ALARM CLOCKS

FOR A NIGHT OF SOUND SLEEP AND AN ON TIME CALL.

One disturbing thought can wreck a night's rest. We know of no more disturbing worry than awaking on time when it is important to do so.

Alarm Clocks are trained to take this worry off your mind by calling you on the dot at whatever time you set.

From \$1.75 to \$5.50

Education

is the Family"—Froebel."

By Martina Gardner Owen

memory. That is like curing a wart on the finger by the major operation of cutting off the arm; like destroying weeds by a powerful chemical which poisons the soil against all growth. True generosity can never grow in a flame-seared mind.

"The correct way is to emphasize the joys of generosity," Miss Phyllis pointed out. "Don't nag about sister's tears when Paul is selfish. Smile about her happiness when brother is generous. Give him the privilege of passing candy to all your guests at table. Tell stories which emphasize the desirability of generosity, as Ruskin's 'King of the Golden River.' Select others from books and current literature. If he persistently refuses to share a toy, tell him, 'The fire engine can't stay with a selfish boy,' and put it away for a week. Plan games which involve the sharing of toys. Do something daily to strengthen the generosity habit. The young child is incapable of genuine altruism. Above all, be honest."

"Meaning?" queried the mother.

"I was thinking of dangerous devices, descended from antiquity," explained her sister. "Probably prehistoric woman, sitting before her cave, observing her offspring clutching an unshared bone, covered her face with her hands and shrilled: 'Mother'll cry!'"

"Probably the child gave his playmate a gnaw from the bone then, but the 'steenth time she tried the plan it didn't work. He had discovered that she was shamming and trading on his love to the point of hypocrisy. Be honorable."

"One more suggestion. Cultivate sensible selfishness yourself. The most ungenerous children I've known have belonged to sweetly sacrificing mothers. Don't give up your own desires and preferences when it is really not best for Paul that you should do so."

Shortage of Lambs.

The noticeable feature of live stock movement, as reported by the Dominion Live Stock Branch, in the third month of the year, apart from the increased volume of hogs, was the short supply of sheep. The report states: "Toronto, Jan. 15, 1927. The supply of lambs last month was 50 per cent. of the supply of lambs last

CANADIAN CLAIMS AGAINST GERMANS NOW IN PROCESS OF ADJUSTMENT

A despatch from London says:—Germany having resumed payment of what are known as enemy claims, considerable progress is being made with settling of claims by Canadians against German Nationals, which were delayed for a long time by Germany's default of payments after the Ruhr occupation. It is understood that German payments are at the rate of less than \$200,000 yearly, while the arrears amount to nearly \$5,000,000, though these may be wiped out immediately after the adoption of the Dawes report.

If the rate of actual payment is slow, however, more progress is being made with the admission of these liabilities by the German representatives in the clearing house set up to administer these matters. A number of Canadian claims which have proved impossible to settle are now before

mixed arbitral tribunals in London. As security for payment of these claims the Canadian Government has over \$20,000,000 worth of sequestrated German property in Canada, and relying on this, will reimburse Canadian claimants against German Nationals once their claims have been admitted. It is understood that since \$1,000,000 was paid over two years ago as the cost of the Canadian army of occupation in Germany no reparations payments have been received by Canada. The Reparations Commission is said to have about \$15,000,000 to its credit as a result of payments in kind and the Ruhr occupation, but there is no immediate prospect of Canada receiving any share of this. It appears more and more likely that the \$22,000,000 worth of sequestrated German property will constitute Canada's most substantial reparations asset for years to come.

O.T.A. SUSTAINED BY THE SUPREME COURT

Appeal in Case of Smith vs. Ontario Attorney-General is Dismissed.

A despatch from Ottawa says:—The Supreme Court on Thursday morning dismissed the appeal in the case of Smith vs. the Ontario Attorney-General. The Ontario Temperance Act is therefore upheld by the Court.

The basis of the action taken by the appellant Smith was that the Ontario Temperance Act, before the provisions of the Canada Temperance Act were applied to prohibit the importation of liquor into Ontario, was not an Act prohibiting the sale of liquor for beverage purposes, as it allowed the general sale of native wines and the importation and exportation of all liquors. The Attorney-General for Ontario argued that the Act need not be an absolute prohibi-

tion, but one prohibiting sale generally would suffice.

Smith is a resident of Toronto. He ordered a case of whiskey, some beer and lager from a dealer in Montreal, and the dealer declined to fill the order on the ground that he could not do so under the terms of the Ontario Temperance Act.

Smith brought action asking for a judicial declaration whether part IV of the Canada Temperance Act had the force of law in Ontario. To this the Attorney-General for Ontario replied that Smith had no interest enabling him to bring a declaratory action, but that he should be liable to prosecution. The trial Judge, Mr. Justice Orde, dismissed the action on the ground that the Attorney-General for Ontario was not the proper defendant, as it should have been against the Attorney-General for Canada. The appellate division affirmed the judgment as to parties but gave no opinion on the merits. Smith then appealed to the Supreme Court of Canada.

Hon. Chas. McCrea, Ontario's minister of mines, has been over in the Old Country to get British capital interested in the province's mineral resources. His efforts have been meeting with success.

Prince Henry Draws \$43.65 Per Year in Norfolk Town

Prince Henry, the third son of King George has a new job, says a London despatch. It carries with it the annual salary of \$43.65. His new office is Lord High Steward of Kings Lynn, a Norfolk town of 20,000 population. In the past this post has been an honorary one, but when, as it is expected will occur shortly, Prince Henry becomes a member of the peerage, he will be regarded as semi-official representative of Kings Lynn in the House of Lords. Incidentally, he will not benefit from his \$10 yearly, as he has announced this will go to charity.

Old Material.
"We've been aggering for nearly two years on paving around the public square in our progressive little city," proudly said the landlord of the Petunia tavern.
"Ah, returned a hypercritical guest. "With good intentions, I presume."

FIVE LOSE LIVES IN WRECK ON L. SUPERIOR

Captain and Two of His Crew Forfeit Chance of Escape in Lifeboats.

A despatch from Sault Ste. Marie, Ont., says:—Replete with stirring tales of tragedy and heroism, grim exposure and near starvation, is the story unfolded by the survivors of the steamer Orinoco, which was wrecked with the loss of five lives, in a fierce storm in Lake Superior last Sunday night. Seventeen survivors have arrived at the Michigan Soo, and they tell graphic stories of one of the most eventful wrecks in the long list of such occurrences on the Great Lakes. Seeing the already overburdened condition of the lifeboats, which were being lowered over the side of the sinking vessel, Captain Lawrence refused to leave his post, and drowned when his ship submerged. Wheelman Hugh Gordon and Chief Engineer Wurtz followed the lead of their captain, knowing it was unsafe to overcrowd the undersized lifeboats, also stuck to their posts and perished.

William Ostrander and Clarence Carlson died at the oars from illness and exposure while helping to get the survivors to the rocky shore, where after being buffeted about by the waves for nearly 24 hours, the survivors in the boats landed. Many of its crew, which included one woman, were severely frostbitten. William Ostrander was a married man with two children. Clarence Carlson was also a married man with two children, according to information supplied by the crew of the Orinoco.

Hugh Yeomans, a deck hand, fractured his right arm when he fell 20 feet to the bottom of the vessel from the deck when the boat severed. His mates claimed it was a mystery how he ever got out of the hold, for he had to climb up a makeshift ladder 25 feet with one arm.

On landing, one of the crew managed to kill a porcupine, which furnished a mouthful for the famishing survivors, many of whom were in a serious condition from frostbite.

All of the officers and members of the crew were residents of the United States, the majority of them belonging to Bay City, Michigan.

All survivors are loud in their praise of the treatment accorded them by Captain D. A. Williams of the tug Gargantua in effecting their rescue and providing food.
"From the time they took us aboard they treated us like princes," said William Schneider, a member of the Orinoco crew. "Hardly 15 minutes elapsed after we were aboard before the cook called us into the dining room, where we got a regular dinner which tasted mighty good after being without food since Sunday morning."

Canada from Coast to Coast

Glace Bay, N.S.—Considerable activity now prevails at Louisbourg, much coal being shipped from that port. All the colliers, with the exception of the Jubilee, at Sydney Mines, are in operation. Two or three new mines are being opened and it is anticipated that production this year will be considerably in excess of 1923.

Frederickton, N.B.—Farming conditions in Southern New Brunswick are reported to be considerably advanced over the corresponding time in 1923. The extreme flood conditions in many sections held back farming a year ago. So far such extreme conditions have not materialized this season.

Quebec, Que.—Between August 11 and September 25, twenty-five agricultural societies will hold 79 exhibitions, including four districts. The Dept. of Agriculture has prepared a list and the dates of these fairs, which show that farmers in nearly every county will be offered the opportunity of exhibiting.

Timmins, Ont.—Gold production from the mines of Northern Ontario amounted to approximately \$2,100,000 during the month of April, according to preliminary estimates. The output at this rate is on a uniform basis. Nine mines contribute to the output

and in each case the tendency is toward an increased tonnage and, consequently, heavier production.

Winnipeg, Man.—About 15 per cent. more butter was produced in Manitoba in 1923 than in the preceding year, according to an estimate of the Provincial Dairy Commissioner. The quality, he states, is also distinctly ahead of last year.

Regina, Sask.—Creamery butter production in Saskatchewan during the first three months of this year shows an increase of 409,458 pounds, according to the Provincial Dairy Commissioner. Total production for the period amounted to 1,683,764 pounds, compared with 1,274,306 pounds for the first quarter of 1923.

Edmonton, Alta.—Nearly 100,000 acres will be planted in corn in Southern Alberta this year, according to official estimates made by the Provincial Dept. of Agriculture. Last year the acreage in corn in the province was estimated at 83,000. A large area is also being sown to sweet clover.

Vancouver, B.C.—In an effort to develop fresh fruit carriage from the Panama Canal to Western Canada, the Furness (Pacific) Line has brought a sample shipment of bananas. The fruit arrived in good shape.

Oxford University to Send Arctic Expedition
A despatch from London says:—A British Arctic expedition under the auspices of Oxford University and supported by the War and Air Offices, will shortly sail from Newcastle under the leadership of George Binney, who headed last year's Oxford expedition. Two ships have been chartered, the 300-ton Norwegian whaler, Polar Bjorn of Tromso, and a small Norwegian sealing sloop; a seaplane specially designed for Arctic work has also been constructed.

The primary objective is to explore North Eastland Island, 90 miles square, which lies northeast of the main Spitzbergen Island. Two previous attempts have been made, the first in 1873 by the Swedish explorer Nordenskiold, who was only partly successful, and the second by the ill-fated German expedition of 1912, which perished in the attempt.

An attempt is to be made to coordinate the work of three sledging survey parties and the seaplane—the seaplane to conduct an aerial survey, and the sledging parties to fix points for an aerial map.

Only Taxpayer in Town Appointed Tax Collector
The man who lives in Boscobel House, in the little town of Boscobel, has just been appointed to a real man-sized job, says a London despatch. The Shifnal authorities decided it was time Boscobel had a tax overseer and collector, so they appointed him to look after the parish rates. Now Boscobel has a population of seven-teen, including children, and out of those only one is a ratepayer. He is the man at Boscobel House.

Incidentally Boscobel is the place in Shropshire where Charles II lay in hiding after the battle of Worcester.

After thousands of dollars had been spent and many lives risked in the search for him, Major Frederick L. Martin and Sgt. Alva L. Harvey, U.S. Army flyers, reached Port Moller in safety following a seven-day trek through the ice and snow of Alaska.

Natural Resources Bulletin.

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

Getting bait is one of the first essentials to a successful fishing trip. Those whose fishing experiences are limited to the interior lakes and rivers can hardly appreciate the importance of a sufficient quantity of bait to the fishermen on the sea coast, when its lack means no fish. The Canadian Fisheries Dept. operates on the Atlantic coast a bait reporting service, whereby captains and owners of fishing vessels are provided with information regarding the catch at various points along the coasts of the Maritime Provinces and the Magdalen Islands. This information is telegraphed to the principal fishing ports, and is very valuable.

Some idea of the amount of bait used may be gained from the fact that last year 142,888 barrels of herring were used for that purpose in eastern Canada.

World Shortage of Wheat Predicted After Coming Harvest

A despatch from London says:—The surprising prediction that there would be a world shortage of wheat after the coming harvest was made at the annual meeting of the Steam Cultivation Development Association at London. It was stated that the opinion was strongly held in the corn trade that the value of wheat would, in the near future, be in the neighborhood of fifty shillings per quarter. Sir William Joynton Hicks, M.P., said he was startled to hear of the possibility of a shortage of wheat during the coming year. From a purely agricultural point of view that might be desirable, but it would be exceedingly bad for the other trades of the country.

He never gets to the top who waits for some one to push him up. With some people unhappiness is just a habit.

Weekly Market Report

TORONTO.	
Man. wheat—No. 1 North, \$1.12½; No. 3 North, \$1.05½.	Man. oats—No. 3 CW, 43c; No. 1, 41½c.
Man. barley—Nominal.	All the above c.i.f. bay ports.
Ont. barley—65 to 70c.	Am. corn—No. 2 yellow, 95c.
Ont. rye—74 to 78c.	Ont. No. 2, \$1.40 to \$1.45.
Millfeed—Del. Montreal, freight, bags included: Bran, per ton, \$24; shorts, per ton, \$26; middlings, \$32; good feed flour, \$1.85.	Ont. wheat—No. 2 white, \$1.01 to \$1.05, outside.
Ont. No. 2 white oats—39 to 41c.	Ont. corn—Nominal.
Ont. flour—Ninety per cent. pat. in jute bags, Montreal, prompt shipment, \$4.75; Toronto basis, \$4.75; bulk, seaboard, \$4.40.	Man. flour—1st pats., in jute sacks, \$6.10 per bbl.; 2nd pats., \$5.60.
Hay—Extra No. 2 timothy, per ton, track, Toronto, \$16; No. 2, \$16; No. 3, \$15 to \$14; mixed, \$11 to \$11.50; lower grades, \$10 to \$12.	Straw—Carlots, per ton \$9.50 to \$10.
Screening—Standard, recleaned, f. o.b., Bay ports, per ton, \$17.	Cheese—New, large, 16½ to 17c; twins, 17 to 18c; triplets, 18 to 19c; Stiltons, 20c. Old, large, 22 to 23c; twins, 23 to 24c; triplets, 24 to 26c.
Butter—Finest creamery prints, 34 to 35c; No. 1 creamery, 33 to 34c; No. 2, 30 to 32c; dairy, 28 to 30c.	Eggs—Extras, fresh, in cartons, 30 to 31c; extra loose, 29 to 30c; firsts, 28 to 27c; seconds, 22 to 23c.
Live poultry—Hens, over 5 lbs., 26c; do, 4 to 5 lbs., 24c; do, 3 to 4 lbs., 15c; spring chickens, 2 lbs. and over, 70c; roosters, 18c; ducklings, over 5 lbs., 26c; do, 4 to 5 lbs., 24c.	Dressed poultry—Hens, over 5 lbs., 28c; do, 3 to 4 lbs., 18c; spring chickens, 2 lbs. and over, 80c; roosters, 22c.
Beans—Can., hand-picked, lb., 6½c; primes, 6c.	Maple products—Syrup, per imp. gal., \$2.50; per 5-gal. tin, \$2.40 per gal.; maple sugar, lb., 25 to 26c.
Honey—60-lb. tins, 11 to 11½c per lb.; 10-lb. tins, 11 to 12c; 5-lb. tins, 11½ to 12c; 2½-lb. tins, 12½ to 13c; comb honey, per doz., No. 1, \$3.75 to \$4; No. 2, \$3.25 to \$3.50.	Smoked meats—Hams, med., 23 to 24c; cooked hams, 34 to 36c; smoked
rolls, 17 to 18c; cottage rolls, 18 to 20c; breakfast bacon, 21 to 25c; special brand breakfast bacon, 28 to 30c; backs, boneless, 28 to 33c.	Cured meats—Long clear bacon, 50 to 70 lbs., \$18.50; 70 to 90 lbs., \$18.90 lbs. and up, \$17; lightweight rolls, in barrels, \$37; heavyweight rolls, \$32.
Lard—Pure tereces, 14½ to 15½c; tubs, 15 to 15½c; pails, 15½ to 16c; prints, 18 to 18½c; shortening, tierces, 14 to 14½c; tubs, 14½ to 15c; pails, 15 to 15½c; prints, 16½ to 17c.	Export steers, choice, \$8 to \$8.25; do, good \$7.50 to \$7.75; export heifers, \$7.25 to \$7.50; baby heaves, \$8 to \$8.25; butcher steers, choice, \$7 to \$7.75; do, good, \$6.25 to \$6.75; do, med., \$5.75 to \$6; do, com., \$4.50 to \$5; butcher heifers, choice, \$7 to \$7.50; do, med., \$5 to \$5.75; do, com., \$4.50 to \$4.75; butcher cows, choice, \$5.25 to \$6.25; do, med., \$3.50 to \$4.50; butcher bulls, \$4.50 to \$5.50; bolognas, \$2.50 to \$3.50; canners and cutters, \$1.25 to \$1.50; feeding steers, choice, \$1.25 to \$1.75; do, fair, \$4 to \$5; milkers, springers, choice, \$7 to \$7.50; do, fair, \$4.50 to \$6.00; stockers, choice, \$4.75 to \$5.25; do, fair, \$3.75 to \$4.20; calves, choice, \$10 to \$10.50; do, med., \$7 to \$7.50; do, com., \$4 to \$5.50; lambs, choice ewes, \$14 to \$15; do, bucks, \$14 to \$14.50; do, culls, \$8 to \$9; spring lambs, each, \$8 to \$14; sheep, light ewes, \$7 to \$8; do, culls, \$4.50 to \$6; hogs, fed and watered, \$7.75; do, f.o.b., \$7.25; do, country points, \$7 to \$8; off cars (long haul), \$8.15; do, select, \$8.50.
MONTREAL.	
Oats, Can. West, No. 2, 51 to 52c; do, No. 3, 49 to 50c; extra No. 1 feed, 48 to 48½c; No. 2 local white, 46 to 46½c.	Flour, Man. spring wheat pats., 1st, \$6.30; 2nds, \$5.80; strong bakers, \$5.60; winter pats., choice, \$5.75 to \$5.85. Rolled oats, bag 90 lbs., \$2.90. Bran, \$23.25. Shorts, \$24.25. Middlings, \$30.25. Hay, No. 2, per ton, car lots, \$16.
Cheese, finest Wests., 15 to 15½c; do, Eastons, 14 to 14½c. Butter No. 1, pasteurized, 32½c; No. 1 creamery, 31½c; 2nds, 30½c. Eggs, fresh, specials, 35c; fresh, extras, 32c; fresh, firsts, 28c. Potatoes, per bag, car lots, \$1.40 to \$1.45.	Com. dairy type cows, \$1.75 to \$4; fairly good veal calves, \$6 to \$6.50; do, med., \$5.50; mixed quality butcher hogs, \$8.75; sows, \$5.50.

Ship Followed by Floating Islands off Borneo Coast

A despatch from New York says:—Floating islands, including a seven-acre body of land which followed the Dollar Line steamship President Adams like a pet whale off Borneo, were encountered by that ship on its round-the-world cruise, according to Captain Jonas Pendelbury, who docked the President Adams on Thursday morning at Pier 15, Staten Island.

It was Captain Pendelbury's first experience with floating islands, and he has been seafaring for 36 years. But floating islands such as he reported encountering off Borneo are not the rarest things in the world, according to members of the staff of the American Geographical Society.

Captain Pendelbury encountered his biggest floating island first. He said its palm trees and coconut palms rose higher than the spars of his ship, and in the tops of those towering palms were chattering monkeys at play. Birds were singing and flowers were abloom. Through marine glasses the skipper said he picked out a large number of cobras, dead-ly of reptiles.

The strange experience of Captain Pendelbury occurred while his ship was negotiating the Palawan Passage.

What is that which lives in winter, dies in summer, and grows with its root upwards? An icicle.

We pass our lives in doing what we ought not and leaving undone what we should do.

Panel 1: IVE TRIED ON NEARLY EVERY HAT IN THE PLACE! MY EARS ARE ABOUT WORN OUT!

Panel 2: HOWJA LIKE THIS ONE BETTY?

Panel 3: OH THAT'S A FRIGHT IT HASN'T A BIT OF STYLE!

SIXTH
of the series dealing with the establishment of the
Bank of Montreal at representative points in Canada
and elsewhere.

WEST OF THE GREAT LAKES

THE growth of the Bank of Montreal has closely coincided with the gradual development of Canada from a small colony to a great Dominion.

In the Bank's westward advance to the Pacific Coast, one of the important links in its transcontinental chain of Branches was formed in 1878 at Winnipeg, when the Bank opened its first Branch west of the Great Lakes.

This forward step, taken seven years before railway communication was opened up between Montreal and Winnipeg, made available to the incoming population on the prairies the stabilizing co-operation of a strong, conservative and at the same time energetic financial institution.

Of the Bank's 567 Branches, 12 are situated in Winnipeg and 180 in the Prairie Provinces, including Winnipeg.

BANK OF MONTREAL

Established over 100 years

Total Assets in excess of \$650,000,000

WHAT IS WRONG WITH OUR SCHOOLS

A writer in the Mail and Empire Toronto, says:

Sir—There are three courses in our High Schools, viz: Teachers', Commercial and University Matriculation course. This gives us school teachers, stenographers, etc., and university graduates—nothing else! Now, suppose, our population were made up entirely of those three classes, what would become of us? We would starve!

The very existence, to say nothing of the prosperity of a person or a nation depends upon production. A farmer must produce or go bankrupt. But he cannot produce without help. No one can run a farm alone.

Now just fancy a farmer running his farm with the help of a teacher, a stenographer, and a University graduate! Again, no farmer can run a farm to-day without a knowledge of mechanics, especially motor mechanics, who starts in to run farm machinery, will soon find himself in the hole over his ears.

Imagine the school teacher running the tractor and the University graduate on the binder and the stenographer following the sower! The farmer would need a repair shop in the corner of each field, and a bank roll as thick as a gate post.

And where are the farmer's sons and daughters? Oh, they are at High School and often have to be driven to and from the train night and morning and once they enter High School their social atmosphere is changed. They must have polished shoes, clean nails and their best Sunday clothes on. They must be genteel. If, by any chance one of them should appear in the classroom with work-day farm clothes on, he or she would have a fit and sink through the floor. Once they got the High School bug there is no more farming for them. It is infragrid; they steer for the white lights. If they have brains they get there; but brains or no brains, they don't return to the farm. The only ones who remain are those that never get into the High Schools.

Farm help is like alfalfa seed. It should be raised on our own farms. The imported variety is not nearly as good. In fact, much of it is no good.

Thus, for the past fifty years or more, our High Schools have been drawing the brainy ones away from the farms and driving them to the urban centres. And when positions were not available there for them all the surplus drifted to the United States. There are to-day over 150,000 of our best Canadians in the United States driven there by our pernicious system of education.

DOUBLING CATTLE RETURNS

With high interest rates, costly labor and big prices for feeds, the raising of live stock on the farm is becoming more and more a proposition requiring business methods. Apart from first costs in securing good foundation stock, it costs just about as much to feed and market scrub cattle as it does prime animals—and the latter will often bring double the price or more. Following is the result of a demonstration at one of the big experimental farms as reported by the press:

Two two-year-old steers, fed alike for five and ½ months in the feed lot, were slaughtered and a comparison of the carcasses made. One dressed carcass weighed 715 pounds; this steer came from a herd headed

by a pure bred Hereford sire. The other one weighed 470 lbs.; it was a common steer without breeding.

When marketed the better animal brought 15 cents a pound wholesale, while the scrub brought only 12 cts. The difference in weight, gave the Hereford steer a money value more than double that of the common steer. The dressing percentage of the Hereford was 61 per cent, and that of the scrub only 42 per cent.

Canada is going in more extensively for mixed farming. But simply buying a few cattle will not solve the problem of the wheat grower. His stock venture will merely prove to be another gamble if he does not select animals of the proper type and provide for feeding and marketing them in a scientific way. It all comes down to a question of putting the farm on a business basis.

IN SHABBYTOWN

In Shabbytown they do not care if things look seedy everywhere. They have no pep, they've lost their grip they simply sit around and yip, in envy's tones of Glossyville, the shining village on the hill. Oh, Shabbytown is pook and gray and it shows symptoms of decay, and strangers passing through remark, "It surely dates back to the ark." "Clean Up and Paint Up" makes men frown along the streets of Shabbytown. A can of paint makes no appeal to this bum village, down at heel; the people think there is no sense in going to so much expense; so things are always going down, and getting worse in Shabbytown. It always gives my soul a thrill when I arrive in Glossyville. The town looks like a blooming bride; the people take a hearty pride in making things look clear and bright, and in their labors take delight. They're lavish with the helpful paint, selecting colors chaste or quaint, and decorating every shack; thus warding off decay's attack, and making all the buildings look like buildings read of in a book. And strangers, when they see the town, say, "Here we'll come and settle down, and raise us 9 kids apiece, and live and die as slick as grease." This happy burg goes right ahead, while Shabbytown is prone and dead.—Walt Mason.

MUST PREPARE FOR HARVEST

Success is a lot like the harvest that comes after a long, laborious and discouraging period of coaxing the crop along. The farmer is by nature a sound thinker. When he harvests in a few weeks, he doesn't think that his whole year's income is from the work of those few weeks. The whole principle is obvious. And it works backwards, too. Life is a garden. And, as some farmers neglect their fields and let the weeds run riot, so also are millions of young and middle-aged men growing a crop of failures. Success even to come to many people before the age of 40. Then or later they collect back pay—high or low, depending on past effort or negligence. Are you growing weeds or wheat?

May the crop be large so that competition for positions will eventually regulate the salaries of this class of public servants downwards and more in line with the average income of the people who have to do the paying.

THOSE WEATHER PROPHETS

A traveller called a few days ago and told of a short interview he had with Mr. J. B. Bowen, the weather prophet at Chatsworth. It was on the 15th he saw Mr. Bowen, who thought his prognostications for the year so far were quite in line with the happenings and the big storm he predicted might be taken as evidence of his knowledge of things to come.

When told he was five days out, Mr. Bowen gave an explanation satisfactory to himself and the traveller accepted the reason without further question.

On being asked for a forecast for the next thirty days the traveller, who makes his rounds in a Ford car, was gratified to learn that it would be dry to the end of the month, but regretted that heavy rains would fall the first week in June, followed by a heavy frost that would damage the crops badly.

The forecast was made on the 15th but instead of dry weather, we have had heavy rains and heavy frosts up to the time of writing, May 20. Let us see what happens in the remaining three weeks of the short-range forecast. Even the wise men at the observatory in Toronto seldom attempt to predict the weather for more than twenty-four hours in advance, and even at that they sometimes fail in their guess.—Durham Chronicle.

DIFFERENCE IN STRENGTH OF WOODS

Within the past year new knowledge regarding the effect of rate of growth on the strength of Canadian woods has been reached at the Forest Products Laboratories of Canada (Dominion Forestry Branch) Montreal.

The fact that rate of growth exercises an important influence on the mechanical properties of timber had been brought to light by previous research. It was known that in soft woods, such as Pine and Spruce, slowly grown material tended to be stronger than that of very rapid growth and that in the so-called ring-porous hardwoods, such as Ash and Oak, the reverse was true, slowly grown wood being inferior in strength to that of more rapid growth.

Analysis of the results of many thousands of strength tests, made at the Laboratories, has now enabled the investigators to go a step further and to determine definitely the rate of growth at which maximum strength is developed in a number of the important commercial woods of Canada. This information finds practical application in a large number of uses of wood in which the strength of the material is a primary consideration.

WE EACH HAVE ONE

The way in which an Oklahoma editor announced that his mother was coming to visit him may seem a trifle breezy, but it is safe to say that there isn't a mother living who would not be glad to have her advent hailed with such genuine delight and pride. This is the way he spread the glad tidings abroad.—

The editor of the News-Republican is going to tug up a little this evening. Going to change collars, put on a pair of cuffs, if we can find any. Going to get shaved and going to get our shoes shined and the pegs cut out, so we can walk right pertly. Ma's a-comin' down to see us. You know who ma is? Ma is our only ma, and she's a good one too.—One of the old Ohio Quaker sort, you know. Ma lives in Kingfisher. She was our ma when we were born; she was our ma in Western Kansas when we hunted prairie coal; she was our ma when we drank parched corn coffee in old Oklahoma in '98, and she's our ma now. She's the best ma we ever had. If you see us tomorrow walking down the street with a little woman with a smile on her face you'll know that's ma. If you never had a ma you should get one—and one like our ma, too.

FEW LEARNING TRADES

A bill before the Legislature recently to govern horseshoers brought out the statement that only ten boys are now apprenticed to blacksmiths in all Ontario. Thus the decline of that ancient trade is emphasized, who are going to shoe the horses 20 years hence? The boys of today are not learning trades, especially those crafts that require the use of much "elbow grease." They are all after white-collar jobs and easy money. There will soon be a surplus supply for this class of work and the trades canks will be skimp. How are those boys going to make an honest living 10 or 15 years hence? The future is not promising and it appears to us that the army of bums will be a formidable force in 1935.—Ex.

The Port Elgin and Saugeen war memorial will be unveiled at Port Elgin during the old home week in July.

A village girl eloped in a suit of her father's clothes. The next day the "Daily News" came out with the sensational headline: "Flees In Father's Pants!"

McKenzie Brothers of East Zorra have a unique record of calves—this spring. They have three pairs of twin calves from three Durham and Ayrshire heifers.

SHOULD BE TAKEN WITH SALT

(Lucknow Sentinel)

"A prominent citizen of this town informed us recently that, at many parties in the cities and larger towns young men were not popular with the girls unless they carried a flask of whiskey in a pocket, or kept them well supplied with cigarettes."

The above is from the Chesley Enterprise, and the editor in commenting upon the statement refers to an article in the Kincardine Reporter, which reports a somewhat similar condition of things at Kincardine.

It may be as well to accept such statements with the proverbial grain of salt, or a little more. The statements may be true, but they by no means fairly illustrate prevailing social conditions in the cities and towns and we venture to say, in Kincardine.

Every city has its sium district and tough element to whom, men and women alike, young and old, a social time is very dull without stimulating beverages, and there is a more pitiable class still whose social evening usually ends by all present being insensible from the use of drugs.

One is shocked on experiencing a forceful illustration of these conditions, and may conclude that the city, or the town, is a horrible place. But there is always the other side.

There may be a purpose in emphasizing the prevalence of these shady social conditions at the present time—the purpose being to discredit the O.T.A., though we shall not suspect either the Chesley Enterprise or the Kincardine Reporter of having this in view.

The dance seems always to have presented a favorable opportunity for the indulgence of stimulants. Too often the rules of admission are too lax and the rowdy element taking advantage of this push themselves in.

AN INFAMOUS LIE

An automobile owner keen on saving gas, installed a new carburetor which guaranteed to save 20% in fuel. Next he put in special spark plugs guaranteed to save another 20%, also intake super heater that was guaranteed to save 20%. His next purchase was a patented rear axle to save 20%. Finally he put on oversize "cords" that promised a 20% per cent saving on gasoline. Now with a saving of 100% of fuel the owner has to stop every 100 miles and bail out the gas tank to keep it from running over.

THE LOWERING LAKE LEVELS

(Lucknow Sentinel)

If you want to be sad and angry drive along the shore south of Kincardine and note how the lake has receded. The boiler of a tug that exploded forty years ago is now almost wholly visible. A few years ago only a few feet of it appeared over the water. Far west of it gulls roost on rocks that were not visible even last year. All along our shores small private piers are no longer useful. The lake has crept away from them. From the fine sand beach that skirted the lake you can now walk two hundred yards over stones that were covered by water a year or two ago. All this is the result of the Chicago drainage canal.—Kincardine Review.

DON'T EXAGGERATE

The habit of exaggeration grows on one almost imperceptibly by use. "I'm tired to death," says one. "I had not a wink of sleep all night," says another. And yet your bed-fellow heard you snore several times.

"I would not do it for all the world," says a third; and yet you have done it and many things equally bad again and again. "We were up to our knees in mud," says a fourth, when you know very well that the mud was not over your shoes. Be correct, truthful and moderate in your speech. The law of your harvest is to reap more than you sow. Sow and act and you reap a habit; sow a habit and you reap a character; sow a character and you reap a destiny.

RETURNING TO FARMS

Unfavorable industrial conditions in the United States, particularly Detroit, is having a beneficial effect on the Western Ontario farm labor problem it became known.

A prominent agriculturist, whose work takes him all over Western Ontario reports that a number of young men who left their homes and farm jobs near Glencoe have come back from Detroit and were glad to get back their old positions.

"I talked to some of these boys and they all said work was mighty scarce on the other side, and they thought the best thing they could do was to hustle back to Canada and farm work while the going was good," declared the farm expert.

"I found similar conditions in Bruce County. The young men are leaving the cities and flocking back to the land. I also find that farm-

ers are not so anxious to leave as at wages beyond \$85 a week and board. In fact, a number won't pay more than \$25 or \$30. They explain that they can't tell what they are going to get for their money and if they take a chance on high wages several men at high wages they will be out of pocket in the fall. "They will hire men, they want them, but they simply won't pay any big wages, and you can hardly blame them."—London Advertiser.

WAVE OF DISHONESTY

"A wave of dishonesty seems to be sweeping over the province, and I hope that we will soon see the end of it," said Judge Coatsworth, charging the Grand Jury at the opening of the General Sessions of the Peace last week.

His Honor commented on the fact that crime seemed to move in circles one type of offence giving place to another. A few years ago, crimes of violence were common, but have disappeared by crimes of conspiracy to defraud the public, those of which were on the docket for this court. "Of course, I am not referring to cases coming before you for trial," said the Bench, "but to charges of a similar character dealt with on former occasions."

Don't camp on the telephone line, but attend to your call promptly.

Reports from Hope Bay state that bears on the Bruce Peninsula are playing havoc with the flocks of sheep and lambs in that district.

The honest citizen who has paid his income tax can now sit back and wonder how much of it will go towards paying commissions and rackets.

If Luther Burbank ever perfects a radish or carrot that will lean over and choke a weed until it is black in the face, he will make a huge fortune.

His Honor Judge Greig, Junior Judge of the County of Bruce, presided for the last time at a Division Court sitting at Tara Wednesday of last week prior to his retirement under the age limit. He was appointed to the Judgeship in 1915. Judge Greig is still without impairment of all his remarkably keen mental faculties and sturdy health. He will carry with him the respect and good will of the people of the County of Bruce in his retirement from the bench.

CHEVROLET

—meets all the Standards by which a car is judged

BY whatever standard you judge a car—whatever qualifications you demand—Chevrolet can meet your closest scrutiny.

Chevrolet economy is an established fact. No other car can be run so inexpensively. Chevrolet is the world's lowest-priced, fully-equipped car.

Chevrolet dependability is proven by thousands of owners every day, in all kinds of weather, over all kinds of roads. Chevrolet appear-

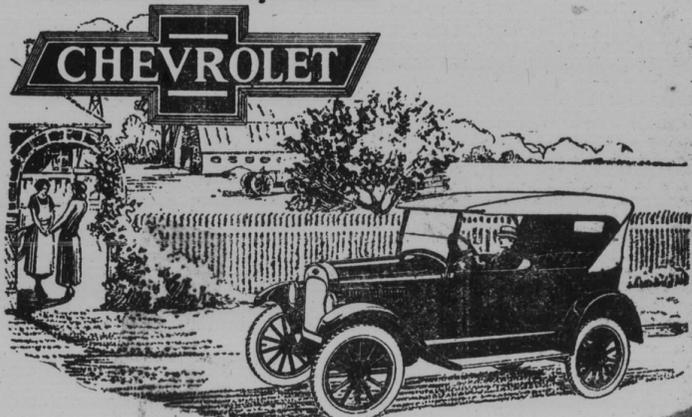

ance and construction set new standards among low-priced cars.

Chevrolet Service is the final factor in determining the value of the car. Wherever you travel, throughout the length and breadth of the Dominion, Chevrolet service is close at hand. There are Chevrolet Dealers and Service stations everywhere, where you can be sure of getting genuine Chevrolet parts and expert service by men who thoroughly understand the car.

Weigh all the evidence carefully—and you will more fully appreciate Chevrolet value. Ask us for a demonstration.

for Economical Transportation.

J. H. BROWN, Dealer, TEESWATER
G. J. Dickison, Salesman, Teeswater

Until You Try "SALADA"

GREEN TEA
you have not tasted the best.
Fresh, fragrant and pure. Try it.

SALAD DAYS AND SALAD WAYS.

"A salad a day" is just as healthful as "an apple a day" and should form part of either the midday or evening meal. Salads, like soups, are endless in variety and can be made with meat, poultry or fish, fresh or canned vegetables or fruit, nuts, and cheese. Vegetables used in the preparation of salads, should be tender, crisp, cold and dry. The exception to this rule is potato salad, which is sometimes served hot, or at least warm. Mayonnaise dressing is at its best on a meat or fish salad, served at luncheon or supper. Dinner salads require a lighter dressing.

Some salad combinations make use of left-overs in a delightful way. The following are both interesting and toothsome: Prunes (cooked and seeded), marshmallows and blanched almonds on lettuce leaves. Sliced oranges and seedless raisins on shredded lettuce. Dice boiled potatoes, chopped peanuts and chopped green peppers. Chopped celery, peanuts and raisins. A slice of pineapple (on a lettuce leaf), covered with sliced bananas, garnished with chopped nuts and a red cherry. Oranges, chopped dates or figs and diced pineapple. Shredded cabbage, sliced bananas, chopped celery and nuts. And there is an infinite variety of others which the housewife can work out for herself.

Corned beef salad is made with one and one-third cups of finely shredded cabbage, one and one-third cups of sliced boiled potatoes, one cup of shredded green peppers and one cup of very thin strips of cold boiled corn beef. Mix these all together with a sharp mayonnaise and serve on lettuce leaves. Garnish with slices of hard boiled egg.

Cream-Cheese and Nut Salad—Form cream-cheese or cottage-cheese into small balls; roll in chopped nuts, arrange on lettuce leaves, or on crisp and finely chopped cabbage, and serve with a cooked or mayonnaise dressing.

For Waldorf Salad mix one cup of apples diced and sprinkled with lemon juice to prevent discoloration, one cup of diced celery, one-half cup of chopped nuts. Moisten with salad dressing and place mixture in red apples which have been cored and hollowed out. Serve on lettuce leaves.

Baked Bean Salad is made with one cup of baked beans, one cup of finely shredded cabbage, one small onion, chopped. Mix with French dressing or any salad dressing preferred. Garnish with thin slices of cucumber pickle, or canned pimiento. Canned string beans may be used instead of the baked beans.

Thousand Island Salad Dressing requires one cup of mayonnaise, one-third cup of chili sauce, one-third cup of whipped cream, two tablespoonfuls of chopped sour and sweet pickles, or chow-chow, and one chopped pimiento. Combine the ingredients in the order given and serve at once. This is delicious with any green salad or with eggs, salmon, chicken, ham, tongue, celery or asparagus.

Hot Potato Salad requires four boiled potatoes, one onion, two slices of bacon, one tablespoonful of flour, one-quarter cup of vinegar and water combined, salt and pepper. Fry the bacon, then remove slices, add flour to bacon fat, rub together until blended, then add vinegar and water, salt and pepper. Cook until the dressing thickens. Dice the bacon and potatoes, slice the onion. Add the dressing, mix well and serve hot.

ADENOIDS.

Adenoids is the name given to an enlargement of the lymphoid tissue that lines the back of the nose and mouth. The enlargement forms a kind of third tonsil and though it frequently comes with the swelling of the real tonsils, may also come when the tonsils are healthy. Although it is a disease of child life, it often persists in adults.

Adenoids are not only troublesome but, since they block up the nose and the openings that deal from the throat to the ears, are also a menace to health. The child that suffers with them cannot breathe properly and may be unable to hear well. Mouth breathing, which he must resort to, brings an endless train of evils with it, among which are constant colds and rapidly deteriorating teeth—both evils that are induced by germs that easily find their way into a constantly open mouth. However, mouth breathing gives an ugly nasal twang to the voice. A child with such handicaps

as those is naturally slow of mind, inattentive and irritable. His dull facial expression—the open mouth and the pinched nostrils—shows clearly what is wrong, and mother, nurse and teacher should be guided by it. It is cruel to scold and punish a child who is struggling with incipient deafness, a permanently stopped-up nose, improperly aerated blood and other symptoms of a bad case of adenoids. It is easy to help them, especially if the case is discovered early. The treatment is surgical and is now so well recognized as the only good way that it is performed without hesitation on the youngest children. The adenoids are removed, usually under an anaesthetic, and relief is prompt. Sometimes even when the most skillful surgeon removes them they will return, but the operation can be repeated. After an operation much can be done for a child by training him to good habits of breathing and to a hygienic mode of life.

SOLVING A CLOTHES PROBLEM.

The daytime clothing of my two children is easily and willingly put into place since I put up two wooden towel racks on the casing in their bedroom. Each rack has three swinging arms, and on each are tied two wooden spring clothespins. These pins are just far enough apart to clasp onto the shoulders of the garments. Thus a dress may be on one, the underwaist with bloomers attached on another, and underwear on a third, with the ends of two arms serving for the stockings and the third for suspenders.

The clothes kept this way are not wrinkled, dressing is done in the least possible time, and it is so easy for me to slip into the clothespins just the garment I want put on in the morning when a change is desired.

MICELESS CUPBOARDS.

To shut off the runways of mice made in cupboards or baseboards, stuff up the holes with wire wool. It has been said that steamships annually use tons of this material to stop the pests until other repairs can be made.

A JAUNTY MODEL.
4710. This "costume" is quite up-to-date, and attractive for any of the material now in vogue. The jacket may be omitted, or it may be made of contrasting material.

The Pattern is cut in 4 Sizes: 6, 8, 10 and 12 years. A 10-year size requires 2 1/2 yards for the dress, and 1 yard for the jacket of 40-inch material. Mustard color linen with stitching in brown floss would be nice for this model, or pongee in a natural shade with pipings or bindings of white or green.

Pattern mailed to any address on receipt of 15c in silver, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

Send 15c in silver for our up-to-date Spring and Summer 1924 Book of Fashions.

EASIER JELLY MAKING.

To adjust a jelly bag properly gather the hem over an embroidery hoop, sew a tape firmly on both sides to hang up by, and suspend over the crock or kettle and allow the juice to drip. The hot fruit can be easily poured into such a bag, and it can be hung up much easier. Make your jelly bag with a sharp point to insure the maximum pressure, and the juice dripping out at one point with less danger of spattering.

"When Hearts Command"

By ELIZABETH YORK MILLER

"When hearts command,
From minds the sagest counsellings depart."

CHAPTER XVIII.—(Cont'd.)

They took a little walk up to the groves behind the Via dei Colli, but the afternoon seemed to hold uncertainties. Every line of Alice's sad, bewildered face, every curve of her drooping body claimed Ardeyne's passionate pity and protection. He was not conceited enough to assume that should she lose him her life might be blasted, although their mutual love called for such an assumption. It was the news of her possible heritage which would mark the cruelty. Even if it might bring about the very thing he feared, for he was too clever a doctor not to appreciate the value of the danger of suggestion. The less she was told about it the better; best of all if she were never told.

Afterwards he often thought of that afternoon in the olive grove above the old town. It marked such a curious crisis in his life; a revolution in thought and in deed. Alice was silent most of the time, a little frightened and miserable. His caresses were scarcely acceptable, since there was this secret separating them—the thing he could discuss with Mrs. Egan but not with her. She suffered his arm about her waist, his tender kisses, but she guessed accurately that in some way—not yet clear to her—she was an object of pity.

"Alice, dear, would you mind if we were married almost at once?" he asked.

His question, unexpected, gave her a feeling of panic. It was as though he had read her mind. She had been saying to herself: "If Philip and I aren't married soon—quite soon—perhaps some terrible thing will happen to prevent our marrying at all." "I don't—I don't mind," she brought out in a hurried little gasp.

"With your mother's consent, of course," he added. "It would have to be at Genoa before the British Consul. But we could be married afterward in church—directly afterwards."

That was how her mother had been married, or something like it. She was a little confused, and pressed him for details. Would such a ceremony be legal in England? Yes, if her mother didn't object; yes, she wouldn't mind being married in Genoa, and she would save a lot of bother and expense. If Philip was quite sure?

He tried to make it plain to her that he was more than sure, yet suddenly there was a change in the nature of his love-making. His arm encircled her in what might be called a fatherly embrace. He adored her, yet he was remote on his passionless pinnacle. But Alice felt the change and was bewildered by it. Those were the kisses of a friend, not of a lover, that was a father's or a brother's arm lightly clasping her waist.

Still, there was not such a great difference that she could suspect at once what had taken place in his mind, if not in his heart.

He took her down through the Old Town to the Villa Charnil, arriving just in time for the evening meal, which proved to be an unsatisfactory performance partaken of in the earwig arbor. The macaroni came up cold and the chicken was a little tough and underdone. It began to rain before they were quite finished, and everybody had to pick up plates and rush for the shelter of the house.

But afterwards there was some good hot coffee and Hugo, discovering an old guitar in the box-room, tuned it up and sang and played to them. He had a surprisingly sweet tenor voice and an endless stock of sentimental songs.

Hector Gaunt, who had stayed on, walked restlessly to and fro the length of the glass-covered corridor smoking a cigar. Hugo's love ditties set his teeth on edge, but he did not like to complain.

It was some time before Ardeyne could get a word in with Mrs. Carnay alone, but finally there was an opportunity, and he asked her if she would object to his and Alice's marriage taking place in Genoa as soon as it could be arranged. If so, he would go at once—to-morrow—and see about it.

What appealed to her most was the fact that he could be got rid of, and—oh, yes, she nodded, if Alice wanted it. Rather suddenly, still, it had to do with the idea more and more, her mind ranging lightly ahead. In three weeks? Yes, doubtless he would have to take up residence in Genoa, and then, of course, the honeymoon.

Ardeyne suggested Lucerne for the honeymoon. Hugo's plaintive voice went on, accompanied by the soft strum of the guitar. The silver rain falling. Just as it fell-eth now! And all things slept gently! Ah! Alice, where art thou? Alice, curled up in a dim corner, shielded her eyes with her hand. She felt like crying, although the reason was obscure to her. If only Mr. Gaunt would go back to his mountain-top and Philip to his hotel and Uncle John to bed. She wanted to talk to her mother.

as in Hugo's song; they had a climb of three miles or so up the black mountain-side and it was warm and cosy in the Villa Charnil, at least for Gaunt and Maria. But at length they did go, and finally Hugo was persuaded to retire and finally Philip—still in his mood of self-exaltation—pressed a friendly kiss upon his fiancée's brow and also departed.

Finally, Mrs. Carnay had finished her fussy round of the villa and her lengthy talk with Louisa on the subject of breakfast and how water was to be heated for morning baths. The front gate was locked and bolted, the doors and windows fastened, a leak discovered in the ceiling of the salon and worried over, a hot water bottle fetched for "Uncle John" who must not be allowed to catch another cold.

Candle in hand, clad in a flowing white gown with her pretty hair falling about her shoulders, Jean Carnay flitted about the house as though pursued by a demon of perversity. Three times she said a firm good-night to Alice, who trailed her in a most exasperating fashion.

But at last she was caught. She had slipped stealthily into her own bedroom, taken off her shoes so as to make no noise, and was just congratulating herself that Alice must be quite asleep by now, when the persistent child appeared again—also with a candle—and demanded an audience.

"But, my dear, it's so late!" Mrs. Carnay complained. "It's only eleven, mummy. And I simply must—"

"But I'm so dreadfully tired—"

"I know, I won't stay a moment. Mumsey, I wanted to ask you something. Please don't be impatient with me, or try to put me off—"

"But, my dear, I hope I'm never impatient with you! All the same, there was a note in her voice which belied the gently reproachful words. "We've got such a lot to do, haven't we, if you're to be married so soon? I've heard of quite a good dressmaker here. We can get the silk for your wedding dress in San Remo and have it made up—simply, you know."

"Mumsey, it's about Uncle John I wanted to ask you."

Mrs. Carnay bent over her pillow, pounding it to a fuller roundness.

"Well?" The question was a little harsh.

"Is Uncle John really my father?" The woman's heart gave a sickening thud and she felt herself turn deadly pale. She continued to thump the pillow, keeping her face turned away from Alice. "Thank heaven, she could—in this instance—answer truthfully with an emphatic denial. She did so.

"Certainly not! What could have put such a dreadful idea into your head?"

"I'm sorry, mumsey. Please forgive me. It was something he said—so many things he said."

Mrs. Carnay dreaded to ask what he had said, while a burning, white hot hatred of Hugo seared her breast. After his solemn promise to her!

"Really!" she gasped. "There's something queer about him," Alice faltered. "Has he been in prison, mumsey?"

"Prison? Prison! Good heavens—what are you talking about?"

"Is he quite—quite an ordinary person? I mean his mind seems a little queer."

"Your poor uncle! Queer, if you like. He's been dreadfully ill, I can't understand driving at him. You're making me feel most uncomfortable, Alice."

"I know. That's just the way Uncle John makes me feel. At first I didn't like him much. But now I feel sorry for him—although he sets me on pins and needles, particularly when Philip is about. . . Mumsey, please, please forgive me for keeping on asking you. I must know the truth. Is Uncle John really my father?"

Mrs. Carnay's face was red and pale by turns as she faced Alice. "I told you your father that your Uncle John isn't your father. I repeat that he isn't. Is there anything more you would like me to add to that statement?"

Never, never had she spoken to Alice like that before. Never before had a harsh word passed her lips to this most beloved of daughters. And now she was what you're driving at—furious, angry. Alice began to cry. "Mumsey, I—oh, mumsey darling!"

"There, there, go to bed. . . No, I'm not annoyed with you, only, only—"

To An Old Friend.

I like to dream of some established spot,
Where you and I, old friend, an evening through
Under tobacco's fog, streaked grey
and blue,
Might reconsider laughter's unforget.
Beside a hearth glow, golden, clear
and hot,
I'd hear you tell the oddities men do:
The clock would tick, and we would sit,
we two—
Life holds such meetings for us, does it not?

Happy are men when they have learned to prize
The sure unvarnished virtue of their friends,
The unchanged kindness of a well-known face;
On old fidelities our world depends,
And runs a simple course in honest wise,
Not a mere taxicab shot wild through space.

—Christopher Morley.

He—"I wonder what it is about spring that gets into the blood?"
She—"Spring tonics, I guess."

When Baby Walks.

Don't put the kettle on the fire with the spout pointing out into the room. If the water boils without your noticing it, baby, running past, may be seriously scalded by the steam.

Don't leave pins and needles lying about; they may find their way into baby's mouth.

Don't polish the floor underneath loose mats. Baby's unsteady little feet slide with the rug, and he has a nasty fall.

Don't have any unguarded fires. Keep a guard permanently and securely fixed in front of each.

Don't, if you live in a flat, leave the front door open "just a few moments" while you run down the stairs for something. Baby may run after you with frightful results. And, if you live in a house with the nursery upstairs, don't omit to fix a gate at the top of the staircase. It need not cost much.

Don't put bowls of hot water within baby's reach. Remember that he is very curious, and he may, on a voyage of discovery, tip a whole stream over him.

Don't forget that baby likes to look out of the window, and that, therefore, if the water boils without your noticing it, baby, running past, may be seriously scalded by the steam.

WRIGLEYS

Chew it after every meal.
It stimulates appetite and aids digestion. It makes your food do you more good. Note how it relieves that stinky feeling after hearty eating.

Doing Away With Sleep.

Medicine has its terrors no less than war. It was announced recently that two medical men are collaborating in an attempt to abolish sleep. The human brain, according to these enterprising gentlemen, is a sort of storage battery; and while it continues to supply electric energy to other parts of our organism we don't feel sleepy. It is when the electricity is exhausted that we become tired. Accordingly, the experimenters have concluded that, if we can recharge the brain battery, the necessity for sleep will vanish. Presently, therefore, instead of going to bed, we will sit down, apply an electric current to the brain-cells, and in about a quarter of an hour will be ready to start another day's work.

OTTAWA EMPLOYEE SAYS TANLAC MET EVERY TEST

Lee Tells How It Restored Strength and Overcame Stomach Trouble.

"If I should live to be 100 years old I will always praise Tanlac for the splendid health it has brought me," is the grateful statement of William Lee, 218 St. Andrew St., Ottawa, Ont., a well known employee of the Public Works Dept., of this city.

"Nine years of stomach trouble brought me down to only 103 lbs., a mere skeleton of myself. I suffered from all the miseries that go with indigestion and got so nervous that

many nights I paced the floor and longed for morning to come.

"Tanalac helped me from the very start and 7 bottles brought back my health and strength and ran my weight up 17 lbs. besides. In fact, I feel as strong and well now as if I had never been sick a day. I will gladly praise Tanlac to anyone wanting to know more about it from me."

Tanalac is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

Tanalac Vegetable Pills, for constipation, made and recommended by the manufacturers of TANLAC.

A Week of Sundays.

Most people know that the original Sabbath Day of the Fifth Commandment corresponds to our Saturday, the seventh day of the week. The early Christians, however, made the following day the sacred day of the week, calling it the Lord's Day, because it was on the morning after the Jewish Sabbath that Christ rose from the dead.

It is a curious fact that there is quite an important "Sunday," so to speak, for every day of the week. In addition to the two mentioned already Monday is the Greek Sabbath, Tuesday the Persian, Wednesday the Assyrian, Thursday the Egyptian, and Friday the Turkish.

WHEN BABY IS ILL

When the baby is ill; when he cries a great deal and no amount of attention or petting makes him happy, Baby's Own Tablets should be given him without delay. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus drive out constipation and indigestion; break up colds and simple fevers and make teething easy. They are absolutely guaranteed to be free from opiates and narcotics and can be given to even the newborn babe with perfect safety and always with beneficial results. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Joe Secured the Petition.

Little Joe and June are twins, but June is stronger than her brother, an advantage she is quick to improve. After an unusually trying day, the little fellow in a pensive mood was waiting for his sister to complete her evening devotions. Mamma had put on the little nightgown and had heard Joe's humble prayer. He sat down on a stool patiently waiting for his sister. June was feeling unusually elated over the day's accomplishments and had gone through with the "I lay me" prayer. After a few added blessings for the members of her family, she even more enthusiastically and brought her prayer to a dramatic climax by saying, "O Lord, make me a better girl!"

Just then a solemn "A-men" came from the little down-trodden male of the species, and before mamma could think what had occurred June was across the room and had her brother on the floor giving him a thorough going over with her small fists. That "Amen" was too suggestive.

Avoid loss when sending money by mail—Use Dominion Express Money Orders—the safe, convenient, inexpensive way.

Cat-tails have been found to yield flour, silk, starch and sugar, and were used extensively during the war, in Central Europe.

Keep Minard's Liniment in the house.

Serve Mustard with all meats

Mustard neutralizes the richness of fat foods and makes them easier to digest. Mustard enables you to enjoy and assimilate food which otherwise would burden the digestive organs.

Delights.

A waking bough; a crescent moon;
The drowsy somnolence of
With hum and stir of bees,
That in and out—when young the
may—

The warm-leaved maple's paler spray
Enmesh with sound the trees.

T crag bold wrought; a fern-fann'd
dell;
Sky-errants patterning the fell;
A pipit in the grass;
Shy, wistful brooks that croon all day
Unloosed kine twining horns in play,
High hawks that circling pass.

A touch of risk; a radiant sky;
A friend that lifts affection high
And graces friendship's name;
The thrush's tender evening trill,
When cool airs hush the hedges still,
And banks are green with flame.

—D. Thompson, in Country Life.

TOO MANY HOME CARES

One Reason Why So Many Women Are Weak and Run-Down.

The work of the woman in the home makes greater demands on her vitality than men realize, and there is always something more to do. No wonder women's backs ache, and their nerves are worn out. No wonder why they get depressed and irritable, suffer from headaches, and always feel out of sorts. But of course all women are not like that. What is the difference?

A woman with plenty of healthy red blood in her veins finds work in the home easy; her vitality is at par. This points the way to health in women who feel run down and depressed. Make new rich blood. You can do it with Dr. Williams' Pink Pills. These pills have the marvellous property of building up the blood and toning up the nerves. That is proved by the case of Mrs. H. Eppinger, Scott Street, Vancouver, B.C., who says:—"Dr. Williams' Pink Pills brought back my health and strength and restored my nerves to normal condition after other medicines had failed. It was after the birth of my second child that I became so anaemic and nervous that I thought I would lose my mind as well as my strength. I tried several medicines, but got no relief until I was advised to try Dr. Williams' Pink Pills. After using a few boxes of these I could see a change. I felt stronger; my appetite was better, I slept better, and my nerves were stronger. I continued the use of the pills for some time, and again found myself a well woman, and I can sincerely say that my health has since been the best. I can cheerfully recommend the pills to all weak, run-down women."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

GREEN TEA IMPORTS LARGER.

Statistics from Ottawa show that in 1923 553,977 pounds more Green Tea were brought into Canada than in 1921, and 906,728 pounds more than in 1922. The reason given is that the fine quality Green Teas of India and Ceylon have displaced the inferior Japan and China Greens which, due to their low price, were imported heavily some years ago. Salada Tea Company is the largest importer of India and Ceylon Green Teas.

Blind Faith.

She—Women are given too much to blind faith.
He—"Yes, many of those who enter the beauty contests prove that."

Any coward can fight a battle when he's sure of winning, but give me the man who has pluck to fight when he's sure of losing.—George Eliot.

The mode of travel some thirty years ago was somewhat different to what it is to-day. The speed of this foot-powered vehicle is four miles per hour, but free from engine trouble, no blow-outs, and it made no difference whether they passed on the right or the left.

Great Faith.

A rich manufacturer of asbestos took a house just across the street from a sweet-spirited old lady, and his family proceeded to enjoy itself in what seemed to her a very worldly fashion. The old lady was never known to speak ill of anyone, even when her neighbors raised a racket all Sunday. She only said: "Dear me! They must have great faith in their asbestos."

The Coming Education.

"How can I teach your children gentleness, and mercy to the weak, and reverence for life, and when by your laws, your actions and your speech, you contrive the very things I teach."
—Longfellow.

Radio Craze in Britain.

More than 12,260 miles of aerial wire have been erected in the British Isles in the last twelve months, so much has the radio craze seized the public. It is estimated by officials of the British Broadcasting Company that 2,000,000 persons are entertained daily at a cost of a farthing each. One hundred thousand pounds has been paid to the entertainment industry in salaries, fees and copyright royalties.

Strenuous efforts are being made in England to stop the catching and killing of English skylarks for food. For a mouthful of food to still such a song!

Ogden's CUT PLUG

Surnames and Their Origin

LANGLEY.

Variations—Lang, Langhorn, Langshaw, Langworthy, Longworth, Langlois, Long.

Racial Origin—English, also French. Source—Localities, also a nationality, also a personal peculiarity.

"Lang" is a variation of the word "long." It is to-day in widespread use colloquially and in the northern sections of England and in Scottish lowlands.

In the Middle Ages a man often earned the nickname of "Long" or "Lang," because of great height and spare build, and in many cases this nickname has developed into a family name.

The name of Langhorn is just what it seems, "long-horn." Long-horns were musical instruments quite common in the Middle Ages.

Langley was a name originally descriptive of locality in which the bearer lived. It means "long-leaf" or "long-meadow." Old instances are found of "John de Langeleye" and "de Langleghe."

A "schaw" was an enclosure or shelter, usually for game; hence the name Langshaw meant originally "of the Long Game-Preserve."

A "worth" was a farmstead, or ward-ship place. Hence the names Longworth and Langworthy mean literally "Long Farm."

Langlois is truly a French name, meaning "the Englishman," and undoubtedly in some cases it has been anglicized into Langley.

Langley is also derived in many cases from the older Norman-French "L'Angleys" or "Lengleyse," with the same meaning.

Lang also is met with as a shortened and anglicized form of the Scottish

Highland (Gaelic) clan name of O'Loynachan.

TIBBOTT.

Variations—Tibbot, Tebbott, Tibbald, Tibble, Tipson, Tibbat, Tibboston. Racial Origin—English. Source—A given name.

Give yourself three guesses as to the given name from which these particular family names have been evolved. Yes, it's a name by no means uncommon to-day, even though it may not be as widespread as John or William. Nevertheless, you'll probably ask for another three guesses or give it up without trying.

The name is Theobald. There are some interesting points to be noted about Theobald as a given name as well as a family name. In the first place it is not Greek, as you might suppose from the "theo." In the second place, this syllable does not mean "God," as it does in the name of Theodore. The name is of ancient Teutonic origin, from "theod," meaning "the people," and "bald," which is the ancestor of our modern word "bold." The figurative meaning of the combination was "one fit to rule the people."

Early, even before the arrival in England of the Normans, who also used the name, the Saxons had contracted it into "Tibald." The Normans made it "Thibald" and "Thibard," which you see, with a "th" that was pronounced like a "t," gives a sound not dissimilar from Tibbott.

The variations of this family name are of particular interest as an example of the way in which vowels sometimes run riot in the progressive development of language and nomenclature, in the latter really more than in the former.

Watch the Oil Tank.

If for any reason the oil-supply tank on a motor-car engine has been allowed to become dry, after refilling, it is a wise precaution to make sure the pump is working properly. Otherwise, an air lock may form at some point in the oil-supply line, preventing the pump from functioning as it should, and burned-out bearings or scored cylinders may result.

Good will to others is constructive thought. It helps build us up. It is good for your body. It makes your blood purer, your muscles stronger, and your whole form more symmetrical in shape. It is the real "elixir of life." The more of such thought you attract to you the more life you have. You draw, then, the best elements from all with whom you associate. If you send out a contrary order of thought, you draw to you from them the poisonous and destructive elements. These will hurt your body. Persons in this way are literally hated to death.—Prentice Mulford.

"Free to you" generally means that someone else pays double.

MRS. MISENER'S ACHES AND PAINS

Vanished After Using Lydia E. Pinkham's Vegetable Compound

"Branchton, Ont.—"When I wrote to you for help my action was mostly prompted by curiosity. I wondered if I, too, would benefit by your medicine. It was the most profitable action I have ever taken. I heartily assure you, for through its results I am relieved of most of my sufferings. I have taken six boxes of Lydia E. Pinkham's Vegetable Compound Tablets and a bottle of Lydia E. Pinkham's Blood Medicine, and I can honestly say I have never been so well before. I had suffered from pains and other troubles since I was fifteen years old, and during the 'Great War' period I worked on munitions for two years, and, in the heavy lifting which my work called for, I strained myself, causing pelvic inflammation from which I have suffered untold agony, and I often had to give up and go to bed. I had doctored for several years without getting permanent relief, when I started taking your medicine."—Mrs. GOLDWIN MISENER, Branchton, Ont.

Write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments of Women."

UNION STOCK MARKETS TORONTO

Slightly higher prices were paid for the best offerings of butcher cattle at the Union Stock Yards yesterday with values for export classes and cows and bulls remaining about steady. The receipts were not as heavy as they were last week, but the trade was somewhat slow in getting started. The lighter receipts caused salesmen to endeavor to secure higher prices and it was near 11 o'clock before buying became brisk. At 2 o'clock about 2500 head had passed over the scales and a good clean-up was affected before closing time.

The market was generally good but the only enhancement in values was in the butcher classes. Here shipments showing the best finish brought from 10c to 15c per cwt. more than last week. Exporters were active in the market and a number of feeders changed hands. About 50 baby heaves passed over the scales from \$7.50 to \$9. There was an odd load of Western cattle on the market and they sold from \$5 to \$5.50 per cwt., but there were no native offerings below \$6.25. One load of export cattle averaged 1335 lbs. brought \$3.65 per cwt. Another load brought \$3.40 with the best shipments generally moving and watered.

from \$7.25 to \$8.25, with heifers bringing from \$7.25 to \$7.75. Cows were taken for the overseas market from \$6.25 to \$7, although there were only two at the top, while bulls sold from \$4.50 to \$5.25. Five loads of feeders changed hands from \$5.50 to \$7.10.

Exporters brought the best of the heavyweight cattle and the bulk of those taken by the packers and butchers brought from \$7 to \$7.60, with one load at \$7.75. Medium to good killers sold from \$6.50 to \$7 some fair to good heifers were taken for killing from \$6 to \$7. Fair to good cows sold from \$4.50 to \$5.50 and medium bulls from \$3.50 to \$4.25. An odd hologna sold from \$3 to \$3.25.

There was a light run of calves and trading was again poor. A few sales were made from \$10 to \$10.50 and one at \$11.

Sheep held about steady with a few choice up to \$2.50 and the bulk around \$1.75. Culls sold down to \$4 per cwt. Spring lambs were about steady with the previous week's close. Tops made \$12.50 each, and from there sales were made from \$15 to \$18 per cwt.

The hog market was again inclined to be unsettled, although most of the sales were made on the basis of \$7.25 f.o.b. and \$7.75 fed

CHESLEY, JUNE 3rd

The Bruce County Soldiers' Re-Union, 6th Annual Celebration, will be held in Chesley, on June 3rd. A big day of Sports, Horse Races, Baseball Tournament with teams from Owen Sound, Chesley and other places competing.
