

EMPIRE AIR ROUTES PROPOSED BY BRITAIN TO FORM HIGHWAYS OF PEACE

London.—From London to Canada in two and a half days, to India in five days, to Capetown in six days, to Australia in seven days and to New Zealand in thirteen days. These were the possibilities of the air which Sir Samuel Hoare, British Air Minister, has submitted to the Imperial Conference.

"There is to-day no technical or operational reason," Sir Samuel declared, "why, by aeroplane or airship, London should not be brought within a fortnight of the farthest cities and territories of the Empire. Sir Samuel devoted himself to civil aviation, and proposed the organization of long-distance Empire air routes beginning in the Far East and from Australia to Capetown on the mosaic plan. "We must," he said, "each of us insert our particular stone in the design."

His proposal, Sir Samuel said, involved no subsidy. It involved nothing more than co-operation between one Government and another, and between military and civil flying. Sir Samuel pressed that the Dominions and dependencies should create and maintain landing grounds in good order. He held that the airship would carry out the long-distance, non-stop air journeys of the future, and indicated that two airships were now being built in England which should, with a normal load of freight and passengers, be able to fly without refuelling in good weather a distance of 4,000 miles. There would be promenade decks outside the

cabins and ample smoking and dining rooms.

The aeroplane and the airship were really complementary to each other, the British Air Minister said. It was necessary to organize both along lines of long-distance flying, the aeroplane being invaluable for short-stage traffic, and particularly needed at present, when the airship program was still in the experimental stage.

Sir Samuel pressed that the Dominions should co-operate in preparing for airship development. To this end two things were essential—highly efficient meteorological information and the erection of mooring masts.

"In a year's time," Sir Samuel proceeded, "these two airships should be completed. It is then proposed to carry out adequate home trials and subsequently to fly one of these airships regularly to and from India for a full period of trial in tropical countries. When these trials are completed it is hoped, if the Dominions so desire, to make demonstration flights to the Capitals of the Empire." Sir Samuel's wish was to see a commercial airship line started at the earliest possible moment between Great Britain and the Dominions. He further suggested that before the next Imperial Conference there should be an Empire air conference to discuss developments.

Premier Stanley Bruce observed that flying had developed so much in Australia that taking an aeroplane was now like taking a taxi-car.

Tommy's Strip for "War" in Trade Efficiency Test

In Britain's next "little war" the British Tommy may go into battle metaphorically, "stripped to the buff" instead of carrying a load of up to eighty pounds. A combatant soldier's "baggage" will be cut down to his weapons and ammunition if a test now being carried out in divisional manoeuvres at Aldershot shows he can safely be relieved of the burden in his pack when marching to the fighting line.

Exercises in which highly mobile troops are engaged against larger but less mobile forces help to answer the question of whether a soldier can rely on motor transport to deliver when and where he may need them all impediments, coats, pack, haversack, rations and field dressings, which formerly he carried into action. A general substitution of motor vehicles for the present horses and wagons will follow if the test is a success.

Yorkshiremen Invoke Old Saxon Law Defense

A curious echo of pre-Norman England was heard in a Daresbury Yorkshire court when three men, who were charged with damaging crops, invoked in their defense a certificate that they were "burley-men." Officers known by this title in Anglo-Saxon times, constituted a primitive village court, which adjusted all local disputes in accordance with Roman law, or local custom.

After the Norman conquest the name was retained, but their jurisdiction merged into that of the manorial courts. Burley-men survive only in the north of England, where they are in some mansors still appointed to assess damage to growing crops and other minor farming matters.

A Lamp of Remembrance.

In a long wide corridor that leads to the "Chief's" room at Scotland Yard stands a lamp that is always alight. It is the "Yard" memorial to its Civil Servants who fell in the war.

This lamp, not unlike one of Old London's street lanterns, has been alight for months. In daytime it is only when you approach close to it that you realize it is still burning, but it will burn day and night for as long as Scotland Yard remains.

Inscribed on it are the words: "In memory of those members of the Civil Service staff of the Metropolitan Police Force who laid down their lives."

Violet Rays for Eyes.

Surgeons have succeeded in restoring sight to diseased eyes and by standardizing the method treatment have opened the way for a new attack on blindness, said A. J. M. Tarrant, secretary of Moorfields, London, the biggest eye hospital in the British Empire. A year's experiment with a tiny mercury vapor lamp throwing out ultra-violet rays, has been successfully concluded.

The secretary said the violet-ray treatment had been successfully used in cases of three and total blindness.

Danes to Make Milk.

Official milk, which is asserted to possess all the qualities of fresh cow's milk, is to be manufactured in Denmark. The product is said not to be merely a substitute for milk as the real butter fat is replaced by vegetable fats and the addition of vitamins gives it character of fresh milk.

Mirrors That Deceive.

Mirrors with a slightly convex surface, which have the result of simulating down the person using them, are said to be popular in American dress saloons.

Secrets of Science.

By David Dietz.

The biologist classes Man among the primates. He believes that the man-like apes are man's nearest relatives upon earth.

Neither Darwin nor any other biologist ever said that man was descended from a monkey.

But the biologist insists that just as various types of mammals can be traced to common ancestors so can man and the man-like apes. Somewhere thousands of years ago a division took place in the development of a certain type of primate. One branch developed into the man-like apes. The other developed into man.

British Delegation. The upper photo is that of Sir William Mackenzie, G.B.C., K.C., chairman of the British delegation investigating industrial relations between employers and the employed in Canada. The lower photo is that of Fred W. Field, British government senior trade commissioner in Canada. The party is also gathering information on the methods in which trade disputes are settled in the United States.

It Is Very Important—

- To treat a customer well even if he does not buy.
- To judge a college by what we send as well as by what comes home.
- To give the railroads some encouragement if we want good service.
- To see that the rich also get justice in the courts.
- To enforce all laws if we want any law to be respected.
- To deserve our rights if we expect to demand them.
- To give good attention if we want to get a good speech.

She: "How dare you try to kiss me!"
 He: "Well, I'd been in the war in France and—"

Stocking Lore.

There are many quaint superstitions connected with the stocking. It is extremely lucky if a stocking is accidentally put on inside out, and on no account should it be taken off and changed. The luck is all the greater if the stocking is the left legged one.

Another quaint idea is to place a stocking under the pillow when sleeping the first night in a fresh bed; to be quite correct, I believe, the stocking has to be the one that has been worn on the right leg during the daytime. Whatever the sleeper dreams that night is sure to come true.

When a young girl marries before her older sisters, it is still the custom in some parts for the unmarried custom to dance in stockings feet at the wedding. Whether this is an act of humiliation or to bring them husbands, too, I know not, but rather suspect the former, because in Scotland the older unmarried sisters are sometimes presented with green stockings. These are sent anonymously by some so-called friend, as a gentle hint that the recipient is "on the shelf."

BLOOD TESTS PROVE EVOLUTION

Scientists Say it Shows Relationship of Man to Apes.

The sketch calls attention to the so-called vestigial organs in man. Evolutionists claim these are conclusive proofs of their theory of the origin of man.

Human blood mingles freely with that of the man-like apes.

There are more complicated examples which prove the same thing. The blood-fluid or serum of a rabbit which has human blood injected into it, forms a cloudy precipitate when mixed with human blood.

It will form almost as heavy a precipitate with the blood of the man-like apes.

In the case of other apes there is only a slight reaction. In the case of the lemur it is weakest of all. Thus the experiment not only shows man's relationship to the ape but his degree of relationship to various types.

Another proof of man's relationship to the animal world is the presence of so-called vestigial organs in his anatomy. These are relics, so to speak, of organs which once were important but which lost their importance as man evolved from the primate stock.

The best known of these rudimentary organs is the vermiform appendix. In certain grazing animals it is a highly important organ.

Certain muscles which now perform no function but which originally twitched the ears and the skin of the face are in the same class.

Many mammals possess a membrane in the eye known as the third eyelid. There are vestiges of this in man.

Another proof of the relationship to the ape is the hair on the arms and legs. The direction in which it grows corresponds to the direction of the hairy growth of the man-like apes. Embryology furnishes other proofs of man's relation to the other forms of life. The human embryo in its early stages resembles the embryo of the fish in its early stages. Later it resembles that of the reptile and still later that of other animals.

Name Lake After Hudson's Bay Co. Governor.

Red Lake, the scene of mining activity in Patricia district in northwestern Ontario, was a centre of fur-trading activity 125 years ago. The great map of Canada made by Aaron Arrowsmith, 1795-1802, from information supplied by the Hudson's Bay Company shows the lake by name with Red Lake House upon it. The present Quirk lake on Chukunt river bears the name "Prince of Wales" lake. Pakwash lake on the same river is known as "L' Paquash" and Lac Seul as "L. Sal." The latter lake, by the way, is shown on the map of Peter Pond of date 1750, as lake "Alone," the translation of the French "Seul." West of Lac Seul on English river in the position of present Barnston lake is shown Gov. Weggs lake, evidently commemorating Samuel Weggs, who was Governor of the Hudson's Bay Company from 1782 to 1789. The Geographic Board of Canada has recently approved of the name "Weggs" being applied to the lake adjoining Barnston lake, sometimes called Sandbar lake.

If To Be Clever.

If to be clever means that I must sneer At every honest effort to be good, Must tear to pieces all the brave reverse, And scorn what isn't clearly understood; If only what is rotten can be art, Lord, keep me from the sin of being smart!

If to be clever means that I must jest At all that men hold sacred, and disdain The simple teachings telling what is best, Must serve the passions for my pocket's gain; If brilliance means an utter lack of heart, Lord, save me from the sin of being smart!

If to be clever means that I must see All that is base and vile and call that peak, And finding honor, swear it cannot be Because I've known some men to lie and steal; If wit must tear all gentle worth apart, Lord, save me from the sin of being smart.

—Edgar A. Guest.

A Good Reporter.

Was Helen then so starry-eyed? Was Troy so very tall? And were the windy plains so wide? Was there a Horse at all?

Perhaps they told old Homer Things were of different size. Perhaps a returned rooster Told tales for blinded eyes.

But the blind man heard them, yearning, So he raised his lyre and sang, And the toyless towers were burning, And the plains with battle rang.

And Helen's face went launching ships The young died, and the hoary, And Troy is down in dust and chips —And Homer got the story.

—Rollin Kirby.

Old Egypt's Dogs.

The Egyptians had several kinds of domestic dogs, including the hound and wolf-dog.

AERIAL SURVEY AS AID IN MAPPING

During the past two seasons planes piloted by the Royal Canadian Air Force have tracked paths back and forth across great stretches of northern Ontario, Manitoba, and Saskatchewan, taking photographs for the making of maps which will be of the greatest value to prospectors, foresters, geologists and others interested in the development of Canada's hidden resources. The areas covered, lying just beyond the fringe of present settlement but within easy access of it, are destined in the near future to play an important part in the progress of the Dominion.

The production of these maps is in the hands of the Topographical Survey, Department of the Interior. It is necessary that the photographs cover the whole area, and accordingly, before each operation a sketch is prepared showing the parallel flight lines required to accomplish this object.

How does the aerial navigator track out these parallel lines of flight across these great and little known expanses? This undertaking properly falls to experienced surveyors, and a Dominion Lands surveyor therefore accompanies each plane as navigational officer.

Of course, he makes use of existing maps but these only show a few of the principal features which, having been plotted largely from explorers' notes, are often misplaced by many miles. The navigator must therefore exercise a nice discretion in their interpretation. Although the magnetic compass is of great assistance too much reliance must not be placed upon it; one must understand its vagaries, its changes in declination over short distances, its response to local attraction, and the influence which magnetic disturbances may have upon it. The force of the wind, often complicated by cross currents, must be reckoned with, its general direction and velocity may vary greatly in a single flight, and drift must always be allowed for in laying off flight courses.

The aerial navigator must have quick and unflinching judgment for an hour the plane covers a distance which would require several days traced by canoe.

A most disconcerting condition occurs when, in the midst of a flight, clouds intervene below the plane and blot out the landscape. Photographs are then suspended and the plane piloted back to its base. The navigator is then faced with the task of returning another day and picking up the exact point at which he left off so that the work may be properly carried on.

DETERMINING THE DISTANCES OF STARS

PROCESS OF TRIANGULATION USED IN THIS WORK.

Dominion Astrophysical Observatory at Victoria, B.C., Co-operates With Other Stations.

That the stars differ in their apparent brightness is self-evident. A thoughtful person might surmise that this is due either to a difference in their light-giving powers or to their being situated at different distances from us. As a matter of fact both are contributory causes and it is only when we know the distance of a particular star that we can have an idea of its real luminosity.

The distances of the nearer stars are determined by a process of triangulation somewhat similar to that which the surveyor uses to obtain the distance of an inaccessible mountain peak. Naturally, the base line must be enormously longer than any used upon the earth and the one that best serves the purpose is the diameter of the earth's orbit about the sun. The small relative shiftings in the positions of the stars as photographed from each end of this 186,000,000-mile base give us data from which to compute their distances.

Through the co-operation of half a dozen observatories in Europe and America the distances of several hundred of the nearer stars had been determined by this triangulation method before the war and this number has been materially increased since. Knowing, then, their distances and their apparent brightnesses, their real or absolute luminosities are easily computed. It has been found that there is a great disparity amongst them, probably a million-fold being not an extreme ratio. Our own star, the sun, while 100 times brighter than some that are reached by our telescopes, is nevertheless outshone 10,000 fold by others which are designated "giant" stars.

Predict the Luminosity.

An examination of the spectra or analyzed light of these stars of different real luminosities revealed peculiarities by which it was possible to reverse the process and predict the corresponding real brightness. That is to say, if we were to secure the spectrum of a star the distance and real brightness of which was unknown we could, from these tell-tale peculiarities, determine the absolute brightness of that particular star. It is then a simple calculation to find out how far away a star of such known brightness must be to appear of the brightness we see it in the sky.

Where Christmas of 1927 Has Been Reached Already

There is a factory in Bradford, England, where they have already reached Christmas—not Christmas 1926, but Christmas 1927.

The mystery is explained by the fact that the factory in question is devoted to the manufacture of Christmas cards. It maintains a staff of 200 or so in a constant atmosphere of peace on earth and good will to men from January 1 to December 31. The Christmas card output for the coming season was completed during midsummer when Bradford was experiencing well above 80 in the shade, and since then the factory has been at work on greetings for Christmas, 1927.

The yearly output verges on five million cards, quite an appreciable proportion of which are shipped to Canada, New Zealand and Australia.

The Deter Anatomy Class.

"That medical student is more often found at the dancing class than the anatomy class, I hear."

"He says he gets better anatomy at the dance."

RHEUMATIC PAIN AND THIN BLOOD

Liniments of No Avail — The Trouble Must be Treated Through the Blood.

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thick and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears. There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these is Mr. Robt. A. Smith, Mersey Point, N.S., who says: "Some years ago I was attacked with rheumatism, which grew so bad that I could not walk and had to go to bed under the doctor's care. It is needless to say that I underwent a great deal of suffering. The doctor's medicine did not seem to reach the trouble, so when I was advised to try Dr. Williams' Pink Pills I did so, and after taking them for some weeks I was able to get out of bed. I continued the pills and was soon able to work, and I have not been troubled with rheumatism since. In other respects also I derived a great deal of benefit from these pills and I think them a wonderful remedy."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

My Mother.

Your fourscore years I contemplate With only one regret. It is that thirty of them passed Before we even met.

Then comes a devastating thought I hate to dwell upon. I had known you all your life I could not be your son.

And still that envied score and ten Can never cause me tears, Far am I not most blessed of men, O mother of fifty years.

—Clarence Hoyt Holmes.

Homeward Bound For Christmas

Old hearts will beat more quickly; old eyes will shine with happiness when YOU go home. And what a joy it will be for you, too, visiting the scenes of childhood days and meeting friends of other years!

Make arrangements now to go home this Christmas on a liner of the Cunard or Anchor-Donaldson Canadian Service. The voyage will be an unforgettable pleasure. The ship's comfortable appointments and the courteous, intelligent interest taken by every member of the staff in your well-being make your journey a real joy.

Christmas Sailings from Halifax
ANTONIA — Dec. 13 to Plymouth, Cherbourg and London.
*LETITIA — Dec. 12 to Belfast, Liverpool and Glasgow.

*Dec. 11 from St. John N.B.

Canada Leads Empire in Silver Production.

Canada has held the premier place within the Empire as the greatest producer of silver for the past two decades. During the last few years Canada has been the third largest producing country in the world, being outranked only by Mexico and the United States. Last year (1925) third place was captured by Peru, whose production exceeded that of Canada by slightly over one and a half million ounces.

The principal producing areas in Canada are, in order of their importance, Ontario, British Columbia, and Yukon. Silver ores have also been found in other parts of the Dominion, but the total production from these areas has been small. The total recorded production to the end of 1925 is 493 million fine ounces, last year's output being slightly in excess of 20 million ounces. The market price of silver fluctuates from day to day; the highest yearly averages were recorded on the London market in 1853 and 1854 at \$1.348, an in 1920 at \$1.346. The lowest price was in 1915 at \$0.519. The total market value placed on Canada's production during the years for which records are available (1857 to 1925), based on average market values from year to year was \$318,826,850. In 1925 the production was valued at \$13,815,742.

The mines of Cobalt, South Lorrain, and Godganda, all in the province of Ontario, are at present Canada's principal silver producers. Ontario's mines have contributed slightly over 363.3 million ounces to the accumulated total of Canada's silver production, of which only 1.8 million ounces were produced prior to 1903, the year of the discovery of the Cobalt area. The average production in Ontario for each of the past four years was 10.7 million ounces. Dividends paid out to the end of 1925 by silver companies operating in northern Ontario amounted to approximately \$92,000,000.

Silver production in British Columbia and in Yukon is obtained from lead-zinc ores. The present rate of production in British Columbia is about 8,500,000 ounces per annum; Yukon production last year was about 905,000 ounces. There appears to be every reason to believe that the present rate of production of silver in Canada will be maintained for some years to come. The decline in production in Cobalt has been more than compensated by new discoveries and increased production from South Lorrain and Godganda, and there has also been an increase in the production from British Columbia.

Diabetes.

Once upon a time we saw a poster which read: "Why is food important? Because we are food on legs!" We hope we are more than just that, but the subject of food must give us pause, although it is rather too much to say "Tell me what you eat and I will tell you what you are," yet any one in any part of the country to-day will tell you that if you eat too much sugar and starchy foods it will doubtless bring on diabetes. That is exactly what happens when the body is not able to properly take care of the sugar and starch contained in the food we eat.

What are we eating? "We are eating more cereal products than any of our ancestors ever ate in the past, except perhaps the ancient Egyptians, who were the grain-eaters of antiquity."

"We are eating much more sugar than any one in the world ever ate before. One hundred years ago the average consumption of sugar per person was about eleven (11) pounds in a year; to-day it is one hundred (100) pounds!" During the war we ate less sugar—diabetes was reduced; after the war we increased our sugar and diabetes increased.

The main cause of diabetes is wrong food—too many sweets and starchy foods. No sugar in tea and coffee, no candy, no pastry, no iced cakes, none but milk puddings, no cereals—are some of the "don'ts" for those who have a tendency to diabetes; use simple foods: milk, eggs, lean meat and fish, fruits and vegetables, bran muffins or brown bread. This is the best preventive—proper diet.

Niece, known as the father of photography, made his first camera from a cigar-box and lenses borrowed from his grandfather's solar microscope.

Clocks that don't run aren't much use, except on a pair of stockings.

THE MELTING POT IN THE WEST

Pick where you will in this group and you will have difficulty in saying which of these girls comes of Russian, British or original Canadian stock. They are typical of the Prairie Provinces where all the nations of Europe come in and settle on the land. And when the next generation rises from the effort and struggle of the first settlers, they are all of them pure Canadian. Their outlook, their appearance, their speech are good British; the land

Morning Hymn.

Ye mistis and exhalations, that now rise From hill or steaming lake, dusky or gray, Till the sun paint your fleecy skirts with gold, In honor to the world's great Author rise; Whether to deck with clouds the uncolored sky, Or wet the thirsty earth with falling showers, Rising or falling, still advance his praise. His praise, ye winds that from four quarters blow, Breathe soft or loud; and wave your tops, ye pines, With every plant, in sign of worship wave.

Fountains, and ye that warble, as ye flow, Melodious murmurs, warbling tune his praise

That singing up to heaven-gate ascend, Bear on your wings and in your notes his praise. Ye that in waters glide, and ye that walk The earth, and stately tread, or lowly creep, Witness if I be silent, morn or even, To hill or valley, fountain or fresh shade, Made vocal by my song, and taught his praise.

—Milton, "Paradise Lost."

Just a Suggestion.
"Jack broke his engagement with me to-night. He said his knee is hurting him."
"Well, why don't you try some other fellow's knee?"

Blind Watchmakers.

Blind people—those who have been born blind—are exceedingly clever with their fingers, but it is not often that we hear of a watchmaker who was born blind. And yet there have been instances of the kind.

A famous blind watchmaker lived at Holbeach, in Lincolnshire. His name was Ripplin, and, although completely blind, he could take to pieces and put together again watches of the most delicate construction with the greatest ease, and in quicker time than most watchmakers who have the advantage of good eyesight.

On one occasion some of the tiny wheels and screws used in his trade were stolen from him, but the thief was captured with the property on his person, and Ripplin identified them by touch.

A Barnstable watch and clock maker brought up his blind son to his trade, and on more than one occasion he detected faults in timepieces which other tradesmen had failed to discover.

Candidates for marriage are now stamped in Turkey. Each person desiring a marriage licence must undergo a medical examination, and to prevent any transfer of the permit the arm of the applicant is stamped with a number corresponding to that on the permit.

Physicians Use Minard's Liniment.

BABY'S OWN TABLETS ARE OF GREAT VALUE

To All Mothers Having Young Children in the Home.

No other medicine is of such aid to mothers of young children as is Baby's Own Tablets. The Tablets are the very best medicine a mother can give her little ones during the dreaded teething time because they regulate the stomach and bowels and thus drive out constipation and indigestion; prevent colic and diarrhoea and break up colds and simple fevers.

Concerning Baby's Own Tablets, Mrs. John A. Patterson, Scotch Village, N.S., says:—"I have six children, and all the medicine they ever get is Baby's Own Tablets. I would use nothing else for them and can strongly recommend the Tablets to all other mothers."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Talc and Soapstone Production Higher.

According to statistics issued by the Dominion Bureau of Statistics, there was an appreciable advance in the production of talc and soapstone in Canada during 1925. Shipments totaled 14,474 tons valued at \$205,835 in 1925 as against 11,332 tons at \$154,480 in 1924.

The Ontario production of talc was obtained from deposits in Hastings County. Practically all of the Quebec shipments consisted of soapstone blocks for use in lining the alkali recovery furnaces of sulphate (kraft) pulp mills. A small tonnage of ground talc was shipped from a deposit at Wolf Creek, Victoria Mining Division, British Columbia.

After Shaving—Minard's Liniment.

Pitt's Love Letters.
The love letters of William Pitt, the elder, the first Lord Chatham, are soon to be published. Pitt's private correspondence has been almost unknown to the public, though many brilliant epistles and some of historic importance are included. They have been retrieved now from the Pitts manuscripts in the record office, edited by Ethel Ashton Edwards, and are soon to be issued in book form.

We cannot hear a sound if it has less than about thirty or more than 40,000 vibrations a second.

RED ROSE TEA

"is good tea" TEA

Perhaps you use good tea. We think Red Rose extra good.

Health Partnership and the Individual's Responsibility.

Industrial Hygiene means promotion of the health of industrial workers. This necessitates the most practical co-operation between the two great groups concerned, the employers, who are responsible for health conditions in the plant, and the employees, who are responsible for health conditions in the home, and, more important still, for their own private health habits. The benefits to health resulting from good working conditions (such as adequate light, ventilation and temperature and facilities for nourishment and cleanliness) are enormously minimized if not entirely counteracted unless the individual employee is a partner in the health campaign, is convinced of the importance of such factors, and tries to obtain them in his home. Health can not be imposed on anyone; to some extent each man must be a self-starter.

Broadly speaking the health factors which are the individual's private responsibility are housing or rooming arrangements, food, sleep and personal hygiene. The importance of these things cannot be over emphasized—if bad, they can shatter the strongest physique; if good, they can conserve and strengthen the most delicate. The problem is similar for men and women but most difficult for women who are apt to be hampered by small means. It is for this reason that the Department of Health brought out the well-known book on the subject—"Health Confessions of Business Women," a book by business women themselves for business women, covering all the personal factors which bear on health. It may be had on application to the Division of Industrial Hygiene, Ontario Department of Health, Spadina House, Toronto. Over 12,000 have already been requisitioned, but a limited supply is still available.

How Much Do You Spend in Heating Your Attic?

In cheaply built houses the attic floor is frequently omitted. It is a proven fact that warm air will pass through a plastered ceiling almost as readily as through a register, and many cold houses have been made warm with the same or even a less amount of fuel by laying a floor of matched boards in the attic. Cases have been reported where the cost of doing this has been met in a single season by the saving in coal.

Roof insulation is the answer to the problem.

PAINS ALL OVER BODY

Two More Cases of Feminine Illness Relieved by Lydia E. Pinkham's Vegetable Compound

Barrington, N. S.—"I had terrible feelings, headaches, back and side aches and pains all over my body. I would have to go to bed every month and nothing would do me good. My husband and my father did my work for me as I have two children and we have quite a big place. I read in the paper about Lydia E. Pinkham's Vegetable Compound, and then got a little book about it through the mail, and my husband sent to Eaton's and got me a bottle, and then we got more from the store. I am feeling fine now and do all my work and am able to go out around more. I tell my friends it is Lydia E. Pinkham's Vegetable Compound that makes me feel so well."—Mrs. VICTOR RICHARDSON, Barrington, Nova Scotia.

Dull Pains in Back

St. Thomas, Ont.—"I took four bottles of Lydia E. Pinkham's Vegetable Compound and found great relief from the dull, heavy pains in the small of my back and the weakness from which I suffered for five years after my boy was born. After taking the Vegetable Compound and using Lydia E. Pinkham's Sensitive Wash I am feeling better than I have for the past seven years, and advise my friends to take it."—Mrs F. JOHNSON, 49 Moore Street, St. Thomas, Ont. 6

CUTICURA HEALS ITCHY ECZEMA

Started With a Rash, Then Broke Out in Blisters, Lost Sleep.

"My daughter suffered with eczema for about a month. It started first with a rash and then broke out in blisters. It itched and burned a great deal, and she lost considerable sleep at night on account of it. We began using Cuticura Soap and Ointment and after a few applications the itching and burning sensation stopped. We continued the treatment and in two weeks she was completely healed." (Signed) Mrs. Peter MacDonald, R. R. 1, Proton S.A., Ont., Sept. 29, 1925.

Make Cuticura Soap and Ointment your every-day toilet preparations and have a clear, sweet skin, soft, smooth hands, and a healthy scalp with good hair. Cuticura Talcum is unexcelled in purity.

Sample Each Free by Mail. Address: Canadian Dispensary, Ltd., Montreal, P. Q. Cuticura Soap 25c. Cuticura Shaving Stick 25c.

THE LATE FREDERICK GREIN

The last call of death came to the home of Mr. Frederick Grein of Normanby on Thursday, Oct. 21, summoning the head of the house in the prime of life, aged 52 years, 9 mos., and 14 days. Shocking indeed was the news, and much sympathy is being tendered the bereaved widow and family. His illness was of a short duration. On the previous Thursday he complained and upon consultation with his physician, decided to be operated upon the following morning. The operation showed the appendix to be punctured, apparently for some time; peritonitis had set in and caused much suffering until he passed peacefully away. Deceased was one of Normanby's well-to-do farmers and a highly respected citizen. He was a son of the late Henry Grein, who predeceased him three years ago, and was born on lot 11, con. 9. In 1894 he married Emma Feick, and this union was blessed with a family of six, viz., Erwin in Alfeldt, Mrs. Ezra Gerhardt, Mrs. Carl Bender, Mrs. David Widmeyer, George and David at home. Besides the family, he is survived by a sister, Mrs. And. Schenk, and two brothers, Valentine and Jacob, all of Normanby, also -10 grandchildren. The funeral on Saturday, the 23rd, was largely attended there being 132 cars in the cortege, among them being friends and relatives from a distance. His pastor, Rev. J. Langholz, conducted the services. Interment took place in the union cemetery at Ayton.

ATTEMPT TO ROB BANK AT PALMERSTON FAILS

Burglars raided the Palmerston branch of the Bank of Commerce, and although entrance to the bank was successfully made, no cash was secured. Local and provincial police quickly had their dragnets out for the bandits, who, by the nature of their work, it is presumed are amateurs, but up to date no arrests have been made.

Entrance to the bank was gained by removing door fasteners and forcing a way into the building, but the attempt to secure money or other valuables was a complete failure. The bank has a modern system of burglar alarms.

The burglars escaped, apparently leaving no clue to their identity.

Style hint: Divorce suits should be kept dark.

Wit and Humor

Both Satisfied

The old fellow with a wheelbarrow wouldn't get out of the way, and the taxi-man shouted: "You ought to be wheeling a pram!"

"And you ought to be in it," replied the old man.

.....

"When did the robbery occur?" asked the cross-examining barrister. "I think—" began the witness. "We don't care what you think—we want to know what you know," said the barrister.

"Well, I may as well get out of the box, then," said the witness. "I can't talk without thinking, I'm not a lawyer."

.....

One mother who considers the Marcel wave as the most fashionable way of dressing the hair, was at work on the job.

Her little eight-year-old girl was crouched on her father's lap, watching her mother. Every once in a while the little fingers would slide over the smooth and glossy pate which is her father's.

"No waves for you, Father," remarked the little one, "you're all beach!"

.....

In a remote country village a new letterbox had been put up. This caused much comment among the village children who gathered round to discuss what it could be.

"I think it belongs to the doctor or the squire," said Billy Jones.

"Can't you see it's by the church, so it must be the rector's" remarked another lad.

"Get out!" said another boy, the smartest one of the crowd, "it ain't the rector's—read what it says on it, 'No collection on Sunday.'"

.....

An American writer foresees the time when women will not longer wear skirts. At any rate it is universally believed that they will wear them no longer.

.....

A Scotchman and a Jew were playing a golf match. Each had one hundred strokes to his credit at the end of seventeen holes. On the eighteenth the Sheeny took a paralytic stroke and the Scotchman made him count it.

.....

About all some men have left of their early training is a hymn or two left to whistle.

A Poor Outlook

Two Hebrews, father and son, went to Edinburgh with a view to locating in business. While walking up one of the principal business streets, their attention was drawn to a farmer who drove up to the curb, got out and took the bridle off the horse preparatory to feeding the animal its noonday meal. After carefully attaching the feed-bag to the horse's head he went to the back of the wagon and took a chicken from a small coop. The chicken had a string tied to its leg. This was attached to the foreleg of the horse so that the chicken could eat the oats that were spilled out of the bag.

"They," commented the elder visitor, "dis is no place for us to do business."

.....

Rector (going his rounds)—Fine pig that, Mr. Dibbles; uncommonly fine!

Contemplative Villager—"Ah, yes, sir, if we was only all of us as fit to die as him sir!"

Johnny Is Wise

Young Johnny was watching his aunt comb her tresses. "What makes your hair stand up like that?" he asked.

"That's electricity, Johnny," he was told.

"Gee, ain't we got a wonderful family," Johnny declared. "Auntie has electricity in her hair, and Grandma has gas on her stomach!"

A man on his first sea voyage experienced the usual symptoms. His companions came down to his cabin and invited him to come up on deck to see the passing ship.

"Don't bother me again," said the victim, "until you see a tree pass."

.....

One member of a fishing party was an Irishman who disagreed very badly with the sea.

"It's all right, old man," said another member of the party; "you're not dead yet."

"True," moaned the sufferer, "but it's only the hope of dying that keeps me alive."

A Joke

Jerome Potter, the Coney Island beach censor, said in an interview: "They allow too much license on some of these swell beaches like Newport. There's a story about a gang of Newport swells that were rehearsing for an amateur show, and the stage manager said to the leading lady:

"I don't like this bathing suit you've put on for our third act crisis I think you'd better change it."

"Why," said the leading lady, "you must be crazy, man. This bathing suit is the very latest thing. A Paris importation. Nothing else is to be seen at Deauville."

"Well and good," said the stage manager, "but in the third act crisis, you'll remember, your husband says to you, 'Alas, alas, you are hiding something from me,' and that bathing suit would make his speech sound a joke."

.....

Miss Ascum—I've often wondered, Mr. Rymes, why you poets always speak of the moon as 'silver'.

Mr. Rymes—Well—er—I suppose it's because of the quarters and halves.

.....

Willie—I guess my dad must have been a pretty bad boy."

Tommie—What makes you think that?

Willie—Because he knows exactly what questions to ask me when he wants to know what I have been doing.

.....

A policeman met a small boy in the streets at one a.m.

"What would your father say if he saw you here at this hour?" asked the policeman.

"He would say: 'Don't tell your mother.'"

JAW BONE IS SMASHED BY KICK FROM HORSE

James Young, a well-known Greenock farmer, had his jaw bone fractured in four places and was otherwise badly injured in an accident at his home on the Chepstow road, shortly before noon to-day. He was unable to tell what happened, but from the nature of his injuries it is supposed he was kicked by a horse. He was in the barn at the time the accident occurred, but managed to make his way to the house before he collapsed. He was removed to Hamilton Hospital.

It is just a week ago that his brother, John Young, was seriously injured on his farm in Bruce Township in much the same manner when he was trampled by a horse in a stable.

"RHSSy7. yzmy,C,i,Ty dmNsmwm"

PASSED AWAY AT CHEPSTOWE

Cargill, Nov. 7—Joseph M. Graff, a well-known resident of this district, passed away at his home at Chepstow this morning following a lingering illness, aged 70. Deceased was born at Wellesley, and came with his parents to Bruce County in 1861, his family settling in Greenock Township. He conducted a sawmill and chopping mill at Chepstow for over 20 years. He was a life-long Conservative in politics and a Roman Catholic in religion.

In 1893 he was married to Mary Hauck of Carrick, who survives, together with a family of two sons and three daughters, namely, Alexander, of Young, Sask.; Frank of Walkerton; Mrs. George Weber, of Young, Sask.; Mrs. George Lippert of Chepstow, and Miss Mary Graff, at home. The funeral was held on Tuesday morning with interment in Chepstow Cemetery.

FINDERS ARE NOT ALWAYS KEEPERS ACCORDING TO LAW

Last June a leather club bag was found on a road in Elma township. There was a tag bearing the owner's name attached to the bag, but the finder did not return the bag to the owner, nor did he advertise the find. Instead, he kept the club bag and divided the contents with another party.

County Constable Wilson was put on the case and this week he was successful in clearing up the case and brought the culprits before

NO RIGHT TO KILL

LAKELET

Lots of turnips in the fields, and the weather such that it is impossible to house them. We may have some nice ones when it falls after this young snow storm.

Chas. Hubbard is now a full-legged member of our burg. He missed his family and effects here on Monday, when some half dozen of his neighbors assisted. They are occupying the home of the late George Horton. Bert Horton moved from this house to Clifford last week. Ed. Horton purposes moving this week to the farm on the 12th, vacated by Chas. Hubbard.

We hear the dredge will get started to work tomorrow, Wednesday, and then the crowds will be heading for the swamp to see it operate. It is a massive looking piece of machinery and must have an enormous power. Jack Heinbecker has the contract of clearing the way for the dredge till it reaches the Blind Lake. The amount to be cleared is equivalent to about seven acres, being four rods wide, and the contract price is \$250. Jack and a couple of his assistants are at work now, and he will have to keep moving to keep ahead of the dredge. The road is supposed to be closed to traffic, but the most of the cars still go through as they slip past the side of the barricade and take chances.

Adam Hutchison, of Fordwich, tax collector for the east division of Howick, was round the other day distributing the tax bills. Taxes in Howick are about the same as they were last year, and of course they are high enough. Taxes are payable at Fordwich this year, and not at Clifford. Mr. Hutchison will be in Lakelet some time this month when those at this north end can come hence and pay their honest debt.

MAN KILLED NEAR DURHAM

John Highley, of Toronto, is dead, and his wife lies in Durham Hospital at the point of death as the result of an automobile in which they were riding being hit by the west-bound Canadian Pacific freight train near McWilliams station at 2.20 last Monday afternoon. The accident is easily the most tragic that has ever occurred in this section of the province and is the first auto fatality of its kind, we believe, to occur on the Walkerton-Saugeen branch.

Mr. and Mrs. Highley came up from Toronto to visit the latter's brother, Mr. Thos. J. Morre, who lives only a few yards east of McWilliams station.

While threshing operations were going on at the Moore farm, Mr. and Mrs. Highley volunteered to go to town to secure more groceries. Their car was a Ford touring and, a cold

west wind blowing at the time, they stopped at the gate to adjust the sides of the car before proceeding. The car had evidently not much more than reached the track, as an investigation after the accident disclosed the probability that the pilot had struck the machine at the back of the engine, hurled it around and dragged it down the track a distance of 100 feet or more. Mrs. Highley was thrown out by the impact, but Mr. Highley was carried about 20 feet before thrown clear of the car. Both were thrown into the water in the ditch alongside the track, Mr. Highley being rendered unconscious.

The car was completely demolished having been dragged a considerable distance and badly smashed when it was dragged along the roadbed and crushed against the station platform. Eyewitness, including the train crew, say they never saw an automobile more completely demolished, and it is remarkable that either of the occupants escaped being killed instantly.

The train was in charge of Conductor Robert Campbell and Engineer Moore of Walkerton. The engineer knew nothing of the accident until he heard the crash, as he had blown the whistle and was watching the public crossing a few yards farther east, as the train had on several occasions been compelled to slow down to escape hitting cattle at this point. When he heard the crash he knew something was wrong and brought the train to a stop in a comparatively few yards.

The injured was placed in the caboose and rushed to Durham where conveyances were on hand to convey them to the hospital. From the time of the accident until both patients were in the hospital only 35 minutes had elapsed.

At first it was thought that Mr. Highley's back was broken, but a subsequent examination by Drs. D. B. Jamieson and Bell showed he had a badly fractured leg, was cut about the head and had three ribs broken. For a time it was thought he had a chance to recover, but he passed away about 9.30 Tuesday morning. Mrs. Highley had two ribs broken as well as several cuts about the body. These are not regarded as serious, owing to the shock and a weak heart it is not thought she has not much chance of recovery.

WOMEN BALK AT WEARING FLANNELS

It's difficult to blush nowadays but the very mention of "red flannels" brings forth a blush which causes vermilion to look a faded pink.

Shivers may come and shivers may go but the flannel undergarment remains a hideous relic of the bygone days. The warmth of these old-timers is replaced strategically by various subtle means. Milady forsakes her chiffon step-ins and steps into bloomers of silk crepe or satin. Perhaps she adds to her shivering torso a vest of silk jersey and a costume slip of satin or heavy crepe de chene. She may even go so far as to cease stocking rilling and to cover her knees with silk knickers fastidiously matching her frock. She might also add an ostrich rosette to her garter.

Women refuse to be unbeatable even in undergarments, and it seems that they are just about as healthy as when they disfigured themselves with union suits and layers of flannel petticoats.

Sports satin is a material that is well liked for costume slips for reasons of its warmth and because it falls straight, hewing to the lines of the fashionable slender figure.

Bloomers or knickers of silk are preferred during the cold weather to step-ins and envelope chemises. If one keeps the body warm the extremities seem to take care of themselves.

For sufferers of chilly ankles we suggest the silk ankle gaiters which come in flesh color and can be worn under the stockings without being detected.

Corsets and girdles do much toward keeping one warm and many

1926 Christmas Seals

The 1926 Christmas Seals, in aid of the Muskoka and Toronto Hospitals for Consumptives, have just been issued. These handsome seals, of different designs, are put up in assorted packets of 10, 25, 50 and 100.

The National Sanitarium Association is in need of funds to carry on the work of its hospitals in Muskoka and at Weston. Every dollar received through the sale of Christmas Seals is used for maintenance of patients there.

Why not buy these seals in lieu of others? Not only will you get good value in return, but your money will be made to serve a greater end, for it will go to help someone in distress. Look for the double-barred Red Cross on every packet. None others are genuine.

For sale by school children and banks, or direct from Xmas Seal Department, Gage Institute, Toronto 2, Ontario.

\$5000 CASH PRIZES!

Can You Find the Twins?

No, they are not all twins! Two and only two are identical, and are the twins you are asked to find. Can you? To be sure, the 18 pictures all look alike; but look closer. How about their hats? There are other differences, too. Read the clues. Only two girls are exact duplicates. They are Twins—can you find them?

CLUES

At first glance all of the pictures look alike. But upon examination you will see that almost every one differs in some way from all the others. In some the difference may be in the light or dark band on the brim of the hat or in the brimming on the hat or the collar. Or, some may wear necklaces, or ear-rings, or both. Only two are exactly alike. No, it's not as easy as it looks. You must search carefully.

Just look closely—make sure that you have the twins, then send in your answer. Somebody who finds the right twins is going to win a big prize. Make that "somebody" be YOU.

First Prize \$2,000.00

MAXIMUM AWARD

This is one of the greatest arrays of Cash Prizes that has ever been offered in a Mail and Empire Puzzle Contest. That's what it is, folks—and you can be a winner. The prizes range from \$2 to \$50 and from \$50 to \$2,000. All prizes will be awarded in time to reach the winners by Christmas Day.

Think of it! You can win as much as \$2,000. Yes, sir, \$5,000 in cash prizes may be won in this interesting puzzle contest, and will be awarded promptly after December 11th. There will be 50 winners and the First Prize, the golden opportunity, \$2,000 IN CASH. Won't that be a wonderful Christmas Gift? In the event of ties for any prize, duplicate prizes will be awarded.

1,000 points win First Prize. We will give you 950 points for finding the Twins. Immediately upon receipt of your correct answer, we will send you particulars of a word-building contest, in which, if successful, you earn the final 50 points required to win a \$2,000.00 First Prize or one of the 49 other Cash Prizes.

MAIL YOUR ANSWER TO-DAY

Now, find the Twins. Write the numbers in the coupon below, fill in your name and address, and mail it to the Puzzle Manager. Get started for the Big First Prize.

Puzzle Mgr., Room 207, THE MAIL AND EMPIRE, Toronto, Canada

50 CASH PRIZES

Listed below are the maximum prizes you can win.

1st Prize	\$2,000
2nd Prize	\$1,000
3rd Prize	\$500
4th Prize	\$200
5th Prize	\$200

Each of the 109 Years

of its business life has added to the Bank of Montreal strength and capacity for financial service.

On the 3rd of November, 1817, the Bank established its first office.

At this, the beginning of its 110th business year, the Bank, through the medium of over 600 offices located throughout Canada and Newfoundland, in Great Britain, France, the United States and Mexico, offers unexcelled facilities in all departments of domestic and foreign banking.

BANK OF MONTREAL

Total Assets in excess of \$750,000,000

into the halls. The citizens in general are very indignant over this dastardly trick, and think it about time the authorities took steps to have the culprits punished. No one would deny young folks having a good time on Hallowe'en night, but going as far as breaking into and daubing public property, the line should be drawn and punishment meted out to the guilty ones.

TWO WEEKS AFTER CHRISTMAS

You wake up bright and early Christmas morning. You open the stockings. Christmas presents on Christmas morning are the most

wonderful, beautiful things in the world. Under the soft light of Christmas candles, every present looks like a priceless treasure.

On the day after Christmas, you begin to look at your presents more carefully. It is easier to decide which ones you like best.

One week after Christmas your preferences are very definite. Two weeks after Christmas, you have to stop and think a minute to remember what some of your friends gave you.

Why not give your friends a present that they cannot forget, and would not if they could? The Youths Companion comes once every week—fifty-two times in a year. For \$2.00

what present could you possibly buy that would be more useful, more used and better appreciated?

Just send your order to the address below and Santa Claus will take care of delivering the Companion to your home or to the home of a friend. Subscribers will receive:

1. The Youth's Companion—52 issues in 1927, and
2. The remaining issues of 1926. All for only \$2.
3. Or include McCall's Magazine the monthly authority on fashions. Both publications, only \$2.50.

FARM FOR SALE

150 acres in Township of Minto, one mile from Harriston, within walking distance of High School. Soil in first class state of cultivation. Good eight roomed brick house, large bank barn with stabling for 50 head of cattle, and water system installed. Pig pen, hen house and garage. One of the most desirable farms in this section. Good reasons for selling. Apply to owner, S. S. McKee, R. R. 1, Harriston.

MCINTOSH

The Mission Band held their annual Thanksgiving Entertainment on Friday, Nov. 5. The children of the Band are certainly to be commended for the excellent programme, consisting of exercises, songs, dialogues and recitations, revealed so very clearly that the Harvest was great, but the Labourers few and the earnestness on the part of the members showed that they still will carry on to further the interests of the Kingdom.

There is one vice that some young men seem to avoid—ad-vice.

Grits will be voting Tory and Tor-ic will be voting Grit in the coming election, we are told. In which case we shall expect to see a lot of hide-bound old Tory and Grit fathers rising out of their graves at such disloyalty on the part of their sons.

Clancy—Mrs. Murphy, yure son Mike has just fell off th' scaffolding and kilt himself.

Mrs. Murphy—Merciful hivins! Clancy—Aisy now! 'Tis only his leg that's bruk, an' it's glad ye will be to hear it whin ye thought he was killed entirely.

On the Same Scale

Pears, peaches and grapes all looked so luscious that the country visitor to London stood bewildered in the West End fruit shop. The assistant came up with a bland smile.

"I'll take two pears, please," said the customer. Then, as the little parcel was handed to him, he asked: "How much?"

"Half-a-crown, sir," said the assistant.

The customer bore the shock bravely. He fished out a two-shilling piece and a shilling.

"Keep the sixpence, too," he said coolly. "I took a grape while you weren't looking!"

Helwig Bros. Weekly Store News

GENERAL MERCHANTS

PROCEEDINGS OF LIBERAL-PROGRESSIVE MEETING

Held at Paisley, November 6th, 1926

Chairman—J. Shoemaker.

Sec'y.—H. A. McGillivray.

Moved by Mr. Gideon Kastner, Warton, seconded by Mr. J. H. Reid, Huron Township, to proceed to select a candidate for North and South Bruce. In the event of this meeting not being able to select a candidate, it to be left to the decision of Mr. Sam Carter, as representing Hon. Sinclair, Raney and the Prohibition Union and that this meeting abide by the decision of Mr. Carter.—Carried Unanimously.

Delegates meet to decide on candidates.

Delegate report on meeting.

Mr. James Johnston reports neither candidates dropping out.

Mr. Carter gives his decision, naming Mr. A. P. Mewhinney for North Bruce and Mr. M. A. McCallum for South Bruce as candidates.

Moved by James Johnston, seconded by George B. Armstrong that Wm. McDonald, Chesley, and Mr. Wm. Hopper, Paisley, be a committee to arrange for expenses incurred by candidates dropping out.—Carried.

Moved by James Johnson, seconded by Roy Avery that minutes of meeting be adopted as read.—Carried.

Moved by Mr. Reid, seconded by Mr. Armstrong that this meeting adjourn.—Carried.

Average 30. No. on roll 32.

F. G. Kehoe, teacher.

Although most of their business is done in Toronto, Gunn's Limited moved their head office to Harriston and thus escaped income tax on an assessment of \$100,000. At court of revision, Toronto attempted to have the income tax stand, but the Judge ruled that the company had legally removed to Harriston.

The Sesqui-Centennial Exposition at Philadelphia, commemorating 150 years of American independence, has proved a huge failure. Only five million people have attended, whereas over 25,000,000 were expected. There is a loss of five million dollars which the people of Philadelphia will have to provide for, as well as the heavy losses by exhibitors and the millions invested in buildings. The Canadian National at Toronto seems to be the only big exposition that can be made a success nowadays.

Whether it presages a hard winter or not, both the caribou and the wolves are coming farther south this fall than ever before, and hunters in Northern Ontario and Quebec are bagging specimens of both of these animals in places where they have previously not been seen. This information was brought back from Northern Ontario and Quebec by E. G. Poole, fish and game representa-

tion of the C.N.R., who has just returned from an inspection of the hunting areas along the transcontinental line of the Canadian National. One explanation of the wolves' journey southward may lie in the shortage of rabbits, partridge and other small game in the north. This is apparently one of the "lean years" for rabbits in the north, and the wolves are consequently driven southward in search of their food.

A hen is the only institution that delivers a breakfast food in a natural sanitary wrapper.

The Board of Conciliation appointed to investigate the demands of the railway employees brought out a report recommending that there be no increase in wages of 15,000 conductors, trainmen and yardmen of the Canadian Pacific and Canadian National Railways.

Little Girls' Game Causes Heartache To Lonely Mother

Two little girls sit at a window playing a game. They make believe that every woman they see coming up the street is mamma coming home to them. They shut their eyes until she gets almost to the door and then open them hoping it is really the one they long to see. They firmly believe that some day their wonderful dreams will come true. Mother knows of this game, and she is doing her best to make it come out right; but just at this time she is having no small struggle to stay on this earth at all. She is taking the cure at the Muskoka Hospital, but had allowed herself to become so greatly run down that there isn't much left of her for the kindly nurses and doctors to build upon. The wonderful quiet of the great hospital, and the care she is getting, are nothing to her worried mind and body. Some day she hopes to be with her little daughters again. Contributions may be sent to Hon. W. A. Charlton, President, 222 College Street, Toronto 2, Ontario.
