the harmony of all the British communities in North America.

I have the honor to be, &c.

(Signed)

NEWCASTLE.

The Right Honble, THE EARL OF MULGRAVE.

de. de. de.

Provincial Secretary's Office, 14th August, 1862.

SIR.—

The subject of a Union of the British Provinces of North America having been, since the publication of Lord Durham's report, discussed, in all of them, from time to time, it was thought desirable by the Legislature of Nova Scotia, in the session of 1861, that the question should be set at rest by such a formal discussion and decision as would promote such a union, if there was any general desire to effect it, and save much time, if there was not.

The resolution, a copy of which I have now the honor to enclose, was

submitted and passed unanimously during that session.

As a general election occurred in New Brunswick in 1861, and as the Island of Prince Edward was much occupied with a controversy that engrossed public attention in that year, the government of Nova Scotia thought it prudent to wait for a more convenient season before inviting the attention of Her Majesty's ministers or of the Colonial Governments to a question of such magnitude and importance.

The resolution was transmitted to the Colonial Secretary in May last, and His Grace's answer, which reached His Excellency the Earl of Mulgrave

by last mail, I have now, by command, the honor to enclose.

You will perceive that the Colonial Governments are left free to invite the leading men of all the provinces concerned, to a discussion of the question of union, either of all the provinces, or of the maritime provinces only; and Her Majesty's government, it would appear, are disposed to give due weight and consideration to any resolutions in which the Colonial Legisla-

tures may concur.

It must be obvious that there can be no great progress made towards an adjustment of this question unless the resolutions to be submitted to the Colonial Legislatures are in substance the same, and in order that uniformity in spirit, and, if possible, in language, may be secured, I am charged to invite, from the government of Canada, a prompt consideration of the subject, and to respectfully request that you will advise me whether its members are prepared to discuss the question of union, and whether, if delegates are appointed by the other provinces, it will be convenient to have a meeting in some central place about the middle of September.

I have the honor, &c.

(Signed)

JOSEPH HOWE.

The Hon. A. A. Dorion,
Provincial Secretary of Canada,
Quebec; also to

The Hon. S. L. TILLEY,
Provincial Secretary, Fredericton,
New Brunswick, and to

Wm. H. POPE, Esq.
Colonial Sectetary for P. E. Island,
Charlottetown.

(Copy.)

Secretary's Office, Quebec. 21st August. 1862.

Sir.—

I have the honor, by command of the Governor General, to acknowledge the receipt of your communication of the 14th instant, proposing to discuss the question of the Union of the Provinces, and to inform you that the subject will receive His Excellency's attention.

I have the honor to be,

Provincial Secretary's Office, Fredericton, N. B. 22nd August, 1862.

SIR,—

I have laid before His Excellency the Lieutenant Governor in Council, your letter of the 14th inst., with copies of Resolutions of the House of Assembly, relative to the proposed Union of the Provinces, and of the Colonial Secretary's reply thereto, and I am directed to inform you that the Lieutenant Governor and a delegation of the Executive Council of this Province will be in Quebec on the 10th September next, when an opportunity will be afforded of entering upon the discussion of this important question.

I have the honor to be.

Sir.

Your most obedient servant,

(Signed)

S. L. TILLEY.

The Honble. Joseph Howe, Provincial Secretary, Nova Scotia.

#### APPENDIX No. 18.

#### RECIPROCITY TREATY.

(COPY.)

No. 109.-Miscella.

Government House, Halifax, N. S., 23d December, 1862.

My Lord Duke,-

· I have the honor to enclose a copy of a correspondence which I have received from Her Majesty's Consul at Boston, on the subject of a license which is now required to be taken out by the masters of all vessels entering an American

port, before they are permitted to dispose of their cargo.

Having doubts in my own mind as to whether this new regulation did not infringe to some extent, the provisions of the Reciprocity Treaty, by which certain articles, enumerated in the schedule, are admitted into each country, respectively, free of duty, I at once telegraphed to Her Majesty's Minister at Washington, drawing his attention to the subject. A copy of the telegraph, together with the answer

which I received from Lord Lyons, is herewith enclosed.

The question is one of considerable importance to Nova Scotia, as a large trade has sprung up under the provisions of the Reciprocity Treaty, which is chiefly carried on in small coasting schooners, many of which are not even constantly employed in the trade, but simply perform one or two voyages during the course of the year, for the purpose of conveying goods belonging to their owners. On vessels of this class the license will of course fall very unequally. Up to the present time it has been the practice for masters to sell their cargoes from their vessels, in such quantities as may best suit the market, and a large portion of the wood, potatoes, and fish, exported from this province to the United States, has been disposed of in this manner.

There may, undoubtedly, be some difficulty in contending that the licenses now enacted are any infringement of the letters of the Reciprocity Treaty, but it will undoubtedly impose, indirectly, a tax upon the importation of articles which have

hitherto been admitted free under that Treaty.

The amount at present is certainly not heavy upon large ships or vessels constantly employed in the trade, but even at its present rate, in the case of a schooner making only one voyage in the year, it would prove no inconsiderable tax upon a cargo of wood or potatoes.

Under these circumstances I consider it best at once to refer the question to

your Grace, for the consideration of H. M. Government.

I have, &c.,

(Signed)

MULGRAVE.

(COPT.)

No. 9.—Nova Scotia.

Downing Street, 28th January, 1863.

Mr LORD,-

I have the honor to acknowledge the receipt of your Lordship's despatch, No. 109, of the 23rd of December, on the subject of the retail license, which is required to be taken by the masters of all vessels entering an American port before they are permitted to dispose of their cargoes.

Her Majesty's Government have had this subject under their consideration, and they are of opinion that the retail law in question is not contrary to the Reciprocity Treaty of 1854. The tax is not a customs duty, and there can be no reason why articles, which in consequence of the Treaty have been admitted free of duty, should not pay the retail tax as well as any other articles.

The fact that they are, for the mutual convenience of the seller and buyer, sold on ship-board instead of a stall in a market or a shop in the street, cannot exempt them from contributing to the tax, which in itself, is perfectly lawful.

I have, &c.,

(Signed) NEWCASTLE.

Lieut. Governor, the Right Hon. the Earl of Mulgrave, &c. &c. &c.

#### APPENDIX No. 19.

#### BLOCKADDE.

(COPY.)

Washington, February 7, 1863.

Mr Lord,-

I have the honor to enclose herewith, a copy of a note dated the 5th inst., which I received from the Secretary of State of the United States at two o'clock yesterday afternoon, and which relates to the blockade of Galveston, in Texas.

I have the honor to be,

. My Lord,

Your Excellency's most humble servant,

(Signed)

LYONS.

His Excellency the Earl of Mulgrave, &c., &c., &c.

(COPY.)

Circular.

Department of State, Washington, 5th February, 1863.

MY LORD,—

As opinions may be entertained by merchants and others interested in trade to the port of Galveston, in Texas, that the blockade of that port by a United States naval force may, in consequence of recent events in that quarter, have been interrupted, I have the honor to acquaint you, with a view to obviate embarrassments to neutral commerce which might be occasioned by such opinions, that the blockade was resumed immediately, and will be continued until further notice. Although due notice of such resumption will probably have been given by the commander of the blockading squadron to vessels which may attempt to enter Galveston, it is deemed advisable to communicate a similar notice to your Lordship.

I have the honor to be, &c. &c.

WILLIAM H. SEWARD.

The Right Honorable Lord Lyons, G. C. B., &c., &c., &c.

#### APPENDIX No. 20.

#### PROVINCIAL RAILWAY.

Railway Office, Halifax, 12th January, 1863.

Sir,-

This, my third annual report, for the information of his Excellency the Lieutenant Governor, I have now the honor to submit. It embraces operations for the year terminating on the 31st day of December, 1862; and will be found to contain a condensed history of the transactions of the Nova Scotia Railways, for

the previous twelve months.

It is with peculiar gratification that I hasten to record the fact, that not a single fatal casualty, nor a serious injury of any kind, has befallen a passenger or an employee of the department connected with the passenger trains, during the year 1862. Two or three casualties have occurred in consequence of persons attempting to mount working cars, while in motion. Particulars will be found in the report of the superintendent of the traffic department. It is often painful to witness the recklessness with which parties persist in such rash efforts, notwithstanding every kind of remonstrance addressed to them. The responsibility in this class of cases must of necessity rest with the victims of such ind scretion. To carry 104,524 passengers within the year, without injury or accident of any kind -nearly one-third of the entire population of the province-is a gratifying fact to With the exceptions referred to, and in none of the cases could the slightest blame be imputed to any of the officers of the department; not only has no fatal casualty occurred, but, as already remarked, no casualty of a serious character of any kind has befallen any passenger, or any person connected with the management of the roads. Great credit is, I consider, due to the vigilance, care, and caution evinced by the officers in charge.

Some portions of the Nova Scotia lines have now been in operation for seven, others for six years, and the whole 92 miles for about four years. During this period embankments have, for the most part, become pretty well consolidated. As a consequence, a considerable amount of labour and material has been required from time to time to be expended in raising and repairing the roadbed, as it naturally became depressed and wasted. The Big Fill, so called at Grand Lake, about the close of 1861 gave a great deal of trouble, and put the department to a considerable expense, which required to be borne in 1862. A heavy north-east storm, one bitter cold day, raised a tremendous lake-sea, which broke clean over the road-bed, burying it a foot deep in ice, and carried away some thousands of yards of material. This required to be immediately replaced. Finding it threatened with a similar casualty, during the autumn of 1862, I caused it to be thoroughly repaired, and a retaining wall to be built on the exposed side, which it is hoped will now secure

this difficult, troublesome, and expensive Fill for the future.

The only other circumstance out of the ordinary routine, connected with the repair and upholdence of the lines for 1862, occurred on the Windsor Branch, in the month of April last. Ascending the high lands from Fenerty's lake towards Windsor, there are several heavy cuttings. The material is a soft, wet, spongy kind of clay. It has proved more or less troublesome every season. In the spring of 1862 a slide of between four and five thousand yards of earth occurred, which

forced the road-superstructure for some distance completely out of its place, twisting the rails up like iron hoops, breaking the chairs, and blocking up the line for several days. This, of course, entailed a very heavy extra charge upon upholdence for the year, and materially interfered with the earnings for a short time. Previously to this event the slopes were about one and a half to one. Now they are in these places upwards of two to one. Whether they will stand at this inclination remains to be seen. I am rather apprehensive that they may not.

The renewal of sleepers for 1862 is a large item, as might be expected. Renewals for 1863 are not likely to be less, but rather more. Taking six years as the average life of a sleeper, it will be seen that about twenty-five thousand sleepers, in round numbers will soon be required annually to keep the roadbed in repair.

The straining which the superstructure of the Nova Scotia Railroads are subjected to, in consequence of their being bare of snow so large a portion of the winter months, and the frost penetrating so deeply, is very severe upon the chairs—especially the joint chairs. By replacing the broken ones with a new and very much heavier article, of a better pattern, the Road Inspector assures me that this difficulty will, in his opinion, be greatly obviated in future. The effects of this mode of procedure are already manifest; but it is one of the items which materially tends to increase the expense of maintenance of way.

Enlarged activity at the Waverley gold district demanded that a siding, platform, and station house should be erected at Rocky lake. These, and similar operations, have been completed and paid for out of the balance of construction funds, provided at the last session of the Legislature. Being convinced that true economy requires that the road-bed of a railway should be kept in the highest and most efficient state of repair, I have acted upon this principle since I took charge of the department; and hence I am enabled to report, that the Nova Scotia railways were never in better order than at the close of the year 1862. A glance at the Accountant's tables will show that the disbursements during the year 1862; under this head, are materially in advance of those for 1861. In 1861 the outlay on maintenance of way and buildings was \$33,998 57; in 1862 \$37,366 93; excess in 1862, \$3,368 36. Whether it would have been wiser to have trimmed the slopes uniformly on the Nova Scotia lines, and seeded down all embankments and cuttings while the works were in course of construction, as was done in New Brunswick, is a question I am not called upon now to decide. It was not done, and passing from the lines of the European and North American Railway to Nova Scotia, the contrast in this respect is marked; and yet, as regards the European and North American line, which is confessedly well managed, the working of the Nova Scotia railways, and the receipts for 1861, by no means compare unfavor-In case of construction of railways hereafter, in Nova Scotia, I should strongly recommend the fished rail. By fishing, or splicing the joints, the line becomes as it were one continuous rail; there is, consequently, no jar or shock, as the wheels pass the joints, and the saving to the rolling stock in consequence is Besides, the noise of a train is greatly diminished, and the motion much less disagreeable to passengers. The difference of expense between fished rails and those not fished, I learned during a recent visit to Canada, to be about forty cents a joint, or at the rate of about \$234 08 a mile of eighteen feet rails. Wherever renewals were being made in Canada, I observed that the fished rail was uniformly substituted, and greatly approved by managers. I shall not enlarge here on the subject of maintenance of way, but refer to the report of the Road Inspector on this subject, (Appendix A).

The number of passengers conveyed, (exclusive of drivers with horses and waggons, 8,504; of members of the Legislature, 107; volunteers, 479; school teachers attending public educational meetings, 138, passing free, and season ticket passengers, 1,175.)

During the year 1862, is Being in excess of 1861, by The aggregate for 1862 being 104,524. 94,121 13,404 This, it must be admitted, exhibits a healthy ratio of increase in the passenger traffic, there being no known or ostensible reason for it, so far as I am aware, beyond the ordinary causes, namely—general prosperity and the facilities and saving resulting from a rapid and safe mode of conveyance.

The gross earnings of the ninety-two miles of road are exhibited in the abstracts attached to the Accountant's report, (Appendix B).

These exhibit the receipts from all sources, for 1862, at Those of 1861, at	\$139,106 71 120,917 66
Increase for 1862,	\$18,189 05
The net revenue for 1862 is  for 1861 is	\$37,181 48 26,802 78
Shewing an increase for 1862 of	\$10,378 70

These are results of a very encouraging kind, and when it is remembered that for the year 1859, the road being then comparatively new, and the rolling stock almost unused, the working expenses exhausted the entire earnings of the lines, and left a deficit of \$8397 31, to be provided for out of the general revenues of the country (see Mr. Mosse's report for that year), it will, I am confident, be highly gratifying to the friends and promoters of railways in Nova Scotia, to witness results of so different a character in 1862; results which, I hope, may tend, in some measure, to rescue this branch of provincial enterprise from that unpopularity with which at one time it seemed to be threatened. Within three years the pecuniary improvement is measured

By a difference of Added to	\$8,397 31 deficit of 1859, 37,181 48 net profit of 1862.
The aggregate being	\$45,578 <b>7</b> 9

A sum considerably more than one per cent. upon the entire capital invested in these works. If the railways of Nova Scotia, extending but sixty miles in one direction, and thirty in another, already exhibit such rapidly improving revenues, what might not reasonably be predicted, if connection were formed with the European and North American line of New Brunswick—and again with the Grand Trunk beyond, and its tributaries—with the Great Western of Canada, and by these with that immense net work of railways of the States of America, east and west of the Alleghany Mountains?

Let it not be said, however, that while the permanent way has been cared for, the rolling stock has been neglected. Upon the locomotive branch of this service, the tables compiled by the railway accountant show an increased outlay, as folows:—

For 1861, In 1862,	expense of locomotive power,	\$33,543 77 35,171 40
	Increase in 1862,	\$1,627 63

The account with the merchandize and passenger cars, for the respective years, stands thus:—

1861, expense,	\$18,154 60
1862, "	20,784 29

Increased outlay in 1862, \$2,629 69

In addition to the common and ordinary repair of the merchandize and passenger cars, which have been put and kept in good working order, as the Car Inspector's report will show (Appendix C), the whole of the box cars have been painted outside, and all the second class cars painted outside, and painted and varnished

within, during the year. Two of the first class cars also have been thoroughly overhauled, rubbed down and painted anew, but the operation not being finished at the close of the year, the bill for painting will, in consequence, be a charge

upon the revenues of 1863.

The new engine house at Richmond, I am happy to report, has so far realized all that was expected of it, and gives, I am glad to say, good satisfaction. The removal of the troops from the old engine house has enabled me to convert it into a carpenter's repair shop, which was greatly needed. Within it four new box cars have been built during the year, and it furnishes room for the painters, who have been at work upon passenger cars most of the season.

A new and commodious station house is now required at Richmond. So soon as any final decision shall be arrived at on the subject of the construction of an Intercolonial line to Canada, I would recommend that a station house be erected at the Halifax terminus, adapted to the future prospect, be it what it may. The present erections were never intended for more than temporary accommodation; and the time has about arrived, when, in my judgment, they should be removed and

replaced with some suitable and substantial edifice.

The Superintendent of Locomotives has prepared his annual report (Appendix D), giving full tabulated statements of the working of the several engines in use. The ability, zeal, and sound discretion which he has exhibited since he assumed the duties of his office, I record with much satisfaction. On one inclement day during the late winter, no less than three of the best engines on the road came into shop disabled. The sudden changes of temperature of our climate, at a time when the road-bed is hard frozen, and entirely unyielding, are very detrimental to locomotive tyres. By foresight, however, and care, hitherto all difficulties have been overcome, and the locomotives kept in order. In my last annual report, I made special reference to No. 10 engine, as having been disabled and thoroughly repaired. I have not had my attention drawn to this particular engine since, until it was attracted by table No. 1 of the addenda to Mr. Johnston's report, showing that during the year, it has run upwards of 21,000 miles, and upwards of 26,000 miles since it was repaired, as I am informed.

After a good deal of correspondence with the agent of the American telegraph company, we settled upon terms of agreement, whereby the several stations, or such of them as might be selected for that purpose, were to be connected with the

company's lines.

A paper signed by me on the part of the Nova Scotia Government, was handed to Mr. Hoyt, to be executed by the company. He forwarded it, as he informed me, to the head office of the company at New York, but has never been able as

yet to get it executed on their part, nor returned.

Eventually the company, without executing the agreement, consented that connections should, in the meantime be made at the several railway stations, where desired, with their lines of telegraph, on the basis of the agreement drawn up, which has been done accordingly. The stations at Richmond, at Elmsdale, and Stewiacke, on the main line, and at Mount Uniacke, on the Windsor branch, are now connected by telegraph. The written agreement contemplated a new line of telegraph posts to be erected within the railway limits, but owing to some disappointment experienced by the company in getting suitable material, this work has not yet been commenced. Until this is done, I should scarcely feel justified in making other or further connections, as their present lines are at considerable distance from some of the stations where the connection would be most needed, and to connect would necessarily involve more expense than, for the accommodation of a single season, I should feel disposed to incur. What has been done will; I trust, aid materially in working the lines, especially in winter, and in bad weather. Five new telegraphing instruments of the latest and best construction have been imported on behalf of the department, and the station musters, where connections have been effected, have had instructors, and are already able themselves to Some additional training will eventually tend to receive and forward messages. make them more adept in the science.

The Road Inspector's report, the Accountant's report and tables, the Car Inspector's report, the Locomotive Superintendent's report and tables, and the Traffic

Superintendent's report, and valuable tabulated statistics (E) in the order named.

constitute an appendix, and speak for themselves.

Except to record my approbation of the faithfulness and good conduct of the several subordinate officers presiding over the respective sub-divisions of departments, and those under their control, and to thank them for that cheerful cooperation afforded, which, under Providence, has secured so much safety and success during the year, I have nothing to add, but to subscribe myself,

Sir,

Your obedient servant.

J. McCULLY.

To the Honorable the Provincial Secretary.

#### APPENDIX A.

Richmond, January 6, 1863.

SIR,-

I beg to submit the following report upon the state and condition of the Railway works under my superintendence:—

The embankment at Barney's brook, widened by the contractor for upholdence, has now become more settled and the road straightened, so that trains can run at full speed when passing over this part of the line.

Heavy slips occurred last spring, in April particularly, on two large cuttings on the Windsor branch, covering the road-bed some five feet deep for a distance of nearly two hundred and fifty feet in length at each cutting, and prevented the trains passing through them for several days. Upwards of 4,000 cubic yards of excavations were required to clear out these cuttings, in consequence of which the embankments, wherever formerly lean or narrow, have been widened with the removed material.

Owing to continual damage occasioned by the heavy surf beating against embankment at Grand Lake, and so much risk of accident to trains, and in anticipation of difficulty there, I had collected, during the last summer, 500 cubic yards rocks. These have, of late, been removed to Grand Lake, and a sea wall built with a batter of one-and-half horizontal to one perpendicular from water level, to within one foot of rails, all along the slope of embankment.

New ballast, to a large extent, has been spread on portions both of Main line and Windsor branch. At many places where embankments had subsided, ballast

has been deposited, and the rails raised and properly adjusted.

The masonry and timber work of all bridges and culverts have been carefully inspected, and I have to report them in good order. The pile bridge near Mount Uniacke has been laid with new sleepers extending across the whole breadth of roadway, and spiked to each longitudinal beam. It may be necessary to put additional braces under the rails next summer, in order to obviate deflection.

Eight thousand three hundred and fifty new sleepers have been used on Windsor branch, and nine thousand five hundred and fourteen on main line, amounting, in the whole, to seventeen thousand eight hundred and sixty-four during the year; this is exclusive of a quantity used as previously stated in relaying pile bridge.

I am glad to report that the breakage in joint chairs this year has been considerably reduced compared with that of the preceding year. The number replaced in 1861 was eight thousand six hundred and forty-nine. In 1862 only six thousand five hundred and three have been required. This is partly attributable to the improved joint chair, and in part to road masters and contractors exercising more care in having the chair-bed properly levelled before fastening chair to sleeper, thereby reducing to some extent their liability to fracture in case of any sudden change from thaw to frost. In view of a still further reduction of this item of expense, the new contracts for furnishing sleepers are specified to be sawed sleepers instead of hewn, as formerly. The extra expenditure in this important item of upholdence will, I trust, be more than counterbalanced by the less frequent breakage of chairs.

The road-bed on both the Windsor branch and main line has been maintained and kept in excellent condition during the past year. The drains of cuttings have

been thoroughly cleaned and properly attended to.

A new platform was erected at Scott's road, on Rocky Lake, for the accommodation of passengers and freight for the Waverly gold diggings. Owing to the increased traffic at this station, and the delay oftentimes experienced by passenger trains while unloading freight, it was found expedient to put in a new siding of

sufficient length to hold six cars, and the delay previously entailed for want of this accommodation, has now been obviated. A station house has also been provided at this place, and a comfortable shed at Horne's road.

For the better protection of firewood and wood sheds, it has been deemed necessary to fit the latter with substantial slide doors. The sheds at Richmond, Wind-

sor Junction, Mount Uniacke, and Windsor, are completed.

The local freight traffic at Newport station is greatly inconvenienced at times for want of additional storage accommodation. I beg to recommend the erection of such at the earliest opportunity.

I remain, Sir,

Your obedient servant.

WILLIAM MARSHALL.

To the Hon. Jonathan McCully.

#### APPENDIX B.

Railway Office, January 27, 1862.

SIR.

I beg to submit the following accounts and summaries, with their abstracts, showing the financial operations of the Nova Scotia Railways, for the year ending 31st December, 1862:

#### 1st.—Revenue Service.

- Revenue Account, with abstracts, B 1.
  - (a) Locomotive power,
  - (b) Merchandize and passenger cars.
  - (c) Maintenance of way and buildings.
  - (d) General charges.
- B 2. Comparative statement of quarterly expenses, years ending 31st December, 1862 and 1861.
- B 3. Monthly summary of receipts and expenses, year ending 31st December. 1862.

#### 2nd.—Construction Service.

B 4. Capital account.

Detailed quarterly accounts of the above, with the vouchers, have been furnished to the Financial Secretary.

On reference to revenue account (B 1), it will be seen that the operations for 1862 compare favorably with those of 1861, there being an increase in the

\$18,189 05 Total receipts from all sources uf An increase in the working expenses of 7,810 35

\$10,378 70 Making an increase in the total nett receipts of

Comparative statement of working expenses (B 2) shows the above increase to be as follows:

1,627 63 Locomotive power, 2,629 69 Merchandize and passenger cars, 3,368 36 Maintenance of way and buildings, 184 67 General charges,

\$7,810 35

The following table gives the results of operations from 1860 to 1862, both inclusive:

Account.	Year ending 31st Dec. 1860.	Year ending 31st Dec. 1861.	Year ending 31st Dec. 1862.
Receipts from all sources,	\$116742 89	\$120917 66	\$139106 71
Working expenses,	96472 26	94114 88	101925 23
Net Revenue,	\$20270 63	\$26802 78	\$37181 48

Shewing an increase in the nett earnings of 1862 over 1860, of

\$16,910 85

do.

do. over 1861, of

10,378 70 22,363 82

Do.

đо.

An increase in the gross receipts from all sources over 1860, of do. over 1861, of

18.189-05

#### 2nd.—Construction Service.

On referring to (B 4) Capital account, it will I there has been received from the Receiver December, 1861, Do. to 31st December, 1862,	oe observed t General to S	hat 31st	\$4,267,628 5 5,654	
			\$4,273,282	80
And expended to 31st December, 1861, Expended during 1862,	\$4,267,316 6,311			
Less per credit account, 1862,	\$4,273,627 226		\$4,273,401	81
Shewing an over-expenditure of			\$119	

The credit account deducted, amounting to 226 10, is for sale of sundries belonging to department, &c., &c., previously debited, which decreases expenditure account by that sum.

I have the honor to be, Sir,

Your obedient servant,

THOMAS FOOT, Accountant.

To the Hon. Jonathan McCully, Chief Commissioner of Railways.

#### APPENDIX C.

Richmond, January, 1863.

SIR,-

I beg leave to submit the following report upon the cars for the past year:

#### FIRST CLASS PASSENGER CARS.

The roof of one has been repaired, the outside of another has been varnished, and the whole have received slight general repairs. Six new cast iron chilled wheels have been put under these cars during the year. Two are in shop being painted, and, in addition to these, it would be desirable to have other two painted ere long.

#### SECOND CLASS PASSENGER CARS.

All of these cars have been painted outside and inside; they have all received general repairs; forty new cast iron chilled wheels have been put under. All are in good order.

#### BOX CARS.

These comprise twenty freight, and nineteen cattle and sheep cars; they have all been painted; ten have had their roofs covered with new canvas, and two other roofs have been covered with gutta percha. Thirty-seven are in good running order, and two are now under repairs. Forty-four new cast iron chilled wheels, and one hundred and sixty repaired malieable iron wheels have been put under during the year. The balance of the old wheels, at present under this class of car, will nearly all have to be replaced during the year 1863. Four new box freight cars have been built on the works during the year.

#### PLATFORM CARS.

A large proportion of these are in good running order. Some of them are continually requiring repairs in wood work, in mountings, or in wheels. Twelve are at present undergoing repairs.

#### SIDE TIP CARS.

These cars are all in good order.

#### SNOW PLOUGHS.

The three ploughs have all been overhauled, and are now in good working order.

#### CAR SHOP.

The stone shed that was formerly appropriated to the engines has been transformed into a car shop, and is admirably suited for this purpose. This is what has long been required.

#### GENERAL REMARKS.

The rolling stock, generally, under my charge, is at present in better condition than it was this time last year. The great increase of the freight traffic causes a great deal more tear and wear than formerly, and the labor to keep up a sufficient number of cars, for the demands of the traffic, has increased in the same ratio. is now evident that more cars must soon be built to meet the growing demands of the traffic.

#### LIST OF CAR ROLLING STOCK.

First class passenger cars,	10
Second class passenger cars,	8
Box freight cars,*	24
Horse, cattle, and sheep cars,	19
Platform cars,	101
Side tip ballast cars,	12
Scotch " "	1
Snow ploughs,	. 3

Your obedient servant,

JEHU WARD,

Car Inspector.

Hon. Jonathan McCully.

<sup>\*</sup>In previous returns of the box cars, an error in the number existed. There never were more than twenty upon the line, till now. There are now twenty-four.

#### APPENDIX D.

Richmond, January, 1863.

SIR,-

Herewith I beg to submit the returns in connection with the Locomotive Department, for the year ending 31st December, 1862:

RETURN No. 1 shows the number of miles run, and stores consumed by each locomotive during the year.

RETURN No. 2 shows the number of miles run and the average consumption of stores per mile, by locomotives on regular and extra passenger trains.

RETURN No. 3 shows the total number of miles run on all services, the stores consumed and the averages.

In my last report I mentioned the completion of the New Engine and Turntable Shed, I have now much pleasure in saying, that after twelve months occupation of the building and use of the turntable, the accommodation is complete, and the benefits are manifold.

The want of telegraphic communication on the line, which was felt for so long a time, has at last been supplied, and is a great desideratum, and will much facilitate the safe working of the road.

With the exception of the interruptions to the trains, caused by the snow storms

during the early part of the year, there is little worthy of remark.

Three locomotives have been painted, and in addition to general repairs there have been twelve new driving wheel tyres put on during the year. The hard and unyielding state of the road during the winter months is very destructive to both tyres and springs.

The locomotives that have been in use during the year are in good working

order.

The following is a statement of the number of engines:

Passenger engines, from	n N	lielson & Co., Glasgow,	,	10
	n th	ne Portland Company,		5
Ballast engines,				5
			Cotal,	20

Your obedient servant,

W. Johnston.

Hon. Jonathan McCully.

RETURN No. 1.

Statement of mileage and consumption of stores, for year ending 31st December, 1862.

#### APPENDIX E.

Richmond, January, 1863.

SIR,-

I beg to submit for your consideration the following report and returns, shewing the earnings from the different sources of traffic upon the Nova Scotia Railways for the past year, ending 31st December, 1862:

Return (a 1) Superintendent's account current with Revenue.

- " (b 1) Various sources of revenue and aggregate earnings at each station.
- " (c 1) Mileage of trains, number of passengers, and quarterly receipts on Main Line and Windsor Branch, and summary of totals.
- " (d l) Number of passengers of each class carried per month, and recapitulation.
- " (e 1) Monthly receipts of local and through passengers at the respective stations.

(f 1) Monthly receipts for horses and waggons.

- " (g 1) Monthly earnings of outward and inward freight traffic at each station.
- " (h 1, i 1) Comparative statement of earnings on Main Line and Windsor Branch for 1861 and 1862.
- " (j 1) Number of first and second class passengers carried from each station, and amounts received respectively.

" (k 1) Description of freight forwarded from each station.

" (11) Weight of freight received at, and forwarded from, Richmond terminus.

The aggregate earnings of the railway during the past year, 1862, as per returns, amount to the sum of \$132,699 33. According to arrangements, there have been certain services performed not entered in the returns, the amount of which I deem consistent to shew here, in order to exhibit the entire operations of this department—

department—			\$132,699	33
Members of Legislative Council, House of Assembly, and Officers, during the Session,	<b>\$1</b> 58	66	•	
Volunteers attending shooting match at Truro and presentation of colors at Halifax, School teachers attending conference meeting at Halifax,	1294 220		<b>\$1673</b>	57
Making a total for 1862 of "1861 of			134372 116943	
Increase in favor of 1862,			\$17429	15
The gross receipts from passenger traffic, as per returns, amount to  Carriage of Members,	\$158 1294		<b>\$63489</b>	84
"Volunteers, "Teachers,	220		1673	57
Total amount of passenger traffic, for 1861,		•	65163 57800	

Shewing an increase of

The business in conveyance of horses and waggons exceeds that of 1861 by \$1785 56.

The freight earnings during the past year, 1862, exhibit a favorable increase over previous years, viz.:

1860. 1861. 1862. \$38,769 89 \$47,212 95 \$55,493 26

Shewing that 1862 exceeds 1861 by \$8,280 31, and 1860 by \$16,723 37.

The total weight of freight moved, including horse and waggon traffic, is 42,135 tons; average receipts per ton moved, \$1 64; the receipts per ton per mile is 5.81, or nearly 6 cents.

The number of passengers carried during the past year, as per returns, 94,121

Members of Legislature, 107

Volunteers, 479

Teachers, 138

Holders of season tickets,\* 1175

1,899

96,020

Being an increase over 1861 of 14,661 passengers, exclusive of 8,504 teamsters carried free.

Mileage of regular and special trains exceeds that of 1861 by 6,358 miles.

You will observe from the comparative statement for 1861 and 1862 there has been a general increase upon all branches of the traffic; the excess in passenger receipts on Main Line and Windsor Branch are nearly the same. The other descriptions of traffic also exhibit an improvement, particularly on the "branch" as per table:

	Main Line.	Windsor Branch.
1862,	\$30,913 89	\$24,579 37
1861,	20,101 18	18,111 77
	ب منسب بیا میبید کمیساند است	
Increase in 1862,	\$1,812 71	\$6,467 60

There has been an increase in "through" passenger traffic, both east and west, particularly the latter. The returns per Bay of Fundy route exceed those of 1861, notwithstanding the incomplete connection at St. John during the months of August and September, caused by the withdrawal of one of the steamers plying between St. John and Boston. Consequently a detention of several days occurred to all passengers from the "States," which undoubtedly affected the travel. The excitement of gold discoveries near Elmsdale and Rocky Lake may have been the means of contributing to the local increase of passengers.

The large increase in freight on the Windsor Branch may be fairly attributed to the flourishing condition of shipbuilding in the vicinity of Windsor and Bedford. To these places the transportation of timber formed a large item of business; and the abundant crop of agricultural produce and fruit in the western counties, a large proportion of which was forwarded to Halifax via Windsor. There is no doubt that this trade is capable of large augmentation. A very satisfactory commencement has been made this year. The competition by water being abundant, every inducement ought to be extended to parties engaged in this branch of industry, in order to secure, as far as possible, the trade.

Notwithstanding the extension of sidings at Richmond in 1861, the increased freight business warrants facilities, on a more extensive scale, being provided in siding and store accommodation, in order to meet the requirements of the trade. During the past season many difficulties have been experienced, and detentions

<sup>\*</sup>Calculated according to amount of each ticket. In 1860 and 1861 holders of season tickets were merely counted as one passenger.

eccurred, owing to the limited accommodation at present available to conduct the traffic. A set of "track scales" are also much wanted at Richmond, so that the overloading of cars may be prevented, which is not only dangerous in operating

the traffic, but ruinous to the rolling stock.

The new station at Rocky Lake (Waverly Gold Diggings) has been of considerable advantage to those engaged in gold mining operations, bringing railway communication within two miles of the gold fields. The siding laid down at that station proves to be a great accommodation to the freighting public. Apparently a large trade will be done in the transport of coal for the use of steam power engaged in quartz crushing; over 400 tons of this article have already been forwarded, and I anticipate a still larger business during the present year, as several new crushers are in course of construction, and gold-mining operations are being prosecuted with the utmost vigor.

At Brookfield and Truro stations, alterations in sidings are required, in view of affording freighters better facilities in loading heavy timber, lumber, &c.; those articles promise to contribute largely to the interests of the road, it being essential to encourage and foster this enterprise, in providing loading ground and sidings apart from the main line, so as to insure greater safety, and obviate, as far as

practicable, detention to the trains.

At Beaver Bank and Newport stations, further accommodation is wanted, particularly the latter; an extension of platform, and also a freight store, is indis-

pensable, as the general business at that station continues to improve.

The increased traffic at intermediate stations, and additional flag stations, having been established, causes delay to the trains, consequently a higher rate of speed is carried out in running between stations, in view of making time. A high speed with heavy trains operates seriously upon the rolling stock. If the business would warrant a separation of passenger and freight trains, doubtless it would give more satisfaction to a portion of the travelling public, as the long delay at stations could then be obviated. I hope the time is not far distant when this can be carried out to advantage.

Special trains might be run, during summer, in connection with the Bay of Fundy steamer, when regular trains would not answer, within two hours, provid-

ing the travel would warrant it.

The telegraph connections which have already been made at several of the important stations on the line, will enable operations to be conducted more satisfac-

torily, particularly during snow storms, or in cases of accident.

The arrangements entered into with the proprietors of the steamer plying between Windsor and St. John, the European and N. A. Railway, the proprietors of the steamer between Shediac and Pictou, and with W. H. Hyde, of Stage line, between Pictou and Truro, to issue round trip tickets, was commenced in July Sixty-six tickets were sold. I have no doubt, when this route becomes properly established, that parties engaged in business will find it advantageous; and pleasure seekers could not desire a more pleasant tour during the summer months, possessing, as it does, the various modes of transport, viz.: Railway, Steamboat, and Stage Coach, passing through the provinces of Nova Scotia, New Brunswick, and P. E. Island. The travel during the past year has quite exceeded my anticipation. The system of tickets adopted, being that of exchanging checks, does not appear to have given the desired satisfaction. The frequent necessity, by this arrangement, of having tickets exchanged by each company, is annoying to travellers, besides the possibility of mistakes occurring, which must cause difficulty in adjusting the accounts. I beg to recommend that the regular coupon ticket, used in the United States, Canadas, and by this department for through travel, be substituted; they are easily understood, and passengers can see at a glance the entire route.

During the past year four freight cars have been built, and placed on the line. I would recommended that the plans be further augmented by having three or four cattle cars built, on an improved and modern pattern, when the same number of our present stock can be appropriated with advantage to hay traffic, they being large and roomy; also two second class cars, the same length as our present first class, fitted up with baggage apartment in one end, and provided with powerful breaks to be used on Windson breaks to be used on Windson breaks.

breaks, to be used on Windsor branch, the grades being heavy.

During the past year the trains have run regularly, with two exceptions, viz., a snow storm in March, and a land slide in April, partially obstructing operations on Windsor branch for several days.

I regret to record four casualties which have occurred during the past year,

resulting fatally, viz.:---

On 11th July a colored man at Newport station, employed by Wood Contractor; and on 18th September, a person in the employ of Still Water Mill Company and working on wood train; in both instances those parties came by their death while

incautiously attempting to get on the train when in motion.

On the 7th November, a man was found in the morning by one of the repairmen, near Cobequid Road, having one of his legs nearly cut off. How he came there remains a mystery. And on 4th December, John Barratt and two others employed on repairs, recklessly attached a trolly to the rear of the train at Beaver Bank, and when near Fenerty Lake the vehicle left the rail, killing the former instantly, and injuring the others. I am glad to say that no passenger or employee of the department has received any injury during the past year. Every care is used by the officers in preventing people unnecessarily exposing themselves.

I am, Sir,

Your obedient servant,

GEO. TAYLOR.

To Hon. Jonathan McCully, Chief Commissioner Railways.

RETURN (a 1.) NOVA SCOTIA RAILWAY.

# APPENDIX No. 21.

# POSTMASTER GENERAL'S REPORT.

General Post Office, Halifax, 5th February, 1863.

SIR,-

I have the honor to submit, for the information of his Excellency the Lieutenant Governor, and the Executive Council, and to be laid before the Legislature, my tenth Annual Report, together with the accompanying returns, numbers from 1 to 18, shewing the working and condition of the Post Office Department of this Province for the year ended 30th September, 1862.

No addition to the number of Post Offices was made during the past year, 73

being in operation on the 30th of September.

22 new Way Offices were established, and one discontinued, making a total of

401 officially recognized Way Offices.

Eight new Post Routes have been established within the year, 3 have been discontinued, and 15 extended, and the number of trips increased, as will be seen on

reference to Reports Nos. 7, 9 and 12.

There are at present 196 established Mail Routes, at an annual cost of \$39,316, and I would here remark that my best attention has been given, during the recess, to the necessity of supplying, at the least possible cost, the means of postal communication to all the newly discovered gold fields, and of establishing in the most suitable localities, the necessary Way Offices for the accommodation and convenience of the miners and others interested in mining operations.

The length of mail route now in existence is 4,509 miles, and the actual dis-

tance travelled, 960,144.

An account has been kept of all mail matter which has been carried free by order of the Government, such as Parliamentary proceedings, &c., for which no credit has been given to the Department. The amount for six months ended 30th September was \$259 36.

The average number of newspapers posted at, delivered from and passing through the Halifax office, shews a falling off compared with that of the previous year.

As regards the letter portion an increase of over 129,000 has taken place this year compared with that of last year. In 1862 the average No. in the Halifax office alone was 835,093; in 1861, 705,696.

The average No. of newspapers delivered from country post offices the past

year was 1,228,576; letter do., 551,380.

#### REVENUE.

The postal revenue of the year has been as follows:

Gross postage, \$54
Less dead and re-directed letters, \$1,540 92
British portion of Packet Postage, 7,749 06

\$54,390 61

9,289 983

Net income, \$45,100 621

The chief items of collection have been as follows, viz	:	
On letters, postage paid otherwise than by stamp, Do. prepaid by postage stamp,	\$15,806 2 38,110 3	
FEES.—Private letter boxes at post office, \$434 00 Detained forward letters, 40 00	\$53,916 G	31
Detailed forward feticis, 40 00	474 (	00
Gross receipts,	\$54,390 6	- 31

The net available income of the Department of this year ended 30th September, exceeds that of 1861 by \$5,048 49½,—which increase may, I think, be attributable in some measure to the introduction of the system of compulsory prepayment by stamp.

This gratifying increase has been effected, notwithstanding a diminution in the amount of correspondence between this province and the United States, as compared with former years, which may doubtless be traced to the present condition of the States, which must necessarily seriously interfere with the commercial transactions of the two countries.

The additional charge of 13 cent imposed on the correspondence sent and received by packet, to and from Bermuda, Newfoundland, and the United States, yielded, during the five months ended 30th September, \$225 04, which sum is included in the gross amount of postage revenue stated above.

The amount derived from charged United States newspapers, received by land mails at the Halifax office—"Forward," and for city delivery—was, during the

same period, \$157 50.

#### EXPENDITURE.

The disbursements have been as follows:-

For salaries, Mail service,		\$23,773 39,316	
		\$63,089	803
Ship letter gratuities,	\$120 83	•	_
Tradesmen's bills,	301 07	}	
Rent,	800 00	•	
Stationery, printing and advertising,	1,257 54	Ļ	
Coals, wood and gas,	371 95	•	
Commission on stamps,	1,320 50	<b>,</b>	
Miscellaneous,	205 02		
,		4,376	93
For new postage stamps, "sea postage nada, travelling expenses, and pre-		•	
change, &c.,	cinium on ex	839	03

Total expenditure, \$68,305 76½ Shewing a decrease in the cost of the Department, as compared with 1861, of \$1,138 59, and a decrease in the deficiency to be provided for, of \$6,187 08.

The saving has been effected upon the following services, viz.: Salaries, mail carriage, ship letter gratuities, printing and advertising, commission on stamps, and on miscellaneous disbursements.

#### DEAD LETTERS.

During the past year 10,689 dead letters have been received at the Dead Letter office, Halifax, and disposed of in the following manner, viz.:

Sent to Great Britain,	1,420	)
To United States,	1,865	,
Canada.	193	•

To New Brunswick, Prince Edward Island, Writers in Nova Scotia, Destroyed for want of sufficient address, &c.,	421 73 4,236 2,481
Total,	10,689
Out of this number,—  18 letters contained money, amounting to 13 Bills of Exchange, 3 Promissory Notes, 6 sundries, 12 "Registered,"	\$180 76 3,816 10 1,140 00
	\$5,136 86

Which were opened and returned to the writers, in the usual manner.

#### STAMPS. .

A further supply of postage stamps has been obtained during the past year, from the "American Bank Note Company of New York," viz:

4,000 sheets of 1 cent stamps.
10,000 " 5 "
4,000 " S½ "
5,000 " 10 "
4,000 " 12½ "

At a cost to the Department of \$677 25.

The proportion of stamps used in the prepayment of the correspondence increases yearly, and last year amounted to \$38,110 33—as will appear by a reference to Report No. 1.

#### COMPULSORY PREPAYMENT.

The seventh section of chapter 23 of the Revised Statutes, of the Post Office, having been repealed during the past year, and the prepayment of Provincial postage made compulsory, the necessary steps were at once taken by the Department, to carry the arrangement into effect; and, commencing on the first of May last, the prepayment of postage was accordingly exacted on all letters posted in the province, for delivery within the same; and as far as I have been enabled to ascertain, from enquiry on the subject, the system appears to work smoothly and well, and to be generally approved throughout the country.

Though the system of compulsory prepayment has been in operation but five months, viz: from 1st May to 30th September, it has, I am satisfied, tended very materially to the augmentation of the postal revenue of the past year, and the result is shewn by the increase of \$5,048 49½ in the net receipts, as compared

with the year 1861.

With theco neurrence of the United States postal department, arrangements were also made to carry out the system of compulsory prepayment of letters by Land Mail, between this country and the United States, which came into operation on the first of June last; but it having been brought to my notice that the arrangement was affecting injuriously the business operations of several merchants of this city, largely interested in the trade with that country, the expediency of reverting back to the former system of optional prepayment was suggested by me to the Postmaster General of the United States, and, with his acquiescence, it was accordingly re-established on the first of January last.

#### REVISION OF POST OFFICE ACT SUGGESTED.

As section 5 and 7, chapter 11, of the Statutes of last session of the post office, page 52, have been variously interpreted, and have given rise to considerable correspondence with this department, I would respectfully recommend that those

sections be repealed, and that the suggestion offered in my Report of last year in reference to mail matter of this description, be adopted, viz:—

"That all foreign newspapers, posted at any office in Nova Scotia, should be

"charged one cent each, and be prepaid by stamp.

- "Foreign newspapers coming in the mail unpaid, (or prepaid in the United "States by money or stamp) be also charged one cent each, except those addressed "to newspaper proprietors; all newspapers, whether Foreign, British, or Colonial,
- "when reposted by private individuals, to be charged one cent each, and not to be
- "forwarded unless prepaid by stamp; and further, that all other printed matter, such as hand-bills, circulars, and prices current, as well as books, pamphlets,
- "&c., when not exceeding 48 oz., be likewise taxed with a uniform rate of one

"cent per oz., to be also prepaid by stamp."

With respect to *United States*, or other foreign *Periodicals*, whether religious or secular, scientific or otherwise, I would again respectfully urge that they be all treated alike, and charged one cent per oz., when received at any post office in this province, either unpaid or with the United States or Foreign postage prepaid thereon; and those posted by agents to subscribers in the province, as well as those reposted by private individuals, be prepaid by stamp, one cent the oz.,—otherwise not to be forwarded through the mail; were this, or a similar course, adopted, I am satisfied a large amount, which is now lost to the revenue, would thus be secured, and the present obvious difficulty of determining which is, and which is not, a religious or scientific periodical, &c., be set at rest.

COMPULSORY PREPAYMENT OF LETTERS BY STAMP BETWEEN PRINCE EDWARD'S ISLANE AND NOVA SCOTIA.

On the first of September last arrangements were made, by an order in Council, for carrying out a system of compulsory prepayment of letters by stamp, between Prince Edward's Island and Nova Scotia.

Letters posted in Prince Edward's Island for Nova Scotia wholly unpaid, or in part, are chargeable with the amount of postage due, and also a fine of five cents in addition thereto.

#### PARCEL POST.

The number of parcels forwarded from, and received at the Halifax post office during the past year, was 387, viz: 275 sent and 112 received.

It is a matter of surprise that the privilege of sending parcels by post between any two places in the province, is not more extensively used, particularly when the charge, viz: 25 cents, is so moderate. No loss in the transmission of parcels has occurred during the year.

#### REGISTRATION.

The number of letters posted as registered, at the Halifax office, in the year, was 4,474; the number received during the same period, 7,707, making a total

of 12,181; being an increase of 949 over that of the previous year.

I regret exceedingly to have to report, that the irregularities in reference to registered letters and unregistered letters, said to have contained money, have been very numerous during the year; a reference to report No. 14 will shew the partiticulars of the several cases which have occurred, and the result of the proceedings instituted by the Department in each case.

#### POSTAL DIRECTORY.

I enclose a Postal Directory which I have prepared and had printed for the use of the several Postmasters, &c., in this province, which I trust will materially assist them in the sorting and disposition of letters and papers, &c., sent from their several offices.

#### POST RIDES INEQUALITY &C., EXPLAINED.

In the Report of the Committee on the Post Office of last year, allusions was made to the eccentricity and inequality in the Post Rides throughout the province.

&c. On this subject, I would beg to remark, that the respective mail services have been established, extended, and changed, from time to time, on the recommendation of different Post Office committees, and also at the suggestion of members of the Government of the day, according to the stated requirements of certain localities in their several counties.

I annex a tabular statement, shewing, opposite to each county, the amount of population; the number of Post and Way offices; the number of miles of mail travel, and the cost per annum in each county; by which it will be seen, that the county of Cumberland has the greatest number of Way offices, and receives the largest amount of mail accommodation, and at greater cost (except Halifax) than any other county, while Yarmouth county enjoys the least.

Comparative Table shewing the Population, No of Post and Way Offices, No. of miles of Post Route, and cost per annum in each County, in the Province of Nova Scotia.

<sup>\*</sup> Exclusive of cost for the carriage of mails by Railway,

As regards the courier's travelling over the same route, I would beg to remark that in some few instances, this is the case, though only for a short distance, and which cannot very well be avoided—the position of the office being such, that the courier, starting from the same point, must necessarily travel the same route, till the road diverges east and west, or north and south, as the case may be.

#### HALIFAX OFFICE, &C.

In consequence of the Government having issued instructions to keep the Halifax office open every night until 9.30, p. m., to enable the public to receive and answer their letters the same night, two temporary clerks have been added to the force in this office at a salary of £75 each; the office is now open for the receipt and delivery of letters every day, Sundays excepted, from 4.30, a. m., till 9.30, p. m.

As regards the present condition of that portion of the building or premises, where the duties of the post office are performed, and the inadequate accommodation it affords for the efficient discharge of the same, I would again respectfully beg to refer the Government and the Legislature to my previous reports on this subject; having already so often alluded to this matter, I fear further remarks from me might perhaps be considered obtrusive and unnecessary. I trust, how-

ever, the day is not far distant when the Legislature will perceive the necessity of taking this important question into consideration.

#### MONEY ORDERS.

Annexed is the Report of the Superintendent of the Money Order office, and it is gratifying to observe the gradual increase of business therein.

This office must eventually become a most important one should its operations

be extended to England and Canada.

I have the honor to be, Sir,

Your most obedient humble servant,

A. WOODGATE.

The Hon. Joseph Howe.

# To A. WOODGATE, Esq., Postmaster General:

Sir,-

The accompanying returns of Moncy Order transactions, for the post office year, from September 30th, 1861, to September 30th, 1862, furnish particulars of such transactions for the year.

By these will be seen, that the Money Order business of Nova Scotia, has increased, in 1862, to the amount of thirty-three thousand dollars, as compared with 1861, while, compared with 1860, the increase has been above forty-nine thousand dollars.

I understand that the Government had under consideration the extension of the Money Order correspondence of Nova Scotia, to Canada and to England, but up to the present time the Provincial Money Order system is restricted to the province itself.

No losses or difficulties in the working of the system, during the year, require mention in this place. The Money Order offices of the counties (which now number nineteen) have co-operated harmoniously with the chief office, during the two years in which I have had the honor of superintendence.

With respect, sir, &c.,

Your obedient, &c.,

J. S. THOMPSON.

Money Order Office, Halifax, Feb'y. 6th, 1863.

#### SCHEDULE.

Accompanying this Report are the following documents:

- No. 1. Statement of Revenue and Expenditure of Post Office Department, for year ended 30th September, 1862.
- No. 2. Packet Postage, general account between the United Kingdom and Nova Scotia, for year ended 30th September, 1862.
- No. 3. Postmaster General's account current with the province of Nova Scotia for the year.

## APPENDIX No. 22.

# EDUCATIONAL REPORT.

MAY IT PLEASE YOUR EXCELLENCY,-

In presenting to your Excellency my eighth Annual Report on the educational condition of the Province, I may state that it is my intention to depart somewhat from my usual plan. Instead of first analyzing the tables with the view of contrasting the present with the past, and then offering some suggestions touching our educational improvement, I shall endeavour to bring before your Lordship and the two Houses of the Legislature, a brief and comprehensive delineation of what, in my opinion, constitute a thorough National System of Education; and, as I proceed, to point out some of our more prominent defects, and the necessity of using every legitimate means, and of exerting our combined energies for their speedy and effectual removal. In following out this plan, my report will extend considerably beyond its usual length; but it is to be hoped than an ever-increasing desire on the part of the enlightened and philanthropic in the community to see the whole of our educational system remodelled, as well as the projected scheme of a Pro-

vincial University, will form a sufficient justification for its adoption.

The law of gradation is universal. It reigns alike in nature and grace, in inorganic and organic substances, in natural and spiritual things, in the world without and the world within. In no department, however, is this law more conspicuously displayed, than in the education of the young, whether we look at it in its external or internal aspects. In the latter of these, that is, in the whole inner processes of education, there are three distinct series, distinct in their aims, their objects, and their difficulties. The first is designed to awaken minds, and to beget a thirst for knowledge, with the means and methods of acquiring it; the second, to confer that intellectual and moral information and discipline which is the common basis of all liberal culture; and the third, to qualify for particular occupation, and especially for the learned professions. Now, in befitting accommodation to, and for the complete carrying out of these objects respectively, we possess the threefold agency, the School, the College, and the University. These when they really serve their legitimate end, have their distinctive spheres of operation, with methods entirely and incompatibly different. To unite them is impossible, and even to make any one an appendage of another is to impair the proper effect of both. Each must occupy an independent and separate position. And any of them offers a field of labour sufficient for and worthy of intellectual power of the best order. And yet, all these departments, whether regarded in their inner or corresponding outer processes, maintain an essential dependence, rise in beautiful consecutive symmetrical order, from the lowest basis to the highest elevation, from the foundation to the copestone of the educational fabric. No State or Province can therefore be said to be complete in its educational apparatus without the establishment and vigorous operation of this threefold series; and to attempt to amalgamate them, or make one do the work of the other, were to confound if not to ruin the whole. But let us look somewhat more particularly at each of the links or steps in this threefold series.

#### I.—THE SCHOOL.

The primary business of the school is not so much to impart knowledge as to awaken a demand for it, and to furnish the means of meeting that demand. If there is no felt want of a thing, no effort will be put forth to get it. If there is no taste or relish for any one object, there will be no demand for it, and, by consequence, no exertion made for its possession. This is the case with all the initiatory stages in the acquisition of learning. Some children may by nature be inspired with a stronger desire than others, to find out the causes or reasons of things; but the early stages in the attainment of knowledge is to all accompanied with a considerable amount of toil, and but a slender share of enjoyment, and all by reason of a lack of demand, an utter indifference as to the thing itself. Let the demand be once created, and gradually, yet surely, will it become the most insatiable, and the most delightful of all acquired desires. It will rise superior to every obstruction and every succeeding difficulty; bravely and manfully met will but render this demand all the more loud and imperative. But this knowledge, to be thus self-propagating and propelling, must be possessed of three elements or characteristics: 1. A clear, accurate, and intelligent conception of that which is cognized. 2. A precision such as that the child shall discern just what the proposition amounts to; how all its elements stand related to one another, so that he can hold the one and the other up before him as a distinct, complete, and prac-3. A thorough discrimination, or such a knowledge as that in passing from one step to another there shall be a right and firm understanding of the relation between them, and of what the one has to do with the other. Whosoever is trained to such an acquisition of knowledge on any one subject, has obtained a boon vastly more valuable than all temporal riches or honors; has seized with his mental grasp, a loadstone which will not only attract to him every other possession, but convert everything it touches into gold; has reached the highest of all earthly attainments, the capability of educating himself, and which, when directed to objects and pursuits congenial to his nature, will invest him with a blessedness which is godlike; and the teacher, who in all his intercourse with his pupils, is determined to be content with nothing short of this, is no sciolist, but the truest and noblest benefactor of his species, worthy of threefold honors, of laurels of amaranthine endurance. And what is the method best fitted to impart this clear, precise, and discriminating view of any subject to the minds of the young? There are just two aspects in which we may regard the whole matter of method; first, in reference to the subject discussed; and secondly, in reference to the party addressed. As to the subject itself, there are just two ways or methods in which it may be treated; in itself, or in its relations concretely or abstractly, analytically or synthetically; we may proceed either from generals to particulars, or from particulars to generals. The former method may be considered the more natural, and the latter the more logical; the one, as a whole, being better fitted for the initiatory, and the other for the more advanced classes. In no respect, perhaps, are the skill and efficiency of the teacher more fully displayed, than in the adoption of the one or the other of these methods, according to the nature of the subject or the stage of progress of his pupils.

As to the other point, looking at method in relation to the scholars, we may notice, that here the grand secret of success consists in constraining the young to exercise their own powers, that is in training them. For this purpose the teacher must come down to a level with his scholars, and by borrowing images or pictorial representations, from objects or things with which they are perfectly familiar, conduct them by a process of questions and answers, and ellipses, from the known to the unknown, from the easy to the difficult, from the material to the spiritual, from the visible to the invisible, from the temporal to the eternal, from the finite to the infinite.

In the picture, they see with their mind's eye, the fact or truth or subject, as clearly as they see any visible object with the naked eye, and this imparts a knowledge of things or realities, and not of mere words or signs; and thus the lesson in every sense is given, just because it is received. In the elliptical process, not only are the perceptive, reflective, and imaginative powers of the scholars ex-

panded and strengthened, but they thereby are shut up to certain findings and conclusions, which they can neither gainsay nor controvert; and which they hold with a firmness and a grasp which is just as modest as the humblest timidity, and vet firmer than the boldest self-confidence—a moral position in relation to knowledge, in which the bold must be restrained, and the timid lifted up. method, diligently and faithfully pursued, cannot fail to create a demand for knowledge, which knowledge alone can meet and satisfy; every act of gratification, but whetting the demand, and rendering it increasingly stronger, all the But what availeth all this thirst for knowledge, unless the young more insatiable. are provided with the means of gratifying it; and to impart this is another high function of the school room. The means essential for the acquisition of knowledge are either direct or indirect. Of the former, the senses are the most important, The organs of seeing and hearing ought therefore to be cultivated in all the initiatory departments of learning; the latter, as a sedative in the securing and preserving of order, as well as a stimulant to intellectual vigour; the former is not only of great practical utility in the whole range of æsthetics, but of paramount importance to the analytical processes of the higher exercises of mind. Indeed the cultivation of the senses ought to constitute one primary object in the education of the young.

But our own powers of observation are, at least, exceedingly limited, and therefore for the augmentation of our stock of knowledge, we are greatly dependent on the observation of others. And what are the means by which we obtain access to their accumulated treasures? They are just the branches of a common school education, namely, reading, writing, and ciphering. The letters of the alphabet, numerical figures, and algebraical symbols, are the marks by which language is made visible. Facility in reading and writing them, amounts only to the means of intelligent intercourse with other minds. They are but the tools which science uses. We employ them as the means of getting at knowledge, which otherwise would entirely be beyond our reach.

But we need not enlarge upon this point. We think we have said enough to satisfy every unprejudiced mind, that the School in the educational series, has its own peculiar work, which, if neglected, cannot be done elsewhere, or at least can be done very imperfectly. It not only constitutes the substratum upon which the whole rests, it deeply and universally affects the superstructure reared upon it. If there is a flaw or imperfection here, it will carry its baneful influence into the College and University, nay, into every pursuit and employment of life, and largely militate against the future progressive career of the parties involved. You may try to supplement their defects by what are styled preparatory or collegiate schools, but unless these schools are conducted, not on the plan of the college—which they generally are—but on the plan of the school, they will serve no useful purpose.

And if the work of the school is peculiar, so is the office of the Schoolmaster, and so, necessarily, must be his qualifications. This view of educational matters, The notion that prevailed for centuries, that we rejoice to say, is growing apace. any person possessed of more than a common degree of scholarship, was perfectly competent to discharge the duties of the school-room, and if needs be, the professional chair; this notion, we say, is now rapidly on the wane. Teaching is beginning to assume the character of a distinct profession, requiring, on the part of those who engage in it, a course of preparation, both theoretical and practical; in a word, the service of an apprenticeship. In verification of this remark, we have only to look at the recent growth of Normal Schools. Though some of these institutions have been in existence for upwards of two centuries, their great increase, their systematic arrangements and approved usefulness, have only taken place within the last 30 or 40 years; and now there is scarcely a civilized nation upon earth which has not its Normal School, some having ten, others twenty, and others fifty, and a few numbering even one hundred. And in the fact that these institutions are now established under the patronage of State governments, we seem to have the assurance that the people are awakened to a sense of their importance, and therein some guarantee that the improvement will be permanent, and that they will not be like so many other attempts, defeated by diversion from their proper aim. Indeed, their declared and legally defined purpose is in itself a barrier

against a danger which has proved fatal to many good academies.

We have thus dilated on the grand aim and object of the School in all its stages from the initiatory to the more advanced, that all may apprehend its peculiar and transcendant importance in the educational series; and that all, whatever be their opinions on other matters, might be induced to unite their energies in securing for Nova Scotia such a school education as shall in quantity be proportionate to the population, and in quality adapted to the advanced and ever advancing state of society. Much has been done during the last twenty-five or thirty years, and considerable progress has been made in some departments. has been done, however, and whatever measures of advancement has been reached. are but so many stand-points from which we may the more clearly discern our manifold imperfections, and be the better able to apply more effectual remedies. If, as seems generally believed, Nova Scotia is on the dawn of a new era in its history, if she is on the eve of receiving some prodigious impulse in her mining! agricultural, and commercial pursuits, surely it is high time to inaugurate a sound system of education in all its compartments, and especially in the Common School. the root and trunk of this prolific tree of national life and efflorescence.

All the material resources now opening up, and all the bright prospects which these inspire, can alone yield true satisfaction and permanent prosperity, when they are developed, regulated, and directed by enlightened intelligence, painstaking industry, and high-toned christian morality. And what but a universal and sound system of education will secure all these essential elements? Who, in the future history of the Province, can estimate the results of the introduction of such a system of education, or the impressions, ever-deepening, ever-widening, that may flow therefrom? Who, with a drop of patriotism or philanthropy in his veins, would begrudge any toil, or sacrifice, to contribute, however slenderly, towards

the consummation of an object so supremely desirable?

Now, in the brief application of the foregoing remark

Now, in the brief application of the foregoing remarks to the school education of the Province, we may state at the outset, that we have little sympathy with those who imagine that by the adoption of this or that specific all our present defects shall be removed, or that by any legislative enactment, however wisely concocted or skilfully and vigorously worked out, any extensive change will be effected at once. Our decided conviction is that as the evils under which we labor are many, so must the remedies be, and that even the most suitable remedies will require a considerable period of time before their effects are felt and rendered palpable. Nevertheless, it appears to us very plain that the time is now arrived in the history of Nova Scotia, when the whole of our school system should be remodelled, if not revolutionized; or, at all events, when a basis so broad and solid should be laid as will admit of every possible extension and enlargement, as may bear the weight of any superstructure that may be erected thereon, or that the ever-varying phase of time and circumstances may demand.

It is unnecessary to enlarge on the many elementary defects in our present school system. A word or two on the quantity and quality will suffice. As to quantity, every one who has paid any attention to the subject knows that in this respect our education is lamentably defective. We refer here not so much to the proportion of children actually attending school in the course of the year, though that is low enough—about one-eighth—but the sadly irregular and fragmentary character of that attendance, consisting, as it does, of three months now, and six months again, with intervals, it may be, extending over twice these periods In every population there are always a few who will rise superior to these disadvantages, but in by far the greater proportion of cases, the education thus given will serve little or no practical purpose in after life. The smattering of instruction which too many Nova Scotians receive will, in a vast majority of cases, become gradually less, until it is well nigh obliterated altogether. If corroboration of this statement were needed, we have but to refer to the appaling facts elicited by last census, and to which I specially directed the attention of your Lordship and of the Legislature in my last annual report.

And if the quantity is thus low and inadequate, the quality must necessarily be in a still worse condition. Indeed, the very deficiency in quantity constitutes the

mightiest hindrance to the elevation of the quality. But even in the case of those who enjoy the advantage of a regular continuous attendance at school, we fear that a majority of them are treated in their educational work more like machines, than thinking, reflecting beings; that their intellects, instead of being expanded, are literally repressed in their growth; that their faculties instead of being energiscal, are rendered more lethargie; that, in one word, their education instead of consisting of things or realities, is little else but a species of word-mongery-of verbal symbology. And if there is so little done for the whetting and strengthening of there purely intellectual powers, there is still less for the quickening and Alas! in how few instances is the school, both in-door enlivening of the moral. and out, rendered an arena for the formation of character. If there is any attempt to impart moral and religious instruction, how little is done to reduce that instruction to practice in the every day details of school life—how feeble the efforts put forth, in co-operation with the parents, in the training up of the young in the way they should go? And thus, the grand balance-wheel or regulator of the whole inner and outer man, remains uncultivated and uncared for; that which alone gives true safety and legitimate force to the knowledge imparted. In one word, how very rarely is that which ought to consitute the grand object of the school-room looked at or aspired after, namely, the growth of the mind of the scholar, by the healthy assimilation of wholesome food; its inspiration with a thirst for knowledge and enlargement; the disciplining of its powers so far that they can go on to educate themselves, and thereby rendered capable of fulfilling the high ends, the ennobling doctrines, designed by their all-wise and bountiful Creator.

But it is more to our purpose that we advert to the means of cure; that we indicate those remedies which, when applied conjointly and allowed fair space for operation, are in our estimation fitted to lay the foundation upon which the most stately and ornamental educational edifice may be upreared; and, first of all, we

shall refer to the revision of

### 1. SCHOOL DISTRICTS.

It is now upwards of twenty-five years since these districts were originally allocated, and the changes which many of them have since undergone, both in point of population and industrial resources and pursuits, have rendered a thorough revision indispensably necessary. Besides, there are whole counties where the boundaries of these districts are very indistinctly marked, and whole townships where the division into districts does not exist at all. As the law now stands, the School Commissioners are the parties entrusted with this business, but it were unreasonable to expect that these gentlemen, giving, as they do, their services gratuitously to the Province, could devote the time and the energy necessary for It ought to be done by paid and disinterested parties, acting generally in concert with the inhabitants of the various districts, but fully empowered, in particular cases, to decide, not in accordance with the whim or caprice of interested persons, but with great broad principles involving the furtherance of education throughout the locality. A greater boon, at this moment, could scarcely be bestowed on the cause of the education of the Province, than the reduction, by one third, of the existing School Districts.

And this is a matter of far greater moment than many are apt to imagine, involving, as it does, not merely the externals of education, but some of the most essential elements of its inner workings.

### 2. SCHOOL HOUSES.

Notwithstanding the improvements that have taken place in the whole matter of school premises, during the last ten years, there is scarcely a third of the whole number commodious and in good order, the other third is barely passable, and the remaining third literally untenantable save during a few of the hot months in summer. Besides, there are not a few districts, and several of these amongst a dense and wealthy population, where there are no school-houses belonging to the district. Now to us it is plain and palpable; that so long as this state of things is allowed to remain, no real progress can be made in our educational work. It is

just as impossible for the Schoolmaster to do justice to himself or his system, or his scholars, without proper school-room accommodation, as it is for the mechanic to And the only and most carry on his craft without suitable workshop and tools. expeditious way of rectifying this fundamental evil, is the passing of a legislative enactment, requiring that every school-house, as well as every teacher, shall be licensed before receiving any share of the public money, and wherever a new school house is needed, that it shall be built by assessment on the whole rateable inhabitants of the district. Whatever objections may be urged against the general measure of assessment for the support of the teacher, there ought to be none against the erection of school-houses, seeing that these are just as much the property of the district, as the dwelling house is of its owner, or the court house or jail of the county. For the regulation of this matter the Superintendent of Education should be instructed to provide half a dozon different plans, with specifications and probable cost; and wherever it is necessary that a new school-house be erected, that the inhabitants be legally summoned by the School Commissioners to meet, and having selected the plan of building adapted to their circumstances, proceed by assessment in the usual form.

### 3. GRADED SCHOOLS.

By this we mean a gradation of departments of Schools. In all more densely peopled localities, where one, two, or three hundred or more schoolable children can be readily mustered, instead of half a dozen or dozen of schools, attended by children of all ages and of all stages of progress, from the alphabet up to the highest branch of classics and mathematics, and altogether independent of one another, this plan of graded schools contemplates the erection of one or two buildings, with two or three departments, the scholars all graded according to their ages and attainments, and placed under their respective teachers in the several apartments; without any interference with, and yet closely dependent the one upon the other, so that the primary feeds the intermediate, and the intermediate the high The immense advantages of classification in a miscellaneous school are well known to every experienced teacher. Indeed no work can be effectually accomplished without it. And if thorough classification is of such benefit in a school composed of children of all ages and attainments, what must it be when applied to schools themselves, with departments for two or three stages of progress, with a separate master for each? Then will the teacher, instead of wasting his time and energies as he censelessly and perfunctorially hastens from class to class, and through subjects the most diverse, be able to present to the minds of his scholars the lesson of the day in all its aspects and relations, until it be thoroughly incorporated in their mental constitution. Then too, will be be able to render the peculiarities of each scholar subservient to the benefit and advancement of the whole, for in instructing and training one, he is instructing and training all Moreover, by this plan, there is a sufficiency of that stimulating sympathy which is found among children of the same age, and of that enthusiasm which makes progress not only more continuous, but more rapid. But if there is soundness in the principle of the division of labour, this is not only the most efficient mode of carrying on the education of the young, it is the most economical. If, by this method, one properly trained to the work can teach 25 with far greater success than 12, 50 than 25, 75 than 50, and so on, the greater number the more power, provided the children are all as nearly as can be reached of the same measure of attainment; then it is clear that this circumstance must render it vastly the cheapest education. It was the lack of this principle of gradation that entailed ruin upon our academics, in the early history of our public educational career. It is the lack of it now that renders our grammar schools little better than superior common schools, if indeed many of them are entitled to that designation.

# 4. HIGHER TEACHING EQUIPMENTS OR HIGHER STANDARD OF QUALIFICATION ON THE PART OF THE SCHOOLMASTER.

The primary duty of every nation in the matter of education is the selection of a system, or the sanctioning of that system chosen by the Superintendent of the officers appointed to preside over this branch of the public service. Properly

sneaking there are only three, or at most four, distinct methods, of carrying on the inner processes of education, worthy of the name. There is, first of all, the Monitorial system, organized and matured by Dr. Bell in India, and Joseph Lancaster in England more than half a century ago; then the Explanatory, or as- it is sometimes styled, the Intellectual system, which received its fullest developement or shape under the auspices of Mr. Wood, and Dr. Andrew Thompson, of Edinburgh, and which has since been patronized by some of the most prominent statesmen, and philanthropists, and educationists of the day; next, we have the Physical, Intellectual, Emotional and Social system, which owes its origin to-Pestalozzi, was worked out by some of the most devoted of his scholars, and embodied and illustrated in the Prussian system of education, and in several of the German States; and last of all, we have the Physical, Intellectual and Moral, or, as it is sometimes called the Training system, with whose leading characteristics and ripened development the name of David Stowe shall ever be associated, shall ever be imprinted on the heart of every educationist whose supreme desire is to sit alike at the feet of nature, and of the great Teacher of Nazareth. other systems are but modifications of these, the blending of some of the characteristics of the one with those of the other. The selection of any one of these, or of any part of them, will, of course, depend entirely on the view that may be entertained of the end of education. Whatever be that end, or the means adopted for carrying it into effect, it is perfectly clear that the choice of the internal system must regulate, control, or at least greatly modify the external apparatus, school premises, text-books, and above all the qualification of the schoolmaster. These qualifications are threefold, natural, literary, and professional. Little or nothing can be done in reference to the first of these, but much may and ought to be done in reference to the other two. A nation may manifest the highest wisdom in the choice of a system, and that system will be ever found to be the best that makes the nearest approximation to nature, but unless it, at the same time, provides the best possible machinery for carrying it out, it will prove of comparatively little benefit. Of this machinery, by far the most important element is a highly qualified class of native Teachers. This Province has, to a certain extent, recognized its obligation in this respect in the establishment of a Normal School, and though this institution has, we believe, been of some service in elevating the standard of teaching qualification in the Province, yet it has been sadly impeded and crippled in its operation. Whilst the students of similar institutions all over the world either receive partial or total support during the periods of their attendance, and after they have passed the usual ordeal and obtained the highest certificates, a far higher remuneration for their labours, no such aid or patronage has been extended to the Normal School of Nova Scotia. For the first two years of its existence, it is true, the sum of £100 was distributed by way of Scholarships amongst the most meritorious of its students, but even that amount, however beneficially it operated, has been withdrawn. And this is not all. When the students have attended two or more terms, and successfully won the highest honors, they receive not a cent more out of the public educational funds than those who have never attended this or similar institutions.

The whole matter of teaching qualification demands a thorough revision. In reference to the Normal School, I would beg to suggest that the Students be required to attend three regular terms before they can graduate with highest honors; that a consecutive course of study be prescribed and fixed by law; and that a Board of Examiners, consisting of three competent persons, be appointed to preside over the whole matter of admission and graduation of the pupil teachers; and also that each student, upon graduating, receive some allowance, if not for his complete, at least for his partial support, during the period he attended, or at all events, that some preferential remuneration be bestowed upon him by virtue of his professional qualifications. This is the case, less or more, in all countries where Normal Schools exist. In reference to the other teachers throughout the province, I would recommend that a programme of qualifications for the different classes of licenses, similar to the one I issued three years ago, be rendered obligatory by legal enactment, and that a Board of well qualified practical Examiners—men of learning and experience in teaching—be set over each county, whose busi-

ness shall be to meet periodically in some central locality, to test both by viva vece and written questions, the qualifications of candidates for the office of teachers, and assign them their legitimate place; and whose travelling expenses to and from the places of meeting, shall be defrayed, as well as a certain allowance made for their time and labor.

# 5. DIFFUSION OF MORE ENLIGHTENED AND ELEVATED VIEWS OF EDUCATION AMONG THE MASSES OF THE PEOPLE.

It is needless to enlarge here on the low and inadequate views entertained by many throughout the province on this subject. This is matter of notoriety to all, and confessedly forms one of the most formidable obstacles in the way of progressive improvement. I cuter into no speculations on the origin of these humiliating and degraded views. I apprehend that they are easily enough accounted for by the events and circumstances through which Nova Scotia, as a young country, has passed during the past century, and more especially the character of the more recent emigrants, the difficulties they have encountered in providing for their more immediate temporal wants, and which, in but too many instances, have necessitated their all but total neglect of the mental culture of themselves and children—an evil this, which can alone be arrested and overcome by bringing to bear upon it some antagonistic force ab extra, such as viva voce addresses, followed by earnest and solemn appeals in written statement. A little has already been done in both these respects. In my official position, as Superintendent of Education, I have annually devoted three months to this work, and have now perambulated four or five times, the great majority of the principal settlements, both in Nova Scotia proper and Cape Breton. The seasons of the year, however, when the Normal School is not in session, the only seasons I could travel, I have found exceedingly disadvantageous for the efficient performance of this work. Sometimes the state of the roads and weather is such as to render travelling highly dangerous, and more than once I have been under the necessity of countermanding my arrangements, finding it to be impracticable to keep my engagements. In consequence of this state of things, and from the annually increasing supply of trained teachers, feeling more and more the necessity of using every possible exertion for the purpose of arousing the province at large to a sense of its responsibility in connection with the grand cause of the education of the young, at a recent meeting of the Commissioners of the Normal School, I proposed that an alteration be made in the present arrangements of that Institution; namely, that instead of holding the two terms in winter and summer, they should be held in winter and spring; in which proposal, I am happy to say, they unanimously acquiesced, and resolved accord-By this arrangement, with four continuous months at my service for visitation work, I shall be able to do as much in one year as in present circumstances This plan may, to a certain extent, perhaps, diminish I can overtake in three. the attendance of students at the Normal School, but even supposing this were to be the case, it would be amply compensated by the general benefit that will flow This change cannot, therefrom to the cause of education throughout the province. of course, affect the attendance at the winter term, seeing it still continues the same; and this after all is the main stay of the Institution; there being generally a third more than at the summer term. At the term now going on there have been enrolled eighty-six students, being four more than on any previous occasion, whereas the attendance last summer scarcely amounted to forty. But there is another boon to the general cause of education that will arise from this arrange-In almost every preceding report I have advocated the appointment of a staff of local inspectors, both on the ground of the intrinsic importance of the office, and of its avowed advantages in all countries where a national system of education exists. Hence, its universal prevalence, and the large sums expended in its behalf, the adjoining province of New Brunswick appropriating not less than \$4000 00 per annum for this object. No such officers have yet been appointed in Nova Scotia, and in very proportion to their declared utility in other countries, must Nova Scotia be suffering educationally. There is now, however, some prospect of this desideratum being supplied. The two teachers of the Normal School are willing, without any addition to their income, to devote three out of the four summer months that they are unemployed, to the business of school inspection, on combition, of course, that their travelling expenses be defrayed by the province, which, it is supposed, will not amount to more than \$300 00. If this inspection is judiciously carried into effect, and in full concert with the proceedings of the different Boards of School Commissioners, it will, I am persuaded, prove an incalculable boon to the general cause of education.

### 6. MATTER OF SCHOOL SUPPORT.

There are three ways by which this branch of the public service may be sustained. It may be entirely by voluntary contributions, or partly by voluntary subscription, and partly by the general revenue of the country, as it now is in Nova Scotia; or it may be by direct taxation on real and personal property. Now, in endeavoring to arrive at a sound decision on this point, other elements besides the more matter of raising the adequate sum must be taken into account. That is of importance, no doubt, both in reference to the competency and the certainty of the amount raised. But there is an element above and beyond all these considerations, and that is, which of these modes is best fitted to elevate the value of the education of the young in the estimation of the people, and thus at once increase its quantity and enhance its quality? To this question we unhesitatingly reply, the last, or that mode which compels the property of all to contribute to the education of all. It is, we think, demonstrable that compulsory taxation is the most likely method of awaking a universal interest in the general cause of education; and this, in our opinion, ought to decide the matter, inasmuch as when this is secured, every other good effect will in course of time ensue. However unpalatable this doctrine may appear to some, there is, we hold, neither an interest nor a party in Nova Scotia that its introduction would not largely benefit. It is alike the friend of the poor and the rich, of the teacher and taught, of the parent and child, of the state and the church. But I have no intention at present of discussing this subject; and there is the less need of this as my views thereon are already at full length before the public. It is of more consequence that we here briefly advert to the way in which we think such a measure should be carried into effect. Though we believe it would prove in every respect advantageous to the cause of education and the country at large, were the whole sum requisite for the support of education raised by direct taxation, yet, as in a young country like this, such a plan might be deemed burdensome by those who have no direct personal interest, who have either no children, or whose children are already educated, it is proposed to introduce the measure in a somewhat modified form. Now as there are three parties or constituencies more or less interested in the cause of education, so each should bear a suitable proportion. There is first the province at large. It is greatly benefitted by the diffusion of a sound popular education, and it is but right and proper that it defray out of its general revenue a third part of the expense. Again, the county is more directly interested. But in each county there are some settlements in a more advanced condition than others, some it may be, are naturally more fertile than others. Some have received an impulse from a certain fortuitous occurrence, and gone forward in a course of careering progression; and others have remained all but stationary. Some have been characterised in a very early period in their history for their high appreciation of education, encouraged it in every possible way, and their industrial pursuits have in consequence grown apace; whilst others in their immediate vicinity, have remained in a state of complete dormancy and inactivity, But whatever is this diversity or its source, it is alike the duty and interest of every settlement to use every means for the general diffusion throughout the country of enlightened intelligence, for the encouragement of industrial habits, and of high-toned christian morality, and as all these can alone be secured by a sound and good education, it is clear that the whole country should be assessed for another third of the aggregate amount necessary for its sup-The next in order is the School District itself. Within its precincts education is still more directly beneficial, not only to parents who have schoolable children, but to every one who owns an acre of land. It is thus but right and proper that the districts pay the other third, raised either by subscription or assessment, or in whatever way the inhabitants shall determine. But there are parties in the

district to whom the education of the young is dearer far. I refer, of course to the parents of the schoolable children. Such, it may be, are determined to obtain the highest possible education for their offspring; and well knowing that suchracommodity is not to be had without an adequate remuneration, they are perfectly prepared to raise any reasonable amount that may be required over and above all that they are legally bound to do. By this arrangement, whilst adequate provision is made for the education of every schoolable child in the district, there is not the slightest restraint upon those more advanced or wealthy settlements desirous of a superior education for their children, and who have both the means and the ability of paying for it. On the contrary, such may have the very education suited to their views and circumstances, whilst, at the same time, they are greatly relieved in their outlay, by all being compelled to pay a certain amount. And could any scheme be more advantageously devised, by which, in accordance with the interest involved or the benefit derived, all are required to contribute accord Could any plan be pursued by which the children of the poorest and richest will receive an education in more exact adaptation to their rank and circumstances? And yet, after all, what is it but a process of equalization, but the distribution of the maintenance of a branch of the public service—a branch which lies at the very basis of all domestic, social, and national prosperity—amongstable many, instead of confining it to the few more directly or personally interested And whilst all this is the case, it is vastly the most economical; for by the application of the principle of division of labour, 75 children will be taught with far greater efficiency than 25. Then all the schoolable children will receive a sound and good education, by which the masses will be trained to habits of industry and morality, and all for less, on an average, than \$2.00 per annum for each family, in the shape of direct taxation.

### II.—THE COLLEGE.

The word College, in its more general acceptation, means a collection, an assemblage, or a society of men, invested with certain powers and rights, performing certain duties, or engaged in some common employment or pursuit. In a more particular sense, it signifies an assembly for a political or ecclesiastical purpose; as the College of Electors, the College of Justice, the College of Commerce, the College of Cardinals, and the like. In a more restricted sense, still, and as a branch in the educational series, it means a high seminary of learning, either in Literature, Philosophy, or Science, in the world of matter or of mind; in things human or divine. It is generally employed to characterize what is designated a Faculty, or some grand department of knowledge, composed of a number of cognate branches, each of which is presided over by its respective Professor, thereby enbodying and illustrating the all-important principle of the division of labour in mental pursuits. The object of the College is to impart the highest and the best knowledge on any one specific branch, and implies that the students in attendance are rendered thoroughly familiar with, completely master of all its facts or phenomena, with their causes and laws, their methods of investigation and combination, the analytical and synthetical processes. Thus there is a wide and radical difference between the school in its highest stage, and the collegiate institution, even in its lowest; and yet they stand in close relation, so much so, that the full benefit cannot be derived from the latter, unless the former has done its part; and done it right well. The first grand aim and object of the college is to convey to the students the accumulated stock of knowledge on any given subject, whether in the walks of literature, of philosophy, or of science; but how could this be effected without our being provided, through the medium of the school, with the means of getting at that knowledge; the prelections of the Professor going little beyond the great leading outline, and pointing out the source whence the minute details Another object of the college is to investigate phenomena in are to be learned. some one department of nature or art, to seize upon the laws or principles, and to trace these in all their diversified relations, both to the world without and the world within, so as to be well equipped for the higher platform of generalization, and yet how could all this be overtaken and achieved with any measure of success save by the training in methods of thought and arrangement, which the students

have received by their passing through a course of sound elementary education at school. In one word, the college is designed and eminently qualified to satisfy a thirst for knowledge in any one department, the school to awaken that thirst.

And if this difference and dependence characterize the aims and objects of the school and college, they affect materially the qualifications of the living agents, respectively, who preside over them, namely, the Teacher and Professor. The attainments and qualifications required by the former are general, those by the latter specific. The Professor ought to be facile princeps in his own chosen department, not merely because he has devoted a great portion of his time and engergies to its study and the study of its cognate branches, but because he possesses a natural inclination, a decided bias for its prosecution. The Schoolmaster, on the other hand, with fair general scholarship, ought to be theoretically and practically a thorough proficient in all that appertains to method, involving an extensive knowledge of psychology, on the one hand, and how the human mind is to be operated on for the production of certain results on the other. In one word, the Teacher has mainly to do with the art of communicating knowledge, the Professor with the amount communicated; the one has to awaken a general spirit of enquiry, to stir up minds at large, the other has to beget an enthusiasm in the subject under consideration, and to put those engaged on the right road of prosecuting the investigation for themselves.

And what a noble field do these collegiate institutions furnish for the division of labour and the attainment of the highest possible excellence in the various walks of literature and science. The young aspirant after literary or philosophic fame is conscious of having been endued with certain gifts eminently qualifying him for a particular study. That, he prosecutes with unabated and ever-increasing ardour and bravely breaks through every obstruction in the pursuit. He gradually outstrips every compeer in that particular walk, and by his skilful and persevering researches and investigations, he adds largely to the already ascertained stock of facts or phenomena respecting it. He publishes abroad the result of his discovery, he grows apace in his devotedness to his favorite branch of study, and in all his intercourse with his fellow-men he diffuses around it a halo of glory. In these circumstances, a professional chair is offered to, and accepted by him, where he can dedicate his means, time and energy to the same pursuit, and where he can spread an enthusiasm and zeal amongst the hundreds and thousands that sit at his feet and wait on his prelections. How advantageous this arrangement for the advancement, refinement, and enjoyment of humanity! How admirably fitted to elevate the whole economical, intellectual, and moral welfare of the human species; all brought about through the instrumentality of the College, in very proportion to the subdivision of whose chairs or classes, will be the benefits, results, and triumphs achieved!

In order, however, that these benefits may flow in full tide from these Institutions, they must adhere to, and do their own proper work. The College, whether of Arts, Medicine, or of Theology, must not travel beyond its own legitimate precincts. The moment it does so, or attempts to blend two or more faculties into one, the whole is marred, and the College reduced to a respectable Academy, if indeed it is worthy of the designation, and, alas, how often has this been attempted on this continent. The denomination determined to have its pulpits supplied with a native ministry, with becoming zeal sets agoing a Theological Institute. But no sconer have operations commenced than it is found that the aspirants for the ministry are not in a state of preparedness to enter on the Theological career, and one or two preliminary professors, as they are called, are appointed to conduct them over the whole range of literature and philosophy. Thus the College ceases to exist, and is converted into an Academy, conducted upon the college plan or into a pseudo university.

### III.—UNIVERSITY.

In France this term is of extensive signification. It comprehends all the public schools and seminaries of learning, from the most initiatory to the highest and most distinguished college. In Great Britain and Ireland, as well as on this continent, it has received a more limited application, denoting an assemblage of collinear.

leges or an aggregate of advanced seminaries. These were never originally intended to prepare and qualify for the learned professions; but in modern times they have considerably extended their sphere of operation, and been made to comprehend professional chairs or lectureships for expounding the science of the practical or economic pursuits of life. Accordingly, a fully equipped University, whether under the same roof, or in separate colleges affiliated, consists of four distinct faculties, Arts, Medicine, Law, and Divinity, with the additional classes just referred to, sometimes designated special courses. The Faculty of Arts is composed of four or six distinct compartments, with separate professors, requiring four or five terms to complete the course, and covering a space of not less than three years. The following may be considered a fair representation of such a course, with the special study of each term, whatever other classes may be attended:-1. The higher departments of Latin and Greek, and Mathematics, specially Geometry and Algebra. 2. Logic and Metaphysics, or Intellectual Philo-3. Rhetoric and Belles Lettres, with History of English Literature; Moral Philosophy, and Political Economy. 4. Natural Philosophy. Attendance upon these classes in order, entitles the student, after a sifting examination, to the honored degree of Master of Arts. Some branches of the Christian church require certificates of attendance at all these classes, before their aspirants to the ministry can be enrolled as students of their respective divinity halls; and, we believe, it would be alike beneficial to themselves, and to the economic interests of the human family, were the candidates of the other learned professions of law and medicine obliged to adopt a similar course. These classes lie at the basis of all liberal cul-They impart a large stock of valuable information, applicable alike to the learned professions, and to the varied pursuits of life. All, therefore, who attend these classes with close application, must necessarily occupy a high vantage ground, and enter upon the study of Law, Medicine, or Theology, with very peculiar advantages.

The Medical Faculty in the University is more or less complete, according to circumstances. If of any repute it has seldom less than six or eight distinct classes, presided over by separate professors, who, besides their general knowledge of their profession, have had their attention specially called both by inclination and external circumstances, to some one department, and who have, in consequence, signalized themselves therein. The Medical Faculty of McGill University, Montreal, one of the most celebrated in the British colonies, if not on the whole continent, have the following distinct classes, with professors for each: 1. Anatomy. 2. Chemistry. 3. Materia Medica. 4. Institutes of Medicine. 5. Practice of Medicine. 6. Surgery. 7. Midwifery. 8. Medical Jurisprudence. 9. Clinical Lectures. 10. Clinical Surgery, with one course of Botany and Zoology. All these classes the candidates for an M. D., are required to attend.

The Law Faculty is generally composed of a staff of three or four professors, one for public or constitutional law, another for the law of contracts, a third for the law of real estate, and a fourth for civil law.

The Theological Faculty, both before and after the Reformation in the sixteenth century, was considered the most important of the whole. Indeed but for the training of a native ministry for supplying the Christian pulpits of the land, the majority of these Universities never would have been originated, and it was only in so far as they served this purpose that they flourished and were perpetuated. In countries where there is no established form of religion, this faculty, as a matter of course, does not and cannot exist. In such circumstances, each branch of the Christian church is bound to support its own Theological Seminary. In every well furnished seminary of this description, there are generally five or six professors: 1. Systematic Theology. 2. Hermeneutics or Biblical Criticism. 32. Ecclesiastical History. 4. Hebrew and Oriental Literature. 5. Pastoral Theology, &c.

In addition to these faculties which go to make up every well-equipped University, special courses, as I have just hinted, have been recently introduced, which cannot fail to prove of great practical utility, and to render these Institutions, nationally, vastly more serviceable. These courses of instruction are mainly introduced to impart a knowledge of the theory involved in the various useful and

industrial arts, such as Agriculture, Engineering, Navigation, Surveying, Merchandizing, and, as intimately connected with some of these, Modern Languages. These arts, as is well known, depend on certain important elementary principles, which have been reduced to sciences. And though these may be cognate to, or merc departments of philosophy, embraced under some of the branches of the Faculty of Arts; yet from their practical bearing, they are entitled to a definite and separate consideration. Besides, it may happen, that many of those who intend to prosecute one or other of these vocations, may be altogether unable, both for want of time and means, to attend a full course of instruction in any of the Collegiate Faculties, and yet to whom a knowledge of the more essential principles involved in the calling for which they are destinated, may prove of the greatest possible value, not only to themselves, but to hundreds of like craft and pursuit.

Such is a brief sketch of a well-equipped University, whether it consists of one building, or of a number of separate colleges, all associated together for the furtherance of the one grand object; and, with the exception of the Theological department, such a University, I hold to be at once the duty and interest of every state or province, to institute, patronise, and support, to the utnost of its ability;

and that for the following, amongst other reasons:

1. Because it will exert an extensive and beneficial influence on all the other Educational Institutions of the land.

It is too generally imagined that Colleges or Universities, or advanced Seminaries of learning, are of benefit only to the rich, or the higher classes in the com-Now, though it is undoubtedly true that these classes derive the more direct and immediate benefit, inasmuch as they are able more largely to avail themselves of them, yet we are persuaded that this is considerably overrated. We believe it will be found on a narrow inspection, that a fair proportion of the sons of the poorer classes attend these Institutions; and that these, generally speaking, rank among the most talented and distinguished of their students. But even granting, to the full extent, that these higher seminaries of learning are attended mainly by the sons of the richer classes, it is altogether a misapprehension to suppose that the poorer, in consequence, derive little or no benefit. A University, if properly conducted, will produce a most healthy influence upon all the Grammar The students at the University, who have Schools and Academies in the land. attended these Schools, will, on their repairing thither, come into competitive trial, and their respective merits be thereby fully and fairly tested. This will stimulate both the teachers and the taught of these academies to a noble and determined rivalry, which will descend into, and diffuse its influence among the Common Schools. What are the higher schools of any country but the more advanced stages of the initiatory or primary, and therefore, whatever operates upon the former must be felt, and felt extensively upon the latter. And hence the soundness of our position.

2. A well-equipped University in any country cannot fail to produce a power-

ful influence on all the learned professions.

It is well known that, in all countries, Divinity, Law, and Medicine, are ranked as learned professions—a designation evidently conferred on them from the circumstance that those who are engaged in them require a certain amount of learning to qualify them for the right discharge of the duties involved. As these duties are of the most weighty character, and deeply affect man's welfare in all the relations he occupies personally, socially and eternally, so it is the paramount obligation of every State or Province to see that every means is provided to give the requisite qualification, and what means more important than a well-equipped University. Every branch of the Christian church is bound, for its own preservation, to provide the means requisite for the theological training of her aspirants to the office of the ministry within her pale. But it is otherwise with literature and science. These should know no sects in religion, and therefore should receive the highest possible encouragement at the hand of the State, by the establishment of a University or Collegiate Institutions, and that, not merely for laying the basis of all liberal culture, but for the elevation of the tone and character of the learned

professions. If the body, the property, and the eternal interests of humanity, are instrumentally so dependent on these professions, surely it behaves every State and Province to do what in it lies to render these professions worthy their honored distinction.

3. But farther, a good University will exert a mighty influence on the whole economic welfare of a country.

By the economic welfare of a country, we understand its prosperity in a temporal and social point of view. This depends on the inventive power of a few, and on the industrial habits of the many. And what is it that energizes and directs the faculty of invention? It is intelligence aided and guided by true The utilitarian inquires in reference to this discovery in science. and that invention in the arts, "Cui bono." It does not directly secure a certain amount of gain, and therefore he repudiates it as a thing of nought, as of little or It brings no direct or immediate return to his accumulated stores; and therefore he treats it as unworthy of notice or regard, and all who encourage it he looks upon as airy visionaries, as wild speculatists. This is bigotry. We unhesttatingly aver that there is not a discovery in science, or an invention in the arts; but what will, sooner or later, tend to the promotion of man's social and economic happiness; and, it may be, of the highest temporal aggrandizement. The fact may for ages remain locked up within the precincts of the volume that records its discovery, but at some period or another, whether by the direct leadings of Providence, or by some accidental occurrence, it shall receive its appropriate application, and approve and attest its utility. In confirmation and illustration of this view, we would merely instance the discoveries of Sir H. Davy in organic chemis-And, as in science, so with any invention founded on the application of sound philosophical principles On some occasion or other, and that, it may be, altogether unexpectedly, will it come into requisition, lessening egregrously man's physical toil, and greatly elevating him in the social and moral scale. And how, is it now asked, are these discoveries to be made and applied? By men of science, mechanical skill, and ingenuity, confining their investigations to some one department, and prosecuting these to the utmost extent of their energies. And this can only be done through the medium of the University, in which by the division of labor, man's powers are concentrated on some one department of knowledge, and in which they have both the means and the time for carrying on their experimental: processes, and adding to the already accumulated stock in their own favorite walk.

It were very easy to continue this strain of observation. We might, for example, show that a well-equipped University will produce an enlightening, refining, and moralizing influence upon the whole community. And again, that it will diffuse amongst all ranks, a liberalized and catholic spirit, and that, at a period of life most impressible and enduring, nay, more, that it will foster a love of father-land, a high toned patriotism. But surely we have said enough to satisfy every unprejudiced mind that the nation which neglects the establishment of such an institution is not only guilty of a grievous direliction of duty, but acts a part in direct hostility to its prosperity, its future greatness, its ever-increasing strength If the Common School lays the foundation of a nations glory, the University unquestionably puts on the copestone. And we know of no colony in the British dominions in a more advantageous position for embarking in such an enterprize There is already a building provided with all the necessary than Nova Scotia. accommodation and furniture. There is an endowment of at least £900 per an num belonging to it. There is a large party in the metropolis, and throughout the province who, apart from all political and denominational grounds, would hall the establishment of a high literary and scientific institution in Halifax. Independent of the advantages to the learned professions there is a considerable number of young men intending to follow a mercantile life who would welcome the opportunity of attending, as amateurs, several of these classes, to whom this would be of incalculable service in their whole future career.

We are not ignorant of the prejudices that exist in the minds of not a few in connection with Dalhousie College, the contentions, the strifes, and the heart-

burnings on the one hand, and the failures, the sad discomfitures, on the other, by which the past history of that establishment has been characterized. We have no desire to stir up even the embers of these, but we do submit with all candour, to the consideration of every reflecting mind, whether these failures have not arisen in a great measure from the non-compliance with the design of the founder of that institution, and a consequent mal-appropriation of its funds. But whatever may have been the cause of the want of success of all the movements that have taken place in connection with that establishment, we think it little less than a reproach if not a scandal upon the Province, that in those days of catholicity and union, it should remain in its present condition of empty desolation, with its valuable funds unemployed, funds that might be employed with untold blessings to the furtherance of advanced education in our midst. In these circumstances, we cannot refrain from noticing the high gratification we have experienced from the scheme proiected last summer, and which we earnestly hope to behold speedily consummated, a scheme which, though it were but partially carried out, promises to be far more in accordance with the original charter as embodied in the deed of incorporation. than any yet propounded. We trust that that scheme will meet with no untoward opposition, and that a commencement will be made on such a broad, catholic basis, as will not fail to elevate Dalhousis College to the distinguished position of a "bona fide" Provincial University. With this view, it ought, in our opinion, to embrace, at the very start, a well-equipped Faculty of Arts, with lectureships on Engineering, Surveying, Agriculture, and if possible, gratuitous lectureships for a session or two in some department of Medicine and Law. This would evince to the supporters of denominational colleges that there was not the slightest desire on the part of the promoters of this movement to come into collision with these institutions; but, on the contrary, to maintain an entirely different and independent position, and which instead of diminishing, would largely increase the number of students in attendance at said colleges.

### IV.—SUPERVISION OF THE WHOLE.

This is a matter of primary importance in every department of the public ser-The service itself may be essential for the public welfare; the external organization may be as complete as the circumstances will admit of; but unless the superintendence is thorough, the whole will be inefficient. To secure this there must be a paid agency. It is all well to make laws providing for Schools and Colleges and Universities, and to appoint Boards or Councils of Commissioners to preside over them, to make regulations, appropriations, and appointments of officers, in connection with these Institutions; but unless some member or members of these bodies be set apart and made responsible for the preparation of all such matters as are necessary from time to time to be brought before said bodies, and then to see them carried into effect, when adopted or ordered, the objects of creating and appointing them will not be accomplished. And all this implies a paid agency, and paid in proportion to the responsibilities involved, and the qualifications required. Now this is one grand cause, we would almost say the cause, why much of our educational work in Nova Scotia has proved completely ineffi-Provision is made for the appointment of trustees as the representatives of the school district, but no penalty is attached either to the non-acceptance or nonperformance of the duties thereto belonging. Nor is there any regulation appointing one of the number to collect the amount required, or to remunerate him who has collected it. Again, Commissioners of Schools are appointed by Government to preside over the educational interests of counties or townships, to allocate school districts, to examine and license teachers, to distribute the provincial money, and otherwise to superintend the general cause of education. These are onerous duties, and if faithfully performed would entail no ordinary amount of toil on these commissioners, such toil, in fact, that it would be unreasonable to expect that they would undergo without an adequate remuneration. They are willing enough to give their time and their counsel gratuitously at two or three fixed meetings in the course of the year, but as to their actual carrying out of the decisions or judgments come to which would require hours and days of precious time, as well as involve them in considerable outlay, it cannot be supposed that

they could overtake. True, these Boards are allowed to appoint clerks, who receive a certain commission for the money distributed, costing the Province between £600 or £700 per annum, but beyond the mere duty of clerk, the majority of them do not consider themselves entitled to go. In one word, these Boards, to be of real service to the cause of education in their respective localities, would require a paid local superintendent or inspector, not only to disburse the money, but to prepare the business for each meeting, and to be responsible for seeing their decisions vigorously carried into execution, whatever the amount of toil involved. In consequence of the want of such a paid agent, the majority of these Boards do little more than meet semi-annually and appropriate the money

placed at their disposal. But the grand defect in the whole of our educational fabric, looked at externally, is the want of a general presiding body in the shape of a Council of Public Instruction or Central Board of Education. Local Commissioners are appointed. but the instructions given is of the most vague and indefinite description. The consequence is, that scarcely two or three of these Boards pursue exactly the same course in any one case. So great, sometimes, is the disparity in the management of their funds, that it is no uncommon occurrence for the same teacher to receive at the rate of £20 from one Board, and from another at no great distance not more than £10. There is, no doubt, a Superintendent of Education, but not only is he destitute of all administrative power, but he is strictly prohibited from interfering with their operations. This anomolous and absurd state of things can only be obviated by the appointment of a Council of Public Instruction, of which Council the Superintendent of Education ought to be a constituent member, and act in the capacity of Secretary to the Board. On this Board ought to devolve the whole management of the educational interests of the Province, from the Common School up to the University; to possess and direct the endowment of Dalhousie College, and to expend all the money that has been or may be granted in support of the Provincial University, or of the Normal and Model Schools; to make or alter, from time to time, with the consent of the Governor in Council, any statutes rules and regulations which may be deemed necessary for the government and discipline of the University and Grammar and Common Schools throughout the Province; to appoint and remove from time to time Teachers and Professors and other officers and servants; to prescribe and fix their duty and remuneration; to make and alter, as may be deemed necessary from time to time, any statutes or regulations touching the course of study, the establishment of scholarships, examination for matriculation, degrees, scholarships, &c., &c., &c.

But the investure of this Council with these powers and functions will be of comparatively little value unless there is an efficient officer in the capacity of Superintendent of Education, to see that all its judgments are to the very letter carried out. More particularly, it should be his duty to see that all the provisions of the acts, and all regulations regarding University, Normal, Grammar and Common Schools are duly executed, to visit Grammar Schools once in the year, and to see that all the Inspectors of Common Schools do their duty; to prepare and lay. before the Council such regulations touching the discipline and government of all the grades in the series of education as he shall judge expedient and advisable; to prepare and transmit all correspondence which shall be requested or authorized by the Council; to have the immediate care, management and payment of all moneys; to use his best endeavours to provide for and recommend the use of uniform and approved text-books; to prepare suitable forms, and to give such instructions as he shall judge necessary and proper for making all reports; to decide upon all matters and complaints that may be submitted to him by any person interested in connection with grammar and common schools; to apportion whatever sums of money shall be granted by the Legislature for the establishment and support of School Libraries, &c.; to be responsible for all moneys paid through him, and to give security for the same; to make to the Government and Legisla ture a report of University, Normal and Model School, Common and Grammar Schools throughout the Povince, &c., &c., &c.

We feel thoroughly persuaded that were such a Council appointed and investeds, with the powers indicated, and the duties of Trustees and Commissioners distinctly.

specified, our educational supervision would be complete—as complete as circumstances would admit of. It would bring about not only a harmony, but a uniformity of action, in all the subordinate departments, and thereby serve the greatest possible utility. It would not only cherish a graduated dependence, but would secure the feeding of the higher by the lower, from the initiatory to the University. It would form the most perfect system of supervision ever yet exemplified. Need we then be suprised that it should have not only the approbation, but the highest possible commendation of such men as Drs. Wayland, Ryerson, Dawson, and others.

I have now endeavoured to bring before your Excellency the great leading features of what, in my opinion, constitutes a thorough system of provincial or national education, founded upon the very nature of education itself; and I trust I have furnished ample materials to those whom it may concern for the remodelling of the whole of our educational condition, and for the constructing of a Legislative enactment thereon. Indeed, I have been so anxious to do justice to these views, which I hold to be essential to a nation's prosperity, that I have left

myself little or no space for referring to the appended tables.

These tables, I am glad to say, show, under almost every heading, a certain increase above those of the previous year. The two most important items—the number of children attending school, and the money expended in support of education—are both considerably in advance. There were 4,830 more children at school, and about £1500 more money was disbursed for education, during the past year than the preceding year, a pretty substantial evidence that, with all the imperfections clinging to our present machinery, we are not only maintaining our grounds, but making some progress, though not to the degree desirable. sessions of the Normal School have been held since my last report was given in; at the first of which there were 55 Students in attendance, and at the second, 41, both rather under the average attendance since the commencement of the Institu-The number in attendance at the present session is, however, larger than on any previous occasion, there having been not fewer than 86 Students enrolled altogether, about a dozen more than there is accommodation provided for Model School during the past year has fully averaged its usual attendance, maintaining its efficiency, and fulfilling the end for which it was established.

I regret that, owing to the inclemency of the weather and the condition of the roads, I was unable to perform my round of visitation last spring. In the autumn I visited the counties of Hants, Cumberland, Pictou, Sydney, Guysborough, and part of Halifax, especially the Eastern Shore districts, holding Institutes with the Teachers' meeting, Trustees and Commissioners, addressing public meetings, &c. I soldom return from one of these visitations without feeling deeply impressed with the conviction that could more time be devoted to such work, and thus the interest awakened, deepened, and perpetuated, the general cause of education throughout the province would be vastly promoted; and I rejoice to be able to state, that from the change that is to take place in the time of holding the terms of the Normal School, this will henceforth be the case. By this change I will be able to devote four months in the year to visitation, instead of three, and that at a season when double the amount of labour can be accomplished. Three months of the year too, devoted to the work of school inspection by the other two teachers of the Normal School, and that without any additional outlay to the province, save the travelling expenses of these gentlemen, will also prove of inculculable service. By this means, in the course of two years or so, a body of educational statistics, relative to school districts, number of families, and schoolable children in each district, school-houses, furniture, &c., will be collected and published, and prove of immense utility to School Commissioners and others interested in the cause of education. by this means, too, from the conferences that will be held with the inhabitants, and especially with the trustees of each district, respecting its educational condition and the means to be employed for its improvement, will great good be effected. There seems to be no unwillingness on the part of many of the young men and women of the province to qualify themselves as teachers. The grand impediment in the way of decided improvement and rapid progress, is the apathy or indifference of whole districts to the matter of education, and the consequent deficiency of means for carrying it out. We know no more likely way of removing this impediment than the one just indicated. We must go to the people, and urge them by legitimate appliances, to a sense of their responsibility and privilege in connection with the cause of education.

All the moneys committed to my disposal by law, have been disbursed by me in accordance therewith. The receipts and vouchers for the same will be luid in due course before the Educational Committee of the House of Assembly.

I have the honor to be,

My Lord,

Your Lordship's most obedient

And humble servant,

ALEXANDER FORBESTER

## APPENDIX No. 23

# AGRICULTURAL REPORT.

MAY IT PLEASE YOUR EXCELLENCY,-

In no respect, probably, has greater injustice been done to Nova Scotiz than in her agricultural capabilities. That she possesses very considerable industrial resources in her forests, minerals and fisheries, is admitted by not a few; but as to her agricultural and horticultural riches, the most egregious ignorance prevails; and that not abroad merely but even among her own population. Hence, one of the principal reasons why so few of the field-labouring emigrants from the old world, land upon her shores. Hence, too, the recreant cry of too many of her own sons respecting the barrenness of her soil, the inhospitableness of her climate, the duration and severity of her winters. And hence, too, amid the profusion of her bounties, the grumbling discontent of not a few, and their eager desire to repair to other lands.

Now, in opposition to all these views, we are prepared deliberately to maintain, that Nova Scotia presents not only a fair and passable field for agriculture, but that in her productiveness of all the staple commodities that go to the support of

animal life, it is equal to any, it is surpassed by none.

Is it asked, What is it that constitutes the natural resources of agriculture, on what does it mainly depend for success? We reply:—I. Climate. II. Soil. III. The command of fertilizing media. IV. The facility of drainage. The first of these, however susceptible of partial improvement by the progressive advancement of society, remains, nevertheless, substantially the same. The other three are all under the control, and at the service of man, and furnish one of the finest fields for the application of science, skill, and expansive benevolence. Let us glance at each of these in order, and, as we proceed, let us endeavor to substantiate the position assumed, namely, that Nova Scotia is an excellent farming country. Then we shall briefly refer to the confirmation given to these views, by the position taken by Nova Scotia at the London Horticultural Show in October last, as well as at the International Exhibition, and, lastly, we shall urge to the adoption of those measures that seem fitted still more fully to develope the whole of our fruit-growing and agricultural resources.

### I.—CLIMATE.

Nova Scotia, as is well known, lies nearly midway between the Equator and the North Pole, between latitude 43° and 47°, about the same as the South of France and the North of Italy—the land preeminently of the grape and peach. Its average annual temperature is 43°, Fahrenheit. During the months of April, May and June, the thermometer ranges about 49°, and of July, August, and September, 62°. The whole time for the cultivation of the soil is from the 11th of April to the 17th of November, about 6½ months. The meantime the crop is in the ground 110 days, the average time of sowing being the 10th of May, and that of reaping the 19th of August, giving thereby about the space of three months for the preparing and fertilizing of the soil, and the same for the growth and ripening of the crops, about 20 days or so less than in the State of New York, and in Canada, and about two months less than in Scotland or England. But when we take into

account the far greater number of rainy days in the last mentioned countries, and the longer time—almost a third more—which the grain takes to vegetate and fructify; and when we reflect, moreover, upon the fertilizing and enriching influences of our winters, and the mellowing and softening power of our waters, we feel ourselves perfectly warranted to infer that the climate of Nova Scotia, for all agricultural purposes, occupies a kind of medium between the South of France and England, inferior, it may be, as a whole to the former, but superior to the latter. And we think we are fully borne out in this statement by the actual results in the growth of roots, grain, and fruits.

We unhesitatingly assert that there is not a climate on the face of the globe, better adapted for the growth of all kinds of esculent roots than Nova Scotia. In former times when the potato grew with such luxuriance everywhere, it was no uncommon occurrence to have a yield of from 300 to 400 bushels per acre, and such was the universally admitted excellence of their quality that they brought in the American market at least twopence a bushel more than those of any other country or province. Even now, there are more potatoes grown in this province than in any country on this side the Atlantic, it being no rare thing to have from 175 to 200 bushels per acre, and perhaps there has been less of that disease—which has produced such havoc all over the world within the last 20 years—than anywhere else. Indeed there are some districts of the country, where it may be said to have scarcely ever made its appearance, replenishing to no small extent the coffers of the farmers resident in these localities. This is altogether independent of the plentiful supply of potatoes raised in newly cleared lands, in consequence of the large amount of alkaline substances found therein.

"I have found," says Mr. Thomson of Windsor, "the best early potato to be the Early White, next the Early Jackson, of which last sort I have raised at the rate of 350 bushels per acre one year; 400 bushels per acre, next two years; and last year only 200 bushels per acre. Next in order of early white sorts, is the Carter. I sent to the Exhibition 8 potatoes weighing 13½ lbs., of excellent quality, with hardly any rot. I planted them from the 10th to the 20th June, the land being in good order, manure one year old, large quantity in the furrow; covered by the plough, with 2½ feet width between the furrows; seeds, with one to three eyes, about ten inches apart in the rows. I hoe as soon as the plants are above ground, and finish as soon after as possible; as I consider working among potatoes after the bulbs or tubers are formed, produces knobs of new growth which are injurious to the general crop. For late potatoes, I grow the early calicoes, the Malagash blues, and the Stirling blues; but I prefer the first to them all."

But Nova Scotia is just as well adapted for the growth of turnips as it is for Whenever this crop receives anything like justice, it yields from 300 to 400 bushels per acre; and, we believe, that by a suitable fertilization of the soil, it could be made to yield 200 bushels more. The specimens of Swedes and Aberdeen yellows shown at the Exhibition, were both unusually large and remarkably symmetrical. Mr. J. McKay, gardener to the Hon. Wm. Black, after describing the mode of culture, says: "I have seen 950 bushels grown on an acre in the neighbourhood of Halifax, on Mr. Black's farm, some of the roots weighing from 15 to 18 lbs., and the general average weight per bushel 51 lbs. So well adapted is the climate of Nova Scotia to the culture of the turnip, that the Aberdeen yellow has both ripened its seed and produced an abundant crop the same season. And what is more extraordinary still, that seed has been sown in the very field that produced that year a good average crop of hay. We question whether there is any country on the face of the earth, that would surpass this in productiveness; all evidently owing to the salubrity of the climate, and especially to the long continuance of fine weather in the autumn—the time in which the roots grow and swell.

The other roots are in every respect as prolific. Mangold Wurtzel yields from 600 to 800 bushels per acre. "The Mangold Wurtzell," says Mr. McKay, "that were sent to the London Exhibition were the long red, six of which weighed 99 lbs. In 1859 I sowed three quarters of an acre of mangolds. We took them up the third week of October, and the return was 1100 bushels. 1200 bushels to the acre is a moderate crop. Weight per bushel 54 lbs. Mangolds may be grown

on the same ground for a number of years in succession, if the ground is well manured every year. I saw a field in the neighbourhood of Dalkeith, 23 years ago, that had grown potatoes and mangolds for 22 years in succession, and then was still producing good crops, but I have never seen them so large in Britain as in Nova Scotia."

Carrots and parsnips are equally productive. "I find," says Mr. McK., "the early horn carrot to be superior, for culinary purposes, to all the larger sorts. It is of finer flavor, and yields a larger crop, averaging 500 bushels to the acre. The large white Belgian is the best for cattle. It yields 400 and 500 bushels to the acre."

"Onions," says the same successful cultivator, "can be grown in Nova Scotia to as great an extent as in any other country. Annapolis and Cornwallis could grow more than would supply the Province. There is a large sum of money sent out of Nova Scotia to the States annually for onions, whereas Nova Scotia might export its onions as well as its apples."

How striking the provision thus made for a copious supply of nutritious aliment to the live stock during our protracted, severe winters! How beautifully does this illustrate the adaptation process in the arrangements of the bountiful Creator, the climate producing in the greatest abundance and perfection, those very crops

best adapted to the wants of the animal kingdom!

But Nova Scotia is not less distinguished for the growth of all sorts of cereal crops, from rye up to the finest wheat, from buckwheat up to the heaviest corn. Wheat yields from 25 to 30 bushels per acre, and some of it weighs as much as 67 lbs. per bushel. At the Provincial Industrial Exhibition, held at Halifax in October 1854, there were 54 samples of various kinds, of which only two were below 60 lbs. per bushel, and to balance this 16 parcels were above 64 lbs. per bushel, while two parcels were above 66 lbs. "Some ten or twelve years ago," says one of our most enterprising farmers, "I sent five bushels of wheat, weighing 67 lbs. and some ounces per bushel, to the Dartmouth mill, and when ground there were only 18 lbs. of bran from the whole quantity." Last year (1862,) Mr. Jas. Thompson of Windsor, raised purposely for the Exhibition, bald barley, which weighed at Windsor Fair, 64 lbs. per bushel. This barley was sown 10th June, and reaped 25th August, being thus only 2½ months in coming to maturity.

The climate is equally well adapted for the growth of flax and hemp.

The Chinese Sugar-cane has been raised in Nova Scotin (although not perfecting the seeds, under ordinary culture,) producing 400 gallons per acre of clear, amber-colored syrup, as thick in consistence as the best molasses, and superior in flavour also; the refuse affording a large amount of food, in crushed cane and foliage, for stock, which they particularly relish, containing as it does a large quantity of saccharine matter.

Another matter here worthy of notice, is the suitableness of this climate for the ripening of all garden and field seeds. It is admitted that our Spring is exceedingly short-lived, for scarcely has winter taken its departure when we are ushered into all the sunshine and warmth of summer. But this again is amply compensated for by the continued fine weather of autumn; September, October, and a great part of November, frequently proving the most pleasant months in the year—such weather in November being designated the "Indian Summer" of Nova Scotia. And whilst this circumstance is fitted to teach important lessons to the gurdener and farmer, especially, never to leave anything undone in the fall that can be done without loss in the spring, it also shows that instead of importing horticultural and igricultural seeds, there ought to be in this country a large overplus for exportation to less favored climates. The reason why the great proportion of seeds is raised in the South of France and England, is the salubrity of the climate, and if such is the case in these countries; why not in Nova Scotia? At all events; Nova Scotia ought to be far removed from the necessity of importing any; and thereby husband for its own benefit and improvement thousands of pounds. From the specimens of grass, clover, turnip, carrot and garden seeds, exhibited by the various agricultural societies throughout the year, as well as from those forwarded to the International Exhibition, we have abundant evidence of the soundness of this observation. Indeed, such are the capabilities of this country for the ripening. of seeds, that peas have been grown, and the seeds of the first crop sown again, and a second crop produced the same season.

But altogether independent of any pecuniary advantage that may arise, this is a matter of the greatest consequence to the cause of agriculture itself. If, as generally admitted, next to the preparation of the soil comes the selection of the seed, then it is clear that every effort should be made to see that that seed is of the best possible description. And how can this be most effectually done? Plainly by our saving the seeds ourselves. Then will the seed be not only the best adapted to the climate, but we shall have it in our power to choose the good and reject the bad, which we could not otherwise do. But in nothing does the excellence of our climate appear so conspicuous as in the growth of fruit. There is, perhaps, no country in the world—the States of the American Union not excepted—better fitted for the growth of apples and pears than three or four of the Western counties. We believe there is scarcely a county in the Province that is not capable of producing good apples and pears, if they receive ordinary attention in propagating and fertilizing, but in the counties referred to, viz. : Hants, Kings, Annapolis, and Digby, the fruit is unsurpassed either for summer, autumn, or winter use, for dessert or culinary purposes. The following list contains the names of a few of the finest of our summer, fall, and winter apples, with their characters.

Summer.—1. Early Harvest or June Eating; the best early apple when in high cultivation. 2. Early Sweet Bough; large size, rich, yellow color. 3. Red Astrachan; beautiful, fine flavor, deep red and crimson. 4. Early Joe; light red, excellent flavor and good quality.

Autumn.—1. Fall Pippin; large, yellow, rich flesh, firm and excellent. 2. Fall Harvey; a very large fruit of first quality. 3. Golden Ball; yellow, very large, strong growth, first quality. 4. Gravenstein; large, covered with bright red stripes, vinous flavor. 5. Porter; one of the best; large, yellow, juicy and rich, a good bearer. 6. Fameuse or Snow Apple; deep red, flesh white, excellent.

Winter.—1. Baldwin; bright red, young trees, not hardy, unless in protected localities. 2. Belle Fleure or Bishop's Pippin; large, oblong, ribbed, yellow, of excellent quality. 3. Esopus Spitzenburg; large, red, rather acid, but good. 4. Swaar; above medium size, rich yellow, best winter apple for the table. 5. Rhode Island Greening; color green, tender, rich flavor, reliable. 6. Hubbardston's Nonsuch, flavor mild, excellent, good bearer. 7. Northern Spy, large, handsomely striped with red, retaining its flavor till late in spring; long in bearing, requires severe pruning and rich culture. S. Roxbury Russet, flat, rough, russet, good keeper. 9. English Russet, round, russetted, keeps long. 10. Ribston Pippin. 11. Pomme Gres. 12. Nonpareil. 13. Seek no Further. 14. Hawley's Dutch Mignonne. 15. Mother; striped, great bearer, valuable. 16. Buckley's English Golden Pippin. 17. Herefordshire Pearmain. 18. Newton Pippin.

These generally ripen according to their sorts, from the beginning of August to the end of October; and both in size and flavor, when the season is at all favorable, are unsurpassed in the most celebrated fruit-growing countries. And when it is stated that such apples as the Nonpareil, the Golden Ribston, Bishop and Royal Pippins, all ripen well on standards in the orchards—which they do not in Scotland, and only in some parts of England—without the aid of artificial means, such as espalier or wall, we surely possess the most indubitable evidence of the geniality of the climate.

Pears are not grown in such abundance as apples; but wherever they are fairly tried, they thrive equally well, some of the finest American and French pears ripening without the assistance of either espalier or wall.

The following is a list of the most choice sorts, that grow and ripen in the counties of Hants, Kings and Annapolis:

Autumn.—1. Beurre d'amands. 2. Belle Lucrative. 3. Long green. 4. Van Morss' Lion le Clerc.

Winter.-5. Vicar of Wakefield. 6. Beurre Easter, 7. Winter Nelis 8.

Passe Colmar. 9. Doyenne Gloubault. 10. Beurri d' Aremburg. 11. Napoleon. 12. Althorp's Crasanne.

But the climate of Nova Scotia is equally well adapted for stone fruit. The following sorts of plums, for example, ripen as well on standards in the open orchards, as they do any where in Scotland on espaliers. 1. Orange plum. 2. Royale de Tour. 3. Gages, green, cloth of gold, Flushing or Prince's Imperial Winter. 4. Bolmar's Washington. 5. Huling's superb. 6. Orleans common. 7. Smith's Orleans. S. Knight's Green Drying.. 9. Ives' Golden Drop. 10. Purple Magnum Bonum. 11. White Magnum Bonum. 12. Vandyn's seedling. 13. Catherine Schenectady. 14. Royale Hative. 15. American nectarine plum. 16. Duane's purple. 17. Deniston's superb. 18. German Prune. 19. True Damson. 20. Reine Claude de Bavey.

Mr. Thompson of Windsor sent to England six Washington plums, which weighed 17 ounces, and measured  $6\frac{\pi}{4}$  inches in circumference, and six nectarine plums which weighed 13 ounces.

Peaches also grow and ripen on standards in the open air. They come to perfection from the first to the end of September, and weigh sometimes from 4 to 4½ ounces.

Grapes, the Sweet Water, White Capillaire, and Isabella varieties, ripen in the open air, in ordinarily protected situations. All that is required is to protect them from the severity of the winter by laying down the branches after the wood is well ripened, and then covering them over with a layer of common mould.

From the census recently taken, it would seem that in 1860 186,484 bushels of apples and 4,335 bushels of plums were raised in the Province, and the last two years there must have been at least a half more. A large quantity of these fruits is anually experted to the United States, and to some of the neighboring provinces. And yet, we believe, that the quantity thus experted could in a very few years be multiplied a hundred fold. Indeed we see nothing to prevent large annual expertations of these fruits to the continent of Europe. We are persuaded that no crop would be more remunerative.

Having thus furnished satisfactory evidence of the excellence of our climate, having shown from position and productions, that Nova Scotia is well fitted for Horticultural and Agricultural pursuits, it may here be very naturally enquired: But what do you say respecting the protracted nature and severity of your winters? Are not these sufficient, and more than sufficient, to counterbalance all that has been advanced in the preceding pages? If the winter eats up the summer, what profit is there to the farmer notwithstanding the capabilities of the climate or the skill and the industry he brings to bear upon his operations?

Now, that our winters are protracted and severe cannot admit of a doubt; and yet we are persuaded that there is no small amount of exaggeration as to the evils that are supposed to flow therefrom. What are these evils? They are generally reputed such as the following:—1. The expense of feeding the stock for such a length of time within doors. 2. The want of suitable employment for the farm 3. The damage done to grass lands, and the winter wheat, &c. first of these, viz., the expense of keeping the cattle for such a lengthened period within doors—we are very much disposed to consider as in a great measure The stock must receive nourishment all that time whether in or out of doors. All the difference then really is, the labor required to lay up in summer a sufficient supply of aliment for the cattle, and the hand-feeding during that inclement season. Granting that this increases considerably the toil of the farmer during the summer and winter months, is it not more than compensated by the greater availableness of the manure of the stock, both solid and fluid; and still more by the better and more profitable condition of the stock itself, whether for the shambles or for dairy purposes. All that is required to obviate this difficulty, and to render our long winters a gain instead of a loss to the farmers, is vastly to to increase the commodiousness and the warmth of the houses of the stock, to add tenfold to the breadth of their green crop, and to bestow a great deal more time and attention to the whole management of their cattle, in reference to their feeding.

their cleanliness, and general comfort. If the farmers in England are now finding it more advantageous to soil their cattle, we do not see why the farmers of Nova Scotia should complain of being obliged to keep their cattle within doors for six or seven months in the year, or why, with a proper attention, this necessity may not be turned to profitable account.

In reference to the second difficulty with our long severe winters, viz.: the want of suitable employment for the farm servants; this, too, to say the least, is in our opinion not a little exaggerated. In all countries whose agriculture is prosecuted with any vigor, there are always two months or so spent in winter in threshing out the grain, and preparing it either for the market, the mill, or the next seed time. Steaming and preparing the food for the cattle should, if properly gone about, occupy another month; repairing the farm implements, prepairing gates, &c., for fences will give employment for another month. The preservation of manure, both solid and fluid, as well as the carting and mixing of composts, will also consumer considerable amount of time. The providing an adequate supply of fuel, too, for the whole year, which can be done at so much less expense in winter in this country, must necessarily occupy a considerable portion of the farm servants time. There is thus no lack of labour for the industrious husbandman during winter, and all indispensably necessary and eminently fitted to enable him to do greater justice to the cultivation of the soil when the spring season comes round, and thereby to sow a larger breadth of crop.

As to the other remaining evil to which reference has been made, the damage done to grass lands, and to tender plants in general; this, is no doubt, an important matter, and every means ought to be resorted to either to remove or to mitigate the evil. And yet it is an evil, incident to all those countries where agriculture is in a high state of advancement. This does not arise so much from the severity of the winter, as from the repeated thaws and congelations when winter is breaking up. The two methods most likely to prove efficacious in lessening the effects of the alternate frosts and thaws are, first, a thorough drainage of the land most subject to be winter killed, or chilled in spring, that the water may have a more speedy escape, and thus to a lesser extent linger and freeze in it; and the second is, the early rolling of these grounds in spring that the roots may again be fastened and take hold of the soil and grow.

But there are also advantages arising from our long and severe winters, which it were unpardonable not to notice, though we must do so without any illustration.

- 1. However severe the frost may be with respect to the vegetable kingdom, it generally finds the young woods well ripened by reason of the genial weather of autumn.
- 2. The frost performs the important office of pulverizing the soil, and thereby saves a large amount of muscular labor—one ploughing doing as much as three or four ploughings in other circumstances would accomplish.
- 3. The frost helps largely to destroy the larvae of many insects that would otherwise prove destructive to the vegetable kingdom.
- 4. The snow, whilst it adds much to the warmth of the soil, deposits a large amount of nitrogen, one of the gases essential for the growth of many plants.
- 5. The long winter nights afford ample time to the farmer for his mental improvement, and thus whilst the cold sharpens his intellect, it enables him to lay up stores of valuable knowledge, general and professional, both for his own benefit and that of his fellow-laborers.
- 6. It presents an abundance of time for the holding of Agricultural Society meetings; for retailing the results of experiments; and for concerting schemes of combined effort during the approaching season for the benefit of one and all.

# II.—THE SOILS OF NOVA SCOTIA—ANOTHER EVIDENCE OF ITS AGRICULTURAL CAPABILITIES.

All soils are composed of two classes, organic and inorganic, combustible and incombustible. The solid rocks have furnished the inorganic or incombustible part—the remains of animals or vegetables have furnished the organic parts, which disappears or burns away in the fire.

Now the rocks of Nova Scotia differ essentially in their nature; some consist of granite, slate and hard quartzose; others of syenite and greenstone; others of limestone and gypsum; others of hard flaggy sandstone and conglomerates; others of red sandstone, and others of trap. If the rocks thus differ in their nature, it is obvious that the loose materials which are formed by their decay must differ in like manner,—must resemble, in their nature and composition, the rocks on which they rest, and from which they have been derived. Hence, the natural differences which are observed amongst soils of different districts, and hence, also, the striking similarities by which soils are sometimes found to be characterized over very large From the crumbling granite and gneiss of Nova Scotia for example, we have granite soil, or soil of a coarse and sandy nature; from the slate we have clays more or less stiff and impervious, more or less light and shingly; from the syenite and greenstone we have brownish loam, with fragments of slate; from limestone and gypsum, we have loamy and marly soils; from flaggy sandstones and conglomerates, we have clays, sands, and stony ground; from the new red sandstone we have loams and sands; from trap, we have deep rich loam.

Now, if any one will take a glance at the Geological Map of Nova Scotia, he will at once perceive where these rocks, and, by consequence, where these soils in fair proportion are to be found. All along the Atlantic coast we have the soils of the Metamorphic district, consisting of two very marked varieties; the first composed of the granite soil, which, when covered as it often is, in its natural state, with black vegetable mould, is capable for a time of producing good crops; the second is the slaty varieties, of which there are large tracts in Yarmouth, Queens, and Lunenburg counties, of excellent quality, and deserving of being classed with, at least, the best second rate uplands of the Province. In the lighter granitic and slaty soils, forest trees thrive well, and might be cultivated in many stony and hilly tracts, not serviceable for other purposes. Again, many stony tracts covered with brushwood, may be converted into excellent pasture by burning the bushes, liming and sowing with grass seeds, and thus large tracts of the most unpromising

parts of our Province might support valuable herds and flocks.

All along the hills of the Cobequid range, those on the south side of the valley of Cornwallis and Annapolis; the hilly country extending from the sources of the Stewiacke, through Pictou, Sydney, and northern Guysborough, and the greater parts of the hills of Cape Breton, we have the soils of the Silurian and Devonian systems, which, with the exception of some spots too rugged and rocky for cultivation, may be characterized as generally good. When deep they are easily worked, fertile, and remarkably favorable to the growth of hay and grain crops.

In the Carboniferous districts, which cover about a third of the Province of Nova Scotia Proper, and about three-fourths of Cape Breton, there are two descriptions of soils; the first, in the vicinity of the large deposits of limestone and gypsum, is loamy and marly, characterised by Professor Whenstone as equal to the best upland in any country. The second consists of light-colored or reddish stiff clays, white and grey sands, and ground filled with flaggy fragments of hard sandstone,

or occasionally with pebbles or other rocks.

In the new red sandstone districts, embracing the counties bordering on the Bay of Fundy, some places on the northern shores of Hants, and more extensively in the valley of Cornwallis, and thence towards Annapolis, we have soil of a bright red colour, varying from loams to sandy loams, and light sands, the latter being sometimes of a whitish colour. The red loams and sands abound in oxide of iron, lime, and gypsum, except when run out; but are deficient in phosphates and Hence, whilst they are admirable for the culture of the apple, potato, turnip and Indian corn, they are inferior as grain soils to the best soils of carboniferous and silurian districts.

In the trap district, confined to the North Mountain of Kings and Annapolis, and its prolongation in Digby and a few isolated patches on the opposite side of the Bay, we have soil containing all the chemical elements of fertility, bearing a fine natural growth of timber, yielding good crops to the new settler, and admirably fitted for orchards of apples and pears; and, in sheltered situations, for all

But notwithstanding the fertility of many of these soils, they come far short of

that of the alluvial deposits, of which there is a larger extent than in any other country of the same area, and of a richer quality. Of these deposits there are two sorts, marine and fresh water; the first being called dyke or marsh lands, and the other, intervale. The marsh lands are principally contained in Cumberland, Colchester, Hants, Kings and Annapolis, there being altogether, according to the last census, 56,216 acres. Now, it has been found that there are some sorts of soils so naturally fertile that they will grow a long succession of crops without any addition of manures, and these always contain in their inorganic part, a notable quantity of ten or eleven different chemical substances. These are potash, soda, lime, magnesia, alumina, silica, iron, manganese, sulphur, phosphorus and chlorine. Soils which require no manuring, and are capable of yielding large crops for 30 or 40 years in succession are thus constituted; and there are many such among the virgin soils of all our colonies, but none perhaps so productive as the marsh lands of Nova Scotia. It is certain that the best varieties of this kind of soil will bear continual cropping without manure for a very long period; yielding from 30 to 35 bushels of wheat per acre, and 23 to 3 tons of hay. But this is a style of farming which should not be encouraged, as it will in course of time lead to exhaustion, and thereby prove ruinous to these fine soils.

The other kind of allavial soil, called Intervale, is, as already stated, a fresh water deposit, and consists of all the chemical substances already specified, washed by springs and streams from lands through which they flow, and silted up by the sides of rivers and lakes, or forming what are called deltas.

But this, however valuable, is neither so rich nor so long-lived, nor so capable of being renewed as the dyke lands. It requires the same management as good upland soil, and except where it has a loose gravelly sub-soil, would often be improved by drainage. It is lamentable to observe in the older settlements so much of this valuable soil almost ruined by an exhaustive system of cropping, without the least effort to have it renewed by irrigation or by any fertilizing process. With ordinary treatment there is no soil so easily worked, so productive, and so capable of growing all kinds of crops.

We trust we have now said enough to satisfy the most sceptical regarding the character and variety of our soils. And the conclusion necessarily forced upon us is, that there is scarcely any kind of crop that goes to the sustenance of man or beast without the soil most appropriate for its growth. Is it a sheep or pastoral farm, or a dairy and stock-rearing farm, or a green-cropping and stall-fattening farm, or a grain farm, or a fruit-growing farm, that is wanted for the investment of capital, the immigrant has only to look at a Geological map of the Province and select his locality, and he will find the very soil best suited for the agricultural department with which he may be best acquainted, and which he desires to prose-And where, let me ask, is there a country of the same area with as great a variety of soil, and thereby better fitted for a profitable investment of capital or for the opening up of a home traffic in different agricultural productions? And when we add these two together—the soils and the climate—who will call in question the agricultural capabilities of Nova Scotia, or the resources at the command of the skilful farmer, for a large and steady return of capital invested?

# III.—NATURAL MANURES OF NOVA SCOTIA—ANOTHER EVIDENCE OF ITS AGRICULTURAL CAPABILITIES.

We have just referred to certain virgin and alluvial soils, that contain in sensible quantities, all those substances that are essential for the nourishment of the vegetable kingdom, and that grow good crops for a long succession of years without any fertilizing medium. But this is the case with comparatively few soils. By far the greater proportion are found to be wholly devoid of one or more of these substances, or to contain them in too small proportion, or to have some of thempresent in too great an excess. And what is the farmer in these circumstances to do? He is to add what is wanting in the less productive, and bring it into the same physical condition, and he will make it equal to the more productive. Again, he is to take away what is in excess in the one, and he will make it as valuable as another, from which it differs only by this excess. If, for example, it contains

too great an abundance of saline matter, he is to remove or neutralise this saline matter, and this will enable the elements of fertility which the soil contains to manifest themselves.

The grand business of the farmer is thus clearly brought out. He is first to ascertain what food the plant requires, and then whether that food is in the soil or not; in other words, he has to provide the very food that the plant requires for its growth and fructification, and that food is just what passes under the name of manures or fertilizing media. It is with the adjustment and application of these that he has mainly to do. The manure or compost heap is his capital, his bank, with which, if he would prosper agriculturally, he must keep the best possible credit.

Now, there are very few countries which possess such immense resources in this respect as Nova Scotia. We have no intention of entering upon a description of the nature and properties of the different sorts of manures. This would be altogether alien to the objects of this report. On other occasions, and at some length, we have discussed this subject. In no measured terms have we remonstrated with the farmers of Nova Scotia, respecting their grievous neglect of what is, after all, the best and surest of all manures—the stable yard, both solid and fluid. been computed, and we believe that computation is less than the reality, that Nova Scotia loses annually £100,000, by inattention to, by not securing by proper means the volatile and soluble parts of the stable yard manure. It is, no doubt, encouraging to observe in many districts of the country, the improvements that are being made in this respect. And yet, withal, it is manifest that the farmers generally, are but awaking to see where the true secret of their strength and riches lies. But this is not the point at present. Our object in the introduction of this topic is to direct attention to the variety and abundance of what may be designated the natural manures, both organic and inorganic, everywhere to be found in the Province.

Organic .- 1. The Algae or Seaweed. In consequence of the peninsular position of the Province, there is an endless supply of algo or seaweed; which, when used along with other fertilizers and in a composted state becomes a rich and valuable manure. 2. Bog-mud. There is scarcely a district where bog-mud is not to be found in smaller or greater deposits, within a manageable distance of every farm, as well as saw-dust, spent-bark, &c. These and such like manures are useful in two points of view; they renew the supply of vegetable substances to the soil, and thereby ameliorate its texture, and they afford, by their decay, substances useful in enabling plants to build up the tissues of their stems and They are also admirable absorbents for the richer parts of putrescent manures; and by mixtures with these substances, they are themselves more rapidly decomposed. 3. Wood ashes. Wood ashes abound in Nova Scotia as in all new These when properly and judiciously applied, not only act powerfully as a manure, but exert a caustic or decomposing influence on organic manures, and the roots of plants, &c. 4. Fish offal. This is another organic manure, which may be obtained in great abundance in the fishing districts, along with the heads and backbones of cod, and other sorts of fish. As these consist almost entirely of phosphate of lime and rich animal matter, they are nearly as valuable as guano. This refuse of tish, if dried and packed in old barrels, might be preserved and conveyed into the interior. It would prove largely remunerative.

There are other manures of this class, such as bones, soot, &c., which if carefully preserved and judiciously applied, might be found exceedingly useful in fertilizing the soil. But as these and the like are not peculiar to Nova Scotia, or in greater abundance than in any other country, there is no need of saying anything

regarding them.

Inorganic.—1. Lime. This mineral in the state of carbonate, and in substances called marls, exists in great abundance in various parts of the Province. In some low grounds, which have formerly been pools or lakes, there are beds of clay, mixed with fresh water shell; and in creeks and harbors there are mussel and oyster beds which afford a similar substance containing much valuable animal matter. On some parts of the coast, also, large quantities of sea shells mixed with marls may be collected. The result of an enlightened view of all that is known with respect to this valuable mineral as a manure, is thus summed up by

Dawson:—"Lime has ultimately the same effects, whether applied in the quick or slaked or mild state. It should be well mixed with the soil, but kept as near the surface as possible, and it should be renewed at intervals of a few years.

"The mechanical effects of lime in opening and loosening the soil are always beneficial on heavy soils, except when these are very wet and undrained; and, on the other hand, they are sometimes injurious to very light and dry ground.

- "The chemical effects of lime when properly applied, are: affording a necessary part of the food of crops; bringing into activity the inert vegetable matter of the soil, and decomposing some mineral compounds which are injurious to vegetation, and others whose constituents are of great utility when set free by its action.
- "When applied to land already abounding in lime or very deficient in vegetable mould, it may produce no benefit.
- "Just as some cultivated plants cannot thrive without a good proportion of lime, there are some wild plants, natives of poor non-calcarous soils, which are destroyed by liming."
- 2. Gypsum. This mineral abounds in Nova Scotia; and even in those districts where it is most needed, it would not cost one half as much to convey it thither as it does to the United States. Surely if the American farmers find this mineral so beneficial for the fertilizing of the soil, there must be many places in Nova Scotia, where, to say the least, it is equally so. It supplies sulphate of lime to to crops, and in general is the cheapest form in which the sulphuric acid may be obtained. It possesses still greater value from its property of decomposing the carbonate of ammonia, one of the most valuable products in the decay of animal substances.
- 3. Marsh mud. This manure, partly organic and partly inorganic, abounds in Nova Scotia, in those counties contiguous to the Bay of Fundy. It contains all the chemical ingredients to be found in the best red marsh or dyke land; and is, accordingly, exceedingly nutritious and invigorating to almost all soils. It is carted by the farmers, in considerable quantities, to fields immediately adjoining the deposits, but not nearly to the extent it ought.

But we cannot enlarge on this topic. Enough, we think, has now been said to show that if the success of the farmer depends on the scientific and skilful application of the fertilizing media, there are few countries, indeed, where the same copious supply of these media is presented or may be procured at so small an expense, and by consequence, there are few countries possessing greater capabilities for the profitable prosecution of agriculture.

But there is another circumstance connected with these manures also deserving We refer to their being, many of them, at least, in the immediate vicinity of those soils where they are most needed, and of course most beneficial The granitoid and slaty soils of the Metamorphic are most deficient in phosphates, and how can these be more easily or more fully supplied than by the sea weed, lying in abundance along the shores that bound those very formations, or still more powerfully by the sea-offal. The bog mud of Aylesford, if spread very copiously on the adjoining sands, would do much towards the enriching of them, and the bog soil would be at least equally benefitted by a top dressing of sand. The clays of the carboniferous system are oftentimes stiff and cold, but the very lime or coal ashes, or sandy marls, are all at hand; and these are just the substances best fitted for their improvement. And so we might go on, and show the same beautiful arrangement in the composting of these inorganic and organic manures, that those best fitted for this purpose lie in immediate proximity, but we forbear. Surely this must be no ordinary accommodation to the scientific and skilful farmer and if he industriously avails himself of it, it cannot fail to yield him an ample remuncration.

## IV.—FACILITIES OF DRAINAGE—ANOTHER PROOF OF THE AGRI-CULTURAL CAPABILITIES OF NOVA SCOTIA.

Nothing so greatly improves the soil, climate, and agricultural capabilities of any country as a thorough system of draining. The following may be regarded as a true and comprehensive summary of its benefits:—"It renders land much more easily and pleasantly worked; makes crops more sure and heavy; prevents alike injuries from drought, and excess in moisture; economises manures, and is equivalent to the deepening of the soil and the lengthening of the summer."

There are few countries whose draining on an extensive scale would be more advantageous than in Nova Scotia. It would form a strong defence against the alternation of frost and thaw in spring, so injurious to the young roots of grasses and clovers. It would enable the farmer, specially in stony, clayey land, to cultivate his ground, and to sow his crop at least a fortnight earlier—a matter of the greatest possible consequence in securing for the crops the benefit of the first genial weather in early summer. And further, a thorough system of drainage would prove the best autidote against the injurious effects resulting from the long continued droughts of our summer months. But we dwell not on these benefits. In all other countries where agriculture has arrived at a high state of advancement, drainage has constituted one of the essential elements, and there is no reason why it should not prove equally beneficial in this country.

Now Nova Scotia possesses peculiar advantages for carrying out such a system. There is first of all the whole surface condition of the country, consisting as it does, generally of gentle and gradual slopes, there being scarcely an acre of ground even in the most extensive alluvial deposit regions, where a sufficient fall cannot Then again, look at the multiplicity of rivers and streams, of bays, be obtained. creeks, and lakes, which, while they form the finest natural drainage for the country, presents, at the same time, the finest possible outlet for the waters of the artificial conduits. Still further, there is not only, generally speaking, an abundant supply of stones for filling up these drains in those very localities, where they are most needed, but there is everywhere a plentiful supply of that clay best adapted for the manufacture of tiles. The old-fashioned stone laid drains, where the stones are properly broken and covered with thick turf, serve all the purposes for which drains are intended, yet they are very expensive, and can scarcely be done on a large scale. This method is, accordingly, in all countries, whose agriculture is in an advanced condition all but entirely abandoned, and instead of the stones, tiles of an inch bore and more are laid in the bottom of the drain. saves a large amount of manual labor, serves the end as effectually, and in transportation &c., vastly more economical. Thus, again, in another and that in a most important department, all things are in a state of readiness, not only awaiting but inviting the application of capital, science, skill and industry.

We have now briefly glanced at the points referred to at the commencement of our report, as essential to establish the capabilities of Nova Scotia as a farming country. We trust we have satisfactorily made out our position. That agriculture thrive in any country, these four constituents are indispensable, viz.: climate, soil, command of manure, and facility of drainage; and we have seen that Nova Scotia possesses all these in an eminent degree; generally speaking, equal, if not superior, to what they are in Scotland, Canada, and the State of New York. And this is not a purely theoretic or conjectural statement, it has been proved and substantiated by a comparative testing of the agricultural productions of Nova Scotia and of the countries just cited. The results from actual statistics of the agricultural capabilities of Nova Scotia, as contrasted with Canada, and the finest farming States in the American Union, were first collected by Professor Johnstone, whose veracity and scientic practical knowledge are undoubted, and have been published through a great variety of channels. And these results have received additional confirmation by the specimens forwarded to the International Exhibitions, specimens, be it observed, not produced for the occasion,

but grown in the usual course and under the usual treatment—the competition Prize List not having been printed till long after the seed was committed to the Had that list been circulated in time to prepare the soil and provide the best seed, these specimens, even with our present imperfect state of agriculture, would have been vastly superior. As it is, Nova Scotia has no cause to be ashamed of her position. Besides honorable mention of some horticultural and agricultural articles, she obtained, properly speaking, two medals for her productions in this department, one for the cereals, and another for the legumose, i. e. pease and beans. The premiums for the cereals was principally owing to the size, weight and quality of the oats, both white and black, sent from Cole Harbour. The latter were pronounced by the Jurors, and by all experienced agriculturists, as the best in the Exhibition-a triumph this that may well make Nova Scotia proud of her agricultural capabilities. The dwarf French varieties of kidney beans were universally admired, particularly the Indian Chief, the Cranberry, and the Scarlet Runner pole beans. Somehow or other, they were overlooked by the the judges at the International, but being presented at the Horticultural Show, they readily obtained a premium there. But Nova Scotia also forwarded articles to the show of the Royal Horticultural Society. This institution, the most extensive of the kind in the world, has great annual fruit shows. Taking advantage of the International Exhibition of last year, it invited the world to a competition. This invitation was embraced by not a few, and Nova Scotia contributed her quota. A preliminary show was held in the Horticultural Gardens, Halifax, towards the end of September, and the best of the articles were forwarded to London. Unfortunately these articles did not arrive in London till about a week after the prizes were awarded, though the articles were still on exhibition, and what was worse, the pears and plums and other stone fruit, in consequence of the moss in which they were packed fermenting, were all destroyed, so that there was nothing but the apples, grapes, grains and roots, in a condition fit to be presented. And yet notwithstanding all these unpropitious circumstances, it is evident from all the notices in the Horticultural and other newspapers, as well as from the statements of Mr. Honeyman and others, that the sensation produced by the appearance of the apples was of no ordinary character. Dr. Lindley, Superintendent and Royal Commissioner for the Colonies at the International, the highest authority perhaps in the world at this moment in all matters connected with horticulture, declares unhesitatingly that our apples were the finest he had ever seen, and when informed that the whole were grown on standards in the orchards, he seemed perfectly amazed, and added, that had they been forwarded on the day that the prizes were adjudged, they would undoubtedly have taken the first premium. Mr. Murray, Secretary of the Royal Horticultural Society, and Superintendent of the Society's gardens, stated in the "Gardener's Chronicle" of the day, that he smiled when he read in the "Morning Sun" of Halifax, that the fruit from Nova Scotia would astonish the Londoners; but that when he actually saw it he felt his incredulity severely rebuked, for nothing in the Exhibition had astonished him more than the fruit from Nova Scotia. But not only were the apples, but the grapes, especially those grown in the open air, objects of attraction and astonishment. It was acknowledged by all judges that the Isabella grapes were nearly twice the size of those that had been forwarded from Berlin, on the continent of Europe. There had been two special prizes given by Dr. Lindley of the value of £5, for the best squashes. Had those from Nova Scotia been forwarded in time, our largest squash, it was admitted by all, would have taken the second prize. The following prizes were awarded:

1. For large collection of Apples, (Silver Medal.) This is the highest premium ever given by the society.

We cannot go farther into details respecting this show. We believe that more has been done by the Horticultural Exhibition in October, 1862, to undeceive the public mind regarding the climate of Nova Scotia, than all the speeches or written statements, however eloquent or elaborate, could have possibly effected. And if all this has taken place without any course of preparation, or indeed without any effort on our part, what might not naturally and reasonably be expected, were both our gardening and farming operations in a more advanced and systematic condition? If such have been the effects or impressions produced in the ordinary course of things, what might have been done by special means and care and effort. And how loud the demand thus made upon us as a Province, both to devise and prosecute those measures which may seem best calculated to develope our resources in the cultivation of the soil.

And this brings us to the grand practical application of all that has been advanced in the preceding pages. In former reports we have descanted on the leading defects in our agricultural operations, and the various means which, in our opinion, ought to be resorted to for the remedying of the same. What we would now insist upon is the agency or instrumentality by which these improvements are to be carried into effect. There are now between 35 and 40 agricultural societies in the Province, supported, in part, by the voluntary contributions of their members, and in part by grants out of the public treasury. That these societies have been of great service in the furtherance of agriculture throughout the Province, cannot, we think, admit of a doubt. At their starting they were well fitted in their organization to the stage or position in which agricultural pursuits then were, but now they are altogether inadequate for the work they have to do. And even if they were, they have no head over them, no presiding power to direct or control individually, or to bring into combined action, when the occasion requires. first and most important step, then, that ought to be taken, and without which everything else would be of little or no avail, is the resuscitation of the Central Board of Agriculture, with specific instructions to remodel and invigorate the various societies throughout the country, to see that every county and district has its own Association in active operation; and, in short, so to direct the combined action of all, as that the general cause of agriculture shall keep pace with the progressive improvement of the times. Though we believe competition in open fields, and on equal terms, to constitute the grand instructress and guide alike in Agriculture and Commerce; yet we are persuaded that there are seasons or emergencies in the history of a people, when both these interests may be largely stimulated by a certain amount of assistance, ab extra. And this we hold to be the case with Nova Scotia, in the present juncture, in so far as agriculture is concerned. It is through the regularly organised Societies, presided over by an active Central Committee, composed of a few intelligent and public spirited men, that this assistance is to be rendered to the cause of agriculture. This proves to a demonstration the necessity of having these societies in an efficient condition, and this can only be brought about by the Central Association referred to. Besides the infusion of fresh life and vigour into these branch Societies throughout the Province, this Central Association ought to take under its more immediate management the ground purchased by the Legislature, in connection with the Provincial Normal School, intended for an Experimental Garden and Farm on a small scale. Though this ground has not yet been directly appropriated to the object for which it was purchased, it has, nevertheless, been passing through a process of preparation, and is now in such a state of fertilization as to be in every respect serviceable for the Next spring presents an admirable opportunity for commencing opera-Through the zeal of Mr. Honeyman, a very large collection of the cereals and seeds of different sorts, from all quarters of the globe that obtained medals or honorable notice at the International and Horticultural Exhibitions, has been obtained, and will be forwarded by sowing time.

These grains and seeds ought to be sown in these grounds, their adaptation to this climate tested, and, as soon as the quantity will admit, distributed over the

Province through the medium of the Societies. But the most important business of this Central Committee will be the devising of measures for a great annual Show of Horticultural and Agricultural productions in different sections of the For this purpose the Province ought to be divided into five or six section, in some central locality, of which this annual Show should be held, all the funds, both local and public of each section, being appropriated to the encourage ment of such a Show. The competition list of such exhibition should be published at least a year before hand, so that the country will be fully prepared, and whilst these annual exhibitions will naturally be cheifly encouraged by the farmers of the respective sections, they ought, under certain conditions, to be thrown open to all in the Province. But the matters of detail, in connection with these exhibitions. must be arranged by the acting committee. If these exhibitions have, in every country where they have been fairly tried, proved highly successful in exciting a spirit of noble emulation, and diffusing much valuable practical knowledge on the subject of agriculture, surely it behoves our Legislature, with all convenient speed. to take such steps as will secure their introduction into this Province; and we know no step more likely to effectuate this object than the organization of a thorough Central Agricultural Association, such as we have just indicated.

Appended will be found a tabular statement of the Agricultural Societies through out the Province, with the monies drawn since my last report was given in, and the receipts of the Treasurers of these Societies, as vouchers of the same. The greater proportion of the Societies have, in accordance with law, also forwarded to me short account of the state of the crops, and their financial condition—all which will be handed over to the Agricultural Committee. The crops last year were upon the whole, above an average. We believe that the farmers in this Province were never in a more healthful or comfortable condition, or in a more favourable position to take more decided steps with a view to their advancement in their important avocation.

All which is respectfully submitted.

ALEXANDER FORRESTER.

## APPENDIX No. 24

## MR. HALIBURTON'S PENSION.

Halifax, 28th January, 1863.

It becomes my duty to report to you, for the information of His Excellency the Licutenant Governor, the present position of the legal proceedings instituted by Judge Haliburton in respect of his claim to a pension under the Provincial Statute, abolishing the Court of Common Pleas.

An arrangement was made by the late Government with Mr. Haliburton, that his claim should be argued under a case to be agreed upon and submitted to the Supreme Court for adjudication.

In pursuance of this arrangement, after a good deal of negotiation, a case was

agreed to and filed on the 23rd day of July, A. D. 1861.

In the case so made, Mr. Anderson, the Receiver General, was the nominal defendant, but a clause was inserted in it that no personal liability should attach to him, and that whatever might be the decision, no costs should be taxed on either side, the object being merely to obtain a judicial decision as to the right of Judge Haliburton.

A further agreement of the same date contained a stipulation that no judgment was to be entered, unless pro forma, in case it might be necessary with a view to

obtaining a final adjudication on the case on appeal.

Gertain previous proceedings of Judge Haliburton having been defended on the part of the Province by the Honorable Mr. Johnston, when Attorney General, assisted by Mr. J. R. Smith, it was considered desirable to retain the services of these gentlemen, on behalf of the Province, in the present case.

Mr. Johnston declined to be engaged; Mr. Smith accepted a retainer, and was

employed in the settlement of the case and in the subsequent proceedings.

The matter came on for argument in the term of July, 1861. Four Judges only presided at the hearing, Judge Wilkins having, before his elevation to the Bench, given an opinion on the case, did not attend during the argument.

The decision of the court was given on the — day of December, A. D. 1861, the Chief Justice being of opinion against the claim, Judges Bliss, Dodd and

DesBarres, for it.

After judgment was pronounced, I intimated to the court that it would probably be appealed from, and stated to the counsel of the plaintiff, that so soon as a formal decision to appeal was arrived at I should give them notice.

In the ordinary course of proceedings in this Province, an appeal from the Supreme Court lies to the Governor in Council. This appeal is prescribed by the

commissions and royal instructions issued to the Governors of the colony from its earliest settlement.

In this case, however, the Judges of the Court of Appeal, as representing the Province of Nova Scotia, were themselves the real defendants, and it would have been contrary to the first principles of justice that they should hear and decide on their own case. The other mode of appeal is prescribed by the Imperial Act of 7 and 8 Victoria, chapter 69.

This statute, after reciting the ordinary rule requiring appeals from a colony to

pass through the Colonial Court of Error, enables Her Majesty to provide, by order, for the admission of appeals to the Privy Council without passing through this intermediate court.

Under this statute orders had been made for several of the colonies, but none as regarded Nova Scotia. No rules therefore existed as to the form, the mode, or the time of appeal.

The decisions of the Court of Appeal formed the only guide to the rules by which they were governed in granting or refusing leave to appeal under this statute.

As a rule, every facility was afforded when the appeals were on matters involving questions of law, and no particular time was fixed for prosecuting the appeals, they having been sustained in several cases, though made after the lapse of a year.

The question as to whether an appeal was to be prosecuted was a matter to be decided on in the first instance by the Provincial Government, and a full attendance of the members of Council was thought desirable. The Assembly was to meet on the thirteenth of February, and several of the members of the Government residing in the country, it was found inconvenient to obtain their attendance before they came up to the meeting of the Legislature.

During the session the question of appeal was mooted in council, but no final decision was arrived at until the 15th of April, when the Council met for the first time after the close of the session, the House having risen on the 12th of that

month.

It having been then decided to proceed with the appeal, notice to that effect was

given Mr. Ritchic, of counsel with plaintiff, on the second of May.

A correspondence was forthwith opened with counsel in England, and the services of Sir Roundell Palmer, the English Solicitor General, were retained on behalf of the Province. No time was lost in procuring and forwarding, under his instructions, the papers required in prosecuting the appeal.

After the petition was presented to the Court of Appeal, it was found impracticable to get a meeting of the court for a considerable period. Eventually, however, the petition for appeal came on to be heard on the 29th of November last.

The Solicitor General argued the case for the Province.

The day before the hearing a copy of an affidavit of Judge Haliburton, intended to be used on the argument, was placed in the hands of the Solicitor for the Province.

This affidavit was used on the argument of the next day, and from the expressions employed by Lord Chelmsford in delivering the judgment of the court, would seem to have created a strong impression on the minds of the Judges.

The petition for appeal is an application to the discretion of the court. The circumstances detailed in the affidavit were such as, if correct, ought seriously to affect, as it would seem they did affect, the exercise of that discretion. A copy of that affidavit is annexed to this report.

Judge Haliburton never could have made this affidavit if he had known the facts of the case as they exist. When he learns that in many of the assertions made by him he is entirely inaccurate, he cannot but regret that he has placed before the Judges of the Court of Appeal, as matter to influence their decision, important statements at variance with the facts as they really exist.

As an illustration of the important character of some of the statements contained in the affidavits, let me select one or two:

Judge Haliburton declares, in substance, that before his counsel would consent to re-argue the case (after the first proceedings having become abortive) there was a clear understanding between his counsel and the then Attorney General, that in case of re-argument there should be no appeal, the decision of the court to be accepted as final, and that but for this understanding his counsel would not have agreed to submit the case again.

As to this matter I cannot speak from my own knowledge, but I may say that such an assertion was never made by his counsel when the terms of the new case were under consideration. I have also enquired of Mr. Johnston, who informs me that there is no foundation for such a statement, that he never entered into any such agreement, or had such understanding with the counsel of Judge Haliburton.

It need hardly be suggested how much such a fact, assuming it to be a lact.

would affect the Court of Appeal on an application made to their discretion in direct violation of a solemn compact.

Judge Haliburton also states in substance, that when the new case came to be framed, the clause for appeal was forced upon his counsel, against their remonstrances, by the counsel of the Province, and that his counsel insisted on inserting in the clause for appeal the word regular, so as to guard themselves against the provision as well as they could.

This is wholly inaccurate. The clause relative to appeal did not originate with

the Counsel of the Province.

The draft of the case as prepared by me, was handed to Mr. R. Haliburton, one of the plaintiff's counsel. It contained no reference whatever to an appeal. The draft of the case as prepared by Mr. Haliburton, after reading mine, contained the clause for appeal just as it now stands. I did not suggest the clause; Mr. Haliburton did not resist it. The appeal was of his own seeking. There was no insisting on my side, no remonstrance on his. The original papers are forthcoming to show the facts. But when the Judges are iold there had been an agreement that there was to be no appeal, and yet that when a case came to be framed the Provincial authorities forced upon the plaintiff the provision for appeal in violation of that agreement, and against strong remonstrances—such a case of mala fides would naturally affect, and ought to affect, the exercise of the discretion of the Court.

Under such a state of facts, any delay which in ordinary cases would be considered of no moment, would be characterized by the bad faith which such a violation of contract would involve.

That the effect produced on the minds of the Judges by this affidavit was such as might naturally have been anticipated, will be obvious from the reading of the judgment rejecting the appeal, a copy of which, from the short-hand writer's notes, is appended. Had this decision been given upon the merits of the claim, had it been given on the ground of delay in the appeal, that delay not being qualified and characterized as above detailed, the Province could not honorably refuse to abide by the decision.

Whether it will feel concluded by a result effected in a manner which never

could have been anticipated, is for the Provincial authorities to determine.

Judge Haliburton himself, who has always through his counsel expressed his anxiety to obtain the judgment of the highest Court of Appeal, should not have shrunk from that judgment when the case was before the Court, and in a position to be decided forthwith on the merits. The case was professedly entered into with reference to such a decision.

From the previous proceedings, the opinions of the Colonial Judges, (with the exception of that of the Chief Justice,) were pretty well known before this case was made. In submitting it therefore to them, it was only as the channel for obtaining the decision of the judicial committee of the Privy Council on the question of his right to the pension.

Judge Haliburton himself has prevented that decision, and has done so under circumstances which should make him willing to re-open the question in the Court

of Appeal on its merits.

If the provincial authorities think he ought to do so, then their course will be to leave him to his remedy, unless he consents to the course suggested. If he has a just claim, this will give it to him, and without delay; and if he has not, it will give both himself and the Province the benefit of the decision of the highest tribunal the law of the land affords.

That any judgment Judge Haliburton may obtain may be rendered immediately available, that he may have no ground for suggesting that in the course proposed the Provincial authorities seek only to delay, and might attempt to evade the judgment if pronounced in his favor on the merits, I would recommend that in case the Government should adopt the course suggested; and the case should be opened on the merits, there should be paid into the Court of Appeal; to abide the result, a sum sufficient to cover the amount in controversy.

This course, if adopted, ought to be a guarantee of the good faith with which the offer is made.

If under these circumstances judgment shall pass against the Province, it must be acquiesced in as the decision of the highest Court before which the matter can be brought; and while the Province naturally objects to a decision which may have resulted from unfounded charges on the character and honorable dealing of its public officers, its duty in case judgment were to pass on the merits would be clear and unquestionable.

I have the honor to be, Sir,

Your obedient servant,

A. G. ARCHIBALD.

To the Hon, the Provincial Secretary.

(COPY.)

Cause—Thomas C. Haliburton, Plaintiff.

vs.

John H. Anderson, Receiver General, Defendant.

The case stated in the above cause has been entered into with a view to ascertain the liability of the Province of Nova Scotia for the pension claimed by Judge Haliburton, with the understanding that no personal liability shall be incurred by defendant; and that whatever may be the decision of the Court, no judgment shall be entered except it may be necessary, pro forma, with a view of a final adjudication of the case.

(COPY.)

Province of Nova Scotia.

At a Council held at the Government House, at Halifax, this 15th day of April, 1862.

### PRESENT:

The Right Honorable the Earl of Mulgrave, &c., &c., &c. The Honorable Provincial Secretary,

44 ATTORNEY GENERAL,

" RECEIVER GENERAL,

" FINANCIAL SECRETARY,

"BENJAMIN WIER,

THOMAS D. ARCHIBALD.

With reference to opinions delivered by the Chief Justice and the Assistant Judges of the Supreme Court, on the question raised by the application of TaC. Haliburton, Esquire, for the pension granted by the Provincial Act, 4 Victorial chapter 3, to a Judge of the Court of Common Pleas, abolished by that act. Let appearing that the opinion of the Hon. Mr. Young, the present Chief Justice has adverse to the claim, and that the opinions of the late Chief Justice Haliburton

and their Honors Mr. Justice Bliss, Mr. Justice Dodd, and Mr. Justice DesBarres. are in favor of the application being granted, His Excellency, by the advice of the Council, is pleased to direct, and it is hereby ordered that the proper steps be taken for bringing the case before the Judicial Committee of Her Majesty's Most Honorable Privy Council; and the Honorable A. G. Archibald, Her Majesty's Attorney General for the Province, is to give such directions, and employ such Counsel, as may appear to be necessary on this behalf, for the interest of the Province.

## IN THE SUPREME COURT, 1862.

Halifax, SS.

THOMAS C. HALIBURTON, Plaintiff.

John H. Anderson, Defendant.

Adams George Archibald, of Halifax, in the county of Halifax, Esquire, of counsel with the defendant in the above cause, maketh oath and saith, that this action was commenced by writ of summons issued out of the said Court, and returnable thereto. That the same was a friendly action, instituted by consent, against the defendant, who had no personal interest therein, but became defendant and entered into a case setting forth the facts upon which the plaintiff founds his claim to a pension of three hundred pounds a year from the Province of Nova Scotia, with a view to obtain an authoritative decision of the Court as to the plaintiff's right to such pension. That in the case stated and signed by the counsel of the respective parties, it was agreed that the defendant should incur no personal responsibility by reason of his entering into the case, and also that either of the parties thereto, if dissatisfied with the decision of the Supreme Court, should be at liberty to prosecute an appeal therefrom. That said case is silent as to the entry of a judgment or filing of a record thereon, but that by an agreement supplementary to said case, and dated on the 23rd day of July, A. D. 1861, signed by the respective counsel of the parties, (whereof a true copy is hereto annexed), it was provided that whatever might be the decision of the said Court, no judgment should be entered except it might be necessary, pro forma, with a view to obtaining a final adjudication of the case.

That the case was argued in the term of July last, and in the term of December last the Judges gave their opinions therein; but no judgment has been entered up or any record filed in respect of such case and decision thereon. That the majority of the Judges having in their opinions sustained the plaintiff's claim to the pension, deponent, on behalf of the Province, gave notice in open Court in the same term of December, of an appeal thereon. That some time after the close of the term, deponent informed Mr. Ritchie, counsel of the plaintiff, that it was possible the Council (meaning the Executive Council of this Province,) might not decide to go on with the appeal, but that so soon as a full meeting could be got, a decision would be come to, and deponent would communicate the same to That in consequence of some of the members of the Council residing in a remote part of the country, a full meeting could not conveniently be held till the time of the assembling of the Legislature. That during the session a decision to proceed with the appeal was come to, and a formal minute thereof was afterwards made on the 15th day of April, immediately after the prorogation of the Legislature, and a formal netice of such decision given to Mr. Ritchie, by letter of the 2d of May last.

That under the practice that has heretofore prevailed in this colony, appeals from the Supreme Court are carried into the Court of Error, consisting of the Governor in Council

That in this case the members of that Court, as representing the Province of Nova Scotia, and the real defendants, and this deponent considered it very undesirable that the real defendants should be called upon as judges to pronounce an opinion in a case in which they were themselves parties, and therefore was desirous to obtain an appeal directly from the Supreme Court to Her Majesty in Council, under the provisions of the act of 7 and 8 Victoria, chapter 69, and with that view addressed a letter to counsel in London to have the proper steps taken. with the least possible delay, to commence and carry on the appeal. That deponent has since then been in correspondence with such counsel, by every mail to and from England, and having learned from him, that though under the Imperial statutes above referred to orders have been made in many of the colonies, regulating the mode of proceeding by appeal from Courts in these colonies from which appeals did not before that act lie directly to Her Majesty in Council—no such order has been made in respect to Nova Scotia; and that therefore as regards this case it will be necessary to obtain under that statute a special order applicable to this individual, case.

That deponent has also learned from said counsel, that it will be necessary before the appeal is asked for from the Court of Privy Council, that there should be in this court a judgment entered up, and a record thereof filed, in order to constitute the proper subject of appeal. That the said counsel considers the case, containing as it does, a mere abstract question; and the opinions of the Judges given on such case would not in that shape be considered by the Court of Appeal as a matter on which they could be called upon to pass.

That deponent, on behalf of the Province of Nova Scotia, is desirous that this matter shall be finally disposed of on the appeal, and that the matter shall be put in such shape that the decision of Her Majesty in Council shall be given on the main point, and not turn on any question of form or technicality, the effect of which would be to leave the matter still in controversy, and be conclusive neither

upon the plaintiff or the province.

(Signed) ADAMS G. ARCHIBALD.

Sworn to at Halifax, this 16th day of July, A. D. 1862, Before me,

(Signed) J. W. NUTTING, Commr.

Prothonotary's Office, Halifax, 13th March, 1863.

I certify the foregoing to be a correct copy of the original affidavit filed in this office.

J. W. NUTTING, Prothonotary.

#### IN THE PRIVY COUNCIL.

In the matter of the petition of John Hawkins Anderson, the Receiver General of the Province of Nova Scotia.

Sworn 20th November, 1862.

I, Thomas Chandler Haliburton, late of Nova Scotia, but now of Gordon House,

Isleworth, Esquire, make oath and say:

1. That in or about the month of August, 1856, feeling unable to undergo the fatigues of a Circuit, resigned the seat I then held on the bench of the Superior Court of the Province of Nova Scotia as one of the Judges of the said Court, but expressly reserved to myself the right I conceived myself to have to a pension I

then enjoyed as the first Justice of the Court of Common Pleas; that although it was open to the Government to decline to receive a resignation, clogged with such a reservation, the resignation was unconditionally accepted.

2. That negociations were then entered into with the Government on the subject of such pension, which resulted in an agreement between my Counsel and the Law Officers of the Crown to have the right so asserted submitted to the Superior Court

for argument and decision.

3. That the claim was so argued, and the Court, consisting of the Chief Justice and two other Judges, unanimously decided in my favor, and judgment was given

accordingly in or about the close of the year IS59.

- 4. That the said decision of the Court having been given, the then Attorney General, James W. Johnston, Esquire, expressed a desire on behalf of the Government to have the case argued again, my Counsel assented thereto, the said Attorney General having distinctly stated (as I was informed and fully believe) to my Counsel, and intimated to the Court, through one of the Judge's, that his sole desire was to have the subject fully argued, and that if the decision should be again in my favor the Government would be prepared to direct the payment of the pension, and the arrears thereof.
- 5. And I further say that I was informed, and verily believe, that the re-argument was assented to by my Counsel on this express understanding.
- 6. That the said Attorney General, from pressure of business, as he asserted, delayed from time to time to prepare the Rule for a rehearing, until the Government, of which he was the leader, retired from office early in the month of February, 1860.

7. That a new Government was then formed upon his retirement, and a new

Attorney General appointed in his place.

S. That the new Attorney General, repudiating the assurance given by his predecessor, insisted upon a clause being inserted in the rule for re-argument, reserving the right of appeal; and that my Counsel, with great reluctance, assented to the insertion of such reservation, but guarded themselves against further unnecessary delay by inserting the words "regular appeal."

9. And I say, that had it not been for the agreement of the then Attorney General, (James W. Johnston) that the decision of the Court should be accepted as final, my Counsel would not have consented to incur the trouble and expense of a re-argument, but would have left the Government to their appeal at once.

10. With regard to the statement contained in the petition, that a full council could not "conveniently" be held until April, 1862, I have made enquiry of my Attorney in Nova Scotia, and I am informed that such was not the case.

11. The following is, so far as the same is material, a true extract from the letter which I have received from my said Attorney, in reply to my enquiry.

"October 2nd, 1862:—I have found that the statement that a full council could not conveniently be held until April, is entirely without foundation. There were two meetings of council in December, before the end of the term in which judgment was given, lasting nine days after day judgment was pronounced.

"I also find that there was at least one meeting of Council before the House met. The House sat over S weeks, during which time all the members of Council were, as far as I can learn, in town; nor do I believe that, from the day judgment

was pronounced to April, there was not a quorum of Council in town.

"Five, I understand, is a quorum.

"Six of the Council reside in Halifax, both Crown officers being always here. The other members of the Council were at least here during the session of the Legislature."

At the Court at Osborne House, Isle of Wight, the 9th day of January, 1863,

#### PRESENT:

## THE QUEEN'S MOST EXCELLENT MAJESTY,

ARCHBISHOP OF CANTERBURY, LORD PRESIDENT, DUKE OF SOMERSET, SIR GEORGE GREY, Bart.

Whereas, There was this day read at the Board, a report from the Judicial Committee of the Privy Council, dated the 29th of November, 1862, in the following words, viz.:—

"Your Majesty having been pleased by your general order in Council, of 20th November, 1861, to refer unto this committee the humble petition of John Hawkins Anderson, the Receiver General of the Province of Nova Scotia, setting forth that on the 21st day of December, in the year of our Lord 1860, an action was commenced against the petitioner as Receiver General of the Province of Nova Scotia in the Supreme Court of the said Province, at Halifax, in the said Province, by Thomas Chandler Haliburton, by writ of summons, in which the said plaintiff alleged that the petitioner, as Receiver General, as aforesaid, of the said Province. was indebted to the plaintiff (who, it was stated in the said writ, was, on the 29th day of March, in the year of Our Lord 1841, a first Justice of the Court of Common Pleas, and President of Sessions for the middle division of the said Province,) in the sum of £1,237 10s. for the several quarterly proportions of a certain pension or compensation, granted to the plaintiff as such first Justice and President as aforesaid, by the 7th section of a statute of the said Province, passed in the 4th year of your Majesty's reign, entitled, "an Act to improve the Administration of the Law, and to reduce the number of the Courts of Justice within the Province, and to diminish the expense of the Judiciary therein," which had accrued and become due and payable to the plaintiff at the treasury of the said Province, since the 16th day of August in the year of Our Lord 1856, when the then Lieutenant Governor of the said Province accepted the resignation by the plaintiff of the office of a Fourth Assistant or Puisre Judge of the said Supreme Court, to which the plaintiff was appointed on or about the 6th day of April, in the year of Our Lord 1841; that in the particulars of the plaintiff's claim, endorsed on the said writ. the said sum of £1,237 10s. was claimed as the quarterly arrears of a pension of £300 per annum, due since August 16th, 1856, up to October 1st, 1860-163 quarters at £75 a quarter; that in and by the 134th chaper of the Revised Statutes of the said Province, with reference to pleadings and practice in the said Supreme Court, and to questions raised by consent without pleading, it is provided as follows: "The parties, after writ issued, may, by leave of the court or a Judge, state any question for trial which they may think fit, without any pleadings, and with or without an agreement; that, according as it may be determined, an agreed sum of money, or a sum to be ascertained by the Jury, shall be paid, and as to payment of costs. Upon such finding judgment may be entered, and the proceedings re-Questions of law, after writ issued, may be stated for the opinion of the Court without pleading, and with similar agreements as to money and costs to be recovered, and with or without an agreement, to bring errors which may be brought when agreed.

That under the provisions of the said last mentioned statute a special case was, after the sucing out of the said writ, stated in the said action without pleadings, for the opinion of the said Supreme Court, and was agreed upon by and between Robert G. Haliburton, as counsel for and on behalf of the plaintiff, and by your Majesty's Attorney General of the said Province, on behalf of the petitioner and of the Government of the said Province, with a view to obtain an authoritative decision of the said Supreme Court, as to the right of the plaintiff to the pension claimed by him as thereinafter set forth; and that by the said special case it was agreed that no costs should be paid on either side, whatever might be the decision thereon; and that no personal responsibility or liability should be

incurred by the petitioner by reason of his appearing in the said action, or through his entering into the said special case, as the same was made merely to ascertain, as against the said Province, the right of the plaintiff to the pension claimed by him; and that either of the parties thereto, if dissatisfied with the decision of the said Supreme Court, should be at liberty to prosecute a regular appeal therefrom to your Majesty in Council; and that all the papers or documents, or copies thereof, thereto annexed, should form part of such case; and that a particular reference to statutes therein should not prevent either party from relying on any statute not referred to, nor from referring for argument to any statute, public or private, whether in force, amended, or repealed. That in and by the said special case it was stated and appeared that on the 4th day of October, in the year 1829, the said Thomas Chandler Haliburton was appointed First Justice of the Court of Common Pleas, and President of Sessions for the Middle Division of the Province of Nova Scotia, and as such was entitled to a salary of four hundred pounds currency per annum. That he continued to hold the said office until the 29th day of March in the year of Our Lord 1841, on which day the Provincial act, 4 Victoria, chapter 3, abolishing the said Court, was assented to by the then Lieutenant Governor, a copy of section 7 and 8 of which act were annexed to said case; that on the same day Lord Falkland, the their Lieutenant Governor, had offered to the plaintiff, by a letter, a copy whereof was annexed to the said case, the office of Fourth Assistant or Puisne Justice of the Supreme Court, created by the said act, to which a salary of seven hundred pounds currency per annum was attached. That the said plaintiff subsequently accepted the said offer, and received a commission dated the 30th day of March, in the year of Our Lord 1841, his said acceptance being subsequent to the date of the said commission, and was sworn into office on the 7th day of April of the same year, and continued to hold the said office until the 16th day of August in the year of Our Lord 1856, having received his salary up to that date from the 1st day of April in the year 1841. That on the 11th day of August in the year of Our Lord 1856, he addressed to the then Lieutenant Governor a letter, a copy whereof was annexed to the said case, tendering his resignation of his said office, which resignation was duly accepted on the 16th day of the said month; that the said 7th and 8th sections of the said Provincial Act, 4 Victoria. chapter 3, referred to in the said special case and annexed thereto, were as follows, that is to say: "Section VII. And be it enacted, that the present Chief Justice of the Court of Common Pleas and President of Sessions for the Island of Cape Breton, and the present First Justice of the Courts of Common Pleas and Presidents of Sessions for the Eastern, Western and Middle Divisions of this Province, from and after the passing of this act shall be entitled to receive and draw at and from the public treasury of this Province, during the term of their natural lives respectively, the sum of three hundred pounds, current monies of this Province, in each and every year, by even quarterly payments, to be computed from and after the quarterly payments respectively which shall happen next after the coming of this act into operation; and no vacancy or vacancies which shall hereafter occur in any of the said respective offices shall be filled up or supplied, or any new appointment or appointments made thereto. Section VIII. And be it enacted, that nothing contained in the 7th clause of the act passed in the 50th year of the reign of his late Majesty King George the 3rd, entitled, 'An act to alter and extend the times of holding the Supreme Court in several of the counties and districts of the Province, and for declaring the qualification of persons hereafter to be appointed Justices of the said Court, their number and salaries,' shall be held to disqualify the Chief Justice or First Justices to hold the office of an Assistant Justice of the Supreme Court: provided always, that in the event of the said Chief Justice and President of Sessions for the Island of Cape Breton, or any of the said First Justices and Presidents of Sessions for the said Eastern, Western and Middle Divisions of this Province accepting any appointment, place or office under Government, of equal or greater value than the aforesaid sum of £300 a year, then and in such case the said sum shall cease to be payable, and from thenceforward shall no longer be paid to the said Chief Justice and President of Sessions, or any of the said first Justices and Presidents of Sessions, who shall so, respectively, accept such appointment place or office."

That certain other acts of the said Province were referred to in the said case, and together with other documents annexed to the said case, formed part thereof; that the question stated in the said special case for the opinion of the said Supreme Court was whether under the provisions of the said several acts, the said Thomas Chandler Haliburton was entitled to receive payment of the said arrears of pension. granted by the said 7th section of the 4th Victoria, chapter 3; that attached to the said special case was a supplemental agreement between the plaintiff and the petitioner by their respective counsel, stating that the said case had been entered into with a view to ascertain the liability of the Province of Nova Scotia for the pension claimed by Judge Haliburton, the plaintiff, with the understanding that no personal liability should be incurred by the petitioner, and that whatever might be the decision of the court no judgment thereon should be entered, except it might be necessary, pro forma, with a view to obtaining a final adjudication of the case: that the said special case afterwards came on for argument before the said Supreme Court, and was argued by counsel for the plaintiff, and by the Attorney General of the said Province on behalf of the petitioner and of the Government of the said Province; that on the 23rd day of December, in the year of Our Lord 1861. judgment was given by the said Supreme Court in favour of the plaintiff, the Judges of the said court having differed in opinion, the opinion of the Chief Justice being in favour of the petitioner, and that of the three other Judges in favour of the plaintiff; that afterwards by a rule of the said court, granted upon the application of the said Attorney General, a record of the said judgment was ordered to be, and was accordingly made, as of the said 23rd day of December, 1861, for the purpose of prosecuting an appeal therefrom; that by the law and practice obtained in the said Province, the immediate Court of Appeal from the said Supreme Court is composed of the Lieutenant Governor and the Executive Council of the said Province, of which the petitioner and the Attorney General of the said Province are members; that after the said twenty-third day of December, 1861, when the judgment of the said Judges was pronounced, no full meeting of the said Executive Council could be conveniently held until the 15th day of April, 1862, to consider and decide whether an appeal from the said judgment should be prosecuted; that on the said 15th day of April, in the year of Our Lord 1862, at a meeting of the said Governor and Executive Council, held at Halifax in the said Province, it was decided that instead of taking any steps to prosecute an appeal in the said action from the said judgment of the Supreme Court to the said Governor and Council, consisting of the different members of the Government of the said Province, and of which, as aforesaid, the petitioner and the said Attorney General are members, leave should be prayed to appeal direct to your Majesty in Council, and it was by an order of the said Governor, on the advice of the said Council, directed that the proper steps should be taken for that purpose; that the petitioner, as such Receiver General, as aforesaid, conceiving the said judgment of the said Supreme Court to be erroneous and bad in law, humbly prays that he may have leave to appeal therefrom direct to your Majesty in Council, and that the said judgment may be reversed or varied, and that the matters of the said judgment may be heard before your Majesty in Council, and that the said Supreme Court may be ordered to transmit to your Majesty in Councila transcript of the record of the said judgment and of the said writ and special case, together with the various documents therein referred to or thereto attached, and of all entries and proceedings in the said action, and that the petitioner may have such other and further relief and such order may be made herein as to your Majesty in your great wisdom shall seem meet. The Lords of the Committee in obedience to your Majesty's said general order of reference have taken the said petition into consideration, and having heard counsel on both sides their Lordships do this day agree humbly to report to your Majesty, as their opinion, that the said petition ought to be dismissed.

"And in case your Majesty should be pleased to approve of this report and to dismiss the said petition, then their Lordships do direct that there be paid by the said petitioner to the said Thomas Chandler Haliburton, the sum of one hundred and five pounds one shilling and four pence, sterling, for costs incurred on this petition."

Her Majesty having taken the said report into consideration, was pleased, by and with the advice of Her Privy Council, to approve thereof, and to order, as it is hereby ordered, that the said petition be, and the same is hereby dismissed, with one hundred and five pounds one shilling and four-pence sterling, costs: Whereof the Governor, Lieutenant-Governor or Commander-in-Chief, of the Province of Nova Scotia for the time being, and all other persons whom it may concern, are to take notice and govern themselves accordingly.

(Signed)

ARTHUR HELPS.

Prothonotary's Office, Halifax, 24th March, 1863.

I certify that the foregoing is a true copy of the original order of Council, in the cause of Haliburton vs. Anderson, filed in this office.

J. W. NUTTING, Prothonotary.

## APPENDIX No. 25.

# REPORT OF COMMITTEE ON PUBLIC ACCOUNTS.

[Adopted 10th April, 1862.]

The joint Committee of the Legislative Council and House of Assembly, appointed to examine the Public Accounts, have examined the same, and the vouchers therewith submitted, and beg to report as follows:—

By the Receiver General's accounts there appears a balance in hand on the 31st December, 1862, of \$12,883.46.

The amount due the Bank of Nova Scotia on the 31st December, 1861, viz.: \$130,541.76, was paid off during the past year, together with the interest accruing thereon.

		o 31st Dec., 1862, was	\$825,26643

\$30,126 57 being an increase over the year 1861, of \$241,775.57.

A slight decrease has occurred in several articles, amounting to \$1002.77; also on imported tobacco of \$2802.59. The duties derived from leaf manufactured within the Province make up \$2449 of the latter deficiency.

By the Financial Secretary's statement, the gross amount of Light duties collected during the past year was \$31,164.50, shewing a decrease from the same service in 1861, of \$900.60.

There was due from Collectors of Excise and Light D December, 1862,	uties, 31st	\$39,659 83
Since paid,		33,493 34
Balance, This balance includes amount due by former Collectors, Unpaid orders taken in 1861 for Light duty, Unpaid orders taken in 1862,	\$2973 98 825 12 492 80	\$6,166 49 • 4,291 90

Balan	ce due 31st December, 1862,			\$4,102 12
Amou	int paid, viz.: March quarter, I	1863,	2596 50	
Order	s taken in 1861, and unpaid,		825 12	
Order	s taken in 1862, and unpaid,		492-80	
				3,914 42
	그러는 병원 교육 경험 경기 경기			
Due 3	31st March, 1863, by A. Fraser	r,		\$187 70

The total amount of Light duty collected at the Canso by A. Fraser in 1862, was		\$5022 90
Included in this amount were orders payable in Picton,	1417 60	
Orders forwarded to Halifax,	1126 70	
Orders in Collector's hands,	187 40	2,731 70
Collected in cash,		\$2,291 20
Expenses of collecting—	600 00	
Salary of Collector,	1081 50	
Wages and board of crew, Repairing boat,	47 48	
Building watch-house,	18 40	
Discount of American notes.	108 40	
		1,855 78
Net amount collected in cash,		\$435 42

The cost of maintaining this branch of the service, it will be observed, comes little short of the entire cash receipts, and it may be a question for the Government to decide whether, on an arrangement being made with the Government of Prince Edward Island, it would not be advisable to discontinue the Canso depart-In the event, however, of the service being continued, the committe recommend that the orders forwarded by the Collectors to the Receiver General, be passed to his credit in the same manner as if they were cash payments.

It is further recommended, that old Collectors of Excise be immediately called upon to pay up their respective debts, and that such balances as are not recoverable, be written off by the Receiver General on the report of the Attorney General.

The committee remark that many of the returns from Collectors of Excise require to be corrected in the Financial Secretary's office; in all such cases it is recommended that an acknowledgment be taken from the Collector that the adjusted balance is correct. CASUAL REVENUE.

The proceeds from the casual revenue for 1862 was In 1861 it was	\$33,540 06 31,767 47
Increase in 1862.	\$1,772 59

#### GOLD FIELDS.

The accounts and vouchers of this department have been examined and found correct. Up to the 30th April, 1862, the business of the department was transacted in the office of the Commissioner of Crown Lands, since which time it has been conducted by Chief Gold Commissioner.

Receipts for 1862, Expenditure,	\$29,469 51 25,631 70

BOARD OF WORKS.	
The accounts and vouchers of this branch of the public servi examined and checked, and found to correspond with each other.	ce have been
The Board charges the Receiver General with payments amount-	
ing to,	\$12,199 66
These payments are credited in the Receiver General's accounts under the following heads:	
Board of Works, \$1679 69	i didi.
Canada	

 Board of Works,
 \$1679 69

 Canada,
 1522 23

 Sable Island,
 1218 31

 Hospital Insane,
 7778 88

\$12,199 66

The committee recommend, that in future the sums payable by the Lords of the Treasury, Canada, New Brunswick and Prince Edward Island, for Light House service, be paid directly into the Board of Works, so that that department may be credited with the amounts.

The balance due the Board of Works on 31st Decr., 1862, was \$1482.24, as will be seen by the account current in Appendix.

## SAVINGS' BANK.

The transactions of the past year appear by the accounts to be correct. The amount due depositors on 31st December, 1862, was £128,890 15s. 3d.

The cash in hand, as stated in the accounts and certified by the Receiver General, amounted to £4536 17s. 10d., of which £646 2s. 7d. belonged to the Bank as cash surplus.

The recommendation of the committee of last year, that the pass books should be called in, and adjusted with the pass books of the Bank, has been carried out

as far as practicable. Out of 1,690 pass books, 1,390 have been examined and compared, and the committee are informed by the officers of the bank that in every case they correspond with the depositors ledger.

Several errors in the transactions of previous years have been discovered; but it is impossible for the committee to trace and check inaccuracies which have escaped the laboured investigations of Mr. Scott and Mr. Lawson. They are therefore obliged to accept the statements of Mr. Goudge, the assistant clerk, who has devoted much time to the examination of the accounts.

By his statement, a sum of £64 9s. 4d. was improperly entered in depositors accounts in 1860, which tended to increase the deficiency account against Mr. Duckett. The committee are satisfied that the amount should now be deducted.

It has been further ascertained that the abstract accounts of amount due depositors on 31st December, 1861, as reported last year, should be increased by the sum of £29 19s. Sd., and that £10 13s. Id., ought to be deducted from the same account; both amounts being the result of errors discovered last year, in additions, omissions, extending balance, and calculations of interest.

The difference between the two amounts, viz: £19 6s. 7d., is now deducted shewing the true balance of that year to be £129,336 14s. 3d.

The committee of last year reported that the difference between the ledger and abstract on the 31st Decr., 1861, was £103 12s. 10d. During the year 1862, many of the errors causing this difference have been discovered and adjusted; and on the 31st Decr., 1862 there was only a difference of £8 5s. 9d., which the assistant clerk expected yet to trace and correct.

It is satisfactory to know that the Receiver General pursues the same course which he adopted last year, viz., examining the books weekly, checking the entries and balances, and counting the cash.

Under such supervision it is improbable that errors, should they occur, can escape detection.

#### MILITIA.

The Militia accounts for the past year have been kept under four principal heads, viz.:—Tradesmen's bills, pay list, travelling expenses, and contingencies.

The principal items under the head tradesmen's bills, are:

Military stores from commissariat,	1		\$7547 54
Advertising, Printing, and Stationery,			2123 00
Forwarding stores,		1	704 35
Staff Sergeants clothing,			738 26
Buttons, principally in stock,			962 85
Prize Cup,			240 00
		•	· _ ·

The following accounts show the expenditure and income for the year ending 31st December, 1862.

## Old Arms Fund.

Balance in treasury, 31st December, 1862, was \$4000 90.

#### TREASURY NOTES.

The sum of \$71,000 old and defaced Treasury Notes handed to your committee

by the Provincial Secretary, have been destroyed.

By a certificate from the Commissioners appointed for signing Province Notes, the committee are informed that the same amount was signed and issued in their place, leaving the provincial issue as before reported, \$447,458.

The committee have also counted and destroyed the coupons for Railway interest, payable in Nova Scotia in 1862, amounting to \$30,000, and also the coupons paid the Bishop of Nova Scotia, amounting to \$2,550.

A quantity of old, signed, and blank coupons, was also destroyed at the request of the Receiver General.

PROVINCIAL RAILWAY.	
The Railway expenditure for construction, to Decr. 31, 1861, was	\$4,267,324 99

### POST OFFICE.

The accounts of this department have been examined and found correct.

The total expenditure for the year 1862 was Total income,	\$68,305 76½ 45,100 62½
Deficiency,	\$23,205 14
The income of 1862 was Do. 1861,	\$45,100 62½ 40,052 13
Increase 1862,	\$5,048 491
Expenditure of 1861 was Do. of 1862,	\$69,444 35½ 68,305 76½
Decrease of expenditure,	\$1,138 59
Deficiency in 1861, Do. in 1862,	$ \begin{array}{r}     \hline     $29,392 \ 22\frac{1}{2} \\     23,205 \ 14 \end{array} $
Decrease of deficiency in favor of 1862,	\$6,187 081

#### INTERNATIONAL EXHIBITION.

The accounts of the Commissioners for the International Exhibition will be found, as rendered to the committee, in Appendix. By them it will be seen that on 31st December, 1861, \$1932 29 was drawn from the Treasury, and that \$11,481 40 was drawn in 1862, exclusive of \$3902 89 received from Baring, Brothers & Co., making in all, \$17,316 58

To which may be added proceeds of articles sold at Exhibition, 781 87

\$18,098 45

The entire expenditure amounts to \$17,413 21, but there are outstanding liabilities not yet wholly ascertained, being for freight of goods returned, and expences in London and Halifax on the same.

All of which is respectfully submitted.

JOHN CREIGHTON, Chairman,
R. A. McHEFFY,
WM. C. WHITMAN,
R. P. GRANT, Chairman,
MOSES SHAW,
JOHN L. BROWN,
A. W. McLELAN,

## APPENDIX No. 26.

## DISABILITIES.

(COPY.)

At a Council held at the Government House, at Halifax, the 5th day of November, 1862.

#### PRESENT:

His Excellency the Right Honorable the Earl of Mulgrave, &c. &c. &c.

On the petition of Captain James Daly, Commander of the Government schooner "Daring," six month's leave of absence is granted to him in consequence of ill-health.

(COPY.)

Provincial Secretary's Office, Halifax, 25th October, 1862.

Sir,—

Having submitted to the Administrator of the Government your letter of this date, requesting that a suitable person may be appointed to take charge of the Government schooner "Daring," during the illness of Captain Daly, I am commanded to acquaint you that His Honor will sanction the appointment of Captain Henry Moseley, who has been recommended for that service by the Executive Council.

I have the honor to be.

Sir.

Your obedient servant,

(Signed)

W. H. KEATING, Deputy Secretary.

Hugh Munro, Esqr., Chairman of the Board of Works, Halifax.

(COPY.)

Board of Works, Halifax, 25th October, 1862.

To H. Moseley, Esq., M. P. P.

Bridgewater, Lunenburg Co,

Can you immediately come and take charge of Daring (pro tem.)—say Monday.

(Signed)

H. MUNRO, Chairman.

Answer by telegraph.

(COPY.)

Province of Nova Scotia.

[L. S.] J. Harvey. By His Excellency Lieutenant General Sir John Harvey, Knight Commander of the Most Honorable Military Order of the Bath, Knight Commander of the Royal Hanoverian Guelphic Order, Lieutenant Governor and Commander-in-Chief in and over Her Majesty's Province of Nova Scotia and its Dependencies, &c., &c., &c.

Mr. James Daly,-

By virtue of the authority in me vested, and confiding in your ability and discretion, I do by these presents, by the advice of Her Majesty's Council for this Province, constitute and appoint you to be an officer for the protection of the fisheries, and for the prevention of smuggling, within three marine miles of any of the coasts, bays, creeks, or harbors of the Province, with full powers to enforce within those limits a strict observance of the stipulations of the convention between his late Majesty King William the Fourth and the United States of America, bearing date the twentieth day of October, A. D. 1818, and of the provisions of any act or acts of the Imperial Parliament, or of the Legislature of this Province, in relation thereto. And I do further for this purpose appoint you to be the Commander of the Government schooner "Daring" during pleasure.

Given under my hand and Seal at Arms at Halifax, this sixteenth day of October, in the fifteenth year of Her Majesty's reign, A. D. 1851.

By His Excellency's command,

(Signed)

JOSEPH HOWE.

Province of Nova Scotia.

By His Excellency Major General Sir John Gaspard Lemarchant,
Knight, Knight Commander of the Orders of St. Ferdinand,
and of Charles the Third of Spain, Lieutenant Governor and
Commander-in Chief in and over Her Majesty's Province of
of Nova Scotia and its Dependencies, &c., &c.

To Mr. JAMES DALY,

Commander of the Provincial schooner "Daring,"

Greeting:

By virtue of the power and authority in me vested, I have thought fit to constitute and appoint, and do, by the advice of the Executive Council of the said Province, hereby, during pleasure, constitute and appoint you, the said James Daly, to be a Collector of duties of tonnage payable from vessels passing through the Strait of Canso, in the Province aforesaid: hereby granting unto you all the rights, powers, and advantages, which to the said office do or may lawfully appertain, and requiring you diligenty to perform the duties thereof.

Given under my hand and Seal at Arms at Halifax, this twenty-fourth day of September, in the twenty-first year of Her Majesty's reign, A. D. 1857.

By His Excellency's command,

(Signed)

CHARLES TUPPER.

## APPENDIX No. 27.

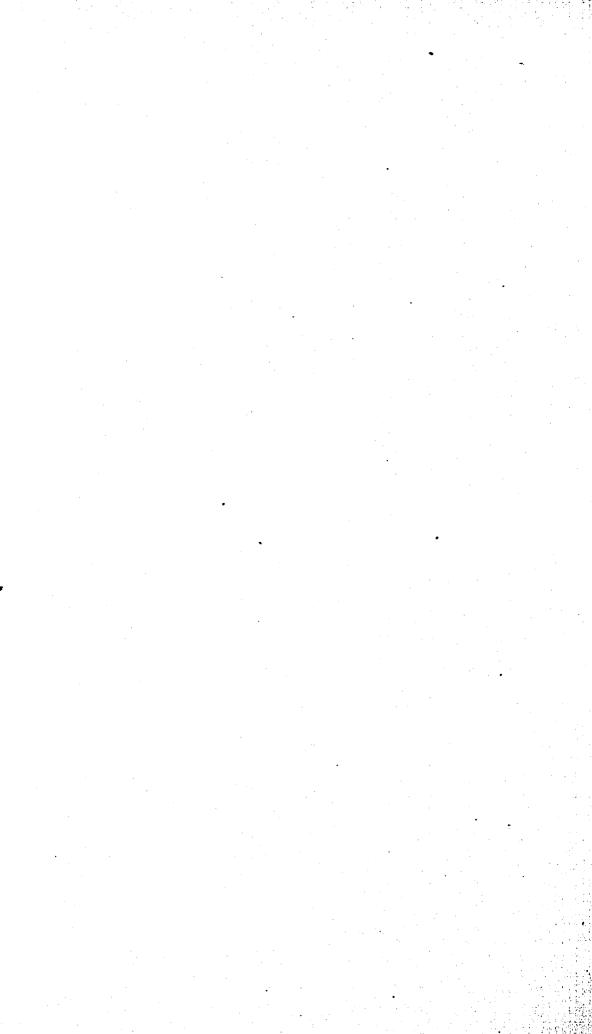

## PUBLIC DEPARTMENTS.

The Committee appointed to consider and make provision for increased accommodation for the Public Departments, beg leave to report, that they have made the necessary enquiries, and ascertained that the ground known as the former site of Hare's building, measuring 125 feet 6 inches on Cheapside, and 53 feet 6 inches on Hollis street, can be had for \$42,000, and they recommend that steps be immediately taken to secure the same.

A. W. McLELAN.

Committee Room, 19th Feb'y, 1863.

### APPENDIX No. 28.

## REPORT OF COMMITTEE ON NAVIGATION SECURITIES.

The Committee on Navigation Securities beg leave to report as follows:—

They have perused the communication addressed to the hon. Provincial Secretary on 26th June last, by Capt. Shortland, R. N., setting forth the necessity of some change being made in the Lights at Port Williams and Margaretville, in order that those Lights may be seen to a greater distance than under the present arrangement; and your committee recommend that the Superintendent of Light Houses be instructed to examine the localities in question, with the view of remedying the evil complained of.

On the petition of David Welch and others, of Westport, complaining of the present management of the ferry between that place and Meteghan in the district of Clare, as well as the appropriation of the money voted for that service, your committee recommend that one half of the grant for this ferry be paid to the owner of each of the boats plying thereon, subject to the regulations prescribed in such cases; but in case either of such two boats should be withdrawn, then that the whole grant should be paid to the owner of the boat by which the service is performed.

On the petition of Albert Spinney and others, of the district of Argyle, praying for the erection of a Light House on Fish Island, in Abuptic Bay, the committee recommend that the prayer of the petitioners be complied with, and the Light House erected as soon as practicable.

The attention of your committee has been called to the report of the Superintendent of Light Houses, dated 15th January, 1859, in which he recommends the crection of a Light House on Bird Islands, off the entrance of Big Bras d'Or; your committee beg to call the attention of the Government to such recommendation, with the object of having the Light House erected in the course of the present season.

Your committee also recommend that the port of Bras d'Or be added to the ports for which Commissioners of Pilots are appointed.

Your committee have had under their consideration an application from representatives of the counties of Hants and Colchester to the Government, shewing the necessity of a small Light on Spencer's Point, in the Bay of Funday, and as it appears that the necessary arrangements will involve a very moderate outlay, they reccommend the matter to the favorable consideration of the Government, and that the Superintendent of Light Houses be authorized to make the arrangements with Captain Wm. Spencer, so as the sum does not exceed the amount contemplated by the applicants for this service.

On the petition of Edward P. Archbold, President of the Glace Bay Mining Company, praying that the jurisdiction of the Commissioners of Pilots for the port of Sydney, in Cape Breton, may be extended to Glace Bay, your committee recommend that the request of the petitioner be acceded to

Your committee do not recommend to the favorable consideration of the House the petition of William Richards, Harbor Master of the port of Pugwash, praying for an increase of the Harbor Masters fees on large vessels frequenting that port.

Your committee have considered the petition of the Commissioners of Pilots for the port of Pugwash, praying for an increase of pilotage fees on vessels over 300 tons entering and leaving that port, and recommend the same to the favorable consideration of the House.

Your committee having ascertained that the usual grant of twenty-four dollars, for encouraging the ferry across Tusket River, was omitted from the estimate of last year, recommend that the Government pay that amount to the parties entitled to receive the same, under the certificate of the Sessions of the district of Argyle.

On the petition of Thomas Holland and others, Pilots of the port of Halifax, praying for an amendment of the second section of chapter 26 of the acts of last session, referring to outward bound vessels paying half-pilotage, and suggesting further alterations in the law. Your committee recommend that the section referred to be repealed, and that the masters of vessels outward bound shall not be required to take a licensed pilot.

Your committee having had submitted to them a written communication from the members of the county of Guysborough, on behalf of the inhabitants of Torbay, Molasses Harbor, Whitehead and other settlements, praying aid in the construction of a canal at the "Haulover" at Whitehead, recommend that three hundred dollars be granted towards this object, upon condition that the sum of one hundred dollars be first raised by subscription and expended on the work, so that the whole expenditure thereon amount to four hundred dollars.

Your committee also desire to bring to the notice of the Government the report of the committee on Navigation Securities for 1862, in which the expediency was advocated of placing a steam-whistle on Cape Canseau for the guidance of vessels entering the Strait, and they strongly recommend the adoption of the suggestion of that report at the earliest possible period.

Your committee lastly report the bills submitted to them in amendment of chapter 78 of the Revised Statutes, with such additional amendments as will carry out the alterations referred to in the within report.

All which is respectfully submitted.

SAMUEL CHIPMAN, GEORGE McKENZIE, DANIEL MOORE, COLIN CAMPBELL, JR., THOMAS F. MORRISON, AVARD LONGLEY, PETER SMYTH.

Committee Room, April, 1863.

It having been brought to our notice that the fog bell at Yarmouth, as rung by machinery, does not give sufficient warning to vessels entering that port in foggy weather, and suggestions having been made from the locality for trying the bell by hand-ringing during one season, your committee recommend that arrangements be made as soon as possible to have said bell rung by hand, provided the expense for the season do not exceed one hundred dollars.

SAMUEL CHIPMAN, Chairman.

## APPENDIX No. 29.

## REPORT OF COMMITTEE ON HUMANE INSTITUTIONS.

[Adopted 23rd April, 1868.]

The Committee on Humane Institutions, beg leave to report as follows:

#### HOSPITAL FOR THE INSANE.

Your committee in visiting this institution, found the number of inmates larger than in any previous year, but believe that the same attention is given to the comfort of each patient as when the number was much less.

The average attendance for 1862, was
Do. do. 1861,

Shewing an increase during the year of

16

The building being now filled almost to its entire capacity, and as it has been found in the working of all similar institutions that if more patients are admitted than can be properly classified and separated, the percentage of cures largely diminish; it is therefore for the interest of the insane that those having the management of this institution should be careful that it be not over-crowded; and whenever vacancies do occur, to admit only those cases offering the best ground to hope for successful treatment.

In view of the large number of insane throughout the Province that will as the benefits of hospital treatment become better known seek admission, the Government should make preparation for an early extension of the building.

Meanwhile your committee consider some repairs necessary to the present building, viz:

To paint the window sashes and the porches.

Repair the zinc spouts.

Examine the roof, particularly round the eaves, and do all that is necessary to render it water tight.

Fur out and replaster the walls which have been injured by dampness.

Your committee also consider an airing court for excited patients necessary, and recommend that it be provided.

Should it be necessary to rebuild the coal shed during the ensuing summer, it

should be placed as near the boiler house as possible.

The amount due from the counties is greater than in 1861, but perhaps not more than proportionate to the increase of patients. The Government should urge the payment of all outstanding debts, and recommend the sessions of counties to provide funds in advance for the maintenance of their patients, as your committee learn has been done by the sessions of Pictou county at their last meeting.

The sessions of Pictou asks for a quarterly report upon the condition of their patients. Such reports your committee recommend to be furnished by the Medical

Superintendent to the Custos of each county.

#### DEAF AND DUMB SCHOOL.

The necessity which has for some time existed for additional school rooms, has been met by the erection, during the past season, of a fine commodious building, which will add greatly to the comfort and health of the inmates, as well as the efficiency of the institution.

To enable the Directors to meet the expense incurred in the erection of this building, your committee recommend that an extra grant of one thousand dollars be allowed them.

Your committee in visiting this institution, were highly gratified by the promptness with which many of the pupils answered, in writing, questions on the various branches of their education—creditable alike to themselves and their teachers. While the domestic management under Mrs. Vinecove, is a pattern of order and cleanliness.

#### POORS' ASYLUM.

Your committee found this establishment in as good order as the crowded state

of the wards renders possible.

Assistance from the public funds should be given to the Commissioners to extend the buildings so as to furnish wash and bath rooms, and additional wards, for want of which the health of the inmates is suffering seriously.

This institution, as are the others mentioned in this report, is conducted with a

due regard to economy.

All of which is respectfully submitted.

A. W. McLELAN, Chairman, JOHN V. N. HATFIELD, COLIN CAMPBELL, Jr. HENRY PRYOR, A. CAMPBELL.

Committee Room, April 17, 1863.

## APPENDIX No. 30.

## REPORT OF COMMITTEE ON AGRICULTURE.

[Adopted 25th April, 1863.]

The committee appointed to take into consideration the several matters referred to them, relating to Agriculture, have to report:—

That they have examined the accounts from the several societies, and find them correct. Your committee regret that fourteen societies, out of the forty-one that reported last year, have not drawn their grants.

The returns from the societies shew that the crops of the last year have been an average produce. Many of the societies appear to be in active and useful operation. Your committee strongly urge the necessity of importing superior breeds of cattle and sheep, and desire the favorable consideration of the Government to this object.

Your committee learn from Dr. Forrester, that the Rev. Mr. Honeyman, while at the London Exhibition, obtained a large variety cereals and seeds, which have been kindly handed over to him to test their adaptability to our soil and climate, and recommend that sufficient aid be afforded to test the experiment.

Your committee recommend that the sum of four hundred dollars be allowed to the Nova Scotia Horticultural Society, according to the prayer of their petition, towards enabling them to defray the expenses of holding annual exhibitions of fruits, cereals, vegetables, &c., in their gardens in Halifax, of paying for the prizes, and of meeting the expense of transmitting the prize articles to the Royal Horticultural Society in London, as your committee are assured that the favorable position secured by Nova Scotia at the great exhibition, will tend greatly to promote her interests as an agricultural province.

The committee would again bring to the notice of the Government the subject of the potato disease, and deem the proposed experiment of obtaining the native seed of the potato root from South America, worthy of attention, and they trust that the Government will have such inquiry made on this subject as will enable them to ascertain how far the experiment may be of benefit in restoring this valuable article of diet to its healthy condition.

All which is respectfully submitted.

ROBT. DONKIN, Chairman. SAMUEL CHIPMAN, DANIEL MOORE, WM. CHAMBERS, WILLIAM GAMMELL, LEWIS SMITH, JOHN McKINNON.

Committee Room, Halfax, April 24, 1863.

## APPENDIX No. 31.

## REPORT OF POST OFFICE COMMITTEE.

[Adopted 22nd April, 1863.]

The Post Office Committee beg leave to report that they have considered the bill referred to them, introduced by Mr. Brown, and have decided to recommend two improvements in the circulation of letters in the interior, namely:

- 1. That all prepaid letters may be sent from way office to way office without passing through a post office.
- [2. That all letters not to be forwarded beyond the bounds of the county in in which they are mailed, shall be charged only two cents.]

The committee have considered the whole subject of the transmission through the Post Office of newspapers and periodicals, and have agreed to recommend—

- 1. That chapter 23 of the Revised Statutes, sections 12 and 13 be repealed.
- 2. That a newspaper shall be held to mean a periodical, published at least once in each week, and containing notices of passing events.
- 3. That newspapers posted in the United States, and addressed to Nova Scotia, shall be liable to one cent each on delivery. That the stamp paid on these papers shall indicate that the United States postage only has been prepaid, the Nova Scotia rate of one cent remaining to be collected.
- 4. That American newspapers, posted or re-posted in Nova Scotia, shall be prepaid one cent each by stamp.
- 5. That all foreign newspapers posted at any office in Nova Scotia, must be prepaid one cent each by stamp.
- 6. That no newspapers, properly so called, (except exchanges) whether devoted to Education, Temperance, Agriculture, or to any branch of science, shall be exempt from charge.
- 7. That no foreign newspapers of any kind (except exchange papers) shall be entitled to pass through the Nova Scotia mails free of postage.

#### PRINTED PAPERS.

8. That circulars, hand-bills, lithographed letters, and other printed matter of a like character, posted in Nova Scotia, addressed to any place in Nova Scotia, be charged one cent per oz. up to 48 oz., and be prepaid by postage stamps.

#### PERIODICALS.

- 9. That publications issued at regular intervals, but less frequently than once a week, shall be deemed periodicals:
- 10. That periodicals, whether foreign or otherwise, and whether religious or secular, scientific or otherwise, either unpaid or with the United States postage prepaid thereon, and also those posted by agents to subscribers in the province, as well as those re-posted by private individuals, shall be prepaid by stamps, two cents each number:

The committee have had under consideration a number of petitions from postmasters, asking for an increase of salary. These petitions are an annual source of embarrassment to the committee. Three years ago the salaries were based upon an average of three years commissions. Since that period the postage and work in several of the offices have largely increased, and in some offices on which post lines concentrate, where night work accumulates, or where mails by steamer arrive at uncertain hours, peculiar claims have been established. The committee recommend that there be added to the salaries of the postmasters at—

\$22
40
20
40
14
10
18
50
\$214

The committee recommend the establishment of way offices at-

Albert Bridge, C. B.,
East side W. B., East River, Pictou,
Mira Gut, C. B.,
Newport Station,
Western Aylesford,
Beech Hill, King's Co.,
New Edinburgh,
Wallace Bridge.

The committee recommend the extension of the money order system to-

North Sydney,
Bridgetown,
Barrington,
Bridgewater,
Wallace,
Cape Canso,
Sherbrooke, (St. Mary's),
Milton.

The committee recommend the establishment of new rides between

Bridgewater and Pleasant River.

Noel and Moose Brook.

St. Andrew's and Guysborough Intervale.

Weymouth and Belliveau's Cove.

The committee recommend that semi-weekly mails be forwarded to the new coal mines being worked in the county of Cape Breton, and between Tatamagouche and New Annan.

That a tri-weekly mail be forwarded between Sherbrooke and Wine Harbor.

That a weekly mail be established round Cape George.

That a second ride per week be established between Waterville, Kingston, and Palmer's corner, Aylesford.

The committee recommend an addition of \$20 to the salary of Donald Morrison, Courier.

The committee decline to recommend alteration of route between Louisburg and Gabarous.

They also decline to recommend applications for increase of salary at Ship Harbor; for mail route from Margaree to Big Intervale; for Way Office; Arbol;

for making the Way Office at Tracadie a Post Office; for tri-weekly mail at Chevarie; for removal of Way Offices at L'Ardoise and Cow Bay; nor can the committee recommend the repayment of money said to have been lost by George Harvey, by Mrs. McKay, or by R. R. Thompson.

The committee do not recommend the removal of the Post Office at Glenelg, St. Mary's, nor at Weymouth; but do recommend that a Way Office be established at Weymouth bridge.

The committee have reviewed the circumstances under which a letter posted at Shelburne was stolen from the mail bag at Port Medway; and though they have no doubt that the mail was robbed in Mr. Armstong's house, yet as there is no positive proof to convict him, and as all his neighbours appear to have confidence in him, the committee recommend that he be reinstated, and that the amount lost be repaid to the Postmaster at Shelburne.

They have also reviewed another case submitted to them by the Postmaster General, in which a letter passing through the Wolfville office was lost. They recommend that the Postmaster at that place be surcharged with the amount contained in the missing letter, it having been found impossible to trace it beyond his office, in consequence of his neglect to obey his instructions.

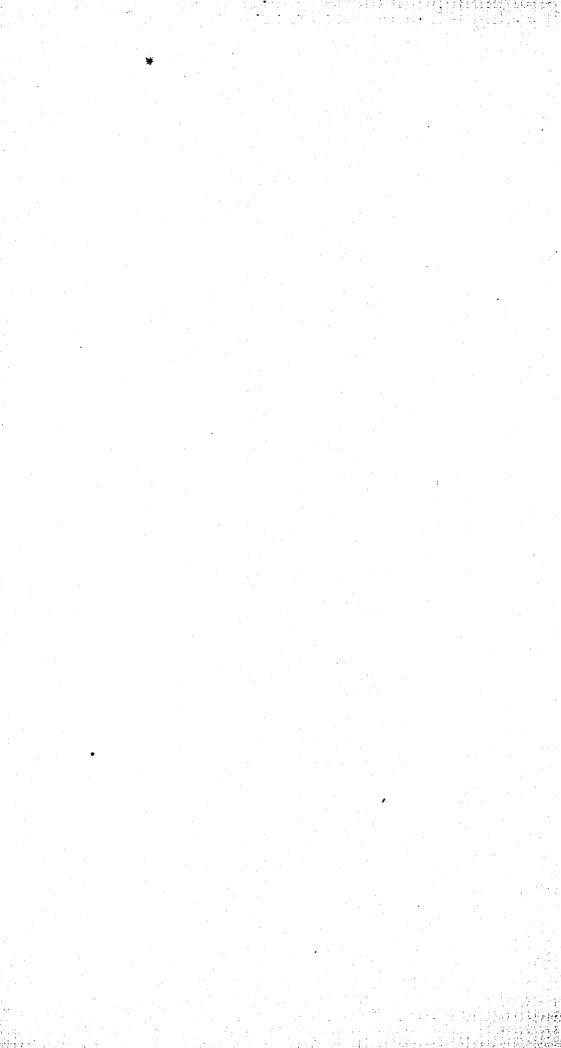

The committee have carefully considered certain petitions from Musquodoboit, complaining of the conduct of the Postmaster at that place, and have heard the petitioners by deputation. This case was carefully reviewed by the Postmaster General in June last, and as no new charges have been preferred or facts elicited since that period, the committee see no reason to disturb the decision.

The committee recommend that \$S 30 worth of postage stamps burnt at Tangier be credited to the Postmaster at that place.

All which is respectfully submitted.

JOSEPH HOWE.
ALEXANDER MACFARLANE.\*
THOMAS COFFIN,
WILLIAM BURGESS,
W. O. HEFFERNAN,
J. BOURINOT.

<sup>\*</sup> Except as to clause in brackets.

# APPENDIX No. 32.

# REPORTS OF TRADE COMMITTEE.

#### FIRST REPORT.

[Adopted 26th February, 1863.]

The Committee on Trade and Manufactures have had before them the petition of Robert Fulton, in reference to a quantity of goods imported by him into the port of Londonderry, and detained there by the Collector of that port upon the charge that the said goods were attempted to be entered at less than their market-

able value at the place from which the same were imported.

The committee having examined the whole matter, and heard the statements of the petitioner, beg leave to report, that the Collector in the transaction acted strictly in accordance with the law; and that the petitioner had at the time the liberty of receiving his goods, by complying with the provisions of the law, and can yet do so, by paying the duties on the invoice, as appraised, together with any penalties to which he may be subject.

> B. WIER, JOHN TOBIN. W. ANNAND, ROBERT ROBERTSON, ANDREW COWIE.

#### SECOND REPORT.

[Adopted 28th March, 1863.]

The committee to whom was referred the petition of Messrs. Creighton and others, touching the seizure of the Schooner Will-o'-the-Wisp and her cargo, by Commander Hunter, of the Federal Steamship Montgomery, in the month of June last, beg to report that they have had the matter under their consideration. They have investigated the facts, and are satisfied that there could not be a more flagrant breach of international law, or a more inexcusable attack upon neutral

rights, than that presented in the case of this vessel.

The Schooner Will-o'-the-Wisp (with her cargo) was seized at the mouth of the Rio Grande in the prosecution of a legitimate voyage, and while at anchor, and actually engaged in discharging cargo into Mexican lighters, coming from the Mexican side of the river, under the permit of the Custom House authorities of Mexico, as appears by the certificates granted by the collector and sub-collector of the port and district of Matamoras, she was taken by force out of this neutral port, and carried to Key West, Florida, whereby the voyage was broken up, and the cargo destroyed and embezzled, to the great loss of the petitioners; and though the Prize Court at Key West ordered both vessel and cargo to be restored to the owners, on the ground (as clearly stated by Judge Marvin in his decree in the case) "that she was a neutral vessel, trading in a neutral port, and that the United States Government does not pretend to interfere with the trade of neutrals." Yet it appears that their cruisers have unwarrantably interfered in this particular instance to the serious damage of the petitioners, and for which no satisfaction

has yet been given.

It would appear that Commander Hunter was aware that there was nothing to warrant the seizure, nor did he attempt to justify it, or to furnish any plea to shew probable cause of capture; and it is a singular fact that the case was got rid of at Key West in the most summary manner, without giving the owners an opportunity to appear, and the very fact of the case being tried at Key West is a proof of the injustice exhibited, because from the exigencies of the war, communication with that port exists in a partial manner, and only for vessels of war.

Your committee are aware that in the prosecution of such a contest as that now being waged, it is not to be expected that the shipping of the province should entirely escape from interruptions, and to such as are inevitable, nothing can be urged; but the Federal cruisers have pressed belligerent rights to an extreme point, and this matter of the Will-o'-the-Wisp is a signal instance of the recklessness of their proceedings, and in the opinion of the committee, it is a case that calls for the prompt and decided interference of the Imperial Government, in order to obtain for the petitioners ample compensation for the severe losses they have sustained, as set forth in their memorial to Her Most Gracious Majesty the Queen, and that such redress can only be obtained by the interposition of Her Majesty's Government with the Federal Government.

Your committee would therefore submit that His Excellency the Lieut. Governor be furnished with a copy of this report, and be respectfully requested to forward the same to Her Majesty's Government, in order that prompt means may be taken to obtain such ample compensation from the American Government, as the circumstances of the case warrant; and which, from the great delay already experienced, falls with very great hardship on the petitioners.

B. WIER,
JOHN TOBIN,
WILLIAM ANNAND,
ANDREW COWIE,
ROBERT ROBERTSON.

#### FINAL REPORT.

[Adopted 10th April, 1863.]

The Committee on Trade have had before them a bill, entitled, an act in addition to chapter 16 of the Revised Statutes, "of the importation of goods," and an act in amendment thereof; also a bill, entitled, an act to amend chapter 19 of the Revised Statutes, "of the prevention of smuggling,"—both of which bills they recommend to the favorable consideration of the House.

Two matters of correspondence have been submitted to them—first, a letter from the Government of Prince Edward Island, referring to the light duties in the Strait of Canso; and secondly, of matters in reference to the trade between the British North American Provinces and the French West India Islands. These papers they beg to recommend may be referred back to the Provincial Government, for the purpose of taking such action upon them as they may deem proper.

They cannot recommend to the favorable consideration of the House, the petition of W. H. Mills, praying for return duties on importations made by himsof

certain goods therein specified.

All of which is respectfully submitted.

B. WIER, Chairman.

# APPENDIX No. 33.

# REPORTS OF COMMITTEE ON EDUCATION.

[Adopted 23rd April, 1863.]

The Committee on Education beg leave to report:

That they have examined the petitions of various teachers whose names they subjoin, for grants of land, as aged teachers,

They recommend the application to these petitioners of the rule as defined in the report of the Committee on Education last year.

The names of the petitioners are:

Dugald Smith,
John McDougall,
Roderick McLeod,
Patrick D. Scanlan,
Thomas Doller,
William McQuarry,
John Dennis,
John Smith,
John Phalen,
Daniel Kitchen,
Robert Cahill.

Lawrence Shed,
George B. Sandford,
James Morash,
Samuel Patten,
Richard Carroll,
Thomas Allison,
George Heans,
Samuel Wetherby,
Susanna Morse,
Caroline Wambolt,

Your committee recommend a grant of \$100 to the Industrial School at Pictou, in addition to the amount allowed by the Commissioners of Schools to that institution.

The applications on behalf of the Academies at New Glasgow, Arichat and Pine Grove, your committee would gladly entertain, if they could do so without establishing a principle which would soon create a large demand upon the treasury. The people of New Glasgow have made exertions that entitle them to the marked notice of your committee, and which contrast very favorably with those of the people of Picton town, who for years have drawn in aid of the education of their youth a large sum from the treasury—a sum which if now asked for the first time could not be granted, but which your committee will not withdraw without warning. They feel it right, however, to say that if this grant should be applied for again, the Committee on Education ought to be satisfied that exertions have been made by the people themselves proportioned to the amount received from the treasury. Pictou has a population that without government aid, ought to support a flourishing school. To justify so large a grant from the public treasury, the usefulness of the institution beyond the class of superior schools scattered over the country which receive no extra aid, should be made quite clear.

The committee do not recommend any alteration in the law as regards the Grammar School money in the county of Cape Breton. While coming to the same decision as regards Western Hants, they cannot but express their opinion that while Windsor receives so large a sum from the public treasury for educational purposes, the claim of Hantsport to the Grammar School money now given to

Windsor, seems to your committee stronger than the Commissioners of Schools have considered it. They recommend the Commissioners to encourage, as far as they can, the efforts made at Hantsport for the establishment of a superior school at that place.

In reference to the petition of Howard McLean, your committee consider that under the circumstances he was entitled to the Grammar School allowance he claims; but the Board of Commissioners having entertained a different opinion; and paid the money to another teacher, under the conviction that they were doing right, your committee would recommend the payment out of the treasury of \$40 to Mr. McLean, in full of his demand.

Your committee approve the suggestion of Dr. Forrester, to employ the teachers of the Normal School in the inspection of Common Schools during the summer recess of that institution. These gentlemen are willing to devote their time to this work upon being paid their expenses, which will not exceed \$400. Your committee recommend the appropriation of that sum to this service.

Your committee recommend that the Grammar School money appropriated to the rural and shore districts of Halifax county, shall be equally divided between those districts, giving \$100 to each district.

Your committee do not consider the case made by William McDonald, sufficient to justify them in overruling the decision of the Board of Commissioners for Cape Breton, particularly as under that decision the money in controversy has been paid to another party.

Your committee recommend a grant of \$75 in aid of a school at the African village, to be kept in the school-house recently erected there.

Your committee recommend that 400 copies of Mr. Munro's work on the Statistics of British North America should be subscribed for, on behalf of the Province, for gratuitous distribution in the Mother Country. This number, at the price of 50 cents each, will amount to \$200.

Your committee cannot forbear drawing the attention of the House to the able and elaborate report of the Superintendent of Education, referred to your committee, and trust that after the ensuing election, some legislation which may place the Common School education on a sounder footing, may meet with the approval of the Legislature.

Your committee have examined the accounts of the Superintendent of Education—for the expenditure of \$50 in the repairs of the Normal School, shewing a balance in his hands of \$2 77; an account of postage for 1862, amounting to \$79; and an account of the disbursement of the sum granted for the current expense of the school—all of which appear to be correct.

A. G. ARCHIBALD,
SILVANUS MORTON,
H. McDONALD,
WM. CHAMBERS,
A. M. COCHRAN,
S. L. SHANNON,
C. TUPPER.

April 23rd, 1863.

#### FURTHER REPORT.

[Adopted 28th April, 1863.]

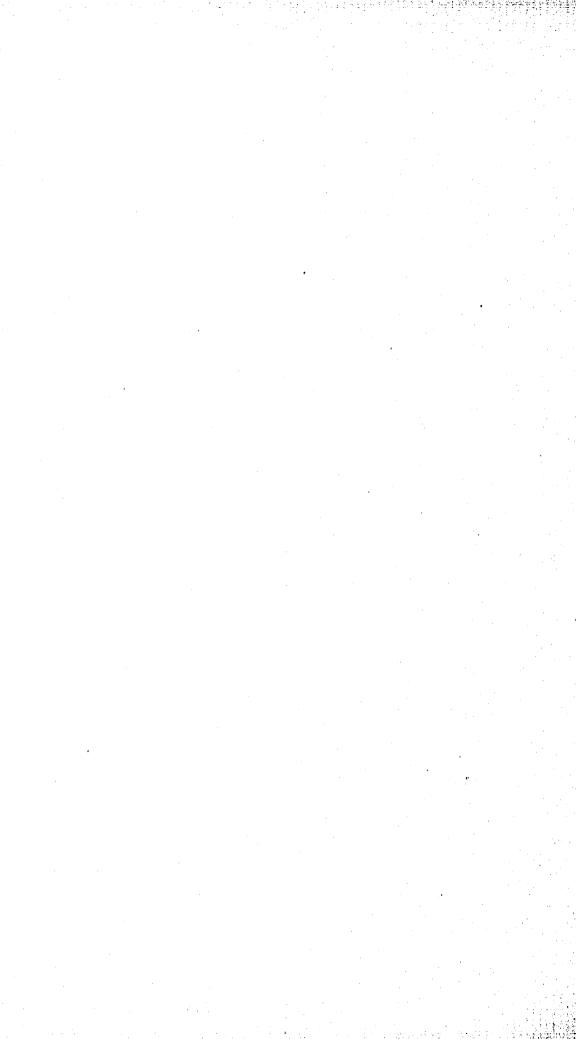

In making their general report to this House, the Committee on Education inadvertently neglected to notice the subject of military drill in schools, which was brought under their consideration by Dr. Cogswell, whose attention to this and kindred subjects entitle him to the respectful notice of this House.

Your committee were present at the National School on the invitation of Dr. Cogswell, to witness the exhibition by the pupils of that institution of their proficiency in drill. The pupils, of ages varying from ten to thirteen, gave evidence of a proficiency which was quite unexpected by your committee. They are attended by a Sergeant of the Line, who instructs them in the principal primary movements taught in military drill. It was impossible to see these youths going through their evolutions, without being satisfied of the value and importance of this branch of education.

The physical exercise which the drill involves, the habits of order and discipline which result from it, and the improvement in tone and manner which marks the appearance of the pupils, show forcibly the value of this addition to the ordinary school instruction, while the importance as a national method of early instructing the youth of the country in exercises of this kind, give an additional value to it.

Your committee, without being prepared to suggest the course which ought to be pursued to introduce this system, feel it right to call the attention of the House to the subject.

A. G. ARCHIBALD, Chairman. S. L. SHANNON, WM. CHAMBERS.

The remaining charges are severally of small accounts	0
for cab hire, turnips, carting and truckage, tobacco	
tea, glass, &c., amounting to	\$781 613
In calling the attention of the House to the charges—	
For groceries, provisions, &c., to	\$1331 31
And ox heads, &c., to	<sup>*</sup> 595 85
Making,	\$1926 16

the committee recommend, from regard to economy as well as to the health and appetite of the convicts, that potatoes be occasionally substituted in the place of the hard biscuit and bread now used for the diet of the convicts.

In order to render such an establishment as much as possible self-sustaining, the committee think that the shoemaking department does not exhibit the returns that should be expected. They find that Mr. Yates has the contract for all the boots and shoes made, at 3s. 6d. for double soled boots, 3s. for single boots, mens shoes at 2s. 6d., girls' do. at 2s. and 1s. 6d.—he supplying all materials. The boots and shoes are well made, under a skillful foreman. Judging by the market prices of these articles, the committee believe the contractor has very large profits.

The whole returns of this branch for the year, amounts to
While the charges for salary and materials, are

\$982.84
1047.44

Leaving this branch Dr., \$64 60 besides the boarding of the convicts employed in it.

The suggestion of the last committee have been adopted in providing better accommodation for the workmen, and a large stone building is erecting for this purpose, which appears substantial and well designed.

The committee find the main building unfinished, and in bad condition, and advise that it be repaired and finished as soon as possible. From the leakings in the roof and windows, &c., the easings and frames are decayed, and many of them rotten, and the rooms are much injured thereby.

The ventilation is very defective, and the atmosphere disagreeable and unwholesome; and the committee recommend that such improvements be made as will
remedy these evils. They believe it can be done at a small expense. They also
recommend additional arrangements for warming the building; and the erection
of a back stairway for the women convicts from their rooms and other rooms, and
to connect with the hospital, as the front hall must now be used for all purposes
of passage from those rooms; also that a water pump and pipe connecting the
kitchen with the well in the yard, be placed there, especially as a security against
fire. They also recommend that a cellar window be placed in the underground
room appropriated to keeping vegetables and other provisions.

The health of the convicts is apparently not good, owing, as the committee

believe, to the bad atmosphere of the cells, and to the nature of the diet, which is

substantial enough, but requires change occasionally, as above suggested.

The committee observe that the great majority of the convicts are young men, evidently without any moral training or education whatever. That others can read, and appear intelligent; they desire books and instruction, which might be afforded them daily for a short time at a little cost; and the committee regret that this most essential part of a corrective discipline, which they recommended last year, has not been attended to.

A large number of the convicts being Catholics, they do not attend the religious services of the Chaplain. The committee recommend that a proportionate sum be given to a clergyman of that church, to afford them like opportunities of religious

worship.

The prisoner No. 409 is hopelessly insane—is confined to his cell, and suffering much in health from confinement and impure atmosphere. The committee earnestly advise, in accordance with the suggestions of the Medical Superintendent, that he be forthwith removed to the Asylum at Dartmouth.

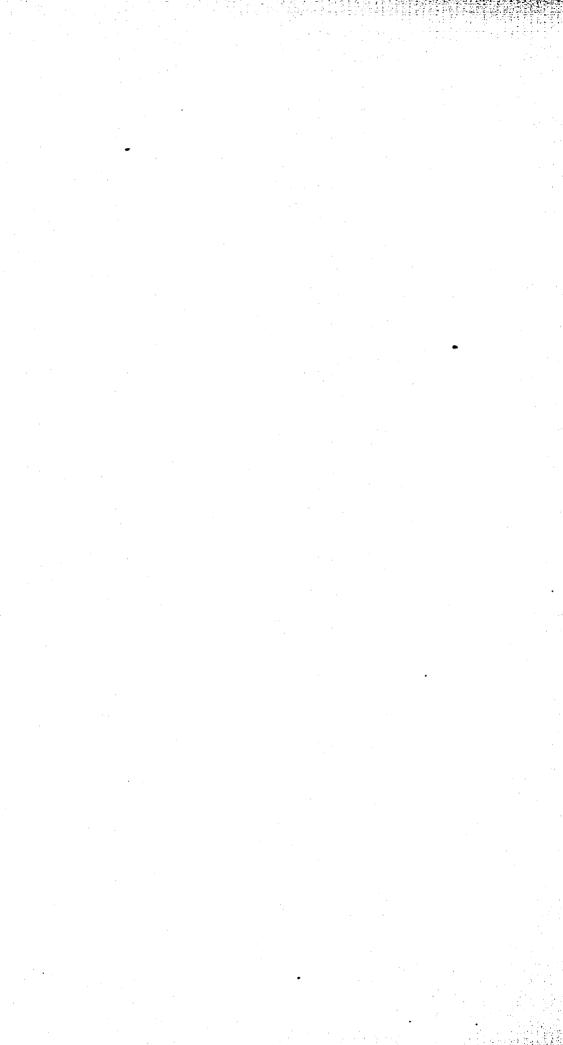

The committee approve of the cleanliness, order, and management, of the pre-

sent Superintendent and Matron.

All which is respectfully submitted.

CHAS. F. HARRINGTON, Chairman.

EZRA CHURCHILL, ANDREW COWIE, HENRY BAILEY, THOMAS CALDWELL, A. W. McLELAN, W. O. HEFFERNAN.

#### APPENDIX No. 36.

# REPORT OF COMMITTEE ON SETTLEMENT OF CROWN LANDS.

[Adopted 23rd April, 1863.]

The Special Committee on Crown Land Property beg leave to report

That they have ascertained that the ungranted lands of the Province are about —,000 acres, of which about 770,000 are capable of cultivation, and which, if opened up to purchasers by roads intersecting, might be made available to a large extent to rapid settlement; 620,000 of these belong to Nova Scotia Proper, the remaining 150,000 acres to Cape Breton Island. Of these cultivable lands for cultivation—

		acies.
The County of	f Annapolis has, in large blocks,	100,000
	Colchester, do.,	25,000
	Cumberland, do.,	75,000
	Guysborough, do.,	80,000
•	Hants, some isolated,	35,000
	Kings, in large tracts,	55,000
	Lunenburg, do.,	80,000
	Pictou, do.,	37,000
	Shelburne, in tracts of moderate size,	20,000
	Halifax, somewhat isolated,	45,000
	Queen's, more do.,	8,000
	Yarmouth, mostly adjoining Digby,	15,000
	Sydney, in small tracts,	6,000
	Digby, isolated.	40,000

The 150,000 acres in Cape Breton are in small blocks, the largest from 1000 to 5000, and mostly occupied by squatters.

The committee are informed that these tracts are exposed to the depredations of trespassers continually, and their valuable forests destroyed wherever accessible; on much so that their value becomes daily less, and purchasers are not frequent. The want of roads through these tracts, by which parties could conveniently take up lots, and at once have easy communication with the nearest highways, deters many persons desirous to settle.

The committee are assured that if lines of roads were judiciously laid out and opened up through these tracts, so as to afford the uses of a highway to settlers, many lots would be speedily taken up and settled on, which must otherwise remain long unpeopled and unprofitable to the country, and subject to the ravages of trespassers. The system of intersecting large tracts of unoccupied lands, in like condition in the United States, preparatory to settlements, has been adopted with signal success. Your committee believe that if the same course were adopted in this province, it would soon add largely to the resources and population of those counties possessing such tracts, especially of Annapolis, Kings, Colchester, Cumberland, Guysborough, Digby, Lumenburg, Halifax, Hants, Pictou, and Shelburne.

The committee consider that they cannot too earnestly impress upon the Government the importance of this subject, with a view to the remedying of the evils that now exist, owing to such large tracts of lands interposed between the settled parts

of the province, obstructing its improvement, rendering the main roads through them expensive and difficult to sustain, and being subject to daily plunder of the best timbers thereon. The committee therefore recommend that lines of roads be run out through those principal tracts of crown lands adapted for the location of purchasers, and connecting with the roads and settlements in the vicinity; regard being always had to making these roads in the most level and judicious routes for permanent roads, without respect to right angles or fixed courses; and that the nett incomes derived from any grants in such tracts, or such other sums as the Government may grant, be applied wholly to finishing such roads where most necessary, as soon as may be practicable.

The committee call attention to the large tracts of ungranted lands in Hants, lying directly on the South side of the Railroad, about ten miles from Windsor. This tract comprises about 35,000 acres, and extends to Ardoise Hill, and which if opened up to settlement by roads, would soon add materially to the prosperity of the country and the advantage of the railroads. They also call the attention of the Government to the large tract in King's county, situate between Lake Paul

and Sherbrooke road.

All which is respectfully submitted.

A. McNUTT COCHRAN.

April 22, 1863.

# REPORT OF COMMITTEE ON CROWN LANDS.

[Adopted 23rd April, 1863.]

The Committee on Crown Lands, beg leave to report:

1st. On the petition of D. & A. McDonald, of Whycocomagh, complaining of the decision of the Government respecting a grant to Wm. Murray, your committee are of opinion that the decision in this case was just, and that Mr. Murray should receive a grant of sufficient land adjoining the mill, on the premises owned by them, to secure to him the exclusive use of the water and water-courses connected therewith.

- 2nd. Your committee cannot recommend the petitions of George Card.
- 3rd. The committee have had before them numerous petitions from the inhabitants of various sections of the island of Cape Breton, praying an extension of the time in which they are required to pay for the crown lands occupied by them:

Your committee would respectfully recommend that the Government should extend the time in which the lands of the squatters in that island are to be paid for, to five years, and that no interest should be charged.

- 4th. On the petition of G. W. Dupe, your committee having examined the parties interested, and having personally inspected the premises referred to, are of opinion that the decision of the Government in this case was just and reasonable.
- 5th. The committee are of opinion that a free grant of one hundred acres of land should pass to Mary McCuash, of River Dennis, the widow of an old soldier; and also that a free grant of one hundred acres pass to Andrew Gilmore, of the county of Annapolis, a discharged soldier.

They also recommend that a similar grant pass to Louis Rissie, John Kearns, and James Frost, who claim to be discharged soldiers, upon satisfactory evidence being furnished to the Government that these persons have been engaged for at least five years as soldiers, and are now of good moral character.

The committee recommend a free grant of one hunered acres of the land on which he is settled, to Alexander McDonald, a deaf mute, residing in the rear lands of Low Point; and that a similar grant pass to Angus McDonald, of Middle

River Mountain

The committee have carefully examined the papers referred to them, respecting the proposed water grant to J. V. N. Hatfield, Esq., at Tusket. The principal matter in dispute has been amicably adjusted by the parties interested; and the committee recommend that Mr. Hatfield receive the grant of the water lot in front of his western lot in Tusket, in the manner and to the extent already recommended by the Government.

Halifax, April 24th, 1863.

### REPORT OF COMMITTEE ON PETITION OF P. LONERGAN.

[Adopted 24th April, 1863.

The Committee to whom was referred the petition of Patrick Lonergan, beg leave to report:

That the committee have heard Mr. Lonergan, and examined the papers and plans connected with his complaint, and are of the opinion that the Government were fully justified in declining to grant to Mr. Lonergan the lot in question.

The committee are also of the opinion that the Government did no injustice to Mr. Lonergan, in refusing him the grant of lands applied for by Mary Thompson.

SAMUEL CHIPMAN, H. BLANCHARD, WM. H. TOWNSEND.

<sup>\*</sup> Except so far as relates to the last clause.

# APPENDIX No. 37.

# REPORT OF COMMITTEE ON INDIAN AFFAIRS.

[Received 1st April, 1863.]

The Committee on Indian Affairs have had before them the report of the Chief Commissioner, accompanied by a report of Whitman Freeman, Esq., respecting the Indian lands in Queen's county; also various other petitions and documents—upon which they beg leave to report as follows:—

Your committee observe the resignation of Capt. Chearnley as Indian Commissioner, whose gratuitous and efficient services deserve their acknowledgment. His successor, the Commissioner of Crown Lands, has since performed the duties of the office, and we approve of the business relating to Indian affairs being conducted by that officer.

The carefully prepared and elaborate report of the Commissioner has been under the consideration of your committee, and many of the suggestions contained therein

are adopted in this report.

In the distribution of blankets, and any other aid for Indians, your committee would recommend that due regard shall be paid to the number of Indians in each county, as far as it can from time to time be ascertained.

The sum of \$144.66 unexpended at the end of 1862, to be added to the general

grant for this year.

The committee consider it necessary and desirable that discretionary power be granted to the Commissioner to relieve cases of distress among the Indians, and were seed would be preferable to blankets, provision should be made to supply those wants, through the medium of a competent agent in the several districts.

The committee are of opinion that the Commissioner of Crown Lands is the proper person to have the control and management of the Indian lands throughout

the Province.

Your committee approve of the arrangement made in the exchange of certain lands in the county of Cumberland, and hope that the necessary steps will be taken, to settle the Indians upon them, and secure their possession by such instru-

ment in writing, as shall be approved by the Crown officers.

In the report of last year, the Committee on Indian Affairs noticed the fact that although Pictou contained the largest Indian population of any county in the Province, there was no Indian reserves in the county. In order to provide a home, and encourage the settlement of the Indians, we recommend the purchase of a lot of land for their exclusive benefit, to be vested in the Commissioners as in other counties, the payment to be made from the general Indian fund, at their credit with the province. The appointment of a suitable person in the county to conduct the purchase, your committee think desirable, provided it can be done without expense.

Mr. Freeman's report, with petition, on Indian reserves in Queen's county, have been considered, and your committee recommend the same rules and regulations now in force in Cape Breton respecting the Indian lands, be extended and applied to Queen's county. To carry out these regulations, it would be desirable that the Commissioner or his deputy should visit the lands, and put such of the

Indians as are disposed to settle in possession of a lot; and such portions of the land as are not required for their use, to make sale of to the best advantage—

adding the proceeds to the present Indian fund in the treasury.

The committee do not think it necessary to enter into details with reference to the policy now being pursued for the settlement and disposal of the Indian lands. The course pursued by the Commissioner, and Mr. Hendry, the principal surveyor of the department, is detailed in the reports, and is tending towards a satisfactory settlement of a troublesome business, especially in Cape Breton.

A plan shewing a town plot laid off in lots at Whycocomagh, in the county of Inverness, has been submitted to your committee, and also the prices affixed to the

lots. We recommend their adoption.

A plan has also been submitted, describing the division of the Indian lands in the county of Victoria, held by squatters, with the prices affixed to each. There is a prevailing opinion in that county, that the prices are entirely too high. They were fixed by Mr. Hendry, who has visited the place, and who is of opinion that the prices are reasonable, and can be easily obtained. We do not consider it our duty, therefore, to recommend any reduction, more especially as in dealing with property of this description, we think that the interest of the Indians ought to be protected, and the full value obtained for such portion of their lands as may be taken from them.

Mr. Hendry has brought to the notice of your committee, that there is a tract of land in the vicinity of Sydney, C. B., which is not occupied by the Indians, and suggest that the same should be divided into lots, either for the purpose of settlement by the Indians, or sale. We recommend that steps be taken to ascertain the most advisable course to be pursued, and that the land be dealt with as in other cases.

From the sale of Indian lands already surveyed, the sum of \$4813 will probably be realized. Of this amount there has already been paid into the treasury,

\$1549.16. A much larger sum is expected during the present year.

It is the sincere desire of your committee to aid the Commissioner by every means they can suggest, in his efforts to induce the Indians to settle on the lands laid off and subdivided for that object; but in accomplishing so desirable an object there are many difficulties to contend with, in order to overcome their prevailing habits. Success is doubtful. It is a duty, however, to make the effort.

All which is respectfully submitted.

WILLIAM ROSS, Chairman.

# APPENDIX No. 38.

# REPORT OF COMMITTEE ON MINES AND MINERALS.

[Adopted 27th April, 1863.]

The Committee on Mines and Minerals, to whom were referred the petitions of Donald McDonald and James McNiel, of Glace Bay, C. B.; that of certain inhabitants of Little Bras d'Or, C. B., and that of John D. Nash and others, beg leave to report as follows:

- 1. On the petition of Donald McDonald and James McNeil, alleging that Messrs. Archbold & Co. had received more than a mile square, or 640 acres, in the lease granted to them, and that they had applied in vain for a lease of the excess, which they allege to be 311 acres, and praying a lease thereof. The committee have ascertained the following to be the facts:—That at the time of the lease to Messrs. Archbold & Co., Mr. F. LeCain had been granted a right to search over the ground included in such lease, and that such right of search was anterior to any application by the petitioners; that in consequence of conflicting claims having thereupon arisen between the petitioners and Mr. LeCain, the whole matter was referred to the Commissioner of Crown Lands, who reported the foregoing state of the question; that, accordingly, a lease was granted to Mr. LeCain of the excess now sought by the petitioners, and such lease being now outstanding, the committee cannot recommend the prayer of the petitioners.
- 2. On the petition of the inhabitants of Bras d'Or, C. B., in which the petitioners claim that the course and line of the reservation to the General Mining Association embraces too large an area, and praying that a survey be had of such reservation; and on consideration of the circumstances attending the last survey, the committee would recommend that the Government do inquire into the matter, and if necessary, take steps to retrace and define the lines of the reservation to the General Mining Association.
- 3. On the petition of John D. Nash and others, praying the adoption of measures to establish an assay office, your committee are of opinion that it is not advisable at the present time to create any public office of the character referred to.
- 4. The committee, in the performance of their duties, have had under consideration, certain papers relating to the claim of Donald A. Holmes of Isaac's Harbour, in respect of lot No. 70, area class No. 1, in the west division of Isaac's Harbour Gold Fields. The committee have to report on these papers, that the parties contending with Mr. Holmes having addressed a letter to the Chief Gold Commissioner to the effect that they have concluded to abandon all claim to the lot in question, the committee did not deem it necessary to enter upon any particular investigation of the papers referred to them, and recommend that the requisite lease be passed to Mr. Holmes, and any monies paid by the opposite party be either refunded or credited to them in their accounts in respect of other areas.
- 5. The committee beg to call the attention of the House to the necessity of all lessees of coal mines throughout the province being required to furnish, for the office of Inspector of Mines, a plan, illustrating the method of working, and system

of ventilation adopted in their respective mines, whenever required to do so. It is of the utmost importance, both to the public interest and to the interest of the proprietors of coal mines, that the method of working and system of ventilation, should be those best adapted to the local peculiarities of their respective mines; order and regularity being no less essential to the safety of a mine, than to the economical and profitable working of it. The utmost attention should be paid to those arrangements of the mine upon which the health and lives of the workmen depend; and the nature of the accidents to which any particular mine may be most liable, should be ascertained, in order that means may be easily adopted to prevent their occurrence.

From surveys and plans of the underground workings of the greater number of the new coal mines opened in the Island of Cape Breton, made with great care and much labor during the past year, it appears that mining operations, so far as they have proceeded in these mines, are irregular, unsystematic, and incapable of being largely extended, without endangering the safety of mines and the health

and lives of the miners.

It is to be regretted that the Inspector of Mines has not been able to induce the agents of the General Mining Association to furnish plans of their methods of underground working and ventilation.

The foregoing views have been brought to the notice of the committee by the communication of Mr. Hendry to the Inspector of Mines, and are, in the opinion

of the committee, deserving of great consideration.

6. The committee have had under their consideration that part of the report of the Inspector of Mines, in which he recommends some alterations in the existing rules and regulations. Your committee think that the laws already in force give sufficient authority to the Governor in Council for the above purpose, and have no doubt that such necessary changes will be adopted as the growing importance of the Mines and Minerals of the province, and the past experience of the management may justify, upon their being made acquainted with the particulars upon which the Inspector of Mines shall think the alterations are called for, and with these views they recommend the subject to the consideration of the Government.

All which is respectfully submitted.

STEWART CAMPBELL, Chairman. JOSEPH HOWE, THOMAS CALDWELL, JOHN TOBIN, ALEX. MACFARLANE, A. CAMPBELL, A. G. ARCHIBALD.

Committee Room, April 25, 1863.

# APPENDIX No. 39.

# REPORT OF COMMITTEE AS TO EXAMINATION OF SHIPMASTERS.

[Adopted 25th March, 1863.]

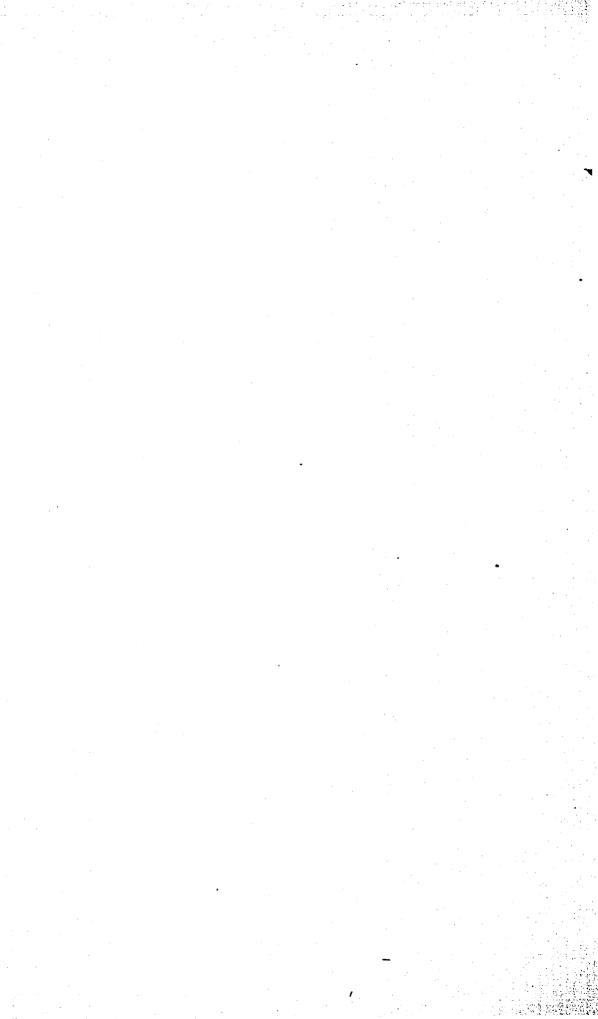

The Committee to whom has been submitted the subject of the Examinations of Shipmasters and Mates by Boards of Examiners in the Colonies, beg leave to report as follows:

That your committee having fully considered the matter submitted to them, beg to recommend that the Government of this Province enter into correspondence with the Governments of Canada, New Brunswick, and P. E. Island, for the purpose of inviting their co-operation with this Government in conducting a correspondence with the Home Government, in order to ascertain whether the Imperial Authorities would be willing to recognise certificates issued from Boards in the Colonies, or to appoint Boards of Examiners in the Colonies wholly under their own control, whose certificates shall have the same effect as if the examinations were held in the Mother Country.

And they further recommend, that the fifth section of chapter forty-two of the acts of 1858, entitled, an act to extend to this province certain provisions of part third of the Merchants Shipping Act of 1854, be repealed.

All of which is respectfully submitted.

EZRA CHURCHILL.

### APPENDIX No. 40.

# REPORT OF MILITIA COMMITTEE.

[Adopted 23rd April, 1863.]

The Committee on Militia Laws beg leave to report:

Your committee have learned with regret that Lieut.-Colonel Laurie, Inspecting Field Officer of the Nova Scotia Militia, having been recalled by the Imperial Government, is about to leave the province and return to England. Your committee cannot allow Colonel Laurie to retire from this service without expressing their high appreciation of the zeal and courtesy which has marked his connection with the volunteers and militia of this province, and their entire approbation of the manner in which he has discharged his duties.

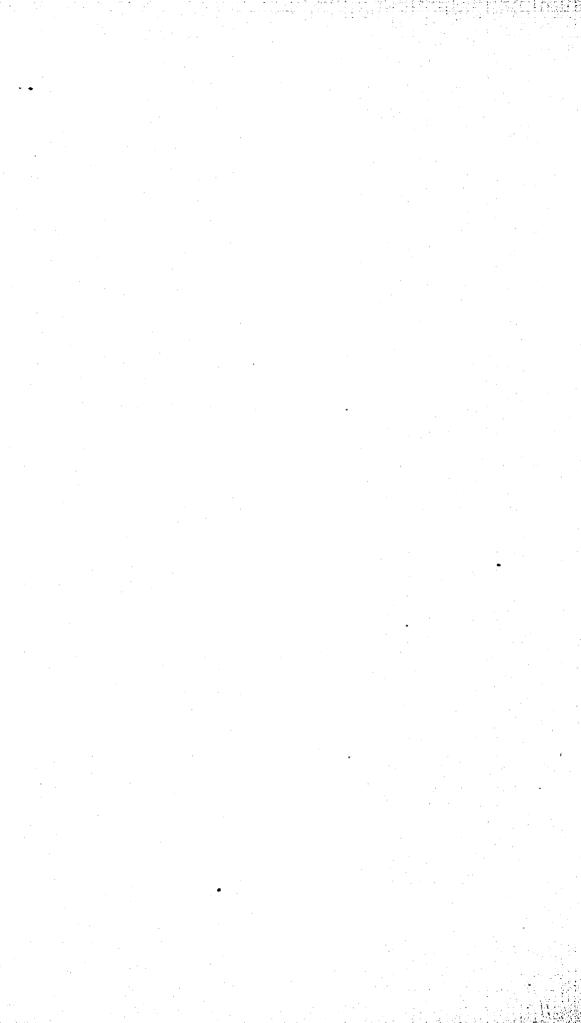

Your committee recommend that a sum not to exceed four thousand dollars, be placed at the disposal of His Excellency the Lieutenant Governor, for the purpose of erecting an armory at Halifax.

Your committee cannot recommend the petitions from certain inhabitants of Digby county, praying to be relieved from militia duty. The committee, while highly approving the zeal and activity of Captain James Stuart, Acting Adjutant Second Battalion Digby Regiment, N. S. Militia, regret that they cannot recommend the prayer of his petition.

While your committee are of opinion that to effect a thorough enrollment of the Provincial Militia, it is absolutely necessary that they should be called out for drill, yet they would respectfully recommend that as short a period as possible be appropriated to Battalion Drill, and that in the more thickly settled localities, companies should be encouraged to meet frequently for drill.

HIRAM BLANCHARD, Chairman. SAMUEL CHIPMAN, AVARD LONGLEY, W. O. HEFFERNAN, W. A. HENRY, HENRY PRYOR.

Committee Room, April 13th, 1863.

# APPENDIX No. 41.

# REPORT OF RAILWAY COMMITTEE.

[Adopted 29th April, 1863.]

The Railway Committee beg leave to report that they have heard evidence on the petitions of Joseph Blackburn, Dougald McLachlin, and John Lowe, praying that they might be paid for cattle killed upon the railway; and they recommend that hereafter all such cases be heard and determined by the Chairman of the Railway Board, whenever an accident occurs, that the parties, if they have just claims, may be paid promptly, and, if they have not, that the Government may be in a condition to resist their applications to the Legislature. They recommend that the Board be instructed to pay to—

Joseph Blackburn, - - - - \$24 Dougald McLachlan, - - - 48 John Lowe, - - - 80

They also recommend the payment of \$50 to Dr. Bent, for attendance on a

deaf mute injured on the Railway.

The committee cannot entertain the claim of James Faulkner, unsupported by any proof that he was injured in the service, nor that of Charles R. Fairbanks for surveying alleged to have been done twelve years ago. Joseph Sutherland, though summoned, has never appeared in support of his petition.

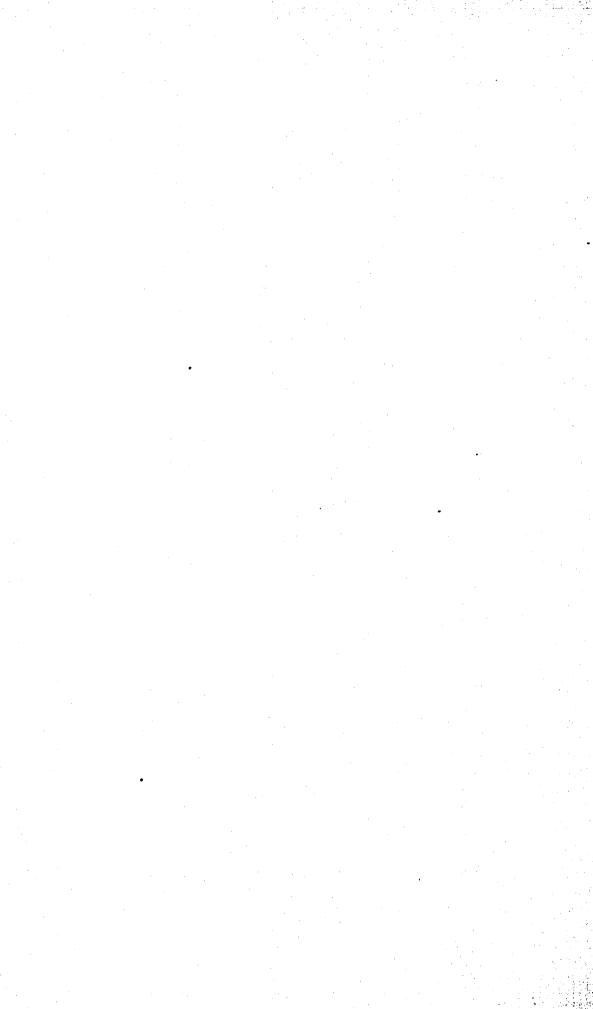

The claim of Robert Gould and others, has been referred to the Chairman of the Board, by whom alone it can be investigated. All such claims should be promptly

adjusted or firmly resisted on the responsibility of the Government.

All which is respectfully submitted.

JOSEPH HOWE, W. A. HENRY, JOHN TOBIN, W. O. HEFFERNAN.

April 29, 1863

### APPENDIX No. 42.

# REPORT OF COMMITTEE ON LUNENBURG LAND CLAIMS.

The Committee to whom was referred the papers touching the Lunenburg land claims, beg leave to report:

That your committee have carefully examined all the papers connected with this matter, and have heard the allegations of Messrs. Dickie and Tupper, two of the parties claiming compensation, Mr. Lawson, the Deputy Surveyor, and others.

Your committee have from such examination, derived the following facts:

That the original memorandum of agreement was not signed by any person on the part of the Government—did not contemplate the laying off larger lots than the size therein specified, and does not in any manner apply to the larger lots since laid off.

That when orders were given to lay off the larger areas, such orders were accompanied by a distinct intimation that the owners should receive "one-fifth the amount charged by the Government, provided he gave his assent to the working of the mines."

That such orders and the intimation referred to were publicly posted up at the Ovens, and inspected and read by hundreds of persons, and that John Misgner, one of the owners, had distinct and personal intimation from one member of government, that the larger lots would not be paid for in the same proportion as the smaller.

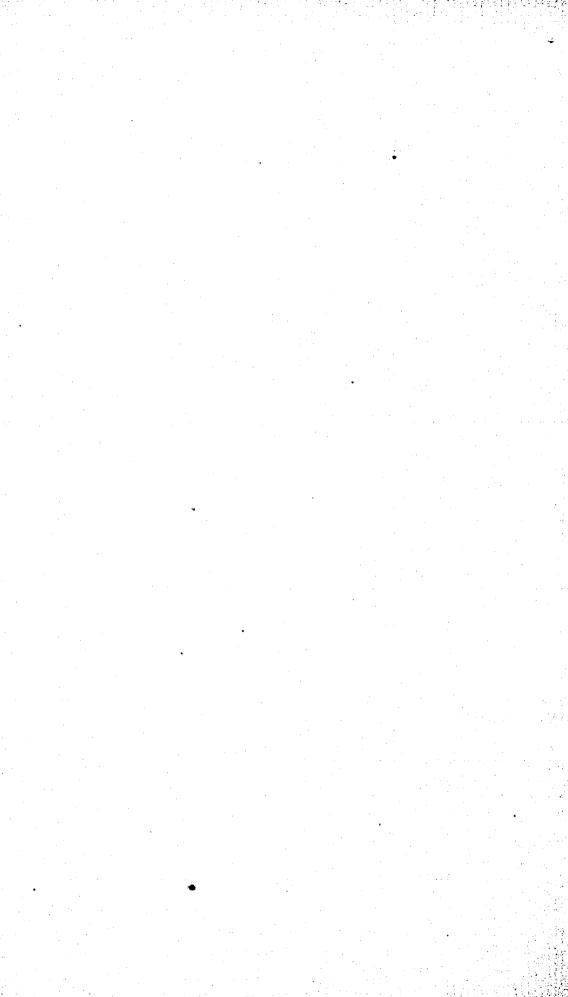

Your committee, under these circumstances, are unanimously of opinion that the parties owning the lands in question were not entitled to be paid at the rate of four dollars for each lot of  $32 \times 30$  feet, contained in the lands laid off in larger areas.

HIRAM BLANCHARD, Chairman. WILLIAM ROSS, JOHN V. N. HATFIELD, WM. CHAMBERS, A. M. COCHRAN.

Halifax, April 17th, 1863.

The subscribers, while concurring in the above report, are of opinion, that the Government having referred this matter to arbitration, should not be placed in a better position than a private individual, and ought either to pay the parties the amount awarded, or allow them to sue on the award in the Supreme Court

A. M. COCHRAN, WILLIAM ROSS.

# APPENDIX No. 43.

# REPORT OF COMMITTEE ON LOSS OF SCHR. GIPSEY.

[Adopted 1st April, 1863.]

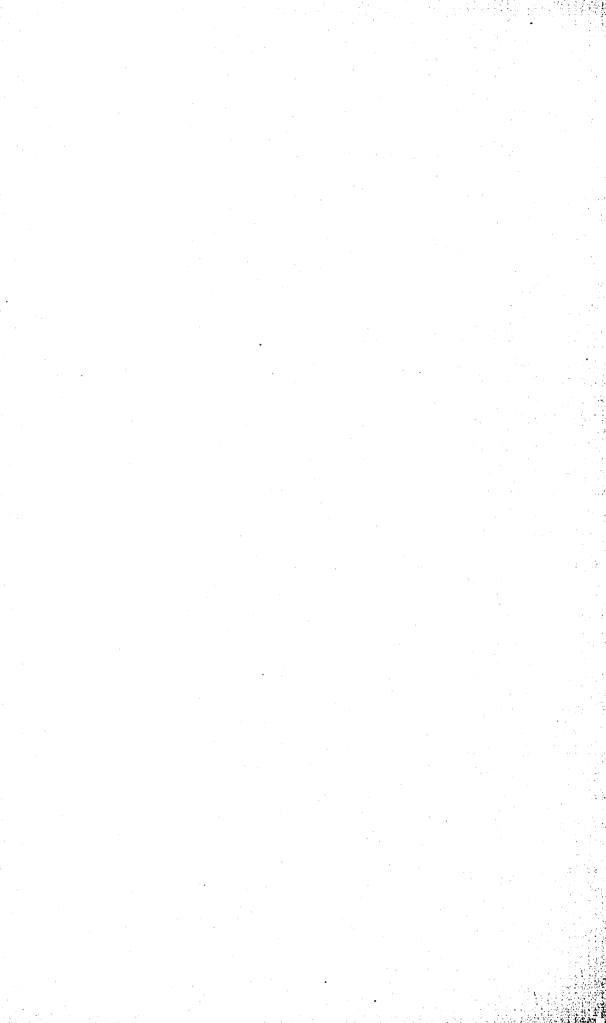

The committee appointed to investigate the circumstances connected with the loss of the schr. Gypsey, of Maitland, beg leave to report—

That the noble conduct of Thomas E. Gilliatt, master of the brigt. Conductor, of Yarmouth, in rescuing J. Graham, master, and S. H. Stockton, mate, only survivors of the schr. Gypsey, induces this committee to recommend that the sum of one hundred dollars be granted and appropriated to the purchasing of a Gold Watch, to be presented to the said Capt. T. E. Gilliat; and that the sum of forty dollars be distributed among the officers and crew.

All of which is respectfully submitted.

MOSES SHAW, Chairman.
A. M. COCHRAN,
THOMAS KILLAM,
EZRA CHURCHILL,
THOMAS F. MORRISON.

Committee Room, March 30, 1863.

# APPENDIX No. 44.

# REPORT OF COMMITTEE ON PRIVILEGES.

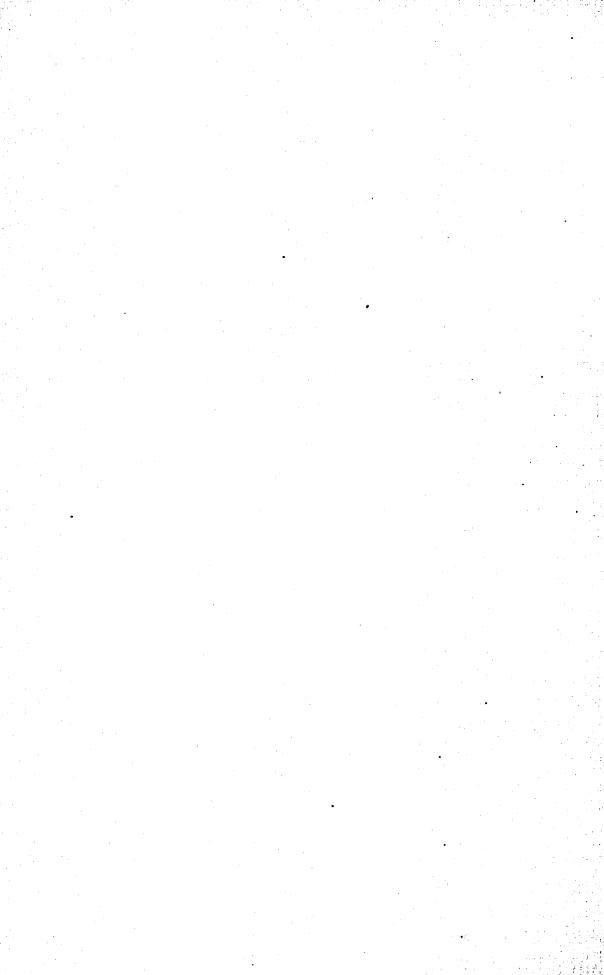

[Adopted 4th April, 1863.]

The Committee of Privileges to whom the bill of the Legislative Council, to secure the purity and more orderly conducting of elections, was referred, beg leave to report:

That your committee feel themselves largely influenced by the precedent on this subject, to be found in the Appendix to the Journals of 1860, page 223. Your committee following the above precedent and the precedent of the House of Commons quoted in that report, recommend that the bill from the Legislative Council, should be suffered to drop, and that this House, if they should deem it expedient, should themselves originate a bill for securing the purity and more orderly conducting of elections.

H. BLANCHARD, Chairman.

Halifax, April 1st, 1863.

# APPENDIX No. 45.

# REPORT OF COMMITTEE ON MEMORIAL OF DANIEL MOSHER AND OTHERS.

[Received 16th March, 1863.

The committee to whom was referred the petition of Daniel Mosher and others, complaining of obstruction offered to countrymen in the sale of hay within the limits of the city of Halifax, beg leave to report as follows:

That your committee have ascertained that on the 13th of February instant, the following resolution was adopted by the City Council:- "Resolved, That carts, waggons or sleighs, with hay, straw, &c., be not permitted to obstruct the streets of the city, or stand or remain thereon waiting for a purchaser. And be it further resolved, That until a purchaser is obtained the said vehicles shall remain at Keating's Country Market, or such other places appointed for the weighing of hay, &c., as can afford the requisite space for their accommodation." Your committee believe such bye-laws to be at variance with the powers intended to be conferred on the city authorities under its Act of Incorporation; and imposes unjust and illegal restrictions upon countrymen frequenting the city markets; that by section 84 of the Incorporation Act of the City of Halifax, no bye law of the city shall take effect until approved or confirmed by the Governor in Council; and your committee find on application at the Provincial Secretarys office, that the resolution above set forth has not received such approval or confirmation. Your committee therefore consider the action of the city authorities in enforcing a bye law not sanctioned as required by the Act of Incorporation, as both oppressive and illegal, and deserving the reprehension of this House. Your committee further report, that in their opinion Keating's Country Market is not a suitable place, from its location at the northern end of the city, for the exclusive sale of hay, nor does it afford accommodation sufficient for that purpose. Your committee consider it to be the duty of the City Council to provide the necessary accommodation, in some central and convenient part of the city; and until the same is provided, and the locality satisfactorily sanctioned, they trust that the bye law above set forth will not receive the sanction of the Governor in Council, and that farmers bringing hay or straw for sale may be entitled to use the streets of the city as heretofore.

> WILLIAM CHAMBERS, ALEX. MACFARLANE, SAMUEL CHIPMAN.

### APPENDIX No. 46.

### REPORT OF COMMITTEE ON INVERNESS STATUTE LABOR BILL.

[Adopted 22nd April, 1863.]

The committee appointed to investigate the objection made to the working of the Statute Labor Law in certain counties, beg leave to report:—

That finding the law as it now stands contains a clause exempting from its operation the counties of Cape Breton, Inverness, Victoria, Digby, and Cumberland, your committee recommend that no action be taken respecting the law during the present session, with this exception, that the county of Lunenburg, having through its Sessions Court memorialised this House on the subject, your committee recommend that it be placed on the same terms of exemption as the aforenamed counties.

JOHN L. BROWN, Chairman.

### APPEALS TO PRIVY COUNCIL.

(COPY.)

No. 13.—Legislative.

Government House, Halifax, N. S., 12th February, 1863.

MR LORD DUKE,-

I have the honor to bring under your Grace's consideration, a letter which has been addressed to me by the Attorney General on the subject of appeals from the Superior Courts of Nova Scotia to Her Majesty in Council.

By this letter it would appear that no regulations have ever been laid down as regards appeals from the judgments of the Supreme Courts of this Province under the provisions of the Imperial Act of Parliament, 7 and 8 Victoria, chap 59.

An order in Council having passed on the 27th November, 1852, making the necessary regulations on the subject for New Brunswick, which it would seem would be applicable to the circumstances of this Province, I have to request that your Grace would be good enough to take such steps as may be necessary to procure the passing of a similar order for Nova Scotia.

I have, &c.,

(Signed)

MULGRAVE.

His Grace the Duke of Newcastle, K. G.

No. 25.

Downing Street, 2nd April, 1863.

My Lord,—

With reference to your despatch, No. 13, of the 12th February, I have the honor to transmit to you the enclosed order of Her Majesty in Council, of the 20th of March, making provision for appeals to Her Majesty in Council from the Supreme Court of Nova Scotia.

I have the honor to be,

My Lord,

Your most obedient humble servant,

NEWCASTLE.

The Right Hon, the Earl of Mulgrave, &c., Nova Scotia.

At the Court at Windsor, the 20th day of March, 1863.

### PRESENT:

### THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

Whereas by an act passed in the session of Parliament holden in the seventh and eighth years of Her Majesty's reign, intituled, "an act for amending an act passed in the fourth year of the reign of His late Majesty, intituled, 'an act for the better administration of justice in His Majesty's Privy Council, and to extend its jurisdiction and powers," it was amongst other things provided, that it should be competent for Her Majesty, by an order or orders, to be from time to time for that purpose made, with the advice of Her Privy Council, to provide for the admission of any appeal or appeals to Her Majesty in Council from any judgments, sentences, decrees, or orders of any Court of Justice within any British colony or possession abroad, although such Court shall not be a Court of Errors or a Court of Appeal within such colony or possession; and it shall also be competent to Her Majesty. by any such order or orders as aforesaid, to make all such provisions as to Her Majesty in Council shall seem meet for the instituting and prosecuting any such appeals, and for carrying into effect any such decisions or sentences as Her Majesty in Council shall pronounce thereon: Provided always, that it shall be competent to Her Majesty in Council to revoke, alter, and amend any such order or orders as aforesaid, as to Her Majesty in Council shall seem meet.

And whereas it is expedient that provision should be made, in pursuance of the said recited enactment, to enable parties to appeal in civil causes from the decisions of the Supreme Court of the Province of Nova Scotia to Her Majesty in Council,

the same not being a Court of Error or of Appeal.

It is hereby ordered by the Queen's most Excellent Majesty, by and with the advice of Her Privy Council, that any person or persons may appeal to Her Majesty, Her heirs and successors, in Her or their Privy Council, from any final judgment, decree, order, or sentence of the said Supreme Court of the Province of Nova Scotia, as a Court of civil judicature, or as a Court of revenue or of escheat, in such manner, within such time, and under and subject to such rules, regulations, and limitations as are hereinafter mentioned; that is to say, in case any such judgment, decree, order, or sentence shall be given or pronounced for, or in respect of any sum or matter at issue above the amount or value of three hundred pounds sterling, or in case such judgment, decree, order, or sentence shall involve directly or indirectly any claim, demand, or question to or respecting property in any civil right amounting to or of the value of three hundred pounds sterling, or in case the matter in question relates to the taking or demanding any duty payable to Her Majesty, Her heirs and successors, or to any fee of office, or other such like matter or things, whereby the rights of Her Majesty, Her heirs or successors, may be bound, the person or persons feeling aggrieved by any such judgment, decree, order, or sentence may, within fourteen days next after the same shall have been pronounced, made, or given, apply to the said Court by motion for leave to appeal therefrom to Her Majesty, Her heirs and successors, in Her or their Privy Council, or if the said Court be not sitting, then by petition to either of the judges of the said Court; and in case such leave to appeal shall be prayed by the party or parties who is or are directed to pay any such sum of money or perform any duty, the said Court or such judge as aforesaid shall, and is hereby empowered either to direct that the judgment, decree, order, or sentence appealed from shall be carried into execution, or that the execution thereof shall be suspended pending the said appeal, as to the said Court or such judge as aforesaid may appear to be most consistent with real and substantial justice; and in case the said Court or such judge as aforesaid shall direct such judgment, decree, order, or sentence to be carried into execution, the person or persons in whose favor the same shall be given shall, before the execution thereof, enter into good and sufficient security, to be approved by the said Court or such judge as aforesaid, for the due performance of such judgment or order as Her Majesty, Her heirs and successors, shall think fit to make upon such appeal; and that in all cases security shall also be given by the party or parties appellant in a bond or mortgage, or personal recognizance, anot

exceeding the value of five hundred pounds sterling, for the prosecution of the appeal, and for the payment of all such costs as may be awarded by-Her Majesty, Her heirs and successors, or by the Judicial Committee of Her Majesty's Privy Council to the party or parties respondent; and that such security as aforesaid for the prosecution of the appeal, and for the payment of all such costs as may be awarded, be completed within twenty-eight days from the date of the motion or petition for leave to appeal, and the party or parties appellant shall then, and not otherwise, be at liberty to prefer and prosecute his, her, or their appeal to Her Majesty, Her heirs and successors, in Her or their Privy Council, in such manner and under such rules as are or may be observed in appeals made to Her Majesty from Her Majesty's colonies and plantations abroad.

And it is further ordered, that it shall be lawful for the said Court, at its discretion, on the motion, or if the said Court be not sitting, then for either of the judges of the said Court, upon the petition of any party who considers himself aggrieved by any preliminary or interlocutory judgment, decree, order, or sentence of the said Court, to grant permission to such party to appeal against the same to Her Majesty, Her heirs and successors, in Her or their Privy Council, subject to the same rules, regulations, and limitations as are herein expressed respecting

appeals from final judgments, decrees, orders, and sentences.

Provided also, that if in any action, suit, or other proceeding it shall so happen that no final judgment, decree, order, or sentence can be duly given in consequence of a disagreement of opinion between the judges of the said Court, then in such ease, the final judgment, decree, order, or sentence may be entered pro forma on the petition of any of the parties to the action, suit, or other proceeding, according to the opinion of the Chief Justice, or, in his absence, of the senior Puisne Judge of the said Court; provided that such judgment, decree, order, or sentence shall be deemed a judgment, decree, order, or sentence of the Court for the purpose of an appeal against the same, but not for any other purpose.

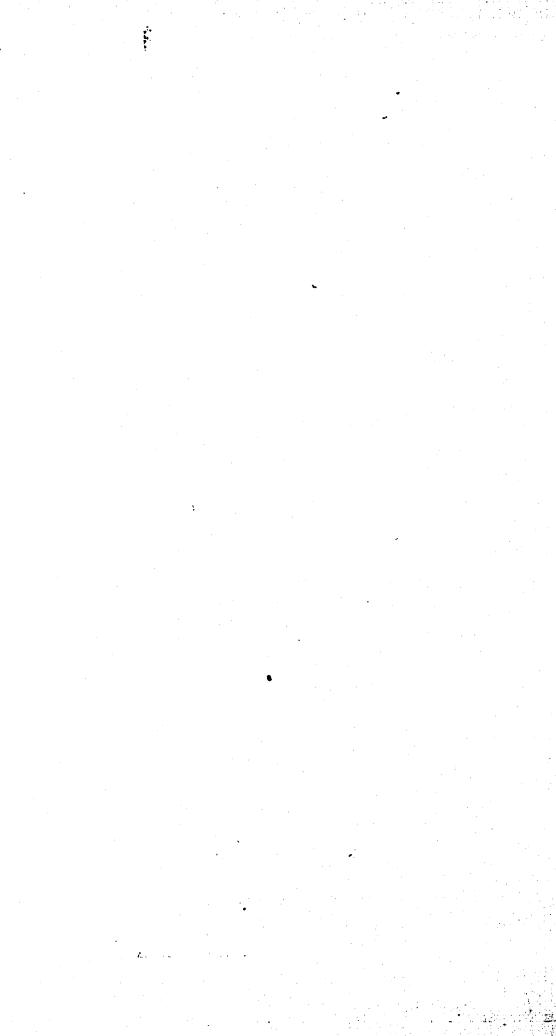

Provided always, and it is hereby ordered, that nothing herein contained doth or shall extend or be construed to extend to take away or abridge the undoubted right and authority of Her Majesty, Her heirs and successors, upon the humble petition of any person or persons aggrieved by any judgment or determination of either of the said Courts at any time to admit his, her, or their appeal therefrom, upon such terms, and upon such securities, limitations, restrictions, and regulations, as Her Majesty, or Her heirs or successors, shall think fit, and to reverse, correct, or vary such judgment or determination as to Her Majesty, Her heirs or

successors, shall seem meet.

And it is further ordered, that in all cases of appeal made from any judgment, order, sentence, or decree of the said Court to Her Majesty, Her heirs or successors, in Her or their Privy Council, such Court shall certify and transmit to Her Majesty, Her heirs and successors, in Her or their Privy Council, a true and correct copy of all evidence, proceedings, judgments, decrees, and orders, had or made, in such cases appealed, so far as the same have relation to the matters of appeal, such copies to be certified under the seal of the said Court; and that the said Court shall also certify and transmit to Her Majesty, Her heirs and successors, in Her or their Privy Council, a copy of the reasons given by the judges of such Court, or by any of such judges for or against the judgment or determination appealed against. And it is further directed and ordained that the said Court shall, in all cases of appeal to Her Majesty, Her heirs or successors, conform to and execute or cause to be executed such judgments and orders as Her Majesty, Her heirs or successors, in Her or their Privy Council, shall think fit to make in the premises, in such manner as any original judgment, decree, or decretal orders, or other order or rule of the said Court should or might have been executed.

And his Grace the Duke of Newcastle, one of Her Majesty's Principal Secreta-

ries of State, is to give the necessary directions herein accordingly.

### APPENDIX No. 49

### CANSO LIGHT DUTIES.

(COPY.)

Government House, Prince Edward Island, 4th February, 1863.

My Lord,-

The House of Assembly of this Colony addressed me in April, 1862, requesting me to give effect to a recommendation, contained in the enclosed report of a special committee, which had considered certain petitions, complaining of a tax levied by the Government of Nova Scotia on vessels passing through the Gut of Canso.

The House of Assembly recommended in that report that a correspondence should be opened with the Government of Nova Scotia, and a proposal made for the payment of a specific sum annually to that Government in lieu of the tax at

present levied on vessels belonging to Prince Edward Island.

I have the honor therefore to request, that you will bring this matter under the consideration of your Government, in order that arrangements may be made during the ensuing session for carrying the proposal of the House of Assembly into effect, in the event of the Government of Nova Scotia approving of it.

I have the honor to be,

Your Lordship's

Most obedient humble servant,

(Signed)

GEORGE DUNDAS, Lieutenant Governor.

The Right Hon. the Earl of Mulgrave, &c., &c., &c.,

(COPY.)

House of Assembly of Prince Edward Island, 1862.

Your committee to whom was referred, in the last session of the Legislatuse, the petition of W. W. Lord and others, merchants and shipowners of this Island, complaining of an oppressive tax being exacted from their ships while passing through the Straits of Canso on their passage to the Atlantic, whether anchoring there, or merely passing through—having given the petition and several matters therein referred to their careful and attentive consideration, have to report:

As regards the right of the Government of Nova Scotia to levy a rate or tax upon vessels of this Island passing through the Gutof Canso, your committee have no doubt upon that point. It is clear that it cannot refuse a passage to such

vessels, because the Straits in question serve for a communication between two seas; its navigation by the established law of nations, is common to all nations; but as the Government of Nova Scotia defrays the expense attendant on the support of Light Houses, &c., it has, in the opinion of your committee, a right to levy a moderate tax upon vessels which do pass through. Thus the King of Denmark requires, or did formerly—until a commutation was effected with foreign nations—a custom or rate on vessels at the Strait of the Sound.

Upon reference to the Revised Statutes of Nova Scotia, chap. 21, your committee find that new vessels leaving the Province, on their first voyage, and intended for sale, are exempted from duty unless they return again, and new vessels cleared on their first voyage after the first day of September, are exempted

from further payment of duty until the first day of April following.

New vessels belonging to this Island, and built for sale, upon their passage through these Straits, are subject to an exorbitant tax of sixpence, Nova Scotia currency, per ton, which being looked upon by merchants engaged in building ships for sale as a partial and excessive tax, is evaded by all new vessels with crews strong enough to resist payment, and by others having the advantage of a strong and fair wind on their passage through.

Your committee submit that the proper way of settling this vexed question would be for the Government of this Island to open a correspondence with the Government of Nova Scotia, with a view of commuting, by the payment of a specific sum annually to that Government, as is already the case with respect to St. Paul's and Scattarie Lights, for the free passage of all vessels belonging to this Island through said Straits, whether they have occasion to anchor therein or not, and report to the House in its next session, the result of such negotiation.

Your committee further submit, that in the event of such an arrangement being made with the Government of Nova Scotia, all vessels clearing from any port in this Island to any port to the eastward of the Straits of Canso, shall be subject to a charge for Canso Light dues, such charge to be fixed by the House, and to be sufficient to defray the annual payment to be made to the Government of Nova

Scotia.

### APPENDIX No. 50.

### POST OFFICE MONEY ORDER SYSTEM.

(COPY.)

No. 48.-Miscella.

Government House, Halifax, N. S., 21st May, 1862.

My Lord Duke,-

I have the honor to enclose an extract from the report of the Post Office committee of the House of Assembly, by which your Grace will perceive that there is a desire, if possible, to enter into arrangements for the establishment of the Money Order system between England and this Province.

Should no insuperable difficulty exist in carrying out this system, it would undoubtedly be of great advantage to this Province, and I should feel greatly obliged to your Grace if you would bring this subject under the consideration of the Post Office authorities of England.

I have, &c.,

(Signed)

MULGRAVE.

His Grace the Duke of Newcastle, &c., &c.,

(COPY.)

Nova Scotia.—No. 191.

Downing Street, 26th August, 1862.

My Lord.—

I have the honor to acknowledge the receipt of your Lordship's despatch, No. 48, of the 21st of May last, and to acquaint you that the Postmaster General has apprised me that the Money Order system between this country and Nova Scotia will be carried into operation, under the same regulations as those that are applicable in the case of Canada, as soon as the necessary preliminaries can be agreed upon between his Lordship's department and the Post Office of Nova Scotia, and that a communication on the subject is about to be addressed to the Provincial Postmaster General.

I have the honor, &c., &c., &,,

(Signed)

NEWCASTLE.

Lieut. Governor the Right Hon.

The Earl of Mulgrave, &c., &c., &c.,

•

### APPENDIX No. 51.

### REVISED STATUTES.

To the Right Honorable the EARL OF MULGRAVE, Lieutenant Governor and Commander-in-Chief in and over the Province of Nova Scotia, &c., &c.

MAY IT PLEASE YOUR EXCELLENCY,-

In conformity with the commission issued by Your Excellency on the 11th day of June last, appointing us commissioners for the revision of the Provincial Statutes, we have applied ourselves to the duty assigned us, and now beg respectfully to submit to your Excellency the result of our efforts in the form accompanying this report, entitled, "The Revised Statutes of Nova Scotia—Third Series."

In comparing the first series enacted in 1851, with the second in 1858, we have, according to our best judgment, corrected and supplied such defects and omissions in the latter, as rendered the text uncertain, contradictory, or void, carefully examining at the same time the acts passed in that interval, and embodying those

subsequently passed up to this time.

Mindful, during this compilation, of the limited power vested in us, we have not failed to observe the necessity of such alterations and amendments in several chapters as the design of the commission evidently required of us, in order to render such chapters more efficient in their operation. These we have accordingly embodied in the appropriate chapters, and now present them for the consideration of your Excellency and the Legislature. They principally refer to the practice of the Supreme Court, the Probate Court, &c., &c. In this branch of our duty we have consulted their Lordships the Chief Justice and other Judges of the Supreme Court, and under their suggestions, most kindly afforded, we have framed certain amendments and introduced several chapters, adopting recent decisions in our own courts, and some English enactments.

The order of the several titles, chapters, and sections of the second series, has, as far as possible, been adhered to in the present series, the only exceptions in such respects being in cases where we considered it judicious to consolidate chapters and sections, and to include subsequent enactments, arranging them consecu-

tively in accordance with the course of proceedings.

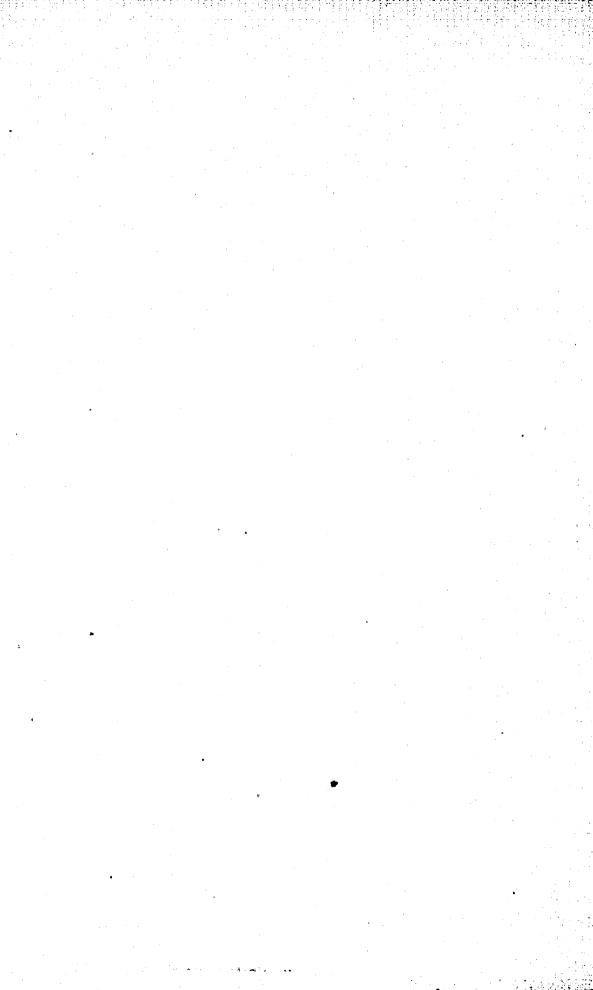

Without abridging the language employed, except when inconsistent with the present compilation, we have reason to hope that this series will not be more bulky than the last.

We have not, for obvious reasons, as yet prepared an index to the work, but await the action of the Legislature upon the series now submitted to enable us to do so.

The Private and Local Acts, in a separate volume, will be shortly submitted. Delay in this respect has arisen from the impossibility of obtaining, as we had expected, the revised volume of such acts, prepared in 1858, as reported by the commissioners of the last series.

All which is respectfully submitted.

STEWART CAMPBELL, CHAS. F. HARRINGTON, H. BLANCHARD.

### APPENDIX No. 54.

### MILITIA.

(COPY.)

Circular 1.—Nova Scotia.

Downing Street, 5th December, 1862.

ŠIR,---

My attention has been called by the Secretary of State for the War Department to the necessity of subjecting every Colonial Militia to the articles of war, and to the provisions of the Mutiny Act, in the event of its being called out for active service.

I annex copies of the provisions of the Canadian militia act by which this object

is effected.

If no corresponding proceedings exist in the militia act of the colony under your government, I have to request that you will bring under the consideration of your advisers the propriety of submitting to the Legislature a bill for this purpose, in the terms of the Canadian act.

I have the honor to be, Sir,

Your most obedient, humble servant,

NEWCASTLE.

The Earl of Mulgrave.

Cap. 35, Consolidated Statutes of Canada—(An act respecting the Militia.)

Section 61.—"The Commander-in-Chief may call out the militia, or any part thereof, whenever it is in his opinion advisable so to do, by reason of war, invasion, or insurrection, or imminent danger of any of them."

Section 76.—"The militia so called out, and every officer or man belonging to it, shall, from the time he has been ordered, taken, or drafted for actual service, be subject to the articles of war, and to the act for punishing mutiny and desertion, and all other laws then applicable to Her Majesty's troops in this Province, and not inconsistent with this act, except that no Militiaman shall be subject to any corporal punishment except death or imprisonment, for any contravention of such laws, and except, also, that the Commander-in-chief may direct that any provisions of the said laws shall not apply to the militia."

(COPY.)

No. 3.-Military.

Government House, Halifax, N. S., 7th January, 1863.

My LORD DUKE,-

Referring to the circular of 5th December, 1862, I have the honor to enclose a copy of those clauses of the militia act, by which the militia are brought

under the provisions of the mutiny act in the event of their being called out for active service.

It appears to me that these clauses confer all the authority required, but should your Grace deem any further alterations necessary, I have little doubt that my Government will be ready to bring them under the consideration of the Legislature, which will meet for the despatch of business early next month.

I have, &c.,

(Signed)

MULGRAVE.

His Grace the Duke of Newcastle, &c., &c., &c.

(COPY.)

Nova Scotia.—No. 13.

Downing Street, 18th February, 1863.

My Lord,-

I have the honor to acknowledge the receipt of your Lordship's despatch, No. 3, of the 7th January last, and to observe to you that the clauses of the Nova Scotia militia act which you quote, subject the militia, when called out, to such of the articles of war as the Governor in Council shall consider applicable, but not to the provisions of the mutiny act.

Her Majesty's Government are therefore of opinion that the act should be altered in this respect into conformity with the Canadian militia act. When thus amended, I shall be prepared to submit to Her Majesty the original and the amending act,

with a recommendation that they should be left to their operation.

I have the honor to be,

My Lord, .

Your obedient servant,

(Signed)

NEWCASTLE.

The Right Honorable the Earl of Mulgrave, &c., &c., &c.

(COPY.)

Circular.—Nova Scotia.

Downing Street, 14th May, 1862.

SIR,-

I transmit to you herewith, a copy of a letter from the War Office, enclosing a copy of the rules and conditions which Secretary Sir George Lewis has adopted for regulating the supply of arms and ammunition to militia and volunteer corps in the different colonies.

I have expressed my entire concurrence in the rules and regulations, and I transmit them, together with the explanatory letter, for your information and guidance.

I have the honor to be, Sir,

Your most obedient humble servant,

(Signed)

NEWCASTLE.

The Right Hon. the Earl of Mulgrave. &c., &c., &c.,

(COPY.)

### SIR E. LUGARD TO SIR F. ROGERS.

War Office, 27th March, 1862.

SIR,-

I am directed by the Secretary of State for War, to acknowledge the receipt of the several letters from the Colonial office, noted in the margin, enclosing applications from Governors and Lieutenant Governors in the West Indies, for arms and ammunition. These requisitions (of which a schedule is annexed) have suggested to Sir George Lewis the expediency of laying down some general and more definite rules than he finds to be at present in existence.

It would appear that small arms, ordnance, ammunition and other military stores, have since the year 1854 been furnished by the War Office to very many of the colonies. They have been supplied as a gift, a loan, or on repayment, and instances have occurred where even in the same colony all three arrangements have

alternately been adopted.

In the year 1860, however, in consequence of the attention of the Secretary of State having been drawn to the absence of system in regulating the issues, it was decided that all rifles for the use of volunteers in the colonies, where not paid for, should be supplied on loan, subject to withdrawal. This decision has been adhered to with general consistency.

Ammunition has not, as a rule, been supplied for some time past to any of the

colonies, except upon repayment.

Again, no steps have been taken, except in a few instances, for procuring information from time to time as to the state of the arms thus lent, ar as to the numbers and degree of efficiency of the men for whose service they were designed.

The above considerations have led Sir George Lewis to devise the series of rules and conditions, of which a copy is transmitted herewith, and which I am to request that you will submit to the Duke of Newcastle for his opinion. Should his Grace concur in them, Sir George Lewis would wish that copies (which will be supplied for that purpose from hence) should be sent to all the Colonial Governors for their information and guidance.

I am to add, that Sir George Lewis does not propose to entertain any of the applications from the West India colonies recently forwarded to him, until the Colonial authorities concerned have been afforded an opportunity of considering the terms on which arms, &c., will henceforth be issued, and of regulating or

renewing their requisitions accordingly.

I have, &c.,

(Signed) EDWARD LUGARD.

Sir F. Rogers, Bart., &c. &c.

### SUPPLY OF ARMS TO COLONIAL MILITIA AND VOLUNTEERS.

- 1. Whenever arms of any description are supplied to a colony, they should be handed over to the Colonial Government as a loan (except when the colony offers to pay for them), liable to be recalled at any time by the Imperial Government.
- 2. All ammunition should be supplied subject to repayment of its value by the colony.

### Applications for Arms, &c.

3. Every application for arms should proceed from the Colonial Government, and be forwarded through the Colonial office to the Secretary of State for War for consideration with reference to the following points:

1st. The amount of the existing stores of arms.

2nd. The demands likely to be made upon that store for Imperial purposes. 3rd. The relative claims of the various colonies.

### General Conditions, &c.

4. All applications for arms, &c., should be accompanied by a written agreement to the following effect:

1st. That the arms, &c., will be received as a loan, and will be redelivered to

Her Majesty's Government on demand.

- 2nd. That the Colonial Government holds itself responsible for the arms, &c.
- 3rd. That a proper storehouse will be provided for the deposit of the arms.

4th. That the arms will be kept in good condition.

5th. That an officer of Her Majesty's army, to be appointed by the General or other officer commanding Her Majesty's forces in the colony, shall inspect the

arms annually,

- 6th. That an officer, similarly appointed, be also permitted and have facilities afforded to him to inspect annually each Militia and Volunteer corps, and that he be furnished by the commanding officer of each corp with a return of the strength of the corps, and the number, &c., of the arms in its possession, according to a form of return to be prescribed by the Secretary of State for War.
- 5. When it has been decided to accede to an application, the Colonial Government and the officer commanding the troops should be informed, and the arms, &c. should be issued upon the requisition of the Governor and order of the officer commanding the troops, by the Military Store officer, as follows:

### Rifles for Infantry.

6. These should be issued according to the number of militia and volunteers enrolled.

### Ammunition for Infantry.

7. Not more than 100 rounds per man per annum, and 110 caps for every 100 rounds, should be supplied. Blank cartridge will not be issued from the military store, as it can easily be provided by the colony.

### Arms for Cavalry.

S. Carbines and swords should be supplied according to the number of men enrolled.

### Ammunition for Carbines.

9. Fifty rounds per man per annum, with caps in the same proportion as for infantry, should be supplied.

### Garrison Artillery Guns.

10. No guns can be supplied for the exclusive use of the Garrison Artillery, but the General or other officer commanding on the station should be authorized, at his discretion, to permit militia and Volunteer Artillery to use the guns of the garrison for the purpose of exercise or practice, under the direction and supervision of the Royal Artillery.

### Ammunition and Shot for Guns.

11. An amount of ammunition not exceeding one round per man per annum, including a proportion of shell not greater than 20 per cent., should be supplied, as well as three friction tubes per man per annum.

### Carbines.

12. Carbines (artillery pattern) should be supplied in the proportion of 12 per battery.

### Ammunition for Carbines.

13. Fifty rounds per man per annum, with caps in the same proportion as for infantry, should be supplied.

### Field Artillery.

The supply of guns, &c., for Field Artillery, must form the subject of special consideration in each instance.

War Office, 18th March, 1862.

(COPY.)

At a Council held at the Government House at Halifax, the 24th day of June, 1862.

### PRESENT:

The Right Honorable the EARL OF MULGRAVE, Lieutenant Governor, &c., &c., &c.

His Excellency lays before the Council a circular despatch, dated 14th May, 1862, from His Grace the Duke of Newcastle, transmitting a copy of the rules and conditions adopted by the Secretary of War for the supply of arms and ammunition to the Colonial militia and Volunteer corps, in accordance with which arms will be loaned to the Colonial Governments, (except when the colony prefers to pay for them) liable to be recalled at any time by the Imperial Government, and ammunition will be supplied subject to re-payment of its value by the colony.

Whereupon his Excellency is advised to acquaint the Duke of Newcastle that the Provincial Government will hold itself responsible for the arms, and provide a proper store-house for their reception, and otherwise observe the conditions prescribed in these regulations, as far as relates to the arms and ammunition which his Excellency the Commander-in-Chief, for the time being, may require for the

service of this Province.

(COPY.)

Enclosure to No. 58.

Government House, Halifax, N. S., 24th June, 1862.

MY LORD DUKE,-

In compliance with the regulations issued by the Secretary of State for War, for the issue of arms to the local forces in the colonies, I beg to state, that should the application for 3000 stand of rifles, contained in my despatch to your Grace, No. 58, be granted,

I. They will be received as a loan, and be re-delivered to Her Majesty's Go-

vernment on demand.

II. That the Government will hold itself responsible for the arms.

III. That the proper provision will be made for the safe custody of the arms.

IV. That the arms will be kept in good condition.

V. That there will be no objections to an officer of H. M. Army being appointed

to inspect them.

VI. That an officer similarly appointed will be permitted, and have every facility afforded him to inspect the Militia and Volunteer corps, and the returns required by the Secretary of State for War will be furnished.

I have &c..

(Signed)

MULGRAVE.

His Grace the Duke of Newcastle, K. G., &c., &c., &c.

(COPY.)

No. 58.—Military.

Government House, Halifax, N. S., 24th June, 1862.

MY LORD DUKE,-

As I have now issued nearly the whole of the 3000 Rifles which were furnished by Her Majesty's Government for the use of the Volunteers, I should feel greatly obliged to your Grace if you would procure for me a further issue of arms on the terms contained in the letter of the Secretary of State for War, forwarded in the circular from your office, dated 14th May, 1862.

I am happy to inform your Grace that of late several new Companies of Volunteers have been formed, and the re-organization and enrollment of the militia is in

progress.

Under these circumstances I am anxious to have a sufficient number of Rifles at my disposal to enable me to meet any demands that may be made upon me, as my

inability to do so, would greatly discourage the Volunteer movement.

It will also be necessary for me to establish a small depot at the head quarters of each Militia regiment for the purpose of instructing the officers and non-commissioned officers of the Militia. I would therefore request that an additional 3000 Rifles may be lent to the Province for the use of the local forces, and that I may be authorised to draw them from the military store as occasion may require.

On Saturday last I had a review of the Volunteers of Halifax, when they turned out nearly 500 strong, and I am happy to inform your Grace that I saw a marked improvement in their drill, and the manner in which they performed the various

manœuvres was most creditable to them.

I have, &c.,

(Signed) MULGRAVE.

His Grace the Duke of Newcastle, &c., &c., &c.

### APPENDIX No. 55.

### RAILWAY TRAFFIC.

Railway Office, Halifax, 1st April, 1863.

Sir,—

In reply to your request, I now return you the information applied for by

Dr. Tupper, in reference to engines disposed of during past year by me.

There were two small engines, one a wood-sawing engine, the other adapted originally for driving a brick machine, applied for by William Stevens, late engine driver on the Windsor branch. Neither of them had been in use for several years. Several applications had previously been made to purchase, but after inspection parties had uniformly declined.

Mr. Stevens made a verbal application last autumn to purchase one or both these engines. I directed Mr. Johnston to inspect and return me a valuation of them. He did so, I append a copy of the paper. Mr. Stevens purchased them, paid \$200.00 down, which was transferred to construction capital account—see my report for 1862, page 24, B. 4. The balance was secured by a good joint note on time.

Your obedient servant,

J. McCULLY.

Honorable Joseph Howe.

(COPY.)

Richmond, 19th November, 1862.

Sir.—

Referring to the brick engine and the small wood-sawing engine, for which parties have at different times applied to purchase, without ever arriving at any thing definite, I now beg to state that I consider the present value of each respectively, as follows:

The brick making engine, (three hundred and fifty)
The wood sawing engine, (two hundred and eighty)

\$350 00 280 00

Referring to the brick engine, it is considerably out of repair.

Yours, &c.,

(Signed)

WM. JOHNSTON.

Hon. J. McCully, Chairman N. S. Railway.

(COPY.)

Railway Office, November 28, 1862.

You will please deliver to Mr. Wm. Stevens the two second hand steam engines valued by you recently.

Yours, &c.,

(Signed)

J. McCULLY.

Mr. Wm. Johnston.

Railway Office, Halifax, 11th April, 1863.

SIR,-

Herewith find report from Traffic Superintendent, in reply to Mr. Pryor's application for statement of detention on Nova Scotia Lines of Railway in consequence of snow storms, for the years 1861-2 and 3, respectively.

During 1863 we have had no detention, as you will perceive, and the trains

have run regularly twice a day.

In 1862, for four or five days, trains run but once. We never had the roads blocked so that we were entirely stopped for a single day on the main line.

In 1861 we lost one day on the main line, Halifax to Truro—a morning train;

once in the afternoon, Truro to Halifax—evening train.

On the branch to Windsor, the trains missed once Windsor to Halifux, as the tables annexed show, and once Halifax to Windsor.

The officers upon the lines are acquiring experience, and doubtless are better able to grapple with the difficulties as they occur.

I am unable to furnish any reliable data applicable to New Brunswick or Canada.

I remain, sir,

Your obedient servant,

J. McCULLY

To the Hon. Joseph Howe, &c. &c.

### APPENDIX No. 56.

### RAILWAY LOCOMOTIVES.

Railway Office, 1st April, 1863.

Sir,-

I now enclose you a letter from Mr. W. Johnston, Locomotive Superintendent, with papers appended, one also from Mr. W. Marshall, Railway Inspector, remarking upon and replying to the letter of Mr. Joseph McLellan, late driver, directed to Doctor Tupper.

These papers furnish so conclusive an answer to his charges, that I do not feel

myself called upon to enlarge.

I have the honor to remain Sir, Your obedient servant,

J. McCULLY.

Hon. Joseph Howe, &c., &c., &c.

Richmond, 30th March, 1863.

Sir,—

I am in receipt of yours, with enclosed letter signed J. McLellan, late driver, reporting the state of the rolling stock at Richmond. Mr. McLellan refers to engines 15 and 17. I beg to remark that neither of the two engines have been in use for upwards of three years, and as I have filled the office of Locomotive Superintendent but a little over two years, I can only report facts in connection with them during that time. No. 15 did some construction work, ballasting, and after that was put into shop; there is nothing material the matter with this engine—it wants overhauling and painting. As there was no place to put the tenders of these two engines, 15 and 17, in, till the new shed was built, they were exposed to the weather, and the brass hose couplings were cut off and stolen, to the value of twelve dollars or so. No. 17 had one of the driving wheel tyres broken on the 27th December, 1859, during Mr. Mosse's time. There is a spare pair of new driving wheels, never used, ready to be put on whenever this engine may be required. The only article belonging to this engine ever used by me, was a pilot or cow catcher. At the time of the great snow storm, 2d February, 1862, No. 16 left the rails at Mount Uniacke and ran into the platform, damaging her pilot, and I ordered the men to take the pilot off No. 17 till I should have a new one made. I got two new ones made accordingly; they cost thirty-six dollars each, and are both on hand now. No. 20 engine coming into Windsor Junction broke her connecting rod, and for the want of a suitable piece of iron to repair it, I ordered the men to take one off No. 17. The iron is now here for replacing it, and it will not cost over ten dollars. So much for these unsubstantiated charges. When I took charge in 1861, the workmen in the shop told me that brasses had been stolen off these engines. I had the remaining brasses stripped off and put up in boxes in store, where they still remain, to the amount of about seven hundred pounds weight.

I regret that Mr. McLellan did not call and inform himself of this fact before making his statement. What he has stated in this connection is entirely untrue; and these two engines can be put in working order at Richmond at any time with-

out sending to the old country or elsewhere for any spare parts.

With reference to No. S, American engine, I have to remark that she has run eighteen thousand miles since Mr. McLellan says "her fire-box was burned at Polly Bog." That fact alone is an answer to such an assertion. As she was coming in for other repairs, I sent to Dartmouth for Mr. Moyes, an experienced boiler maker, who after examining the flue sheet, was of opinion that corrosion had set in, and that he could do nothing but take out the sheet and put in a new one. When taken out it proved that he was correct, corrosion had set in on both sheets. I have had new sheets put in accordingly, with forty-six new flues, and when she gets one hundred more, that are expected daily from Boston, this engine

will be in thorough repair. With reference to No. 9 engine, she has done a great deal of work; she came in to get fire-box stays, I have accordingly put in fifty. Mr. McLellan says that these two engines have done the greater part of the work. This is about the only true statement in all his letter; and having done so much work, it is not surprising that they are both undergoing thorough repairs. With reference to fire-box sheets and flue sheets, I may say that No. 14 was taken in shop in February 1861, for repairs to fire-box, and on examining her I found that one of her sheets was unsound, and was only 3-16th of an inch thick. This engine had not done one-half of the work of either No. 8 or No. 9. Corrosion is the great enemy of boiler plates; if a small fracture should be caused when bending or selling the plates, corrosion is almost sure to set in, and when it does it destroys the plates very rapidly. Mr. Sparrow's letter, of Portland Locomotive Works, to you last autumn on the subject of boilers, sent by him for this road, will be found to corroborate I have much pleasure in informing you that our engines have these statements. not sustained anything like so much damage this winter-as last. At this time 1862, I had four engines in with broken tyres; up to date not a single tyre has given way this winter. Forty chilled wheels have been ordered, as you are aware, for the Portland engines for the coming season; and having arranged, with your approbation, with Mr. John Stairs, he has been requested to import Low Moor tyres for the Scotch engines sufficient for the year. Of a hundred chilled wheels imported for the car department, fifty have been put on since the year commenced. and I am fitting fifty more now to be ready when required.

I may further add that Mr. McLellan is neither a machinist nor a boiler maker. If the Government or the Legislature wish an inspection of this branch of the department under my control, I shall be only too happy to submit the entire locomotive rolling stock to a thorough examination; but such an inspection should be conducted by suitable men, practically acquainted with the manufacturing and repairing of locomotives, and then not, as it seems to me, at the instance of an engine driver. That you may be reminded of the circumstances under which Mr. McLellan was discharged, I append a report from Conductor Murray, bearing date 2nd October, 1861, and my action thereon. Permit me to say that the marked success which has attended the operations of this road of late, as well in regard to the safety of passengers as in a financial point of view, I had fain hoped would have operated to spare its officers from attacks by public men—attacks having no better foundation to rest upon than a letter from such a person as Joseph McLellan.

In reference to the brick-making machine, all I know as regards its history is what I have been told, namely that it was imported in 1855, at the commencement of operations on the road. The brick making parts are all here as they came, unused. The engine, a small 7 horse power article, said to have cost originally two hundred and thirty pounds sterling, was used as a stationary engine for a good while in the repair shop, and until a proper engine adapted to the work was eventually procured. For several years this second-hand article had been lying about, and after a while would have been good for little or nothing except as old material. An offer having been made for its purchase last season, as you are aware, I appraised it at three hundred and fifty dollars, which I consider its full value, and at that sum accordingly it was purchased and taken away.

It would be an easy matter for me, by encouraging extravagance in the shops, countenancing carelessness on the part of drivers, or failing to impose fines when deserved for negligence or irregularities, to swell up the charges for locomotive

repairs, and thus contribute to exhaust the net earnings of the road. I was not brought up in a school of that kind. I have hitherto conducted the operations of the department over which I preside with that due regard to safety and economy combined, which, as a faithful public servant, I had hoped would merit public approbation.

In conclusion it is but proper for me to add, that exercising my best judgment, I have ordered and expended upon the locomotive rolling stock all that I consider necessary to keep it in good repair; that I am under no restraint whatever; and

that my orders are all fulfilled as rapidly as circumstances will permit.

I have the honor to remain, Sir,

Your obedient servant,

W. JOHNSTON.

The Hon. J. McCully, Chief Commissioner, &c.

(COPY.)

Wednesday, 2nd October, 1861.

SIR,-

I am sorry that I have to report Joseph McLellan, Engine driver, for being intoxicated on his engine before leaving Windsor with the 3.45 train.

I acquainted Mr. Harding with the case, and requested him to come to the Mount and act as conductor; he agreed, and I went on the engine from Windsor to Halifax. At the Mount I told the breakman to keep a good look out for the train, as I would remain on the engine to Halifax, inspecting the train at the stations myself.

Should Joseph McLellan deny this report, I would refer you to his fireman, or

Francis Creamer, who was on the engine all the way.

(Signed)

JOHN MURRAY,

Conductor W. Branch.

To Mr. Wm. Johnston.

(COPY.)

Richmond, 3rd October, 1861.

Sir,—

Referring to the above report given in by Mr. Murray against Joseph McLellan, driver of the engine attached to the passenger train, of which Mr. Murray is the conductor, I beg to state that I have summarily discharged McLellan, and clear myself of any further responsibility in the case, and if Mr. McLellan wishes to appeal from my decision, he can do so to you for further investigation.

Your obedient servant,

(Signed)

WM. JOHNSTON.

Hon. J. McCully, Chairman N. S. Railway.

Bedford, 31st March, 1863.

Sir,—

In reply to that portion of Joseph McLellan's letter, dated 23rd February, in which he states that "nearly all the rails have been turned twice on the Nova Scotia Railway," I beg leave to submit the following remarks:—

As regards the first eight miles from Richmond to Bedford, being that portion of the road first opened for traffic, a few rails at Birch Cove, being the sharpest curves on the line, have been reversed, owing to the friction of the wheels wearing off and flattening face of rails, and in some other instances where curves are sharp, the rails have been turned upside down. This has occasionally occurred on the next five miles, reaching as far as Windsor Junction. The traffic between Rich-

mond and Windsor Junction being about 125 per cent more than any other part of the road, it is to be expected that the rails will sooner exhibit marks of wear and tear; some rails were turned on the first thirteen miles previous to my appoint-

ment to the office of Road Inspector.

The rails on Main line and Windsor branch, beyond Windsor Junction, have neither been reversed nor turned, with very few exceptions, and with proper care will last for many years to come. I am not aware that ever Joseph McLellan made a personal inspection of the state of the rails on the Nova Scotia Railway; I much doubt if he ever walked a mile of the road with any such object in view, and not being a plate-layer or skilled in railway construction, his opinion, if he had, would not weigh much with competent judges.

Not having been favored with a copy of Mr. Low's letter, I am unable to furnish any observations upon its contents. He was dismissed from the road as a contractor in 1862, in consequence of a report of Mr. Feetham, Road-master, a copy of

which I am enabled to annex.

I am, Sir, Your obedient servant,

WM. MARSHALL

Hon. J. McCully.

(COPY.)

Richmond, 31st March, 1862.

I have to complain to you of John Low's conduct in reference to the upholding of his contract; also the abuse he gave me in walking over his section on 15th inst. I asked him to adjust certain portions of the road; he told me he would, but did not. I called his attention to the same work two different times since, but it still remained the same. On 29th inst. I again walked over his section, saw Mr. Low and again spoke to him about the road, asking to have it attended to; he became in a great rage and said that he did not care for Mr. Marshall nor none of us, he would do as he liked with the road, and repair it when it suited him. I spoke to him about hauling fence poles from his shanty to Horn's road, and manure from Sutherland's stables to Horn's road, with trolley; he said that he done it after night, and would do it when he liked, and that he did not care if he was off the road to-morrow, and he would never put on any more men than his instalment would pay, after he had taken out his own salary. I asked him to turn some rails that are battered down at the ends, he told me to turn them myself, and left them unturned, and was at the place at the same time. There are some joints that are enough to strain or break the springs off any engine that was ever I therefore beg to say that if such be allowed by a contractor, I cannot be responsible for the road. He had 16 joint chairs lying idle on same day.

I am, Sir,

Your obedient servant,

(Signed)

A. FEETHAM.

Mr. W. Marshall.

(COPY.)

Railway Office, 31st March, 1862.

Mr. Feetham has lodged a complaint against you of so serious a nature that I feel it to be my duty forthwith to suspend you and the operation of your contract, till you shall be entitled to satisfy me on the subject of the charges pre-I have directed Mr. Marshall to provide a competent overseer and engage road repairers in the meantime.

Yours, &c.,

(Signed) J. McCULLY.

Mr. John Low.

# APPENDIX No. 58.

# LIGHT HOUSES.

(COPY.)

Lunenburg, Nova Scotia, 26th June, 1862.

SIR,-

Last month I had an opportunity of visiting the Light-houses at Port Williams and Margaretsville.

I observed, first, that the lights do not show sufficiently far to the Westward, which, being the most important point from which they require to be seen, ought to be corrected as soon as possible. For instance, Port Williams Light can only be seen by vessels which bear from it to the Northward of W. by W., it ought to be visible as far round as W. S. W.

Margaretsville light cannot be seen by vessels bearing from it to the Southward of N. W. by W. ½ W.; it ought to be visible as far round as S. W. by W. ½ W.

2. In both, the colored light is placed too near the white light.

3. Port Williams Light-house is placed too far in the cove.

I subjoin the following particulars, which may prove useful:—

Port Williams white light, 60 feet above high water; Green, 57 ditto. Latitude 43° 56′ 52″ North; Longitude 65° 16′ 1″ West.

Margaretsville white light 30 feet above high water; Red light 27 feet ditto. Latitude 44° 2′ 57″ North; Longitude 65° 4′ 0″ West.

I am, Sir,

Your very humble servant,

P. FREDERICK SHORTLAND, Captain R. N.

To the Chairman of the Board of Works, of Nova Scotia.

(COPY.)

27 Leadenhall Street, London, 6th February, 1863.

My Lord,—

In September I published a letter in the Steam Shipping Journal, and also in the Shipping Gazette, of London, advocating the placing of a Light vessel off Cape Race, on the inner bank, in about 7 fathoms water. This vessel to display a light of the first magnitude, and to sound a gong or steam whistle in foggy weather.

The objects sought to be achieved are: 1st. To intercept the outward and homeward bound steamers off Cape Race with greater ease and certainty than at present.

2nd. To serve as a security to vessels in foggy weather.

3rd. To sustain telegraphic communication between the Light vessel and the headland of Cape Race.

The great advantages of this Light vessel are so apparent that it is needless to

expatiate on its benefits.

Such a vessel should be well and strongly built, have the best ground tackle and every known improvement on board Light-ships. She should also have steam power to use on an emergency, and an extra length of cable on board ready to submerge in the event of accident.

Capitalists in England are not disposed to embark money in this kind of inter-

national enterprise unless on the guarantee of a given per centage.

I therefore ask your Lordship to lay this before the Nova Scotian Government, and to gain their sanction to a guarantee of 4 per cent on an expenditure of £50,000, in concert with the Governments of Newfoundland and Canada.

The total guarantee will be £2,000 per annum, to be divided in such proportions among the British Colonies as their Governments may decide. On this guarantee the capital can be raised, and if the receipts from telegrams cover the expenses and leave a margin for profit equal to 4 per cent, there will be no claim on the colonists.

By this post a copy of this letter goes on to Newfoundland and Canada.

I have the honor to subscribe myself,

Your obedient,

THOMAS MOORE.

His Excellency Earl Mulgrave, Halifax.

## APPENDIX No. 59.

# LEGISLATIVE LIBRARY.

Legislative Library Rooms, 12th March, 1863.

SIR.

For the information of His Excellency the Lieutenant-Governor, the undersigned submit this their first annual report on the subject of the Legislative Library. The design which had been for some years under consideration of consolidating the Libraries of both Houses, was consummated at the earliest opportunity after the removal of the sittings of the Supreme Court to the new Court House. Under a set of rules framed for the purpose, and by which the Library and its use are regulated, the Institution has been governed for the last twelve months, and so far as the undersigned are aware, with general satisfaction. They consider it highly desirable that the shelves of the library should be filled up as rapidly as the funds at the disposal of the Legislature, and a due regard to the exigencies of other branches of the public service, will admit. The small sum of four hundred dollars voted in the session of 1862 for that purpose, has been duly disbursed according to vouchers, and the report of the Librarian hereto appended, as by reference thereto will appear. The report of the Librarian is so full, on the various subjects herein treated, that the undersigned do not feel it necessary to recapitulate. They have much pleasure in making satisfactory mention of the manner in which he has discharged the duties of his office during the past year. All which is respectfully submitted by the undersigned, a joint committee of both Houses of the Legislature.

J. McCULLY, Chairman,
M. B. ALMON,
EDWARD KENNEY,
JOSEPH HOWE,
A. G. ARCHIBALD,
S. L. SHANNON,

Members of
the House of Assembly.

To the Honorable Joseph Howe,
Provincial Secretary.

Legislative Library Rooms, Halifax, Nova Scotia.

To the Honorable

The Chairman of the Joint Committee of the Legislative Library.

Sir.

In pursuance of the rules established for the regulation of the Legislative Library, I most respectfully beg leave to submit the following report upon its present condition.

I had the honor to be appointed Librarian by the Committee, immediately after its formation and the adoption of the rules above referred to, copies of which are

printed, and occupy a prominent place in the Library.

I have endeavored, to the best of my ability, to carry out these regulations; and in doing so I am happy to say that I have experienced but little difficulty, visitors in general obeying them of their own accord. Notwithstanding that a large number of persons have visited the Library during the year, and availed themselves of its benefits, there have not been any losses, and the books which have been used, are, with trifling exceptions, nearly as good as when first deposited.

In consequence of the limited amount of funds at disposal, the additions, by purchase, to the Library, have not been large. Two very important works, viz., the "Annual Register," and the "Parliamentary History of England," both of which had been rendered comparatively valueless by the loss of several volumes of each, have been made complete by importing from London the missing numbers. They constitute at present a very valuable portion of the Library. The former begins with the year 1758, and continues down to the present time. The latter begins with the Norman Conquest, 1066, and extends to the close of the year 1803; from that date to the present they are continued under the title of "Hansard's Debates," a few of the latter numbers of which only are required to complete this important work, to obtain which arrangements are being made.

During the latter part of 1862, tenders were taken for binding a large number of the London Patent Office Reports, which had been lying in the upper part of

this Building for some time.

The number of volumes could not be calculated with certainty, but they will probably amount to nearly one thousand. A part of them are already finished and in the Library, and in a very short time the remainder will be ready for the shelves.

The Library has been enriched during the year with a present from the colony of Victoria, consisting of fifteen volumes of the Laws and Journals of the Legislative Council and the House of Assembly of that Province, embracing the period from 1858 to 1861 inclusive. There have also been placed in the Library by Thomas B. Aikins, Esq., Record Commissioner, one hundred and fifty-six handsomely bound volumes of manuscript documents relating chiefly to the history of this Province.

The Smithsonian Institute at Washington has continued its yearly contribution, and sent us last year five volumes of miscellaneous collections, connected mostly with scientific subjects.

The total number of volumes in the Library at present is five thousand and sixty, and when those in the bookbinder's hands are all returned, that number will be largely increased. It is proper, however, to add, that the above number includes a great many duplicates, some of which are of considerable value.

An alphabetical catalogue of the whole is prepared, (omitting the duplicates) by

means of which access may readily be had to any book in the Library.

There are yet a great many valuable, though costly, works of reference, which are indispensable to a public library, and which it is very desirable to have placed

upon the shelves.

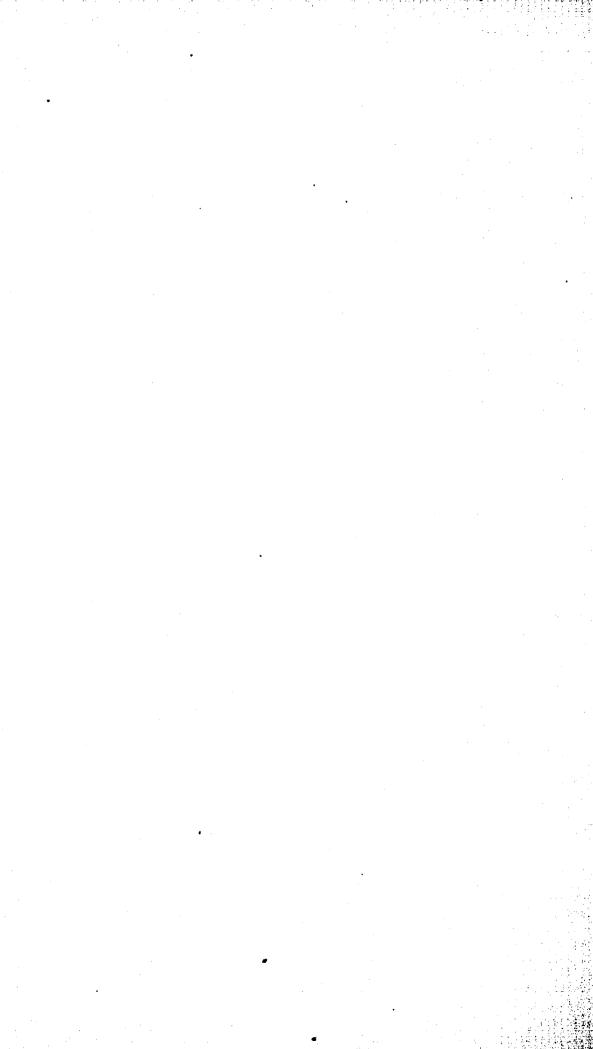

The total amount granted by the Legislature last year in aid, was four hundred dollars, of which there has been paid for books, advertising, and incidental expenses, two hundred and thirty-three dollars and twenty-two cents, leaving a balance of one hundred and sixty-six dollars and seventy-eight cents; the bookbinder's contract for nearly one thousand volumes, you will readily perceive, will quite exhaust, if not over-run the above balance.

Appended hereto I submit an account current as part of my report.

# GOLD FIELDS.

## REPORT OF INSPECTOR OF MINES.

Crown Land Office, 9th February, 1863.

The act passed at the last session of the Legislature, followed by the appointment of a Commissioner of Gold Fields, brought to a close my connection with that branch of the public service.

I was directed to make my accounts terminate on the 30th April last, and I have prepared them accordingly, giving a full statement of all receipts and

disbursements.

It remains only for me to annex to this brief report an abstract of the accounts, in order that the Government may become acquainted with the aggregate of my receipts and expenditures. My successor will, no doubt, furnish similar state-

ments to the end of the year.

It has not been without considerable labor, that I have been enabled to arrange my accounts with the various Superintendents at the different Gold Fields, some of whom had little experience in the formalities necessary to be observed in dealing with public monies; but it is a gratification to notice that they all readily acquiesced in the form prescribed, and I am thus enabled to present complete returns of all applicants and monies received in the different districts, and show the amounts which they have respectively produced.

I have the honor to be,

Sir.

Your obedient servant,

SAMUEL P. FAIRBANKS.

The Honourable the Provincial Secretary.

SAMUEL P. FAIRBANKS.

# APPENDIX No. 62.

# INTERCOLONIAL TRADE.

MY LORD,-

Your Excellency having been pleased to authorise me to confer with the Finance Ministers of Canada and New Brunswick on the subject of Intercolonial Irade, I beg leave to report that I proceeded to Quebec in September last, and on my arrival there was invited with Messrs. Howe and McCully to take a seat at the Council assembled to deliberate on the question of an Intercolonial Railway and other topics of interest to the Provinces. At this meeting, the question of free exchange of articles, the growth and manufacture of British North America, was incidentally discussed in connection with the Intercolonial Railway, and subsequently more fully by the Finance Ministers of Canada and New Brunswick and the undersigned.

The prevailing sentiments at both of these meetings was in the highest degree favorable to the adoption of a free trade policy between the British North American Provinces. The representatives of the government of Canada, probably feeling that many of the manufactures of that Province, fostered by a tariff more or less protective in its character, would compete most successfully with those of Nova Scotia and New Brunswick, were desirious of giving immediate effect to the policy under consideration. The Finance Ministers of New Brunswick and Nova Scotia, on the other hand, while admitting the soundness of the general principle, were not prepared on the instant to adopt so extensive a change in our revenue laws.

First, because it would not have been just to existing interests, hastily, and without sufficient notice, to bring the larger and more advanced manufactures of Canada into competition with the limited and infant productions of the maritime

Provinces; and,

Secondly, because, in view of the large additional obligations agreed to be assumed by the Provinces of Nova Scotia and New Brunswick to pay seven-twelfths of the interest on the proposed loan of three millions of pounds sterling for the Intercolonial Railway, it was felt that, although our revenues were rapidly improving, that the present was not the time to risk the loss of any large amount of revenue.

And thirdly, because, before adopting a full measure of Intercolonial Reciprocity, it was indispensable that a uniformity of tariffs should take place, which would require time, as it would be impossible for Canada at once to bring her generally high rates of duties down to a level with ours, and not very wise, even if practicable on the part of Nova Scotia, to burthen our people with the heavy revenue charges imposed on the population of Canada.

Under these circumstances, and in full view of the facts of the case, it was agreed by the Council representing the Provinces of Canada, Nova Scotia, and New Brunswick, that the introduction of a free trade between them be deferred until the completion of the railway between Halifax and Quebec, and the following minute, signed by the leaders of the several governments was adopted.

### MEMORANDUM.

The Delegates from Nova Scotia and New Brunswick and the government of Canada having under consideration the report of the Hon. the Finance Minister of Canada of the 8th September, instant, on the subject of Intercolonial Reciprocity, agree—

I. That the free interchange of goods, the growth, produce, and manufacture of the Provinces, and uniformity of tariff, are considered to be an indispensable

consequence of the construction of the Intercolonial Railway.

II. But that in consequence of the recent diminution of the revenues of the respective Provinces, arising out of the war in the neighboring republic, and the increased liabilities incurred by the additional obligations necessary to the construction of the proposed road, the Delegates from New Brunswick and Nova Scotia regret that they are not at this moment in a position to adopt measures to carry this important principle into practical effect.

(Signed)

J S. MACDONALD,

for Canada.

(Signed)
(Signed)

JOSEPH HOWE, S. L. TILLEY.

I have the honor to be,

Your Excellency's

Most obedient,

Very humble servant,

WILLIAM ANNAND.

Halifax, N. S., 18th October, 1862.

His Excellency the Earl of Mulgrave, &c., &c., &c.
